There is a debt (the loan from the US bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (Ali’s wife, in March 2013).

The oil painting which derives, in part, from A’s relevant foreign earnings, is used outside the UK in respect of this relevant debt.

There is a taxable remittance in 2013-14, the tax year in which the painting is used to pay the relevant debt.”

More analytically, remittance condition B is satisfied under s.809L(3)(d): the picture (which derives from RFE) is used in respect of the relevant debt. The example continues:

“The remittance occurs when the foreign income or gains are regarded as used in respect of the relevant debt (2013-14) not when the property is first used in the UK by a relevant person (2012-13). ...

Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.”

That was a case where the debt-related asset was given to B. Suppose:

- (1) T borrows money.
- (2) T gives the borrowed money to R (a relevant person in relation to T).
- (3) R uses the money to acquire a UK asset (“R’s UK asset”).

Is T’s debt a relevant debt? T’s debt is a relevant debt if it relates (indirectly) to R’s UK asset. It is suggested that T’s debt relates to R’s UK asset if and only if steps (1) and (2) form an arrangement. If there is no connection of that kind between T’s debt and the R’s asset, the debt does not relate to the asset.<sup>159</sup>

The RDR Manual 33160 provides an example where A borrows and income of B (a relevant person) is used to repay the debt:

Example 7 (Kumar)<sup>160</sup>

K is settlor of a non resident settlor-interested trust.

The trust borrows to buy an asset which K uses in the UK.

The HMRC analysis is as follows:

There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person).

More analytically, the debt is a relevant debt since:

- (1) It relates to the UK asset.
- (2) The asset falls within s.809L(2)(a) for two reasons (either would be sufficient):
  - (a) The asset is used in the UK by a relevant person (K).
  - (b) The asset must have been brought to or received in the UK by the

---

159 Contrast 17.16.16 (Gift on to third party).

160 The example in full (including its irrelevant detail) is as follows:

**“RDRM33160 Condition B - relevant debt [Jan 2019]**

*Example 7*

Kumar sets up and is a beneficiary of a non resident trust with £1,000,000 capital which the trustees invest in overseas property which produces income that would be chargeable on Kumar if he remitted it to the UK.

The trust borrows £500,000 from an offshore lender to buy a UK asset which Kumar uses in the UK. The trust pays the interest on the loan with the income from the letting of the overseas property.

There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person). The income used to service the loan is regarded as a taxable remittance, chargeable on Kumar.”

trustees or by K.

Thus if the trustees repay the debt out of foreign trust income (which is deemed to be the income of K, as income of a settlor-interested trust) then K is chargeable under the s.624 remittance basis. If K repays the debt out of K's own income/gains there is also a taxable remittance of that income/gain.

#### 17.20.7 *Borrowing to acquire co shares*

Suppose T borrows and buys all the shares of a company which owns a UK asset ("the Co's asset"). The debt relates to the shares. At first sight it may seem that the debt also relates to the Co's asset. But note that if T uses income to purchase the shares, the income is not remitted. That being the case, it would be anomalous if there were a remittance if T borrows to purchase the shares and then uses income to pay the debt. So the debt should not be regarded as a relevant debt: the debt does not relate to the Co's asset.<sup>161</sup> One does not lightly pierce the corporate veil.

If that were wrong then anyone who borrows to acquire quoted shares would need to investigate whether UK assets were held by the company; that cannot be right.

The above concerns a share *purchase*. Suppose:

- (1) T borrows and *subscribes* for shares in a company.
- (2) The company uses the proceeds of the share subscription to acquire UK assets.

Is the debt a relevant debt? It is suggested that the answer is, yes, if the two steps form part of an arrangement; but not otherwise.

#### 17.20.8 *Borrowing for partnership share*

Suppose:

- (1) T borrows and buys an interest in a partnership or subscribes for partnership capital
- (2) The partnership owns or acquires a UK asset.

It is suggested that the debt does not relate to the UK asset. It relates to the

---

<sup>161</sup> It would be different if there were an arrangement under which (1) the company acquired the property and (2) the individual borrowed to purchase its shares.

partnership share.<sup>162</sup>

### 17.20.9 *Debt for unpaid interest*

Suppose T has two debts:

- (1) A debt for capital borrowed (the principal debt).
- (2) A debt for interest on the principal debt (the interest debt).

The fact that the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) does not make the interest debt a relevant debt. This follows from the repeal of the former s.809L(8) ITA in 2009. However see 17.21.1 (Payment of interest).

### 17.20.10 *Debt charged on UK asset*

Suppose:

- (1) T borrows and receives the borrowed money abroad
- (2) T secures the debt on property brought/received/used in the UK.

It is considered that the debt does not relate to the UK property (within the meaning of the section) so the debt is not a relevant debt. The context shows that the colourless word “relate” is intended to apply to the proceeds of the debt, the borrowed money. Otherwise there would be a remittance when the debt is repaid, which is absurd.

### 17.20.11 *Debt imposed by law*

This section considers debts imposed by law.

A court order on a divorce is not normally a relevant debt (it does not normally relate to property brought received/used in the UK, though it might do so). Indeed the obligation may not be a “debt”. Likewise liabilities arising under a separation agreement. So the relevant debt rule will not normally apply.

Similarly, a fine or penalty does not necessarily relate to property brought/received/used in the UK.

A tax liability on income/gains relates to the income or gains. If so a tax liability on income/gains is not necessarily a relevant debt, but a tax liability on UK income/gains, or on remitted foreign income/gains is a relevant debt.

---

162 See 17.37 (Partnerships). But the position is different if the partnership borrows.

Even if the debt is not a relevant debt, there might be a remittance under ordinary principles when the debt is satisfied.

#### 17.20.12 *Debt relates to property in part*

If a debt relates partly to property brought/received/used in the UK, the entire debt is a relevant debt, the unfairness is avoided by s.809P(10) ITA.<sup>163</sup>

In RDR Manual the facts (stripping out irrelevancies)<sup>164</sup> are as follows:

##### *Example 4 (Karen)*

K borrows:

- to pay for UK school fees, a service provided in the UK to her minor daughter (a relevant person)
  - to pay for a summer school in France, a service provided outside the UK
- K repays the overdraft from her relevant foreign earnings.

The HMRC analysis is:

There is a debt (the overdraft) which relates in part to a service provided in the UK (the schooling) to a relevant person (the daughter) – this part is a relevant debt. However part of the overdraft facility is not a relevant debt because it does not relate to a service provided to the daughter in the UK, but to a service provided in France.

The author has overlooked the definition of relevant debt in s.809L(7) ITA:

In this section “relevant debt” means a debt that relates (*wholly or in part*, and directly or indirectly) to—

- (a) property falling within subsection (2)(a) [property brought/received/used in UK by a relevant person]
- (b) a service falling within subsection (2)(b) [service provided in UK

163 See 17.32.3 (Debt remittances); 17.32.4 (Debt remittance apportionment).

164 The example in full (including its irrelevant detail) is as follows:

**“RDRM33160 Condition B - relevant debt** [Jan 2019]

##### *Example 4*

In August 2011 Karen, a remittance basis user, uses an interest-free [*sic*] overdraft facility on her Jersey bank account to pay UK school fees for her 14 year old daughter Lauren. She also uses the remainder of the facility to pay for Lauren to attend a summer school in France organised by a French university. Karen repays the overdraft from her relevant foreign earnings between August and November 2011. ...”

to a relevant person] ...

HMRC conclude:

The daughter ... has taxable remittances of the relevant foreign earnings used to service and repay the part of the overdraft that is a relevant debt.

More analytically, *K* has a taxable remittance on the basis that:

- (1) Remittance condition A is satisfied: a service is provided in the UK to a relevant person (the daughter)
- (2) Remittance condition B is satisfied: the RFE is used outside the UK in respect of a relevant debt
- (3) The amount remitted is the part of *K*'s RFE used in respect of the part of the debt that is in respect of the UK services (the UK school fees).<sup>165</sup>

The end result is the same; HMRC have taken the wrong route to the right destination.

#### 17.20.13 2008 transitional rules for relevant debt

In the following discussion a “**pre-2008 debt**” is one incurred before 6 April 2008.

Suppose:

- (1) A pre-2008 debt which is not a relevant debt (the debt-related property is kept outside the UK).
- (2) The debt-related property is brought/received/used in the UK by a relevant person after 2008.

The debt becomes a relevant debt at the time the property is brought/received/used in the UK. There is no difference here between a pre-2008 debt and a post-2008 debt.

Suppose:

- (1) A pre-2008 debt
- (2) The debt-related property is brought/received/used in the UK by the borrower *before* 2008.

It is considered that the debt becomes a relevant debt from 2008/09. In this case there is a transitional relief if the pre-2008 debt is a residential loan.<sup>166</sup>

---

165 See 17.32.4 (Debt remittance apportionment).

166 See 17.42 (Transitional loan relief: Pre-2008 loans).

Suppose:

- (1) A pre-2008 debt
- (2) The borrower gives the debt-related property to, say, a spouse.
- (3) The property is brought/received/used in the UK by spouse before 2008.

Is this a relevant debt? It is arguable that the answer is no, on the grounds that the property was not brought/received/used in the UK by a relevant person. The spouse was not a relevant person at the time the property was brought/received/used in the UK, because the wide concept of relevant person did not then exist. This is consistent with the relevant person transitional rule.<sup>167</sup>

The usual 2008 transitional reliefs applies if pre-2008 income/gains are used to repay a relevant debt (wherever incurred).<sup>168</sup>

### 17.21 “Use in respect of” debt

Condition B is satisfied if income/gains are used in respect of a relevant debt.

In the discussion below I sometimes refer simply to a debt, rather than a relevant debt; ie it may be assumed the debt is a relevant debt.

Use “in respect of” a debt requires some nexus between the use and the debt; exactly what that nexus is has been left to the courts to sort out.<sup>169</sup>

The words “directly or indirectly” do not add any clarity. Indeed I am not sure that it is altogether coherent to speak in the abstract of use “directly or indirectly” in respect of a debt, for use indirectly in respect of a debt is use in respect of a debt. The word “indirectly” does show that the drafter did not want the words “in respect of” to be narrowly construed. But (subject to context) the expression always has a wide meaning.<sup>170</sup>

If income/gains are used to pay a debt, this is a taxable remittance under the relevant debt rule: money used to pay a debt is used in respect of the debt.

If a person transfers an asset in satisfaction of a debt, that is a disposal of the asset. If a gain arises on that disposal, that gain is also used in respect

<sup>167</sup> See 17.9 (Relevant person: Pre-2008 income/gain).

<sup>168</sup> See 17.9 (Relevant person: Pre-2008 income/gain); 17.41 (Transitional: pre-2008 property).

<sup>169</sup> See App.2.6.1 (In respect of).

<sup>170</sup> See App.2.6.1 (In respect of).

of the debt.

### 17.21.1 *Payment of interest*

Section 809L(9) ITA provides:

The cases in which property (including income or chargeable gains) is used in respect of a debt include cases where the property is used to pay interest on the debt.

Suppose T has two debts:

- (1) A debt for capital borrowed (the principal debt)
- (2) A debt for interest on the principal debt (the interest-debt)

It is possible that:

- (1) the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) but
- (2) the interest-debt is not a relevant debt.<sup>171</sup>

However if T uses income/gains to pay the interest-debt, the funds are regarded as used in respect of the *principal* debt, and so are regarded as remitted under the relevant debt rule. In other words, it does not matter whether or not the interest-debt is a relevant debt, all that matters is that the principal debt is a relevant debt.

## 17.22 Use as security for debt

### 17.22.1 *Unsecured loan*

It is helpful first to consider the position for unsecured loans. If T borrows without giving security, T's assets are not used in respect of the debt. That is so even if T owns assets (say, RFI) and the lender would not lend had T not owned those assets. The fact that the lender only lends because of the RFI does not entail that the RFI is used in respect of the debt. HMRC agree:<sup>172</sup>

HMRC accepts that there is no remittance where

[1] a loan is unsecured, but

[2] it is clear that it [the loan] is only given because the lender is aware of the various assets the borrower has (some of which will represent

---

171 See 17.20.9 (Debt for unpaid interest).

172 ICAEW TAXREP 52/14.

or be derived from FIG [foreign income or gains]).

Since there is no “contractual matrix” [more analytically, since there is no contract or charge] the lender has no right of recovery against the assets representing or derived from FIG, so the FIG cannot be said to be “used” in connection with a relevant debt, HMRC consider that the legislation will not be engaged.

Although the matter had not been fully considered, HMRC thought that it would not try to argue that there was “use” where a loan is only made as a result of a credit agency check (which would have taken into account the individual’s assets representing or derived from FIG).<sup>173</sup>

### 17.22.2 *Secured loan*

Suppose income/gains are charged as security for a relevant debt. There are various possible views:

- (1) One view is that the charge constitutes “use” of the funds, in respect of the debt, within the meaning of the relevant debt rule. On this view, charging funds as security for a relevant debt constitutes a taxable remittance. Nothing more is needed.
- (2) Another view is that funds are only “used” in respect of a debt if they are “used up” ie consumed; on this view (unless and until the security is enforced) funds used as security are not “used”, and charging funds as security for a relevant debt does not constitute a remittance.
- (3) A compromise view is that merely charging funds does not constitute use in respect of the debt: something more is needed combined with the charge, before the income/gains can be said to be used in respect of the debt. The question then is to identify that “something more”:
  - (a) I have considered the view that funds charged are “used” in circumstances where the loan would not be made without the security, and funds are not “used” if the circumstances are that the loan would be made anyway. On reflection I think that is not an attractive view. Among other objections:
    - (i) The question whether the loan would be made without the security is a hypothetical question which would often be

---

173 There is no reason to think that HMRC’s other changes of view in this area have altered their practice on this point.

Although the last sentence is expressed tentatively, it clearly follows from the point made in the first sentence of this quote.

imponderable.

- (ii) The answer to that question may vary over time.
- (iii) What if a loan would have been made, but on different terms? or in smaller amount?

(b) HMRC adopted a form of this compromise view until 4 August 2014.

### 17.22.3 HMRC pre-2014 view

Until 4 August 2014, the RDR Manual provided:

***RDRM33170 collateral in respect of relevant debt*** [Dec 2011]

*Foreign income and gains may be used as collateral<sup>174</sup> for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt).*

*Such foreign income and gains used as collateral are used ‘in respect of’ the relevant debt, so there may be a taxable remittance at this point.*

[1] *The foreign income or gains used as collateral may be used directly, that is, the lender may receive a charge over cash assets in a bank account.*

[2] *However it is more likely they will be offered indirectly, often in the form of an asset such as a property or bond note that is ‘derived from’ the foreign income or gains.<sup>175</sup>*

[3] *This situation only arises where remittance basis users offer their foreign income or gains for use as collateral for a relevant debt, whether to a UK-based or an offshore lender.*

[4] *In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007/s809L(3)(c))...<sup>176</sup>*

---

174 Author’s footnote: A note on terminology. The author of this passage is using the word “collateral” as a synonym of “security”. This usage is possibly more standard in America, but it is also found in UK legal English, eg s.263C TCGA (from 2009) and it can be traced back at least to FA 1995. The word includes any type of security, whether a charge, lien, pledge, or mortgage.

175 Author’s footnote: I rather doubt that [2] is “more likely” than [1] and perhaps HMRC agreed, as the current Manual does not make that point; but it does not matter.

176 More analytically: There is no taxable remittance of UK property or non-taxable offshore property because remittance condition B is not met.

So far the Manual appeared to take the view that charging as security is use in respect of a debt, but the text went on to qualify that with an exception so large that that default rule rarely applied:

*Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also ‘used in respect of’ a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible sources of a taxable remittance charge in respect of the relevant debt – the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.*

*In the majority of commercial situations, neither party to the relevant debt transaction expects or intends that the collateral offered as security will be taken by the lender. Instead it is planned that the loan will be serviced and the capital repaid without recourse to the security charge. In such cases using foreign income or gains to regularly service or make capital repayments in respect of the relevant debt effectively ‘masks’ the collateral being used. In such cases the only taxable remittance will occur as and when the foreign income or gains are used to service or repay the loan. The payments, and thus the taxable remittances, will be spread over the loan period.*

HMRC then specified some exceptions where the default rule would apply so granting a charge for a debt would be a remittance of the assets charged:

*In some cases, usually involving avoidance or non-commercial arrangements, the relevant debt is not serviced or repaid by the borrower, or only a token amount is offered. In these circumstances the foreign income or gains offered as collateral are being utilised in respect of the relevant debt, that is, to delay or minimise service charges or repayments. As there is only one possible tax charge in respect of the relevant debt, that is the charge HMRC will take. The charge is taken up-front when the collateral is offered. Such arrangements are expected to be rare.*

*This should not be mistaken with interest-only repayment terms, or commercial arrangements that offer payment breaks and so forth. Always check the terms and general availability of the loan arrangements on offer.*

*If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment*

*schedules.*<sup>177</sup>

Thus on this view, security is not “used in respect of a debt” if the debt is “serviced and repaid” on commercial terms but in other cases it is so used.

I refer to this as the “**pre-2014 HMRC view**”.

#### 17.22.4 *HMRC current view*

The RDR Manual was amended on 4 August 2014 and now takes a different view:

**RDRM33170 collateral in respect of relevant debt** [Jan 2019]

Foreign income and gains may be used as collateral for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt - see RDRM33160).

The foreign income and gains used as collateral are used ‘in respect of’ the relevant debt, so there is a taxable remittance when the loan is brought to the UK.

The collateral containing the foreign income and gains may be a charge over cash assets in a bank account or other possessions, such as property or financial instruments that are ‘derived from’ foreign income or gains. This situation only arises where remittance basis users offer their foreign income or gains as collateral for a relevant debt, whether to a UK-based or an offshore lender.

In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007/s809L(3)(c)) as the property used as collateral will not contain foreign income or gains.<sup>178</sup>

To determine the amount of remittance where foreign income or gains are used as collateral in respect of a relevant debt refer to RDRM35050 Condition B – Collateral in respect of relevant debt.<sup>179</sup>

Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also ‘used in respect of’ a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible sources of a taxable remittance charge in respect of the relevant debt -

---

177 The Manual gave examples which I considered in the 2018/19 edition of this work at 12.21.3. I omit this now as it is of historical interest only.

178 More analytically: There is no taxable remittance of UK property or non-taxable offshore property because remittance condition B is not met.

179 See 17.32.5 (Security for debt: Amount remitted).

the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.

Similarly:

**RDRM37050 Foreign income and gains as collateral [Dec 2020]  
Remittance basis clarifications**

*When foreign income or gains are used as collateral when does the remittance take place?*

A remittance will occur if foreign income or gains are used in respect of a relevant debt. HMRC considers that foreign income or gains will be used in respect of a relevant debt, if

[1] they are used to agree the terms for the loan or

[2] used to satisfy the terms of a loan.

If the loan is not a relevant debt initially, the foreign income or gains used as collateral will be remitted at the point the loan becomes a relevant debt.

The Manual then gives an example; the facts (stripping out irrelevancies)<sup>180</sup> are as follows:

**RDRM33170 collateral in respect of relevant debt [Jan 2019]**

**Example 1 (John)**

In 2012-13 John, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. John uses the loan to purchase a horse and a

---

180 The example in full (including its irrelevant detail) is as follows:

“In 2012-13 John, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. John uses the loan to purchase a horse and a stable/paddock in Chester to indulge his young daughter’s latest hobby; so the loan is a relevant debt.

John offers as collateral for the loan a 5-year offshore bond, due to mature in 2015. He purchased this bond in 2010-11 (a year in which he was also a UK resident remittance basis user) using £200,000 of his untaxed relevant foreign income from that year.

John repays £18,000 of the loan (principal plus interest) in 2012-13, using his relevant foreign earnings from his separate employment in Guernsey.

John is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so John is using his relevant foreign income in respect of the relevant debt. However John is also using his relevant foreign earnings to both service and repay the debt capital; both the £200,000 foreign income from 2010-11 and the £18,000 foreign earnings from 2012-13 are regarded as remitted in 2012-13.”

stable/paddock in Chester; so the loan is a relevant debt.

John offers as collateral for the loan a 5-year offshore bond. He purchased this bond in 2010-11 (a year in which he was also a UK resident remittance basis user) using £200,000 of his untaxed relevant foreign income from that year.

John repays £18,000 of the loan (principal plus interest) in 2012-13, using his relevant foreign earnings from his separate employment in Guernsey.

The HMRC analysis is now as follows:

J is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so J is using his relevant foreign income in respect of the relevant debt. However J is also using his relevant foreign earnings to both service and repay the debt capital; both the £200,000 foreign income from 2010-11 and the £18,000 foreign earnings from 2012-13 are regarded as remitted in 2012-13.<sup>181</sup>

**Note** - In the example above, the relevant debt could also be serviced and repaid using non-taxable income or capital sources in which case there would be no taxable remittances of foreign income or gains in respect of the servicing payments.

If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment schedules.

**Note** - Previous HMRC guidance did not follow the position given above and suggested (!) that collateral in ‘commercial’ situations was not taxable if ‘regular’ servicing payments were made. This guidance was withdrawn on 4 August 2014...

I refer to this as the “**current HMRC view**”.

HMRC discuss the position of income/gains arising from the collateral:

**RDRM37050 Foreign income and gains as collateral** [Dec 2020]

*... Is it accepted that where the original collateral remains in place but that collateral itself generates further overseas income and gains, there is no additional remittance as a result of the additional income and gains arising, even where the assets representing those income and*

---

181 Author’s footnote: However J would not have paid tax on this remittance, because in the relevant year (2012/13), it would have not been regarded as taxable, on the basis of the pre-2014 HMRC view.

*gains form part of the security for the loan?*

HMRC considers that the point at which foreign income or gains are remitted will depend on the particular facts. If the loan terms are conditional on the foreign income or gains used as collateral, or foreign income or gains are used to satisfy the terms of the loan, the foreign income or gains have been used in respect of a relevant debt and there will be a taxable remittance.

*Would the answer still be the same if, as a result of investment losses, the original collateral (although not having been withdrawn) is reduced below the amount of the loan?*

If foreign income or gains are used to make up a shortfall in the collateral originally offered, there will be a taxable remittance. At this point, the foreign income or gains have been used in respect of a relevant debt because they have been used to satisfy the terms on which the loan was provided.

HMRC discuss what amounts to a charge/collateral:

**RDRM37050 Foreign income and gains as collateral** [Dec 2020]

*... Are foreign income or gains used (and remitted) in respect of a loan if they are not part of the formal security package, but can be used by the bank to repay the loan in the event of a default as the result of a general pledge contained in the bank's standard terms and conditions*

If the loan or the repayment terms are conditional on the availability of the foreign income or gains used as collateral, HMRC considers the foreign income or gains have been used in respect of the debt and there will be a taxable remittance.

*For there to be a remittance, does the customer need to take some positive action to use foreign income or gains as security for the loan?*

There doesn't need to be some positive action on behalf of the customer for there to be a remittance of foreign income or gains used as collateral. For example, if, at the point the relevant debt is taken out, the collateral offered is £250,000 capital held in a nominated account. £10,000 clean capital is subsequently withdrawn from the account but on the same day a foreign gain of £10,000 is paid into the account. Although the individual may not have taken a formal step of offering the foreign gain to the lender as collateral, the foreign gain has been used in respect of the relevant debt. The foreign gain has been used in respect of the debt because the payment into the account prevented a breach of the terms of the loan.

17.22.5 *Transitional: Pre-2014 loan*

On the current HMRC view there is a remittance when a relevant debt is charged on income/gains. But HMRC did not seek to apply this to “arrangements where the loan was brought into or used in the UK before 4 August 2014”.<sup>182</sup>

It follows that HMRC cannot say that there is a taxable remittance later when the same income/gains are remitted to the UK (or used to repay the debt).<sup>183</sup> A sum (on the current HMRC view) which is remitted in one year cannot give rise to a remittance charge if remitted again in a second year. As HMRC cannot usually assess the tax in the year of remittance, pre-2014 loans may provide a windfall for the taxpayer, though in practice the mixed fund rules may somewhat restrict the advantage.

#### 17.22.6 *The law*

The meaning of words is always context dependent, but this is particularly so in the case of broad expressions such as use “in respect of” a debt.<sup>184</sup>

The pre-2014 HMRC view raises few difficulties.

The current HMRC view leads to more serious difficulties:

- (1) Double taxation (which was the reason why in 2010 HMRC adopted its pre-2014 view).
- (2) What if the value of the property charged exceeds the amount of the loan? HMRC’s view has wavered, but they now say that the remittance is not limited to the amount of the loan, which is not a sensible result.<sup>185</sup>
- (3) What if there is a foreign currency loan and the value of the foreign

---

182 I discussed this issue in detail in the 2018/19 edition of this work at 12.21.5. I now omit this material, with regret as the story has amusing and instructive aspects, but it is of mainly historical interest.

It is suggested that HMRC’s transitional relief practice only applies where there was (on the new HMRC view) a remittance before 4 August 2014. Eg if the loan was brought to the UK before 4 August 2014, but charged on foreign income/gains after that date, the transitional relief would not apply.

183 The principle that a concession in one year cannot be used to impose a tax in another year is self-evident; but if authority is needed, see s.284A TCGA (Concessions that defer a CGT charge) which disapplies the principle (in short) for pre-1999 CGT concessions only.

184 See App 2.6.1 (In respect of).

185 See 17.32.5 (Security for debt: Amount remitted).

currency increases? Suppose:

- (a) A \$100 debt secured on £1000 income/gains at a time when the exchange rate means the debt is worth £80. On the HMRC view there is a remittance of £80.
  - (b) Later the dollar appreciates and the debt becomes worth £100. Is there a further remittance of £20?
- (4) What if a debt is secured on two items of property:
- (a) UK property (or other clean capital) and
  - (b) foreign income/gains?

Typically, if a debt is taken to purchase a house, the debt may be secured on UK property and (if the debt exceeds more than a safe proportion of the value of the property) income/gains. Suppose the debt is 100, the UK property is worth 100, the income/gains are worth 100, and the primary charge is over the property. What if anything is remitted? HMRC's view has wavered, but they now say all the foreign income/gains are remitted which is not a sensible result.<sup>186</sup>

For these reasons, it is suggested that (in the absence of special circumstances) the better view is that the mere grant of security is *not* use in respect of the debt.<sup>187</sup> HMRC's pre-2014 view was correct.

Back-to-back loans may be an example of arrangements which do constitute "use" of charged funds. Suppose:

- (1) T deposits income/gains in a bank ("T's deposit").
- (2) T borrows from the bank ("the relevant debt").
- (3) No interest is paid on T's deposit and only a small rate of interest is paid on the borrowing.

It is suggested that the income/gains deposited is used in respect of the relevant debt. But even here, it is still arguable that there is no use in respect of the relevant debt, as the funds are not used up or consumed. (On the other hand, if commercial interest rates are paid on the deposit and the borrowing, the deposited funds are not used in respect of the debt.)

### 17.22.7 Policy issues

---

<sup>186</sup> See 17.32.5 (Security for debt: Amount remitted).

<sup>187</sup> The position is clearer if property is acquired subject to a charge (as opposed to being held free of a charge and then charged); but that will not often arise.

Whenever there is a dispute as to what the law is, it is worth pausing to ask: regardless of what is the current law - what should the law be? Should the law treat a charge on income/gains as security as a remittance? If the HMRC old view is correct, should the law be altered?

It seems to me that there is no right or wrong answer to this: it depends on how generous or stringent a remittance basis one wants, bearing in mind that the policy reason for the remittance basis is to make the UK an attractive place for foreign domiciliaries to reside.<sup>188</sup>

On any basis, the double charge involved in the current HMRC view is wrong. If charging the property is a taxable remittance, repaying the debt should not be.

The pre-2014 HMRC view permits tax planning by allowing the option of borrowing instead of remitting income/gains. However:

- (1) There is not usually any tax advantage. Broadly, one exchanges an up-front charge of tax on the sum borrowed for an ongoing charge of tax on interest and repayments (made out of income/gains). There is no overall tax saving, except in the case of a remittance basis taxpayer who:
  - (a) dies before repaying the debt, or
  - (b) leaves the UK before repaying the debt, and is not just a temporary non-resident.

This is not tax avoidance in the strict sense of the expression.

- (2) Such planning remains possible under the current HMRC view - at a greater cost - by unsecured borrowing.

The case for changing the law is not made out.

I suspect there may be an inconsistency in government policy here, some of those responsible for tax administration in 2014 (and subsequently) have little or no sympathy with government policy decisions in 2008 (and 2017) to accept and retain the remittance basis; so they seek to adopt as strict an interpretation of the law as is possible.

### **17.23 Becoming/ceasing to be relevant person: Conditions A & B**

A person may be a relevant person at one time and not at another time. For instance, a child ceases to be a relevant person on becoming 18; an

---

188 See 1.1 (Foreign Domicile Tax Policy: Introduction).

individual becomes a relevant person on marriage or cohabitation, and ceases to be a relevant person on divorce or separation. A company becomes/ceases to be a relevant person in relation to T if T becomes/ceases to be a participator in the company.

The statute does not expressly address the application of conditions A and B in this situation. We need to find the answer as best we can in the words of the statute.

### 17.23.1 *Condition A*

Section 809L(2) ITA provides:

Condition A is that—

- (a) ... property is brought to, or received or used in, the UK by ... a relevant person...

For present purposes there are three ways of satisfying condition A: property must be (i) brought or (ii) received or (iii) used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment. It is considered that condition A is met if and only if the person is a relevant person at that moment.

Suppose:

- (1) T uses income/gains to make a gift of an asset to S (not a relevant person). S brings or receives the asset in the UK. There is no taxable remittance at the time of the gift or at the time of the receipt in the UK.
- (2) Later, S becomes a relevant person (eg S becomes a spouse or cohabitee). There is no taxable remittance at that time.<sup>189</sup>

Likewise if:

- (1) T uses income/gains to make a gift of an asset to R (a relevant person). R does not remit the asset to the UK. There is no taxable remittance at this time.
- (2) Later, R ceases to be a relevant person, and subsequently brings or

---

<sup>189</sup> An interesting question arises if there is a second receipt in the UK later. That is, add to those two steps a third step: S subsequently takes the property outside the UK and then (still a relevant person) brings or receives it in the UK for a second time. Is there a taxable remittance on the second receipt? It is suggested that the answer is no, though it needs a somewhat purposive construction to reach that result.

receives the asset in the UK. There is no taxable remittance at that time.

HMRC agree. RDRM33150 example 5 is an example of a person ceasing to be a relevant person. The facts (stripping out irrelevancies)<sup>190</sup> are:

In 2013 W uses foreign chargeable gains to purchase a motorcycle offshore.

W gives the asset to her husband H. H keeps the bike at offshore. [So there is no remittance at this time].

Subsequently, H and W divorce, and H moves from their home [ie H ceases to be a relevant person].

In 2017 H brings his bike to the UK.

The relevant part of HMRC analysis is as follows:

H and W were married and so H was a relevant person in 2013 when W gave him the motorcycle; he could not therefore have been a gift recipient (see Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.<sup>191</sup>

By 2017 they have divorced so H is not a relevant person when he brings in the motorcycle [to the UK].

More analytically, condition A is not satisfied because H is not a relevant person at the time when H brings the asset to the UK.

### 17.23.2 *Condition B*

---

190 The example in full (including its irrelevant detail) is as follows:

**“RDRM33150 Condition B - remittances derived from income or gain** [Jan 2019]

*Example 5*

Caroline is a remittance basis user. In August 2013 she realises some foreign assets and so makes some foreign chargeable gains. She uses all the proceeds (and so uses all these gains) to purchase a motorcycle in Paris which she gives to her husband Joel. It is registered in his name. Joel keeps the bike at his French apartment. A few years later Caroline and Joel divorce, and Joel moves from their home in Liverpool to Manchester.

In September 2017 Joel and Caroline’s 16 year old son, Joseph wants to learn how to ride a motorcycle, so Joel imports his bike from Paris to his Manchester home for Joseph to use.”

191 See 17.26 (Remittance condition C (gift recipient)).

Condition B provides (in part):

Condition B is that—

- (b) the property, service or consideration [received in the UK]—
  - (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
  - (ii) in the case of property or consideration, is *property of or consideration given by a relevant person ...*

It is considered that the requirement in (b)(ii) is met only if the person is a relevant person at the time that condition A is met (ie at the time that the property is brought/received/used in the UK). HMRC agree. The RDRM33120 motorbike example (already discussed just above in connection with condition A) covers the point. The facts (so far as relevant) are as set out above with one additional fact:

The motorcycle is used in the UK by C who is a minor child of W (a relevant person).

The HMRC analysis is as follows:

Here, property has been provided in the UK (the motorcycle) for the use of a relevant person (C) ...

More analytically, condition A is satisfied.

...and the property derives directly from W's foreign chargeable gains. However the motorcycle is the property of H, who is not a relevant person [at the time that the property is used by the relevant person C], so there is no taxable remittance for W.

More analytically, condition B is not satisfied because H is not a relevant person when the asset is used by the relevant person, C.

To drive the point home, the RDR Manual 33150 gives another example making the same point on somewhat far-fetched facts. So far as relevant<sup>192</sup>

---

192 The example in full (including its irrelevant detail) is as follows:

**“33150 Condition B - remittances derived from income or gain [Jan 2019]**

*Example 6*

In 2011, while visiting New York, Ros, a UK resident remittance basis user, purchases several art prints by H Marcus, an international artist. Ros uses her relevant foreign income to make the purchase. She gives them to her daughter Rachael, who is at that time living and studying in the US, as a 16th birthday present

the facts are:

In 2011 W uses RFI to purchase prints retained outside the UK. W gives the prints to her daughter D who is age 16 and so a relevant person. D retains the prints outside the UK [so there is no remittance]. D ceases to be a relevant person on becoming 18 but in that year (although still a teenager) D has a child GD (who is a relevant person in relation to W).

In 2016 D enters into an (implausible) agreement under which she transfers the prints (still outside the UK) to the mother of a singing teacher in consideration of the teacher giving singing lessons to GD (age only 3) in the UK.

The HMRC analysis is as follows:

A service has been provided in the UK (the singing lessons) for the benefit of a relevant person (GD) ...

More analytically, condition A is satisfied.

...and the consideration for the service (the print) derives from W's RFI. However the consideration is given by D, who is not a relevant person [at the time that condition A is satisfied] and so W has not made a taxable remittance of her relevant foreign income. D is 21 years old and so is not a relevant person in June 2016 when she gives the prints in consideration for a service.

More analytically, condition B is not satisfied.

Note – D was 16 years old and so is a relevant person in 2011 when her mother gave her the prints (see also Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose:

---

in February 2011. Rachael returns to the UK in May 2011, but leaves the prints at her uncle's New York apartment.

In June 2016 Rachael's 3 year old daughter Abigail decides to start singing lessons in Newcastle. The singing teacher's mother is a collector of Marcus prints, so the teacher agrees with Rachael to accept one of the prints in exchange for the lessons. Rachael arranges for her uncle to send the print from New York directly to the singing teacher's mother in California.”

- (1) T uses income/gains to make a gift of an asset to S (not a relevant person). There is no taxable remittance at this time.
- (2) S becomes a relevant person, and subsequently brings/receives the asset to the UK. There is a taxable remittance at that time.

HMRC agree. The RDR Manual provides an example where the facts (stripping out irrelevancies)<sup>193</sup> are:

**RDRM33240 Gift recipients cannot be relevant persons [Jan 2019]**

*Example 2*

In 2010 T uses RFI to purchase a clock outside the UK.

T immediately gives the clock to S (not a relevant person) and it is kept outside the UK.

S, not being a relevant person, is a gift recipient.

In 2014, T marries S. S becomes a relevant person and ceases to be a gift recipient at this time.

Subsequently, S brings the clock to the UK.

The HMRC analysis is as follows:

As S is no longer a gift recipient Condition C is not relevant.

However as S is now [in 2014] a relevant person there is a taxable remittance chargeable on T when S imports the clock, under Conditions A and B. This is because

[1] property (the clock) has been brought to the UK by a relevant person (S) [ie condition A is satisfied] and

[2] that property derives from T's RFI and the property is property of a relevant person (S) [ie condition B is satisfied]

---

193 The example in full (including its irrelevant detail) is as follows:

“In June 2010 Sam, a remittance basis user, uses £8,000 of her relevant foreign income to make an overseas purchase of an antique clock from a dealer in Denmark. Sam immediately makes a gift of an antique clock to Chris and Jo, who at that time are living in Denmark. The clock is kept at Chris's family home in Copenhagen.

Chris, not being a relevant person, is a gift recipient.

Two years later Jo and Chris split up, and in July 2014, Sam and Chris marry. Chris ceases to be a gift recipient at this time.

In October 2014 Chris brings the antique clock to the UK to the house that is shared with Sam. ...”

The example as published is defective in that it must be assumed (though this is not stated) that Chris gave his interest in the clock to Jo (or perhaps the gift was to Jo and not to Jo and Chris).

So far we have considered property brought to or received in the UK. That can happen only at a particular moment. On the other hand, property can be *used* in the UK over a period of time. Suppose:

- (1) Year 1: T uses income/gains to make a gift of an asset to S (not a relevant person). S uses and continues to use the asset in the UK eg she buys a house which she occupies. There is no taxable remittance at the time of the gift or at the time of the use.
- (2) Year 2: S becomes a relevant person (eg a spouse or cohabitee). She continues to use the property.

Is there a taxable remittance in year 2 when S becomes a relevant person? It would be strange if there were a difference between this case and the case of receipt in the UK. It is suggested that the answer is, no.

### 17.23.3 *Relevant debt: Becoming/ceasing to be relevant person*

Similar principles apply to debt remittances. A relevant debt is (in short) one which relates to property brought/received/used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment, and *used* (if at all) only at a particular time or period. It is considered that a debt relating to that property is a relevant debt in relation to an individual only if the person who brings/receives/uses the property in the UK is a relevant person in relation to that individual at that time the property is brought/received/used in the UK.

Suppose:

- (1) S (not a relevant person in relation to T) borrows money. S brings/receives the money in the UK. The debt is not a relevant debt in relation to T, so there would be no taxable remittance if T repaid the debt out of T's income/gains.
- (2) Later, S becomes a relevant person (eg S becomes a spouse or cohabitee of T). The debt is still not a relevant debt, and there is no taxable remittance if T repaid the debt.

Likewise if:

- (1) R (a relevant person in relation to T) borrows money. R does not remit the money to the UK. The debt is not a relevant debt.
- (2) Later, R ceases to be a relevant person, and subsequently brings or receives the money in the UK. The debt is still not a relevant debt.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose

- (1) R (a relevant person in relation to T) borrows money. R does remit the money to the UK. The debt is a relevant debt in relation to T.
- (2) R ceases to be a relevant person in relation to T (eg R and T divorce).

The debt does not cease to be a relevant debt in relation to T. The debt relates to the property, and the property still falls within s.809L(2)(a). So there is a taxable remittance if T repays the debt after divorce.

#### 17.23.4 *Third persons*

The position becomes more complicated when a third person is involved. Suppose:

- (1) T gives income/gains to T's spouse W.
- (2) There is a divorce and W ceases to be a relevant person.
- (3) W transfers the income/gains to a trust under which a minor child of T is a beneficiary. The trustee is a relevant person in relation to T.
- (4) The trustee transfers the funds to the minor child who receives them in the UK.

Condition B appears to be satisfied since at the time of the receipt in the UK the funds are the funds of a relevant person. But the trust funds may not be derived income.<sup>194</sup>

#### 17.24 **Debt becomes/ceases to be relevant debt**

A debt which is not a relevant debt may become a relevant debt. Condition B is (in short) that income is used in respect of a relevant debt. It is considered that there is a taxable remittance only if the debt is a relevant debt at the time income is used in respect of the debt.

Suppose:

- (1) Year 1:
  - (a) T borrows and receives the borrowed money offshore.
  - (b) T uses income/gains to pay the interest (use in respect of the debt).

In year 1 condition B is not satisfied as the income/gains is not used in respect of a relevant debt.

---

<sup>194</sup> See 17.16.16 (Gift on to third party).

(2) Year 2: T remits the borrowed money to the UK.

In year 2 the debt becomes a relevant debt, but it is considered that the income/gains used to pay interest in year 1 does not become remitted at that time. But if income/gains is used to pay more interest in year 2, that income/gains satisfies condition B.

If a debt is, or becomes, a relevant debt, it is not likely that it can subsequently cease to be a relevant debt (so the tax puzzle of a debt ceasing to be a relevant debt is not likely to arise).<sup>195</sup>

### **17.25 Role of remittance conditions C/D**

The drafter identified 2 gaps in remittance conditions A and B which are addressed by remittance conditions C and D.

In outline:

- (1) The individual may receive funds in the UK which are derived from the income/gains but which are not the property of a relevant person. Then condition B is not met.<sup>196</sup> This problem is met by imposing a remittance if the individual receives in the UK property of a third party (not a relevant person) with some link to the individual:
  - (a) Remittance condition C applies if the individual receives property of a gift recipient.
  - (b) Remittance condition D applies if the individual receives property of a third party, called (my terminology) a condition-D person.
- (2) The individual may receive funds in the UK which are not derived from the income/gains (“non-derived property”). Then condition B is not met. This problem is met by imposing a remittance if the individual receives non-derived property in the UK with some link to the income/gains:
  - (a) Remittance condition C applies if the individual receives “qualifying property” (which can include non-derived property).
  - (b) Remittance condition D applies if the individual receives any property; the necessary link is in the requirement of a “connected operation”.

---

<sup>195</sup> See 17.20.3 (Debt-related asset leaves UK/ceases to exist).

<sup>196</sup> It is usually a requirement of condition B that the income/gains are the property of a relevant person; see 17.14.1 (Property of relevant person).

## 17.26 Remittance condition C (gift recipient)

Section 809L(4) ITA provides:

Condition C is that qualifying property of a gift recipient—

- (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
- (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

### 17.26.1 *Enjoyment by relevant person*

The requirements in (a) and (b) are similar but not the same as remittance condition A. The differences are as follows:

<b>Condition C requirement</b>	<b>Condition A requirement</b>
--------------------------------	--------------------------------

Property brought/received/used in the UK

Property brought/received/used in the UK *by or for the benefit of a relevant person.*

Property *enjoyed* by a relevant person.

No equivalent in condition A (though the requirement that the property is brought/received/used by or for the benefit of a relevant person is similar.)

The word “enjoyed” in condition C means more or less the same as the word “used” in condition A.<sup>197</sup> I do not think there is a difference though if there were, the vagueness of the words makes it impossible to say what it may be. The reason for the different word is probably that other parts of condition C are derived from the GWR wording, where the word “enjoyed” is used<sup>198</sup> so the word enjoyed is copied across to condition C.

Enjoyment is a cliff-edge test: any enjoyment (above *de minimis*) and the entire sum is remitted, even if the sum exceeds the value of the enjoyment.

### 17.26.2 *Enjoyment disregards*

Section 809N ITA provides definitions and other supplementary provisions for condition C. Section 809N(1) ITA provides:

---

<sup>197</sup> As to which, see 17.12.4 (Property used in UK).

<sup>198</sup> See 74.1 (GWR – Introduction).

This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition C in section 809L.

Section 809N(9) ITA provides three cases where enjoyment is disregarded. Since enjoyment is a requirement of remittance condition C, the disregards amount to exemption from condition C:

Enjoyment by a relevant person of property or a service is to be disregarded in any of these cases—

- (a) if the property or service is enjoyed virtually to the entire exclusion of all relevant persons;
- (b) if full consideration in money or money's worth is given by a relevant person for the enjoyment; or
- (c) the property or service is enjoyed by relevant persons in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

Para (a) is based on IHT GWR provisions.<sup>199</sup>

Para (b) is the most important of the three disregards, and is also based on GWR:<sup>200</sup> I refer to it as the “**full consideration exemption**”. I discuss these two paragraphs in the GWR chapter.

Para (c) concerns charitable or public gifts; it is hard to see that it is needed, but it does no harm.

Suppose:

- (1)(a) T gives pre-2008 income/gains to T's spouse (not a relevant person and so a gift recipient) and the spouse uses the money to buy a property jointly with T; or
  - (b) T gives income/gains to T's brother (a gift recipient) and the brother uses the money to buy a property jointly with T.
- (2) The co-owners occupy the property jointly.

It is considered T does not “enjoy” the co-owner's half share, so condition C is not satisfied in respect of the gifted income/gains. The same would apply to jointly held chattels.

Suppose:

- (1) T gives income/gains to T's adult son S (a gift recipient), and

---

199 See 74.6.4 (“Virtually” excluded).

200 See 74.7 (Full consideration exemption for GWR).

- (2) S uses the money to purchase a UK residence which is occupied by S, not by T.
- (3) S has a minor child, GS, who also lives in the property.

It is considered that the property is not “enjoyed” by GS, who is merely a licensee of S. Any “enjoyment” by GS is incidental to the primary use by S, and should be ignored. It is different if S leaves the property and GS becomes the occupier (but since GS is by then likely to be 18, GS ceases to be a relevant person). HMRC agree. RDR Manual provides:

**RDRM33270 enjoyment by a relevant person ignored** [Jan 2019]

Each case will depend on its particular facts, but broadly, enjoyment by a relevant person is disregarded, and so there is no taxable remittance under Condition C (if there otherwise would be) where the property or service is enjoyed by the gift recipient virtually to the entire exclusion of all relevant person, that is,

[1] the gift is genuine and

[2] any enjoyment by a relevant person is incidental...

After this somewhat loose paraphrase of Condition C, the Manual gives the example we are considering:

For example a minor child may derive benefit from living in the UK with his parents in a house that was purchased using offshore funds gifted by his grandfather (a remittance basis user) to his father, for his father’s own use. It is normal for a young child to live with his parents and therefore, in most cases, no advantage over minor children generally is obtained. In this type of circumstance HMRC would generally accept that the minor child’s enjoyment of the house was merely incidental to that of his father.

### 17.26.3 *Gift recipient*

The key terms in remittance condition C are “gift recipient” and “qualifying property”.

Section 809N(2) ITA provides:

A “gift recipient” means a person, other than a relevant person, to whom the individual makes a gift of money or other property that—

- (a) is income or chargeable gains of the individual, or
- (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Strictly one should not use the term “gift recipient” in the abstract. A gift recipient can exist only *in relation to an individual (the donor)*. But where the context is clear it is permissible simply to refer to a gift recipient.

A relevant person cannot be a gift recipient. So in practice gift recipients will be individuals who are not members of the individual’s close family, such as parents, adult children, friends and relatives. (Family trusts and companies will generally be relevant persons and where they are not, it is unlikely they would or properly could enter into a transaction caught by condition C.)

If T makes a gift to G, and G gives the property to H, H is not a gift recipient in relation to T.

If T makes a gift to a trust, and the trust appoints the property to B, B is not a gift recipient, as T has not made a gift to B.

#### 17.26.4 “Gift”

Section 809N(5) ITA extends “gift” to include disposals at an undervalue:

The individual “makes a gift of” property if the individual disposes of the property—

- (a) for no consideration, or
- (b) for consideration less than the full consideration in money or money’s worth that would be given if the disposal were by way of a bargain made at arm’s length;

but, in a case falling in para (b), the individual is to be taken to make a gift of only so much of the property as exceeds the consideration actually given.

In the phrase “full consideration in money or money’s worth *that would be given if the disposal were by way of a bargain made at arm’s length*” do the italicised words add anything? It is thought not; these words are otiose but they do no harm.

Section 809N(6) ITA is intended to widen this:

A reference to the individual making a gift of property includes a case where—

- (a) the individual retains an interest in the property, or
- (b) an interest, right or arrangement enables or entitles the individual to benefit from the property.

I am unable to make sense of this. The wording is loosely based on s.102A FA 1986 but the context there is different, and s.102A is itself

obscure, so that does not shed any light on the matter. Perhaps it is meaningless.

Suppose T makes an interest-free loan to B. The transaction is for full consideration so it is not a gift within s.809N(5). A lender in principle has no interest in the money lent so s.809N(6)(a) does not apply. A loan does not entitle T to benefit from the money lent. B may use that money for himself or herself. It is considered that the loan does not enable T to benefit from the money lent, so s.809N(6)(b) does not apply. B is not a gift recipient.

#### 17.26.5 “Qualifying property”

Section 809N(7) ITA defines “qualifying property”. There are three categories of qualifying property:

“Qualifying property”, in relation to a gift recipient, is—

- (a) the property that the individual gave to the gift recipient,
- (b) anything that derives (wholly or in part, and directly or indirectly) from that property, or

Para (a) and (b) are what one would expect, but the definition goes on to include non-derived property which has some nexus to the gifted property:

- (c) any other property, but only if it is dealt with as mentioned in section 809L(4)(a), (b) or (c) by virtue of an operation which is effected—
  - (i) with reference to the gift of the property to the gift recipient, or
  - (ii) with a view to enabling or facilitating the gift of the property to the gift recipient to be made.

Section 809N(8) ITA is intended to widen this:

In subsection (7)—

- (a) the reference in para (b) to anything deriving from property, and
  - (b) the reference in para (c) to other property,
- includes a thing,<sup>201</sup> or property, that does not belong to the individual but which the individual is enabled or entitled to benefit from by virtue of any interest, right or arrangement.

This is misconceived. Qualifying property will not belong to the

---

201 The reference to a “*thing or property*” is meaningless. What non-property “thing” could there be?

individual because it has been given to the gift recipient, so it is not necessary to say that property includes property not belonging to the recipient. Here, as in s.809N(6), the drafter's desire to achieve the widest possible generality, and avoid any possible gaps in the legislation, has led to incoherence.

#### 17.26.6 *Time of remittance*

Section 809L(6) ITA provides a rule which applies for conditions C and D:

In a case where subsection (4)(a) or (b) or (5)(a) or (b) applies to the importation or use of property, the income or chargeable gains are taken to be remitted at the time the property or service is first enjoyed by a relevant person by virtue of that importation or use.

#### 17.26.7 *Becoming/ceasing to be relevant person: Condition C*

Section 809N ITA provides:

(3) The question of whether or not a person is a relevant person is to be determined by reference to the time when a gift is made.

(4) But, if a person to whom a gift is made subsequently becomes a relevant person, the person ceases to be a gift recipient.

Thus if a gift is made to a relevant person, condition C cannot apply, even if they cease to be a relevant person<sup>202</sup> and so become a gift recipient.

If a gift is made to a non-relevant person, condition C ceases to apply if they become a relevant person. That makes sense because in such a case, remittance conditions A and B may apply.

### 17.27 **Examples of condition C**

#### 17.27.1 *Gift/loan of gifted asset*

The RDR Manual provides examples numbered (1)(a) and (b); I consider example (b) first as it is the easier of the two. I reword the examples so that T is the taxpayer and G is the gift recipient.

---

202 See 17.23 (Becoming/ceasing to be relevant person: conditions A & B); 17.29.4 (Becoming/ceasing to be a relevant person: condition D).

The facts of example 1(b) (stripping out irrelevancies)<sup>203</sup> are:

*Example 1(b) (Klimt)*

T gives money derived from chargeable gains to his sister G (a gift recipient).

G uses the money to buy a car which T's wife uses in the UK.

Condition C is satisfied. The HMRC analysis is:

The qualifying property here is the car, which derives from the money that T gifted to G.

That qualifying property is used in the UK and is enjoyed by a relevant person (T's wife).

The use of the gift means there is a taxable remittance on T.

The same applies if T gives income/gains to T's adult son S (not a relevant person) and S uses it to buy the house in the UK in which T lives. This is not caught by remittance condition B. (The house is derived from the income/gains but it is not property of a relevant person.) The house is qualifying property and is caught by remittance condition C.<sup>204</sup>

---

203 The example in full (including its irrelevant detail) is as follows:

**RDRM33260 Gift recipients - qualifying property** [Jan 2019]

*"Example 1(b) (Klimt and Helena)*

In May 2015 K, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister H, a gift recipient. In October 2016 H uses half of this money to buy a car in the UK which she makes available to K's wife to use. ..."

There is a similar example in the CG Manual:

**CG25342 Meaning Of Remitted To The UK: Gifts Of Money And Assets: ITA07/S809L(4)** [Nov 2019]

"... Torvald claims the remittance basis in 2009-10; in that year he sells a property in Norway and uses the proceeds to buy a car which he gives to his business partner Stig who lives in Oslo. Stig exports the car to the UK and gives Torvald's wife Helga the keys.

In terms of ITA07/S809L(4), the car is qualifying property because it was given by Torvald to Stig. Stig is a gift recipient because he is not a relevant person and he has received a gift of property (the car) that derives from Torvald's chargeable gain. ... The car is brought to the UK and is enjoyed by a relevant person, Torvald's wife. Torvald's chargeable gain on the disposal of his property has therefore been remitted to the UK to the extent that it was used to buy the car. Note that it is the cost of the car, not its market value when it comes to be used in the UK, which fixes the upper limit of the remittance.)"

204 See 17.34 (Purchase of family home).

### 17.27.2 Gift/gift of gifted asset

The facts of RDR Manual example 1(a) (stripping out irrelevancies)<sup>205</sup> are:

T gives money derived from chargeable gains to his sister G (a gift recipient).

G brings the money to the UK and then gives it to T's wife.

In the HMRC view condition C is satisfied. The HMRC analysis is as follows:

[1] The qualifying property here is the money that T gifted to G.

[2] That qualifying property is used in the UK and is enjoyed by a relevant person (T's wife).

[3] The use of the gift means there is a taxable remittance on T.

Point [2] is not correct. Condition C is that:

qualifying property of a gift recipient is ... enjoyed by a relevant person,

The money ceases to be qualifying property "of a gift recipient" when G gives it to T's wife. Thus qualifying property of a gift recipient is brought to or received in the UK.<sup>206</sup> But the property which is enjoyed by a relevant person is not property of a gift recipient.

However, on the facts of the example, remittance condition B may be satisfied. That depends on whether the money given to T's wife can be said to derive from T's gains, which would be the case if the two steps of the example are part of a single arrangement.<sup>207</sup>

### 17.27.3 Gift/loan of non-derived property

The RDR Manual 35060 [Jan 2019] next provides an example where the

---

205 The example in full (including its irrelevant detail) is as follows:

**RDRM33260 Gift recipients - qualifying property** [Jan 2019]

*"Example 1(a) (Klimt and Helena)*

In May 2015 K, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister H, a gift recipient. In October 2016 H uses half of this money to buy a car in the UK which she makes available to K's wife to use. ..."

206 Though, contrary to the HMRC analysis, it is not *used* in the UK (unless one says that H "uses" the funds by making a gift to K's wife, which is not the normal meaning of the word "uses").

207 See 17.16.16 (Gift on to third party).

property enjoyed in the UK is non-derived property. The facts (stripping out irrelevancies)<sup>208</sup> are:

There is an arrangement under which:

- (1) T gives RFI to his aunt G (a gift recipient).
- (2) Later,<sup>209</sup> G allows T's wife to use a property in the UK owned by G, without charge.

One analysis of these facts is that T and G have entered into a contract, under which G promises to allow T's wife to use the land in consideration of T's payment (not properly called a "gift") to G. In that case there is a remittance under remittance conditions A and B. It is however assumed that the arrangement is an informal, non-binding, non-contractual one. That would be implausible if G were a stranger, but not in the case of a friend or relative. In that case condition B is not satisfied.

The HMRC analysis is as follows:

The house cannot be said to "derive from" the income or gains.

More analytically, condition B is not satisfied.

However condition C is satisfied:

The house is "other property" [ie non-derived property, within s.809N(7)(c)] used in the UK and enjoyed by a relevant person (T's wife).

As the operation which brought the house within Condition C was done with reference to the gift or to enable or facilitate the gift it is qualifying property and Condition C is met.

There is a remittance and tax is chargeable on T.

The amount of the remittance is determined by s809P(11)(c).<sup>210</sup>

208 The example in full (including its irrelevant detail) is as follows: (*Adam and Linda*) L's husband's family has owned a holiday house in Scotland for many years. In February 2012 A, a remittance basis user transfers some of his foreign income and gains to his aunt, L, the gift recipient, which she uses to book herself on an around-the-world cruise. A gives the money to L on the agreement that L will provide his wife Clare, a keen painter, with access to the Scottish property.

Several months later L provides Clare with an agreement saying that she can use the Scottish house, for which Clare pays nothing.

209 The example specifies that "several months" pass between step (1) and step (2) to make the point that one cannot avoid the tax consequences of the arrangement by a few months delay.

210 See 17.32.7 (Condition C/D: Amount remitted).

Suppose the order of transactions was reversed:

- (1) G grants allows W to use a property in the UK.
- (2) Later, after W has left the property, T gives RFI to G.

Condition C is not satisfied at stage (1) since G is not at that point a gift recipient. At stage (2) G becomes a gift recipient but condition C does not become satisfied. However condition D would apply: see 17.30.1 (Loan of asset/gift to lender).

#### 17.27.4 *Gifted property used to pay relevant debt*

The last HMRC example is slightly contrived, in order to illustrate the relevant debt rule in application to remittance condition C. The facts (stripping out irrelevancies)<sup>211</sup> are:

- T gives property derived from RFI (shares) to his brother G, (a gift recipient.)
- G borrows to purchase furniture.
- T uses the furniture in the UK.
- G uses the property to repay the loan.<sup>212</sup>

The HMRC analysis is as follows:

T has made a gift of property derived from his foreign income (the shares) to G, a gift recipient. The shares are thus qualifying property of a gift recipient.

The loan taken out by G to purchase the furniture is a relevant debt because it relates to property (the furniture) brought to the UK for the

---

211 The example in full (including its irrelevant detail) is as follows:

**“33260 Condition C - relevant debt** [Jan 2019]

*(Fraser and Victor)*

F, who is a remittance basis user, purchases some non-UK shares in January 2012, using his foreign income and gains. F makes a gift of these shares to his brother, V, a fashion designer.

In March 2012 V takes out a loan with an offshore bank to purchase a designer table and chairs. V brings these table and chairs to the London town house that he and his brother F inherited jointly from their father, and where they both now live. F regularly entertains clients and friends at the house.

V uses some of the shares and bonds to pay off the loan.

212 That is, G sells and uses the proceeds to repay the loan; or (less plausibly) transfers the shares to the creditor in satisfaction of the loan.

benefit of a relevant person (T).

T benefits because he uses the furniture.

The qualifying property (the shares) of G (a gift recipient) is used outside the UK in respect of this relevant debt. There is a remittance under Condition C.

## 17.28 Condition C transitional rule: Pre-2008 income/gains

Para 86(4) sch 7 FA 2008 provides:

Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as the “**para 86(4) amendment**”. Amended as para 86(4) directs, condition C (set out in s.809L(4)) provides:

Condition C is that qualifying property of a gift recipient—

- (a) is brought to, or received or used in, the UK and is enjoyed by ~~a relevant person~~ *the individual*,
- (b) is consideration for a service that is enjoyed in the UK by a ~~relevant person~~ *the individual*, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

This is consistent with the remittance condition A/B rules for pre-2008 income.<sup>213</sup> Since the para 86(4) amendment applies only for s.809L, para 87 sch 7 FA 2008 has to make further amendments to s.809N:

Section 809N of ITA 2007 (section 809L: gift recipients, qualifying property and enjoyment) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—

- (a) the reference in subsection (2) to a relevant person were to the individual,
- (b) subsections (3) and (4) were omitted, and
- (c) the references in subsection (9) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 87 requires, s.809N(2) reads:

---

213 See 17.9 (Relevant person: Pre-2008 income/gain).

A “gift recipient” means a person, other than ~~a relevant person~~, the individual to whom the individual makes a gift of money or other property that—

- (a) is income or chargeable gains of the individual, or
- (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

The words “other than the individual” are meaningless because the individual cannot make a gift to himself. So s.809N(2) means:

A “gift recipient” means a person ... to whom the individual makes a gift of money or other property that—

- (a) is income or chargeable gains of the individual, or
- (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Para 87 does not restrict the definition of “gift recipient”: it *widens* it.

The para 87 deletions of 809N(3)(4) are straightforward amendments consequential on the para 87 amendment to s.809N(2).

The last para 87 amendment is also a straightforward consequential amendment. Amended as para 87 requires, s.809N(9) reads

Enjoyment by ~~a relevant person~~ the individual of property or a service is to be disregarded in any of these cases—

- (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ the individual,
- (b) if full consideration in money or money’s worth is given by a ~~relevant person~~ the individual for the enjoyment, or
- (c) the property or service is enjoyed by ~~relevant persons~~ the individual in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

The condition D rule for pre-2008 income/gains is not very different from that which applied under the pre-2008 law.

## 17.29 Condition D: Connected operation

For an introduction to this topic, see 17.25 (Role of remittance conditions C/D).

Section 809L(5) ITA provides:

[1] Condition D is that property of a person other than a relevant person

(apart from qualifying property of a gift recipient)—

- (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
- (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,

[2] in circumstances where there is a connected operation.

We need some terminology to grapple with this, and in the following discussion:

The “**condition-D person**” is the non-relevant person whose property is used as set out in (a)-(c), ie (in short) enjoyed by a relevant person.

The “**enjoyment requirement**” is the requirement in s.809L(5)[1] (in short, that a relevant person enjoys property of the condition-D person in the UK). The property which the relevant person enjoys need not be derived from the individual’s income/gains.

The wording of the enjoyment requirement is (more or less) the same as in remittance condition C.<sup>214</sup> The same enjoyment disregards apply.<sup>215</sup> The same timing rule applies.<sup>216</sup> These aspects need not be considered again here.

### 17.29.1 *Condition D person*

The RDR Manual comments on the identity of the condition-D person:

**RDRM33430 Connected Operation - definition** [Jan 2019]

The property that is brought to the UK, or used outside the UK as consideration for a service or in respect of a relevant debt must not be qualifying property of a gift recipient as this will fall within Condition C. However this restriction relates to the property not the individual, so the same person may be a gift recipient under Condition C and, in other transactions, “a person whose property is used” under Condition D.

Could a partnership be a condition-D person? A partnership is not a relevant person. An English law partnership is not a person at all, in the

---

214 See 17.26.1 (Enjoyment by relevant person).

215 Section 809O(6) ITA repeats s.809N(9) verbatim; see 17.26.2 (Enjoyment disregards).

216 See 17.26.6 (Time of remittance).

strict sense, but the word person can be used loosely, to include a partnership;<sup>217</sup> and the context suggests that is the case here.

### 17.29.2 “Qualifying disposition”

The key term in remittance condition D is “connected operation”, and that term relies on the concept of a “qualifying disposition.” Section 809O provides the definitions and other supplemental provisions for condition D.

Section 809O(1) ITA provides:

This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition D in section 809L.

Section 809O(4) ITA defines “qualifying disposition”:

A “qualifying disposition” is a disposition that—

- (a) is made by a relevant person,
- (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c) [ie made to/for the benefit of the condition-D person], and
- (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

Section 809O(5) provides an exception:

But a disposition of property is not a qualifying disposition if the disposition is, or is part of, the giving of full consideration in money or money’s worth for the dealing that falls within section 809L(5)(a), (b) or (c).

I do not see the need for that, since if there is full consideration for “the dealing that falls within section 809L(5)(a), (b) or (c)” (in short, for the enjoyment by the relevant person) then the full consideration exemption applies.<sup>218</sup> But it does no harm.

### 17.29.3 *Connected operation*

---

217 See 82.13 (Partnership: person/body corporate).

218 See 17.26.2 (Enjoyment disregards). Perhaps the point is that s.809O(5) provides exemption in a case falling within s.809L(5)(c) (relevant debts).

Armed with the term “qualifying disposition” we can turn to the definition of “connected operation”. Section 809O(3) ITA provides:

A “connected operation”, in relation to property dealt with as mentioned in section 809L(5)(a), (b) or (c), means an operation which is effected—

- (a) with reference to a qualifying disposition, or
- (b) with a view to enabling or facilitating a qualifying disposition.

Thus in order to have a connected operation, four requirements must be met:

- (1) A qualifying disposition (eg a transfer to the condition-D person).
- (2) An operation (but that is so wide it scarcely counts as a requirement).
- (3) A link between the operation and the qualifying disposition: the operation must be effected with reference to/with a view to enabling/facilitating the qualifying disposition.
- (4) A link between the operation and the condition-D person’s property: the operation must be “in relation to property dealt with as mentioned in s.809L(5)(a)(b)(c)” ie it must relate to the condition-D person’s property.

The RDR Manual comments on requirement (3):

**RDRM33430 Connected Operation - definition** [Jan 2019]

It is important to note the words “with reference to” and “with a view to enabling or facilitating a qualifying disposition”. The nature of the link between the connected operation and the qualifying disposition, or even which comes first, is not specified. This means that a taxpayer cannot avoid a charge to tax by setting up complex structures to disguise foreign income or gains, or to try and “break the link” between something enjoyed in the UK and that income or those gains.

17.29.4 *Becoming/ceasing to be relevant person: Condition D*

Section 809O(2) ITA provides:

For the purposes of section 809L(5), the question of whether or not the person whose property is dealt with as mentioned in para (a), (b) or (c) of section 809L(5) is a relevant person is to be determined by reference to the time when the property is so dealt with.

This is consistent with condition C: see 17.26.7 (Becoming/ceasing to be relevant person: Condition C).

## 17.30 Examples of condition D

### 17.30.1 *Loan of asset/gift to lender*

A straightforward example of condition D would be:

T wishes to use a UK asset owned by X (not a relevant person). T and X enter into an informal, non-binding arrangement<sup>219</sup> under which:

- (1) X allows T to use the asset.
- (2) After T has ceased to use the asset, T gives RFI to X (the qualifying disposition).

The analysis is:

X is a condition-D person.

The enjoyment requirement is met by T's use of X's asset.

T's gift to X is a qualifying disposition.

The connected operation is X's allowing T to use the asset.

So condition D is satisfied.

### 17.30.2 *Loan/gift for benefit of lender*

The RDR Manual provides a more subtle example where the facts (stripping out irrelevancies)<sup>220</sup> are:

T wishes to use UK land owned by X (not a relevant person).

There is an arrangement under which:

- (1) X allows T to use the land rent free.

---

219 If the arrangement is by way of binding contract (which is likely unless T and X are relatives or friends) then remittance conditions A and B are satisfied, as T's obligation to X will be a relevant debt.

220 The example in full (including its irrelevant detail) is as follows:

*Janet and John*

**“35080 Condition D - remittances of foreign income or chargeable gains [Jan 2019]**

John personally owns a country estate in Cornwall, in an area of outstanding natural beauty. His friend Janet wishes to use the mansion for several important family functions.

Janet is a remittance basis user. She owns a foreign yacht which she bought using her foreign income and gains. On 2 March she disposes of the yacht to a nonresident company for £15,000. John has a controlling interest in that non-resident company. In October, with reference to the transfer of the yacht, John allows Janet full and exclusive use of the estate, rent-free.

- (2) T transfers an asset derived from T's RFI (a yacht) to a company owned by X, at an undervalue.

This is like my straightforward example, except that T transfers the RFI to a company owned by X (not to X directly).

One analysis of these facts is that T and X have entered into a contract, under which X leases or licenses the land to T in consideration of T's transfer of the yacht to the company. In that case there is a remittance under remittance conditions A and B, on the basis that:

- (1) If the rent is paid in advance: T receives an asset in the UK (a lease or licence) which is derived from T's RFI; or
- (2) If the rent is paid after the grant of the lease: T has used RFI to pay a relevant debt.

Note that the rent would also be taxable.

It is however assumed that the arrangement is an informal, non-binding, non-contractual one. That might be possible if X is a friend of T or a friendly trust or company. In that case condition B is not satisfied.

The HMRC analysis first considers condition C:

X is not a gift recipient (the yacht was given to his company, not to X). Condition C cannot therefore apply.

So we turn to condition D. In my terminology, X is the condition-D person.

[1] X is not a relevant person in relation to T.<sup>221</sup>

[2] There is a qualifying disposition because:

- [a] There is a disposal of property (the yacht) which derived from T's income (ITA07/S809O(4)(c))
- [b] The disposal was made by a relevant person (T) (ITA07/S809O(4)(a))
- [c] The disposal was for the benefit of X (although the disposal was not made directly to X, he benefits from it through his

---

221 The HMRC analysis adds that "the company is not a relevant person (as T is not a participator)". In fact, whether the company is a relevant person is not determined by the facts expressly given in the example. The company would be a relevant person if any relevant person is a participator. Perhaps we are meant to assume that X is the sole participator in the company. However it makes no difference whether or not the company is a relevant person (unless the company brings the yacht to the UK).

ownership of the company) (ITA07/S809O(4)(b))

[3] X's property [the land] is enjoyed in the UK by a relevant person (T) (ITA07/S809L(5)(a) and ITA07/S809O(4)(b)).

In this example T's advantage is due to<sup>222</sup> a connected operation<sup>223</sup> (ITA07/S809O(3)) and Condition D will be met.

Some or all of the foreign income used by T to acquire the yacht will be remitted.

The Manual does not consider whether it is some or all of the income which is remitted, which one might have thought an important issue. In principle, all of the income is remitted.<sup>224</sup>

Take the same facts in another order:

(1) T uses land owned by X rent-free for a period.

(2) After the end of that period, T transfers RFI to a company owned by X.

Condition D is not satisfied at stage (1) as there is no connected operation. There is no charge at stage (2): one could not say that X's property is enjoyed "in circumstances where there *is* [present tense] a connected operation." But if (as would normally be the case) there is a contract between X and T, there would be a remittance under conditions A and B.

### 17.30.3 Loan/gift to parent of company lender

The CG Manual provides another example. The facts (stripping out irrelevancies)<sup>225</sup> are:

---

222 "Due to" is an inaccurate paraphrase of the statutory language, but it does not matter.

223 HMRC do not identify the operation, but I think it is X's licencing the land to T; this is indeed a connected operation.

224 See 17.32.7 (Condition C and D: mount remitted).

225 The example in full (including its irrelevant detail) is as follows:

*Antonella*

**CG25343 Meaning of remitted to the UK: other reciprocal arrangements** [Nov 2019]

A has claimed remittance basis in 2009-10. She realises a foreign chargeable gain of £5 million in that year and uses it to buy shares in a company listed on the Zurich stock exchange. She enters into an agreement with her bank in Naples that an Italian subsidiary of the bank will acquire a house in London and allow A and her family to live in it rent-free: as consideration for this she agrees to transfer her Swiss shares to the bank. The family moves into the house on 3 April 2010 and A transfers the

T wishes to occupy a house in the UK.

T enters into an arrangement with X Ltd (not a relevant person) under which:

- (1) A subsidiary of X Ltd<sup>226</sup> (“the subsidiary”) acquires a house and allows T to live in it rent-free.
- (2) T transfers shares (derived from foreign chargeable gains) to X Ltd.

This is like the RDR Manual example above, except that the asset is lent to T by a subsidiary of X Ltd (not by X Ltd directly).

In my terminology, X Ltd is the condition-D person.

Let us ignore the implausibility of the facts. (In practice, the transfer might be the purchase price, in which case the subsidiary would hold the house on trust for T. Or the transfer might be rent. In those cases there is a remittance under usual principles.) Let us assume that the arrangement is an informal, non-binding, non-contractual one.

In that case condition B is not satisfied. The HMRC analysis on this point is:

Note that the conditions for a basic remittance are not met because the London property is not, and is arguably not derived from, the chargeable gain, and does not belong to a relevant person.

The Manual then makes a comment which I assume relates to remittance condition C:

The conditions for a remittance after a gift are not met because the gain or property derived from the gain is not gifted to the subsidiary but transferred for what we assume is full value.

If the transfer is for full value there is a remittance under remittance conditions A and B. But if it is a gift, then X is a gift recipient but the subsidiary is not.

However that may be, we turn to condition D. The HMRC analysis is as follows:

T is a relevant person, and she makes a disposition of property which

---

shares on 7 April.

<sup>226</sup> The Manual specifies that X Ltd is a bank. It is not conceivable that a bona fide bank could enter into an arrangement of this kind, but a friendly company might do so.

derives from her own chargeable gains. The disposition is made

- [i] to (if it is made directly to the subsidiary) or
- [ii] for the benefit of (if it is made to another company in X Ltd's group)

the person whose property is used to provide the advantage in the UK. There is therefore a qualifying disposition.

In fact the example specifies that the shares are transferred to X Ltd. The condition-D person (who provides the property) is the subsidiary. The transfer to a parent company is not for the benefit of a subsidiary. So there is no qualifying disposition. The rest of the HMRC analysis does not arise:

Property belonging to X Ltd's subsidiary is used in the UK and is enjoyed by a relevant person (eg T or her family). Furthermore, the process by which the London House is made available is closely linked<sup>227</sup> to the qualifying disposition ie the transfer of the shares to the bank, so it is a connected operation. So a chargeable gain of £5m is treated as accruing to T.

The HMRC example raises the timing issue:

T moves into the house on 3 April 2010 and T transfers the shares on 7 April.

The HMRC analysis states that the gain is treated as remitted in 2009/10. See 17.26.6 (Time of remittance).

It is difficult to escape the conclusion is that the author of the CG Manual example had only a tenuous grasp of the remittance basis - not altogether surprising given the difficulty of the topic.

### **17.31 Condition D transitional rule: Pre-2008 income/gains**

It will be recalled that Para 86(4) sch 7 FA 2008 provides:

Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as the “**para 86(4) amendment**”. Amended as para 86(4)

---

227 This wording is a paraphrase of the statutory language, but it does not matter.

directs, condition D (set out in s.809L(5)) provides:

Condition D is that property of a person other than ~~a relevant person~~ *the individual* (apart from qualifying property of a gift recipient)—

- (a) is brought to, or received or used in, the UK, and is enjoyed by ~~a relevant person~~ *the individual*,
- (b) is consideration for a service that is enjoyed in the UK by a ~~relevant person~~ *the individual*, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,

in circumstances where there is a connected operation.

This is consistent with remittance condition A and B rules for pre-2008 income.<sup>228</sup> Since the para 86(4) amendment applies only for s.809L, para 88 sch 7 FA 2008 has to make further amendments to s.809O ITA:

Section 809O of ITA 2007 (section 809L: dealings where there is a connected operation) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—

- (a) subsection (2) were omitted, and
- (b) the references in subsections (4) and (6) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 88 requires, s.809O(4) ITA provides:

A “qualifying disposition” is a disposition that—

- (a) is made by ~~a relevant person~~ *the individual*,
- (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c), and
- (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

The last para 88 amendment is also a straightforward consequential amendment. Amended as para 88 requires, s.809O(6) ITA reads

Enjoyment by ~~a relevant person~~ *the individual* of property or a service is to be disregarded in any of these cases—

- (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ *the individual*,
- (b) if full consideration in money or money's worth is given by a

---

228 See 17.9 (Relevant person: Pre-2008 income/gain).

- ~~relevant person~~ *the individual* for the enjoyment, or
- (c) the property or service is enjoyed by ~~relevant persons~~ *the individual* in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

## 17.32 Amount remitted

Section 809P(1) ITA provides:

The amount of income or chargeable gains remitted to the UK is to be determined as follows.

Five rules then follow.

### 17.32.1 *Actual income/gains remitted*

Section 809P(2) ITA provides:

If the property, service or consideration<sup>229</sup> is the income or chargeable gains, the amount remitted is equal to the amount of the income or chargeable gains.

That seems sensible, indeed self-evident.

### 17.32.2 *Change in property value*

Section 809P(3) ITA provides:

If the property, service or consideration derives from the income or chargeable gains, the amount remitted is equal to the amount of income or chargeable gains from which the property, service or consideration derives.

The RDR Manual provides:

**RDRM35030 remittances derived from foreign income/gains** [Jan 2019]

[1] ... Where, as in most cases, the property, service or consideration derives from a foreign currency, the taxable amount is the pounds sterling equivalent value (at time of remittance) of the amount of

---

229 The words “property, service or consideration” relate back to the wording of condition B: property means property brought/received/used in the UK, service means a service provided in the UK, and consideration means consideration for a service provided in the UK.

foreign currency (refer to RDRM31190 Exchange rates) used to acquire or pay for the property or service etc.

- [2] This means that where an item of depreciating value (such as a car) is brought to the UK the amount that is liable to tax is not the current value of the car but the amount of foreign income or gains from which the car derives (example 4).
- [3] For the same reason, where an item of appreciating value (perhaps a work of art) is brought to the UK, the taxable amount is the amount of foreign income or gains from which the property derived, and not its current market value (example 5).
- [4] The same principle applies where an investment is made in shares or other such financial instruments, and those shares are in, or are otherwise brought, to the UK. The chargeable amount is the amount of foreign income or gains from which the shares derived

...

Point [1] assumes that one translates foreign currency income into sterling at the time of remittance; this is almost certainly wrong.<sup>230</sup>

*Remittance of asset which has fallen in value*

Point [2] states that on remittance of an asset purchased from foreign income/gains, the amount remitted is the amount of foreign income/gains and not the value of the asset at the time of remittance, if lower. To hammer the point home, RDR Manual provides a straightforward example where the facts (stripping out irrelevancies)<sup>231</sup> are as follows:

**RDRM35030 remittances derived from foreign income or gains** [Jan 2019]

*Example 4 (Marianne)*

M purchases a car for £25,000 of foreign chargeable gains.

M later brings the car to the UK.

The market value of the car at that time is £14,000.

---

230 See 91.6 (Remittance basis: Conversion date).

231 The example in full (including its irrelevant detail) is as follows:

“In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.

Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000. ...”

The HMRC analysis is as follows:

The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

A remarkably unfair result; in practice the tax charge is likely to exceed the value of the car when remitted.<sup>232</sup>

In earlier editions of this work, I raised this challenge:

The author has not addressed the interesting questions which arise if M sells the car abroad. Suppose on the above facts M had sold the car abroad, and brought the proceeds of (let us say) £14k to the UK.

HMRC amended the Manual to address this, and boldly argue that the same unfairness results:

This would be the case even if M sold the car in Italy for its market value of £14,000 and brought the sale proceeds to the UK. The taxable remittance is still £25,000 of M's foreign gains as that is what the sale proceeds are derived from.<sup>233</sup>

The Manual gives a straightforward example to hammer the point home where the facts (stripping out irrelevancies)<sup>234</sup> are as follows

**RDRM35030 remittances derived from foreign income/gains** [Jan 2019]

Example 6 (Ben)

B purchases foreign shares for £100,000 from foreign income.

B later sells the shares for £75,000.

B remits the sale proceeds to the UK.

The HMRC analysis is as follows:

---

232 The unfairness is slightly masked by the implausible figures given in the example. Average depreciation of a three year old car is 60% so the tax charge on £25k arises on importation of an asset more likely to be worth £10k than £14k. But the values do not affect the principle.

233 This passage was added to the Manual in 2014.

234 The example in full (including its irrelevant detail) is as follows:

“B purchases shares in a French company using £100,000 of his unremitted foreign income. Unfortunately the company performs badly and several years later B sells his entire share holding for £75,000. He transfers the whole of the sale proceeds to his UK account and uses the money to fund his general living expenses in the UK.”

Although he has only transferred £75,000 to the UK we need to determine what the money derives from. In this case it derives originally from £100,000 of his unremitted foreign income. As a result if this B has made a taxable remittance of £100,000.

It is considered that the concept of derivation is flexible enough to reach the obviously sensible result that the amount remitted does not exceed the value or amount of what is actually remitted. On the facts of example 6, only £75k is remitted. The balance is attributable to the loss, which is not remitted.

The mixed fund rules support this, because whatever the constituents of the fund, one cannot remit income/gains more than the amount of the transfer.

On the facts of example 4, it is arguable that £14k of the gain is attributed to M's car, which is remitted, and the balance is attributable to depreciation which is not remitted. But the position is different from the case of a sale and remittance of money (example 6) because the loss has not been realised. If the asset were a chargeable asset, (not a car, which is outside CGT) the taxpayer could sell the asset when in the UK and realise an allowable loss. That suggests one should not credit the loss at the time of the remittance, or there would be a double deduction. So M would be best advised to sell her car and bring the proceeds to the UK.

#### *Remittance of asset which has increased in value*

Point [3] states that on remittance of an asset purchased from foreign income/gains, the amount remitted is the amount of foreign income/gains and not the value of the asset at the time of remittance, if higher. That is obviously right. The increase in value comes into charge on a disposal.

### 17.32.3 *Debt remittances*

Section 809P ITA provides:

(4) If the income or chargeable gains are used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains used; but this is subject to subsection (10).

(5) If anything deriving from the income or chargeable gains is used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or

chargeable gains from which what is used derives; but this is subject to subsection (10).

The RDR Manual provides:

**RDRM35040 remittances in respect of relevant debt** [Jan 2019]

[The Manual paraphrases s.809P(4)(5) and gives some straightforward examples:]

The first example is payment of interest on a relevant debt:

**Example 1 (Katrina)**

In May 2011, K, a remittance basis user, borrows £12,000 from an overseas bank to buy shares in a UK company. This is a relevant debt.

In tax year 2011-12 K uses £4,600 of her relevant foreign income to pay the interest and to repay some of the amount borrowed. The chargeable amount is £4,600.

The second example is payment of interest and repayment of capital of a relevant debt:

**Example 2 (Gary)**

On 6 April 2015, G, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull. Payments are due on the first day of each month from May 2015 onwards. The first 12 payments are on an interest-only basis.

G pays £1,000 interest each month to the overseas lender from his overseas account with the same bank, into which G ensures a sufficient amount of his relevant foreign earnings are paid directly to cover the repayments.

From 1 May 2016 the payments increase to a fixed amount of £2,500 each month as G starts to repay the capital amount of the loan as well as the interest. The payments continue to be met from the same account of relevant foreign earnings.

The loan is a relevant debt because it is respect of property (the apartment) which is used in the UK by a relevant person (G).

G has made taxable remittances in 2015-16 of £12,000, that being the relevant foreign earnings used to service the relevant debt. In 2016-17 G has made taxable remittances of £30,000, being the amount used to both service and repay the relevant debt.

The next two examples make the facts a little more complicated but the debt remittance principles are the same:

**Example 3 (Ali)**

A, a remittance basis user, borrows money.

A uses the loan to purchase an asset kept outside the UK.

A gives the asset to his wife W who keeps the asset outside the UK.

W brings the asset to the UK.

A satisfies the loan by transfer of another asset which is outside the UK, and which was purchased with £50,000 RFE and £30,000 of clean capital.<sup>235</sup>

The HMRC analysis is as follows:

The relevant debt is serviced by the oil painting, which derives, in part, from A's RFE (refer to the earlier example). A has made a taxable remittance in 2013-14 of £50,000.

Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.

**Example 4 (Francine)**

F, a remittance basis user, borrows £40,000 which she uses to pay the foreign contractor for services provided in the UK.

F transfers to the creditor a bond purchased out of foreign chargeable gains of £10k, as part repayment of the loan.<sup>236</sup>

---

235 The example in full, including its irrelevant detail, is as follows:

“A, a remittance basis user, purchases some sculptures in Sweden in October 2012 for £80,000; he takes out an interest-free (!) loan of £80,000 with his US bank to fund this purchase, repayable within 1 year.

In November 2012 he gives them to his wife as an anniversary gift. She initially keeps them at her mother's home in Stockholm, but 6 months later in March 2013 she decides to bring these sculptures to the UK to display in her UK garden.

In October 2013 A arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami. A had purchased the painting in May 2011, using £50,000 of his relevant foreign earnings and £30,000 of capital inherited from an uncle. ...”

236 The example in full, including its irrelevant detail, is as follows:

“F, a remittance basis user, has a Spanish-style courtyard created at her house in Brighton. She takes out an unsecured loan of £40,000 from her French bank which she uses to pay the specialist Spanish contractor.

F has several French government bonds, which she purchased entirely from her relevant foreign income, and a German government bond which she acquired using her foreign chargeable gains. These bonds are each worth £10,000.

In September 2010 F gives the German bond to her bank as part repayment of the loan. ...”

The HMRC analysis is as follows:

The relevant debt is serviced by the German bond which derives wholly from F's foreign chargeable gains, and is used outside the UK in respect of this relevant debt (refer to the earlier examples). F has made a taxable remittance in 2013-14 of £10,000.

#### 17.32.4 Debt remittance apportionment

Section 809P(4)(5) is the equivalent of s.809P(2)(3) for debt remittances, but here there is an apportionment rule. Section 809P(10) ITA provides:

If the debt is only partly in respect of<sup>237</sup> the property or service, the amount remitted is (if it would otherwise be greater) limited to the amount the debt would be if it were wholly in respect of the property or service.

Suppose:

- (1) T borrows £10m.
- (2) T remits £1m of the borrowed money to the UK.

The *entire* debt is a relevant debt.

(3a) T repays the entire borrowing out of income/gains.

The amount remitted is £1m.

(3b) Suppose instead T only repaid £1m or £2m of the debt.

There is still a remittance of £1m.

This example illustrates a planning point: one should avoid debts which relate *partly* to property brought/received/used in the UK. Instead, T should borrow so as to have two separate debts, one of £1m (remitted to the UK) and one of £9m (unremitted). Then the unremitted debt is *not* a relevant debt and can be repaid out of foreign income/gains.

The RDR Manual provides:

**RDRM35040 remittances in respect of relevant debt** [Jan 2019]

... Foreign income or gains may be used outside the UK to redeem or service a debt only part of which is a 'relevant debt' within the meaning

---

<sup>237</sup> Section 809P(10) refers to a debt *in respect of* UK property but the definition of relevant debt is one which *relates to* UK property. It is considered that the expressions are synonymous.

of ITA07/s809L(7). In such cases, the amount that is taxable as an ‘amount remitted’ is, if it would otherwise be greater, limited to the amount that is attributable to that part of the debt which is a relevant debt (ITA07/s809P(10)) (example 5)...

The Manual provides a straightforward example

**Example 5 (Karen)**<sup>238</sup>

In 2011/12 K, a remittance basis user, borrows £10,000 from a Jersey bank and uses the borrowed funds to pay £8,000 for services provided to a relevant person in the UK, and £2,000 for services provided out of the UK.

K repays the borrowing from her relevant foreign earnings.

The HMRC analysis is as follows:

K has made a taxable remittance in 2011-12 of £8,000 relevant foreign earnings, that being the part of the debt that is in respect of a service provided in the UK ... which is thus a ‘relevant debt’.

What about interest on the debt? The example avoids the question by stipulating, implausibly, that the bank borrowing is interest-free. It is suggested that there should be an apportionment, so (in the example of Karen) if the interest is repaid out of foreign income/gains, only 80% of the sum is regarded as remitted. But it does need a somewhat purposive construction to reach that result. It would be wise for Karen to take out two distinct loans, to avoid the issue.

### 17.32.5 *Security for debt: Amount remitted*

The s.809P(10) apportionment rule applies to partly relevant debts, ie where a relevant debt *relates* partly to property received in the UK. What if income/gains is *used* partly in respect of a wholly relevant debt, ie the debt relates wholly to property in the UK? The common case involves use of property as security for a relevant debt, which, since 2014, HMRC

---

238 The example in full (including its irrelevant detail) is as follows:

“In August 2011 K, a remittance basis user, uses an interest-free £10,000 overdraft facility on her Jersey bank account to pay £8,000 of UK school fees for her 14 year old daughter Lauren. The remaining £2,000 of the facility is used to pay for Lauren to attend a summer school in France organised by a French university.

K repays the overdraft from her relevant foreign earnings between August and November 2011. ...”

consider to be a remittance.<sup>239</sup>

The RDR Manual formerly provided:

**RDRM35050 Collateral in respect of relevant debt** [Jan 2019]

*The amount of the foreign income or gains that are so used in respect of the relevant debt will be restricted to the amount of the capital loaned, together with any accrued interest (where applicable). The amounts due will depend, to some extent on the terms on which the security is offered.*

HMRC gave a number of examples. The first is a straightforward charge over RFI of £160k to secure a relevant debt of £100k:

*Example 1 (Freda)*

*F, a remittance basis user takes out an interest-free loan for £100,000; with allegedly (?) no requirement for repayment until an indeterminate future date.<sup>240</sup> She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt.*

*F offers as collateral for the loan a French painting, currently in her Parisian apartment. She purchased this painting in an earlier tax year in which she was also a UK resident remittance basis user, using £160,000 of her untaxed relevant foreign income from that year. The painting is still worth £160,000. ...*

The HMRC analysis was as follows:

*F has used her foreign income as collateral, in respect of a relevant debt. The amount so used is 'capped' at the amount of the debt, which is £100,000 in this case.*

*The reason for this is obvious if you consider what would happen in the very unlikely event that the lender immediately 'seized' the collateral in the painting to repay the £100,000 debt in full. The lender would realise £160,000 from the painting; the lender would retain £100,000 to satisfy the debt owed and return £60,000 to F (ignoring accrued interest, penalties and service charges). So only £100,000 of the collateral is used in respect of the debt.*

HMRC considered a mixed fund charged as security for a relevant debt:

---

239 See 17.22 (Use as security for debt).

240 The significance of this is that granting the security constitutes use of the painting in respect of a relevant debt, so there is a remittance even applying the pre-2014 HMRC view.

***RDRM35270 Remittances from mixed funds - collateral in respect of relevant debt [Jan 2019]***

*When foreign income and gains are used as collateral for a relevant debt they are used ‘in respect of’ the relevant debt, so there will be a taxable remittance when the loan is brought to the UK.<sup>241</sup>...*

*Often the collateral offered will be an asset which is itself a mixed fund. In these circumstances the mixed fund ordering rules at section 809Q(4) apply to the asset offered as security. In such a case, the taxable amount is made up of the same amounts of capital and foreign income and gains that were used to purchase the asset in the first place.*

*The ‘transfer’ is the offering of the asset as collateral in respect of the relevant debt and any formal charge is registered to the lender (where appropriate). The analysis is carried out on the date immediately before the collateral is so offered.*

Discussing this, I commented:

This illustrates the difficulty of the HMRC current view, as granting a charge (which the author, using layman’s language, calls “offering an asset as collateral”) is not a transfer in the normal sense of the word. Nor is it possible to compute, in the normal sense, the amount of that transfer. Thus the application of the mixed fund rules requires some violence to language that the mixed fund rules employ.<sup>242</sup>

HMRC gave two more examples which I need not set out here.<sup>243</sup>

HMRC also considered the case of a debt charged over several assets (not comprising a single mixed fund):

*Example 3 (Freda)<sup>244</sup>*

*F, a remittance basis user receives an interest-free loan<sup>245</sup> of £100,000. She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt.*

*F gives, as collateral for the loan, a general right to the bank over her*

---

241 The text of this section has been revised to reflect the HMRC current view.

242 See 19.4 (Onshore transfers).

243 See the 2021/22 edition of this work 17.32.5 (Security for debt: Amount remitted).

244 This is a variant of *Example 1 (Freda)* above.

245 The grant of an interest-free loan from a bank seems somewhat implausible, unless the bank is owned by Freda or a connected person. The significance is that the loan is not commercial, so granting security over this kind of loan constitutes a remittance even applying the pre-2014 HMRC view.

*many current and savings accounts and investment portfolio held with them.*

*Ignoring accrued interest, the ‘cap’ on the amount of collateral regarded as used in respect of the relevant debt is £100,000.*

*The ‘transfer’ is the offering of the asset as collateral so an analysis of F’s accounts over which the charge is granted would be needed to analyse the credits into each account immediately before the date of transfer, in order to determine the constituent parts of each account for s809Q(4) purposes.*

*In these circumstances the terms and conditions surrounding the loan and the collateral offered should be examined carefully as this may prioritise the order of the accounts against which any ‘collateral’ charge will be taken; for example it may prioritise current or savings flexible accounts over high-interest period or notice accounts. The s809Q(4) analysis should reflect this priority.*

HMRC repeated the point in a meeting with the professional bodies. The note of meeting provides:

*HMRC confirmed that generally the examples in RDRM35270 continue to stand, so if there is contractual priority this will be respected.<sup>246</sup>*

HMRC quietly reversed their position in 2020. The Manual now provides:

**RDRM37050 Foreign income and gains as collateral [Dec 2020]  
Remittance basis clarifications (!)<sup>247</sup> ...**

*Where the overseas income and gains which are used as security for the relevant debt exceed the amount of the debt, is it HMRC’s practice to limit the amount of the remittance to the amount of the debt plus any accrued interest?*

Where the full amount of the loan has been brought to the UK the amount of foreign income or gains taxed as a remittance is not capped at the amount of the loan. The amount of the remittance will be the full amount of foreign income or gains that are used as collateral for the loan...

The change of practice also affects debts charged on several assets:

*Will HMRC look at any provisions in the arrangements between the taxpayer and the bank as to the priority of any security held by the bank*

---

246 ICAEW TAXREP 52/14 para 15.

247 See App 1.2 (Clarify/modernise/reform). This was published (co-incidentally?) on 18 December, so some time passed before the “clarification” was noticed.

*in assessing what has been remitted to the UK?*

*For example, A borrows £500,000 from a bank to purchase a property in the UK for £750,000. The bank takes a charge over the property but also has security over A's portfolio with the bank in Switzerland. The agreement with the bank however specifies that the bank must attempt to enforce its security over the property before it can enforce against the portfolio. As the value of the property is in excess of the amount of the loan, do HMRC accept that there is no remittance of any foreign income and gains contained in the portfolio?*

If the provision of the loan or the repayment terms are conditional on the availability of the foreign income or gains used as collateral, the foreign income or gains are used in respect of the debt and there will be a taxable remittance. In the above scenario, there will be a taxable remittance of the foreign income or gains in A's portfolio with the bank in Switzerland.

HMRC's customers may think that a major change such as this ought to have been announced, and preceded by consultation. Then thought would have been given to transitional issues. The professional bodies are left playing catch-up.

The position is said to be different if only part of the relevant debt is remitted:

Where only part of the loan has been brought to the UK, s809P (10) ITA 2007 caps the extent of the amount of the collateral remitted to the total of the loan brought to the UK. S809P (10) ITA 2007 applies only where part of the loan has been brought to the UK.

The anomalous distinction (one could use stronger language) suggests that the HMRC analysis must be flawed. The moral seems to be to borrow and leave £1 of the borrowing offshore, which avoids the need to challenge HMRC's new position, and the unfairness if HMRC were correct.

#### 17.32.6 *Cap on amount remitted*

Section 809P(12) ITA provides:

If the amount remitted (taken together with any amount previously remitted) would otherwise exceed the amount of the income or chargeable gains, the amount remitted is limited to the amount which, when taken together with any amount previously remitted, is equal to the amount of the income or chargeable gains.

How could the amount remitted (which must derive from the income/gains)

exceed the amount of the income/gains?

This could happen in cases of double representation, ie there are two assets which are both derived from the same income/gains,<sup>248</sup> and both assets are remitted.

Another case is if income is remitted (the remittance conditions are met) and then the remittance conditions are met again, in relation to the same income. Suppose:

- (1) Year 1: T (an individual taxable on the remittance basis) receives income in the UK. The income is remitted (“the first remittance”) and so subject to tax.
- (2) Year 2: The income is used in the UK, or is transferred out of the UK and brought to the UK again (“the re-remittance”).

The RDR Manual provides:

**RDRM35030 remittances derived from foreign income/gains** [Jan 2019]

...[The Manual paraphrases s.809P(12) ITA and continues:]. Where property is brought to or used in the UK by or for the benefit of a relevant person the amount that is liable to tax is the amount of the underlying foreign income or gains from which the property derives (whether directly or indirectly). The taxable remittance will only occur once; this will usually be the time the asset is first brought to, received by or used in the UK by a relevant person.

This is right. But the same will apply if the income/gains is *not* taxed on the first remittance, eg:

- (1) A remittance before 2008 of source-ceased income or of property enjoyed in specie.
- (2) A remittance by a non-resident of income/gains of a resident period.<sup>249</sup>

HMRC agree. December 2008 Q&As provides:

**Q9** If a taxpayer undertook a source ceasing exercise during the 2006-07 tax year and then remitted the proceeds before the 2008-09 tax year, if those funds were to then be taken back outside of the UK and re-imported, would this constitute a remittance. In other words, would the earlier source ceasing exercise be looked through despite its timing? It is

---

248 See 17.16.9 (Double representation).

249 The temporary non-residence rules would need consideration.

understood that interest/profit from any new investment would be a remittance.

A If the source ceased in 2006-07 and was remitted in 2007-08, then this did not count as a remittance and it will not count as a remittance if it is exported and subsequently re-imported.

HMRC do not cite a statutory authority to justify their answer; s.809P(12) ITA would do, though there are others as well.<sup>250</sup>

### 17.32.7 Condition C/D: Amount remitted

Section 809P ITA provides:

(6) In a case falling within section 809L(4)(a) or (b), the amount remitted is equal to the amount of the relevant income or chargeable gains.

(7) In a case falling within section 809L(4)(c), the amount remitted is equal to the amount of the relevant income or chargeable gains; but this is subject to subsection (10).

(8) In a case falling within section 809L(5)(a) or (b), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c).

(9) In a case falling within section 809L(5)(c), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c); but this is subject to subsection (10).

...

(11) In subsections (6) and (7) “relevant income or chargeable gains” means—

- (a) if the qualifying property falls within section 809N(7)(a), the income or gains—
  - (i) of which the qualifying property consists, or
  - (ii) from which the qualifying property derives;
- (b) if the qualifying property falls within section 809N(7)(b), the income or gains—
  - (i) of which the property given to the gift recipient consisted, or
  - (ii) from which that property derived;
- (c) if the qualifying property falls within section 809N(7)(c), the income or gains—
  - (i) of which the property given to the gift recipient consists, or
  - (ii) from which that property derives.

---

250 Para 86(2) sch 7 FA 2008 would also provide relief here: see 17.41 (Transitional: pre-2008 property).

The RDR Manual offers seven examples but the matter does not seem important enough to be setting out here.

#### 17.32.8 Sets

Section 809P(13) ITA provides:

If the property forms part of a set only part of which is in the UK, the amount remitted is such portion of what it would have been had the complete set been brought to, or received or used in, the UK when the part was as is just and reasonable (having regard to the part of the set which is there).

This is a mad level of micro-detail, and should be repealed. But in practice the point will rarely if ever arise.

### 17.33 Gain on disposal at undervalue

#### 17.33.1 *The CGT background*

CGT is charged on gains accruing to a person on a disposal of assets. Gains are normally computed as the actual consideration for the disposal less allowable expenditure.

In certain circumstances the consideration for a disposal is deemed to be market value consideration, not the actual consideration (if any).<sup>251</sup> In these cases a gain is deemed to accrue which is not a real gain (in the sense that the individual does not actually receive a sum which constitutes or represents the gain). I refer to this as a “**deemed gain**”.

The most common case of a deemed gain is a gift. In money terms (one might say, in economic reality, but I do not think that is a helpful concept) a gift cannot give rise to a gain, and normally gives rise to a loss. However, for CGT purposes a gift is treated as made for market value.

#### 17.33.2 *Remittance of deemed gain*

In the absence of express provision, the deemed gain arising on a gift could not be remitted, because it does not exist (in the sense that the individual does not receive a sum from the disposal which is the gain or derives from

---

251 See App.4.4 (Deemed MV consideration).

In certain circumstances a gain is deemed to accrue to an individual even though there is no disposal, but s.809T does not apply to that.

the gain). Accordingly, s.809T ITA provides:

- (1) This section applies if—
  - (a) foreign chargeable gains accrue to an individual on the disposal of an asset, and
  - (b) the individual does not receive consideration<sup>252</sup> for the disposal of an amount at least equal to the market value<sup>253</sup> of the asset.
- (2) For the purposes of this Chapter [Chapter A1 Part 14, remittance basis], treat the asset as deriving from the chargeable gains.

It is not expressly stated that s.809T only applies on a disposal made by an individual, but this is implied. Eg on a disposal by non-resident close company, conditions (a)(b) are met, if one reads the words literally:

- (a) s.3 gains may accrue to an individual who is a participator, and
- (b) the individual does not receive the consideration for the disposal.

But s.809T does not apply. Otherwise provisions such as s.3D(3)(a) TCGA would be unnecessary.<sup>254</sup>

### 17.33.3 *Gift of asset*

Suppose:

- (1) T (a remittance basis taxpayer) gives an asset (foreign situate) to a trust. A gain is deemed to accrue on the disposal as if the asset were sold for market value. (Assume the asset has risen in value and a deemed gain accrues.)
- (2) T (or a relevant person) receives the asset in the UK.

The deemed gain is remitted. This reverses the rule for the pre-2008 CGT remittance basis.

For the interaction with s.87 gains, see 57.7.6 (Payment from unremitted gains).

### 17.33.4 *Sale of asset at market value*

Suppose T sells an asset for market value. Then s.809T does not apply. It

252 “Consideration” here obviously means actual consideration, as opposed to deemed market value consideration under s.17(1) TCGA. (Though normally in the legislation the drafter states this expressly; eg s.165(7) TCGA.)

253 Defined s.809Z10 ITA: “In this Chapter ... “market value” has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act).”

254 See 60.24 (Section 3 remittance basis).

does not matter if T is connected with the purchaser. The purchase price is or (better) is derived from the gain accruing on the sale, but the asset itself is not (and is not derived from) the gain. So it does not matter if the asset is remitted.

Suppose T sells an asset and the purchase price is left outstanding as a loan. It is considered that T “receives” the consideration, for the benefit of the outstanding loan is the consideration.

### 17.33.5 *Sale of asset at undervalue*

Suppose T sells an asset at an undervalue. Assume for the purpose of discussion that the asset has a market value of £200 and a base cost of £50. So a deemed gain of £150 accrues on the disposal.

The asset is treated as derived from the chargeable gains, and there is a charge if the asset is remitted.

If the asset is sold for base cost, £50, it is suggested that the £50 is not derived from the deemed gain, so the £50 sale proceeds could be remitted tax free. But other views are possible.

What if the asset is sold at an undervalue, but for more than base cost, say for £100? In the absence of s.809T, I would say that the purchase price is in part derived from the gain. One might say that since the sale price is half the market value, half of the sale price represents the gain, ie £75. I prefer the view that the purchase price is £50 more than base cost, so that £50 of the purchase price is derived from gain. Does the rule in s.809T, that the asset is derived from the gain, mean that the sale proceeds are *not* derived from the gain? Logically that should follow, but if that were right then tax could be avoided by sales at a (marginal) undervalue. So the context shows that one should not carry the deeming so far.

The conclusion is that on a sale at an undervalue:

- (1) the asset held by the trust derives from the gain *and*
- (2) the sale proceeds (in part)

are both derived from the gain. However the cap on the amount remitted avoids double taxation.<sup>255</sup>

This rule applies to all sales at less than market value, even if accidental.

This rule applies if the sale is less than market value, even if it is 99% of the market value.

---

255 See 17.32.6 (Cap on amount remitted).

The rule applies even if the disposal is not between connected persons, though in practice this is not likely to arise because:

- (1) A disposal between unconnected persons is not likely to be at an undervalue.
- (2) If the purchaser brings the asset to the UK, that is not likely to be a taxable remittance (because the purchaser is not likely to be a relevant person in relation to the vendor).

### 17.33.6 *Transitional: Pre-2008 deemed gain*

Subject to immaterial exceptions, para 81 sch 7 FA 2008 provides:

The other amendments made by this Part of this Schedule have effect for the tax year 2008-09 and subsequent tax years.

A deemed gain accrued to an individual on pre-2008 gifts: it was just not remittable. At first sight this does not help. It is accepted that the ITA remittance basis governs pre-2008 income/gains. So after 2008/9 s.809T applies and the gain becomes remittable, though it qualifies for RP relief. It does not matter when (after 1965) the gain arose: gains from disposals made in the 1960s could now come into charge, though all records will have been long discarded. However HMRC do not take that view. The RDR Manual provides:

**RDRM31180 Foreign chargeable gains accruing on disposal made otherwise than for full consideration** [Jan 2019]

The new rule at s.809T ITA07 applies to disposals by remittance basis users on or after 6 April 2008.

## 17.34 Purchase of family home

Suppose:

- (1) T gives income/gains to T's son S, not a relevant person.
- (2) S buys the freehold interest of a house and uses the income/gains to pay the purchase price.

The topic raises many remittance issues, discussed throughout this chapter, so it is convenient to draw them together.

### 17.34.1 *Rent-free occupation*

Suppose S allows T to occupy the house rent-free. It is considered that S "uses" the house (the word "use" is wide enough to cover this even though

it would be more normal and better legal English to say S occupies or enjoys the use of the house). Accordingly remittance condition A is satisfied. The house is derived from the income/gains, but condition B is not satisfied because the property is not property of a relevant person.

Remittance condition C is satisfied, since the property is qualifying property of a gift recipient, and is used and enjoyed by a relevant person. So the purchase price income/gains is remitted.

### 17.34.2 *Lease for full consideration*

Now suppose:

- (1) T gives income/gains to T's son S, who uses it to buy the freehold interest of a house.
- (2) S grants a lease of the property to T for full consideration and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above). So remittance condition A is satisfied in relation to the lease. However the lease is not derived from the income/gains. So condition B is not satisfied. Of course funds T uses to pay for the lease are regarded as remitted.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not property of a relevant person so condition B is not satisfied.

Conditions C and D are excluded (even if they could otherwise apply) since the full consideration exemption applies.

### 17.34.3 *Lease not for full consideration*

Now suppose:

- (1) T gives income/gains to T's son S, not a relevant person, who uses it to buy the freehold interest of a house.
- (2) S grants a lease of the property to T for no consideration or for less than full consideration, and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above) So remittance condition A is satisfied in relation to the lease. If the transactions are part of an arrangement, the lease is derived from the

income/gains. So condition B is satisfied (as the lease is property of a relevant person). What is the amount remitted? It is the amount from which the lease is derived. It is suggested that that is not the full amount used to pay for the property, but only a part reflecting the value of the lease.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not the property of a relevant person so condition B is not satisfied.

Turning to remittance condition C, does T enjoy the lease for the purposes of remittance condition C? T does. At first sight this does not matter as the lease is not qualifying property of a gift recipient (it is not property of a gift recipient). The lease may (depending on the facts) however be qualifying property within s.809N(7)(c). If so the amount remitted is all the income/gains(not the value of the lease).

Next, does T use and enjoy the reversion? It is considered that T does, since the lease T enjoys is derived from the reversion, and the lease is the mechanism by which T enjoys the reversion. If that is right, then condition C is satisfied, since the reversion is qualifying property of a gift recipient.

#### 17.34.4 *Another analysis*

Another analysis is that the “property” is the physical house, not the legal interests in the property, but one should not disregard the most basic principles of the law of real property in construing a taxing statute, if any other approach is possible.

### 17.35 **School fees**

Suppose T wishes to pay the school fees of minor grandchildren. Assume the grandchildren are at school in the UK (otherwise there is no problem). A direct payment out of income/gains is a remittance as conditions A and B are satisfied.

Suppose T gives funds to T’s child (not a relevant person) and the child uses the funds to pay the fees. This is still a remittance as conditions A and B are still satisfied: the funds in the hands of the child are derived from the income/gains.

Suppose there is an informal arrangement under which:

- (1) T gives funds to T’s child;
- (2) the child will use *other* funds to pay the school fees.

This is caught by condition C because the funds used to pay the fees are

“qualifying property” within s.809N(7)(c). That is, it is used to pay the school fees by virtue of an operation which is effected “with reference to the gift of the property to the gift recipient”.

T must therefore make an unconditional gift to T’s child ie a gift such that the payment of the school fees is not with reference to that gift; in that case (assuming the fees are not paid out of the gifted property) there is no taxable remittance.

### **17.36 Remittance before income/gains arise**

Section 809U ITA provides:

Where—

- (a) income or foreign chargeable gains are treated as arising or accruing, and
- (b) by virtue of anything done in relation to anything regarded as deriving from the income or chargeable gains, the income or chargeable gains would otherwise be regarded as remitted to the UK before the time when they are treated as arising or accruing, treat the income or chargeable gains as remitted to the UK at that time.

This provision can apply to s.87 gains<sup>256</sup> where:

- (1) A beneficiary receives a capital payment in the UK in one year.
- (2) No s.87 gains accrue in that year, because there are no trust gains to which the capital payment can be matched.
- (3) Trust gains arise in a subsequent year, which are matched to the capital payment, so s.87 gains accrue in that subsequent year.

Similarly, this provision can apply to s.731 income<sup>257</sup> where:

- (1) An individual receives a benefit in the UK in one year.
- (2) No s.731 income arises in that year, because there is no relevant income to which the benefit can be matched.
- (3) Relevant income arises in a subsequent year, which is matched to the benefit, so s.731 income arises in that subsequent year.

These are cases where the individual may (but for s.809U) receive property in the UK (regarded as deriving from s.731 income or s.87 gains) in a year earlier than the year in which the income/gains are treated as arising.

---

256 See 57.19 (s.87 remittance basis).

257 See 47.39 (s.731 remittance basis).

Section 809U may also apply to accrued income profits, and, it is suggested, to trading income.<sup>258</sup>

### 17.37 Partnerships

This section discusses two related questions.<sup>259</sup> Assume P (a remittance basis taxpayer) is a member of a partnership.

- (1) *Remittance of funds transferred to partnership.* Suppose:
  - (a) P receives income/gains.
  - (b) P contributes the funds to the partnership, as partnership capital.
  - (c) The partnership brings the funds to the UK.
- (2) *Remittance of partnership income/gains.* Suppose:
  - (a) The partnership receives income/gains.
  - (b) The partnership does not distribute the funds to the partners, but brings the funds to the UK.

In these cases, is there a taxable remittance? The partnership itself is not a relevant person<sup>260</sup> but P is a relevant person and P's partners may be relevant persons too.

There are two possible views:

- (1) One regards P as owning a *distinct asset* (a chose in action) and not a share of the partnership assets. In that case:
  - (a) Funds contributed to the partnership are remitted if P receives the partnership share in the UK (because the partnership share is derived from P's income/gains).<sup>261</sup>
  - (b) Partnership income/gains brought by the partnership to the UK are not remitted.

258 Jane Kennedy (then Financial Secretary to the Treasury) said in parliament:

“[Section 809U] prevents tax arising on remittance to the UK in certain circumstances where items are remitted to the UK before the income or gain to which they relate is treated as arising. Under the original wording, such payments might in certain circumstances become chargeable before the tax year in which they arose. The amendment ensures that that cannot now happen.”

<http://www.publications.parliament.uk/pa/cm200708/cmpublic/finance/080619/pm/80619s02.htm> The same point was made in EN Remittance Basis Amendments 482 to 493. That is not quite correct; but it does not now matter.

259 Also see 17.20.8 (Borrowing for partnership share).

260 See 17.8 (Relevant person: Partnership).

261 Assuming (which is perhaps arguable) that receipt of a UK situate intangible asset counts as receipt in the UK for the purposes of remittance condition A.

- (2) One regards P as owning *a share of the partnership assets*. In that case:
- (a) Funds contributed to the partnership<sup>262</sup> are remitted if the partnership brings the funds to the UK.
  - (b) Partnership income/gains<sup>263</sup> are remitted if the partnership brings the income/gains to the UK.

One might describe the first view as being that partnerships are not transparent for remittance basis purposes, and the second view as one that partnerships are transparent. But that is just a convenient shorthand, not an exact statement of the statutory provisions.

#### 17.37.1 *Partnership opaque for remittance basis*

The starting point is to understand the legal nature of a partnership share; see 82.3 (Nature of partnership share) where I identify two possible analyses of a partnership share, which I call a chose in action analysis and a co-ownership analysis. The choice depends on the context.

In the context of remittances, the RDR Manual adopts the chose in action analysis:

**RDRM33530. Partnerships** [Jan 2019]

*Investment into partnerships*

When a partner makes a capital contribution to a partnership they acquire an asset under partnership law, namely an ‘interest’ or ‘share’ in the partnership which gives them rights to share in future profits and distributions (of their capital and any surplus) on dissolution of the partnership.

On this basis the RDR Manual adopts the non-transparent view:

**RDRM33530. Partnerships** [Jan 2019]

*... Offshore partnerships trading or investing in the UK*

... Offshore partnerships, whether trading or investment partnerships, may bring partnership funds into the UK to meet trading or investment expenses in the usual course of partnership business. As the funds are brought in by the partnership they are not brought in by a relevant person.

---

262 Or at least, the part of the funds attributable to the partnership shares of P and of other partners who are relevant persons.

263 Or at least, the share of the income/gains attributable to partnership shares of P and of other partners who are relevant persons.

In most cases there will be no benefit to a relevant person from the money or other property brought into the UK by the partnership, nor will a service usually be provided in the UK to or for the benefit of a relevant person, so Condition A of ITA07/s809L is not met.<sup>264</sup> Thus there will be no taxable remittance.

In short, in the Manual's view, partnerships are not transparent for remittance basis purposes (in the sense that remittance by the partnership is not remittance by the partners). The Manual refers to offshore partnerships, but the same must apply to UK partnerships.

The co-ownership analysis would give a different answer. But the context shows that the chose in action analysis is preferable, since in many common partnership situations, tracing from a partnership contribution to the partnership assets is simply impractical.

This conclusion is consistent with the rule that partnership income is regarded as income of the partners; in that sense partnerships are said to be transparent.<sup>265</sup> There is no contradiction, for the issues and statutory provisions are different: there is no general principle of income tax transparency which requires the same answer in every context.<sup>266</sup>

This conclusion is consistent with s.848 ITTOIA (partnership not an entity for IT purposes) as it is based on the nature of a partnership, and does not depend on a conception that a partnership is an entity; in any case, the purpose of s.848 relates specifically to assessment.<sup>267</sup>

For these reasons, the Manual's view is correct.

The RDR Manual adds four qualifications:

**RDRM33530. Partnerships** [Jan 2019]

... [1] In cases where there does appear to be a benefit to an individual partner (or to another relevant person) from money or other property brought into UK by the partnership, or from a service provided in the UK for which the partnership gives consideration then you should examine the transaction and the partnership documents very carefully to identify the source of the partnership funds.

This is considering whether a capital contribution to the partnership is

---

264 This is a loose paraphrase of remittance condition A, but the meaning is clear.

265 See 82.15 (Partnership transparency: IT/CT).

266 See 86.2.1 (Transparent/opaque terminology).

267 See 82.16 (Entity disregard rule).

remitted. More analytically, remittance condition A is satisfied if a partnership asset is used in the UK for the benefit of a relevant person, or if the partnership pays the consideration for a service provided in the UK to a relevant person. But remittance condition B is not satisfied, as even if the partnership asset or consideration derived from the individual's income/gains, the property is not property of a relevant person. Instead condition D needs consideration (see below).

The Manual continues:

**RDRM33530. Partnerships** [Jan 2019]

[2] The provision of the property or service by the partnership may be a remittance of that individual's 'share' in partnership profit. To the extent that the individual's share in partnership profit falls to be regarded as relevant foreign income (see below) there may be a remittance.

This is considering whether partnership income/gains are remitted.

The Manual continues:

**RDRM33530. Partnerships** [Jan 2019]

[3] You may also need to examine whether there is a true partnership, or whether in fact it is the individual's foreign income or gains that have been remitted.

Whether there is a partnership is a question of partnership law. That should not cause difficulties, if documentation and implementation are correct, but it depends on the facts.<sup>268</sup>

[4] Alternatively there may be a connected operation to which Condition D of ITA07/s809L(5) applies. ...

The Manual wisely does not explain any further; it is possible that remittance condition D could be satisfied, if the individual enjoys a benefit from partnership property in the UK, though the HMRC argument is not completely straightforward.

Suppose the partnership borrows and brings the borrowed money to the UK. The debt is a relevant debt. If the partnership then repays the debt out of property derived from income/gains of P, there is in principle a remittance under the debt remittance rules.

---

268 See 82.5.3 (Formation of partnership).

### 17.37.2 *Income/gains contributed to partnership*

The RDR Manual 33530 provides:

**RDRM33530. Partnerships** [Jan 2019]

... It follows [from the statement of the partnership law position] that a remittance basis user who uses his foreign income or gains to make a capital contribution to a UK partnership acquires a UK asset; namely a share in the UK partnership, in exchange for his ‘equity’ subscription in the partnership. Thus the foreign income or gains that he uses to contribute to the partnership will be a taxable remittance within ITA07/s809L.

This is so even if the individual places his investment into the partnership’s overseas account, and the UK partnership is only investing or trading overseas and not in the UK.

The text does not say what it means by “UK partnership” - presumably it means an interest in which is UK situate, on common law/international law principles: that is, a partnership which is managed and controlled in the UK.<sup>269</sup>

It is in principle correct that if a person who is not a partner uses offshore income/gains to acquire a share in a UK situate partnership, there is a taxable remittance.<sup>270</sup>

On the other hand, if all the partners of an existing partnership contribute further partnership capital in proportion to their partnership shares, no-one acquires a larger partnership share than before, and there is nothing received in the UK.

If a partner lends income/gains to a partnership, there might be a taxable remittance if the loan is a UK situate asset.<sup>271</sup>

### 17.37.3 *Partnership profits remitted*

Where partnership income is RFI<sup>272</sup> the same point arises. There is no taxable remittance if the partnership brings its income to the UK. A partner

---

269 See 97.33 (Situs of partnership share).

270 This assumes that receipt of a UK situate asset is a taxable remittance, ie is a receipt of an asset in the UK. The contrary might be argued: see 17.12.9 (Receipt of UK situate investment asset).

271 See 17.12.11 (Acquisition of UK debt).

272 See 82.18 (Partnership income: Remittance basis); 17.15.1 (What is the income?).

can only remit income to the UK after it is distributed to them from the partnership.

See too 19.8.4 (Income/gains of partnership): mixed funds.

#### 17.37.4 *Company held by partnership*

Suppose a partnership holds a company. The partners are participators in the company. The company will be a close company (or a non-resident close company), since partners are associates. Accordingly the company is a relevant person in relation to each of the partners. So there is a taxable remittance if income/gains are brought/received/used in the UK by the company; even though there would be no remittance if the same property was brought/received/used in the UK by the partnership which holds the company! This is the case regardless of the number of partners, because a company held by a partnership is close even if it has hundreds of unconnected partners. Remittance investment relief may mitigate this problem.

### 17.38 **Proceeds of divorce settlement**

Suppose T transfers income/gains to W as part of a divorce settlement. It is suggested that the funds in the hands of W are not derived from T's income. They are received for full consideration (in the general sense of that expression).<sup>273</sup> If that is right, remittance condition B is not satisfied even if:

- (1) W remits while still a relevant person (before decree absolute);
- (2) W applies the funds for the benefit of relevant persons (eg children or grandchildren of T under 18).

However in case HMRC do not agree, W should not bring the funds to the UK until after decree absolute, by which time she has ceased to be a relevant person; and she should ideally not use the funds for the benefit of relevant persons (in relation to H). Then there is clearly no taxable remittance.<sup>274</sup>

### 17.39 **Debit, credit and charge cards**

---

<sup>273</sup> See App.4.2.6 (Transfer on divorce).

<sup>274</sup> See 17.23 (Becoming/ceasing to be relevant person: conditions A and B). As to the relevant debt rule, see 17.20.11 (Debt imposed by law).

This section considers whether the use of debit, credit and charge cards involves a remittance. The starting point is to understand the legal nature of debit, credit and charge cards. The following analysis draws on *The Law of Bank Payments*.<sup>275</sup>

On the use of a card, three contracts come into being. For present purposes the most important terms of the contracts are as follows:

(1) Cardholder and supplier

This is the contract for goods or services between the cardholder and the person from whom the cardholder purchases goods or services (“the supplier”). This contract is the same whether the cardholder pays by card or by cash.

(2) Card-issuer and supplier

The card-issuer undertakes to honour the card by paying the supplier.

(3) Card-issuer and cardholder

(a) A *debit* card is issued only by a bank. The contract between the card-issuer bank and cardholder authorises the bank to debit the cardholder’s bank account with the amount of the card transaction.

(b) Charge and credit cards are different. Here the cardholder is required to make a payment to the card-issuer. A *charge* card requires the cardholder to repay the balance outstanding after a set period.<sup>276</sup> A *credit* card allows the cardholder extended credit.

It is necessary to distinguish between use of cards to obtain (1) cash, and (2) goods or services.

### 17.39.1 *Card used to obtain cash*

If a debit card is used to obtain cash in the UK from a foreign bank account which is in credit,<sup>277</sup> and the card is used at a branch of the bank which

---

275 Brindle & Cox, (5<sup>th</sup> ed., 2017), para 4-007. In any particular case it is strictly necessary to review the specific terms governing the card concerned, but I expect that will not usually make any difference in practice. Store-issued cards are not discussed here.

276 In the case of a bank-issued credit card, the issuer is normally authorised to debit the cardholder’s bank account to meet a debt due on the card. But in practice this facility is not used unless needed (or the card effectively becomes a debit card).

277 If the effect of use of the card is to put an account into debit, there is obviously no remittance on ordinary principles, though the relevant debt rule will in principle apply when the overdrawn account is repaid.

issued the card, then there is clearly a remittance of the money. The same applies if cash is withdrawn from a bank which is not the card-issuing bank, because the third party bank acts as the agent for the card-issuing bank.

The use of a *charge* card to obtain cash in the UK is likewise a remittance. The time of the remittance is when the sum is debited from the individual's bank account (assuming the account is in credit); not when the cash is obtained by using the card. The position is the same if an individual uses a *credit* card to obtain cash in the UK.

### 17.39.2 *Card to buy goods/services*

Where a debit card is used to obtain services provided in the UK, remittance condition A is satisfied. Payment to the card issuer out of income/gains satisfies remittance condition B.

Where a debit card is used to obtain goods provided in the UK, remittance condition A is satisfied, but not if the goods are exempt property, which will quite often be the case (clothes, watches, jewellery, or items under £1k).<sup>278</sup> Where that relief does not apply, payment to the card issuer out of income/gains would satisfy remittance condition B.

### 17.39.3 *HMRC view*

The RDR Manual provides:

#### **RDRM36130 Credit Cards and Debit Cards [Jan 2019]**

##### *Credit card issued in the UK*

If a taxpayer who is chargeable on the remittance basis uses a UK credit card to pay for goods or services, either in the UK or overseas and he or she subsequently settles their credit card bill using foreign income or gains, the payment is a taxable remittance.

The remittance does not have to be received in the UK by the taxpayer, it is sufficient that it is received by the credit card company in the UK.

HMRC do not say why this is so, but perhaps the argument is that the money is used or brought to the UK by a relevant person. This is not the case.<sup>279</sup> However a remittance basis taxpayer should avoid a UK credit card in order to avoid dispute.

##### *Credit card issued by an overseas bank or other financial institution*

---

278 See 18.29 (Exempt property).

279 See 17.12.4 (Property used in UK).

Where an overseas credit card is used in the UK, the cardholder is effectively authorising the credit card company to pay the bill for the goods or service in just the same way as if they had instructed the bank to make a payment directly to the person supplying the goods or services. The terms of credit card agreements may differ as to the moment of “indebtedness” between the cardholder and the credit card company. However the use of the credit card to pay for goods used or received in the UK, or services provided in the UK by, to, or for the benefit of a relevant person will create a debt.

The use of the individual’s untaxed foreign income or gains to pay the credit card company in respect of the debt will be a taxable remittance. Interest and other such charges should be apportioned accordingly between UK and non-UK goods and services. In most cases a straight proportional split of the interest against each type of expenditure will be acceptable; for example if £400 of the debt relates to UK goods which are taxed as a remittance and £600 to non-UK goods and there is an interest charge in relation to that £1,000 debt of £10, then £4 of the interest is also a taxable remittance. However some cards may apply different rates where cash is withdrawn, or depending of date of purchase, in which case the taxpayer will need to compute the interest due on the “relevant debt” part of the payment only.

**Note 1:** This section may apply to any credit card debt which the individual satisfies using their foreign income or gains, even if they are not the cardholder.

**Note 2:** If an overseas credit card is used abroad and the account is settled direct to the card company out of overseas income, no liability to UK tax will arise. But if an asset purchased using the card is brought to the UK and subsequently sold here, there will be a taxable remittance, at the date of disposal, up to the amount of any foreign income used to settle the original account.

*Debit card issued by an overseas bank or other financial institution*

Payments for goods or services that are made using a debit card (for example a Visa debit card or one issued under the brand name “Cirrus”) issued by an overseas financial institution are treated in exactly the same way as a cash transaction.

This means that when goods or services are purchased in the UK<sup>280</sup> using a debit card, a taxable remittance is made to the extent of the amount of

---

280 Author’s footnote: More analytically, in the language of condition A, when goods are received in the UK or services are provided in the UK.

any overseas income or gains in the bank account. Likewise any cash withdrawals from shops or ATM machines in the UK are taxable cash remittances.

Payment by cheque drawn on an overseas account or by electronic transfer of any kind are also treated in exactly the same way as cash and are potentially taxable remittances of overseas income and gains.

## 17.40 Gift to charity

A remittance basis taxpayer (“T”) making a gift to charity<sup>281</sup> should give:

- (1) money (including foreign currency), qualifying for gift aid relief or
- (2) foreign assets, qualifying for qualifying investment donation relief.<sup>282</sup>

The gift may be made out of income/gains, or property derived from income/gains. If the sum given is money the gift should be to a bank account in the name of the charity outside the UK.<sup>283</sup>

For the interaction of gift aid and the remittance basis claim charge, see 16.12.5 (Interaction with Gift Aid).

### 17.40.1 *Is charity a relevant person*

Suppose:

- (1) T gives assets to a charity which receives the assets offshore.
- (2) The charity brings the assets to the UK.

There is in principle no taxable remittance, unless the charity is a relevant person in relation to T.

A charitable company would be a relevant person if it is a close company and T or some other relevant person is a participator.<sup>284</sup>

281 This includes some EU and EEA charities: see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), Chapter 3 (Definitions of “Charity”) online version <https://www.taxationofcharities.co.uk>

282 For these reliefs, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), Chapter 15 (Cash Gifts from Individual to Charity (Gift Aid)) and Chapter 21 (Relief for Gift of Shares and Land to Charity) online version <https://www.taxationofcharities.co.uk>

283 I understand that the CAF maintain an offshore account for this purpose (and no doubt some other charities do the same). This is not strictly necessary: see 17.12.7 (Gift to non-relevant person); but HMRC do not agree with that view.

284 See 17.4 (Relevant person: Companies). There is a reasonable argument that a charitable company cannot be close, but it would be safer to assume that it may be close: see 99.23.10 (Member of charitable co).

A charitable trust would be a relevant person if T or some other relevant person is a beneficiary.<sup>285</sup> No individual has a legal or equitable (beneficial) interest in a charitable trust, so in the strict sense a charitable trust has no beneficiaries:

Individuals may benefit from the application of trust moneys but they are not, as individuals, the beneficiaries of the trust and may not enforce its terms.<sup>286</sup>

There is a statutory definition but that makes no difference. Section 809M(3)(e) ITA provides:

“beneficiary”, in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement.

It is possible (at least theoretically) that (say) the individual becomes destitute and a charity whose objects include the relief of poverty makes them a grant. However that does not bring the individual within the definition. One must say:

- (1) The benefit is incidental (the object of the charitable trust being the relief of poverty, not to benefit the individual) and incidental benefits should be disregarded;<sup>287</sup> or
- (2) This possibility is not included in the word “may”.<sup>288</sup>

285 See 17.5 (Relevant person: Trusts).

286 *Re Crown Forestry Rental Trust, Latimer v IRC* [2004] 4 All ER 588 at [29]. Likewise Law Commission, *Capital and Income in Trusts: Classification and Appointment* Consultation Paper No. 175 (2004) para 6.16: “The ‘beneficiary’ [of a charitable trust] is at all times the public (although the identity of the individuals who incidentally benefit from the carrying out of the charitable purpose may not remain constant).”

Likewise *AG v Cocke* [1988] Ch 414 at p.419: “... the nonsense of alleging that there is any beneficiary in any meaningful sense of that word under a public charitable trust of this nature. It seems probable to me that in almost all charitable trusts there are no individual beneficiaries.”

I stress this because statute does sometimes refer to “beneficiaries” of a charity, eg: s.525(1)(b) ITA, s.561 ITA; s.117 Charities Act 2011. These are examples of the word being used in a loose sense, where it may apply in the context of charitable companies as well as charitable trusts.

287 See 47.5.9 (School/university fees).

288 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 13.11 (What does a settlor exclusion clause cover?).

If that were wrong, then (in the absence of a settlor exclusion clause) every charitable trust is within the scope of s.624 ITTOIA is a settlor-interested trust; which cannot be correct. The definition must be read in its context. The purpose is to include discretionary beneficiaries or persons who may be added to the class of beneficiaries.

So a charitable trust is not a relevant person. This is the case even if the individual is a trustee or owner and director of a corporate trustee of the charity. If limited liability is needed, the trust may have a corporate trustee.

What about a company wholly owned by a charitable trust (“a subsidiary company”)? The charity trustee is a participator, but it is not a relevant person. For the same reason, s.809L(2)(h) will not apply.<sup>289</sup> So the subsidiary company of a charitable trust is not a relevant person. I mention one exception for completeness: a loan creditor is a participator, so the subsidiary company is a relevant person if the individual (or any other relevant person) is a loan creditor of the subsidiary company. In practice funding for the subsidiary company will usually come from the charity, not from loans directly from the individual or other relevant persons, so this should not be a problem.

Outstanding loans from the individual to the charity would need further consideration.

#### 17.40.2 *Gifts to charity: Reform*

A rule that a charity is not a relevant person would be sensible and avoid the current illogical distinction between charitable trusts and charitable companies. But if (as advocated in this book) the definition of relevant person was cut back to individuals closely connected to the individual, this problem would fall away.

HMRC say:

2.91 A number of responses from the arts and charity sectors suggested that the business investment relief<sup>290</sup> should be extended to allow non-domiciles to bring overseas income and gains to the UK tax-free for the purpose of making donations to, or investments (?) in, UK charities.

---

289 See 17.6 (Body connected with trust).

290 As far as I can see, the proposal has nothing to do with business investment relief; the proposal was framed that way because it was made in the context of a consultation on that relief.

I suspect, though it is not completely clear, that the suggestion was that a gift directly to a UK bank account of a charity should not be regarded as a taxable remittance. That reform would make it unnecessary for charities to maintain a foreign bank account. That seems in principle sensible,<sup>291</sup> but HMRC rejected it:

**Government response**

2.92 The Government is committed to encouraging philanthropy. However, there are already tax-efficient ways for non-domiciles to make donations to UK charities<sup>292</sup> and the Government has not seen any compelling evidence that extending the business investment relief in the way suggested would lead to a significant increase in the level of donations to UK charities by non-domiciles. It is also very likely that complicated legislation and anti-avoidance provisions would be required. The Government therefore does not intend to take any further action on this issue at the present time...<sup>293</sup>

Thus there is no current prospect of reform.

**17.41 Transitional: Pre-2008 property**

---

291 There are two complications. (1) If one is going to change the rule, there is no good reason to limit the change to charities. The same rules should apply to a payment to the bank account of a non-charity, for instance, a gift to a non-relevant person should not have to be made via a foreign bank account. The point illustrates how well meaning reform proposed special interest groups can complicate matters as they may fail to look at the broad picture. (2) The proposal assumes that at present a payment to a UK bank account is a remittance; that is the HMRC view, but it is not correct. see 17.12.7 (Gift to non-relevant person); So what is needed is a change of practice, not a change in the law.

Still, it could all be sorted out easily enough.

292 It does not say, but presumably this is a reference to planning by a gift to a foreign bank account.

293 The paragraph concluded “but [the Government] will consider how to increase awareness of ways for non-domiciles to make tax-efficient donations under the existing rules.” Nothing was done. Perhaps that was not intended seriously. Or perhaps the Government realised that the current rules are so absurd that the less that is said about them, the better.

HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (2011).

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

Para 81 sch 7 FA 2008 provides the starting point:

The other<sup>294</sup> amendments made by this Part of this Schedule [ie Part 1 which sets out the provisions discussed in this chapter] have effect for the tax year 2008-09 and subsequent tax years.

17.41.1 *Pre-April 08 remittance: Para 86(2) relief*

Under the pre-2008 RFI remittance basis, there was no remittance of RFI if property was remitted *in specie* (not in the form of money). This is now caught by remittance condition B.

Para 86 sch 7 FA 2008 provides a transitional relief:

(1) Section 809L of ITA 2007 (meaning of “remitted to the UK”) has effect subject to this paragraph.

(2) If, before 6 April 2008, property (including money) consisting of or deriving from an individual’s relevant foreign income was brought to or received or used in the UK by or for the benefit of a relevant person<sup>295</sup>, treat the relevant foreign income as not remitted to the UK on or after that date (if it otherwise would be regarded as so remitted).

I refer to this as “**para 86(2) transitional relief**” and I refer to the asset brought/received/used in the UK as “**the UK asset**”.

The UK asset may be any property, including money. At first sight, the words “including money” seem otiose: the word “property” alone would include money. But para 86(3) transitional relief (discussed below) refers to “property other than money” and (as it was desired to apply para 86(2) transitional relief to money brought to the UK before 2008), it made some sense for the statute refer expressly to property including money, if only for clarity. That avoids any inference that money would not be within para 86(2).

Para 86(2) transitional relief continues to apply even if the UK asset is sold. HMRC appear to accept this in relation to para 86(3) transitional relief (see the example of Heidi, below) and the same must apply in relation to para 86(2). The result is something of a windfall, but there it is.

---

294 The word “other” excludes provisions concerning employment-related securities, not discussed here.

295 The restricted definition of “relevant person” in relation to pre-6 April 2008 income does not apply here; see 17.9 (Relevant person: Pre-2008 income/gain).

The RDR Manual provides:

**RDRM31460 Property derived from RFI not treated as a remittance**

**(1)** [Jan 2019]

*Background*

The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. In certain situations, the operation of the previous remittance rules in respect of relevant foreign income meant that it could be brought to the UK without triggering an immediate tax charge.

As an example, if an asset such as a car was purchased abroad using relevant foreign income and the car was then brought into the UK, there would be no income or capital gains<sup>296</sup> tax charge when it is brought in. Instead the charge would only occur if/when the asset was sold or otherwise realised for cash in the UK (also refer to RDRM31250 Changes to old regime - cash only).

Property consisting of, or deriving from, relevant foreign income from tax years up to and including 2007-08 may have been brought into the UK prior to 6 April 2008, and the transitional provisions deal with these situations.

*Transition*

The transitional position is that the new rules contained in s809L do not have effect and that property brought to the UK is not treated as a remittance where:

- Property, including money, was acquired either directly or indirectly using relevant foreign income RDRM31140 and was brought to, received, or used in the UK before 6 April 2008.

*Effect*

Relevant foreign income brought to or used in the UK by the individual or any other relevant person before 6 April 2008 is not regarded as remitted under s809L after 6 April 2008 even if it is still in the UK. So in the example of the car above, even though it is still used in the UK by a relevant person on or after 6 April 2008 it will not be treated as a remittance under s809L.

Also, the same money or property can be sent or taken outside the UK and then brought in again. It will not be regarded as a remittance when brought in a second or subsequent time. ...

---

296 There is no question of a CGT charge if the car is purchased out of RFI, so the words “or capital gain” are irrelevant. But it does not matter.

The Manual goes on to explain why the transitional relief is restricted to RFI:

Note: This transitional provision applies only to relevant foreign income because the pre 6 April 2008 position for employment income and capital gains was different. These were always chargeable even if remitted in the form of property rather than cash.

It is debatable whether this correctly states the pre-2008 law, but it does not now matter.

Suppose:

- (1) T borrowed to purchase an asset and acquired the asset before 6 April 2008.
- (2) T receives the asset in the UK after 6 April 2008.
- (3) T repays the borrowing out of RFI after 6 April 2008.

Para 86(2) transitional relief does not apply because the purchased asset is not derived from RFI.

#### 17.41.2 *Pre Mar 08 acquisition: Para 86(3) relief*

Para 86(3) sch 7 FA 2008 provides:

If, before 12 March 2008, property (other than money) consisting of or deriving from an individual's relevant foreign income was acquired by a relevant person<sup>297</sup>, treat the relevant foreign income as not remitted to the UK on or after 6 April 2008 (if it otherwise would be regarded as so remitted).

I refer to this as “**para 86(3) transitional relief**”.

Para 86(2) transitional relief applies where property (including “money”) was *remitted* before 6 April 2008.

Para 86(3) transitional relief where property (excluding “money”) was *acquired* before 12 March 2008, regardless of the date of remittance.

The RDR Manual provides:

**RDRM31470 Property derived from RFI not treated as a remittance (2)** [Jan 2019]

[The Manual repeats the text of RDR Manual 31460 and continues:]

---

297 The restricted definition of “relevant person” in relation to pre-6 April 2008 income does not apply here; see 17.9 (Relevant person: Pre-2008 income/gain).

***Transition***

The transitional position is that the new rules contained in s809L do not have effect and that property brought to the UK will not be treated as a remittance where:

- property (other than money) was acquired either directly or indirectly by a relevant person using relevant foreign income before 12 March 2008 and is brought to or received in the UK after 5 April 2008.

The exclusion of money is important as it ensures that income arising from sources that have ceased is subject to the rule changes.<sup>298</sup> See s809Y ITA 2007 for the definition of money in these circumstances.

***Effect***

This provision is similar to that described in RDRM31460. However this provision applies only to the purchase of property abroad before 12 March 2008 using relevant foreign income, where that property remained abroad and was not brought to or used in the UK before 6 April 2008.

***Example 1*** (Heidi)

H bought a car in Germany on 15 October 2007 using her relevant foreign income.

She kept the car at her German apartment until May 2009 when she decided to bring it to the UK to use here. Under the previous rules there would have been no remittance until the car was sold in the UK.

The HMRC analysis is as follows:

Under the new rules at s809L the car is regarded as derived from the relevant foreign income and so, without this transitional rule, there would be a taxable remittance of that relevant foreign income in May 2009.

***Example 1A*** (Heidi)

As for example 1 but this time H decides that she needs a bigger car. In August 2009 she sells her car in Germany and brings the proceeds to the UK.

The HMRC analysis is as follows:

The proceeds from the sale of the car derive from H's relevant foreign income and would be regarded as a taxable remittance to the UK under the new rules at s809L. But as H's car (the property) was acquired before 12 March 2008 the transitional rule at paragraph 86(3) applies and what would be regarded as remitted is treated as not remitted. The money from the sale of the car that H brings into the UK is not therefore a taxable

---

298 Author's footnote: I am unable to understand this sentence.

remittance.

There will be no foreign chargeable gain on the disposal of the car because her private motor vehicle is not a chargeable asset.<sup>299</sup>

Since para 86(3) relief applies to property “other than money” the definition of “money” is important. Para 86(5) provides: “money” has the same meaning as in s.809Y ITA; see 18.30.2 (“Money”).

If para 86(3) is taken literally, it disapplies the remittance basis for all RFI held in non-“money” form before 12 March 2008! For instance, it would apply to RFI invested in shares.

The possibilities are:

- (1) “Property (other than money)” should be taken literally, ie any form of property other than “money” (as defined).
  - (2) “Property (other than money)” should be taken to refer to chattels (as the drafter of the RDR Manual perhaps assumes).
- (1) Solution (1) is far reaching, and the reader may wonder whether it represents the actual intention of the drafter. Of course, the FA 2008 was enacted in such a rush that one can safely say that no-one carefully formulated any intention at all on the extent of para 86.
- (2) One might infer from the RDR Manual that HMRC intended para 86(3) to apply to RFI used to purchase chattels; but the Manual was written much later, and there was no clear statement at the time the Act was passed, so that may be an afterthought. It is also inconsistent with the words “other than money”. To read the section in that way amounts to legislation and not construction.

It is considered that solution (1) is to be preferred.

## **17.42 Transitional loan relief: Pre-2008 loans**

---

299 The RDR Manual is less clear-cut on the position if there is a sale of the asset:

**“RDRM36230. Cash only** [Jan 2019]

Under the transitional rules introduced in FA 2008 ... any asset purchased out of untaxed relevant foreign income which an individual owned on 11 March 2008 remains exempt from a charge under the remittance basis, for so long as that individual owns it, even if that asset is outside the UK and is imported at a later date. Any asset in the UK on 5 April 2008 is also exempt from a charge under the remittance basis for so long as the current owner owns it, even if that asset is later exported and then re-imported.”

Para 90 sch 7 FA 2008 provides a relief which I call “**transitional loan relief**”. Para 90(1) provides:

This paragraph applies if—

- (a) before 12 March 2008, money was lent to an individual outside the UK,
- (b) the loan was made for the purpose of enabling the individual to acquire an interest in residential property in the UK (and for no other purpose), and
- (c) before 6 April 2008—
  - (i) the money was received in the UK,
  - (ii) the individual used the money to acquire an interest in residential property in the UK (“the interest”), and
  - (iii) repayment
    - [A] of the debt for the money (“the debt”), or
    - [B] of payments made under a guarantee of that repayment (“the guarantee”),<sup>300</sup>
 was secured on the interest.

Para 90(2) provides the relief:

Relevant foreign income of the individual used outside the UK before 6 April 2028 to pay interest on the debt is treated as not remitted to the UK.

The individual does not have to occupy the relevant property. However transitional loan relief is restricted in important ways:

---

300 Para 90(6) sch 7 FA 2008 defines “guarantee”:

“In this paragraph ‘guarantee’ includes an indemnity, and ‘guaranteed’ is to be read accordingly.”

March 2009 Q&As provides:

**Q20:** We would also welcome confirmation that the provisions in paragraph 90(1)(c)(iii) apply to a non-UK loan drawn down before 12 March 2008 where there are two (or more) guarantees in place for repayment of the debt, of which only one is secured on the UK residential property.

**A:** We can only reply in general terms to this query. The way in which this provision will apply will be determined in practice by the details of the particular loan or guarantee transactions in question. We would generally treat repayments of a debt secured on the property itself as falling within the provisions of paragraph 90 regardless of what guarantees might also exist. Likewise, any repayments made under such a guarantee will also be covered by the paragraph. However, any repayments made under a guarantee which is not secured on the UK property will not be covered.

- (1) The relief applies only to RFI; it does not apply if employment income or gains are used to pay the interest.
- (2) The relief applies only to loans for residential property; it does not apply even to loans to pay home improvements or SDLT.
- (3) The relief applies only to secured loans.
- (4) The relief applies only to loans by individuals, not if the borrowing is by a trust or company.

Suppose:

- (1) H borrowed before 2008 to purchase property.
- (2) W used her RFI to pay interest on the loan.

Transitional loan relief does not apply as W is not the individual to whom the money is lent.

The effect of the relief in some cases will be to impose a severe tax penalty on a foreign domiciliary who wishes to move house. It also makes re-financing almost<sup>301</sup> impossible as the relief ceases to apply.

#### 17.42.1 *Refinancing pre-2008*

Para 90(4) sch 7 FA 2008 provides:

If—

- (a) before 12 March 2008, money was lent to the individual outside the UK (“the subsequent loan”),
- (b) the subsequent loan was made for the purpose of enabling the individual to repay—
  - (i) the loan mentioned in sub-para (1), or
  - (ii) another loan in relation to which sub-paras (2) and (3) apply (by virtue of this sub-paragraph),and for no other purpose, and
- (c) before 6 April 2008—
  - (i) the individual used the money to repay the loan referred to in para (b)(i) or (ii), and
  - (ii) repayment of the subsequent loan, or of payments made under a guarantee of that repayment, was secured on the interest,

sub-paras (2) and (3) apply in relation to the subsequent loan (and for this purpose references there to the debt or the loan are to be read as

---

301 It would be possible for the creditor to assign the benefit of the loan, which may allow some scope for refinancing.

references to the subsequent loan).

### 17.42.2 *What is loan made for*

March 2009 Q&As provides:

**Q19:** It would be helpful to understand more fully the meaning of the requirement in paragraph 90(1)(b) that the loan was made for the purpose of acquiring an interest in residential property “and for no other purpose” and in particular to what extent any other purpose might cause the whole loan to fall outside paragraph 90.

In a situation where money is lent before 12 March 2008 from a non-UK bank to an individual (resident but not domiciled in the UK) outside the UK under a facility letter for £5 million. £4.5 million of the facility is initially drawn down and the money used by the individual to purchase a residential property in the UK. Assume for these purposes that the loan was secured on a UK residential property.

Subsequently (and before 12 March 2008) a second tranche of £0.5 million was drawn down under the same loan facility, also outside the UK. The money from the second draw down was used to refurbish the residential property purchased by the first draw down.

**A:** The effect of paragraph 90(1) is to provide transitional provisions for loans made for the purpose of acquiring an interest in residential property in the UK. In this scenario, there are effectively two separate loans, even though they were made under a single facility letter: it is the drawdown of the money rather than the facility letter which constitutes the lending of the money. Therefore the first £4.5m drawn-down was money lent to the individual before 12 March and used to purchase a UK residential property and for no other purpose and was secured on that interest. That being the case, the transitional conditions will apply if, and to the extent which, relevant foreign income is used to pay interest on the debt.

However, because the second £0.5m tranche of money was used to refurbish the property rather than to acquire an interest in it, it does not meet the conditions set out paragraph 90(1)(b). Therefore, any relevant foreign income which is used to pay interest on this part of the debt will be treated as a taxable remittance in the UK.<sup>302</sup>

---

302 The RDR Manual provides:

**RDRM31501 Transitional Provisions: RFI and offshore loans** [Jan 2019]

**Example 1** (Jennifer)

Before 11 March 2008 J draws down £100,000 from a mortgage loan with a non-UK bank that is secured on a residential property in the UK, with interest

What if a loan meets the conditions in part? It appears that HMRC accept there can be an apportionment. March 2009 Q&As provides:

**Q21:** We would welcome guidance on the principles for calculating the interest on that part of the debt which can be paid from relevant foreign income of the individual outside the UK without triggering a taxable remittance (under paragraph 90(2)). We suggest a reasonable approach is to calculate the interest element based on the loan capital ratio (ie that part of the loan which meets the paragraph 90 conditions over total capital of the loan facility), and apply that ratio to the total amount of interest due.

**A:** The approach you suggest is, in broad terms, one which HMRC would consider acceptable, with the obvious caveat that the actual approach in any specific case would depend entirely on the terms of the loans.

### 17.42.3 *When is loan made*

December 2008 Q&As provides:

**Q27 Remittance basis - offshore borrowing** If a mortgage was arranged and contracts for the purchase of the relevant property were exchanged in October 2007 but completion was not until March 31 2008 and the mortgage funds were not drawn down until completion, would this be considered to be an existing mortgage as at 12 March 2008?

HMRC refuse to answer the question:

**A** The conditions for the grandfathering relief to run would only be met if the “lending” took place before 12 March 2008, providing the funds were received in the UK and used to acquire the interest in the property in question before 6 April 2008. The answer depends on the terms and conditions of the mortgage arrangement, which determine the point at which the funds are regarded as “lent”.

The answer does not depend on the terms and conditions of the mortgage

---

payments made out of relevant foreign income. On 10 March 2008 she draws down a further amount of £21,000 from this mortgage (still secured on the UK property) to fund some home repairs.

Although the full £121,000 has been lent before 12 March 2008, only £100,000 relates to the acquisition on the interest in the property, so it is only the interest payments in relation to the £100,000 draw-down of the loan that are not treated as a remittance.

arrangement. It depends on when the money was lent which the question states was not until completion. Thus transitional loan relief is not available. This is of course extremely unfair: it may be because of the unfairness that HMRC choose not to answer the question. But the same question is asked later in the Q&As, and receives a straight answer:

**Q** A UK non-domiciled came to the UK in July 2007. He made an offer to purchase a residential property in the UK in November 2007. The deal became unconditional in February 2008 and entry was agreed for 16 March 2008. He has an offshore mortgage and the loan offer was made prior to 12 March but of course not drawn until 16 March. Does para 90 of Schedule 7 of FA 2008 apply?

**A** The grandfathering provisions for offshore mortgages apply only where the loan was made before 12 March 2008. This means that the money had to be in the hands of the non-domiciled individual (or for example in the Solicitor's client account) before that date.

#### 17.42.4 *Joint accounts*

March 2009 Q&As provides:

**Q22:** We would welcome confirmation that the remittance protection in paragraph 90 applies where a husband and wife (or civil partners), both of whom are resident but not domiciled in the UK, have a joint non-UK bank account and a joint offshore mortgage. The offshore mortgage meets the conditions set out in paragraph 90 (1).

If only one spouse (or civil partner) has relevant foreign income and that spouse makes a payment into a joint non-UK bank account using that relevant foreign income and these funds are then used to pay the interest on the offshore mortgage, then it is our understanding that such payment of interest will not constitute a remittance of any of the relevant foreign income by virtue of paragraph 90.

**A:** We are not able to provide the confirmation you are seeking because whether there is a taxable remittance in this situation will depend on the composition of the joint account and the way in which the mixed fund rules section 809Q apply to it. Therefore we can again only answer in general terms.

Provided the payment of relevant foreign income by one spouse or civil partner into the joint account is the only income within that account (in other words, section 809Q is not in point) which is then used to pay the interest on the mortgage which meets the conditions within paragraph 90(1), then that payment would also fall within paragraph 90.

### 17.42.5 “Residential property”

Para 90(5) sch 7 FA 2008 provides:

In this paragraph “residential property” has the same meaning as in Part 4 of FA 2003 (see section 116 of that Act).

So we turn to s.116 FA 2003 to find the complex definition:

- (1) In this Part “residential property” means—
- (a) a building that is used or suitable for use as a dwelling, or is in the process of being constructed or adapted for such use, and
  - (b) land that is or forms part of the garden or grounds of a building within para (a) (including any building or structure on such land),  
or
  - (c) an interest in or right over land that subsists for the benefit of a building within para (a) or of land within para (b);

and “non-residential property” means any property that is not residential property.

This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.

(2) For the purposes of subsection (1) a building used for any of the following purposes is used as a dwelling—

- (a) residential accommodation for school pupils;
- (b) residential accommodation for students, other than accommodation falling within subsection (3)(b);
- (c) residential accommodation for members of the armed forces;
- (d) an institution that is the sole or main residence of at least 90% of its residents and does not fall within any of paras (a) to (f) of subsection (3).

(3) For the purposes of subsection (1) a building used for any of the following purposes is not used as a dwelling—

- (a) a home or other institution providing residential accommodation for children;
- (b) a hall of residence for students in further or higher education;
- (c) a home or other institution providing residential accommodation with personal care for persons in need of personal care by reason of old age, disablement, past or present dependence on alcohol or drugs or past or present mental disorder;
- (d) a hospital or hospice;
- (e) a prison or similar establishment;
- (f) a hotel or inn or similar establishment.

(4) Where a building is used for a purpose specified in subsection (3), no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use.

(5) Where a building that is not in use is suitable for use for at least one of the purposes specified in subsection (2) and at least one of those specified in subsection (3)—

- (a) if there is one such use for which it is most suitable, or if the uses for which it is most suitable are all specified in the same sub-paragraph, no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use,
- (b) otherwise, the building shall be treated for those purposes as suitable for use as a dwelling.

(6) In this section “building” includes part of a building.

(7) Where six or more separate dwellings are the subject of a single transaction involving the transfer of a major interest in, or the grant of a lease over, them, then, for the purposes of this Part as it applies in relation to that transaction, those dwellings are treated as not being residential property.

(8) The Treasury may by order—

- (a) amend subsections (2) and (3) so as to change or clarify the cases where use of a building is, or is not to be, use of a building as a dwelling for the purposes of subsection (1);
- (b) amend or repeal subsection (7) and the reference to that subsection in subsection (1).

Any such order may contain such incidental, supplementary, consequential or transitional provision as appears to the Treasury to be necessary or expedient.

#### 17.42.6 *Withdrawal of relief*

Para 90(3) sch 7 FA 2008 provides:

If, at any time on or after 12 March 2008—

- (a) any term upon which the loan was made, or any term of the guarantee, is varied or waived,
  - (b) repayment of the debt, or of payments made under the guarantee, ceases to be secured on the interest,
  - (c) repayment of any other debt is secured on the interest or is guaranteed by the guarantee, or
  - (d) the interest ceases to be owned by the individual,
- sub-para (2) does not apply in relation to relevant foreign income used as mentioned there after that time.

I am unable to see the point of conditions (b) and (c).

FAQ Remittances (April 2008) stated that the relief only applies so long as “no further advances are made on or after 12 March”. This is not correct, but if any further advances are made care must be taken with the documentation to ensure that there is a new loan (not a variation of an existing one) and the debt is not secured on the individual’s interest in the property.

The RDR Manual provides:

**RDRM31502 Transitional Provisions: RFI and offshore loans - Example 2** [Jan 2019] (Charles)

C is a UK resident remittance basis user and has lived in the UK for several years. He has an existing mortgage that was taken out in 2005 with a non-UK bank that is secured on a house in the UK in which C, his wife and children all live. C pays interest on the loan out of his untaxed relevant foreign income.

The existing mortgage facility includes an open credit facility that allows C to borrow (draw-down) additional funds. On 15 March 2008 C uses the credit facility to borrow a further amount of £100,000 that he intends to use to buy an additional interest in his residential property. The terms and conditions of the original loan facility apply to the further draw-down.

The draw down of additional funds after 12 March 2008 represents a further advance of the mortgage under the original terms, so it is not regarded as ‘another debt’ secured on the property. It is a ‘relevant debt’ for the purposes of s809L.

**RDRM31510 Transitional Provisions: Loans in existence before 12 March 2008 - Grandfathering no longer applicable** [Jan 2019]

...

**Example 1** (Judith)

J is a UK resident, non-domiciled remittance basis user who has an offshore mortgage from an overseas lender that was in place before 12 March 2008 on which she pays interest out of her relevant foreign income.

Under the terms of her loan agreement interest on the loan is at a fixed rate for two years at the end of which J will automatically transfer to the lenders standard variable rate for the remaining ten year period of the loan agreement.

The ending of the fixed-rate period and the automatic transfer to the variable rate is not regarded as amending or otherwise varying the loan

facility, so the ‘grandfathering’ provision at FA08/para 90 applies to the loan.

In practice in the usual case the move to a floating rate will happen automatically, and the relief will continue to apply.

**Example 2 (Jane)**

J is a UK resident, non-domiciled remittance basis user who has an offshore mortgage from an overseas lender that was in place before 12 March 2008 on which she pays interest out of her relevant foreign income.

Under the terms of her loan agreement the loan is a two-year fixed interest loan. In May 2009, at the end of the two year period, J agrees a new loan with the same bank, for a further period of two years. The new loan has the same terms as her previous loan agreement.

This is a new loan that is not covered by the grandfathering provisions at FA08/para 90. The new loan is a ‘relevant debt’; any payments of interest (or capital) that are made from the Jersey account are a taxable remittance.

*17.42.7 Transitional loan relief: Critique*

No reasons were ever given for the restricted scope of transitional loan relief, so one is left to speculate. If the purpose of the relief is to assist those who have taken out loans on the assumption that the law which existed from 1956 to 2008 would govern the taxation of the interest, and who may now be unable to pay the interest, the restrictions are irrational. I surmise that the object was specifically to support the residential property market by preventing forced sales by foreign domiciliaries who became unable to repay their mortgages by reason of the new tax charge: If so those who borrowed to buy a house and improve it are particularly unfairly treated. The restriction of relief to RFI is also irrational.<sup>303</sup>

Non-residential property does not qualify for transitional loan relief. Loans to acquire let property had a benevolent treatment under the pre-2008 remittance basis: interest on the loan could be paid out of income without a remittance, but the interest was deductible in computing the profits of the UK property business. Similar points apply to other cases where interest

---

303 It was probably based on the erroneous belief that under the pre-2008 rules, employment income or gains used to pay interest were regarded as remitted.

is deductible. Perhaps that was thought to be too generous to justify a transitional relief.

Perhaps the matter was not thought much, if at all, and the only thinking was to provide the smallest possible transitional relief consistent with appeasing the banking lobby or other objectors. Perhaps it was to give the appearance of a transitional relief without much substantial relief. In the absence of any reasons being provided by HMRC, all the above can only be speculation.

### **17.43 Remittance basis planning**

The starting point is not to remit. That must be as old as the remittance basis. Lord Barnett (then Labour Chief Secretary to the Treasury) said:

I used to advise people not to remit.<sup>304</sup> It was a perfectly legitimate thing to do. It would have been silly to do so. They did not need to do it.<sup>305</sup>

#### *17.43.1 Avoid mixed fund: Segregation*

In practice individuals may need to bring some funds to the UK. The way to avoid or minimise remittance basis liabilities is to keep funds which are charged at different rates on remittance separate from each other.

The starting point is to segregate clean capital and other funds.<sup>306</sup> Clean capital may consist of:

- (1) Funds acquired before arrival in the UK
- (2) Gifts<sup>307</sup> and inheritance
- (3) Capital distributions from trusts (if not within the many IT and CGT anti-avoidance provisions)
- (4) UK income/gains
- (5) Foreign income/gains taxed on an arising basis (because no remittance

---

304 In the 1940's and 1950's Barnett was an accountant in private practice.

305 *Hansard*, Standing Committee A, Finance Bill debate 20 June 1974, col.426. Again HC Deb 22 July 1974 vol 877 cc1114-37: "They avoided tax by not remitting the pension, and that was perfectly proper. There was no need for them to pay the tax and they did not do so."

[http://hansard.millbanksystems.com/commons/1974/jul/22/foreign-pensions-or-annuities#S5CV0877P0\\_19740722\\_HOC\\_346](http://hansard.millbanksystems.com/commons/1974/jul/22/foreign-pensions-or-annuities#S5CV0877P0_19740722_HOC_346)

306 See 17.43.1 (When are funds mixed).

307 Unless the donor is a remittance basis taxpayer making a gift of income/gains to a relevant person.

basis claim is made or the individual is deemed domiciled)

If funds are large enough, and there is not enough clean capital alone, it may be worth segregating:

- (1) Income taxable on remittance:
  - (a) at the top rate
  - (b) at the top dividend rate
  - (c) at lower rates (because of DT relief)
- (2) Chargeable gains taxable on remittance:
  - (a) at the full CGT rate
  - (b) at lower CGT rates (because of DT relief)
- (3) Clean capital

Funds can then be remitted from accounts with a lower or nil rate of tax. Income taxable at the top rate can be used abroad or reinvested. Thus one may need as many as six accounts. The reader may think that a tax system which requires this may benefit from simplification, but HMRC do not agree.<sup>308</sup>

Once an individual has become deemed domiciled (or decides not to claim the remittance basis charge) income is taxed on an arising basis. That may be remitted, and may be paid into a mixed fund (because it comes out of the fund first); but care is still needed not to transfer unremitted income/gains into a clean capital account, under the offshore transfer rules.

HMRC accept this planning. The CG Manual provides:

**CG25385 Remittance basis: mixed funds: summary** [Nov 2019]

... Taxpayers may prefer to create and operate a number of bank accounts so that income and capital from various sources or of various years is always clearly identifiable as such and the mixed fund rules do not apply when transfers are made from those accounts. This is not in principle objectionable...<sup>309</sup>

How does one segregate funds? An easy course is to keep clean capital in

<sup>308</sup> See 19.20 (Mixed funds: Critique).

<sup>309</sup> Another example: HMRC 2018 Cleansing Guidance example 7 provides: “If he wants to safeguard the 3 new accounts and his other 4 cleansed accounts from becoming mixed fund accounts in the future, Hamid will have to ensure that any funds accruing in each account (for example, interest) are paid into a separate account to prevent ‘tainting’ of the funds.”

See <https://www.gov.uk/guidance/cleansing-mixed-funds>

a bank account and pay the income into a separate account. The bank account may be in any currency as currency bank account gains are not taxed.

What if the individual does not want to hold cash for an extended period, and wishes to be able to invest in a wider class of assets? Possible solutions are:

- (1) Borrowing charged on investments which are clean capital.
- (2) Life insurance policy<sup>310</sup> purchased out of clean capital. The individual may surrender up to 5% of the policy tax free, per annum, and that amount is derived from the clean capital, and can be remitted tax free. The growth in the policy reflects the underlying investments but the gains on those investments do not form a mixed fund. The gain on the ultimate surrender of the policy is taxable, but the proposal may be attractive if it is anticipated that will be when the policyholder is non-resident (and not temporarily non-resident).

#### 17.43.2 *Planning when mixed fund exists*

Suppose T already has a substantial mixed fund holding income and gains. Some planning is still possible. T should begin segregating income from the fund, allowing capital gains to accrue within the fund. Subsequent remittances are regarded as taken from those gains first before the income of earlier years. If the gains are sufficient to exceed the remittances, this will reduce the rate of charge on remittance to CGT rates, as gains of subsequent years are treated as remitted before income of earlier years.

### 17.44 **Reform**

HMRC have rejected calls for simplification:

The Government will not look further at the following:

*Simplification* Definition of a remittance and the derivation rules

*Government response* The Government recognises that the definition of a taxable remittance is widely defined but believes any change to narrow the rules would open up opportunities for abuse and an unacceptable risk to the Exchequer.<sup>311</sup>

---

310 But not a personal portfolio bond.

## CHAPTER EIGHTEEN

# REMITTANCE RELIEFS

18.1

### 18.1 Remittance reliefs: Introduction

This chapter considers 8 reliefs which allow property to be received in the UK without a taxable remittance:

<b>Relief</b>	<b>See para</b>
Investment relief	18.2
Paying remittance basis charge	18.24
Foreign services relief	18.25
Exempt property remittance reliefs:	18.29
(a) public access	18.31
(b) personal use	18.32
(c) the repair rule	18.33
(d) temporary importation	18.36
(e) small remittances	18.38

### 18.2 Remittance investment relief

The ITA remittance basis in its original 2008 form (more or less) prevented remittance basis taxpayers from investing in the UK, either directly or indirectly through trusts and companies.

The coalition government introduced the relief in 2012. It is slotted in after s.809V ITA, so the 15 sections are numbered ss.809VA – 809VO.<sup>1</sup> The statutory heading is “business investment relief”; I call it “**remittance investment relief**” or just “investment relief”.<sup>2</sup>

---

1 See **App.** 11.3 (Section numbering system).

2 I guess the more bland and less helpful label “business investment relief” was chosen for presentational reasons. “Business investment” is a positive spin: who could object to business investment? But presentation is of course important.

The 2017 reforms have reduced the need for the relief, because income arising in a protected trust, or underlying company, can in principle be brought to the UK, for investment, without a taxable remittance.<sup>3</sup> So the relief is only needed if the funds to be invested in the UK are (or derive from) foreign income/gains of an individual, which would in principle be taxable if remitted.

The development of the relief can be traced through:

- a consultation paper<sup>4</sup>
- consultation response paper<sup>5</sup> (“**consultation response document**”)
- a guidance note<sup>6</sup>

But these are now of mainly historical interest.

Some of the drafting is loosely derived from other reliefs, such as community investment relief<sup>7</sup> and social investment relief.<sup>8</sup>

HMRC comment on EU law:

The Government is satisfied that the draft legislation to be published in Finance Bill 2012 is compatible with EU law and the State Aid rules.<sup>9</sup>

### 18.3 Relevant event

Section 809VA(1) ITA sets out three conditions for relief. The first is in para (a):

- 
- 3 See 88.9 (s.624 protected-trust relief); 88.8 (s.720: Protected-trust relief). Protected-trust relief is better, as it does not have the onerous conditions and traps of remittance investment relief.
  - 4 HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (2011) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)
  - 5 HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (2011).  
[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)
  - 6 HMRC Guidance Note: Changes to the Remittance Basis (2012)  
<https://www.gov.uk/government/publications/guidance-note-changes-to-the-remittance-basis>
  - 7 Part 7 CTA 2010; Part 7 ITA.
  - 8 Part 5B ITA.
  - 9 Consultation Response Document, para 2.90  
[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

- (1) Subsection (2) [remittance investment relief] applies if–  
 (a) a relevant event occurs,

The term “relevant event” is not a particularly helpful label, but it is better to follow the statutory usage as anything else is even more confusing.

There are two types of relevant event.

### 18.3.1 *Relevant event: Investment*

Section 809VA(3) ITA provides:

- A “relevant event” occurs if money or other property–  
 (a) is used by a relevant person to make a qualifying investment<sup>10</sup>

The RDR Manual provides:

#### **RDRM34330 Qualifying Investments Overview** [Jan 2019]

...Sometimes investments are made in qualifying companies via nominees rather than directly by a relevant person. Strictly this would mean the investment failed to qualify for business investment relief as the investment must be made by a relevant person (section 809VA(3)(a) ITA 2007). However HMRC will not reject a claim to business investment relief in cases where a relevant person subscribes for shares in a qualifying company through a nominee provided that relevant person is able to demonstrate they have beneficial ownership of those shares and that all of the other conditions for the relief are met.

It seems to me HMRC practice is correct as a matter of law, not concession: an investment made by a nominee counts as made by the beneficial owner.<sup>11</sup> But the issue is not likely to arise.

### 18.3.2 *Remittance for investment purpose*

Section 809VA(3) ITA provides:

- A “relevant event” occurs if money or other property...  
 (b) is brought to or received in the UK in order to be used by a relevant person to make a qualifying investment.

Section 809VA(5) ITA imposes a time limit on the period between

---

<sup>10</sup> See 18.9 (“Qualifying investments”).

<sup>11</sup> See 1.7.4 (Tax treatment of bare trust).

bringing the money to the UK and making the investment:

Subsection (2) [remittance investment relief] applies by virtue of subsection (3)(b) to the extent only that the investment is made within the period of 45 days beginning with the day on which the money or other property is brought to or received in the UK.

Section 809VA(6) ITA deals with the situation where some of the money brought to the UK is used to make the investment:

Where some but not all of the money or other property is used to make the investment within that 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

## 18.4 Remittance by virtue of relevant event

Section 809VA(1) ITA sets out three conditions for relief. The second is in para (b) but this must be read with para (a) to follow the sense:

- (1) Subsection (2) [remittance investment relief] applies if–
- (a) a relevant event occurs,
  - (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event...

### 18.4.1 “Income/gains of individual”

The relief applies to income treated as arising to an individual under s.624, or s.720, or gains treated as accruing under s.3, even though the income or gains actually arise to a non-resident trust or company and are invested (and so remitted) by the trust or the company. This was deliberate. HMRC say:

2.34 It is common for non-domiciles to hold money in offshore trusts but the tax treatment of remittances currently deters some offshore trusts and companies from investing in the UK. For this reason, it is not proposed to limit the new tax incentive to investments made directly by the individual. There will be no restriction on individuals remitting overseas income or capital gains which are held in investment vehicles or trusts. This will allow non-domiciles to invest in UK businesses using funds held in offshore companies and trusts without attracting a tax charge on

the remittance.<sup>12</sup>

But this matters less now that income of a protected trust is not taxable if remitted.

Suppose:

- (1) an individual receives a benefit chargeable under the s.87 remittance basis or the s.731 remittance basis and
- (2) the individual uses the benefit to make a qualifying investment.

Investment relief applies, as the income or gains invested are the income or gains of the individual.

Similarly, investment relief applies if:

- (1) an individual receives a benefit chargeable under the s.731 remittance basis and
- (2) the person abroad uses matched relevant income to make a qualifying investment.

It is not a requirement that the income used to make the investment is the income of the individual: just that income of the individual would be regarded as remitted by virtue of the relevant event.

However in these cases, consideration must be given as to whether the benefit is a related benefit.

#### 18.4.2 “By virtue of” relevant event

The requirements for relief in s.809VA(1)(b) are:

- (1) a relevant event
- (2) income/gains remitted to the UK and
- (3) the remittance is “by virtue of” the relevant event.

Suppose:

- (1) T lends to a company or subscribes for shares in a company.
- (2) The company uses the funds to purchase a property in the UK.

Step (1) is a relevant event. If it is also a remittance to the UK, the position is straightforward: the relief applies.

---

12 HMT & HMRC, “Reform of the taxation of non-domiciled individuals: a consultation” (2011)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)

Suppose step (1) is not a remittance to the UK (in short, because the company is an offshore company which receives the funds outside the UK). There is a taxable remittance at step (2) when the company brings the funds to the UK.<sup>13</sup> However the company does not make a qualifying investment so step (2) is not a relevant event. But it is considered that the remittance is “by virtue of” the relevant event at step (1), so the relief applies. HMRC agree. The RDR Manual provides:

**RDRM34330: Remittance Basis: Exemptions: Business Investment Relief: Qualifying investments - overview [May 2020]**

It is possible for a qualifying investment to be made in a close company which is itself a relevant person [see RDRM33030]. In such cases, where the company subsequently uses the invested funds in the UK, for example to purchase stock or to pay employees, the foreign income and gains will not be treated as a taxable remittance, provided they are not used in a way which would itself be a potentially chargeable event [see RDRM34390].

Suppose:

- (1) T borrows to make a qualifying investment. This is a relevant event but no income/gains are remitted to the UK.
- (2) T uses income/gains to repay the loan. This is a remittance of the income/gains.

HMRC accept that the relief applies. CIOT say:

HMRC have confirmed that using foreign income and/or gains to repay loans where those loans, in turn, funded investments made after 6 April 2012, would in principle qualify for the business investment relief.

Concerns had been expressed on this point because s809VA(1)(b) gives relief only where (in the absence of the relief) income or chargeable gains would be regarded as remitted by virtue of the investment. Where borrowed monies are used to make the investment, it is not the investment which (in the absence of the relief) triggers the remittance; rather it is the subsequent repayment of that borrowing which triggers the remittance.

However, HMRC have confirmed that they take a wide view of the meaning of ‘by virtue of’ in this context and there is nothing in s809VA

---

<sup>13</sup> Assume the company is a relevant person (as a close company would be).

which requires that the remittance which would otherwise have occurred should take place in the same year as the relevant event to which it relates. It therefore follows that the remittance and claim can be in a year or years after the relevant event.

For non-doms wishing to invest in this way, there is therefore scope – through borrowing – to fund that investment through future offshore income/gains.

Claims should be made in the year(s) that the loan is repaid rather than the year the investment is made and careful records will obviously need to be kept for these purposes.<sup>14</sup>

It would have been better if the statutory expression was “in connection with” the relevant event, not “by virtue of” the relevant event. But a generous construction, together with the flexibility inherent in a causation test, has brought us to the same destination.

Section 809VA(4) ITA confirms that relief is available following an exempt property clawback charge:

Subsection (1)(b) includes a case where income or gains would be treated under section 809Y<sup>15</sup> as remitted to the UK by virtue of the relevant event.

That seems self-evident, though it will rarely if ever happen in practice.

## **18.5 Claims**

The third condition for the relief is in s.809VA(1)(c) ITA which provides:

Subsection (2) [remittance investment relief] applies if ...

(c) the individual makes a claim for relief under this section.

Section 809VA(8) ITA provides:

A claim for relief under this section must be made on or before the first anniversary of the 31 January following the tax year in which the income or gains would, but for subsection (2) [remittance investment relief], be regarded as remitted to the UK by virtue of the relevant event.

The claim is made in the tax return. The sidenote to box 38 SA109 (2020/21) reads:

---

14 Press release 15 August 2012 [2012] STI 2563.

15 See 18.39 (Exempt property clawback charge).

If you're claiming relief from UK tax for foreign income or gains invested in a qualifying business, enter the total amount invested and the Company Registration Numbers below

The RDR Manual provides:

**RDRM34380 Claiming Business Investment Relief** [Jan 2019]

... It is not necessary for an individual to claim the remittance basis in the year the investment is made...

That is self-evident. But of course the individual must have been a remittance basis taxpayer at some point, in order to hold foreign income/gains taxable on the remittance basis.

## 18.6 The relief

Assuming the three conditions in s.809VA(1) are satisfied, we can turn to the relief, which is in s.809VA(2) ITA; but to follow that one needs to read subsections (1) and (2) together:

- (1) Subsection (2) [remittance investment relief] applies if–
  - (a) a relevant event occurs,
  - (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event, and
  - (c) the individual makes a claim for relief under this section.
- (2) The income or gains are to be treated as not remitted to the UK.

## 18.7 Investment relief TAAR

Section 809VA(7) ITA provides:

Subsection (2) [remittance investment relief] does not apply if the relevant event occurs, or the investment is made, as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

Section 989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts

...

“tax”, if neither income tax nor corporation tax is specified, means either of those taxes.

So it does not matter if the purpose of the arrangement is IHT avoidance or CGT avoidance: only IT (or CT) avoidance counts.

The concepts of avoidance and purpose are the same as in the ToA motive defence; see 49.1 (Motive defence: Introduction).

The HMRC consultation paper provided:

2.53 ... there will be provisions to prevent non-domiciles buying a pre-existing business from themselves by selling it to a new company funded by income remitted from overseas. This would create no new business investment in the UK and would merely transfer legal ownership whilst the individual continues to own the business.<sup>16</sup>

There are no express provisions to this effect, but the arrangement may constitute avoidance and so the relief would be disallowed.

CIOT lobbied for repeal of this TAAR:

That test is a potential deterrent as nobody can say with certainty what kind of transaction a particular officer of HMRC, or an individual judge, will view as avoidance. ... We would urge removal of section 809VA(7), particularly now that the GAAR has been enacted.<sup>17</sup>

But no-one took any notice of that.

## **18.8 Investment fails to proceed**

A person may bring funds to the UK intending to make an investment which fails to proceed. Then there is no relief under s.809VA(2) ITA as there is no relevant event, but s.809VB ITA provides relief:

(1) This section applies to any portion of the income or gains to which section 809VA(2) [remittance investment relief] does not apply because the investment was not made within the period mentioned in section 809VA(5) (“the 45-day period”).

(2) That portion is to be treated as not remitted to the UK to the extent that the remaining money or other property is taken offshore within the

---

16 HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (2011) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)

17 Business Investment Relief: CIOT comments (2013) [https://www.tax.org.uk/system/files\\_force/file\\_uploads/130918%20Business%20Investment%20Relief%20-%20CIOT%20comments.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/130918%20Business%20Investment%20Relief%20-%20CIOT%20comments.pdf?download=1)

45-day period.

(3) Where some but not all of the remaining money or other property is taken offshore within the 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

(4) If any remaining money or other property is taken offshore within the 45-day period, nothing in subsection (2) prevents anything subsequently done in relation to it (or anything deriving from it) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is subsequently done.

(5) A reference to the “remaining” money or other property is to so much of the money or other property brought to or received in the UK as is not used within the 45-day period to make the investment (which may in some cases be all of it).

## 18.9 “Qualifying investment”

This is a key term used throughout the remittance investment relief provisions; in particular, a relevant event requires a qualifying investment. Section 809Z10 ITA provides:

In this Chapter ... “qualifying investment” has the meaning given by section 809VC (and references to making a qualifying investment are to be read in accordance with that section)

So we turn to s.809VC.

### 18.9.1 “Investment”

“Investment” has an artificial meaning. Section 809VC(1) ITA provides:

For the purposes of section 809VA, a person makes an investment if–  
 (a) shares<sup>18</sup> in a company are issued to or acquired by the person, or  
 (b) the person makes a loan (secured or unsecured) to a company.

This definition applies only for s.s.809VA, so it needs to be incorporated when the same term is used elsewhere: s.809VD(4) ITA.

Non-corporate investments do not count as “investment” and do not qualify for relief. HMRC say:

---

18 Section 809VC(6) ITA provides: “A reference in this section to “shares” includes any securities.”

2.43 The Government is not yet convinced of the case for including partnerships within the relief. It remains concerned that extending the relief in this way could lead to large scale avoidance unless complex anti-avoidance legislation was introduced. The legislation which will take effect from 6 April 2012 will not allow investment in partnerships.

2.44 However, in view of the strength of support for extending the relief to investments in partnerships and the increased investment that this might encourage, the Government will consider this issue further to evaluate whether there is any scope for widening the relief to include investment in partnerships in Finance Bill 2013. The Government will not consider extending the relief to sole traders.<sup>19</sup>

Nothing happened, and OTS floated the same idea three years later.<sup>20</sup>  
HMRC responded:

HMRC is considering this proposal in more detail, however, it is very likely that the costs associated with this change will rule out taking this proposal further.<sup>21</sup>

Again nothing happened, and the proposal has clearly been dropped.

Section 809VC ITA provides some terminology:

- (2) The company is referred to as “the target company”.
- (3) The shares or the person’s rights under the loan (or both) forming the subject of the investment are referred to as “the holding”...

Section 809VC ITA deals with the question of when an investment by way of loan is made:

- (7) If a loan agreement authorises a company to draw down amounts of a loan over a period of time—
  - (a) entry into the agreement does not count for the purposes of this

- section as the making of a loan, but
- (b) a separate loan is to be treated as made each time an amount is drawn down under the agreement.
- (8) Accordingly—
- (a) a separate investment is treated as made each time an amount is drawn down under the agreement, and
- (b) the reference in subsection (3) to the person’s rights under the loan applies only to so much of the person’s rights as relate to the drawdown of that particular amount.

### 18.9.2 “Qualifying” investment

Section 809VC(4) ITA provides:

The investment counts as a “qualifying investment” if conditions A and B are met when the investment is made.

I refer below to “**investment conditions A and B**”.

## 18.10 Condition A: Trading co/group

Section 809VD(1) ITA provides:

Condition A is that the target company is—

- (a) an eligible trading company,
- (b) an eligible stakeholder company,
- (ba) an eligible hybrid company, or
- (c) an eligible holding company.

### 18.10.1 Eligible trading company

Section 809VD(2) ITA provides:

A company is an “eligible trading company” if—

A set of three conditions then follow:

- (a) it is a private limited company,
- (b) it carries on one or more commercial trades or is preparing to do so within the next 5 years, and
- (c) carrying on commercial trades is all or substantially all of what it does (or of what it is reasonably expected to do once it begins trading).

I refer to “**trading company conditions (a) - (c)**”.

### 18.10.2 *Substantially trading*

It is helpful to consider “eligible trading company” condition (c) together with the definition of “trading company” in Part 5 TCGA<sup>22</sup> because they raise (more or less) the same issues:

#### **s.809VD(2) ITA:remittances**

#### **s.165A(3) TCGA: hold-over relief, etc**

A company is an “eligible trading company” if ...  
(c) carrying on commercial trades is all or substantially all of what it does (or of what it is reasonably expected to do once it begins trading).

“Trading company” means a company carrying on trading activities whose activities do not include to a substantial extent activities other than trading activities.

The RDR Manual provides:

#### **RDRM34345 Eligible Trading Company** [Apr 2019]

... The phrase ‘all or substantially all’ used in the definition of an eligible trading company is not defined in the legislation. Whether or not carrying on a commercial trade is all or substantially all of a trading company's activities will depend on a consideration of all the relevant facts. However, where carrying on a commercial trade accounts for at least 80% of a company's total activities, the company will generally be regarded as meeting this requirement.

Consultation Response Document said: “HMRC will provide guidance on how total business activity should be measured.”<sup>23</sup> No guidance was produced. But the hold-over relief definition is not materially different on this point, so guidance on that should be helpful.

The CG Manual provides:

#### **CG64090: trading company and holding company of a trading group - the meaning of "substantial"** [Oct 2020]

... Most companies and groups will have some activities that are not

22 This definition applies for business asset reliefs: hold-over relief, business asset disposal relief (formerly called entrepreneurs’ relief) and investors’ relief.

23 [http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

trading activities. The legislation provides that such companies and groups still count as trading if their activities "... do not include to a substantial extent activities other than trading activities". The phrase "substantial extent" is used in various parts of the TCGA92 to provide some flexibility in interpreting a provision without opening the door to widespread abuse. Substantial in this context means more than 20%. The question to ask is how should a company's non-trading activities be measured to assess whether they are substantial?

There is no simple formula to this but some, or all, of the following are among the measures or indicators that might be taken into account in reviewing a particular company's status. These indicators, adopted for Business Asset Disposal Relief, are the same as those used for the old taper relief and in the Substantial Shareholding Exemption for corporation tax.

- Income from non-trading activities
- The asset base of the company
- Expenses incurred, or time spent, by officers and employees of the company in undertaking its activities
- The company's history
- Balance of indicators

#### **Income from non-trading activities**

For example, a company may have a trade but also let an investment property. If the company's receipts from the letting are substantial in comparison to its combined trading and letting receipts then, on this measure in isolation, the company would probably not be a trading company.

#### **The asset base of the company**

If the value of a company's non-trading assets is substantial in comparison with its total assets then again, on this measure, this could point towards it not being a trading company. If a company retains an asset it previously used, but no longer uses, for the purposes of its trade, this may not be a trading activity (but see above regarding surplus trading premises). In some cases it might be appropriate to take account of intangible assets (e.g. goodwill) that are not shown on a balance sheet in considering a company's assets. Current market value and amounts given by way of consideration for assets may both be appropriate measures of the relative extents of a company's trading and other activities. Which measure is appropriate will depend on the facts in each case.

#### **Expenses incurred, or time spent, by officers and employees of the**

**company in undertaking its activities**

For example, if a substantial proportion of the expenses of a company were to be incurred on non-trading activities then, on this measure, the company would not be a trading company. Or a company may devote a substantial amount of its staff resources, by time or costs incurred, to non-trading activities.

**The company's history**

For example, at a particular instant certain receipts may be substantial compared to total receipts but, if looked at on a longer timescale, for instance if a company's trade was seasonal, they may not be substantial compared to other receipts over that longer period. Looked at in this context, therefore, a company might be able to show that it was a trading company over a period, even where that period may have included particular points in time when non-trade receipts amounted to a substantial proportion of total receipts.

**Balance of indicators**

The indicators discussed should not be regarded as individual tests to which a 20% "limit" applies. They are factors, or indicators, that may be useful in establishing whether there is substantial overall non-trading activity. It may be that some indicators point in one direction and others the opposite way. You should weigh up the relevance of each in the context of the individual case and judge the matter "in the round" (see approach of the Special Commissioner in the IHT case of *Farmer v IRC* SpC 216). If you are unable to agree the status of a particular company for a period then the issue could be established only as a question of fact before the First-tier Tribunal.

This was discussed in *Allam v HMRC*:<sup>24</sup>

150. In some respects, the definition of a "trading company" in s165A(3) is relatively broad. The concepts of "trade" and "trading activity" as defined in s165A are not limited to the activities of trading itself. They extend to activities for the purposes of a trade or for the purposes of a trade that the company is preparing to carry on and even to activities involved in acquiring a trade, starting to carry on a trade or acquiring an interest in another company which is itself trading. Against that background, it is clear that an over-analytical approach is not

---

24 [2020] UKFTT 216 (TC). The position will need to be reviewed when the case is final.

appropriate. The relief is in this respect intended to be relatively broad; it is intended to extend to disposals of shares in companies that are fundamentally trading or preparing to trade and should not be denied simply because the activities of the company extend to activities which are not activities of the trade themselves but are perhaps preparatory to or ancillary to the carrying on of a trade.

151. As [Counsel for the taxpayer] points out, any company that carries on some “trading activities” (as defined) will meet the first part of the definition. It is the second part of the definition (which begins with the words “whose activities do not include...”) which provides an important limitation on the relief. In our view, the clear purpose of that limitation is to ensure that, whilst the relevant company need not be engaged in exclusively trading activities, the relief should not be available for disposals of shares in companies which have non-trading activities which are of real importance when viewed in the context of the company's activities as a whole.

**“trading activities”/activities other than “trading activities”**

152. As we have mentioned above the first part of our enquiry requires us to distinguish between those activities of the company that are regarded as “trading activities” and those which are not.

153. The definition of a “trading company” refers to the “activities” of the company. This suggests that the focus should be on what the company actually does and a narrow reading of that term might suggest that we should have regard primarily to the active steps that a company takes in furtherance of its business. However, in our view, we should guard against placing too restrictive an interpretation on the term. As we have set out above, in our view, the limitation on the definition of a trading company is designed to ensure that relief is not given for transfers of shares in companies which are not engaged fundamentally in trading activity. That purpose would be defeated if the limitation did not encompass the holding of investments where the holding of investments is substantial in the context of the activities of the company as a whole. If that were not the case it would be possible for relief to be obtained on a sale of shares in a company which has a relatively small but active trading business (or which was perhaps preparing to trade) but which also holds a substantial investment portfolio generating significant income which requires little active management. In our view, that would run contrary to the purpose of the relief.

**“to a substantial extent”**

154. Both parties pressed upon us various glosses on the words “to a

substantial extent” and both referred to the guidance from the HMRC's manuals [set out above].

155. The HMRC guidance suggests that “substantial” in this context means more than twenty per cent. (20%) and that it is helpful to assess that threshold by reference to certain attributes of the business which can be regarded as indicators of the trading or non-trading activities of the company. Those attributes are: the level of income from non-trading activities, such as rental income from investment property; the company's trading and non-trading asset base; the expenses incurred, or time spent, by officers and employees of the company in undertaking its trading and non-trading activities; and the company's history over several years.

156. [The officer for HMRC] whilst being at pains to state that the twenty per cent. (20%) threshold set out in the HMRC guidance should only be regarded as a “rule of thumb”, conducted his analysis by reference to the guidance. [Counsel for the taxpayer] whilst casting doubt on the guidance and in particular the relevance in this case of some of HMRC's indicative factors, also substituted his own gloss for the statutory words by suggesting that if a company which carried on some trading activities was to be treated as not meeting the test, the non-trading activities should predominate or, if there was to be numerical threshold, it should be at least fifty per cent. (50%).

157. We do not find any of these glosses particularly helpful. The legislation itself does not elaborate further on the meaning of the phrase “to a substantial extent”. We must apply those words giving them their ordinary and natural meaning in their statutory context. That context is that of a relief which is intended to apply to shares in companies which are carrying on trading activities (read broadly in the sense required by s165A(14)) but to guard against the use of that relief to reduce the tax on assets which are used for other purposes. Against that background, in our view, “substantial” should be taken to mean of material or real importance in the context of the activities of the company as a whole.

158. This means that we reject [Counsel for the taxpayer's] submission that the non-trading activities must predominate before the limitation can apply...

159. As regards, the HMRC guidance, we can understand that it is useful for HMRC staff to have some practical guidance to assist them in the application of the legislation, but there is no sanction in the legislation for the application of a strict numerical threshold. Furthermore, although the guidance accepts that the factors to which it refers should not be

regarded as individual tests and they are just factors which may point one way or another and which need to be weighed up in the context of the individual case, we would counsel against any form of exclusive list. It is not permissible to substitute another test for the test dictated by the legislation. The question for us must be whether or not the activities of ADL include non-trading activities to a substantial extent. We must assess that question in the context of the facts and circumstances of the case as a whole and so by reference to the activities of the company as a whole.

This approach should be upheld on the forthcoming appeal.

#### 18.10.3 *Eligible stakeholder company*

Section 809VD(3) ITA provides:

A company is an “eligible stakeholder company” if—

- (a) it is a private limited company,
- (b) it exists wholly for the purpose of making investments<sup>25</sup> in eligible trading companies (ignoring any minor or incidental purposes), and
- (c) it holds one or more such investments or is preparing to do so within the next 5 years.

#### 18.10.4 *Eligible hybrid company*

Section 809VD(3A) ITA provides:

A company is an “eligible hybrid company” if—

- (a) it is a private limited company,
- (b) it is not an eligible trading company or an eligible stakeholder company,
- (c) it carries on one or more commercial trades or is preparing to do so within the next 5 years,
- (d) it holds one or more investments in eligible trading companies or is preparing to do so within the next 5 years, and
- (e) carrying on commercial trades and making investments in eligible trading companies are all or substantially all of what it does (or of what it is reasonably expected to do once it begins

---

<sup>25</sup> Section 809VD(4) ITA provides: “The references in subsections (3) and (3A) to making investments is to be read in accordance with section 809VC.” See 18.9.1 (“Investment”).

operating).

### 18.10.5 Eligible holding company

Section 809VD ITA provides:

- (5) A company is an “eligible holding company” if—
  - (a) it is a member of an eligible trading group or of an eligible group that is reasonably expected to become an eligible trading group within the next 5 years,
  - (b) an eligible trading company in the group is a 51% subsidiary of it, and
  - (c) if the ordinary share capital that it owns in the eligible trading company is owned indirectly,<sup>26</sup> each intermediary in the series is also a member of the group.
- (6) “Group” means a parent company and its 51% subsidiaries.<sup>27</sup>
- (7) “Parent company” means a company that—
  - (a) has one or more 51% subsidiaries, but
  - (b) is not itself a 51% subsidiary of any company.
- (8) A group is an “eligible group” if the parent company and each of its 51% subsidiaries are private limited companies.
- (9) A group is an “eligible trading group” if—
  - (a) it is an eligible group, and
  - (b) carrying on commercial trades is all or substantially all of what the group does (taking the activities of its members as a whole).

A group may consist of resident and non-resident companies.<sup>28</sup>

The RDR Manual provides:

#### **RDRM34355 Eligible Holding Company** [Jan 2019]

...All the companies in the group must be private limited companies for the group to be an eligible trading group. The group activities, as a whole, must be the carrying on of commercial trades. It is not necessary for all the members of the group to carry on a trade; the test is that, considering the activities of all the group members together, all or substantially all, of what the group does is carrying on commercial

---

26 Section 809VD(10) ITA provides: “(10) The reference in subsection (5) to owning ordinary share capital indirectly is to be read in accordance with section 1155 of CTA 2010.” See 60.27.2 (Indirect ownership).

27 See 60.27 (“51/75/90 % subsidiary”).

28 Groups for CG group relief are different: see 60.25 (CG Group reliefs).

trades.

Whether or not carrying on a commercial trade is all or substantially all of an eligible trading group's activities will depend on a consideration of all the relevant facts. However, where carrying on a commercial trade accounts for at least 80% of an eligible group's total activities, the group will generally be regarded as meeting this requirement. (s809VD(5) to (10) ITA2007)...

*Example 1*

The shares in holding company H Limited are all owned by Mr and Mrs Smith, making it a private limited company. H Limited owns 100% of the share capital in A Limited, B Limited and C Limited. As it is not itself a subsidiary company, and each of its subsidiaries are private limited companies, H Limited is the parent company of an eligible group.

Diagrammatically:

If the activity of C Limited is negligible, so that substantially all that the group does is carry on a commercial trade, the group will qualify as an eligible trading group. Qualifying investments could be made directly in H Limited (an eligible holding company), A Limited or B Limited (both eligible trading companies); however direct investments in C Limited would not be eligible for relief.

If the activities of C Limited were significant enough to mean that the group was not an eligible trading group. H Limited would not be an eligible holding company. However, investments could still be made directly in A Limited and B Limited if they were eligible trading companies.<sup>29</sup>

18.10.6 *Private limited company*

The term “private limited company” matters for the definitions of eligible

---

<sup>29</sup> The Manual has a second example not printed here as it does not add much to the first.

trading/stakeholder/holding company.

Section 809VD(11) ITA provides:

A company is a “private limited company” if–

- (a) it is a body corporate whose liability is limited,
- (b) it is not a limited liability partnership, and
- (c) none of its shares are listed on a recognised stock exchange.

The company need not be UK resident. This is deliberate. HMRC say:

2.38 The Government wants to ensure that non-domiciles can invest in a range of companies, including those incorporated in other countries, and believes this will broaden the positive economic impact of this incentive. Therefore, it does not propose to restrict tax relief to investment in businesses that are resident in the UK or to businesses carrying out trades wholly or mainly in the UK. Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies....

2.41 The Government does not propose to introduce any other restrictions on the type of holding company that can qualify or the degree of ownership the company has over its subsidiary companies. This means that companies that hold shares in other companies and are resident outside the UK would be included. It also means that private equity companies and venture capital companies could qualify even where they do not have a majority ownership stake in the invested companies....

2.52 The Government agrees that restricting investment to non-UK resident companies with a UK PE is not necessary and has decided not to include this restriction.<sup>30</sup>

The company may be a foreign entity. This was deliberate. HMRC say:

2.45 Investment in a foreign entity will be eligible for relief where it is a private limited company and the other conditions on qualifying activities are met.

### 18.10.7 “Trade”

Section 809VE ITA provides an extended definition of trade, to include property investment:

---

30 Consultation Response Document

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

- (1) Section 809VD is to be read in accordance with this section.
- (2) A reference to a “trade” also includes—
  - (a) anything that is treated for corporation tax purposes as if it were a trade, and
  - (b) a business carried on for generating income from land (as defined in section 207 of CTA 2009<sup>31</sup>).

HMRC said:

2.33 Businesses undertaking furnished holiday lettings (FHLs) will not be qualifying businesses for the purposes of the relief. Although FHLs are treated as a trade for certain purposes, they are not taxed as such and will therefore not meet the qualifying conditions.<sup>32</sup>

This is not carried through in the legislation since FHL is a property business. Presumably there was a change of mind.

The residence consultation paper explains:

**UK businesses**

2.38 ... Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies ....

2.39 While this approach would allow investments to be used for trades outside the UK, non-domiciled investors can already invest in such trades without remitting income or capital gains into the UK. It is therefore likely that in the vast majority of cases, non-domiciles will use the new incentives to invest in UK trades, which they cannot currently do without incurring a tax charge.<sup>33</sup>

### 18.10.8 “Commercial” trade

Section 809VE(3) ITA provides:

A trade is a “commercial trade” if it is conducted on a commercial basis

31 See 23.2.4 (Generating income from land).

32 Consultation Response Document

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

33 HMT & HMRC, “Reform of the taxation of non-domiciled individuals: a consultation” (2011)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)

and with a view to the realisation of profits.

See App 5.1 (Commercial basis/view to profit).

This definition applies only for s.809VD, so it needs to be incorporated when the same term is used elsewhere: s.809VH ITA.

### 18.10.9 *Research and development*

Section 809VE ITA provides:

(4) The carrying on of activities of research and development from which it is intended that a commercial trade will be derived, or will benefit, is to be treated as the carrying on of a commercial trade.

(5) But preparing to carry on activities within subsection (4) is not to be treated as the carrying on of a commercial trade.

### 18.10.10 *Corporate partner*

Section 809VE(6) ITA provides:

A company which is a partner in a partnership is not to be regarded as carrying on a trade carried on by the partnership.

## 18.11 **Condition B: No benefit**

Section 809VF(1) ITA provides:

Condition B is that

[a] no relevant person has (directly or indirectly) obtained or become entitled to obtain any related benefit, and

[b] no relevant person expects to obtain any such benefit.

Remittance investment relief has two no-benefit rules:

- (1) Investment condition B, which (in short) disapplies the relief if there is a benefit or expected benefit at the time of the investment.
- (2) The extraction of value rule which (in short) claws back the relief if there is a receipt of value later, even though not expected at the time of the investment.<sup>34</sup>

Investment condition B is severe in that any benefit disallows relief on the entire investment.

The relief is disapplied even if the benefit is received outside the UK,

---

<sup>34</sup> See 18.14 (Extraction of value rule).

which is illogical in the context of the remittance basis.

### 18.11.1 *Benefit*

“Benefit” is not usually defined, but that did not deter the drafter. Section 809VF(2)(a) ITA provides:

A “benefit”–

- (a) includes the provision of anything that would not be provided to the relevant person in the ordinary course of business, or would be provided but on less favourable terms, ...

Section 809VF(2)(b) ITA provides an exclusion:

A “benefit” ...

- (b) does not include the provision of anything provided to the relevant person in the ordinary course of business and on arm’s length terms.

I think all this is otiose and benefit still has its normal (wide) meaning; but it does no harm.

### 18.11.2 *“Provision”*

“Provision” is never defined, but that did not deter the drafter. Section 809VF(4) ITA provides:

For the purposes of subsection (2)–

- (a) a reference to the provision of anything is to the provision of anything in money or money’s worth, including property, capital, goods or services of any kind, and
- (b) “provision” includes any arrangement that allows a person to enjoy or benefit from the thing in question (whether temporarily or permanently).

This is again otiose, though it does no harm. One hopes this will not enter parliamentary counsel’s handbook, and so become standard practice, like the ubiquitous (but unnecessary) definition of arrangement.

### 18.11.3 *“Related” benefit*

Section 809VF(3) ITA provides a wide meaning of “related”:

A benefit is “related” if–

- (a) it is directly or indirectly attributable to the making of the

- investment (whether it is obtained before or after the investment is made), or
- (b) it is reasonable to assume that the benefit would not be available in the absence of the investment.

The normal way to draft no-benefit rules is to say that the rule applies if the benefit is received by reason of, or as a result of, or in consequence of, the investment. I am unable to see any difference between those words and the phrase used, *attributable to the investment*. Either way, there is a causation test. Perhaps the drafter thought that “attributable” was wider.

As usual, the words “directly or indirectly” do not add much, but they show that the drafter did not want the word “attributable” to be narrowly construed.

Para (b) adds nothing, as if a benefit would not be available in the absence of the investment, the benefit must be attributable to the investment. So it is not significant that this provision is not found in the extraction of value rule which also uses the expression “attributable to the investment”.

#### 18.11.4 HMRC examples

The RDR Manual provides some straightforward examples:

**RDRM34360: Remittance Basis: Exemptions: Business investment relief: Qualifying investments - condition B (s809VF ITA2007) [May 2020]**

Example 1

Joaquin invests £250,000 in a qualifying company obtaining newly issued shares for his investment. Joaquin does not become either a director or an employee of the company.

All of the existing company directors have the use of company vehicles but these are unavailable to any other individual or current employee.

The company wish to thank Joaquin and so provide him free of charge with a company vehicle.

Joaquin’s investment has failed Condition B as the benefit, the company vehicle, is related directly to the making of the investment. It would not have been available at all in the absence of Joaquin’s investment. Therefore Joaquin’s £250,000 investment will be a taxable remittance unless he takes the appropriate mitigation steps.

The benefit is not taxable on Joaquin as he is not an employee or director of the company. ...

**Example 2**

In March 2012 Todd is invited to invest some money in a private limited company, Company B. Company B expects to start trading commercially in the three to four months after Todd agreeing his investment.

Todd has been a remittance basis taxpayer for a number of years and decided to invest £500,000 of his foreign income and gains. On 6 April 2012 Todd transfers the money to his UK bank account and on 1 May 2012 (25 days later) he makes his investment in Company B. In return for this investment Todd is issued with shares in Company B and he becomes a working director of the company, receiving a salary at a market rate. Company B commences trading on 1 June 2012.

The investment was made within 45 days of Todd bringing his foreign income and gains to the UK and Company B began commercial trading within two years of the investment having been made. Conditions A and B are both satisfied and so Todd's foreign income and gains qualify to be treated as not remitted to the UK provided Todd makes a valid claim on his 2012-13 tax return.

Todd is in receipt of a salary for his work as a director and, because Company B is profitable, he and other shareholders are paid a dividend on 31 July 2013. These payments would reasonably have been expected to be made to any other similar director and shareholder of the company and are taxable in the UK so are not "benefits" for the purpose of Condition B. Todd's foreign income and gains continue to be treated as not remitted to the UK.

**18.12 Clawback remittance charge**

Section 809VG(1) ITA provides:

Subsection (2) applies if–

- (a) income or chargeable gains are treated under section 809VA(2) as not remitted to the UK as a result of a qualifying investment,
- (b) a potentially chargeable event occurs after the investment is made, and
- (c) the appropriate mitigation steps are not taken within the grace period allowed for each step.<sup>35</sup>

If these conditions are satisfied, we move on. Section 809VG(2) ITA provides:

---

<sup>35</sup> See 18.18 (Grace period).

The affected income or gains are to be treated as having been remitted to the UK immediately after the end of the relevant grace period.

I refer to this as the “**clawback remittance charge**”.

#### 18.12.1 “*Relevant grace period*”

The “grace period” is the deadline for taking the appropriate mitigation steps. As there are various possible grace periods, statute uses the term “relevant” grace period to fix the date on which the clawback remittance charge arises.

Section 809VG ITA provides:

(3) Where the step required by section 809VI(2)(a) is not taken within the grace period allowed for that step, “the relevant grace period” is the grace period allowed for that step.

(4) Otherwise, “the relevant grace period” is the grace period allowed for the step required by section 809VI(1) or (2)(b).

#### 18.12.2 “*Affected income or gains*”

“Affected income or gains” matters as these are the income/gains which are treated as remitted under the clawback remittance charge.

Section 809VG ITA provides:

(5) “The affected income or gains” means such portion of the income or gains mentioned in subsection (1)(a) [income/gains qualifying for Business Investment Relief] as reflects the portion of the investment affected by the potentially chargeable event.

(6) The portion of the investment affected is—

- (a) if the potentially chargeable event is a disposal of a part of the holding (or a part of the remaining holding), a portion equal to the portion of the holding (or remaining holding) being disposed of, and
- (b) otherwise, the whole of the investment.

#### 18.12.3 *Investment partly offshore*

Section 809VG(8) ITA provides:

If a qualifying investment is made using the money or other property mentioned in section 809VA(3) together with other funds ...

What is the property “mentioned in s.809VA(3)”? That provides:

- (3) A “relevant event” occurs if money or other property—
- (a) is used by a relevant person to make a qualifying investment, or
  - (b) is brought to or received in the UK in order to be used by a relevant person to make a qualifying investment.

I assume s.809VG(8) applies if an investment is made partly out of UK funds and partly out of offshore funds, though that is not what the words actually say.

Assuming the opening words of s.809VG(8) are satisfied, two rules follow:

- (a) that investment is to be treated as two separate investments,
  - [i] one made using the money or other property mentioned in section 809VA(3) and
  - [ii] one made using the other funds, and
- (b) references in the business investment provisions<sup>36</sup> to “the investment” and “the holding” relate only to the investment made using the money or other property mentioned in section 809VA(3).

The RDR Manual provides:

**RDRM34535 Order Of Disposals: Qualifying And Non Qualifying Investments** [Jan 2019]

If an investment is made with some funds that would qualify for business investment relief and some that would not, it is treated as two separate investments, one containing the qualifying funds and one containing the non qualifying funds. (s809VG(8) ITA2007)

In Example 1 in RDRM34530<sup>37</sup> if Asif’s second investment of £100,000 in June 2013 had been funded half from foreign chargeable gains and half from a UK taxed source, this would be treated as two separate investments of £50,000. One of the investments of £50,000 would derive from the foreign chargeable gains and the other from UK taxed income. In any subsequent disposal where the mitigation step is not taken, the investment containing the foreign chargeable gains would be deemed as disposed of before the investment containing the non taxable funds.

#### 18.12.4 *Series of events*

---

36 Defined s.809Z10 ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

37 See 18.20.1 (Multiple claims).

Section 809VG(9) ITA provides:

If the potentially chargeable event mentioned in subsection (1)(b) is not the first such event to affect the investment, the income or gains mentioned in subsection (1)(a) do not include, as respects that investment—

- (a) any part already treated under subsection (2) as remitted to the UK as a result of an earlier event,
- (b) any part contained in amounts already taken offshore or reinvested by way of appropriate mitigation steps following an earlier event, or
- (c) any part contained in amounts already used to make a tax deposit without which an amount mentioned in paragraph (b) would not have been enough to satisfy section 809VI(1) or (2)(b) (see section 809VK).<sup>38</sup>

### 18.13 Potentially chargeable event

There are four types of potentially chargeable event:

- (1) Ceasing to be an eligible company
- (2) Disposal of holding
- (3) Extraction of value
- (4) 2-year start-up rule

I consider items (1)(2)(4) in this section, and item (3), which is the most difficult, in the following section.

#### 18.13.1 *Ceasing to be eligible co*

Section 809VH(1) ITA provides:

For the purposes of section 809VG, a “potentially chargeable event” occurs if—

- (a) the target company is for the first time neither an eligible trading company nor an eligible stakeholder company nor an eligible hybrid company nor an eligible holding company...

An example would be if the company stops trading or becomes quoted. The RDR Manual provides:

---

<sup>38</sup> See 18.19.1 (Retention to pay CGT).

### **RDRM34410 Potentially Chargeable Events Ceasing To Be An Eligible Company** [Jan 2019]

...It is possible for a target company [see RDRM34340] to change its status, yet remain a qualifying company. For example, as a consequence of a share reorganisation, a company changes from being an eligible trading company, eligible stakeholder company, or a eligible holding company, to being one of the other qualifying types of company (e.g. stops being an eligible trading company and starts being an eligible stakeholder company). The investment will be viewed as having been a qualifying investment throughout therefore there is no potentially chargeable event. (s809VH(1)(a) ITA2007)

#### 18.13.2 *Disposal of holding*

Section 809VH ITA provides:

- (1) For the purposes of section 809VG, a “potentially chargeable event” occurs if ...
- (b) the relevant person who made the investment (“P”) disposes of all or part of the holding,

“Dispose” is not defined and so has its natural meaning, not the CGT meaning.<sup>39</sup>

A person does not dispose of assets on death<sup>40</sup> so death is not a potentially chargeable event.

The RDR Manual provides:

### **RDRM34390 Potentially Chargeable Events Overview** [Jan 2019]

#### **... Share for share exchanges**

During corporate restructuring, old shares can be disposed of and new shares in the same company, or another company, issued in their place. The disposal of the old shares is a potentially chargeable event. However, provided both the old and new shares are qualifying investments, the exchange will be treated as an immediate reinvestment in a target company and no potentially chargeable event will occur provided a valid claim is made on the appropriate tax return for the year of the share exchange. The new shares are derived from the original

---

<sup>39</sup> This is consistent with the rule that CGT statutory situs rules do not apply for remittance purposes: see 17.12.13 (Situs of property for condition A).

<sup>40</sup> Contrast 64.5 (Death of individual).

foreign income and gains in the same way as the original shares.

If consideration for a disposal is paid by installments, it may be difficult to re-invest so as to avoid a clawback charge. Section 809VH(8) ITA deals with this:

If consideration for a disposal of all or part of the holding is to be paid in instalments, the disposal is to be treated for the purposes of this section as if it were separate disposals, one for each instalment (and each giving rise to a separate potentially chargeable event).

### 18.13.3 2-year start-up rule

Section 809VH ITA provides:

- (1) For the purposes of section 809VE, a “potentially chargeable event” occurs if ...
- (d) the 5-year start-up rule is breached.

Section 809VH ITA provides:

- (5) The 5-year start-up rule is breached if—
- (a) immediately after the end of the period of 5 years beginning with the day on which the investment was made, the target company is non-operational, or
  - (b) at any time after the end of that period, the target company becomes non-operational.
- (6) The target company is “non-operational” at any time when—
- (a) it is an eligible trading company but is not trading,
  - (b) it is an eligible stakeholder company but—
    - (i) it holds no investments in eligible trading companies, or
    - (ii) none of the eligible trading companies in which it holds investments is trading,
  - (ba) it is an eligible hybrid company but is not trading and—
    - (i) it holds no investments in eligible trading companies, or
    - (ii) none of the eligible trading companies in which it holds investments is trading, or
  - (c) it is an eligible holding company but—
    - (i) the group of which it is a member is not an eligible trading group, or
    - (ii) none of its 51% subsidiaries in the eligible trading group of which it is a member is an eligible trading company that is trading.

(7) In subsection (6), “trading” means carrying on one or more commercial trades (including the carrying on of any activities treated under section 809VE(4) as the carrying on of a commercial trade).

#### 18.13.4 *Insolvency relief*

Section 809VH ITA provides:

(9) An event listed in subsection (1) does not count as a potentially chargeable event if it is due to an insolvency step taken for genuine commercial reasons (but this does not prevent the extraction of any value in connection with the insolvency step from counting as a potentially chargeable event).

(10) For the purposes of subsection (9), an insolvency step is taken if—

- (a) the target company enters into administration or receivership or is wound up or dissolved,
- (b) the target company is an eligible stakeholder company or an eligible hybrid company and any eligible trading company in which it holds an investment enters into administration or receivership or is wound up or dissolved,
- (c) the target company is an eligible holding company and any eligible trading company in the group that is a 51% subsidiary of it enters into administration or receivership or is wound up or dissolved, or
- (d) a similar step is taken in relation to a company mentioned in paragraph (a), (b) or (c) under the law of a country or territory outside the UK.

The RDR Manual provides:

#### **RDRM34390 Potentially Chargeable Events Overview** [Jan 2019]

##### *Example 1* (Junaid)

J made a qualifying investment of £500,000 in Bey Motors Limited. Unfortunately Bey Motors is not successful and the company goes into receivership, ceasing trading on the 11 March 2015. At this point there is no chargeable event even though the company has ceased trading; J need take no mitigation steps.

On 5 December 2015 J, as a creditor, receives £40,000 from the disposal of the company’s assets. J will need to take the appropriate mitigation steps to prevent a taxable remittance from occurring.

#### **18.14 Extraction of value rule**

Section 809VH ITA provides:

- (1) For the purposes of section 809VG, a “potentially chargeable event” occurs if ...
- (c) the extraction of value rule is breached,

Section 809VH(2) ITA provides:

The extraction of value rule is breached if–

- (a) value (in money or money’s worth) is received by or for the benefit of P or another relevant person,
- (b) the value is received from any person in circumstances that are directly or indirectly attributable to the investment, and
- (c) the value is received other than by virtue of a disposal that is itself a potentially chargeable event.

The normal way to draft para (a) would be to say that the extraction of value rule is breached if P (or a relevant person) receives a *benefit*. Is there a difference between receiving a “benefit” and the novel (and somewhat illiterate<sup>41</sup>) expression, receiving *value*?

Perhaps the words are apt to include making or repaying a loan, or redeeming shares, which may not be a benefit as there is full consideration.

The word attributable is also used in investment condition B: see 18.11.3 (“Related” benefit).

HMRC give some straightforward examples:

2.52 ... the Government proposes to introduce a provision to prevent the value of the investment leaking out to the individual either directly through payments or loans which are not arms-length or through transactions designed to pass value to the individual. For example, it would not be permitted for the company to use the funds invested to guarantee loans made to the individual; nor would it be possible to make

---

41 I am not sure it is strictly correct to speak of receiving value. One may receive a benefit, or other thing, which has a value; but one does not receive value as such, the value is an attribute of what one receives. I can receive a valuable asset, but what I receive is the asset, not the value. But perhaps that objection is pedantic. One receives value if one receives benefit or other thing which has a value. The words “in money or money’s worth” are unnecessary but they do no harm. The expression value received is used elsewhere, but with a defined meaning, so that gives no guidance here.

payments to a third party which are linked to payments made to the individual.<sup>42</sup>

If value is extracted, all the relief is clawed back unless the entire holding is sold and the entire proceeds reinvested or removed abroad. That is the result even if the value extracted is minimal.<sup>43</sup>

The rule applies even if the value is received outside the UK, which is illogical in the context of the remittance basis.

Section 809VH(3) ITA provides a limited exception where the value is income for tax purposes:

But the extraction of value rule is not breached merely because a relevant person receives value that—

- (a) is treated for income tax or corporation tax purposes as the receipt of income or would be so treated if that person were liable to such tax, and
- (b) is paid or provided to the person in the ordinary course of business and on arm's length terms.

#### 18.14.1 *VCT/EIS relief*

What is the position if the investment confers EIS tax relief? At first sight, there is a problem. The tax relief is a receipt of value. The benefit is received in circumstances which are attributable to the investment.<sup>44</sup> The exemption for income-taxable benefits does not apply.

However the RDR Manual provides:

**RDRM34385 Interaction Of Business Investment Relief With Enterprise Investment Scheme (EIS) And Seed Enterprise Investment Scheme (SEIS) [Jan 2019]**

If an individual claims business investment relief, there is nothing to prevent that individual from claiming either EIS or SEIS relief on the investment; provided that the qualifying criteria for all the schemes are

42 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)

43 See 18.12.2 ("Affected income or gains").

44 The same conclusion was reached in another context in *Harris v HMRC* [2010] UKFTT 385 (TC).

met. ...

### 18.15 “Appropriate mitigation steps”

Where there is a potentially chargeable event, there is (in short) still no remittance clawback remittance charge if the appropriate mitigation steps are taken.

Section 809VI ITA provides:

- (1) If the potentially chargeable event is a disposal of all or part of the holding, the appropriate mitigation steps are regarded as taken if the whole of the disposal proceeds have been taken offshore or reinvested.
- (2) For any other case, the appropriate mitigation steps are regarded as taken if—
  - (a) P has disposed of the entire holding (or so much of it as P retains when the potentially chargeable event occurs), and
  - (b) the whole of the disposal proceeds have been taken offshore or re-invested.

### 18.16 “Taken offshore” or “re-invested”

#### 18.16.1 *Scope of definition*

Section 809Z9 ITA provides:

- (1) This section applies to a provision of this Chapter that is satisfied if something (for example, disposal proceeds) is taken offshore or used by a relevant person to make a qualifying investment...
- (10) References in this section to something being “invested” are to something being used by a relevant person to make a qualifying investment.
- (11) The provisions to which this section applies include sections 809UA(2)<sup>45</sup> and 809VB(2)<sup>46</sup>, but in those cases—
  - (a) disregard references in this section to investment, and
  - (b) in the case of section 809VB(2), the assessment date for the purposes of subsection (5) is the date of the relevant event (see section 809VA(3)(b)).

#### 18.16.2 “Taken offshore”

---

45 See 18.24.4 (Payment on account).

46 See 18.8 (Investment fails to proceed).

Section 809Z9(2) ITA provides:

Things are to be regarded as “taken offshore” if (and only if) they are taken outside the UK such that, on leaving the UK, they cease to be available—

- (a) to be used or enjoyed in the UK by or for the benefit of a relevant person, or
- (b) to be used or enjoyed in any other way that would count as remitting income or gains to the UK.

### *Taking money offshore*

Section 809Z9(3) ITA explains how money is taken offshore:

If—

- (a) the thing required to be taken offshore or invested is money and
- (b) it is paid temporarily into an account pending satisfaction of the provision,

the provision is satisfied only if the money actually taken offshore or invested is taken from the same account.

There is no relief if money is transferred from one account to another, or if money is paid into one account and funds from another account are taken offshore. It is difficult to see the reason for the rule.

The RDR Manual provides:

#### **RDRM34460 Taking Proceeds Offshore or Investing Them** [Jan 2019]

##### *Example 1* (Ammar)

A disposes of some of his qualifying investment for £50,000. He deposits the £50,000 proceeds into a joint bank account he holds with his wife Layan. The joint account contains UK taxed income of both A and Layan.

A fortnight later, A transfers £50,000 from the joint account to an account in his sole name in the Isle of Man.

A is regarded as having taken the proceeds of the sale of his qualifying investment offshore and thus to have taken the appropriate mitigation steps.

If A had transferred the £50,000 to the Isle of Man from a different UK bank account, he would not have carried out the appropriate mitigation step and would be taxable on the foreign income or gains used to make his original investment.

### *Taking property (not money) offshore*

Section 809Z9 ITA then deals with property other than money:

- (4) If the thing required to be taken offshore or invested is something in money's worth,<sup>47</sup> the provision may be satisfied—
  - (a) by taking the thing offshore or investing it, or
  - (b) by taking offshore or investing money or other property of the equivalent value.
- (5) "The equivalent value" is the market value<sup>48</sup> of the thing in money's worth, assessed as at the date of the sale or other disposal in relation to which the provision is triggered.

Perhaps the point is that the consideration might be property which cannot be taken offshore.

Section 809Z9(6) ITA then deals with deemed consideration:

- If the consideration for a disposal is deemed under section 809Z8(4),<sup>49</sup> the provision may be satisfied by taking offshore or investing money or other property of a value equal to—
- (a) the amount of the deemed consideration, less
  - (b) any agency fees (within the meaning of section 809Z8) that are deducted before the actual consideration is paid or otherwise made available to or for the benefit of a relevant person.

Section 809Z9(7) ITA deals with the interaction with exempt property rules:

- Subsections (4)(b) and (6) do not apply in the case of other property of the equivalent value if the other property is—
- (a) exempt property under section 809X,<sup>50</sup>
  - (b) consideration for the disposal of any such exempt property, or
  - (c) consideration for the disposal of all or part of the holding (see section 809VC) relating to a qualifying investment.

---

47 "Something in money's worth" is a clumsy expression meaning property other than money; the drafter is half remembering the technical expression *consideration of money or money's worth*.

48 Defined s.809Z10 ITA: "In this Chapter ... "market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

49 See 18.17.3 (Deemed consideration).

50 See 18.29 (Exempt property).

Section 809Z9(8) ITA deals with the interaction with the mixed fund rules:

Money or other property taken offshore or invested in accordance with subsection (4)(b) or (6) is to be treated for the purposes of this Chapter—

- (a) as deriving from the thing required to be taken offshore or invested, and
- (b) as having the same composition of kinds of income and capital as that thing.

### 18.16.3 *Part taken offshore*

Section 809Z9(9) ITA provides:

A provision to which this section applies may be satisfied—

- (a) by taking the whole thing offshore or investing the whole thing, or
- (b) by taking one part offshore and investing the other part.

### 18.16.4 *“Re-invested”*

Section 809VI(7) ITA provides:

Proceeds are “re-invested” if a relevant person uses them to make another qualifying investment (or the proceeds are themselves a qualifying investment) whether in the same or a different company.

An example is a share for share exchange.

### 18.16.5 *Gain on disposal of investment*

Section 809VI ITA provides:

(3) But if the disposal proceeds exceed X, subsections (1) and (2)(b) apply only to so much of the proceeds as is equal to X.

(4) “X” is—

- (a) the sum originally invested,<sup>51</sup> less
- (b) so much of that sum as has, on previous occasions involving the same investment—

---

51 This has a commonsense definition in s.809VI:

(5) “The sum originally invested” means the amount of the money, or the market value of the other property, used to make the investment.

(6) Market value is to be assessed for these purposes as at the date of the relevant event (see section 809VA).

- (i) been taken into account in determining the affected income or gains under section 809VG(2) [clawback remittance charge],
- (ii) been taken offshore or re-invested in order to avoid the application of that section, or
- (iii) been used to make a tax deposit without which the amount actually taken offshore or re-invested would not have been enough to satisfy subsection (1) or (2)(b) (see section 809VK).<sup>52</sup>

The RDR Manual provides:

**RDRM34440 Appropriate Mitigation Steps [Jan 2019]**

*Example 1 (Luther)*

L has made a qualifying investment of £1 million in Nelka Fashions Limited. The company flourishes, and after several years, L decides to dispose of half of his holding. The disposal proceeds are £1,200,000.

There have been no prior potentially chargeable events so amount X is £1 million (the amount originally invested). This is less than the disposal proceeds of £1,200,000 so L is only required to take £1 million offshore in order to take the appropriate mitigation steps.

There is also a capital gain of £700,000 (proceeds £1,200,000 less cost of £500,000) that L will report on his Self Assessment tax return for the year of disposal.

*Example 2 (Rory)*

R brings £1 million of his foreign income to the UK and invests in an eligible trading company for which he acquires 1,000 newly issued shares.

Twelve months later R sells 250 shares for £325,000. The acquisition cost of these shares is £250,000 so there is a UK capital gain of £75,000. As amount X is £1 million, R must take the entire £325,000 offshore or reinvest it in a target company if he is to avoid a taxable remittance of the £250,000 used to buy the shares. R accordingly takes £325,000 offshore.

In the following tax year R sells a further 250 shares for £450,000 which gives rise to a UK capital gain of £200,000. Amount X is now £675,000 - that is the original investment of £1 million less the amount of £325,000 previously taken offshore. R must again take the entire

---

<sup>52</sup> See 18.19.1 (Retention to pay CGT).

proceeds of £450,000 offshore or reinvest in an eligible company to avoid a taxable remittance of £250,000. R takes £450,000 offshore. Five years later R sells his remaining 500 shares for £2,500,000, making a UK capital gain of £2 million. At this point R has taken offshore £775,000 of his original £1 million qualifying investment, amount X is now £225,000. R must therefore take a further £225,000 offshore or reinvest it if he is to avoid a taxable remittance of £500,000. The remaining £2,275,000 can be retained in the UK.

### 18.16.6 *Liquidation of target company*

Section 809VI(8) ITA provides:

In cases where a breach of the extraction of value rule occurs in connection with the winding-up or dissolution of the target company—

- (a) subsection (2)(a) does not apply,
- (b) the reference in subsection (2)(b) to the disposal proceeds is to the value received, and
- (c) references in this section and in succeeding provisions of the business investment provisions<sup>53</sup> to the disposal proceeds are to be read as references to the value received.

### 18.17 “Disposal proceeds”

Section 809Z8(1) ITA provides:

(1) In this Chapter, in relation to a sale or other disposal, “the disposal proceeds” means—

- (a) the consideration for the disposal, less
- (b) any agency fees that are deducted before the consideration is paid or otherwise made available to or for the benefit of the person making the disposal (“the transferor”) or any other relevant person.

#### 18.17.1 *Agency fees*

Section 809Z8 ITA provides:

(6) In subsection (1), “agency fees” means fees and other incidental costs of the disposal that are charged to the transferor by any person by or

---

<sup>53</sup> Defined s.809Z10 ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

through whom the disposal is effected, but excluding any such fees or costs that—

- (a) are charged to the transferor by another relevant person, or
- (b) are to be passed on to or otherwise applied for the benefit of a relevant person.

(7) The exclusion mentioned in subsection (6) does not apply to the extent that the fees or costs—

- (a) relate to a service actually provided by the relevant person to the transferor in connection with effecting the disposal, and
- (b) do not exceed the amount that would be charged for that service if it were provided in the ordinary course of business and on arm's length terms.

### 18.17.2 *Non-cash consideration*

Section 809Z8(3) ITA provides:

If the consideration is provided in the form of anything other than money, the amount of the consideration is the market value<sup>54</sup> of the thing at the time of the disposal.

### 18.17.3 *Deemed consideration*

Section 809Z8 ITA<sup>55</sup> provides:

(4) If the disposal is made other than by way of a bargain made at arm's length, the disposal is deemed to be made for a consideration equal to the market value, immediately before the disposal, of the thing being disposed of.

(5) Without limiting the generality of subsection (4), a disposal made to another relevant person or to a person connected with a relevant person is treated in all cases as made other than by way of a bargain at arm's length.

Usual CGT reliefs such as spouse relief and charity relief do not apply.

## 18.18 **Grace period**

There is no clawback remittance charge if “the appropriate mitigation

---

54 Defined s.809Z10 ITA: “In this Chapter... “market value” has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act).”

55 Flagged by s.809Z8(2) ITA.

steps” are taken within the “grace period”.

Section 809VJ ITA provides:

- (1) The grace period allowed for the step mentioned in section 809VI(2)(a) [disposal of holding] is the period of 90 days beginning—
  - (a) if the potentially chargeable event is a breach of the extraction of value rule, with the day on which the value is received, and
  - (b) otherwise, with the day on which a relevant person first became aware or ought reasonably to have become aware of the potentially chargeable event.

In the case of the extraction of value rule, the grace period is fixed as the date of receipt, even though the investor may not know the rule is breached (because the value may be received by another person. The power to extend time may be useful here.

- (2) The grace period allowed for the step mentioned in section 809VI(1) and (2)(b) is the period of 45 days beginning with the day on which the disposal proceeds first became available for use by or for the benefit of P or any other relevant person.

#### 18.18.1 *Breach of startup rule*

Section 809VJ ITA provides:

- (2A) But subsection (2B) applies instead of subsections (1) and (2) where the potentially chargeable event is a breach of the 5-year start-up rule by virtue of section 809VH(5)(b).
- (2B) The grace period allowed for the steps mentioned in section 809VI(2)(a) and (2)(b) is the period of 2 years beginning with the day on which a relevant person first became aware or ought reasonably to have become aware of the potentially chargeable event referred to in subsection (2A).

#### 18.18.2 *Exceptional circumstances*

Section 809VJ(3) ITA provides:

An officer of HMRC may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in exceptional circumstances.

HMRC give one example of exceptional circumstances:

2.24 In some cases, it may be difficult for an investor to know that a company's activities have changed and to dispose of their investment within the 45-day period. The draft legislation therefore contains a provision to allow HMRC to extend this grace period where exceptional circumstances mean it would be unreasonable to expect the individual to dispose of an investment within 45 days.<sup>56</sup>

### 18.18.3 *Extension of grace period*

Section 809VJ ITA provides:

(4) An officer of HMRC may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in circumstances specified in regulations made by the Commissioners.

(5) Regulations under subsection (4) may have effect in relation to investments made before the day on which the regulations are made.

(6) Nothing in subsection (4) or in regulations made under it limits the power conferred by subsection (3).

(7) The powers conferred on officers of HMRC by subsections (3) and (4) include power to agree to extend a grace period for a length of time that is indefinite but is capable of becoming definite by means identified in the agreement (such as the satisfaction of conditions).

The regulations are the Business Investment Relief Regulations 2012. It is dispiriting to see the level of micro-detail under a government which claimed to be “determined to cut red tape”.<sup>57</sup>

Regulation 2 Business Investment Relief Regulations provides:

2. The grace period allowed for an appropriate mitigation step by section 809VJ of the Income Tax Act 2007 may be extended by an officer of HMRC if regulation 3 or 4 applies.

**Lock-up agreements**

3.—(1) This regulation applies if conditions 1 and 2 are met.

(2) Condition 1 is that—

- (a) the target company has ceased to be a private limited company by virtue of having some or all of its shares listed on a recognised stock exchange; or

---

<sup>56</sup> Consultation Response Document

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

<sup>57</sup> <http://www.redtapechallenge.cabinetoffice.gov.uk/about>

- (b) (i) the target company has become a subsidiary of another company (“the new company”); and
  - (ii) the new company is a body corporate some or all of whose shares are listed on a recognised stock exchange (or are to be so listed).
- (3) Condition 2 is that P is unable to comply with an appropriate mitigation step without breaching the terms of a lock-up agreement.
- (4) For the purposes of this regulation “lock-up agreement” means a contract—
- (a) entered into by P with one or more relevant parties which is directly related to the listing of shares in the target company or, as the case may be, the new company, on a recognised stock exchange; and
  - (b) that imposes restrictions on the time or manner in which P may—
    - (i) dispose of some or all of P’s holding in the target company; or
    - (ii) dispose of some or all of any shares in the new company received by P in return for P’s holding in the target company.
- (5) For the purposes of this regulation “relevant party” means—
- (a) the target company;
  - (b) the new company;
  - (c) professional advisers retained by the target company or the new company in relation to the listing of the shares of the target company (or, as the case may be, the shares of the new company) on a recognised stock exchange.

### **Statutory and legal bars**

4. This regulation applies if—
- (a) P is prevented from taking an appropriate mitigation step by a prohibition imposed by or under any enactment; or
  - (b) the taking of an appropriate mitigation step by P would breach the terms of an order imposed by any court.

## **18.19 Effect of mitigation steps**

Section 809VL ITA provides:

- (1) This section explains the effect for the purposes of this Chapter in cases where section 809VG(2) [clawback remittance charge] does not apply because the appropriate mitigation steps were taken within the

grace period allowed for each step.

(2) If disposal proceeds were taken offshore as part of those steps, nothing in section 809VA(2) [remittance investment relief] prevents anything subsequently done in relation to those proceeds (or anything deriving from them) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is subsequently done.

(3) If disposal proceeds were re-invested as part of those steps—

(a) the underlying income or gains continue to be treated under section 809VA(2) as not remitted to the UK, and

(b) the business investment provisions<sup>58</sup> apply to the reinvestment as they apply to the original investment.

(4) In the application of the business investment provisions to the reinvestment—

(a) treat the potentially chargeable event mentioned in section 809VG(1)(b) as the relevant event,

(b) treat the underlying income or gains as the income or gains treated under section 809VA(2) as not remitted to the UK as a result of the re-investment, and

(c) treat the amount used to make the re-investment as the sum originally invested.

(5) If the re-investment is made using more than the minimum amount of disposal proceeds required to satisfy section 809VI(1) or (2)(b)—

(a) that investment is to be treated as two separate investments, one made using the minimum amount of disposal proceeds and one made using the excess, and

(b) references in the business investment provisions to “the investment” and “the holding” relate only to the investment made using the minimum amount of disposal proceeds.

(6) “The underlying income or gains” means the affected income or gains (within the meaning of section 809VG) or, if one part of the disposal proceeds is taken offshore and the other part re-invested, a corresponding proportion of the affected income or gains.

(7) A further claim must be made in accordance with section 809VA in respect of the re-investment and, if no such claim is made on or before the first anniversary of the 31 January following the tax year in which the re-investment was made, section 809VG(2) [clawback remittance

---

58 Defined s.809Z10 ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

charge] applies, as respects the original investment, as if the appropriate mitigation steps had not been taken within the grace period allowed for each step.

(8) Section 809VM makes further provision in cases involving a tax deposit.

### 18.19.1 *Retention to pay CGT*

Section 809VK ITA provides:

- (1) This section applies if—
  - (a) there is a disposal of all or part of the holding,
  - (b) the disposal counts as a potentially chargeable event or is part of the appropriate mitigation steps taken in consequence of a potentially chargeable event,
  - (c) a chargeable gain (but not a loss) accrues to P on the disposal, (d) P is chargeable to capital gains tax (but not corporation tax) in respect of that gain, and
  - (e) the actual disposal proceeds are less than Y.
- (2) The difference between the actual disposal proceeds and Y is referred to in this section as “the shortfall”.
- (3) “The actual disposal proceeds” means the disposal proceeds but disregarding section 809Z8(4).<sup>59</sup>
- (4) “Y” is the sum of—
  - (a) the amount (if any) that would, but for this section, be required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b), and
  - (b) the amount found by applying the highest potential CGT rate to the amount (computed in accordance with TCGA 1992) of the chargeable gain accruing to P on the disposal.
- (5) The highest potential CGT rate is the highest rate specified in section 1H of TCGA 1992 (regardless of the type of the chargeable gain or, if P is an individual, the rate of income tax at which P’s income is chargeable).
- (6) If this section applies, the amount that is required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) is reduced by the permitted amount.
- (7) “The permitted amount” is so much of the shortfall as is used, within the grace period allowed for taking the disposal proceeds offshore or re-

---

<sup>59</sup> See 18.17.3 (Deemed consideration).

investing them, to make a deposit in respect of which a certificate of tax deposit is issued to P under section 12 of the National Loans Act 1968.

- (8) A reduction may not be made under subsection (6) unless—
- (a) when details of the deposit are confirmed to HMRC, the confirmation letter states that this section is intended to apply to the deposit, and
  - (b) the amount of the deposit is no greater than the shortfall.

### 18.19.2 Tax deposit

Section 809VM ITA provides:

- (1) This section applies in cases where—
  - (a) section 809VG(2) [clawback remittance charge] did not apply because the appropriate mitigation steps were taken within the grace period allowed for each step,
  - (b) the amount required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) had been reduced under section 809VK<sup>60</sup>, and
  - (c) but for that reduction, the amount that was actually taken offshore or re-invested would not have been enough to satisfy section 809VI(1) or (2)(b).
- (2) The tax deposit that gave rise to the reduction is referred to in this section as “the tax deposit”.
- (3) Use of the tax deposit to pay the relevant tax liability<sup>61</sup> does not count as remitting the underlying income or gains to the UK (and, accordingly, section 809VA(2) [remittance investment relief] continues to apply to the income or gains).

### 18.19.3 CTD clawback charge

Section 809VM ITA provides:

- (4) If any of the CTD conditions is breached, the underlying income or gains are to be treated as having been remitted to the UK immediately after the day on which the breach occurs.
- (5) “The underlying income or gains” means such portion of the affected

---

<sup>60</sup> See 18.19.1 (Retention to pay CGT).

<sup>61</sup> Defined s.809VM(8): For the purposes of this section ... (a) “the relevant tax liability” means P’s liability to capital gains tax for the tax year in which the disposal took place...

- income or gains (within the meaning of section 809VG) as is—
- (a) represented by the payment, in the case of subsection (3), or
  - (b) affected by the breach, in the case of subsection (4).

#### 18.19.4 CTD conditions

Section 809VM(6) ITA provides:

The CTD conditions are as follows—

- (a) the tax deposit must not be used to pay a tax liability other than the relevant tax liability,
  - (b) if any of the tax deposit is withdrawn by the depositor, the amount withdrawn must be taken offshore or re-invested within the period of 45 days beginning with the day on which the withdrawal was made, and
  - (c) any part of the tax deposit that has been neither used to pay a tax liability nor withdrawn by the due date<sup>62</sup> must be withdrawn by the depositor and taken offshore or reinvested<sup>63</sup> within the period of 45 days beginning with that date.
- (7) Where the CTD conditions were not breached because the requisite amount was taken offshore or re-invested within the 45-day period mentioned in subsection (6)(b) or (c)—
- (a) section 809VL applies to the amount taken offshore or reinvested as it applies to disposal proceeds, but
  - (b) read the reference in section 809VL(4)(a) to the potentially chargeable event as a reference to—
    - (i) the withdrawal,<sup>64</sup> in a case within subsection (6)(b), and
    - (ii) the due date, in a case within subsection (6)(c).

The RDR Manual provides:

**RDRM34460 Taking Proceeds Offshore or Investing Them** [Jan 2019]

*Example 2* (Magnus)

M, a UK resident remittance basis taxpayer, loaned £40,000 to a friend's

62 Defined s.809VM(8): For the purposes of this section ... (b) “the due date” means the date by which the relevant tax liability is required to be paid...

63 Defined by reference s.809VM(8): For the purposes of this section ... (c) “re-invested” has the meaning given in section 809VI(7)...

64 Defined s.809VM(8): For the purposes of this section ... (d) references to withdrawal include repayment for whatever reason.

eligible trading company in 2012-13; he makes a valid claim to business investment relief on his Self Assessment tax return.

The £40,000 is made up of £20,000 foreign capital gains and £20,000 foreign income.

The business is successful and in 2014-15 is in a position to repay 50% (£20,000) of the loan back. The £20,000 will retain the ratio of the type of funds originally invested so will comprise £10,000 foreign capital gains and £10,000 foreign income.

As M is looking to upgrade his car, his friend offers him a 6 month old company car which has a market value of £20,000. M takes ownership of the car in repayment of the loan to date.

The car is now treated as deriving from £10,000 foreign capital gains and £10,000 foreign income. M wants to use the car in the UK, so to carry out the appropriate mitigation step he decides to take £20,000 of his UK taxed income offshore instead. Although it is UK taxed income, the £20,000 will now be treated as deriving from the £10,000 foreign capital gains and £10,000 foreign income that M originally invested. If, in the future, these funds are remitted to the UK they will be taxed as M' foreign capital gains and foreign income.

#### *Example 3*

In the above example, instead of taking £20,000 of his UK taxed income offshore, M decides to take offshore an antique vase purchased with £25,000 of his UK employment income. The vase has a market value of £30,000 at the time that M takes possession of the car in satisfaction of the part repayment of the loan he made to his friend's company.

M has taken the appropriate mitigation step and no tax under the remittance basis is due on the disposal of his qualifying investment. The vase is now regarded as deriving from M' £10,000 foreign chargeable gains and £10,000 foreign income originally loaned to the company.

If the value of the vase had fallen to £15,000 by the time the loan was repaid, it would not be regarded as fulfilling the mitigation steps. M would have to take additional property offshore to the value of £5,000.

The RDR Manual provides:

#### **RDRM34500 Certificates Of Tax Deposit (CTD) [Jan 2019]**

HMRC operates a general Certificate of Tax Deposit scheme. Under the scheme a taxpayer can make tax deposits in advance of tax liabilities becoming due and payable. For information about how to make a tax deposit refer to our website (The Certificate of Tax Deposit Scheme)

An individual, claiming business investment relief, who sells the whole

of their investment at a gain, will usually have sufficient proceeds to take the mitigation steps and to pay any Capital Gains Tax on the gain made. That is because, in order to take the appropriate mitigation steps [see RDRM34440], they are only required to take the original invested amount outside the UK and can leave the "gain" element in the UK to pay any resulting tax liability.

However, in the case of a partial disposal where the proceeds received from the sale are less than the amount originally invested, the whole of the disposal proceeds must be taken outside the UK or reinvested in order to take the appropriate mitigation steps. In such a case, there may be no funds available in the UK to pay any resulting Capital Gains Tax liability.

*Example 1 (Kylie)*

K's initial qualifying investment is £100,000 for which she receives 10,000 shares.

Two years later she sells 5,000 shares for £80,000 giving rise to a capital gain of £30,000 on which she calculates the maximum Capital Gains Tax payable would be £8,400. The proceeds are less than the sum originally invested (£100,000) so the whole of the £80,000 must be taken offshore or reinvested in order to take the appropriate mitigation steps. If K does not have sufficient UK funds to pay the Capital Gains Tax liability she could have to remit offshore funds to the UK, which themselves could become taxable as a remittance.

The CTD scheme can be used in situations such as this in order to pay the UK Capital Gains Tax. When taxpayers use some of the proceeds of their disposal to make a tax deposit, which must be made within 45 days of the disposal proceeds being paid [see RDRM34480], the amount of the disposal proceeds that must be taken offshore or reinvested in order to take the appropriate mitigation steps is reduced by the amount of the tax deposit. (s809VK ITA2007)

*Example 2*

Following on from the example above, K makes a tax deposit of £8,400 ten days after receiving the disposal proceeds. The amount that K must take offshore or re-invest in order to carry out the mitigation steps is now £71,600 (£80,000 less £8,400); K has a further 35 days to reinvest this sum or take it offshore.

The RDR Manual provides:

**RDRM34510 CTD Amount That Can Be Deposited [Oct 2016]**

*Example 1 (Charan)*

C pays tax on the remittance basis. In 2012-13 he made a qualifying investment of £1 million in an engineering company and was issued with 20,000 shares. He subsequently makes a claim for the business investment relief on his Self Assessment tax return for the tax year 2012-13, and so does not pay any UK tax on what would otherwise have been a chargeable remittance of £1 million.

In July 2015 C disposes of 10,000 shares for £800,000 making a capital gain of £300,000. To comply with the appropriate mitigation steps C must move the entire £800,000 proceeds offshore or reinvest them in a target company. In this case C can choose to make a tax deposit with HMRC under the CTD scheme and, if he does so, the tax deposit will reduce the amount of the proceeds that must be taken offshore or reinvested.

C calculates the potential maximum Capital Gains Tax liability accruing on the gain from his part disposal as:

$$£300,000 \times 28\% = £84,000$$

Amount Y is therefore £884,000 (£800,000 plus £84,000). As this is higher than the amount that must be taken offshore to satisfy the mitigation steps, C is able to make a tax deposit of the difference.

If C makes a tax deposit of £84,000, he need only take offshore or reinvest £716,000 (£800,000 less £84,000) to complete the mitigation steps. C must also confirm, in writing, to HMRC that ITA07/s809VK is intended to apply to the tax deposit.

\*Based on Capital Gains Tax rates at May 2012.

### *Example 2 (Izaak)*

I has made a qualifying investment of £1 million. He was issued with 250,000 shares at a cost of £4 per share. He makes a claim for business investment relief on his Self Assessment tax return for the tax year 2012-13, and does not pay any UK tax on what would otherwise have been a remittance of £1 million. I disposes of his holding over several years as illustrated below.

	2012-13	2013-14	2014-15	2015-16
Shares held at start of year	250,000	250,000	150,000	112,500
Shares disposed of	-	100,000	37,500	112,500
Disposal proceeds (a)	-	£500,000	£200,000	£700,000
Cost of shares disposed of (b)	-	£400,000	£150,000	£450,000
Chargeable gain: (a)-(b) = (c)	-	£100,000	£50,000	£250,000

Maximum Capital Gains Tax liability (c) × 28% = (d)	-	£28,000	£14,000	£70,000
Amount to be taken offshore or reinvested under mitigation steps (e)		£500,000	£200,000	£30,000
Amount Y - amount to be taken offshore or reinvested plus maximum CGT liability (d) + (e) = (f)		£528,000	£214,000	£370,000
Shortfall - difference between Y and disposal proceeds, unless disposal proceeds are greater than Y (f) - (e) = (g)		£28,000	£14,000	Disposal proceeds greater £0
Amount that I can deposit in CTD within 45 days of disposal		£28,000	£14,000	Not Applicable
Amount I must take offshore or reinvest within 45 days of disposal if he chooses to make the maximum deposit under the CTD scheme (e) - (g) -		£472,000	£186,000	£300,000

There is no requirement for the taxpayer to make a tax deposit if they prefer to meet their capital gains tax liabilities from other funds. If they do not make a tax deposit, the amount to be taken offshore or reinvested is not reduced.

## 18.20 Pooling investments in co/group

### 18.20.1 Multiple claims

Section 809VN(1) ITA provides:

Subsection (2) applies if at any time income or chargeable gains of an individual are treated under section 809VA as not remitted to the UK as a result of—

- (a) more than one qualifying investment made in the same target company,
- (b) more than one qualifying investment made in companies in the same eligible trading group, or
- (c) qualifying investments made
  - [i] in an eligible trading company and
  - [ii] in an eligible stakeholder company or eligible hybrid company that holds investments in that trading company.

Where this condition is met, we turn to s.809VN(2) ITA:

In the application of section 809VG at that time—

- (a) treat the investments and holdings as if they were a single qualifying investment and a single holding, and
- (b) assume that a disposal of all or part of that deemed single holding affects the deemed single investment in the order in which the qualifying investments were made (that is to say, on a first in, first out basis).

There are two deemings here:

- (1) A pooling of the various holdings. If an investor has made multiple investments qualifying for relief in the same company or group, clawback on receipt of a benefit affects all the investments unless they are all taken abroad or reinvested.
- (2) Disposals are on a FIFO basis regardless of the asset actually disposed of.

The RDR Manual gives a straightforward example where the facts (stripping out irrelevancies)<sup>65</sup> are as follows:

---

65 The example in full (including its irrelevant detail) is as follows:

In tax year 2011-12 A is a UK resident remittance basis taxpayer. He had substantial foreign earnings that year, and in June 2012 he makes an investment of £100,000 of his foreign earnings in K Limited, a private limited trading company. A receives 50,000 newly issued ordinary 'A' shares in the company in respect of his investment. The conditions applying to the making of his investment under the business investment relief provisions are met and A makes a valid claim on his 2012-13 Self Assessment tax return. The £100,000 foreign earnings are treated as not remitted to the UK.

In June 2013 A makes a further investment of £100,000 that consists entirely of foreign chargeable gains from 2012-13. As the value of K Limited has increased, A receives 40,000 newly issued ordinary 'B' shares for his investment. Once again, A makes a valid claim to business investment relief on his 2013-14 Self Assessment tax return in respect of the £100,000 investment of foreign chargeable gains, which are treated as not remitted to the UK.

In June 2014 A wants to buy a property in the UK and partially finances the purchase by selling the 40,000 ordinary 'B' shares in K Limited for £180,000. As A requires the money in the UK he does not carry out the appropriate mitigation steps and will be taxable on the foreign income or gains used to make the qualifying investment. There has been more than one qualifying investment by A in K Limited so, for remittance basis purposes, the sale is matched against the June 2012 investment first, that is A's original purchase of 50,000 ordinary 'A' shares. A is taxable on £100,000

**RDRM34530 Order of disposals: Multiple qualifying investments**

[Jan 2019]

*Example 1* (Asif and Kadigan Ltd)

A is a remittance basis taxpayer.

In June 2012 A makes an investment of £100,000 of his foreign earnings in K Limited. A receives 50,000 newly issued ordinary ‘A’ shares in the company. A claims remittance investment relief and the £100,000 foreign earnings are treated as not remitted to the UK.

In June 2013, A makes a further investment of £100,000 that consists of foreign chargeable gains. A receives 40,000 newly issued ordinary ‘B’ shares. A claims remittance investment relief so the foreign chargeable gains are treated as not remitted to the UK.

In June 2014, A sells the 40,000 ordinary ‘B’ shares Limited for £180,000. A does not carry out the appropriate mitigation steps.

The HMRC analysis is as follows:

There has been more than one qualifying investment by A in K Limited so, for remittance basis purposes, the sale is matched against the 2012/13 investment first, that is A’s original purchase of 50,000 ordinary ‘A’ shares. A is taxable on £100,000 of his foreign earnings and this is regarded as remitted to the UK in 2014-15.

A has also made a UK capital gain on the disposal of his ordinary ‘B’ shares.

The 50,000 ‘A’ shares remaining invested in the company are treated as deriving from £100,000 foreign chargeable gains.

### 18.20.2 *Qualifying & other investments*

Section 809VN(3) ITA provides:

Subsection (4) applies if at any time—

- (a) income or chargeable gains of an individual are treated under section 809VA as not remitted to the UK as a result of one or more qualifying investments,

---

of his foreign earnings from 2011-12 and this is regarded as remitted to the UK in 2014-15. A has also made a UK capital gain on the disposal of his ordinary ‘B’ shares and he reports this on his 2015-16 SA return. The 50,000 ‘A’ shares remaining invested in the company are treated as deriving from £100,000 foreign chargeable gains arising in 2012-13.

- (b) in addition to that investment or those investments, a relevant person holds at least one other investment in
  - [i] the same target company,
  - [ii] the same eligible trading group or
  - [iii] a related eligible company,<sup>66</sup> and
- (c) that other investment is not a qualifying investment.

Where these conditions are met, we turn to s.809VN(4) ITA:

In the application of section 809VG at that time—

- (a) treat the investments and holdings as if they were a single investment and a single holding, and
- (b) assume that a disposal of all or part of that deemed single holding is a disposal of a holding from a qualifying investment until the holdings from all the qualifying investments have been disposed of.

These are the same two deemings as s.809VN(2) discussed above; though the second of them is slightly differently worded.

The RDR Manual gives an example where the facts (stripping out irrelevancies)<sup>67</sup> are as follows:

---

66 Section 809VN (5) provides: “The reference to a “related eligible company”—  
 (a) in relation to an eligible trading company, is to an eligible stakeholder company or eligible hybrid company that holds investments in that company, and  
 (b) in relation to an eligible stakeholder company, is to an eligible trading company in which that company holds investments.”

67 The example in full (including its irrelevant detail) is as follows:

E holds 100 shares in a UK trading company he set up in 2004 using £500,000 of his UK taxed income. This is not a qualifying investment.

In June 2012 E invests a further £500,000 of his foreign income into the company and receives an additional 100 newly issued shares. As E’s investment is a qualifying investment, he makes a claim to business investment relief on his tax return for 2012-13 and the foreign income is not taxed as a remittance.

In 2013-14 E decides to sell half of his 200 shares to help fund the purchase of a property in the UK and receives £750,000 for them.

As E does not carry out the appropriate mitigation steps, the 200 shares are treated as a single holding and the disposal of 100 of the shares is treated, for remittance basis purposes, as out of qualifying investments first. E is treated as disposing of the investment made in June 2012 first and so will be taxed on £500,000 foreign income on the remittance basis. E has also made a capital gain that he declares on his 2013-14 Self Assessment tax return along with the £500,000 foreign income remittance.

**RDRM34535 Business investment relief: Mixed funds [Oct 2016]***Example 1* (Erik)

E holds 100 shares in a UK trading company set up in 2004 using £500,000 of his UK taxed income. This is not a qualifying investment.

In June 2012 E invests £500,000 of his foreign income into the company and receives an additional 100 newly issued shares. E claims remittance investment relief and the foreign income is not taxed as a remittance.

In 2013-14 E sells half of his 200 shares for £750,000.

E does not carry out the appropriate mitigation steps, [*checking with JK*]

The HMRC analysis is as follows.

The 200 shares are treated as a single holding and the disposal of 100 of the shares is treated, for remittance basis purposes, as out of qualifying investments first. E is treated as disposing of the investment made in June 2012 first and so will be taxed on £500,000 foreign income on the remittance basis.

E has also made a capital gain.

In *Allam v HMRC*:<sup>68</sup>

- (1) T lent funds to a company (a qualifying investment).
- (2) The company declared a dividend left outstanding as a sum due to T (“the dividend debt”)

---

Once again, it does not matter whether E or another relevant person makes the investments. All investments are treated as a single holding and disposals will be treated as coming from the qualifying investments first.

If an investment is made with some funds that would qualify for business investment relief and some that would not, it is treated as two separate investments, one containing the qualifying funds and one containing the non qualifying funds. (s809VG(8) ITA2007)

In Example 1 in RDRM34530 if Asif’s second investment of £100,000 in June 2013 had been funded half from foreign chargeable gains and half from a UK taxed source, this would be treated as two separate investments of £50,000. One of the investments of £50,000 would derive from the foreign chargeable gains and the other from UK taxed income. In any subsequent disposal where the mitigation step is not taken, the investment containing the foreign chargeable gains would be deemed as disposed of before the investment containing the non taxable funds.

<sup>68</sup> [2020] UKFTT 216 (TC). The decision had been issued 4 months previously, but the Tribunal subsequently decided they had made a mistake on this point, revoked that decision, and reissued their decision; see at [295]. The position will need to be reviewed when the case is final.

The question was whether the dividend debt was an investment for the purposes of s.809VN(4) ITA. The FTT held:

275. ... There is no definition of “investment” in or for the purpose of s809VN. We therefore agree ... that “investment” in s809VN (and in the other provisions of relating to business investment relief) must be given its ordinary meaning informed by the context in which it is being used...

277. The same rationale does not apply to the use of the word “investment” in other parts of the business investment relief rules. For example, there is no reason why the concept of “investment” in those provisions should not encompass any interest in the share or loan capital of a company that a person acquires from a third person. That having been said, in our view, the meaning of “investment” in s809VN (and in other part of the business investment relief rules) must at the very least be informed by s809VC given that the provisions form part of the same code: for example, a (non-qualifying) investment is treated by s809VN(4)(a) as part of the same “holding” as a qualifying investment (for the purposes of s809VC(2)) and the same concepts of “disposal” (in s809VG(1)(b)) should apply to them.

278. Against this background, in our view, a normal dividend which is declared (and so becomes due and payable) does not, simply because it is not paid immediately, become an “investment” for the purposes of s809VN. In those circumstances, the dividend is a return on the investment (the shares). It is not a disposal of the investment. In the period before the dividend is actually paid, the obligation to pay the dividend does not (without more) become an “investment” for the purpose of the business investment relief rules so that when it is discharged the payment is treated as a disposal. This interpretation accords with the natural meaning of the words. It also avoids the risk of a dividend on shares becoming both taxable income and, at the same time, a potentially chargeable event under the business investment relief rules, which would run contrary to the purpose of those rules, which is to encourage investment in UK trading companies.

279. By a “normal” dividend in the previous paragraph, we mean a regular dividend paid out of the commercial profits of the company. We can envisage circumstances in which the same conclusion might not be reached – for example, if a dividend is paid out of profits created on a reduction in capital of the company. However, every case will have to be judged on its own facts in the context of all of the circumstances.

280. In our view, before an outstanding normal dividend can be treated

as a further investment, there needs to be some further step which indicates that the shareholder is intending to reinvest the proceeds and put them at the disposal of the company. That may occur in a number of ways, for example, the shareholder and the company may take steps after a dividend has been declared to formalize the debt which is then outstanding between the shareholder and the company by entering into documentation to govern its terms or the shareholder may agree to accept further shares in lieu of the unpaid dividend. We also accept that that, in appropriate circumstances, it may be possible to infer that position has been reached between the company and its shareholders, for example, if a dividend has been left outstanding for a material period of time and/or if interest is charged on the amount due. Whether such an inference can be justified will depend on the circumstances of the case.

But the word investment is commonly used and has a generally understood sense which is not quite that set out above.

The decision is also doubtful when it turns to the facts of the case:

281. If we turn to the facts of this case, in our view, the unpaid dividend declared on 19 December 2012 became an investment before it was paid on 14 March 2013. Steps were taken which indicate that Dr Allam was reinvesting the proceeds (albeit for a relatively short time) and putting them at the disposal of the company. The obligation to pay the dividend was added to the loan account of Dr Allam with the company and taken into account in the balance due to Dr Allam on that account. There was no differentiation made between the dividend and other amounts due to Dr Allam (which were clearly “investments” for these purposes) shown in that account in the respect. Interest was charged on the balance.

282. The outstanding dividend should therefore be treated as a loan made by Dr Allam and so as part of the same single investment and single holding in Allamhouse as his other qualifying investments (the overseas loans) and any other investments in Allamhouse that he may have had (s809VN(4)(a)).

There was no loan, as that word is properly understood.<sup>69</sup> *Allam* ought to be reversed on this point in the forthcoming appeal. The FTT should at least have acknowledged the unfairness which follows from their decision.

In the meantime there is an important planning point, not to provide

---

<sup>69</sup> See App 2.7 (Loan).

informal short term credit to a company where remittance investment relief has been claimed.

### 18.20.3 *Investments held by different persons*

Section 809VN(6) ITA provides:

Subsections (2) and (4) apply whether the investments in question are held by the same relevant person or different ones.

This would apply (for instance) where some investments are made by one close company in which T is a participator, and other investments are made by another.

### 18.20.4 *Examples*

These rules work in anomolous ways.

Suppose:

- (1) An individual (“T”) makes an investment (say, a loan) in a company which qualify for remittance investment relief.
- (2) T (or a relevant person) purchases other investments (say, shares) in the same company; those purchased shares are not a qualifying investment.
- (3) T (or the relevant person) sells the shares.

The two investments are pooled, the sale is treated as a disposal of the loan, so the proceeds must be removed outside the UK.

Suppose:

- (1) An individual (“T”) makes an investment (say, a loan “the first loan”) in a company and does not claim remittance investment relief (eg the loan may have been made before 2012).
- (2) T (or a relevant person) lends to the same company (“the second loan”) and claims the relief.

Pooling does not apply. Section 809VN(2) does not apply as there is only one claim for relief. Section 809VN(4) does not apply as the first and the second loan are both qualifying investments. (A loan or share subscription may be a qualifying investment even though the investor does not claim the relief.)

## **18.21 Investment from mixed fund**

Section 809VO ITA provides:

- (1) This section applies if—
  - (a) but for section 809VA(2) [remittance investment relief], income or gains would have been remitted to the UK by virtue of a relevant event, and
  - (b) section 809Q (transfers from mixed funds) would have applied in determining the amount that would have been so remitted.

That is, s.809VO applies if:

- (a) Remittance investment relief applies; and
- (b) The investment is made out of a mixed fund.

Suppose:

- (1) A mixed fund consisted of
 

capital	£90
income	<u>£10</u>
total	<u>£100</u>
- (2) The investment was £10

In the absence of express provision, the onshore transfer mixed fund rule would apply. The investment would represent the £10 income, and the mixed fund would cease to be mixed. That would allow scope for planning. So s.809VO(2) provides:

The relevant event counts as an offshore transfer for the purposes of section 809R(4).

This applies the offshore mixed fund rule. Thus on the facts of the example above:

- (1) The investment is a mixed fund of £9 capital and £1 income.
- (2) The offshore fund becomes a mixed fund of £91 capital and £9 income.

Section 809VO ITA provides:

- (3) The holding is to be treated as containing a proportion of each kind of income and capital contained in the invested property equal to the fixed proportion.
- (4) “The fixed proportion” is the proportion of that kind of income or capital contained in the invested property by virtue of subsection (2).
- (5) “The invested property” means the money or other property used to

make the investment.

### 18.21.1 Funds taken offshore

Section 809VO ITA provides:

- (6) Subsection (7) applies in cases where—
  - (a) section 809VG(2) [clawback remittance charge] does not apply because an amount is taken offshore, re-invested or used to make a tax deposit,<sup>70</sup> or
  - (b) section 809VM(4) [CTD clawback charge] does not apply because an amount is taken offshore or re-invested.<sup>71</sup>
- (7) The amount taken offshore, re-invested or used to make a tax deposit is treated, immediately after that step, as containing the fixed proportion of each kind of income and capital contained in the holding.
- (8) In cases where section 809VG(2) applies—
  - (a) the affected income or gains are so much of the fixed amount of each kind of income or gain mentioned in subsection (1)(a) as reflects the portion of the investment affected by the potentially chargeable event (see section 809VG(6)),
  - (b) “the fixed amount” is the amount of that kind of income or gain that the holding is treated as containing by virtue of subsection (3), and
  - (c) section 809Q does not apply in determining the affected income or gains.

These rules could still be exploited for tax planning, but the mixed fund TAAR is kept in reserve.<sup>72</sup>

## 18.22 Clearance

It is possible to seek advance clearance that the relief applies, under CAP1.<sup>73</sup> This is a non-statutory procedure, but a clearance would bind HMRC, assuming full disclosure.

Annex B CAP1 sets out the points which need to be covered in the

<sup>70</sup> See 18.12 (Clawback remittance charge).

<sup>71</sup> See 18.19.2 (Tax deposit).

<sup>72</sup> Section 809VO(9) ITA provides: “Section 809R(2) and (3) and section 809S apply for the purposes of this section.” See 19.10 (Mixed-fund TAAR).

<sup>73</sup> HMRC, “Non-statutory clearance service guidance”

application:

### **Annex B - Business Investment Relief advance assurance checklist**

Use this checklist if you want to ask HM Revenue and Customs (HMRC) to give you their view on whether a proposed investment can be treated as a qualifying investment as defined in section 809VC of Income Tax Act (ITA) 2007. You can find guidance on the Business Investment Relief on the website ...

It helps us if you follow the order set out in the checklist in your clearance application and use the numbering on any supporting documents.

#### **Send us your request by post to:**

Business Investment Relief, HM Revenue and Customs, BX9 1BN

#### **1. Information about the claimant and their request for advance assurance**

- 1.1 The claimant's name, address and customer identification number in full, eg, National Insurance number (NINO) and Self Assessment (SA) Unique Taxpayer Reference (UTR). The claimant is the person whose foreign income and gains will be used to make the investment.
- 1.2 If you are requesting advance assurance on behalf of the claimant, state the capacity in which you are acting and your authority to do so where HMRC don't already hold this. Provide your contact details for correspondence including your phone number.
- 1.3 The legislation permits a 'relevant person' to make an investment using the claimant's foreign income or gains. A relevant person is defined in section 809M of ITA 2007. Please provide general information about the 'relevant person' if the 'relevant person' is:
  - an individual, tell us the name and address, NINO, UTR and the relationship of the 'relevant person' to the claimant.
  - a company, tell us the: registered office, place of tax resident, directors and shareholders (including their names and addresses), any UK tax reference, company registration number and reason for it being a 'relevant person', that is, its relationship to the claimant.

#### **2. Information about the proposed investment(s)**

- 2.1 General information about the company in which the proposed investment is intended to be made: name and registered office address, Company Registration Number, date and place of incorporation and UK tax reference if known
- 2.2 Details of all trading or other activities which the company, and any subsidiary company(ies), is carrying on or intends to carry on. Please provide detailed information that demonstrates that the company is an eligible trading, stakeholder or holding company ...
- 2.3 Details of how the investment will be structured.
- 2.4 Details about any shares to be issued to the claimant or 'relevant person' by the company and/or details of the nature of any loan(s) to be made by the claimant or 'relevant person' to the company.
- 2.5 Details of any loan or subscription agreement or other side agreement to be entered into by the claimant or 'relevant person'.
- 2.6 The anticipated date that the income/gains will be brought to the UK and the date the

investment will take place.

- 2.7 The amount of income/gains to be invested.
- 2.8 The anticipated SA Return year in which the claimant will claim the relief.
- 2.9 Copies of all supporting documents including:
  - the latest available accounts of the company and of any subsidiary company or investment company, or an explanation of why no accounts are available
  - a copy of any prospectus or similar document (such as a business plan or financial projections) issued by the company to potential investors
  - an up-to-date copy of the Memorandum and Articles of Association for the company with details of any changes to be made

Please identify any part(s) or passage(s) of the documents that you think are particularly relevant.
- 2.10 Any other information relevant to the request.

### 3. Advice requested from HMRC

- 3.1 The nature of the assurance you are seeking from HMRC – set out your opinion of the tax consequences of the particular investment you want HMRC to consider and how you have arrived at that opinion.
- 3.2 A clear explanation of any point(s) on which you are uncertain. If you have already received professional advice please explain why you are still unclear and share any advice which you are content to disclose.
- 3.3 Any legal advice you have already received which you are content to disclose.

### 4. Claimant's confirmation

Please include with your request confirmations from the claimant (see 4.1 or 4.2 below)

- 4.1 To the best of their knowledge and belief, no 'relevant person' will (directly or indirectly) obtain or become entitled to obtain any related benefit, and no 'relevant person' expects to obtain any such benefit as a consequence of making the investment.  
[For these purposes, a benefit is defined in section 809VF of ITA 2007]
- 4.2 To the best of their knowledge and belief they have told HMRC about all of the facts relevant to the investment/the advice sought and that these are correct.

### 5. Tax avoidance schemes

- 5.1 If there is an avoidance scheme which covers all or part of the transaction please provide details of the arrangement and/or any disclosure made to HMRC with the allocated DOTAS scheme reference number, if applicable.<sup>74</sup>

## 18.23 Investment relief: Critique

Budget 2011 announced:

**3.7 Review of non-domicile taxation** ... the rules mean that foreign income and gains are taxed if they are brought to the UK and this is a

---

<sup>74</sup> [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/748413/Annex\\_B.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/748413/Annex_B.pdf)

disincentive to inward investment. The Government will introduce the following reforms:

- remove the tax charge when non-domiciles remit foreign income or capital gains to the UK for the purpose of commercial investment in UK businesses;

It is melancholic to compare the aspiration expressed in three lines with the outcome, in 18 dense pages of legislation. The rules are complex, restrictive, and (perhaps most seriously, for potential investors) contain many uncertainties, as anyone who tries to apply them to a complex business transaction will discover.

In the consultation paper, HMRC said:

2.48 At the same time the Government recognises that complicated anti-avoidance provisions could deter non-domiciles from using this new incentive and believes that both these risks can be tackled by relatively straightforward provisions....

The Government recognises that complexity can deter investment. Therefore, to make the investment incentive genuinely appealing to non-domiciles, the Government is clear that it should be free of unnecessary restrictions and be simple to use.<sup>75</sup>

I infer that the minister's intention clashed with the deeply ingrained culture of HMRC, that anti-avoidance is a consideration which trumps every other; and the latter prevailed. In consequence, the legislation has not lived up to the promise.

All else being equal, a remittance basis taxpayer will not wish to rely on this relief to invest in the UK, either directly or indirectly through trusts and companies, as investment elsewhere avoids the burden of the rules discussed in this chapter.

For a simple solution to this problem, see 17.11 (Relevant person rules: Critique).

## 18.24 Relief on paying remittance charge

### 18.24.1 *Paying rem. basis charge*

---

75 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)

Section 809V(1) ITA provides:

Subsection (2) applies to income or chargeable gains of an individual if–

- (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
- (b) the money is brought to the UK by way of one or more direct payments to the Commissioners [HMRC], and
- (c) the payments are made in relation to a tax year to which section 809H [remittance basis claim charge<sup>76</sup>] applies as regards the individual.

Where these conditions are met, s.809V(2) ITA provides the relief:

The income or chargeable gains are to be treated as not remitted to the UK to the extent that the payments do not exceed the applicable amount (as defined in section 809H).<sup>77</sup>

The RDR Manual provides:

**RDRM34020. Remittance Basis charge - money paid directly to HMRC** [Jan 2019]

Money brought into the UK to pay the remittance basis charge (see RDRM32210) is treated as not remitted to the UK if direct payment is made to HMRC (ITA07/s809V). This exemption will only apply if the money is paid:

- in respect of the tax due for the year in which the remittance basis has been claimed, and
- the remittance basis charge is due for that tax year.

Only remittances that relate to the remittance basis charge are covered by the exemption. Remittances of foreign income or gains to pay any other liability to UK tax, including for example income tax or capital gains tax on remitted amounts, are themselves chargeable to UK tax as remitted income or gains of the tax year in which the tax is paid to HMRC (although see also RDRM35140 - remittances of nominated income). This includes payments to settle enquiry cases by contract settlement except to the extent of any payments of the remittance basis charge included in the contract settlement (but not any interest or

---

76 See 16.12 (Remittance basis claim charge).

77 See 16.12.1 (7 & 12-year residence tests).

penalties on those amounts).

The remittance basis charge can be paid in one or more amounts. However, the amount that benefits from the exemption provided at s809V is limited to the amount of the charge - that is either £30,000 or £50,000.<sup>78</sup> The amount due can be paid in one lump sum or in several stages, and may form part of the payments on account paid on 31 January or 31 July, or may be paid as a balancing payment. The exemption applies as long as the payment is in relation to the tax year in which the remittance basis charge is due.

The exemption only applies where the remittance basis charge is paid directly from foreign income or gains held outside the UK, the payment must be made direct to HMRC. This can be done either by:

- cheque (drawn on a foreign bank account)
- electronic transfer of funds.

Taxpayers will need to keep sufficient records to show that payment of the £30,000, or £50,000 remittance basis charge was made directly to HMRC from an overseas account. A copy of a cheque (or cheques) drawn on the foreign bank account, or the relevant bank statement identifying the bank transfer are examples of acceptable evidence.

The Manual gives an example where A remits £40k to pay a £30k remittance basis charge:

**Example (Alex)**

A is a long-term UK resident remittance basis taxpayer. He uses the remittance basis in 2008-09 and plans to use it again in 2009-10. A therefore makes payments on account (see RDRM32390) of £100,000 on 31 January 2009 and on 31 July 2009 in respect of his 2009-10 liability.

In July 2009 he pays £40,000 of that payment on account from his 2008-09 foreign income. Payment is made by cheque drawn on an account at a bank in the Isle of Man that was sent direct to HMRC.

A's tax liability for 2009-10 is £200,000 including the remittance basis charge of £30,000, which has been wholly met from the payments on account that he has made. No further tax is due for this year.

Because £40,000 of the tax that A has paid on account was paid directly to HMRC from an overseas account, £30,000 of the £40,000 income remitted may be treated as not remitted to the UK and is not chargeable

---

78 The text has not been updated for the increase from £50k to £60k in 2015.

to tax, unless A has instructed otherwise. The remaining £10,000 will be taxed as a remittance in the normal way. As it was remitted in July 2009 it will be a taxable remittance for the tax year 2009-10, and should be declared as such.

In this example, all of the £40,000 was remitted in July. However the remittances might be split between the payment on account dates, for example £20,000 remitted on 31 January 2009 and a further £20,000 on 31 July 2009. In such cases, unless the taxpayer specifies otherwise, the £10,000 that is not subject to the exemption and so is a taxable remittance will be treated as having occurred at the later date, as this will usually be in the taxpayer's favour.

Refer to RDRM34030 for example of where the 'remittance basis charge' is repaid to A, or otherwise no longer applies

### **Nominated Income or gains**

If taxpayers use nominated income or gains to pay the remittance basis charge of either £30,000 or £50,000 it is treated as not remitted to the UK under section 809V. Because none of the individual's nominated income or gains is treated as having been remitted to the UK in that tax year you do not have to apply the 'ordering rules' at ITAs809I and s809J. See RDRM35100 Remittances of nominated income or gains.

If the remittance basis charge is repaid by HMRC it is treated as remitted at that point (see RDRM34030) and section 809I will be triggered.

See 19.18.9 (Nominated income used to pay remittance basis charge).

### 18.24.2 *B pays A's rem. basis charge*

The Manual formerly discussed the somewhat unusual situation where B pays the remittance basis charge due from A:

#### **Example 1** (Olaf and Giselle)

O uses the remittance basis in 2008/09 and 2009/10 and 2010/11; but in 2011/12 O chooses not to use the remittance basis.

In 2011/12 O makes payment of £30,000 direct to HMRC from his foreign income that arose during 2009/10. This payment is to pay the remittance basis charge of his sister G, who is a long term resident of the UK and who has made a claim to the remittance basis in 2011/12.

The £30,000 remitted by O may be treated as not remitted to the UK under Section 809V ITA 2007 and so is not chargeable to tax provided that the payments made for a particular year do not exceed £30,000.

The position should be looked at critically if there is evidence of any reciprocity. In the case of doubt or difficulty submit to PTI Advisory

Foreign Income and Remittance Basis Team.

This text was removed in January 2014. The Manual formerly provided:

The £30,000 remittance basis charge may be paid directly from outside the UK to HMRC by a person other than the individual; the most common example will be a payment by an employer on behalf of an employee. In such cases the £30,000 paid to HMRC may form part of the taxpayer's income, for example if paid by his employer the £30,000 will form part of the employee's earnings. To the extent that these are regarded as foreign chargeable earnings this exemption will apply.

This text was removed in June 2016.

### 18.24.3 *Repayment of rem. basis charge*

Section 809V(3) ITA provides:

Subsection (2) [relief for payment of remittance basis charge] does not apply to payments if or to the extent that they are repaid by the Commissioners.

The RDR Manual provides:

#### **RDRM34030 repayment by HMRC [Jan 2019]**

There may be some exceptional circumstances where the £30,000 or the £50,000 remittance basis charge is paid to HMRC but then is later repaid, or is otherwise no longer due.

Any foreign income or gains remitted to pay the charge and initially covered by the exemption at ITA07/s809V will be regarded as a remittance when the charge is withdrawn and so will be treated as liable to UK tax at that point (ITA07/s809V(2)).

#### **Change of claim**

The £30,000 or £50,000 remittance basis charge is most likely to be withdrawn where an individual, having made a claim for the remittance basis and paid the charge for that year, subsequently decides not to claim the remittance basis for that year and makes an amendment to their Self Assessment return (TMA1970/s9ZA). In such circumstances ITA07/s809H will not apply for that tax year, so the exemption cannot apply either.

#### **Change of status**

The other situation where the £30,000 or £50,000 is likely to be withdrawn or not otherwise due is where it later transpires an individual

has claimed the remittance basis for a tax year but was not entitled to do so as they were UK domiciled and ordinarily resident in the UK in that year.

**Effect**

If the exemption under section 809V was claimed, the foreign income or gains used to pay the remittance basis charge will not have been subject to tax in the year in which they arose/accrued because the individual used the remittance basis in that year. Due to the exemption the income or gains will also not have been subject to tax when brought into the UK. In such situations there are two possibilities:

- the £30,000 or £50,000 payment was made from foreign income or gains from an earlier year in which the individual was entitled to claim the remittance basis and did so. The £30,000 or £50,000 is treated as a taxable remittance and will be taxable in the year in which the remittance to HMRC occurred
- the £30,000 or £50,000 payment was made from foreign income or gains from the present year or an earlier year in which the individual was not entitled to claim the remittance basis. The income or gains will be taxed on the arising basis for the year in which the foreign income or gains actually arose. If the return cannot be amended you may need to deal with such assessments under the 'discovery provisions' at TMA70/s29.

**Example 1(Alex)**

In the example in RDRM34020 above, A's circumstances change and he decides not to claim to be taxed on the remittance basis for 2009-10. His liability for 2009-10 on the arising basis is £195,000.

When A made the payment on account of £40,000 in July 2009 he anticipated that £30,000 of it would be attributed to the remittance basis charge. In the event he did not claim to be taxed on the remittance basis. He does not have to pay the remittance basis charge.

None of the payments on account can therefore be attributed to the remittance basis charge and the £40,000 that A paid from his 2008-09 foreign income (remember that A did use the remittance basis in 2008-09) in July 2009 is a taxable remittance.

Any cases of difficulty should be referred to Specialist PT, Personal Tax International - Advisory, Foreign Income and Remittance Basis Team.

#### 18.24.4 *Payment on account*

The RDR Manual provides:

**RDRM34030 repayment by HMRC [Jan 2019]**

... Finance Act 2013 introduced section 809UA ITA 2007 for the years 2012-13 onwards. This legislation allows payments on account made in anticipation of a claim to the remittance basis to continue to be treated as not remitted if no claim to the remittance basis is subsequently made provided an amount equivalent to the foreign income and gains paid directly to HMRC is taken offshore.

Section 809UA ITA provides:

- (1) Subsection (2) applies to income or chargeable gains of an individual if—
  - (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
  - (b) the money is brought to the UK by way of direct payments to the Commissioners on account of income tax,
  - (c) the tax year (“tax year 2”) in respect of which the payments on account are made is a tax year for which section 809H (remittance basis charge for long-term UK resident) does not apply as respects the individual, and
  - (d) that section applied as respects the individual for the previous tax year (“tax year 1”).

The wording draws on s.809V.

- (2) The relevant amount of income or chargeable gains is to be treated as not remitted to the UK if money equal to the relevant amount is taken offshore by—
  - (a) the 15 March following the end of tax year 2, or
  - (b) such later date as the Commissioners may allow on a claim made by the individual.
- (3) A claim under subsection (2)(b)—
  - (a) may be made only if the individual has made and delivered a return under section 8 of TMA 1970 for tax year 2 and reasonably expects to receive from the Commissioners a repayment of tax paid in respect of that tax year, and
  - (b) may be made no later than the 5 April following the end of tax year 2.
- (4) Money that is taken offshore in accordance with subsection (2) is to be treated as having the same composition of kinds of income and capital as the money used to make the payments on account.

(5) In this section “the relevant amount” means the lower of the following—

- (a) the amount brought to the UK as mentioned in subsection (1)(b), and
- (b) the applicable amount (as defined in section 809H) for tax year 1 ...

## 18.25 Foreign services relief

Section 809W(1) ITA provides:

This section applies to income or chargeable gains if—

- (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK because conditions A and B in section 809L are met,
- (b) condition A in section 809L [remittance condition A] is met because a service is provided in the UK (“the relevant UK service”), and
- (c) condition B in section 809L [remittance condition B] is met because section 809L(3)(a) or (b) applies to the consideration for the relevant UK service (“the relevant consideration”).

I refer to these conditions as “**services relief conditions A and B**”.

Section 809W(2) ITA provides the relief:

The income or chargeable gains are to be treated as not remitted to the UK if the following conditions are met but this is subject to subsection (5).

I refer to this as “**foreign services relief**”.

There is no relief if remittance conditions C or D apply, but in practice that will not often happen.

More importantly, there is no relief if s.809L(3)(c) or (d) apply, which deal with debt remittances. Thus suppose:

- (1) T borrows and uses the borrowed money to pay for foreign services provided in the UK: the debt is a relevant debt.
- (2) T repays the debt.

There is a taxable remittance under the debt remittance rules even though a direct payment for the services would qualify for foreign services relief and so be exempt. This is anomalous. The reason might be the difficulty of applying services relief condition B to a relevant debt case; if so it is not

a good reason as services condition B is itself misconceived.

Unless the service is provided in the UK there is no need for foreign services relief.<sup>79</sup> In the following discussion it is assumed that the service is provided in the UK.

## 18.26 Services cond<sup>n</sup> A: non-UK property

Section 809W(3) ITA provides:

Condition A is that the relevant UK service relates wholly or mainly to property situated outside the UK.

One needs to identify:

- (1) The service
- (2) The property (if any) to which the service relates
- (3) The situs of that property
- (4) If the service relates to foreign property and to other things, whether the property relates “mainly” to the foreign property

Situs is relatively straightforward. Section 809W(6) ITA incorporates the CGT situs rules.<sup>80</sup>

### 18.26.1 *Relating to non-UK property*

EN Clause 23 Sch 7 Remittance Basis Amendment 354 provides some obvious examples:

7. Condition A would cover for example, fees paid to a UK bank for managing an individual’s overseas investment portfolio. It would cover legal or brokerage fees in respect of offshore assets, such as the legal fees on the sale of a foreign house....

This is considering fees paid by the individual, but the same applies to fees paid by a relevant person, such as a settlor-interested trust:<sup>81</sup>

13. Among the sort of payments that Condition A might cover would

---

<sup>79</sup> See 17.13 (Service provided in the UK).

<sup>80</sup> Section 809W(6) ITA provides: “sections 275 to 275C of TCGA 1992 (location of assets) apply for the purposes of subsection (3) as they apply for the purposes of TCGA 1992.” See 98.1 (Asset situs for CGT: Introduction).

<sup>81</sup> After 2017 protected-trust relief is likely to be available, so it is not necessary to rely on foreign services relief.

be fees paid by non-UK resident trustees to UK advisers for advice on  
 [1] managing the assets held in the trust or  
 [2] non-UK assets the trustees are considering purchasing.  
 Accountancy fees for preparing non-UK tax returns would also be covered providing the majority of the accountancy services relates to non UK property.

The RDR Manual provides:

**RDRM34060 Relevant services provided in the UK - location of overseas property** [Jan 2019]

In applying these rules it is important to determine exactly what the service relates to, not just to whom it is provided.

For example, services may be said to be provided for non-resident trustees (a relevant person) RDRM33030 in respect of shares that the trust owns in a non-resident company (that would, if it were UK resident, be a ‘close’ company’).<sup>82</sup> However if the service actually relates to that company’s underlying UK assets then the service does not relate to property ‘outside the UK’.

On the other hand, if the service is in connection with legal obligations between the trustees and the non-resident company in respect of, say the shares that are held, for example updating the share register in the local territory, then this is a service relating to property (the company/shares) wholly situated outside of the UK.

*Example 1 (Petra)*

P, a remittance basis user, is a participator in a Jersey company that would, if it were in the UK, be a close company. The company is a relevant person RDRM33030.<sup>83</sup> The company owns a portfolio of UK real estate. UK-based advisors produce an investment and tax report in respect of the company’s UK activities; the advisors fees are paid overseas using P’s foreign income.

The example is factually far-fetched since one would normally expect the

---

82 The author is confused, here and in the examples which follow, in that whether or not the company is a close company is not relevant; though in the kind of case under consideration the company is likely to be close. (In this section I use the expression “close” company loosely, to include a non-resident close company, ie one which would be close if UK resident.)

83 The facts that the company is close, and a relevant person, are irrelevant; see above footnote.

company to pay for its own advice, out of its gross rental income, and (so far as the expense is deductible) there would in principle be no taxable remittance.<sup>84</sup> But we must assume (as the example requires) that P did pay for the advice. The HMRC analysis is as follows:

The relevant UK service is the provision of advice in a tax report which relates to the Jersey company's UK activities. It is the UK activities which are the subject of the advice, not the overseas company so the exemption cannot apply. We look through to what the work relates to.

More analytically, the service relates to property, not activities; but it relates to UK property and so HMRC are correct to conclude that the foreign services relief does not apply.

The moral for tax planning is that P should use foreign advisers (who may subcontract to the UK).

*Example 1(a)*

The Jersey company in example 1 above also has a French property, which makes up only 10% of its business.

UK-based advisors produce a separate marketing report in respect of this property. The advisors fees are paid overseas using P's foreign income. The service provided in the UK - in this case the preparation of the report - relates to a non-UK property. So the exemption at ITA07/s809W would apply, assuming the other conditions are also met.

This is straightforward.

**RDRM34040 Relevant services provided in the UK [Jan 2019]**

*...Example 6 (Micho)*

M, a remittance basis user, employs UK-based agents to prepare his US tax return. He uses his foreign income to pay for this service, paying directly into the agent's offshore bank account. This is a service provided in the UK.

Advice on the completion of a non-UK tax return would generally be within the exemption providing the majority of the advice relates to non-UK property; for example:

1. M's major source of income is UK salary and other UK employment benefits, and most of the work relates to this.

This is service work relating to non-asset related income, eg

---

84 See 17.15.1 (What is trading income).

employment income, so whether UK employment or not there is no property so the exemption at s809W cannot apply.

More analytically, the an employment contract is property, and the service relates to it.<sup>85</sup> However a contract of UK employment is likely to be subject to UK law, and so UK situate; so the conclusion that foreign services relief does not apply is correct. The moral, again, is that M should use foreign advisers.

The Manual continues:

2. Most of the work undertaken is in respect of his UK sources of income and gains, albeit these are small compared to his world wide income and gains.

The service relates to investment income/gains from UK sources so it is outside the exemption.

More analytically, the issue is CGT situs, not source, but in practice the two are normally the same.

3. Most of the work undertaken is in respect of advice relating to investment income/gains from non-UK sources.

The service provided relates to investment income/gains from non-UK sources, so it is within the exemption if all other conditions are met.

Perhaps more importantly, fees for UK tax advice, and for preparing UK tax returns, will similarly be exempt if they relate mainly to non-UK assets.

In some cases, it would be helpful for invoices to identify expressly the property to which the services charged for relate.

#### 18.26.2 “Wholly or mainly”

The RDR Manual provides:

**RDRM34040. Relevant services provided in the UK** [Jan 2019]

... For the purposes of applying the exemption “wholly or mainly” means more than half. Wholly or mainly relates to the service provided, not the property, and is, in general, judged by reference to work done, normally time spent.

However, if advisers value the measurement of work done using a variety of factors, such as, for example a basis of both time and fee rate

---

<sup>85</sup> *O'Brien v Benson's Hosiery* 53 TC 254.

(eg use of a team specialising in international property), it is appropriate that this should be reflected in the considerations of “wholly or mainly”. Other factors may include the fee and time rate if specialist advice was required, split of assets between UK and foreign situs, and the place of research or administration.<sup>86</sup>

The RDR Manual provides an example:

**RDRM34040. Relevant services provided in the UK [Jan 2010]**

... *Example 2 (Ritika)*

R, a remittance basis user, engages an investment manager based in the UK to manage her investment portfolio which covers assets both in and outside the UK and which changes throughout the year. ... Whether Condition A is met depends on whether the service provided relates wholly or mainly to property situated outside the UK.

If the advice relates to assets and investments held by R, and/or her obligations that ensue from these (eg completing valuation/ownership details to comply with requirements in the jurisdiction where the assets are based), and the advice relates to both UK-situs and offshore situs assets, it will depend on the split of the assets.

For example, if she holds, say, 60% foreign assets, and the advice given relates to all of the assets held in the portfolio, then the ‘wholly or mainly’ test would be met.

If the advisers are considering changes in R’s portfolio or the acquisition of UK assets and their research is UK-centric, then the ‘service’ provided in the UK is likely to relate to UK property, regardless of what is eventually acquired.

The tax planning moral is that R should instruct the investment managers to invest in non-UK property, but in practice she will want to do that for other reasons anyway; or (better) appoint foreign managers and then R can forget about the requirements of foreign services relief.

### 18.26.3 *Identifying the service*

It is necessary to identify what is the service before identifying what is the property to which the service relates:

- (1) There may be one service relating to UK and non UK property, in which case one applies the “wholly or mainly” test.

---

<sup>86</sup> The same point is made in EN Clause 23 Sch 7 Remittance Basis Amendment 354.

- (2) There may be separate services, one (or more) relating to UK property, and one (or more) relating to foreign property, in which case the services relating to the foreign property only can qualify for the relief.

Of course either analysis may better suit the taxpayer or HMRC, depending on the outcome of the wholly or mainly test. The VAT distinction between single (though composite) and multiple supplies is applicable here.

The RDR Manual provides:

**RDRM34040. Relevant services provided in the UK** [Jan 2019]

... If

- [1] the services (and thus the consideration due for that service) can be clearly and specifically identified as relating either to UK assets or to non-UK assets and
- [2] it is possible to separately identify this from the fees structure and invoicing,

the work relating to UK assets will not be regarded as meeting the “wholly or mainly” test at Condition A in section 809W.<sup>87</sup> This does not necessarily require a separate advice letter, report or invoice (“split-invoice”) to be issued, as long as the individual is clearly able to identify from the invoice to what his payments relate. ...

If that is right, a remittance basis taxpayer should not use a UK investment manager, say, as the commission on the purchase of UK situate securities would not be exempt, even if the securities as a whole are mainly non UK situate. A UK investment manager should be used only if no UK situate securities are purchased.

Where there are two or more separate supplies, some exempt, some not, it is necessary to identify the consideration given for each supply. The RDR Manual discusses apportionment:

**RDRM34040. Relevant services provided in the UK** [Jan 2019]

If there is a split contract for services relating to UK and non-UK assets you should accept the computations if the split bears a reasonable resemblance to the actuality of service provided.

Any attempt to use artificial or otherwise unrealistic cost structures, for

---

87 Author’s footnote: It follows that the work relating to the foreign assets does meet the wholly or mainly test (even if the foreign assets are a minority of the whole).

example to increase the costs attributed to non-UK property advice work against UK-property advice work should be strongly resisted. ...

See too 17.13.2 (Identifying the services).

### 18.27 Services condn B: Pay non-UK bank

Section 809W(4) ITA sets out services relief condition B:

Condition B is that the whole of the relevant consideration is given by way of one or more payments to one or more bank accounts held outside the UK by or on behalf of the person who provides the relevant UK service.

No relief is available if any part of the fees are paid in any other manner, for instance by way of set-off.

The service provider will generally remit the payment to the UK immediately on receipt. That does not affect the customer's tax position. In particular:

- (1) If the service provider is not a relevant person, it does not matter whether it subsequently receives money in the UK.
- (2) Even if the service provider is a relevant person, it is considered that the money it receives in the UK is derived from the work done in providing the services, and is not derived (even indirectly) from the customer's income.<sup>88</sup>
- (3) Even if that were wrong, s.809W(2) is wide enough to provide exemption in this case.

That is sensible, as the customer will not usually know, and cannot be expected to know, what the service provider does with its own money.

#### 18.27.1 *Services condition B: Critique*

I am unable to see the purpose of services relief condition B. It continues the rule in *Timpson's Executors v Yerbury* applicable under the pre-2008 remittance basis. Perhaps the policy was that something which was a remittance under the pre-2008 rules should in principle continue to be a remittance under the ITA remittance rules. If so the policy was misguided. The opportunity should have been taken to create a new and coherent set

---

<sup>88</sup> See 17.16.5 (T purchases asset from R).

of rules. As it is, suppliers of services relating to foreign property will need to open foreign bank accounts and the individual must ensure that they pay all the fees into that account; a pointless and inconvenient bureaucratic requirement, but there it is.

In practice it may be easier to appoint foreign advisers, or other suppliers, so as not to have to bother about the relief.

### 18.28 Services relief: s.730/s.87 benefit

Section 809W(5) ITA provides:

Subsection (2) does not apply if the relevant UK service relates (to any extent) to the provision in the UK of—

- (a) a benefit that is treated as deriving from the income by virtue of section 735,<sup>89</sup> or
- (b) a relevant benefit within the meaning of section 87B of TCGA 1992 that is treated as deriving from the chargeable gains by virtue of that section.<sup>90</sup>

I refer to a benefit within (a) or (b) as a “**s.731/s.87 benefit**”.

I do not see what the legislation is aiming at here. The following conditions must all be satisfied:

- (1) A service is provided in the UK.
- (2) The service relates to non-UK property.
- (3) The service relates to the provision *in the UK* of s.731/s.87 benefit.

Points (2) and (3) appear to be contradictory.

Is the following a possible (if unlikely) scenario to which the rule might apply?<sup>91</sup>

- (1) P transfers (1) RFI and (2) clean capital to an offshore trust.
- (2) Later P borrows from a UK bank to buy a UK house. The trustees charge the clean capital to guarantee P's borrowing. The trustees employ UK lawyers to advise on the guarantee.

The analysis might be:

- (1) The lawyers' service relates:

---

89 See 47.39 (Section 731 remittance basis).

90 See 57.19 (s.87 remittance basis).

91 I am grateful to John Barnett for this suggestion.

- (a) wholly or mainly to property outside the UK (the clean capital)
- (b) to a lesser extent, to a s.731/s.87 benefit to P.

In the absence of s809W(5) the trustees could use the RFI to pay the lawyers. Section 809W(5) might prevent this.

Whether this unusual scenario merits specific legislative counteraction is highly doubtful.

It is suggested that s.809W(5) ITA should be repealed.

## 18.29 Exempt property

Section 809X(1) ITA provides:

Exempt property which is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies<sup>92</sup> is to be treated as not remitted to the UK.

I refer to this as “**exempt property remittance relief**”.

There are five categories of exempt property:

<b>Exempt property</b>	<b>See para</b>
Public access for works of art	18.31
Clothing/footwear/jewellery/watches for personal use	18.32
Property brought to UK for repair	18.33
Temporary importation (275 days)	18.36
Small remittances (under £1,000)	18.38

I deal with the categories in the statutory order, though temporary importation is the most important; the others are of specialist or de minimis interest only.

The exemptions do not extend to remittance condition C or D, but those conditions will not often apply.

Suppose:

- (1) T borrows to purchase exempt property.
- (2) The exempt property is brought/received/used in the UK.

Is the debt a relevant debt? The debt relates to the exempt property, so the question is whether the exempt property “falls within s.809L(2)(a)”.

---

<sup>92</sup> Section 809L(2)(a) applies if “money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person.”

It is the old question of how far to carry the deeming.<sup>93</sup> It is considered that since the exempt property is treated as not remitted, it is treated as not falling within s.809L(2)(a), so the debt is not a relevant debt, and repayment out of foreign income or gains is not a taxable remittance. If the property ceases to be exempt, there would be a remittance under s.809R(3).<sup>94</sup>

### 18.30 Exempt property code: Definitions

Section 809Z6 ITA provides some definitions.

Section 809Z6(1) ITA provides:

This section applies for the purposes of sections 809X to 809Z5.

These sections cover all the exempt property exemptions.

#### 18.30.1 “Property”

Section 809Z6(2) ITA provides:

“Property” does not include money.

This is an artificial definition of “property” as the word in its natural sense does include money.

In the remittance basis provisions outside s.809X to s.809Z5, the word “property” is used without a definition, and does include money.<sup>95</sup> This breaches the somewhat elementary principle of good drafting, not to use the same word with different meanings. The consequence is to cause confusion and make discussion more difficult, as care is needed in choice of terminology. In this chapter:

- the word *property* (by itself) does include money;
- where I want to refer to “property” in the artificial s.809Z6(2) sense, which applies for exempt property purposes, I use the expression *property (excluding “money”)*.

#### 18.30.2 “Money”

Section 809Z6(3) ITA provides an inclusive definition of money:

---

93 See App. 7.1 (Construction of deeming provisions) .

94 See 19.6 (Income/gains used to pay debt).

95 See 17.12.1 (“Property” and “money”).

In subsection (2) “money” includes—

- (a) a traveller’s cheque,
- (b) a promissory note,
- (c) a bill of exchange, and
- (d) any other—
  - (i) instrument that is evidence of a debt, or
  - (ii) voucher, stamp or similar token or document which is capable of being exchanged for money, goods or services.

Why does the drafting identify these four types of money? It is not following any statutory precedent definition of money.<sup>96</sup> The answer is that it is adopting the concept of money used in the pre-2008 remittance basis. The pre-2008 rule that there was only a taxable remittance if the asset remitted was “money”. There was some case law discussing this. In *Scottish Widows Fund Life Assurance Society v Farmer*:<sup>97</sup>

Now, actual receipt of money, it seems to me, can only be effected in one of two ways. Either the money itself must be brought over in specie, or the money must be sent in the form which, according to the ordinary usages of commerce, is one of the known forms of remittance.

What is a “commercially recognised form of money”? In *Thomson v Moyse*:<sup>98</sup>

Nor is it necessary that Mr Moyse ... should receive the sums in coins or dollar notes or treasury notes. It is sufficient if he ... receives the sums in England in any of the other forms of money recognized by commercial men, such as bills of exchange, cheques, promissory notes or cash at bank.

---

96 For completeness: the nearest precedents I can find are:

- (1) sch 9 POCA 2002: “cash” defined to include travellers’ cheques
- (2) s.1102 CTA 2010: “securities” includes a promissory note or other instrument evidencing indebtedness...

97 5 TC 502 at p.508, following *Gresham Life v Bishop* 4 TC 464 at p.476. But the question is to some extent a question of fact, not law. Commercial practices change over time. See *Chitty on Contracts* (33rd ed., 2020), 21–057 (Mode of payment); and see the 6<sup>th</sup> edition of this work (2017/18) para 9.26 (UK receipt must be money or commercial equivalent).

98 39 TC 291 at p.340.

The former Inspectors Manual echoed the point:

***IM1564 meaning of ‘sums received in the UK’ [Dec 06]***

*The receipt may be in any commercially recognised form of money, for example, cash, notes, cheques, promissory notes, bills of exchange, or financial credit.*

This is the origin of the categories set out in the statutory definition of money.

If that is right, then the definition might only for the avoidance of doubt, as the items specifically mentioned could all be “money” in the general sense; but money is a vague word and a definition adds clarity.

“Instrument that is evidence of a debt” should be construed *ejusdem generis* with traveller’s cheques, promissory notes, and bills of exchange. These may all be regarded as commercially equivalent to money.

The statutory definition is expressed to apply only for the purposes of s.809Z6(2), through which it applies for the purposes of s.809X to s.809Z5. It is also used in para 86 sch 7 FA 2008 (2008 transitional relief) where it is incorporated by reference.<sup>99</sup>

Elsewhere in the remittance basis provisions the word *money* is used without definition, and has its ordinary meaning. So, strictly, care is needed in use of terminology. In this chapter:

- when the word *money* is used in the defined sense, which applies in the exempt property context, I refer to it as “money” with scare quotation marks.
- when the word *money* is used in its ordinary sense, I write it without quotation marks.

But in practice the statutory definition will not usually make any difference.

### 18.30.3 *Property “being in the UK”*

Section 809Z6(4) ITA defines “being in the UK”:

- References to property being in the UK are references to the property—
- (a) being in the UK after being brought to, or received in, the UK in

---

<sup>99</sup> The definition is also repeated verbatim in s.809Y. That is otiose as the definition in s.809Z6 would apply: that definition applies for s.809X to s.809Z5. But it does not matter.

circumstances in which section 809L(2)(a) applies, or  
(b) being used in the UK in circumstances in which section 809L(2)(a) applies.

Section 809L(2)(a) applies if “money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person.”

#### 18.30.4 *“Lost, stolen or destroyed”*

Section 809Z6(5) ITA provides:

References to property being lost, stolen or destroyed are to the property being lost, stolen or destroyed whilst in the UK.

#### 18.30.5 *“Compensation payment”*

Section 809Z6(6) ITA provides:

“Compensation payment”, in relation to property that has been lost, stolen or destroyed, means any payment of compensation (whether under an insurance policy or otherwise) in respect of the property.

#### 18.30.6 *Compensation payment “released”*

Section 809Z6(7) ITA provides:

A compensation payment is “released” on the day on which it first becomes available for use in the UK by or for the benefit of any relevant person.

#### 18.30.7 *“Recovered”*

Section 809Z6(8) ITA provides:

Property that has been lost or stolen is “recovered” on the day on which it becomes available to be used or enjoyed in the UK by or for the benefit of a relevant person.

### **18.31 Public access rule**

#### 18.31.1 *Introduction*

Suppose an individual has purchased works of art out of foreign income or gains. It may be possible to lend these works to UK institutions without

a taxable remittance<sup>100</sup> but s.809Z ITA provides an additional exemption for works of art brought to the UK for public display. Perhaps it is intended for the case where the institution is a relevant person.

Section 809X(3) ITA provides:

Property is exempt property if it meets the public access rule (see section 809Z).

Section 809Z(1) ITA provides:

Property meets the public access rule if conditions B and C are met.

I refer to **“public access conditions B and C”**.

The former conditions A and D were deleted by the FA 2013. Former condition A had restricted the relief (in short) to works of art. It is now available (in short) for any property (excluding money) but the requirement of public display at an approved gallery or museum effectively limits it to chattels of public interest. Former condition D had incorporated VAT rules by reference which required several pages to set out and which the 2012/13 edition of this work had described as “quite pointless”.

### 18.31.2 *Public access*

Section 809Z(3) ITA provides:

Condition B is that—

- (a) the property is available for public access at an approved establishment,
- (b) the property is to be available for public access at an approved establishment and, in connection with its being so available, is in transit to, or in storage at, public access rule premises, or
- (c) the property has been available for public access at an approved establishment and, in connection with its having been so available, is in transit from, or in storage at, public access rule premises.

The key terms here are “available for public access” and “approved establishment.” Both are defined.

### 18.31.3 *Available for public access*

---

100 See 17.12.2 (Property brought to UK).

Section 809Z(4) ITA provides:

Property is “available for public access” at an approved establishment if the property is—

- (a) on public display at the establishment,
- (b) held by the establishment and made available to the public on request for viewing or for educational use, or
- (c) held by the establishment for public exhibition in connection with the sale of the property.

The RDR Manual outlines the statutory provision and continues:

**RDRM34140 - Remittance basis: exemptions: public access rule - condition B - available for public access - definition** [Jan 2019]

... Some property qualifying under the public access rule will be on permanent display at an approved establishment. Other works will have been lent to a museum or art gallery as part of temporary exhibition - perhaps of the work of a particular artist.

The second bullet above [para (b)] might apply to articles that are too fragile to be on permanent display.

Prior to 6 April 2012, property brought into the UK for public display in connection with its sale to satisfy the public access rule meant that if that property was sold in the UK a charge arose ....

Since 6 April 2012, property brought to the UK for public display and subsequently sold in the UK may not result in a UK charge to tax if all of the conditions as set out at s809YA are met ...

#### 18.31.4 *Approved establishment*

Section 809Z(5) ITA defines approved establishment. There are two types:

An “approved establishment” is—

- (a) an approved museum, gallery or other institution within the meaning of Group 9 of Schedule 2 to the Value Added Tax (Imported Goods) Relief Order 1984, or

If one turns to the VAT (Imported Goods) Relief Order 1984 one might expect to find a definition of “approved museum, gallery or other institution.” There is none, but article 2 does say that “approved” means approved by the secretary of state. In practice approval is granted by the National Import Reliefs Unit and its practice is set out in HMRC Notice 361 (Importing museum and gallery exhibits free of duty and VAT).

Section 809Z(5) ITA continues:

An “approved establishment” is ...

- (b) any other person, premises or institution designated (or of a description designated) by the Commissioners.

The RDR Manual provides:

**RDRM34130 - Remittance Basis: Exemptions: Public access rule - Condition B - approved establishment - definition** [Jan 2019]

...Any questions about what constitutes an ‘approved establishment’ or requests for approval as an ‘approved establishment’ (ITA07/s809Z(5)(b)) should be made to Specialist Personal Tax, PTI Advisory - Remittance Basis Technical Team.

There is no set form which needs to be completed to request designation as an approved establishment, but all applications should be made in writing and provide sufficient detail about the relevant circumstances relating to making property available for public access, including particulars of the appropriate person, premises or institution wanting to be designated as an approved establishment and full contact details.

#### 18.31.5 *Public access premises*

Lastly, s.809Z(6) ITA defines public access rule premises:

“Public access rule premises” are—

- (a) premises in the UK at which the property is to be, or has been, available for public access, or
- (b) other commercial premises in the UK used by the approved establishment for the storage of property in advance of its being, or after its having been, available for public access at the approved establishment.

#### 18.31.6 *Condition C: Time limit*

Section 809Z ITA provides:

(7) Condition C is that, during the relevant period, the property meets condition B for no more than—

- (a) two years, or
  - (b) such longer period as the Commissioners may specify.
- (8) “The relevant period” means the period—
- (a) beginning with the importation of the property, and
  - (b) ending when it ceases to be in the UK after that importation.

- (8A) But if the property is lost or stolen—
- (a) the relevant period ends with the time at which it is lost or stolen, and
  - (b) a new relevant period begins with its importation or the time at which it is recovered.
- (9) “Importation” means the property being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies.

The definition of “importation” recognises that there may be an importation to the UK to which s.809L(2) does not apply, in which case time does not begin to run. The RDR Manual provides:

**RDRM34150 Public access rule - Condition C - two year period** [Jan 2019]

...

The relevant period starts with the importation of the property and ends when the property ceases to be in the UK after that importation.

For these purposes, property is treated as brought into the UK or imported if it is brought to the UK in circumstances such that it would be treated as a remittance to the UK within Condition A of ITA07/s809L (refer to RDRM33120 Condition A - property) if it were not for this public access rule (or any other rule exempting it) (ITA07/s809Z(9)).

The two year period will not necessarily start with the importation of the property as the property may not have been available for public access when it was first imported into the UK. For example it may be brought in under the temporary importation rule prior to public access.

Again the two year period will not necessarily end when the property ceases to be in the UK as the property may cease to be available for public access before the property actually leaves the UK. For example it may instead qualify under the repair rule after a period of public access.

**Example 1** (Faizal)<sup>101</sup>

F is a UK resident remittance basis user. He is asked by a London museum, which is an approved establishment, if he will contribute a vase that he owns to an exhibition that the museum intends to stage. The vase is derived from F’s relevant foreign income.

F arranges for the vase to be shipped to the UK from his holiday home in Switzerland. In May the vase is received by the museum and is put into secure storage for one month after which the museum will begin to set up

---

101 I omit a few irrelevancies in setting out the text of this example.

the special exhibition. The exhibition lasts until the following year in October, at the end of which the vase is returned to Switzerland. The vase has been in the UK for 18 months in total. The vase is exempt property so F has not made a chargeable remittance.

### **Example 2**

The circumstances are the same as Example 1 but this time, at the end of the exhibition, the vase is not returned to Switzerland. Instead, F asks for the vase to be sent to a well known restorer in Newcastle to be cleaned. The restorer keeps the vase in his business premises for a further eight months [!] and then in the following June F arranges for it to be sent back to his home in Switzerland.

The vase has been in the UK for 26 months. The vase, purchased using F's relevant foreign income is exempt property under the public access rule for the 18 months from its arrival in the UK in May to the October in the following year.

Between October and the following June it is within temporary importation rule (as it is with the repairer) and so remains exempt property. As the 2 year time 'repair' limit at Condition C has not been exceeded the vase remains exempt property throughout and F has not made a taxable remittance.

Any requests under the terms of ITA07/s809Z(7)(b) to extend the period during which property may remain in the UK under the terms of the public access rule should be made to Specialist Personal Tax, PTI Advisory, Foreign Income and Remittance Basis Team.

## **18.32 Personal use rule**

Section 809X(4) ITA provides:

Clothing, footwear, jewellery and watches are exempt property if they meet the personal use rule (see section 809Z2).

Section 809Z2 ITA provides:

(1) Clothing, footwear, jewellery or watches meet the personal use rule if they—

- (a) are property of a relevant person<sup>102</sup>, and
- (b) are for the personal use of a relevant individual.

(2) In this section—

---

102 The restricted definition of "relevant person" in relation to pre-6 April 2008 income does not apply here; see 17.9 (Relevant person: Pre-2008 income/gain).

- (b) “relevant individual” means an individual who is a relevant person by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild).

The words “*by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild)*” are otiose because an individual who is a relevant person is necessarily a relevant person by virtue of those provisions; but no harm is done.

### 18.33 Repair rule

Section 809X(5)(a) ITA provides:

Property is exempt property if— ...

- (a) the property meets the repair rule (see s.809Z3).

Section 809Z3 ITA provides:

- (1) Property meets the repair rule for the whole of the relevant period if, during the whole of that period, the property meets the repair conditions.
- (2) Property meets the repair rule for a part of the relevant period if—
  - (a) during the whole of that part of that period, the property meets the repair conditions, and
  - (b) during the whole of the other part of that period, or the whole of each other part of that period, the property meets the repair conditions or the public access rule.

### 18.34 Repair conditions

Section 809Z3 ITA provides:

- (3) Property meets the repair conditions if the property—
  - (a) is under repair or restoration,
  - (b) is in transit from a place outside the UK to repair rule premises, in transit between such premises, or in storage at such premises, in advance of repair or restoration, or
  - (c) is in storage at such premises, in transit between such premises, or in transit from such premises to a place outside the UK, following repair or restoration.

### 18.35 Repair premises

Section 809Z3 ITA provides:

- (4) “Repair rule premises” means—
- (a) premises in the UK that are to be used, or have been used, for the repair or restoration referred to in subsection (3)(b) or (c), or
  - (b) other commercial premises in the UK used by the restorer for the storage of property in advance of, or following, repair or restoration of property by the restorer.<sup>103</sup>
- (6) Property meets the repair conditions, or the public access rule, during the whole of a period, or the whole of part of a period, if the property meets those conditions or that rule—
- (a) on the whole of, or on part of, the first day of that period or part period,
  - (b) on the whole of, or on part of, the last day of that period or part period, and
  - (c) on the whole of each other day of that period or part period.
- (7) “The relevant period” has the same meaning as in section 809Z.

The relief applies only to the property being repaired. There is no relief for the cost of repair. A remittance basis taxpayer would not normally bring an asset to the UK in order to make use of UK repair or restoration services. Even if the importation of the asset did not give rise to a taxable remittance the payment for the repair would give rise to a taxable remittance. Thus yacht and similar restoration work, for instance, from remittance basis taxpayers is lost to the UK. But there it is.

### 18.36 Temporary importation rule

Section 809X(5)(b) ITA provides:

Property is exempt property if— ...

- (b) the property meets the temporary importation rule (see s.809Z4)

Section 809Z4(1) ITA provides:

Property meets the temporary importation rule if the total number of countable days (subject to any increase under subsection (3B)) is 275 or fewer.

---

103 Defined ss(5): "Restorer" means the person who is to carry out, or has carried out, the repair or restoration referred to in subsection (3)(b) or (c).

18.37 *Countable day*

Section 809Z4(2) ITA defines “countable day”:

A “countable day” is a day on which, or on part of which, the property is in the UK by virtue of being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies (whether the current case, or a past case, when the property was so brought, received or used).

One needs to keep a lifetime record for every item of property (except money, which does not qualify for the relief as it is not “property”<sup>104</sup>).

Days before 2008/09 are not countable days, but that will not normally matter because chattels received in the UK before 2008 qualify for transitional relief.<sup>105</sup>

If the property is in the UK but brought/received/used by a non-relevant person, that does not count towards the countable days.

The relief was designed for chattels, but it applies to all forms of property (except “money”). It applies for instance on the acquisition of UK land or securities<sup>106</sup> (other than “money”) if the purchase price is received by the vendor offshore (and so is not remitted). I have wondered whether the law should be amended so the relief is restricted to chattels, but the relief is essentially a form of de minimis relief: short term UK use should not count. That should logically apply to all forms of property.

Section 809Z4(3) ITA deals with the interaction with other exempt property remittance reliefs:

- A day is not a countable day if, on that day or any part of that day—
- (za) the property meets the public access rule,
  - (a) the property meets the personal use rule,
  - (b) the property meets the repair rule,
  - (ba) subsection (3A) applies to the property [lost or stolen property],
  - (c) the notional remitted amount<sup>107</sup> in relation to the property is less than £1,000, or

---

104 See 18.30.1 (“Property”).

105 See 17.41 (Transitional: pre-2008 property).

106 The receipt of UK securities is in principle a remittance; see 17.12.9 (Acquisition of UK security).

107 This term is defined in s.809Z5 ITA: see 18.38 (Small remittance rule).

- (d) all or any part of the income or chargeable gains contained in the property (or from which the property derives) is treated, or continues to be treated, under section 809VA(2), 809Y(8)(b) or 809YC(2) or 809YF(4) as not remitted to the UK.

The RDR Manual provides a straightforward example:

**RDRM34220 Temporary importation rule - countable days** [Jan 2019]

... Example (Jez)

On 15 January 2010 J, a remittance basis user, brings a rare oil painting into the UK to hang on the wall of his castle. J had purchased the painting two months earlier using his foreign employment income.

On 1 July 2010 he allows the painting to be put on public display at the National Gallery, London. The painting remains on display for six months, until 31 December 2010, after which it is immediately shipped to J's office in Dubai on 1 January 2011.

The HMRC analysis is as follows:

The conditions for meeting the public access rule for the period 1 July 2010 to 31 December 2010 have been satisfied.

Bringing the painting into the UK would ordinarily be a taxable remittance under section 809L but we need to consider the exemption rules. During the period 15 January to 30 June 2009 the painting was not available for public access. This period is immediately followed by a period of public access from 1 July 31 December 2009.

The 15 January to 30 June 2009 period falls to be considered under the temporary importation rule (167 days).

For the period 1 July 2009 to 31 December 2009 the property is exempt property under the public access rule and therefore this period does not count towards the 275 day limit.

### 18.37.1 *Lost/stolen property*

Section 809Z4(3) ITA provides:

A day is not a countable day if, on that day or any part of that day ...

- (ba) subsection (3A) applies to the property [lost or stolen property]

Section 809Z4(3A)(3B) ITA provides:

(3A) This subsection applies to the property if—

- (a) it is not available to be used or enjoyed in the UK by or for the

benefit of a relevant person because it has been lost, stolen or destroyed,

- (b) (if lost or stolen) it has not been recovered, and
- (c) no compensation payment has been released in respect of it.

(3B) If—

- (a) property that has been lost or stolen is recovered,
- (b) the first day after the day on which it is recovered is a countable day, and
- (c) excluding that countable day there have already been 231 or more countable days in relation to the property,

the number of countable days specified in subsection (1) is read as being increased by the number necessary for there to be 45 countable days beginning with the countable day mentioned in paragraph (b).

### 18.38 Small remittance rule

Section 809X(5)(c) ITA provides:

Property is exempt property if ...

- (c) the notional remitted amount (see s.809Z5) is less than £1,000,

I refer to this as the “**small remittance rule**”.

Section 809Z5(1) ITA defines “notional remitted amount”:

The “notional remitted amount”, in relation to property, is the amount that would be taken to be remitted to the UK in relation to the property (if section 809X did not apply in relation to the property).

Money does not qualify for the relief as it is not “property”.<sup>108</sup>

Each item of property qualifies for the £1,000 limit. HMRC agree. The RDR Manual provides:

**RDRM34180 Exempt Property - Notional remitted amount less than £1,000** [Jan 2019]

... Example (Jacob)

J, a remittance basis user, uses his foreign income to purchase a mobile phone for £250 whilst on holiday in Florida. Later in the same trip, while in Singapore he also buys a fountain pen for £485, and a new suitcase at the airport, as a present for his wife. This cost him £630. He brings all the items back to the UK with him upon his return home..

---

<sup>108</sup> See 18.30.1 (“Property”).

The mobile phone, pen and suitcase all derive from J's foreign income so would be taxable as remittances when brought into the UK under ITA07/s809L. However each item's notional remitted amount (£250, £485 and £630 respectively) is under the £1,000 limit, so section 809Z5 provides that the phone, the pen and the suitcase are regarded as exempt property. J has not therefore made a chargeable remittance.

In J's case the total cost of all the property brought to the UK exceeds £1,000. However the exemption limit applies to each item of property, unless it forms part of a set.

£1,000 was quite a substantial limit, but it has not been increased so its real value is gradually being whittled away by inflation.

The passage concludes with a comment on sets:

Where the property in question forms part of a set and only part of that set is in the UK, a just and reasonable apportionment is made to find the notional value of that part by reference to what the remittance would have been had the whole set been brought to, or received or used in the UK at the same time as the part in question (ITA07/s809P(13)). ...

That issue will rarely if ever arise.

## 18.39 Exempt property clawback charge

### 18.39.1 Clawback charges

Section 809Y(1) ITA provides:

Property that ceases to be exempt property is to be treated as having been remitted to the UK at the time it ceases to be exempt property.

I refer to this as the “**exempt property clawback charge**”.

Section 809Y(2) ITA provides:

Property ceases to be exempt property in any of the following cases.

There are three cases where this may apply.

### 18.39.2 Case 1: Sale in UK

Section 809Y(3) ITA provides:

The first case is where the whole or part of the exempt property is sold

or otherwise converted into money<sup>109</sup> whilst it is in the UK.

An exchange for a non-money asset is not a sale.

### 18.39.3 *Case 2: Exemption ceases*

Section 809Y(4) ITA provides:

The second case is where the property—

- (a) is exempt property only because it meets one or more of the relevant rules,<sup>110</sup>
- (b) ceases to meet that rule, or all of those rules, whilst it is in the UK, and
- (c) does not meet any other relevant rule.

### 18.39.4 *Case 3: Compensation payment*

Section 809Y(4B) ITA provides:

The third case is where a compensation payment is released in respect of exempt property that has been lost, stolen or destroyed.

### 18.39.5 *Lost property*

Section 809Y(4A) ITA provides:

Where exempt property has been lost, stolen or destroyed, the first and second cases do not apply in relation to the property during any period—

- (a) beginning with the time at which it was lost, stolen or destroyed, and
- (b) (if lost or stolen) ending with the time at which it is recovered.

## 18.40 Sales relief

Section 809YA - 809YD ITA provide two reliefs for arm's length sales where the proceeds are taken out of the UK:

(1) Relief from the exempt property clawback charge

---

109 For the definition see 18.30.2 (“Money”).

110 Section 809Y(5) ITA provides:

“relevant rule” means-

- (a) the public access rule,
- (b) the personal use rule,
- (c) the repair rule, and
- (d) the temporary importation rule.

- (2) The gain on the sale of a UK situate asset is a foreign gain (so the remittance basis can apply)

I refer to this as “**sales relief**”.

Perhaps this reflects some effective lobbying by auctioneers. Of course it is far too complicated.

Section 809YA(1) ITA provides relief from the clawback charge:

Section 809Y(1) does not apply to property if—

- (a) it ceases to be exempt property because the whole of it is sold whilst it is in the UK, and
- (b) conditions A to F are met.

I refer to “**sales relief conditions A-F**”.

#### 18.40.1 *Sale to 3<sup>rd</sup> party*

Section 809YA ITA provides:

- (2) Condition A is that the sale is to a person other than a relevant person.
- (3) Condition B is that the sale is by way of a bargain made at arm’s length.
- (4) Condition C is that, once the sale is completed, no relevant person—
  - (a) has any interest in the property,
  - (b) is able or entitled to benefit from the property by virtue of any interest, right or arrangement, or
  - (c) has any right (whether conditional or unconditional) to acquire
    - [i] any interest mentioned in paragraph (a) or
    - [ii] ability or entitlement mentioned in paragraph (b).

#### 18.40.2 *Prompt receipt of proceeds*

Section 809YA ITA provides:

- (5) Condition D is that the whole of the disposal proceeds are released (whether in one go or in instalments) on or before the final deadline.
- (6) “The final deadline” is the first anniversary of the 5 January following the tax year in which the property ceases to be exempt property (within the meaning of section 809Y).

#### 18.40.3 *Proceeds taken offshore/invested*

Section 809YA ITA provides:

- (7) Condition E is that—
- (a) the whole of the disposal proceeds are
    - [i] taken offshore or
    - [ii] used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the proceeds are released, or
  - (b) if the disposal proceeds are paid in instalments, each instalment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the instalment is released.
- (8) But if any of the disposal proceeds are released in the period of 45 days ending with the final deadline, Condition E is satisfied, as respects those proceeds, only if they are taken offshore or used by a relevant person to make a qualifying investment on or before the final deadline.

#### 18.40.4 *Qualifying investments*

Section 809YA(9) ITA provides:

Condition F is that, if Condition E is satisfied wholly or in part by using disposal proceeds to make a qualifying investment, the remittance basis user makes a claim for relief under section 809YC(2) on or before the first anniversary of the 31 January following the tax year in which the property is sold.

Section 809YB ITA provides power to extend the time limit for investment:

- (1) An officer of HMRC may agree in a particular case to extend any period within which disposal proceeds (or instalments) must be taken offshore or used by a relevant person to make a qualifying investment in order to satisfy Condition E.
- (2) The power to agree to an extension is exercisable only in exceptional circumstances and only if the remittance basis user requests such an extension.

#### 18.40.5 *“Released”*

Section 809YA ITA(10) provides a commonsense definition:

For the purposes of this section, proceeds or instalments are “released” on the day on which they first become available for use by or for the benefit of any relevant person.

### 18.40.6 Sales relief TAAR

Section 809YA(11) ITA provides:

This section does not apply if the sale is made as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

This is an avoidance-purpose TAAR; see 2.10.3 (Types of TAAR).

### 18.40.7 Supplemental rules

Section 809YC ITA provides:

(1) This section has effect if section 809Y(1) does not apply to property by virtue of section 809YA.

(2) The income and gains treated under section 809X as not remitted to the UK continue to be treated after the sale as not remitted to the UK even though the property has ceased to be exempt property.

(3) But nothing in subsection (2) prevents anything done in relation to any part of the disposal proceeds after that part is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is done.

(4) Treat the disposal proceeds as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

(5) Where Condition E was met by using the disposal proceeds to make a qualifying investment—

(a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (2), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and

(b) if the investment was made using more than just the disposal proceeds, treat only the part of the investment made using the disposal proceeds as “the investment” for the purposes of those provisions.

### 18.40.8 Relief for gain on sale

Section 809YD(1) ITA provides:

This section applies to an individual (“P”) if—

- (a) a chargeable gain (but not a loss) accrues to a person on a sale of exempt property,
- (b) but for section 809YA [sales relief], section 809Y(1) [clawback charge]<sup>111</sup> would have applied to the property by virtue of the sale, and
- (c) P is either—
  - (i) the person to whom the gain accrues, or
  - (ii) a person to whom a part of the gain is treated as accruing under section 3 of TCGA 1992 (members of non-resident companies).

In the HMRC view, the relief only applies if there would have been a clawback charge. If the temporarily UK asset is derived from clean capital, the relief does not apply. That seems rather odd. Is it actually right?

If these conditions are met we move on to the relief. Section 809YD(2) ITA provides:

The relevant UK gain is to be treated for the purposes of this Chapter as if—

- (a) it were a foreign chargeable gain of P, and
- (b) in the case of section 809E, it were not part of P’s UK income and gains.

The RDR Manual explains para (b):

**RDRM34280: chargeable gains on sales of exempt property** [May 2020]

Some individuals do not need to make a remittance basis claim because they have no UK income or gains and do not remit any foreign income and gains (refer to RDRM32140). For those individuals, the foreign chargeable gain will not be treated as part of their UK income and gains (ITA07/s809YD(2)(b)).

(3) Accordingly, if section 809F [remittance basis] applies to P for the applicable tax year,<sup>112</sup> the relevant UK gain is charged in accordance

111 See 18.39 (Exempt property clawback charge).

112 Section 809YD(5) provides: “The applicable tax year is —

(a) if section 1M of TCGA 1992 (temporary non-residents) applies in P’s case and the relevant UK gain is within subsection (2) of that section, the tax year that

with paragraph 1 of Schedule 1 to TCGA 1992 as if it were a foreign chargeable gain.

(4) The relevant UK gain is—

- (a) in a case falling within subsection (1)(c)(i), the gain accruing to P,
- (b) in a case falling within subsection (1)(c)(ii), the part of the gain treated as accruing to P...

(6) In applying this Chapter to the relevant UK gain—

- (a) treat the amount of any gains mentioned in section 809Q(4)(e) contained in the disposal proceeds by virtue of section 809YC(4) as increased by the amount of the relevant UK gain,
- (b) disregard section 809U,<sup>113</sup> and
- (c) anything done in relation to any part of the disposal proceeds before the part is taken offshore or used to make a qualifying investment (or both) does not count as a remittance to the UK of any of the relevant UK gain.

(7) The relevant UK gain is to be treated for the purposes of the following provisions of TCGA 1992 as if it accrued on the disposal of a foreign asset (within the meaning of Schedule 1 to TCGA 1992)—

- (a) section 1M,
- (b) section 3D, and
- (c) Schedule 1.

(8) This section has effect despite section 3D(2) of TCGA 1992.

#### 18.40.9 Election out of relief

One can elect out of this relief. Section 809YD(9) ITA provides:

This section does not apply with respect to a chargeable gain if P gives notice to HMRC under this subsection.<sup>114</sup>

A notice will not usually be advantageous, but it might perhaps in some

---

consists of or includes the period of return as defined in that section,

- (b) otherwise, the tax year in which the relevant UK gain accrues.”

<sup>113</sup> See 17.36 (Remittance before income/gains arise).

<sup>114</sup> Section 809YD(10) provides: “A notice under subsection (9)—

- (a) must be in writing and must identify the gain in question,
- (b) must be given on or before the first anniversary of the 31 January following the applicable tax year, and
- (c) may not be revoked after that first anniversary.”

cases of double taxation relief. HMRC give another example of when a notice might be desirable:

**RDRM34280: chargeable gains on sales of exempt property** [May 2020] Where an individual has unremitted foreign income and gains of less than £2,000 they can be taxed on the remittance basis without making a claim (see RDRM32110). Such individuals do not lose access to personal allowances or their annual exempt amount and are not required to pay the annual remittance basis charge regardless of the length of time they have been resident in the UK. Where an individual sells exempt property giving rise to a chargeable gain, treating the gain as a foreign chargeable gain might mean their total unremitted foreign income and gains exceed the £2,000 limit in the year of sale. The individual would need to make a claim to be taxed on the remittance basis under ITA07/s809B and become liable to pay the remittance basis charge if they wanted access to the remittance basis.

An individual can therefore elect for the foreign gain arising on the sale of exempt property to be treated as a UK chargeable gain...

I have wondered whether a notice is desirable in order that a loss on the disposal is an allowable loss, but that does not seem to be the case. HMRC agree:

**RDRM34280: chargeable gains on sales of exempt property** [May 2020]

Where an allowable loss accrues on the sale, the loss will be treated as a UK loss and available to be used against any UK gains under existing rules for capital losses.

#### 18.40.10 *Exempt property invested*

Section 809Y(6) ITA provides:

Subsection (1) does not apply to property that ceases to be exempt property by virtue of the first or second case if—

- (a) the property, or anything into which it is converted,<sup>115</sup> is used by

---

<sup>115</sup> This is given a commonsense definition in s.809Y(7): “The reference in subsection (6)(a) to anything into which property is converted is—  
 (a) if the property is disposed of, the disposal proceeds, and  
 (b) if the property is converted into money in some other way, the money into which it is converted, (including where the disposal or conversion occurs after the property ceases to be exempt property).”

a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which it ceased to be exempt property, and

- (b) the remittance basis user<sup>116</sup> makes a claim for relief under this subsection on or before the first anniversary of the 31 January following the tax year in which the property ceases to be exempt property.

Section 809Y(8) ITA incorporates the investment remittance relief rules:

- (8) If subsection (1) does not apply by virtue of subsection (6)—
  - (a) the property (or thing into which it was converted) used to make the investment is to be treated as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the fixed amount,
  - (b) the income or gains treated under section 809X as not remitted to the UK continue to be treated as not remitted to the UK even though the property has ceased to be exempt property, and
  - (c) the business investment provisions<sup>117</sup> apply to the income and gains as they apply to income or gains treated under section 809VA(2) as not remitted to the UK.
- (9) “The fixed amount” is the amount of that kind of income or gain contained in the property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

Section 809Y(10) ITA provides an apportionment rule:

If the investment is made using more than just the property (or thing into which it was converted), treat only the part made using the property (or thing into which it was converted) as “the investment” for the purposes of the business investment provisions.

#### 18.40.11 *Interaction with gift to nation relief*

For completeness, s.809YE ITA provides:

- (1) Section 809Y(1) [exempt property clawback charge] does not apply to property if—

---

116 Defined s.809Z10: “In this Chapter “the remittance basis user”, in relation to income or chargeable gains of an individual, means that individual.”

117 Defined s.809Z(10) ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

- (a) it ceases to be exempt property in the second case mentioned in that section, and
  - (b) by no later than the time when it ceases to be exempt property, it has been donated in the circumstances described in paragraph 1 of Schedule 14 to FA 2012 (gifts to the nation).
- (2) Where section 809Y(1) does not apply to property by virtue of this section, the property is to continue to be treated as not remitted to the UK even though it no longer meets any of the relevant rules.

#### 18.40.12 *Compensation taken offshore/invested*

Section 809YF ITA provides:

- (1) Section 809Y(1) does not apply to property if—
  - (a) it ceases to be exempt property because a compensation payment in respect of it is released, and
  - (b) conditions A and B are met.
- (2) Condition A is that the whole of the compensation payment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the payment is released.
- (3) Condition B is that, if Condition A is satisfied wholly or in part by using the compensation payment to make a qualifying investment, the remittance basis user makes a claim for relief under subsection (4) on or before the first anniversary of the 31 January following the tax year in which the payment is released.
- (4) If section 809Y(1) does not apply to property by virtue of subsection (1), the income and gains treated under section 809X as not remitted to the UK continue to be treated after the compensation payment is released as not remitted to the UK even though the property has ceased to be exempt property.
- (5) But nothing in subsection (4) prevents anything done in relation to any part of the compensation payment after that payment is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is done.
- (6) Treat the compensation payment as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

(7) Where Condition A was met by using the compensation payment to make a qualifying investment—

- (a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (4), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and
- (b) if the investment was made using more than just the compensation payment, treat only the part of the investment made using the payment as “the investment” for the purposes of those provisions.

## CHAPTER NINETEEN

# MIXED FUNDS

### 19.1

#### *Cross references*

The following topics are considered elsewhere:

- 17.43 (Remittance basis planning)
- 33.23 (OWR mixed funds rule)
- 53.17.4 (BAD relief: Mixed fund)
- 90.6 (Remittance from joint account)

### **19.1 Mixed funds: Introduction**

It is helpful first to outline the problems which the mixed fund rules are intended to address.

Suppose a person holds a fund which includes different types of income/gains, or income/gains of different years:

- (1) If the person remits part of the fund to the UK, it is necessary to know:
  - (a) which type of income or gains have been remitted (as different rates may apply)
  - (b) which year's income or gains have been remitted (as different rates and different rules may apply to income of different years).
- (2) If the person transfers some assets out of the fund, without remitting those assets to the UK, there is no immediate tax charge. However if there is a later remittance out of the remaining fund, or the transferred assets, it is necessary to know:
  - (a) which income/gains are in the remaining fund, and
  - (b) which income/gains are in the transferred assets.

The mixed fund rules are intended to answer these questions.

I coin the following terminology:

**“ITA mixed fund rules”** means the rules set out in s.809Q to 809S ITA.

**“Pre-2008 mixed fund rules”** means the rules applicable before 2008/09.

## 19.2 Definition of “mixed fund”

### 19.2.1 *The statutory definition*

Section 809Q(6) ITA provides:

In this section “mixed fund” means money or other property which, immediately before the transfer, contains or derives from—

- (a) more than one of the kinds of income and capital mentioned in subsection (4), or
- (b) income or capital for more than one tax year.

This is only a section-wide definition so the drafter has to repeat it in s.809R(7) ITA:

In this section ‘mixed fund’ means money or other property containing or deriving from—

- (a) more than one of the kinds of income and capital mentioned in section 809Q(4), or
- (b) income or capital for more than one tax year.

This is not quite a verbatim repetition, but the omission of the words “immediately before the transfer” does not seem material.

One must first identify what is the fund, and then identify the constituents which it contains (or derives from).

### 19.2.2 *Identifying the fund*

The paradigm example of a mixed fund is a bank account with diverse entries.

A mixed fund need not necessarily be a bank account. If money constituting a mixed fund is invested in an asset, the asset is the mixed fund. For instance, if a person uses foreign income and capital to purchase a foreign property, or shareholding, the foreign property or shareholding is a mixed fund.

A portfolio of securities may together constitute a single fund if it is managed by one investment manager and held under one account name and number.

In some cases it may be unclear whether a number of securities should

be classified as distinct funds, or together constitute a single fund;<sup>1</sup> in practice, any reasonable analysis consistently adopted ought to be acceptable.

### 19.2.3 *When are funds mixed*

Funds are distinct, ie, not mixed, if they are held in separate accounts or sub-accounts<sup>2</sup> at one bank. HMRC agree. The RDR Manual provides:

**RDRM35230 Remittances from mixed funds** [Jan 2019]

*No Mixed Fund*

A mixed fund does not exist just because the individual has several accounts with the same banking institution, if each account is separately constituted and contains only one of the relevant types of income from only one year. This will usually include bank accounts set up as sub-accounts under an “umbrella” agreement.

If income and capital sources from a tax year are maintained separately (sometimes referred to as “kept clean” or “clean capital”) no mixed fund is created, and so these rules will not apply.<sup>3</sup>

This is consistent with the banking law background:

A person’s claim to money in his or her account is identifiable by an account name and/or number, and subject to the bank’s right to combine accounts, is distinct from any other claim he or she may have against the same bank.<sup>4</sup>

- 
- 1 The question of what is a distinct fund is comparable to the question of what constitutes a distinct trust; for which, see 94.22.2 (Variation or resettlement?).
  - 2 I suspect that “sub-account” is a commercial term with no precise or significant legal meaning; but the issue does not arise here. The issue is raised in Cleansing Q&As Questions 11 and 12, but HMRC did not answer beyond saying that “Whether a sub account is a separate account will be a question of fact determined by the terms attached to an account.”
  - 3 The Manual then gives a straightforward example: “For example, an individual maintains three separate accounts with the same offshore institution:  
Account A into which he pays his relevant foreign earnings for the tax year  
Account B into which he pays some inherited money (clean capital)  
Account C into which he pays some relevant foreign income for the tax year  
As long as these accounts do not become mixed funds, the individual can bring money into the UK from Account B and that will be accepted as a being a transfer of “clean” capital, and so will not be a taxable remittance.”
  - 4 Fox, *Property Rights in Money* (1<sup>st</sup> ed, 2008), para 1.108 (original footnotes omitted).

Accordingly one can in principle avoid mixing income with other funds by arranging that the income is paid to a separate account. If one does that, it will be possible to remit the other funds, keeping the income unremitted.<sup>5</sup>

The position is different for capital gains. A capital gain has no separate identifiable existence so the proceeds of a disposal giving rise to a gain are always a mixed fund.<sup>6</sup> For accrued income profits see 27.9 (AIP remittance basis).

#### 19.2.4 *Money paid in & withdrawn*

The RDR Manual provides:

**RDRM33560. Banking Issues** [Jan 2019]

*Interest credits to a capital account*

Often interest on a maturing deposit is credited to the same account comprising the principal capital investment, but under the bank's normal internal system the interest is then immediately and identifiably transferred to an income account.<sup>7</sup>

Where a mixed fund such as this is created fleetingly by an operation of the banking system, HMRC will accept that the interest credit will not taint the principal and so the mixed fund rules in ITA07/s809Q to s809S do not apply.

At first sight this statement may seem concessionary. However, it is a sensible commercial construction of the statute to say that a sum only "fleetingly" in an account should not to be said to become "mixed".

The statement refers to banks, and to interest, but the same should apply to a non-banking institution which holds accounts for a customer, and to other types of income, such as dividends.

See too 17.17 (Bank errors).

#### 19.2.5 *Same shares in 2 portfolios*

Cleansing Q&As<sup>8</sup> Question 14 provides:

---

5 See 17.43.1 (Avoiding mixed funds: Segregation).

6 See 17.15.3 (What is a gain).

7 I would be interested to know from readers how often this actually happens; and how long interest typically remains in the deposit account.

8 For this document, see 19.11 (Cleansing mixed funds).

How do you carry out a mixed fund analysis where an individual has shares/securities of the same class in more than one portfolio?

### **Suggested Answer**

Unless the portfolios mirror each other such that the amount taken from each account to acquire the investments is the same as the CGT base cost amount (TCGA 1992, s 104),<sup>9</sup> there are significant mixed fund issues where shares/securities of the same class are held in more than one portfolio. This is because the TCGA 1992, s 104 legislation provides that all shares/securities of the same class that were acquired by an individual in the same capacity are pooled for base cost purposes (provided the 30 day or same day rules do not apply). As such, the base costs used for the CGT computations will be different (possibly significantly so) to the amount used to acquire the shares/securities.

***We would strongly suggest that to avoid complexity, shares/securities of the same class are not held in more than one portfolio.***

However, it is likely that not realising the issues, a number of taxpayers will have shares/securities of the same class in more than one investment portfolio. If the client wants to cleanse it will be necessary to carry out a mixed fund analysis taking this issue into account. This additional problem will make a mixed fund analysis in a real example extremely complex and even more time consuming. Depending on the numbers the divergence between the base cost and the amount used from the mixed fund account to make the purchases could result in significant additions to or depletions from the ITA 2007, s 809Q(4)(i) “other” category. In basic terms clean capital could either be created or depleted.

**The following is a simplified example to illustrate the point (the acquisition and sales proceeds figures have been specifically chosen such that large gains and losses result in order to show what a significant difference this issue can make to the mixed fund analysis).**

### **Example (Kurt)**

K is a UK resident foreign domiciliary.

On 15 June 2011 he paid a £5 million inheritance (received in 2011/12) into account C with XYZ Offshore Bank. He used this £5 million to acquire £1 million shares in Raven Inc (£5 per share). These shares were kept within an investment portfolio with XYZ Offshore Bank with a linked sterling account. K already held shares in Raven Inc in a mixed fund portfolio with LMN Offshore Fund Manager. The 2 million shares had been acquired in 2008/2009 for £3.50 per share using £7 million of funds representing K's 2008/09 Remittance Basis relevant foreign earnings.

---

<sup>9</sup> See 53.10.2 (Bed-and-breakfasting).

Raven Inc operates in a volatile sector, but K feels he has specialist knowledge of the sector and that he can make a profit from investing in the shares despite the volatility.

On 19 October 2014 K sold 1 million of the Raven Inc shares in his LMN Offshore Fund Manager portfolio for £8 per share.

His base cost per share must take both portfolio holdings into account so is £4 ((£5 million + £7 million) / 3 million).

K is a Remittance Basis User in 2014/15. Proceeds of £8 million are received. This breaks down as:

£3.5 million traceable to K's 2008/09 Remittance Basis relevant foreign earnings (that is 50% of the original £7 million used to acquire the holding of which half has been sold);

£4 million 2014/15 Remittance Basis chargeable gain (proceeds of £8 million less base cost of £4 million); and

£0.5 million – 2014/15 “other” ITA 2007, s 809Q(4)(i) - arisen as the operation of TCGA 1992, s 104 results in a £4 million Remittance Basis Chargeable Gain rather than the £4.5 million gain that would have arisen if pooling was not necessary and the actual amount used from LMN Offshore Fund had been the base cost. As the amount falls into s 809Q(4)(i) it is effectively an addition to clean capital.

Just over a year later, on 24 November 2015 K acquired a further 1 million shares in Raven Inc in his LMN Offshore Fund Manager portfolio paying £2 per share (this was a low price for the shares and K was confident that they would recover).

K reinvested £2 million of the £8 million he received. This is an offshore transfer:

investment 25%; and (ii) kept in cash 75%.

<b>24 November 2015 acquisition</b>	<b>New Investment - 1 million holding Raven Inc shares 25% offshore transfer</b>	<b>Bank account 75%</b>
2008/09 Remittance Basis relevant foreign earnings	£875,000	£2,625,000
2014/15 Remittance Basis chargeable gain	£1 million	£3 million
2014/15 “other” ITA 2007, s 809Q(4)(i)	£125,000	£375,000

The original unsold 1 million Raven Inc shares in his LMN Offshore Fund Manager portfolio represented £3.5 million of 2008/09 Remittance Basis relevant foreign earnings.

On 5 October 2017 K sold his entire 1 million Raven Inc shares holding in his XYZ Offshore Bank portfolio for £4.50 per share.

Again, K's base cost per share must take both portfolio holdings into account, so is £3.50 ((£5 million + £3.5 million + £2 million) / 3 million). The base cost of the 1 million shares sold is, therefore, £3.5 million.

K is a Remittance Basis User in 2017/18. Proceeds of £4.5 million are received, the base cost for the £1 million shares is £3.5 million (as calculated above). From a CGT perspective, because of the operation of TCGA 1992, s 104, a £1 million gain has been realised (Remittance Basis no foreign tax credit).

If pooling were not necessary and the actual amount used from XYZ Investment Bank had been used as the base cost there would have been a £0.5 million loss. There is, therefore, a mixed fund analysis issue, since the funds within the bank account are £1.5 million less than the funds used to acquire the shares and the chargeable gain.

The situation here is different to that in question 13 but again we have a situation where there is £1.5 million less in the mixed fund and nothing in the legislation to assist in terms of how this diminution should be treated. Applying the same just and reasonable methodology as in question 13:

Step 1 – proportionately allocate out the £1.5 million across the original clean capital used to acquire the shares and the Remittance Basis gain on the sale of the shares:

	Amounts Per Category	%	Reduction	Proceeds
Clean Capital	£5 million	83.33%	£1.25 million	£3.75 million
Remittance Basis Gain	<u>£1 million</u> <u>£6 million</u>	16.67%	<u>£0.25 million</u> <u>£1.5 million</u>	<u>£0.75 million</u> <u>£4.5 million</u>

Step 2 – adjust the step 1 result as the derivation rules mean that the gains figure cannot be reduced.

	Amounts Per Category
Clean Capital	£3.75 million
ITA 2007, s 809Q(4)(I)	
Remittance Basis Gain	£1.00 million
ITA 2007, s 809Q(4)(e)	
	<u>£4.75 million</u>

That is, again as a result of the derivation rules, the mixed fund analysis aggregate total of the ITA 2007, s 809Q(4) categories of income and capital is higher (in this case £0.25 million higher) than the actual proceeds figure.

On 19 February 2018 K uses £4.25 million of the £4.5 million within his XYZ Offshore Bank account to acquire 600,000 shares in Raven Inc. This is an

offshore transfer:

investment 94.4%; and (ii) kept in cash 5.6%.

On 31 May 2018 K sells the 2 million shares in Raven Inc within his LMN Offshore Fund Manager portfolio for £11 per share.

His base cost per share must take both portfolio holdings into account, so is £3.75 ((£4.25 million + £3.5 million + £2 million) / 2.6 million). The base cost of the 2 million shares sold is, therefore, £7.5 million.

K is a Remittance Basis User in 2018/19. Proceeds of £22 million are received and paid into the same LMN Offshore Fund Manager account as the funds not reinvested from the first sale. The £22 million proceeds breaks down as:

- £ 4,375,000 (£875,000 + £3.5 million) traceable to K's 2008/09 Remittance Basis relevant foreign earnings;
- £1,000,000 2014/15 Remittance Basis chargeable gain;
- £125,000 2014/15 “other” ITA 2007, s 809Q(4)(i);
- £14.5 million (£22 million less £7.5 million) 2018/19 Remittance Basis chargeable gain;
- £2 million 2018/19 “other” ITA 2007, s 809Q(4)(i) - arisen as the operation of TCGA 1992, s 104 results in a £14.5 million Remittance Basis Chargeable Gain rather than the £16.5 million gain that would have arisen if pooling was not necessary and the actual amount used from the LMN Offshore Fund Portfolio account had been the base cost. As the amount falls into s 809Q(4)(i) it is effectively an addition to clean capital.

Note that the LMN Offshore Fund Portfolio account could be cleansed prior to 6 April 2019 and the total £2.5 million ITA 2007, s 809Q(4)(i) “other” (the £375,000 kept in the account and the £125,000 and £2 million above) transferred to a new “clean capital account”.

### HMRC Comment

HMRC are OK with the response.

## 19.3 Ingredients of mixed fund

### 19.3.1 *Mixed fund categories*

Section 809Q(4) ITA identifies 9 categories of income and capital which may make up a mixed fund:

The kinds of income and capital are—

Category	Type of income/capital	Exceptions	Exceptions fall within:
(a)	Employment income	Foreign income	para (b)/(c)/ (f)
(b)	Relevant foreign earnings	Foreign taxed income	para (f)
(c)	Foreign specific employment income	Foreign taxed income	para (f)
(d)	Relevant foreign income	Foreign taxed income	para (g)

- (e) Foreign chargeable gains                      Foreign taxed gains                      para (h)
- (f) Employment income subject to a foreign tax
- (g) Relevant foreign income subject to a foreign tax
- (h) Foreign chargeable gains subject to a foreign tax
- (i) Income or capital not within another paragraph [residuary category]<sup>10</sup>

I refer to these as the “**mixed fund categories**”.

The order in which these categories are placed is important: I call this the “**mixed fund priority order**”.

A remittance basis taxpayer needs to classify every mixed fund into these nine categories for every year from 2008/09. The mixed fund rules require a vast amount of record keeping.

### 19.3.2 *Income/gains of non-resident*

Income which accrues to a non-resident is not RFI<sup>11</sup> (even foreign interest, dividends, etc which would be RFI if received by a UK resident). Similarly, earnings received by a non-resident are not employment income.<sup>12</sup> Such income falls into the bottom category (i).

Chargeable gains from non-UK assets which accrue to a non-resident *are* foreign chargeable gains.<sup>13</sup> Such gains will fall within category (e) or (h) depending on whether they are subject to a foreign tax.

One could devise circumstances where these questions matter, but in practice it seems unlikely to arise.

### 19.3.3 *Income/gains of UK resident*

What if a UK resident individual receives foreign income or gains which are taxable in the year of receipt, either because they are remitted to the UK or because no remittance basis claim is made in that year? The sums do not cease to be foreign income or gains, so they remain in their relevant categories (a) to (h).

### 19.3.4 *“Foreign tax”*

---

10 For clarity I have set this out in tabular form rather than the layout of the statute.

11 Because it does not meet the condition in s.830(1)(b) ITTOIA; see 15.10.2 (“Relevant foreign income”).

12 Unless within s.27 ITEPA (duties performed in UK or overseas Crown employment).

13 See 53.4 (Territorial scope of CGT) and 16.4.3 (Foreign chargeable gains).

I refer to income/gains which are subject to a foreign tax as “**foreign-taxed**”. This affects the mixed fund categories in the following way:

	<b>Not foreign-taxed</b>	<b>Foreign-taxed</b>
<b>RFE</b>	para (b)	para (f)
<b>FSEI</b>	para (c)	para (f)
<b>RFI</b>	para (d)	para (g)
<b>Gains</b>	para (e)	para (h)

The object is to increase UK tax by deferring the remittance of foreign-taxed items, so deferring foreign tax credits. This (surely unfair) policy comes at a considerable cost in complexity, since it roughly doubles the number of mixed fund categories and the record keeping.

Section 809Q(5) ITA defines “foreign tax”:

In subsection (4) “foreign tax” means any tax chargeable under the law of a territory outside the UK.

At first I thought that tax deducted under the former EU Saving Directive was not “foreign tax”. The EU is not a territory outside the UK. But if tax was deducted in, say, Luxembourg, the better view is that the tax was chargeable under the law of *Luxembourg* so the tax is a foreign tax. That is clearly so if the EU directive did not have direct effect in the MS concerned and it would be strange if the position were different when the directive does have direct effect.

### 19.3.5 “Subject to foreign tax”

The RDR Manual provides:

**RDRM35240 Remittances from mixed funds - Identifying nature of remittance** [Jan 2019]

...

Occasionally UK resident remittance basis users’ UK employment income may be “subject to foreign tax”, that is to say another country or government authority (usually their country of nationality or citizenship) will also tax them on this income. In these cases HMRC will accept that the individual’s UK source employment income may still be regarded as within Para (a) in the mixed fund, unless the individual requests otherwise, in which case it will remain to fall within Para (f) as employment income subject to a foreign tax.

This is obviously an extra-statutory concession.

This is only relevant where the other country has in fact subjected the UK employment income under consideration to their tax. In some cases no tax will, in fact, have been due in or paid to the other country due to various exemptions and provisions, (for example the US has a “foreign earned income exclusion” provision to employment income below a certain level), so the UK employment income will be within Para (a) anyway.

This is not correct as it is not consistent with the approach applied elsewhere in deciding what is “subject to tax”: see 104.14 (“Subject to tax”). But it will normally suit taxpayers to treat UK earnings as category (a) so it will not be contested.

### 19.3.6 *Cat. (i): Other income/capital*

This is the residuary category.<sup>14</sup> That would include:

- (1) Gifts, inheritance
- (2) Borrowed money
- (3) Gain on a disposal of a UK situate asset
- (4) Gain which is not chargeable (eg on disposal of FOTRA security)
- (5) Chargeable event gain (eg on surrender of a life policy)
- (6) Foreign income of non-resident (including protected s.720 income and protected s.624 income)

Section 809Q(8) ITA provides:

References in this section and section 809R to anything deriving from income or capital within para (i) of subsection (4) do not include—

- (a) income or gains within any of paras (a) to (h) of that subsection,  
or
- (b) anything deriving from such income or gains.

If a sum falls into two categories, category (i) and another, then the other category takes priority. How could a sum fall into two categories? Suppose:

- (1) RFI arises to A.

---

<sup>14</sup> The *i* indicates the number nine; it is not the Roman numeral representing the number one.

(2) A gives the RFI to B, or lends it interest-free to B.

The receipt in B's hands is B's capital (within (i)); and is also derived from A's RFI; it is treated in B's hands as derived from RFI.

### 19.3.7 *Finding income/capital for year*

Step 1 in s.809Q(3) ITA provides:

For each of the categories of income and capital in paragraphs (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

Income for a tax year is not difficult to identify, for the tax system requires one to attribute income to a tax year and provides rules for that purpose. Chargeable gains for a tax year are not difficult to identify, for gains accrue on a particular date, and in particular cases there are rules to identify the date.

It is considered chargeable-event gains are category (i) capital for the year in which they are received. Suppose:

- (1) Year 1: T uses RFI to purchase a foreign policy for £1m.
- (2) Year 5: T surrenders the policy for £2m and realises a chargeable event gain of £1m (taxable on the arising basis<sup>15</sup>). T remits £1m.

The £1m remitted is category (i) (other income or capital) of year 5, so there is no further charge on the remittance.<sup>16</sup>

### 19.3.8 *Derived property*

Section 809R ITA provides:

- (1) This section applies for the purposes of step 1 of section 809Q(3) (composition of mixed fund).
- (2) Treat property which derives wholly or in part (and directly or indirectly) from an individual's income or capital for a tax year as consisting of or containing that income or capital.

This is needed as step 1 refers to income or capital of the individual, but

---

<sup>15</sup> See 62.5 (No remittance basis).

<sup>16</sup> The £1m remitted is not regarded as derived from the RFI: see 17.16.15 (Income from income/gains).

that must of course be taken to include sums derived from that income or capital.

For instance, suppose:

- (1) Year 1: T receives £1m capital and uses it to purchase shares.
- (2) Year 2: T sells the shares for £2m (£1m gain).

The proceeds of sale are a mixed fund consisting of:

- (1) Gains of year 2 (the gain on the disposal); and
- (2) Capital of year 1 (not year 2) because that derives from the capital of year 1.

HMRC agree: see the example of Jason in 19.4.8 (RFI + gain of different years).

## 19.4 Onshore transfers

### 19.4.1 *Scope of mixed fund rule*

Section 809Q ITA provides:

- (1) This section applies for the purposes mentioned in subsection (2) ...
- (2) The purposes referred to in subsection (1) are—
  - (a) determining whether condition B in section 809L is met, and
  - (b) if it is met, determining (under section 809P) the amount of income or chargeable gains remitted.

Accordingly, the mixed fund rule in s.809Q does not apply for the purposes of remittance basis conditions C or D. This was presumably because those conditions do not always require the use of foreign income/gains or property derived from it. Fortunately conditions C and D will not often apply. So in practice the mixed fund rule applies for most remittance purposes. When conditions C and D are in point, one applies the pre-2008 mixed fund rules.

This may allow some tax planning. Suppose:

- (1) T has a mixed fund of £2m, consisting of 50% clean capital and 50% gains.
- (2) T wishes to bring £1m into the UK to purchase a property.

If T brings in £1m personally, the ITA mixed fund rules apply and there is gains remitted of £1m. If T gives the fund to a non-relevant person, say, an adult child, who purchases the property and allows T to live there, the pre-2008 mixed fund rules apply, and there is a remittance of £0.5m. But

the mixed-fund TAAR might apply.

#### 19.4.2 *Onshore transfer*

Section 809Q(1) ITA provides:

This section applies ... where

- [za] condition A in section 809L is met [property is brought/received/used in the UK by a relevant person]<sup>17</sup> and—
- (a) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, a transfer from a mixed fund, ...

Expanding this, and focussing on property rather than services (which are less important) it should be read to mean:

This section applies where

- [za] Condition A is met, [property is brought/received/used in the UK by a relevant person], and—
- (a) [i] the property ... is (wholly or in part) ... [property transferred by]<sup>18</sup> a transfer from a mixed fund, or
- [ii] the property ... derives (wholly or in part, and directly or indirectly) from [property transferred by] a transfer from a mixed fund...

The next part of s.809Q(1) deals with debt remittances:

This section applies ... where

- [za] Condition A is met, [property is brought/received/used in the UK by a relevant person], and ...
- (b) [i] a transfer from a mixed fund, or
- [ii] anything deriving (wholly or in part, and directly or indirectly) from such a transfer, is used as mentioned in section 809L(3)(c) [used in respect of a relevant debt].

I refer to a transfer to which s.809Q applies as an “**onshore transfer**”.

---

17 See 17.12 (Remittance condition A: UK link).

18 The words in square brackets must be implied. The drafter has referred to a transfer but intends to refer to the property transferred by the transfer, which is actually a different thing. But the meaning is clear.

That term is not wholly apt<sup>19</sup> but it will do as a short label. The RDR Manual occasionally uses the expression “remittance transfer”.

In short, there is an onshore transfer in six cases:

- (1) A relevant person receives property in the UK which:
  - (a) is from a mixed fund or
  - (b) is derived from a mixed fund
- (2) A relevant person receives a UK service, consideration for which:
  - (a) is from a mixed fund or
  - (b) is derived from a mixed fund
- (3) A relevant debt:
  - (a) is satisfied out of a mixed fund or
  - (b) is satisfied out of property derived from a mixed fund.

#### 19.4.3 “Transfer”

Transfer is not defined but the context shows that it means any payment or transfer out of the mixed fund, whether or not for consideration.

If (the paradigm case) the mixed fund is a bank account, it means any withdrawal from the account.

If the mixed fund is a managed account of securities, it would include any transfer out of the account but not

- (1) sales where the proceeds are paid into the account; or
- (2) purchases where the price is paid from the account

Section 809Q(7) ITA defines the amount of a transfer:

References in this section to the amount of the transfer include the market value of it.

It would be more accurate to refer to a valuation of the property transferred, not the transfer, but the meaning is clear. Thus if, say, dollars are transferred to the UK from an offshore dollar account, the amount of the transfer is the value of the dollars at the time of the remittance.

#### 19.4.4 *Onshore transfer mixed fund rule*

We can turn at last to the rule itself. Section 809Q(3) ITA provides:

---

<sup>19</sup> For instance, a transfer of funds received in the UK by a non-relevant person counts as an offshore transfer and not as an onshore transfer.

The extent to which the transfer is of the individual's income or chargeable gains is to be determined as follows.

Section 809Q(3) ITA then sets out five steps. It is easier to follow the steps if one has an example in mind. Suppose T (a remittance basis taxpayer) receives £100 per annum of each of the mixed fund categories and pays them into one mixed fund:

Category	Type of income	Year 1	Year 2
Para (a)	UK earnings	£100	£100
Para (b)	relevant foreign earnings	£100	£100
Para (c)	FSEI	£100	£100
Para (d)	relevant foreign income	£100	£100
Para (e)	foreign chargeable gains	£100	£100
Para (f)	foreign-taxed earnings	£100	£100
Para (g)	foreign-taxed RFI	£100	£100
Para (h)	foreign-taxed gains	£100	£100
Para (i)	other income and capital	£100	£100

There is therefore a mixed fund of £1800. Suppose T remits nothing in year 1 and £1,000 to the UK in year 2. This is an onshore transfer. One follows the steps thus:

*Step 1*

*For each of the categories of income and capital in paras (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.*

*“The relevant tax year” is the tax year in which the transfer occurs.*

In the example, the relevant tax year is year 2. I consider this further below but for present purposes assume that “the amount of income or capital of the individual in the mixed fund immediately before the transfer” is as set out in the table above.

*Step 2*

*Find the earliest paragraph for which the amount determined under step 1 is not nil.*

The earliest paragraph is para (a) and the amount determined under step 1 is £100.

*If that amount does not exceed the amount of the transfer, treat the*

*transfer as containing the income or capital within that paragraph (and for that tax year).*

T's transfer is treated as containing £100 employment income category (a) for year 2.

*Otherwise, treat the transfer as containing the relevant proportion of each kind of income or capital within that paragraph (and for that tax year).*

*"The relevant proportion" is the amount of the transfer divided by the amount determined under step 1 for that paragraph.*

(Had the transfer been (say) £50 then the relevant proportion would have been  $£50 \div £100 = 50\%$  so the transfer would have been treated as containing £50 employment income category (a) for year 2.)

*Step 3*

*Treat the amount of the transfer as reduced by the amount taken into account under step 2.*

The amount of the transfer is reduced to £900.

*Step 4*

*If the amount of the transfer (as reduced under step 3) is not nil, start again at step 2.*

*In step 2, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step in relation to the transfer.*

Following this iterative process a total of nine times, the transfer is treated as containing:

(a)	employment income	£100
(b)	relevant foreign earnings	£100
(c)	foreign specific employment income	£100
(d)	relevant foreign income	£100
(e)	foreign chargeable gains	£100
(f)	foreign-taxed employment income	£100
(g)	foreign-taxed RFI	£100
(h)	foreign-taxed gains	£100
(i)	other income and capital	<u>£100</u>
<b>Total</b>		<b><u>£900</u></b>

The amount of the original £1,000 transfer is by this stage treated as reduced to £100. We move to the next step:

*Step 5*

*If the amount of the transfer (as reduced under step 3) is not nil once steps 2 and 3 have been undertaken in relation to all paragraphs of subsection (4) for which the amount determined under step 1 is not nil, start again at step 1.*

*In step 1, read the reference to the relevant tax year as a reference to the tax year immediately before the last tax year for which step 1 has been undertaken in relation to the transfer.*

Thus we repeat step 2 a last and tenth time, reading “the relevant tax year” to mean year 1. So the transfer of £1,000 from the mixed fund is treated as being:

<b>Category</b>	<b>Type of income</b>	<b>Year</b>	<b>Amount</b>
Para (a)	UK earnings	2	£100
Para (b)	relevant foreign earnings	2	£100
Para (c)	FSEI	2	£100
Para (d)	relevant foreign income	2	£100
Para (e)	foreign chargeable gains	2	£100
Para (f)	foreign-taxed earnings	2	£100
Para (g)	foreign-taxed RFI	2	£100
Para (h)	foreign-taxed gains	2	£100
Para (i)	other income and capital	1	£100

In order to reach this answer for one single transfer we have had to carry out 37 steps.<sup>20</sup> Yet it will be common for there to be hundreds or thousands of transfers from mixed funds.

#### 19.4.5 *Drafting style: Critique*

The effect of the onshore transfer mixed fund rule is that transfers from a mixed fund are treated as being made in the mixed fund priority order, taking more recent years before earlier years. Why didn't the statute simply say so? For a discussion of the drafting style, see 57.15.7 (Method statements: Critique). But the fundamental problem is not the drafting, but conception of the mixed fund rule.

---

<sup>20</sup> Steps 1–4 were each carried out 9 times and step 5 once.

### 19.4.6 Examples: onshore transfers

The RDR Manual provides examples. I set them out more or less verbatim, but rearrange and omit some irrelevant detail for clarity.

### 19.4.7 Mixed RFE/RFI/EI of 1 year

The first example involves a single onshore transfer out of a mixed fund containing RFE, RFI and UK employment income of one year.

#### **RDRM 35280 Example 1 (Amelia)** [Jan 2019]

A, a remittance basis user, has an offshore account with mixed funds as follows:

- foreign earnings from two employers totalling £40,000 per month, half of which is subject to foreign tax [mixed fund categories (b) and (f)]
- relevant foreign income of £10,000 per quarter, which is not subject to foreign tax [mixed fund category (d)].
- some of her UK employment income (£50,000 per month) which has already been subject to tax in the UK is paid into the same offshore bank account [mixed fund category (a)]

On 15 October 2010 A purchases an aircraft for £460,000, which she brings to the UK.

Since the account was opened in the tax year, we have an account with 20 credits and one debit (an onshore transfer) thus:

2009-10		Credit (Debit)	Balance	Category
30 Apr	UK salary	£50,000	£50,000	(a)
30 Apr	Overseas salary NFT <sup>21</sup>	£20,000	£70,000	(b)
30 Apr	Overseas salary FT <sup>22</sup>	£20,000	£90,000	(f)
31 May	UK salary	£50,000	£140,000	(a)
31 May	Overseas salary NFT	£20,000	£160,000	(b)
31 May	Overseas salary FT	£20,000	£180,000	(f)
2 Jun	RFI	£10,000	£190,000	(d)
30 Jun	UK salary	£50,000	£240,000	(a)
30 Jun	Overseas salary NFT	£20,000	£260,000	(b)
30 Jun	Overseas salary FT	£20,000	£280,000	(f)
31 Jul	UK salary	£50,000	£330,000	(a)
31 Jul	Overseas salary NFT	£20,000	£350,000	(b)
31 Jul	Overseas salary FT	£20,000	£370,000	(f)
31 Aug	UK salary	£50,000	£420,000	(a)
31 Aug	Overseas salary NFT	£20,000	£440,000	(b)
31 Aug	Overseas salary FT	£20,000	£460,000	(f)
2 Sept	RFI	£10,000	£470,000	(d)

21 Not foreign-taxed.

22 Foreign-taxed.

30 Sept	UK salary	£50,000	£520,000	(a)
30 Sept	Overseas salary FT	£20,000	£540,000	(f)
30 Sept	Overseas salary NFT	£20,000	£560,000	(b)
15 Oct	Aircraft purchase	(£460,000)	£100,000	

**Step 1** Identify the “amount of transfer” in the relevant year (2010-11) £460,000  
 Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a) UK employment income	£300,000
Para (b) Relevant foreign earnings (not subject to a foreign tax)	£120,000
Para (d) RFI (not subject to a foreign tax)	£20,000
Para (f) Employment income subject to a foreign tax	£120,000

**Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: Para (a) £300,000

**Step 3** Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.

	£460,000
	<u>-£300,000</u>
	<u>£160,000</u>

**Step 4** Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

<b>Step 2</b> repeated: Para (b)	£120,000
<b>Step 3</b> repeated Amount transferred further reduced to:	£40,000

**Step 4** In the order of preference listed above repeat Steps 2 and 3.

<b>Step 2</b> repeated: Para (d)	£20,000
<b>Step 3</b> repeated Amount transferred further reduced to:	£20,000

**Step 4** In the order of preference listed above repeat Steps 2 & 3.

<b>Step 2</b> Para (f)	£120,000
------------------------	----------

**Step 3** If the amount at Step 2 is equal to or more than the remaining amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain £nil

There has been a transfer to the UK of £460,000. Of this, £300,000 is from UK employment income which has already been taxed, so will not be taxed again. There have also been taxable remittances of A's relevant foreign earnings (£140,000 (£20,000 of which was subject to a foreign tax) and relevant foreign income (£20,000)). £100,000 of taxed foreign employment income (para f) remains in the offshore account fund.

*Moral:* A should have kept her taxed foreign earnings separate so that they could be remitted. The tax on that remittance would be less because the foreign tax credit would be available. If A had kept all the sources of income separately, she would also have been saved the cost of the

computation.

#### 19.4.8 *Mixed RFI/gain of different years*

The next example is a single onshore transfer from a mixed fund with RFI of earlier years and a chargeable gain of a later year.

**RDRM35290 Example 2** (Jason) [Jan 2019]

In Year 1 J purchases shares in a foreign company for £8m. The £8m represents J's 'clean' capital, being perhaps an inheritance or similar such windfall.

In Year 3 J later sells the shares for £10m, which produces a £2m chargeable gain. The sale proceeds are credited in Year 3 to his overseas bank account that contains some relevant foreign income from the last two tax years, but no other monies.

There is now a mixed fund, containing:

- £8m capital from Year 1,
- £2m a foreign chargeable gain from Year 3
- relevant foreign income from Years 2 and 3.

Later in Year 3 J, a remittance basis user, brings £5m to the UK from that account. The ordering rules in ITA07/s809Q mean that all of the relevant foreign income and the £2m gain from Year 3 is treated as remitted before any of the capital can be considered as remitted.

If the mixed fund also included other amounts of income or capital gains for that tax year (Year 2 or 3), those amounts must also be taken into account before any of the 'capital' element of the proceeds, (that is the £8m that is not a gain) realised by the sale of shares can be considered.

*Moral:* J should have kept the proceeds of the share sale in a separate account. Then the £5m remittance would have been £2m gain and £3m capital.

Better, J should have disposed of the shares by two separate disposals of £5m each, and remitted the proceeds of the first disposal. Then remittance would have been £1m gain and £4m capital.

#### 19.4.9 *Fund accruing over 2 years*

The next example involves a single onshore transfer out of a mixed fund of RFE, RFI and UK earnings and chargeable gains, accruing over a two year period.

**RDRM35300 Mixed Funds: Example 3 - single remittance** (Jeff) [Jan 2019]

J has:

- UK salary of £10,000 a month paid into an overseas bank account [mixed fund category (a)].
- a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the same bank account [mixed fund category (f)].

Both salaries are paid on the last day of each month.

- Dividends from a shareholding in a foreign company are also paid into the account [mixed fund category (g)].

In Year 0, J had purchased shares in a foreign company for £8m. The £8m is 'clean' capital [mixed fund category (i)]. J sells the shares in Year 2 for £10m, which produces a £2m chargeable gain [mixed fund category (e)].

J's remittances to the UK from this fund in Year 2 are £10m.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are credited net of overseas withholding taxes.

		Credit (Debit)	Balance	Category
<b>Year 1</b>			£0	
31 Mar	UK salary (net of tax)	£10,000	£10,000	(a)
31 Mar	Overseas salary FT	£5,000	£15,000	(f)
<b>Year 2</b>				
30 Apr	UK salary	£10,000	£25,000	(a)
30 Apr	Overseas salary	£5,000	£30,000	(f)
15 May	Dividend	£2,000	£32,000	(g)
31 May	UK salary	£10,000	£42,000	(a)
31 May	Overseas salary	£5,000	£47,000	(f)
18 Jun	Sale of shares: gain	£2,000,000		(e)
	Sale of shares: capital	£8,000,000	£10,047,000	(i)
30 Jun	UK salary	£10,000	£10,057,000	(a)
30 Jun	Overseas salary	£5,000	£10,062,000	(f)
25 Jul	Dividend	£2,000	£10,064,000	(g)
31 Jul	UK salary	£10,000	£10,074,000	(a)
31 Jul	Overseas salary	£5,000	£10,079,000	(f)
31 Jul	Bank interest	£5,000	£10,084,000	(d)
14 Aug	Transfer to UK account	(£10,000,000)	£84,000	

Applying the ordering rules in S809Q to the account immediately before the transfer:

**Step 1** Identify the "amount of transfer" in relevant tax year (Year 2)      **£10,000,000**

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

<b>Para (a)</b> Employment income (including UK employment income) not subject to a foreign tax	Year 1: £10,000 Year 2: £40,000
<b>Para (d)</b> Relevant foreign income (not subject to a foreign tax) <i>Bank interest</i>	Year 2: £5,000
<b>Para (e)</b> Foreign chargeable gains (not subject to a foreign tax)	Year 2: £2,000,000
<b>Para (f)</b> Employment income subject to a foreign tax	Year 1: £5,000 Year 2: £20,000
<b>Para (g)</b> Relevant foreign income subject to a foreign	

tax <i>Foreign dividends</i>	Year 2: £4,000
<b>Step 2</b> Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:	
<b>Para (a)</b>	£40,000
<b>Step 3</b> Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.	£10m less £40k = <u>£9,960,000</u>
<b>Step 4</b> Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.	
<b>Step 2</b> <b>Para (d)</b>	-£5,000
<b>Step 3</b>	<u>£9,955,000</u>
<b>Step 4</b> In the order of preference listed above repeat Steps 2 and 3	
<b>Step 2</b> <b>Para (e)</b>	-£2m
<b>Step 3</b>	<u>£7,955,000</u>
<b>Step 4</b> In the order of preference listed above repeat Steps 2 and 3	
<b>Step 2</b> <b>Para (f)</b>	-£20,000
<b>Step 3</b>	<u>£7,935,000</u>
<b>Step 4</b> In the order of preference listed above repeat Steps 2 and 3	
<b>Step 2</b> <b>Para (g)</b>	-£4,000
<b>Step 3</b>	<u>£7,931,000</u>

At this point all of the income of Year 2 has been matched against the remittance.

<b>Step 5</b> If the amount of the transfer (as reduced under Step 3) is not nil once steps 2 and 3 have been undertaken for all of the capital, income and gains of the relevant tax year repeat the exercise using the income, capital and gains of the next earliest year (Year 1)	
<b>Step 2</b> <b>Para (a)</b>	-£10,000
<b>Step 3</b>	<u>£7,921,000</u>
<b>Step 4</b> In the order of preference listed above repeat Steps 2 and 3	
<b>Step 2</b> <b>Para (f)</b>	-£5,000
<b>Step 3</b>	<u>£7,916,000</u>

At this point all of the income of Year 1 has been matched against the remittance

<b>Step 5</b> If the amount of the transfer (as reduced under Step 3) is not nil once steps 2 and 3 have been undertaken for all of the capital, income and gains of the relevant tax year repeat the exercise using the income, capital and gains of the next earliest year (Year 0)	
<b>Step 2</b> - If the amount is more than the [residual] 'relevant amount', treat the whole of the remittance as coming from that item of income or gain <b>Para (i)</b>	£8m

The result of this exercise is that

- All of J's UK salary in tax year 2 is deemed to have been brought to the UK first.
- Similarly all of his foreign income and gains of tax year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.
- J's income of Year 1 is also matched against the remittance.

- £7,916,000 capital has also been brought to the UK.

Until such time as further amounts of income and gains are credited to the overseas account, the mixed fund contains £84,000 of capital (from the sale of shares).

The next part of the example has two more transfers from the mixed fund.

**RDRM35310: Mixed Funds: Example 3 - (continuation) remittance of funds covering two years) [Jan 2019]**

Immediately after the £10m transfer in Year 2 (refer to example 3) J's mixed fund contains £84,000 of capital from Year 0 (from the sale of shares).

For the rest of Year 2, J continues to have his UK salary of £10,000 a month and his 'relevant foreign earnings' of £5,000 a month paid into that same account. Both salaries are paid on the last day of each month. There are no further credits or debits from the account in Year 2.

In Year 3 J purchases shares in a UK company by direct debit from this account (£150,000). He also transfers £5,000 to meet daily living expenses. These amounts are remittances from a mixed fund to which the rules in s809Q apply.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are also credited to the account net of overseas withholding taxes.

*J's overseas bank account continuation*

		Credit (Debit)	Balance	Category
<b>Year 2</b>	Balance b/f		£84,000	
31 Aug	UK salary	£10,000	£94,000	(a)
31 Aug	Overseas salary	£5,000	£99,000	(f)
30 Sept	UK salary (net of tax)	£10,000	£109,000	(a)
30 Sept	Overseas salary (net of tax)	£5,000	£114,000	(f)
31 Oct	UK salary	£10,000	£124,000	(a)
31 Oct	Overseas salary	£5,000	£129,000	(f)
30 Nov	UK salary	£10,000	£139,000	(a)
30 Nov	Overseas salary	£5,000	£144,000	(f)
31 Dec	UK salary	£10,000	£154,000	(a)
31 Dec	Overseas salary	£5,000	£159,000	(f)
31 Jan	UK salary	£10,000	£169,000	(a)
31 Jan	Overseas salary	£5,000	£174,000	(f)
28 Feb	UK salary	£10,000	£184,000	(a)
28 Feb	Overseas salary	£5,000	£189,000	(f)
31 Mar	UK salary	£10,000	£199,000	(a)
31 Mar	Overseas salary	£5,000	£204,000	(f)
<b>Year 3</b>				
30 Apr	UK salary	£10,000	£214,000	(a)
30 Apr	Overseas salary	£5,000	£219,000	(f)
15 May	Dividend	£2,000	£221,000	(g)
31 May	UK salary	£10,000	£231,000	(a)
31 May	Overseas salary	£5,000	£236,000	(f)

30 Jun	UK salary	£10,000	£246,000	(a)
30 Jun	Overseas salary	£5,000	£251,000	(f)
30 Jun	Purchase UK shares	(£150,000)	£101,000	
3 Jul	Transfer to UK	(£5,000)	£96,000	

The direct debit on 30 June (£150,000) is a remittance from a mixed fund. Applying the ordering rules in S809Q to the account immediately before the transfer:

**Step 1** Identify the “amount of transfer” in the relevant tax year (Year 3)      **£150,000**

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for the relevant tax year (Year 3) immediately before the date of the transfer:

<b>Para (a)</b> Employment income (including UK employment income) not subject to a foreign tax	£30,000
<b>Para (f)</b> Employment income subject to a foreign tax	£15,000
<b>Para (g)</b> Relevant foreign income subject to a foreign tax	£2,000

**Step 2** Identify the earliest paragraph above for the relevant year (Year 3), which has an amount of income or gain in the mixed fund:

<b>Para (a)</b>	£30,000
-----------------	---------

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£150,000
<u>-£30,000</u>
<u>£120,000</u>

**Step 4** Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

<b>Step 2</b> Identify the earliest paragraph: <b>Para (f)</b>	£15,000
--	---------

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£120,000
<u>-£15,000</u>
<u>£105,000</u>

**Step 4** Repeat Steps 2 and 3.

<b>Step 2</b> Identify the earliest paragraph: <b>Para (g)</b>	£2,000
--	--------

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£105,000
<u>-£2,000</u>
<u>£103,000</u>

At this stage all of the amounts credited to the account in Year 3 have been matched against remitted amounts. Income and capital of the next previous year (Year 2) must now be considered - so return to Step 1 for Year 2.

**Step 1** Identify the separate amounts of income, capital gains and capital present for Year 2 before transfer:

**Para (a)** Employment income (including UK employment income) not subject to a foreign tax £80,000

**Para (f)** Employment income subject to a foreign tax £40,000

**Step 2** Identify the earliest paragraph above for the relevant year (Year 2), which has an amount of income or gain in the mixed fund: **Para (a)** £80,000

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

	£103,000
	<u>-£80,000</u>
	<u>£23,000</u>

**Step 4** Find the next paragraph/amount for that tax year.

In the order of preference listed above repeat Steps 2 and 3.

**Step 2** Identify the earliest paragraph: **Para (f)** £40,000

**Step 3** If the amount is more than the [residual] “transfer amount”, the whole of the remittance comes from that paragraph. £23,000

The £150,000 transfer is therefore regarded as a remittance of:

Amount	Type of income	Category	Income of year
£110,000	UK employment income	(a)	£30k Year 3 + £80k Year 2
£38,000	Relevant foreign income	(f)	£15k Year 3 + £23k Year 2
<u>£2,000</u>	Relevant foreign earnings	(g)	Year 3
<u>£150,000</u>			

**Note**

The transfer on 3 July of £5,000 to meet daily living expenses will similarly be regarded as coming from the ‘earliest paragraph’ in the mixed fund, which is paragraph (f) containing £17,000 of relevant foreign earnings from Year 2.

*Reconciliation*

The mixed fund still contains:

£84,000	Capital of Year 0 (from the sale of shares in Year 2) together with
<u>£12,000</u>	Relevant foreign earnings from Year 2, and
<u>£96,000</u>	

The result of this exercise is that:

- All of J’s UK salary in Year 3 (£30,000) is deemed to have been brought to the UK first and is not a taxable remittance. In addition, J has remitted £80,000 of UK employment income from Year 2 that is also not taxable again upon remittance.
- Similarly all of his relevant foreign income (£2,000) and overseas employment income of Year 3 (£15,000) together with £28,000 of relevant foreign earnings from Year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax

*Moral:* J should have kept his £150k capital receipt separate and remitted

from that. That would have reduced the tax on the remittance and saved the costs of the computation.

## 19.5 Offshore transfer

Section 809R(4) ITA provides:

Treat an offshore transfer from a mixed fund as containing the appropriate proportion of each kind of income or capital in the fund immediately before the transfer.

“The appropriate proportion” means the amount (or market value) of the transfer divided by the market value of the mixed fund immediately before the transfer.

I refer to this as the “**offshore transfer**”.

### 19.5.1 “Transfer”

“Transfer” is not defined.

It should have the same meaning as in s.809Q<sup>23</sup> so there is a transfer where the funds in the hands of the transferee are regarded as derived from the mixed fund, but not otherwise. For the meaning of derived in this context, see 17.16 (Derived property).

### 19.5.2 “Offshore” transfer

Section 809R(5) ITA defines “offshore transfer”:

A transfer from a mixed fund is an “offshore transfer” for the purposes of subsection (4) if and to the extent that section 809Q does not apply in relation to it.

So far the definition seems clear. One must ask whether s.809Q applies. Section 809Q applies (in short) if property from a mixed fund is received in the UK by a relevant person.<sup>24</sup> A transfer to a UK bank account is an onshore transfer. So a transfer to a foreign account appears to be an offshore transfer.

But suppose:

Year 1: A sum is transferred from a mixed fund to a foreign account (“the first transfer”).

---

<sup>23</sup> See 19.4.3 (“Transfer”).

<sup>24</sup> See 19.4.2 (Onshore transfer).

Year 2: The sum (now in the foreign account) is transferred to a UK account (“the second transfer”).

It appears that in year 1 the first transfer is not an onshore transfer, but in year 2 it becomes one.<sup>25</sup> To avoid this result, s.809R(6) ITA provides:

Treat a transfer from a mixed fund as an “offshore transfer” (and section 809Q as not applying in relation to it, if it otherwise would do) if and to the extent that, at the end of a tax year in which it is made—

- (a) section 809Q does not apply in relation to it, and
- (b) on the basis of the best estimate that can reasonably be made at that time, section 809Q will not apply in relation to it.

If condition (a) and (b) of this subsection are *both* satisfied, there are two consequences:

- (1) One must treat the transfer as an offshore transfer.
- (2) One must treat section 809Q as not applying in relation to it, if it otherwise would do.

Unless condition (a) and (b) are both satisfied, this subsection does not apply.

The condition in subsection (6)(a) is clear enough. One asks whether s.809Q applies at the end of the tax year. Eg this condition is met if:

- (1) T transfers a sum from a mixed fund to a new offshore account on 6<sup>th</sup> April 2008, and
- (2) the money is still there on 5<sup>th</sup> April 2009, or the money has been used to purchase a non UK asset.

Subsection (6)(b) is a challenge. At the end of the tax year, one must ask whether s.809Q will or will not apply in relation to the transfer. In relation to some transfers one can say with certainty that s.809Q will not apply. If the transferor draws a sum from a mixed fund to pay for a dinner outside the UK, then s.809Q will not apply to it because nothing will be received in the UK. That is an offshore transfer.

If a person transfers a sum to an offshore account and does expect to spend it in the UK that is an onshore transfer when remitted to the UK.

---

<sup>25</sup> Section 809Q applies because (1) remittance condition A is met, and (2) the property received in the UK derives indirectly from the first transfer from the mixed fund.

### 19.5.3 *Recomputation problem*

I use the term “**problematic transfer**” (for reasons which will become clear) to describe a transfer made in the following circumstances (by no means unusual):

- (1) In year 1 T transfers a sum from a mixed fund to an account outside the UK.
- (2) At the end of year 1 the transferred sum is not received in the UK.
- (3) T cannot say at the end of the year 1 that “section 809Q will not apply in relation to” the problematic transfer. This may be because:
  - (a) At the end of year 1, T does expect to spend the sum in the UK but not until a later year, say, year 5; or
  - (b) T has not decided whether to remit the sum to the UK or not.At the end of year 1, the problematic transfer is not an onshore transfer. It is an offshore transfer within the definition in s.809R(5). Admittedly it is not within subsection 809R(6) but that subsection does not stop any transfer being an offshore transfer, if applicable it treats onshore transfers as offshore transfers.
- (4) Suppose in a later year (say year 5) T transfers the sum to the UK. I refer to this as its “**subsequent remittance.**”

On one view, the problematic transfer changes status at the time of its subsequent remittance and becomes an onshore transfer. That is workable if in the meantime T has not made any other onshore transfers from the mixed fund. It is not workable if in the meantime T has made other transfers from the mixed fund, because:

- (1) T needed to know at the time what income or gains those other transfers included.
- (2) There cannot be a recomputation of the tax effect of the other transfers in earlier years on the basis that the problematic transfer has turned out to be an onshore transfer after all. I think that is obviously impractical, but for good measure it is also inconsistent with s.809R(9) ITA which provides:

If section 809Q applies in relation to more than one transfer from a mixed fund, when undertaking step 1 in relation to the second or any subsequent transfer take into account the effect of step 2 of section 809Q(3) (composition of transfer) as it applied in relation to each earlier transfer.

It is difficult to make a coherent and workable tax regime out of this intractable statutory material, which is not surprising given the way in which it was enacted. I think the best solution is to say that s.809R(6)(b) is misconceived, that a problematic transfer is only an onshore transfer if s.809Q applies to it in the year of the transfer. If at the end of the year it is an offshore transfer, its status does not change later. This can be justified on the basis that IT is an annual tax.<sup>26</sup>

The alternative view is that the problematic transfer does change its status and becomes an onshore transfer, on the occasion of its subsequent remittance. One carries through the implications for tax purposes so far as that is possible, so the result is that tax is charged as if the problematic transfer was made after the subsequent transfers.

If that were so, another issue arises. Suppose when asked whether the sum will be remitted, T says (as may well be said) that T will remit it if represents an offshore transfer. The question whether a sum will be remitted to the UK may depend on the tax position, ie if it represents an offshore transfer it will be remitted and if it represents an onshore transfer it will not. It is therefore impossible to answer the s.809R(6)(b) question, whether the sum will be remitted, on the view that a problematic transfer becomes an onshore transfer when remitted; for if it is an offshore transfer it will be remitted (and so is an onshore transfer) but if it is an onshore transfer it will not be remitted (and so is an offshore transfer).

#### 19.5.4 *HMRC explanation*

EN Clause 23 sch 7 Remittance Basis Amendments 463 to 481 explains s.809R(4) ITA:

7. Amendment 465 introduces a new subsection [4], dealing with cases where transfers are made wholly offshore. The new rules aim to ensure that where a transfer is made offshore from fund A to fund B, and remittances to the UK are then made from fund A or fund B, the normal ordering rules for mixed funds apply, as they would have done had the transfer to Fund B not been made before the remittance.

This is an inaccurate precis of the offshore transfer mixed fund rule. The EN continues:

---

<sup>26</sup> Section 4 ITA.

8. So if fund A consisted of equal amounts of untaxed income and capital, and half the fund was transferred to fund B, it cannot be argued that fund A or B consisted solely of capital, and remittances from fund A or B were not therefore taxable. Instead, where there is an offshore transfer, so that the normal mixed fund ordering rules do not apply, fund B is to be treated as containing the same proportion of the different categories of income and capital as the original fund, in relation to the amount transferred.

### 19.5.5 *Transfer part on/off-shore*

Section 809R(8) ITA provides:

If section 809Q applies in relation to part of a transfer, apply that section in relation to that part before applying subsection (4) in relation to the rest of the transfer.

In practice this will rarely occur.

### 19.5.6 *Examples: on/off-shore transfers*

The RDR Manual provides a straightforward example of onshore and offshore transfers from an account with different categories of income and gains:

**RDRM35430** [Jan 2019], **RDRM35440** [Jan 2019]

**Example 1** (Ahmid)

A, a remittance basis user has an offshore bank account into which is paid both UK source (taxed) income and his foreign income and gains. A makes regular **transfers from this account to his UK account to meet his UK living expenses.**

		<b>Credit (Debit)</b>	<b>Balance</b>	<b>Category</b>	<b>Note</b>
10 Apr	XYZ (CI) Ltd – proceeds from sale of shares	£1,000,000	£1,000,000	(e)	1

3 May	Transfer to UK a/c	(£5,000)	£1,025,000		2
15 May	Offshore dividend	£2,000	£1,027,000	(g)	
31 May	UK salary	£10,000	£1,037,000	(a)	

---

<sup>27</sup> Net of tax.

31 May	Overseas salary	£5,000	£1,042,000	(f)	
31 May	ABC (IoM) Ltd	(£1,000,000)	£42,000		3
	– purchase of shares in foreign company				
3 Jun	Transfer to UK a/c	(£5,000)	£37,000		4
30 Jun	UK salary	£10,000	£47,000	(a)	
30 Jun	Overseas salary	£5,000	£52,000	(f)	
3 Jul	Transfer to UK a/c	(£5,000)	£47,000		5
31 Jul	UK salary	£10,000	£57,000	(a)	
31 Jul	Overseas salary	£5,000	£62,000	(f)	
3 Aug	Transfer to UK a/c	(£5,000)	£57,000		6
15 Aug	Cheque – ZZZ	(£25,000)	£32,000		7
	Cars Ltd London				

**Note 1**

The sale price of the shares includes a gain over the original purchase price of £150,000 that has not been taxed. The purchase was made long before 6 April 2008 and was made using accumulated foreign income and gains which were treated as clean capital.

The mixed fund provisions do not apply to foreign income or gains that arose or accrued before 6 April 2008 (Sch 7 FA 2008 para 89). This means that it is not possible to apply the “mixed fund” rules to the £850,000 used to buy the shares.

**Note 2**

Using the ordering rules at ITA07/s809Q(1), the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the “earliest paragraph” of income or gains within the mixed fund.

Working this through this example:

The £5,000 transfer to the UK on 3 May is a “transfer” from a mixed fund within section 809Q. Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (g)	RFI subject to tax	£10,000
Para (i)	Income or capital not within another para	£850,000

The remittance is regarded as coming from the “earliest paragraph”, that is Para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed.

**Note 3**

The purchase of shares on 31 May is an “offshore transfer”; by the end of the tax year the shares purchase have not, nor on best estimate are they likely to be, a remittance transfer [in my terminology an onshore transfer] so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

**Immediately before the offshore transfer the mixed fund consists of the following**

Para (a)	employment income	£ 15,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	RFI subject to tax	£12,000
Para (i)	Income or capital not within another para	<u>£850,000</u>
		<u>£1,042,000</u>

**The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund.**

Para (a)	employment income	£14,396
Para (d)	RFI	£4,798
Para (e)	Chargeable gains	£143,953
Para (f)	Earnings subject to a foreign tax	£9,597
Para (g)	RFI subject to tax	£11,517
Para (i)	Income or capital not within another para	<u>£815,739</u>
		<u>£1,000,000</u>

**Note 4**

The £5,000 transfer on 3 June to the UK is a “transfer” to the UK from a mixed fund, and is within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a)	employment income	£604
Para (d)	RFI	£202
Para (e)	Chargeable gains	£6,047
Para (f)	Earnings subject to a foreign tax	£403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The transfer is regarded as coming from each of the paragraphs in order; that is £604 from Para (a), and a taxable remittance of £4,396, being £202 from Para (d) and £4,194 from Para (e).

**Note 5 and 6**

Both of these £5,000 transfers are to the UK. There have been credits to the fund between the last transfer (note 4) and this transfer and the fund now contains some employment income (Para a) and additional amounts of foreign earning subject to foreign tax (Para f) in addition to the residue following the last transfer.

The £5,000 transfers made on 3 July and 3 August are regarded as coming from the earliest paragraph of income, that is Para (a) – £10,000 of UK employment

income credited to the account on 30 June.

**Note 7**

The cheque remittance on 15 August is £25,000. This amount was used to buy a car from a UK company. This is also a remittance within s809Q.

**Immediately before the transfer the mixed fund consists of:**

Para (a)	employment income	£10,000
Para (d)	RFI	£nil
Para (e)	Chargeable gains	£1,853
Para (f)	Earnings subject to a foreign tax	£10,403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The cheque remittance is regarded as coming from each of the paragraphs in order; that is £10,000 from para (a), £1,853 from para (e) and £10,403 from Para (f), £483 from Para (g) and £2,261 from Para (i).

The remaining £32,000 at 15 August is also within Para (i)

19.5.7 *Example 1(a)*

**Example 1(a) – Transfer to another account** To continue the offshore account in example 1:

<b>Date</b>		<b>Credit (Debit)</b>	<b>Balance</b>	<b>Category</b>	<b>Note</b>
	Balance b/f		£32, 000		
31 Aug	Overseas salary (net of tax)	£5,000		f	
31 Aug	UK salary	£10,000		a	
3 Sept	Transfer to UK a/c	(£5,000)			1
15 Sept	Cheque – XYZ Travel Services (CI) Ltd	(£10,000)			2
30 Sept	Overseas salary (net)	£50,000		f	
30 Sept	Overseas Dividend	£350,000		g	
30 Sept	UK salary	£180,000		a	
3 Oct	Transfer to UK a/c	(£5,000)			3
15 Oct	Transfer to Swiss a/c	(£350,000)			4

**Note 1**

Immediately before the transfer on 3 September the mixed fund contained:

Para (a)	Employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the 'earliest paragraph', that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed,

**Note 2**

The next payment from the account is £10,000 for the family holiday flights to the USA. The full payment is a remittance because the service provided is in the UK – the flights begin or end in London.

The transfer is regarded as coming from each of the paragraphs in order; that is £5,000 from para (a) and a taxable remittance consisting of £5,000 from para (f).

**Note 3**

Immediately before the remittance on 3 October the mixed fund contained:

Para (a)	Employment income	£180,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the 'earliest paragraph', that is para (a), so the £5,000 is UK employment income.

**Note 4**

The transfer of £350,000 to a new Swiss bank account is an offshore transfer. Immediately before the offshore transfer on 15 October the IoM bank account (mixed fund) is regarded as containing:

Para (a)	Employment income	£175,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	<u>£32,000</u>
		<u>£607,000</u>

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	Employment income	£100,906
Para (f)	Earnings subject to a foreign tax	£28,830
Para (g)	RFI	£201,812
Para (i)	Income or capital not within another para	£18,452

The Swiss bank account is another 'mixed fund', containing the income, gains and capital of the transferred amount. Assuming nothing else is added or taken away from the Swiss account in the interim, if in a couple of years time A decides to remit £120,000 to the UK from his Swiss bank account, the same ordering rules will apply to the Swiss fund, so the remittance is regarded as consisting of £100,906 from para (a) and £19,094 from para (f).

### 19.5.8 Example 2

The next example has another mix of offshore and onshore transfers.

**RDRM 35450** [Apr 2019]

**Example 2 (Lorraine)**

L, a remittance basis user, opens an offshore bank account in Bermuda into which is paid both UK source (taxed) income and her foreign income and gains. L makes a few transfers from this account to her UK account to meet UK living expenses. She also transfers money from this account to her other offshore account in Jersey, as well as using it for several offshore purchases.

**Account 1 Bermuda**

	Credit (Debit)	Balance	Category	Note
--	----------------	---------	----------	------

**Year 1**

15 Jan	Capital	£1,000,000	£1,000,000	(i)	1
30 Jan	UK salary	£10,000	£1,010,000	(a)	
30 Jan	Bank interest	£5,000	£1,015,000	(d)	
30 Jan	Overseas salary (net of tax)	£5,000	£1,020,000	(f)	
3 Feb	Transfer to UK a/c	(£5,000)	£1,015,000		2
28 Feb	Dividend	£2,000	£1,017,000	(g)	
28 Feb	UK salary	£10,000	£1,027,000	(a)	
28 Feb	Overseas salary	£5,000	£1,032,000	(f)	
3 Mar	Purchase of shares in foreign company	(£800,000)	£232,000		3
10 Mar	Transfer to UK a/c	(£5,000)	£227,000		4
31 Mar	UK salary	£10,000	£237,000	(a)	
31 Mar	Overseas salary (net of tax)	£5,000	£242,000	(f)	
2 Apr	Transfer to UK a/c	(£5,000)	£237,000		5
<b>Year 2</b>					
30 Apr	UK salary	£10,000	£247,000	(a)	
30 Apr	Overseas salary (net of tax)	£5,000	£252,000	(f)	
3 Mar	Transfer to UK a/c	(£5,000)	£247,000		6
15 Mar	Transfer to UK a/c	(£100,000)	£147,000		7
31 May	UK salary	£10,000	£157,000	(a)	
31 May	Overseas salary (net of tax)	£5,000	£162,000	(f)	
8 Jun	Transfer – A2Z travel services	(£20,000)	£142,000		8

**Year 1**

**Note 1**

The £1,000,000 credited to the account on 15 January was inherited under L’s great aunt’s will, and is “clean” capital.

**Note 2**

The £5,000 transfer to the UK on 3 May is a “remittance” from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Inherited capital	£1,000,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

**Note 3**

The purchase of shares on 3 March (£800,000) is an “offshore transfer”. By the end of the tax year the shares purchased have not been sold, brought to the UK or otherwise used so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of the following:

Para (a)	Employment income	£15,000
Para (d)	Relevant foreign income	£5,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	Relevant foreign income subject to tax	£2,000
Para (i)	Inherited capital	<u>£1,000,000</u>
		<u>£1,032,000</u>

The “offshore transfer” (the shares purchase) consists of an appropriate proportion (100/129) of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£11,628
Para (d)	RFI	£3,876
Para (f)	Earnings subject to a foreign tax	£7,752
Para (g)	RFI subject to tax	£1,550
Para (i)	Income or capital not within another para	<u>£775,194</u>
		<u>£800,000</u>

**Note 4**

The £5,000 transfer to the UK on 10 March is a “remittance” from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer the mixed fund consists of:

Para (a)	employment income	£3,372
Para (d)	RFI	£1,124
Para (f)	Earnings subject to a foreign tax	£2,248
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	<u>£224,806</u>
		<u>£232,000</u>

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), £3,372, para (d) £1,124 and para (f) £504. Of this amount, £1,124 and £504 are taxable remittances.

**Note 5**

The next remittance on 2 April is again £5,000. Two further amounts have been credited to the account which now consists of

Para (a)	employment income	£10,000
----------	-------------------	---------

Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

The account now consists of:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	<u>£224,806</u>
		<u>£237,000</u>

At the end of the tax year, L has made taxable remittances of: £1,628 (para (d) £1,124 and para (f) £504). She has also made two offshore transfers:

### Year 2

At the start of the next tax year, L continues to make remittances to the UK from the overseas account. The “mixed fund” rules mean that income gains and capital of a tax year are treated in priority to income gains and capital of a previous year.

### Note 6

The £5,000 transfer to the UK on 3 May is a “remittance” from a mixed fund within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

### Note 7

On 15 May, L transfers £100,000 to her UK bank account. This is a “remittance” from a mixed fund within section 809Q(1).

Applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000

So £10,000 of the transfer comes from these two paragraphs of Year 2 income. The outstanding balance of £90,000 must be identified by applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 1 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450

Para (i)	Income or capital not within another para	£224,806
So the remaining £90,000 of the transfer will be regarded as consisting of monies from para (a) £5,000, Para (f) £6,744, Para (g) £450 and Para (i) £77,806 from Year 1.		
The mixed fund now consists of:		
Para (i)	Income or capital not within another para	£147,000

## 19.6 Income/gains used to pay debt

Section 809R(3) ITA provides:

If a debt relating (wholly or in part, and directly or indirectly) to property<sup>28</sup> is at any time satisfied (wholly or in part) by—

- (a) an individual's income or capital for a tax year, or
- (b) anything deriving (directly or indirectly) from such income or capital,

from that time treat the property as consisting of or containing the income or capital if and to the extent that it is just and reasonable to do so.

I refer to this as the “**s.809R backward-tracing rule**”.

Suppose:

- (1) T borrows from L and receives “the borrowed money” outside the UK.
- (2) T uses RFI to repay the debt to L so T retains the borrowed money.

The debt is not a relevant debt, so its repayment is not a taxable remittance under the debt remittance rules.

In the absence of a statutory provision, one would not usually say that the borrowed money was derived from the RFI, or that the borrowed money consists of or contains the RFI.<sup>29</sup> However the debt relates to the

<sup>28</sup> The phrase “debt relating ... to property” is taken from the definition of relevant debt; for discussion, see 17.20 (Debt “related” to property (debt-related asset)).

<sup>29</sup> See 19.6 (Income/gains used to repay debt).

borrowed money. So applying the s.809R backward-tracing rule, the borrowed money is treated as consisting of or containing the RFI, so far as is just and reasonable.

When is that just and reasonable? It seems just and reasonable in principle, and clearly so in cases of avoidance.

If the debt is satisfied in part by RFI, and in part by clean capital, then it would be just and reasonable to regard the proportionate part of the borrowed money as derived from the RFI.

Cases where it is not just and reasonable to apply the s.809R(3) backward-tracing rule may include:

- (1) If the sums involved were small.
- (2) If it was not reasonably practical to make that tracing exercise (but the requirement in s.809R(3) that the debt must “relate” to the borrowed money is another route to the same destination).
- (3) If the borrowed money was received/brought/used in the UK. Then the debt would be a relevant debt and its repayment is a taxable remittance under the debt remittance rules (or under ordinary principles). The taxpayer cannot argue that s.809R(3) prevents a remittance under the debt remittance rules as that would not be just and reasonable.

The same analysis applies if:

- (1) T purchases a non-UK asset from L and left the purchase price outstanding as a debt.
- (2) T uses the RFI to repay the debt.

Applying the s.809R backward-tracing rule, the asset will be treated as consisting of or containing the RFI so far as just and reasonable.

It is curious that the s.809R backward-tracing rule has been made a part of the mixed fund rules, and does not apply more generally.

### 19.6.1 Backward tracing: example

The RDR Manual gives an example involving repayment of a loan (not a relevant loan) from a mixed fund.

**RDRM35470** [Jan 2019]

**Example (Frankie)**

... F, a remittance basis user, has a bank account in Jersey into which is paid both UK source (taxed) income and foreign income and gains.

F makes transfers from the Jersey account to his UK account to meet his UK living expenses.

On 28 May, F acquires a loan from his Jersey bank that he uses to purchase an asset in Jersey for £200,000. He repays the loan from this account.

		<b>Credit (Debit)</b>	<b>Balance</b>	<b>Category</b>	<b>Note</b>
6 Apr	Clean capital	£80,000	£80,000	(i)	
15 Apr	RFI NFT	£10,000	£90,000	(d)	
30 Apr	UK salary	£10,000	£100,000	(a)	
30 Apr	RFI interest	£5,000	£105,000	(d)	
30 Apr	RFE NFT	£5,000	£110,000	(b)	
3 May	Transfer to UK a/c	(£5,000)	£105,000		1
15 May	RFI	£2,000	£107,000	(d)	
31 May	UK salary	£10,000	£117,000	(a)	
31 May	Overseas salary	£5,000	£122,000	(b)	
3 Jun	Transfer to UK a/c	(£5,000)	£117,000		2
28 Jun	loan repayment	(£15,000)	£102,000		3 & 4
30 Jun	UK salary	£10,000	£112,000	(a)	
30 Jun	Overseas salary	£5,000	£117,000	(b)	
3 Jul	Transfer to UK a/c	(£5,000)	£112,000		5
28 Jul	loan repayment	(£15,000)	£97,000		6
31 Jul	UK salary	£10,000	£107,000	(a)	
31 Jul	Overseas salary	£5,000	£109,000	(b)	
3 Aug	Transfer to UK a/c	(£5,000)	£102,000		7
15 Aug	Cheque – ZZZ Cars	(£25,000)	£77,000		8
28 Aug	loan repayment	(£15,000)	£62,000		9
31 Aug	Overseas salary	£5,000	£67,000	(b)	
31 Aug	UK salary	£10,000	£72,000	(a)	
3 Sep	Transfer to UK a/c	(£5,000)	£67,000		10

The first two transfers are straightforward:

**Notes 1 & 2: £5k UK remittances**

Using the ordering rules at ITA07/s809Q, the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the “earliest paragraph” of income or

gains within the mixed fund.

The remittance on 3 June is also matched against the UK salary from that tax year credited to the account before that date.

We now turn to the point of the example:

**Note 3**

The £200,000 used to pay for the assets is borrowed capital and is not in itself a remittance or an offshore transfer.

This is correct. The payment of £200k is not an offshore transfer (as defined) because the £200k is not mixed into the mixed fund.<sup>30</sup>

If the £200k had been paid into the account (and withdrawn from there to purchase the asset) the analysis would have been different.

However, subsequent payments of interest and capital used to repay the loan are offshore transfers.

**Note 4: £15k loan repayment**

At the time immediately before the first repayment of the debt occurs on 28 June, the mixed fund is composed as follows:

Clean capital	£80,000
UK salary	£10,000 <sup>31</sup>
Relevant foreign earnings	£10,000
Relevant foreign income	<u>£17,000</u>
	<u><u>£117,000</u></u>

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£10,256
UK salary	£1,282
Relevant foreign earnings	£1,282
Relevant foreign income	<u>£2,180</u>
	<u><u>£15,000</u></u>

The property acquired by F using the loan is now regarded as containing this income. ...

The next remittance is straightforward:

<sup>30</sup> See 19.5.2 (“Offshore” transfer).

<sup>31</sup> Although £20,000 of F’s UK salary has been credited to the account, £10,000 has already been remitted prior to 28 June (see Notes 1 and 2).

**Note 5: £5k UK remittance**

The next remittance on 3 July is again £5,000 that is matched against the UK salary credited to the account before that date.

Now comes the second loan repayment:

**Note 6: £15k loan repayment**

At the time immediately before the repayment on 28 July, the “mixed fund” is composed as follows:

Clean capital	£69,744
UK salary	£13,718
Relevant foreign earnings	£13,718
Relevant foreign income	<u>£14,820</u>
	<u>£112,000</u>

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£9,339
UK salary	£1,838
Relevant foreign earnings	£1,838
Relevant foreign income	<u>£1,985</u>
	<u>£15,000</u>

The property acquired by F is now regarded as containing this income.

Next come two straightforward onshore transfers:

**Note 7 and 8: £5k UK remittance & £25k UK remittance**

A further £5,000 remittance on 3 August is again matched against UK salary.

The payment of £25,000 to ZZZ Cars is to buy a car and is a taxable remittance. Immediately before the transfer the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£16,880
Relevant foreign earnings	£16,880
Relevant foreign income	<u>£12,835</u>
	<u>£107,000</u>

This £25,000 remittance is matched firstly against UK salary (£16,880), then against relevant foreign earnings (£8,120).

Next another loan repayment:

**Note 9: £15k loan repayment**

At the time immediately before the repayment on 28 August, the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£nil
Relevant foreign earnings	£8,760
Relevant foreign income	<u>£12,835</u>
	<u>£82,000</u>

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£11,049
Relevant foreign earnings	£1,603
Relevant foreign income	<u>£2,348</u>
	<u>£15,000</u>

**Note 10: £5k UK remittance**

The fifth remittance on 3 September is again £5,000 that is matched against the UK salary from that tax year credited to the account before that date.

The account now contains £77,000, being

Clean capital	£49,356
UK salary	£5,000
Relevant foreign earnings	£12,157
Relevant Foreign Income	£10,487

For the purposes of this example, assume that on 8 September F wins the Jersey local lottery (“clean capital”) and uses his winnings to pay off the outstanding loan.<sup>32</sup>

Three years later, F brings the property acquired with the loan to the UK. The property is a mixed fund, and it is regarded as containing the income and capital used to pay off the loan, that is:

UK salary	£3,120
Relevant foreign earnings	£4,723
Relevant foreign income	£6,513
Clean capital	<u>£185,644</u>
Total	<u>£200,000</u>

---

32 The author does not consider the remittance issues of bets; see 17.16.18 (Betting).

F has remitted foreign income of £4,723 + £6,513 = £11,236.

The moral which follows from this example is the imperative of not mixing funds of different types of income or gains, so far as possible.

### 19.7 Fund with different types of RFI

Suppose a person holds in one mixed fund two different types of RFI, both subject to foreign tax, but one subject to a higher rate of foreign tax than the other. It matters which type of income is remitted, because one type qualifies for more foreign tax credit relief than the other.

The ITA mixed fund rules give no guidance because both fall into the same mixed fund category. It is considered that the *Duke of Roxburghe*<sup>33</sup> approach applies. A remittance from this mixed fund should be regarded as made first out of the income which qualifies for more UK double tax relief.

However, it would be better practice (if practical) to pay the two types of income into separate accounts. Then this issue does not arise and a remittance from the appropriate account can easily be identified as one type of income or the other.

### 19.8 Mixed fund held by 3<sup>rd</sup> party

So far we have considered the mixed fund rules where an individual transfers from a mixed fund containing their own income or gains. The position is more complex when another person is involved. This may arise in many different ways.

#### 19.8.1 s.3 gains

Suppose:

- (1) A gain accrues to non-resident company within s.3 TCGA, so that a s.3 gain accrues to an individual participator, taxable on the s.3 remittance basis.
- (2) That gain forms part of a mixed fund (ie the gain is mixed with other funds of the company).

There is a taxable remittance if the company remits its gain to the UK. If

---

33 20 TC 711.

part of the mixed fund is remitted to the UK, it is considered that the mixed fund rules apply to determine whether the part remitted is the participator's gain. Section 809Q(3) ITA provides: "The extent to which the transfer is of *the individual's income or chargeable gains* is to be determined as follows." Similarly, step 1 of s.809Q(3) requires one to find the income or gains of *the individual*. However the gains in the company are treated as derived from the s.3 gains of the individual.<sup>34</sup> So applying s.809R(2) ITA the funds of the company are treated as containing those gains.<sup>35</sup>

### 19.8.2 s.720 income

Suppose:

- (1) Income arises to a person abroad within s.720, so that s.720 income arises to an individual transferor, taxable on the s.720 remittance basis.
- (2) That income forms part of a mixed fund (ie the income is mixed with other funds of the person abroad).

There is a taxable remittance if the person abroad remits its income to the UK. If part of the fund is remitted to the UK, it is suggested that the mixed fund rules apply to determine whether the part remitted is the transferor's income. The reasoning is the same as for a non-resident company. The funds held by the person abroad are treated as derived from the s.720 income of the individual.<sup>36</sup> So applying s.809R(2) ITA the funds of the person abroad are treated as containing that income.<sup>37</sup>

This view may favour the taxpayer. Suppose:

- (1) A company within s.720/731
- (2) An individual is subject to tax by reference to the company income under the s.720/731 remittance basis.
- (3) The company holds a mixed fund consisting of:

<b>Item</b>	<b>amount</b>	<b>Mixed fund category</b>
-------------	---------------	----------------------------

---

34 See 60.24 (Section 3 remittance basis).

35 See 19.3.8 (Derived property).

36 See 46.20 (s.720 remittance basis).

37 See 19.3.8 (Derived property).

Income of year 1	£100	(d), (g) or (i) <sup>38</sup>
Gain of year 2	<u>£100</u>	(e) or (h)
	<u>£200</u>	

(4) In year 3, the company remits £100 to the UK in year 2.

The sum remitted is regarded as the gain, so:

- (1) For the purpose of the s.720/s.731 remittance basis, the income is not remitted.
- (2) If s.3 applies,<sup>39</sup> the remittance gives rise to a charge on the s.3 gain under the s.3 remittance basis.

### 19.8.3 *Settlor-interested trust income*

Suppose:

- (1) Income arises to a settlor-interested trust within s.624, so that the trust income arises to the settlor, taxable on the s.624 remittance basis.
- (2) That income forms part of a mixed fund (ie the income is mixed with other funds of the trustees).

There is a taxable remittance if the trustees remit the income to the UK. If part of the mixed fund is remitted to the UK, it is suggested that the mixed fund rules apply to determine whether the part remitted is the settlor's income. The funds in the hands of the trustees are, or are derived from, the s.624 income.<sup>40</sup> So applying s.809R(2) ITA the funds in the hands of the third party are treated as containing that income.<sup>41</sup>

### 19.8.4 *Income/gains of partnership*

Suppose:

- (1) Income/gains accrue to a partnership, and a partner is taxable on the remittance basis.
- (2) The income/gain forms part of a mixed fund (ie the gain is mixed with

38 In this example it does not matter which category the income falls in; as the year 2 item will be remitted before year 1 items.

39 In short, if the individual owns the company directly, ie the company is not held in a trust; and assuming the s.3 motive and other defences do not apply.

40 In this case (unlike the s.3/s.720 cases) there is no statutory rule to treat the trustees funds as derived from the settlor's s.624 income, but none is needed.

41 See 19.3.8 (Derived property).

other funds of the partnership).

(3) The partnership distributes part of the fund to the partner.

The distribution is from a mixed fund, and it is suggested that the mixed fund rules apply to determine whether the part remitted is the partner's income/gain. The funds in the hands of the trustees are or are derived from the partnership income/gains.<sup>42</sup> So applying s.809R(2) ITA the funds in the hands of the third party are treated as containing that income.<sup>43</sup>

In relation to large investment partnerships, the mixed fund rules are not workable, and it is suggested that investor/partners have no option but to accept that a partnership distribution consists of income or capital in accordance with the information given to them by the partnership at the time of the distribution.

#### 19.8.5 *Gift to relevant person*

Suppose:

- (1) An individual makes a gift of an asset to a relevant person ("R"), on which a deemed gain arises.
- (2) The asset is treated as derived from that gain and there is a taxable remittance if R remits the asset to the UK.

The asset forms part of a mixed fund (ie the asset is mixed with other funds of R). If R remits part of the mixed fund to the UK, do the mixed fund rules apply to determine whether the part remitted is T's income or gains?

The question matters for T, but it also matters for R, if R is a remittance basis taxpayer. Suppose R and the individual ("T") are UK resident.

Similarly, suppose:

- (1) T gives income, say, RFI, ("T's income") to R.
- (2) R mixes T's income with gains of R (accruing in the same year).
- (3) R remits part of the mixed fund.

Has R remitted T's income or R's gains? It is in R's interest to argue that R has remitted T's income, and in T's interest to argue that R has remitted R's gains.

<sup>42</sup> In this case (unlike the s.3/s.720 cases) there is no statutory rule to treat the partnership funds as derived from the settlor's income/gains, but none is needed.

<sup>43</sup> See 19.3.8 (Derived property).

One must categorise R's mixed fund into the mixed fund categories. The part derived from T's income seems to fall into two categories: it is both RFI of T (within category (d)) but it is also capital of R. However it does not fall within the final category (i) since that refers to capital *not within another paragraph of this subsection*. So this item is treated as income within category (d). It is considered that R has remitted T's income first.

This rule normally works in favour of HMRC, but if T is not UK resident at the time of the remittance, it may work in favour of R.

A similar problem arises in the case of a joint account, as the income of joint account holders is held in a mixed fund; see 90.6 (Remittance from joint account).

### 19.8.6 Gift to non-relevant person

Suppose:

- (1) Income/gains accrue to an individual ("T")
- (2) The individual gives the income/gains to a non-relevant person ("donee").

The common example will be a gift of pre-2008 income/gains to a trust. The donee trustees are not a relevant person in relation to those income/gains. But there will be a taxable remittance if T receives the income/gains. What if the income/gains form part of a mixed fund held by the trustees? It is suggested that the mixed fund rules apply.

## 19.9 Unremitted income given to trust

Suppose:

- (1) A remittance basis taxpayer ("S") receives foreign income<sup>44</sup> ("the old income") which is not remitted to the UK and so not taxed.
- (2) S transfers the old income to a non-resident trust.
- (3) The trustees invest and realise gains ("trust gains") in a subsequent tax year. For simplicity, assume that no income arises to the trustees, or any income which arises to them is segregated and paid out to S.
- (4) The trustees make a distribution to S which is received in the UK.

If the distribution is an income receipt of S, it is taxed as an Annual

---

44 Some similar points would apply for gains.

Payment on ordinary principles;<sup>45</sup> that does not count as a taxable remittance of the old income as the receipt of new income should not be regarded as derived from the old income.<sup>46</sup> It may not matter whether the distribution is taxed under either way, so long as it is not taxed on both, but it might matter eg if the old income was dividend income, as the rate of tax is different for Annual Payments.

Suppose the distribution is a capital receipt of S. This raises the question of the interaction of:

- (1) the ITA remittance basis charge on the old income and
- (2) s.87 charge which arises if S receives a capital payment.

The first question is whether the distribution is derived from the old income. One applies the mixed fund tracing rules. If the payment is out of a mixed fund holding the old income and the capital gains, the capital gains are treated as distributed first, as they are gains of a later year. So if the distribution is less than the gains in the mixed fund, the distribution is not the old income. The distribution is a capital payment, matched to the trust gain, and subject to CGT under s.87. If the distribution exceeds the gains in the mixed fund, it is partly derived from the old income and the old income comes into charge. It is considered that a distribution derived from the old income received in the UK is not a capital payment.<sup>47</sup>

The application of the rules becomes very intricate. Take the following (simplified) example:

S has £900 of old income arising before year 1 (“S’s old income”). S transfers this to a non-resident trust. The trust gains and distributions are as follows:

Year	Gift to trust	Trust Gains	Distribution	Total Fund
0	£900			£900
1		£100	nil	£1,000
2		nil	£200 to W	£800
3		£200	nil	£1,000
4		nil	£400 to S	£600

Assume the distributions are received in the UK and that S and W are UK

45 See 38.3 (Tier 3: Discretionary payment: charge).

46 See 17.16.15 (Income from income/gains).

47 See 57.7.4 (Chargeable to IT).

resident. (If received outside the UK and (un)taxed on the remittance basis then no difficulty arises.)

For simplicity, I ignore the trust's CGT annual exemption.

The tax analysis is as follows:

*Year 2*

The tax analysis of £200 distribution to W in year 2 is (relatively) straightforward. The £200 distribution to W in year 2 does not constitute a taxable remittance of the old income, for IT purposes, because remittance condition A in s.809L is not satisfied. Assume W is not a relevant person.<sup>48</sup>

The £200 distribution is a capital payment which is matched with the £100 trust gain. W is therefore treated as receiving s.87 gains of £100. The remaining £100 of the £200 distribution is unmatched in year 1, and carried forward. We need not consider the mixed fund rules at this point.

*Year 3*

The remaining £100 of the £200 distribution which was unmatched in year 2 is matched to the trust gain in year 3. W is treated as receiving a s.87 gain of £100 in year 3. The remaining trust gain of £100 is unmatched in year 3 and carried forward to be matched to future capital payments.

*Year 4*

The tax analysis of the £400 payment to S in year 4 is more complicated.

First, to what extent is the payment derived from S's old income? For IT purposes, what were the constituents of the fund from which the payment was made, immediately before the £400 payment to S? Here we do need to consider the mixed fund rules.

The trustees made a transfer of £200 to W of out a mixed fund:

S's old income but the trustees capital	£900
gain of year 1	<u>£100</u>
total	<u>£1,000</u>

That is an offshore transfer (as defined) since s.809Q does not apply to it; see s.809R(5) and s.8090Q(1). So the transfer consisted of:

one fifth of the capital	<u>£180</u>
--------------------------	-------------

---

<sup>48</sup> If S's old income is pre-2008 income, W could be the wife of S, as (for pre-2008 income) a relative is not a relevant person.

one fifth of the gain	£20
total	<u>£200</u>

So the trustees fund before the £400 transfer in year 4 consisted of:

S's old income but the trustees capital	£720
gain of year 1	£80
gain of year 3	<u>£200</u>
total	<u>£1,000</u>

Applying the mixed fund rule, the £400 payment to S consists of the gains before the old income (because they are gains of a later year) so it consists of:

gain of year 1	£80
gain of year 3	£200
S's old income but the trustees capital	<u>£120</u>
total	<u>£400</u>

£280 of the capital distribution is not derived from the old income.

Of that sum, £100 is matched to the outstanding trust gains, and the balance (£180) is carried forward to be matched against future trust gains.

£120 of the payment is matched to S's old income and is subject to income tax as remitted income. That is not a capital payment.<sup>49</sup>

## 19.10 Mixed-fund TAAR

Section 809S contains a rule which I call the “**mixed-fund TAAR**”.

### 19.10.1 *Conditions of TAAR*

Section 809S(1) ITA provides:

This section applies if, by reason of an arrangement the main purpose (or one of the main purposes) of which is to secure an income tax advantage or capital gains tax advantage, a mixed fund would otherwise<sup>50</sup> be regarded as containing income or capital within any of paras (f) to (i) of section 809Q(4).

<sup>49</sup> See 57.7.4 (Chargeable to IT).

<sup>50</sup> The meaning must that in the absence of the arrangement, a mixed fund would contain income or capital within those categories; or else, in the absence of the TAAR; but perhaps it does not matter.

There are strictly four requirements or conditions here.

- (1) An arrangement.<sup>51</sup> But this term is so wide that point (1) is not so much a requirement as a convenient definition for use in conditions (2) and (4). One cannot identify purpose, or results, until one can identify the arrangement.
- (2) The arrangement has the purpose of securing an IT /CGT advantage. These terms have the standard (wide) definitions.<sup>52</sup>
- (3) A mixed fund would otherwise be regarded as containing income or capital within mixed fund categories (f) to (i).
- (4) That state of affairs is by reason of the arrangement.

The third requirement is that a mixed fund contains (or would contain) income or capital within mixed fund categories (f) to (i). So if a mixed fund consisted of (say) RFI within category (d) and chargeable gains within category (e), the mixed-fund TAAR does not apply. This is a little surprising and it might be that s.809S(4) contains a typographical error, (f) being a slip for (a). But it is not obvious that there has been an error, as there is rather more scope for manipulation of the rules in a mixed account which contains categories (f) to (i). So a court should construe the section to mean what it says. In practice the point is not important, as a mixed fund will usually contain some item within categories (f) to (i).

### 19.10.2 *Application of TAAR*

Section 809S(2) ITA provides:

Treat the mixed fund as containing so much (if any) of the income or capital as is just and reasonable.

Section 809S is primarily intended to override the offshore mixed fund transfer rule, although this is not expressly stated.<sup>53</sup>

Suppose:

- (1) T has an account (“account 1”) with a mixed fund containing £2m,

---

51 Section 809S(3) ITA provides the standard (unnecessary) IT definition: see App 2.2.3 (Definitions of “arrangement”).

52 Section 809S provides the standard definitions of IT/CGT advantage: see 2.12.1 (Tax advantage: Definitions).

53 The mixed-fund TAAR could also override the *onsshore* transfer mixed fund rule, but it is not likely ever to be just and reasonable to substitute any other set of rules.

50% income and 50% capital.

- (2) T transfers £1m (half the total amount) to another account (“account 2”) (an offshore transfer). T intends to keep that amount offshore.
- (3) T then remits the funds in account 1 to the UK.

Applying the offshore transfer mixed fund rule the first account, which is remitted, consists of 50% income and capital, so on remittance 50% of the sum received is tax free. In the absence of the offshore transfer, the whole of the £1m remitted would have been subject to income tax.

The offshore transfer is an arrangement which secures an IT advantage. Assuming this was a main purpose, the conditions for the application of the mixed-fund TAAR are satisfied.

One then has to ask what is “just and reasonable”. The drafter has given up here and left the courts to sort it out.<sup>54</sup> One might say that it is reasonable to apply the pre-2008 mixed fund rules. That can hardly be described as unjust or unreasonable. But it is considered that the expression “just and reasonable” should be construed in the context of the onshore transfer mixed fund rule. So the arrangement should be disregarded: it would be just and reasonable to raise tax as if the offshore transfer from the first account had not been made. To put it another way, it is just and reasonable that transfers whose main purpose is to obtain a tax advantage should not do so.

If that were wrong, what would happen if there were a second transfer from the first account: in this way one could reduce the income element of any mixed fund to a relatively small sum by a series of offshore transfers.

### 19.11 Cleansing mixed funds

This relief was first announced in “Reforms to the taxation of non-domiciles: further consultation” (“**the 2016 consultation paper**”)<sup>55</sup> but this paper is now of historical interest only.

---

54 CIOT express the point more strongly in Response to consultation paper “Reform of the taxation of non-domiciled individuals”: “Section 809S is so widely drawn as to be almost meaningless.” But TAAR drafting which was noteworthy for vagueness in 2008 has become standard, and no longer excites comment.

55 <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles-further-consultation> (August 2016).

There are two reliefs:

- (1) Para 44: this is available to all mixed funds
- (2) Para 45: this applies where a mixed fund includes pre- 2008 items

Cleansing is not an apt term for these reliefs, but it is a convenient shorthand, and it is difficult to think of a better one.

HMRC have issued guidance which I call

- (1) **“2017 cleansing guidance”**<sup>56</sup>
- (2) **“2018 cleansing guidance”**<sup>57</sup>

The professional bodies have published a set of Q&As with HMRC replies (**“Cleansing Q&As”**).<sup>58</sup> The edition history is:

Version	Date	ICAEW label
1		
2	October 2018	Taxguide 05/18
3	March 2019	Taxguide 02/19

### 19.11.1 *Outline of cleansing relief*

The 2016 consultation paper provides:

The government recognises that the mixed fund rules can (!) be complicated, and that these reforms will mean that those non-doms who become deemed-domiciled in April 2017 who were taxed on the remittance basis will have to pay tax in the UK on their offshore income and gains on an arising basis for the first time. It will also mean that an individual with a mixed fund will find it difficult to bring any money from the fund into the UK without paying tax at their top rate of tax

---

56 HMRC, “Cleansing of Mixed Funds” (April 2017) accessible [https://www.step.org/sites/default/files/Comms/Cleansing\\_of\\_Mixed\\_Funds\\_v5.0.docx](https://www.step.org/sites/default/files/Comms/Cleansing_of_Mixed_Funds_v5.0.docx)

The 2017 guidance was issued when the legislation was still in draft, and needs to be read subject to the subsequently introduced para 45 relief; but it contains useful comments which are not in the 2018 guidance.

57 HMRC, “Cleansing mixed funds” (January 2018) <https://www.gov.uk/guidance/cleansing-mixed-funds>

58 The full title is “Cleansing of Mixed Funds - Professional Bodies Q&As”. See <https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-02-19--cleansing-of-mixed-funds.ashx> or <https://www.tax.org.uk/policy-technical/submissions/finance-no-2-act-2017-taxation-non-uk-domiciliaries>

when they do so. For some, this will be a punitive outcome, as the fund will be comprised of a mix of both foreign income which would be taxable at the highest rate of tax as well as money that would be taxable at a lower rate; for example, foreign gains which would be taxed at a top rate of 28% or clean capital, which would not be taxable at all even when remitted.

The government has therefore decided to introduce a temporary window in which such individuals will be able to rearrange their mixed funds overseas to enable them to separate those funds into their constituent parts. This window will last for one tax year [later extended to two tax years] from April 2017 and it will provide certainty (!) on how amounts remitted to the UK will be taxed.

During this time, non-doms with mixed funds will be able to rearrange their mixed funds and separate out the different parts. This will mean, for instance, that they will be able to move their clean capital, foreign income and foreign gains into separate accounts, and will then be able to remit from their accounts as they wish and pay the appropriate amount of tax. There will be no requirement for the non-dom to make a remittance from their newly segregated accounts in any particular order or within any particular time limit. This will mean that an individual who separates their mixed funds may, if they wish, remit funds from each separated fund, even if that remittance takes place in a later tax year after the transitional period has ended.

The special treatment will only apply to mixed funds which consist of amounts deposited in bank and similar accounts. Where the mixed fund takes the form of an asset (for example a valuable painting), it will not qualify for the special treatment. However, an individual will be able to sell any overseas asset during the transitional window and separate the sale proceeds in the same way as any other money.

Cleansing will not be available where an individual is unable to determine the component parts of their mixed fund. The mixed fund rules have always required a remittance basis user to track and monitor their offshore funds in order to benefit from the remittance basis, and while the government is willing to introduce a transitional rule to help people to separate their funds, this will not extend to those who are unable to identify the source of those funds.

This treatment will be available to any non-dom who was not born in the UK with a UK domicile of origin – it will not be restricted only to individuals who have been resident for 15 of the past 20 years who will become deemed-domiciled under the new rules.

An individual need not be resident in the UK in April 2017 to be able to use this protection, but it will only be of any benefit to those individuals who have been UK resident at some point in time and who have used the remittance basis of taxation.

## 19.12 Para 44 cleansing relief

### 19.12.1 *Para 44 cleansing relief: scope*

Para 44(1) sch 8 F(no.2) A 2017 provides:

This paragraph applies for the purposes of the application of section 809Q(3) of ITA 2007 in relation to an individual (“P”).

Cleansing relief only applies in relation to an individual, but it can apply to mixed funds of trusts or companies, where they hold income within s.624 or s.720, as that is deemed to be, or to be derived from, the income of an individual. Likewise for s.3 gains of a company so far as they are attributed to an individual who is a participator.

### 19.12.2 *Cleansing relief conditions*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where-

Seven<sup>59</sup> conditions then follow which I call “**para 44 cleansing conditions**”.

### 19.12.3 *Condition (a): Date of transfer*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where-

- (a) the transfer is made in the tax year 2017-18 or the tax year 2018-19

Cleansing (unlike 2017 rebasing) was a short term transitional relief. The transfer must be made in 2017/18 or 2018/19, and the relief stopped on 5 April 2019. But it remains necessary to understand the relief in order to

---

59 They are numbered semi-numerically (a) - (f), but para (c) contains two conditions.

analyse mixed funds going forward.

#### 19.12.4 *Condition (b): Money*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...

(b) the transfer is a transfer of money

“Money” in its normal sense includes foreign currency<sup>60</sup> but not cryptoassets (such as bitcoin).<sup>61</sup>

HMRC say:

Bitcoins are not considered to be legal tender and therefore not recognised as money.<sup>62</sup>

#### 19.12.5 *Cond. (c): Inter-account transfer*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...

(c) the mixed fund from which the transfer is made is an account (account A) and the transfer is made to another account (account B)

What constitutes a separate account? See 19.2.2 (Identifying the fund).

#### 19.12.6 *Condition (d): Nomination*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...

(d) the transfer is nominated by P for the purposes of this subparagraph

2018 Cleansing Guidance provides:

---

60 See Proctor, *Mann on the Legal Aspect of Money* (7th ed, 2012), para 1.86.

61 See 97.35.1 (What cryptoassets are).

62 Charity Tax Forum Action Point Log

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/440570/Action\\_Point\\_Log\\_29\\_May\\_2015.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/440570/Action_Point_Log_29_May_2015.pdf)

You must ... make the nomination between 6 April 2017 to 5 April 2019

But that is plainly wrong. The legislation specifies a time limit for the making the transfer, but not for making the nomination, and there is no reason to imply one. However until a nomination is made, the relief will not apply; and a return would be made on that basis; if the nomination is made after the return is submitted, the return would need to be amended, and once the time limits for amendment have passed, it is too late to amend.<sup>63</sup>

2017 Cleansing Guidance provides:

There is no formal nomination process, but records of all nominations must be retained.<sup>64</sup>

Nomination may even be oral, but in practice a short written memorandum is appropriate, such as:

I nominate the transfer made [date] of [amount] from [account A] to [account B] for the purposes of para [44(2)(d)]<sup>65</sup> sch 8 F(no.2)A 2017.<sup>66</sup>

The memorandum should be kept on file. There is no formal claim or election, but the nomination requirement amounts to a claims procedure as it effectively makes the relief optional.

#### 19.12.7 *Cond.(d): 1 nominated transfer*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...

(e) at the time of the nomination no other transfer from account A to account B has been so nominated

2017 Cleansing Guidance provides:

---

63 The position here is similar to a Gift Aid declaration; see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (14<sup>th</sup> ed, 2019/20), para 15.50 (Gift Aid declaration).

64 The guidance subsequently refers to s.12B TMA.

65 For para 45 cleansing relief say: para 45(1)(e).

66 The memorandum also needs to specify income/gains: see 19.12.10 (Specifying income/capital).

Such a nomination can only be made once with respect to any one mixed fund account. All the nominated amounts from the mixed fund account must be transferred to the receiving account(s) at the same time.

Transfers to the same account at different times in principle constitute 2 distinct transfers, which is not allowed. But:

If an individual gives instruction to their bank to make a transfer, say on a Monday, but the transfer, or part of the transfer, is not effected until Tuesday due to the bank's internal processes and through no fault of the individual, the transfer will be acceptable for cleansing purposes. All transfer instructions to the bank should be retained by the individual.

More than one transfer can qualify for cleansing, but each transfer must be to a separate account. It is difficult to see the point of that.

2017 Cleansing Guidance provides:

It is not necessary to cleanse all overseas mixed fund accounts at the same time, so long as each account is cleansed within the 2-year window, ending 5 April 2019.

Nor is it necessary to completely empty the original mixed fund account, though once a nominated transfer from an account has happened it cannot be nominated again.

#### 19.12.8 (f): *Qualifying individual*

Para 44 sch 8 F(no.2) A 2017 provides:

(2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...

(f) P is a qualifying individual.

Qualifying individual is a label for a set of rules (note that the rules are not the same as for the definition of qualifying individual for 2017 rebasing relief).

Para 44 provides:

(3) P is a qualifying individual if-

(a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applied in relation to P for any tax year before the tax year 2017-18

P must be a remittance basis taxpayer for at least one of the years 2008/9

to 2016/17. That will generally require a remittance basis claim, but for shorter term residents, it need not involve payment of the remittance basis charge.

Para 44 provides:

- (3) P is a qualifying individual if ...
  - (b) P is not an individual who-
    - (i) was born in the UK, and
    - (ii) whose domicile of origin was in the UK.

Formerly-domiciled individuals are, as usual, excluded from relief.

### 19.12.9 *Effect of para 44 cleansing*

Assuming the para 44 cleansing conditions are met, we move on to the rule. Para 44(2) sch 8 F(no.2) A 2017 provides:

Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund<sup>67</sup> where [the cleansing application conditions are satisfied]

Having disapplied 809R(4), para 44(4) lays out a different rule:

An offshore transfer to which sub-paragraph (2) applies is to be treated as containing such amount of such kind or kinds of income and capital in the mixed fund immediately before the transfer as may be specified in the nomination under sub-paragraph (2)(d).

Para 44 relief applies only if the transfer from the mixed fund is an offshore transfer. If it is an onshore transfer, the relief does not apply.

### 19.12.10 *Specifying income/capital*

The nomination needs to specify the “amount [or amounts<sup>68</sup>] of such kind or kinds of income and capital in the mixed fund immediately before the transfer;” and these will in principle be the amounts taken to be transferred by the transfer.

The kinds of income and capital which can be specified clearly include the 9 kinds specified in the mixed fund categories, but may be more

---

<sup>67</sup> Para 44(6) applies the standard definitions: “In this paragraph “mixed fund” and “offshore transfer” have the same meanings as in section 809R(4) of ITA 2007.”

<sup>68</sup> The singular “amount” clearly includes the plural.

detailed, for instance, one may specify:

- (1) a type of RFI which has DT relief at a higher rate.
- (2) income/capital of a particular year.

It is not essential to specify any amount at all (the statute refers to “such amount as *may* be specified in the nomination) but in the absence of a specification the usual offshore transfer rules will apply to the transfer.

“Specified” means unambiguously identified or made clear.<sup>69</sup> It is not strictly necessary to specify a number, but it is doubtful whether “such amount of RFI as is in the account” is sufficiently clear.

### 19.12.11 *Under-nomination*

The amount(s) specified may be less than the sum transferred. Eg one may transfer £100 and specify £50 as RFI. In that case the usual offshore transfer rules apply to the amount which is not specified.

HMRC agree. Cleansing Q&As Question 6 provides:

... Please confirm that cleansing transaction(s) and nomination(s) are valid where there have been under nominations and the original mixed fund account remains mixed when all the transfers have taken place?

**Suggested answer**

In such circumstances the cleansing transaction(s) and nomination(s) will be valid.

There is nothing in the legislation that states that for the cleansing transactions to be valid the original mixed fund account must be fully cleansed such that after the cleansing transactions it is no longer a mixed account.

**Example**

An individual has a mixed fund offshore account (account C). The individual knows that the account was opened initially with £10 million of clean capital but is not sure about other receipts. The mixed fund analysis is, therefore, carried out on the basis that all the other receipts are Remittance Basis income with no foreign tax credit. Having carried out the analysis on this basis there is £7.8 million of clean capital as at 29 July 2018. To be cautious £7.5 million is transferred out to newly established offshore account D and the appropriate nomination made for

---

<sup>69</sup> That is the ordinary meaning, and was adopted in another context in *Re Green* [1985] 3 All ER 455 at p.460.

the clean capital (ITA 2007, s 809Q(4)(i)). The remaining contents of account C are unknown. This is not an issue.

**Example**

An individual has a mixed fund account (account C) and analysis breaks it down as:

- £1.2 million Remittance Basis relevant foreign income not subject to a foreign tax;
- £2.7 million Remittance Basis foreign gains not subject to a foreign tax; and
- £3.3 million clean capital (inheritances and gifts).

All funds arising after 5 April 2008.

... Three new accounts are opened (accounts B, C and D) and the following cleansing transfers and nominations are made in 2018/19:

- £1 million to account D - a nominated transfer for the purposes of Finance (No 2) Act 2017, sch 7, part 4, para 44(2) with the £1 million transferred to account D representing income within ITA 2007, s 809Q(4)(d) (that is relevant foreign income other than income within paragraph (g)).
- £2.5 million to account E - a nominated transfer for the purposes of Finance (No 2) Act 2017, sch 7, part 4, para 44(2) with the £2.5 million transferred to account E representing gains within ITA 2007, s 809Q(4)(e) (that is foreign gains other than gains within paragraph (h)).
- £3 million to account F - a nominated transfer for the purposes of Finance (No 2) Act 2017, sch 7, part 4, para 44(2) with the £3 million transferred to account F representing income within ITA 2007, s 809Q(4)(i).

The three nominations are valid. Account C remains mixed containing (in accordance with the analysis):

- £200K of relevant foreign income not subject to a foreign tax;
- £200K foreign gains not subject to a foreign tax; and
- £300K clean capital (inheritances and gifts).

HMRC say: HMRC has no problem with this response.

### 19.12.12 *Over-nomination*

Para 44(5) sch 8 F(no.2) A 2017 provides:

An amount of a kind of income or capital specified under sub-paragraph (4) may not exceed the amount of that kind which is in the mixed fund immediately before the transfer.

What if one specifies an amount of income/capital which exceeds the amount in the mixed fund? It is considered that the specification should be valid up to the actual amount of income/capital. But HMRC do not agree. 2018 Cleansing Guidance provides:

If nominated transfers exceed the amount of that kind of income held in the mixed fund account immediately before the transfer then the normal mixed fund rules will apply. Such a nomination would be invalid

If that is right, another nomination could be made. In the meantime, the Guidance explains:

[The invalid nomination] would have the potential to affect all subsequent nominations possibly invalidating them too...

**Example 2 (Flavia)**

F has a mixed fund account which contains the following funds immediately before she nominates transfers<sup>70</sup> under the cleansing provisions:

<b>Date</b>	<b>Nature of receipt</b>	<b>Amount<sup>71</sup></b>
2014/15	Overseas capital gain	£200,000
2014/15	Clean capital	£150,000
2013/14	Foreign income	£110,000
2013/14	Overseas capital gain	£600,000
2010/11	Foreign income	£850,000
		<u>£1,910,000</u>

F nominates £1 million foreign income, transferring it to a new account (B) on 17 July 2018.

F leaves the balance of her funds in the original account (A).

The HMRC analysis is as follows:

The total amount of foreign income immediately before the transfer to account B was £960,000, F's transfer exceeds the total amount of foreign income contained in the account by £40,000.

This error means that F has breached one of the cleansing conditions, instead of successfully cleansing the original account F has engaged the mixed fund rules at section 809Q and 809R (that is the entire £1 million

70 In fact, in the example as reformulated in March 2018, there is only one transfer.

71 I have formulated the data into a table, for enhanced clarity.

is taken to be an offshore transfer), creating another mixed fund. She will need to work out by applying these rules the proportion of income, gains and capital that this account contains.

The author, perhaps understandably, preferred not to work through the example numerically.

F can if she wished subsequently cleanse this account (B) by correctly applying the cleansing provisions so long as she is within the 2 year window.

Alternatively, as noted, F could simply make another nomination.

If the figures are uncertain, the best solution is to transfer the minimum amount of category (i) assets (clean capital) to a new account, with the appropriate nomination and specification, and leave the income/gains (whatever they may come to) in the old account.

### 19.12.13 *Cleansing joint account*

2018 Cleansing Guidance provides:

Joint mixed fund accounts can be cleansed even if only one person qualifies.

Each qualifying person can cleanse their share of the joint account by identifying:

- the funds which are theirs
- what those funds are, income, capital or chargeable gains

2017 Cleansing Guidance provides:

There is nothing to prevent the cleansing of a joint mixed fund account. No matter how many named account holders there are there can still only be 1 nominated transfer from the account for mixed fund cleansing purposes.

### 19.12.14 *Rebasing/cleansing compared*

In outline:

#### **2017 Rebasing<sup>72</sup>**

Asset held 5/4/17

Disposal any time post 6/4/17

#### **Cleansing**

Asset acquired any time

Account transfer 2017/8 or 2018/19

---

<sup>72</sup> See 53.14 (2017 rebasing).

Any asset	Money only
Asset foreign-situate 16/3/16 - 5/4/17	Asset unremitted
Remittance basis charge in 2008/9 - 17/18	Rem. basis claim in 2008/09 - 17/18
P not formerly-domiciled resident	Same
P meets 15-year rule in 2017/18	Not required
Election to disapply	Nomination to apply

### 19.13 Para 45 cleansing relief

Para 44 and 45 cleansing reliefs overlap, and an individual may effectively claim either, by an appropriate nomination, if the necessary cleansing relief conditions are satisfied.

It is easiest to follow para 45 cleansing relief if it is set out in a format which highlights the differences from para 44 cleansing relief.

Para 45 sch 8 F(no.2) A 2017 provides:

- (1) This paragraph applies to a transfer made by a person (“P”) from a mixed fund where—

Seven conditions then follow which I call “**para 45 cleansing conditions**”:

- (a) the transfer is made in the tax year 2017-18 or the tax year 2018-19,
- (b) the transfer is a transfer of money,
- (c) the mixed fund<sup>73</sup> from which the transfer is made is an overseas account<sup>74</sup> (account A) containing pre-6 April 2008 income or chargeable gains,<sup>75</sup> **and**
- (d) the transfer is made to another overseas account (account B),<sup>76</sup>
- (e) the transfer is nominated by P the person for the purposes of this subparagraph,
- (f) at the time of the nomination no other transfer from account A to

73 Para 45(5) provides: “In this paragraph and paragraph 46—  
“mixed fund” has the same meaning as in section 809R(4) of ITA 2007”.

74 Para 45(5) provides: “In this paragraph and paragraph 46 ...  
“overseas account” means an account situated outside the UK”.

75 Para 45(5) provides: “In this paragraph and paragraph 46 ...  
“pre-6 April 2008 income or chargeable gains” means income or chargeable gains for the tax year 2007-8 or any earlier tax year.”

76 It does not matter whether account B is a mixed fund or not. That seems self-evident, but the point is also confirmed in Cleansing Q&As Question 8.

- account B has been so nominated, and  
 (g) P is a qualifying individual.

The only difference here is that the transferor account must contain pre-2008 income/gains.

The definition of qualifying individual is the same: para 45(2).

Cleansing under para 45 (just as para 44) requires the individual to be a remittance basis taxpayer for at least one of the years 2008/9 to 2016/17. Remittance basis treatment in an earlier year will not suffice. That is not logical, but there it is.

Assuming the para 45 conditions are satisfied, we move on to the relief. Para 45(3) provides (highlighting differences from para 44 relief):

~~An offshore transfer to which sub-paragraph (2) this paragraph~~ applies is to be treated as containing such amount of such kind or kinds of income ~~and~~ or capital in the mixed fund immediately before the transfer (for example, income or chargeable gains for a particular tax year) as may be specified in the nomination under ~~sub-paragraph (2)(d) subparagraph (1)(e).~~

The transfer need not be an offshore transfer, though it must be made to an offshore account, which is not quite the same thing.<sup>77</sup> The other differences in wording are not material.

Para 45(4) provides:

An amount of a kind of income or capital specified under sub-paragraph ~~(4)~~ (3) may not exceed the amount of that kind which is in the mixed fund immediately before the transfer.

This is the same rule as for para 44 relief.

### 19.13.1 *Pre-2008 payments*

Para 46 sch 8 F(no.2) A 2017 applies only to para 45 relief. It provides rules for pre-2008 payments in/out of the mixed fund.

- (1) This paragraph applies to determine, for the purposes of paragraph 45, the composition of the mixed fund referred to in paragraph 45(1).

Para 46(2)-(5) provide the rules for a payment out of the mixed fund:

---

<sup>77</sup> See 19.5.2 (“Offshore” transfer).

(2) Sub-paragraphs (3) to (5) apply where a transfer of money is made before 6 April 2008 from the mixed fund to another overseas account.

(3) Take the following Steps—

*Step 1.* Calculate the total amount of income and chargeable gains in the mixed fund immediately before the transfer (“the total income and gains”).

*Step 2.* Calculate what proportion of the total income and gains is income and what proportion is chargeable gains.

(4) If the amount transferred does not exceed the total income and gains, the transfer is to be treated as if it consisted of income and chargeable gains in the proportions found under Step 2 in sub-paragraph (3).

(5) If the amount transferred exceeds the total income and gains, the transfer is to be treated as if it consisted of—

- (a) all the income and chargeable gains that were in the mixed fund immediately before the transfer, and
- (b) in respect of the balance, other capital from the mixed fund.

Cleansing Q&As Question 8 provides:

Does the reference in the legislation to “the mixed fund” in para 46(2) purely refer to the account being cleansed such that the legislative rules above do not apply for pre-6 April 2008 offshore transfers between two mixed funds i.e. does the reference to “another overseas account” in para 46(2) include a mixed fund account or not?

**Suggested answer put to HMRC**

There is nothing in the legislation that suggests that the reference to “another overseas account” must be a reference to an account which is not a mixed fund. Indeed, the second rule specifically suggests that the transfer from the other overseas account to the mixed fund is a transfer between different mixed fund accounts since para 46(7-9) suggests there could be income and gains in the other account.

**HMRC Comment**

Agree only for cleansing.

Para 46(6)-(8) provide the rules for a payment into the mixed fund:

(6) Sub-paragraphs (7) and (8) apply where—

- (a) a transfer of money is made before 6 April 2008 from another overseas account to the mixed fund, and
- (b) there is insufficient evidence to determine the composition of the transfer.

(7) Take the following Steps—

*Step 1.* Calculate the total amount of income and chargeable gains in the other overseas account immediately before the transfer (“the total income and gains”).

*Step 2.* Calculate what proportion of the total income and gains is income and what proportion is chargeable gains.

(8) The transfer is to be presumed to consist of income and chargeable gains in the proportions found under Step 2 in sub-paragraph (7).

Para 46(9) provides a rule where there is no evidence as to origin of the funds:

For the purposes of Steps 1 and 2 in sub-paragraph (7), if there is insufficient evidence to say that an amount is income or that it is chargeable gains, treat it as income.

This only applies for the limited purpose mentioned.

#### 19.14 Loss in mixed fund

Suppose a mixed fund of:

Gains	30
Capital	<u>70</u>
Total fund	<u>100</u>

The fund is invested and a loss is made of 10, leaving a fund of 90.

There are (at least) 4 possibilities:

	<b>Deduct loss from gain</b>	<b>Deduct loss from capital</b>	<b>Deduct loss pro rata</b>	<b>No deduction</b>
Gains	20	30	23	30
Capital	<u>70</u>	<u>60</u>	<u>57</u>	<u>70</u>
Total capital/gain	<u>90</u>	<u>90</u>	<u>90</u>	<u>100</u>

The following points are clear:

- (1) Losses (like gains) accrue to an individual on a disposal of assets.
- (2) Losses may or may not be allowable (depending in particular on whether a loss election has been made)
- (3) Losses (unlike gains) cannot be remitted. Or more accurately, tax has a concept of remitting income or gains, but there is no concept of remitting a loss so the question whether or not a loss may be said to be remitted does not arise.

The key statutory provisions are:

(1) The definition of “mixed fund” in s.809Q(6):

In this section “mixed fund” means money or other property which, immediately before the transfer, contains or derives from

- (a) more than one of the kinds of income and capital mentioned in subsection (4), or
- (b) income or capital for more than one tax year.

(2) Step 1 s.809Q(3):

For each of the categories of income and capital in paragraphs (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

In the example above, there exists a mixed fund, as defined, ie, property (a fund) “which contains or derives from more than one kind of income/capital”. Even if the fund did not “contain” more than one kind of income/capital (say the loss equalled the gain, and assume the loss could be set against the gain) the fund may still be said to *derive* from 30 gain and 70 capital,

So the question is: What is the amount of “income or capital in this mixed fund”.

The legislation does not answer this directly, but it is suggested that the loss is simply ignored in computing the amount of income/capital in the fund. The loss erodes neither the capital nor the gain. This is more consistent with the rules that:

- (1) The loss is not allowable
- (2) A mixed fund need not *contain* income/capital, it is sufficient if it *derives from* mixed income/capital

Any other rule would be difficult to operate in practice as assets are bought and sold; but the remittance basis is often difficult to operate.

Accordingly if (on the example) one remits the whole of the £90 fund, one applies the mixed fund rules and the remittance consists of £30 gain and £60 capital.

However the HMRC view is more generous: capital losses should be

deducted from capital gains, in analysing the contents of a mixed fund.<sup>78</sup> So there would be a remittance of £20 gain and £70 capital.

The issue is raised in Cleansing Q&As Question 13:

*Example 1*

In the example in the question the funds used to acquire the property break down into Remittance Basis income and clean capital, as follows:

	Amount	%
Relevant foreign income	£1.0 m	40%
Relevant foreign earnings	£1.0 m	40%
Clean capital	<u>£0.5 m</u>	20%
	<u>£2.5 m</u>	

The property is sold for £2 m, so we have a loss of £0.5 m and nothing in the legislation to assist in terms of how this loss should be treated.

Applying just and reasonable methodology one would proportionally reduce each category of income and capital as follows:

	Acquisition Cost	Reductions	Proceeds
Relevant foreign income	£1.0 m	£0.2 m	£0.8 m*
Relevant foreign earnings	£1.0 m	£0.2 m	£0.8 m*
Clean capital	<u>£0.5 m</u>	<u>£0.1 m</u>	<u>£0.4 m</u>
	<u>£2.5 m</u>	<u>£0.5 m</u>	<u>£2.0 m</u>

\*Whilst the above is a necessary first step<sup>79</sup> as it deals with the loss, the allocation above cannot be the final position. This is because it is not in accordance with the derivation rules for income and chargeable gains in ITA 2007, Part 14, Chapter A1, which make it clear that such amounts cannot be reduced.<sup>80</sup> This means that for mixed fund analysis purposes there is:

	Amount
Relevant foreign income	£1.0 m
Relevant foreign earnings	£1.0 m
Clean capital	<u>£0.5 m</u> <sup>81</sup>
	<u>£2.5 m</u>

78 Private correspondence. It would be appropriate to explain the basis of the tax computation in the “white box”.

79 Author’s footnote: I do not see why this is a necessary step, since the loss deducted at this step is then added back in.

80 I think the reference is to s.809P(3): see 17.32.2 (Change in property value).

81 Author’s footnote: the original reads £0.4m and gives the total as £2.4m, but I think that is just a slip.

That is, the aggregate total of the s 809Q(4) categories of income and capital is £0.4 m higher than the actual £2 m proceeds figure.

The Q&A then considers the implications for cleansing relief:

The £0.4 m of clean capital can be cleansed.

### Example 2

Initially a painting is acquired for £4.8 m:

	Amount	%
Relevant foreign income	£1.2 m	25%
Foreign gains	£1.2 m	25%
Clean capital	<u>£2.4 m</u>	50%
	<u>£4.8 m</u>	

The painting is sold for £3.6 m realising a loss of £1.2 m.

Step 1 – proportionally allocate out the £1.2 m loss.<sup>82</sup>

	Acquisition cost	Reductions	Proceeds
Relevant foreign income	£1.2 m	£0.3 m	£0.9 m
Foreign gains	£1.2 m	£0.3 m	£0.9 m
Clean capital	<u>£2.4 m</u>	<u>£0.6 m</u>	<u>£1.8 m</u>
	<u>£4.8 m</u>	<u>£1.2 m</u>	<u>£3.6 m</u>

Step 2 – adjust the step 1 result as the derivation rules mean that the income and gains figures cannot be reduced.

	Amount
Relevant foreign income	£1.2 m
Relevant foreign earnings	£1.2 m
Clean capital	<u>£1.8 m</u>
	<u>£4.2 m</u>

That is, the aggregate total of the ITA 2007, s 809Q(4) categories of income and capital is £0.6 m higher than the actual proceeds figure.

So far Q&A example 2 is like example 1, but there is then another transaction of purchase and sale, this time at a profit:

The proceeds are paid into a new offshore account (C) and then reinvested in

---

<sup>82</sup> As noted, I cannot see the point of Step 1, which is undone by Step 2; but it does not matter.

shares. The shares are sold on 19 May 2018 for £4.4 m and the proceeds paid into account C (which contains no other funds). A Remittance Basis gain of £0.8 m is realised on the sale (£4.4 m less £3.6 m). As such, for mixed fund analysis purposes there is:

	Funds Re-invested	Rem. Basis gain	Amount
Relevant foreign income	£1.2 m	£1.2 m	
Foreign gains	£1.2 m	£0.8 m	£2.0 m
Clean capital	<u>£1.8 m</u>	<u>£1.8 m</u>	
	<u>£4.2 m</u>	<u>£0.8 m</u>	<u>£5 m</u>

That is, again as a result of the derivation rules, the mixed fund analysis aggregate total of the s 809Q(4) categories of income and capital is £0.6 m higher than the actual proceeds figure paid into account C.

The Q&A then considers the implications for cleansing relief:

The £1.8 m of clean capital can be cleansed.

The £2 m of foreign gains could also be cleansed (since the current CGT rates are much lower than the Income Tax rates this might be felt to be worthwhile).

#### HMRC Comment<sup>83</sup>

- Derivation rules do not account for clean capital.
- The derivation rules only apply to foreign income or gains.

I find this comment delphic: does it mean that HMRC agree with the two examples?

### 19.15 Pre-2008 mixed fund

The ITA mixed fund rules raise transitional issues which the FA 2008 addresses only in general terms, leaving HMRC, taxpayers and the courts to sort the matter out as best they can.

Para 89 sch 7 FA 2008 provides:

Sections 809Q to 809S of ITA 2007 (transfers from mixed funds) do not apply for the purposes of determining whether income or chargeable gains for the tax year 2007-08 or any earlier tax year are remitted to the UK (or the amount of any such income or chargeable gains so remitted).

#### 19.15.1 Pre-2008 transfer from fund

---

83 Footnote original: The HMRC comments are in line with the comments made in the Q&A. However, HMRC does not say whether it agrees with the examples.

Suppose:

- (1) A mixed fund contains pre-2008 income/gains.
- (2) A transfer is made from that fund to the UK before 2008.

One obviously applied the pre-2008 mixed fund rules (discussed in the next section) to identify what was remitted at the time of the transfer and the same rules determine what income/gains remain in the fund (which may be remitted post 2008).

#### 19.15.2 *Post-2008 transfer from fund with pre-2008 income/gains*

Suppose:

- (1) A mixed fund contains pre-2008 income/gains (no post-2008 income/gains have been added).
- (2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. Para 89 means that one disregards the ITA mixed fund rules (and instead applies the pre-2008 mixed fund rules discussed in the next section).<sup>84</sup> HMRC agree.<sup>85</sup>

#### 19.15.3 *Post-2008 transfer from fund with pre- & post-2008 income/gains*

Suppose:

- (1) A mixed fund contains pre-2008 and post-2008 income/gains.
- (2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. The analysis comes in two stages.

- (1) First one has to determine whether the transfer consists of pre-2008 or post-2008 income/gains.
- (2) (a) If the transfer consists of pre-2008 income/gains, one applies the pre-2008 mixed fund rules to identify what is remitted.
- (b) If the transfer consists of post-2008 income/gains, one applies the

---

<sup>84</sup> This view is the more natural reading. Also, if it were wrong (so one had to apply the ITA mixed fund rules) it would be necessary to classify the constituents of the mixed fund held at 6/4/08 by date and by the nine mixed fund categories, going back without limit of time. Records in many cases will not exist.

<sup>85</sup> See 19.17.2 (Transfer from fund with pre-and post-2008 entries).

ITA mixed fund rules to determine what is remitted.

Which set of rules apply at stage 1? It is suggested that one first applies the ITA mixed fund rules so far back as 2008/09 and then the pre-2008 mixed fund rules. HMRC agree.<sup>86</sup>

## 19.16 Pre-2008 mixed fund rules

We can now turn to consider the pre-2008 mixed fund rules. There were few statutory provisions. There were a few old cases, supplemented by practice, and outside areas governed by clear rules, I expect HMRC would accept any reasonable view.

### 19.16.1 *Fund: Taxed/untaxed income*

The RDR Manual provides:

#### **36320. Remittances from a mixed fund** [Jan 2019]

... Where an overseas 'mixed fund' contained an amount that has already suffered UK tax, for example UK salary dealt with under PAYE, the practice (*Sterling Trust v CIR* 12 TC 868) was that a taxpayer was entitled to say that he or she has remitted income which has already suffered UK tax (to the extent that such income exists in the fund) in priority to income which is assessable on the arising basis [ie in priority to income which is assessable if remitted].<sup>87</sup>

This is soundly based on *Duke of Roxburghe's Executors v IRC*.<sup>88</sup>

### 19.16.2 *Fund: Untaxed/DT relief income*

Suppose an individual holds in one pre-2008 mixed fund:

- (1) income which is subject to foreign tax and qualifies for UK double tax relief; and

---

<sup>86</sup> See 19.17.2 (Transfer from fund with pre-and post-2008 entries).

<sup>87</sup> The same point is made in RDR Manual 35320 [Jan 2019] (Mixed Funds: Example 4 - remittances before 6 April 2008, Note 2).

<sup>88</sup> 20 TC 711 discussed in another context at 17.17 (Bank errors).

Although the taxpayer in *Roxburghe* kept the funds in two accounts at the bank, the result would have been the same if the taxed and untaxed income had been held in a single bank account. This was accepted without argument in *Walsh v Randall* 23 TC 55: see para 3 of the Special Commissioners' decision, and it is accepted in this passage from the RDR Manual.

(2) untaxed foreign income taxable in full on the remittance basis.

It is considered that the *Roxburghe* approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for UK double tax relief.

### 19.16.3 Fund: Capital/income

In *Scottish Provident Institution v Allan* 4 TC 591, the taxpayer held offshore:

- (1) Capital which had been invested in secured loans in Australia, and which would not be taxable if remitted; and
- (2) Interest arising from those loans, which qualified for the remittance basis, and which was therefore taxed if remitted.

A sum was remitted to the UK and the question was whether this sum was the untaxed income or the capital. The background was this:

- (1) The income and capital had been paid into a single account (mixed).
- (2) The remittances (from the Australian agents) had been accompanied by letters stating that the sums remitted represent repayments of the loans, ie capital. The loans had in some cases been repaid only very shortly before the remittance.
- (3) The sum remitted (£200,000) was small compared to the amount of the loans and the interest received (each about £1.5m).

It was held that the remitted sum was the income, not capital. The Lord Chancellor said:

It is obvious that the mere nicknaming the sum received and ascribing to it, because it is so named, the character of capital and not of income, cannot defeat the right of the Crown to have the tax levied upon that which in substance and truth is [income] ...<sup>89</sup>

Two points shine out:

- (1) The description of the remittance as capital does not make the

---

<sup>89</sup> 4 TC 591 at p593. Similarly Lord Davey: “I must say that that is a draft upon my credulity, a strain upon my powers of belief, which they will not bear. I agree that the mere calling it capital for the purpose of the Inland Revenue Department will not make into capital that which is essentially and in truth ... the interest received on the securities.”

remittance capital if “in truth” it is income. This is obviously right, an application of the Shakespearean principle that “a rose by any other name ...” However, this principle does not address the more fundamental question of *how* the courts determine what is income and what is capital.

- (2) The answer to this second question is that the courts look to the substance.

However, it is one thing to look for the substance, and another to find and identify it. Why, in substance, was the remittance from the income, not from the capital? The answer may be found in the speech of Lord Robertson: “The facts of the case must furnish the inference.”

The following facts were relevant:

- [1] First of all there is the fact of remittance in two consecutive years ...
- [2] There is no suggestion that any exceptional reason required remittances of capital, in either year or in both.
- [3] On the other hand it is certain that the amount of invested capital left behind in the Colony, after these remittances, is larger than before; so that the capital is fully accounted for.
- [4] Well then, what is done with this so-called capital remitted? The answer is, exactly what would be done with profits.

This is explained by Lord Shand in argument:

If it is capital you have brought back and distributed as bonus, you have been paying back capital, which I should think you have no authority to do.

This is why Lord Robertson concluded:

The inference from these facts is that the moneys remitted were in fact profits, [ie income] ...

The former Inspectors Manual para 1566 gave the HMRC view:

Where a person maintains abroad a fund (for example, a bank account) containing income assessable on the remittance basis, a capital lodgement to the fund is normally considered to lose its identity in the fund. A subsequent remittance from such a mixed fund, therefore, represents income up to the full extent of the income content of the fund (see *Scottish Provident Institution v Allan* 4 TC 409 and 4 TC 591, and

especially the Lord Chancellor's remarks on 'mere nicknaming' at 4 TC 593). Only when the income content of the fund is exhausted will any balance remitted be regarded as capital. Where this is not accepted, the full facts of the case should be reported to Revenue Policy, International (Cases IV and V), Victory House.

The Inspectors Manual over-simplified the law as expounded in *SPI v Allan*. There is no rule that the remittance out of a mixed fund of income and capital is to be treated as income first. Suppose a taxpayer remits a substantial amount, exceeding the income, and applies it capital expenditure, such as an investment in the UK, or the purchase of a house. It is considered that the "substance" of the matter, applying Lord Robertson's approach, is that the remittance is one of capital. The position is even stronger if the taxpayer first uses an amount equal to the income of a mixed account on expenditure abroad of an income nature.

The RDR Manual now provides:

**RDRM36320. Remittances from a mixed fund** [Jan 2019]

For tax years up to 5 April 2008, there are no statutory rules to determine what amounts remitted from 'mixed funds' actually consisted of.

On occasion this created difficulty in determining, for UK tax purposes what a remittance to the UK actually consisted of, for example, was it non-taxable income, employment income, interest, chargeable gains or capital.

*Scottish Provident v Allan*

Broadly HMRC practice was based on House of Lords decisions, in particular that of *Scottish Provident v Allan* (4 TC 409/591). In the Court of Exchequer, Lord McLaren said (page 419)

'un-appropriated remittances must be dealt with according to the ordinary course of business, and these remittances must be presumed to be paid in the first place out of interest so far as they are income, and in the second place of principal or capital. I think that rule results from the fact that no prudent man of business will encroach upon his capital for investment when he has income un-invested lying at his disposal'.

The House of Lords considered that the question of whether any amount of income had actually been received in the UK is essentially one of fact, that is, of tracing in the first instance, or, where direct tracing proves to be impossible, of inference from the known facts.

In the absence of any evidence to the contrary, the principle is that where capital and income have been paid into a single fund overseas so that they are no longer distinguishable, remittances to the UK out of the fund will be presumed to be income to the extent that there is income existing in the fund at the time that the remittance was made.

... Only when the income content of the fund is exhausted will any balance remitted be regarded as capital.<sup>90</sup>

Note that *SPI v Allan* was a case where the mixed fund was capital and income. The case can have no application where the mixed fund consists of different kinds of income or different kinds of capital.

At first sight there is some tension between *SPI v Allan* and *Duke of Roxburghe* 20 TC 711. In the first, “mere nicknaming” was contemptuously dismissed; in the second, it was the “legal right” of the Duchess to direct whether the remittance was from one part of a mixed fund or the other. The cases agree, however, that the matter is one of “substance”. It is suggested that the cases can be reconciled in this way: in a marginal case, the description of the remittance given by the taxpayer may be decisive. Where the substance of the transaction shows that a remittance is one of income or capital, “mere nicknaming” will not alter the position.

#### 19.16.4 *Fund: Gain/clean capital*

Suppose an individual holds in one pre-2008 mixed fund:

- (1) capital which does not represent any chargeable gain within the scope of CGT; and
- (2) the proceeds of a disposal on which a chargeable gain accrued.

A remittance from this fund should for CGT purposes be treated as coming out of the tax free source first.

#### 19.16.5 *Remittance: gain or base cost?*

Suppose a foreign domiciliary purchases a foreign asset for £1m; they sell it for £3m and realises a pre-2008 chargeable gain of £2m. If they remit the entire £3m proceeds, the entire £2m gain is charged to CGT. But what is

---

<sup>90</sup> The same passage is found in RDRM 35320 Note 2.

the position if they remit only £1m and retain the balance abroad? The RDR Manual provides:

**RRM36320. Remittances from a mixed fund ....** [Jan 2019]

*Capital Gains*

For years up to 5 April 2008, where a remittance is made to the UK from a mixed fund into which the proceeds from the sale of an asset (such as a shareholding) has been paid the remittance contains a due proportion of any capital and of any capital gain arising from the disposal.

That is because, unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. Refer to the Capital Gains Manual CG25380 onwards (and CG25440 in particular).<sup>91</sup>

The last sentence is correct to say that a capital gain has no separate existence. I do not think it even exists as “part of the money received from the sale”. It is not a separate or separable item of property existing at all. The gain is merely the result of a computation. The proceeds of a disposal represent the gain, but they do not constitute the gain, just as trading receipts do not constitute the profits of a trade. So it is considered that the HMRC view is correct.

## 19.17 Pre-2008 mixed funds: examples

The RDR Manual gives two examples concerning pre-2008 mixed funds.

### 19.17.1 *Pre-2008 transfer from pre-2008 mixed fund*

The first example involves a pre-2008 transfer from a pre-2008 mixed fund. One therefore applies the pre-2008 mixed fund rules.<sup>92</sup>

**RDRM35320 Mixed Funds: Example 4 - remittances before 6 April 2008**

**Example 4** (Martyn) [Jan 2019]

The “mixed fund” rules in s809Q do not apply to amounts that are in an account before 6 April 2008 (FA2008/para 89).

M has lived in the UK for many years. He has paid UK tax on the remittance basis for all relevant tax years and has decided that he will do so again for 2008-2009.

---

91 The same point is made at para 35320 (Mixed Funds: Example 4 - remittances before 6 April 2008 Note 3).

92 See 19.15.1 (Pre-2008 transfer from fund).

M has his UK salary paid into his overseas bank account. He also has a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the account. Dividends from a shareholding in a foreign company are also paid into the account.

On 18 March M sold some of his foreign shares as he was thinking of purchasing a new property. He deposited the proceeds of £5,000,000 from the sale into his overseas account. This amount is made up of £4m capital and £1m gain (no deduction of foreign tax).

Tax Year 2007-2008		Credit (Debit)	Balance	Note
	Balance b/f		£47,000	1
31 Dec	UK salary (net of tax)	£10,000	£57,000	
31 Dec	Overseas salary (net of tax)	£5,000	£62,000	
3 Jan	Transfer to UK account	(£5,000)	£57,000	2
31 Jan	UK salary	£10,000	£67,000	
31 Jan	Overseas salary	£5,000	£72,000	
3 Feb	Transfer to UK account	(£12,000)	£60,000	2
15 Feb	Dividend	£2,000	£62,000	
29 Feb	UK salary	£10,000	£72,000	
29 Feb	Overseas salary	£5,000	£77,000	
3 Mar	Transfer to UK account	(£8,000)	£69,000	2
18 Mar	Share Sale £4m capital, £1m gain	£5,000,000	£5,069,000	3 <sup>93</sup>
31 Mar	UK salary	£10,000	£5,079,000	
31 Mar	Overseas salary	£5,000	£5,084,000	
3 Apr	Transfer to UK account	(£10,000)	£5,074,000	2

**Note 1: Identity of balance brought forward**

The balance brought forward of £47,000 is made up of

UK salary	£15,000
overseas salary	£25,000
overseas dividends	<u>£7,000</u>
	<u>£47,000</u> <sup>94</sup>

The Manual then considers the tax analysis of the four UK transfers. The key fact is that M never remitted more than the UK salary already received in the account (the transfers totalled £35k and salary totalled £55k). The Manual provides:

**Note 2: Transfers to UK account**

93 For this note, see 19.16.5 (Remittance: gain or base cost?).

94 The Manual adds: "all items arising in, and credited during that tax year. M has paid the relevant amount of UK tax based upon his UK sources of income and the amounts of foreign income and gains that he has remitted to the UK." But that is not relevant to the example.

... So to establish the taxable amount of remittances made in the example above in 2007-2008 the account must be analysed. In this case the analysis is straightforward. M has brought £35,000 to the UK between December 2007 and March 2008 to meet his day to day UK spending needs. Applying the *Sterling Trust v CIR* practice outlined above,<sup>95</sup> the £35,000 can be regarded as remittances consisting solely of his UK salary that has already been taxed under PAYE. Because he has claimed the remittance basis of taxation in respect of his relevant foreign income or foreign earnings for 2007-2008 he has no further amount of UK tax to pay on these amounts that stay in the Offshore account.

The example is repeated in RDR Manual 36330 [Jan 2019] (Remittances from a mixed fund - Example 1).

### 19.17.2 *Transfer from fund with pre- and post-2008 entries*

The next example is a post-2008 transfer from a mixed fund containing pre- and post-2008 income/gains.

#### **RDRM35330 Remittances from mixed funds involving income/gains before 6 April 2008 - Example 4a** [Jan 2019]

Continuing from the example 4 above, on 5 April 2008 M's Offshore account contains:

<b>2007- 2008</b>	UK salary	£20,000
	Overseas salary	£45,000
	Overseas dividends	£9,000
	Sale of shares: Capital	£4,000,000
	Sale of shares: Gain	<u>£1,000,000</u>
		<u>£5,074,000</u>

		<b>Credit (Debit)</b>	<b>Balance</b>	<b>Category Note</b>
	<b>2008-2009</b>			
6 Apr	Balance b/f	£5,074,000		
30 Apr	UK salary (net)	£10,000	£5,084,000	Para (a)
30 Apr	Overseas salary (net)	£5,000	£5,089,000	Para (f)
3 May	Transfer to UK acc	(£5,000)	£5,084,000	1
15 May	Dividend	£2,000	£5,086,000	Para (g)
31 May	UK salary	£10,000	£5,096,000	Para (a)
30 May	Overseas salary	£5,000	£5,101,000	Para (f)
30 Jun	UK salary	£10,000	£5,111,000	Para (a)
30 Jun	Overseas salary	£5,000	£5,116,000	Para (f)
30 Jun	Direct Debit to UK	(£100,000)	£5,016,000	2

**Note 1** analyses the £5k remittance made 3 May:

95 See 19.16.1 (Fund: Taxed/untaxed income).

Applying the ordering rules in S809Q to the account **immediately before the transfer**:

**Step 1** Identify the “amount of transfer” in the relevant tax year (2008-09) £5,000

Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:

**Para (a)** Employment income not subject to a foreign tax £10,000

**Para (f)** Employment income subject to a foreign tax £5,000

**Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund

**Para (a)** £10,000

**Step 3** Where the amount of the remittance is less than the amount identified at Step 2 the amount remitted is treated coming entirely from that paragraph. There is no need to continue to step 4. £5,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

**Note 2** analyses the £100k remittance made 30 June. At this point the example becomes more challenging:

M decided to buy a residential property. He remits £100,000 to pay some legal fees [!] for the purchase on 30 June. Although M considers that this amount has come from the sale of shares in 2007-2008 the ordering rules in s809Q require the remittance to be taken into account first against all income and gains of the year in which the remittance is made.

**Step 1** Identify the “amount of transfer” in the relevant tax year (2008-2009) £100,000

Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:

**Para (a)** Employment income not subject to a foreign tax £25,000

**Para (f)** Employment income subject to a foreign tax £15,000

**Para (g)** Relevant foreign income subject to a foreign tax £2,000

**Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:

**Para (a)** £25,000

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £100,000

- £25,000

£75,000

**Step 4** Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

**Step 2** Identify the earliest paragraph: **Para (f)** £15,000

**Step 3** Where the amount of the remittance is greater than the

amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2	£75,000
	<u>-£15,000</u>
	<u>£60,000</u>

**Step 4** In the order of preference listed above repeat Steps 2 and 3.

<b>Step 2 Para (g)</b>	£2,000
<b>Step 3</b>	£60,000
	<u>- £2,000</u>
	<u>£58,000</u>

At this stage all of the amounts credited to the account in 2008-09 have been matched against £100,000 remittance transfer [in my terminology an onshore transfer] in that year. But £58,000 has been brought to the UK that has not been “matched” under the s809Q rules (and cannot be matched because of FA2008/para89).

The remaining £58,000 is regarded as coming from the 2007-08 credits to the account. The ordering rules at section 809Q cannot be used, so instead the general principles outlined in Note 2 of example 4 above will apply.

HMRC then explain the applicable pre-2008 mixed fund rules:

This £58,000 will usually be regarded as a remittance of M’s income and is, first and foremost (*Sterling Trust* principle) his taxed income and then (*Scottish Provident v Allan* principle) any other income - that is his foreign employment income or dividends - as he selects.

However in this case M may equally be able to demonstrate that the remaining £58,000 comes from the proceeds of the sale of shares, as he particularly sold the shares in order to fund this house purchase. If that is the case, the remaining remittance will consist of £11,600 foreign chargeable gain (1/5 due proportion – refer to note 3 in example 4).<sup>96</sup>

HMRC do not say whether the £58k remittance is income or capital. How is M to “demonstrate that the £58k comes from the proceeds of the sale of shares” given that the payment was out of a mixed fund? The correct approach is to say that the substance is one of a remittance of capital since the purchase is for the house, ie has the nature of capital expenditure.<sup>97</sup>

Thus the £58k remittance is capital.

*Moral:* M should not have paid the proceeds of the share sale into a mixed account. If it had been paid into a separate account, and the £100k paid from there, the position would have been simpler and better.

## 19.18 Nominated income/gain remitted

<sup>96</sup> See 19.16.3 (Fund: Capital/income).

<sup>97</sup> See 19.16.3 (Fund: Capital/income).

### 19.18.1 *Outline*

EN FB 2008 provides:

14... If, in subsequent years, that “nominated” income or gains upon which the RBC has been paid is, in fact, remitted to the UK, then that income or gains will not be taxed again. However, there are ordering rules to ensure that if “nominated” income or gains is, in fact, remitted when other untaxed income and gains remain unremitted, then that unremitted income and gains is treated as being remitted before the “nominated” income and gains.

These rules are not (or not just) mixed fund rules, as they may apply even if funds are not mixed; but it is convenient to deal with them in this chapter.

### 19.18.2 *“Nominated income /gains”; “nomination year”*

The expression “nominated income and gains” is defined in s.809I(3) ITA. The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(3) ITA. (If the definitions had been made ITA-wide definitions this repetition would not have been necessary.) The definition provides:

In this section the individual’s “nominated income and gains” are the total income and chargeable gains nominated by the individual under section 809C for the relevant tax year or any earlier tax year (each such year for which the individual has made a nomination under that section being referred to as a “nomination year”).

The definition is discussed in 16.12.2 (Nomination of income/gains).

### 19.18.3 *“Remittance basis income”*

Section 809I(4) ITA gives this term a fairly commonsense meaning:

An individual’s “remittance basis income and gains” are the foreign income and gains of the individual for all the tax years (up to and including the tax year mentioned in subsection (1)(a)) for which section 809B, 809D or 809E applies to the individual, apart from the individual’s nominated income and gains.

Nominated income/gains do not count as remittance basis income/gains because they are taxed on an arising basis. The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(4)

ITA.<sup>98</sup>

#### 19.18.4 *Nominated income categories*

The taxpayer must classify all their remittance basis income and gains into 8 categories, which I will call the “**nominated income/gains categories**”. The categories are set out in s.809J(2) ITA. These are almost the same as the 9 mixed fund categories<sup>99</sup> but:

- (1) there are casual differences of wording which do not affect the meaning; and
- (2) there are (incredibly) small differences (I do not see why – if any reader can suggest a reason I would be interested to know).

I here set out a table which compares the two (the differences are italicised):

<b>Nominated income/gains categories</b>	<b>Mixed fund categories</b>
	(a) <i>employment income (other than income within para (b), (c) or (f))</i>
(a) relevant foreign earnings (other than those subject to a foreign tax)	(b) relevant foreign earnings (Other than income within para (f))
(b) foreign specific employment income (other than income subject to a foreign tax)	(c) foreign specific employment income (other than income within para (f))
(c) relevant foreign income (other than income subject to a foreign tax)	(d) relevant foreign income (other than income within para (g))
(d) foreign chargeable gains (other than gains subject to a foreign tax)	(e) foreign chargeable gains (other than chargeable gains within para (h))

---

98 “In step (1) of subsection (1) the individual’s “remittance basis income and gains” are the foreign income and gains of the individual for all the tax years (up to and including the relevant tax year) for which section 809B, 809D or 809E applies to the individual, apart from the individual’s nominated income and gains.”

99 See 19.3 (Ingredients of mixed fund).

- |  |   |
|--|---|
| (e) <i>relevant foreign earnings subject to a foreign tax</i>          | (f) employment income subject to a foreign tax        |
| (f) <i>foreign specific employment income subject to a foreign tax</i> |   |
| (g) relevant foreign income subject to a foreign tax                   | (g) relevant foreign income subject to a foreign tax  |
| (h) foreign chargeable gains subject to a foreign tax                  | (h) foreign chargeable gains subject to a foreign tax |
|  | (i) income or capital not within another paragraph    |

Section 809J(6) ITA provides a commonsense definition of “foreign tax” for the purpose of the nominated income/gains categories. The same definition is used for the mixed funds categories and I discuss the definition there.<sup>100</sup>

#### 19.18.5 *Nomination rules: Application*

Section 809I(1) ITA provides:

This section applies if—

- (a) any of an individual’s nominated income and gains is remitted to the UK in a tax year,
- (b) any of the individual’s remittance basis income and gains has not been remitted to the UK in or before that year, and
- (c) the £10 test is met for that year.

#### 19.18.6 *The £10 test*

Section 809I ITA provides:

- (5) The £10 test is met for the tax year mentioned in subsection (1)(a) (“year X”) if, taking each nomination year separately, the cumulative total as respects at least one nomination year exceeds £10.
- (6) In relation to a nomination year—
  - (a) “the cumulative total” means the sum, for all the tax years in aggregate up to and including year X, of the amounts of relevant

---

<sup>100</sup> See 19.3 (Ingredients of mixed fund).

- income and gains remitted to the United Kingdom in those tax years from that nomination year, and
- (b) “relevant income and gains” means the income and chargeable gains nominated by the individual under section 809C for that nomination year.

This is therefore a de minimis rule.

The 2011 remittance consultation paper explains the background:

2.67 Non-domiciles who have been UK resident in at least seven of the past nine tax years are liable to an annual charge of £30,000 if they claim the remittance basis. The rules governing the payment of this charge can be very complicated and result in significant administrative burdens and inconvenience for the taxpayer.

2.68 Those who elect to pay the charge are required to nominate an amount of their overseas income and capital gains which is taxable on the arising basis and is deemed to generate an additional tax charge of £30,000.

2.69 There are complicated rules to ensure that an individual cannot subsequently remit any of the income or capital gains which they have nominated before other overseas income and capital gains which would be taxed in the UK when remitted. This must be in addition to the UK tax to which they are otherwise liable on income and capital gains arising in the UK or remitted to the UK. This nomination ensures that the £30,000 is a tax charge on overseas income and gains rather than a standalone levy.

2.70 Individuals can encounter significant administrative difficulties where they fail to keep their nominated income and capital gains segregated from other income and capital gains. In such situations, an individual might inadvertently remit some of their nominated income and capital gains to the UK. This will mean that they become subject to complicated identification rules which trace the origin of each payment and ensure that the nominated amounts are always the last to be remitted. In the absence of these rules, it would be possible for an individual to reduce significantly the amount of tax they pay on the income or capital gains which they remit to the UK.

2.71 To avoid some of these complexities, it is common for an individual to open an overseas bank account which has the sole purpose of holding funds to generate sufficient income to be nominated for the purposes of the annual charge. Whilst this should allow the individual to avoid the identification rules, the need to set up a special overseas bank account involves additional expenditure and administrative obligations. Moreover, even where an individual has a dedicated bank account for their nomination, it cannot be guaranteed that they would never inadvertently

make remittances from the account.

2.72 The Government recognises that this can result in excessive and unhelpful complexity which is hard for the taxpayer to understand. It therefore proposes to amend the legislation to allow individuals to remit the first £10 of income or capital gains which they nominate free of tax and without becoming subject to the identification rules. This will enable them to nominate up to £10 of their foreign income or capital gains for the purposes of the £30,000 charge without having to ensure they do not subsequently remit any part of that nominated amount to the UK. Many individuals only nominate a small amount of foreign income or capital gains and so this simplification would remove the risk of them inadvertently remitting the nominated income and triggering the identification rules.

2.73 This would significantly reduce the need to maintain an overseas bank account solely for the purposes of nominating income and capital gains, whilst making the nomination rules less administratively onerous.

2.74 The remaining rules applying to nominated income and capital gains will remain unaltered.<sup>101</sup>

The EN accompanying the draft clauses provides:

130. Where [remittance basis taxpayers] remit the foreign income and gains which they have nominated under section 809C before any other unremitted foreign income and gains, the order in which income and gains are remitted is determined by sections 809I and 809J.

131. The amendments made by Part 4 of the Schedule allow such individuals to remit up to £10 each year of their income or gains which they have nominated without having to ensure they do not subsequently remit any part of that nominated amount into the UK.

132. An illustration of how the new rules work is set out below.

133. In year 1, an individual nominates £5 income and gains from that year which they remit to the UK. As the total amount of nominated income and gains remitted is less than £10, they do not meet the £10 test and section 809I does not apply.

134. In year 2, the individual nominates £20 from year 1, of which they remit £7. The amounts of nominated income and gains from year 1

---

101 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81510/consult\\_condoc\\_non\\_domicile\\_individuals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf)

exceeds £10, so section 809I will apply.

The example is somewhat far-fetched, since an individual would either nominate a nominal £1 or £10 or else nominate a substantial amount.

### 19.18.7 Nomination rules

Assuming that the conditions for the application of the nominated income remittance rules are satisfied, we move on to s.809I(2) ITA which provides:

Income tax and capital gains tax are charged, for that year and subsequent tax years, as if

- [a] the income and chargeable gains treated under section 809J as remitted to the UK by the individual in that tax year had been so remitted
- [b] (and income and chargeable gains of the individual that were actually remitted in that year had not been).

So we turn to s.809J ITA, which sets out artificial or fictional remittance rules which I call the “**nominated income remittance rules**”. (It would be more accurate to call this “the nominated income/*gains* remittance rules”, but for convenience I generally refer to income (rather than income/*gains*) and leave *gains* to be understood.)

Section 809J(1) ITA provides:

If section 809I applies, the following steps are to be taken for the purpose of determining the income or gains treated in a tax year (“the relevant tax year”) as remitted to the UK by the individual.

The section sets out six steps. It is easier to follow the steps if one has an example in mind.

Suppose T (a remittance basis taxpayer) has remittance basis income and gains of £10k per annum of each of the nominated income/*gains* categories thus:

Category	Type of income (in short)	Year 1	Year 2
(a)	relevant foreign earnings	£10k	£10k
(b)	foreign specific employment income (FSEI)	£10k	£10k
(c)	relevant foreign income	£10k	£10k
(d)	foreign chargeable gains	£10k	£10k
(e)	foreign taxed relevant foreign earnings	£10k	£10k
(f)	foreign taxed FSEI	£10k	£10k

(g)	foreign taxed RFI	£10k	£10k
(h)	foreign taxed gains	£10k	£10k

Suppose T has in addition to the above £30k nominated income and gains per annum.

T remits nothing in year 1. In year 2 T remits:

- (a) £1k from T's nominated income/gains.
- (b) £80k from T's remittance basis income/gains.

This brings the nominated income remittance rules into action.

*Step 1*

*Find the total amount of—*

- (a) the individual's nominated income and gains, and*
  - (b) the individual's remittance basis income and gains,*
- that have been remitted to the UK in the relevant tax year.*

*This amount is "the relevant amount".*

In the example the relevant tax year is year 2. Applying the facts of the example, the relevant amount is £81k.

*Step 2*

*Find the amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C) that is within each of the categories of income and gains in paras (a) to (h) of subsection (2).*

*If none of sections 809B, 809D and 809E apply to the individual for that year, treat those amounts as nil (and accordingly go to step 6).*

"The amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C)" means the remittance basis income/gains. (The drafter has forgotten to use the term which was defined (twice) for this purpose; but it does not matter.) The amount in the example is as set out in the table above.

*Step 3*

*Find the earliest paragraph for which the amount determined under step 2 is not nil.*

The earliest paragraph is para (a).

*If that amount does not exceed the relevant amount, treat the individual*

*as having remitted the income or gains within that paragraph (and for that tax year).*

The individual is treated as having remitted £10k relevant foreign earnings, category (a) for year 2.

Otherwise, treat the individual as having remitted the relevant proportion of each kind of income or gains within that paragraph (and for that tax year).

“The relevant proportion” is the relevant amount divided by the amount determined under step 2 for that paragraph.

(Had the total remittance been (say) £5k then the relevant proportion would have been  $\text{£}5\text{k} \div \text{£}10\text{k} = 50\%$  so the transfer would have been treated as containing £5k RFE category (a) for year (1).)

*Step 4*

Reduce the relevant amount by the amount taken into account under step 3.

The relevant amount is reduced to £71k.

*Step 5*

If the relevant amount (as reduced under step 4) is not nil, start again at step 3.

In step 3, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step.

Following this iterative procedure a total of eight times, the transfer is treated as containing:

(a)	relevant foreign earnings	£10k
(b)	foreign specific employment income	£10k
(c)	relevant foreign income	£10k
(d)	foreign chargeable gains	£10k
(e)	foreign taxed RFE	£10k
(f)	foreign taxed SEI	£10k
(g)	foreign taxed RFI	£10k
(h)	foreign taxed gains	<u>£10k</u>
	<b>Total</b>	<b>£80k</b>

The relevant amount is by this stage reduced to £1k. We move to the next step:

*Step 6*

*If the relevant amount (as reduced) is not nil once steps 3 to 5 have been undertaken in relation to all paragraphs of subsection (2) for which the amount determined under step 2 is not nil, start again at step 2.*

*In step 2, read the reference to the foreign income and gains of the individual for the relevant tax year as a reference to such of the foreign income and gains of the individual for the appropriate tax year as had not been remitted<sup>102</sup> by the beginning of the relevant tax year.*

*“The appropriate tax year” is the latest tax year which is—*

- (a) before the last tax year for which step 2 has been undertaken, and*
- (b) a tax year for which section 809B, 809D or 809E applies to the individual.*

Thus we repeat step 2 a last and ninth time, reading “the relevant tax year” to mean year 1. So the remittance of £81k is treated as being:

(a) relevant foreign earnings	£11k
(b) foreign specific employment income	£10k
(c) relevant foreign income	£10k
(d) foreign chargeable gains	£10k
(e) foreign taxed RFE	£10k
(f) foreign taxed SEI	£10k
(g) foreign taxed RFI	£10k
(h) foreign taxed gains	<u>£10k</u>
<b>Total</b>	<u><b>£81k</b></u>

March 2009 Qs & As provides:

**Q3:** HMRC have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of “tainting” every other source of income of that type. For example if an individual has an account with one bank in Jersey

---

102 Section 809J(5) ITA provides:

In step 6 of subsection (1) the reference to income or gains being remitted is—

- (a) as respects any tax year before section 809I applies, to income or gains being remitted to the UK, and
- (b) as respects any tax year in relation to which that section applies, to income or gains treated under this section as so remitted.

and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?

**A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the “nominated” account. That might be the entire account number, or the account “name”, or some other unique identifying feature of the account.

March 2009 Qs & As makes an obvious point:

**Q6:** If I use nominated income or gains to pay the remittance basis charge of £30,000 it would appear that does not trigger the provisions in sections 809I and 809J. Is that right?

**A:** If £30,000 of the nominated income or gains is brought to the UK to pay the remittance basis charge, it is treated as not remitted to the UK under section 809V. Therefore section 809I does not apply because none of the individual’s nominated income or gains is regarded as having been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so section 809I will be triggered.

#### 19.18.8 *Accidental remittance of nominated income/gains*

The RDR Manual provides:

**RDRM35140 Remittances of nominated income or gains - misc** [Jan 2019]

##### *Accidental remittances*

If an individual accidentally remits any nominated income or gains to the UK then HMRC will (using its discretionary powers) allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s809I and s809J will not apply.

HMRC will only use its discretion in such situations as long as there have

been no relevant transactions or other benefits conferred on a relevant person in the interim. Otherwise the s809J ordering rules will apply. For example, if £20,000 is transferred in error from an overseas bank to a UK bank account and two weeks later the account owner realises the mistake and immediately transfers that £20,000 directly back to the overseas bank account, HMRC will accept that s809I and s809J do not apply. However if, for example, the £20,000 was spent in the UK and then £20,000 from another UK account was transferred back to the overseas account then s809I and s809J do apply.

This recognises the unfairness of the nominated income remittance rules. Contrast 17.17 (Bank error).

#### 19.18.9 *Nominated income used to pay remittance basis charge*

The RDR Manual provides:

##### **RDRM35140 Remittances of nominated income or gains - misc** [Jan 2019]

###### *Accidental remittances*

If an individual accidentally remits any nominated income or gains to the UK then HMRC will (using its discretionary powers) allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s.809I and s.809J will not apply.

#### 19.18.10 *HMRC example*

The RDR Manual provides:

##### **RDRM35150 Remittances of nominated income or gains** [Apr 2019]

###### *Example 1* (Alexandria)

	Foreign gains Para (d)	Jersey RFI Para (c)	Jersey RFE Para (a)	Nomination (from Jersey RFI)
2010-11	£250,000	£75,000	£200,000	£75,000 RFI
2011-12	£300,000	£80,000	£120,000	£75,000 RFI <sup>103</sup>
2012-13	Nil	£75,000	£280,000	£75,000 RFI
2013-14	£130,000	£80,000	£150,000	£75,000 RFI
Totals	<u>£680,000</u>	<u>£310,000</u>	<u>£750,000</u>	

103 The author ignores the complication that the rate of income tax has risen to 50%.

*In 2013-14 A actually and identifiably remits*

£30,000 Jersey relevant foreign income that she nominated in 2010-11,  
 £140,000 foreign chargeable gains from 2011-12 and  
 £50,000 relevant foreign earnings from 2013-14.

*The ordering rules are triggered. The “relevant year” is 2013-14*

**Step 1** Identify nominated income and gains remitted in the relevant year      £30,000      **Relevant Amount**      £220,000

Identify the remittance basis income and gains remitted in the relevant year      £190,000

**Step 2**

Find the total amount of the individual’s foreign income and gains (excluding those nominated) for the relevant tax year      **Para (a)** Relevant foreign earnings (not subject to a foreign tax)      £150,000

**Para (c)** Relevant foreign income (not subject to a foreign tax)      £5,000

**Para (d)** Foreign chargeable gains (not subject to a foreign tax)      £130,000

**Step 3** Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil.      **Para (a)**      £150,000

**Step 4** Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified      £220k less £150k = £70,000

**Step 5** If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

**Step 3** repeated      **Para (c)**      £5,000

**Step 4** repeated      Relevant Amount reduced to:      £65,000

**Step 5** In the order of preference listed above repeat Steps 3 and 4.

**Step 3** repeated      **Para (d)**      £130,000

**Step 4** If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain.

*So A will be taxed on £220,000 of remittances as if she had actually remitted the following*

		2010-11	2011-12	2012-13	2013-14
<b>Foreign chargeable</b>	Accruing in year	£250,000	£300,000	Nil	£130,000
	Actually remitted	£Nil	£140,000	£Nil	£Nil

<b>gains</b>	Treated as remitted	£Nil	£Nil	£Nil	£65,000
<b>Relevant foreign income Nominated</b>	Arising in year	£75,000	£75,000	£75,000	£75,000
	Actually remitted	£30,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil
<b>Relevant foreign income Not nominated</b>	Arising in year	£Nil	£5,000	£Nil	£5,000
	Actually remitted	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000
<b>Relevant foreign earnings</b>	Accruing in year	£200,000	£120,000	£280,000	£150,000
	Actually remitted	£Nil	£Nil	£Nil	£50,000
	Treated as remitted	£Nil	£Nil	£Nil	£150,000

If in future years she actually remits any of these monies, the ordering rules will treat her as having remitted something else instead (refer to RDRM35160 - example 1 continuation).

### 35160 Remittance of “nominated” income or gains [Jan 2019]

#### Example 1 - Continued

Moving forward, in 2014-15 A has relevant foreign earnings of £80,000, but no other foreign income or gains. She decides not to use the remittance basis in that year.

In 2014-15 A actually brings into the UK;

£5,000 Jersey relevant foreign income that she did not nominate in 2013-14 (note 1)

£80,000 relevant foreign earnings from 2013-14 and

£80,000 relevant foreign earnings from 2014-15

Although A is not using the remittance basis in 2014-15, the ordering rules at s809J ITA 2007 are still required to determine what she is to be taxed as having remitted in that year.

The relevant year is 2014-15.

#### Ordering rules at 2014-15

**Step 1** Identify nominated income and gains remitted in the relevant year (2014-15)      £nil      **Relevant Amount**      £85,000

Identify the remittance basis income and gains remitted in the relevant year      £85,000 (see note 2)

**Step 2** Find the total amount of the individual's foreign income and gains (excluding those nominated) for the relevant tax year If the remittance basis was not used in that year (that is sections 809B, 809D or 809E did not apply), treat those amounts as nil and go to step 6      Nil

**Step 6** If the relevant amount is not nil, start again at step 2. Take the reference to “relevant year” to be a reference to foreign income of gains of the individual for the earliest ‘appropriate year’ previous to the last tax year from which Step 2 was undertaken.

**Step 2** Find the total amount of the      **Para (d) Foreign**      £65,000

individual’s foreign income and gains (excluding those nominated) for the appropriate tax year (2013-14) (refer to Note 3)

**Step 3** Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil. **Para (d)** £65,000

**Step 4** Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified. Relevant Amount £85k less £65k = £20,000

**Step 5** If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

**Step 6**

If the relevant amount is not nil after Steps 3-5 have been completed for the year, start again at step 2. Take the reference to ‘relevant year’ to be a reference to foreign income of gains of the individual for the earliest ‘appropriate year’ previous to the lat tax year from which Step 2 was undertaken.

**Step 2** Find the total amount of the individual’s foreign income and gains (excluding those nominated) for the appropriate tax year (2012-13) **Para (a)** Relevant foreign earnings (not subject to a foreign tax) £280,000

**Step 3** Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil. **Para (a)** £280,000

**Step 4** If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So in 2014-15 A is treated as having remitted £20,000 relevant foreign earnings £65,000 foreign chargeable gains.

NB – The £80,000 relevant foreign earnings from 2014-15 that she brings in will be taxed on the arising basis in that year.

**Note 1** In 2013-14 A has £80,000 of Jersey relevant foreign income, of which £75,000 were nominated; if this £80,000 were all in the one single account, and there was nothing else in the account then, under the principle of this section the first £5,000 remitted in 2014-15 is accepted as being “not-nominated” income.

In this example it is of little practical difference because the s809J ordering rules have already been “triggerred” in 2013-14 by her remittance of nominated income (from 2010-11).

But if the ordering rules had not already been triggered, then because, this £5,000 Jersey relevant foreign income in 2014-15 can be accepted as being “un-nominated” income first and foremost, so A’s remittance of this £5,000 would not, of itself, have triggered the

s809J ordering rules in this year.

**Note 2** A's remittance basis income and gains are her total foreign income or chargeable gains for all tax years up to the "relevant tax year" (2014-15) in which she used the remittance basis under section 809B, section 809D or section 809E. It therefore excludes her relevant foreign earnings from 2014-15 because she is not using the remittance basis in that year.

**Note 3** the 'foreign income and gains 'for' the appropriate year exclude any:

- 'nominated' income or gains, or
- income or gains that were actually remitted to the UK before the beginning of the appropriate tax year or
- income or gains that were treated as remitted to the UK previously under section 809J before the beginning of the appropriate tax year.

In A's case, the £5,000 Jersey relevant foreign income from 2013-14, and the £80,000 relevant foreign earnings from 2013-14 that she actually remitted in 2014-15 were treated as having been remitted in 2013-14 by the ordering rules (refer to the earlier part of example 1 RDRM35150).

*Summary*

		2010-11	2011-12	2012-13	2013-14	2014-15
<b>Foreign chargeable gains</b>	Accruing in year	£250,000	£300,000	£Nil	£130,000	£Nil
	Actually brought to UK	£Nil	£140,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£130,000	£Nil
<b>Relevant foreign income</b>	Arising in year	£75,000	£75,000	£75,000	£75,000	£Nil
	Actually brought to UK	£30,000	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil	£Nil
<b>Nominated</b>						
<b>Relevant foreign income Not nominated</b>	Arising in year	£Nil	£5,000	£Nil	£5,000	£Nil
	Actually brought to UK	£Nil	£Nil	£Nil	£5,000	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000	£Nil
<b>Relevant foreign earnings</b>	Arising in year	£200,000	£120,000	£280,000	£150,000	£80,000
	Actually brought to UK	£Nil	£Nil	£Nil	£130,000	£80,000
	Treated as remitted	£Nil	£Nil	£20,000	£150,000	£Nil

## 19.19 Nominated income: Critique

In short, the effect of the nominated income remittance rule is that remittances are treated as being made in the nominated income/gains priority order, taking more recent years before earlier years (regardless of the actual remittances). As in the case of the "steps" of the mixed fund rules, one is tempted to ask: why didn't the statute simply say so?

But the drafting is the least of the problems of the nominated income remittance rule. The author of the EN anticipates criticism that this is administratively difficult and offers some tax planning advice:

14...The rules dealing with this in sections 809I and 809J will require additional records to be maintained from 6 April 2008 or the first year of residence in the UK, if later.

15. The record keeping necessary for sections 809I and 809J can be avoided if individuals ensure that “nominated” income or gains upon which the RBC is paid are not remitted to the UK, or only remitted after the remittance of all other unremitted income and gains since the first year of residence from April 2008. If an individual is confident they will never need to remit that “nominated” income or gains, paying the RBC will not involve any extra complexity or record keeping.<sup>104</sup>

Even if this advice were correct it would not help the majority of remittance basis taxpayers, but they should not complain: they are responsible for the problem, which they brought on themselves by making a remittance basis claim:

16. As mentioned earlier, those eligible can choose whether or not to claim the remittance basis for each particular year, depending on whether it is to their advantage to do so.

But even the administrative inconvenience is not the serious problem of the rule. The effect of the rule is that if the individual remits a penny of their nominated income/gains, one disregards entirely the actual remittances and charges on the basis of the fictional rules. Thus an individual who actually remits gains is taxed as if they remitted income (as long as they also remits a penny of nominated income). It is therefore in principle desirable to take care not to remit any nominated income/gains. The funds may be used abroad or used to pay the remittance basis charge.

## 19.20 Mixed funds: Critique

The ITA mixed fund rules operate on a daily, indeed minute by minute basis, as the rules must be applied at the time of every onshore and offshore transfer. They do not operate within a given tax year on a pro rata basis (contrast the s.87 or s.731 matching rules). If a client’s account

---

104 The last sentence is not correct. It is not enough that an individual is “confident that they will never need to remit that nominated income or gains”. The individual must be able to demonstrate to HMRC that they have not remitted, and that requires record keeping.

contains thousands of entries, the computations must be done thousands of times. The reader who has studied the chapter to here, and who contemplates applying these rules to the actual circumstances of a client, will agree that the mixed fund rule is unworkable.

Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 records the same view:

Delegates asked whether HMRC would be prepared to allow for apportionment on an annualised (rather than a monthly) basis. The legislation concentrates on transfers from mixed funds on the occasion of each and every transfer. HMRC did not think it was possible to override the intention of the legislation but agents considered that it would be unworkable to examine each and every debit and credit on the basis envisaged within a new legislation. ...

The overwhelming view put forward by external delegates was that without the availability of a methodology along the lines of SP 5/84 it would be impractical for any inward expatriate to claim access to the remittance basis because it would not be possible to perform the calculations required by the legislation.<sup>105</sup>

In their defence, HMRC make two points:

[1] HMRC reminded delegates that use of the remittance basis is voluntary as from 6 April 2008 and [2] that HMRC had been asked to bring in rules on remittance from mixed funds and rules relating to overseas transfers.

But as to point [1], the fact that the remittance basis is voluntary is no excuse for unworkable tax law. HMRC have overlooked<sup>106</sup> that the remittance basis is intended to make the UK an *attractive* place for foreign domiciliaries to reside. There is no need to comment on point [2].

A few months later HMRC issued SP 1/09 so the step thought impossible proved to be possible after all.<sup>107</sup> But while helping employees who qualify for overseas workday relief, that does not help other remittance basis taxpayers who face the same problems. Why were workday relief

---

105 <http://webarhive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm>

106 An alternative inference is that a conscious decision was made to undermine the remittance basis by making it difficult to operate.

107 See 33.23 (OWR (recent arrivers) mixed funds).

employees singled out for special treatment? The reason was presumably down to effective lobbying rather than any rational policy consideration.

The mixed fund legislation needs to be rethought from beginning to end – a challenging task, which could not possibly have been done in the few days available as the FA 2008 hurtled to the deadline for enactment. HMRC rejected this:

In particular, the Government will not look further at the following:

*Simplification* Reviewing and simplifying the mixed fund rules

*Government response* Although the Government appreciates that these rules can (!) be complicated to operate, it is essential to be able to identify different types of income, gains and capital as they are remitted from a single account. The Government cannot envisage an alternative approach to achieve this purpose which would not entail similar complexity or a significant Exchequer cost.<sup>108</sup>

But cleansing relief represents some second thoughts, though of a timid and one-off nature.

It is suggested that the rule ought to be that the person remitting from a mixed fund can determine what constituent of the fund the remittance consists of. That would be a significant simplification. The cost to the exchequer could be recovered by an adjustment in the remittance basis claim charge. The reform would be especially welcomed by those who actually try to comply with the present rules.

## CHAPTER TWENTY

# TRADING INCOME

### 20.1

#### *Cross references*

The following topics are considered elsewhere:

- 11.8 (Emigration of trader)
- 17.15.1 (What is trading income)
- 31.8 (Trade IP income)
- 50.1 (Profit fragmentation)

For ToA issues see:

- 45.7 (Income “payable” to person abroad)
- 45.16.2 (Trade income/loss of person)
- 118.2 (Tax collected from UK representatives)

### **20.1 Trading income: Introduction**

The taxation of trading income is governed by Part 2 ITTOIA/Part 3 CTA 2009. A full discussion would require many volumes. I focus on matters closest to the themes of this book.

For the meaning of “trade” see App.2.20 (Trade).

### **20.2 Charge on trading income**

The charge is as follows:

#### **s.5 ITTOIA**

Income tax is charged on the profits of a trade, profession or vocation.

#### **s.35 CTA 2009**

The charge to corporation tax on income applies to the profits of a trade.

The territorial scope of the charge is in s.6 ITTOIA/s.5 CTA 2009, but these provisions are not drafted in the same way and need to be considered separately.

## 20.3 Profession/vocation

Section 6(3) ITTOIA provides:

This section applies to professions and vocations as it applies to trades.

There are points where the distinction matters for tax, but none of these arise here. In this chapter, reference to a “trade” includes a profession or vocation.

### 20.3.1 *Profession/vocation: Critique*

It is suggested that the distinctions between trade/profession/vocation ought to be abolished: uniform rules should apply to trades, professions and vocations. That would be a worthwhile simplification. It would also solve the problem that no-one actually knows what is meant by “vocation”. The meaning of the word has drifted somewhat since it was used in the first Income Tax Act of 1799, but the word does not seem to be used in its ordinary contemporary meaning.

It is generally accepted that a company cannot carry on a profession or vocation, so this is already the case for CT.

## 20.4 IT territorial limit: Trading

### 20.4.1 *UK resident trader: IT*

Section 6(1) ITTOIA provides:

Profits of a trade arising to a UK resident are chargeable to tax under this Chapter wherever the trade is carried on.

Section 7 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the profits of the tax year. ...
- (4) This section is subject to Part 8 (foreign income: special rules).

Section 7(4) ITTOIA feeds into s.832, which incorporates the remittance basis if the trading income arises from a source outside the UK. It is therefore necessary to identify the source. Section 7(5) ITTOIA states the test of source of trading income:

And, for the purposes of section 830 (meaning of “relevant foreign income”), the profits of a trade, profession or vocation arise from a

source outside the UK only if the trade, profession or vocation is carried on *wholly* outside the UK.

This is a statutory statement of the pre-ITTOIA case law.<sup>1</sup> It is a strangely wide test of source. Applying this test, if a trade is carried on partly in country A and partly in country B, the source of the income is in country A *and* country B. For the same income to have a source in two different countries is contrary to the natural meaning of “source”, and contrary to the purpose of the concept which is to locate a source in one jurisdiction in order to identify one state with jurisdiction to tax. (Similarly an individual can have only one domicile.)

The explanation is that s.7(5) ITTOIA does not provide the natural meaning of “source”; it is an artificial or deeming definition. It is fortunate (but not surprising) that commonwealth countries which adopted a UK style income tax did not adopt this rule. Thus Commonwealth cases on the source of trading income are not relevant here.

If any part of the trade is carried on in the UK then the entire trade has a UK source and does not qualify for the remittance basis. There is not even a *de minimis* rule; contrast the incidental duties disregard which applies to employment income.<sup>2</sup>

The former International Tax Handbook discussed the old case law, which still holds good under ITTOIA:

### **209. San Paulo case**

[The San Paulo Railway Company (*San Paulo (Brazilian) Railway Company v Carter* 3 TC 407)] ... was a UK incorporated company with its board meetings in London. The whole of its physical undertaking was in South America and while it accepted that it was resident here it argued that its business was carried on wholly abroad where its railway was. The Courts held that the head and brain of the trading venture was here and that the profits were those of a trade partly carried on here and that, accordingly, Case I [UK source] applied. ...

### **210. Trade partly in UK**

The principle underlying the San Paulo decision is that a trade carried on partly in the UK is within Case I. The factors which decide whether a company is resident in the UK by reason of central management and control are, as will be seen, similar to those which decide whether its trade should be within Case I or

---

1 See Avery Jones, “Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis”, *Studies in the History of Tax Law* (Vol 1 2004) p.26, <https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf>

2 See 33.16 (Incidental duties in UK).

Case V [foreign source] and the result is that for many years in the corporate sector the only examples seen of Case V trades were those in which a company is a partner in an overseas trade. ...

**211. *Ogilvie v Kitton***

But other cases were to show how difficult it was going to be, except on very exceptional facts, to establish that any trade of a resident person was carried on wholly abroad. There was, for example, Mr Ogilvie in *Ogilvie v Kitton* (5 TC 338). He lived in Aberdeen and ran a shop in Canada. To say that he ran the shop really begs the question because he simply received reports from his manager in Canada and did not in fact intervene actively in the business at all, merely taking a tacit interest in things from the information in the reports. It was held that the head and brain of the trading venture was in Aberdeen and that the profits were assessable under Case 1.

In short, if a sole trader is UK resident it is in practice impossible to arrange that their trading income has a foreign source. Section 7(4)(5) ITTOIA is dead letter law. The former International Tax Handbook recognised this at para 209:

That decision [*San Paulo*] suited the Revenue very well. We no longer had to worry about remittances ... And so we effectively got on to a statutory arising basis for trades which, in everyday language, were wholly overseas and we reached that position purely through the interpretation of the statute by the Courts. ...

See too 7.18 (CMC/trade income source compared).

For completeness: s.95 ITA restricts loss relief for trades carried on wholly outside the UK, but since it is almost impossible to arrange that, the section is also dead letter law, at least as far as sole traders are concerned.

Assuming it is desired to retain the present law, it would be sensible to state expressly that UK resident sole traders did not qualify for the remittance basis on foreign source trading income.<sup>3</sup> But perhaps the change is more trouble than it is worth.

#### 20.4.2 *UK resident trader: Planning*

---

<sup>3</sup> Similar considerations apply to employment income, see 33.16 (Incidental duties in UK), but the trading rules also need to address partnership trading income, as the remittance basis can apply to a UK resident partner - unless that rule too were to be reconsidered.

If a remittance basis taxpayer carries on a trade partly in and partly out of the UK, the individual will be taxed on the arising basis and not under the remittance basis. In these circumstances the individual may be able to divide up their activities into two parts— those in and those out of the UK. The individual will then be carrying on two separate activities, of which at least one will yield foreign source income and qualify for remittance basis treatment.

How is this division to be achieved? Overseas activities could be carried on by a partnership controlled abroad. The offshore partner may be a company. This route was successfully taken by Sir David Frost.<sup>4</sup> Alternatively the activities could be carried on by a company or trust. In this way foreign trading income may be converted into foreign employment or dividend income which would enjoy a more beneficial tax treatment.

#### 20.4.3 *Non-resident trader: IT*

An entirely different rule applies to trading income arising to a *non-resident* person. Section 6(2) ITTOIA provides:

Profits of a trade other than a trade of dealing in or developing UK land<sup>5</sup> arising to a non-UK resident are chargeable to tax under this Chapter only if they arise—

- (a) from a trade carried on wholly in the UK, or
- (b) in the case of a trade carried on partly in the UK and partly elsewhere, from the part of the trade carried on in the UK.

The pre-ITTOIA wording imposed a charge on non-residents on income arising:

from any trade, profession or vocation exercised within the UK.<sup>6</sup>

The meaning was the same so pre-ITTOIA case law is still relevant.

It is not likely that a non-resident will be carrying on a trade *wholly* in the UK (for the same reasons that a UK resident cannot in practice carry on

---

4 *Newstead v Frost* 53 TC 525.

5 See 21.3 (Dealing/developing UK land).

6 Section 18 ICTA 1988 (repealed). It was accepted (though not stated in statute) that where a trade was exercised partly in the UK, income was apportioned and only the UK part was taxable.

a trade wholly outside the UK). So we are not concerned with para (a).

Section 6(2)(b) effectively raises two issues: (1) When is a trade carried on partly in the UK? (2) If a trade is carried on partly in the UK, how does one identify the profits from that part?

This is sometimes paraphrased by asking the question whether (or to what extent) the source of the trading income is in the UK. There seems nothing wrong with that; it is the correct and natural meaning of the word “source”. Since s.7(5) ITTOIA uses the word “source” in an artificial sense in the rules relating to UK resident traders, I have wondered whether it would aid clarity to avoid the word “source” in the context of the rules for non-residents. But it is not practical to avoid the use of the word “source” here<sup>7</sup> so one simply needs to remember that in the context of trading income, source has distinct meanings, or perhaps more accurately, there are distinct tests of source, for residents/non-residents.

#### 20.4.4 *To whom trading income arises*

Since different IT rules apply depending on whether trading income arises to a resident/non-resident, it is necessary to identify the person to whom the income arises.

Suppose a non-resident trust is carrying on a trade. If the trading income accrues to the trustees, they are taxed in accordance with the rules relating to *non-residents* so the trustees would only be subject to UK income tax if the trade was carried on partly in the UK, and then only on the profits (if any) attributable to that part.

However if the life tenant of a transparent (*Baker*-style) trust was resident in the UK, then the profits of the trade arise to a UK resident, and the life tenant is taxed in accordance with the rules relating to UK residents: ie on an arising basis unless the strict condition is satisfied that the trade is carried on by the trustees wholly outside the UK.

Suppose a non-resident settlor-interested trust with a settlor who is a remittance basis taxpayer. One might think that the settlor would be taxable on an arising basis only on the part (if any) of the trading income attributable to carrying on the trade in the UK. The balance of the profits one might think taxable only (if at all) under the s.624 remittance basis. But this is not the case. Since the trust income is deemed to be that of the

---

<sup>7</sup> Since relevant case law and foreign statutes regularly use the word “source”.

UK resident settlor, the settlor is taxed in accordance with the rules relating to UK residents: ie the settlor is taxed on an arising basis unless the strict condition is satisfied that the trade is carried on by the trustees wholly outside the UK.

What if the trade is carried on by a non-resident company within s.720 ITA? The transferor is treated as receiving s.720 income which is not trading income. However, the s.720 remittance basis applies only if the income of the person abroad would be RFI if it were the individual's.<sup>8</sup> So for the purpose of the s.720 remittance basis one must apply the rules relating to UK residents: ie the transferor is taxed on an arising basis unless the strict condition is satisfied that the trade is carried on by the company wholly outside the UK.

#### 20.4.5 *Trading income of split year*

Section 6(2A) ITTOIA provides a sensible split-year rule:

If the tax year is a split year as respects a UK resident individual, this section has effect as if, for the overseas part of that year, the individual were non-UK resident.

See too 11.8 (Emigration of trader).

### 20.5 **CT territorial limit: Trading**

#### 20.5.1 *UK resident company trader*

Section 5(1) CTA 2009 provides:

A UK resident company is chargeable to corporation tax on income on all its profits wherever arising (but see Chapter 3A for an exemption from charge in respect of profits of foreign permanent establishments).<sup>9</sup>

#### 20.5.2 *Non-resident company trader*

Section 5(2) CTA 2009 provides:

A non-UK resident company is within the charge to corporation tax on income only if—

(a) it carries on a trade of dealing in or developing UK land (see

---

<sup>8</sup> See 46.20 (s.720 remittance basis).

<sup>9</sup> I do not consider this exemption here.

- section 5B)<sup>10</sup>, or
- (b) it carries on a trade in the UK (other than a trade of dealing in or developing UK land) through a permanent establishment in the UK,<sup>11</sup> ...

### 20.5.3 Profit of PE

Section 5(3) CTA 2009 identifies the amount on which CT is charged:

A non-UK resident company which carries on a trade in the UK through a permanent establishment in the UK is chargeable to corporation tax on all its profits wherever arising that are chargeable profits as defined in section 19 (profits attributable to its permanent establishment in the UK)...

Section 19 CTA 2009 defines “chargeable profits”:

- (1) This section applies if a non-UK resident company carries on a trade in the UK through a permanent establishment in the UK.
- (2) The company’s chargeable profits are its profits that are—
  - (a) of a type mentioned in subsection (3), and
  - (b) attributable to the permanent establishment in accordance with sections 20 to 32.
- (3) The types of profits referred to in subsection (2)(a) are—
  - (a) trading income arising directly or indirectly through or from the establishment,
  - (b) income from property or rights used by, or held by or for, the establishment, and
  - (c) chargeable gains falling within section 10B of TCGA 1992 (non-resident company with UK permanent establishment)—
    - (i) as a result of assets being used in or for the purposes of the trade carried on by the company through the establishment, or
    - (ii) as a result of assets being used or held for the purposes of the establishment or being acquired for use by or for the purposes of the establishment.

The topic of how profits are attributed to a PE needs a long book to itself; it is not discussed here.

---

<sup>10</sup> See 21.3 (Dealing/developing UK land).

<sup>11</sup> The drafting is based on article 7 OECD Model.

## 20.6 Where is trading income source

The UK case law is mostly antique, because in practice double taxation treaties often apply and then the issues may not arise. But of course that is not always the case. The former International Tax Handbook is erudite and still helpful.<sup>12</sup> Commonwealth cases on the source of trading income can be helpful<sup>13</sup> though unfortunately these cases are inconsistent.<sup>14</sup>

## 20.7 Place where contract made

The former International Tax Handbook provided:

### 813. *Erichsen v Last*

Another very early case was *Erichsen v Last* [4 TC 422] which was heard in the Court of Appeal in 1881. It is a highly important case and, curiously, was not published in Tax Cases until some twenty years after the decision. It is perhaps a pity that *Erichsen v Last* was concerned with a very special sort of trade – the relaying of telegraph messages. The application of the ideas which emerge from *Erichsen v Last* to other trades is, because of its special facts, rather difficult. The facts are simple enough. Erichsen was the UK representative of the Great Northern Telegraph Company of Copenhagen. The company was not resident here but it had three cables running across the North Sea to bases in Scotland and it had a staff of operators here. Messages were collected through an arrangement with the Postmaster General. The Post Office collected the money and deducted its agreed remuneration before handing over the messages to the company's operators here. The company's own staff then transmitted the messages across the North Sea. Thereafter, depending on their destination, they passed through cables owned by the Danish and Russian governments to their destinations which might have been as far off as Japan. The company made a weak sort of claim that it was not trading here but it went on to say that if it was, it ought to be taxed only on the profit arising from the relaying of the messages along the main cable to Denmark. It was making the point that some of the profit arose from the transmission along other cables which had absolutely nothing to do with the UK. The first thing the judgments in the Court of Appeal make clear is that the matter

---

12 Tax Bulletin 18 provides a brief summary, not set out here.

13 See 15.9 (Non-UK cases on source).

14 See Littlewood's scholarly article "The Privy Council, the Source of Income and *Stare Decisis*" [2004] BTR 121; Venables, "The Territorial Source of Income" OTPR, Vol 7, p.177, <http://www.khplc.co.uk/reviews> Wong, "A comparative study of the taxation of business profits - especially 'online' profits - in Australia and the Hong Kong Special Administrative Region of the People's Republic of China" (2009) <http://arrow.monash.edu.au/hdl/1959.1/56990>

is wholly one of fact. The judgments then separate two questions for decision. First, is there trading in the UK? Brett LJ says this on page 425. His words are important because it is here that the significance of contract – place of contract – begins.

“Now, I think it would be first of all nearly impossible and second wholly unwise to attempt to give an exhaustive definition of when a trade can be said to be exercised in this country. The only thing that we have to decide is whether upon the facts of this case it can be said that this company is carrying on a profit earning trade in this country. Now I should say that wherever profitable contracts are habitually made in England by or for a foreigner with persons in England, because those persons are in England, to do something for or supply something to those persons, such foreigners are exercising a profitable trade in England, although everything done by or supplied by them in order to fulfil their part of the contract is done abroad. The profit arises to them from the contract which they make. The profit which they derive can only be derived from the payment which is to be made to them by the person with whom they contract. In the given case they would not have any such contract as they are in the habit of making unless it was a contract made in England with a person who is in England because he is in England. Observe, if the person or someone acting for him were not in England he would not be wanting to send a telegraph message from England”.

The language is now over 100 years old and while it may perhaps look a little old fashioned today its meaning seems plain. The Court was saying: “You, the customer, are in England and because you are here you want goods here (or in the case in point, you want a message sent from here). The profit comes from the contract, the contract is here and there is trading in England and it is nonetheless trading in England even though the goods come from abroad or the service is provided through electric cables which are partly abroad”. ...

### **815. First champagne cases**

*Erichsen v Last* was followed by the so-called champagne cases. There were three leading champagne cases. In the first two, the Revenue succeeded in a claim that the French champagne houses concerned were trading in the UK through agents in London. In the Pommery case [*Pommery and Greno v Apthorpe* 2 TC 182] there was no express finding as to where contracts were made but most orders were met from stock held in the UK. In the Werle case [*Werle v Colquhoun* 2 TC 402] the Court of Appeal made it clear that they considered the contracts to be made by the agents here on behalf of their principal.

These two houses were producers of champagne as well as sellers of champagne and it is reasonably clear that the Revenue did not claim to tax the producer’s profit. In the Pommery case at page 189, the Judge specifically referred to the difficulty of calculating the profit; he said that there might be some difficulty as to the manner of calculation in deciding what amount of expenditure to put against the profits and wondered whether it would be proper to look at the goods

sent over to England and to put a fair valuation upon them as they arrived. That he said was a matter of quantum, a matter for the consideration of persons skilled in such things.

In the Werle case on page 413 Fry LJ had a similar approach, he said

“A small shopkeeper... is plainly carrying on a trade in the place where the shop is ... The question, however, becomes more difficult when the trade is carried on, as in the present case, in a far more complicated manner ... when the contract may be in one place, the goods in another, the principal in another and the goods may be delivered in some other place. We have, however, simply to do this, to take all the relevant facts and the mode in which the business is carried on, and to ask ourselves whether that business be or be not carried on within the UK. It appears to me that the same business may in some sense be carried on in many places. The Head Office of a firm, the place where the goods are manufactured, the place where the contracts are made, may all of them be places in which the business or parts of the business is or are carried on. Now, in the present case what we find is this, that the appellants reside in France, carrying on there the business of vineyard proprietors, champagne makers and champagne merchants, no doubt a large portion of that business is carried on within France, but a portion of that business is that of champagne merchants. Now, that means, as I understand, the selling of champagne and that business they carry into effect in England through the intervention of a firm of agents in this country.”

### **816. Contracts abroad**

The last of the champagne cases is *Grainger v Gough* [3 TC 311 and 462] and it is a very significant case. The Court of Appeal made no distinction between this and the earlier cases and found that the champagne house was liable on its trading here. ...

But Lord Esher and his fellow judges were overruled by the House of Lords on the question of whether there was liability at all. That was on the basis that in this particular case, contracts were not made in the UK. Although to the customer there may have been little difference between buying through the agents in the first two cases and buying through the agents in the third, there was a difference in the arrangements which the House of Lords saw as vital in determining the non-resident's liability to UK tax. In finding that the contracts were not made in the UK the House of Lords drew the now classic distinction between trading in the UK which involves liability and trading with the UK which does not. Non-residents with customers here commonly rely on this distinction.

The House of Lords may well have had it in mind that if we sought too strenuously to tax foreigners who sold goods here, we might be faced with hostility by countries to which we were exporters and which might seek to tax those exporters in parallel circumstances. The thought is not directly expressed but there is a hint of it at the end of Lord Herschell's judgment on page 468.

## **20.8 Place-of-contract test rejected**

The former International Tax Handbook provided:

**817. Place of contract not decisive**

There are later judgments and very important judgments which tend to water down a little the great emphasis on place of contract. Lord Atkin speaking in the *Smidth* case [*Smidth v Greenwood* 8 TC 193] in 1921 said this

“It (the place of contract) is obviously a very important element in the enquiry and if it is the only element the assessments are clearly bad. The contracts in this case were made abroad. But I am not prepared to hold that this test is decisive. I can imagine cases where a contract of resale is made abroad, and yet the manufacture of the goods, some negotiation of the terms, and complete execution of the contract take place here under such circumstances that the trade was in truth exercised here. I think that the question is, where do the operations take place from which the profits in substance arise?”

This is sometimes called “the operations test”. It is not in fact a “test” as such, because further guidance is needed to identify where the profits in substance arise. It is however a rejection of the place of contract test. The former International Tax Handbook gave one further quote to drive the point home:

In one of the few fairly modern<sup>15</sup> cases on this subject, the *Firestone* case [*Firestone Tyre & Rubber v Lewellin* 37 TC 111 at p.142] in 1957, Lord Radcliffe said this

“But he (Counsel for the Appellants) rightly reminded us that more than once the place where the contract is made has been spoken of as the ‘crucial’ test or, again, as the ‘most vital’ element. Speaking for myself, I do not find great assistance in the use of a descriptive adjective such as ‘crucial’ in this connection. It cannot be intended to mean that the place of contract is itself conclusive. That would be to re-write the words of the Taxing Act, and could only be justified if there was nothing more in trading than the act of sale itself. There is of course much more. But if ‘crucial’ does not mean as much as this, it cannot mean more than that the law requires that great importance should be attached to the circumstance of the place of

---

15 I guess that this passage in the former International Tax Handbook was written in the 1980s.

sale. It follows, then, that the place of sale will not be the determining factor if there are other circumstances present that outweigh its importance or unless there are no other circumstances that can.”

This approach is adopted in the Privy Council. The Hong Kong Revenue have issued useful guidance (the “**Hong Kong guidance note**”<sup>16</sup>) which provides:

7. Lord Bridge explained the “broad guiding principle” in *Hang Seng Bank* at 322H to 323A in the following terms: “But the question whether the gross profit resulting from a particular transaction arose in or derived from one place or another is always in the last analysis a question of fact depending on the nature of the transaction. It is impossible to lay down precise rules of law by which the answer to that question is to be determined. The broad guiding principle, attested by many authorities, is that one looks to see what the taxpayer has done to earn the profit in question.”

8. The “operations test” was further elaborated by Lord Jauncey in *HKTVBI* at 407C-D:

“*Smidth v Greenwood* [1921] 3 K.B. 583 was cited in *Hang Seng Bank* case and their Lordships do not doubt that Lord Bridge has in mind the judgment of Atkin L. J. in that case and in particular the passage when he said, at p.593: ‘I think that the question is, where do the operations take place from which the profits in substance arise?’ Thus Lord Bridge’s guiding principle could properly be expanded to read ‘one looks to see what the taxpayer has done to earn the profit in question and where he has done it.’”<sup>17</sup> ...

21. When Lord Bridge said in *Hang Seng Bank* that profits from buying and reselling of commodities were derived from the place where “the contracts of purchase and sale were effected”, he could not merely mean legally executed (as this would depend on formal legal rules of offer and acceptance). The Department agrees with the approach in *Magna* and will contemplate all the relevant operations carried out to earn the

---

16 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

17 Similarly Lord Jauncey in *HK-TVBI* at 409D-E:

“The proper approach is to ascertain what were the operations which produced the relevant profits and where those operations took place.”

profits, including the solicitation of orders, negotiation, conclusion, trade financing, shipment and performance of the contracts.

22. The Department does not merely look at the place of contract to determine the geographical source of profits. Where the contract is made by exchange of letters, by fax, or by e-mail, the application of contract law and of private international law as to where the contract is made may result in conclusions that are entirely fortuitous. In *Firestone Tyre and Rubber Co v Lewellin* [1957] 1 WLR 464 (HL) at 471, Lord Radcliffe said such an approach under the conditions of international business and modern facilities of communication was capable of proving a somewhat ingenuous one. Hunter J shared the same view in *Sinolink Overseas v IRC* 2 HKTC 126 at 131.<sup>18</sup>

## 20.9 Where profits in substance arise

So we turn to the question of where profits in substance arise. The short answer is that there is no short answer. This test does not answer the question of where trading income arises, it merely rephrases it.

The former International Tax Handbook provided:

### 820. NRs: profits in substance

It is consistent with the words of Brett LJ at the start of the quotation in ITH813 to say that no neat formula to decide what is, and what is not, trading in the UK can be devised. ...

Circumstances vary so widely that it is not possible to devise a single test that fits all cases.<sup>19</sup> The Hong Kong guidance<sup>20</sup> note provides:

11. The broad guiding principle has been followed in subsequent cases before the Court of Final Appeal. In *Kwong Mile*, Bokhary PJ summarised the broad guiding principle at 174I to 175E:

“The ascertainment of the source of a profit is not hindered by technical rules, but is helped by the broad guiding principle that one looks to see what the taxpayer has done to earn the profit and where he has done it. ... In *IRC v Orion Caribbean* [1997] HKLRD 5 924,

---

18 *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though “it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases”.

19 “No simple legal test can be employed”; see *IRC v Orion Carribean*.

20 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

Lord Nolan emphasised (at p.931F) that ‘[n]o simple, single, legal test can be employed’ when ascertaining the source of a profit. ... The situations in which the source of a profit has to be ascertained are too many and varied for a universal judge-made test. Apart from the words of the statute themselves, the only constant is the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters.’<sup>21</sup>

This is a general principle of international tax law:

Profits should be taxed where economic activities deriving the profits are performed and where value is created.<sup>22</sup>

It is not, of course, an answer just to say that the question is a question of fact. That simply leaves the issue answered.<sup>23</sup>

## 20.10 Preparatory/auxiliary activities

The former International Tax Handbook Manual para 849 provided that activities within OECD Model Convention para 5(4) do not amount to trading in the UK. This states (in short) that preparatory and auxiliary activities do not constitute a PE.<sup>24</sup> That includes in particular:

- (1) storage, display or delivery of goods
- (2) purchasing goods<sup>25</sup>
- (3) collecting information

The Hong Kong guidance note provides:

### ANTECEDENT OR INCIDENTAL ACTIVITIES

14. In *ING Baringat* 428, Ribeiro PJ when discussing the legal principle also emphasised the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters. The focus is on establishing the geographical location of the taxpayer’s profit-producing transactions as distinct from activities

21 *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though “it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases”.

22 G20 Leaders Declaration (2013)

<https://www.oecd.org/g20/summits/saint-petersburg/Saint-Petersburg-Declaration.pdf>

23 See 25.14.1 (Source of interest: Critique).

24 See 101.17 (Preparatory and auxiliary activities).

25 See 20.11 (Buying from UK sellers).

antecedent or incidental to those transactions.

15. Whether an act is an antecedent or incidental activity is a question of fact and would depend on the nature of the transaction. In *IRC v The Hong Kong & Whampoa Dock Co* [1960] 1 HKTC 85, the initial business contact in Hong Kong which set in motion a chain of operations that ultimately led to the salvaging of the vessel was rejected as the relevant operation.<sup>26</sup>

16. Comments in a similar vein can be found in *Hang Seng Bank* at 320F-G:

“The activities of the bank from which the income arose was the buying and selling of this property in overseas market places and not the decision making process in Hong Kong or any other activities in Hong Kong. Likewise the income arose from the trading in property situate outside of Hong Kong and not the moneys of customers situate in Hong Kong.”<sup>27</sup>

## 20.11 Buying from UK sellers

The former International Tax Handbook provided:

### 812. Purchasing is not trading in

The mere buying of goods here does not amount to trading here. That was decided in the very first case in these matters, *Sulley v AG* [2 TC 149], in 1860. A New York firm purchased goods in England for sale in America. It had an office here where the English resident partner saw to the purchasing and shipping of the goods. The Court of Exchequer (a Court of Appeal) found that “The profits of the firm in America do not accrue in respect of any trade carried on in this country, but in respect of the trade carried on in New York, where the main business is conducted”.

Maintaining a purchasing office is also included in the list of auxiliary activities which do not amount to trading in the UK.<sup>28</sup>

The Hong Kong guidance note provides:

#### BUYING OFFICE

---

26 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012),

[http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

27 *IRC v Hang Seng Bank* [1990] STC 733 at p.738.

28 Model convention para 5(4)(d); see 20.10 (Preparatory/auxiliary activities).

29. A trading company, carrying on business outside Hong Kong, may set up a branch in Hong Kong to act as a buying office for the purpose of purchasing goods or merchandise or of collecting information. The activities of the branch are confined to the purchase of goods or merchandise or of collecting information in Hong Kong and it is not involved in their sale, either in Hong Kong or elsewhere. In such a situation, a liability to Hong Kong profits tax would not arise. The functions of a buying office may also be carried out by a subsidiary company or by an agent (either related or unrelated). However, as for a branch, the subsidiary company or agent must not be involved in the sale of the goods. On the other hand, any commission or other remuneration earned by the subsidiary company or agent for performing its services in Hong Kong will be fully taxable.<sup>29</sup>

## 20.12 Buying/selling to UK purchasers

The former International Tax Handbook para 820 provided:

But we do attach much importance to Lord Atkin's approach to the question of "trading in" in the *Smidth v Greenwood* case quoted in ITH817 above – "where do the operations take place from which the profits in substance arise".

We have come to adopt this test as the principal criterion for determining whether there is "trading in". But it should be borne in mind that the *Smidth* company was found not to be trading in the UK. Although it had an agent in the UK to advise prospective purchasers and assist with the installation of machinery, the profits in substance arose from the sale of that machinery under contracts made abroad. ...

### **821. Merchanting: Place of sale**

The decision in the *Smidth* case supports the conclusion that in the case of merchanting business (buying and selling goods for profit), the trade is normally exercised at the place where the contracts for sale are made – that is where the operations take place from which the profits in substance arise.

It may help, in considering why that should be the relevant place, to put the decided cases aside and to ask what sort of facts could possibly be significant in leading to an answer to the question of whether there is trading in the UK. Where merchanting is concerned – buying and selling – there will often be a central office where questions of policy are considered and finance is arranged. There is the buying of the goods and perhaps the holding of a stock of goods. Then there is the search for customers and there is the actual contract for sale. That

---

29 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

contract may be at a price laid down in a distant Head Office or it may be for a price negotiated with some skill on the spot. Finally there is delivery involving the question where does the lawful property in the goods pass from seller to buyer.

Few if any of the elements described above necessarily call for a presence in this country and the functions involved can be located where the trader wishes. Most countries take the same view as we do about buying. The Court in *Sulley's* case simply said "It would be most impolitic thus to tax those who come here as customers." The place of sale, as identified by the place of contract for sale, is a reasonable means of determining the location of trading; trading profit becomes measurable only when there is a sale and without a sale there can be no profit.

### **822. Place of sale unreliable**

But the place of sale, like other elements, can be moved. Even where the trade is that of buying and selling some qualification is needed to the assertion that there is trading in the UK if the contracts for sale are made here. It is generally taken for granted that it must be so if the sales are to people who are here. But, as is apparent from ITH830–ITH834 below which look at the place of contract, just when and where a contract is concluded can depend on fine distinctions and may even be a matter of chance. If, for example, a non-resident advertises goods for sale in a newspaper here and the customer responds by a telephone call to the non-resident during which agreement is reached or there is an exchange of telexes, the contract may technically be made in the UK even though the non-resident does very little here at all. We do not know what view the Courts would take of that though they have certainly not ruled out the possibility that while there may be contracts here there may nevertheless be no trading here [See *Belfour v Mace* 13 TC 558].

There may be similar doubt when sales are to people who are not resident here. The problem can be illustrated by a simple example. A New York art dealer has a picture which a Frenchman is interested in. The American and the Frenchman happen to meet in London which both are visiting for a few days holiday. In their hotel they agree on a price for the picture and conclude the deal. The contract is made here. Is the American trading in the UK? The matter is considered further on in chapter 9 (ITH947).

One may devise improbable examples of this kind without doing more than to highlight the difficulties which absolute reliance on the place of contract as a test would involve. Other cases of difficulty are those where there is reason to believe that, although contracts are formally made abroad, everything is really done here short of signing a piece of paper. In such cases we would say that there is trading here. The problem in such a case is largely one of proof. See, for example, the comments in chapters 9 (ITH914) and 10 (ITH1017).

The Hong Kong guidance note provides:

18. In *IRC v Magna Industrial Co* [1997] HKLRD 171 at 178, Litton VP recognised that in case of a trading profit the purchase and the sale were the

important factors. He further included in his deliberation all of the relevant operations and not just the purchase and sale of the products. When applying the operations test, Litton VP said at 176G:

“In other words, one looks to see what the taxpayer has done to earn the profits and where he has done it. Obviously the question where the goods were bought and sold is important. But there are other questions: For example: How were the goods procured and stored? How were the sales solicited? How were the orders processed? How were the goods shipped? How was the financing arranged? How was payment effected?”

19. The obtaining of the buyer’s order in Hong Kong and the placing of the order with the seller from Hong Kong are the foundations of a trading transaction since the differential between the selling price and the buying price (i.e. the mark-up) generates the profit. In *Exxon Chemical International Supply SA v IRC* 3 HKTC 57, having decided that the obtaining of the order from the buyer and the placing of the order with the seller, took place respectively in and from Hong Kong, Godfrey J concluded that the profit arose in or was derived from Hong Kong.

20. In *IRC v Euro Tech (Far East) Limited* 4 HKTC 30, Barnett J doubted that there should be some particular level or threshold of activity on the part of the taxpayer in Hong Kong, such as by bringing the products into Hong Kong and re-exporting them. He observed that in many trading companies the taxpayer was doing no more than bringing together the complementary needs of sellers and buyers. He said if the bringing together was done in Hong Kong the trading profit was sourced in Hong Kong....

23. On the basis of the various court judgments discussed in paragraphs 18 to 22 above, the Department’s views which are reflected in its assessing practice on the locality of profits derived from trading in commodities or goods by a business carried on in Hong Kong can be summarised as follows:

- (a) Where both the contract of purchase and contract of sale are effected in Hong Kong, the profits are fully taxable.
- (b) Where both the contract of purchase and contract of sale are effected outside Hong Kong, no part of the profits are taxable.
- (c) Where either the contract of purchase or contract of sale is effected in Hong Kong, the initial presumption will be that the profits are fully taxable. Matters, such as those mentioned in paragraph 18 above, will be examined to determine the issue.
- (d) Where the sale is made to a Hong Kong customer (including the Hong Kong buying office of an overseas customer), the sale contract will usually be taken as having been effected in Hong Kong.
- (e) Where the commodities or goods are purchased from either a Hong Kong supplier or manufacturer, the purchase contract will usually be taken as having been effected in Hong Kong.
- (f) Where the effecting of the purchase and sale contracts does not require travel outside Hong Kong but is carried out in Hong Kong by telephone, fax, etc., the contracts will be considered as having been effected in Hong Kong.
- (g) The purchase and sale contracts are important factors but all the relevant

operations that produce the trading profits must be looked at to determine the locality of the profits. Persons who are merely trading with Hong Kong by either selling goods to customers in Hong Kong or buying goods from suppliers in Hong Kong will not fall within the ambit of this paragraph. Nor will this paragraph apply to a buying office referred to in paragraph 29 below.

24. Having regard to the points expressed above, it will be apparent that, in the Department's view, the question of apportionment does not arise in relation to trading profits. Trading profits will be either wholly taxable or wholly non-taxable. There is no room to substitute a mixed source for a Hong Kong source even though there might be some overseas activities.<sup>30</sup>

### 20.12.1 *Trading stock: land*

In *IRC v HK-TVB* the Privy Council said:

profits accruing to a resident taxpayer from the sale of foreign immovable property are likely to arise in the country where that property is situated although both the contracts of purchase and sale thereof are made in the country of residence of the taxpayer.<sup>31</sup>

The Hong Kong guidance note provides:

45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows:

- (a) Rental income from real property. *Locality:* Location of the property.
- (b) Profits derived by an owner from the sale of real estate. *Locality:* Location of the property.

### 20.12.2 *Trading stock: securities*

The Hong Kong guidance note provides:

---

30 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

31 [1992] STC 723 at p.729; if further authority is needed, which I doubt, see *Marsh v HMRC* [2017] UKFTT 320 (TC) at [81]: "As all the assets of any trade are situated in the UK and the trade is carried on by the sale in the UK of those assets by contracts having effect under the law of England and Wales it follows that if there is a trade it is carried on in the UK."

However in relation to UK land, this rule is statutory: see 21.3 (Dealing/developing UK land).

45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows ...

- (c) Profits from the purchase and sale of listed shares and other listed securities. *Locality*: Location of the stock exchange where the shares or securities in question are traded. Where the purchase and sale took place over-the-counter, the place where the contracts of purchase and sale are effected.
- (d) Profits from the purchase and sale of unlisted shares and other unlisted securities. *Locality*: Place where the contracts of purchase and sale are effected...

### 20.12.3 *Buying/selling through agent*

SP 1/01 provides:

22. If a non-resident carries on a financial trade outside the UK, any transactions carried out through a UK investment manager are likely to amount to trading in the UK. That is so whether there is a discretionary agreement or whether the manager acts on the instructions of the non-resident. The criteria for deciding whether a non-resident financial company is an investment company or a trading company are the same as those which apply to a resident company.

Whether or not this is right does not much matter as in most cases the investment manager exemptions apply, but (even allowing for the qualification in the use of the word “likely”) it is too widely expressed. The Hong Kong guidance note provides:

25. Cases may arise where it is claimed that contracts of purchase and of sale have been effected wholly outside Hong Kong by employees of the Hong Kong business travelling abroad or by overseas agents. In this context, no operations are carried out in Hong Kong to give effect to the trading transaction; and the employee or overseas agent habitually exercises a general authority to negotiate and conclude contracts on behalf of his principal.

26. Normally the activities of an agent and an employee are accorded the same weight if it can be shown that the employee has full authority to conclude contracts without reference to the business in Hong Kong. In considering claims that contracts have been wholly effected outside Hong Kong by employees, Assessors will, in addition to facts in paragraph 18 above, require details of travelling, hotel and subsistence expenses in respect of each individual transaction. Where it is claimed

that contracts are effected by overseas agents, it will be necessary to provide agency agreements or other evidence to support the claim.<sup>32</sup>

## 20.13 Services

The former International Tax Handbook continued:

### 826. Where work is done

Many trades are not limited to merchanting. Where services are concerned, we tend to give greater weight to the place where the service is provided.<sup>33</sup>

The Hong Kong Guidance Note adopts the same approach:

45. The Department regards the locality of the following types of profits to be as follows ...

(e) Service fee income. *Locality*: place where the services are performed which give rise to the fees.<sup>34</sup>

This raises the question of where the services are performed/provided.<sup>35</sup> Services performed by an individual (whether personally or on behalf of a company or partnership) are performed where the individual is when they provide the services.<sup>36</sup>

Likewise in Australia:<sup>37</sup>

The place of the performance of services is likely to be significant to

32 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

33 The former International Tax Handbook para 826 continued:

There are particular difficulties with transmission services with which the approach is to say that the service is given where the act of transmission begins, following the case of *Ericksen v Last* already quoted in ITH813.

34 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

35 The International Tax Handbook refers to the place where services are *provided* and the HK guidance refers to the place where services are *performed* but the meaning is the same. I think the word performed is clearer.

36 See 33.30 (Where are duties performed); See too 106.8.2 (Income from services/trading).

37 *CT v Resource Capital Fund IV LP* [2019] FCAFC 51 at [52] citing: *FCT v French* [1957] HCA 73; *FCT v Mitchum* [1965] HCA 23; *FCT v Efsthakis* [1979] FCA 28.

determine the source of income derived from personal exertion.

In *Brackett v Chater*<sup>38</sup> a surveyor entered into an employment contract with a Jersey company (owned by a Jersey trust that he had made, although this was not material). Clients contracted with the Jersey company but the surveyor did all the work in the UK using facilities available to them at the offices of the firm in which they were previously partners. The Jersey company was held to be trading in the UK.

Where services are performed by a team of people, and do not involve work in a single location, the answer may be less clear.

The Hong Kong guidance note provides:

It should be noted that in the case of an investment adviser whose organisation and operations are located only in Hong Kong, profits derived in respect of the management of the clients' funds are considered to have a Hong Kong source.

Included in chargeable sums are not only management fees and performance fees but also rebates, commissions and discounts received by the adviser from brokers located in Hong Kong or elsewhere in respect of securities transactions executed on behalf of clients.<sup>39</sup>

### 20.13.1 Commissions

The Hong Kong Revenue guidance provides:

#### RE-INVOICING CENTRE

27. The Department's view is that if a profit is derived from services rendered in Hong Kong, the profit is clearly taxable. Commission income or profit that accrues to a "re-invoicing centre" for services rendered is chargeable to profits tax. Profits derived from the buying and selling of goods are not service income. The transaction involves the taking of commercial risks (e.g. product risks, inventory risks, credit risks, exchange risks, capital risks, etc.) different from those attached to a service. Confirmation of sales and issue of purchase orders are indications that it is a trading transaction. The source of trading profits depends on the locality of the trading operations. Paragraphs 18 to 26 are relevant.

28. It is not possible to categorise the circumstances under which income or profit derived by a "re-invoicing centre" would be regarded as a service income

---

38 60 TC 134 & 639.

39 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

and not as a trading profit. In each case, the Department would examine the nature of the operations and the type of risks in question to determine whether they constitute the provision of services or trading. The label “re-invoicing centre” clearly does not in itself provide the answer as it can mean different business structures.

*Example 1*

Company A, incorporated in Hong Kong, is a re-invoicing centre of a group of companies with a holding company incorporated in the United States, as more particularly described below. It manages in Hong Kong all foreign currency exposures from intra-company trade, guarantees the exchange rates for future orders and manages intra-affiliate cash flows, including lead and lags of payments. Manufacturing affiliates in Mainland China sell goods to Company A, which in turns resells to the distribution affiliates in North America and Europe. Company A resells at cost plus a mark-up for its services. The mark-up covers the cost of the re-invoicing centre and a reasonable return on the services provided. The profits accrue to Company A are service income derived from Hong Kong. The mark-up earned by Company A, which acts as a re-invoicing centre, is chargeable to profits tax.<sup>40</sup>

## 20.14 Construction/engineering work

The former International Tax Handbook para 826 continued:

Where construction and engineering works are concerned we say that the construction works are the essential operations and it is normally immaterial where the contract is signed – there is support for this in the Muller case [*WH Muller & Co (London) v Lethem* 13 TC 151].

## 20.15 Manufacturing

The former International Tax Handbook para 826 continued:

There may be more than one part of the trade which can be identified as the profit producing part. There can be the case where there is manufacture abroad and selling here or manufacture here, and selling abroad. To look at the first situation, manufacture abroad and selling here, it is reasonably clear from the champagne cases that the Revenue only claimed to tax the selling profit and there is nothing in the judgments to suggest that it was entitled to more. The question is considered more fully in chapter 9 (ITH920). As to the second situation,

---

40 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

manufacture on its own is certainly trading, even though there may be no sales here, and the old judgments tend to support the view that we should in such circumstances seek, on some sensible basis, to tax only the manufacturing profit. There was a Privy Council [*Commissioners of Taxation v Kirk* [1900] AC 588] case in the early part of the century, an Australian case, which supports that idea and it is what we have in fact always done.

See too *IRC v Hang Seng Bank*:

If he has ... engaged in an activity such as the manufacture of goods, the profit will have arisen or derived from the place where ... the profit making activity carried on. There may, of course, be cases where the gross profits deriving from an individual transaction will have arisen in or derived from different places. Thus, for example, goods sold outside Hong Kong may have been subject to manufacturing and finishing processes which took place partly in Hong Kong and partly overseas. In such a case the absence of a specific provision for apportionment in the Ordinance would not obviate the necessity to apportion the gross profit on sale as having arisen partly in Hong Kong and partly outside Hong Kong.<sup>41</sup>

The Hong Kong Revenue guidance note provides:

#### MANUFACTURING PROFITS

30. Lord Jauncey in *HK-TVBI* at 410F has commented on the source of manufacturing profits. He explained:

“If a manufacturer in Hong Kong sells his goods to a merchant in Manila the payment which he receives is no doubt sourced in Manila but his profit on the transaction arises in and is derived from his manufacturing operation in Hong Kong.”

Where goods are manufactured in Hong Kong, the profits arising from the sale of such goods will be fully taxable because the profit making activities are considered to be the manufacturing operations carried out in Hong Kong, which should include the procurement of raw materials, the employment of labour, the design of products and the use of machinery and plant, etc.

31. The following examples illustrate the Department’s views on this subject:

#### *Example 2*

Company B manufactures goods in Hong Kong and sells them to overseas customers. The fact that Company B has sales staff based overseas does not give

---

41 [1990] STC 733 at p.740. The *dictum* to the contrary in *IRC v HK-TVBI* [1992] STC 723 at p.730h can be disregarded.

a part of the profits an overseas source. This is not a case for apportionment. The whole of the profits are liable to profits tax.

*Example 3*

Company C manufactures in Mainland China and sells the finished goods through a retailing branch in Hong Kong. The retailing branch has sales staff and a fixed place of business, and has registered for business in Hong Kong. Company C is both a manufacturer and a retailer. Profits are derived from the manufacturing operations in Mainland China and the retailing operations in Hong Kong. It is necessary to apportion the profits derived by Company C. Profits attributable to the Hong Kong retailing branch are chargeable to profits tax.

32. In Mainland China, two types of processing trade normally involve Hong Kong companies: contract processing and import processing. They are two different forms of transaction and require an accurate legal analysis.

**CONTRACT PROCESSING**

33. In contract processing, the document that governs the contractual relationship among the parties is the processing agreement. It sets out the rights and responsibilities of the Hong Kong company and the Mainland processing enterprise. The Hong Kong company is responsible for the supply of raw materials and machinery without consideration and to provide technical and managerial know-how while the Mainland processing enterprise is responsible for the provision of factory premises, utilities and labour force. 34. In return for the processing service, the Hong Kong company pays a subcontracting charge to the Mainland enterprise. The legal title to the raw materials and finished goods remains with the Hong Kong company. In the Department's view, the Hong Kong company's operations in Mainland China complement its operations in Hong Kong. Recognising the operations of the Hong Kong company in the Mainland, an apportionment of profits on a 50:50 basis is usually accepted.

35. In *D132/99* 15 IRBRD 25, the taxpayer contended that all of its profits were offshore in nature. The Board of Review held that its operations in Mainland China were not dominant operations that overshadowed the activities in Hong Kong and the operations in Hong Kong could not be disregarded.

36. In *D145/99* 15 IRBRD 91, the Board found that the taxpayer was not privy to the processing agreements, which had been entered into by its fellow subsidiaries and the taxpayer should be assessed for profits tax on 100% of its profits for the years of assessment after the processing agreement lapsed. The Board found that the taxpayer's business was the procurement of toys to satisfy sale and purchase contracts and that important operations took place inside Hong Kong: the reaching of purchase agreements; the determination of price; the issue of invoices; the procurement of raw materials and the shipment of finished products.

37. If the Hong Kong company has restricted involvement in the processing arrangement with the Mainland enterprise, the apportionment of profits could not be appropriate. For example, a Hong Kong company has contracted out the assembly work to various contractors in Hong Kong and the Mainland. The jobs

are numerous, small in value and of short duration and the Hong Kong company has minimal involvement in the assembly work. Given that the Hong Kong company does not carry out any manufacturing operations outside Hong Kong, its profits should be fully chargeable to profits tax without any apportionment. 38. The apportionment contemplated in paragraph 34 above will also apply to cases where manufacturing activities are undertaken under a similar arrangement in other places.

#### IMPORT PROCESSING

39. In import processing, the manufacturing operations are carried out by a foreign investment enterprise (FIE) related to the Hong Kong company. An FIE is often a separate legal entity incorporated in the Mainland. The Hong Kong company sells raw materials to the FIE and buys back the finished goods from the FIE. The Hong Kong company engages in the trading of raw materials and finished goods whilst the FIE manufactures the finished goods. The legal title to the raw materials and the finished goods passes to/from the FIE.

40. In import processing, the gross profits arise from trading transactions whereby the Hong Kong company purchases finished goods from an FIE and sells them for a profit. The manufacturing operations of the FIE in the Mainland are not performed on behalf of, or for the account of, the Hong Kong company even though the Hong Kong company and the Mainland enterprise might be within the same group of companies.

41. In *ING Baring*, Lord Millet NPJ said that the source of profits had to be attributed to the operations of the taxpayer which produced them and not to the operations of other members of the group. In D36/06 21 IRBRD 694 which was a typical import processing case, the Board held that the taxpayer's profits were fully chargeable to profits tax. It was ruled that the FIE was not part of the taxpayer and was not an agent of the taxpayer. Hence the FIE's operations were not relevant in determining the source of profits of the taxpayer. The Board of Review rejected the contention of "substance over form" and disagreed with the suggestion that a leasing agreement of production facilities was similar to a contract processing agreement.

42. The Department holds the view that profits which accrued to the Hong Kong company from "trading transactions" carried out in Hong Kong cannot be attributed to the manufacturing operations of the FIE carrying on business in Mainland China. The source of the trading profits must be attributed to the operations of the Hong Kong company which produced them. In *Consco Trading v IRC* [2004] 2 HKLRD 818, To Deputy J said that it was correct to consider factors such as the finance arrangements, the payment of raw materials and processing fees, the arrangement for receipt of payment from purchasers for the finished product and pre-contract negotiations and the Board was entitled to conclude that, on the evidence, the preponderance of the activities which earned the profits were performed in Hong Kong. The Court of First Instance said the Board correctly excluded the processing activity of the Mainland Chinese entity as not being relevant to the determining of the taxpayer's source of profits which were derived through the sale of processed goods.

43. In *IRC v Datatronic Limited* [2009] 4 HKLRD 675, where the arrangement between Datatronic and the FIE was an import processing arrangement, the Court of Appeal held that the profit-producing transactions were the purchase of goods from the FIE by Datatronic and subsequent sale and that these activities took place in Hong Kong. Thus, the profits were derived from Hong Kong. The Court of Appeal further held that the fact that the FIE, although a wholly-owned subsidiary of Datatronic, is a separate legal entity and that its dealings with Datatronic were not at arm's length would not detract from the reality of the legal effect of the transactions. It is also worth to note the Court of Appeal's concurrence with the Board's findings that the manufacturing was done by the FIE in the Mainland is substance and not form and that Datatronic's activities (i.e. assisting the FIE in preparing the goods and supplying them to Datatronic) in the Mainland were merely antecedent or incidental to the profit-generating activities.

44. The Department has noticed that a Hong Kong company is sometimes interposed between an overseas company and a Mainland manufacturing enterprise in order to comply with or circumvent the trade barriers imposed by the overseas jurisdiction. In D7/08 23 IRBRD 102, the Board of Review recognised that making the Hong Kong company a customer of the overseas company and of the Mainland enterprise freed the overseas company from the trade barriers. Applying what the Court of Final Appeal held in the Kim Eng case on the effective cause of the production of the profits in question, it was held that the Hong Kong company's relevant activity in Hong Kong however limited was what was done to earn the profits in question and the Hong Kong company did it in Hong Kong.<sup>42</sup>

## 20.16 Use of UK commodity markets

The former International Tax Handbook provided:

### **929. Is use of the markets “trading in”?**

It is a good thing for this country that these markets exist. There are all sorts of spin-off advantages. Big business has to be financed and insured and there are shipping services and all sorts of peripheral activities which are good both for the people who are involved in them and for the country's balance of payments. Looking at the physical markets the produce concerned may or may not come to this country. A Brazilian plantation owner may sell his cocoa in London although the buyer may be in France. A broker here will sell to another broker acting on behalf of the buyer and the contract will be made here. So the question arises – is the Brazilian producer trading in London and until the end of the last century it never occurred to anybody that this might be so.

---

42 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), [http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

Then came clarification by the Courts on the meaning of trading in the UK and the possibility that the fact of a contract being made by an agent in London could involve the principal in UK tax. It appeared open to the Revenue to contend that he principal was carrying on the selling part of his trade in London or even carrying on the whole trade in London. The Revenue had contended neither of those things; to have done so would have frightened off the foreign users of our markets. In any event, in those early days, the non-resident principal could have arranged that his London brokers did not receive the profits or gains.

But in 1915 everything changed because it was then provided that the receipt of the profits or gains would no longer count<sup>43</sup> and the business world was worried. The Revenue said that it had always regarded business done on our markets through brokers as trading with the UK rather than trading in the UK. But the business world was not satisfied. The difficulty was clear enough. If, as some of the early cases might suggest, the bare making of a contract here is such a vital matter, there is a risk that anybody using our markets might be held to be trading here. The Revenue's former view that in normal circumstances that constituted trading with rather than in the UK is not easily defensible.

**930. Pt VIII TMA 1970: Trading in: Can there be any profit?**

But accepting that a primary producer, a Brazilian plantation owner selling cocoa in London, is trading in the UK, where is the profit? Such commodities have a world market price at any time; it is an essential function of the market to decide exactly what that price is. If it is decided that the Brazilian producer is trading in the UK he must be charged either as a seller of cocoa or as a cocoa grower. If he is not charged as a grower and, to put it no higher it would be stretching things rather to do so, it is hard to see how any profit can be said to arise in London as a seller of cocoa. The position is entirely different from that of the French champagne grower of the type referred to in ITH815 of chapter 8, who may at least be regarded as making a merchanting profit here. In that situation one would look at the market value of the champagne in bulk and then at the price (wholesale or retail) actually realised in this country. But where commodities like bulk tin or rubber or cocoa are concerned, the position is otherwise. These things are traded in our markets precisely to determine what their market value is and to dispose of them at that price.

**931. Dealer**

In some cases the primary producer may not sell directly in London but sell to an intermediary in the producing country who in turn sells on the London market. The trade here is then clearly that of selling and if the intermediary does not purchase at world prices – there may, for example, be a reserve price – it may be possible to identify a profit or a loss. But if the intermediary sells through a broker within the exemption described in the following paragraphs then the exemption runs just the same. But it sometimes happens that, although the

---

43 F(no.2)A 1915 introduced the rules under which UK representative are liable for the tax of non-resident principals.

contracts are made through a broker, the seller has a presence here – a branch or an agent – which plays some part in the selling process. It may, for example, instruct the brokers. The question then is whether what is done is sufficient to enable us to say that the non-resident is trading also through that branch or agent. The terminal markets may be used by a non-resident dealer in commodities simply to hedge purchases or sales of raw materials which take place outside the UK. The hedging transactions may amount to trading here but, again, the broker exemption may apply unless the non-resident has a presence here, other than the broker, which is involved with the hedging transactions. If the exemption does not apply, there is then the question of the extent, if any, to which the results of the related transactions outside the UK should be taken into account in measuring the taxable profits. This is an area of difficulty and International Division should be consulted in such a case.

In practice the point is not important because the broker exemption applies.<sup>44</sup>

## 20.17 Hire of chattels

The position for property income from land is governed by statute and trading case law is irrelevant for UK tax.<sup>45</sup>

What about hiring<sup>46</sup> chattels (eg pictures)? It is necessary to consider trading and non-trading cases separately. In the absence of a trade, income from hiring chattels is Misc Sweep-up Income.<sup>47</sup>

If the hiring is a trade, then the income is trading income and the source is the trade, not the assets of the trade. For a non-resident trader, the question is whether the trade is partly carried on inside the UK, and this can be addressed looking at wider factors than just where the asset is situate. But in practice it is suggested that the situs of the chattels will generally be determinative, unless the trade involves chattels situate in more than one country.<sup>48</sup>

### 20.17.1 *Is chattel hire a trade*

For general discussion of the concept of trade, see App.2.20 (Trade). I

---

44 See 68.1 (Investment Manager exemptions).

45 See 23.1 (Property income).

46 References to hire here include a lease and a licence: the distinction does not matter for present purposes.

47 See 32.10.1 (Hire of chattels); 32.15.1 (Source: Income from assets).

48 See 20.12.1 (Trading stock: land).

consider here whether chattel hire is a trade.

Business Leasing Manual provides:

**00315. Whether lessor trading** [Jun 2016]

In general, where chattels are leased, you should accept that the leasing is by way of trade.

In exceptional cases, however, where the evidence of trading is extremely slight, for example if only one asset has been acquired for leasing and there is no personal involvement by the taxpayer or any semblance of a trading organisation, the taxpayer's activities may be special leasing within CAA01/S19.

You should not seek to deny trading treatment where, although there is no personal involvement by the taxpayer, there is trading activity by a manager as agent for the taxpayer.

The same principle applies to special purpose vehicle lessor companies set up by groups that carry out leasing activities. In such cases it is not unusual for the company to own only one (or a few) assets and be managed by a group member.<sup>49</sup> ...

This is an oversimplification. For instance, when the chattel is acquired by way of gift (not purchase), and when the taxpayer is an individual or trust rather than a commercial company, then trading is much less likely.

A conclusion of trading will usually suit a non-corporate taxpayer and so not be challenged. A conclusion of trading may be a concern to a corporate taxpayer if it were carrying on that trade in the UK through a permanent establishment, which would move it from income tax to the more onerous corporation tax regime.

## 20.18 Research division/shop windows

The former International Tax Handbook provided:

**827. Profit producing activities**

Early in this chapter (ITH811) an illustration was given of the hypothetical maker of refrigerators making them in various places in the world and selling them in those places. One way of describing the split of that trade is as a vertical split with a vertical slice here and other similar vertical slices in other countries. We would wish to tax only the

---

<sup>49</sup> Very similar wording is found in BI Manual 61190 [Jul 2006].

vertical slice of the trade carried on here. The other way in which a trade may be split may be thought of as horizontal, the sort of situation we have just discussed, one horizontal slice of the trade, manufacturing say, being here and another slice, the selling, abroad.

The horizontal/vertical terminology seems strange. The metaphor is also used in competition law but the other way round.<sup>50</sup> The former International Tax Handbook continued:

The above cases are straightforward enough but difficulty starts to emerge when what is done here is not clearly identifiable as part of the whole trade in that way. An example is the non-resident stock-broker with a branch in London which merely puts the goods in the shop window.

“Shop window” is another unhelpful metaphor. What does it mean? The former International Tax Handbook explained:

There may be a research section here with computers and the other paraphernalia of a modern trade of that sort. The branch gives advice to would be customers and when they decide to buy a particular American stock, it tells its head office in New York and there the actual deal is done. If the London branch really is only a shop window and really does take no part in the contracting process then the conclusion is that that is not trading within the UK; there is only one trade which is providing the service of buying or selling stocks and that is done in New York. It is quite possible for a non-resident trader to have an office here employing a substantial number of people and yet not to be exercising the trade here.

Another example might be the manufacturer on a very large scale in America, which has a research division in this country. The work of the research division may be absolutely vital to the trade but if that trade consisted for example in the making and sale of television sets, one could not say that research on, let us say, conductivity constituted a distinct profit producing part of that trade. That is reasonably clear.

This is right because it is difficult to allocate the profits, so they should be

---

<sup>50</sup> “Vertical agreements” are those made between two or more undertakings each of which operates at a different level of the production or distribution chain. “Horizontal agreements” are those made between undertakings operating at the same level of the production or distribution chain, covering for example research and development, production, purchasing or commercialisation. See Regulation (EC) no. 2790/1999.

regarded as merely auxiliary.<sup>51</sup>

More difficult is the position of non-resident banks or insurance companies which use the UK for their investment activities but do not carry on the business of banking or insurance here. The questions in this whole area of “trading in” are mainly those of fact and degree and absolute guidelines are simply not possible. International Division will be glad to help in cases of doubt.

## 20.19 Where is contract made?

If or so far as the place where the contract is made is an important factor, that place has to be identified. The place where a contract is made is, fundamentally, a question of contract law. But the identity of the place where the contract is made is not relevant for the purposes of contract law, so there are no contract law cases discussing the issue. In the reported tax cases the place where the contract was made was fairly obvious, and so the cases do not help us here. We are thrown back to first principles.

Going back to first principles, a contract in English law<sup>52</sup> is made by acceptance of an offer. The contract takes effect on acceptance and the place where the contract is made is where the acceptance takes place. As a general rule, acceptance takes place when the acceptance is received by the person who makes the offer. There are, however, exceptions to this:

- (1) Acceptance by post—acceptance takes place when and where the letter of acceptance is posted, not where received (unless the offer otherwise provides).
- (2) When an offer is made, one can specify in the terms of the offer how and when it can be accepted, and this can therefore alter the place where the contract is made.

Offer and acceptance can be difficult to identify. The court will try to impose an offer and acceptance analysis on circumstances which may not lend themselves to that analysis.<sup>53</sup>

---

51 See 20.10 (Preparatory/auxiliary activities).

52 Further consideration is needed if the applicable law is not English law.

53 Some academic writers have suggested abandoning the “offer and acceptance” analysis and replacing it by a contract theory based on reliance. (There is more than a hint of this in Lord Denning’s judgment in *Gibson v Manchester City Council*. This decision was reversed by the House of Lords but even Lord Diplock accepted that there would be times when offer and acceptance would be difficult to identify and the “normal analysis of a contract as being constituted by offer and acceptance” might not

There is no case law on email acceptance.<sup>54</sup> The person making the offer can decide how that offer is accepted so if the documentation is correctly drafted a contract can be made abroad by the click of a mouse outside the UK.

The former International Tax Handbook discussed this issue:

**The making of a contract**

**830. General**

There have been many references in this chapter to the making of a contract and to the place where a contract is made. If two people agree specifically on a sale by word of mouth that is the making of a contract and the place of their agreement is the place where the contract is made. A great deal of business is done in that way daily and the place of contract is not changed by the signing of a piece of paper in a tax haven sometime afterwards. The difficulty is one of proof as we have already seen in ITH822. But putting difficulties of that sort on one side, if the question where a contract is made becomes of central importance it is one on which we should rely on legal advice – it is pre-eminently a question for the Solicitor and what follows is very general guidance.

**831. Acceptance of offer**

Offer and acceptance constitute contract. The place of contract is governed by the place of acceptance of the offer and acceptance takes place where it is received. Where acceptance is communicated by letter it is regarded as received at the place of posting rather than at the place of actual receipt. This is because, once a letter has been posted, the Post Office holds it on behalf of the addressee. Where telephone communication is used the place of acceptance is the place where the recipient of the acceptance is. That is the general rule for so-called instantaneous communication. It would apply also to an acceptance sent by telex or fax directly from the acceptor's office to the offeror's office. The general rule may need qualifying when a cable company's services are used. A telegram like a letter is regarded as received when put into the hands of the Post Office.

**832. Price lists**

The mere sending out of price lists and advertisements does not constitute an offer, it is rather an open invitation for offers to be made. An offer must be quite specific and a price list is not an offer to supply an unlimited amount of goods at the price named. It follows that when a customer buys goods from a supplier the customer makes the offer and the supplier notifies acceptance. That is generally the assumption in cases where place of contract has been decisive in

---

be appropriate. However that would be exceptional. See [1979] 1 WLR 294 at p.297).

<sup>54</sup> The Law Commission paper (Electronic Commerce: Formal requirements in commercial transactions, December 2001) does not deal with the issue of where a contract made by email is made.

determining a non-resident's liability. But it is not impossible for a price list to amount to an offer, as long as the list details the price, the quantity and gives a definite description of the goods concerned. If in such circumstances the buyer were to put in some amendment not contained in the original offer, then what the buyer does becomes a fresh offer and one which has to be unconditionally accepted before there can be said to be a binding contract. And there may be a series of communications between customer and supplier so that it is a matter of chance as to who makes and who accepts the final offer.

### **833. Delivery**

It is quite common to find that there is no formal acceptance of the offer by the person supplying the goods and, in that situation, delivery itself will normally constitute acceptance; and then it would be important to look at the place of delivery, the place where the lawful property in the goods passes from seller to buyer.

### **834. Acceptance by agent**

There can be widely different circumstances in which contracts are made here. There is the case where the agent or branch in this country really does the job of negotiating the contract. That person settles the deal and terms and makes the contract here and there is no doubt whatever about it. On the other hand, there can be the case where the agent makes the contract in the legal sense, but does so only with the specific authority of the principal. That is to say the agent gets an offer, writes to or rings the principal, obtains approval and then, and only then, accepts the offer. In that case, acceptance would be here and there are at least two cases [For example, *Wilcock v Pinto & Co* 9 TC 111] on that point.<sup>55</sup>

## **20.20 Trade partly in UK: Apportionment**

I turn to the question of how to apportion where part of the trade is in the UK. Of course this overlaps with the question of whether there is a trade partly in the UK. If there are activities in the UK which do not involve trading in the UK there is nothing to apportion.

Tax Bulletin 18 provides:

It is perhaps less obvious how the profits from the part of the trade carried on in the UK should be measured. They are required to be measured on the arm's length principle set out in the [OECD model tax convention] where a DTA applies which includes the relevant provisions. It is considered that it also follows from the main rule in Schedule D that the same principle applies even if there is no treaty.

There is support for this principle in the early tax cases on non-residents

---

<sup>55</sup> There is also a brief comment (not worth setting out here) in NI Manual 29013 [Dec 2016].

trading in the UK. For example, in *Pommery & Greno v Apthorpe* at 2 TC 189, Denman J said, with regard to the profits chargeable in the UK from merchanting champagne produced in France, that:

It may be that there may be some difficulty in some respects as to the manner of calculating the amount of expenditure to be put against the profits, whether it would be a proper course to look at the goods sent over to England and then to consider what profit they make, putting a fair valuation on them as they arrive, and as the money is transmitted, or whether it would be necessary in such a case to look more minutely into the profits and losses upon the whole trade carried on partly in France and partly in England. I do not think it is necessary at all at this stage of the case to decide that. That is a matter of quantum, a matter for the consideration of persons skilled in dealing with such matters as assessing profits of trade.

This can be seen as an early description of the arm's length principle and as a recognition of the need to develop methods to apply that principle in practice.<sup>56</sup>

The former International Tax Handbook also touched on this issue:

**814. Measure of profit in *Erichsen v Last*<sup>57</sup>**

The second point the case deals with is – what is the chargeable profit? That is a rather special point where the transmission of messages is concerned. What the company claimed was that a great deal of the profit arose from the transmission over cables which were not here at all. The Master of the Rolls gave a simple parallel example of a foreign company running a steam packet between Dover and Calais. He said that as far as carrying passengers from Dover to Calais was concerned that was trading in Dover. There was no need to look at the three mile limit or anything of that sort. One simply had to take the receipts and deduct the expenses. The journey started here and the service was here. That is an idea limited in its application to trades involving the transmission of passengers, goods and information.

---

56 Author's footnote: See Russo (ed), "The Attribution of Profit to Permanent Establishments" (2005); OECD Report on the Attribution of Profits to Permanent Establishments (2008).

<http://www.oecd.org/dataoecd/20/36/41031455.pdf>

57 Author's footnote: For facts of *Erichsen v Last* 4 TC 422 see 20.7 (Place where contract made).

## 20.21 Post-cessation receipts

Until 1960 post-cessation trading receipts were not subject to tax.<sup>58</sup> Hence there is a separate code to deal with this topic.

I do not discuss here:

Debts paid/released after cessation: s.248, 249 ITTOIA

Relief for post-cessation expenditure: s.254, 255 ITTOIA

Election to carry back: s.257 ITTOIA

### 20.21.1 *Post-cessation receipt: Charge*

#### **s.242 ITTOIA**

Income tax is charged on post-cessation receipts arising from a trade.

#### **s.188 CTA 2009**

The charge to corporation tax on income applies to post-cessation receipts arising from a trade.

### 20.21.2 *Extent of charge*

#### **s.243 ITTOIA**

(1) A post-cessation receipt is chargeable to tax under this Chapter only so far as it is not otherwise chargeable to income or corporation tax.

(2) Accordingly, a post-cessation receipt arising from a trade is not chargeable to tax under this Chapter so far as it is brought into account in calculating the profits of the trade for any period.

#### **s.189 CTA 2009**

(1) A post-cessation receipt is chargeable to tax under this Chapter only so far as it is not otherwise chargeable to corporation or income tax.

[identical]

### 20.21.3 *Territorial limitation*

Section 243 ITTOIA/s.189 CTA 2009 provide:

(3) A post-cessation receipt is not chargeable to tax under this Chapter

---

<sup>58</sup> See 30.4 (Post-cessation trading receipt).

if-

- (a) it is received by or on behalf of a non-UK resident who is beneficially entitled to it, and
  - (b) it represents income arising outside the UK.
- (4) A post-cessation receipt is not chargeable to tax under this Chapter if it arises from a trade carried on wholly outside the UK, other than a person's trade of dealing in or developing UK land.

Section 243(5) ITTOIA provides:

A post-cessation receipt is not chargeable to tax under this Chapter in the case of a partner in a firm if-

- (a) it represents income arising outside the UK from a trade carried on by the firm, and
- (b) the partner's share of the firm's income arising out of the UK is treated as relevant foreign income by section 857(3) (partners to whom the remittance basis applies)

#### 20.21.4 *Split year*

Section 243(6) ITTOIA provides:

If the tax year is a split year as respects a UK resident individual, this section has effect as if, for the overseas part of that year, the individual were non-UK resident.

#### 20.21.5 *Basis of assessment*

Section 244 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the receipts received in the tax year.
- (2) This is subject to-
  - (a) sections 254 and 255 (allowable deductions), and
  - (b) section 257 (election to carry back).

#### 20.21.6 *"Post-cessation receipt"*

Section 246(1) ITTOIA/s.190(1) CTA 2009 provide:

In this Part "post-cessation receipt" means a sum-

- (a) which is received after a person permanently ceases to carry on a trade, and
- (b) which arises from the carrying on of the trade before the cessation.

Section 246 ITTOIA provides:

(2A) If, immediately before a person permanently ceases to carry on a trade, an election under section 25A (cash basis for small businesses) has effect in relation to the trade, a sum is to be treated as a post-cessation receipt only if it would have been brought into account in calculating the profits of the trade on the cash basis had it been received at that time.

(3) Subsection (4) applies if-

- (a) a firm carries on a trade,
- (b) a person ceases to be a partner in the firm, and
- (c) the departure results in the partner permanently ceasing to carry on the notional trade (see section 852).

(4) The partner is treated for the purposes of this Chapter as permanently ceasing to carry on the trade.

Section 190 CTA 2009 provides:

(2) In this Chapter, except in sections 194 and 195, references to a person permanently ceasing to carry on a trade include-

(a) in the case of a company, the occurrence of an event treated under section 18 of ITTOIA 2005 (companies beginning or ceasing to be within charge to income tax) as the company permanently ceasing to carry on the trade, and

(b) in the case of a trade carried on by a person in partnership, the occurrence of an event treated under section 246(4) of ITTOIA 2005 (basic meaning of "post-cessation receipt") as the person permanently ceasing to carry on the trade.

#### 20.21.7 *Person liable*

Section 245 ITTOIA provides:

The person liable for any tax charged under this Chapter is the person receiving or entitled to the receipts.

#### 20.21.8 *Transfer of rights transferee not trading*

**s.251 ITTOIA**

**s.194 CTA 2009**

(1) This section applies if-

(a) a person ("the transferor") permanently ceases to carry on a trade,

(b) the transferor transfers to another person ("the transferee") for value the right to receive sums arising from the carrying on of the trade, and

(c) the transferee does not subsequently carry on the trade.

(2) The transferor is treated as receiving a post-cessation receipt.

(3) The amount of the receipt is-

(a) the amount or value of the consideration for the transfer, if the transfer is at arm's length, or

(b) the value of the rights transferred as between parties at arm's length, if the transfer is not at arm's length.

(4) Any sums mentioned in subsection (1)(b) which are received after the cessation of the trade are not post-cessation receipts.

(5) This section is subject to-

(a) section 252 (transfer of trading stock or work in progress), and

(b) section 253 (lump sums paid to personal representatives for copyright etc.).

(1) This section applies if-

(a) a company ("the transferor") permanently ceases to carry on a trade,

(b) the transferor transfers to another person ("the transferee") for value the right to receive sums arising from the carrying on of the trade, and

(c) the transferee does not subsequently carry on the trade.

(2) The transferor is treated as receiving a post-cessation receipt.

[identical]

[identical]

(5) This section is subject to section 195 (transfer of trading stock).

### 20.21.9 *Transfer trading stock/work in progress*

Section 252 ITTOIA provides:

(1) When a person permanently ceases to carry on a trade, a sum

realised by-

- (a) the transfer of trading stock, or
- (b) the transfer of work in progress,

is not a post-cessation receipt if a valuation of the stock or work is brought into account in accordance with Chapter 12 (valuation of stock and work in progress).

(2) This does not prevent a sum from being treated as a post-cessation receipt as a result of an election under section 185 (election for valuation of work in progress at cost).

(3) In this section-

- (a) "trading stock" has the meaning given by section 174, and
- (b) "work in progress" and "transfer of work in progress" have the meaning given by section 183.

#### 20.21.10 *PRs lump sum for copyright*

Section 253 ITTOIA provides:

(1) A lump sum which is paid to the personal representatives of the author of a literary, dramatic, musical or artistic work as consideration for the assignment by them of-

- (a) the copyright in the work, or
- (b) the public lending right in the work,

is not a post-cessation receipt.

(2) A lump sum which is paid to the personal representatives of the designer of a design in which design right subsists as consideration for the assignment by them of that right is not a post-cessation receipt.

(3) For the purposes of this section it does not matter whether the whole or a part of the right is assigned.

This seems generous.

#### 20.22 **DT relief: trading income**

Article 7(1) OECD Model provides:

- [a] [i] The profits of an enterprise of a Contracting State shall be taxable only in that State
  - [ii] unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein.
- [b] If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

A full discussion of this topic requires at least 3 volumes:

- a volume on the relief in art 7(1)[a][i]
- another on the meaning of PE (such books have been written)
- another on attribution of profits to a PE, the most contentious topic in international taxation

OECD Commentary provides:

11. The first principle underlying paragraph 1, i.e. that the profits of an enterprise of one Contracting State shall not be taxed in the other State unless the enterprise carries on business in that other State through a permanent establishment situated therein, has a long history and reflects the international consensus that, as a general rule, until an enterprise of one State has a permanent establishment in another State, it should not properly be regarded as participating in the economic life of that other State to such an extent that the other State should have taxing rights on its profits.

#### 20.22.1 “Business”

Article 1(h) OECD Model provides an inclusive definition of “business”:

the term “business” includes the performance of professional services and of other activities of an independent character.

In the usual UK sense, “business” is very wide. No-one would have doubted that the provision of professional services or other activities of an independent character constitutes a “business” in the ordinary sense. But the definition does no harm, and is there for historical reasons. OECD Commentary provides:

8. Before 2000, income from professional services and other activities of an independent character was dealt with under a separate Article, i.e. Article 14.<sup>59</sup> The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article

---

59 See 20.23 (Independent personal services).

14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits. This was confirmed by the addition of a definition of the term “business” which expressly provides that this term includes professional services or other activities of an independent character.

The activity of being an employee, and the activity of making or holding or managing investments, may constitute a business in the wide UK sense of the word, but they are not businesses within article 7.

### 20.22.2 “Enterprise”

The term “enterprise” is frequently used in the OECD Model, in particular:

<b>Article: Topic</b>	<b>Wording (in outline)</b>
5: Definition of PE	Fixed place of business through which business of an enterprise is carried on
7: Business profits	Profits of enterprise of Contracting State taxable only in that State
9: Associated enterprises	<i>Not discussed here</i>
13(2): Capital gains	Gains from ... business property of PE which an enterprise of a Contracting State has in the other State may be taxed in that other State

Article 3(1) OECD Model defines “enterprise” and “enterprise of a Contracting State”:

For the purposes of this Convention, unless the context otherwise requires...

- c) the term “enterprise” applies to the carrying on of any business;<sup>60</sup>
- d) the terms “enterprise of a Contracting State” and “enterprise of the other Contracting State” mean respectively an enterprise

---

<sup>60</sup> See 20.22.1 (“Business”).

carried on by a resident of a Contracting State and an enterprise carried on by a resident of the other Contracting State; ...

The term “enterprise” is used in two ways:

- (1) to refer to the business, or business activity
- (2) to refer to the person or entity which carries on that activity<sup>61</sup>

Usage (2) seems eccentric, if not erroneous, but it does not matter as the meaning is clear. Perhaps the English is influenced by the French version of the model.

OECD Commentary provides:

4. The question whether an activity is performed within an enterprise or is deemed to constitute in itself an enterprise has always been interpreted according to the provisions of the domestic laws of the Contracting States. No exhaustive definition of the term “enterprise” has therefore been attempted in this Article. However, it is provided that the term “enterprise” applies to the carrying on of any business. Since the term “business” is expressly defined to include the performance of professional services and of other activities of an independent character, this clarifies that the performance of professional services or other activities of an independent character must be considered to constitute an enterprise, regardless of the meaning of that term under domestic law. States which consider that such clarification is unnecessary are free to omit the definition of the term “enterprise” from their bilateral conventions.

See Avery Jones, “Does ‘Enterprises’ in OECD Model mean ‘Business’?” (2006) 60 Bulletin for International Taxation 476. See too:

<b>Topic</b>	<b>See para</b>
What is a separate enterprise	101.10
Is stichting an enterprise	86.31.6

---

61 This is self-evident, but if authority is needed, see *Fowler v HMRC* [2016] UKFTT 234 (TC) at [105]: “the words “enterprise” and “business” are only partially defined in [the South Africa/UK DTA, which follows the OECD Model]. In this connection, it seems to me that the word “enterprise” is wide enough to encompass both the entity carrying on and the activity which can be described as a business. It is true that Article 3(1)(g) tells us the word “enterprise” applies to the carrying on of any business, but that does not, I think, take us very far. It focuses our attention on what is meant by the word “business”.”

Enterprise of transparent entity 87.6.1

### 20.22.3 “Profits”

OECD Commentary on art 7 provides:

71. Although it has not been found necessary in the Convention to define the term “profits”, it should nevertheless be understood that the term when used in this Article and elsewhere in the Convention has a broad meaning including all income derived in carrying on an enterprise. Such a broad meaning corresponds to the use of the term made in the tax laws of most OECD member countries.

### 20.22.4 Attribution to PE

Article 7(2) OECD Model provides:

For the purposes of this Article and Article [23 A] [23 B], the profits that are attributable in each Contracting State to the permanent establishment referred to in paragraph 1 are the profits it might be expected to make, in particular in its dealings with other parts of the enterprise, if it were a separate and independent enterprise engaged in the same or similar activities under the same or similar conditions, taking into account the functions performed, assets used and risks assumed by the enterprise through the permanent establishment and through the other parts of the enterprise.

### 20.22.5 Adjustment for attribution

Article 7(3) OECD Model provides:

3. Where, in accordance with paragraph 2, a Contracting State adjusts the profits that are attributable to a permanent establishment of an enterprise of one of the Contracting States and taxes accordingly profits of the enterprise that have been charged to tax in the other State, the other State shall, to the extent necessary to eliminate double taxation on these profits, make an appropriate adjustment to the amount of the tax charged on those profits. In determining such adjustment, the competent authorities of the Contracting States shall if necessary consult each other.

### 20.22.6 Interest from third state PE

OECD Commentary provides:

28. [Article 11] Paragraph 5 provides no solution for the case, which it excludes from its provisions, where

- [a] both the beneficiary and the payer are indeed residents of the Contracting States, but
- [b] the loan was borrowed for the requirements of a permanent establishment owned by the payer in a third State and the interest is borne by that establishment.

As paragraph 5 now stands, therefore, only its first sentence will apply in such a case. The interest will be deemed to arise in the Contracting State of which the payer is a resident and not in the third State in whose territory is situated the permanent establishment for the account of which the loan was effected and by which the interest is payable. Thus the interest will be taxed both

- [a] in the Contracting State of which the payer is a resident
  - [b] and in the Contracting State of which the beneficiary is a resident.
- But, although double taxation will be avoided between these two States by the arrangements provided in the Article, it will not be avoided between them and the third State if the latter taxes the interest on the loan at the source when it is borne by the permanent establishment in its territory.

29. It has been decided not to deal with that case in the Convention. The Contracting State of the payer's residence does not, therefore, have to relinquish its tax at the source in favour of the third State in which is situated the permanent establishment for the account of which the loan was effected and by which the interest is borne. If this were not the case and the third State did not subject the interest borne by the permanent establishment to source taxation, there could be attempts to avoid source taxation in the Contracting State through the use of a permanent establishment situated in such a third State. States for which this is not a concern and that wish to address the issue described in the paragraph above may do so by agreeing to use, in their bilateral convention, the alternative formulation of paragraph 5 suggested in paragraph 30 below. The risk of double taxation just referred to could also be avoided through a multilateral convention. Also, if in the case described in paragraph 28, the State of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the interest at the source, there would be nothing to prevent those two States together with, where appropriate, the State of the beneficiary's residence, from concerting measures to avoid the double

taxation that would result from such claims using, where necessary, the mutual agreement procedure (as envisaged in paragraph 3 of Article 25); see paragraphs 38.1 and 55 to 55.2 of the Commentary on Article 25). 30. As mentioned in paragraph 29, any such double taxation could be avoided either through a multilateral convention or if the State of the beneficiary's residence and the State of the payer's residence agreed to word the second sentence of paragraph 5 in the following way, which would have the effect of ensuring that paragraphs 1 and 2 of the Article did not apply to the interest, which would then typically fall under Article 7 or 21: Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a State other than that of which he is a resident a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

31. If two Contracting States agree in bilateral negotiations to reserve to the State where the beneficiary of the income resides the exclusive right to tax such income,<sup>62</sup> then ipso facto there is no value in inserting in the convention which fixes their relations that provision in paragraph 5 which defines the State of source of such income. But it is equally obvious that double taxation would not be fully avoided in such a case if the payer of the interest owned, in a third State which charged its tax at the source on the interest, a permanent establishment for the account of which the loan had been borrowed and which bore the interest payable on it. The case would then be just the same as is contemplated in paragraphs 28 to 30 above.

#### 20.22.7 *3<sup>rd</sup>-party relief disapplied*

Section 130 TIOPA provides:

- (1) Subsection (4) applies if double taxation arrangements make the provision, however expressed, mentioned in subsection (2).
- (2) The provision is that the profits of an enterprise within subsection (3) are not to be subject to UK tax except so far as they are attributable to a permanent establishment of the enterprise in the UK.

That includes treaties in OECD Model form, which is the large majority.

---

62 See 25.26.2 (DTAs with 100% interest relief).

- (3) An enterprise is within this subsection if the enterprise—
- (a) is resident outside the UK, or
  - (b) carries on a trade, or profession or business, the control or management of which is situated outside the UK.

The word “enterprise” here means the person who carries on the enterprise (business).

Assuming the conditions of s.130(1)-(3) are satisfied, we move on to s.130(4) which disallows treaty relief:

The provision does not prevent income of a person resident<sup>63</sup> in the UK being chargeable to income tax or corporation tax.

In short, treaty relief is only allowed for a person treaty-resident outside the UK, and what I call third-party DT relief<sup>64</sup> is disallowed.

Section 130 applies where an enterprise is carried on by a trust or company which is a resident in a treaty state with a standard business income article; and a UK resident is taxable on the income. The UK resident person does not qualify for DT relief. That may happen:

- (1) as life tenant of the trust
- (2) under s.624 ITTOIA
- (3) under the transactions in land code (though this also has its own treaty override)<sup>65</sup>

For completeness: s.130(5) TIOPA provides an exception:

Subsection (4)—

- (a) does not apply in relation to income of a person resident in the UK if section 858 of ITTOIA 2005 (UK resident partner is taxable on share of firm’s income despite any double taxation arrangements) applies to the income, and
- (b) does not apply in relation to income of a company resident in the UK if section 1266(2) of CTA 2009 (UK resident company

63 Section 130(6) TIOPA defines residence:

“A person is resident in the UK for the purposes of this section if the person is resident in the UK for the purposes of the double taxation arrangements.”

The wording in the definition of treaty-residence is: “a resident *of* the UK”, but the preposition does not matter; see 8.1 (Treaty-residence: Introduction).

64 See 103.21 (Third-party DT relief).

65 See 21.15.1 (TiL treaty override).

that is partner in a firm is taxable on share of firm's income despite any double taxation arrangements) applies to the income.

Section 130 is not needed here as s.858 ITTOIA does the same job; see 82.24 (DT relief: Partnership).

In the 2020/21 edition of this work I said:

Section 130 is headed: *Interpreting provision about UK taxation of profits of foreign enterprises*. This rule is however not interpretation or even misinterpretation: it is a treaty override. This section simply disapplies treaty relief for business profits. Breach of treaty agreements has ceased to concern HMRC when on the tax avoidance warpath.

But treaties eventually caught up with the s.130 approach, which is now authorised by the OECD Model/BEPS Savings Clause.<sup>66</sup>

## 20.23 Independent personal services

Article 14 OECD Model formerly provided:

*(1) Income derived by an individual who is a resident of a Contracting State in respect of professional services or other activities of an independent character shall be taxable only in that State unless he has a fixed base regularly available in that other State for the purpose of performing the activities. If he has such a fixed base, the income may be taxed in that other State, but only so much of it as is attributable to that fixed base.*

*(2) The term "professional services" includes especially independent scientific, literary, artistic, educational or teaching activities as well as the independent activities of physicians, lawyers, engineers, architects, dentists and accountants.*

This article was abolished in 2000, but survives in older treaties.

The INTM provides:

### **INTM153160 Independent personal services** [Jul 2018]

This Article deals with professional income and income from activities of an independent character, income which in the UK would generally be taxed as trade profits. Such income can only be taxed in the country of which the person deriving the income is a resident, but, if he has a

---

<sup>66</sup> See 104.9 (Savings Clause).

fixed base regularly available to him in the other country, then the other country can tax so much of the income as is attributable to that fixed base. Some agreements provide additionally that, if an individual is present in the other country exceeding a specified number of days (normally 183), that other country can tax so much of the income as is attributable to the services performed in that country in that period.

The Article was deleted from the OECD Model DTC in 2000 on the basis of a report entitled 'Issues related to Article 14 of the OECD Model Double Taxation Convention'. That decision reflected the fact that there were no intended differences between the concepts of permanent establishment, as defined in Article 5 and used in Article 7 and fixed base as used in Article 14, or between how profits were computed and tax calculated according to which of Article 7 or 14 applied. In addition, it was not always clear which activities fell within Article 14 as opposed to Article 7. The effect of the deletion of Article 14 from a particular treaty will be that income derived from professional services or other activities of an independent character will be dealt with under Article 7 as business profits.

Of course, a large number of the UK's tax treaties still contain an Article 14. As time goes on and as treaties are renegotiated, this will change. But in the meantime, if there is an Article 14 in a particular treaty then it should be applied as appropriate. The last OECD update which contains a commentary on Article 14 was the one published in June 1998. ...

## CHAPTER TWENTY ONE

# TRADING IN LAND

### 21.1

#### 21.1 Trading in land: Introduction

This chapter considers:

- (1) Non-residents dealing/developing land
- (2) Transactions in land code

#### 21.2 What is trading in land

For general discussion of the concept of trade, see App.2.20 (Trade). I consider here what constitutes trading in land.

BIM provides:

##### **BIM60025 land: trading transactions: badges of trade** [Jun 2016]

You should consider the established badges of trading and in particular the following:

- whether there have been any previous transactions and, if so, at what intervals;
- whether the way in which the transaction was organised was typical of a land dealer;
- whether a loan was necessary to fund the purchase and, if so, on what terms;
- the character of the land: was it amenity land for the purchaser, suitable for long term investment or ripe for immediate development?
- the length of time the land was held and, particularly, whether there might have been, at the moment of acquisition, a pre-arranged sale.

The badges are summarised in the property dealing context in *Marson v Morton and Others* [1986] 59 TC 381. You should remember that no one factor is determinant. What you are seeking to establish is the overall ‘character’ of the transaction.

##### 21.2.1 *Intention on acquisition*

BIM provides:

##### **BIM60030 land: trading transactions: intention on acquisition** [Jan 2019]

The purchaser’s intention at the moment of acquisition of the land is of great importance. In *Lionel Simmons Properties Ltd v CIR* [1980] 53 TC 461, Lord Wilberforce said at

page 491:

‘Trading requires an intention to trade: normally the question to be asked is whether this intention existed at the time of the acquisition of the asset’.

It is therefore often necessary to demonstrate an intention to trade at the time of acquisition. For land transactions, the exchange of contracts is the moment when the property is acquired. The formal transfer of property or completion follows within a month of completion but is sometimes delayed for commercial, or tax planning reasons.

**BIM60035 land: trading transactions: profit seeking motive** [Jun 2016]

An intention to dispose of land at a profit at some time in the future, does not automatically mean there is an intention to trade (*CIR v Reinhold* [1953] 34 TC 389), though in appropriate circumstances such an intention can ensure that a transaction is an adventure in the nature of a trade.

Land may be acquired as a capital asset in the knowledge that it will appreciate in value and realise a ‘profit’ one day on disposal.

It is not conclusive that the land will produce investment income before eventual sale: *Marson v Morton and Others* [1986] 59 TC 381. Accordingly, it will be insufficient to demonstrate a profit seeking motive. A trading intention has to be shown from all the facts of the case.

**BIM60040 land: trading transactions: deal or investment?** [Jan 2019]

In practice, it will be rare for someone to say that they are starting a trade in property. Intention may be reasonably inferred from all the circumstances at the time. If you identify the badges of trade in a transaction, these will indicate a trading intention.

It is necessary to examine the transaction objectively. Do the facts suggest a ‘deal’ or an investment?

If, notwithstanding the purchaser’s stated intentions, the facts suggest a trading intention it should be argued that the transaction is part of a trade.

**BIM60045 land: trading transactions: equivocal and unequivocal transactions** [Jan 2019]

There may be cases where, on examination of all the facts, it is difficult to decide whether the transaction is part of a trade. A distinction between these ‘equivocal’ transactions and the ‘unequivocal’ variety is drawn in the past cases. Examples are *Iswera v CIR* [1965] 1 WLR 668 ... and *Kirkham v Williams* [1991] 64 TC 253.

There are no hard and fast rules as to what makes a transaction equivocal. The matter was considered in *Kirkham v Williams*. In that case Nourse LJ thought an equivocal or ambiguous case was one in which the facts, when viewed on their own, did not tell you whether the land was acquired as trading stock or as a capital asset.

In ‘unequivocal’ or unambiguous cases the purchaser’s actual intention will not be conclusive (see *Iswera v CIR*). Where the transaction is equivocal the purchaser’s motive(s) for entering into a transaction may determine the character of the whole transaction.

A purchaser’s stated intention of a single capital transaction will constitute evidence that the Tribunal must accept unless sufficient evidence of a trading intention can be adduced by reference to the badges of trade.

This is the principle to be drawn from *Iswera* which was cited with approval in *Kirkham*. As a general rule we should, when the facts allow, argue that the transaction was

unequivocal. This means, identifying as many badges of trading as possible.

**BIM60050 land: trading transactions: dual motive transactions** [Jun 2016]

Transactions that are 'equivocal' may also be dual motive transactions. A dual motive transaction is a transaction entered into with two objects. An example would be an acquisition of land both to provide accommodation for an existing trade and for eventual development and resale at profit. It would be for the Tribunal to decide as a question of fact in such circumstances whether one of those motives was a trading motive and, if so, to what extent it coloured the whole transaction as being, in essence, a trading transaction. Nourse LJ's comments in *Kirkham v Williams* [1991] 64 TC 253 are relevant.

### 21.2.2 Trading stock or capital asset

In *Simmons v IRC*:<sup>1</sup>

What I think is not possible is for an asset to be both trading stock and permanent investment at the same time, nor for it to possess an indeterminate status, neither trading stock nor permanent asset. It must be one or the other ...

### 21.2.3 Supervening trade

*Lionel Simmons Properties v IRC* considered a change in intention after purchasing an asset:<sup>2</sup>

Intentions may be changed. What was first an investment may be put into the trading stock, and, I suppose, vice versa. If findings of this kind are to be made precision is required, since a shift of an asset from one category to another will involve changes in the company's accounts, and, possibly, a liability to tax

BIM provides:

**BIM60060 land: trading transactions: supervening trade** [Jun 2016]

... Worthwhile cases should be pursued where it is possible to identify a clear change of intention with regard to the land. Such a change must be shown by reference to objective factors. An example might involve the demolition of a warehouse previously held as a capital asset and the construction for sale of residential flats. It is once again a question of fact and degree. The greater the change in character of the land, the stronger the argument that a supervening trade has commenced.

The change of intention will involve an appropriation of the capital asset to trading stock

---

1 53 TC 461.

2 53 TC 461 at p.491. See too *Taylor v Good* 49 TC 277 at p.287; *Page v Lowther* 57 TC 199 at p.217; *Hopscotch v HMRC* [2020] UKUT 294 (TCC).

when the trading activity begins and there will therefore be a deemed disposal at that moment for Capital Gains Tax purposes.<sup>3</sup> The determination of that moment is a question of fact. You should therefore ensure that you examine the history of the project in sufficient detail to be able to identify and, if necessary, to argue for the appropriate date. This date will of course have implications both for the valuation of the land and the expenditure that is allowable as a trade expense or even as pre-trading expenditure under the legislation.

All cases involving supervening trading should be submitted to CTISA before listing for a contentious hearing before the tribunal.

**BIM60065 supervening trade: limited development** [Jun 2016]

Development of infrastructure alone (for example, the division of land into plots, the construction of access roads and the installation of mains services) is not sufficient to demonstrate the appropriation of land, previously acquired as a capital asset, to stock in trade. Such development is ambiguous as it can point to the preparation of the land for sale. Accordingly, you should obtain more evidence before arguing that a supervening trade has begun. Such development merely enhances the value of the capital asset: *The Hudson's Bay Company Ltd v Stevens* [1909] 5 TC 424.

**BIM60070 supervening trade: planning permission** [Jun 2016]

The obtaining of planning permission prior to sale does not, in itself, characterise a transaction as a trading transaction: *Taylor v Good* [1974] 49 TC 277. It may, however, provide evidence of intention and thus add weight, in certain circumstances, to a trading argument.

#### 21.2.4 Trading: Private residence

BIM provides:

**BIM60075 land: trading transactions: private residences** [Jun 2016]

The fact that a dwelling has been used as the person's residence is not automatically fatal to a trading contention: *MacMahon and MacMahon v CIR* [1951] 32 TC 311.

However, to succeed in a trading argument in these circumstances, it is necessary to demonstrate that residential use was incidental to that person's primary objective which was to dispose of it by way of trade.

#### 21.2.5 Trading: Builders

BIM provides:

**BIM60080 land: trading transactions: builders** [Jun 2016]

Where builders buy and resell land there is a special onus placed on them to show that the transaction is on capital account and not part of the trade, see *Harvey v Caulcott* [1952] 33 TC 159.

This does not mean that builders can never hold land other than as trading stock. It does mean that they have to point to evidence that it was not acquired as trading stock.

---

<sup>3</sup> Author's footnote: see s.161 TCGA.

### 21.2.6 Trading: Losses

BIM provides:

**BIM60085 land: trading transactions: loss making transactions** [Jun 2016]

There may be periods when there is a slump in the property market.

In these circumstances a one off transaction may give rise to a loss. You may be faced with an argument, from a person who is not a land dealer, that the transaction was a trading transaction and the loss is relievable as a trading loss.

The same principles have to be used in determining the character of loss making transactions as profitable ones. Once again the final question is whether the transaction could fairly be described as a 'deal or an investment' (*Marson v Morton and Others* [1986] 59 TC 381), albeit, in the latter case, an investment which went wrong. The key issue is the intention of the purchaser at the time of acquisition: *Lionel Simmons Properties Ltd v CIR* [1980] 53 TC 461...

### 21.2.7 Trading: Land acquired as gift

BIM provides:

**BIM60090 land: trading transactions: land acquired by inheritance or gift** [Jun 2016]

Where land is acquired by inheritance or gift, its subsequent disposal will not ordinarily be chargeable as trading income: *Hudson's Bay Company v Stevens* [1909] TC 424 and *Williams v Davies* [1945] 26 TC 371.

A possible exception to this general rule is where, following acquisition, the recipient decides to use the property to start trading in land. This would be the commencement of a supervening trade (see BIM60060).

### 21.2.8 Trading: case law summary

There are a hundred or so cases on whether a transaction is trading in land. BIM sets out the correct approach to the case law:

There are numerous decided cases and it is rarely profitable to spend time trying to find one which matches the facts of your case. It is much better to concentrate on the main principles, which can be extracted from the cases listed here.

HMRC's case law reading list is as follows:

**BIM60160 land: trading transactions: useful land cases** [Jun 2016]

The following is a list of useful land cases and the points of interest they illustrate...

*Marson v Morton and Others* [1986] 59 TC 381:

- summary of badges of trading in land context

- the role of case law in arguing and presenting cases
- sale arranged prior to acquisition: a major trade pointer
- trading is a question of fact

*Lionel Simmons Properties Ltd (in Liquidation) and Others v CIR* [1980] 53 TC 461:

- the importance of establishing intention on acquisition
- assets cannot be acquired with indeterminate status
- assets can change from investment to trading stock and vice versa
- judicial endorsement of concept of supervening trading

*Iswera v CIR* [1965] 1WLR 1985 ... :

- land bought partly for sale, partly for retention the former to finance the latter: transaction held to be trading

- equivocal/non equivocal transactions

*Kirkham v Williams* [1991] 64 TC 253:

- discussion of equivocal transactions
- discussion of dual motive transactions

*Harvey v Caulcott* [1952] 33 TC 159:

- the special position of builders in land transactions

*The Hudson's Bay Company v Stevens* [1909] 5 TC 421:

- the enhancement of land limited to development of the infrastructure does not entail trading

*CIR v Reinhold* [1953] 34 TC 389:

- whether adventure in the course of trade
- profit motive not conclusive of trading

*Taylor v Good* [1974] 49 TC 277, *Page v Lowther* [1983] 57 TC 199:

- supervening trading

*Hopscotch Ltd v HMRC* [2020] UKUT 294 (TCC) can be added to this list.

### 21.3 Dealing/developing UK land

The legislation was introduced in 2016. It was put into the Finance Bill at committee stage, so precluding consideration or debate. The professional organisations grumbled (eg the Law Society, “a disturbing precedent of avoiding proper consultation and scrutiny...”).<sup>4</sup> But no-one took any notice.

---

4 Law Society Press Release 24 August 2016

<http://communities.lawsociety.org.uk/property/news-and-updates/property-news/ast-minute-changes-to-the-finance-bill-to-affect-btl-investors/5057235.article>

The background is discussed in an HMRC Technical Note.<sup>5</sup>

The rules relate only to UK land.

In accordance with the policy of the Tax Law Rewrite, the provisions are set out twice, once for IT and again for CT.

**s.6(1A) ITTOIA**

Profits of a trade of dealing in or developing UK land arising to a non-UK resident are chargeable to tax under this Chapter wherever the trade is carried on.

**s.5(2A) CTA 2009**

A non-UK resident company which carries on a trade of dealing in or developing UK land is chargeable to corporation tax on all its profits wherever arising that are profits of that trade.

In order to understand the significance of this, it may be helpful to review the pre-2016 position.

Income from a non-resident's land dealing/development trade was formerly subject to income tax under general principles if carried on in the UK, but that was likely to be the case.<sup>6</sup> The trade was also likely to have a UK PE. On that basis the trade would have been taxable even pre-2016. However the change may be significant in practice, because it was common before 2016 to seek to arrange that the trade was not carried on in the UK, and so was not taxable; or was carried on without a UK PE, and so could qualify for treaty exemption. In practice, HMRC did not strive to challenge that, and relied instead on the ToA rules.<sup>7</sup>

The provisions now preclude non-residents arguing that a trade of dealing/developing UK land is not subject to income tax, on the grounds that it is carried on outside the UK.

Income from a non-resident company's land dealing/development trade was formerly subject to CT under general principles if carried on in the UK through a UK PE. That was likely to be the case but it was possible for a land dealing trade to have no PE, and the same was at least theoretically possible for a development trade, in which case the non-

5 HMRC, "Profits from Trading in and Developing UK Land" (2016) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/507766/1044\\_Budget\\_Day\\_Technical\\_Note\\_v2\\_0\\_3\\_.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/507766/1044_Budget_Day_Technical_Note_v2_0_3_.pdf)

6 See 20.12.1 (Trading stock: land).

7 See *Davies v HMRC* [2018] UKFTT 559 (TC) discussed at 49.14.4 (Special tax regime).

resident company would be governed by IT rules.

The trend of moving non-resident companies profits from land from IT to CT continued with the FA 2019 CGT/property income reforms.

HMRC describe the charge as an expansion of the territorial scope of IT/CT, which it was, though it is open to question how large the expansion was.

### 21.3.1 “Dealing/developing UK land”

The provisions only apply to a trade of *dealing in or developing UK land*.

Section 6B ITTOIA provides:

- (1) A non-UK resident person’s “trade of dealing in or developing UK land” consists of —
  - (a) any activities falling within subsection (2) which the person carries on ...
- (2) The activities within this subsection are—
  - (a) dealing in UK land;<sup>8</sup>
  - (b) developing UK land for the purpose of disposing<sup>9</sup> of it.

Section 6B(1)(a) and (2) does not add anything to the natural meaning of dealing or developing.

Section 6B(1) ITTOIA provides:

- A non-UK resident person’s “trade of dealing in or developing UK land” consists of ...
  - (b) any activities from which profits arise which are treated under Part 9A of ITA 2007 [transactions in land] as profits of the person’s trade of dealing in or developing UK land.

See 21.11 (TiL trade).

## 21.4 Land-dealing TAAR

### s.6A ITTOIA

### s.5A CTA 2009

- 
- 8 Section 6B(3) ITTOIA (more or less) duplicates the Interpretation Act 1978 definition of land, so it adds nothing; see App 2.17 (Land).  
Section 6B(4) ITTOIA provides (for the benefit of a reader unsure of the meaning of “UK”): “In this section ... “UK land” means land in the UK.”
  - 9 Section 6B(4) ITTOIA provides: “In this section “disposal” is to be interpreted in accordance with section 517R of ITA 2007”. See 21.22 (“Disposal”).

(1) Subsection (3) applies if a person has entered into an arrangement<sup>10</sup> the main purpose or one of the main purposes of which is to obtain a relevant tax advantage for the person.

(1) Subsection (3) applies if a company has entered into an arrangement the main purpose or one of the main purposes of which is to obtain a relevant tax advantage for the company.

(3) The relevant tax advantage is to be counteracted by means of adjustments.

[Identical]

(4) For this purpose adjustments may be made (whether by an officer of Revenue and Customs or by the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

[identical]

I refer to this as the “**land-dealing TAAR**”.

#### 21.4.1 “*Relevant tax advantage*”

##### **s.6A(5) ITTOIA**

In this section “relevant tax advantage” means a tax advantage<sup>11</sup> in relation to income tax to which the person is chargeable (or would without the tax advantage be chargeable) by virtue of section 6(1A) [charge on dealing/developing UK land].

##### **s.5A(5) CTA 2009**

In this section “relevant tax advantage” means a tax advantage in relation to corporation tax to which the company is chargeable (or would without the tax advantage be chargeable) by virtue of section 5(2A) [charge on dealing/developing UK land].

#### 21.4.2 *Treaty override*

---

10 Subsection (7) provides the standard (unnecessary) IT definition : see App 2.2.3 (Definitions of “arrangement”).

11 Section 6A(6) ITTOIA sets out the GAAR definition of “tax advantage”; see 2.12.1 (Tax advantage: Definitions).

Section 6A(2) ITTOIA/5A(2) CTA 2009 extend the TAAR with a treaty override:

In subsection (1) the reference to obtaining a relevant tax advantage includes obtaining a relevant tax advantage by virtue of any provisions of double taxation arrangements,<sup>12</sup> but only in a case where the relevant tax advantage is contrary to the object and purpose of the provisions of the double taxation arrangements (and subsection (3) has effect accordingly, regardless of anything in section 6(1) of TIOPA 2010).

The wording is based on the OECD principal purpose test.<sup>13</sup>

Treaty relief would only apply in the absence of a UK PE.<sup>14</sup> When would arranging that be “contrary to the object and purpose” of a DTA? It would presumably suffice if the underlying beneficial owners are in the UK, and there is no commercial reason for using a company set up in the foreign treaty-state.

## 21.5 Transactions in land: Introduction

This section considers the rules in Part 9A ITA/Part 8ZB CTA 2010 (Transactions in land). I refer to this as the “**TiL code**”.

In accordance with the policy of the Tax Law Rewrite, the provisions are set out twice, once for IT and again for CT. The IT provisions were slotted in after s.517, and so are numbered 517A to 517U. The CT provisions (slotted in after the sections numbered 356N to 356NO) are numbered 356OA to 356OT.<sup>15</sup>

## 21.6 Direct disposal of land

Section 517B(1) ITA/s.356OB(1) CTA 2010 provide:

---

12 Section 6A(7) ITA provides the standard commonsense definition: “In this section ... “double taxation arrangements” means arrangements which have effect under section 2(1) of TIOPA 2010 (double taxation relief by agreement with territories outside the UK).”

13 See 104.8 (OECD principal purpose test).

14 See 20.22 (DT relief: trading income).

15 See **App 11.3** (Section numbering system).

An earlier edition of this work set out the differences between the current law and the pre-2016 law, but this is omitted now as it is of historical interest only. See the 2018/19 ed of this work, para 17.4.1 (Comparison with pre-2016 rules).

**s.517B(1) ITA**

Section 517C(1) applies (subject to subsection (3) of that section)<sup>16</sup> if—

(a) a person within subsection (2)(a), (b) or (c) realises a profit or gain from a disposal of any land<sup>17</sup> in the UK, and

(b) any of conditions A to D is met in relation to the land.

**s.356OB(1) CTA 2010**

Section 356OC(1) applies (subject to subsection (3) of that section) if—

[identical]

[identical]

In this chapter:

- A person within (1)(a) is a **“TiL person”**
- Conditions A to D are **“TiL gateway conditions”**
- I abbreviate “profit or gain” to gain

**21.7 TiL person**

Section 517B(2) ITA/s.356OB(2) set out 3 categories of TiL person. They are so wide that it is difficult to see how there could be a disposal of land without many TiL persons:

The persons referred to in subsection (1) are—

- (a) the person acquiring, holding or developing the land,
- (b) a person who is associated<sup>18</sup> with the person in paragraph (a) at a relevant time, and
- (c) a person who is a party to, or concerned in, an arrangement within subsection (3).

**21.7.1 Concerned in arrangement**

Section 517B(3) ITA/s.356OB(3) CTA 2010 provide:

An arrangement is within this subsection if—

- (a) it is effected with respect to all or part of the land, and

---

<sup>16</sup> For this exception, see 21.11.2 (Income receipt exemption).

<sup>17</sup> Section 517S(1) ITA (more or less) duplicates the Interpretation Act definition of land, so it adds nothing; see App 2.17 (Land).

<sup>18</sup> See 21.9.3 (“Associated”).

- (b) it enables a profit or gain to be realised—
- (i) by any indirect method, or
  - (ii) by any series of transactions.

### 21.7.2 *Slice of action/overage*

BIM provides:

#### **BIM60645 ‘Slice Of The Action’ Contracts And Overage Arrangements** [May 2019]

The transactions in UK land rules can be applied to ‘slice of the action’ contracts.

‘Slice of the action’ contracts are so called because they confer upon a landowner (who holds the land as an investment), the right to share in the proceeds of any subsequent development by the purchaser. In these cases, the contract for sale of the land to a builder or developer provides for consideration that is, in whole or in part, contingent upon the successful development of the land.

A common arrangement is for the landowner to receive a fixed sum at the time of the disposal, plus a percentage of the sale proceeds of each building subsequently constructed by the purchaser on the land.

Such ‘slice of the action’ contracts, and other overage arrangements where the landowner is entitled to receive consideration, if a specified condition is satisfied often fall within the transactions in UK land rules for the following reasons:

- The landowner is included under the definitions of ‘person’<sup>19</sup> as the ‘slice of the action’ contract or other specified contractual condition is an arrangement with the person holding the land.
- The land has been developed with the main purpose of realising a profit or gain from disposing of the land when developed (condition D in Section 356OB(4)CTA 2010).

#### **Example 1**

A landowner sells land to a developer for £10m. At the date of sale the land is valued at the same amount.<sup>20</sup> The contract of sale specifies that if the developer makes profits in excess of £5m from developing the land the landowner will receive 10% of subsequent profits. The developer makes £8m profit and pays the landowner £300k.

---

19 Author’s footnote: More analytically, the landowner is within s.517B(2)(c) as a person concerned in the arrangement (in my terminology, a TiL person).

20 This would not normally happen. But it simplifies the example.

In this instance the landowner is concerned in an arrangement to develop the land and condition D is met. The £300k will be taxed as trading income.

**Example 2**

A landowner sells land to a developer for £6m. The developer's intention is to build a block of flats. The contract stipulates that £3m will be paid to the landowner immediately, and £3m will be paid to landowner at the earlier of 4 years after the date of sale or when 20 of the flats have been sold.

Here the landowner is not concerned in an arrangement to develop the land. The £3m is deferred consideration receivable regardless of whether the land will be developed or not.

...

**BIM60655 'Slice Of The Action' Contracts: Portion Of Charge May Be Exempt: Example [May 2019]**

In a 'slice of the action' contract the effect of the exemption from the transactions in UK land rules can be significant. Normally, it removes an amount equal to the value of the land at the first intention date from the calculation of income chargeable to tax under those rules.

**Example**

A landowner agrees to sell some fields to a land developer for a fixed payment of £1m and a further payment of £0.5m which is contingent on the properties being built on the site being sold.

- The initial fixed payment of £1m is made on 5/8/2016 ,
- Further payments of £0.5m contingent on the development are agreed, and
- The value when the contract is signed on 5/8/2016 (the first intention date) is £1.2m.

The amount excluded from the calculation of the chargeable income is £1.2m, this amount is subject to chargeable gains tax or corporation tax on chargeable gains. The amount of income subject to income tax or corporation tax is £0.3m: the total payments received (£1.5m) less the value of the land at the first intention date (£1.2m).

For completeness: BIM adds:

If, exceptionally, the first intention date value is less than the fixed initial payment, the amount of the gain taxed as income is the entirety of the contingent payments. The fixed initial payment is not within the calculation of the income since it is not contingent upon the development.

**Example**

A landowner sells land held for investment purposes to a developer for £5.2m. The developer intends to build 10 houses on the land. At the date of sale the land is valued at £5m and in this case this is the first intention date. The contract of sale specifies that £1m will be paid to the landowner when the first house is sold. At the date of sale £5.2m is recognised for capital gains tax purposes. Three years later the first house is sold. At this point condition D is met and the £1m will be taxed as trading income.

It is difficult to see how this could happen.

**21.8 TiL gateway conditions****21.8.1 Purpose to realise gain**

Condition A, B, and D relate to a purpose of realising a gain.

Section 517B ITA/s.356OB CTA 2010 provide:

(4) Condition A is that the main purpose, or one of the main purposes, of acquiring the land was to realise a profit or gain from disposing of the land.

(5) Condition B is that the main purpose, or one of the main purposes, of acquiring any property deriving its value from the land was to realise a profit or gain from disposing of the land...

(7) Condition D is that (in a case where the land has been developed) the main purpose, or one of the main purposes, of developing the land was to realise a profit or gain from disposing of the land when developed.

TiL condition A is not likely to arise, as if a main purpose of acquisition is to realise a gain on disposal, there is likely to be a trade on general principles.<sup>21</sup> But conditions B, C and D may arise.

**21.8.2 Trading stock**

Section 517B(6) ITA/s. 356OB(6) CTA 2010 provide:

Condition C is that the land is held as trading stock.

At first sight land held as trading stock would normally meet condition A,

---

<sup>21</sup> See 21.2 (What is trading in land).

but perhaps the drafter was thinking of land acquired for investment and subsequently appropriated to trading stock.

### 21.8.3 “Main purpose”

BIM makes some general comments:

**BIM60560: Main purpose or one of the main purposes** [May 2019]  
Conditions A, B and D contain a test of whether the “main purpose or one of the main purposes” for acquiring or developing the land, or the property deriving its value from land, was to make a profit or gain from disposal of land. This is a test of purpose, not of benefit or expectation. The concepts of ‘the main purpose’ and ‘a main purpose’ are used widely in UK tax law. A person may have more than one main purpose in entering into a transaction, and ‘a main purpose’ is a wider test than requiring something to be ‘the main purpose’. It is therefore important to consider the question of trading alongside a main purpose test when considering whether or not this legislation applies, to ensure that what are genuinely non-trading transactions are not brought within its scope. An example of a type of arrangement where a main purpose test might be invoked would be a fact pattern similar to that in *Ransom v Higgs* [1974] 50 TC 1.

### 21.8.4 Purpose to realise gain

BIM provides:

**BIM60555: Amounts treated as profits of a trade of dealing in UK land: Conditions** [May 2019]

The purpose of this legislation is to ensure that profits from activities which, when looked at in the round, amount to (i) a trade in land or (ii) a trade of developing land, are taxed as trading profits. It is not the purpose of these rules to alter the treatment of activity that is clearly investment.

The rules effectively look through structures or arrangements which might (?) allow an argument, that on a strict legal analysis, the transactions in question do not amount to a trade.

These rules do not alter the treatment of or recharacterise investment activities, except where they are part of such a wider trading activity. In particular, they do not apply to transactions such as buying or repairing a property for the purpose of earning rental income, or as an investment to generate rental income and enjoy capital appreciation.

The legislation should always be understood in the context that it is taxing only what are, in substance, trading profits.

BIM makes some general comments:

**BIM60560: Main purpose or one of the main purposes** [May 2019]

... If a person buys land with the intention of

- [1] building on part of it to retain for their own purposes, and
- [2] of building on the rest of it for sale at a profit [in a manner consistent with trading activity]<sup>22</sup>,

it is clear that one of their main purposes is to make a trading profit from development and disposal.

In this instance at the point of acquisition the precise section of the land to be disposed of and the costs relating to that section may not be known. If this is the case profits should be calculated using the original cost of the land apportioned on a just and reasonable basis, subject to the anti-fragmentation provisions.

It may be the case that an investor in UK property expects primarily to benefit from capital growth over time, in addition to obtaining rental yield. The legislation requires that a main purpose of the arrangement is to obtain a gain from disposing of the property. This condition will not be met in the case of straightforward long-term investment, where the economic benefit arising to the owner is the result of market movement from holding that asset rather than transactions that are in the nature of trading.

An owner may also seek to increase the value of their property through improving the quality and security of the property's rental income, for example by negotiating longer leases. Alternatively, they may improve the property through some form of refurbishment in order to attract higher paying tenants, or subdivision of the property to attract more tenants, which again would increase the value of the property. Rental income is often an indicator that the asset is held as an investment, although this is not conclusive - an asset held for trading purposes could produce rental income over a relatively short period, equally an asset held over a longer period may for a number of reasons not produce income but could still be seen as an investment. The facts of each case will determine whether or not one of the main purposes is to make a trading profit from development and disposal.

---

22 Author's footnote: Square brackets are original.

It is possible for the intention to change over time, at which point the main purpose test would need to be reconsidered (see examples 3, 4 and 5 below).

The HMRC examples are as follows:

<b>Example/Scenario</b>	<b>TiL conditions met</b>
1 Investment + sale 7 years later after repairs	no
2 Development + sale 6 months after development	yes
3 Investment + change of intention after “several” years	yes but 517L relief
4 Purchase investment Co + intention to realise its assets	yes but 517L relief
5 Mixed trading/investment purpose	yes but apportion
6 Investment + redevelopment + sale 5 years later	no
7 Investment + unforeseen sale 2 years later	no
8 Investment + little rent + sale 5 years later	no
9 Investment + unforeseen sale 18 months later	no

**Example 1 [Investment + sale 7 years later after repairs]**

A non-resident property investor purchases a property with the primary purpose of realising rental income from the land purchased. When the investor purchased the land one of the factors they considered was likely capital appreciation of the land.

After letting out the property for 7 years they make some repairs and dispose of the land.

The HMRC analysis is as follows:

This is an example of an investment not trading transaction. The main purpose of the transaction is the rental income. Whilst the long term capital appreciation could be a reasonable expectation, it is clearly not a profit from a disguised trading transaction and would not therefore meet condition A.

**Example 2 [Development + sale 6 months after development]**

A non-resident property investor purchases a property with the intention of developing then selling the property. After developing the property they let it out for 6 months while they wait for the market to pick up.

In this instance a main purpose of acquiring the land, was to realise a profit from disposing of the land and condition A would be met.

**Example 3 [Investment + change of intention after “several” years]**

An individual property investor acquires an old block of flats. They rent the flats out for several years then decide to build new flats on the site.

They obtain planning permission for a new development which they complete and sell.

In this example there has been a change of intention and Section 517L ITA 2007 will apply. Only the profit relating to the period after the change of intention should be taxed as a trading profit. The portion relating to the period where there was an investment intention should not be included in the tax calculation.

Please see BIM60825 for details on apportionment.

**Example 4 [Purchase investment Co + intention to realise its assets]**

Company X purchases 100% of the share capital of company Y, which owns a UK property on investment account. Company X has the intention of realising a profit in a manner consistent with trading activity, by procuring company Y that subsequently sells the property. This would fall under Condition B.

In this example there has been a change of intention and Section 356OL CTA 2010 will apply. Only the profit relating to the period after the change of intention should be taxed as a trading profit. The portion relating to the period where there was an investment intention should not be included in the tax calculation.

Please see BIM60825 for details on apportionment.

**Example 5 [Mixed trading/investment purchase]**

An individual purchases a rundown block of flats. They intend to develop the flats into luxury apartments. After development they intend to keep 55 for rental and sell 45.

In this instance a main purpose of acquiring the land was to realise a profit or gain from disposing of it so condition A would be met. The profit relating to the 45 apartments should be taxed as trading income. Where it is not possible to specifically identify costs relating to the 45 apartments just and reasonable apportionment should be used.

**Example 6 [Investment + redevelopment + sale 5 years later]**

A non-resident property investor purchases an ageing block of offices in a prime location with the primary purpose of realising rental income from the land purchased. In order to achieve a higher rate of rent and a better quality of tenant, the investor redevelops the offices soon after the acquisition and then lets out the redeveloped offices for a period of 5 years. After such time they dispose of the land at a gain.

In this instance the main purpose of the transaction is the rental income. Whilst the office block is redeveloped, the primary purpose for doing so is to improve the yield from the investment rather than realise a gain.

**Example 7 [Investment + unforeseen sale 2 years later]**

A non-resident property investor purchases a property with a view to obtaining an income stream from the land purchased. At the time that the investor purchased the land it anticipated holding the property for over 5 years. In fact, after 2 years, the investor suffers a liquidity event and is forced to sell the property. The main purpose of the transaction is the rental income and the sale was motivated by a sudden unforeseen emergency. Condition A would not be met in this instance.

**Example 8 [Investment + little rent + sale 5 years later]**

A non-resident property investor purchases a property with a view to realising long term capital appreciation from the land purchased. The company will have to wait a significant number of years before the lease ends, or the tenant is prepared to surrender the lease. During the time that the property is held, the rental profits are poor, perhaps due to a rent-free period or vacancy arising from unexpected occupier insolvency. The investor sells the property after 5 years for a significant profit due to a market increase in the value of the land. This is an example of an investment and not trading transaction and condition A would not be met.

**Example 9 [Investment + unforeseen sale 18 months later]**

A non-resident property investor purchases a property with a view to realising rental income from the land purchased. At the time that the investor purchased the land it anticipated holding the property for over 5 years. In fact, after 18 months, the investor sells the property early as a result of unforeseen circumstances.

In this instance the main purpose of the transaction is the rental income and the sale was motivated by unforeseen circumstances so condition A would not be met.

## 21.9 Definitions

### 21.9.1 “Relevant time”

Section 517B(8) ITA/s.356OB(8) CTA 2010 provide:

In this section “relevant time” means any time in the period beginning when the activities of the project begin and ending 6 months after the disposal mentioned in subsection (1).

This only applies for s.517B ITA/s.356OB CTA 2010, so the definition is repeated verbatim in s.517H(6) ITA/s.356OH(6) CTA 2010.

### 21.9.2 “The project”

s. 517B(9) ITA/s.356OB(9) CTA 2010 provide:

In this section “the project” means all activities carried out for any of the following purposes—

- (a) the purposes of dealing in or developing the land, and
- (b) any other purposes mentioned in Conditions A to D.

This only applies for S.517B ITA/s.356OB CTA 2010, so the definition is repeated verbatim in s.517H(10) ITA/s. 356OH(10) CTA 2010.

### 21.9.3 “Associated”

“Associated” person matters because the word is used in:

- (1) s.517B(10) ITA/s. 356OB(10) CTA 2010: definition of TiL person in direct disposal condition (a).<sup>23</sup>
- (2) s.517H(9) ITA/s. 356OH(9) CTA 2010: fragmentation rule.

#### **s. 517B(10) ITA**

For the purposes of this section a person (“A”) is associated with another person (“B”) if—

(a) A is connected with B by virtue of any of subsections (2) to (4) of section 993 (read in accordance with section 994), or

(b) A is related to B (see section 517U).

#### **s.356OB(10) CTA 2010**

[identical]

(a) A is connected with B by virtue of any of subsections (5) to (7) of section 1122 (read in accordance with section 1123), or

(b) A is related to B (see section 356OT).

This only applies for s.517B/356OB, so the definition is repeated verbatim in s.517H(9) ITA/356OH(10) CTA 2010.

The term “related” is used in the definition of “associated”.<sup>24</sup> The definition is in s.517U ITA/s.356OT CTA 2010; see 54.7 (“Related party”).

## **21.10 Indirect disposal of land**

#### **s.517D(1) ITA**

#### **s.356OD(1) CTA 2010**

<sup>23</sup> See 21.7 (TiL person).

<sup>24</sup> See 21.9.3 (“Associated”).

(1) Section 517E(1) applies (subject to subsection (3) of that section) if—

(1) Section 356OE applies (subject to subsection (3) of that section) if—

There follow three conditions, or sets of conditions, which I call indirect disposal conditions (a) to (c).

### 21.10.1 *Condition (a): Land-rich asset*

#### **s.517D(1) ITA**

Section 517E(1) applies (subject to subsection (3) of that section) if—

(a) a person realises a profit or gain from a disposal of any property which (at the time of the disposal) derives at least 50% of its value from land<sup>25</sup> in the UK

#### **s.356OD(1) CTA 2010**

Section 356OE applies (subject to subsection (3) of that section) if—

[identical]

I refer to this as an “**indirect disposal of land**” and property within (a) is a “**land-rich asset**”.

Section 517S(2) ITA/s. 356OR CTA 2010 provide a commonsense definition:

In this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] references to property deriving its value from land include—

- (a) any shareholding in a company deriving its value directly or indirectly from land,
- (b) any partnership interest deriving its value directly or indirectly from land,
- (c) any interest in settled property deriving its value directly or indirectly from land, and
- (d) any option, consent or embargo affecting the disposition of land.

### 21.10.2 *Condition (b): Concerned in arrangement*

---

<sup>25</sup> Section 517S(1) ITA (more or less) duplicates the Interpretation Act 1978 definition of land, so it adds nothing; see App 2.17 (Land).

**s. 517D(1) ITA**

Section 517E(1) applies (subject to subsection (3) of that section) if...

(b) the person is a party to, or concerned in, an arrangement concerning some or all of the land mentioned in paragraph (a) (“the project land”)

**s. 356OD(1) CTA 2010**

Section 356OE applies (subject to subsection (3) of that section) if...

[identical]

BIM provides:

**BIM60845: Definitions: Arrangement** [May 2019]

... To be in an arrangement<sup>26</sup> it is necessary to be acting together in some way or to have knowledge of the purpose of the arrangement. Where there is a small shareholder who has no or little input into the company which is developing the land, it is unlikely they will be concerned in an arrangement. There is a large spectrum of situations and the specific circumstances will determine whether an individual or company is concerned in an arrangement.

**Example 1**

An individual shareholder purchases a small number of shares in one of the UK’s largest house builders. After holding these shares for a period they decide to dispose of the shares.

In this instance it is unlikely the individual is concerned in an arrangement. They are unlikely to be acting together with the house builder to deal in or develop UK land.

**Example 2**

An individual purchases 60% of the shares in a company which has been set up to purchase and develop a piece of land. The company will not be selling the land but will be sold to the person who wants to acquire the land. The reason for purchasing the shares was to purchase a portion of the land which will be disposed of after it is developed. When the land is developed the individual sells their shares to a third party.

In this instance it is likely the individual has been concerned in an arrangement to develop the land.

---

26 Author’s footnote: This is a loose paraphrase of the statutory term, which is “party to or concerned in” an arrangement. But nothing turns on that.

### 21.10.3 Condition (c): Purpose of gain

#### s. 517D(1) ITA

Section 517E(1) applies (subject to subsection (3) of that section) if...

(c) the arrangement meets the condition in subsection (2).

#### s. 356OD(1) CTA 2010

Section 356OE applies (subject to subsection (3) of that section) if...

[identical]

Section 517D(2) ITA/s. 356OD(2) CTA 2010 provide:

The condition is that the main purpose, or one of the main purposes, of the arrangement is to—

- (a) deal in or develop the project land, and
- (b) realise a profit or gain from a disposal of property deriving the whole or part of its value from that land.

This is a rough equivalent of the TiL gateway conditions which apply on a direct disposal.<sup>27</sup>

## 21.11 TiL trade

The rules for direct/indirect disposals are in s.517C/E ITA and s.356OC/E CTA 2010, and it is helpful to read them side by side:

#### Direct disposal

##### s.517C ITA

(1) The profit or gain [from the disposal of land] is to be treated for income tax purposes as profits of a trade carried on by the chargeable person.

##### s.356OC CTA 2010

(1) The profit or gain [from the disposal of land] is to be treated for corporation tax purposes as profits of a trade carried on by the chargeable company (see section 356OG).

#### Indirect disposal

##### s.517E ITA

(1) The relevant amount is to be treated for income tax purposes as profits of a trade carried on by the chargeable person.

##### s. 356OE CTA 2010

(1) The relevant amount is to be treated for corporation tax purposes as profits of a trade carried on by the chargeable company.

<sup>27</sup> See 21.8 (TiL gateway conditions).

I refer to the deemed trade as the “**TiL trade**”.

The TiL code does not have its own charging provision: the income falls under the general charge on trading income.

The (deemed) trading income does not qualify as RFI.<sup>28</sup>

Section 517E (indirect disposal) is the same as s.517C (direct disposal) except the quantum of the charge is on the relevant amount, not the gain.

### 21.11.1 *Deemed development trade*

#### **Direct disposal**

##### **s.517C ITA**

(2) If the chargeable person is non-UK resident, that trade is the person’s trade of dealing in or developing UK land (as defined in section 6B of ITTOIA 2005).

##### **s.356OC CTA 2010**

(2) If the chargeable company is non-UK resident, that trade is the company's trade of dealing in or developing UK land (as defined in section 5B of CTA 2009).

#### **Indirect disposal**

##### **s.517E ITA**

(2) If the chargeable person is non-UK resident, that trade is the chargeable person’s trade of dealing in or developing UK land.

##### **s. 356OE CTA 2010**

(2) If the chargeable company is non-UK resident, that trade is the company's trade of dealing in or developing UK land.

The wording is effectively the same. The point is to bring into effect the anti-avoidance rules relating to dealing/developing UK land by non-residents; see 21.3 (Dealing/developing UK land).

### 21.11.2 *Income receipt exemption*

It is helpful to compare the rules for direct/indirect disposals, so I set them side by side. The IT/CT rules are substantially identical, but I set out both for completeness:

#### **Direct disposal**

##### **s.517C(3) ITA**

#### **Indirect disposal**

##### **s.517E(3) ITA**

---

28 See 15.10.2 (“Relevant foreign income”).

But subsection (1) [deemed trade] does not apply to a profit or gain [from the disposal of land] so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)—

- (a) for income tax purposes, or
- (b) for corporation tax purposes

**s. 356OC(3) CTA 2010**

(3) But subsection (1) [deemed trade] does not apply to a profit or gain [from the disposal of land] so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)—

- (a) for corporation tax purposes, or
- (b) for income tax purposes.

But subsection (1) [deemed trade] does not apply to an amount [ie a relevant amount]

so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)—

- (a) for income tax purposes, or
- (b) for corporation tax purposes.

**s. 356OE(3) CTA 2010**

(3) But subsection (1) [deemed trade] does not apply to an amount [ie a relevant amount]

so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)—

- (a) for corporation tax purposes, or
- (b) for income tax purposes.

BIM Manual gives an example in relation to the indirect disposal charge:

**BIM60575 Disposals Of Property Deriving Its Value From Land**  
[May 2020]

... **Example**

A new company is set up to acquire land and develop an office building thereon. The land is not held as trading stock. Once the development is completed, the intention is to sell the company shares as a means of disposing of the development (enveloping) rather than selling the land and buildings directly. If all of the conditions at s.356OD CTA 2010 or s.517 ITA2007 are met the rules will apply to tax the profit on disposal of the shares as income.

This is sensible, though far from obvious from the legislation.

21.11.3 *Date income arises*

**s. 517C(4)/517E(4) ITA**

**s. 356OC(4)/356OE(4) CTA 2010**

The profits are treated as arising in the tax year in which the profit or gain is realised.

The profits are treated as arising in the accounting period of the chargeable company in which the profit or gain is realised.

BIM provides:

**BIM60625 Period In Which The Gain Is Taxed** [May 2019]

The profit or gain is chargeable in the:

- tax year in which the gain arises (where the person liable for the tax is an individual, a trustee or a personal representative), or
- accounting period in which the gain arises (where the person liable for the tax is a company). Guidance on accounting periods can be found at CTM01410

**Example 1**

Company X has an accounting period ending on 31 December 2017. It disposes of a property on 12 May 2017. The profit will be taxable in the accounting period ending 31 December 2017.

**Example 2**

Non-resident Company X was not within the charge to UK taxation prior to the new legislation. At the date the new legislation came into force they were carrying on a trade of dealing in or developing UK land. As the company has first come into charge to corporation tax on the date of the introduction of the new legislation (5th July 2016) a new accounting period will begin on that date.

**Example 3**

Non-resident Company Y had a permanent establishment in the UK prior to the introduction of the new legislation. As the company has been chargeable to CT throughout this will not cause the cessation of a tax accounting period and the commencement of a new one.

21.11.4 *Capital gain*

Sections 517C(5)/517E(7) ITA and 356OC(5)/356OE(7) CTA 2010 are all identical:

This section applies in relation to gains which are capital in nature as it applies in relation to other gains.

In contemporary tax usage, the word gain is usually reserved for gains of a capital nature. If the profit (gains) are of an income nature, the TiL code does not apply.

21.11.5 *Relevant amount*

Relevant amount matters as the indirect disposal charge is on the relevant amount.

**s. 517E ITA**

(5) In this section the “relevant amount” means so much (if any) of the profit or gain mentioned in section 517D(1) as is attributable, on a just and reasonable apportionment, to the relevant UK assets.

(6) In this section “the relevant UK assets” means any land in the UK from which the property mentioned in section 517D(1) derives any of its value (at the time of the disposal mentioned in that subsection).

**s. 356OE CTA 2010**

(5) In this section the “relevant amount” means so much (if any) of the profit or gain mentioned in section 356OD(1) as is attributable, on a just and reasonable apportionment, to the relevant UK assets.

(6) In this section “the relevant UK assets” means any land in the United Kingdom from which the property mentioned in section 356OD(1) derives any of its value (at the time of the disposal mentioned in that subsection).

BIM provides:

**BIM60590: Relevant amount and relevant assets** [May 2019]

...In all calculations, a just and reasonable basis should be used for apportionment.

**Example 1**

A company disposes of its shareholding in a company. The shares were purchased with the intention of dealing in the project land and making a profit from disposing of the shares which derives their value from the land. The shares are worth £10m, £6m of the value relates to a block of flats based in the UK and £4m to a housing development outside the UK. In this instance, and assuming that the acquisition costs of the shares is nil, the block of flats is the relevant UK asset and the relevant amount is £6m. If consideration paid for the shares was £5m, and 60% of that cost related to the UK development, the relevant amount would be £3m (£6m less 60% of £5m).

**Example 2**

An individual purchases shares in a company which is developing a

large housing estate. The shares were valued at £10m and the value is derived entirely from UK Land. When the individual purchased the shares they intended to dispose of 40% of the shares to an individual who wished to purchase the land after development and hold on to the remaining 60% for the capital appreciation. In this instance the relevant UK assets are the £4m of land. The remaining £6m are investment assets, and not subject to the new legislation.

## 21.12 Chargeable person/company

Chargeable person/company matters because the TiL trade is deemed to be carried on by the chargeable person/company, and so the chargeable person/company is subject to the tax.<sup>29</sup>

### s. 517G ITA

(1) For the purposes of sections 517C and 517E the general rule is that the “chargeable person” is the person (“P”) that realises the profit or gain (as mentioned in section 517B(1) or 517D(1)).

### s. 356OG CTA 2010

(1) For the purposes of sections 356OC and 356OE the general rule is that the “chargeable company” is the company (“C”) that realises the profit or gain (as mentioned in section 356OB(1) or 356OD(1)).

s. 517G ITA/ s.356OG CTA 2010 signposts some exceptions:

### s. 517G ITA

(2) The general rule in subsection (1) is subject to the special rules in subsections (4) to (6).

(3) But those special rules do not apply in relation to a profit or gain to which section 517H(3) (fragmented activities) applies.

### s. 356OG CTA 2010

[identical]

(3) But those special rules do not apply in relation to a profit or gain to which section 356OH(3) (fragmented activities) applies.

### 21.12.1 Provider of value

#### s. 517G ITA

#### s. 356OG CTA 2010

---

<sup>29</sup> See 21.11 (TiL trade).

(4) If all or any part of the profit or gain accruing to P is derived from value provided directly or indirectly by another person (“B”), B is the “chargeable person”.

(5) Subsection (4) applies whether or not the value is put at the disposal of P.

(4) If all or any part of the profit or gain accruing to C is derived from value provided directly or indirectly by another person (“B”) which is a company, B is the “chargeable company”.

(5) Subsection (4) applies whether or not the value is put at the disposal of C.

### 21.12.2 *Provider of opportunity*

#### **s. 517G(6) ITA**

If all or any part of the profit or gain accruing to P is derived from an opportunity of realising a profit or gain provided directly or indirectly by another person (“D”), D is “the chargeable person” (unless the case falls within subsection (4)).

#### **s. 356OG(6) CTA 2010**

If all or any part of the profit or gain accruing to C is derived from an opportunity of realising a profit or gain provided directly or indirectly by another person (“D”) which is a company, D is “the chargeable company” (unless the case falls within subsection (4)).

BIM provides:

#### **BIM60830: Definitions: Realising a gain [May 2019]**

##### **... Example**

Person A (“A”) and person B (“B”) are related parties.

If, by a premature sale, A directly or indirectly transmits the opportunity of realising a profit or gain to another B, then A realises B’s profit or gain for B.

BIM provides:

#### **BIM60820: Definitions: The chargeable company or person [May 2019]**

... Since the tax charge is raised on the third party (i.e. someone who is not a party to the transaction in land), clear and convincing evidence is needed to show that this person, as a matter of fact, is the provider of value or the opportunity for gain. The third party may transmit the value or opportunity directly or indirectly.

When a person has purchased land or an interest in land at market value

under a normal commercial arrangement in the absence of other factors the special rules will not apply to regard them as providing the value for a gain to be realised, or the opportunity to derive that value.

**Example 1** [Transfer at undervalue]

Mr B transfers developed land at £1m, which is £9m undervalue, to Company A a non UK resident company in which he is the sole shareholder.

Company A immediately sells the land realising a £9m profit and immediately goes into liquidation.

The HMRC analysis is as follows:

In this scenario Mr B would be the chargeable person in respect of that £9m gain.

But is it correct that company A has made a £9m gain?

**Example 2** [Sale of SPV]

Company B - a wholly owned subsidiary of company A - develops a property as an investment. Company A sells the shares in company B to company C as soon as the development is complete, and the transaction is caught by the enveloping rules. In this situation, company A would remain the chargeable person - not company B (merely because it had developed the property), nor, company C (as the acquirer of the shares).

BIM provides:

**BIM60580: Disposals of property deriving its value from land** [May 2019]

... Where a company or individual are charged by virtue of S356OD CTA 2010 or Section 517D ITA 2007, they may not have started a trade prior to the point of disposal. If this is the case the obligation to notify will arise when the shares are disposed of.

**Example 1**

Company X owns 100% of Company Y. Company Y purchases a piece of UK land and carries out the development of a block of flats. Company Y has no other substantial assets so over 50% of the company's value relates to the land. The intention of Company X is for Company Y to develop the land and to immediately dispose of their shares in Company Y when the land is developed. The land is not held as trading stock by Company Y. When the development is completed Company X sells the shares in Company Y to a third party.

In this example the disposal meets the conditions and is a disposal of property deriving its value from land. The profits should be treated as trading profits of Company X.

**Example 2**

Company X purchases 100% of the share capital of Company Y, whose only asset is a dated office block that is held on investment account. Company X purchased the shares in company Y to hold as an investment and yield income.

After a period of rental there is a change of intention and a decision to redevelop and sell the office block. To carry out this disposal it is agreed Company X will dispose of its shares in company Y when the redevelopment is complete.

In this example there has been a change of intention and Section 356OL CTA 2010 will apply. Only the profit relating to the period after the change of intention should be taxed as a trading profit. The portion relating to the period where there was an investment intention should not be included in the tax calculation.

Please see BIM60825 for details on apportionment.

## 21.13 Fragmentation

### s. 517H ITA

- (1) Subsection (3) applies if –
- (a) a person (“P”) disposes of any land in the UK,
  - (b) any of conditions A to D in section 517B is met in relation to the land,<sup>30</sup> and
  - (c) a person (“R”) who is associated<sup>31</sup> with P at a relevant time has made a relevant contribution to activities falling within subsection (2).

### s. 356OH CTA 2010

- (1) Subsection (3) applies if—
- (a) a company (“C”) disposes of any land in the United Kingdom,
  - (b) any of conditions A to D in section 356OB is met in relation to the land, and
  - (c) a person (“R”) who is associated with C at a relevant time has made a relevant contribution to activities falling within subsection (2).

---

30 See 21.8 (TiL gateway conditions).

31 See 21.9.3 (“Associated”).

- (2) The following activities fall within this subsection— [identical]
- (a) the development of the land,
  - (b) any other activities directed towards realising a profit or gain from the disposal of the land.

### 21.13.1 *Anti-fragmentation rule*

If these conditions are satisfied, s. 517H ITA/s. 356OH CTA 2010 recomputes the profit/gain:

#### **s. 517H ITA**

(3) For the purposes of this Part [Part 9A ITA, transactions in land], the profit or gain (if any) realised by P from the disposal is to be taken to be what that profit or gain would be if R were not a distinct person from P (and, accordingly, as if everything done by or in relation to R had been done by or in relation to P).

(4) Subsection (5) applies to any amount which is paid (directly or indirectly) by R to P for the purposes of meeting or reimbursing the cost of income tax which P is liable to pay as a result of the application of subsection (3) in relation to R and P.

(5) The amount—

- (a) is not to be taken into account in calculating profits or losses of either R or P for the purposes of income tax or corporation tax, and
- (b) is not for any purpose of the Corporation Tax Acts to be regarded as a distribution.

#### **s. 356OH CTA 2010**

(3) For the purposes of this Part, the profit or gain (if any) realised by C from the disposal is to be taken to be what that profit or gain would be if R were not a distinct person from C (and, accordingly, as if everything done by or in relation to R had been done by or in relation to C).

(4) Subsection (5) applies to any amount which is paid (directly or indirectly) by R to C for the purposes of meeting or reimbursing the cost of corporation tax which C is liable to pay as a result of the application of subsection (3) in relation to R and C.

(5) The amount—

- (a) is not to be taken into account in calculating profits or losses of either R or C for the purposes of income tax or corporation tax, and
- (b) is not for any purpose of the Corporation Tax Acts to be regarded as a distribution.

## 21.13.2 “Relevant contribution”

**s. 517H ITA**

(7) For the purposes of this section any contribution made by P to activities falling within subsection (2) is a “relevant contribution” unless the profit made or to be made by P in respect of the contribution is insignificant having regard to the size of the project.

(8) In this section “contribution” means any kind of contribution, including, for example—

- (a) the provision of professional or other services, or
- (b) a financial contribution (including the assumption of a risk).

**s. 356OH CTA 2010**

(7) For the purposes of this section any contribution made by R to activities falling within subsection (2) is a “relevant contribution” unless the profit made or to be made by R in respect of the contribution is insignificant having regard to the size of the project.

[identical]

BIM provides:

**BIM60610: Relevant Contribution** [May 2019]

The anti-fragmentation rules address the risk that a developer carrying on a trade of dealing in or developing UK land could enter into arrangements to move profits to a connected party, where the connected party is not chargeable to UK tax on the profit that they realise. This could, for example, arise where a firm supplying professional services is allocated a share of the profit from the disposal of the land. It could also arise where interest is paid to a connected party based to any extent on sharing profits from the development.

... All contributions are considered to be relevant contributions unless they are insignificant when considered in relation to the size of the project.

The significance of a contribution in relation to the size of a project will depend on the facts and circumstances of each instance.

One situation where a contribution is likely to be considered insignificant is if it is a Low Value Added Service (LVAS). This is because the mark-up for a LVAS is typically low, so the cost is not likely to be material in respect of the project.

The Manual gives 3 straightforward examples.

**Example 1**

Company X carries on a trade of dealing in or developing UK land. It receives admin services from a group company and pays a mark-up of 2% on the costs. In this instance the contribution would be regarded as insignificant and the fragmentation rules would not apply.

**Example 2**

Company Y carries on a trade of dealing in or developing UK land. A group company (Company Z) designs all of the buildings. Company Y pays Company Z 10% of the profits for the provision of architectural services. In this instance the profit made by Y would not be regarded as insignificant with regards to the size of the project and the fragmentation rules will apply.

**Example 3**

Company A carries on a trade of dealing in or developing UK land. The group has an intra group service centre run by Company B which provides IT and HR services. The costs which relate to Company A are recharged by Company B. In this instance any profit in Company B is likely to be minimal so the contribution will be insignificant.

### 21.13.3 *Interest*

BIM provides:

**BIM60611: Anti-fragmentation: Interest** [May 2019]

A financial contribution is considered a relevant contribution where it includes the assumption of risk by the lender. The rules are targeted at loans which aim to transfer a portion of the project profit from the company making the disposal to an associated company.

There is a relevant contribution where there is an intra group loan which results in the lender being entitled to a proportion of the profit or gain from the project (e.g. via a profit participating loan), or an intra group loan which results in the lender taking on a portion of the risk from the project. In both of these instances the interest payments may result in profits being fragmented to the lender.

Whilst interest payments may be at arm's length, they may still be relevant contributions. For example, if there is a mezzanine loan with an interest rate which is high - due to the lender taking on project risk - the loan could be arm's length, but as the high interest rate is linked to the risk of the project, it would be a relevant contribution.

Anti-fragmentation does not relate to senior lending with terms and

interest rates commensurate with those available in the open market or to mezzanine debt where there is no participation in the profits/gains and/or no risk premium element; it only applies where and to the extent that significant project risk is taken on by the lender.

It is likely that if the profit is insignificant then this will be because, for example, the other party has not taken on a significant level of risk in relation to the overall project, although - as with all aspects - this has to be considered in the round.

Where a loan is from an unconnected party the anti-fragmentation rules will not apply. The rules will also not apply where lending from an unconnected party has been on-lent in whole or in part on materially the same terms.

Any loan where there is no risk premium reflected in the interest and where the interest is not linked to the profit from the disposal will not be considered a relevant contribution. In these instances the interest payments will be allowable deductions unless they are disallowed by other legislation.

Where there is a loan between connected parties which has both a portion with a risk premium and a portion without a risk premium, only the portion with the risk element will be considered to be a relevant contribution.

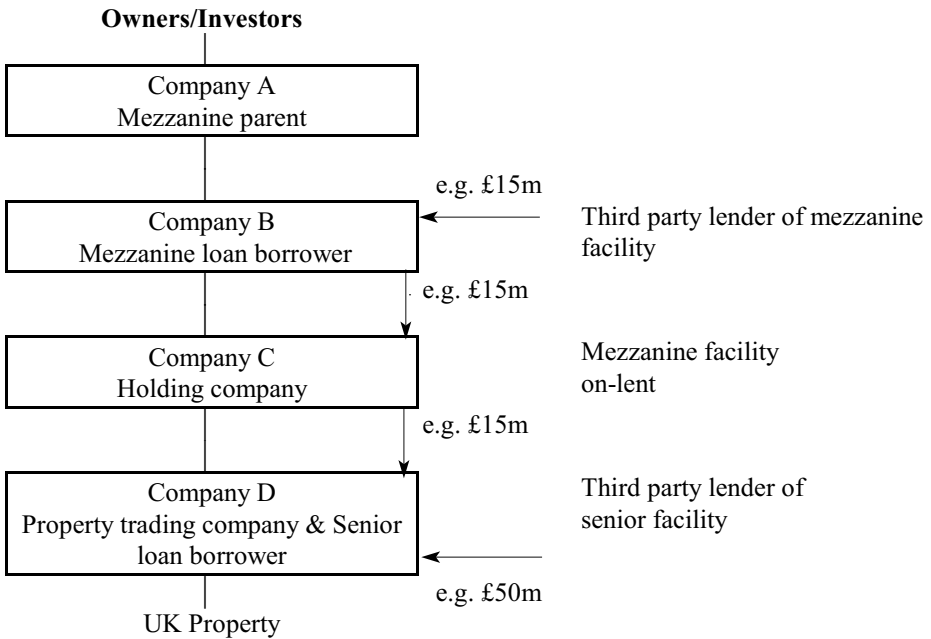

**Example 1**

Company C has raised as much bank finance as it can, at normal rates, to finance an apartment development. R makes a loan of £300m to Company C with a high interest rate to reflect taking on part of the risk of the project. In this instance the loan is a relevant contribution.

**Example 2**

R makes a loan of £100m to Company C, at normal senior rates, and this is 30% of the cost of the land. The loan is made for the initial acquisition of land and there are no unusual terms in the loan. In this instance the loan would not be considered to be a relevant contribution.

**Example 3**

In the example above the interest deductions would not be considered to be relevant contributions as they are all on-lending of external finance. Where there is external funding this can be traced through any number of companies.

**BIM60615: Antifragmentation: Example [May 2019]**

In the situation above, ‘Dealer’ is subject to the new charge, as ‘Dealer’ will realise a profit from the disposal of UK Land.

In this case ‘Dealer’ does not have the assets (e.g. cash) or employees to manage the risk comprised in the development. Instead, the risks associated with the development are funded by ‘Devco’.

In this example ‘Devco’ performs many of the significant people

functions (SPFs), and as such is paid the majority of the profits realised from the sale of the UK property. This is done in a manner that is designed to be compliant with UK transfer pricing methodologies.

The contribution 'Devco' is making to the development of the land is not insignificant and the anti-fragmentation rules will apply in this case.

- 'Dealer' has disposed of land in the UK,
- Condition A is met in relation to the land, and
- 'Devco' has made a relevant contribution to the development of the land by assuming the risk.

Any profit realised by 'Devco' will be taxed on 'Dealer' as if 'Dealer' and 'Devco' were one entity. Only profits of 'Devco' that are directly attributable to Dealer are taxed in that entity, while Devco's other [unrelated] profits remain taxable in 'Devco.'

If 'Devco' is a UK resident Section 356OC(3) CTA 2009<sup>32</sup> would provide relief, so far as the profits would be brought into account as income in calculating profits (of any other person).

## 21.14 Calculation of gain

### s. 517I ITA

For the purposes of this Part [Part 9A, transactions in land],  
 (a) the profit or gain (if any) from a disposal of any property is to be calculated according to the principles applicable for calculating the profits of a trade under Part 2 of ITTOIA 2005,

(b) subject to any modifications that may be appropriate

(c) (and for this purpose the same rules are to apply in calculating losses from a disposal as apply in calculating profits).

### s. 356OI CTA 2010

For the purposes of this Part [Part 8ZB, transactions in UK land],  
 (a) the profit or gain (if any) from a disposal of any property is to be calculated according to the principles applicable for calculating the profits of a trade under Part 3 of CTA 2009,

[identical]

[identical]

Section 517J ITA/s.356OJ CTA 2010 deal with apportionment in a commonsense way:

---

<sup>32</sup> See 21.11.2 (Income gain outside TiL).

Any apportionment (whether of expenditure, consideration or any other amount) that is required to be made for the purposes of this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] is to be made on a just and reasonable basis.

BIM provides:

**BIM60620: Calculation of profit or gain** [May 2019]

After it has been determined that the profits should be treated as trading profits, Section 356OI CTA 2010 and Section 517I ITA 2007 determine how the profit or loss from the disposal should be calculated. The profits should be calculated in accordance with the normal principles for calculating profits of a trade. These principles can be found at Part 2 ITTOIA 2005 for income tax and Part 3 CTA 2009 for corporation tax.

Where a deduction would be allowable or receipt taxable, if a UK resident business was carrying out the trade, then the same should apply to a non-resident which has a trade of dealing in or developing UK land.

Where a non-resident company comes within the scope of corporation tax, stock should be recognised at ‘carrying value’.. Where an asset is not held as a trading asset the asset should also be brought in at cost. The deeming provisions in Section 41 CTA 2009 are not sufficient to invoke the provisions of Section 158/160 CTA 2009, in order to determine the opening value of stock.

The trading profits of the development activity should be calculated based on UK GAAP or any other acceptable GAAP.

Where the non-resident business disposes of UK land as only part of a trade, or if it carries on more than one trade, the profit or loss should be apportioned between the UK land trade and the other trade on a just and reasonable basis.

#### 21.14.1 Losses

BIM provides:

**BIM60620: Calculation of profit or gain** [May 2019]

Carried forward trade losses will be available for use in the normal way. If a company was carrying on a trade of developing UK land - prior to enactment of the new legislation on 5 July 2016 - and was within the charge to CT by virtue of having a permanent establishment in the UK, Section 45 CTA 2010 applies, as the company will be

carrying on the same trade [albeit not within the charge to CT under Section 5B CTA 2009]. Therefore, trading losses that accrued before 5 July 2016 will continue to be available to offset against future income of the same trade under Section 45 CTA 2010.

#### 21.14.2 *Group relief*

BIM provides:

**BIM60620: Calculation of profit or gain** [May 2019]

Group relief will be permissible in the normal way. Whilst Section 134 CTA 2010 has a “UK related” condition, Section 1141(1) CTA 2010 provides that a company has a permanent establishment in a territory if it has a fixed place of business there through which the business of the company is wholly, or partly carried on. Section 1141(2)(h) provides that a fixed place of business includes a building site or construction or installation project.<sup>33</sup> HMRC’s position is that most UK property development sites will fall under Section 1141(2)(h) CTA 2010 and meet the “UK related” condition at Section 134 CTA 2010.

#### 21.14.3 *Foreign taxation*

BIM provides:

**BIM60600: Fragmented activities overview** [May 2019]

...Where an amount is taxed by another jurisdiction unilateral relief may be available and/or an application for Mutual Agreement Procedure (MAP) may be made.

#### 21.14.4 *Interaction of TiL/CGT*

The general rule is that where the person making a disposal is subject to income tax on the proceeds, IT has priority over CGT, and there is no double charge.<sup>34</sup> This rule does not work where X makes a disposal but the income is treated as the income of Y; s.37(5)/(5A) TCGA deal with this problem:

**s.37(5) TCGA**

**s.37(5A) TCGA**

---

<sup>33</sup> See 101.11.1 (Building/construction site).

<sup>34</sup> See s.37 TCGA, discussed at 53.3.4 (Interaction of IT/CGT).

If—

- (a) because section 517G(4) or (6) of ITA 2007 (transactions in land: the chargeable person) applies, an amount is charged to income tax as income of a person other than the person (“A”) by whom the gain was realised, and  
 (b) the income tax has been paid,

for the purposes of this section the amount charged to that tax is regarded as having been charged as the income of A.

If—

- (a) because section 356OG(4) or (6) of CTA 2010 (transactions in land: the chargeable company) applies, an amount is charged to corporation tax as profits of a person other than the person (“C”) by whom the gain was realised, and  
 (b) the corporation tax has been paid,

for the purposes of this section the amount charged to that tax is regarded as having been charged as the income of C.

## 21.15 TiL TAAR

### s. 517K ITA

(1) Subsection (3) applies if an arrangement has been entered into the main purpose or one of the main purposes of which is to enable a person to obtain a relevant tax advantage.

(3) The tax advantage is to be counteracted by means of adjustments.

I refer to this as the “**TiL Taar**”.

### s. 517K(4) ITA

For this purpose adjustments may be made (whether by an officer of Revenue and Customs or by the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

### s. 356OK CTA 2010

(1) Subsection (3) applies if an arrangement has been entered into the main purpose or one of the main purposes of which is to enable a company to obtain a relevant tax advantage.

[identical]

### s. 356OK(4) CTA 2010

For this purpose adjustments may be made (whether by an officer of Revenue and Customs or by the company) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

Section 517K(5) ITA/s. 356OK(5) CTA 2010 defines “relevant” tax

advantage:

In this section “relevant tax advantage” means an advantage in relation to income tax charged (or which would, if the tax advantage were not obtained, be charged) in respect of amounts treated as profits of a trade by virtue of this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land].

Section 517K(6) ITA/s. 356OK(6) CTA 2010 provide the standard IT/CT/CGT definition of “tax advantage”.<sup>35</sup>

BIM provides:

**BIM60700: Avoidance provisions** [May 2019]

**...Example**

An individual is contemplating disposal of shares which derive 60% of their value from land. Just prior to the disposal the individual injects additional capital into the company to ensure the 50% test at Section 517OD (1)(a) ITA 2007 is not met. The individual argues the profits should not be treated as trading profits as the 50% condition is not met. In this instance the individual has entered into an arrangement with a main purpose of obtaining a relevant tax advantage. The tax which would have been chargeable as a result of Part 9A ITA 2007 has been reduced so an adjustment should be made to counter the tax advantage.

The HMRC analysis is as follows:

In this instance the individual has entered into an arrangement with a main purpose of obtaining a relevant tax advantage. The tax which would have been chargeable as a result of Part 9A ITA 2007 has been reduced so an adjustment should be made to counter the tax advantage.

21.15.1 *TiL treaty override*

Section 517K ITA/s.356OK CTA 2010 provide a treaty override, in the same terms as the land-dealing TAAR<sup>36</sup>:

(2) In subsection (1) the reference to obtaining a relevant tax advantage includes obtaining a relevant tax advantage by virtue of any provisions of double taxation arrangements, but only in a case where the relevant tax advantage is contrary to the object and purpose of the provisions of

---

<sup>35</sup> See 2.12.1 (Tax advantage: Definitions).

<sup>36</sup> See 21.4.2 (Treaty override).

the double taxation arrangements (and subsection (3) has effect accordingly, regardless of anything in section 6(1) of TIOPA 2010).

(3) The tax advantage is to be counteracted by means of adjustments.

The wording is again based on the OECD principal purpose test.<sup>37</sup>

## 21.16 Pre-development gain

The rules for direct/indirect disposals are in s.517L ITA/356OL CTA 2010 and it is helpful to read them side by side:

### Direct disposal

#### s.517L(1)-(2) ITA

(1) Subsection (2) applies if—

(a) subsection (1) of section 517C applies because Condition D in section 517B is met (land developed with purpose of realising a gain from its disposal when developed), and

(b) part of the profit or gain mentioned in that subsection is fairly attributable to a period before the intention to develop was formed.

(2) Section 517C(1) has effect as if the person mentioned in section 517B(1) had not realised that part of the profit or gain.

#### s. 356OL(1)-(2) CTA 2010

(1) Subsection (2) applies if—

### Indirect disposal

#### s.517L(3)-(4) ITA

(3) Subsection (4) applies if—

(a) section 517E(1) applies, and

(b) part of the profit or gain mentioned in section 517E(5) is fairly attributable to a period before the person mentioned in section 517D(1) was a party to, or concerned in, the arrangement in question.

(4) Section 517E has effect as if the person had not realised that part of the profit or gain.

#### s. 356OL(3)-(4) CTA 2010

(3) Subsection (4) applies if—

<sup>37</sup> See 104.8 (OECD principal purpose test).

(a) subsection (1) of section 356OC applies because Condition D in section 356OB is met (land developed with purpose of realising a gain from its disposal when developed), and

(b) part of the profit or gain mentioned in that subsection is fairly attributable to a period before the intention to develop was formed.

(2) Section 356OC(1) has effect as if the person mentioned in section 356OB(1) had not realised that part of the profit or gain.

#### s. 517L(5) ITA

In applying this section account must be taken of the treatment under Part 2 of ITTOIA 2005 (trading income) of a person who appropriates land as trading stock.

(a) section 356OE(1) applies, and

(b) part of the profit or gain mentioned in section 356OE(5) is fairly attributable to a period before the person mentioned in section 356OD(1) was a party to, or concerned in, the arrangement in question.

(4) Section 356OE has effect as if the person had not realised that part of the profit or gain.

#### s. 356OL(5) CTA 2010

(5) In applying this section account must be taken of the treatment under Part 3 of CTA 2009 (trading income) of a company which appropriates land as trading stock.

### 21.17 Private residence

Section 517M ITA provides:

No liability to income tax arises under this Part [Part 9A, transactions in land] in respect of a gain accruing to an individual if—

- (a) the gain is exempt from capital gains tax as a result of sections 222 to 226 of TCGA 1992 (private residences), or

See 60.1 (Private residence relief).

### 21.18 Tracing value

Section 517N ITA/s. 356OM CTA 2010 provide:

- (1) This section applies if it is necessary to determine the extent to

which the value of any property or right is derived from any other property or right for the purposes of this Part [Part 9A CTA, transactions in land/Part 8ZB CTA 2010, transactions in UK land].

(2) Value may be traced through any number of companies, partnerships, trusts and other entities or arrangements.

(3) The property held by a company, partnership or trust must be attributed to the shareholders, partners, beneficiaries or other participants at each stage in whatever way is appropriate in the circumstances.

Section 517N(4) ITA/s. 536OM(4) CTA 2010 set out foreign-entity definitions of partnership/partner/ trust/beneficiary, but these are otiose; see 86.1.1 (Statutory foreign-entity definitions).

## 21.19 Indirect arrangements

### s. 517O ITA

(1) In determining whether section 517C(1) or 517E(1) applies, account is to be taken of any method, however indirect, by which—

(a) any property or right is transferred or transmitted, or

(b) the value of any property or right is enhanced or diminished.

(2) Accordingly—

(a) the occasion of the transfer or transmission of any property or right, however indirect, and

(b) the occasion when the value of any property or right is enhanced, may be an occasion on which section 517C(1) or 517E(1) applies

### s. 356ON CTA 2010

(1) In determining whether section 356OC(1) or 356OE(1) applies, account is to be taken of any method, however indirect, by which—

[identical]

[identical]

[identical]

(b) the occasion when the value of any property or right is enhanced, may be an occasion on which section 356OC(1) or 356OE(1) applies.

(3) Subsections (1) and (2) apply in [identical] particular—

(a) to sales, contracts and other transactions made otherwise than for full consideration or for more than full consideration,

(b) to any method by which any property or right, or the control of any property or right, is transferred or transmitted by assigning—

(i) share capital or other rights in a company,

(ii) rights in a partnership, or

(iii) an interest in settled property,

(c) to the creation of an option affecting the disposition of any property or right and the giving of consideration for granting it,

(d) to the creation of a requirement for consent affecting such a disposition and the giving of consideration for granting it,

(e) to the creation of an embargo affecting such a disposition and the giving of consideration for releasing it, and

(f) to the disposal of any property or right on the winding up, dissolution or termination of a company, partnership or trust.

## 21.20 “Another person”

Section 517P ITA/s. 356OO CTA 2010 provide:

(1) In this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] references to “other” persons are to be interpreted in accordance with subsections (2) to (4).

(2) A partnership or partners in a partnership may be regarded as a person or persons distinct from the individuals or other persons who are

for the time being partners.

(3) The trustees of settled property may be regarded as persons distinct from the individuals or other persons who are for the time being the trustees.

(4) Personal representatives may be regarded as persons distinct from the individuals or other persons who are for the time being personal representatives.

### **21.21 “Arrangement”**

Section 517Q(1) ITA/s.356OP CTA 2010 provide the standard (unnecessary IT definition of “arrangement”.<sup>38</sup> But the author tried harder.) Section 517Q(2) ITA/s. 356OP CTA 2010 provide:

For the purposes of this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] any number of transactions may be regarded as constituting a single arrangement if—

- (a) a common purpose can be discerned in them, or
- (b) there is other sufficient evidence of a common purpose.

I doubt if that adds anything to the meaning.

### **21.22 “Disposal”**

Section 517R(1) ITA/s. 356OQ(1) CTA 2010 provide:

In this Part [Part 9A CTA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] references to a “disposal” of any property include any case in which the property is effectively disposed of (whether wholly or in part, as mentioned in subsection (2))—

- (a) by one or more transactions, or
- (b) by any arrangement.

Section 517R(2) ITA/s. 356OQ(2) CTA 2010 provide:

For the purposes of this Part [Part 9A, transactions in land]—

- (a) references to a disposal of land or any other property include a part disposal of the property, and
- (b) there is a part disposal of property (“the asset”) where on a person making a disposal, any form of property derived from the asset remains undisposed of (including in cases where an

---

38 See App 2.2.3 (Definitions of “arrangement”).

interest or right in or over the asset is created by the disposal, as well as where it subsists before the disposal).

The drafting is based on s.21 TCGA.

BIM provides:

**BIM60835: Definitions: Disposal** [May 2019]

... In a straightforward sale this will be the date of completion. If the date of completion is delayed but the property has effectively been disposed of an earlier date may be applied...

**Example**

A developer sets up a company to complete a housing development. The developer intends to dispose of 40% of the properties to a third party and retain 60% of the properties as a longer term investment. When the properties are finished they sell 40% of their shares to the third party. In this instance the 40% is a disposal of property deriving its value from land.

## 21.23 Definitions

### 21.23.1 “Realising a gain”

**s. 517T ITA**

(1) For the purposes of sections 517B(1) and 517D(1) it does not matter whether the person (“P”) realising the profit or gain in question realises it for P or another person.

(2) For the purposes of subsection (1), if, for example by a premature sale, a person (“A”) directly or indirectly transmits the opportunity of realising a profit or gain to another person (“B”), A realises B’s profit or gain for B.

**s.356OS CTA 2010**

(1) For the purposes of sections 356OB(1) and 356OD(1) it does not matter whether the person (“P”) realising the profit or gain in question realises it for P or another person.

[identical]

### 21.23.2 “Development”

After some vacillation, BIM now provides:

**BIM60806: Definitions: Development** [May 2019]

Whether the land has been developed is a question of fact.

‘Development’ for the purpose of Condition D is not defined but is interpreted to mean any change from the land’s position at purchase. In the absence of other factors obtaining planning permission will not constitute land being developed for the purpose of condition D.

*Example 1*

A person acquires land with the intention to hold it for investment purposes. After several years planning permission is obtained to build houses on the land. The landowner’s intention changes to build and sell housing units on the land. An access road and other infrastructure is built before the landowner gets in financial difficulty and sells the land. Condition D applies, the land has been developed and one of the main purposes of developing the land was to profit from disposing it.

*Example 2*

A company carried out research and decided to purchase a plot of land as they have identified the land will be worth significantly more with planning permission. After acquisition they obtain this planning permission and sell the land. The land has not been developed for the purposes of condition D but it is likely that the company has either a trade in dealing UK land or that Condition A would apply due to the one of the main purposes of acquiring the land was to profit from its disposal.

This is the correct view. Section 55(1) Town and Country Planning Act 1990 provides:

Subject to the following provisions of this section, in this Act, except where the context otherwise requires, “development,” means

- [1] the carrying out of building, engineering, mining or other operations in, on, over or under land, or
- [2] the making of any material change in the use of any buildings or other land.

The significance of the definition for planning is in s.57(1):

Subject to the following provisions of this section, planning permission is required for the carrying out of any development of land.

It is considered that part [1] of the definition is a succinct statement of the meaning of “development” for TiL purposes. In short, development means building work. Mere change of use (eg using a former shop as a café) is something which needs to be controlled by planning legislation,

but is not “development” in the TiL sense.

## **21.24 Notification and assessment**

BIM provides:

### **BIM60900: Notification and assessment [May 2019]**

Where the legislation applies to a non-UK resident company the company will be treated as having a trade of dealing in or developing UK land. Both resident and non-resident companies and individuals will need to notify chargeability and register to pay tax.

There are no separate filing or payment rules for this legislation. The normal self-assessment regime for income tax and corporation tax will apply.

## CHAPTER TWENTY TWO

# PERFORMERS

### 22.1

#### 22.1 Entertainers and sportspeople

This chapter considers the taxation of non-resident entertainers and sportspeople (“performers”).

The legislation is scattered: trading income rules are in ITTOIA, withholding tax is in ITA, and the bulk of the rules are in Income Tax (Entertainers and Sportsmen) Regulations 1987 (“ITESR”). I refer to this together as the “**entertainers/sportspeople code**”.

The policy of the Tax Law Rewrite was not to rewrite or update statutory instruments. So ITESR is out of date twice over: it was not updated for the 1988 consolidation in ICTA or for the rewrite in ITTOIA, and retains the references to the original legislation in sch 11 FA 1986.<sup>1</sup> The consequence is that the rewrite left this area of law more difficult to follow than before. When quoting ITESR, I add the current statutory references in brackets.

HMRC have issued guidance which I call “**Performers guidance**”.<sup>2</sup>

##### 22.1.1 *Purpose of the code*

In *Agassi v Robinson*:

There were a number of perceived problems in applying to foreign entertainers and sportsmen the charging provisions [relating to trades]. Section 108 imposed a Schedule D charge to tax on the profits or

- 
- 1 FA 1986 can be found at [http://www.legislation.gov.uk/ukpga/1986/41/pdfs/ukpga\\_19860041\\_en.pdf](http://www.legislation.gov.uk/ukpga/1986/41/pdfs/ukpga_19860041_en.pdf)
  - 2 HMRC, “A Guide to paying Foreign Entertainers” <https://www.gov.uk/pay-tax-on-payments-to-foreign-performers>

gains of any person, whether or not resident in the United Kingdom, from any trade, profession or vocation carried on in the United Kingdom.

The first problem related to the concept of carrying on a trade, profession or vocation. Was a person who made only single or infrequent visits to this country, eg, playing in, say, two tennis tournaments, carrying on a trade, profession or vocation in this country?

Second, would income arising from commercial endorsements, eg wearing Nike tennis shoes and playing with a Head tennis racquet, be regarded as part of the profits or gains of carrying on the trade, profession or vocation?

Third, the section 108 charge only applied to the person carrying on the trade, profession or vocation. Would payments made to a foreign company, albeit controlled by the person exercising the trade, profession or vocation, be caught by the charge?

And, fourth, collection of the tax from a foreign entertainer or sportsman, whose visits to this country might be sporadic and who would often have no assets in this country, was not always practicable.

...

These were the problems that were addressed in the [entertainers/sportspeople code] ...

The problem of collecting the tax charged ... was addressed by ... paragraph 2(1) (section 555(2) of the 1988 Act) which required a person making a payment which had "a connection of a prescribed kind with the relevant activity" to deduct a sum representing income tax and account to the Inland Revenue for the sum...

The problem about the scale of activities that could constitute the conduct of a trade, profession or vocation was addressed by paragraph 6(1) and (4) of the Schedule (section 556(1) of the 1988 Act) and the problem about payments to companies owned and controlled by the entertainer or sportsman was dealt with by paragraph 7 of the Schedule (section 556(2) of the 1988 Act). Paragraph 6 and paragraph 7 each had a sub-paragraph (6(2) and 7(4)) which said that the paragraph was not to apply unless the payment was one to which paragraph 2 applied. These provisions became, on consolidation, the first part of section 556(5).<sup>3</sup>

---

3 [2006] UKHL 23 at [8] - [12].

## 22.2 Definitions

It is helpful first to deal with some definitions. Because the legislation is scattered, most definitions have to be repeated or cross referenced; but we muddle through.

### 22.2.1 “Entertainer” and “performer”

Reg 2(1) ITESR defines “entertainer”:

In these Regulations unless the context otherwise requires ...  
“entertainer” means any description of individuals (and whether performing alone or with others) who give performances in their character as entertainers or sportsmen in any kind of entertainment or sport;  
and “entertainment or sport” in this definition includes any activity of a physical kind, performed by such an individual, which is or may be made available to the public or any section of the public and whether for payment or not.

ITTOIA and ITA use the expression:

an entertainer, sportsman or sportswoman<sup>4</sup> of a prescribed description (“a performer”)

This incorporates the above definition.

Performers guidance provides:

#### **Which entertainers and sportsmen are involved?**

The following list is not exhaustive. athletes, golfers, cricketers, footballers, tennis players, boxers, snooker players, darts players, motor racing drivers, jockeys, ice skaters, contestants in chess tournaments, singers, musicians, conductors, models, dancers, actors, TV and radio personalities, variety entertainers. The person may appear alone or with others in a team, choir, band, group, orchestra, opera company, ballet company, troupe or circus.

### 22.2.2 *Relevant (taxable) activity*

Section 13(8) ITTOIA provides the definition of “relevant activity”:

---

4 Note the change from the “sportsmen” of the 1987 regulations: gender neutral drafting was one of the policies of the Tax Law Rewrite.

In this section and section 14—

“relevant activity” means an activity of a prescribed description<sup>5</sup>

We turn to reg 6(1) ITESR to find the “prescribed description” of a relevant activity:

Subject to this regulation, any activity performed in the UK by an entertainer (whether alone or involving others) of any of the descriptions in paragraph (2) is an activity of a prescribed description (“relevant activity”) for the purposes of paragraph 1 of [Schedule 11 FA 1986], that Schedule and these Regulations.

That is, the definition in reg. 6 applies for all relevant purposes. So we read on to reg 6(2) ITESR:

A relevant activity to which paragraph (1) refers is an activity

[a] performed in the UK by an entertainer

[b] in his character as entertainer

on or in connection with a commercial occasion or event ...

The regulation goes on to expand this:

and includes—

(a) any appearance of the entertainer by way of or in connection with the promotion of any such occasion or event;

(b) any participation by the entertainer in or for sound recording, films,<sup>6</sup> videos, radio, television or other similar transmissions (whether live or recorded).

Regulation 6(3) ITESR provides a commonsense definition of “commercial occasion or event”:

A commercial occasion or event to which paragraph (2) refers includes any description of occasion or event—

(a) for which an entertainer (or other person) might receive or become entitled, for or by virtue of the entertainer’s

---

5 Section 966(7)(a) ITA repeats the definition for ITA.

6 Defined reg. 6(4) ITESR: “film” includes any record (with or without sound), however made, of a sequence or series of one or more visual images, which is a record capable of being used as a means of showing part or all of that sequence or series as a moving or still picture...”

- performance of the activity, to receive anything by way of cash or any other form of property; or
- (b) which is designed to promote commercial sales or activity by advertising, the endorsement of goods or services, sponsorship, or other promotional means of any kind.

“Relevant activity” is an opaque term; I gloss it as “**relevant [taxable] activity**”.

### 22.2.3 “Payment” and “transfer”

Section 13 ITTOIA provides:

- (9) In this section and section 14—
- (a) references to a payment include references to a payment by way of loan of money, and
- (b) references to a transfer do not include references to a transfer of money but, subject to that, include references to—
- (i) a temporary transfer (as by way of loan), and
- (ii) a transfer of a right (whether or not a right to receive money).
- (10) This section does not apply to payments or transfers of a kind prescribed in regulations under section 966(6) of ITA 2007.

ITA added s.13(9) ITTOIA but that merely preserved the subsection; it had been in s.555(5) ICTA 1988, which ITA repealed.

## 22.3 Charge independent of withholding tax

Section 13(8) ITTOIA formerly provided:

*payment” means a payment from which income tax is to be deducted under section 555(2) of ICTA*

*“transfer” means a transfer in respect of which income tax is to be accounted for under section 555(3) of ICTA*

In short, unless there was a duty to impose withholding tax, there was no liability on the individual entertainer/sportsperson. The two were linked.

ITA deleted those definitions so there can be a personal liability on the individual even if there is no duty to impose withholding tax (though the two will almost always go together). EN ITA provides:

**Change 156: Deduction of tax: visiting performers: Schedule 1**

**(section 556 of ICTA and section 13 of ITTOIA)**

This change ... gives statutory effect to the majority decision of the House of Lords in *Agassi v Robinson*.<sup>7</sup> ...

The amendments to section 13 of ITTOIA make it explicit that when a payment or transfer of the type referred to in section 555 of ICTA is made, it is not necessary for there to be a duty to deduct under section 966 of this Act in order for the performer to be liable to income tax on the payment or transfer under Chapter 2 of Part 2 of ITTOIA (income taxed as trade profits). As part of this amendment, section 555(5) of ICTA has been incorporated into section 13[9] of ITTOIA to make clear that there is no link between the primary liability to income tax under Chapter 2 of Part 2 of ITTOIA (income taxed as trade profits) and the duty to deduct tax under section 966 of this Act.

**22.4 Deemed UK trade**

Section 13(1) ITTOIA provides:

This section applies if an entertainer, sportsman or sportswoman of a prescribed description (a “performer”)—

- (a) is non-UK resident in a tax year, and
- (b) performs a relevant [taxable] activity in the UK in the tax year.

If the conditions of s.13(1) are met, there are three deemings:

- (1) A deemed trade, which is:
  - (a) deemed to be a UK trade
  - (b) deemed to be a separate trade
- (2) Payment to prescribed third parties deemed made to performer.

Firstly the deemed UK trade. Section 13(2) ITTOIA provides:

If a payment or transfer connected<sup>8</sup> with the relevant [taxable] activity is made, the performer is treated for income tax purposes as performing the relevant [taxable] activity in the course of a trade, profession or vocation carried on in the UK.

I refer to this as the **“notional UK trade”**. ITESR refers to it as

7 The EN’s explanation of the decision in *Agassi* is not set out here, and is not completely accurate, but the point is of no current interest. For *Agassi*, see App 15.13 (Territorial principle: Application).

8 See 22.5 (Connected payment/transfer).

“Schedule 11 trade”. I use the word “trade” to include a profession or vocation.

EN ITTOIA explains the reason for this:

92. A visiting performer may not be in the UK long enough to become resident for tax purposes. And any relevant activities may not be part of a trade, profession or vocation carried on in the UK. So, without this section, there would be no liability to tax on the activities in the UK.

The income of the notional UK trade is taxed as UK source trading income. The remittance basis does not apply.

The notional UK trade is deemed to be a separate trade. Section 13(7) ITTOIA provides:

If—

- (a) income tax is chargeable on profits arising from payments or transfers (made to any person), and
- (b) the payments or transfers are connected with the relevant [taxable] activity,

the tax is charged as if the payments or transfers were received in the course of a separate trade, profession or vocation (distinct from any other trade, profession or vocation carried on by the performer).

I am not quite sure why this is needed; perhaps to emphasise that expenses of non-UK activity cannot be deducted in computing the profits of the notional UK trade.

## 22.5 Connected payment/transfer

The expression “connected with” the relevant [taxable] activity matters because payments/transfers connected with the relevant [taxable] activity are taxed as part of the deemed trade, and subject to withholding tax.

Section 13(8) ITTOIA provides:

In this section and section 14 a payment or transfer is connected with a relevant [taxable] activity if it has a connection of the prescribed kind with that activity.<sup>9</sup>

Regulation 2 IETSR defines the convenient terms connected payment/transfer:

---

<sup>9</sup> Section 966(7)(b) ITA repeats the definition for ITA.

2.—(1) In these Regulations unless the context otherwise requires ... a payment or transfer to which reg 3 ITESR applies is described as “connected”.

We turn to reg 3(1) ITESR to find the “prescribed kind” of connection:

This regulation applies for the purposes of and subject to the provisions of paragraph 2 of [Schedule 11 FA 1986], the other provisions of that Schedule and these Regulations.

That is, the definition applies for all relevant purposes. So we read on to reg 3(2) ITESR:

Subject to paragraph (3) a payment or a transfer made or, in respect of or which in any way derives either directly or indirectly from, the performance of a relevant [taxable] activity, has a connection of a prescribed kind with the relevant [taxable] activity.

Reg 3(3) ITESR provides three exceptions where a payment/transfer is not connected with the relevant [taxable] activity. The significance is to disapply all the rules.

The first exception is where a withholding tax regime already applies:

- (3) The following are descriptions of payments to which paragraph (2) shall not apply—
- (a) a payment out of which a sum representing tax is or falls to be deducted under the Taxes Act [1970] apart from [Schedule 11 FA 1986] or these Regulations;

Other withholding taxes have priority over the entertainers/sportspeople code. This would apply to royalties.

The second exception concerns payments to UK residents (which should constitute a taxable receipt of the UK resident):

- (3) The following are descriptions of payments to which paragraph (2) shall not apply...
- (b) (i) a payment (to which paragraph (ii) applies) made to a person who is resident in the UK, not being a person who is

- connected<sup>10</sup> with or an associate<sup>11</sup> of the entertainer concerned;
- (ii) a payment to which paragraph (i) refers is a payment—
    - (a) which falls to be made for the provision of services ancillary to the performance of a relevant [taxable] activity, and
    - (b) which is of an amount or value which does not exceed what would be reasonable for that provision between persons dealing with each other at arms' length<sup>12</sup>;

The third exception concerns royalties for sound recordings:

- (3) The following are descriptions of payments to which paragraph (2) shall not apply...
  - (c) any payment made to an entertainer in respect of the proceeds of sale of records<sup>13</sup> deriving from a sound recording made by the entertainer, being payments calculated by reference to those proceeds or payments on accounts of those proceeds.

The reason for this is, perhaps, that (1) records (unlike concerts and sports events) could be made anywhere; or (2) royalties are covered by an entirely different tax regime.

## 22.6 Activity otherwise taxable

Section 13(4) ITTOIA provides two exceptions where there is no notional UK trade:

- (4) Subsection (2) [deemed notional UK trade] does not apply—
  - (a) so far as the performer would otherwise be performing the relevant [taxable] activity in the course of a trade, profession or vocation carried on in the UK, or

In this case the charge is on the actual trade, not a notional UK trade.

10 Regulation 2(2) incorporates the standard definition: "S.533 of the Taxes Act [1970] (meaning of connected persons) applies for the purposes of these Regulations."

11 Regulation 13 ITESR incorporates the standard definition: "associate" has the meaning given to it by section 303(3) of the Taxes Act [1970]; see 99.6 (Associates).

12 This expression is always written *arm's length*; one arm is all that is required. The reading *arms' length* must be a slip, and the expression has its normal meaning; see App 4.6 (Arm's length).

13 Defined reg. 6(4) ITESR: "record" in this definition includes video.

The second exception is:

- (4) Subsection (2) [notional UK trade] does not apply...
  - (b) if the relevant [taxable] activity is performed in the course of an employment or office.

In this case the charge is on the employment income, not a notional UK trade.

These two exceptions disapply the deemed notional trade under s.13(2), but not the third party rules under s.13(5) to which I now turn.

## 22.7 Payment to third parties

Section 13(3) ITTOIA provides:

It does not matter whether the payment or transfer is made to the performer or anyone else.

Section 13(5) ITTOIA provides:

If a payment or transfer connected with the relevant [taxable] activity is made to—

- (a) a person other than the performer, and
  - (b) that person is of a prescribed description,
- the payment or transfer is treated for income tax purposes as made instead to the performer in the course of a trade, profession or vocation carried on in the UK.

An argument that a territorial principle prevented the application of the charge where the payment was made between non-resident companies was rightly rejected in *Agassi v Robinson* 77 TC 678. This is now confirmed by statutory amendment.<sup>14</sup>

I refer to the person of a prescribed description as “**a prescribed third party**”.

### 22.7.1 Prescribed third parties

Regulation 7(1) ITESR provides:

Any description of person in paragraph (2) is a person (not being the entertainer) to whom paragraph 7(1) of [Schedule 11 FA 1986 = s.13(5)

---

<sup>14</sup> See 15.13 (Territorial principle: Application).

ITTOIA] refers.

So we read on to reg 7(2) ITESR. There are four categories of prescribed third party.

The first category is controlled persons:

- (2) The descriptions of persons to whom paragraph (1) refers are—  
 (a) any person who is under the control<sup>15</sup> of the entertainer;

The second category is certain non-residents:

- (2) The descriptions of persons to whom paragraph (1) refers are ...  
 (b) any person who is—  
 (i) not resident in the UK, and  
 (ii) not liable to tax by reason of residence, domicile, place of management or otherwise, in a territory outside the UK where the rate of tax charged on the profits or income of such a person is a rate exceeding 25%;<sup>16</sup>

The third category is certain settlements:

- (2) The descriptions of persons to whom paragraph (1) refers are ...  
 (c) (i) subject to paragraph (ii), any person in receipt (whether directly or indirectly) of  
 [A] a connected payment or  
 [B] value transferred<sup>17</sup> by a connected transfer  
 which is, is treated as, or falls to be included in the computation of, income arising under a settlement in relation to which the entertainer is a settlor;<sup>18</sup>

---

15 Reg 2 ITESR incorporates the ultra-wide definition: “control” shall be construed in accordance with s.302(2) to (6) of the Taxes Act [1970]; see 99.3 (Control: Ultra-wide sense).

16 The figure of 25% ought to be reduced in line with the reduction of CT rates since 1987 (when the CT rate was 35%).

17 Defined reg 2 ITESR: “value transferred” in relation to a transfer means the gross amount to which regulation 17(1) refers.

18 Para (c)(ii) incorporates the settlement-arrangement definitions of these terms: “for the purposes of paragraph (i):—  
 “income arising under a settlement” and “settlor” have the meanings given to them by section 454 of the Taxes Act [1970], and  
 “settlement” has the meaning given to it by section 444(2) of the Taxes Act [1970]”.

The fourth category concerns arrangements under which the performer may benefit:

- (2) The descriptions of persons to whom paragraph (1) refers are ...
- (d) (i) any person
- [A] to whom paragraph (2) of this regulation does not otherwise apply<sup>19</sup>
- [B] who receives any connected payment or connected transfer (whether directly or indirectly) at or in respect of a time when there is in force between that person and the entertainer concerned a contract or arrangement to which paragraph (ii) applies;
- (ii) a contract or arrangement to which paragraph (i) refers is a contract or arrangement by or under which it is reasonable to suppose that the entertainer (or other person who is connected with or is an associate of the entertainer) is, will or may become, entitled to receive amounts, whether by way of cash or other value, not substantially less than the appropriate amount of profits or gains arising from the connected payment or connected transfer to which [para 8(1) sch 11 FA 1986 = s.13(2) ITTOIA] applies.

## 22.8 Notional trade profits computation

Regulation 8 ITESR provides some self-explanatory rules for the computation of the profits of the deemed UK trade:

- (1) Subject to the provisions of these Regulations, the profits or gains (to which paragraph 7(2) of [Schedule 11 FA 1986] refers) shall be computed in accordance with the provisions of the Taxes Act [1970] relating to the charging of profits or gains under Case I or II (as the case may be) of Schedule D, so that a just and reasonable amount of such a payment or value transferred by such a transfer is charged to tax as such profits or gains; and
- (2) Notwithstanding any provision of the Taxes Act [1970], in computing the said profits or gains such deductions of expenses incurred by any person (not being the entertainer) in relation to the payment or transfer concerned shall be made as are just and reasonable.

---

<sup>19</sup> Para [A] seems otiose, but it does not matter.

Regulation 16 ITESR provides for apportionment:

- (1) The provisions of paragraph (2) are by way of supplementation of the provisions of section 127 of the Taxes Act [1970] .
- (2) Where, in the case of any payment, value transferred or profits or gains to which Schedule 11 or these Regulations apply, it is necessary, in order to arrive at the appropriate amount of such payment, value or profits or gains for any tax year or other period, to make any apportionment, division or aggregation of any amounts or values, any such apportionment, division or aggregation, shall be made as is just and reasonable.

## 22.9 Trading loss

Regulation 15 ITESR provides:

- (1) In this regulation—
  - (a) “world-wide trade” means a trade of an entertainer which is a trade apart from Schedule 11 and these Regulations, and a “Schedule 11 trade” means a trade which is a separate trade of an entertainer only by virtue of Schedule 11 and these Regulations;
  - (b) “trade” includes profession or vocation.
- (2) For the purposes of section 171 of the Taxes Act [1970] (carry forward of losses) the world-wide trade and the Schedule 11 trade shall be treated as the same trade.
- (3) For the purposes of section 174 of the Taxes Act [1970] (carry back of terminal losses) a loss sustained for any relevant period under a Schedule 11 trade (to which otherwise that section would apply) shall not be a terminal loss except where the world-wide trade is permanently discontinued in that period, in which case such a loss in either trade shall be available under that section to be deducted or set off against profits or gains of those trades.
- (4) For the purposes of section 30 of the FA 1978 (losses in early years of trade) the world-wide trade and the Schedule 11 trade shall be treated as the same trade, but that section shall apply to any such loss of an entertainer only in the tax year in which the world-wide trade was first carried on and in the next 3 succeeding tax years.

## 22.10 Withholding tax

Section 966 ITA provides:

- (1) This section applies if—
  - (a) an entertainer, sportsman or sportswoman of a prescribed description (“a performer”) who is non-UK resident for a tax year performs a relevant [taxable] activity in the UK in the tax year, and
  - (b) a payment or transfer connected with the relevant [taxable] activity is made.
- (2) It does not matter—
  - (a) whether the payment or transfer is made to the performer or anyone else, or
  - (b) when the payment or transfer is made...
- (6) This section does not apply to payments or transfers of such a kind as may be prescribed.

### 22.10.1 *Deduction on making payment*

Section 966(3) ITA provides:

If a payment within subsection (1)(b) is made the person who makes the payment must, on making it, deduct from it a sum representing income tax and account to HMRC for the sum.

The Courts rejected an argument that the principle of territoriality prevented this from applying to a non-resident made a payment to another non-resident.<sup>20</sup>

### 22.10.2 *Deduction on making transfer*

Section 966(4) ITA provides:

If a transfer within subsection (1)(b) is made the person who makes the transfer must account to HMRC for a sum representing income tax.

### 22.10.3 *Amount of tax deducted*

Regulation 4(1) ITESR provides:

Each of the sums mentioned in paragraph 2(2) and (3) of Schedule 11 [FA 1986 = s.966(3)(4) ITA] (“tax payment”) shall be calculated in accordance with the rules prescribed by this regulation.

---

<sup>20</sup> See 15.12 (Territorial principle).

Regulation 4(2) ITESR sets out the usual rule:

Except where

- [a] it is otherwise provided by these Regulations or
- [b] there is an arrangement to which this regulation refers,  
the tax payment shall be a proportion
  - [i] of the connected payment or
  - [ii] of the value transferred by a connected transfer  
equal to the basic rate of income tax for the tax year in which the  
payment or transfer is made.

Regulation 17(1) ITESR provides grossing up:

- (a) The actual worth of what is transferred by a transfer to which paragraph 2(3) of Schedule 11 [FA 1986 = s.966(4) ITA] applies (“the net value”) shall be treated as a net amount corresponding to a gross amount from which income tax at the basic rate has been deducted; and
- (b) the said gross amount shall be treated as the value of what is transferred for the purposes of paragraph 2(4) of Schedule 11.

Regulation 17(2) ITESR defines net value:

- (a) The net value to which paragraph (1) refers shall be the cost of what is transferred, and
- (b) the cost of what is transferred to which sub-paragraph (a) refers is the cost in or in connection with its provision (including its provision to the person who makes the transfer) or transfer, less so much of that cost which has been borne by the entertainer.

#### 22.10.4 *Personal allowance*

Regulation 4(3) ITESR (in short) exempts payments and transfers within the IT personal allowance:

- (a) Subject to sub-paragraph (b), where the connected payments and the value transferred by connected transfers for a tax year made to an entertainer, or to a person who is connected with him or who is an associate of his, do not together exceed the relevant amount<sup>21</sup> the tax

---

21 Reg 2 ITESR defines this: “the relevant amount” means the amount of the personal allowance in section 35(1) ITA 2007 which applies for the tax year in which the payment or transfer is made.

payment shall be a nil amount;

Para 4(3)(b) deals with fragmentation schemes:

- (b) connected payments and the value transferred by connected transfers made by any person who is connected with any other person by whom connected payments or connected transfers are made to the entertainer, or by any associate of such other person, shall together be treated as constituting a single connected payment in determining whether they exceed the relevant amount.

## 22.11 Arrangements with HMRC

The usual rule in regulation 4(2) ITESR applies unless “there is an arrangement to which this regulation refers.” This anticipates regulation 4(4)-(6) ITESR which allow HMRC to make different arrangements:

- (4) An arrangement to which paragraph (2) refers is an arrangement in writing between

- [a] the Board and

- [b] the person by whom the connected payment or connected transfer is made, the entertainer, or the recipient of the connected payment or connected transfer,

made following a decision by the Board on an application to which regulation 5 refers, under which the tax payment is an amount which, as a proportion of the connected payment or value transferred by the connected transfer, is an amount less than the said basic rate (“reduced tax payment”).

- (5) The reduced tax payment may be arrived at by reference to

- [a] a percentage of the connected payment or of the value transferred by a connected transfer or

- [b] as a lump sum calculated without reference to any such percentage.

- (6) In making an arrangement of the kind to which paragraph (2) refers the Board—

- (a) shall, subject to sub-paragraph (b) and paragraph (7) below, at all times aim at securing that the tax payment shall be, as nearly as may be, the amount of the liability to tax of the entertainer or other person arising in relation to the connected payment or connected transfer under the Tax Acts, Schedule 11 and these Regulations, and

- (b) may take into account the fact that the liability to the Board for

tax has, in a manner satisfactory to them, been secured or otherwise provided for, whether by a guarantee (of whatever person) or other means.

Performers guidance provides:

**Application to HMRC to limit the amount of tax withheld**

An application may be made in writing by the entertainer or anyone else authorised to do so on their behalf. Where the application is agreed, it allows the payer to deduct an amount other than the basic rate of tax which corresponds as near as to the entertainer's final UK liability on that payment.

An application to HMRC to limit the amount of tax withheld may be made in writing or on form FEU 8. Any letter which advises the Unit that detailed figures are to follow is considered to constitute an advance notification of an application **but does not constitute the application itself**.

Applications to the Foreign Entertainers Unit must be made no less than 30 days before the date the payment is due.

If the application is not agreed tax must be accounted for at the basic rate on all related payments.

**How to make a reduced tax payment application (RTPA)**

The information required to enable an agreement to be made includes:

- dates of arrival in and departure from the UK
- whether the entertainer is likely to return to the UK again before the 5 April
- a projection of actual or estimated total income due from all sources
- a schedule confirming; the date of each performance/event, the name and address of the venue and the name and address of the promoter
- a schedule of the projected actual or estimated expenses which will be incurred
- a copy of each relevant engagement contract or agreement (these do not need to be signed copies).

The application should give sufficient information to show how figures have been arrived at (including the basis for any estimates) and how expenditure appropriate to several countries has been apportioned.

In some cases you may be authorised to deduct a reduced rate of tax, a fixed sum or no tax from the gross payment. This could apply, for example, where an entertainer has to meet substantial expenditure out of a gross fee thus reducing the expected UK tax liability.

In reaching an agreement the Foreign Entertainers Unit will make

allowances for admissible expenses. What can be allowed depends on the general rules covering expenditure allowable in arriving at taxable business profits under Section 34 Income Tax (Trading and Other Income) Act 2005 and the facts of each case. Normally allowances will be made for:

- general subsistence expenses
- commission, manager's and agent's fees
- UK travel
- international air fares to and from the UK where the entertainer comes to the UK to perform and returns directly to his or her home country

Other expenses may be allowable. What is allowable in each case will need to be agreed with the Foreign Entertainers Unit including the proportion of any costs appropriate to several countries.

Further information can be obtained about Reduced Tax Payment Applications including further advice regarding the preparation of an entertainer RTPA.

If the point you wish to check is not covered in this guidance or at the above link then contact the Foreign Entertainers Unit.

**How do you know that a reduced tax payment has been authorised?**

The Foreign Entertainers Unit will authorise you to deduct a reduced amount of tax by sending you a form FEU 4. Even where you have been a party to the agreed arrangement with HMRC you must wait until you get the form FEU 4.

**If you have not received an authorisation form FEU 4 by the time the payment is due you must deduct tax at the basic rate on all related payments.**

## 22.12 Chains of payments

Regulation 4(7) ITESR provides:

Where—

- (a) a person makes a connected payment or connected transfer in relation to a relevant [taxable] activity, and
- (b) in respect of the same relevant [taxable] activity that person has received a connected payment or connected transfer in respect of which the amount of the tax payment has been paid under these Regulations,

the person concerned shall not be required to deduct out of the connected payment or pay in respect of the connected transfer (to which

sub-paragraph (a) refers) any sum to which paragraph 2 of Schedule 11 applies unless, and to the extent that, the tax payment which then falls to be made exceeds the amount of the tax payment to which sub-paragraph (b) refers.

The default rule is that deduction is made at the start of the chain.

Performers guidance provides:

### **How do you deal with payment chains?**

Some activities may give rise to a chain of payments. Every payer in the chain must deduct tax as required by law unless the payment is exempt.

#### *Example*

A concert is arranged at a venue. The venue owners control the box office and pay over the ticket proceeds to the promoter less their costs and Withholding Tax. The promoter is then required to deduct Withholding Tax from the fee payable to the entertainer. The promoter should deal with this as follows:

He must deduct Withholding Tax (where it is due) from the payment made to the entertainer and pay over the net amount.

He must issue a tax deduction certificate form FEU 2, to the entertainer confirming the pay and tax details.

He declares the payment made and the tax deducted on the form FEU 1 (boxes 5 & 6) and shows the tax already withheld from the payment made to him in box 8.

#### *Example*

A Promoter engages a non-resident entertainer to appear at a UK venue. The Entertainer is the only non-resident entertainer the promoter engages in the quarter. The sequence of payments is as follows:

The Venue pays £100,000 less £20,000 tax to the Promoter

The Promoter pays £60,000 less £12,000 tax to the Entertainer

The Promoter is liable to account to HMRC for £12,000 but as the payment he has received has had £20,000 Withholding Tax deducted from it he can treat the £12,000 as paid.

#### *Entries on the Promoter's return form FEU 1*

The amount and income tax columns of the Promoter's return for the relevant period should be completed as follows:

Payment	Amount	Tax
	60,000	12,000
Less tax already paid by Venue		<u>12,000</u>
Tax payable now		Nil

Evidence of the tax already paid must be provided with the FEU1 return by including part 3 of the FEU2 tax deduction certificate which is supplied by the Venue.

However it is possible to agree a different rule. Regulation 5 ITESR provides:

(1) Where a connected payment or connected transfer falls to be made subject to a tax payment to which regulation 4(2) refers the person by whom the connected payment or connected transfer is made, the entertainer, or recipient of the connected payment or connected transfer, may make an application in writing to the Board, not later than 30 days before the connected payment or connected transfer falls to be made, that it shall be subject instead to a reduced tax payment (within the meaning of regulation 4).

(2) Unless and until there is in force an arrangement under which such a reduced tax payment falls to be made regulation 4(2) shall at all times continue to apply to the connected payment or connected transfer.

Performers guidance provides:

### **Middleman Applications**

Payers can ask for an arrangement which moves the withholding point further down the chain so that payments between specified payers can be made without deduction of tax. This can only be done with the Foreign Entertainers Unit's approval.

If the concert promoter makes a 'Middleman' application, the Unit may agree to the promoter being the withholding point, therefore the venue will not have to withhold tax. The promoter will then have to deduct tax at basic rate on his or her payment or a reduced amount if an entertainer's application for a reduced tax payment has been made and agreed.

The Unit will ask for certain information in support of any 'Middleman' application you make, for example, a copy of any contract, dates of appearances, and probably a copy of the budget. If you are submitting a 'Middleman' application for the first time the Unit will be happy to advise you on the procedure and level of information required....<sup>22</sup>

---

22 <http://webarchive.nationalarchives.gov.uk/20140109143644/http://www.hmrc.gov.uk/feu/appromers.htm>

## 22.13 Position of payor

Reg 12 ITESR provides:

(1) Where under these Regulations there is accounted for and paid to the Board an amount of tax which is—

- (a) in respect of a connected payment or connected transfer, or
- (b) paid under an assessment made under paragraph 11,

that amount shall, subject to this regulation, be treated as a payment of tax on account of the tax liability (of whatever person) in respect of the connected payment or connected transfer concerned.

(2) Where, in respect of a connected payment or connected transfer, there is a liability to tax under the Tax Acts as well as under Schedule 11 or these Regulations, the Board shall allocate any payment made to them to which paragraph (1) refers as is just and reasonable in discharge of some or all of those liabilities of the entertainer or other person concerned to whom these Regulations apply.

(3) Where—

- (a) by virtue of paragraph 8 of Schedule 11 and these Regulations a connected payment or the value transferred by a connected transfer falls to be included in the amount of profits or gains to which paragraph 8(1)(a) refers, and
- (b) the amount of the connected payment or the value transferred (or an amount in respect of that value) is charged to tax under Schedule E

the amount charged under Schedule E (to which sub-paragraph (b) refers) shall be treated as expenditure which falls to be deducted in computing the profits or gains to which sub-paragraph (a) refers.

(4) Where a payment is a connected payment—

- (a) which is, is treated as, or falls to be included in a computation of, income of the entertainer chargeable to tax by virtue of the provisions of Part XVI of the Taxes Act [1970] , or
- (b) which is a receipt of a company which provides the services of the entertainer to perform the relevant [taxable] activity, being a receipt which falls to be included in the computation of its profits which are chargeable to tax under Schedule D,

the charge under Schedule 11 shall have effect and the charges to which sub-paragraphs (a) and (b) refer shall be disregarded.

(5) A person making a connected payment or connected transfer in respect of which a tax payment has been made by virtue of these Regulations shall furnish the recipient with a certificate showing the

gross amount of the payment or the value transferred, the amount of the tax payment, and the amount actually paid.

Performers guidance provides:

**How are payments dealt with in your Self Assessment or Corporation Tax accounts?**

If the income you receive is attributed to the entertainer under the rules set out in Regulation 7 ITESR then the tax withheld from the payment you receive will be treated as a payment on account of the entertainer's UK liability.

You will not be charged to UK tax on that income and there will be no repayment of the Withholding Tax to you.

But if:

- you are UK resident and
- the income you receive is not attributed to the entertainer under the above rules then the payment you receive will be a receipt of your own business

The amount of the assessable income will be the payment received plus the amount of the Withholding Tax which has been deducted. You will be able to claim the gross payment you make as a deduction in your UK Income Tax or Corporation Tax accounts.

'Gross payment' means the payment to the entertainer or intermediary plus the tax accounted for to HMRC.

If you make the payment in a series of payments as described at How to work out the tax, you may be entitled to set off tax withheld from payments you receive against your UK tax liabilities or claim a repayment of tax.

*Example*

A UK Venue pays box office income of £100,000 to a UK Promoter in respect of the performance of a non-UK resident entertainer. The Entertainer is paid a fee of £60,000 by the Promoter

**Withholding Tax**

A venue pays £80,000 to the promoter. This is £100,000 less £20,000 which is 20% tax. The £20,000 tax is paid to HMRC.

The promoter pays £48,000 to the entertainer. This is £60,000 less £12,000 which is 20% tax. The £12,000 tax is paid to HMRC.

**Treatment in the accounts**

The Venue is allowed the expense of £100,000 (that is the gross payment shown in his accounts).

The Promoter has a receipt of £100,000 as income and is allowed

£60,000 as an expense in its accounts.

### **Tax set offs**

The Promoter can claim to set the excess Withholding Tax of £8,000 against its Income Tax/Corporation Tax liability for that accounting period. i.e. £20,000 less the payment of £12,000.

If the Promoter had a tax liability of less than £8,000 it can claim a repayment of the amount by which £8,000 exceeds its Income Tax/Corporation Tax liability for that accounting period.

Performers guidance provides:

### **Is Withholding Tax due on payments made to Groups, Theatre Companies, Productions, etc, which include both UK resident and non-resident entertainers?**

For example, a music group or a theatre company which includes both UK resident and non-resident performers.

Yes, Withholding Tax is due

Unless advised otherwise by the Foreign Entertainers Unit the payer must account for Withholding Tax on the total payment, including expenses, made to or in respect of the group or theatre company.

If the payee/group/theatre company want the payer to calculate and deduct tax only on the non UK resident performers, the payee/group/theatre company must apply to the Foreign Entertainers Unit for agreement to do this.

### **How to work out the Withholding Tax**

Where you are paying or transferring money it is very straightforward to work out the tax.

Assuming the basic rate percentage for the year of payment is 20 per cent then you should deduct this percentage from each payment made.

#### *Example*

Gross Payment	£10,000
Tax (10,000 × 20%)	<u>£2,000</u>
Net amount paid to entertainer	<u>£8,000</u>

The same applies to a loan of money. You should deduct tax from the amount of the loan.

All payments of Withholding Tax made to HMRC must be made in sterling. If you make a payment directly or indirectly to an entertainer in a foreign currency you should calculate the Withholding Tax due using the rate of exchange at the time when the payment is made or at the rate used at the time the foreign currency was purchased. The rate of exchange used should be shown on your return form FEU 1.

If the transfer of an asset is involved (for example, a motor car for a 'hole in one' during a golf competition) you must account for the tax as if the asset's cost to you or in connection with providing it was the net amount of the payment.

Withholding Tax is also due on expenses provided for an entertainer. For example, hotel accommodation, airfares, UK transport etc.

In the absence of an agreement with the Foreign Entertainers Unit, Withholding Tax must be accounted for and paid by the payer, from its own funds, on payments made in respect of expenses provided for an entertainer.

The Withholding Tax due must be calculated as follows:

The cost of the expenses, to the payer, must be grossed up, at the basic rate of tax, to give the true cost of the benefit to the artiste.

Withholding Tax due must be calculated at the basic rate on the grossed up value of the expenses.

The withholding tax calculated must be paid by the payer from its own funds: it must not be deducted from the overall payment made to the artiste.

#### *Example*

The airline ticket costs you £1,000. You need to work out the gross amount of the payment and pay tax on that amount. To work out the gross amount you do the following sum.

Net amount of payment £1000 × 20 (basic rate of tax) divided by 80 (100% - 20% basic rate of tax) = £250

Add the tax amount £250 to the net payment £1000 to get the gross payment £1250

Add the result to the net payment to get the gross payment.

£250 + £1,000 = £1,250

Tax (£1,250 × 20%) = £250

#### **VAT Implications**

VAT is not chargeable on Withholding Tax and you should therefore exclude the VAT when calculating Withholding Tax due.

When calculating the amount of tax due on a payment to be made either to, or in respect of an entertainer you must not include VAT (if any) charged to you.

If you are a venue paying the gross ticket sales to a promoter or entertainer, the VAT element of each individual ticket price must be taken out.

## **22.14 Administration**

Reg 9 ITESR deals with returns:

- (1) A person who makes a connected payment or connected transfer shall, in accordance with this regulation, make a return to the Board of the connected payment or connected transfer which he makes and of any tax payment (including a nil amount) for which he is accountable to the Board.
- (2) A return shall be made in the tax year for each successive period ending on 30th June, 30th September, 31st December and 5th April.
- (3) The return for each period shall be made within 14 days after the end of the period.
- (4) [This deals with notices requiring information, but is now effectively superseded by more general HMRC information powers]
- (5) The [TMA 1970] shall apply to a return to which this regulation relates as it applies to a return under the Taxes Acts.

Reg 10 ITESR deals with the due date for tax payments:

- (1) A tax payment (including any reduced tax payment), whether any deduction out of a connected payment or provision in respect of a connected transfer has been made or not, shall be due at the time by which the return under regulation 9(1) is to be made (“the due date”) and payment shall be made before, or at the time when, that return is made.
- (2) A payment at any time so due shall be payable by the person who makes the connected payment or connected transfer concerned, without the making of any assessment in respect of it.
- (3) Subject to the provisions of regulation 11, tax which has become due and payable under this regulation (whether or not it has been paid when the assessment is made) may be assessed on the person from whom it is due if that tax, or any part of it, is not paid on or before the due date.

Reg 11 ITESR deals with assessments, Reg 13 ITESR deals with tax overpayments of tax and reg. 14 incorporates the TMA rules. These need not be set out here.

## 22.15DT Relief

Article 17 OECD Model Convention provides:

1. Notwithstanding the provisions of Articles 15 [Employment income], income derived by a resident of a Contracting State

- [a] as an entertainer, such as a theatre, motion picture, radio or television artiste, or a musician, or
- [b] as a sportsperson,
- from that resident's personal activities as such exercised in the other Contracting State, may be taxed in that other State.

This article was amended in 2014 following an OECD report (“the OECD Art.17 report”).<sup>23</sup>

I refer to income within article 17(1) as “**entertainment income**”.

OECD Model Commentary explains why there is a special rule for entertainment income:

2. This provision [Article 17] makes it possible to avoid the practical difficulties which often arise in taxing entertainers and sportspersons performing abroad.

The commentary does not say what these difficulties are but OECD Art.17 report explains:

... residence taxation should not be assumed given the difficulties of obtaining the relevant information, that Article 17 allows taxation of a number of high-income earners who can easily move their residence to low-tax jurisdictions and that source taxation of the income covered by the Article can be administered relatively easily.<sup>24</sup>

### 22.15.1 “*Entertainer*”/“*Sportsperson*”

The International Manual comments on the terminology:

#### **INTM153190 Artistes/entertainers/athletes** [Jun 2016]

This Article is generally entitled artistes and athletes, but the terms entertainers and sportsmen<sup>25</sup> can also be used. We do not consider there is any difference between the terms artistes and entertainers and sportsmen and athletes.

OECD Commentary discusses these terms:

---

23 OECD, “Issues related to Article 17 of the model tax convention” (2014)

<http://www.oecd.org/tax/treaties/report-article%2017-model-tax-convention.pdf>

24 OECD Art.17 report para 5.

25 Author's footnote: In keeping with contemporary values, the 2014 OECD Model update changed to gender neutral language.

3. Paragraph 1 refers to entertainers and sportspersons. It is not possible to give a precise definition of “entertainer”, but paragraph 1 includes examples of persons who would be regarded as such. These examples should not be considered as exhaustive. On the one hand, the term “entertainer” clearly includes the stage performer, film actor, actor (including for instance a former sportsperson) in a television commercial. The Article may also apply to income received from activities which involve a political, social, religious or charitable nature, if an entertainment character is present. On the other hand, it does not extend to a visiting conference speaker (e.g. a former politician who receives a fee for a speaking engagement), to a model performing as such (e.g. a model presenting clothes during a fashion show or photo session) rather than as an entertainer or to administrative or support staff (e.g. cameramen for a film, producers, film directors, choreographers, technical staff, road crew for a pop group etc.). In between there is a grey area where it is necessary to review the overall balance of the activities of the person concerned.

4. An individual may both direct a show and act in it, or may direct and produce a television programme or film and take a role in it. In such cases it is necessary to look at what the individual actually does in the State where the performance takes place. If his activities in that State are predominantly of a performing nature, the Article will apply to all the resulting income he derives in that State. If, however, the performing element is a negligible part of what he does in that State, the whole of the income will fall outside the Article. In other cases an apportionment should be necessary.

5. Whilst no precise definition is given of the term “sportspersons” it is not restricted to participants in traditional athletic events (e.g. runners, jumpers, swimmers). It also covers, for example, golfers, jockeys, footballers, cricketers and tennis players, as well as racing drivers.

The Commentary discusses the concept of sports or entertainment:

6. The Article also applies to income from other activities which are usually regarded as of an entertainment character, such as those deriving from billiards and snooker, chess and bridge tournaments.

7. Income received by impresarios, etc. for arranging the appearance of an entertainer or sportsperson is outside the scope of the Article, but any income they receive on behalf of the entertainer or sportsperson is of course covered by it.

### 22.15.2 *Income derived by performer*

OECD Commentary provides:

8. Paragraph 1 applies to income derived directly and indirectly from a performance by an individual entertainer or sportsperson. In some cases the income will not be paid to the individual or his impresario or agent, directly with respect to a specific performance. For instance, a member of an orchestra may be paid a salary rather than receive payment for each separate performance: a Contracting State where a performance takes place is entitled, under paragraph 1, to tax the proportion of the musician's salary which corresponds to such a performance. Similarly, where an entertainer or sportsperson is employed by e.g. a one person company, the State where the performance takes place may tax an appropriate proportion of any remuneration paid to the individual. In addition, where its domestic laws "look through" such entities and treat the income as accruing directly to the individual, paragraph 1 enables that State to tax income derived from performances in its territory and accruing in the entity for the individual's benefit, even if the income is not actually paid as remuneration to the individual.

8.1 The paragraph applies regardless of who pays the income. For example, it covers prizes and awards paid by a national federation, association or league which a team or an individual may receive in relation to a particular sports event.

The commentary considers the boundary between (1) entertainment income and (2) trading, royalty and employment income:

9. Besides fees for their actual performances, entertainers and sportspersons often receive income in the form of royalties or of sponsorship or advertising fees. In general, other Articles would apply whenever there is no close connection between the income and the performance of activities in the country concerned. Such a close connection will generally be found to exist where it cannot reasonably be considered that the income would have been derived in the absence of the performance of these activities. This connection may be related to the timing of the income-generating event (e.g. a payment received by a professional golfer for an interview given during a tournament in which she participates) or to the nature of the consideration for the payment of the income (e.g. a payment made to a star tennis player for the use of his picture on posters advertising a tournament in which he will participate). Royalties for intellectual property rights will normally

be covered by Article 12 rather than Article 17 (see paragraph 18 of the Commentary on Article 12), but in general advertising and sponsorship fees will fall outside the scope of Article 12. Article 17 will apply to advertising or sponsorship income, etc. which has a close connection with a performance in a given State (e.g. payments made to a tennis player for wearing a sponsor's logo, trade mark or trade name on his tennis shirt during a match). Such a close connection may be evident from contractual arrangements which relate to participation in named events or a number of unspecified events; in the latter case, a Contracting State in which one or more of these events take place may tax a proportion of the relevant advertising or sponsorship income (as it would do, for example, in the case of remuneration covering a number of unspecified performances; see paragraphs 9.2 and 9.3). Similar income which could not be attributed to such performances would fall under the standard rules of Article 7 or Article 15, as appropriate. Payments received in the event of the cancellation of a performance are also outside the scope of Article 17, and fall under Article 7 or 15, as the case may be. Various payments may be made as regards merchandising; whilst the payment to an entertainer or sportsperson of a share of the merchandising income closely connected with a public performance but not constituting royalties would normally fall under Article 17, merchandising payments derived from sales in a country that are not closely connected with performances in that country and that do not constitute royalties would normally be covered by Article 7 (or Article 15, in the case of an employee receiving such income).

9.1 Apart from the above examples, there are a number of cases where it may be difficult to determine whether a particular item of income is derived by a person as an entertainer or sportsperson from that person's personal activities as such. The following principles may be useful to deal with such cases:

- The reference to an “entertainer or sportsperson” includes anyone who acts as such, even for a single event. Thus, Article 17 can apply to an amateur who wins a monetary sports prize or a person who is not an actor but who gets a fee for a once-in-a-lifetime appearance in a television commercial or movie.
- As noted in the previous paragraphs, the activities of an entertainer or sportsperson do not include only the appearance in an entertainment or sports event in a given State but also, for example, advertising or interviews in that State that are closely connected with such an appearance.

- Merely reporting or commenting on an entertainment or sports event in which the reporter does not himself participate is not an activity of an entertainer or sportsperson acting as such. Thus, for instance, the fee that a former or injured sportsperson would earn for offering comments during the broadcast of a sports event in which that person does not participate would not be covered by Article 17.
- Preparation, such as rehearsal and training, is part of the normal activities of entertainers and sportspersons. If an entertainer or sportsperson is remunerated for time spent on rehearsal, training or similar preparation in a State (which would be fairly common for employed entertainers and sportspersons but could also happen for a self-employed individual, such as an opera singer whose contract would require participation in a certain number of rehearsals), the relevant remuneration, as well as remuneration for time spent travelling in that State for the purposes of performances, rehearsal and training (or similar preparation), would be covered by the Article. This would apply regardless of whether or not such rehearsal, training or similar preparation is related to specific public performances taking place in that State (e.g. remuneration that would be paid with respect to the participation in a pre-season training camp would be covered).

For a US view of the royalty/personal services divide, see *Garcia v Commissioner of Internal Revenue*.<sup>26</sup>

### 22.15.3 Performer income computation

OECD Commentary provides:

10. The Article says nothing about how the income in question is to be computed. It is for a Contracting State's domestic law to determine the extent of any deductions for expenses. Domestic laws differ in this area, and some provide for taxation at source, at a low rate based on the gross amount paid to entertainers and sportspersons. Such rules may also apply to income paid to groups or incorporated teams, troupes, etc. Some States, however, may consider that the taxation of the gross amount may be inappropriate in some circumstances even if the

---

26 140 TC 6 (2013)

<https://www.ustaxcourt.gov/UstcDockInq/DocumentViewer.aspx?IndexID=5978480>

applicable rate is low. These States may want to give the option to the taxpayer to be taxed on a net basis. This could be done through the inclusion of a paragraph drafted along the following lines ...

Apportionment issues have often proved controversial. OECD Art.17 report discusses the issue of preparation and training activities:

34. One commentator indicated that the practice of the UK tax authorities was “to tax a proportion of income earned under contracts for services – even if that income is earned by a personal service company – on the basis of competition days in the UK.” The commentator argued, however, that it would be inappropriate to tax endorsement income of a sportsperson on that basis since a sportsperson has to train the rest of the year. Using the example of a marathoner, the commentator argued that “if the athlete was in the UK for a week for the London Marathon and did not return in a given tax year, but could demonstrate that he/she trained on every day of the year (as many marathon runners do) then 1/52 of global income for services should fall within the UK tax net.” The Committee, however, disagreed with that suggestion, which does not take into account the consideration for the payments received: where a marathoner derives all of her income from her participation and performance during races held in one country, it is difficult to consider that any part of that remuneration is paid for training in another country. It also disagreed with the argument that the proposal “seems to grant preferential status to employed, rather than self-employed sportspeople”: under the proposed interpretation, self-employed individuals who are paid to train or rehearse are treated like employed individuals who are paid to train or rehearse. The Committee simply noted that it seemed more unusual for self-employed entertainers and sportspersons to be paid for training or preparation.

35. Two commentators, however, objected to that last observation and referred to the following situations where they argued that self-employed individuals were paid for preparation or training:

- “Self-employed sportspeople have contracts which include the fact that products must be used in training as well as competition”.
- “Actors may need to undertake preparation for specific roles (e.g. a role requiring him/her to ride a horse); in that case they will need to train for the role, but the days spent in training will form part of the work in relation to the film fee.”
- Some self-employed persons performing in plays, operas and concerts may be contractually required to participate in rehearsals.

36. Whilst it was unclear, in the first two examples, whether or not the person was paid for the training or preparation period, the Committee agreed that the last example involved payments for preparation made to a self-employed person.

37. Based on these comments, the Committee concluded that the reference to rehearsals and the example of a self-employed person being paid for rehearsing should be added to proposed paragraph 9.1.

The following revised version of the relevant part of the paragraph was therefore adopted by the Committee:

Add the following subparagraphs to proposed paragraph 9.1 (see above) of the Commentary on Article 17:

[9.1 Apart from the above examples, there are a number of cases where it may be difficult to determine whether a particular item of income is derived by a person as an entertainer or sportsperson from that person's personal activities as such. The following principles may be useful to deal with such cases:]

- [...]
- Preparation, such as rehearsal and training, is part of the normal activities of entertainers and sportspersons. If an entertainer or sportsperson is remunerated for time spent on preparation, rehearsal, training or similar preparation in a State (which would be fairly common for employed entertainers and sportspersons but could also happen for a self-employed individual, such as an opera singer whose contract would require participation in a certain number of rehearsals), the relevant remuneration, as well as remuneration for time spent travelling in that State for the purposes of performances, rehearsal and training (or similar preparation), would be covered by the Article. This would apply regardless of whether or not such rehearsal, training or similar preparation is related to specific public performances taking place in that State (e.g. remuneration that would be paid with respect to the participation in a pre-season training camp would be covered).

#### 22.15.4 Receipts by third parties

Para 17(2) OECD Model provides:

2. Where income in respect of personal activities exercised by an entertainer or a sportsperson acting as such accrues not to the entertainer or sportsperson but to another person, that income may, notwithstanding

the provisions of Article 15, be taxed in the Contracting State in which the activities of the entertainer or sportsperson are exercised.

OECD Commentary provides:

11. Paragraph 1 of the Article deals with income derived by individual entertainers and sportspersons from their personal activities. Paragraph 2 deals with situations where income from their activities accrues to other persons. If the income of an entertainer or sportsperson accrues to another person, and the State of source does not have the statutory right to look through the person receiving the income to tax it as income of the performer, paragraph 2 provides that the portion of the income which cannot be taxed in the hands of the performer may be taxed in the hands of the person receiving the remuneration. If the person receiving the income carries on business activities, tax may be applied by the source country even if the income is not attributable to a permanent establishment there. But it will not always be so. There are three main situations of this kind:

- a) The first is the management company which receives income for the appearance of e.g. a group of sportspersons (which is not itself constituted as a legal entity).
- b) The second is the team, troupe, orchestra, etc. which is constituted as a legal entity. Income for performances may be paid to the entity. Individual members of the team, orchestra, etc. will be liable to tax under paragraph 1, in the State in which they perform their activities as entertainers or sportspersons on any remuneration (or income accruing for their benefit) derived from the performance; of these activities (see, however, paragraph 14.1 below). The profit element accruing from a performance to the legal entity would be liable to tax under paragraph 2.
- c) The third situation involves certain tax avoidance devices in cases where remuneration for the performance of an entertainer or sportsperson is not paid to the entertainer or sportsperson himself but to another person, e.g. a so-called star-company, in such a way that the income is taxed in the State where the activity is performed neither as personal service income to the entertainer or sportsperson nor as profits of the enterprise, in the absence of a permanent establishment. Some countries “look through” such arrangements under their domestic law and deem the income to be derived by the entertainer or sportsperson; where this is so, paragraph 1 enables them to tax income

resulting from activities in their territory. Other countries cannot do this. Where a performance takes place in such a country, paragraph 2 permits it to impose a tax on the profits diverted from the income of the entertainer or sportsperson to the enterprise. It may be, however, that the domestic laws of some States do not enable them to apply such a provision. Such States are free to agree to other solutions or to leave paragraph 2 out of their bilateral conventions.

11.1 The application of paragraph 2 is not restricted to situations where both the entertainer or sportsperson and the other person to whom the income accrues, e.g. a star-company, are residents of the same Contracting State. The paragraph allows the State in which the activities of an entertainer or sportsperson are exercised to tax the income derived from these activities and accruing to another person regardless of other provisions of the Convention that may otherwise be applicable. Thus, notwithstanding the provisions of Article 7, the paragraph allows that State to tax the income derived by a star-company resident of the other Contracting State even where the entertainer or sportsperson is not a resident of that other State. Conversely, where the income of an entertainer resident in one of the Contracting States accrues to a person, e.g. a star-company, who is a resident of a third State with which the State of source does not have a tax convention, nothing will prevent the Contracting State from taxing that person in accordance with its domestic laws.

11.2 Paragraph 2 does not apply, however, to prize money that the owner of a horse or the team to which a race car belongs derives from the results of the horse or car during a race or during races taking place during a certain period. In such a case, the prize money is not paid in consideration for the personal activities of the jockey or race car driver but in consideration for the activities related to the ownership and training of the horse or the design, construction, ownership and maintenance of the car. Such prize money is not derived from the personal activities of the jockey or race car driver and is not covered by Article 17. Clearly, however, if the owner or team receives a payment in consideration for the personal activities of the jockey or race car driver, that income may be taxed in the hands of the jockey or race car driver under paragraph 1 (see paragraph 7 above).

#### 22.15.5 *Foreign tax credit relief*

The INTM provides:

**INTM168063 Foreign tax paid on trade income: limitation on credit: Artistes/athletes/sportsmen [Jan 2018]**

As indicated in INTM153190, the country in which an entertainer or sportsman performs has primary taxing rights over the income he derives from his performances in that country. Many foreign countries impose a withholding tax on the payments made for such performances at a fixed percentage of the gross payments. These are final taxes and normally claims cannot be made to the foreign country to have the expenses incurred in earning the payments deducted from the gross amounts. Where a resident entertainer or sportsman is charged to UK Income Tax on profits or gains arising from any profession or vocation, he is entitled to credit for these foreign taxes against the UK tax on the UK measure of that income, that is, the income less the expenses incurred in earning it. The credit will be the lesser of the foreign tax and the tax at his marginal rate (see INTM165040 onwards).

Where, however, a resident entertainer or sportsman is employed by a service company, the income from his performances is income of that company and he is paid a salary out of that income. Credit for the foreign tax paid on the payments for his performances is due against the Corporation Tax payable by the company on its profits. The income of the entertainer or sportsman is remuneration from the service company and not the original fees paid to the company and he is not therefore entitled to credit for such foreign tax against the UK tax on his salary. Nonetheless, it is possible that a different treatment may be available where the foreign tax is imposed in a personal capacity on the entertainer etc notwithstanding that the performance payments are made to the service company. This treatment is intended to put the entertainer etc in a similar position when receiving remuneration from a service company in respect of overseas income that can be matched to a particular source, to the one he would have been in had he received the income direct. For instance, if a clear and direct link can be made between the fees for the performance in the overseas country and the income arising to the performer in the form of remuneration from the service company then it may be that the remuneration derived by the entertainer can be identified with the income taxed by the foreign tax authority. Where there such a link can be made, and the interval between the two events is short, it may be possible to allow the tax credit against income tax charged on the entertainer etc. Any credit given to the entertainer etc must be restricted in accordance with TIOPA10/S36 and S37, by reference to expenses (see INTM168010

onwards.)<sup>27</sup>

Please therefore refer to Personal Tax International (PTI) Advisory. (part of Charity, Assets & Residence) where (i) a claim to credit for foreign tax is made by the entertainer or sportsman and (ii) the foreign tax has been imposed on the income received by the service company but (iii) the overseas tax authority has disregarded the existence of the service company and taxed the income as if it belonged to the entertainer or sportsman. This treatment will not be available where a deduction for the foreign tax has been allowed to the company under S112 TIOPA10.

#### 22.15.6 *Cultural exemption*

OECD Model Commentary provides:

2. ... too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement, limit the application of paragraph 1 to business activities.

About a dozen UK treaties contain a cultural exemption.

---

<sup>27</sup> See 106.23 (Limit on credit relief).

## CHAPTER TWENTY THREE

# PROPERTY INCOME

### 23.1

#### *Cross references*

The following topics are considered elsewhere:

13.3.2 (Property/trade income overlap).

106.20.2 (FTC: Property income)

### **23.1 Property income: Introduction**

The Taxes Acts use the term “**property income**” to mean income from land.<sup>1</sup> The taxation of property income is governed by Part 3 ITTOIA/Part 4 CTA 2009. A full discussion needs a book to itself. This chapter

---

1 TLR Exposure Draft No. 13 discusses the terminology:

*“Finding a suitable name*

223. Letting income has long been referred to as ‘Schedule A income’ by tax professionals. But that is not an informative label for the non-specialist and we are removing references to the Schedules.

224. We considered several possible new names for this type of income including ‘land income’, ‘letting income’, ‘rental income’, ‘property business income’ and ‘property income’. We concluded that ‘property income’ offered the best compromise because:

- it matches the names that are proposed for the other types of income: ‘trading income’, ‘employment income’ and ‘savings and investment income’;
- for most people, it is likely to appear the most appropriate name; and
- it links directly with what we think is the most appropriate name for the business activity (‘property business’): ‘land business’ and ‘rental business’ might be particularly misleading.

225. The disadvantage is that it might appear to go wider than income just from land; that is, strictly, ‘property’ means more than just land and buildings. But we do not think that most people will find this confusing as the proposed use corresponds broadly to the popular use.”

focuses on matters closest to the themes of this book.

From 2020/21, property income of non-UK resident companies is subject to CT rather than IT.

The development of the rules can be traced through:

- HMRC “Non-resident companies chargeable to Income Tax and non-resident CGT: Consultation Document” (Mar 2017)<sup>2</sup>
- HMRC “Non-resident companies chargeable to income tax and non-resident CGT: summary of responses” (Dec 2017)<sup>3</sup>
- Draft FB clauses (July 2018)

But these are now of historical interest only.

The change will add to complexity. CT is a more sophisticated tax than IT, in many respects, in particular:

- (1) Treatment of interest (loan relationships)
- (2) Corporate interest restriction (cap on debt funding deductions by reference to a percentage of the company’s profits); Part 10 TIOPA
- (2) Taxation of hybrids

Private client practitioners advising foreign companies will have to master CT rules which hitherto they could leave for corporation tax practitioners. Sarah Squires<sup>4</sup> comments:

Schedule 5 FA 2019 is not particularly lengthy (14 pages only) - but it just deals with the basics (commencement, transitional provisions and the charge itself). The “consequential” provisions are basically the entirety of the Corporation Tax Acts - and although corporation tax is based on income tax principles, developments since the early 1990s mean that there are significant differences between the two taxes (particularly in relation to financing arrangements) - with these differences extending to compliance. For many non-resident landlords, the move to corporation tax brings with it a rather steep learning curve.<sup>5</sup>

## 23.2 Property business terminology

The definitions are in s.263 ITTOIA/s.204 CTA 2009.

The CT definitions are applied (with modifications) in ATED rental business relief.<sup>6</sup>

### 23.2.1 “UK property business”

#### s.264 ITTOIA

A person’s UK property business consists of—

- (a) every business which the person carries on for generating income from land in the UK, and
- (b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.

#### s.205 CTA 2009

A company’s UK property business consists of—

- (a) every business which the company carries on for generating income from land in the UK, and
- (b) every transaction which the company enters into for that purpose otherwise than in the course of such a business.

At first sight para (b) is puzzling. EN ITTOIA explains:

1049. ... the concept of the “property business” is, to a certain extent, an artificial one. Unlike the term “trade” it may not always correspond to an activity organised in a way that the proprietor would necessarily describe as a business. As such, the term has to cover:

- “real” businesses where the lettings are organised in a professional way;
- lettings which are not so organised; and
- casual and one-off transactions which may have very little of the qualities normally associated with a business.

Then all of these lettings of different types must be treated as part of the same, single business.

### 23.2.2 “Overseas property business”

#### s.265 ITTOIA

#### s.206 CTA 2009

---

<sup>6</sup> See 93.18 (ATED rental relief).

A person's overseas property business consists of—

(a) every business which the person carries on for generating income from land outside the UK, and

(b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.

A company's overseas property business consists of—

(a) every business which the company carries on for generating income from land outside the UK, and

(b) every transaction which the company enters into for that purpose otherwise than in the course of such a business.

EN ITTOIA explains:

1056. The definition is identical to that of “UK property business” except that the land from which the income arises is outside the UK. That is the only difference between a UK and an overseas property business: income from land outside the UK can arise only in an overseas property business; income from land in the UK can arise only in a UK property business.

1057. For the purpose of deciding whether there is an overseas property business, overseas land law is interpreted in accordance with section 363.

See 23.6 (Overseas property business: loss) for a refinement to this definition.

### 23.2.3 “*Property business*”

Section 263(6) ITTOIA/s.204(1) CTA 2009 provide a commonsense definition:

In this Act “property business” means a UK property business or an overseas property business.

ITTOIA/CTA take foreign income of a non-resident out of charge. They adopt the somewhat clumsy technique of amending the definitions of overseas property business/property business (it makes no practical difference):

**s.263 ITTOIA**

**s.204 CTA 2009**

(4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).

(2) References in this Act to a property business are to a property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, the rules about territorial scope in section 5).

(5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits concerned would not be chargeable to tax under Chapter 3.

(3) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of a property business if the profits concerned would not be chargeable to tax under Chapter 3.

23.2.4 *Generating income from land*

Section 266 ITTOIA/s.207 CTA 2009 provide:

(1) In this Chapter “generating income from land” means exploiting an estate, interest or right in or over land as a source of rents or other receipts.

(2) “Rents” includes payments by a tenant for work to maintain or repair leased premises which the lease does not require the tenant to carry out.

(3) “Other receipts” includes—

- (a) payments in respect of a licence to occupy or otherwise use land,
- (b) payments in respect of the exercise of any other right over land, and
- (c) rentcharges and other annual payments reserved in respect of, or charged on or issuing out of, land.

(4) For the purposes of this section a right to use a caravan or houseboat at only one location is treated as a right deriving from an estate or interest in land.

**s.267 ITTOIA**

**s.208 CTA 2009**

For the purposes of this Chapter the following activities are not carried on for generating income from land—

[identical]

(a) farming or market gardening in the UK (but see section 9 (UK farming or market gardening treated as trade)),

(b) any other occupation of land (but see section 10 (certain commercial occupation of UK land treated as trade)), and

(c) activities for the purposes of a concern to which section 12 applies (profits of mines, quarries etc).

(a) farming or market gardening in the UK (but see section 36 (UK farming or market gardening treated as trade)),

(b) any other occupation of land (but see section 38 (certain commercial occupation of UK land treated as trade)), and

(c) activities for the purposes of a concern to which section 39 applies (profits of mines, quarries etc).

### 23.3 Territorial limits: Property income

The charge is as follows:

#### **s.268 ITTOIA**

Income tax is charged on the profits of a property business.

#### **s.209 CTA 2009**

The charge to corporation tax on income applies to the profits of a property business.

The territorial scope of the charge is in s.269 ITTOIA/s.5 CTA 2009, but these provisions are not drafted in the same way.

#### 23.3.1 *IT territorial limits*

Section 269 ITTOIA provides:

(1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.

(2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.

#### **270 Income charged**

(1) Tax is charged under this Chapter on the full amount of the profits arising in the tax year.

(2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 270(2) ITTOIA feeds into s.832 which incorporates the remittance basis.

### 23.3.2 Property income of split year

Section 270(3) ITTOIA provides the usual split-year rule:

If, as respects an individual carrying on an overseas property business, the tax year is a split year—

- (a) tax is charged under this Chapter on so much of the profits referred to in subsection (1) as arise in the UK part of the tax year, and
- (b) the portion of the profits arising in the overseas part of the tax year is, accordingly, not chargeable to tax under this Chapter.

Section 270(4) (not discussed here) deals with capital allowances.

### 23.3.3 CT territorial limits

The key provision is s.5(3A) CTA 2009, but it is necessary to read this in the context of the whole of section 5:

(1) A UK resident company is chargeable to corporation tax on income on all its profits wherever arising (but see Chapter 3A for an exemption from charge in respect of profits of foreign permanent establishments).

(2) A non-UK resident company is within the charge to corporation tax only if—

- (a) [dealing in or developing UK land]
- (b) [trade in UK through a UK PE],
- (c) it carries on a UK property business, or
- (d) it has other UK property income.<sup>7</sup>

(2A) [concerns dealing in or developing UK land]

(3A) A non-UK resident company which carries on a UK property business is chargeable to corporation tax on income on all its profits that are—

- (a) profits of that business, or
- (b) profits arising from loan relationships or derivative contracts that the company is a party to for the purposes of that business.

Section 5(3B) CTA 2009 deals with the quantum of the charge:

---

7 Section 5(5) CTA 2009 provides: “In this Part “other UK property income” means income dealt with by any of the following Chapters of Part 4—

- (a) Chapter 7 (rent receivable in connection with a UK section 39(4) concern);
- (b) Chapter 8 (rent receivable for UK electric-line wayleaves);
- (c) Chapter 9 (post-cessation receipts arising from a UK property business).”

(3B) A non-UK resident company which has other UK property income is chargeable to corporation tax on income on all its profits that—

- (a) consist of that income, or
- (b) are profits arising from loan relationships or derivative contracts that the company is a party to for the purposes of enabling it to generate that income.

### 23.3.4 Loan relationships charge

Section 5(3A) CTA 2009 imposes two charges to CT:

- (1) s.5(3A)(a): charge on profits of a UK property business
- (2) s.5(3A)(b): charge on loan relationship/derivative contract profits

The reason for the second charge is s.211(1) CTA 2009 which provides:

The profits of a property business are calculated without regard to items giving rise to—

- (a) credits or debits within Part 5 (loan relationships), or
- (b) credits or debits within Part 7 (derivative contracts).

Interest<sup>8</sup> is not taken into account in calculating profits of a UK property business for CT purposes. Instead the loan relationship /derivative codes apply. These give rise to non-trading credits and debits: and hence the need for a specific charging section to apply s.299 CTA 2009.<sup>9</sup>

The CT loan relationship charge applies so that non-trading profits<sup>10</sup> arising to a non-resident company from its loan relationships/derivative contracts are charged to CT - but only where the relevant amounts arise from a loan relationship to which the non-resident is party for the purposes of its UK property business.

“For the purposes of” requires a link between interest income and property business. So for example, interest on late rent should be within s.5(3A)(a). But, if say, the non-resident company is also a holding company and has, independently of its property business, made a loan to a subsidiary, interest on that loan would be outside CT (although potentially subject to IT if the interest has a UK source).

<sup>8</sup> I use the term loosely, to include other financing amounts.

<sup>9</sup> The position of a non-resident company carrying on a property business is different from a non-resident company dealing/developing UK land, where credits/debits are brought into account as trading receipts/losses; see s.297 CTA 2009.

<sup>10</sup> See s299 and 301 CTA 2009.

Similarly, the loan relationship code governs the deductibility of interest payable by non-resident companies for CT purposes.<sup>11</sup> But again relief under the loan relationship code is only available where the nonresident company is party to the loan/derivative for the purposes of its UK property business.<sup>12</sup>

If a company's non-trading debits exceed its non-trading credits in an accounting period, a nontrading deficit arises - and relief can only be obtained on the making of a claim for sideways relief.<sup>13</sup>

The charge to tax under s.5(3A) CTA 2009 is subject to any applicable DTA.

## 23.4 Non-resident co: Transitional rules

### 23.4.1 Commencement

Para 35 sch 5 FA 2019 provides:

This Schedule comes into force on 6 April 2020 (“the commencement date”).

Para 49 sch 5 FA 2019 contains a forestalling TAAR, which is not discussed here.

### 23.4.2 Accounting period across 6/4/20

Para 36 sch 5 FA 2019 provides:

30 Where a period of account of a company begins before and ends on or after the commencement date, it is to be assumed for the purposes of the amendments made by this Schedule-

- (a) that the period (“the straddling period of account”) consists of two separate periods of account-
  - (i) the first beginning with the date on which the straddling period of account begins and ending with 5th April 2020, and
  - (ii) the second beginning with the commencement date and ending with the date on which the straddling period of

---

11 See s.464 and s.1301A CTA 2009. Note: s.300(3) CTA 2009 means that a loan relationship can be brought into account under Part 5 CTA 2009 even if it is not itself a source of income.

12 See s.301 CTA 2009.

13 See s.463D CTA 2009.

- account ends, and
- (b) that separate accounts have been drawn up for each of those separate periods in accordance with generally accepted accounting practice.

### 23.4.3 Losses

Para 37 sch 5 FA 2019 provides:

- (1) This paragraph applies if—
  - (a) in a tax year ending before the commencement date a company makes a loss in a UK property business that is within the charge to income tax,
  - (b) relief for the purposes of income tax is not given to the company for an amount of the loss (“the unrelieved amount”), and
  - (c) on the commencement date the UK property business ceases to be within the charge to income tax and comes within the charge to corporation tax as a result of section 5(3A) of CTA 2009.
- (2) Relief for the purposes of corporation tax is given to the company under this paragraph for the unrelieved amount.
- (3) For this purpose—
  - (a) the unrelieved amount is carried forward to post-commencement accounting periods of the company (for so long as the company continues to carry on the UK property business), and
  - (b) the profits of any such accounting period that are mentioned in subparagraph (4) are to be reduced by the unrelieved amount (so far as that amount cannot be used under this paragraph to reduce the profits of an earlier period).
- (4) The profits are—
  - (a) profits of the UK property business, and
  - (b) profits arising from loan relationships or derivative contracts that the company is a party to for the purposes of that business.
- (5) In this paragraph “post-commencement accounting period” means an accounting period ending after the commencement date.

### 23.4.4 Company in partnership

Para 38 sch 5 FA 2019 provides:

- (1) This paragraph applies if—
  - (a) in the tax year 2019-20 a non-UK resident company is a partner in a firm which—
    - (i) carries on a trade, and

- (ii) has untaxed income or relieviable losses from a UK property business, and
  - (b) accordingly, the company is treated under section 854 of ITTOIA 2005 as having a notional business for the tax year.
- (2) The basis period for the notional business for the tax year is taken to end with 5th April in that tax year (if it would not otherwise do so).
- (3) In this paragraph “untaxed income” has the meaning given by section 854(6) of ITTOIA 2005.

### 23.5 Quantum of property income

The quantum of property income is dealt with in a series of provisions from s.271A ITTOIA/s.210 CTA 009 onward; this is not discussed here, though I hope to address it in a future edition.

#### 23.5.1 Property income: IT computation

The Property Income Manual provides:

##### **2105. Introduction** [Mar 2018]

##### **... Interest rate hedging instruments**

Where an interest rate hedging contract such as a swap or cap is taken out to hedge interest payments which are deductible in computing the profits or losses of a rental business, then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that rental business. This is because trading principles are imported into the property income computation rules. Profits and losses on such instruments should normally be computed on an accruals basis so that payments and receipts are allocated to the periods to which they relate, without regard to the periods in which they are made or received or become due and payable, in accordance with normal accounting practice. For more on the tax treatment of swaps held by IT payers see PIM2066.

### 23.6 Overseas property business: Loss

#### 23.6.1 Losses from 2008/09

Chapter 4 Part 4 ITA provides loss relief for a property business. There are three classes of loss relief:

- (1) Carry forward against subsequent property business profits: ss.118–119 ITA.
- (2) (a) Capital allowance losses and  
(b) agricultural estate losses.

Sections 120–124 ITA.

(3) Post-cessation property relief: ss.125–126 ITA.

In this chapter I consider only the first of these reliefs. Section 118 ITA provides:

- (1) Relief is given to a person under this section if the person—
  - (a) carries on a UK property business or overseas property business (alone or in partnership) in a tax year, and
  - (b) makes a loss in the business in the tax year.
- (2) The relief is given by deducting the loss in calculating the person's net income for subsequent tax years (see Step 2 of the calculation in section 23).
- (3) But a deduction for that purpose is to be made only from profits of the business.<sup>14</sup>

The Property Income Manual correctly summarises:

**4703 CT** [Apr 2018]

*Losses*

As part of the changes made by FA95, the taxable profits and losses of overseas let property were ring fenced for IT purposes. The effect was that:

- losses of an overseas property business cannot, for IT purposes, be set against profits of a UK property business carried on by the same individual,

---

14 For completeness, the ITA continues:

“(4) In calculating a person's net income for a tax year, deductions under this section from the profits of a business are to be made before deductions of any other reliefs from those profits.

(5) No relief is to be given under this section so far as relief for the loss is given under section 120.

(6) This section needs to be read with section 119 (how relief works).

**119 How relief works**

This section explains how the deductions are to be made.

The amount of the loss to be deducted at any step is limited in accordance with section 25(4) and (5).

Step 1 Deduct the loss from the profits of the business for the next tax year.

Step 2 Deduct from the profits of the business for the following tax year the amount of the loss not previously deducted.

Step 3 Continue to apply Step 2 in relation to the profits of the business for subsequent tax years until all the loss is deducted.”

- similarly, losses of UK property business cannot for IT purposes be set against profits of an overseas property business carried on by the same individual.

The definitions of UK property business and overseas property business in ITTOIA were only ITTOIA-wide definitions (they do not apply for all the Income Tax Acts) so the drafter of the ITA had to repeat them. Section 989 ITA extends them to the Income Tax Acts:

The following definitions apply for the purposes of the Income Tax Acts—

“overseas property business” has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005,

“UK property business” has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005

At this point we need to consider s.263(4)(5) ITTOIA which restricts the meaning of “overseas property business”:

(4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).

(5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits concerned would not be chargeable to tax under Chapter 3.

I refer to this provision as the “**non-chargeable overseas property business rule**”. This rule applies for the purposes of “this Act” (ITTOIA). However it is suggested that this applies for the purposes of loss relief in the ITA, s.989 ITA incorporates the s.263 rule, because it incorporates the definition of Chapter 2 Part 3 ITTOIA, and s.263 is in Chapter 2.

Suppose T carries on an overseas property business and:

- (1) Year 1: T is non-resident and realises losses;
- (2) Year 2: T is UK resident and realises profits.

The losses of Year 1 are disallowed since the profits of that year are not chargeable under Chapter 3 (or at all) so there is no overseas property business. In short, losses of non-residents are not relievable. *Quaere* whether this would apply if T were resident in an EU member state.

What about an overseas property business carried on by a remittance basis taxpayer? An overseas property business which is taxed under the

remittance basis is (from 2008/09) taxed under Chapter 3 (even though the amount of income taxed is determined by s.832 ITTOIA which is not in chapter 3.) So the non-chargeable overseas property business rule does not disallow loss relief. Presumably this change was intentional as it was not desired to introduce an equivalent of the incomprehensible CGT loss rules into this context.<sup>15</sup>

### 23.6.2 Losses before 2008/09

The position was different before 2008/09. This is still relevant in relation to the question of whether pre-2008 losses can be carried forward and set against post 2008 profits. The relevant legislation in ITTOIA provided:

#### **268 Charge to tax on profits of a property business**

Income tax is charged on the profits of a property business.

#### **269 Territorial scope of charge to tax**

(1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.

(2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.

*(3) But, in the case of an overseas property business carried on by a UK resident to whom the remittance basis applies, the only profits of the business chargeable to tax under this Chapter are those in respect of land in the Republic of Ireland.*

*(4) For a UK resident to whom the remittance basis applies, see also Chapter 11 (charge to tax on overseas property income other than income arising in Republic of Ireland).*

(Words in italics repealed by the FA 2008.) Thus for a remittance basis taxpayer, and ignoring the special case of land in Ireland,<sup>16</sup> the charge was not under Chapter 3. Instead it was in Chapter 11 (also repealed in the FA 2008). This provided:

#### **357 Charge to tax on overseas property income**

*Income tax is charged on the overseas property income of a person to whom the remittance basis applies.*

---

<sup>15</sup> See 61.16 (Loss of remittance basis taxpayer).

<sup>16</sup> I do not discuss Irish property income here, but note that the pre-2008 legislation was in breach of EU law; see 16.22 (RFI from Ireland).

**358 Meaning of “overseas property income”**

*In this Chapter “overseas property income”, in relation to a person to whom the remittance basis applies, means amounts which*

- (a) are not brought into account in calculating the profits of any overseas property business of the person, but*
- (b) would be if section 269(3) (charge to tax on profits of an overseas property business of a person to whom the remittance basis applies only in respect of land in the Republic of Ireland) were omitted.*

**359 Income charged**

*Tax is charged under this Chapter on the amount specified by section 832 (relevant foreign income charged on the remittance basis).*

So before 2008, the remittance basis taxpayer did not have an “overseas property business” so there could not be loss relief. In the 2007/08 edition of this book I commented:

This is consistent with the CGT treatment of losses. It may be desirable for a foreign domiciliary not to claim remittance basis treatment in the year that a loss accrues in order to obtain that loss relief. Though the cost of that claim must be set against the benefit of the remittance basis in that year.

Suppose the loss is allowable in the year it accrues but in a subsequent year the owner claims remittance basis treatment. The loss is not allowable in that year. However, it is suggested that the loss can be carried forward and set against profits of other years if the arising basis applies to those years.

It is suggested that a loss which did not qualify for relief in the year that it accrued cannot be carried forward to 2008/09 or subsequently. HMRC may well agree. The Property Income Manual provides:

**4705. IT cases up to 2004-05 [April 2018]**

No loss can ever arise on income taxed on the remittance basis.

Offshore property business losses from before 1998/99 are allowable under ESC B25, but it seems unlikely that any such losses will still be available to be carried forward to the present time.

**23.7 DT relief: Property income**

Article 6(1) OECD Model provides:

Income derived<sup>17</sup> by a resident of a Contracting State from immovable property (including income from agriculture or forestry) situated in the other Contracting State may be taxed in that other State.

The significance of this is that income from immovable property does not fall within article 21 (“Other Income”, which is taxed only in the state of residence).<sup>18</sup> Instead, it is taxed in the source state with credit given in the state of residence.

OECD Model Commentary provides:

1. Paragraph 1 gives the right to tax income from immovable property to the State of source, that is, the State in which the property producing such income is situated. This is due to the fact that there is always a very close economic connection between the source of this income and the State of source. ... Article 6 deals only with income which a resident of a Contracting State derives from immovable property situated in the other Contracting State. It does not, therefore, apply to income from immovable property situated in the Contracting State of which the recipient is a resident within the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 [other income] shall apply to such income.

### 23.7.1 “Immovable property”

The definition of immovable property is important for article 6 and for article 13 (capital gains).

Article 6(2) OECD Model Convention provides:

- [a] The term “immovable property” shall have the meaning which it has under the law of the Contracting State in which the property in question is situated.
- [b] The term shall in any case include
  - [i] property accessory to immovable property,
  - [ii] livestock and equipment used in agriculture and forestry,
  - [iii] rights to which the provisions of general law respecting landed property apply,
  - [iv] usufruct of immovable property and
  - [v] rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and

---

17 See 14.10.1 (“Deriving” income).

18 See 32.16 (DT relief: “Other Income”).

other natural resources;  
[c] ships, and aircraft shall not be regarded as immovable property.

OECD Model Commentary provides:

2. Defining the concept of immovable property by reference to the law of the State in which the property is situated, as is provided in paragraph 2, will help to avoid difficulties of interpretation over the question whether an asset or a right is to be regarded as immovable property or not. The paragraph, however, specifically mentions the assets and rights which must always be regarded as immovable property. In fact such assets and rights are already treated as immovable property according to the laws or the taxation rules of most OECD member countries. ... No special provision has been included as regards income from indebtedness secured by immovable property, as this question is settled by Article 11.<sup>19</sup>

### *23.7.2 Property income or other income*

Article 6(3) elucidates “derived from” immovable property:

3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property.

OECD Model Commentary provides:

3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property....

Mortgage interest is classified as interest income rather than property income.<sup>20</sup>

OECD Model Commentary comments on the border between property income and company distribution income:

3. ... Income in the form of distributions from Real Estate Investment Trusts (REITs), however, raises particular issues which are discussed in paragraphs 67.1 to 67.7 of the Commentary on Article 10.

Article 6(4) deals with the overlap of business income and property income:

---

<sup>19</sup> See 25.26.5 (DTA definition of interest).

<sup>20</sup> The definition of interest in OECD Model article 11(3) expressly includes income secured by mortgage: see 25.26.5 (Definition of interest).

4. The provisions of paragraphs 1 and 3 shall also apply to the income from immovable property of an enterprise.

OECD Model Commentary provides:

3. ... Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises. ...

4. It should be noted in this connection that the right to tax of the State of source has priority over the right to tax of the other State and applies also where, in the case of an enterprise, income is only indirectly derived from immovable property. This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of an enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudice the application of domestic law as regards the manner in which income from immovable property is to be taxed.

## 23.8 Non-resident landlord scheme

### 23.8.1 Background

Section 971(1) ITA 2007 provides:

HMRC may by regulations make provision for—

- (a) the collection, from non-resident landlord representatives of a prescribed description, of prescribed amounts of income tax in respect of non-resident landlord income, and
- (b) the assessment and recovery of the income tax on or from such persons.

This is known as the non-resident landlords scheme (“NRLS”).

The regulations are the Taxation of Income from Land (Non-residents) Regulations 1995, which I abbreviate to **NRLR**. The policy of the Tax Law Rewrite was not to rewrite or update statutory instruments, so the regulations retain out of date references to the former legislation in ICTA 1988, and use the old terminology. (I add the current references in brackets).

HMRC have issued guidance which I call the “**NRLS guidance**”.<sup>21</sup>

### 23.8.2 “Non-resident landlord income”

Section 971(2) ITA 2007 provides:

“Non-resident landlord income” means income

- [a] of a person whose usual place of abode is outside the UK (“the non-resident”) and
- [b] which is or may become chargeable as the profits of a UK property business under Chapter 3 of Part 3 of ITTOIA 2005 or Chapter 3 of Part 4 of CTA 2009.

### 23.8.3 “Landlord representative”

Section 971(3) ITA 2007 provides:

“Non-resident landlord representative” means—

- (a) a person by whom any sums are payable to the non-resident which are to be treated as receipts of a UK property business (within the meaning of Chapter 2 of Part 3 of ITTOIA 2005 or Chapter 2 of Part 4 of CTA 2009) carried on by the non-resident, or
- (b) a person who acts on behalf of the non-resident in connection with the management or administration of any such business.

I refer to a person within (a) as the “**tenant**” and a person within (b) is the “**letting agent**”.

## 23.9 Non-resident landlord

### 23.9.1 Partnerships

The NRLS guidance provides:

2.2 Landlords, for the purposes of the Non-resident Landlords Scheme, include individuals, companies and trustees. In the case of partnerships, each partner is treated as a separate landlord in respect of their share of the rental income.

---

21 HMRC, “The Non-resident Landlords Scheme: Guidance notes for letting agents and tenants” (2016)

<https://www.gov.uk/government/publications/non-resident-landlord-guidance-notes-for-letting-agents-and-tenants-non-resident-landlords-scheme-guidance-notes>

### 23.9.2 *Joint owners*

The PI Manual provides:

**PIM4810 summary of the non-resident landlord scheme** [May 2020]

... For jointly owned property (e.g. husband and wife), each individual is treated as a separate landlord. It is possible for some of those landlords and not others to be NRLs for the purposes of the NRL scheme. For example it is possible for one spouse to be a NRL and within the scheme, while the other lives in the UK and is unaffected by the scheme.

The NRLS guidance provides:

**Jointly owned property**

2.7 Where a property is jointly owned and one or more of the joint owners has a usual place of abode outside the UK, the share of rental income attributable to those joint owners falls within the NRL Scheme. The share attributable to joint owners who do not have a usual place of abode outside the UK does not fall within the Scheme. For husband and wife joint-ownership cases, see paragraph 2.8 below.

### 23.9.3 *Husband and wife*

The NRLS guidance provides:

**Husband and wife joint-ownership cases**

2.8 Where a husband and wife jointly own a UK property and both have their usual place of abode outside the UK, the NRL Scheme applies to both spouses and each is treated as a separate landlord in their own right. If the husband and wife both wish to receive the rental income with no tax deducted they must each complete a separate application form and send it to HMRC (see Chapter 11 below).

In such cases, letting agents and tenants should pay rental income with no tax deducted only to the spouse(s) named on the HMRC authorities they hold. Under no circumstances should they pay with no tax deducted to a husband and wife where they hold an authority to do so for only one spouse.

But if only one of the spouses has a usual place of abode outside the UK, the NRL Scheme applies only to that spouse's share of the rental income. The rental income belonging to the UK-resident spouse is not within the Scheme and no HMRC approval is required to pay the income with no tax deducted.

### 23.9.4 *Armed forces, Crown servants*

The NRLS guidance provides:

#### **Members of HM Armed Forces and other Crown Servants**

2.9 Members of HM Armed Forces and other Crown Servants, including diplomats, are treated no differently from any other non-resident landlords. So if they receive UK rental income and have a usual place of abode outside the UK (see paragraph 2.3 above) the NRL Scheme applies to them.

2.10 If members of HM Armed Forces and other Crown Servants whose usual place of abode is outside the UK wish to receive rental income with no tax deducted, they should apply to HMRC for approval (see Chapter 11.1 below).

### **23.10 Definitions**

#### 23.10.1 “Agent”

Reg 2 NRLR provides:

In these Regulations unless the context otherwise requires—  
“agent” means a person falling within [s.42A(2)(b) ICTA = s.971(3)(b) ITA, a person who acts on behalf of the non-resident in connection with the management or administration of a UK property business”]

I use the term “**letting agent**” (following the NRLS guidance). The NRLS guidance provides:

3.5 For example, excluded persons include solicitors who do no more than:

- receive apportioned rental income or a premium in the course of a conveyance; or
- take legal proceedings for the recovery of arrears of rental income.

But solicitors who draw up a lease and collect the rent for the first period are *not* excluded persons. Whilst drawing up a lease would be the provision of a legal service, in collecting the rent the solicitor is going beyond the provision of legal services and acts as a letting agent for the purposes of the NRL Scheme.

3.6 Banks and building societies who do no more than provide an account into which rental income is paid and from which withdrawals are made are not treated as letting agents for the purposes of the NRL Scheme.

3.7 Persons who find tenants for non-resident landlords and who:

- receive fees for that service but do not handle or control any rental income; or
- handle or control income only for short periods within paragraph 3.27 below

are not treated as letting agents for the purposes of the Scheme.

The NRLS guidance provides:

### **Tenant-finders**

3.27 Some persons enter into arrangements with non-resident landlords whereby they find a tenant for the landlord's property. The tenant-finder then collects rent for a period from which he or she recovers the fee. The tenant subsequently pays rental income directly to the landlord. In such circumstances the tenant-finder does not have to operate the NRL Scheme in respect of the landlord, provided:

- the period for which rent is collected is no more than three months; and
- the tax which would be payable would be no more than £100.

### **3.28 Example 1**

Janet finds a tenant for a non-resident landlord in respect of a property rented at £500 per month. Janet collects two months' rent in order to recover her fee, £700. The tenant pays the rent direct to the landlord from the third month.

If Janet were required to operate the scheme, her tax calculation would be (see Chapter 4 below):

Rental income received	£1000
<u>Less</u> deductible expenses	<u>£700</u>
	£300
Basic Rate tax on £300	£60
(20% for 2010/11)	

As the tax is less than £100, Janet does not have to operate the Scheme.

### **3.29 Example 2**

John finds a tenant for a non-resident landlord in respect of a property rented at £2000 a year. John collects six months' rent in advance from which he recovers his fee of £500. John also pays insurance and repairs of £400.

John's tax calculation is (see Chapter 4 below):

Rental income received	£1000
<u>Less</u> deductible expenses	<u>£900</u>
	£100
Basic Rate tax on £100	£20

(20% for 2010/11)

The tax is only £20 but because John collects more than three months' rent he must operate the Scheme. He should deduct the tax of £20 and pay it with his quarterly return (see Chapter 4 below).

3.30 Where tenant-finders collect a period's rent and do not have to operate the Scheme, the non-resident landlord will receive rental income with no tax deducted for that period. Subsequently tenants will pay rent direct to the landlord and may have to operate the Scheme (see Chapter 6 below). In these circumstances it would be helpful if tenant-finders notify the tenant of his or her obligations under the NRL Scheme.

### 23.10.2 “Non-resident” (place of abode)

In these Regulations unless the context otherwise requires—  
“non-resident” means a person who has his usual place of abode outside the UK;

The place of abode matters on two occasions:

- (1) The landlord is only within the regulations if their place of abode is outside the UK.
- (2) The agent or tenant is only a prescribed person if their place of abode is in the UK.

For the meaning of the expression, see 25.21 (Usual place of abode).

### 23.10.3 “Schedule A business”

Reg 2 NRLR sends the reader on a wild goose chase:

“Schedule A business” shall be construed in accordance with subsection (8)(a) of section 42A [ICTA 1988]

Section 42A(8) was repealed in 1998: It provided that:

*This section shall have effect—*

- (a) *as if references in this section to a Schedule A business included references to any activities which would be comprised in a Schedule A business if they were carried on by an individual, rather than by a company...*

That rule was needed for the short period from 1995 when individuals were taxed on the profits of a schedule A business, but companies were still taxed under the former schedule A. Now companies are taxed on a UK property business, as individuals, this rule has no effect.

The Tax Law Rewrite replaced the expression “schedule A business” with “UK property business”, which is how the expression must now be understood.

These irritations are bound to arise under the rewrite project, under which statutes were rewritten but statutory instruments were not; but it does not ultimately matter.

#### 23.10.4 *Quarters and other time periods*

Reg 2 NRLR provides:

“annual period” means the period commencing on 1st April and ending on the following 31st March;

“quarter” means—

- (a) the period from 6th April 1996 to 30th June 1996;
- (b) any subsequent period of 3 months ending with the last day of September, December, March or June;

“year” means year of assessment.

#### 23.10.5 *“Payments to the board”*

The regulations refer to payments being made “to the Board” of HMRC. Para 169 sch 2 ITA provides:

(1) Sub-paragraph (2) applies to any references in the Taxation of Income from Land (Non-residents) Regulations 1995 (SI 1995/2902) to payments to be made to the Board in respect of tax that is or may become chargeable as the income from a business of a non-resident (as defined in those regulations).

(2) On and after 6 April 2007 those references are to be read as references to income tax to be paid to the Commissioners for Her Majesty’s Revenue and Customs in respect of non-resident landlord income (as defined in section 971(2)).

### 23.11 Prescribed persons

Reg 1(2) NRLR provides:

These Regulations shall have effect with respect to any payment<sup>22</sup> made on or after 6th April 1996 which—

- (a) constitutes income of a Schedule A [UK property] business

---

<sup>22</sup> For the meaning of payment, see 14.3 (Recognition/attribution: Analysis),

- carried on by a non-resident, and
- (b) either—
- (i) is made by a person
    - [A] falling within subsection 42A(2)(a) ICTA [= s.971(3)(a) [a tenant]
    - [B] who is a prescribed person in respect of the non-resident, or
  - (ii) is received by an agent who is a prescribed person in respect of the non-resident or by another person at the direction of that agent.

Thus being a prescribed person is a key to the application of the scheme. There are three categories of prescribed person. In order of priority:

- (1) Agent or tenant with HMRC notice
- (2) Agent without HMRC notice
- (3) Tenants without HMRC notice

### 23.11.1 *Agent/tenant has HMRC notice*

Regulation 3(1) NRLR provides:

- (1) In any case where
  - [a] a person falling within [42A(2)(a)(b) ICTA = s.971(3) ITA, an agent or tenant]
  - [b] is issued with a notice by the Board stating that he is a prescribed person for the purposes of [s.42A(1) = s.971(1) ITA] in respect of the Schedule A [UK property] business of a non-resident, or a part of that business, that person is prescribed for the purposes of subsection (1) of that section in respect of that business or, as the case may be, the part referred to in the notice.

Regulation 3(2) NRLR deals with the content of the notice:

- (2) Except where it relates to a part of a non-resident's Schedule A [UK property] business, a notice under paragraph (1) above need not specify the name of the non-resident concerned or describe his Schedule A [UK property] business.

The NRLS guidance provides:

1.17 ... Where a non-resident landlord changes letting agents, or tenants where there is no letting agent, a notice held by the old letting agent or tenant cannot be transferred to the new letting agent or tenant. The

landlord should write to Charities, Savings & International with details of the new letting agent or tenant. Charities, Savings & International will then send a notice to the new letting agent or tenant. New letting agents or tenants must deduct tax until they receive a notice from Charities, Savings & International .

### 23.11.2 *Agent without HMRC notice*

Regulation 3(3) NRLR provides:

In any case where—

- (a) no notice has been issued by the Board under paragraph (1) above in respect of a non-resident’s Schedule A [UK property] business , or there is a part of his business in respect of which no notice has been issued under that paragraph; and
- (b) a person whose usual place of abode is in the UK—
  - (i) is an agent in respect of that business or that part,
  - (ii) has power to receive income in respect of that business or that part or has control over the direction of that income, and
  - (iii) is not an excluded person,
 that person is, subject to paragraph (4) below, prescribed for the purposes of subsection (1) of section 42A in respect of that business or, as the case may be, that part.

Regulation 4 provides protection for lawyers by making them excluded persons:

- (1) In regulation 3—
  - (a) “excluded person” means an agent whose activity on behalf of the non-resident in connection with the management or administration of his Schedule A [UK property] business or part thereof (as the case may be) is confined to the provision of legal advice or legal services;

### 23.11.3 *Power to select agent*

Regulation 3(4) NRLR provides:

Where in a case falling within paragraph (3) above there is more than one person to whom sub-paragraph (b) of that paragraph applies as respects the same business or the same part of a business, the person who is the elected agent or, if there is no elected agent, the last agent is the person prescribed for the purposes of subsection (1) of section 42A

in respect of that business or, as the case may be, that part.

The NRLS guidance provides:

**Elected letting agents**

3.9 Where there is a chain of letting agents, the last letting agent and any other letting agent in the chain can jointly elect to transfer the responsibility for operating the Scheme from the last letting agent to the other letting agent making the election.

3.10 For example, ABC Ltd collects rents from tenants of a property owned by a non-resident landlord. It pays the rents to John, who is responsible for meeting the costs of repairs to the property and paying the balance of the rents into the landlord’s bank account. John is responsible for operating the Scheme because he is the last letting agent in the chain. But, if they both wish, ABC Ltd and John can jointly elect for ABC Ltd to operate the scheme.

Regulation 4 provides:

- (1) In regulation 3—
  - (b) “elected agent” means the agent who is elected jointly by the last agent and himself to assume the responsibilities of a prescribed person for the purposes of [s.42A(1) ICTA = s.971(1) ITA] in relation to the Schedule A [UK property] business or part thereof (as the case may be);

Regulation 4 then deals with procedural aspects of an election:

- (2) An election shall be made by notice to the Board signed by the last agent and the person to be elected, and any such notice shall state—
  - (a) the name and address of the agent elected, and
  - (b) the date from which the election has effect, not being a date earlier than the first day of the quarter in which the election is made.
- (3) An election may be revoked by notice to the Board given by either of the agents who made the election, and any such revocation shall have effect—
  - (a) from the first day of the quarter next following the date on which the notice is received by the Board, or
  - (b) after the expiry of 30 days following the date on which the notice is received by the Board,whichever is the later to occur.

The NRLS guidance provides:

3.11 Letting agents who wish to make an election should write to Charities, Savings & International providing the following information:

- the name and address of the elected letting agent;
- the name and address of the other letting agent;
- the name and address of the non-resident landlord or landlords; and
- the date from which the election is to take effect (the letting agents can choose this date but it cannot be earlier than the first day of the quarter in which the election is made).

The election must be signed by both letting agents making the election. They can make an election by sending in one letter signed by both parties or by writing in separately and each providing the same information. There is no special form for making an election.

3.12 Letting agents may wish to make an election in respect of only part of a landlord's rental business. They can do this by identifying the property to which the election relates.

3.13 Either letting agent may revoke the election by notice in writing to Charities, Savings & International. Such a revocation will take effect from:

- the first day of the quarter next following the date on which notice of revocation is received by Charities, Savings & International; or
- 30 days following the date on which the notice of revocation is received by Charities, Savings & International;

whichever is the later.

3.14 Where an election is revoked, Charities, Savings & International will write to both letting agents advising them of the date from which the revocation is effective.

In the absence of an election we fall back on the last agent. Regulation 4(1) defines the expression:

(1) In regulation 3—

- (c) “last agent” means the agent by whom sums constituting income from the non-resident's Schedule A [UK property] business or part thereof (as the case may be) are paid directly to the non-resident or to an agent whose usual place of abode is outside the UK or to a person who is not an agent.

#### 23.11.4 *UK tenant*

In the absence of an agent, we fall back on the tenant.

Regulation 3(5) NRLR provides:

In any case where—

- (a) no notice has been issued by the Board under paragraph (1) above in respect of a non-resident's Schedule A [UK property] business, or there is a part of his business in respect of which no notice has been issued under that paragraph;
- (b) there is no person to whom paragraph (3)(b) above applies in respect of that business or that part; and
- (c) a person whose usual place of abode is in the UK—
  - (i) is a tenant of premises owned by the non-resident in connection with that business or that part, and
  - (ii) is liable to pay to the non-resident in respect of his occupation of those premises sums exceeding in the aggregate £5,200 per annum or, where he occupies the premises for less than one year, the proportionate amount of that sum which is determined by the duration of his occupation,that person is prescribed for the purposes of subsection (1) of section 42A [= s.791 ITA] in respect of that business or, as the case may be, that part.

£5200 per annum is equivalent to £100 per week. The figure has not been increased since 1995.

The NRLS guidance provides:

1.3 ...Letting agents must operate the scheme regardless of the amount of the rent they collect - even if it is £100 a week or less.

...

6.8 Where two or more people share a property and each of them is a tenant under the lease, the £5200 limit will apply separately to each of the tenants in respect of his or her share of the rent. This is the case even though the tenants may be jointly and severally liable for all of the rent payable under the lease. Where two or more people share a property but only one of them is the tenant under the lease, the £5200 limit will apply to that person in respect of all of the rent payable under the lease.

6.9 The limit of £5200 applies in respect of each landlord. So, where tenants have several non-resident landlords, they are required to operate the Scheme only in respect of those landlords to whom they are due to pay more than £5200 a year. For example, a UK company renting six offices at £4000 a year each, from six different non-resident landlords, would not be required to operate the scheme (unless it receives a notice from Charities, Savings & International - see paragraph 6.5 above).

### 23.11.5 *Prescribed person a partnership*

Regulation 5 NRLR provides:

In any case where a liability to make any payment to the Board under these Regulations arises from amounts payable or things done in the course of a business carried on by any persons in partnership, that partnership as such shall be treated for the purposes of these Regulations as a person falling within subsection (2)(a) or (b) (as the case may be) of section 42A.

### 23.11.6 *Agent with multiple principals*

Regulation 6(1) provides:

In any case where an agent—

- (a) is a prescribed person by virtue of regulation 3 in respect of the Schedule A [UK property] business, or part thereof, of more than one non-resident,
- (b) acts on behalf of those non-residents through branches<sup>23</sup> of his business in circumstances where the average number of non-residents in each branch at the relevant time<sup>24</sup> is not less than five, and
- (c) is a person approved by the Board for the purposes of this regulation,

that person shall be treated for the purposes of these Regulations as if in respect of each branch he were a separate and distinct person.

Each branch puts in its own return. It is not clear to me why the agent should find that useful.

The rest of reg 6 deals with the procedure for application and approval:

(2) An application for approval under paragraph (1) above shall be made to the Board in a form provided or authorised by the Board which shall contain—

- (a) such information as is necessary to identify the branches

---

23 Regulation 6(11) provides a wide definition: “In this regulation ... references to branches of an agent’s business are references to the units (of whatever kind) into which the agent has divided his business.”

24 Defined reg 6(11): “In this regulation ... references to “the relevant time” are references to the time at which an application for approval is made by the prescribed person.”

- concerned,
  - (b) the number of non-residents in each branch, and
  - (c) a declaration by the prescribed person that he does not act on behalf of any non-residents other than those whose business is managed by the branches so identified.
- (3) An approval under paragraph (1) above shall, unless revoked or withdrawn, have effect for the quarter following that in which it is given and for any subsequent quarter.
- (4) An approval may be revoked by the prescribed person by notice to the Board and, subject to paragraph (5) below, such revocation shall have effect for the quarter following that in which it is given and for any subsequent quarter.
- (5) Notwithstanding the revocation of approval under paragraph (4) above, a further application for approval may be made by the prescribed person in accordance with paragraph (2) above at any time following the revocation; and paragraph (3) above shall apply accordingly in relation to an approval given in response to that application.
- (6) The Board may, by notice to the prescribed person, refuse approval where they have reason to believe that—
- (a) the average number of non-residents in each branch is less than five at the relevant time, or
  - (b) there is likely to be a failure on the part of the prescribed person to comply with the obligations imposed on him under these Regulations in relation to any branch, or
  - (c) the declaration given by the prescribed person pursuant to paragraph (2)(c) above is incorrect.
- (7) The Board may, by notice to the prescribed person, withdraw approval where they have reason to believe that—
- (a) the average number of non-residents in each branch was at the relevant time, or has since become, less than five, or
  - (b) there has been a failure on the part of the prescribed person to comply with the obligations imposed on him under these Regulations in relation to any branch, or
  - (c) the declaration given by the prescribed person pursuant to paragraph (2)(c) above was, or has become, incorrect.
- (8) The prescribed person may appeal against a notice under paragraph (6) above refusing approval, or a notice under paragraph (7) above withdrawing approval, by notice to the Board within 30 days of the date of issue of the notice of refusal or, as the case may be, the notice of withdrawal.
- (10) The tribunal shall, on an appeal notified to it, confirm the notice

of refusal or withdrawal unless . . . satisfied that it ought to be quashed.

For the procedure, see the NRLS guidance para 3.17. It does not seem of sufficient importance to set it out here.

### 23.11.7 *Agent duty to register*

Regulation 7 NRLR provides:

- (1) The person prescribed by paragraph (2) below shall, within the period of 30 days following the date specified in paragraph (3) below, register with the Board the following details—
  - (a) his name and address, and
  - (b) his tax office reference, if he has one.
- (2) The person prescribed by this paragraph is any person who is—
  - (a) an agent in respect of the Schedule A [UK property] business, or part thereof, of a non-resident, and
  - (b) a person prescribed by regulation 3 in respect of that business or that part.
- (3) The date specified in this paragraph is the date on which the agent became a person prescribed by regulation 3 in respect of that business or that part.

Registration is done by form NRL4.

## 23.12 Tax computation: Agent

The NRLS guidance provides:

1.14 The tax deducted by the letting agent or tenant is unlikely to be equal to the landlord's liability because the rules of the NRL Scheme are different from the rules for calculating the landlord's tax liability.

There are different rules for tenants and for agents. I deal with agents first, as that is the usual case.

Regulation 9(1) NRLR provides:

An agent who is a prescribed person in respect of the Schedule A [UK property] business, or part thereof, of a non-resident shall calculate for each quarter the amount of any payment to be made to the Board in respect of tax which is or may become chargeable on the income from that business or that part.

Regulation 9(2)(3) explains the computation:

- (2) The amount of the payment to be calculated is the amount of tax at the basic rate on the amount which results after deducting from the income specified in paragraph (3) below—
- (a) the expenses specified in paragraph (4) below, and
  - (b) any excess amount of expenses falling to be deducted from that income in accordance with paragraph (5) below.
- (3) The income specified is all income which falls to be treated as a receipt of that business or that part, other than income specified in regulation 8(3), and which either—
- (a) was received by the prescribed person in the quarter concerned, or
  - (b) was income which it was in his power to receive or over whose direction he had control but which was paid at his direction to another person in that quarter without being received by him.

The exception in reg 8(3) NRLR relates to non-resident companies with a UK branch within the scope of CT:

- The income specified in this paragraph is any income which—
- (a) is attributable to a branch of the non-resident in the UK, and
  - (b) is chargeable to corporation tax.

### 23.12.1 *Rental income*

The NRLS guidance provides:

9.3 Letting agents and tenants should take into account all rental income received or paid in the quarter notwithstanding that it relates to rent due for an earlier, or later, period. Letting agents and tenants should not calculate tax for a quarter on rental income that fell due in the quarter but was not paid in the quarter.

...

#### **When is rental income received or paid?**

9.5 Letting agents receiving rental income by cheque receive the income on the day the cheque is paid into their bank account, and *not* on the day it is cleared. But if the cheque is subsequently dishonoured they should not take the amount into account in their calculation of tax due.

9.6 Tenants paying rental income by cheque make the payment on the day they send the cheque to the landlord and *not* on the day the cheque is cashed or cleared. But if the cheque is subsequently dishonoured they should not take the amount into account in their calculation of tax due.

#### **Examples of rental income**

9.7 Rental income includes a wide variety of receipts arising from land

and property. In particular, rental income includes:

- income from letting furnished, unfurnished, commercial and domestic premises, and from any land;
- where property is let furnished, any separate sums from the tenant for the use of the furniture;
- rent charges, ground rents and feu duties;
- premiums and other similar lump sums received on the grant of certain leases (see paragraph 9.8 below);
- income arising from the grant of sporting rights, such as fishing and shooting permits;
- income arising from allowing waste to be buried or stored on land;
- income from letting others use land - for example, where a film crew pays to film inside a person's house or on their land;
- grants received from local authorities or others contributing to expenditure which is an allowable expense (see Chapter 10 below) such as repairs to a let property;
- rental income received through enterprise investment schemes;
- income from caravans or houseboats where these are not moved around various locations;
- insurance recoveries under policies providing cover against non-payment of rent;
- service charges received from tenants in respect of services ancillary to the occupation of property (other than those falling within Section 42 of the Landlord & Tenant Act 1987 - see below).

Section 42 of the Landlord & Tenant Act 1987 requires that where the tenants of *two or more* dwellings contribute to the same costs by the payment of service charges, those charges shall be held upon trust for the contributing tenants. This means that the charges are not, at that stage, the income of the landlord and, as such, are not rental income for the purposes of the NRL Scheme. But once sums are paid out by the trustee (usually the letting agent) for service charges, then agents should treat those sums as the rental income of the landlord and consider whether they are 'deductible expenses' or not.

### **Premiums**

9.8 Lump sums received up front for the grant of a lease of 50 years or less are liable to income tax. Such receipts are generally called 'premiums'. They are treated wholly or partly as rental income.

[The guidance summarises the lease premium rules]

...

### **Income which is not rental income**

9.11 There are certain receipts arising out of the use of land that are not

rental income. These include:

- income from woodlands managed on a commercial basis;
- income from the types of concerns listed below
  - mines and quarries (including gravel pits, sand pits and brickfields),
  - ironworks, gasworks, salt springs or works, alum mines or works and water works and streams of water,
  - canals, inland navigations, docks, and drains or levels,
  - rights of markets and fairs, tolls, bridges and ferries,
  - railways and other ways,
  - lettings of tied premises by traders, and
- income which arises in the course of carrying on a trade such as running a hotel.

### 23.12.2 Expenses

Deduction is allowed for expenses paid by the agent. Regulation 9(4) NRLR provides:

The expenses specified are all amounts paid in the quarter by the prescribed person or by another person at the direction of the prescribed person that—

- (a) the prescribed person is reasonably satisfied are deductible expenses, and
- (b) in relation to financing costs,<sup>25</sup> where the prescribed person elects, do not exceed the financing costs allowance.

The NRLS guidance provides:

#### **‘Reasonably be satisfied’**

10.2 HMRC does not expect letting agents and tenants to be tax experts in order to operate the Non-resident Landlords Scheme. The test is that an expense should be deducted only where the letting agent or tenant can ‘reasonably be satisfied’ that it is allowable in computing the profits of the landlord’s rental business. This provides protection for letting agents and tenants in two ways:

- where letting agents and tenants have reason to be uncertain whether an expense is an allowable expense of the non-resident landlord’s

---

<sup>25</sup> Regulation 9(10) NRLR provides: “(10) For the purposes of this regulation, “financing costs” and “the financing costs allowance” have the meanings given in regulation 9A(5).”

- rental business, they are justified under the rules in not deducting it when computing the tax due; and
- where letting agents and tenants can reasonably be satisfied that an expense is an allowable expense of the non-resident landlord's rental business, they can deduct the expense without fear of being penalised if it is later found that the expense is not in fact allowable.
- 10.3 Letting agents and tenants cannot reasonably be satisfied that an expense is allowable in computing the profits of the landlord's rental business merely because the landlord says that it is allowable. If they have reason to believe it may not be an allowable expense they should not deduct it.

There is provision to carry back excess expenses:

(5) Where in any quarter in an annual period the expenses specified in paragraph (4) above exceed the income specified in paragraph (3) above—

- (a) the amount of the excess shall first be deducted from the income specified in paragraph (3) above for previous quarters in that annual period, taking later quarters before earlier quarters, and

Failing that, there is provision for carry-forward of excess expenses:

- (b) any balance remaining of that amount shall be carried forward and deducted from the income specified in paragraph (3) above for subsequent quarters, including quarters after the end of that annual period, taking earlier quarters before later quarters.

The NRLS guidance give some examples:

#### 4.11 Example: carry back

ABC Ltd, a letting agent, acts for a non-resident landlord, Juan. In the quarter to 30 September 2010 it receives rental income of £2000 and pays deductible expenses of £500. In the quarter to 31 December 2010 it receives rental income of £2000 and pays deductible expenses of £3000. ABC Ltd's calculation for the quarter to 31 December 2010 is as follows:

##### Quarter to 31.12.10

Rental income received	£2000
<u>Less deductible expenses paid</u>	<u>£3000</u>
Excess expenses	(£1000)

ABC Ltd should set off the excess expenses against rental income received in the quarter immediately before the quarter to 31 December

2010, that is the quarter to 30 September 2010. Its revised calculation for that quarter will then be:

**Quarter to 30.9.10**

Rental income received	£2000
<u>Less deductible expenses paid</u>	<u>£500</u>
<u>Less excess expenses brought back from quarter to 31.12.10</u>	<u>£1000</u>
Revised net income on which basic rate tax is due	<u>£500</u>

ABC Ltd will have paid tax of £300 for the quarter to 30 September 2010 ((£2000 - £500) @ 20%).

Paragraph 4.14 below describes how to recover the repayable amount.

**4.12 Example: carry forward**

ABC Ltd, a letting agent, receives £2000 rental income for a non-resident landlord, Juanita, in the quarter ending on 30 June 2010 and pays £3000 deductible expenses. In the quarter to 30 September 2010 it receives £500 and pays no expenses.

**Quarter to 30.6.10**

Rental income received	£2000
<u>Less deductible expenses paid</u>	<u>£3000</u>
Excess expenses	(£1000)

ABC Ltd cannot carry back the excess expenses because carry back is restricted to earlier quarters in the same year to 31 March.

**Quarter to 30.9.10**

Rental income received	£500
<u>Less excess expenses brought forward</u>	<u>£1000</u>
Balance of excess expenses available to	
ABC Ltd to carry forward	(£500)

4.13 Letting agents must not deduct excess expenses paid for one landlord from the rental income of another landlord. In the above examples, ABC Ltd cannot deduct excess expenses paid for Juanita from Juan's rental income.

Carry back allows a reclaim of withholding tax:

(6) Where an amount paid by a prescribed person in a previous quarter becomes repayable as a result of an excess amount being deducted from income pursuant to paragraph (5)(a) above, the amount repayable—

- (a) shall first be set off by the prescribed person against payments due under this regulation in respect of other non-residents in respect of whose Schedule A [UK property] business or part thereof he is a prescribed person for the quarter in which the excess amount arises, and

- (b) any balance remaining shall, on a claim being made to the Board by the prescribed person, be repaid to him.

The NRLS guidance give some examples:

**4.15 Example 1**

	<u>Landlord A</u>	<u>Landlord B</u>
<b>Quarter to 30.6.10</b>		
Rental income	£1000	£2000
<u>Less deductible expenses</u>	<u>£200</u>	<u>£1000</u>
	£800	£1000
Basic Rate tax (20% for 2010/11)	£160	£200
Total tax payable (£160 + £200)	<u>£360</u>	
<b>Quarter to 30.9.10</b>		
Rental income	£1000	£2000
<u>Less deductible expenses</u>	<u>£1500</u>	<u>£1400</u>
	(£500)	£600
Basic Rate tax (20% for 2010/11)	Nil	£120
Excess expenses carried back	£500	

When the letting agent carries back the excess expenses of £500 to quarter 1, his tax liability for quarter 1 will be reduced by £100 (£500 @ 20%).

He can set off this £100 against the tax calculated for quarter 2, £120. This leaves £20 (£120 less £100) payable.

**4.16 Example 2**

	<u>Landlord A</u>	<u>Landlord B</u>
<b>Quarter to 30.6.10</b>		
Rental income	£1000	£2000
<u>Less deductible expenses</u>	<u>£600</u>	<u>£1000</u>
	£400	£1000
Basic Rate tax (20% for 2010/11)	£80	£200
Total tax payable (£80 + £200)	<u>£280</u>	
<b>Quarter to 30.9.10</b>		
Rental income	£1000	£2000
<u>Less deductible expenses</u>	<u>£1200</u>	<u>£1950</u>
	(£200)	£50
Basic Rate tax (20% for 2010/11)	Nil	£10
Excess expenses carried back	£200	

When the letting agent carries back the excess expenses £200 to the earlier quarter, his tax liability for that quarter will be reduced by £40 (£200 @ 20%).

He can set off this £40 against the tax calculated for the quarter to

30.9.10, £10. This leaves £30 repayable. The letting agent should show £30 as repayable on his form NRLQ for the quarter to 30.9.10 and the Accounts Office will repay £30.

The rest of the regulation deals with minutiae of a repayment claim:

(7) A claim under paragraph (6)(b) above (“a repayment claim”) shall be made in a quarterly return under regulation 10.

(8) An appeal from the Board’s decision on a repayment claim shall be brought by giving notice to the Board within 30 days of receipt of notice of the decision.

(9) All such assessments, payments and repayments shall be made as are necessary to give effect to the Board’s decision on a repayment claim or to any variation of that decision on appeal.

### 23.12.3 *Financing costs election*

The background can be found in

- HMRC Policy paper, “Income tax: Changes to the regulations for the Non-residents Landlord Scheme”<sup>26</sup>
- a Guidance note (“the 2020 changes guidance note”)<sup>27</sup>

Regulation 9A NRLR provides:

(1) This regulation applies where an election is made under regulation 9(4)(b).

(2) The election—

- (a) must be notified to Her Majesty’s Revenue and Customs with the annual return which relates to the first quarter to which the election applies, and
- (b) is irrevocable.

(3) Where in any quarter in an annual period, the financing costs that the prescribed person is reasonably satisfied are deductible expenses exceed the financing costs allowance, the amount of the excess is carried forward and treated as financing costs in the next quarter, including a quarter after the end of that annual period.

---

<sup>26</sup> <https://www.gov.uk/government/publications/income-tax-changes-to-the-regulations-for-the-non-residents-landlord-scheme/income-tax-changes-to-the-regulations-for-the-non-residents-landlord-scheme> (2020).

<sup>27</sup> <https://www.gov.uk/government/publications/income-tax-changes-to-the-regulations-for-the-non-residents-landlord-scheme/guidance-note> (2020).

(4) Where in any quarter in an annual period, the financing costs allowance exceeds the financing costs that the prescribed person is reasonably satisfied are deductible expenses, the amount of the excess (“the unused allowance”) is carried forward and included in the financing costs allowance in the next quarter, including a quarter after the end of that annual period.

(5) For the purposes of this regulation—

“financing costs” has the meaning given in section 544(4) and (5) of the Corporation Tax Act 2010, but in applying subsection (5) the reference to “accounting period” is to be read as a reference to “annual period”; “the financing cost allowance” for a quarter is the sum of—

(a) an amount equal to 30% of the relevant amount for that quarter, and

(b) the unused allowance for the previous quarter;

“the relevant amount” for a quarter is the greater of—

(a) zero, and

(b) the difference of I-OE,  
where—

I is the amount of income for that quarter specified in regulation 9(3), and

OE is the amount of expenses for that quarter specified in regulation 9(4) other than financing costs.<sup>28</sup>

(6) For the purposes of this regulation and regulation 9, in applying the definition of “deductible expense”, the reference to the Tax Acts is to be treated as not including Part 10 of the Taxation (International and Other Provisions) Act 2010 (corporate interest restriction).

The 2020 changes guidance note provides:

Once non-UK resident company landlords become chargeable to Corporation Tax from 6 April 2020, Corporate Interest Restriction at Part 10 of TIOPA will apply to them.

---

28 Reg 6 Taxation of Income from Land (Non-residents) (Amendment) Regulations 2020 is a transitional provision:

“(1) Where an election is made under regulation 9(4)(b) of the principal Regulations, inserted by regulation 4(a) of these Regulations, financing costs attributable to any time before 6th April 2020 may be included as a deductible expense but must not be taken into account in determining the extent, if any, to which financing costs exceed the financing costs allowance for any quarter in an annual period.

(2) The amount of financing costs attributable to any time before 6th April 2020 must be determined on a just and reasonable basis.”

These rules apply a cap to the amount of financing costs that can be deducted from rental income...

These rules also apply to those non-UK resident company landlords that have an amount withheld on account of tax from their rents under the Non-residents Landlord Scheme. Corporate Interest Restriction is complex and being reasonably satisfied about its application may require an agent to obtain information about the non-UK resident company landlord and its funding arrangements.

Some agents would be able to apply Corporate Interest Restriction but many others may not. For those agents that have difficulties in applying Corporate Interest Restriction, the existing Regulations would typically prevent a deduction for financing costs paid by the agent which would increase the amount to be withheld on account of tax.

Consequently, the non-UK resident company landlord would file a company tax return to directly claim a deduction for its financing costs, resulting in a refund of tax, and increasing the administrative burden on both HMRC and non-UK resident company landlords.

To avoid this, a simpler alternative to Corporate Interest Restriction is provided to enable the agent to calculate the financing cost deduction which is limited to a fixed allowance (30%) of the UK rental income, net of deductible expenses other than financing costs. Any unused allowance may be carried forward from one quarter period to the next. Any unused financing costs above the allowance may also be carried forward. It is to be subject to an irrevocable election which is made by the agent.

The rule does not apply to rental income paid by a tenant who is a prescribed person to non-UK resident company landlords since tenants are in a different position under the Regulations.

The non-UK resident company landlord must check whether the amount withheld on account of tax under the Non-residents Landlord Scheme Regulations actually meets its underlying Corporation Tax liability in respect of its UK property income.

### **Chapter 3: How the alternative Corporate Interest Restriction rule works**

#### **3.1 Being reasonably satisfied and Corporate Interest Restriction**

The financing costs of a non-UK resident company landlord will be subject to the corporation tax rules on deductibility of financing costs. In particular, the Corporate Interest Restriction rules may give agents who are prescribed persons reason to be uncertain as to whether financing costs (as a non-trade loan relationship deficit) can be set against the profits of the UK property business of the non-UK resident company landlord, and, therefore, whether they may be deducted in determining the amount to withhold under the Non-residents Landlord Scheme.

It is recognised that Corporate Interest Restriction can be complex and further that it may require agents to obtain information from non-UK resident company landlords to be reasonably satisfied that financing costs are not restricted by Corporate Interest Restriction, or if restricted, by what amount. The test that is applied here is one of reasonable satisfaction.

This guidance does not seek to be prescriptive in what constitutes reasonable satisfaction. However, in getting to a position of reasonable satisfaction an agent may make judgements as to the likely position of a non-UK resident company landlord provided that the agent takes reasonable steps to test such judgements, and that the agent does not have

knowledge to the contrary.

For instance, agents may make judgements as to the likely application of the de minimis limit in the Corporate Interest Restriction rules taking into account the amount of rental income, the nature of the investment in UK property by, and the investment profile of, the non-UK resident company landlord.

Where agents do not have enough information to be reasonably satisfied that there will not be a restriction under Corporate Interest Restriction, or cannot determine the amount of the restriction, they cannot be reasonably satisfied that the expense is a “deductible expense” and no deduction of the financing costs is permitted.

Agents may choose, instead, to make an irrevocable election to use the alternative rule for Corporate Interest Restriction for the purpose of the Non-residents Landlord Scheme. When bringing financing costs into account under the alternative rule agents must still be reasonably satisfied that the costs would be deductible for the non-UK resident company landlord if Corporate Interest Restriction were to be disregarded.

### 3.2 How to make an election

The election can only be made by the prescribed person who:

- is an agent of the non-UK resident company landlord, where either:
- the agent has paid financing costs in the quarter, or
- financing costs have been paid in the quarter by another person at the direction of the agent

The election is irrevocable. It must be notified to HMRC with the annual return that the agent sends to HMRC for the annual period which relates to the first quarter to which the election applies.

### 3.3 How the alternative to Corporate Interest Restriction works

In all of the following, it is assumed that the agent is reasonably satisfied that the financing costs are tax-deductible, ignoring the effect of Corporate Interest Restriction. The maximum amount of financing costs that can be deducted (“the financing costs allowance”) when calculating the amount to withhold for a particular quarter is calculated as follows:

#### Step 1:

Apply the following calculation:

$$30\% \times (I - OE)$$

where:

‘I’ is rental income in that quarter, and ‘OE’ is total of all deductible expenses for that quarter, other than financing costs.

#### Step 2:

Add the amount of any unused allowance brought forward from the last quarter to the sum of the above calculation. The result is the financing costs allowance for the quarter. If the financing costs paid out in a quarter are less than the financing costs allowance, then the full amount of the financing costs can be deducted in that quarter. If there are restricted financing costs that have been carried forward to the quarter, these are added to the financing costs of this quarter when working out the amount of financing costs to deduct and any amount which may be restricted.

If the total financing costs exceed the financing costs allowance, the amount to be deducted in that quarter is capped at the maximum of the financing costs allowance.

### 3.4 Unused financing costs allowance

Where the financing costs allowance for a quarter is greater than the amount of the financing costs in that quarter, the difference between the two, the unused allowance, is carried forward to the next quarter and added at Step 2 of the calculation to give the financing costs allowance for that next quarter.

### 3.5 What happens to excess financing costs

To the extent that the amount of financing costs in a quarter is more than the financing costs allowance for that quarter, the excess amount, that is the amount restricted which the agent cannot take into account, is carried forward to the next quarter and added to the financing costs paid out in that quarter.

The calculation shown above at 3.3 is then applied to this total amount to work out the amount of financing costs that can be deducted from the rents in that quarter.

The restricted amount of financing costs cannot be carried back to earlier quarters.

To the extent that the amount of financing costs in a quarter falls within the financing costs allowance, but the agent cannot take them into account against the rental income of that quarter, the agent can take them into account under regulation 9(5).

### 3.6 Example (John)

J, an agent, acts for a non-UK resident company landlord, ABC Ltd, and elects to apply the alternative financing costs rule.

- in the quarter to 30 June 2020, J collects rental income of £2,000 and pays financing costs of £600 and other expenses of £500 out of those rents.
- in the quarter to 30 September 2020, J receives rental income of £2,000 and pays financing costs of £400 and other expenses of £100.
- in the quarter to 31 December 2020, J receives rental income of £3,000 and pays financing costs £100 and other expenses of £100.
- in the quarter to 31 March 2021, J receives rental income of £500 and pays financing costs £600 and other expenses of £500.

J is reasonably satisfied that all expenses are tax-deductible, ignoring the effect of Corporate Interest Restriction. It is also assumed that there are no financing costs attributable to any time before 6 April 2020.

#### Quarter to 30 June 2020

The amount of financing costs that can be deducted by J in the quarter to 30 June 2020 is as follows:

Restricted financing costs brought forward (N/A)	£0
Financing costs paid out	£600
Total financing costs for the quarter	£600
Rental income received (I)	£2,000
Less deductible expenses paid, other than financing costs (OE)	(£500)
Net amount of income (I-OE)	£1,500
Initial financing costs allowance calculation ( $30\% \times £1,500$ )	£450
Unused financing costs allowance brought forward	£0
Financing costs allowance for the quarter	£450
Financing costs allowance used for the quarter	£450
Unused financing costs allowance carried forward	£0

The maximum amount of financing costs that can be deducted in the quarter to 30 June

2020 is £450. The remaining £150 of the financing costs that were paid out will be carried forward to the next quarter and added to the financing costs for that quarter.

J's calculation of the amount to withhold for the quarter to 30 June 2020 is as follows:

Rental income received	£2,000
Less deductible expenses (other than financing costs)	(£500)
Total chargeable profits for the quarter	£1,500
Less financing costs	(£450)
Net amount on which basic rate tax is applied	£1,050
Tax withheld $£1,050 \times 20\%$	£210
Restricted financing costs carried forward to the next quarter (£600 – £450)	£150
Unused financing costs allowance carried forward	£0

### Quarter to 30 September 2020

The amount of financing costs that can be deducted by J in the quarter to 30 September 2020 is as follows:

Restricted financing costs brought forward	£150
Financing costs paid out	£400
Total financing costs for the quarter	£550
Rental income received (I)	£2,000
Less deductible expenses paid, other than financing costs (OE)	(£100)
Net amount of income (I–OE)	£1,900
Initial financing costs allowance calculation ( $30\% \times £1,900$ )	£570
Unused financing costs allowance brought forward	£0
Financing costs allowance for the quarter	£570
Financing costs allowance used for the quarter	£550
Unused financing costs allowance carried forward	£20

Since the financing costs allowance is more than the sum of the financing costs for the quarter, the deduction is allowed for the full amount of financing costs (£550). The unused financing costs allowance £20 (£570 less £550) is carried forward to the next quarter.

J's calculation of the amount to withhold for the quarter to 30 September 2010 is as follows:

Rental income received	£2,000
Less deductible expenses (other than financing costs)	(£100)
Total chargeable profits for the quarter	£1,900
Less financing costs	(£550)
Net amount on which basic rate tax is applied	£1,350
Tax withheld $£1,350 \times 20\%$	£270
Restricted financing costs carried forward to the next quarter	£0
Unused financing costs allowance carried forward	£20

### Quarter to 31 December 2020

The amount of financing costs that can be deducted by J in the quarter to 31 December 2020 is as follows:

Restricted financing costs brought forward	£0
Financing costs paid out	£100
Total financing costs for the quarter	£100

Rental income received (I)	£3,000
Less deductible expenses paid, other than financing costs (OE)	(£100)
Net amount of income (I-OE)	£2,900
Initial financing costs allowance calculation ( $30\% \times £2,900$ )	£870
Unused financing costs allowance brought forward	£20
Total financing costs allowance for the quarter	£890
Financing costs allowance used for the quarter	£100
Unused financing costs allowance carried forward	£790

Since the total financing costs allowance available for the quarter is more than the sum of the financing costs for the quarter, the deduction is allowed for the full amount of financing costs (£100). The unused financing costs allowance of £790 is carried forward to the next quarter.

J's calculation of the amount to withhold for the quarter to 31 December 2020 is as follows:

Rental income received	£3,000
Less deductible expenses (other than financing costs)	(£100)
Total chargeable profits for the quarter	£2,900
Less financing costs	(£100)
Net amount on which basic rate tax is applied	£2,800
Amount withheld $£2,800 \times 20\%$	£560
Restricted financing costs carried forward to the next quarter	£0
Unused financing costs allowance carried forward	£790

### Quarter to 31 March 2021

The amount of financing costs that can be deducted by J in the quarter to 31 March 2021 is as follows:

Restricted financing costs brought forward	£0
Financing costs paid out	£600
Total financing costs for the quarter	£600
Rental income received (I)	£500
Less deductible expenses paid, other than financing costs (OE)	(£500)
Net amount of income (I-OE)	£0
Initial financing costs allowance calculation for the quarter ( $30\% \times £0$ )	£0
Unused financing costs allowance brought forward	£790
Total financing costs allowance for the quarter	£790

Since the rental income for this period is reduced to zero by the other specified expenses, there is no amount on account of tax to withhold and the initial calculation of the amount of financing costs allowance for this quarter is nil.

However, because it is possible to carry forward unused financing costs allowance, the financing costs allowance for the quarter is £790. J can apply the financing costs allowance brought forward to the amount of financing costs paid in the quarter so that the financing costs become specified expenses for the purposes of regulation 9(4) of the Non-residents Landlord Scheme Regulations.

Financing costs allowance for the quarter	£790
Financing costs allowance used for the quarter	£600
Unused financing costs allowance carried forward	£190

Because there is now an excess of specified expenses above the specified income for this quarter, J can deduct this excess from the income of the previous quarter under regulation 9(5) and claim a repayment when he sends in his quarterly return. The amount of unused financing costs allowance to carry forward to the quarter to 30 June 2021 is reduced to £190.

The revised figures for the quarter to 31 December 2020 become:

Rental income received	£3,000
Less deductible expenses (other than financing costs)	(£100)
Total chargeable profits for the quarter	£2,900
Less unrestricted financing costs as before	(£100)
Net amount on which basic rate tax is applied	£2,800
Less excess specified expenses carried back	£600
Updated net amount on which basic rate tax is applied	£2,200
Amount withheld $£2,200 \times 20\%$	£440
Amount previously withheld	£560
Repayment due	£120

Note that the costs carried back under regulation 9(5) are simply deducted against the rental income for the period. There is no need to recalculate the financing costs allowance for the quarter to 31 December 2020. Nor is there any need to include the costs carried back to 31 December 2020 in the tested amount of financing costs for the quarter ended 31 December 2020.

If these circumstances had arisen in the following quarter (quarter to 30 June 2021), any excess of specified expenses could only be carried forward to the next quarter because the quarter ended 31 March 2021 is in a different annual period to the annual period in which the quarter to 30 June 2021 falls. Under regulation 9(5) it is not possible to carry back an amount of specified expense to a quarter period of a different annual period.

When J sends the annual return to HMRC for the annual period ended on 31 March 2021, he must tell HMRC that he has made the election under regulation 9A to use the alternative financing costs rule. He must continue to use the alternative financing costs rule in the next annual period and so on.

### 23.13 Tax computation: Tenant

If, exceptionally, the agent is not the prescribed person, we turn to reg 8 NRLR which deals with tenants. Regulation 8(1) is the equivalent of regulation 9(1) set out above:

A person falling within [s.42A(1)(a) ICTA = s.971(3)(a) ITA, the tenant] who is a prescribed person in respect of the Schedule A [UK property] business, or part thereof, of a non-resident shall calculate for each quarter the amount of any payment to be made to the Board in respect of tax which is or may become chargeable on the income from that business or that part.

Regulation 8(2) NRLR explains the computation:

The amount of the payment to be calculated by that person is the amount of tax at the basic rate on the aggregate of all income which falls to be treated as a receipt of that business or that part, other than income specified in paragraph (3) below, and which either—

- (a) was paid by him in the quarter to the non-resident, or
- (b) was paid by him in the quarter to a person other than the non-resident, not being a payment which he can reasonably be satisfied is a deductible expense.<sup>29</sup>

It is usually better to appoint an agent as prescribed person as:

- (1) Withholding tax is (in short) limited to net profits rather than gross rent.
  - (2) There is provision for carry forward and back of excess expenses.
- In any case, tenants will not normally want to take on the duty of payment and quarterly returns.

The NRLS provides some examples:

#### 7.4 Example 1

Joan is due to pay rent of £1600 per quarter to a non-resident landlord. In the quarter to 30 September 2010 she can manage to pay only £1000. As the calculation is based on rental income paid (not due), her calculation for the quarter is:

Rental income paid	£1000
Basic Rate tax on £1000 (20% for 2010/11)	<u>£200</u>
	<u>£800</u>

As a result Joan pays £800 to the non-resident landlord and £200 to HMRC.

#### 7.5 Example 2

Jack pays rental income of £1500 per quarter to a non-resident landlord. In the quarter to 30 June 2010 the landlord tells him to pay £400 to a third party in settlement of a loan (which is not a deductible expense) and to pay the £1100 balance to the landlord.

Jack's calculation for the quarter to 30 June 2010 is:

---

<sup>29</sup> Regulation 2 NRLR provides a commonsense definition: “deductible expense” means, subject to regulation 9A(6),

[1] an expense which is deductible under the Tax Acts in computing the profits or gains of a non-resident's Schedule A [UK property] business or

[2] or is capable of being offset against those profits under the Tax Acts”.

Rental income paid to landlord	£1100
<u>Plus</u> rental income paid away to third party at landlord's direction	<u>£400</u>
	<u>£1500</u>
Basic Rate tax on £1500 (20% for 2010/11):	<u>£300</u>

### 7.6 Example 3

Julie pays rental income of £1500 per quarter. In the quarter to 30 September 2010 she pays out

- £200 for plumbing repairs;
- £100 to a third party, on the instruction of her landlord, in settlement of a loan (which is not a deductible expense); and
- £1200 direct to her landlord.

As the plumbing repairs are a deductible expense (see Chapter 10 below) but the settlement of the loan is not, Julie's calculation will be:

Rental income paid to landlord	£1200
Plus rental income paid to third parties, where the payment is not a deductible expense	<u>£100</u>
	<u>£1300</u>
Basic Rate tax on £1300 (at 20% for 2010/11):	<u>£260</u>

## 23.14 Returns and administration

### 23.14.1 HMRC letters to tenants

In August 2019 HMRC sent questionnaires to tenants of property owned by overseas companies. CIOT have published the following Q&A:

**1. It is unclear why HMRC would send this letter and the list of questions to a tenant, as it would seem unlikely the tenant would know the answers to many of the questions (particularly the ones about trusts).**

The letter and questionnaire have been designed to gather information to ensure the correct tax is paid. This includes situations where the tenant may be connected to the offshore entity. In those cases, we would expect the tenant to know the answers to many of the questions asked. The tenant should reply "not known" if they do not know the information.

**2. It is unclear why the tenant is being asked to provide their personal details (NINO and UTR, email address and telephone number for example). Perhaps the form should caveat that not all this personal information is a requirement/it is voluntary.**

The information requested from tenants is required to ensure HMRC can accurately confirm the identity of the tenants and ensure we have the most up-to-date contact details on file. As the tenant may have personal responsibility for deducting tax on the rents paid, it is important that HMRC has the most up-to-date and accurate information.

**3. It would appear that there is no legal obligation on the tenant to respond to the letter and questionnaire. Would HMRC confirm this to be the case, or not?**

There is no legal obligation to respond to the letter and questionnaire but the response will enable HMRC to help the tenant if further action is required or to quickly tell them that no further action is required.

**4.If the tenant is unable or unwilling to complete the questionnaire, would a letter providing the information they know about the tenancy suffice?**

Absolutely. We are asking the questions to help work out whether the correct tax has been paid. Any and all information (regardless of its form) will assist us with this.

**5. A tenant who receives this letter may be worried about how to respond particularly if they do not have enough information or knowledge to answer the questions. Perhaps the letter could have included wording such as “we recognise that you may not be able to answer all the questions we have asked. Please supply the information requested to the best of your ability and knowledge”.**

Throughout the letter, we offer support to occupants to help them understand this complicated area of taxation and how it might impact upon them, depending on the circumstances of their rental or occupancy arrangement. Contact details are provided for any occupants who require further information or support in responding to the letter which they have received. The helpline number to call is 03000 554444.

**6. The wording at the end about errors and penalties could alarm the recipient especially if they are not able to answer all the questions.**

It is not our intention to cause distress, we are simply asking occupants of the property to provide information to enable HMRC to ensure the correct amount of tax is paid.

We would not look to charge a penalty if mistakes have been made in the completion of the form attached to the letter to tenants. The penalties mentioned in the letter to tenants are only relevant to situations where the tenant has chosen not to deduct tax at the right time or neglected to do so.

The tenant should answer the questions to the best of their knowledge. If they have any questions or need help, they can phone us on the dedicated helpline.

**CIOT follow-up comment:** In the perhaps less common situation where there is no letting agent, a third party tenant wholly unconnected to the non-resident landlord may have no knowledge, or means of establishing that deduction of tax is required. In such cases the tenant cannot be said to have chosen not to deduct tax or necessarily have been neglectful in doing so.

It is recognised that if there is no agent, and subject to the de minimis (of an annual rent of £5200 or less), the tenant must withhold basic rate tax and account to HMRC quarterly unless the property owner applies to HMRC for permission to receive income gross. However, we suspect that few tenants, especially those who have no connection with the landlord beyond that of the landlord/tenant relationship, are likely to become aware of these obligations. It is difficult to see, in practical terms, how they might become aware that these obligations exist. The GOV.UK guidance on ‘Landlord and tenant rights and responsibilities in the private rented sector’ makes no reference to the tax obligations of tenants (except for council tax).

We recognise that there is tax guidance on GOV.UK for Paying tax on rent to landlords abroad . However, there is nothing to point a tenant to that guidance. It was last published

in December 2014. There does not appear to have been any efforts to alert tenants to their obligations in advance of the ‘nudge’ letters and the potential imposition of penalties for failure to meet those obligations that may arise as a consequence of the letters.

### **HMRC Further Response**

We would reiterate that the penalties mentioned in the letter to tenants are only relevant to situations where the tenant has chosen not to deduct tax at the right time or neglected to do so. Therefore, whilst the technical position regarding penalties is correct, we have decided to remove the reference to penalties in any future letters to avoid causing any potential distress to the majority of tenants who have made genuine mistakes. Tenants who didn’t make a genuine mistake may still be liable to a penalty.

**7. The tenant may decide to seek professional advice before answering the letter (particularly given the threat of penalties). It might help to mention that if they have an agent, they might want to show it to their agent before responding.**

Customers are always advised to consult tax specialists on any areas of tax with which they are not familiar to ensure they are complying with their tax obligations...

**9. What action will HMRC be taking where no response is received to the letter?**

Where we have had no response from either the tenant or the landlord, our process is to register the property for the ATED charge and to issue the offshore company with a tax determination. The company is liable for this tax demand, not the tenant, however if tenants have any concerns at all they should contact the helpline provided.

**10. What are HMRC intending to do with the information provided by tenants? There is some misgiving amongst our members that the information requested might be used for more than the stated purpose of checking whether tax should be deducted from rents paid.**

It is HMRC’s role to ensure that everyone pays the tax they owe to ensure the continued funding of the UK’s vital public services. In some cases, the tenants we have contacted may have a beneficial interest in the property which they are renting, requiring follow up activity to understand the tenant’s situation in relation to the offshore landlord/company.

**11. Are any further mailings planned, and if so, when?**

HMRC regularly sends letters to customers to educate, remind or prompt them to review their tax affairs, particularly where we have information that suggests there are specific risks to the payment of tax owed.

This is a commonly-used and targeted compliance approach which forms part of HMRC’s Promote, Prevent, Respond strategy and has been positively received by many of our customers in helping them ensure their tax affairs are correct and the correct amount of tax is paid on time...<sup>30</sup>

## 23.14.2 *Quarterly returns*

Regulation 10 NRLR provides:

(1) In the circumstances specified in paragraph (2) below and within 30

---

<sup>30</sup> <https://www.tax.org.uk/policy-technical/technical-news/corporate-non-resident-landlords-compliance-letter-tenants>

days after the end of a quarter, a prescribed person shall make a return to the Board, in such form as the Board may prescribe, containing the information specified in paragraph (3) below and the declaration specified in paragraph (4) below.

(2) The circumstances specified are where—

- (a) an amount is payable by the prescribed person in respect of the quarter, calculated in accordance with regulation 8 or 9 as the case may be, or
- (b) a repayment of tax is due under regulation 9(6)(b), or
- (c) the Board have issued a notice to the prescribed person requiring a return to be made in respect of that quarter.

(3) The information specified is—

- (a) the name and address of the prescribed person;
- (b) where the prescribed person is a person falling within [s.42A(2)(a) ICTA = s.971(3)(a), the tenant], the aggregate of the amounts payable by him for that quarter, calculated in accordance with regulation 8, in respect of all non-residents in respect of whose Schedule A [UK property] businesses (or parts thereof) he is a prescribed person;
- (c) where the prescribed person is an agent, the aggregate of the amounts payable by him for that quarter, calculated in accordance with regulation 9, in respect of all non-residents in respect of whose Schedule A [UK property] businesses (or part thereof) he is a prescribed person, after set off of any amounts repayable pursuant to paragraph (6)(a) of that regulation; and
- (d) a claim for repayment of an amount pursuant to regulation 9(6)(b), where appropriate.

(4) The declaration specified is a declaration by the prescribed person that the particulars given in the return are to the best of his knowledge correct and complete.

The NRLS guidance provides:

#### **Quarterly returns and payment of tax**

4.17 Letting agents must pay any tax due each quarter to HMRC's Accounts Office, Shipley, with return form NRLQ. The return form will normally be issued to them by the Accounts Office. Letting agents who need a form NRLQ should contact the Charities, Savings & International at the address shown at paragraph 1.15 above. Quarterly returns are due for the periods ending 30 June, 30 September, 31 December and 31 March.

4.18 Letting agents who are not required to make a payment of tax for any quarter generally do not need to complete a quarterly return form for the quarter. However, they should complete one if they receive a notice in writing from Charities, Savings & International telling them to do so.

4.19 Letting agents must include the following details on the return form:

- the total amount of tax due in respect of all their non-resident landlords for that quarter; or
- where there is no tax due in the quarter but the letting agent is due a repayment (see paragraph 4.14 above), the amount of the repayment claimed.

4.20 Letting agents who act for more than one non-resident landlord should calculate the tax due for each landlord separately. They should then add together the amounts due and subtract any repayable amount. They should show the result of this calculation on form NRLQ.

4.21 Letting agents should send payment for the amount due with the completed return form. The form and payment should be sent to the Accounts Office at the address shown in paragraph 1.16 above.

4.22 The return form NRLQ must be sent in time to arrive at the Accounts Office no later than 30 days after the end of the quarter to which it relates. For example, form NRLQ for the quarter to 30 September 2001 must arrive by 30 October 2001.

#### **Interest payable on late payment**

4.23 Where tax is due but a letting agent does not pay that tax by the due date, the Accounts Office may charge interest from the date when tax became due until the date it is paid.

4.24 Where interest is charged in respect of late payment of tax and that tax is subsequently repaid, the letting agent is not entitled to recover any of the interest.

### 23.14.3 *Payment*

Regulation 10(5) NRLR provides:

The aggregate amount referred to in paragraph (3)(b) or (c) above shall be due at the time by which the return under paragraph (1) above is to be made, and that amount so due—

- (a) shall be payable by the prescribed person without the making of an assessment, and
- (b) may be assessed on the prescribed person (whether or not it has been paid when the assessment is made) if it, or any part of it, is not paid on or before the due date.

23.14.4 *Interest on tax*

Regulation 10 NRLR provides:

(6) The amount so due shall carry interest at the rate applicable under section 178 of the FA 1989 to section 87 of the Management Act from the date when the amount becomes due until payment.

(7) Where an amount paid by a prescribed person in a previous quarter is repaid pursuant to a claim under regulation 9(6)(b), the repayment shall not affect interest under paragraph (6) above on the amount repaid for such time as is specified in paragraph (8) below but, subject to that, paragraph (6) above shall apply as if any such amount which is repaid had never become payable.

(8) The time for which interest is not affected is—

- (a) any time before the expiration of the period of 30 days from the end of the quarter in which the excess of expenses giving rise to the repayment arose, unless the return for that quarter is made earlier in that period; and
- (b) if that return is made earlier in that period, any time ending before the date on which the return is made.

23.14.5 *Assessment*

Regulation 10 NRLR provides:

(9) If it appears to the Board that there is an amount which ought to have been but has not been included in a quarterly return as payable to the Board, or if the Board are dissatisfied with any quarterly return, they may make an assessment on the prescribed person to the best of their judgment in respect of that amount.

(10) The like provisions as are contained in paragraph 10 of Schedule 16 to the Taxes Act (assessments and due date of tax) shall have effect in relation to an assessment under paragraph (9) above as if—

- (a) for references to an assessment under that Schedule there were substituted references to an assessment under paragraph (9) above;
- (b) the references to paragraphs 4(1) and 9 of that Schedule were omitted;
- (c) sub-paragraph (5) were omitted.

(11) Any income tax due under an assessment made by virtue of paragraph (9) above shall carry interest at the rate applicable under section 178 of the FA 1989 to section 87 of the Management Act from

the date when the tax becomes due until payment; and for that purpose the tax shall be treated as having become due at the time when it would have become due if a correct return had been made.

### 23.14.6 *Annual returns*

Regulation 11 NRLR provides:

(1) Not later than the 5th July following the end of an annual period, a prescribed person, other than a person specified in paragraph (3) below, shall make a return to the Board for that period—

- (a) in respect of the non-resident or, if more than one, each non-resident separately, in respect of whose Schedule A [UK property] business (or part thereof) he was a prescribed person at any time falling within that period, and
- (b) containing the information specified in paragraph (4) below and the declaration specified in paragraph (5) below.

(2) A return under paragraph (1) above shall be in such form as the Board may prescribe.

(3) The person specified is any tenant who, as a result of a notice given by the Board under regulation 17(5)(b), was not obligated to make payments to the Board in respect of any payments made to a non-resident in that period.

(4) The information specified is—

- (a) the name of the non-resident;
- (b) where the non-resident is—
  - (i) an individual, or
  - (ii) a trustee other than a corporate or a professional trustee, the principal residential address of the non-resident;
- (c) where the non-resident is a company, the address of its registered office or its principal place of business;
- (d) where the non-resident is a professional trustee,<sup>31</sup> the address of his employment or principal place of business;
- (e) where the prescribed person is an agent, the amount of income which, before deduction of any expenses, fell to be taken into account in the annual period in calculating under regulation 9 amounts of tax payable by him in respect of the Schedule A

---

31 Regulation 11 NRLR provides: a commonsense definition: “professional trustee” means a person who carries on, or is employed by, a business which consists of or includes the management of trusts, and who acts as trustee in the course of that business or employment.

- [UK property] business (or part thereof) of the non-resident, or which would have fallen so to be taken into account if the non-resident had not been an approved person for the purposes of regulation 17 in that period;
- (f) where the prescribed person is a person falling within [s.42A(2)(a) = s.971(3)(a) ITA, the tenant], the aggregate of the following amounts of income—
    - (i) the amount of income which fell to be taken into account in the annual period in calculating under regulation 8 amounts of tax payable by him in respect of the Schedule A [UK property] business (or part thereof) of the non-resident, or which would have fallen so to be taken into account if the non-resident had not been an approved person for the purposes of regulation 17 in that period, and
    - (ii) the amount of income which did not fall so to be taken into account because it was paid to a person other than the non-resident in circumstances where the prescribed person could reasonably be satisfied that the amount of the payment was a deductible expense;
  - (g) except where the non-resident is an approved person for the purposes of regulation 17, the aggregate of—
    - (i) all amounts paid during the annual period on behalf of the non-resident by or at the direction of the prescribed person which the prescribed person could reasonably be satisfied constituted deductible expenses, and
    - (ii) amounts carried forward to that period from a previous period pursuant to regulation 9(5)(b);
  - (h) the aggregate of the amounts specified as payable to the Board in quarterly returns made by the prescribed person for the annual period;
  - (j) the reference number relating to an approval by the Board of the non-resident under regulation 17.
- (5) The declaration specified is a declaration by the prescribed person that the particulars given in the return are to the best of his knowledge correct and complete.

The NRLS guidance provides:

5.2 Annual returns must be made on form NRLY. Charities, Savings & International will normally send this form to letting agents in May each year. A letting agent who needs a form NRLY can get one from

Accounts Office at the address shown in paragraph 1.16 above.

5.3 Forms NRLY will need to be accompanied by continuation sheets (form NRLY Cont) if letting agents have more than 7 landlords to report. If letting agents wish, they can attach their own schedules to the form NRLY rather than use forms NRLY Cont. They might, for example, want to do this where they can produce computer-generated schedules. However, their schedules must contain all the details set out in paragraph 5.1 above.

5.4 Example

ABC Ltd has to operate the scheme for two non-resident landlords, Jordi and Jan. On 17 March 2009 ABC Ltd receives a notice from the HMRC authorising it to pay rental income to Jordi with no tax deducted. The notice shows that Jordi’s approval number is 0123456 (see paragraph 11.12 below). In the year to 31 March 2011, ABC Ltd keeps the following records.

Jan

<u>Quarter to</u>	<u>Rental Income</u>	<u>Deductible Expenses</u>	<u>Tax Due</u>	<u>Repayable Amount</u>
30.06.10	2000	500	£300	
30.09.10	2000	3000	-	£2000
31.12.10	2000	1000	£200	-
31.03.11	<u>2000</u>	<u>1000</u>	<u>£200</u>	<u>-</u>
TOTAL	8000	5500	£700	£200

Jordi

<u>Year to</u>	<u>Rental Income</u>	<u>Deductible Expenses</u>	<u>Tax Due</u>	<u>Repayable Amount</u>
30.03.11	16000	Not applicable*	-	-

\* Letting agents do not have to record deductible expenses for landlords who are approved to receive rental income with no tax deducted.

ABC Ltd should complete the annual return as follows:

<u>Name and address</u>	<u>Approval No</u>	<u>Rental Income</u>	<u>Deductible expenses</u>	<u>Tax</u>
Jordi Doe [Address]	0123456	16000		-
Jan Doe [Address]	-	8000	5500	500

The total tax is the amount included in quarterly returns for the year in respect of the non-resident landlord. That is, the tax less any repayable amounts. In this example, the amount for Jan, £500, is the total of the

three amounts of tax (£700) less the repayable amount (£200).

5.5 Letting agents should always include on the annual return either an approval reference number, or a figure of deductible expenses (if there were any). Where they receive a notice authorising them to pay rental income with no tax deducted part way through the year they should show:

- the approval reference number; and
- the tax shown on the quarterly returns up to the quarter in which the approval notice was issued.

5.6 Letting agents should provide the landlord’s address as follows:

- where the non-resident landlord is an individual, his or her principal residential address;
- where the non-resident landlord is a trust, the address of one of the trustees
  - in the case of a corporate trustee, the address of its registered office or its principal place of business,
  - in the case of a professional trustee, the address of his or her employment or principal place of business
  - in any other case, the trustee’s principal residential address;
- where the non-resident landlord is a company, the address of its registered office or its principal place of business.

The NRLS gives an example where the prescribed person is a tenant:

**8.5 Example**

James is a tenant due to pay rental income of £2000 in each quarter to his non-resident landlord, Julia. For the four quarters in the year to 31 March 2011, James keeps the following records.

Deductible expenses paid (1)	Non-deductible expenses paid (2)	Balance of rental payment (3)	Tax on (2) & (3) @ 20%	Net rent paid to Julia
-	£500	£1500	£400	£1100
£600	£1400	£280	£1120	
-	-	£2000	£400	£1600
-	-	£2000	£400	£1600
<u>£600</u>	<u>£500</u>	<u>£6900</u>	<u>£1480</u>	<u>£5420</u>

James should complete the annual return as follows:

Name and Address	Approval No Income	Rental Expenses	Deductible	Tax
------------------	--------------------	-----------------	------------	-----

Julia	-	£8000 *	£600	£1480
[Address]				

\* James must show the total amount he pays, both to Julia and to third parties. In this example he pays out £2000 each quarter, £8000 in total.

### 23.14.7 Record keeping

The NRLS guidance provides:

#### **Records**

12.4 The rules of the NRL Scheme do not require letting agents and tenants to operate prescribed record-keeping systems. But records must be adequate to satisfy Charities, Savings & International that letting agents and tenants have complied with their obligations under the Scheme. In particular, letting agents and tenants should keep the following records separately for each non-resident landlord:

- a record of rental income received by the letting agent or paid by the tenant; and
- copies of any correspondence with the landlord regarding his or her usual place of abode.

And unless the letting agent or tenant is authorised to pay rental income with no tax deducted:

- a record of expenses paid; and
- invoices and receipts (or copies) to provide evidence of expenses paid.

Landlords fall within the scope of section 12B of the Taxes Management Act 1970, and so are required to keep records for the purposes of enabling them to submit correct and complete tax returns. Failure by a landlord to keep proper records could result in the landlord incurring a penalty. Letting agents and tenants should therefore discuss this subject with a landlord before disposing of any underlying records relating to that landlord's business.

12.5 The record of rental income received by the letting agent or paid by the tenant should show the date and amount of each receipt or payment.

12.6 The record of expenses should show the date and amount of each payment and a brief description of the expense. For example: 16/09/10 Gardening £25.

12.7 Letting agents and tenants may retain records on microfilm, microfiche or any other medium that preserves an exact copy of the original document. Letting agents and tenants who wish to retain documents in this way should contact Charities, Savings & International

before destroying the originals.

12.8 If possible letting agents and tenants should retain records for six years after the end of the year to 31 March to which they relate. However, apart from letting agents and tenants being visited for the first time, the auditors will generally not ask to see records that are more than four years old.

### 23.14.8 *Certificate for landlord*

Regulation 12 NRLR provides:

(1) Not later than the 5th July following the end of an annual period, a prescribed person who is liable under these Regulations to make any payments to the Board for any quarter falling within that period in respect of tax chargeable on the income of a non-resident, shall provide the non-resident with a certificate which shall include the particulars specified in paragraph (2) below and the declaration specified in paragraph (3) below.

(2) The particulars specified are—

- (a) the name of the non-resident;
- (b) where the non-resident is—
  - (i) an individual, or
  - (ii) a trustee other than a corporate or a professional trustee, the principal residential address of the non-resident;
- (c) where the non-resident is a company, the address of its registered office or its principal place of business;
- (d) where the non-resident is a professional trustee, the address of his employment or principal place of business;
- (e) the name and address of the prescribed person;
- (f) the annual period to which the certificate relates;
- (g) the aggregate amount of the liability referred to in paragraph (1) above for all quarters falling within the annual period.

(3) The declaration specified is a declaration by the prescribed person that the certificate is to the best of his knowledge correct and complete.

### 23.15 **Gross payment of property income**

Regulation 17 NRLR provides:

(1) A non-resident may apply to the Board for the obligation imposed under these Regulations to make payments to the Board not to apply in relation to payments falling to be treated as receipts of a Schedule A [UK property] business carried on by him.

(2) An application under paragraph (1) above shall be made on a form provided by the Board and shall contain the information specified in paragraph (3) below and the undertakings specified in paragraph (4) below.

(3) The information specified is—

- (a) the name of the applicant;
- (b) the date of the application;
- (c) where the applicant is—
  - (i) an individual, or
  - (ii) a trustee other than a corporate or a professional trustee, the principal residential address of the applicant;
- (d) where the applicant is a company, the address of its registered office or its principal place of business, and the names and principal residential addresses of its directors;
- (e) where the applicant is a professional trustee, the address of his employment or principal place of business;
- (f) the applicant's national insurance number, if he has one;
- (g) the applicant's UK tax office reference, if he has one;
- (h) the name and address of the prescribed person or, if more than one, each of the prescribed persons by or through whom payments falling to be treated as receipts of the applicant's Schedule A [UK property] business are made;
- (j) a statement that—
  - (i) the applicant has complied with all obligations imposed on him by or under the Tax Acts or the Management Act prior to the date of the application; or
  - (ii) the applicant has not had any obligations imposed on him by or under the Tax Acts or the Management Act prior to the date of the application; or
  - (iii) he does not expect to be liable to pay any amount by way of UK income tax for the year in which the application is made.

(4) The undertakings specified are that—

- (a) where the applicant makes a statement falling within paragraph (3)(j)(iii) above, he will notify the Board in writing if he becomes liable to pay any such amount;
- (b) the applicant will fully comply with all obligations imposed on him by or under the Tax Acts or the Management Act;
- (c) the applicant will inform the Board if his usual place of abode ceases to be outside the UK.

(5) Where the Board approve an application under paragraph (1) above,

they shall give—

- (a) notice of the approval to the non-resident, and
  - (b) notice to the prescribed person or, if more than one, each prescribed person, specifying the date from which the obligations referred to in paragraph (1) above shall cease to apply in relation to payments falling to be treated as receipts of the applicant's Schedule A [UK property] business and made on or after that date.
- (6) The Board may, by notice to the applicant, refuse an application under paragraph (1) above where—
- (a) they are not satisfied that the statement contained in the application and falling within paragraph (3)(j)(i), (ii) or (iii) above, as the case may be, is correct; or
  - (b) they are not satisfied that the applicant will comply with the undertakings contained in the application.
- (7) The applicant may appeal against the Board's refusal of his application under paragraph (6) above by giving notice to the Board within 90 days of receipt of the notice of refusal.
- (9) The tribunal shall, on an appeal notified to it, confirm the notice refusing approval unless satisfied that the notice ought to be quashed.

Regulation 19 allows withdrawal of approval:

- (1) An approval of an application under regulation 17 may be withdrawn by the Board by notice to the non-resident by whom the application was made specifying—
- (a) the reasons for the withdrawal, and
  - (b) the date from which the withdrawal of approval shall take effect.
- (2) The Board may withdraw their approval of an application where—
- (a) they cease to be satisfied that the statement contained in the application and falling within regulation 17(3)(j)(i), (ii) or (iii), as the case may be, is correct; or
  - (b) they cease to be satisfied that the non-resident will comply with the undertakings contained in the application; or
  - (c) the non-resident fails to furnish information to the Board in accordance with regulation 18.
- (3) Where the Board withdraw their approval of an application under paragraph (1) above, they shall give notice to the prescribed person or, if more than one, each prescribed person, specifying the date from which the obligations imposed under these Regulations to make payments to the Board shall apply in relation to payments falling to be treated as receipts of the applicant's Schedule A [UK property] business

and made on or after that date.

(4) A non-resident may appeal against the Board's withdrawal of approval under paragraph (1) above by giving notice to the Board within 90 days of the date of issue of the notice withdrawing approval.

(6) The tribunal shall, on an appeal notified to it, confirm the notice withdrawing approval unless . . . satisfied that the notice ought to be quashed.

The NRLS guidance provides:

### **Sovereign immunity**

11.3 Non-resident landlords who are a sovereign power and are exempt from UK tax because of sovereign immunity must apply to Charities, Savings & International if they wish to receive their UK rental income with no tax deducted. But they are not required to complete an application form. They can apply by writing to Charities, Savings & International, enclosing, where possible, a copy of the letter in which the HMRC confirms to them their 'sovereign immune' status.

### **When can an application be made?**

11.4 You should make the application no more than three months before you leave the UK. HMRC cannot consider an application before then. If you have already left the UK, you can apply immediately.

### **How to complete the application form**

11.5 There are explanatory notes on the application forms NRL1i , NRL2i and NRL3i. The notes tell non-resident landlords how to complete the forms. The following information supplements the explanatory notes.

### **Who can sign the application form?**

11.6 Downloaded Application forms must be signed as follows:

- form NRL1i must be signed by the non-resident landlord;
- form NRL2i must be signed by the company secretary or a duly-authorized officer of the company;
- form NRL3i must be signed by a trustee.

### **Principal residential address: 'care of' and PO Box addresses**

11.7 Some non-resident landlords may live in parts of the world in which the only address they can provide is a 'care of' or 'PO Box' address. In these circumstances Charities, Savings & International will accept a correspondence address instead of a principal residential address. But non-resident landlords should attach a brief explanation to the form NRL1i of why they have not provided a residential address. Other non-resident landlords may have a principal residential address that is not a postal address. In these circumstances they should provide

the principal residential address and a correspondence address.

**UK Tax Office, tax reference number and NINO**

11.8 Non-resident landlords should provide details of their most recent UK Tax Office and tax reference number, if known.

Non-resident landlords who are individuals should also give their National Insurance number (NINO) if they have one.

Without this information Charities, Savings & International may not be able to process applications made on the basis that the non-resident landlord's tax affairs are up to date. Where a non-resident landlord's tax affairs have been dealt with in the past through a letting agent or tenant, the application should show, where known, the Tax Office and reference number for the letting agent or tenant.

**Approval of applications**

11.9 Charities, Savings & International will approve an application by notice in writing to the non-resident landlord provided that:

- the application form is complete and correct; and
- it is satisfied that the non-resident landlord making the application will comply with all of his or her UK tax obligations.

The approval does not mean that the rental income is *exempt* from UK tax. Although the rental income will be paid with no tax deducted, it is still liable to UK tax and the non-resident landlord must include it on any tax return HMRC sends him.

11.10 Charities, Savings & International will normally approve them after an initial check.

Applications will be checked later, in more detail. Non-resident landlords may be required to supply additional information at a later date when the application is checked in detail. Failure to provide such additional information may result in the withdrawal of approval (see paragraph 11.16 below).

**Who receives notification of approval?**

11.11 Charities, Savings & International will send a notice of approval to receive rental income without deduction of tax to the non-resident landlord. They will also send a copy to the non-resident landlord's accountant or tax adviser where they hold written authority to do so. These notices will show an approval reference number.

11.12 Charities, Savings & International will also issue a separate notice to the letting agents or tenants named on the application form authorising them to pay rental income to the non-resident landlord without deducting tax. These notices will show an approval reference number.

11.13 All notices of approval will specify the date from which rental

income should be paid without deducting tax. It will normally be the first day of the quarter in which the landlord's application (on form NRL1i, 2i or 3i) is received at Charities, Savings & International.

### **Refusal of applications for approval**

11.14 Charities, Savings & International may refuse an application from a non-resident landlord if:

- it is not satisfied that the information provided in the application is correct; or
- it is not satisfied that the non-resident landlord will comply with their UK tax obligations.

11.15 Charities, Savings & International will refuse an application by notice in writing. The notice will explain how the landlord can appeal against the refusal.

Appeals should be made in writing to Charities, Savings & International within 90 days of the date of the notice. If the appeal cannot be settled by agreement between Charities, Savings & International and the landlord it will be heard by an independent appeal tribunal.

...

### **Changes of letting agent or tenant**

11.19 Where a non-resident landlord changes letting agents, or tenants where there is no letting agent, a notice held by the old letting agent or tenant cannot be transferred to the new letting agent or tenant. The landlord should write to Charities, Savings & International with details of the new letting agent or tenant. Charities, Savings & International will then send a notice to the new letting agent or tenant. New letting agents or tenants must deduct tax until they receive a notice from Charities, Savings & International.

Where Charities, Savings & International has not been told about a change, the new letting agent or tenant will not hold a notice from Charities, Savings & International allowing them not to deduct tax. In such cases tax will be deducted from the rental income of a landlord that has a valid approval. If this situation goes on beyond the 31 March in any year, the letting agent or tenant should simply complete an annual return and issue a certificate reflecting the tax deducted. However, if the letting agent or tenant receives a notice (see paragraph 11.12 above) prior to 31 March and has deducted tax from the landlord's rental income at any time since the previous 1 April, the letting agent or tenant may either

- contact Accounts Office Shipley to discuss the recovery of any tax deducted in respect of the relevant quarters (clearly recording the transactions through which any money is recovered and paid to the

- landlord) or
- agree with the landlord to issue a certificate after the end of the year to cover the tax deducted and to make no further deductions during the year.

**If a non-resident landlord dies**

11.20 If a non-resident landlord dies, any HMRC approval notice to pay rent without deduction of tax automatically ceases to have effect. Letting agents and tenants who have to continue paying the same rent to someone else after a landlord's death should deduct tax unless the new payee

- does not have a usual place of abode outside the UK (for example, a UK executor), or
- is someone for whom they already hold an approval notice (for example, the landlord's surviving spouse).

The new payees can of course apply for HMRC approval to receive their rent without deduction of tax (see paragraph 11.1 above).

Executors or trustees, all of whom have their usual place of abode outside the UK, should use form NRL3i (see paragraph 1.15 above) if they wish to receive their UK rental income without deduction of tax.

**Irish charities, superannuation schemes and insurance companies**

11.21 Under Article 14A of the UK/Republic of Ireland Double Taxation Convention the following types of Irish tax-exempt landlords are exempt from UK tax on their rental income:

- charities
- superannuation schemes
- insurance companies (in respect of their pension business).
- These landlords should not fill in forms NRL1i, 2i and 3i.

Instead they should claim exemption under the Double Taxation Convention by filling in a form Ireland-Company, available from the HMRC website

## 23.16 Credit for withholding tax

Regulation 20 NRLR provides:

Section 59A of the Management Act (payments on account of income tax) ("section 59A") shall have effect in relation to payments to be made to the Board by virtue of section 42A in respect of any tax as if any reference in section 59A to income tax deducted at source included a reference to such payments.

Regulation 21 NRLR provides:

- (1) A non-resident may set off against either of the amounts specified in paragraph (2) below the aggregate amount of the payments which—
- (a) were liable to be made to the Board under these Regulations for each quarter ending in a year by any person who is a prescribed person in respect of the Schedule A [UK property] business (or part thereof) carried on by the non-resident in that year, and
  - (b) were retained by the prescribed person out of sums due from him to the non-resident in order to meet that liability.
- (2) The amounts specified are—
- (a) the amount in which the non-resident is chargeable to income tax for the year in question, and
  - (b) the amount of the first payment on account of his liability to income tax for that year.
- (3) Where pursuant to paragraph (1) above an amount is set off against the amount specified in paragraph (2)(a) above, section 59A (as modified by regulation 20) shall have effect as if the reference in subsection (1) of that section to the amount which is the assessed amount were a reference to that assessed amount reduced by the amount set off.
- (4) Where pursuant to paragraph (1) above an amount is set off against the amount specified in paragraph (2)(b) above, section 59A (as so modified) shall have effect as if the reference in subsection (2) of that section to the first payment on account were a reference to the amount of that payment reduced by the amount set off.
- (5) In any case where—
- (a) by virtue of regulation 17 the obligations imposed under these Regulations to make payments to the Board do not apply in any year in relation to payments falling to be treated as receipts of a Schedule A [UK property] business carried on by a non-resident in that year, and
  - (b) those obligations applied to such payments in the immediately preceding year,
- subsection (1) of section 59A (as so modified) shall have effect as if those obligations did not apply in the immediately preceding year.

### **23.17 Agent indemnity**

Section 971 ITA 2007 provides:

- (4) A non-resident landlord representative who must pay prescribed amounts of income tax to HMRC under regulations under this section

is entitled—

- (a) to be indemnified by the non-resident for all such payments, and
  - (b) to retain out of any sums otherwise due from the representative to the non-resident, or received by the representative on behalf of the non-resident, sums representing income tax sufficient for meeting any liabilities under the regulations to make such payments.
- (5) Subsection (4)(b) applies whether the liability is one which the representative has discharged or to which the representative is subject.

## CHAPTER TWENTY FOUR

# DEDUCTION OF INTEREST FROM PROPERTY INCOME

### 24.1

#### *Cross references*

For questions of the location of the source of interest, and deduction at source, see 25.1 (Interest income)

### **24.1 Deduction of interest**

This chapter considers the deduction of interest for the purposes of income taxation of property income and trading income.

A great deal of tax and planning depends on obtaining that deduction. See *Langsam v Beachcroft LLP* [2011] EWHC 1451 (Ch) for an interesting negligence case, where a dissatisfied remittance basis taxpayer obtained damages against solicitors who failed to advise on tax avoidance possibilities dignified with the label “equity release arrangement”.

I do not discuss:

- (1) UK resident companies (subject to corporation tax and governed by the loan relationship rules)
- (2) Restrictions on interest deduction for residential property<sup>1</sup>

The significance of the topic will greatly decrease in 2020/21, when non-resident companies become subject to corporation tax on UK property income. It will continue to matter for individuals and trusts, but they are not likely to have a significant UK property business.

### **24.2 Basis for deduction**

Section 272(1) ITTOIA is the starting point for property income:

---

<sup>1</sup> Section 272A ITTOIA.

The profits of a property business are calculated in the same way as the profits of a trade.

Section 272(2) provides a long list of statutory provisions which apply to a property business, including the sections discussed below. Thus I can deal with property income and trading income in the same chapter, though my focus here is on property income.

### 24.3 Capital expenditure

Section 33 ITTOIA provides:

In calculating the profits of a trade, no deduction is allowed for items of a capital nature.

In the early days of income tax, the courts ruled that where a loan was used as capital in a trade, interest on the loan was a capital expense and so disallowed.<sup>2</sup> That seems a strange result, but the courts wished to avoid the anomaly, which broadly still holds today, and was a contributing factor to the 2008 financial crisis,<sup>3</sup> that debt finance gives rise to deductible interest but equity finance does not, as there is no deduction for dividends or the cost of share capital.

The old rule was however reversed by statute and s.29 ITTOIA now provides:

For the purpose of calculating the profits of a trade, interest is an item of a revenue nature, whatever the nature of the loan.

Interest is in principle a deductible expense if incurred wholly and exclusively for the purpose of the property business.

A premium (if not interest) is not deductible for IT purposes. That rule is preserved by s.58 ITTOIA, which allows relief for incidental costs of loan finance, but s.58(4) ITTOIA provides:

But the following are not incidental costs of obtaining finance ...

(c) the cost of repaying a loan or loan stock so far as attributable to

---

2 See for instance *European Investment Trust v Jackson* 18 TC 1.

3 The issue is discussed briefly in Report of the Parliamentary Commission on Banking Standards, *Changing banking for good* (2013) Volume II para 185-188 <http://www.parliament.uk/documents/banking-commission/Banking-final-report-vol-ii.pdf>

its being repayable at a premium or having been obtained or issued at a discount...

## **24.4 Wholly and exclusively**

Section 34 ITTOIA provides:

- (1) In calculating the profits of a trade, no deduction is allowed for—
- (a) expenses not incurred wholly and exclusively for the purposes of the trade,

The Property Income Manual provides:

### **2105. Introduction** [Mar 2018]

#### **Overview**

... For income tax, for tax years up to and including 2016/17, interest payable on loans used to buy land or property which is used in the rental business, or on loans to fund repairs, improvements or alterations, is deductible in computing the profits or losses of the rental business in the same way as other expenses.

Similarly, interest payable under hire purchase agreements or on an overdraft is deductible where the asset is used for business purposes.

[The manual discusses the rules for residential let property, and continues] The normal rental business rules apply, see PIM1100 onwards, including the “wholly and exclusively” rule and the rules governing the timing of relief (see PIM1100 onwards). A taxpayer cannot, for example, deduct interest on a private loan, such as a loan used to buy their private residence. Where part of the taxpayer’s own residence is let see PIM2100.

Similarly, the interest on a loan or overdraft may not be allowable, or only part may be allowable, where the taxpayer, for example, uses the borrowing:

- to buy non-rental business investments (which may be shown in the balance sheet as assets),
- to buy private assets or assets for their family,
- for the provision of private funds to be taken out from the rental business.

Deciding what interest, if any, can be deducted may be difficult, particularly where the taxpayer’s account with the business is overdrawn. That is, where the taxpayer has drawn out more money than the profits of the rental business. The loan may have, for example, partly financed the rental business and partly met private living expenses. Interest on a borrowing that is used to fund private living expenses or

other non-business expenditure isn't allowable.

For advice regarding the incidental costs of loan finance see PIM2050. Interest on a partner's capital account with the business isn't deductible. It is merely an allocation of the rental business profit and is taxed as property income.

For more detailed guidance about the deduction of interest see BIM45650 onwards.<sup>4</sup>

***Interest payable on property only partly used for rental business***

A property may be let for short periods in a tax year or only part of it may be let throughout a tax year (or both); the rest of the time the property is used for private or non-business purposes. Here the interest charged on a qualifying loan on that property has to be split between the rental business use and the private or non-business use. The split is done in whatever way produces a fair and reasonable business deduction, taking account of both the proportion of business use and the length of business use.

You don't have to split the interest if the taxpayer is genuinely trying to let the property but it is empty because they have not been able to find a tenant. In this case the interest will meet the "wholly and exclusively" test. It won't meet this test if they have not been trying to let the property or they have been using it for private or non-business purposes .

***[Interest and rent-a-room - passage not printed here]***

***Legislation***

The profits of a rental business are calculated in the same way as the profits of a trade. Therefore interest may be deducted in computing the profits of a rental business provided that it meets the following criteria.

- It must be payable wholly and exclusively for the purposes of the rental business.
- [• If it is paid to a person not resident in the UK, the deductible element must not be at more than a reasonable commercial rate - see PIM2130.]<sup>5</sup>

Remember that under the rental business rules, relief is given for interest payable on the accruals basis (not interest paid unless, exceptionally, the cash basis is used - see PIM1090).

The guidance on interest as a trade expense at BIM45650 onwards

4 This material is not set out here for reasons of space, but it is well worth reading, particularly where the interest is deducted from trading income rather than property income.

5 This passage is out of date: see 24.4.1 (Interest at uncommercial rate).

applies equally to interest as a rental business expense.

***Interest rate hedging instruments*** [See 23.5.1 (Property income: computation)]

**2064. Paid abroad** [Mar 2018]

***Business deduction and deduction of tax***

The residence status of the lender does not affect the taxpayer's right to an interest deduction in computing the profits or losses of their rental business. But where they pay interest to a lender whose usual place of abode is outside the UK, they should normally deduct IT at the basic rate from the payments they make and account for it to HMRC ...

#### 24.4.1 *Interest at uncommercial rate*

The Property Income Manual provides:

**2064. Paid abroad** [Mar 2018]

...

***Interest paid at uncommercial rates***

Interest paid to a lender not resident in the UK over and above a commercial rate isn't allowable as a deduction even if it would otherwise qualify (perhaps because the loan was used to buy a rental business property). Generally, HMRC will accept the interest charged by the lender as an allowable deduction where it is paid on an arm's length loan made on a normal commercial basis.

Take a broad view of what is a reasonable commercial rate. You should not normally seek an adjustment where the payer and recipient are at arm's length. If interest is payable in the UK on an advance from a foreign bank carrying on a bona fide banking business in the UK through a branch, treat it as if it were interest payable to a UK bank...

This is referring to the former s.74(1)(n) ICTA 1988, which disallowed interest paid to a non-resident so far as it was at more than a reasonable commercial rate. The provision was repealed in 2004, so the Manual is almost a decade out of date. However if interest is paid at more than a commercial rate, whether or not to a non-resident, the deduction would in principle be disallowable on transfer pricing or on "wholly and exclusively" principles.

#### 24.4.2 *Non-resident co pays interest*

Lastly, for completeness, the Manual refers to (what is now) 1301A CTA 2009:

In calculating a company's income from any source for corporation tax purposes, no deduction is allowed for interest otherwise than under Part 5 (loan relationships).

That only applies for CT and does not disallow a deduction for interest for IT. HMRC agree. The PI Manual states:

**2110. Paid abroad** [Jan 2018]

...

***Non-resident companies***

... Section 337A does not preclude a deduction for interest for companies chargeable to IT such as non-resident companies with income from UK property.

## **24.5 Tax relief schemes**

Section 809ZG(1) ITA provides the general rule:

Relief is not to be given under any provision of the Income Tax Acts to a person in respect of a payment of interest if

- [a] a tax relief scheme has been effected, or
  - [b] tax relief arrangements have been made,
- in relation to the transaction under which the interest is paid.

Section 809ZG(2) ITA is a small point:

Subsection (1) applies whether the tax relief scheme is effected, or the tax relief arrangements are made, before or after the transaction.

I do not see how a transaction could take place before the scheme is effected, but it does not matter.

Section 809ZG(3) ITA defines tax relief scheme:

A scheme is a tax relief scheme in relation to a transaction for the purposes of subsection (1) if it is such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(4) ITA defines tax relief arrangements in the same way:

Arrangements are tax relief arrangements in relation to a transaction for the purposes of subsection (1) if they are such that the sole or main benefit that might be expected to accrue to the person from the

transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(5) ITA provides a commonsense definition of relief:

In this section “relief” means relief by way of—

- (a) deduction in calculating profits or gains, or
- (b) deduction or set off against income.

Corporate Finance Manual provides:

**39030. Artificial payments of interest: Sole or main benefit** [Nov 2019]

[The Manual summarises the legislation and continues:] The sole or main benefit test is an objective, rather than a subjective test: the subsection focuses on the result to be expected from the transaction rather than its purpose. (See *The Crown Bedding Co v IRC* 34 TC 107 at pp 115, 118-120, followed in *Ackland & Pratten v IRC* 39 TC 649 at p662, and approved in *IRC v Brebner* 43 TC 705 at p718).

Ordinary borrowings involving funds, which are genuinely invested or re-lent, are not affected because the tax relief on the interest paid is incidental to the transaction.

The International Manual formerly provided:

**509120. Section 787 ICTA 1988** [Mar 2012]

*Part XVII ICTA 1988 includes various anti-avoidance provisions including Section 787. This restricts relief for interest paid under a scheme from which the sole or main benefit which might be expected to accrue is the reduction of tax resulting from the relief, including group relief. Although this appears to be a far reaching section which could be used against many avoidance schemes, its usefulness is somewhat restricted.*

*The provision was introduced to counteract a specific domestic avoidance scheme to get relief on ‘manufactured’ interest by paying interest in advance on a borrowing which was effectively immediately repaid. It is necessary to distinguish between an out-and-out avoidance scheme and a judiciously arranged borrowing scheme. The section is not, therefore, easily invoked but it may still be legitimate to use it in some cases involving intra-group funding transactions.*

The entry has been deleted but there seems to be no reason to believe that HMRC practice has changed. HMRC’s reluctance to use the section goes

back to an assurance given in parliament:

**Mr. Robert Sheldon (financial secretary to the Treasury):** The hon. Member for Guildford (Mr. Howell) rightly asked for some assurance that there would be no problems for innocent parties seeking arrangements whereby they undertook to pay interest for genuine business purposes. I can give the hon. Gentleman the assurance that those paying true interest for genuine business purposes will not be caught by this scheme. To give him the definition, which I think also deals with the question put by the hon. Member for Cirencester and Tewkesbury (Mr. Ridley), in a genuine commercial scheme the main benefit is to secure finance. If that is applicable, those people will not be caught by the main benefit test and they will be perfectly free to go about seeking and undertaking any transactions which fall within that definition.

The natural anxiety of the hon. Member for Guildford is that these matters are closely watched. I can give him that assurance. That is to the advantage of the kind of people mentioned in this debate so that we do not entrap those perfectly legitimate and proper cases where people are prepared to pay the interest and get it allowable against tax. We are concerned about people who resort to some of those very peculiar devices of the kind which show an immense amount of ingenuity and, as the hon. Member for Guildford said, with such unfortunate results.<sup>6</sup>

## 24.6 Transfer pricing/thin capitalisation

The transfer pricing rules are in part 4 TIOPA, supplemented by OECD transfer pricing guidelines which is nearly 400 pages. This is a vast topic, and a full discussion would need many volumes. I focus on matters closest to the themes of this book.

Assuming interest is paid at market rates, one would not expect transfer pricing issues to arise. However the effect of some deft deeming provisions is that transfer pricing rules also serve as thin capitalisation rules, ie rules which restrict the deduction of interest by companies funded primarily by borrowing, having limited share capital or net value. It is therefore necessary to consider these rules in some detail.

The International Manual explains the background as it appears to HMRC:

---

<sup>6</sup> Hansard, 13 July 1976.

**413010. Definition of thin capitalisation** [Dec 2019]

In the commercial world, a company is said to be thinly capitalised when it has more debt than equity, and many thin cap cases boil down to a company with more debt than it could and would have borrowed on its own resources, because it is borrowing either from or with the support of connected persons.

However, the amount of interest payable may be excessive for one or more reasons - interest rate, excessive duration of lending, restrictions on repayment, etc - so all terms and conditions should be considered in a thin capitalisation review. Other less obvious issues of possible interest are the appropriateness of the currency of the loan (e.g. forex risk) and the presence of guarantees. For HMRC, thin cap means looking at every aspect of lending and borrowing from a transfer pricing angle...

**How thin capitalisation arises**

When a company operates at arm's length from its sources of funding, commercial considerations drive the decision to raise funds either through debt, equity, or a mixture of the two. There is a marked difference in tax treatment between debt finance and equity, in that interest on debt is deductible from profits, whereas dividends on shares are not. This is explored in more detail in the Practical Thin Cap Guidance from INTM510000 onwards.

When a company borrows from or with the support of other group companies, funding decisions may not be driven by commercial considerations alone. The connection between the parties involved might allow them to change the way in which the funding is obtained in ways unavailable or unattractive to the borrower at arm's length, or to take on funding risks which an independent borrower would avoid. Factors such as group policy, strategy, and tax planning will sit alongside commercial considerations.

As a result of the differences in tax treatment between interest and dividends, a company which increases its indebtedness, and thereby increases its interest payments, reduces the tax it has to pay.

Thin capitalisation is just a form of transfer pricing, and is not limited to companies, except where the legislation says so, but this guidance concentrates largely on corporate relationships.

**Thin capitalisation and tax planning**

As with transfer pricing more generally, thin capitalisation does not require a tax avoidance motive. The aim of applying transfer pricing legislation is to ensure that arm's length prices are recognised for goods, services, etc, for tax purposes. However, company finance is an easy and

attractive way for groups to change the jurisdiction within which profits arise, and tax planning will be an aspect of the financing plans for any major corporate acquisition.

Corporate thin capitalisation is usually seen in a group context, since it would be counter-productive (though not unheard of) for a company to increase its interest costs payable to a third party, just to reduce its tax liability. Besides, a borrower cannot borrow more (or pay more interest) than an arm's length lender is willing to lend, unless that money is guaranteed, usually by group members. Where the borrowing is intra-group, the interest remains within the group; the group as a whole is no less profitable, but the borrower has paid less tax, and, where the lender is in a country with a lower corporation tax rate than the borrower or has losses to absorb interest received, the group can end up far better off overall. At the same time, there may be arbitrage (INTM590000) or other opportunities to further reduce tax.

With third party borrowing supported by a group guarantee, interest is paid to a third party and value leaves the group, but in that case the issue may be a matter of where it is most tax efficient for the group's interest costs to arise. The inference is that the world-wide group has capacity to borrow but not necessarily within the UK entity, which is where it wishes to place the debt. However, guarantees, including less formal support such as a letter of comfort, can enable a company to borrow more cheaply than would be possible on a standalone basis.

#### 24.6.1 *Thin capitalisation: EU law*

The EC comment on the EU law aspects of thin capitalisation:

*Thin capitalisation rules.* There are many different approaches to the design of thin cap rules which reflect the different views and legal traditions of MSs. However, the background to these rules is similar. Debt and equity financing attract different tax consequences. Financing a company by means of equity will normally result in a distribution of profits to the shareholder in the form of dividends, but only after taxation of such profits at the level of the subsidiary. Debt financing will result in a payment of interest to the creditors (who can also be the shareholders), but such payments generally reduce the taxable profits of the subsidiary. Dividend and interest may also attract different withholding tax consequences. The difference in treatment between debt and equity financing under national tax law (and at bilateral level), as a result of which the source state's taxing rights on interest are generally more limited than those on dividends, make debt financing considerably more attractive in a cross-border context and can therefore lead to the erosion of the tax base in the state of the subsidiary.

By abolishing their thin cap rules altogether or by carving out dealings with lenders resident in other MSs and EEA States from their scope, the difference in treatment

between resident subsidiaries according to the seat of their parent company within the EU/EEA would be removed. The Commission is of the opinion that MSs should, however, be able to protect their tax bases from artificial erosion through structured debt financing, also within the EU/EEA. Following *Lankhorst*, some MSs have tried to avoid the charge of discrimination by extending the application of their thin cap rules to cover also purely national relations. As discussed above, this is not desirable development. In *Thin Cap* the ECJ acknowledged that measures to prevent thin capitalisation are not per se impermissible. Their application must however be confined to purely artificial arrangements. This may be achieved by ensuring that the terms of the debt financing arrangements between related companies remain within the limits of what would have been agreed upon between unrelated parties or that they are based on otherwise valid commercial reasons. The Commission considers that the principles laid down by the ECJ in relation to thin cap rules also apply to transfer pricing rules, which are essential to the continued existence of individual national tax systems. MSs cannot operate effective tax systems unless they are able to ensure that their tax bases are not eroded through non-commercial arrangements between associated companies.

#### **4. APPLICATION OF ANTI-ABUSE RULES IN RELATION TO THIRD COUNTRIES**

CFC rules determine the tax treatment of the profits of a foreign company controlled by a resident. As such rules are directed at, and thus only affect resident shareholders with definite influence over a foreign company (usually a parent in a corporate group) their centre of gravity lies with the ability of companies (and as the case may be, individuals) to establish themselves, through subsidiaries, in other countries. Similarly, MSs' thin cap rules are directed exclusively at group debt financing arrangements, i.e. they are only applied in situations where a foreign shareholder holds a substantial participation in the resident subsidiary. Thus, the centre of gravity in respect of thin cap rules also lies clearly with the freedom of establishment and as in the case of CFC rules their application is therefore to be examined solely from the perspective of Article 43 of the EC Treaty.<sup>7</sup>

As Community law does not require MSs to avoid discrimination in relation to the establishment of their nationals outside the Community, or the establishment of third-country nationals in a MS<sup>8</sup> the issue of discrimination does not arise in the cases of a controlled company or a creditor/shareholder resident in a third country. MSs should therefore not be precluded from applying CFC and thin cap rules in relation to third countries. Community law does not impose any particular requirements on the legitimacy of the application of such legislation to transactions outside the EU.<sup>9</sup>

However, should the application of those rules not be confined to situations and transactions between companies in a corporate group (or otherwise related parties where

---

7 *Lasertec Gesellschaft für Stanzformen v Finanzamt Emmendingen*, C-492/04 at [20].

8 As the ECJ noted in *ICI v Colmer* Case C-264/96 at [34]: “When deciding an issue concerning a situation which lies outside the scope of Community law, the national court is not required, under Community law, either to interpret its legislation in a way conforming with Community law or to disapply that legislation.”

9 Their application may however be precluded by the relevant Double Tax Convention.

one has definite influence over the other) and to the extent that this was the case, they would need to comply with Article 56 of the EC Treaty, and also in relation to third countries, be applied to wholly artificial arrangements only (with the exception of situations where there is no adequate information exchange relationship with the third country concerned).

The corporate tax directives only apply to companies incorporated in the MSs and their overall objective is to create *within the Community* conditions analogous to those of an internal market by removing tax obstacles to cross-border reorganisations and to payments of dividends, interest and royalties. It would therefore not appear to fall within their ambit to, for instance, facilitate arrangements intended to avoid withholding taxes on payments to non-European entities, if such structuring does not serve any commercial purpose.<sup>10</sup>

### 24.6.2 *Other provisions*

The International Manual provides:

#### **413010. Definition of thin capitalisation [Dec 2019]**

##### **... Other legislation on finance**

There is other legislation - and this is not an exhaustive list - which may result in a restriction of the interest deduction, including:

- Arbitrage provisions - see INTM590000
- Unallowable purpose legislation - s.441-442 CTA - see CFM38010
- Remaining provisions of pre-2004 legislation (s.209 ICTA) - now around s.1000 CTA - such as interest in excess of a commercial rate of return - see below and CTM15502
- World-wide debt cap - Part 7 TIOPA 2010 - see CFM90100 onwards

The first two represent anti-avoidance legislation, so the choice of applicable legislation depends on the facts and circumstances of the particular case, and transfer pricing concerns may sit alongside avoidance concerns. Section 155(6) TIOPA says that the CTA10/S1000 list and the world-wide debt cap legislation shall be disregarded when calculating the transfer pricing tax advantage. The debt cap applies after any transfer pricing adjustment has been made.

These provisions concern corporation tax only, and so are not discussed here.

### 24.7 “The basic pre-condition”

---

<sup>10</sup> EC Communication “The application of anti-abuse measures in the area of direct taxation” COM(2007) 785

<http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785>

Section 147(1) TIOPA provides:

For the purposes of this section “the basic pre-condition” is that—

- (a) provision (“the actual provision”) has been made or imposed as between any two persons (“the affected persons”) by means of a transaction or series of transactions,
- (b) the participation condition is met (see section 148),
- (c) the actual provision is not within subsection (7) (oil transactions), and
- (d) the actual provision differs from the provision (“the arm’s length provision”) which would have been made as between independent enterprises.

Thus the “basic pre-condition” actually consists of four conditions or sets of conditions. I refer to them as “**basic pre-conditions (a) to (d)**” though condition (b) has its own label (the participation condition). Condition (c) (which concerns oil transactions) is not discussed here.

Section 151(1) TIOPA defines “**arm’s length provision**” in line with the commonsense usage in basic pre-condition (a):

In this Part “the arm’s length provision” has the meaning given by section 147(1).

#### 24.7.1 *Transaction/series*

This expression is used in basic pre-condition (a). Section 150(1) TIOPA provides a wide definition of transaction:

In this Part “transaction” includes arrangements,<sup>11</sup> understandings and mutual practices (whether or not they are, or are intended to be, legally enforceable).

Section 150 TIOPA provides a wide definition of series of transactions:

- (2) References in this Part to a series of transactions include references to a number of transactions each entered into (whether or not one after the other) in pursuance of, or in relation to, the same arrangement.
- (3) A series of transactions is not prevented by reason only of one or

---

<sup>11</sup> Section 150(5) TIOPA provides (with minor contextual modifications) the standard (unnecessary) IT definition”: see App 2.2.3 (Definitions of “arrangement”).

more of the matters mentioned in subsection (4) from being regarded for the purposes of this Part as a series of transactions by means of which provision has been made or imposed as between any two persons.

- (4) Those matters are—
- (a) that there is no transaction in the series to which both those persons are parties,
  - (b) that the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or both of those persons, and
  - (c) that there is one or more transactions in the series to which neither of those persons is a party.

The International Manual provides:

**413060. Transaction or series of transactions** [Jun 2018]

Transactions within a series do not have to occur in a recognisable sequence. They may be simultaneous or removed in time from one another, but they have to be part of an overall arrangement or scheme.

The meaning of series of transactions is further widened by Section 150(4) TIOPA 2010 [the Manual sets out s.150(4) and continues:]

By recognising a series of transactions, the transfer pricing legislation can apply to more complex and indirect financial structures in the same way that it does to the most straightforward borrower/lender situation. However, irrespective of the complexity or number of transactions which make up the “series”, it should always be borne in mind that this legislation is still about a provision within TIOPA10/S147 between two persons that results in a tax advantage; see INTM412020 and INTM413050

*Examples of “series of transactions”*

A simple example of indirect finance which would fall within the definition of a series of transactions is a UK borrower being lent money by an entirely unconnected third party bank, with a party connected to the borrower guaranteeing the loan.

A more complex example is where

- [1] a company in the same group as the UK borrower has provided a guarantee to one bank,
- [2] which then provides a guarantee to a second bank, and
- [3] the second bank then lends money to the UK borrower.

Here there is a step - between the first and second banks - which does not involve either the parent or the borrower. This is still a series of transactions, and one which, though difficult to detect, would fall within

the scope of the thin capitalisation legislation. Apart from the provision of a guarantee, the most likely situations where the provision might consist of a series of transactions would be where an intermediary is acting in a nominee or agency capacity in providing finance cross border between group companies.

In guarantee cases of this nature, the questions to ask in considering the provision are:

- Without the guarantee(s) would the borrower have been able and willing to borrow on these terms?
- Had the borrower and the guarantor been at arm's length from one another, would they have entered into the guarantee?

#### 24.7.2 *Basic pre-condition (a)*

With that definition in mind we can turn to basic pre-condition (a). Section 147(1) TIOPA provides:

For the purposes of this section “the basic pre-condition” is that—

- (a) provision (“the actual provision”) has been made or imposed as between any two persons (“the affected persons”) by means of a transaction or series of transactions ...

At first sight, this is not so much a condition as a convenient way of defining the terms “actual provision” and “affected persons”.

It is considered that the condition only applies when both persons are carrying on an enterprise, which is sometimes important.<sup>12</sup>

### 24.8 Participation condition

We turn to basic pre-condition (b), the participation provision.

Section 147(1) TIOPA provides:

For the purposes of this section “the basic pre-condition” is that ...

- (b) the participation condition is met (see section 148)

Section 148(1) TIOPA provides:

For the purposes of section 147(1)(b), the participation condition is met if—

- (a) condition A is met in relation to the actual provision so far as the actual provision is provision relating to financing arrangements, and

---

<sup>12</sup> See 79.42 (Transfer pricing & BiK).

- (b) condition B is met in relation to the actual provision so far as the actual provision is not provision relating to financing arrangements.

I refer to “**participation conditions A and B**”. It is helpful to consider condition B first.

#### 24.8.1 *Participation condition B*

Section 148(3) TIOPA provides:

Condition B is that, at the time of the making or imposition of the actual provision—

- (a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or
- (b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

#### 24.8.2 *Participation condition A*

Section 148(2) TIOPA provides:

Condition A is that, at the time of the making or imposition of the actual provision or within the period of six months beginning with the day on which the actual provision was made or imposed—

- (a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or
- (b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

Participation condition A is the same as B, except for the underlined words: the participation test can be satisfied at the time of the arrangement in the following 6 months. This wider test applies to financing arrangements. That term is given a commonsense definition in s.148(4) TIOPA:

In this section “financing arrangements” means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

For the participation tests, see 100.1, 14.1 (Participation).

## 24.9 The general rule

If the “basic pre-condition” is met, we move on. Section 147(2) TIOPA provides:

Subsection (3) applies if—

- (a) the basic pre-condition is met, and
- (b) the actual provision confers a potential advantage in relation to UK taxation on one of the affected persons.

If that is the case we come to the general rule:

(3) The profits and losses of the potentially advantaged person are to be calculated for tax purposes as if the arm’s length provision had been made or imposed instead of the actual provision.

Similarly if there are several affected persons:

(4) Subsection (5) applies if—

- (a) the basic pre-condition is met, and
- (b) the actual provision confers a potential advantage in relation to UK taxation (whether or not the same advantage) on each of the affected persons.

(5) The profits and losses of each of the affected persons are to be calculated for tax purposes as if the arm’s length provision had been made or imposed instead of the actual provision.

The International Manual provides:

### **413020. Introduction** [Jun 2018]

...Paragraph 1.65 of the OECD Transfer Pricing Guidelines is particularly helpful in finding the appropriate approach towards the arm’s length provision in thin capitalisation cases. This says that the basic transfer pricing approach considers economic substance versus form in thin capitalisation cases:

“[In cases] where the economic substance of a transaction differs from its form... the tax administration may disregard the parties’ characterisation of the transaction and re-characterise it in accordance with its substance. An example of this circumstance would be an investment in an associated enterprise in the form of interest-bearing debt when, at arm’s length, having regard to the economic circumstances of the borrowing company, the investment

would not be expected to be structured in this way. In this case it might be appropriate for a tax administration to characterise the investment in accordance with its economic substance with the result that the loan may be treated as a subscription of capital.”<sup>13</sup>

This means that where a borrower obtains an actual loan of £100m from a non-arm’s length source, but would only be able to borrow £60m at arm’s length, the tax deduction for the interest costs should be restricted to those accruing on £60m of the £100m actually borrowed. The balance would have had to be provided in some other form, most likely as equity. This is an explanation, not a literal recharacterisation in the way that excessive interest was once reclassified as a distribution for tax purposes (see INTM413260). Debt which is found to be excessive may be treated as equity for the purposes of a thin cap analysis, but the interest on the £40m excess remains interest for tax purposes; it is simply disallowed in the computation.

There will be variations in the way debt is treated as equity. There may be negotiations which result in an amount of debt being recognised as serving an equity function, as if that debt had actually been permanently converted into equity, but there will be other instances, for example the application of a debt: equity ratio in an advance agreement, where equity will in effect vary from year to year.

This sort of “recharacterisation” should be uncontroversial, assuming the level of disallowance is agreed. It is a case of finding an explanation, should one be needed, for the presence and treatment of funds that have been deemed “excessive” as debt in thin cap terms. However, if the argument goes further, for example towards saying that the loan transaction would not have taken place at all and something different would have happened at arm’s length, it is recommended that the matter be discussed with CSTD Business, Assets International Transfer Pricing Team before the case is developed,

It is important to remember that thin capitalisation considerations are not limited to determining simply the amount which would have been borrowed at arm’s length, but also extend to the other terms attached to the actual provision, such as the interest rate, duration and repayment terms. Any of these is capable of creating or extending a tax advantage for the UK borrower.

### 24.9.1 *Separate entity basis*

---

13 OECD, *Transfer Pricing Guidelines for Multinational Enterprises and tax Administration* (July 2010).

The International Manual provides:

**413070. Separate entity basis for determining borrowing capacity**  
[Jun 2018]

The separate entity principle is part of the basic pre-condition in TIOPA10/S147(1)(d). This defines the arm's length provision as that "which would have been made as between independent enterprises". The arm's length borrowing capacity of the borrower is therefore the debt which it could and would, as a stand-alone entity, have taken on from an independent lender. To establish this, it is necessary to consider the borrower separately from other members of the same group of companies. This is the "separate entity" or stand-alone basis for determining borrowing capacity.

This approach is derived from OECD Transfer Pricing Guidelines, as expressed in paragraph 1.6 of the Guidelines:

By seeking to adjust profits by reference to the conditions which would have obtained between independent enterprises in comparable transactions and comparable circumstances, the arm's length principle follows the approach of treating the members of an MNE group as operating as separate entities rather than as inseparable parts of a single unified business. Because the separate entity approach treats the members of an MNE group as if they were independent entities, attention is focussed on the nature of the dealings between those members.<sup>14</sup>

The main impact of the "separate entity" basis for determining borrowing capacity is that no account is taken of any guarantees, explicit or implicit, from connected companies (INTM413130). However, it is recognised that, without offending the "separate entity" principle, negotiations with a third party lender would include an assessment of the financial strength of the borrower. This would take into account the income, assets and liabilities of the company, but also of its subsidiaries. In broad terms, this will be based on the strength (or otherwise) of the borrower's consolidated balance sheet and profit and loss account, subject to some analysis of what underlies the figures on the face of the accounts. This grouping is known as the "borrowing unit".

HMRC follows a practical approach and, if consolidated accounts are not drawn up as a matter of course, will request a consolidated

---

14 OECD, *Transfer Pricing Guidelines for Multinational Enterprises and tax Administration* (July 2010).

presentation of the relevant figures. The borrower is not obliged to produce audited consolidated accounts purely for HMRC, so properly drawn up schedules reflecting the consolidated position will be acceptable. This may not be a straightforward task if the exercise embraces companies resident in a number of countries and using a variety of accounting conventions. In such cases it may be helpful to discuss how HMRC may be satisfied without creating major expense and difficulty.

There may be companies that need to be excluded from the consolidation and dealt with according to their own characteristics e.g. finance companies which are likely to have higher proportions of debt to equity than ordinary trading companies. Some subsidiaries may need to be excluded altogether e.g. companies with a dividend block, which a lender might not recognise as assets against which they would be willing to lend. This whole question must be viewed pragmatically.

Further practical guidance on the separate entity measure of borrowing capacity is at INTM542050. The next page gives some background on the pre-2004 treatment; this shows the contrast between the previous statutory approach to the borrowing unit with the practical, analytical approach which has been adopted to deal with the separate entity basis. UK companies under common ownership with the borrowing unit may be able to make a compensating adjustment claim if they have spare borrowing capacity...

## 24.10 “Provision otherwise made”

Section 151(2) TIOPA provides:

For the purposes of this Part, the cases in which provision made or imposed as between any two persons is to be taken to differ from the provision that would have been made as between independent enterprises include the case in which

- [a] provision is made or imposed as between two persons but
- [b] no provision would have been made as between independent enterprises;

and references in this Part to the arm’s length provision are to be read accordingly.

The International Manual provides:

### **413030. The “would” and “could” arguments** [Jun 2018]

The test of thin capitalisation is to test the actual borrowing position against the arm’s length borrowing position.

The arm's length principle recognises that connected parties may enter into transactions with each other on terms which differ from those which would be found in the open market between entirely unconnected persons. Where profits arise and the extent to which those profits are taxed may also differ from the arm's length position.

The application of the arm's length principle requires a judgement on the merit of each individual case to establish what would have happened at arm's length; the terms on which the company in question could have borrowed and would have borrowed (if anything),

- as a separate entity
- from a third party lender unconnected with the borrower, and
- without guarantees or other forms of comfort from any party connected with the borrower.

There are two main ways of looking at the borrowing: what the lender would do and what the borrower would do if the circumstances were as outlined above, and these are expressed as:

- the "could" argument - what a lender would have lent and therefore what a borrower could have borrowed - and
- the "would" argument - what a borrower acting in the best interests of their own business would have borrowed.

**The "could" argument**

This is generally the less subjective issue. The could argument focuses on what a lender would be prepared to lend to the company and on what terms, taking into account the borrower's capacity to borrow, the risk of default, assets (as security) and liabilities (additional drains on the borrower's resources), and its ability to service the debt: in short, how much and on what terms a lender would lend.

Risk elements will include amount, duration of lending, purpose, security, currency and the economic climate at a sector, national and international level.

**The "would" argument**

This issue is more subjective, since it can involve the whole basis on which the business is run. The "would" argument considers the borrower's perspective: whether the borrower would have entered into the actual transaction in the absence of a special relationship (INTM412020) with the lender. Therefore, when trying to establish the amount and terms of arm's length debt, the "would" argument relates to how much, and on what terms, the borrower would have borrowed at arm's length bearing in mind the sort of issues mentioned below.

So, the "would" argument requires consideration as to what terms a borrower would have agreed at arm's length, such as

- the amount of debt, and whether that leaves headroom to allow the borrower to absorb cyclical or seasonal variations, an unforeseen event or a fluctuation in interest rates or profits, and ultimately repay the principal;
- the costs of borrowing, and whether forecasts indicate that the borrower is likely to be able to service the debt fully and still have sufficient cash to operate as a profitable going concern;
- whether the other terms, such as the interest rate or provision for early repayment are ones to which the borrower would have agreed in the absence of a special relationship;
- whether the borrower would have taken out the loan at all.

Consideration of all aspects of the “could” and “would” arguments should highlight situations such as where

- an arm’s length interest rate is being applied, but the amount of debt is more than the borrower could have borrowed from an independent lender, or
- an arm’s length interest rate is applied to an arm’s length amount of debt, but the borrower appears to have no purpose of its own for borrowing the money (and therefore no reason to borrow other than the group relationship).

Debt is not necessarily paid down to nil. A certain level of debt is acceptable, even desirable in most companies, and while higher levels of acquisition debt tend to be reduced in the years following the transaction, there is likely to be a level of debt appropriate to the needs of the business, year on year, appropriate to achieving the right balance between debt, equity and profitability...

## 24.11 Securities (loans)

Section 152 TIOPA provides:

- (1) This section applies where—
  - (a) both of the affected persons are companies, and
  - (b) the actual provision is provision in relation to a security issued by one of those companies (“the issuing company”).
- (2) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring account to be taken of all factors, including—
  - (a) the question whether the loan would have been made at all in the absence of the special relationship,
  - (b) the amount which the loan would have been in the absence of the special relationship, and

- (c) the rate of interest and other terms which would have been agreed in the absence of the special relationship.

The International Manual provides:

**413040. Summary of sections specific to thin capitalisation** [Jun 2018]

There are specific sections within TIOPA10/Part 4 that apply only to loans between two companies:

- TIOPA10/S152 requires that in the case of lending between companies, certain factors to be considered when comparing the arm's length provision with the actual provisions in TIOPA10/S147(1)(d). See INTM413100
- TIOPA10/S181 to TIOPA10/S184 sets out the conditions required for a lender to make a valid compensating adjustment claim where a disallowance has been made in the borrower's computations. See INTM413140
- TIOPA10/S153 deals with the factors that are taken into account when a loan is supported by a guarantee, and the borrower and the guarantor have a special relationship. See INTM413160
- TIOPA10/S191 to TIOPA10/S194 sets out the conditions required for a guarantor to make a valid compensating adjustment claim. See INTM413150

**Non-corporates**

TIOPA10/Part 4 applies to loans made to companies by non-corporates where the participation condition in TIOPA10/S148 is met. However, the explicit instructions regarding factors to be considered as part of evaluating the arm's length provision in TIOPA10/S152 and TIOPA10/S153 do not apply directly as legislation to loans by non-corporates. Even so, the factors that are set out in TIOPA10/S152 and TIOPA10/S153 are generally those which are taken into account by lenders and borrowers acting at arm's length, so in practice the nature of the lender, corporate or non-corporate will have little if any impact on how the arm's length provision is determined.

Claims for compensating adjustments by non-corporates can be made under the conditions in TIOPA10/S174 to TIOPA10/S178 (Para 6 of Sch 28AA)....

24.11.1 *Disregard: Non-business loan*

Section 152(3) TIOPA introduces two disregards:

Subsection (2) has effect subject to subsections (4) and (5).

Section 152(4) TIOPA provides:

If—

- (a) a company (“L”) makes a loan to another company with which it has a special relationship, and
  - (b) it is not part of L’s business to make loans generally,
- the fact that it is not part of L’s business to make loans generally is to be disregarded in applying subsection (2).

Why is this needed? The International Manual explains:

**413100. Special rules for lending between companies** [Jun 2018]

TIOPA10/S152(4) ensures that the fact that the lender is not generally in the business of making loans cannot be taken into account when evaluating the terms.

24.11.2 *Disregard: Guarantee*

Section 152(5) TIOPA provides:

(5) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.

(6) The matters are—

- (a) the appropriate level or extent of the issuing company’s overall indebtedness,
- (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
  - (i) the issue of a security by the issuing company, or
  - (ii) the making of a loan, or a loan of a particular amount, to the issuing company, and
- (c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

Section 153 TIOPA repeats the same material:

(1) This section applies where the actual provision is made or imposed by means of a series of transactions which include—

- (a) the issuing of a security by a company which is one of the

- affected persons (“the issuing company”), and
  - (b) the provision of a guarantee by a company which is the other affected person.
- (2) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring account to be taken of all factors, including—
- (a) the question whether the guarantee would have been provided at all in the absence of the special relationship,
  - (b) the amount that would have been guaranteed in the absence of the special relationship, and
  - (c) the consideration for the guarantee and other terms which would have been agreed in the absence of the special relationship.
- (3) Subsection (2) has effect subject to subsections (4) and (5).
- (4) If—
- (a) a company (“G”) provides a guarantee in respect of another company with which it has a special relationship, and
  - (b) it is not part of G’s business to provide guarantees generally, the fact that it is not part of G’s business to provide guarantees generally is to be disregarded in applying subsection (2).
- (5) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.
- (6) The matters are—
- (a) the appropriate level or extent of the issuing company’s overall indebtedness,
  - (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
    - (i) the issue of a security by the issuing company, or
    - (ii) the making of a loan, or a loan of a particular amount, to the issuing company, and
  - (c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

The International Manual provides:

**413110. Guarantees - what they do and what they are** [Jun 2018]

As explained in INTM413060, a provision may arise from a series of transactions rather than just a single transaction between two connected

companies. A loan from a third party which is guaranteed by a connected person constitutes a provision consisting of a series of transactions. The same would apply to a loan from a connected party which is guaranteed by another connected party. The most common instance will be a single loan supported by a single guarantee but the provision could consist of any number and combinations of loans and cross guarantees.

### **The effect of a guarantee**

Guarantees most commonly support third party borrowing, but can be used to support loans between group companies: for example, a European group treasury company might provide finance to a fellow group company resident in the UK, but under guarantee from the UK borrower's parent company.

With the additional comfort offered to the lender by a guarantor, the lender might provide a loan on more advantageous terms than the borrower could have obtained otherwise, because the guarantee will reduce the risk to the lender. In the event of a failing borrower and no guarantee, a third party lender's prospects of recovering its outlay would be at risk. However, with a guarantee in place, the lender should have greater and more immediate success in recovering debt and interest, simply by exercising its rights under the guarantee and seeking payment from the guarantors, than it would by waiting for a distribution of assets in a liquidation, or having to write off all or part of the loan. The guarantor would of course have to demonstrate that it could make good its pledge, and probably provide security in relation to its commitment. The effect of a guarantee on loan terms is varied. Guarantees may help secure:

- a larger loan
- a lower rate of interest
- an increase in duration
- less demanding covenants on the borrower

Any of these may have implications for the transfer pricing of the transaction e.g. a larger loan may be obtainable, but it may be more than the borrower would be able or willing to take on at arm's length. Also, the guarantee may secure preferable terms as compared to what would be otherwise on offer. A lower interest rate on a larger amount of debt might be regarded as a more attractive and not a more expensive deal. See INTM413120.

The presence of a guarantee does not necessarily signify a change in lending terms, and in any case larger, longer, etc, do not mean "better" for the borrower; a larger loan may be more than the borrower would or could borrow without this help, and therefore more than the borrower

could or would borrow at arm's length. Lenders may seek guarantees as part of a "belt and braces" approach: not a crucial factor, but better to have than not have. A typical example being the cross guarantees required by lenders when they lend to a group of companies.

**413120. Evaluating guarantees: starting with the arm's length cost of debt** [Jun 2018]

TIOPA10/S153 (SCH28AA/Para 1B) is about considering the effect of, and consequently the issue of allowing the costs of pricing guarantees between connected companies. It adopts a similar approach to the way transfer pricing of securities between companies operates - see TIOPA10/S152 (INTM413100). However to understand how the section works it is better to start by looking at the factors that have to be disregarded before looking at the factors that are specifically to be taken into account.

TIOPA10/S153(4) has the same effect for guarantees as TIOPA10/S152(4) has for loans. It ensures that where the guarantor is not generally in the business of making guarantees, that circumstance cannot be taken into account when evaluating what the guarantee fee would be at arm's length.

TIOPA10/S153(5) and (6) ensure that guarantees from connected companies are ignored, so that the borrower's borrowing capacity is evaluated on a separate entity basis (INTM413070). These subsections repeat what was said at TIOPA10/S152(5) and (6), except with different intent. S152 is about how the arm's length provision is calculated for the borrower, for the purposes of testing whether a security is on arm's length terms. S153 repeats the same test, but as a precursor to working out whether a guarantee has an arm's length value to the borrower. The exercise should isolate and exclude the effect of the guarantee to identify what would have been achieved without it.

Looking at the loan whilst ignoring the effect of any guarantees establishes the amount the borrower would have been able to borrow in its own right, and the terms on which it would have done so. The legislation specifically states that guarantees should be disregarded in considering the following specific issues:

- the level or extent of overall debt
- whether a loan would have been entered into
- the rate of interest or other terms

Once this is established, the legislation considers the transfer pricing of the guarantee fee itself - see INTM413110.

**413130. Establishing the arm's length value of a guarantee** [Feb

2020]

This is about guarantee fees and their worth to the borrower, where the borrower is actually charged for the provision of a guarantee. This is therefore about:

- what value the guarantee brings to the borrower, compared to what it could and would obtain without it
- What is the appropriate level for the guarantee fee which the borrower pays

S153 (Para 1B) first establishes the arm's length price of the loan without guarantees. This does not necessarily mean that guarantees will be permanently ignored in pricing the debt. In considering what guarantee, if any, would have been provided at arm's length. TIOPA10/S153(2) (PARA1B(2)) asks that "all factors" be taken into account in working this out, and particularly asks what would have happened in the absence of the special relationship between the borrower and the provider of the guarantee (i.e. at arm's length):

- would the guarantee have been provided at all
- what amount would have been guaranteed
- what consideration (fee, etc) and other terms would have been agreed

This is simply a matter of applying a transfer pricing test to guarantee costs.

At arm's length, a company would not take on the extra cost of a guarantee unless that guarantee makes the overall cost of finance cheaper than it would be on a stand-alone basis. If the cost of the guarantee itself is greater than the saving it brings, it will be disallowed to the extent that it causes the total finance costs relating to the guaranteed debt to exceed the stand-alone arm's length price.

*When does a guarantee provide an arm's length benefit?*

The scenarios below set out how TIOPA10/S153 operates for the borrowing company. The "cost of loan" in the headings below refers to actual costs of borrowing excluding guarantee fees and not adjusted by transfer pricing provisions. These scenarios do not demonstrate the arm's length price of a guarantee, but will show whether the guarantee has brought a benefit when the borrowing is considered on an arm's length basis.

#### 1. Guarantee fee charged and cost of loan exceeds arm's length

The borrower is already paying more than it would if borrowing on a separate entity basis. Considered at arm's length, the value of the guarantee is nil and it simply represents an additional cost. The terms of the loan are adjusted for transfer pricing purposes to the arm's length amount, the non-arm's length element of the loan costs is disallowed,

and the guarantee fee is disallowed.

There is no apparent benefit from this guarantee, so any claim that there is value meriting a guarantee fee should be subject to a thorough analysis to identify whether the guarantee provides any other, less obvious commercial benefit that would justify the payment of a fee. A guarantee might enable a borrower to spread its finance costs over a longer period, which might be advantageous in certain circumstances.

2. Guarantee fee charged and cost of loan is equal to the arm's length  
The cost of the loan is arm's length so no adjustment is required with respect to the loan itself, but as in 1 above, it would be difficult to justify a guarantee fee. It appears to provide no benefit by way of cheaper financing and is likely to be disallowed unless some less obvious benefit can be demonstrated.

3. Guarantee fee charged and cost of loan is less than arm's length  
This situation may arise where the guarantee is taken into account in setting the terms of the loan. For example, the presence of the guarantee may have the effect of improving the credit rating of the borrower and achieve a lower interest rate. As the guarantee has reduced the cost of the loan to below the stand-alone cost, there is a clear benefit to the borrower in entering into the guarantee. It is therefore likely that at arm's length a fee would be paid, as there is a genuine benefit to the borrower. However, the borrower would only agree to pay a fee at arm's length if there was an overall saving, and the level of the fee should reflect this.

4. No guarantee fee charged and cost of loan is less than arm's length  
Where there is a guarantee in place but no fees have been charged, the guarantee may still provide the borrower with beneficial terms, such as a reduced interest rate. The arm's length cost of the loan will exceed the actual cost of the loan, because the guarantee reduces finance costs without itself costing anything. It might be argued that, at arm's length, a fee would be charged for such an effective guarantee, but one cannot be imputed in the computations of the borrower, because transfer pricing legislation operates as a one way street. This scenario creates no tax advantage, so the basic transfer pricing conditions are absent. Of course if the guarantor negotiated a fee, that would be considered on its merits. Evaluating the arm's length value of a guarantee fee should be more than a simple mathematical comparison of actual and arm's length costs. It is worth emphasising that all relevant factors should be considered:

- the obligations of the guarantor
- its ability to fulfil them
- an analysis of the improvement to the borrower's credit worthiness
- consideration as to whether the guarantee brings the borrower

something beyond the implicit parental or group support provided by passive association with fellow group members.

It may be that the benefits provided by a guarantee, particularly informal understandings, are such that a guarantee fee would not normally be justified. Furthermore, where the guarantor is unable to honour its commitments under the guarantee because of the state of its own finances, the guarantee will in practice have no value.

## **24.12 Definitions**

### *24.12.1 Special relationship*

Section 154 TIOPA provides some definitions introduced by s.154(1)

Subsections (3) to (7) apply for the purposes of sections 152 and 153....

Section 154(3) TIOPA provides:

“Special relationship” means any relationship by virtue of which the participation condition is met (see section 148) in the case of the affected persons concerned.

The term “special relationship” is used in OECD Model without definition (though discussed in the commentary) but the definition here is narrower.

### *24.12.2 Guarantee*

Section 154(4) TIOPA provides:

Any reference to a guarantee includes—

- (a) a reference to a surety, and
- (b) a reference to any other relationship, arrangements, connection or understanding (whether formal or informal) such that the person making the loan to the issuing company has a reasonable expectation that in the event of a default by the issuing company the person will be paid by, or out of the assets of, one or more companies.

The International Manual has an interesting passage on implicit guarantees which is not set out here as it is not relevant to the themes of this book.

### *24.12.3 Participatory relationship*

Section 154(5) TIOPA provides:

One company (“A”) has a “participatory relationship” with another

(“B”) if—

- (a) one of A and B is directly or indirectly participating in the management, control or capital of the other, or
- (b) the same person or persons is or are directly or indirectly participating in the management, control or capital of each of A and B.

#### 24.12.4 *Security*

Section 154 TIOPA provides:

(6) “Security” includes securities not creating or evidencing a charge on assets.

(7) Any—

- (a) interest payable by a company on money advanced without the issue of a security for the advance, or
- (b) other consideration given by a company for the use of money so advanced,

is to be treated as if payable or given in respect of a security issued for the advance by the company, and references to a security are to be read accordingly.

Subsection (6) is standard form. However subsection (7) means that all loans are “securities.” It would have been clearer to use the word “loan” rather than to (mis)use the word “securities”, but there it is.

#### 24.13 **Potential advantage for UK tax**

Section 155 TIOPA provides:

(1) Subsection (2) applies for the purposes of this Part.

(2) The actual provision confers a potential advantage on a person in relation to UK taxation wherever, disregarding this Part, the effect of making or imposing the actual provision, instead of the arm’s length provision, would be one or both of Effects A and B.

(3) Effect A is that a smaller amount (which may be nil) would be taken for tax purposes to be the amount of the person’s profits for any chargeable period.

(4) Effect B is that a larger amount (or, if there would not otherwise have been losses, any amount of more than nil) would be taken for tax purposes to be the amount for any chargeable period of any losses of the person.

##### 24.13.1 *Disregarded income*

Section 155(5) provides a disregard for disregarded income:

In determining for the purposes of subsection (3) or (4) the amount that would be taken for tax purposes to be the amount of the profits or losses for a year of assessment in the case of a non-UK resident, there is to be left out of account any income of that person which is—

- (a) disregarded income within the meaning given by section 813 of ITA 2007 (limits on liability to income tax of non-UK residents), or
- (b) disregarded company income within the meaning given by section 816 of that Act.

Subsection (6) provides two more disregards:

For the purposes of subsections (2) to (4)—

- (a) Part 7 (tax treatment of financing costs and income), and
  - (b) paragraph E of the list in section 1000(1) of CTA 2010 (excessive interest etc treated as a distribution),
- are to be disregarded.

#### **24.14 SME exemption**

Section 166(1) TIOPA provides what appears to be a wide exemption, which is then restricted by significant exceptions.

Section 147(3) and (5) do not apply in calculating for any chargeable period the profits and losses of a potentially advantaged person if that person is a small or medium-sized enterprise for that chargeable period (see section 172).

I refer to this as the “**SME exemption**”.

The definition of small and medium-sized enterprises is by reference to EU law.<sup>15</sup> This is not discussed here.

#### **24.15 Election into transfer pricing**

I mention the first exception to the SME exemption for completeness. Section 167(1) TIOPA provides:

- (1) Subsections (2) and (3) set out exceptions to section 166(1).

---

<sup>15</sup> [http://ec.europa.eu/growth/smes/business-friendly-environment/sme-definition/ind\\_ex\\_en.htm](http://ec.europa.eu/growth/smes/business-friendly-environment/sme-definition/ind_ex_en.htm) See s.172 TIOPA.

- (2) The first exception is if the small or medium-sized enterprise elects for section 166(1) not to apply in relation to the chargeable period. Any such election is irrevocable.

Why would one want to elect into transfer pricing?

## **24.16 Non-qualifying territory resident**

The next exception to the SME exemption is more important. Section 167(3) TIOPA provides:

The second exception is if—

- (a) the other affected person, or
- (b) a party to a relevant transaction,

is, at the time when the actual provision is or was made or imposed, a resident of a non-qualifying territory (whether or not that person is also a resident of a qualifying territory).

In short, residents of non-qualifying territories do not qualify for the SME exemption.

Section 167(4) TIOPA provides some general definitions:

For the purposes of subsection (3)—

- (a) a “party to a relevant transaction” is a person who, if the actual provision is or was imposed by means of a series of transactions, is or was a party to one or more of those transactions, and
- (b) “qualifying territory” and “non-qualifying territory” are defined in section 173.

Section 167(5) TIOPA defines “resident”:

In subsection (3) “resident”, in relation to a territory—

- (a) means a person who, under the law of that territory, is liable to tax there by reason of the person’s domicile, residence or place of management, but
- (b) does not include a person who is liable to tax in that territory in respect only of income from sources in that territory or capital situated there.

The drafting is based on OECD Model wording.<sup>16</sup>

## **24.17 Qualifying territory**

---

<sup>16</sup> See 8.3 (Residence under art 4(1)); 8.8 (Exception where source tax only).

Section 173(1) TIOPA provides:

In section 167(3)—

“non-qualifying territory” means any territory which is not a qualifying territory, and

“qualifying territory” means—

- (a) the UK, or
- (b) any territory in relation to which condition A or condition B is met.

I refer to “**qualifying territory conditions A and B**”.

A similar definition is found in s.931C CTA 2009 (exemption of distributions for CT).

#### 24.17.1 *Condition A: Non-discrimination*

Section 173(2) TIOPA provides:

Condition A is that—

- (a) double taxation arrangements<sup>17</sup> have been made in relation to the territory,
- (b) the arrangements include a non-discrimination provision, and
- (c) the territory is not designated as a non-qualifying territory for the purposes of this subsection in regulations made by the Treasury.

For the meaning of “Non-discrimination provision” see 107.8 (“Non-discrimination provision”).

#### 24.17.2 *Condition B: Designated territory*

Section 173(3) TIOPA provides:

Condition B is that—

- (a) double taxation arrangements have been made in relation to the territory, and
- (b) the territory is designated as a qualifying territory for the purposes of this subsection in regulations made by the Treasury.

No regulations have been issued, so condition B does not apply.

---

<sup>17</sup> Section 173(6) TIOPA provides the standard definition: “In this section “double taxation arrangements” means arrangements that have effect under section 2(1) (double taxation relief by agreement with territories outside the UK).”

## CHAPTER TWENTY FIVE

# INTEREST INCOME

25.1

### *Cross references*

The following topics are considered elsewhere:

- 9.3.1 (Split year: Pt 4/5 ITTOIA Income)
- 14.6 (When are dividends recognised).
- 26.1 (Exempt interest: Introduction)
- 40.5.6 (Savings income rates)
- 40.10 (Application of savings rates)

### **25.1 Interest: Introduction**

This chapter considers:

- (1) The taxation of interest income<sup>1</sup>
- (2) Interest withholding tax

A full discussion requires a book to itself. I focus on matters closest to the themes of this book, but it is necessary to consider the subject in the round.

I do not consider:

- (1) Corporation taxation of interest (loan relationships)
- (2) EU interest and royalties directive,<sup>2</sup> which applied to interest/royalty payments between associated companies in different member states, and is repealed, in short, from 1 June 2021.<sup>3</sup>

---

1 One normally refers to interest, not interest income. I use the expression to distinguish two distinct topics: (1) taxation on the receipt of interest, considered in this chapter; and (2) deduction for the payment of interest, considered in the next chapter.

2 2003/49/EC (3 June 2003).

3 Section 34 FA 2021.

For a brief history of the taxation of interest from 1799, see the appendix to *re Lehman Bros* [2016] EWHC 2492 (Ch).

## 25.2 Definition of interest

This section considers the meaning of interest in UK law. For the DTA meaning, see 25.26.5 (DTA definition of interest).

### 25.2.1 *Tax law rewrite*

Most of the cases cited below are pre-ITTOIA cases. The statutory wording has changed, but the old cases are still good law. A Tax Law Rewrite paper provides:

2. ... We do not propose to define interest. “Interest” is a concept of common and contract law and has developed its own natural meaning rather than being a concept of the Tax Acts. Decided cases have considered whether particular payments are interest and the qualities needed to make a payment interest but they have not provided a separate meaning of interest for tax purposes.

3. The charge to tax in [the old legislation] Schedule D Case III(a) is on “any interest of money, whether yearly or otherwise”. Case law demonstrates that the reference to “of money” is to the debt upon which the interest itself is payable. This comes back to the ordinary meaning of interest. ... We have concluded that the words “of money” add nothing to “interest” and can be dropped.

4. We have also decided to dispense with the words “yearly or otherwise”. These follow the historical recognition by tax legislation of a distinction between yearly and short interest. Until the Income Tax Act 1918 there were separate charging rules for yearly interest and short interest. Although these were merged in 1918 the reference to “yearly or otherwise” was retained. The distinction between yearly and short interest is still relevant in some areas, for example the deduction of tax provisions ... but the words do not appear to add anything to the charge to tax on “any interest ...” in Schedule D Case III(a).

5. The removal of the words referred to in paragraphs 3 and 4 is a change in the statute, but not in the underlying law.<sup>4</sup>

### 25.2.2 *What is not interest*

---

<sup>4</sup> <http://webarchive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/rewrite/exposure/second/p62.htm#1>

It is helpful first to clear off the table some items which are not interest. The SAI Manual provides:

**SAIM2040 Interest: when does interest run?** [Dec 2019]

**Interest cannot be back-dated**

Since interest on a loan or debt can normally only run where there is an agreement to pay interest (SAIM2030), it follows that interest cannot be back-dated.

**Example (Deborah)**

D is a controlling shareholder in Deb's Fashions Ltd. When the company started in 2011, she made a loan of £10,000 to the company. There was no agreement in 2011 that the loan should pay interest. In preparing the company accounts for year ended 31 December 2015, the company's accountant advises that the company can now afford to pay interest, and accordingly it is agreed on 4 February 2016 that the loan will carry interest at 3% per annum.

The agreement will have effect only from 4 February 2016. The company may make a payment to D to compensate her for the period when she received no interest on the £10,000. Such a payment is not interest, even if it is calculated on a time basis, or if it is described in the company accounts as 'interest'. The tax treatment of such a payment will depend on the exact nature of the arrangements between D and the company.

**SAIM2050 Interest: voluntary payments** [Mar 2017]

**Voluntary payments are not interest**

Since interest can only accrue by virtue of some right, a voluntary or gratuitous payment cannot be interest, even if it is expressed as in lieu of or 'equivalent to half the interest', as in the case of *Seaham Harbour Company v Crook* (16 TC 333). Rowlatt J's comment that

"interest or an annual sum which is paid really benevolently each time is merely an allowance, and not taxable at all"

is a reflection of that common-law principle.

Truly voluntary payments are likely to be rare. For instance where compensation is paid, labels such as 'ex gratia' may only mean that the payer settled out of court, or 'without admitting liability'. Such a payment is not voluntary or gratuitous if made in consideration of the claimant giving up the right to take proceedings for the damage suffered. See SAIM2330 for more on compensation or damages generally.

See too 25.34 (Grossing-up: not interest).

### 25.2.3 *Label does not matter*

The label does not matter. It rarely does. Interest may be called something else; non-interest may be (mis)described as interest. This is self-evident, but the SAI Manual provides some authorities:

**SAIM2060 Interest: case law** [Dec 2019]

**... What is interest is a question of substance**

What constitutes interest is a question of legal substance, not terminology. In the *Westminster Bank* case Lord Wright said its ‘essential quality...depends on substance not on the mere name’. Lord Simonds, with Lord Porter concurring, said that what needed to be considered was ‘what is its intrinsic character’.

That substantive test was reaffirmed in *Re Euro Hotel (Belgravia) Ltd*, in which Megarry J said

“It has, quite rightly, not been suggested that the language used by the parties to an instrument in describing payments to be made under it can bind the Inland Revenue, or affect the operation of a statute. The question must always be one of the true nature of the payment.”

The contract in that case was one in which it was provided that one party would ‘pay to the Bank interest’. It was held that what was paid was not ‘interest of money’ despite the wording of the contract quoted above, because the Bank in question had not advanced money as a loan, but instead as out and out non-returnable payments for building works. The ‘interest’ was not ‘interest of money’.

### 25.2.4 *What is interest*

The SAI Manual provides:

**SAIM2030 Interest: meaning of interest** [May 2017]

**The legal concept of interest**

Interest is not defined in the Taxes Acts. It is a concept of common and contract law. Halsbury’s Laws of England defines it as follows.

“Interest is the return or compensation for the use or retention by one person of a sum of money belonging to or owed to another...”<sup>5</sup>

---

5 Author’s footnote: See *Halsbury’s Laws of England* Vol 49 (5<sup>th</sup> ed., 2008), para 1303 (Interest in general). Halsbury’s footnote at this point refers to: *Re Farm Security Act 1944* [1947] SCR 394 at 411; *Dunn Trust Ltd v Feetham* [1936] 1 KB 22; *Bennett v Ogston* 15 TC 374; *Bond v Barrow Haematite Steel Co* [1902] 1 Ch 353;

...

**SAIM2060 Interest: case law** [Dec 2019]

The definition of interest has been the subject of much judicial interpretation over the years. In *Westminster Bank v Riches* (28 TC 159), Lord Wright observed

“...the essence of interest is that it is a payment which becomes due because the creditor has not had his money at the due date. It may be regarded either as representing the profit he might have made if he had had the use of the money, or, conversely the loss he suffered because he had not had that use. The general idea is that he is entitled to compensation for the deprivation.”

The leading case on the meaning of ‘interest of money’ is now *Re Euro Hotel (Belgravia)* (51 TC 293). In that case, Megarry J considered that in general the case-law showed there were two requirements which had to be satisfied for a payment to amount to interest

- there must be a sum of money by reference to which the payment which is said to be interest is to be ascertained - a payment cannot be ‘interest of money’ unless there is the requisite ‘money’ for the payment to be said to be ‘interest of’;
- those sums of money must be due to the person entitled to the alleged interest.

He did not suggest that the two requirements are exhaustive or inescapable but that in the ordinary case they sufficed...

The Corporate Finance Manual also discusses this issue; omitting parts which repeat the SAI Manual, this provides:

**CFM33030 what is interest?** [Aug 2018]

... The question of what constitutes interest has been the subject of much case law over the years. Perhaps the best known quotation on what interest is comes from Rowlatt J in *Bennett v Ogston* (15 TC 374). He described interest as ‘payment by time for the use of money’.

... The concept that interest is something that accrues over time is supported by the cases of *Wigmore v Thomas Summerson* (9 TC 577) and *Willingale v International Commercial Bank* (52 TC 242). These cases indicated that true interest accrues from day to day or at periodic intervals.

---

*Westminster Bank v Riches* 28 TC 159; and adds: Money paid in lieu of interest is not itself interest: *Tomkins v Tomkins* (1978) Times, 24 May.

### 25.2.5 *Sum indivisible or dissected?*

The SAI Manual provides:

**SAIM2060: Interest: case law** [Dec 2019]

... ‘**Single indivisible sums**’

Another important case on the nature of interest is *Chevron Petroleum (UK) v BP Petroleum Development* (57 TC 137). Payments between the companies included ‘an interest factor’ and were calculated in accordance with a complex formula. BP made the payments to Chevron after deducting income tax from the interest factors. The point at issue was whether the payments were true interest. [Sir Robert] Megarry’s view was that the ‘interest factor’ was, in law, ‘interest of money’ and that because of the substantive nature of the test the Court would, if necessary, dissect lump-sum payments into interest of money and other sums. He said

“If in its nature a sum is ‘interest of money’, I think it retains that nature even if the parties to a contract provide for it to be wrapped up with some other sum and the whole paid in the form of a single indivisible sum. The wrappings may conceal the nature of the contents but they do not alter them. Were the law otherwise, strong contractual wrappings might become remarkably popular.”

In *Howard de Walden v Beck*<sup>6</sup> the taxpayer purchased for £250k a series of promissory notes of £3,750, payable at three-monthly intervals over 30 years (total £450k). In *Vestey v IRC*<sup>7</sup> the taxpayer sold shares worth £2m for £5.5m payable by 125 yearly instalments. In each case the payments were expressed to be interest free. but were dissected into interest and capital.

But in *IRC v Church Commissioners* 50 TC 516:

[*Vestey*] represents, so far, the high water mark of dissection cases ... I would, for myself, accept this decision as correct, even though I would be unable to follow those portions of the judgment in which the learned Judge appears to favour a general rule of dissection wherever there is a deferred payment of a purchase price.

The reader may think this was a good win for the Church Commissioners

---

6 23 TC 384. On the same facts today the deeply discounted security rules would need to be considered.

7 40 TC 112.

and less meritorious taxpayers need to stand back from an unclear dividing line.

### 25.2.6 Summary

*Pike v HMRC* provides a convenient summary of the above:

It was possible to identify certain characteristics of an amount payable by way of interest. First, it is calculated by reference to an underlying debt. Second, it is a payment made according to time, by way of compensation for the use of money. Third, the sum payable accrues from day to day or at other periodic intervals. Fourth, whilst the payment so accrues, it does not, in order for it to be interest, have to be paid at any intervals: it is possible for interest not to become payable until the principal becomes payable ... Fifth, what the payment is called is not determinative; the question must always be one as to its true nature. Sixth, the fact that an interest payment may be aggregated with a payment of a different nature does not ‘denature’ the interest payment.<sup>8</sup>

In *Pike*, the Court of Appeal regarded the issue as one of fact, concluding: “the FTT was entitled to find that it was interest and made no error of law in doing so.” I would have thought the issue one of law: the facts were all recorded in the relevant loan stock document. But the fact/law distinction is fraught.

## 25.3 Discount

### 25.3.1 Meaning of “discount”

The SAI Manual provides:

#### **SAIM2220 Interest: Specific Inclusions: Discounts [Dec 2019]**

##### **Discounts and premiums**

Paying interest is only one way in which a borrower may ‘reward’ a lender. Debt securities, such as government or corporate bonds, may be issued at a discount. For example, a 5-year bond may have a nominal value of £1,000, but be issued for £800. When the investor redeems the bond at maturity, he or she will receive £1,000 - the £200 profit, or ‘original issue discount’, represents the investor’s reward for lending. A security that is issued at a discount may carry interest as well, or it

---

8 [2014] EWCA Civ 824 at [18].

may be interest-free (a zero coupon bond).

...

But many investors will - rather than subscribing for a security and then holding it to maturity - buy and sell securities in the market. The difference between the purchase price and the face value of the security is called 'market discount'.

A Tax Law Rewrite paper explains:

4. In *Brown v National Provident Institution* 8 TC 57, the House of Lords held that the whole difference between

[1] the price paid for a Treasury Bill and

[2] the sum realised by holding the Bill until maturity, or by selling it or converting it before maturity,

represented a profit chargeable to income tax under Schedule D Case III and that no part of that profit was an accretion of capital. However, more recent cases ... have made the position less straightforward.

5. It is clear that discount is different from interest, although they can be difficult to distinguish. Broadly, "the difference between the price at which the bank buys the bill [of exchange], and the bill's face value is something referred to as 'a discount'".<sup>9</sup> But the cases do not provide an easy definition of the term "discounts" which could be included in the rewritten legislation. Accordingly, we have not attempted to define the term and its meaning must continue to be explained by the case law.<sup>10</sup>

"Discounts" means profits arising from a transaction on a security bought at, or involving, a discount.

### 25.3.2 *Types of discount*

There are three categories of discount:

- (1) DDS discount, ie a discount in a deeply discounted security
- (2) Non-DDS discount, which may be:
  - (a) income
  - (b) capital

### 25.3.3 *DDS discount*

---

<sup>9</sup> *Willingale v International Commercial Bank* 52 TC 242, at p.269.

<sup>10</sup> <http://webarchive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/rewrite/exposure/second/p62.htm#1>

If applicable, the DDS code has priority.<sup>11</sup> Section 367(1) ITTOIA provides:

Any income, so far as it falls within Chapter 2 (interest) and Chapter 8 (profits from deeply discounted securities), is dealt with under Chapter 8.

#### 25.3.4 *Non-DDS discount*

Section 381(1) ITTOIA provides:

All discounts, other than discounts in deeply discounted securities, are treated as interest for the purposes of this Act.

EN ITTOIA provides:

#### **Change 83: Discounts: charge to tax as interest: clause 381**

This change provides for discounts currently taxed under section 18(1)(b) of ICTA and Schedule D Case III (b) to be taxed as interest. Discounts have been part of the charge to tax under Schedule D Case III since at least 1805. Several tax cases have considered aspects of their tax treatment including the difficulties in determining the nature of a “discount” as compared with “interest”. It has emerged from this case law that while the line between the terms can be difficult to identify, they are distinguishable in nature.

Discounts are nevertheless taxed in much the same way as interest. ... Chapter 2 of Part 4 of this Bill [ITTOIA] includes a specific charge to tax for interest which is extended to include other types of income which are currently treated as interest.

Clause 381 provides that discounts, other than those in relevant discounted securities within Schedule 13 to FA 1996 [now, deeply discounted securities], are taxed under Chapter 2 of Part 4 of this Bill as interest, so removing the necessity to distinguish between them for the purposes of the charge to income tax. It follows that the separate charge for these discounts is not rewritten in the Bill.

Section 381(1) is not well drafted. It refers to “all” discounts as that was the wording of the pre-rewrite legislation.<sup>12</sup> “All discounts” means discounts (ie profits from discounts) of an income nature.<sup>13</sup> Profits of a

---

11 See 28.1 (DDS code).

12 Section 18 ICTA 1988.

13 This was accepted in *Healey v HMRC* [2015] UKUT 140 (TCC) at [40].

capital nature are not within s.381(1) and so are not subject to IT as deemed interest.

Discounts are deemed to be interest only for the purpose of ITTOIA, that is, as EN puts it, “for the purposes of the charge to income tax”. Discounts are not interest for other purposes, so they are not subject to withholding tax (which is in ITA). In this context the discount/interest distinction continues to matter.<sup>14</sup>

## 25.4 Premium

The SAI Manual provides:

### **SAIM2220 Interest: Specific Inclusions: Discounts [Mar 2017]**

#### **Discounts and premiums**

... A third way of rewarding an investor is by redeeming the security at a premium. The nominal value of the security is, say, £800, and any interest is calculated on a principal amount of £800, but when the security matures the investor will get back (say) £1,000.

A premium is an additional sum (above the amount borrowed) paid on repayment of the loan.

There are three types of premium:

- (1) A premium may be of an income nature. Then it is interest (even if not described as such).
- (2) A premium may be of a capital nature. Then it is not interest; it may be:
  - (a) A DDS premium (a premium under a deeply discounted security) or
  - (b) Not a DDS premium, subject to tax under CGT rules.

A premium commonly arises where a loan is index-linked. The capital/interest-income distinction is fraught here, as so often, but this topic is not considered here, as I have considered it elsewhere.<sup>15</sup>

Sometimes the word premium is reserved to describe only payments within (2), of a capital nature, but I am inclined to think a payment may be correctly described as a premium even though it constitutes interest-

---

14 See Gabbai, “Withholding tax planning: Should it be disclosed and how might it be challenged?” [2020] BTR 335.

15 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), App. 4 (Tax on payment of index-linked nil rate sum).

income rather than capital. Like a discount, a premium may be of an income or a capital nature. The word itself is neutral. But context will generally show what meaning is intended.

## 25.5 Deemed interest

Section 369(2) ITTOIA provides a list of cases where sums are treated as interest:

ITTOIA s.	Subject	See para
372	Building society dividends	
373	OEIC distributions	
376	Authorised unit trust distributions	
378A	Offshore fund distributions	65.2
379	Registered societies & co-operatives	25.16
380	Funding bonds	
380A	FSCS payments representing interest	
381	Discounts	25.3

See too 25.24 (Disguised interest) and 25.25 (Loan or credit transaction).

## 25.6 Part payment: Interest or principal

If a debt includes both interest and principal (capital), the question may arise as to whether a part payment of the total debt is interest or principal. The question is one of general law (contract law) and not tax law, though it may arise most often in a tax context.

A solvent debtor can<sup>16</sup> direct that a part payment is to be treated as a payment of the interest, or a payment of the principal.<sup>17</sup> That is, if the debtor chooses to pay interest, the receipt is interest; if the debtor chooses to repay principal, the receipt is not interest.

Similarly, a solvent debtor who owes two debts can direct that any payment is to be treated as a payment of one debt or a payment of the other.

If the creditor is dissatisfied with that, their remedy is to sue for remaining sums due.

---

16 Unless the contract otherwise provides.

17 *Cory Bros v Owners of the Turkish Steamship "Mecca"* [1897] AC 286; *Kriticos v HMRC* [2019] UKFTT 0677 (TC) discussed at 116.10.1 (HMRC/taxpayer relationship).

In the absence of a direction, the creditor may choose.

If the debtor is bankrupt, the same applies if the payment is made with the consent of the creditor and the debtor. For instance, if the creditor waives the interest, a payment of the remaining outstanding debt will be principal.

For completeness, there is a complication if:

- (1) The creditor is an interest in possession trust
- (2) The debtor is bankrupt, and
- (3) The trustee-creditor does not expressly agree to attribute a part payment of a debt to interest or to principal.

The position<sup>18</sup> is governed by the rule in *Re Atkinson* [1904] 2 Ch 16. The rule is summarised by Gregory Hill:

... the rules in *Re Atkinson* and *Re Bird*, ... prescribe apportionments between trust capital and income where the realisation of a fixed interest security, such as a mortgage debt or debenture stock, produces a sum which is less than the total amount owing for principal and arrears of interest.

... *Re Atkinson* applies where the deficient security was an authorised investment, [this will be usual the case] and requires the amount actually realised (A) to be divided between capital and income in the proportion which the amount due for capital (B) and that due for arrears of interest (C) bear to one another, but the income beneficiary's entitlement to the interest actually received is not in any way affected. The relevant formulae, where the investment was authorised, are thus:

$$\text{Capital} = (A \times B) \div (B + C)$$

$$\text{Income} = (A \times C) \div (B + C)^{19}$$

The rule in *re Atkinson* was applied in a case where, under a scheme approved by the court, interest on debentures was cancelled and what was paid was regarded as principal (not interest) for tax purposes.<sup>20</sup> But that was a case where the trustees did not consent to treating the payment in that way (they had no choice in the matter as they held only a small holding of the debenture stock concerned). So the application of the rule

18 Unless the trust otherwise provides.

19 Hill, "Successive Interests and Deficient Fixed-Interest Securities" [2012] TQR <http://www.step.org/successive-interests-and-deficient-fixed-interest-securities>

20 *Re Morris* [1960] 1 WLR 1210.

was necessary if one was to be fair to the life tenant. But the fairness is not tax-efficient. The life tenant's receipt is not interest but it is subject to income tax under the category of "annual payment".

## 25.7 Interest: Charge to tax

Section 369(1) ITTOIA imposes the charge on interest:

Income tax is charged on interest.

Section 370 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the interest arising in the tax year.
- (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 370(2) incorporates the remittance basis for foreign source interest.

The SAI Manual comments on deductible expenditure:

**SAIM2440: when interest arises** [Feb 2020]

ITTOIA05/S370 provides that tax is charged on the full amount of interest arising in the tax year. This means that a person receiving interest cannot set off any interest payable, bank charges or similar amounts against sums chargeable under ITTOIA05/S369.

A reference to the "full amount" of profits or gains, or income, does not preclude deductible expenditure, because the question is, what are the profits or gains (or what is the income).<sup>21</sup> But the wording here refers to the full amount of the *interest* which does seem to preclude deductions. And whatever the reason, no-one doubts that is the rule.

Section 371 incorporates the standard rule that liability rests on the person receiving/entitled to the income: see 14.2.1 (Identifying person liable)' 14.5 (When interest arises).

## 25.8 Interest: Location of source

I refer to the person paying interest as the "**debtor**" and the recipient as the "**creditor**".

Foreign source interest is outside the scope of withholding tax and qualifies for the remittance basis, so the question of source matters to both

---

21 See 25.11 (Sweep-up income: Computation).

creditor and debtor.

For source issues generally, see 15.3 (Approach to locating source) ff.

Statute provides virtually no guidance on the location of a source of interest, so one falls back on principle and case law. There are four rival tests, or approaches, to the source of interest:

<b>Approach</b>	<b>Outline</b>	<b>Application</b>
<b>Situs approach</b>	Source is in principle <sup>22</sup> the situs of the debt determined by the IHT/international law situs rules (“ <b>debt situs rules</b> ” <sup>23</sup> )	Accepted until 1993 but now rejected
<b>Multifactorial approaches</b> <sup>24</sup>	Source is identified by weighing up relevant factors.	Adopted by HMRC in 1993, and (in amended form) 2007; upheld in <i>Ardmore</i>
<b>Place of credit test</b>	Source is the place that credit was provided	International case law adopts this test but UK case law does not
<b>OECD model test</b>	Residence of debtor/branch	Used in DTAs

## 25.9 The situs approach

### 25.9.1 *Source in pre-ITTOIA legislation*

The situs approach is readily understandable when one recalls the terms of the legislation in force before the ITTOIA rewrite in 2005. Section 18 ICTA 1988 provided (I omit references to trade which are not relevant here):

- (1) The Schedule referred to as Schedule D is as follows:—  
“SCHEDULE D

22 I say “in principle” as a situs approach allows for points of detail where the rules for the location of the source may differ from debt situs rules.

23 For these rules see 97.1 (Concepts of situs).

24 I use the plural as there are many ways to identify and weigh up relevant factors,

Tax under this Schedule shall be charged in respect of—

- (a) the annual profits or gains arising or accruing—
  - (i) to any person residing in the UK from any kind of property whatever, whether situated in the UK or elsewhere, and
  - (ii) [this concerns trading income] and
  - (iii) to any person, whether a Commonwealth citizen or not, although not resident in the UK from any property whatever in the UK ... and
- (b) all interest of money, annuities and other annual profits or gains not charged under Schedule A, B, C or E, and not specially exempted from tax.”

(2) Tax under Schedule D shall be charged under the Cases set out in subsection (3) below, and subject to and in accordance with the provisions of the Tax Acts applicable to those Cases respectively.

(3) The Cases are—

[Cases I and II concern trading income]

Case III: tax in respect of... any interest of money...<sup>25</sup>

Case IV: tax in respect of income arising from securities out of the UK...;

Case V: tax in respect of income arising from possessions out of the UK

Case VI: tax in respect of any annual profits or gains not falling under any other Case of Schedule D and not charged by virtue of Schedule A, B, C or E.

Now, the important point to take out of this jumble was that the charge on interest did not apply to a non-resident if the income arose from property in the UK; and (which comes to the same) the charge did not apply to income from securities/ possessions “out of the UK” and so taxed under case IV/V (now, relevant foreign income, but the term was not used in the pre-ITTOIA legislation).<sup>26</sup>

The natural reading of the phrase “in/out of the UK” was *situate* inside/outside the UK, ie, the situs approach.

---

25 Case III was not expressed to have any territorial limitation at all! That had to be read in: interest arising from securities or possessions “outside the UK” was taxed under case IV or case V and did not fall within case III.

26 For this issue, see too 32.1.1 (Current/previous charging clause); 32.15.2 (Source: Income from services).

The pre-rewrite legislation did not refer to interest arising from a *source* inside/outside the UK. The word *source* was used as a paraphrase of the statutory words, but it was only a paraphrase.

### 25.9.2 Consensus until 1993

From the earliest times, up to about 1993, the situs approach was universally adopted. In argument and in the decisions, the textbooks cited were private international law textbooks on situs; and case law cited was situs case law.

The IR consultative document “Tax Treatment of Interest paid by Companies to Non-residents”<sup>27</sup> confirmed a situs approach to location of a source of interest was applied up to 1979:

In the case of a simple contract debt it is settled law that the source is where the debtor is resident. Before the ending of exchange control, the Revenue was normally able to accept that interest paid abroad in a foreign currency<sup>28</sup> under a specialty contract (ie a contract under seal governed by foreign law) to a non-resident could have a foreign source, even though the payer was a UK resident company.

The situs approach survives in the Double Taxation Relief Manual (which has not been properly updated since the publication of RI 55 in 1993):

**1730. Interest** [February 2006]

There is sometimes some difficulty in deciding whether interest is treated as having a UK source where the borrowing is made by a UK branch. ...

The leading case on this subject is a Privy Council decision on a Hong Kong estate duty matter (*Kwok Chi Leung Karl*<sup>29</sup> (1988) STC 728). The Privy Council decided that where a debtor company has two places of residence where a debt may be enforced, the locality of the debt (and its source for tax purposes in the absence of statutory provision to the contrary) falls to be determined by reference to the place of residence where under the contract creating the debt the primary obligation is expressed to be performed (that is where the creditor would apply first

---

<sup>27</sup> January 1983 <https://www.kessler.co.uk/tfd-archive>

<sup>28</sup> The currency is not relevant for situs; but it was relevant for exchange control, as a UK resident needed Bank of England consent to buy, or issue, foreign currency securities.

<sup>29</sup> Author’s footnote: *Kwok* is a situs case, see 97.12.1 (Meaning of “residence”).

for his money).

The 14<sup>th</sup> edition of this work gave further references, which are omitted here as the point is now of mainly historical interest.

### 25.9.3 *Bank of Greece*

Against that background, we can consider the *Bank of Greece* case.<sup>30</sup> The key facts were straightforward:

- (1) A Greek bank issued bearer bonds.
- (2) The bank defaulted and the guarantor<sup>31</sup> paid the interest.<sup>32</sup>

The Revenue took the situs approach: the “basic test” for the source of interest was the IHT/private international law situs test:<sup>33</sup>

The basic test for determining whether the payments are income arising in the UK is to be found in *Dicey and Morris on The Conflict of Laws*, 8th ed. (1967), p.508, rule 79, on the determination of the situs of things.<sup>34</sup>

The Revenue argued that although the debt was originally situate in Greece, it had moved and become situate in the UK:

Applying that rule here, the debt is enforceable only in England where it is situate and this is the place where the income arises.

The difficulty which the Revenue argument faced - if one accepts the premise of the situs approach - was that the usual test of situs is residence, and the guarantor was not UK resident! The Revenue answer was that

<sup>30</sup> *Westminster Bank Executor and Trustee Co v National Bank of Greece* 46 TC 472.

<sup>31</sup> For completeness: Following an amalgamation, the payments were made by a company which succeeded to the original guarantor, and which was subject to the same obligations as the original guarantor; but that made no difference.

<sup>32</sup> For completeness: it was not completely clear that guarantee payments should be classified as “interest”. However even if it was not interest it is sensible that location of the source of guarantee income should be determined on principles similar to those which apply to interest income, and the House of Lords proceeded on the basis that there is no difference.

<sup>33</sup> [1970] 1 QB 256, at p.266; the Revenue were not called on to argue the point in the House of Lords but there is no reason to think they changed their view.

<sup>34</sup> Now Dicey, Morris & Collins (15<sup>th</sup> ed., 2012), rule 129; see 97.12.6 (Place-of-enforceability: Synonym of place-of-debtor rule). The text has not materially changed.

where residence and enforceability differed, situs was in the place of enforceability, not residence:<sup>35</sup>

Residence is important because in most cases it is where the debtor is resident that the debt can be enforced. But the true test is: in what country is the obligation primarily enforceable? The answer to the question: ... this was an English contract governed by English law; and under English law the Income Tax Act, 1952, requires tax to be deducted before payment. *New York Life Insurance Co. v Public Trustee*<sup>36</sup> shows that if the test of residence leaves one with a choice between an English and a Greek situs, the English situs must be preferred because the proper law of the contract is English. It would be patently absurd to attribute a Greek situs to the obligation when Greece is the one country where it has been abolished.<sup>37</sup>

The House of Lords held that the interest had a foreign source. First they summarised the facts:

[1] I have come to the conclusion that the source of the obligation in question was situated outside the UK.

- [a] This obligation was undertaken by a principal debtor which was a foreign corporation.
- [b] That obligation was guaranteed by another foreign corporation which, as was conceded before us, had at no time any place of business within the UK.
- [c] It was secured by lands<sup>38</sup> and public<sup>39</sup> revenues in Greece.
- [d] Payment by the principal debtor of principal or interest to residents outside Greece was to be made in sterling<sup>40</sup> and either

---

35 Where residence and enforceability differ, the correct view is that situs is in the place of *residence*, not enforceability; but in 1971 the point was arguable.

36 [1924] 2 Ch 101; *New York Life Insurance* is a situs case; see 97.12 (Simple contract debt).

37 [1970] 1 QB 256 at p.267

38 For completeness. The debt was originally secured on land in Greece but these properties were taken over or destroyed following the German and Italian occupation of Greece in 1941. But nothing turns on that.

39 For completeness: The interest was payable out of income of the Bank of Greece. That is “public” revenues in a loose sense, as the National Bank of Greece was publically owned. The bonds were bank bonds and not government bonds.

40 For completeness: in 1935 this changed so that Greek residents could only be paid in drachmas: see *National Bank of Greece v Metliss* [1958] AC 509 at p.510. But

at the offices of [UK banks in London] or (at the option of the holder) at the National Bank of Greece in Athens, Greece, by cheque on London. Whichever method of payment was selected, ... discharge of the principal debtor's obligation would have involved in the ordinary course either a remittance from Greece to the paying agents specified in the bond or, at the option of the holder, a cheque issued within Greece though drawn on London, and presumably payable there out of funds remitted by the debtors from abroad.<sup>41</sup>

- [e] ... the bond contained no provision for payment by the guarantor at any particular place or in any particular country.

This is a straightforward case of a foreign company raising funds by issuing debentures. Why was it argued the interest had a UK source?

[2] The only circumstances relied on by the Appellants as supporting their contention that the obligation was located inside the UK were as follows.

- [a] Although the original guarantor had no branch in the UK, the present Appellants had acquired one on their universal succession in London.<sup>42</sup>
- [b] Moreover, it was urged that, since discharge of the obligations under the bond in Greece had been caught by the moratorium enacted by the Greek Government, it followed that the only place at which the obligation could have been discharged or enforced was in London.

That is, circumstances had changed, and

- (1) The guarantor (who originally had no branch in the UK) now had a branch in the UK.
- (2) The bonds (which were originally enforceable in Greece) were now enforceable in the UK.<sup>43</sup>

These changes (though seemingly fundamental) did not change the location of the source of the interest:

---

nothing turns on that.

41 The point is that payment would in the ordinary course have ultimately derived from funds situate in Greece.

42 That is, the guarantors who succeeded to the original guarantor acquired a branch in London on their succession to the original guarantor.

43 *National Bank of Greece v Metliss* [1958] AC 509.

[3] Speaking for myself, I do not see how an obligation originally situated in Greece for the purposes of British income tax could change its location either by reason of the fact that

- [a] one guarantor had been substituted for another, or
- [b] ... the second guarantor so substituted subsequently acquired a London place of business, or
- [c] ... the Government of Greece had by retrospective legislation altered by moratorium and substitution of a new guarantor for the purposes of Greek law the obligations imposed upon the principal debtor and the guarantor.

The Appellants acquired no obligation different from that of the original guarantors, and that was the obligation imposed on the original guarantors by the terms of the bonds.

[4] In my view, the bond itself is a foreign document, and the obligations to pay principal and interest to which the bond gives rise were obligations whose source is to be found in this document.

Only one (quite narrow) proposition of law can be inferred from this. *Bank of Greece* is authority for the (sensible) proposition that the location of a source of interest is fixed and does not move with changes of circumstances.<sup>44</sup> I refer to that as the “**stability principle**”.

It was clear, and all sides accepted, that interest paid by the principal debtor (the Bank of Greece, which issued the bonds) had a Greek source.<sup>45</sup> The question whether the interest on the bonds originally had a UK source was not raised, not argued, and not answered. The practice at the time that interest paid by a non-resident was in principle within case IV or V was

---

44 More accurately, the case is authority for the proposition that the changes which occurred in the *Bank of Greece* case did not change the location of the source. However the changes which occurred there were so fundamental that there will be few if any cases where the location of a source of interest does move.

45 In the Court of Appeal at p.487 “it has been common ground both in this Court and at first instance that if the payments of the coupons had been made by the principal debtors (the Mortgage Bank) they would have fallen within Case IV as being in respect of foreign securities.” Likewise the case for the respondents in the House of Lords states at para 6: “It is common ground that if payment of the interest due on presentation of the coupons had been made by the principal debtor, those payments would have fallen within case IV of Schedule D as being in respect of foreign securities.”

applied without need for consideration. In any event, almost<sup>46</sup> all the features of the debt pointed to Greece.

HMRC have argued since 1993, and the taxpayer conceded in *Ardmore* at the Court of Appeal, that paragraph [1] of the quoted passage supports a multifactorial approach: all the features listed in the paragraph were relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise. The Court of Appeal said:

- [1] [Bank of Greece] was the only binding authority on the meaning of the statutory phrase "interest arising in the" UK...
- [2] Lord Hailsham, with whom the other members of the House of Lords agreed, approached the matter experientially by weighing and comparing the factors, and this process has become known as the multifactorial test.<sup>47</sup>

Both propositions are wrong:

- (1) The current statutory phrase "arising in the UK" was not in the law before 2005.
- (2) *Bank of Greece* provides no support for a multifactorial approach. That is not surprising, as the House of Lords had no need to say anything about the location of the source of interest paid by the Bank of Greece. The court heard no argument about the principles of identifying the location of the source of interest. The relevant cases were not cited. In short: the passage sets out a list of *facts*, not *factors*.

The CA misreading in *Ardmore v HMRC* is (more or less) binding, in our doctrine of precedent;<sup>48</sup> so the analysis above is of somewhat academic interest. But I think it is still worth pointing out, because a diligent

46 The following features in *Bank of Greece* did not cause the interest to have a UK source:

- (1) payment made in sterling
- (2) English proper law
- (3) interest paid in England.
- (4) The loan was "raised in London": 46 TC at p.489.

47 [2018] EWCA Civ 1438 at [11].

48 Strictly speaking, a statement in a judgement on a matter that was not the subject of argument is not binding authority. This is basic, but if authority is needed, see *Scrivens v Ethical Standards Officer* [2005] All ER (D) 78 (Apr) at [52] citing long established authorities. But in practice one can expect the courts to follow *Ardmore's* lead.

practitioner who actually reads *Bank of Greece* will otherwise emerge very puzzled.

#### 25.9.4 *Hafton Properties*

*Hafton Properties v McHugh*<sup>49</sup> is another case where the location of the source of interest was straightforward until the circumstances of the debt changed:

- (1) Under the original loan agreement, a US company borrowed from a US bank, the loan being secured on US property.
- (2) Hafton (UK resident) acquired the property subject to the mortgage. It paid the interest due under the original loan agreement.

At the time of *Hafton Properties* (1986) the Revenue still maintained the situs approach. They argued that IHT/international law situs was the test of source:

[The Revenue] maintained that, notwithstanding the arrangements made for the servicing of the debt, the residence of the debtor fixed the situs of the debt. See the citation from Atkin LJ's judgment in *New York Life Insurance Company v Public Trustee* [1924] 2 Ch 101 at page 119<sup>50</sup> in Cheshire and North, *Private International Law* (10th Edn.) at page 537<sup>51</sup>.

The difficulty for the Revenue was that the debtor (the US company) was not UK resident, so the interest should have been foreign source! The Revenue answer was that the US company was not the debtor:

[The Revenue] submitted, ... there was a novation of the personal debt: so that Hafton became ... the debtor under the Note. [The Revenue] accordingly submitted that Hafton is the ultimate debtor, that Hafton is resident in the UK, and therefore that the debt is located in the UK. The situs of the debt locates, in her submission, the source of income, and therefore the source of income is a UK source.<sup>52</sup>

Interest under the original loan was not UK source, and the Special Commissioner held it did not acquire a UK source when the payor changed:

---

49 59 TC 420.

50 *New York Life Insurance* is a situs case, see 97.12 (Simple contract debt).

51 See Cheshire and North, *Private International Law* (15<sup>th</sup> ed., 2017) p.1280.

52 59 TC 420 at p.426.

In one respect the Greek Bank case is different from this one, in that in that case the debtors (both original and substituted) were at all times essentially Greek in character. Nevertheless I collect from Lord Hailsham's speech a clear disinclination to regard sources of income as being peripatetic.<sup>53</sup>

This correctly identifies the basis (or at least, one basis) of *Bank of Greece*: the location of a source of interest does not change. One started here with foreign source interest. The change (a change to the identity of the debtor) did not change the source.

The actual facts of *Hafton Properties* (purchase of property subject to mortgage) are unusual. A mortgage is almost always paid off at the time of purchase. A possible case is on the death of an individual in a civil law jurisdiction, where the heir becomes liable for the debts of the deceased.

A common situation is that an individual who has borrowed funds later changes his or her residence, and continues to pay interest; or the debtor dies and PRs with a different residence continue to pay the interest. The stability principle (the location of a source of interest is fixed and does not move with changes of circumstances) suggests that interest does not become UK source merely because the debtor becomes UK resident. Conversely interest does not cease to be UK source just because a debtor becomes non-resident.

*Hafton* is only a decision at Special Commissioner level but it neatly illustrates the stability principle, and reminds us it is soundly based on *Bank of Greece*, so the case does continue to have some relevance to the current law.

## 25.10 Rejection of situs approach

There were some difficulties in applying a situs approach to the source of interest:

---

<sup>53</sup> 59 TC 420 at p.426. For completeness: The Special Commissioner added that the Revenue argument failed even if *Hafton* was the debtor, because the situs was still outside the UK:

“That is fortified, of course, by the fact that the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found. The mortgage deed is, and so far as I know always has been, in the United States.”

See 59 TC 420 at p.426.

- (1) There were some discrepancies between a strict situs approach and HMRC practice, which perhaps mattered more after the abolition of exchange control in 1979.
- (2) *Bank of Greece* was inconsistent with a strict situs approach. If the basis, or a basis, of the decision is that the source of interest does not move, there is already one inconsistency.<sup>54</sup>
- (3) Debt situs rules did not always give a sensible answer to the location of the source of interest. That is not surprising, as the rules were not devised for that purpose, or indeed for any tax purpose.

If it is accepted that the situs approach is to be abandoned, the question arises as to what should be the new test for the source of interest.

HMRC first made the break from the situs approach in RI 58 (1993). This adopted a multifactorial approach.

If the situs approach is rejected, it followed that the old legislation (which suggests a situs test) was not appropriately worded. The Tax Law Rewrite recognised this. EN ITTOIA cited s.18(3) ICTA,<sup>55</sup> and explained why they replaced the expression securities/possessions “out of the UK” with the expression “*source* outside the UK”:

3079. Section 18(1) and (3) of ICTA require that, for an amount to fall within the charge under[cases IV and V] as opposed to another charging provision, it has to be (a) income, (b) which arises from, (c) securities or possessions, (d) out of the UK ....

3080. Case law establishes that “securities” are a sub-set of “possessions”. The definition of “relevant foreign income”<sup>56</sup> does not maintain any distinction between income which, in the source legislation, is within Schedule D Case IV and income which is within Schedule D Case V.

3081. The definition [in the rewrite legislation, ITTOIA] uses “source” rather than “possessions” (the expression in Schedule D Case V). “Possessions”, in the context of Schedule D Cases IV and V, appeared

---

54 The security in that case was a bearer security, and under the situs test should have been regarded as situate wherever the document was held. It would obviously be impractical to apply that rule for the source of interest, though I do find it puzzling that the case makes no mention of this difficulty.

55 See 25.9.2 (Consensus until 1993).

56 The EN is considering the definition of relevant income in s.830 ITTOIA, but the comments on source apply to the source of interest generally.

in the first income tax Act of 1799 when the word carried associations with, in particular, colonial property that it no longer has. The definition employs the more widely used term “source”.

3082. The meaning of “possessions” [out of the UK] in Schedule D Case V has been interpreted by case law. It covers any and every source of income arising outside the UK. Income charged to tax under Schedule D Cases IV and V by virtue only of section 18(3) of ICTA (that is, excluding amounts treated as income by another provision in the source legislation and charged under Schedule D Case IV or V) has an identifiable source.

3083. In *Colquhoun v Brooks* (1889), 2 TC 490 HL (where the subject was how to tax a partner’s share of a foreign trade), Lord Macnaghten dealt with the meaning of “possessions” in terms of a source of income (page 508):

...The word “possessions” is not a technical word. It seems to me that it is the widest and most comprehensive word that could be used. Why, for instance, should not possessions in Ireland mean everything, every source of income that the person chargeable has in Ireland, whatever it may be? Why should not “profits from possessions out of Great Britain,” which is to be found in [Income Tax Act 1842] Schedule G., No. XI., ... mean profits from every source of income abroad? I use the expression “source of income” because it is as a source of income that the Act contemplates and deals with property and everything else that a person chargeable under the Act may have, and the [Income Tax Act 1842] itself, in section 52, uses the expressions “sources chargeable under [this] Act” and “all the sources contained in the said several schedules” as describing everything in respect of which the tax is imposed.

The current wording, referring to interest arising in the UK, removes the inference of the former wording, that a situs approach should be the test for the source of interest. But it sheds no light on what the test for source actually is or ought to be.

## 25.11 Modern case law

### 25.11.1 Multifactorial test established

The issue finally reached the Court of Appeal in *Ardmore Construction v*

*HMRC*.<sup>57</sup> As noted, the CA adopted a multifactorial test, and even though it was wrong to cite *Bank of Greece* as support,<sup>58</sup> this approach is now established.<sup>59</sup>

### 25.11.2 What multifactorial test?

The question then is: What are the relevant factors, and how does one weigh them up? The court's comments are discouraging:

... the correct approach is not merely multifactorial but also acutely fact-sensitive. The court or tribunal must examine all the available facts both singly and cumulatively.

That does not take us very far.

### 25.11.3 Fact or law?

The Court of Appeal in *Ardmore* cite the familiar dictum:

The Legislature in using the word “source” meant, not a legal concept, but something which a practical man would regard as a real source of income. Legal concepts must, of course, enter into the question when we have to consider to whom a given source belongs. But the ascertainment of the actual source of a given income is a practical, hard matter of fact.<sup>60</sup>

The statement that the issue is one of fact is code for saying that (1) the matter is not, or not easily, appealable, and (2) no further attempt is to be

---

57 EWCA Civ 1438

58 See 25.9.3 (*Bank of Greece*).

59 Pre-*Ardmore* decisions at tribunal level are now inconsequential and not considered here.

60 *Nathan v FCT* [1918] HCA 45; [1918] 25 CLR 183 at p.189-190 cited for instance in *Rhodesia Metals v CT* [1940] AC 774 at p.789. The adjectives “practical, hard” are meaningless. The point is made discreetly by Lockhart J at first instance in *CT v Spotless Services* (“... a little opaque...”). For criticism of the “practical man” test see Stack et al, “Commissioner for Inland Revenue v Lever Brothers and Unilever Ltd: A practical problem of source” (“a practical man would say the obvious thing to do was to ask a lawyer... not so much a test as an attitude of mind in which the Court should approach the task of judgment”).

[https://www.researchgate.net/publication/331046971\\_Commissioner\\_for\\_Inland\\_Revenue\\_v\\_Lever\\_Brothers\\_and\\_Unilever\\_Ltd\\_A\\_practical\\_problem\\_of\\_source](https://www.researchgate.net/publication/331046971_Commissioner_for_Inland_Revenue_v_Lever_Brothers_and_Unilever_Ltd_A_practical_problem_of_source)

made to clarify what the test actually is.<sup>61</sup>

In *Ardmore Construction v HMRC* at the Upper Tribunal:

62. The jurisdiction of this Tribunal is limited to points of law arising out of a decision...

65. The question for us is whether we find any error in the approach of the FTT in *Perrin*. We can identify no material error. [UT reviewed the facts and concluded:] In summary, therefore, the FTT was, in our view, fully entitled on the evidence to find that the substantive source in Mr Perrin's case was in the UK.

CA agree but express themselves more strongly:

The evaluative nature of the exercise of applying the source principle means also that the appellate tribunal should be slow to interfere, especially as in this case the Tribunals<sup>62</sup> are specialist tribunals. Consequently, in my judgment, *Ardmore* has to satisfy this Court that the Tribunals were wrong in the sense that they left a material factor out of account or took a matter into account that should have been left out, or misdirected themselves in law or fact or reached a perverse conclusion.<sup>63</sup>

The CA judgment gives very little indication of how to approach the test. The judgement extensively sets out arguments of HMRC and taxpayer, but without expressing much if any view itself, so that takes us no further. The Court of Appeal just makes a few brief comments on specific factors, discussed below, and concludes:

I see no basis, therefore, for holding that the Tribunals left out of account

---

61 See *Tariff Reinsurances v Comr of Taxes* (1938) 59 CLR 194 at p.208: "We are frequently told... that such a question is "a hard, practical matter of fact". This means, I suppose, that every case must be decided on its own circumstances, and that screens, pretexts, devices and other unrealities, however fair may be the legal appearance which on first sight they bear, are not to stand in the way of the court charged with the duty of deciding these questions. But it does not mean that the question is one for a jury or that it is one for economists set free to disregard every legal relation and penetrate into the recesses of the causation of financial results, nor does it mean that the court is to treat contracts, agreements and other acts, matters and things existing in the law as having no significance."

62 Footnote added: The reference to "the Tribunals" skates over important issues of the roles and relationship of the first-tier and Upper Tribunals, but it was not necessary or appropriate for the CA to address that.

63 at [40].

any material factor or took any immaterial factor into account.

In the circumstances the decision of the Upper Tribunal in *Ardmore* remains the best guidance currently available.

## 25.12 Relevant factors

There are many possible connecting factors. It is not possible to compile a full list but the main factors are as follows:

- (1) The debtor:
  - (a) residence of debtor
  - (b) place where debtor carries on business<sup>64</sup>
- (2) The interest:
  - (a) place of fund used to pay interest (looking before payment)
  - (b) place where interest is received (looking after payment)
- (3) The money borrowed or credit provided:
  - (a) Place of money used to make loan (looking before payment)
  - (b) Place where money is received (looking after payment)
  - (c) Place where money is used by debtor (eg if used to purchase UK/non-UK asset or in UK/non-UK business)
  - (d) The place where credit is provided
- (4) The contract under which interest is paid:
  - (a) proper law
  - (b) place where contract would be enforced
  - (c) place where contract is made
- (5) The debt, regarded as an asset: situs under IHT/international law principles (eg location of deed if debt is a specialty)
- (6) The security for debt (if any): situs under international law principles
- (7) The guarantor (if any): residence of guarantor
- (8) The creditor:
  - (a) residence of creditor
  - (b) place where creditor carries on business
- (9) In the case of registered securities, the place of the register

In *Ardmore* the UT described some factors as irrelevant. The CA thought

---

<sup>64</sup> Place of incorporation is another conceivable connecting factor but no-one has ever suggested it should be relevant.

there was no such thing as an irrelevant factor,<sup>65</sup> but it hardly matters, as there is no effective difference between an irrelevant factor and one of very little weight. Perhaps one should say “generally irrelevant” rather than “irrelevant”.

### 25.12.1 *What is the source?*

One problem in deciding which factors to apply is the difficulty or ambiguity in identifying what actually is the “source” of interest. One might say that the source is:

- (1) The debtor who pays the interest
- (2) The funds used to pay the interest
- (3) The money borrowed or credit provided
- (4) The contract
- (5) The debt (regarded as an asset)

If one identifies the source as any one of these, then identifying the location of the source may become easier: but of course all of them are intimately connected to the existence of the interest.

In *Ardmore v HMRC*:

43. ... in normal cases of a simple loan, the debt which will be the source of the interest, and not any underlying activity of the creditor. That may not hold good in particular circumstances, for example

[1] where a debt arises in the course of a trade, where the trade might be regarded as the source,

[2] or in special circumstances, such as those which arose on the *Lever Bros* case,<sup>66</sup>

but where the case is one of a simple loan, the asset of the creditor, on which the interest arises, is the debt, and it is that debt which will be the

---

65 At [41]: “HMRC urged on us that some factors were “irrelevant” whereas on a multifactorial test a factor is still relevant even if it carries little weight.”

But it turns on what one means by “factor”.

66 *IRC v Lever Bros* [1946] AD 441; 14 SATC 1

[https://www.kessler.co.uk/wp-content/uploads/2014/07/1202\\_001.pdf](https://www.kessler.co.uk/wp-content/uploads/2014/07/1202_001.pdf)

But *Ardmore* rejected the source test proposed in *Lever* (where credit was provided). See Stack et al, “Commissioner for Inland Revenue v Lever Brothers and Unilever Ltd: A practical problem of source”

[https://www.researchgate.net/publication/331046971\\_Commissioner\\_for\\_Inland\\_Revenue\\_v\\_Lever\\_Brothers\\_and\\_Unilever\\_Ltd\\_A\\_practical\\_problem\\_of\\_source](https://www.researchgate.net/publication/331046971_Commissioner_for_Inland_Revenue_v_Lever_Brothers_and_Unilever_Ltd_A_practical_problem_of_source)

source.

### 25.12.2 *Some principles*

Principle cannot identify the “right” connecting factor(s) but it can identify some approaches to the issue as unsatisfactory, at least in some cases.

The location needs to be known by the debtor (who may have to deduct withholding tax) and creditor (who may be taxable). This suggests no weight should be given to factors not likely to be known by both parties.

Factors which the parties can manipulate without commercial cost or inconvenience are not suitable (at least from HMRC’s viewpoint, and the courts will sympathise).

Many of the connecting factors may change, and it is possible that the source of interest can change its location. However, it would not be convenient for location of a source to change very often. There are two ways to deal with this:

- (1) to place little or no weight on features which may easily change; or
- (2) to look at the situation at the time the debt arises, and to ignore later changes.

The two solutions are not incompatible.

Debts are frequently assigned, and it is suggested that:

- (1) assignment should not alter the location of the source; and
- (2) facts not likely to be known by an assignee should not affect the location.

### 25.12.3 *Debtor residence/place of business*

Residence of the debtor, whatever the test of residence, is in principle a satisfactory connecting factor.

In *Ardmore Construction v HMRC* at the Upper Tribunal:

49. That the residence of the debtor is a material factor is clear from the Greek Bank case. There is, however, a question as to the weight which should be placed on that factor...

52... the residence of the debtor is a factor regardless of whether that place of residence is the jurisdiction in which the parties may bring proceedings [because of an exclusive jurisdiction clause].

53. Residence is, on the other hand, only one factor, and it cannot be elevated into the most important factor, whether alone or when combined with the question of the location of the debtor’s assets. ... The question

is simply a multifactorial one, having regard to all the circumstances and all the relevant factors.<sup>67</sup>

In the case of a dual resident debtor, or joint debtors resident in different places, this test would not work, but other factors such as the place of business connected with the loan would fill the gap.<sup>68</sup>

A difficulty arises if debtors change their residence, which if not common is by no means impossible. This was pointed out in *Philips*.<sup>69</sup> The stability principle would suggest one should ignore subsequent changes of residence.

#### 25.12.4 *The interest*

The next two possible connecting factors are:

- (a) place of fund used to pay interest (looking before payment)
- (b) place where interest is received (looking after payment)

These could be useful connecting factors if they were stable, but they can and often will change from year to year. This difficulty is noted in *IRC v Philips' Gloeilampenfabrieken*:

It is not sufficient to ascertain the fund out of which the income was in fact paid, which is no more than the reservoir from which it was drawn. It is not whence it was paid, but why it was paid, that is the determining factor. The emphasis is not upon the receipt, but upon the derivation of the income. Consequently, it does not constitute the source within the meaning of the section that the money [used to pay the interest] was drawn from or provided by the trading profits in New Zealand. The New Zealand company [the debtor] was free to obtain the funds with which to perform its obligation anywhere it chose, from deposits in England, if it had any, or from borrowing in England, or from the profits of its trading in New Zealand. That was a domestic matter. The money could

---

67 [2015] UKUT 633 (TCC).

68 Contrast the situs rules: 94.12.2 (Dual resident debtor); 94.12.4 (Joint debtors).

69 *IRC v Philips' Gloeilampenfabrieken* [1955] NZLR at p.898: "In my opinion, the fallacy in the able argument presented by [counsel for the Revenue] was exposed when he felt obliged to submit (as indeed he was if he was to be consistent) that if a New Zealand citizen, while in London, found himself in financial difficulties and had to obtain from a London money-lender a loan, which he was able to repay over a period of years only after he had returned to his own country, the London money-lender could be assessed with [New Zealand] income tax ..."

“come from” any of these “sources”, but none of them would be the source from which the [creditor] derived what it received as income.<sup>70</sup>

In other words, one should not equate the location of the source of the interest with the situs of the *resources* that the debtor uses to pay the interest.

But in *Ardmore v HMRC* the CA considered this was important:

The funds paid over as interest derived from funds generated in the UK... The importance of [proper law and jurisdiction] clauses is also undermined by the fact that the enforcement of any judgment following default on assets of *Ardmore* would be in the UK (and it is not necessary to go further than to note that all the available assets to meet the liabilities to the lender were in the UK).<sup>71</sup>

Likewise the UT in *Ardmore* identify “the ultimate, or substantive, source of discharge of the debtor’s obligation” as a relevant factor for “normal cases of a simple loan”.

On the other hand the UT in *Ardmore* identify as irrelevant “the place of payment of the interest”.

### 25.12.5 Money borrowed/credit provided

The next possible set of connecting factors are:

- (a) Place of money used to make loan (looking before payment)
- (b) Place where money is received (looking after payment)
- (c) Place where money is used by debtor
- (d) In cases where money is not lent, where credit is provided

These seem sensible connecting factors.

It may be objected that place of receipt allows tax planning where money is lent in one jurisdiction and then immediately transferred to another. But the courts could look through transient arrangements of that kind to identify the place where the money is substantially received.

However the UT in *Ardmore* identify as irrelevant “the place where credit was advanced”.

### 25.12.6 Loan contract

---

<sup>70</sup> See 25.12.7 (Situs of debt).

<sup>71</sup> EWCA Civ 1438 at [42].

The next possible set of connecting factors are:

- (a) proper law
- (b) place a contractual jurisdiction clause requires the contract to be enforced
- (c) place where contract is made

These are less suitable connecting factors as they are within the control of the parties.<sup>72</sup> Also the Courts would not want to discourage use of UK proper law and courts, by risking imposing a tax charge on interest.

In *Ardmore* the CA agreed:

There was no default and the Gibraltarian exclusive jurisdiction and governing law clauses would only matter if there was default.

### 25.12.7 *Situs of debt*

The situs of a debt under IHT/international law rules is (1) the location of the document if a specialty,<sup>73</sup> or a bearer security or negotiable instrument,<sup>74</sup> or (2) for a simple debt, the residence of the debtor.

The location of a document is obviously an unsuitable connecting factor. The debtor will not have possession of the deed and may not know its location. The location is easily changeable, and the rule would allow easy tax planning.

It is not illogical or inconsistent to say that the situs of a debt for IHT/international law purposes is in one country, but the location of the source of interest on that debt for income tax purposes is in another. This is the case for shares: the source of dividends is the place where the company is resident, but the situs of shares is the place where the shares are registered. One might simply say that the location of a source of income and the situs of assets are distinct concepts governed by distinct rules. Alternatively, and more subtly, one might say that the source of interest (for IT purposes) is not the debt but the transaction which gives

---

72 Place of enforceability may also be unsuitable as a contract may be enforceable in more than one place, or the place of enforceability may be unclear.

The place the contract is made is also unsuitable because the place the contract is made is sometimes difficult to identify; see 20.19 (Where is contract made).

73 See 97.13 (Specialty obligation).

74 See 97.7 (Bearer documents and negotiable instruments).

rise to the debt (which may be located in a different place from the location of the debt).<sup>75</sup> Either way, the IHT/international law situs rule is not the test of source.

In *Ardmore Construction v HMRC* the UT said:

46. In addition, it was accepted before us, and we consider rightly, that the legal situs of the debt is not a relevant factor for income tax purposes. Thus, the fact that the situs of a simple debt is where the debtor resides is not a factor independent of the residence of the debtor itself...

47. It would follow from this that the situs of a specialty debt would likewise also be of no relevance. The distinction between the situs of a simple debt and that of a specialty debt was one of the principal reasons why the New Zealand courts in *Philips* rejected the proposition that source should be determined according to situs.<sup>76</sup> Although situs is relevant in connection with certain taxes... it is not appropriate for source for income tax purposes to depend on whether the debt instrument is a simple contract or by deed.

CA accepted this view (though the less one says about the reasoning the better):

The parties are agreed that the situs of the debt (that is, the place where a debt is located) for the purpose of the conflict of law rules is of little or no weight as the rules as to situs are legal rules only.<sup>77</sup>

### 25.12.8 *Situs of security for debt*

A rule that source of interest on a secured debt depends on the location of the property on which the debt is secured is not sensible because in normal

---

<sup>75</sup> *Philips* takes this approach.

<sup>76</sup> “If the location of the debt were to be selected as the test, the source would be located differently according as whether the contract was a simple contract or a specialty; and, in the latter case, its location would arbitrarily change with the actual situation of the deed itself. Such a test would, indeed, be far from the practical commonsense test prescribed by the authorities; and I cannot think it proper to apply it here if some other is available.” *IRC v Philips’ Gloeilampenfabrieken* 10 ATD 435 [1955] NZLR 868 <https://www.kessler.co.uk/wp-content/uploads/2012/04/CIRvPhilips.pdf>  
I discuss *Philips* in detail in the 14<sup>th</sup> edition of this work para 18.9.1 (*IRC v Philips*). The High Court of Australia rejected the situs approach for similar reasons in *Studebaker Corporation of Australasia v CT*.

<sup>77</sup> at [16].

circumstances the security will not be called upon. It would often not be appropriate.<sup>78</sup>

- (1) The rule does not work if a large debt is secured on an asset of a small value. Would one say that a £100 million debt is situate in Jersey if it is secured on property there worth £100,000? Also, one cannot have a rule where the location of interest depends on the relative value of the debt or the security, which may fluctuate from time to time (though that might be resolved by looking only at the position at the time the debt arises.)
- (2) If land determines the location of interest from of a debt secured on land, then a debt charged on (say) shares should be situate where the shares are situate.
- (3) A debt may be charged on property in two different countries.
- (4) This rule would sometimes allow scope for tax planning.

But the UT in *Ardmore* disagree and identify the residence of the original guarantor as a relevant factor for “normal cases of a simple loan” the location of the security originally provided.<sup>79</sup>

#### 25.12.9 *Residence of guarantor*

No weight should be given to the residence of a guarantor, since in the normal course of events a guarantor would not be called on to make any payment. Even if it a guarantee is called on, it does not alter the source of the interest. But the UT in *Ardmore* disagree and identify the residence of the original guarantor as a relevant factor for “normal cases of a simple loan” .

#### 25.12.10 *Residence of creditor*

No weight should be given to the residence of the creditor, since one is looking for the source and not the destination of the interest; also this may change easily as debts are usually assignable and frequently assigned.<sup>80</sup>

---

<sup>78</sup> Similar issues arise for IHT situs of secured debts: see 97.17 (Debt secured on land).

<sup>79</sup> The view that even a former security is a relevant factor is consistent with the stability principle (that the location of a source of interest is fixed and does not move with changes of circumstances).

<sup>80</sup> A further objection to this factor might be that a single debt may be owed to joint creditors resident in different places, Interest on that debt cannot have two different

In *Ardmore v HMRC* CA agree:

In this case, however, the conclusion of the Upper Tribunal that the residence of the creditor should carry little weight cannot be criticised. The immediate search is for the source of the interest rather than a search indirectly for the source of the loan.<sup>81</sup>

Likewise the UT in *Ardmore* identify as irrelevant “the residence of the creditor or the place of activity of the creditor”.

#### 25.12.11 *Branch/agency/PE*

It seems that a branch is regarded as a separate person. The SAI Manual provides:

**9095. Yearly<sup>82</sup> interest: UK source: companies** [Mar 2017]

*Interest paid by companies*

In deciding whether or not interest has a UK source, in addition to the factors described in SAIM9090, there are other matters to be taken into account for companies.

**Companies and branches**

Where the debtor is a company it may of course have more than one residence – for example it may be registered in a US state but managed and controlled from the UK.<sup>83</sup> Jurisdiction in relation to a corporation will in general depend on where the corporation does business (except where the EU Regulation or the 1968 Convention apply – see SAIM9090). So for these purposes it will be resident where it carries on business. If a debtor company has a number of places of residence/business then to decide the location of the debt you have to look at the terms of the loan agreement. The loan agreement should say where the interest and loan are payable, which (if the company is also resident in that place) will determine whether or not the interest has a UK source.

When it comes to considering loans made to a branch of a UK company the source of the interest is overseas if all the following factors apply:

---

sources. But that would not preclude any regard to the residence of the creditor where there is only one creditor.

81 STC 1487 at[42].

82 Author’s footnote: Although the Manual heading refers to yearly interest, the same rules should apply to short interest.

83 The example given is using “Residence” in the sense of jurisdiction-residence.

- [1] an overseas branch of a UK resident company has entered into a loan agreement overseas;
- [2] the loan is for the business of the overseas branch;
- [3] the overseas branch pays the interest from its income;
- [4] the loan agreement obligations are enforceable in the jurisdiction in which the branch is situated.

The paragraph does indicate a “safe haven” situation where one may be confident that the interest paid by a person who is UK tax-resident does not have a UK source, at least so far as one can rely on HMRC manuals and practice.

The SAI Manual continues:

Conversely, where a branch of a non-UK resident company enters into a loan agreement in the UK for the business of its UK branch and the UK branch pays the interest then the interest is regarded as having a UK source.

#### 25.12.12 *Changes in international law*

The background law (that is, private international law) has changed since the date of the situs cases which underlie the HMRC view of the meaning of jurisdiction-residence which is a factor in determining the source of interest. For instance, *New York Life Insurance* was decided in 1924. Jurisdiction is now largely governed by international conventions, under which it is only approximately correct to say that residence of the debtor is the test of jurisdiction, (though in most cases the end result will be the same). In short, it is not the case that the residence or place of business of the debtor is the place the debt will be enforced.<sup>84</sup> So if jurisdiction-residence is the test, or at least a relevant factor in the test, there is a choice. Does interest arise:

- (1) in the place where the debtor has jurisdiction-residence; or
- (2) in the place where the debt is actually enforceable.

The author of the SAI is aware of the question, but does not give the answer:

**9090. Yearly interest: UK source: The general rule [Dec 2019]**

---

<sup>84</sup> See 97.12 (Simple contract debt). In *Bank of Greece* the debt was enforceable in the UK but the interest was not UK source.

*Duty to deduct tax from interest with a UK source***EU rules**

If the debtor is resident within the EU, the Council Regulation (EC) 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial matters, [“Brussels I Regulation”] and the 1968 ‘Brussels Convention’,<sup>85</sup> may have an impact on the general rule described above.

There are different rules for individuals, corporations, and trusts.

The usual rule is that where an individual is domiciled in a contracting state, then they should be sued in the courts of that state (Article 2 of the Regulation/Convention).<sup>86</sup> Domicile is defined according to the rules of that contracting state but for these purposes only, it is, in the UK, linked to the individual’s residence. Under these rules an individual is domiciled in England for example if he is resident there and the nature and circumstances of his residence indicate that he has a substantial connection with England.<sup>87</sup> So an individual resident in England would in general terms only be sued in the courts in that country. However this is a complex area and there are exceptions. For example it may be argued that:

- [1] the case does not fall within the Regulation;
- [2] another convention or international agreement gives jurisdiction to

85 Author’s footnote: Brussels I Regulation applies in EU Member States. It supersedes the 1968 Brussels Convention except for some territories which fall within the scope of the Convention and which are excluded from the Regulation pursuant to Article 349 TFEU.

86 Author’s footnote: Article 2 Brussels I Regulation provides: “Subject to this Regulation, persons domiciled in a Member State shall, whatever their nationality, be sued in the courts of that Member State.”

87 Author’s footnote: Article 59 Brussels I Regulation provides:  
 “1. In order to determine whether a party is domiciled in the Member State whose courts are seised of a matter, the court shall apply its internal law.  
 2. If a party is not domiciled in the Member State whose courts are seised of the matter, then, in order to determine whether the party is domiciled in another Member State, the court shall apply the law of that Member State.”

In England, s.41(3) Civil Jurisdiction and Judgments Act 1982 provides:

“... an individual is domiciled in a particular part of the UK if and only if—

- (a) he is resident in that part; and
- (b) the nature and circumstances of his residence indicate that he has a substantial connection with that part.”

- another state's courts
- [3] proceedings have already begun in another state's courts; or
- [4] it has been agreed under Article 22 of the Brussels Convention<sup>88</sup> that the courts of a particular state have exclusive jurisdiction.

Point [4] is common, as the parties may agree any jurisdiction which suits them. What happens then? The Manual does not say:

In any case in which it is argued that a UK resident debtor can be sued in a Member State in precedence to the UK courts please refer the case to BAI (Financial Products Team).

The SAI Manual then turns to consider the impact of modern private international law on companies:

**9095. Yearly interest: UK source: Companies [Mar 2017]**

*Interest paid by companies*

**Companies within the EU**

Under both the EU Regulation and 1968 Convention, domicile is the main ground of jurisdiction and will, at first sight, determine the rules for the recoverability of debts. EU regulation 44/2001 provides for a definition of domicile for corporations so that the company is domiciled where it has its statutory seat (in the UK its registered office), central administration or its principal place of business.<sup>89</sup> However it is

88 Author's footnote: I think the reference should be Article 23 Brussels I Regulation, which provides:

"1. If the parties, one or more of whom is domiciled in a Member State, have agreed that a court or the courts of a Member State are to have jurisdiction to settle any disputes which have arisen or which may arise in connection with a particular legal relationship, that court or those courts shall have jurisdiction..."

89 Author's footnote: Article 60 Brussels I Regulation provides:

"1. For the purposes of this Regulation, a company or other legal person or association of natural or legal persons is domiciled at the place where it has its:

- (a) statutory seat, or
- (b) central administration, or
- (c) principal place of business.

2. For the purposes of the UK and Ireland 'statutory seat' means the registered office or, where there is no such office anywhere, the place of incorporation or, where there is no such place anywhere, the place under the law of which the formation took place."

Thus Brussels I Regulation provides *three* places where a company is domiciled and may be sued. There is no single place where the debt can be enforced which would

important to note that a corporation is not domiciled in a country for these purposes merely because it does business there.

The Manual does express a view on the location of a source in a case where the debtor is jurisdiction-resident in one place but domiciled (in the sense of the Regulation) in another:

If an EU based company carries on business in a country in which it is not domiciled you have to consider the terms of the loan agreement to determine the situation of the debt. For example, if a company which has its principal place of business in the UK also carries on business in another Member state, where the interest and loan are payable in that other Member state and that member state's courts have jurisdiction then the interest will be non-UK source.

For branches of EU companies the position is as described above for branches generally.<sup>90</sup>

Thus in the Manual's view, the place of jurisdiction-residence has priority.

In the 14<sup>th</sup> edition of this work, I said: "it is suggested that the better approach is to pay no regard to modern conflicts law in determining the source of interest, even if the place where the debt is enforceable is not the place where the debtor resides." CA agree: see above.

### 25.12.13 *Interest after debtor death*

I refer only for completeness to *IRC v Viscount Broome's Executors*. This was another case where the circumstances of the loan had changed:

- (1) The original debtor was primarily<sup>91</sup> resident in Kenya.
- (2) The original debtor died. His executors were UK resident.
- (3) The loan was enforceable in Kenya. The UK executors who became liable for the debt paid the interest in the UK out of funds in the UK.

Both sides agreed, and the judge accepted, that the situs approach was the test of source:

---

serve as a test for the location of a source.

90 Author's footnote: Article 5(5) Brussels I Regulation provides:

"A person domiciled in a Member State may, in another Member State, be sued:  
... 5. as regards a dispute arising out of the operations of a branch, agency or other establishment, in the courts for the place in which the branch, agency or other establishment is situated;"

91 Also UK resident, but that does not matter.

There was really very little dispute between [counsel for the Revenue] and [counsel for the taxpayer] as to the law (particularly perhaps as to the Income Tax law) which is applicable. There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... This also seems to me to be clear, and it is elaborately explained in the case of the *English, Scottish and Australian Bank, Limited v IRC*,<sup>92</sup> this, I say, was not questioned, that the locality of a simple contract debt is the place where the debtor is to be found.<sup>93</sup>

The dispute concerned where the situs actually was. Since the executors were resident in the UK, one would expect that the situs of the debt would also be in the UK. The taxpayer's argument to the contrary was curtly dismissed:

I think the executors were resident in this country. Mr. Latter [counsel for the taxpayer] contended that it was not the question of the executors; it was a question of the executorship. I hardly ever fail to understand Mr. Latter, but I am not perfectly certain that I did exactly understand what he meant by the residence of the executorship.<sup>94</sup>

More analytically, an executorship is not a person and does not have a residence. Only executors do.

*Broome* has no relevance to the current law because it is inconsistent with

---

92 *English, Scottish and Australian Bank* is a situs case, see 97.12 (Simple contract debt).

93 19 TC 667 at p.678.

94 at p.679.

For completeness: The judge added (at p.680):

“There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... I think it was payment out of a source here. The first two payments are perhaps a little more clear, because there the payment was actually made to [the creditor] personally in this country. He happened to be here; he was resident abroad, but he happened to be here, and he was actually paid by the executors in London; and equally [the other payments] were made in London, were sent to a bank in London, and were remitted by the bank in London to Kenya to be paid there. In these circumstances I am of opinion that this was a payment made by persons resident in London out of sources in London.”

This passage adopts uncritically the view that the funds used to pay interest constitute the source of interest. In the 4th edition of this work, I said: “It is suggested that no guidance should be taken from *Broome* on this point.” This view is now supported by *Ardmore*.

the subsequent cases of *Bank of Greece* and of course *Ardmore*.

Accepting (as the judge did) that interest on the original debt was not UK source, it should not have changed following the death of the debtor, as interest sources are not peripatetic.

#### 25.12.14 HMRC view

As noted, HMRC first adopted a multifactorial approach in RI 58 (1993). HMRC did not announce a change of view, but from 2008 the SAIM Manual adopts a revised version of the multifactorial test, and RI 58 is described as “superseded by SAIM 9090 onwards”.<sup>95</sup> I take that to be notice that HMRC have withdrawn from it.<sup>96</sup> This version of the multifactorial approach expanded the list of relevant factors from four to eight, and gave an inkling of priority:

#### SAIM9090

##### **9090. Yearly interest: UK source: The general rule** [Dec 2019]

... Whether or not interest has a UK source depends on all the facts and on exactly how the transactions are carried out. HMRC consider the most important factor[s]<sup>97</sup> in deciding whether or not interest has a UK source to be

[1] the residence of the debtor and

[2] the location of his/her assets.

Other factors to take into account are

[3] the place of performance of the contract and

#### Comment

SAIM refers to *yearly* interest, but the same rules should apply to short interest.

95 See the HMRC online version of Tax Bulletin 9

[webarchive.nationalarchives.gov.uk/20101006151632/http://www.hmrc.gov.uk/bulletins/tb9.htm](http://webarchive.nationalarchives.gov.uk/20101006151632/http://www.hmrc.gov.uk/bulletins/tb9.htm) also recorded in Tolley’s Yellow Tax Handbook.

96 INT Manual still supports RI 58:

##### **342030 UK source** [May 2019]

The onus is on the payer to decide whether tax is properly to be deducted having regard to settled case law principles [!] and all the facts surrounding the loan. In particular, the payer should refer to the approach and criteria endorsed by the House of Lords in the *National Bank of Greece* case (46 TC 472). HMRC’s position in that case is outlined in Tax Bulletin 9 of November 1993 [RI 58].

Presumably this has not been properly updated since 2008.

97 SAIM refers to factor (in the singular) but then refers to 2 distinct factors.

- [4] the method of payment;
- [5] the competent jurisdiction for legal action and
- [6] the proper law of contract;
- [7] the residence of the guarantor and
- [8] the location of the security for the debt

HMRC consider the residence of the debtor to be most important because this, along with the location of the debtor's assets,<sup>98</sup> will influence where the creditor will sue for payment of the interest and repayment of the loan.

The SAI Manual then defines "residence":

'Residence' in these circumstances is not the same as tax residence. Residence of the debtor is residence for the purposes of jurisdiction.

I refer to the concept as "**jurisdiction-residence**" to distinguish it from tax-residence. It seems surprising to use the term residence in a non-tax sense but this arises for historical reasons: the concept comes from common law/IHT debt situs rules<sup>99</sup> which in the past governed the rules for the source of interest.<sup>100</sup>

What is the test of jurisdiction-residence? In the case of an individual it is the same as tax-residence (or as near as makes no difference); but in the case of a company, it is place of business, which may be different from tax-residence.

### 25.13 Weighing up factors

In *Ardmore Construction v. HMRC*:

---

98 The location of the debtor's assets will not influence the place where the creditor sues for payment, as to which there may be no choice; but it may influence the place of enforcement. The location of assets which are security for the debt would have an influence on where the creditor seeks recovery of payment of the interest, but that is mentioned separately at [8].

99 See 97.12.1 (Meaning of "residence").

100 See 25.9.2 (Consensus until 1993).

60. The FTT took the view that the following factors were relevant:
- “(1) The proper law of the agreement. This was that of the Isle of Man. This factor however I judge to be of very little weight.
  - (2) The place in which payment was actually made, namely, for the two payments at issue, the Isle of Man. I regard this as of little weight.
  - (3) The jurisdiction in which judgement could be obtained, namely the Isle of Man.
  - (4) The country in which Mr Perrin was resident, namely the UK.
  - (5) The country from or in which Mr Perrin’s obligations to pay would be contemplated to be enforced or would substantively originate, namely the UK.”
61. The FTT concluded that the interest arose in the UK and did not arise from a source outside the UK. It found that the factors of residence and the source of funds for payment or enforcement outweighed that of jurisdiction and actual payment. As regards the actual payments made by Mr Perrin from his Isle of Man bank account, this factor was discounted by the FTT on the basis that what was required by the Greek Bank case to be ascertained was the source of the obligation and that this was the totality of the loan obligations and not simply the source of payment of the interest.

## 25.14 Source of interest: Conclusion

Accepting, in the light of *Ardmore*, that a multifactorial approach should be adopted, it is suggested that the position should be as follows:

(1) Suppose a debt were wholly non-UK connected but secured on UK land; that is, the UK situate security is the only UK aspect of the debt. For instance, a debt from one non-resident to another non-resident, which arises under a contract governed by a foreign proper law. It is suggested that interest on such a debt has a foreign source. It would be wiser to avoid the issue.

By contrast, suppose a debt was made unsecured (or secured on non-UK assets) and later became secured on UK land. It is considered that this would not turn a non-UK source into a UK source.

(2) Suppose a debt were wholly non-UK connected but paid out of funds derived from UK source income (eg rents of UK land). This cannot be enough to make the interest UK source. The origin of funds used to pay interest is a weak connecting factor. (I would submit it should not be a connecting factor at all.)

(3) Suppose a debt were wholly non-UK connected but had a UK resident debtor. It is suggested that this alone does not give the source of interest a UK location.

(4) Different considerations apply in the case of securities issued by a company as (particularly in the case of publicly issued securities, held by many investors) many of the other connecting factors do not work so well. In these cases the residence of the company should play a more significant role. The RDR Manual provides:

**33550 Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme [Jan 2019]**

... Securities are “foreign” where income (in practice, interest) from them would be relevant foreign income. This will include, for example, a security issued in registered form by a non-UK company, which maintains the register of note-holders outside the UK.<sup>101</sup>

The rule that the source of interest on registered bonds of a foreign company is the location of the register seems a sensible rule but that will normally be the same as the place of residence.

The same applies to bearer securities: that is consistent with *Bank of Greece*.

### 25.14.1 Source of interest: Critique

After reading many pages on this issue, the reader will agree with HMRC who say:

The current tests in UK law of whether ... payment of interest is made from a UK source are unclear and cause confusion.<sup>102</sup>

That is as true now as when it was written in 2003.<sup>103</sup>

---

101 The comment is made in relation to the AIS remittance basis, but the point made here relating to the source of interest has a more general application. The text is also found in EN FB 2008.

102 Inland Revenue, “Income tax: Meaning of UK Source for Payments of Interest and Royalties” Consultation document (2003), para 1.1.

103 The difficulty is acknowledged in *CT v Spotless Services* (which adopted a multifactorial approach) at [52]: “Where ... the transaction is complex in terms of its background, its nature and its execution, and where ... important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated.” 71 ALJR 81; 34

It is not actually an answer to ask what a “practical man” would regard as the “real source”. The only way in which a man, practical or otherwise, can locate the source of interest (other than tossing a coin) is to apply a theory as to the priority of rival connecting factors.<sup>104</sup> The exhortation to adopt a “practical approach” is harmless. It is just not helpful. No-one advocates that the law should adopt an impractical approach. Those who stress the practical approach should bear in mind that the first thing that a practical man will ask of the law is that it will provide a clear *answer* to the question of where is a source. There is nothing more impractical than uncertainty. What Kurt Lewin said of psychology is also true of tax: there is nothing so practical as a good theory.

It is not satisfactory to say that many or all factors are relevant, and if different factors point in different ways, it is a matter of carrying out a balancing exercise. We need rules on which factors have priority or there is no law on the subject at all.

The OECD Model source rule is superior to the multifactorial approach (or any other approach).<sup>105</sup> However legislation (with appropriate transitional provisions) would be needed to make this reform. The gap between the existing case law and this solution is too great to be bridged by the courts, except by the Supreme Court, and the Supreme Court ought to follow the international case law rather than adopting a new solution.

ATR 183; 141 ALR 92

<http://www.uniset.ca/other/css/96ATC5201.html>. I could not find the case on <http://www.austlii.com> so have put it on <https://www.kessler.co.uk/tfd-archive> *Spotless* went on to the High Court of Australia but the Revenue wisely abandoned their appeal on the source issue.

A test which will “usually be difficult” to apply is not a satisfactory one for something as basic as identifying the source of interest.

I discuss *Spotless* in the 2013/14 edition of this work para 20.7.4 (*Spotless*).

104 ‘Everyone is in the grip of some theory - even those who affect to despise theory’; thus John Kay, when asked why it was not possible to define income using common sense: Kay, “Tax Policy: A Survey” (1990) 100 *Economic Journal* 18, 20.

See *IRC v Philips’ Gloeilampenfabrieken* 10 ATD 435 [1955] NZLR 868 at p.896-6 I discuss *Philips* in detail in the 14<sup>th</sup> edition of this work, para 18.9.1 (*IRC v Philips*).

105 See 25.26.6 (Source of interest for DTA). If we adopted OECD Model test one modification might be desirable: that where a debtor changes residence, the source of interest does not change (ie the source is determined and fixed at the time the debt arises). But that point could be argued both ways.

A HMRC consultation document in 2003 proposed this sensible reform<sup>106</sup> but the proposal was quietly dropped. The reason why was never announced. Tax reform generally has winners and losers. Losers cry louder than winners, and that is an obstacle for many tax reforms. It is not clear that this was the problem here. It is hard to identify obvious “losers”, ie persons who could say with any confidence that they were not taxable under the present law. But there may have been a lobby on behalf of taxpayers who could argue in favour of foreign source at present, and who would lose under a clearer set of rules. If so, there was never a lobby more misguided.

In 2012 HMRC again promised to consider reform,<sup>107</sup> but if that was ever intended seriously, it was subsequently dropped.

In the 14<sup>th</sup> edition of this work I discussed the foreign case law in detail, and argued the case for a place of credit test. That still seems to me to be superior to the multifactorial approach. But I omit this now, as *Ardmore* has settled the law for the time being.

## 25.15 Building society income

Building society income will have a UK source. EN ITTOIA Vol II explains:

48. Under [what is now s.14 and s.15 CTA 2009] a society incorporated under the Building Societies Act 1986 will be resident in the UK through incorporation. As long as dividends are paid by a UK resident company they have a UK source under the principle in *Bradbury v The English Sewing Cotton Company* 8 TC 481.

49. But a society may be non-resident where it satisfies a residence test in the territory of a treaty partner and the treaty awards residence to that other territory. [What is now s.18 CTA 2009] will then apply to treat the society as non-resident. Theoretically dividends paid by a building society may therefore arise from a source outside the UK. This would be most unlikely, however, since a building

---

106 Inland Revenue, “Income tax: Meaning of UK Source for Payments of Interest and Royalties” Consultation document (2003).

107 HMRC, “Possible Change to IT rules on Interest: Summary of Responses” (2012) para 3.15 accessible [http://webarchive.nationalarchives.gov.uk/20121002231638/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?\\_nfpb=true&pageLabel=pageLibrary\\_ConsultationDocuments&propertyType=document&column=1&id=HMCE\\_PROD1\\_032340](http://webarchive.nationalarchives.gov.uk/20121002231638/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&column=1&id=HMCE_PROD1_032340)

society may only be incorporated under the Building Societies Act 1986 if its principal office is in the UK. With the place of incorporation and the principal office in the UK a residence test is unlikely to be satisfied in another territory.

## 25.16 Co-operative & community benefit society income

EN ITTOIA Vol 2 explains the source of income from a co-operative and community benefit society:

52. Under [what is now s.14 and s.15 CTA 2009] a society registered under the Industrial and Provident Societies Acts<sup>108</sup> will be resident in the UK through incorporation. A society may, however, be non-resident where it also satisfies a residence test in the territory of a treaty partner of the UK and the treaty awards residence to that other territory. [What is now s.18 CTA 2009] will then apply to treat the society as non-resident.

53. Section 486(4) of ICTA [now s.379 ITTOIA] provides that share or loan interest is chargeable under Schedule D Case III. Theoretically therefore payments by a registered society may arise outside the UK but be charged under Schedule D Case III and not able to benefit from treatment specific to Schedule D Cases IV and V. For the sake of consistency this section [s.369 ITTOIA] treats such income arising outside the UK as relevant foreign income and therefore able to benefit from the special rules in Part 8 of this Act.

See Kessler, Wong & Birkbeck, *Taxation of Charities & Nonprofit Organisations* (2019/20) chapter 41A (Clubs & Mutual Concerns).<sup>109</sup>

## 25.17 Non-resident's interest: Outline

The general principle is that non-residents are subject to UK tax on UK source interest, as they are on any other UK source income. There are however exceptions of such breadth that the general principle rarely applies. The exceptions are:

- (1) The non-residents IT exemption. By itself, this limits UK tax to withholding tax. Where withholding tax exemptions apply, interest is therefore not taxable at all. There are many such exemptions.
- (2) DTA agreements sometimes confer exemption.

---

108 Author's footnote: now rebranded Co-operative and Community Benefit Societies and Credit Unions Acts.

109 <https://www.taxationofcharities.co.uk>

### (3) FOTRA and similar state issued securities.

Policy issues concerning deductibility of interest overlap with policy issues on the taxability of UK source interest received by non-residents. In short: restrictions on deductibility and extensions of taxability each increase effective capital costs which in principle should have the consequence of reducing investment. Two irreconcilable policy choices are at play here, on one hand to collect UK tax from non-residents on UK source income; and on the other to encourage investment in the UK by non-residents.

The former International Tax Handbook para 876 explained the policy reason behind the exemption for non-residents for interest from deposit-takers:

There were moreover compelling policy considerations. An attempt to tax the interest could have harmed the balance of payments by discouraging foreigners from putting their money into the UK. For the same reason no attempt has been made to require banks to deduct tax from interest paid to non-residents and interest belonging to persons not [ordinarily<sup>110</sup>] resident is now excluded from the arrangements for deduction of tax from bank interest.

In the case of FOTRA and similar state-issued securities, the case for exemption is stronger and this is reflected in the exemptions for FOTRA securities which are wider. OECD summarises:

7.5 Where the payer of the interest happens to be the State itself, a political subdivision or a statutory body, the end result may well be that the tax levied at source may actually be borne by that State if the lender increases the interest rate to recoup the tax levied at source. In that case, any benefits for the State taxing the interest at source will be offset by the increase of its borrowing costs. For that reason, many States provide that such interest will be exempt from any tax at source.<sup>111</sup>

The Katz commission makes an interesting comment on the policy issues:

6.2.2.1 Most worldwide or residence based systems of taxation subject

---

110 Under the SRT reforms, references to ordinary residence in the tax code have been replaced by references to residence. But that change does not affect the point made here.

111 OECD Commentary to article 11 OECD Model. OECD are considering exemption provided in a DTA, but the policy points to a general exemption.

non-residents to taxation on income derived from a source within their jurisdiction, and, in principle, there should be no objection against doing the same as regards interest accruing to or being received by a non-resident from a South African source. However, in this instance, the high mobility of capital militates against the adoption of a pure approach. Most countries refrain from so taxing interest, at least as regards interest on debts with unrelated parties (so-called portfolio interest). At the same time, most of those systems tax interest flowing between related parties. The reason is that in the latter situations interest merely represents another form of extracting profits from the jurisdiction where they were earned, and of course would enjoy a deduction in appropriate circumstances. In following these tendencies South Africa will ensure that it remains competitive in international capital markets, while still, like most other countries, protecting the tax base on income arising from South African operations.<sup>112</sup>

The UK however does not adopt this approach: it does not apply a rule that seeks to tax UK source interest paid to non-resident related parties (as distinguished from unrelated parties). Similarly, the UK does not disallow interest deductions paid to related parties. CIOT say:

There is no reason ... why a well-capitalised and cash rich group headquartered in a relatively low taxed jurisdiction should be penalised by financing a subsidiary by debt, if that subsidiary could raise the debt externally if it were an independent entity.<sup>113</sup>

## 25.18 Withholding taxes: Introduction

I use the term “**withholding tax**” which seems to me the clearest. Statute uses a variety of expressions which carry the same meaning:

The duty to deduct a sum representing income tax<sup>114</sup>  
Deduction of tax at source<sup>115</sup>

---

112 5th Report - Basing the South African Income Tax System on the Source or Residence Principle - Options and Recommendations (1997)

<http://www.polity.org.za/polity/govdocs/commissions/katz-5.html#6.2.1>

113 CIOT response paper (2015) para 2.8

<http://www.oecd.org/tax/aggressive/public-comments-action-4-interest-deductions-other-financial-payments-part1.pdf>

114 Eg s.884(1) ITA.

115 Eg s.13 TIOPA.

The obligation to deduct or account for tax<sup>116</sup>

HMRC guidance refers to WHT as a receipt “with income tax taken off”.

When withholding tax does not apply, the interest may be said to be “**paid gross**”.

Interest withholding tax is one of a set of withholding taxes. The withholding taxes discussed in this book are:

Type of withholding tax	See para
Rent	23.8
UK public revenue dividends	26.3
Annual Payments	30.10
Intellectual property income	31.10
Trust income distributions	38.5

### 25.19 Interest withholding tax

Interest withholding tax is governed by Chapter 3 Part 15 ITA. Section 874(1) ITA provides:

This section applies if a payment<sup>117</sup> of yearly interest arising in the UK is made—

- (a) by a company,
- (b) by a local authority,
- (c) by or on behalf of<sup>118</sup> a partnership of which a company is a member, or
- (d) by any person to another person whose usual place of abode is outside the UK.

If these conditions are satisfied, we move on; s.874(2) ITA provides:

The person by or through whom the payment is made must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

#### 25.19.1 *Non-residents withholding tax*

For individuals, trustees and PRs, withholding tax arises under s.874(1)(d)

<sup>116</sup> See 2.12.1 (Tax advantage: Definitions).

<sup>117</sup> For the meaning of payment, see 14.3 (Recognition/attribution: Analysis).

<sup>118</sup> The words “on behalf of” are otiose. Perhaps the drafter was concerned by the fact that a partnership is not a legal person; if that were the concern, it is far from clear that it is a good reason. But it does not matter.

when the following conditions are satisfied:

- (1) Payment
- (2) Yearly interest
- (3) Interest arises in the UK
- (4) Payment to a person whose usual place of abode is outside the UK

In the following discussion:

- a person whose usual place of abode is outside the UK is described (for brevity) as “**outside the UK**”
- Withholding tax under para (d) is “**Non-residents withholding tax**”

Withholding tax is particularly important if the recipient is not UK resident, as non-resident IT relief provides effective exemption except so far as withholding tax applies.<sup>119</sup>

### 25.19.2 *Collection of withholding tax*

The rules for the collection of withholding tax are in Chapters 15-17 Part 15 ITA, s.945-964 ITA. I do not address them here, though I hope to do so in a future edition.

INT Manual provides:

#### **413220 Consequences of failing to deduct withholding tax [Mar 2020]**

...

#### ***Assessing the unpaid income tax***

Chapter 15, Part 15 of Income Tax Act 2007 ... provides for returns and collection of income tax in respect of payments falling within ITA07/S946, which specifically includes payments of yearly interest where a deduction is required under s.874.

The rules, under ITA07/S951 are that:

- the income tax at the basic rate on the interest is due on the same date as the return reporting the payment
- both the return and tax are due within 14 days of the end of the quarter within which the payment of interest was made
- no assessment is required for collection of this tax.

This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment. ITA07/S957 sets out what should happen if it appears that a s.946 payment (which this is) has not been included in a return, and the tax

---

119 See 42.1 (Non-resident IT relief – Introduction).

arising on the payment has not been paid:

(1) This section applies if an officer of Revenue and Customs thinks—

(a) that there is a section 946 payment which should have been included in a return under this Chapter and which has not been so included, or

(b) that a return under this Chapter is otherwise incorrect.

(2) An officer of Revenue and Customs may make an assessment, to the best of the officer’s judgement, on the person who made the return, or who should have made one.

Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

## 25.20 To whom is interest paid

Since withholding tax arises on a payment to a person who is not in the UK, it is necessary to identify the person to whom the payment is made.<sup>120</sup>

Suppose interest is paid to a transparent (*Baker*-style) IIP trust which is not a settlor-interested trust. It is suggested that the interest is paid “to” the trustees (who have a lien). So if the trustees are in the UK but the life tenant is outside the UK the person paying the interest to the trustees need not deduct; but the trustees must do so when they pay the interest to the life tenant. But if the trustees mandate the income to the life tenant, the payer has an obligation to deduct.

Suppose:

(1) interest is paid to a settlor-interested trust; and

(2) the trustees are outside the UK and the settlor is in the UK.

At first sight there is no obligation to deduct as the interest is treated as income of the settlor “and of the settlor alone”. Following the deeming, the payment should be treated as paid to the settlor. Conversely, if the settlor is outside the UK, there is an obligation to deduct even if the trustees are in the UK. It is suggested that that is the correct view. This is consistent with the position for deposit-takers. The former TDSI Guidance Notes provided:

[2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong

---

120 Similar issues arise elsewhere: see 20.4.4 (To whom trading income arises).

to the settlor<sup>121</sup> and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.

[3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.<sup>122</sup>

This result is surprising: the payer may be expected to know whether the payee is outside the UK, but they cannot be expected to know if the recipient is a settlor-interested trust, and if so, who is the settlor and is the settlor outside the UK.

Section 646(8) ITTOIA provides:

Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.

This is not entirely to the point but it illustrates the view that the deeming of s.624 does not apply in all cases.

Suppose:

- (1) interest is paid to a non-resident company within s.720; and
- (2) the transferor is in the UK.

The transferor is taxable under s.720 on income treated as arising to them, but the interest is still the income of the company. So there is an obligation to deduct.

## 25.21 Usual place of abode

### 25.21.1 Introduction

The expression “usual place of abode” occurs in the context of rent/royalty withholding tax, as well as in the context of interest withholding tax. The

---

121 Author’s footnote: It is assumed that the Stiftung is a settlor-interested trust.

122 HMRC, “Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 2.3.

<https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions>

TDSI was abolished from 2016/17, and the Guidance Notes withdrawn. But the general point made here remains relevant.

meaning in all cases is the same.<sup>123</sup>

The phrase “settled or usual abode” was often used as an explanation or paraphrase of the concept of tax-residence before the SRT,<sup>124</sup> so one might think that there is no difference between residence and “usual place of abode”. HMRC agree there is a difference, though the concepts are close. The SAI Manual provides:

**9080. Yearly interest: ‘place of abode’ of recipient** [Mar 2017]

*Meaning of ‘place of abode’*

ITA07/S874 (1)(d) requires deduction of tax from a payment to a person “whose usual place of abode is outside the UK”. This phrase is distinguishable from the concept of “residence”...

Likewise EN ITA para 2648:

The term “usual place of abode” is consciously retained, because it is a technical term, distinct from residence.

One difference is that under the SRT an individual is UK resident (or not) for an entire tax year, but the usual place of abode can change at any time.

### 25.21.2 *Place of abode: Individual*

The PI Manual provides:

**PIM4810: summary of the non-resident landlord scheme** [May 2020]

**Meaning of ‘usual place of abode’**

... The rules of the NRL Scheme are concerned with the landlord’s usual place of abode, not their residence status for UK tax purposes. Although there is no statutory definition of ‘usual place of abode’ the NRL Scheme will apply to all landlords leaving the UK for a period that is expected to, or will, exceed six months.

Individuals have a usual place of abode outside the UK if they usually live outside the UK.

You should still regard the term as applying to them even if in a particular year they are resident in the UK for tax purposes, as long as the usual place of abode is outside the UK. (For example the individual

---

123 This view is adopted by EN ITA para 2648: “The term ‘usual place of abode’ is consciously retained, *because it is a technical term*, distinct from residence” (emphasis added).

124 See the 2012/13 edition of this work para 3.8.

may count as resident in the UK in a particular year because of  
 [1] a six months' visit, or  
 [2] a visit of a shorter time when he or she has a place of abode available in the UK.)<sup>125</sup>

Do not treat someone as having their usual place of abode outside the UK if they are only temporarily living outside the UK, say for six months or less.

The SAI Manual makes the same point more tersely:

**9080. Yearly interest: 'place of abode' of recipient** [Mar 2017]

An individual's usual place of abode is outside the UK if he or she usually lives abroad, unless that arrangement is temporary.

The NRLS guidance provides:

2.3 It is **usual place of abode** and not **non-residence** that determines whether a landlord is within the scheme or not. In the case of individuals, HMRC normally regard an absence from the UK of six months or more as meaning that a person has a usual place of abode outside the UK. It is therefore possible for a person to be resident in the UK yet, for the purposes of the scheme, to have a usual place of abode outside the UK.

There is some parallel between "usual place of abode" and ordinary residence, but the analogy does not help, as the concept of ordinary residence was (more or less) abolished for tax purposes in 2013, and even before then its meaning was vague and contested.

The PI Manual formerly provided:

**4800 Overseas landlords** [deleted 2018]

*Meaning of 'usual place of abode'*

... a person who is not resident in the UK should normally be treated as having their usual place of abode outside the UK.

This passage was deleted in 2018, though there was no announcement to say that HMRC practice has changed.

### 25.21.3 *Place of abode: Company*

---

<sup>125</sup> Author's footnote: Para [2] refers to the supposed "available accommodation rule" which was an aspect of the pre-SRT residence test abolished in 1993. The passage was no doubt written before 1993 and has not been updated since.

The PI Manual provides:<sup>126</sup>

**PIM4810: summary of the non-resident landlord scheme** [May 2020]  
... Companies that have their main office or other place of business outside the UK, and companies incorporated outside the UK, normally have a usual place of abode outside the UK. However, companies regarded as resident in the UK for tax purposes do not have a usual place of abode outside the UK for the purposes of the scheme, even if incorporated outside the UK. The UK branch of a non-resident company, where that branch is within the charge to Corporation Tax, does not have a usual place of abode outside the UK for the purposes of the scheme.

The SAI Manual addresses the question of UK branches of non-resident companies:

**9080 Yearly interest: ‘place of abode’ of recipient** [Mar 2017]  
*Companies*

A non-UK resident company that has a UK permanent establishment that is within the charge to corporation tax does not have a usual place of abode abroad.<sup>127</sup>

This practice seems surprising, but it favours the taxpayer so it will not be challenged.

#### 25.21.4 *Place of abode: Trust/PRs*

The SAI Manual 9080 provides:

**9080 Yearly interest: ‘place of abode’ of recipient** [Mar 2017]  
*Trustees*

Trustees, including personal representatives, have a usual place of abode abroad if each trustee, considered as an individual or a company as the case may be, has a usual place of abode there. So if one trustee does not

---

126 The same text is in NRLS guidance para 2.4.

127 The NRLS guidance likewise provides:

“2.5 The UK branch of a non-resident company, where that branch is within the charge to Corporation Tax, does not have a usual place of abode outside the UK for the purposes of the NRL Scheme.”

<https://www.gov.uk/government/publications/non-resident-landlord-guidance-notes-for-letting-agents-and-tenants-non-resident-landlords-scheme-guidance-notes>

have a usual place of abode abroad, neither does the trust.<sup>128</sup>

This text was probably composed before the statutory residence rules for trustees and PRs. One might have thought that the usual place of abode for trustees and PRs is where they are resident under those rules. But the HMRC practice favours the taxpayer so it will not be challenged. It is also satisfactory for HMRC; as long as one trustee is here, HMRC can collect tax from that trustee and do not need the assistance of a withholding tax.

### 25.21.5 Usual place of residence

Article 56 VAT directive provides in relation to persons not carrying on a business:

1. The place of supply of the following services to customers established outside the Community, or to taxable persons established in the Community but not in the same country as the supplier, shall be ... the place where he has his permanent address or usually resides:

Section 9(5) VATA 1994 provides in relation to individuals:

A person who is not a relevant business person is to be treated as belonging-

(a) in the country in which the person's usual place of residence or permanent address is ...

VAT is outside the scope of this work, but discussion of this provision may shed some light on residence issues more generally.

VAT Place of Supply of Services Manual provides:

**VATPOSS04600 Belonging: Usual place of residence [Aug 2019]**  
**Private individual**

The usual place of residence of a private individual is not defined in the law. We interpret the phrase as meaning the one country where the individual spends most of their time for the period in question. It is likely to be the country where the individual has set up their home, lives with their family and is in full time employment. As far as possible, this should coincide with the actual economic situation. Individuals are not treated as belonging in a country if they are short term, transitory visitors

---

128 The same point is in NRLS guidance para 2.6 and PIM4810. This view is supported by *Dawson v IRC* 62 TC 301.

(for example if they are visiting as tourists, to receive medical treatment or for a short term language/other course).

For VAT purposes, persons who have not been granted a right or permission to remain in the UK should be treated as belonging in their country of origin. This will apply to, for example, asylum seekers and those entering without permission. Belonging in this context involves something more than mere presence. In these circumstances, the country in which individuals have their usual or permanent place of residence can only reasonably be seen to be their country of origin unless and until they are granted the right to remain in the UK.

Once an individual is granted leave or permission to remain in the UK, then the place of supply of any services they receive, for example legal services supplied to a person that has been granted asylum in relation to obtaining a work permit, will be on the basis they are regarded as belonging in the UK.

Where an individual is granted the right or permission to remain in the UK and this expires or is subsequently revoked for whatever reason, they should be treated, for VAT purposes, as resident in the UK until such time as the issue is concluded (including the time taken to go through any appeal process). VAT should be charged on all relevant services supplied to such a person, subject to the normal rules.

In exceptional circumstances, an individual may not have had an identifiable country of origin. Such individuals are in effect stateless and should be treated, for VAT purposes, as belonging in the UK. For example, a situation may arise where a person is granted exceptional leave to remain in the UK on the basis that their country of origin is unknown and their claim to be a British citizen cannot readily be verified.

#### **Case law**

In the case of *USAA Ltd* (LON/92/1950A) (VTD 10369), the Tribunal considered the meaning of usual place of residence of US Forces personnel living in England. It found that such personnel living in England on a three year term of duty had their usual place of residence in the UK. During the tour of duty, if they had a permanent address in the form of a home in the USA, it was let. If they returned for training to the USA, their families remained in the UK. The US personnel could not therefore be regarded as having their usual place of residence in the USA.

In *Razzak & Mishari* (LON/97/754), [1997] VATTR 392, (VTD 15240), the Tribunal held that the supply of legal services in respect of UK

proceedings by a UK solicitor to Mrs Shaik Haseena, a woman of Indian nationality, was received in India and was outside the scope of UK VAT. Mrs Haseena lived with her Kuwaiti employers as a servant for several years, first in Kuwait and later in the UK. She left their employment some three months after their arrival in the UK. She commenced an action through the UK courts for alleged cruelty against her former employers. During the period of these proceedings, some four years, Mrs Haseena lived in the UK and nowhere else.

The Tribunal found that the facts in this case were most unusual. ... It considered that there must be a sufficient degree of permanence and not merely a temporary presence. It held that, in this case, there was insufficient degree of permanence in that

- on arrival in the UK Mrs Haseena expected to stay only one month
- if she had remained in her employers' service and they had remained for the maximum permitted period, her visa was for only six months
- when she left her employers, she was prohibited by immigration law from working
- her entitlement to stay was initially not accepted by the Home Office
- when she was allowed to stay, it was for a limited period and a limited purpose with no guarantee of extension even to pursue the litigation
- during her period in the UK, she stayed in a series of hostels of temporary abode
- correspondence with the Home Office showed that if the visa had not been extended, she would have returned to India, and
- the case was distinguishable from *USAA Ltd* because Mrs Haseena's stay was not voluntary.

Thus it held that, throughout the relevant period, India was the country where Mrs Haseena had her usual place of residence.

*Ist Contact v HMRC* [2012] UKFTT 84 concerned "working holidaymaker" students on an extended gap year:

2... young people, principally from Australia, New Zealand and South Africa, coming to the United Kingdom temporarily for a "working holiday" or "overseas experience". They come with the intention of travelling around this country and other parts of Europe, while taking on incidental, temporary work to pay for their short-term living expenses and travel plans. ... most came under the "working holidaymaker" provisions of the Immigration Rules, which allowed young persons from specified countries to come to the United Kingdom on a "working

holiday” for up to two years, during 12 months of which they were permitted to undertake work “incidental to” the holiday. ... Most of the Appellant’s customers in fact were in the United Kingdom for 18 to 19 months, on and off between travel elsewhere.

42. As there is no evidence that the typical customer had a permanent address in either country, for purposes of the present appeal the issue must be to determine the country in which the typical customer “usually resided” for purposes of Article 56(1) of the 2006 Directive, or the country in which the typical customer had “his usual place of residence” within the meaning of [now, s.9(5) VATA].

43. In relation to the meaning of “usual residence” for present purposes, both parties relied on *Shah*. In argument, attention was drawn to the following passages in the speech of Lord Scarman (with whom the other Lords all agreed):

Unless, therefore, it can be shown that the statutory framework or the legal context in which the words are used requires a different meaning, I unhesitatingly subscribe to the view that “ordinarily resident” refers to a man’s abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or of long duration. [At 343G-H]

And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the “propositus” intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled. The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular,

habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose. [344C-F]

My Lords, the basic error of law in the judgments below was the failure by all the judges, save Lord Denning M.R., to appreciate the authoritative guidance given by this House in *Levene v. Inland Revenue Commissioners* [1928] AC 217 and *Inland Revenue Commissioners v. Lysaght* [1928] A.C. 234 as to the natural and ordinary meaning of the words “ordinarily resident.” They attached too much importance to the particular purpose of the residence; and too little to the evidence of a regular mode of life adopted voluntarily and for a settled purpose, whatever it be, whether study, business, work or pleasure. [At 347H-348B]

... “Immigration status” ... may or may not be a guide to a person’s intention in establishing a residence in this country: it certainly cannot be the decisive test, as in effect the courts below have treated it. Moreover, in the context with which these appeals are concerned, i.e. past residence, intention or expectations for the future are not critical: what matters is the course of living over the past three years. A further error was their view that a specific limited purpose could not be the settled purpose, which is recognised as an essential ingredient of ordinary residence. This was, no doubt, because they discarded the guidance of the *Levene* and *Lysaght* cases. But it was also a confusion of thought: for study can be as settled a purpose as business or pleasure. And the notion of a permanent or indefinitely enduring purpose as an element in ordinary residence derives not from the natural and ordinary meaning of the words “ordinarily resident” but from a confusion of it with domicile.

I, therefore, reject the conclusions and reasoning of the courts below. And I also reject the “real home” test (and the variant of it) for which the local education authorities contended. In my view neither the test nor the variant is consistent with the natural and ordinary meaning of the words. [At 348D-F]

44. Lord Scarman uses the expression “settled purpose”. This expression clearly is not intended to mean a “purpose to settle in a country” in the sense of becoming permanently resident there. Lord Scarman makes clear that a “settled purpose” may be “for a limited period” or “for the time being, whether of short or of long duration”, and

that it does not mean “real home” or “domicile”. Rather, the expression “settled purpose” appears to refer simply to the fact that the person has voluntarily and deliberately gone to a particular place for a particular reason. Lord Scarman makes clear that the reason need not be employment, but might encompass “business, work or pleasure”, or even “merely love of the place”, that the reason may be specific or general, and that there may be more than one purpose. Lord Scarman also considered it to be necessary is that there be “a sufficient degree of continuity”, and “a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences”. Lord Scarman also indicated that ordinary residence, is “ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind”. Neither party in the present case disputed that this is a question of fact and degree, depending on the circumstances of the case as a whole.

45. In *Shah*, the issue before the House of Lords was whether immigrant students who had studied in the United Kingdom for the previous three years or longer had been ordinarily resident in the United Kingdom during the previous three years. The House of Lords did not itself decide the question, but held that the decisions below contained errors of law. Lord Scarman said in respect of the correct test to be applied that:

... it is, therefore, my view that local education authorities, when considering an application for a mandatory award, must ask themselves the question: has the applicant shown that he has habitually and normally resided in the United Kingdom from choice and for a settled purpose throughout the prescribed period, apart from temporary or occasional absences? If a local education authority asks this, the correct, question, it is then for it, and it alone, to determine whether as a matter of fact the applicant has shown such residence. An authority is not required to determine his “real home,” whatever that means: nor need any attempt be made to discover what his long term future intentions or expectations are. The relevant period is not the future but one which has largely (or wholly) elapsed, namely that between the date of the commencement of his proposed course and the date of his arrival in the United Kingdom. The terms of an immigrant student's leave to enter and remain here may or may not throw light on the question: it will, however, be of little weight when put into the balance against the fact of continued residence over the prescribed period - unless the residence is itself a breach of the terms of his leave, in which

event his residence, being unlawful, could not be ordinary. [At 349B-E]

46. *USAA* concerned the supply of services to members of the US armed forces serving in the United Kingdom. The typical case was described as a member of the US forces who had arrived in the United Kingdom on a 3 year tour of duty (which might be extended or curtailed), accompanied by spouse and children, who had let out any home they owned back in the USA for the duration of the tour, and who would leave family members in the United Kingdom if returning during the tour of duty to the US for training. The Tribunal said that:

I do not rule out the possibility that a taxpayer may in some cases have more than one “usual place of residence”. However, it seems to me that an officer who is serving a three year term in the UK whose family are living here in a house or an apartment, whose home in the USA is let, and who may if he goes back to the USA for training leave his wife and family here, has a “usual place of residence” in the UK and has no “usual place of residence” in the USA. Although it was not put to me separately, I also think that an unmarried officer here for three years whose parents (with whom he resided when in the USA) continue to reside there, similarly has a “usual place of residence” in the UK being the quarters that he occupies here but not in the USA.

One must concentrate on a point of time, not as in *Levine* and *Lysaght* on a year of assessment. I do not think that it can fairly be said that an officer as described with his three year residence here has “a usual place of residence” in the USA. If his house is let he has no place of residence at all in the USA. I think the question is really one of fact and degree, and in the typical case put to me I do not think the serving officer, starting without a presumption one way or the other, can fairly say that he has a “usual place of residence” in the USA at the time when, in the UK, he affects motor insurance. If I am in error in considering that a person may have two usual places of residence, I reach the same conclusion, namely that the only usual place of residence in the circumstances is in the UK.

A retired officer who sets up house here and does not keep a house in the USA is plainly usually resident here. An officer being in the USA and about to move to the UK has in my view a “usual place of residence” in the USA.

47. In *Razzak*, the person to whom services were supplied was found not

to be ordinarily resident in the United Kingdom in the following circumstances. She was an Indian national who had been working as a domestic servant for a family in Kuwait. She came with that family to the United Kingdom as a domestic worker on a 6 month visa. She said that she did not want to come, but was told it would be for only a month. She claimed that she was mistreated by her employers and left after 3 months and went to a refuge, where she stayed for 9 months. She brought a claim for damages against her former employers, and was eventually granted exceptional leave to remain in the United Kingdom for purposes of pursuing the claim. The claim was settled some four years after she arrived, and it appears she had left the United Kingdom by the time that the case was decided. The Tribunal said at [47] that:

In my judgment the words in [now s.9(5) VATA] must be construed as encompassing “the place where he has his permanent address” and in particular the word “permanent”, not necessarily in the literal sense but at least as the antithesis of purely temporary and as having a sufficient degree of permanence. Viewed in that way it seems to me that the presence of Mrs Haseena in the United Kingdom was not such as to make this “the country of her normal place of residence”. When she arrived in August 1992 she only expected to stay for a month; even if she had remained in the Appellants’ service and they had remained for the maximum permitted period, her visa was only for six months; I do not consider that the UK could have properly been described as “the country where she had her usual place of residence”. When she left the Appellants she was prohibited by immigration law from working and her entitlement to stay was initially not accepted by the Home Office. When she was allowed to stay it was for a limited period and a limited purpose with no guarantee of extension even to pursue the litigation. During the period from November 1992 Mrs Haseena stayed in a series of different hostels which of their very nature were temporary places of abode. It is clear from the correspondence with the Home Office as early as March 1993 that if the visa had not been extended she would have returned to India. In my judgment throughout the relevant period India was the country where she had her usual place of residence although she was temporarily and effectively involuntarily present in the UK.

48. *Martin-Jenkins*, concerned a supply of goods made to a person who had been living in the United Kingdom for some 10 years, but who was in the process of moving to Mauritius where he had a residence permit,

and a start date for his employment and his children's schooling. The goods were intended for use in Mauritius. He left the United Kingdom for Mauritius on 31 August 2007. The goods had been delivered to him in the UK some 2 weeks before he left, to be shipped with his other effects to Mauritius. The Tribunal found that he was "resident" in the United Kingdom at the time of the supply, since at the time he was living with his family in his home in the United Kingdom. It was held to be irrelevant that "his mind may well have been in Mauritius", since residence must be established by objective evidence and not subjective intention. It was held that a person can only be resident in one territory at a time, and that *Razzak* was of no assistance since his presence in the United Kingdom was voluntary.

49. Applying the relevant principles derived from this case law to the present case, the Tribunal finds the following.

50. Although a person may be ordinarily resident in a place for a short period, and although the purpose of ordinary residence may be "merely love of the place", an ordinary tourist in the United Kingdom for a period of days or weeks clearly could not generally be said to have their ordinary residence here. Presence in this country as a typical tourist would not be, in the words of Lord Scarman, "for settled purposes as part of the regular order of his life for the time being", and presence here in that capacity would not be a "regular, habitual mode of life in a particular place". A typical tourist would, for instance, have a home and employment in their country of origin. Typically, a tourist would not rent their home out while on holidays, and would be on annual leave from their employment at home and would not be taking up employment in the United Kingdom. However, each case would depend on its own facts. A person who spent a year in this country without working, and who spent the year here travelling and sightseeing, might well be described as a "tourist". Nevertheless, if the person had no home or employment in their country of origin, and if they rented a home in the United Kingdom for the year as a base from which to conduct travels and sightseeing, the conclusion might be reached that the person is ordinarily resident in the United Kingdom for the year in question.

51. The Tribunal finds that *Razaak* is of limited assistance due to its unusual facts. It concerned the supply of services to a person whose presence in the United Kingdom was involuntary, not only in the sense that she said that she did not want to come here in the first place, but in the sense that she remained beyond the one month period for which she initially thought she was coming due to supervening circumstances

arising in this country that formed no part of her original purpose in coming here, and which she did not bring upon herself.

52. The case law indicates that a person's particular immigration status is not a particularly significant factor, and that a person's ordinary residence may be in the United Kingdom, regardless of where their "real home" or domicile may be. The Tribunal finds that the nature of the customers' immigration status is relevant only to the extent that is instructive in establishing material facts. The Tribunal takes into account the evidence that the Appellant's customers came here with the intention to undertake such combination of work and travel that was consistent with the requirements of a working holidaymaker visa, whether they actually had a working holidaymaker visa or had some other immigration status. Apart from this, the immigration case law on working holidaymakers is not considered pertinent.

54. The evidence is that the Appellant's customers came to the United Kingdom intending to have an experience involving a combination of travel and work known as a "working holiday" or "overseas experience", and that they would typically stay some 18 months. In pursuit of that purpose, they remained regularly in the United Kingdom for that period, with temporary absences visiting other countries (including short trips back to their home countries), even if their living arrangements were short-term and transitory. The Tribunal finds that the purpose of having such a "working holiday" or "overseas experience" can in itself be a "settled purpose" in the sense used in *Shah*. A settled purpose can include more than one purpose, and there is no reason why it cannot include a combination of travel and work.

55. The evidence is that the Appellant's customers typically arrived in the United Kingdom with no fixed plans. However, the Tribunal is satisfied on the evidence that they did arrive with a general purpose of having a working holiday, which typically lasted perhaps some 18 months. It may be that they did not know at the time of arrival whether they would leave early if things did not work out, or stay longer if they did and if they could get any necessary extension of their immigration status. However, in *USAA*, the 3 year postings of US service personnel were also capable of being extended and curtailed, such that they would not know at the outset exactly how long they would stay. Lack of certainty of the duration of presence in the United Kingdom is not decisive.

56. The fact that the Appellant's customers intended that they would be in the United Kingdom only temporarily and would return to their

“normal” lives in their home countries at the end of a working holiday does not mean that they could not be ordinarily resident in the United Kingdom in the meantime. It was clearly the intention of typical US service personnel in *USAA* to be in the United Kingdom for only a limited period. In *Martin-Jenkins*, the person to whom goods were supplied was actually in the process of moving to Mauritius at the time of the supply, yet was found still to be resident in the United Kingdom. 57. The service personnel in *USAA* were found to be resident in the United Kingdom, notwithstanding that throughout their posting here, they maintained very strong links with the USA. They owned homes there, which they had rented out. They remained in the service of the US armed forces. Their service in the United Kingdom was part of a continuous employment by the US employer, which existed before they came to the United Kingdom and typically continued after they left the United Kingdom.

58. It is true that in *USAA*, the US service personnel brought their spouses and children with them to the United Kingdom. However, the evidence is that the Appellant’s customers typically were not married and had no children. There is no evidence that the typical customer maintained a home in their country of origin. There is no evidence that the typical customer had, for instance, a job in their country of origin from which they had taken leave of absence in order to have a working holiday. Furthermore, even if customers had homes in their home countries that they had rented out, or previously lived with their parents in their home country, *USAA* indicates that this would not mean that they continued to be resident in their home country while in the United Kingdom.

59. Although it may be presumed that many or most working holidaymakers have parents, siblings, and other family or friends in their country of origin, that would be equally true of the service personnel in *USAA*, and of many other people who take up ordinary residence in the United Kingdom. While working holidaymakers may have maintained an intention of returning to their home countries at the end of the working holiday, and although there was evidence that they might return home on short trips during their working holiday, there was no evidence that they maintained any particular types of connections or commitments in their home countries during the period that they were away.

60. It may be the case that the Appellant’s customers did not remain in one place in a single employment like the US service personnel in *USAA*, or have an established home in this country as in *Martin-Jenkins*.

However, it is implicit in the wording of section 9(3) VATA and Article 56(1) of the 2006 Directive that the test of residence relates to the country of usual residence, rather than a particular street address. Even if customers changed address and moved from place to place during the working holiday, that is not inconsistent with the United Kingdom being their usual place of residence for the period in question. Throughout that period, they continuously lived a working holidaymaker lifestyle, even if it was a transitory lifestyle involving a combination of travel and work.

61. The Tribunal is satisfied on the evidence that for the duration of their working holiday, the Appellant's typical customer was in the United Kingdom "for settled purposes as part of the regular order of his life for the time being", and had a "purpose of living where one does has a sufficient degree of continuity to be properly described as settled", and had a "a regular mode of life adopted voluntarily and for a settled purpose".

#### 25.21.6 *Place of abode uncertain*

The PI Manual provides:

**PIM4810 summary of the non-resident landlord scheme** [May 2020]

It is for the letting agent or tenant to determine the 'usual place of abode' of the landlord. If this is in doubt, the letting agent or tenant should get more information from the landlord to satisfy themselves on the point. In particular, PO Box numbers and 'care-of' addresses alone should not be relied on as evidence that the scheme does not apply. Where letting agents or tenants have no reason to believe that a landlord has a usual place of abode outside the UK, they are not required to make any special enquiry and they therefore would not have to operate the scheme.

The NRLS guidance provides:

**How do letting agents and tenants know whether a landlord has a 'usual place of abode' outside the UK?**

2.11 A landlord's usual place of abode (see paragraphs 2.3 to 2.6 above) will usually be evident without the need for special enquiries. If it is outside the UK, letting agents or tenants should operate the NRL Scheme. If the usual place of abode is in doubt, letting agents and tenants should get more information from the landlord to satisfy themselves on the point. In particular, PO Box numbers and 'care of' addresses alone should *not* be relied on as evidence that the Scheme does not apply. In cases of difficulty letting agents can get advice from PTI (see paragraph

1.15 above).

2.12 Where letting agents and tenants have no reason to believe that a landlord has a usual place of abode outside the UK they are not required to make any special enquiries. In these circumstances they do not have to operate the Scheme.

### 25.21.7 *Place of abode: Critique*

Do we need a concept of “usual place of abode” in addition to concepts of residence? For individuals, the statutory residence test provides a definition of “residence” which should be the starting point here and “place of abode” should be abolished. There would need to be some provision for cases where at the time of payment of the interest it is not clear whether the payee is resident or not. In practice, we muddle through.

## 25.22 **Withholding tax: Exceptions**

There are about 20 exceptions to interest withholding tax:

<b>ITA s.</b>	<b>Exemption</b>	<b>See para</b>
875	Interest paid by building society	
876	Interest paid by deposit-taker	
877	UK public revenue dividends	26.3
878	Interest paid by bank	
879	Interest paid to UK bank	25.22.3
880	Interest paid to building society	
881	National Savings Bank interest	
882	Quoted Eurobond	25.22.7
883	Interest on loan to buy life annuity	
884	Foreign source interest	25.22.1
885	Authorised dealer in financial instruments	
886	Interest paid by recognised clearing house	
887	Payment made by registered society	
888	Statutory interest	
888A	Qualifying private placement	25.22.6
888B	Designated dividends of investment trust	
888C	Interest distribution of OEIC	
888D	Interest distribution of authorised unit trust	
888E	Interest on peer-to-peer lending	
893	Public revenue dividends	22.3

There are further exemptions which apply to interest and other withholding

taxes:

933/934 Company within CT	25.23.1
936/937 Exempt recipients	25.23.2, 25.23.3
981 Foreign currency securities	22.8.2

In this work I consider only some of these exemptions, but hope to consider more in a future edition.

### 25.22.1 *Foreign source interest*

Section 874 ITA imposes the obligation to deduct on making:

a payment of yearly interest arising in the UK<sup>129</sup>

Foreign source interest is not subject to withholding tax, as one would expect.

Section 884(1) ITA provides:

The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest which is chargeable to income tax as relevant foreign income.

This is otiose, because RFI by definition must be income arising from a source outside the UK,<sup>130</sup> so it is not income arising in the UK, and not subject to withholding tax in the first place. But it does not matter.

The SAI Manual provides:

**9090 Yearly interest: UK source: The general rule** [Dec 2019]

... whether or not tax should be deducted from interest paid on an overseas loan depends on the source of the interest. If the interest has a UK source tax must be deducted, if it does not then tax should not be deducted.

### 25.22.2 *Withholding: Interest source*

Section 874(6A) ITA provides:

In determining for the purposes of subsection (1) whether a payment of interest arises in the UK no account is to be taken of the location of any deed which records the obligation to pay the interest

---

129 See 25.18 (Interest withholding tax).

130 See 15.10.2 (“Relevant foreign income”).

For the purposes of s.874(1) (only) the location of a deed is disregarded; for other purposes it is not. Thus there are two definitions of the source of interest.

The disregard does not apply for the purposes of s.884(1). So if one took the provision literally, the location of the deed is taken into account in determining whether the interest is RFI, and if it is RFI, there is no obligation to deduct.

Fortunately this defect does not matter, as the location of a deed is not relevant to the location of the source of interest.<sup>131</sup> Section 874(6A) is otiose. What a mess!

The reason for the provision is found in a shallow HMRC consultation paper:

4.11 For ‘debts under seal’ or ‘specialty debt’ it is sometimes argued that case law supports the view that interest paid on such debts does not have a UK source where the loan agreement is physically held outside the UK, and hence that income tax is not required to be deducted at source.

4.12 HMRC does not accept this argument. However, to put the matter beyond doubt, the Government proposes to amend the relevant provisions of Chapter 3 of Part 15 of ITA [withholding tax] so that the question of whether or not interest arises in the UK is established without reference to the location of the agreement or deed evidencing the debt.<sup>132</sup>

---

131 See 25.10 (Rejection of situs approach).

132 HMRC, “Possible changes to income tax rules on interest” (2012) [http://webarchive.nationalarchives.gov.uk/20131002164136/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?\\_nfpb=true&pageLabel=pageLibrary\\_ConsultationDocuments&propertyType=document&columns=1&id=HMCE\\_PROD1\\_031986](http://webarchive.nationalarchives.gov.uk/20131002164136/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_031986)

The consultation paper omitted to point out that HMRC formerly accepted the view which they now reject, as did at least one Special Commissioner decision. It contained no discussion of the relevant law (beyond a cursory reference to *Bank of Greece*) and did not mention the 2003 consultation.

See too HMRC, “Possible changes to income tax rules on interest: Summary of Responses” (2012)

[http://webarchive.nationalarchives.gov.uk/20131002141406/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?\\_nfpb=true&pageLabel=pageLibrary\\_ConsultationDocuments&propertyType=document&columns=1&id=HMCE\\_PROD1\\_032340](http://webarchive.nationalarchives.gov.uk/20131002141406/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_032340)

The need for a statutory definition of source remains unmet.

### 25.22.3 *Interest paid to UK bank*

Section 879(1) ITA provides:

The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on an advance from a bank<sup>133</sup> if, at the time when the payment is made, the person beneficially entitled to the interest

- [a] is within the charge to corporation tax as respects the interest or
- [b] is a bank that would be within the charge to corporation tax as respects the interest apart from section 18A of CTA 2009 [Exemption for profit of foreign permanent establishment].

This would apply on payment of interest to a UK branch of a non-resident bank, though it may be that such companies do not have their usual place of abode abroad.

This exemption (together with other exemptions from withholding tax not discussed here) rests on tax competition considerations.<sup>134</sup>

### 25.22.4 *Short interest*

Tax law distinguishes between:

- (1) “yearly” or “annual” interest (the terms are synonymous); and
- (2) other interest (known as “short” interest).

Withholding tax does not apply to short interest.<sup>135</sup>

The SAI Manual explains the distinction:

**9075. Yearly interest: Case law on short and yearly interest** [Aug 2017]  
*When is interest “short” or “yearly”?*

---

133 For completeness, s.879 provides:

- “(2) Section 991 (meaning of ‘bank’) applies for the purposes of this section.
- (3) Subsection (1) applies to the European Investment Bank as if the words from ‘if’ to the end were omitted.
- (4) An order under subsection (2)(e) of section 991 designating an international organisation as a bank may provide that subsection (1) applies to the organisation with the modification mentioned in subsection (3).”

134 See 1.2.2 (Other tax competition).

135 See Gabbai, “Withholding tax planning: Should it be disclosed and how might it be challenged?” [2020] BTR 335.

Although tax law has made a distinction between yearly and short interest since 1806, there is no statutory definition of yearly interest. The distinction rests wholly on case law.

The classic example of short interest is interest payable on a bank loan for less than a year. In the early case of *Goslings and Sharpe v Blake* (2 TC 450), the Court of Appeal confirmed that interest on such a loan, where there was no provision to extend the borrowing for more than a year, could not be yearly interest, notwithstanding the use of an annual percentage rate.

It is therefore a useful starting point to say that where a loan or debt is for less than a year, there is a presumption that it gives rise to short interest. Conversely, interest on a loan or debt that exists for a year or more is likely to be yearly interest.

But you cannot just apply this as a mechanical rule, with the benefit of hindsight. Particular difficulties may occur where, at the time when a loan or debt comes into existence, it is not clear how long it is going to last.

For example, the case of *Bebb v Bunny* (1854) 1 K&J 216 concerned the payment into court of the purchase price of a property, with interest on the delayed payment. It would have been possible for the interest to have run for more than a year if the purchaser had been particularly late in paying. The judge held that the interest was yearly. On the other hand, the Court of Appeal held, in *Gateshead Corporation v Lumsden* [1914] 2 KB 883, that certain interest which had run for more than a year was nevertheless short interest. The interest in question was statutory interest due to Gateshead Corporation on late-paid contributions towards the cost of making up roads. The court took the view that the mere failure by the Corporation to enforce the debt within a year did not make the interest “yearly interest”.

To distinguish interest arising on long-term loans from that arising on apparently short-term debts, the courts began to lay stress on the debt having “a measure of permanence” or being “in the nature of an investment” as opposed to being merely “temporary accommodation”. Thus in *Corinthian Securities v Cato* (46 TC 93) the Court of Appeal decided that interest on a bank loan, repayable on demand, was yearly interest because the loan had the quality of investment – even though, in the event, the loan was called in after 6 months.

However, the leading case on yearly interest is now considered to be *Cairns v MacDiarmid* (56 TC 556). In this case, the Court of Appeal saw the intention of the parties as the determining factor. If the debtor and creditor intend that the debt should subsist for a year or more, or where there is mutual acceptance that the interest may have to be paid from year to year, the interest will be yearly. This principle was applied in *Minsham Properties v Price* (63 TC 570), where a loan from a parent company, repayable on demand, gave rise to yearly interest because it was regarded by both parties as permanent finance.

It was felt in *Cairns v MacDiarmid* that merely asking whether a loan had the character of an investment was a less useful test – even an overnight deposit of money might be regarded as an “investment”.

**9076. Practical application** [Dec 2019]

*Applying case law principles*

It is always a question of fact whether, in any particular case, interest is yearly or short. The intention of the parties will be the most important factor in deciding the question (see SAIM9075). This will be the case in particular where a loan has a duration of less than 12 months but is ‘rolled over’, once or more than once, to a second year. If the intention of the parties, when the borrowing was first put in place, was for the borrowing term to be less than 12 months, HMRC will require clear evidence that this was the original intention. Without such evidence, HMRC will be unable to accept that the intention of the parties was to have a borrowing term of less than 12 months.

The question of whether interest is short interest, from which the payer has no obligation to deduct tax, is most likely to arise in the context of payments made by a UK resident to a person whose usual place of abode is outside the UK. If the interest is short, there is no need for the recipient to apply under a relevant Double Taxation Agreement to receive the interest gross (or with tax withheld at a reduced rate). There is guidance at INTM505010 onwards.

A UK resident may make a series of loans, each of less than a year, to a non-resident, and claim that the interest is short. HMRC staff should refer to the guidance at INTM413210 in such cases.

Uncertainty may also arise as to whether there is a duty to deduct tax from interest in circumstances comparable to that in *Bebb v Bunny* (SAIM9075) – where a sum of money remains outstanding for a period that may, or may not, be a year or more. For example, a manufacturer might guarantee to refund the purchase price, with interest from the date of claim, if a product proves faulty: such claims may normally be processed speedily but, in disputed cases, may drag on for over a year.

Where the parties intend at the outset that monies due will not be left outstanding for a year or more, the interest will be short – even if, in a few cases, there are delays which prolong the period over which interest accrues. If however the parties anticipate at the beginning that the debt will exist for a year or more, or appear to be indifferent as to whether it will or not, the interest is likely to be yearly.

Where the payer of the interest is uncertain about whether it is short or yearly, they may in practice “play safe” by deducting tax. If the recipient of such interest objects to the tax deduction, HMRC staff should advise him or her to take up the matter with the payer, see SAIM9180.

If, conversely, the payer decides that interest is short and pays it gross, HMRC staff should not challenge that view unless

- the decision appears to be completely unjustified on the facts and in the light of relevant case law, or there is reason to suspect a definite intention of avoiding the payment of withholding tax; and
- material sums of tax are at risk.

Overdraft interest is usually short interest.

INT Manual formerly provided:

**542010. Provisions of Section [s.874 ITA]** [March 2007]

*In some circumstances, an overseas lender may seek to circumvent the provisions of [what is now s.874 ITA] by advancing a series of short-term consecutive loans, each for a period of less than one year. It may then be argued that the interest is not annual interest but short interest, to which the provisions of [s.874 ITA] do not apply. This argument is open to challenge unless the UK borrower can show that there was no need for long term funding or that alternative sources of funding were readily available to replace that which was argued to be short term.*

*Where Inspectors meet a situation in which a long-term funding requirement is being met via a series of short-term loans, they should refer for advice to CT & VAT, Business Profits & Relief.’*

This was deleted when the Manual was rewritten in March 2011. Perhaps HMRC now accept these arrangements. Challenge would be harder if the short-term loans are each from separate lenders.

In 2012, a shallow consultation document proposed to extend the withholding tax to short interest (and so to abolish the yearly/short interest distinction), but the proposal was rightly abandoned.<sup>136</sup>

**25.22.5 Discounts and premiums**

SAI Manual provides:

**3070 Taxation: Profit on disposal** [Dec 2019]

*Deduction of tax*

---

136 HMRC, “Possible changes to income tax rules on interest” (2012) [http://webarchive.nationalarchives.gov.uk/20131002164136/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?\\_nfpb=true&pageLabel=pageLibrary\\_ConsultationDocuments&propertyType=document&columnns=1&id=HMCE\\_PROD1\\_031986](http://webarchive.nationalarchives.gov.uk/20131002164136/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columnns=1&id=HMCE_PROD1_031986)

The paper did not consider the need for the rule, or whether any modification of the rule would be better suited for its purpose. It is in fact a de minimis rule and as such serves an important purpose. The paper also did not consider international practice. Do other countries require deduction at source for interest on transient or short term loans?

HMRC, “Possible changes to income tax rules on interest: Summary of Responses” (2012).

[http://webarchive.nationalarchives.gov.uk/20131002141406/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?\\_nfpb=true&pageLabel=pageLibrary\\_ConsultationDocuments&propertyType=document&columnns=1&id=HMCE\\_PROD1\\_032340](http://webarchive.nationalarchives.gov.uk/20131002141406/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columnns=1&id=HMCE_PROD1_032340)

Discounts payable on the redemption of relevant discounted securities<sup>137</sup> are not payments of interest. Consequently the payments are made without deduction of tax.

Discounts are not interest and not subject to withholding tax even if not payable on the redemption of a DDS.<sup>138</sup>

A premium may be interest or it may be a capital receipt, in which case it is not subject to withholding tax.

### 25.22.6 *Qualifying private placements*

Section 888A ITA provides:

- (1) The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on a qualifying private placement.
- (2) “Qualifying private placement” means a security—
  - (a) which represents a loan relationship<sup>139</sup> to which a company is a party as debtor,
  - (b) which is not listed on a recognised stock exchange, and
  - (c) in relation to which such other conditions as the Treasury may specify by regulations are met.

The regulations are Qualifying Private Placement Regulations 2015. This covers relevant securities between unconnected parties where the value is £10m+ and of less than 50 years duration. Dependent upon the territory in which the lender is resident, the borrower can self-assess that no WHT need be paid.

### 25.22.7 *Quoted Eurobond*

Section 882 ITA provides the exemption:

The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on a quoted Eurobond (see section 987).

Section 987(1) ITA provides the definition:

In this Part [Part 15 ITA, withholding tax] “quoted Eurobond” means a

---

<sup>137</sup> The correct term is now deeply discounted securities.

<sup>138</sup> See 25.3 (Discount).

<sup>139</sup> Defined by reference in s.888A(6): “In this section “loan relationship” has the same meaning as in Part 5 of CTA 2009.”

security, including a share (in particular any permanent interest bearing share as defined in section 117 of TCGA 1992), that—

- (a) is issued by a company,
- (b) is listed on a recognised stock exchange or admitted to trading on a multilateral trading facility operated by an EEA-regulated recognised stock exchange,<sup>140</sup> and
- (c) carries a right to interest.

Partnership borrowers are excluded from the private placements exemption, and are excluded from the Quoted Eurobonds legislation. However, the Eurobond exemption may apply where a company partner issues a security as the general partner of an LP.

### 25.23 Excepted payment

Section 930(1) ITA provides:

The duties to deduct sums representing income tax mentioned in subsection (2) do not apply to a payment if—

- (a) it is made by a company, local authority or qualifying partnership<sup>141</sup>, and
- (b) at the time the payment is made, the company, authority or partnership reasonably believes that it is an excepted payment.

Section 930(2) ITA lists the withholding taxes which are disappplied:

The duties to deduct are those under—

**Section Topic**<sup>142</sup>

874(2) Yearly interest

889(4) Building society securities

901(4) Annual payments made by persons other than individuals

140 Section 882(2) provides the relevant definitions: “For the purposes of this section—

- (a) a recognised stock exchange is an “EEA-regulated recognised stock exchange” if it is regulated in the European Economic Area, and
- (b) “multilateral trading facility” has the same meaning as in Article 4.1.22 of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments.”

141 Section 932 ITA provides: “For the purposes of this Chapter a partnership is a “qualifying partnership” if any partner in the partnership is a company or a local authority.”

142 For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

- 903(7) Patent royalties
- 906(5) Royalties where the owner lives abroad
- 910(2) Proceeds of a sale of patent rights paid to non-UK residents
- 919(2) Manufactured interest on UK securities: payments by UK residents
- 928(2) Chargeable payments connected with exempt distributions

Section 930 ITA then provides 2 exceptions:

- (3) Subsection (1) has effect subject to any directions under section 931.
- (4) Subsection (1) does not apply to a payment made by a company, or qualifying partnership, acting as trustee or agent for another person.

Subsection (4) seems odd because as a trustee is deemed to be a separate notional person. Perhaps it applies to unit trust trustees. The omission of local authorities is also odd. But these questions will rarely arise in practice.

#### *25.23.1 Payment to UK company*

Section 933 ITA provides:

A payment is an excepted payment if the person beneficially entitled to the income in respect of which the payment is made is a UK resident company.

A UK resident company is not likely to have a place of abode abroad<sup>143</sup> but this can apply to other withholding tax rules.

Section 994 ITA considers non-resident companies subject to CT:

- (1) A payment is an excepted payment if each of the following conditions is met in relation to the payment.
- (2) The person beneficially entitled to the income in respect of which the payment is made must be a non-UK resident company.
- (3) The non-UK resident company must carry on a trade in the UK through a permanent establishment.
- (4) The payment must be one that is required to be brought into account in calculating the chargeable profits (within the meaning given by section 19 of CTA 2009) of the non-UK resident company.

#### *25.23.2 Exempt recipients*

---

143 See 25.21.3 (Place of abode: Company).

Section 935 ITA deals with ISAs, not considered here.

Section 936 provides:

- (1) A payment is an excepted payment if it is made to, or to the nominee of, a recipient who is specified in subsection (2) as a recipient who is to be paid gross.
- (2) The following recipients are to be paid gross—
  - (a) a local authority,
  - (b) a health service body within the meaning of section 986 of CTA 2010,
  - (c) a public office or department of the Crown other than one mentioned in section 978(2),
  - (d) a charity,
  - (e) a body for the time being mentioned in section 468 of CTA 2010 (bodies that are allowed the same exemption from tax as charitable companies the whole income of which is applied to charitable purposes),
  - (f) a body which is an association for the purposes of section 469(1)(a) of CTA 2010 (scientific research associations) and complies with the conditions in subsections (2) and (3) of that section,
  - (g) the scheme administrator of a registered pension scheme,
  - (h) the sub-scheme administrator of a sub-scheme which forms part of a split scheme pursuant to the Registered Pensions (Splitting of Schemes) Regulations 2006 (SI 2006/569),
  - (i) the trustees of a scheme entitled to exemption under section 613(4) of ICTA (Parliamentary pension funds), and
  - (j) the persons entitled to receive the income of a fund entitled to exemption under section 614(3) of ICTA (certain colonial, etc pension funds).
- (3) The Treasury may by order amend this section so as to add to, restrict or otherwise alter the persons or bodies who are to be paid gross.

### 25.23.3 *Partnership of exempt persons*

Section 937 ITA provides:

- (1) A payment is an excepted payment if each of the following conditions are met.
- (2) A partnership must be beneficially entitled to the income in respect of which the payment is made.

- (3) Each partner in the partnership must be—
  - (a) a person or body mentioned in section 936, or
  - (b) a person or body to whom one of subsections (4) to (6) applies.<sup>144</sup>
- (4) This subsection applies to a UK resident company.
- (5) This subsection applies to a company that—
  - (a) is non-UK resident,
  - (b) carries on a trade in the UK through a permanent establishment, and
  - (c) is required to bring into account, in calculating its chargeable profits (within the meaning of section 19 of CTA 2009), the whole of any share of the payment that is attributable to it because of Part 17 of that Act.
- (6) This subsection applies to the European Investment Fund.

Section 937 is needed on the basis that partnerships would not be transparent for the purposes of withholding, ie payment to the partnership is *not* payment to the partners, ie it adopts the chose in action analysis of a partnership share.<sup>145</sup>

#### 25.23.4 *Direction to deduct*

For completeness: s.931 ITA provides:

- (1) An officer of Revenue and Customs may give a direction to a company, local authority or qualifying partnership directing that section 930 is not to apply in relation to any payment that—
  - (a) is made by the company, authority or partnership after the giving of the direction, and
  - (b) is specified in the direction or is of a description so specified.
- (2) A direction under this section may be given only if the officer has reasonable grounds for believing, as respects each payment to which the direction relates, that the payment will not be an excepted payment at the time it is made.
- (3) A direction under this section may be varied or revoked by a later direction.
- (4) A variation or revocation of a direction under this section has effect

---

<sup>144</sup> Section 937(7) provides: “The Treasury may by order amend this section to add to, restrict or otherwise alter the persons or bodies falling within subsection (3)(b).”

<sup>145</sup> See 82.3.1 (English partnership: 2 analyses).

only in relation to payments made after the date of the variation or revocation.

But I wonder if this happens much if at all.

### 25.23.5 *Mistake by payor*

Section 938 ITA provides:

- (1) This section applies if—
- (a) a payment is made by a company, local authority or qualifying partnership without a sum representing income tax on the payment being deducted from it,
  - (b) at the time the payment is made, the company, authority or partnership reasonably believes that it is an excepted payment,
  - (c) one of the duties to deduct sums representing income tax mentioned in section 930(2) would apply to the payment if the company did not so believe, and
  - (d) the payment is not an excepted payment at the time it is made.
- (2) This Part has effect in relation to the payment as if section 930(1) had never disappplied the duties to deduct mentioned in section 930(2).

## 25.24 **Disguised interest**

Disguised interest is covered in Chapter 2A Part 4 ITTOIA.

Section 381A ITTOIA imposes the charge to tax:

- (1) This Chapter applies where a person is party to an arrangement<sup>146</sup> which produces for the person a return in relation to any amount which is economically equivalent to interest.
- (2) Income tax is charged on the return if the return is not charged to income tax under or as a result of any other provision of this Act or any other Act.<sup>147</sup>

### 25.24.1 *Interaction of disguised interest/CGT*

The general rule in s.37(1) TCGA is that where the person making a disposal is subject to income tax on the proceeds, IT has priority over

---

146 Section 318A(6) provides the standard (unnecessary) IT definition: see App 2.2.3 (Definitions of “arrangement”).

147 For this style of charging provision, see 13.3.1 (Priority in charging provision).

CGT, and there is no double charge.<sup>148</sup> Section 37(2A) TCGA disapplies this rule for disguised interest.<sup>149</sup> Instead, s.381D ITTOIA provides:

- (1) This section applies if at any time a tax other than income tax (“the other tax”) is charged in relation to a return on which income tax is charged under this Chapter.
- (2) In order to avoid a double charge to tax in respect of the return, a person may make a claim for one or more consequential adjustments to be made in respect of the other tax.
- (3) On a claim under this section an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.
- (4) Consequential adjustments may be made—
  - (a) in respect of any period,
  - (b) by way of an assessment, the modification of an assessment, the amendment of a claim, or otherwise, and
  - (c) despite any time limit imposed by or under any enactment.

It would have been simpler to leave the normal rule to apply. I cannot see the justification for a special rule. But it does not matter.

#### 25.24.2 *Economic equivalent to interest*

Section 381A(4) ITTOIA provides:

For the purposes of this Chapter a return produced for a person by an arrangement in relation to any amount is “economically equivalent to interest” if (and only if)—

- (a) it is reasonable to assume that it is a return by reference to the time value of that amount of money,
- (b) it is at a rate reasonably comparable to what is (in all the circumstances) a commercial rate of interest, and
- (c) at the relevant time there is no practical likelihood that it will cease to be produced in accordance with the arrangement unless the person by whom it falls to be produced is prevented (by

---

<sup>148</sup> See 53.3.4 (Interaction of IT/CGT).

<sup>149</sup> Section 37(2A) provides: “Subsection (1) is not to be taken as excluding from the consideration so taken into account any money or money's worth which is, or is taken into account in computing, a return on which income tax is charged under Chapter 2A of Part 4 of ITTOIA 2005 (disguised interest) (but see section 381D of that Act).”

reason of insolvency or otherwise) from producing it.

The CFM comments on the equivalent CT provision:

**CFM42060: returns ‘economically equivalent to interest’** [Aug 2018]

The main feature of the disguised interest rules is to be able to identify interest-like returns or, as the legislation puts it ‘a return in relation to any amount which is economically equivalent to interest on that amount.’ CTA09/S486A(2) sets out a definition of ‘economically equivalent to interest’ that runs through three conditions.

**Basic definition of interest (subsection (a))**

The return must fit within a basic definition of interest. This basic definition of the meaning of interest is drawn from a number of the indicia commonly cited in cases on the meaning of interest (e.g. *Euro Hotel (Belgravia) Limited* 51 TC 293 and *Bennett v Ogston* 15 TC 374) (CFM33030). This captures the familiar concepts that the return must be:

- by reference to an amount of money. This means HMRC will be looking for an investment of some sort (or an entitlement to payment of something akin to a debt) in order for the legislation to apply; and
- calculated by reference to the time value of money.

**Commercial rate of interest (subsection (b))**

The return must in all the circumstances be comparable to a commercial rate of interest. There are a couple of features to this condition that are worth noting.

The return must only be ‘comparable’. Consequently, the return does not have to be exactly the same as a commercial rate of interest. It therefore provides a range of interest rates within which a return could be ‘comparable’ to a commercial rate of interest.

In deciding whether an interest rate is comparable to a commercial rate of interest, you should assume that all factors are taken into account. A commercial rate of interest would therefore take into account the identity and creditworthiness of the counterparty. It could also include such features as the relationship between the two parties, the duration of the arrangement and the currency of the transaction(s).

**Practical likelihood of the return (subsection (c))**

The interest-like return must be predictable. There must be ‘no practical likelihood’, when viewed at the ‘relevant time’ that the return will not be produced in accordance with the arrangement.

It is therefore not enough that an interest-like return results from the arrangements. If the return is the product of chance or could not have been reasonably anticipated at the outset of the arrangement, then it

cannot be a return 'economically equivalent to interest'.

In assessing whether there was 'no practical likelihood' that the return will not be produced in accordance with the arrangement you should ignore contingencies such as default outside of the control of the parties. This would include ignoring the possibility of default.

### **The 'relevant time' (S486B(3))**

The 'relevant time' is defined for the purposes of S486B(2)(c), as being the later of the time when the company becomes party to the arrangements or the time when the return begins to be produced. It must therefore be clear at the outset that the return will be produced. Thus, although there is no express requirement for the arrangement to be 'designed' to produce the return, the return must be initially predictable.

## 25.24.3 HMRC examples

The CFM provides:

### **CFM42010 disguised interest: overview [Aug 2018]**

#### **...Example**

Company A purchases an asset (that is not a security) for £100m from Company B under an arrangement whereby Company A will sell that asset back to Company B in two years' time for £112M.

Assuming that the return of 6% per annum (straight line) is reasonably comparable to a commercial rate of interest, then this transaction provides an interest-like return in a manner that would not, without any special rules, be taxed as interest...

### **CFM45020: examples of avoidance schemes [Aug 2018]**

This guidance applies to companies that hold shares up to 21 April 2009. The following two examples show in outline how companies could structure arrangements to generate an interest-like return which for tax purposes does not arise as interest.

#### **Scheme 1: shares subject to third party obligations**

- On day 1, a UK special purpose vehicle (SPV) company issues 100m £1 ordinary shares to a bank but only 0.001p/share is actually paid up (i.e. £10k in total). Under the terms of the share issue, the bank is obliged to pay up the balance of the capital (£100m less £10k) in one year's time, even if it sells the shares in the meantime.
- On the same day, the bank sells the shares to UK plc (avoider) for their net present value of (say) £95m. At the end of the year, bank pays up the remaining £100m of share capital, so that the value of the SPV shares is then £100m, being the cash it has.

- The economic effect is that the bank receives £95m from UK plc on day 1, and pays £100m to SPV (owned by UK plc) on day 365. The figures will be such that the £5m difference represents a year's interest on the initial £95m cash paid by UK plc.
- The substance is that UK plc has invested £95m for a year and has received £5m of interest, and it is likely that this arrangement will be accounted for as a loan and the profit of £5m shown as interest income.
- For CT purposes, the only charge would be on a capital gain of £5m (subject to indexation) if UK plc disposes of the shares. It would usually be the case that UK plc would have capital losses to cover the gain.

#### **Scheme 2: other interest-like shares**

- In this scheme, a UK SPV is set up with share capital of £95m and it uses that cash to acquire a debt of £100m due in a year's time. £95m is the present value of the debt. This is most likely to have been a structured debt set up for the purposes of the scheme (and to avoid problems with the debt going bad).
- The shares are then sold to UK plc for £95m. UK plc knows the company will be worth £100m in a year's time.
- The substance is exactly the same as scheme 1 in that UK plc would earn a fixed profit of £5m in the form of an unrealised capital gain, it is only the mechanism which delivers the pre-ordained increase in value of the SPV's shares that differs.

The last example concerns dual currency investments:

#### **SAIM2800: Disguised interest: examples [Dec 2019]**

##### **...Currency movements**

An investor may receive a return from holding deposits in more than one currency, seeking to take advantage of movements in exchange rates to generate a return. The arrangements may require the investor to enter into options involving the receipt or payment of amounts in the event of the spot rate being above or below a specified level. The return the investor actually receives may be described, for example, as a combination of a 'money market rate' (say 0.5% p.a.) plus an option premium (say 4.5%), giving an overall yield of 5%. This return will fall within the disguised interest provisions.

This is not self-evident: It would need a deeper consideration of the investment background to determine if this is correct. The position may

vary from one dual currency investment to another.

#### 25.24.4 *Foreign disguised interest*

Section 381B ITTOIA provides:

Tax is charged under this Chapter on the full amount of the return, or any part of the return, arising in the tax year.

The remittance basis does not apply: foreign source disguised interest received by a remittance basis taxpayer is taxable on the arising basis.

A non-resident is not taxed on foreign source disguised interest. It is suggested that the test of foreign source should be similar to the test for ordinary interest.

### 25.25 **Loan or credit transaction**

Chapter 5C Part 13 ITA rewrites the former s.786 ICTA 1988. This was done by TIOPA in 2010, rather than in 2007 with the rest of ITA, perhaps to link in with work on CTA 2010.<sup>150</sup> The consequence is that the sections were slotted in with clumsy letter/numbering: s.809CZA-809CZC.<sup>151</sup> Throw in the repetitive style of drafting, 6 sections by contrast to the single original, and older practitioners may have preferred to have kept the old section. But there it is.

HMRC say:

**ICAEW question:** While the section has its history in income tax avoidance, there is no specific limitation on the ambit of the section to income tax or to tax avoidance situations. This causes concern and additional complexity in a number of bona fide corporate reorganisations and transactions, including the straightforward refinancing of an insolvent company involving waivers of accrued interest. We would therefore be grateful for confirmation that the Revenue does not regard the section as applying in other than income tax avoidance situations.

**Revenue response** As the Institute recalls, TA 1988 s 786(5) was introduced to tackle schemes of income tax avoidance—specifically, at attempts to circumvent the restrictions on personal tax relief for interest by a debtor substituting other income foregone for interest otherwise

---

150 The CT equivalent is Chapter 3 Part 16 CTA 2010, but it sits in the very different context of the CT loan relationship code.

151 See App 11.3 (Section numbering system).

payable. We continue to regard the subsection as aimed at situations involving tax avoidance.

Although we cannot rule out in principle its potential application to cases involving corporation tax rather than income tax, we would in practice expect this to be exceptional given the relatively less restricted relief available for interest expense of companies. We would not expect to invoke the provision in the sort of case cited by the Institute—bona fide reorganisations and straightforward refinancing of insolvent companies.<sup>152</sup>

The taxpayer referred to this in *Spritebeam v HMRC* but the point was an unattractive one, as the case concerned a tax avoidance scheme, albeit not the one at which the section was originally aimed. The Upper Tribunal were not impressed:

HMRC ‘s comments cannot change the clear words of s 786 ... the scope of s 786 cannot be restricted by the mischief at which the provisions seem to have been aimed when no such restriction can be read into the words used.

We note too that HMRC’s answer to the ICAEW’s question is not in any event wholly supportive of [Counsel for the taxpayer’s] analysis. It demonstrates that s.786(5) has the potential to be applied to circumstances outside the apparent mischief.<sup>153</sup>

### 25.25.1 “Loan/credit transaction”

Section 809CZA ITA provides:

- (1) This section defines a loan or credit transaction for the purposes of sections 809CZB and 809CZC.
- (2) A transaction is a loan or credit transaction if it is—
  - (a) effected with reference to the lending of money or the varying of the terms on which money is lent, or
  - (b) effected with a view to enabling or facilitating an arrangement concerning the lending of money or the varying of the terms on which money is lent.
- (3) A transaction is a loan or credit transaction if it is—
  - (a) effected with reference to the giving of credit or the varying of the terms on which credit is given, or

---

152 [1993] STI p.1333-1334.

153 [2015] STC 1222 at [26] - [27].

- (b) effected with a view to enabling or facilitating an arrangement concerning the giving of credit or the varying of the terms on which credit is given.

Subsections (4)(5) are in the same terms, but one refers to the lending of money and the other to the giving of credit.

In *Spritebeam v HMRC*:

We do not consider that the phrase: ‘any transaction effected with reference to the lending of money or the giving of credit ...’ requires the transaction to be something separate from the loan or credit arrangements themselves. It seems to us that this is the plain meaning of the section. Section [809CZA] is worded as it is in order to catch any arrangement for the lending of money however that arrangement may be constructed. We find nothing in its wording which could be read as limiting its application to collateral transactions, and do not agree that the subsection requires the existence of both the loan and a separate transaction if the operative provisions of the section are to be engaged.<sup>154</sup>

Section 809CZA ITA provides:

- (4) Subsection (2) has effect whether the transaction is effected—
  - (a) between the lender and borrower,
  - (b) between either of them and a person connected with the other,  
or
  - (c) between a person connected with one and a person connected with the other.
- (5) Subsection (3) has effect whether the transaction is effected—
  - (a) between the creditor and debtor,
  - (b) between either of them and a person connected with the other,  
or
  - (c) between a person connected with one and a person connected with the other.

Subsections (2)(3) are in the same terms, but one refers to lender and borrower, and the other refers to creditor and debtor.

### 25.25.2 *Annuity deemed interest*

---

154 [2015] STC 1222 at [16]. The reader may agree with the first-tier tribunal that the contrary view is the plain reading; but the point seems now settled, at least at the level of the Upper Tribunal.

Armed with the definition of “loan or credit transaction” we move on. I mention s.809CZB ITA only for completeness. This provides:

- (1) This section applies if a loan or credit transaction provides for a payment which is not interest but is—
  - (a) an annuity or other annual payment falling within Part 5 of ITTOIA 2005 and chargeable to income tax otherwise than as relevant foreign income, or
  - (b) an annuity or other annual payment which is from a source in the UK and chargeable to corporation tax under [Chapter 7 of Part 10 of CTA 2009 (annual payments not otherwise charged) or regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.
- (2) The payment must be treated for the purposes of the Income Tax Acts as if it were a payment of yearly interest (see, in particular, section 874).

The SAI Manual provides:

**SAIM9110 Artificial Arrangements** [Dec 2019]

... An example might be where A grants B an interest-free loan and B grants A an annuity for the life of the loan, or transfers the right to income from an asset to A for the duration of the loan. ...

If the transaction provides for the payment of an annuity or annual payment, the payment is to be treated as annual interest for all Income Tax (ITA07/S809CZB) and Corporation Tax purposes (CTA10/S778). The purpose of this sub-section was to prevent persons from obtaining tax relief by paying an annuity or annual payment where no relief would have been available for payment of interest.

Since the enactment of ITA07/S900 and ITTOIA05/S727, previously ICTA88/S347A (SAIM9050) which limited the circumstances in which the payer of an annuity or other annual payment can deduct and retain income tax, the tax treatment of annual interest and annuities/annual payments is the same in most circumstances. ...

So far, s.809CZB is dead-letter law.

However this sub-section is still relevant where the lender is overseas. Payments by individuals and trustees of annual interest to non-residents should be made under deduction of tax (SAIM9070), but payments of annuities/annual payments by non-corporates (whose income has been wholly subject to income tax) can be made gross. Without this sub-section there would therefore be the opportunity for a lender to

receive gross payment for what is essentially interest.

This dusty corner is outside the scope of this book.

### 25.25.3 Charge on transferred interest

Section 809CZC ITA is potentially of wider import. It provides:

- (1) This section applies if—
  - (a) under a loan or credit transaction a person transfers income arising from property,
  - (b) the person is not, as a result of Chapter 5B (finance arrangements), chargeable to income tax on the income transferred, and
  - (c) the person is within the charge to income tax.
- (2) In such a case—
  - (a) income tax is charged under this section,
  - (b) the tax is charged on an amount equal to the full amount of the income transferred,
  - (c) the tax is charged for the tax year in which the transfer takes place, and
  - (d) the person who transfers the income is liable for the tax.
- (3) This section does not prejudice the liability of any other person to tax.

Section 809CZC(4) ITA defines “transfer”:

For the purposes of this section a person transfers income if the person surrenders, waives or forgoes it.

This does not apply to an interest-free loan. One does not “forgo” income by making such a loan. Income is only foregone if it is income to which one is otherwise entitled.<sup>155</sup>

Section 809CZC continues:

- (5) Subsection (6) applies for the purposes of this section if—
  - (a) credit is given for the purchase price of property, and
  - (b) the rights attaching to the property are such that the buyer’s rights to income from the property are suspended or restricted

---

<sup>155</sup> I would also have said that a loan is not a transaction *effected with reference to* the lending of money. It *is* the lending of money. But that is now harder to maintain after *Spritebeam*.

during the life of the debt.

(6) The buyer must be treated as surrendering income of an amount equal to the income the buyer in effect forgoes by obtaining the credit.

Section 809CZC(7) ITA quantifies the amount of income:

For the purposes of this section an amount of income payable subject to deduction of income tax must be taken as the amount before deduction of tax.

The SAI Manual provides:

**SAIM9110 Artificial Arrangements** [Dec 2019]

...If the transaction is one which involves the assignment, transfer or waiver of rights to income from property (for instance a security) without the actual transfer or sale of the property itself then ITA07/S809 (CZC) (2) or CTA10/S779 (2) imposes a charge on the debtor. This charge is to income tax or to corporation tax under Schedule D Case VI on an amount equal to the income assigned. The purpose of this section is to prevent debtors from escaping tax on income corresponding to interest for which they could not have claimed relief. The person to whom the right to the income has been transferred will remain liable to tax on this income.

ITA07/S809 (CZC) (5) and (6) and CTA10/S779 (5) and (6) provide that, if property is bought on credit and the rights attaching to the property restrict the purchaser's income from the property until it is paid for, so that there is no separate provision for waiver of rights, then the above will apply as if there was an agreement to forgo the relevant amount of income.

Although (what is now) s.809CZC was introduced in 1969, the first and only case in which it was discussed was *Spritebeam* in 2013. Clearly HMRC do not seek to apply it outside interest-avoidance contexts, and the fact that the Manual still refers to the pre-2010 provision suggests it is not considered much if at all.

#### 25.25.4 *Waiver of interest*

It has never been suggested that s.809CZC might reverse the case law

decisions<sup>156</sup> which held that a waiver of interest was not taxable.<sup>157</sup> If that were wrong, then there could be a tax charge on the waiver of interest due from an insolvent debtor, even though the interest would never be paid; which would surely be absurd.

## **25.26 DT relief: Interest income**

### *25.26.1 OECD Model*

Article 11 OECD Model provides:

1. Interest arising in a Contracting State and paid<sup>158</sup> to a resident of the other Contracting State may be taxed in that other State.
2. [a] However, interest arising in a Contracting State may also be taxed in that State according to the laws of that State,
  - [b] but if the beneficial owner<sup>159</sup> of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.
  - [c] The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.

OECD Model Convention does not provide exemption but only a partial relief. UK tax is set against tax in the state of residence. So where the OECD Model rule applies, the effective tax rate is the foreign tax rate or the UK withholding tax rate (10%), whichever is the higher.

### *25.26.2 DTAs with 100% interest relief*

About a third of UK DTAs provide full relief, ie UK source interest arising to a person who is treaty-resident in the foreign state is taxable only in the foreign state, and not taxed at all in the UK; this includes France, Ireland, Luxembourg, Switzerland and USA.<sup>160</sup> HMRC publish a convenient digest

---

156 See 14.7 (Waiver).

157 *Norfolk & Montagu on the Taxation of Interest and Debt Finance* agrees: para 5.399 (looseleaf).

158 See 14.10.2 (“Paid” and “payment”).

159 See 104.11 (DTA beneficial owner rule).

160 UK/France Art.11; UK/Ireland DTA Art.12; UK/Luxembourg DTA Art.11; UK/Switzerland DTA Art.11; UK/USA DTA Art. 11.

of DTAs.<sup>161</sup>

### 25.26.3 *Interest arising in 3<sup>rd</sup> state*

OECD Commentary provides:

6. The Article deals only with interest arising in a Contracting State and does not, therefore, apply to interest arising in a third State.

Interest arising in a third state (not in either treaty state) falls within the Other Income article and is taxed in the state of residence.<sup>162</sup>

### 25.26.4 *Transfer pricing*

Article 11(6) OECD Model provide the usual rule for transfer pricing/special relationships:

6. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the interest, having regard to the debt-claim for which it is paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

OECD Commentary provides:

6. ... Interest arising in a Contracting State which is attributable to a permanent establishment which an enterprise of that State has in the other Contracting State may be taxed by the first-mentioned State under paragraph 2 but may also be taxed by the other State under paragraph 1 of Article 7 (see paragraphs 9 and 9.1 of the Commentary on Articles 23 A and 23 B concerning relief of double taxation in such cases).

### 25.26.5 *DTA definition of interest*

Article 11(3) OECD Model defines “interest”:

The term “interest” as used in this Article means

---

161 <https://www.gov.uk/government/publications/double-taxation-treaties-territory-residents-with-uk-income>

162 See 32.16 (DT relief: “Other Income”).

- [1] income from debt-claims of every kind,
  - [a] whether or not secured by mortgage and
  - [b] whether or not carrying a right to participate in the debtor's profits,
- [2] and in particular,
  - [a] income from government securities and
  - [b] income from bonds or debentures, including premiums and prizes attaching to such securities, bonds or debentures.
- [3] Penalty charges for late payment shall not be regarded as interest for the purpose of this Article.

It is necessary to distinguish:

**Treaty-interest:** interest within this definition

**UK domestic-law interest:** interest under the UK domestic law definition.

OECD Commentary provides:

18. ... The term “debt-claims of every kind” obviously embraces cash deposits and security in the form of money, as well as government securities, and bonds and debentures, although the three latter are specially mentioned because of their importance and of certain peculiarities that they may present. It is recognised, on the one hand, that mortgage interest comes within the category of income from movable capital (*revenus de capitaux mobiliers*), even though certain countries assimilate it to income from immovable property. On the other hand, debt-claims, and bonds and debentures in particular, which carry a right to participate in the debtor's profits are nonetheless regarded as loans if the contract by its general character clearly evidences a loan at interest.

OECD Commentary then considers the interest/dividend borderline:

19. Interest on participating bonds should not normally be considered as a dividend, and neither should interest on convertible bonds until such time as the bonds are actually converted into shares. However, the interest on such bonds should be considered as a dividend if the loan effectively shares the risks run by the debtor company (see *inter alia* paragraph 25 of the Commentary on Article 10). In situations of presumed thin capitalisation, it is sometimes difficult to distinguish between dividends and interest and in order to avoid any possibility of overlap between the categories of income dealt with in Article 10 and Article 11 respectively, it should be noted that the term “interest” as used in Article 11 does not include items of income which are dealt with

under Article 10.

A premium is not UK domestic law interest, but it falls within the treaty definition:

20. As regards, more particularly, government securities, and bonds and debentures, the text specifies that premiums or prizes attaching thereto constitute interest. Generally speaking, what constitutes interest yielded by a loan security, and may properly be taxed as such in the State of source, is all that the institution issuing the loan pays over and above the amount paid by the subscriber, that is to say, the interest accruing plus any premium paid at redemption or at issue. It follows that when a bond or debenture has been issued at a premium, the excess of the amount paid by the subscriber over that repaid to him may constitute negative interest which should be deducted from the stated interest in determining the interest that is taxable. On the other hand, the definition of interest does not cover any profit or loss that cannot be attributed to a difference between what the issuer received and paid (e.g. a profit or loss, not representing accrued interest or original issue discount or premium, which a holder of a security such as a bond or debenture realises by the sale thereof to another person or by the repayment of the principal of a security that he has acquired from a previous holder for an amount that is different from the amount received by the issuer of the security). Such profit or loss may, depending on the case, constitute either a business profit or a loss, a capital gain or a loss, or income falling under Article 21.

[For para 20.1, see 27.16 (DT relief for AIP income)]

21. Moreover, the definition of interest in the first sentence of paragraph 3 is, in principle, exhaustive. It has seemed preferable not to include a subsidiary reference to domestic laws in the text; this is justified by the following considerations:

- a) the definition covers practically all the kinds of income which are regarded as interest in the various domestic laws;
- b) the formula employed offers greater security from the legal point of view and ensures that conventions would be unaffected by future changes in any country's domestic laws;
- c) in the Model Convention references to domestic laws should as far as possible be avoided. ...

There is a comment on swaps:

21.1 The definition of interest in the first sentence of paragraph 3 does

not normally apply to payments made under certain kinds of nontraditional financial instruments where there is no underlying debt (for example, interest rate swaps). However, the definition will apply to the extent that a loan is considered to exist under a “substance over form” rule, an “abuse of rights” principle, or any similar doctrine.

There is a comment on penalties:

22. ... Penalty charges, which may be payable under the contract, or by customs or by virtue of a judgement, consist either of payments calculated pro rata temporis or else of fixed sums; in certain cases they may combine both forms of payment. Even if they are determined pro rata temporis they constitute not so much income from capital as a special form of compensation for the loss suffered by the creditor through the debtor’s delay in meeting his obligations. Moreover, considerations of legal security and practical convenience make it advisable to place all penalty charges of this kind, in whatever form they be paid, on the same footing for the purposes of their taxation treatment.

...

Annuity income is not treaty-interest:

23. Finally, the question arises whether annuities ought to be assimilated to interest; it is considered that they ought not to be. On the one hand, annuities granted in consideration of past employment are referred to in Article 18 and are subject to the rules governing pensions. On the other hand, although it is true that instalments of purchased annuities include an interest element on the purchase capital as well as return of capital, such instalments thus constituting “fruits civils” which accrue from day to day, it would be difficult for many countries to make a distinction between the element representing income from capital and the element representing a return of capital in order merely to tax the income element under the same category as income from movable capital. Taxation laws often contain special provisions classifying annuities in the category of salaries, wages and pensions, and taxing them accordingly.

See Avery-Jones et al “The Definitions of Dividends & Interest in OECD Model: Something Lost in Translation?” [2009] BTR 406.

#### 25.26.6 *Source of interest for DTA*

Article 11(5) OECD Model provides:

[a] Interest shall be deemed to arise in a Contracting State when the

payer is a resident of that State.

[b] Where, however,

[i] the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and

[ii] such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

It is necessary to distinguish:

**Treaty-source:** the source of interest within this definition

**UK domestic-law source:** the source of interest under UK domestic law

I refer to interest within art 11(5)[b] as “**PE-interest**”.

OECD Commentary on art 11 (interest) provides:

26. [Art 11(5)] lays down the principle that the State of source of the interest is the State of which the payer of the interest is a resident. It provides, however, for an exception to this rule in the case of interest-bearing loans which have an obvious economic link with a permanent establishment owned in the other Contracting State by the payer of the interest. If the loan was contracted for the requirements of that establishment and the interest is borne by the latter, the paragraph determines that the source of the interest is in the Contracting State in which the permanent establishment is situated, leaving aside the place of residence of the owner of the permanent establishment, even when he resides in a third State.

27. In the absence of an economic link between the loan on which the interest arises and the permanent establishment, the State where the latter [ie, the permanent establishment] is situated cannot on that account be regarded as the State where the interest arises; it is not entitled to tax such interest, not even within the limits of a “taxable quota” proportional to the importance of the permanent establishment. Such a practice would be incompatible with paragraph 5.

The Commentary then considers when (in my terminology) interest counts as PE-interest, ie (in short) when is a loan connected to a PE:

Moreover, any departure from the rule fixed in [art 11(5)[a]] is justified only where the economic link between the loan and the permanent establishment is sufficiently clear-cut. In this connection, a number of

possible cases may be distinguished:

- a) The management of the permanent establishment has contracted a loan which it uses for the specific requirements of the permanent establishment; it shows it among its liabilities and pays the interest thereon directly to the creditor.
- b) The head office of the enterprise has contracted a loan the proceeds of which are used solely for the purposes of a permanent establishment situated in another country. The interest is serviced by the head office but is ultimately borne by the permanent establishment.
- c) The loan is contracted by the head office of the enterprise and its proceeds are used for several permanent establishments situated in different countries.

In cases a) and b) the conditions laid down in [art 11(5)[a]] are fulfilled, and the State where the permanent establishment is situated is to be regarded as the State where the interest arises. Case c), however, falls outside the provisions of [art 11(5)[b]], the text of which precludes the attribution of more than one source to the same loan. Such a solution, moreover, would give rise to considerable administrative complications and make it impossible for lenders to calculate in advance the taxation that interest would attract. ...

See 103.13 (Effectively connected with PE).

### *25.26.7 Contracting state PE*

For the overlap between interest income and business profits, see 103.8.3 (Other business profit overlaps).

### **25.27 Interest: Pre-1963 DTAs**

Pre 1963 DTAs<sup>163</sup> do not provide exemption for interest. They do however provide exemption for industrial or commercial profits.

The treaties are in similar form, so I take the Belize DTA as an example. Art 3(2) Belize/UK DTA provides:

The industrial or commercial profits of a Belize enterprise shall not be subject to UK tax unless the enterprise is engaged in trade or business in the UK through a permanent establishment situated therein. If it is so engaged, tax may be imposed on those profits by the UK, but only on so

---

163 See 103.24 (Pre-1963 DTAs).

much of them as is attributable to that permanent establishment.

This confers relief on interest, provided:

- (1) The recipient is a Belize enterprise, defined as “an industrial or commercial enterprise or undertaking carried on by a resident of Belize”<sup>164</sup> (eg a Belize bank).
- (2) The recipient is not engaged in trade or business in the UK through a PE in the UK (or if it is so engaged, the interest is not profits attributable to that PE).
- (3) The interest is or is part of the “industrial or commercial profits”.

A person who makes a simple loan by way of investment does not carry on an industrial or commercial enterprise, and interest on such a loan does not constitute industrial or commercial profits. However a business (such as a bank) which includes lending does constitute an industrial or commercial enterprise and the interest is part of its profits.<sup>165</sup> HMRC agree. The International Manual provides:

The International Manual provides:

**337310. Background to claims by foreign financial concerns** [Jun 2016]

Under a longstanding practice, a claim by an overseas financial concern for interest which bears the character of income arising from their trading activities or forms part of their trading income may be relieved under the Business Profits Article (provided the Business Profits Article doesn't clearly exclude interest for example Kenya) in either of the following circumstances

- there is no interest article, or
- the conditions of the interest article are not satisfied.

**337330. How to deal with claims from foreign financial concerns** [Jun 2016]

If you receive a claim or correspondence for income which can be considered under the Business Profits Article as outlined in INTM337310

<sup>164</sup> Belize/UK DTA art.2(1)(h).

<sup>165</sup> The issue was discussed in more detail in the 6th edition of this work, and HMRC manual passages dealing with Jersey banks were set out in the 2019/20 edition of this work para 21.24.7, but I omit that here as it has become less important as the Channel Island/IoM have moved from their pre-1963 treaties to the OECD model form.

you should deal with it as follows:

Where there is no interest article in the relevant Double Taxation Agreement (DTA) and the claimant is not trading in the UK through a permanent establishment, exemption may be authorised under the business profits article on form 241(Int-Roys).

Where in such circumstances the claimant is trading in the UK through a permanent establishment, necessitating restriction of relief under that article, and in cases where there is an interest article but claims under it are automatically restricted because the claimant is trading in the UK through a permanent establishment, you will need to consult the Officer dealing with the permanent establishment and arrange for any interest attributable to the permanent establishment to be included in his computation of liability. Form 502 should be used for this purpose. Provided the Officer has no objections the interest can then be exempted under the business profits article using form 241(Int-Roys). You should issue form 501 (amended as necessary) with the Officer's copy of the exemption notice where relief is authorised under the business profits article and there is trading in the UK through a permanent establishment. Where there is no trading through a permanent establishment you need to send a memo with the exemption notice explaining the circumstances in which relief has been authorised.

Note: These provisions do not apply where the rate of relief under the business profits article is more favourable than under the interest article and relief is available under the latter.

### **337340. Requests to extend the provisions to other income [Jun 2018]**

If the claimant asks you to extend the concession to dividends or other distributions you should ask the HMRC office for the permanent establishment (PE) to confirm that

- the payments represent trading income; and
- they are not attributable to the PE.

The reason for doing this is because dividends/distributions, unlike interest and royalties, cannot be brought into the charge to corporation tax on the PE (CTA09/S19).

## **25.28 DT relief: Withholding tax**

### *25.28.1 Procedure to obtain DT relief*

The legislation is in Double Taxation Relief (Taxes on Income) (General) Regulations 1970 (which I abbreviate to "DTRR 1970"). Regulation 2(1) provides:

The following provisions of these Regulations shall have effect where, under arrangements having effect under section 497 ICTA 1970 [now s.2 TIOPA], persons resident in the territory with the government of which the arrangements are made are entitled to exemption or partial relief from UK income tax in respect of any income from which deduction of tax is authorised or required by the Income Tax Acts.

This applies where interest qualifies for DT relief.

Regulation 2(2) provides exemption from withholding tax:

Any person who pays any such income (referred to in these Regulations as “the UK payer”) to a person in the said territory who is beneficially entitled to the income (such person being referred to in these Regulations as “the non-resident”) may be directed by a notice in writing given by or on behalf of the Board that in paying any such income specified in the notice to the non-resident he shall—

- (a) not deduct tax, or
- (b) not deduct tax at a higher rate than is specified in the notice, or
- (c) deduct tax at a rate specified in the notice instead of at the lower<sup>166</sup> or basic rate otherwise appropriate;

and where such notice is given, any income to which the notice refers, being income for a year for which the arrangements have effect, which the UK payer pays after the date of the notice to the non-resident named therein shall, subject to the following provisions of these regulations, be paid as directed in the notice...

I refer to this as a “**DTRR notice**”.

Regulations 3 DTRR 1970 dots some *i*'s and cross some *t*'s:

3. Where a notice given under Regulation 2(2) directs the UK payer to deduct tax at a rate specified in the notice, the provisions of the Income Tax Acts under which he would, but for the notice, have been chargeable with or liable to account for all or part of any tax deducted at the [lower or basic] rate shall apply as if those Acts required him to deduct tax at the rate so specified.

### 25.28.2 Revocation of DTRR notice

---

166 The rate “otherwise appropriate” is always the basic rate, never the lower rate; the drafter has failed to amend the wording of the regulation to keep up with the changes to tax rates in 2008. But no harm arises from this error.

Of course, a notice is revocable. Regulation 8 DTRR 1970 provides:

Any notice given under Regulation 2(2) may be expressed to become ineffective if certain specified events happen, or, whether so expressed or not, may be cancelled by a notice of cancellation given by or on behalf of the Board, and if to the knowledge of the UK payer any of those events happens or if such notice of cancellation is given, any payment made to the non-resident by the UK payer after the happening of that event becomes known to the UK payer or after the receipt of that notice, as the case may be, shall be subject to deduction of tax in accordance with the Income Tax Acts.

### 25.28.3 *DTRR notice issued in error*

Regulations 5 DTRR 1970 provides:

5 The UK payer shall not, in respect of any payment, be charged with or liable to account for any tax which, but for a notice given under Regulation 2(2), he would have been required by the Income Tax Acts to deduct and account for on making the payment but in compliance with the notice has not deducted.

Regulation 9 DTRR 1970 provides:

If it is discovered after a notice has been given under Regulation 2(2) that the non-resident is not entitled to exemption or partial relief from tax in respect of income referred to in the notice, any tax which, but for the notice, would have been deductible from any payment made to the non-resident by the UK payer but in compliance with the notice has not been so deducted—

- (a) may be assessed on the non-resident under Case VI of Schedule D by an Inspector, or
- (b) shall, if a direction to that effect is given by or on behalf of the Board, be deducted by the UK payer out of so much of the first payment made to the non-resident after the date of the direction as remains after the deduction of any tax deductible therefrom under the Income Tax Acts, and any balance which cannot be deducted out of the first such payment shall be deducted, subject to the same limitation, out of the next such payment, and so on until the whole of the tax (the amount of which shall be specified in the direction) has been deducted.

Any tax which the UK payer is required to deduct under paragraph (b) of this Regulation shall be accounted for as if it was tax deductible under

section 53 of the Income and Corporation Taxes Act 1970 in respect of the payment from which it is deducted.

The UK payor is not at personal risk from complying with a mistaken notice, but the non-resident payee is at risk of assessment directly.

## 25.29 Obtaining a DTRR notice

There are two methods to obtain a DTRR notice not to pay WHT: the certified claim route and the DTT passport scheme.

### 25.29.1 *Certified claim*

The DTTP consultation paper provides:

This process can be cumbersome for overseas lenders, as a Direction needs to be issued for each loan, and in each case HMRC requires the overseas lender to obtain proof of their residence for tax purposes from their own fiscal authority. This is known as the “certified claim” method. If an overseas lender makes multiple loans to the UK it needs to go through this process each time before HMRC will issue a Direction to each borrower in the UK.<sup>167</sup>

### 25.29.2 *Partnership lender*

HMRC say:

In deciding whether or not HMRC Residency should exercise its discretion in meeting an application for relief at source [ie an application to pay interest without deduction], it must primarily have regard to the risk that the underlying conditions for relief might change over the lifetime of a Direction (which will normally last no longer than five years). Such changes might remove the basis for relief altogether, or in some other way prejudice the amount of tax that the UK is otherwise properly entitled to receive in that period.

Given its duty of care to the UK Exchequer and taxpayer, HMRC Residency have to give particular consideration to the desirability of giving DT treaty relief where transparent concerns such as partnerships and LLCs are concerned. This is because, more often than not, there is a much higher risk that the beneficial owners of such concerns will change. Or that there will be fluctuations in income or profit apportionment that might erode the amount of UK-source income that is attributable to the DT treaty-resident beneficial owners who were identified at

---

167 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/525399/Double\\_Taxation\\_Treaty\\_Passport\\_scheme\\_review.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/525399/Double_Taxation_Treaty_Passport_scheme_review.pdf) para 1.4

the time the application for relief at source was made.

Attention is drawn to the undertaking sought from claimants in the Declaration (Part F of the US/Company 2002) that they will notify HMRC Residency of any changes in the information given on the form. (A similar warning to notify any material changes is given to a UK payer when a Direction is issued to it.)

Without calling into question the good faith of partnership or LLC claimants who give these undertakings, HMRC Residency considers that the problem of monitoring this aspect is particularly acute where there are a very large number of investors, or there is an unfeasible number of layers of participation - partners who are themselves partnerships, which contain yet more transparent partners. For these reasons, although HMRC Residency is willing to entertain any application for relief at source from partnerships or LLCs, it should be understood that it is likely to give relief in this way chiefly where:

- \* HMRC Residency are able to accept satisfactory assurances about the monitoring and notification of membership from the claimant concern.
- \* The number and type of the concern's membership is not a problem in the first place - for example, a small and fixed number of participators, such as US corporations engaged in a joint venture. Or where the concern is the business arm of a small number of joint intellectual property owners such as a band or similar collaborative venture.
- \* In response to a successful representation of special considerations or factors that would allow us to decide that relief may safely be given in this form.

Each case will be considered on its merits.

Otherwise, HMRC Residency will consider giving relief only by meeting discrete repayment claims.<sup>168</sup>

Although this comment is made in relation to the USA DTA, it should apply to partnerships generally. On the other hand, it applies only to American LLCs (which are treated as transparent under the US DTA).

### *25.29.3 Debtor outside UK*

HMRC Residency Double Taxation Guidance Note 1 deals with applications for relief at source on interest payments where the borrower is outside the UK:

This Guidance Note explains how HMRC Residency Nottingham handles applications for relief at source from UK income tax under a double taxation treaty in respect of interest payments where both lender and borrower are outside the UK.

[After some general comments on the law the note continues:]

---

168 "HMRC Residency Double Taxation Guidance Note 3 partnerships and LLCs claiming relief under the 2002 UK/USA DTC."

In its consideration of an application for relief at source in such circumstances, HMRC Residency must be satisfied that all the elements necessary to give relief are present. In the circumstance where the payer of the interest is not situated in the UK, HMRC Residency will need satisfactory evidence that the payer has concluded that the payments are to be considered as UK-source and has formed the intention of deducting and accounting for tax accordingly.

HMRC Residency's claim forms ask claimants to attach copies of relevant loan documentation as part of the normal process. In cases such as those discussed in the previous paragraph, HMRC Residency would also ask claimants to enclose supporting evidence confirming the payers' intentions. This could, for example, be copies of pertinent correspondence with the borrower or other relevant documentation.

Without the comfort afforded by such supporting documentation, HMRC Residency may well take the view that it should not exercise its discretion under SI 1970/488 to authorise relief at source.

However, it would then be open to the non-resident payee to make a repayment claim to HMRC Residency once the interest payments have commenced and tax has been deducted. HMRC Residency will be prepared to keep the application for relief at source open and on file pending this eventuality. If the non-resident payee is then able to forward a certificate of tax deducted completed by the payer, HMRC Residency may then be able to accept that the UK source categorisation of the payments has been established. Assuming that all the other conditions for Double Taxation treaty relief are present, HMRC Residency should then be in a better position both to repay the tax deducted and consider in a more positive light the appropriateness of issuing a Direction under SI 1970/488 for future payments.<sup>169</sup>

This is the most absurd procedure which could be imagined, for in many cases the payor will want to argue that the interest is not UK source but (since one can rarely<sup>170</sup> be sure) will want a direction to pay gross as a

---

169 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/606556/Double\\_Taxation\\_Treaty\\_Passport\\_Scheme\\_-\\_Terms\\_and\\_Conditions\\_and\\_Guidance.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/606556/Double_Taxation_Treaty_Passport_Scheme_-_Terms_and_Conditions_and_Guidance.pdf)

170 The guidance note states complacently that "The meaning of UK-source in this context will not normally give rise to difficulties." The author has not read the HMRC consultation paper on interest which says: "The current tests in UK law of whether ... payment of interest is made from a UK source are unclear and cause confusion." See 25.14.1 (Source of interest: Critique).

safeguard. Perhaps no-one takes any notice of it in practice.

### 25.30 DTT Passport scheme

The DTTP scheme is intended to streamline the procedure for obtaining a DTRR notice.

The scheme is explained in:

HMRC, “Double Taxation Treaty Passport Scheme” (2017) (“DTTP”)<sup>171</sup>

HMRC, “DTTP Scheme: Technical questions and answers” (“DTTP Q&As”)<sup>172</sup>

The background can be found in HMRC consultation and response papers:<sup>173</sup>

Double Taxation Treaty Passport scheme review (2016)

Double Taxation Treaty Passport scheme review consultation response (2017)

HMRC, “Double Taxation Treaty Passport Scheme” provides:

#### **DTTP30000 Introduction and general purpose**

The Double Taxation Treaty Passport (DTTP) Scheme is an administrative simplification designed to assist certain foreign lenders in accessing reduced withholding tax rates on interest that are available within the UK’s tax treaties with other territories. The scheme is available to all UK borrowers who are required to withhold income tax at the basic rate on certain loan interest payments to overseas lenders.

The scheme is administered by the Double Taxation Treaty Team, who can be contacted at HM Revenue & Customs, DT Treaty Team, Barkley House, Castle Meadow Road, Nottingham, NG2 1BA.

The scheme allows certain overseas lenders to be recognised by HMRC as residents of countries with which the UK has double taxation treaty. Proof of this recognition will be the granting of the status as “treaty passport holder”.

Loans dealt with under the scheme can, subject to a direction issued by HMRC, be paid with deduction of withholding tax at the rate specified in the relevant treaty.

The scheme exists as an alternative to the certified claim method for reclaiming tax withheld. This method remains available for those lenders not using the DTTP scheme.

Guidance on certified claims is available at

<https://www.gov.uk/guidance/double-taxation-relief-for-companies>

#### **DTTP30010 Commencement of new rules**

---

171 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/606556/Double\\_Taxation\\_Treaty\\_Passport\\_Scheme\\_-\\_Terms\\_and\\_Conditions\\_and\\_Guidance.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/606556/Double_Taxation_Treaty_Passport_Scheme_-_Terms_and_Conditions_and_Guidance.pdf)

172 <http://81.144.160.101/cnr/dtpp-faqs.pdf> (updated 2013).

173 <https://www.gov.uk/government/consultations/double-taxation-treaty-passport-scheme-review>

Prior 6 April 2017 the scheme was restricted to overseas corporate lenders and UK corporate borrowers.

As announced at Spring Budget 2017 the Government extended the scheme for loans entered into on or after 6 April 2017 - the following are key elements:

- The scheme will be made available to all UK borrowers that have an obligation to deduct withholding tax, including UK partnerships, individuals and charities.
- Transparent entities (including partnerships) will be admitted to the scheme as lenders where all of the constituent beneficial owners of the income are entitled to the same treaty benefits under the same treaty.
- Sovereign wealth funds and pension funds who are utilising withholding tax treaty rates will be admitted into the scheme as lenders.

#### **DTTP30020 Overview**

An eligible lender will make an application to HMRC to be awarded passport holder status. A passported lender will provide the borrower with its Passport number, and the relevant rate at which it believes income tax should be withheld.

HMRC will review the application by the borrower to withhold income tax at the relevant treaty rate, and if the conditions for relief are met it will issue a Direction for the borrower to do so.

#### **DTTP30100 Overview of lender eligibility**

All corporate entities and certain transparent entities may, following a successful application, be admitted to the DTTP scheme as lenders.

Transparent entities are eligible to apply under the scheme only if all of the constituent ultimate beneficial owners of the income are entitled to the same treaty benefits under the same treaty.

So any entity who is currently entitled to make use of the certified claim procedure on its own account will be able to apply for a passport under the DTTP scheme unless otherwise excluded.

HMRC retains full discretion on whether to admit these entities to the scheme.

### *25.30.1 Corporate lender*

DTTP provides:

#### **DTTP30110 Corporate entities**

Any overseas corporate entity – or concern treated by its country of residence as a corporate body for tax purposes - is entitled to apply for a treaty passport as a lender.

A separate passport is needed for each entity in a group, and there are no ‘group passports’ which can be used at group level.

#### **DTTP30120 Branches and permanent establishments**

Where, for double taxation treaty purposes, HMRC regards a branch as being indistinguishable from its head office, then the double taxation arrangements the UK has with the country of residence of that head office governs what relief from UK withholding tax might be available to interest paid to the branch.

That being the case, if a loan is suitable for treaty passport treatment when made by the head office, then it can be considered as so eligible when made by a branch, subject to it meeting all other treaty passport criteria for suitability and any tests (such as subject to tax

in the head office residence country) laid out in the relevant double taxation treaty relied on to obtain relief.

### 25.30.2 *Transparent lender*

DTTP provides:

#### **DTTP30130 Transparent entities including partnerships**

Transparent entities can participate in the scheme as lenders if all of the ultimate constituent beneficial owners of the income are entitled to the same treaty benefits under the same treaty.

Overseas partnerships are entitled to apply for a treaty passport, but only where all partners are resident in the same jurisdiction and entitled to the same treaty benefits.

When applying for a treaty passport, a partnership should nominate a partner to be responsible for corresponding with HMRC regarding the passport and notifying any relevant changes.

### 25.30.3 *S corp/LLC lender*

DTTP Q&As provides:

A United States multi-member LLC which has elected under ‘check the box’ to be taxed on a simple corporate basis is eligible to apply for and use a passport, as it meets the criteria of both Article 3(1)(b) of the UK/USA Double Taxation Convention and paragraphs 1 and 3 of the Treaty Passport Scheme Terms and Conditions.

That seems self-evident.

HMRC is also prepared to consider issuing a passport to a US LLC which is wholly owned by a US corporate single member, and which is treated for US tax purposes as a disregarded entity, fiscally indistinguishable from its parent.

Although US S-corporations are required to file separate US income tax returns they are (in broad terms) required to determine and allocate ‘tax attributes’ (linked to business profits) to their individual owners proportionate to their share ownership; these tax attributes are then brought into account in assessing that owner’s overall tax exposure.

Drawing a general analogy with the circumstances of a disregarded entity LLC, HMRC will consider issuing a passport to an S-corporation which is owned by a single US corporate owner, with the entirety of the tax attributes of the S-corporation thus attracted to that single owner.

### 25.30.4 *Sovereign/pension fund lender*

DTTP provides:

#### **DTTP30140 Sovereign wealth funds and pension funds**

Sovereign investors and pension funds who are utilising treaty withholding tax rates may participate in the scheme if the ultimate beneficial owner of the income is entitled to the same treaty benefits under the same treaty.

This process is separate from, and has no impact on, the process for making a claim relating to sovereign immunity.

HMRC will accept applications made by the trustees of the pension fund in their capacity as representatives of the fund's members. A copy of the Pension Trust Deed should be provided in support of the application.

### 25.30.5 *Syndicated loan (joint lenders)*

DTTP provides:

#### **DTTP30160 Syndicated loans**

A syndicate as such cannot be a treaty passport holder. Where the syndicate has chosen to be treated as an entity under the Syndicated Loan Scheme ("SLS"), formerly the Provisional Treaty Relief Scheme, it will be the syndicate manager who conducts the syndicate's dealings with HMRC. Possession of a passport by the overseas lender will help the syndicate manager to judge the availability of double taxation relief available to the syndicate as a whole.

If passport holders are lending members of a syndicate that is outside the SLS, then it is open to them to make use of their passport in substitution for a certified claim (assuming the satisfaction of all relevant DTTP scheme conditions – for example, beneficial ownership where relevant). The UK borrower must then tell HMRC of that use with a DTTP2 notification, leading to the issue of a Direction enabling relief at source on the interest payments to that passport holder.

Overseas lending members of a non-SLS syndicate that do not possess a passport will need to make a certified claim in the normal way.

Where a UK borrower has a loan facility with multiple lenders, and frequent buying into or trading of debt-right, then HMRC recognises that individual DTTP2 notifications may place an undue compliance burden on that borrower. As a consequence, HMRC is willing to consider entering into arrangements with that borrower whereby these individual notifications can be swept up into a monthly consolidated DTTP2A notification. This will still require a passport holder to follow the standard DTTP procedure with the borrower - for example, specifying the rate of double taxation relief it considers itself entitled to - but in a modified form appropriate to the borrower's circumstances. UK borrowers wishing to enter into such arrangements with HMRC should contact: HM Revenue & Customs, LBS DT Treaty Team, Barkley House, Castle Meadow Road, Nottingham, NG2 1BA, telephone 03000 547584.

### 25.30.6 *Transfer of loan*

DTTP provides:

#### **DTTP30170 Secondary loan market**

Acquisition of a loan by a third party may create a new payer/payee relationship between the UK borrower and the overseas acquirer of the loan.

Where a passport holder acquires a loan for which withholding tax is due on the interest payments, they will be eligible to use the scheme in the normal way where all other requirements are met.

## 25.31 DTTP scheme: Guarantors

DTTP provides:

### **DTTP30180 UK guarantors**

The exposure of a guarantor of a debt will be contingent on whether it will be called on to act on that guarantee in the case of default by the principal debtor, and assume the responsibility for making interest payments. Any payments not categorised as interest will not be subject to withholding tax and therefore not come into consideration in a treaty passport context.

In the case of such default, a new payer/payee relationship can then be said to exist between the guarantor and the overseas owner of the debt-right, which can then expose the guarantor to a withholding tax obligation. While the loan arrangements giving rise to the guarantee might have existed for some time, and was contracted with a UK borrower other than the guarantor, for the purposes of the DTTP scheme HMRC regards the date from which the guarantee is called upon (and the guarantor assumes liability for payments) as the beginning of a new loan relationship amenable to the use of a passport.

On this footing, and conditional on the guarantor and overseas lender otherwise meeting the conditions of the scheme, and absent any resulting changes in the overseas owner of the debt-right, the latter may make use of its passport in substitution for a certified claim in the usual way.

This is subject to there being no bar to the use of the passport found elsewhere in the DTTP scheme terms and conditions and guidance.

## 25.32 DTTP scheme: Application process

DTTP provides:

### **DTTP30200 Application process**

Applications for passport holder status are made using a form DTTP1, which is available online for download and postal submission. Applicants must obtain a certificate of residence from the overseas tax authority where they are resident. This residence certificate should have been issued within the last 12 months.

If accepted onto the scheme, each passport holder is given a unique identifying reference number to be used in all DTTP scheme correspondence.

Passports are valid for a period of 5 years, after which point they may be renewed.

The consideration and acceptance of an applicant's request for passport holder status shall be entirely at the discretion of HMRC.

### **DTTP30300 Register of passport holders**

A register of recognised passport holders is kept by HMRC and is available to the general public to verify a passport holder's status. Included on this register is the name of the lender, their unique DTTP scheme reference number and country of residence.

In participating in the DTTP scheme, passport holders agree that HMRC may publish their name and DTTP scheme identification details in the register. A lender can use the certified claims method for obtaining treaty relief to avoid the publication of their details.

### 25.32.1 *Conditions for use*

DTTP provides:

#### **DTTP30400 Conditions for use**

A passport holder will enter into a loan making use of the DTTP scheme only where all conditions for relief under the relevant double taxation arrangements are satisfied.

This will include (but not be restricted to) factors such as:

- where being subject to tax in the passport holder's country of residence is required
- where relief is restricted only to the amount of income remitted to that country of residence (where it is not intended to remit the entirety, then the DTTP scheme will not be available or used)
- where the passport holder cannot reasonably demonstrate that it is the beneficial owner of the interest (in the international fiscal meaning of that term), and where this is a requirement for relief.

HMRC reserves the right not to apply the DTTP scheme facility to a particular loan, in which eventuality it will notify both lender and borrower as early as possible.

### 25.32.2 *Change of circumstances*

DTTP provides:

#### **DTTP30410 Material changes to lender circumstances**

A passport holder will be obliged to notify HMRC if there are any material changes to its form or circumstances.

Examples of material changes include the following:

- a change in its correspondence address
- a change in its business form (such as following a merger)
- a change of its name
- a change in its country of residence
- for non-corporate entities, any changes in the country of residence of any of its constituent members
- for non-corporate entities, any changes in its underlying constituent membership
- any other change of circumstance which would potentially require HMRC's consideration when issuing a passport

Failure to do this may result in the suspension or revocation of passport holder status, at HMRC's discretion.

#### **DTTP30420 Material changes to a loan or its ownership**

In certain circumstances, where there is a material change in the terms or ownership of a loan subject to a direction, the lender should notify HMRC to ensure that relief-at-source can continue to apply.

As a general rule, and assuming that all relevant treaty passport criteria are met, if a claim form would previously have been necessary to notify HMRC of a material change in the terms of a loan then lenders may use the treaty passport process instead.

Specifically, this can cover:

- Changes in material circumstances in the lifetime of a Direction. Guidance on what

constitutes a material change can be found in DT Guidance Note 2 (reproduced as Appendix C of this guidance).

- Contractual extensions of a loan (being an instance of such a material circumstance).
- The sale or assignment of a loan. If the loan commenced before 06 April 2017 (the date the new DT Treaty Passport scheme rules commenced) and is sold or assigned after that date, HMRC will for passport purposes treat the date of sale or assignment as being the date the loan commenced.
- ‘UK-source’ applications dealt with by DT Guidance Note 1 (reproduced as Appendix B of this guidance) and allowed for under the DTTP scheme’s terms and conditions - (where the borrower believes that it would be liable to UK withholding tax on interest payments).

Where the existing or new lender is a passport holder; a borrower may then submit a DTTP2 notification in place of a claim form (certified or otherwise) from the lender that would otherwise be required.

Lenders should consider all Guidance Notes mentioned above before applying for relief at source through the treaty passport route, as compliance with them will still be incumbent to the parties to a loan.

So far as changes, extensions and transfers of debt-right are concerned HMRC would expect lenders to take particular care to judge whether the material changes involved are potentially of such a nature as would prudently merit a fresh claim or passport application (where, for example, the passport holder’s name has changed).

This is a matter for the parties to the transaction to weigh up for themselves, having regard to factors including (but not limited to) the commercial terms of the new or extended loan relationship, and any cross-ownership or community of interest relationship between the parties to a deal.

In regard to the above HMRC reserves power of discretion at all times to ensure that the scheme is used appropriately.

### 25.32.3 *Securitisation*

DTTP provides:

#### **DTTP30430 Securitisation of contractual debt**

In certain circumstances HMRC will accept the use of the DTTP scheme process by a passport holder purchasing or acquiring securitised contractual debt-rights, such as a portfolio of poor performing or toxic debts. The circumstances HMRC is willing to extend the use of the treaty passport facility are:

- the purchase or acquisition of the debt-right by the passport holder is effected in a single transaction, and
- interest payments are gathered in and paid on under a single asset management agreement.

Particular regard should be had as to whether the basic conditions of the DTTP scheme are met, especially concerning beneficial ownership considerations (where pertinent to the availability of relief), by the parties to these sorts of transactions in judging whether the use of a treaty passport is appropriate

### 25.32.4 HMRC reviews

DTTP provides:

#### **DTTP30440 HMRC's right to review passport holder and loan information**

It is a requirement of the DTTP scheme that passport holders co-operate with HMRC when it conducts a review of lender status or any other aspect of the scheme. This means providing HMRC with all information requested in connection with such a review.

That co-operation shall extend to providing HMRC with copies of loan documentation, information about any loans entered into using a treaty passport and any other information requested.

The passport holder may be specifically required to provide a schedule of 'passported' loans contracted by it within a specified period; that schedule identifying the UK borrowers, dates of loans and amounts lent.

### 25.32.5 Process for borrowers

DTTP provides:

#### **DTTP30500 Eligibility – borrowers**

For loans entered into on or after 06 April 2017 the DTTP scheme may be used to obtain double taxation treaty relief on UK loan interest payments made by any UK resident borrower (or any non-UK resident borrower with UK source income) obliged to withhold income tax under section 874(2) Income Tax Act 2007.

For loans entered into between 1 September 2010 and 5 April 2017 only loan interest payments made by UK corporate borrowers (or non-UK resident borrowers with UK source income) fell within the scheme, subject to the old terms and conditions (see DTTP31000).

#### **DTTP30600 Entering into a passported loan**

Simply entering into a loan with a passport holder does not automatically allow the borrower to withhold tax at the treaty rate when making interest payments: the borrower must also notify HMRC that they have entered into the loan using form DTTP2.

#### **DTTP30610 DTTP2 process**

Once in possession of a treaty passport, a passport holder then has the potential to enter into a loan agreement that can be dealt with under the DTTP scheme.

The passport holder should in that case provide the borrower with its DTTP scheme reference number (verifiable by reference to the online register of passport holders), and specify the rate of relief applicable under the relevant double taxation treaty in force, so that the UK borrower (or foreign borrower with UK-source interest payments) can enter these details into the DTTP2 notification to HMRC.

The DTTP2 form can be accessed via the Gov.uk website. Borrowers have the option of printing the form and posting it, or of submitting it online.

On receipt of their online submission acknowledgement, borrowers who submit the DTTP2 online may, if they wish, provisionally withhold at the relevant treaty rate in advance of receiving a formal Direction.

If a UK resident borrower (or any non-UK resident borrower with UK source income)

applies the wrong rate of relief, they will be obliged to make any corrective payments to HMRC.

HMRC reserves the right not to apply the DTTP scheme facility to a particular loan. In this eventuality the lender and borrower should be notified as soon as possible.

**DTTP30630 Directions to pay tax under treaty rate**

If on receipt of a DTTP2 form HMRC will check if all conditions for relief under the relevant double taxation treaty are met, the borrower will be sent a Direction under Regulation 2 SI 1970/488, instructing them to either to

- not deduct tax, or;
- not deduct tax at a higher rate than is specified in the notice, or
- deduct tax at a rate specified in the notice instead of at the lower or basic rate otherwise appropriate

The Direction will specify the period it is valid for. This will usually be no longer than 5 years.

**DTTP30640 Consequences of failure to notify HMRC of entry into a passported loan**

If the UK resident borrower (or non-UK borrower with UK source income) does not notify HMRC that they have entered into a loan from a passport holder that they consider to be a passported loan, they will be required to withhold tax at the basic rate regardless of the passport holder's status.

HMRC reserves the right to request payment of tax and/or interest in such cases.

If the UK borrower does not send a DTTP2 notification to HMRC before the first interest payment, then HMRC can give no assurance that any Direction will be issued in time to be applied to a particular interest payment.

The UK borrower may therefore not get a Direction before it has to make interest payments.

If HMRC is unable to issue a Direction before a particular interest payment is made, the borrower must fulfil its legal obligation to withhold tax, and the passport holder will need to make a certified repayment claim (see DTTP30650).

**DTTP30650 Repayments of withholding tax**

A claim for repayment of tax shall be made by the passport holder in writing and should include the name of the borrower, date(s) of payment, gross amount(s), amount of tax deducted and repayment instructions.

**DTTP30700 Renewals**

When granted, a passport will be valid for 5 calendar years from the date of granting.

A passport may be renewed on application to HMRC by letter to HM Revenue & Customs, LBS DT Treaty Team, Barkley House, Castle Meadow Road, Nottingham, NG2 1BA, not less than 3 months before the date of expiry.

If there have been no material changes since the original passport is granted then the passport will be renewed for a further 5 year period subject to HMRC conducting necessary checks. If an application for renewal is not received by the expiry date, then passport holder status shall be withdrawn.

Lenders will take full responsibility for ensuring that renewal applications are made timeously.

**DTTP30800 Sanctions for misuse**

A passport holder found to be in breach of these terms and conditions may, depending on

the gravity of any breach:

- receive a formal warning that a further breach may result in the suspension or removal of their passport status; or
- have their passport status suspended for a fixed period, said period being entirely at the discretion of HMRC; or
- have their passport holder status removed, said removal and any conditions which may be attached thereon, being entirely at the discretion of HMRC.

Determination of whether a breach of these terms and conditions has taken place will be entirely at the discretion of HMRC.

**DTTP30810 Effects of cancellation of a passport on an existing Direction**

In the event of a lender's passport holder status being withdrawn, the borrower can rely on a Direction in the usual manner unless informed otherwise by HMRC in a notice of cancellation. The content and issuing of a notice of cancellation is entirely at the discretion of HMRC.

For the avoidance of doubt, the loss of passport holder status by a lender will not of itself be viewed as a material change invalidating a Direction.

In a connected party lending scenario, the borrower may be liable to withhold tax if it knew, or might reasonably be expected to know, that the passport holder did not qualify for relief.

**DTTP30900 Interaction with other provisions**

The DTTP scheme is distinct from Council Directive 2003/49/EC (EU Directive on Interest and Royalties) and s.888A ITA 2007 and SI 2015/2002 (Private Placement legislation).

For the avoidance of doubt the DTTP scheme is an administrative simplification within existing legislation covering withholding tax on payments overseas that are relievably under double taxation treaties, namely s.874 ITA 2007 (as may be amended or re-enacted) and SI 1970/488.

Accordingly the DTTP scheme should not be used in relation to withholding tax in respect of the legislative provisions such as those mentioned above.

...

## 25.32.6 *Change of circumstances*

DTTP provides:

**DTTP31200 Appendix C – Double Taxation Guidance Note 2**

**Changes of name and business account details during the lifetime of a Double Taxation relief at source**

This Guidance Note explains how changes in payer and payee name and business details may affect the validity of an existing Direction for UK payers to make payments of interest/royalties to non-UK residents which incorporate double taxation treaty relief. It sets out the circumstances in which such changes can trigger the need for a fresh application for relief at source from the non-resident.

**Background**

Under Chapter 3 of Part 15 Income Tax Act 2007 ... there is a general obligation on UK payers of interest and royalties to deduct and account for tax at a stipulated rate to HMRC.

HMRC Residency has the discretion to give Double Taxation (DT) treaty relief at source by directing, under Regulation 2 of SI 1970 No. 488, a UK payer of relievable income to make subsequent payments either without deducting income tax at the statutory rate, or by deducting an amount specified by reference to the DT treaty appropriate to the country of residence of the payee.

In the absence of a Direction, or where it may be reasonably inferred that an existing Direction has become invalid by reference to the conditions under which it was issued, the UK payer is bound to deduct and account for tax in the normal way. Failure to do so may result in the UK payer being assessed for the tax that should have been deducted from the payments in question and being charged to interest and penalties.

Both the UK payer and the non-resident payee are specifically named and identified, using the information supplied to HMRC Residency in the application for treaty relief.

The Direction itself clearly states that it will 'cease to have effect if ... the recipient of the income changes...' In strictness this means the Direction would become invalid by any change in the name or details, no matter how minor, of the account to which payments are being made by the UK payer.

That can't be correct. But the point will not often arise.

### **Compliance issues**

Whilst HMRC Residency has to fulfil its obligations to protect the UK Exchequer and taxpayer, it seeks to keep the compliance and administrative work required from its customers to a minimum.

Changes in the name and business details of either the UK payer or the non-resident payee may signify a more fundamental change to the basis on which DT treaty relief was authorised in the first place. And this could mean that relief is either no longer available or that the terms under which the Direction was issued must be reconsidered.

The key issue that HMRC Residency must have regard to is whether there has been any change in the underlying beneficial ownership of the income in question, and of the relationship between the beneficial owner(s) and the UK payer, that could prejudice the basis on which treaty relief was initially authorised.

### **The HMRC Residency approach**

HMRC Residency adopts the following broad tests in deciding what further action is appropriate where there have been changes in the name and business details of either the UK payer or the nonresident payee.

#### **Changes affecting the UK payer**

- If the UK payer changes its name with no change of ownership it will be unable to rely upon the cover of the existing Direction, which was issued to it under a different name. But if it advises of the change, HMRC Residency is willing to consider issuing a replacement Direction in the new name of the payer without a fresh application from the non-resident payee.

Reasoning: the assumption is that a superficial (and thus non-material) change only has taken place.

- If beneficial ownership of the UK payer changes or it is the subject of a merger or other restructuring, and it notifies of the changes, HMRC Residency will ask the UK payer's tax office whether or not there is any objection to the issue of a new Direction, without

a fresh application being required. A new Direction would, so far as possible, be worded to provide cover for the UK payer from the time of any changes.

Reasoning: the tax office is alerted to any emerging tax consequences for the UK tax base (for example transfer pricing) and can in return flag up any prejudicial elements for the basis of the DT claim (for example a special relationship question). This should identify at an early stage cases where a fresh application for treaty relief is needed, or where the extent or form of the relief must be otherwise re-assessed.

#### **Changes affecting the non-resident payee**

- If the non-resident payee simply changes its name and there is no change of ownership, and advises to this effect, HMRC Residency will ask for documentation of the name change and consider issuing a fresh Direction with the new payee details. Such a Direction would cover the period from the changes in payee details.

Reasoning: no fresh application is likely to be justified, using the same assumptions as within bullet one above.

- If beneficial ownership of the non-resident payee changes or it is the subject of a merger or business restructuring, HMRC Residency will require a fresh application from the payee. It will process this in the normal way, and where it is satisfied treaty relief is due will issue a new Direction, subject to the normal rules about retrospection: see the article ‘Treaty Claims and Loan Interest’ in Tax Bulletin Number 12 of August 1994 - the principles underlying which are now applied to all forms of UK source income, and not just interest.

Reasoning: the overseas concern that was previously successful in claiming treaty relief has changed in a sufficiently substantial and material way as to justify a re-establishment of that entitlement.

#### **Conclusion**

UK payers especially should take careful note of the wording and terms of any SI 1970/488 Direction issued to them in order to understand fully their obligations to deduct tax at the appropriate treaty rate.

Prompt notification of changes of name or beneficial ownership etc. will allow HMRC Residency to give fresh consideration to the terms of the Direction and enable it to issue a new notice where appropriate at the earliest opportunity and so give the UK payer or non-resident payee certainty of treatment.

If you consider that you may be affected by such changes, you should contact HMRC Residency caseworkers immediately, quoting the HMRC Residency ‘FD...’ reference given on the Direction or used in correspondence with this office.”<sup>174</sup>

### **25.33 No notice to pay gross**

INT Manual provides:

#### **INTM413220 Consequences of failing to deduct withholding tax [Feb**

---

174 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/606556/Double\\_Taxation\\_Treaty\\_Passport\\_Scheme\\_-\\_Terms\\_and\\_Conditions\\_and\\_Guidance.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/606556/Double_Taxation_Treaty_Passport_Scheme_-_Terms_and_Conditions_and_Guidance.pdf)

2020]

...

An application by the overseas lender under a DTA or under the EU Interest & Royalties Directive (INTM400000), is likely to be made up of two elements, depending largely on how promptly the claim follows the making of the loan. These are:

- A clearance application - for S874 no longer to apply (or only to apply to a lower rate of withholding specified in the relevant tax treaty) to a specific loan. If the application is successful, the payer will receive a notice issued under SI488/1970 advising them that they may henceforth, for a specified period, pay interest gross or at the lower rate on the income named in the notice;
- A repayment claim - for the lender to have paid to them tax which the payer of the interest has accounted for to HMRC in compliance with their S874 obligation, prior to the notice being issued.

Forms available on the HMRC website cater for both aspects on a single form.

It is vital to understand that until the payer receives a clearance notice directing them to do otherwise, the payer must continue to withhold and account for the income tax on interest payments made to an overseas lender. The UK payer is not entitled to anticipate either the lender making an application or the outcome of them doing so. It is immaterial whether the lender is a fellow group company to the borrower, or a vast European lending institution for which the borrower is just another customer.

If the payer fails to observe the obligation to withhold and pay, or only does so late, HMRC can assess and recover the tax, and charge late payment interest under TMA70/S87 on the outstanding income tax, running from the tax due date to the date of payment. See INTM413240 for what may happen in circumstances where a valid clearance/repayment claim is received...

### **Assessing the unpaid income tax**

Chapter 15, Part 15 of Income Tax Act 2007 ... provides for returns and collection of income tax in respect of payments falling within ITA07/S946, which specifically includes payments of yearly interest where a deduction is required under s874.

The rules, under ITA07/S951 are that:

- the income tax at the basic rate on the interest is due on the same date as the return reporting the payment,
- both the return and tax are due within 14 days of the end of the quarter

within which the payment of interest was made

- no assessment is required for collection of this tax.

This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment.

ITA07/S957 sets out what should happen if it appears that a section 946 payment (which this is) has not been included in a return, and the tax arising on the payment has not been paid ...

Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

### **25.34 Grossing-up: Not interest**

If the loan agreement provided for grossing up where withholding tax applies, the creditor may compensate the debtor for over-payment.

INT Manual provides:

#### **413220 Consequences of failing to deduct withholding tax [Feb 2020]**

##### **Grossing up clauses**

“Grossing up clauses” appear in loan agreements, requiring borrowers to pay over interest without withholding income tax, irrespective of the clearance position, so that domestic withholding obligations are at the expense of the borrower and the lender gets 100% of their interest. From a loan relationships point of view HMRC accepts that any additional amount paid under a grossing up clause is a loan relationship expense, but it is not interest. If the borrower received the grossing up amount back from the lender, possibly after the lender had made a successful treaty claim, the repayment would be treated as a loan relationship credit. If £100 of interest is paid over, representing the full amount of interest due, the withholding tax is £20, assuming the rate to be 20%. There is a school of thought that treats the amount paid over as if it were the net amount, so that the £100 should be “grossed up” to £125 with income tax of £25 (20% × £125). This is incorrect.

The existence of a grossing-up clause does not affect the obligation to withhold income tax.

### **25.35 Failure to withhold**

INT Manual provides:

#### **413230. The interaction between UK taxing rights and double taxation agreements [Jan 2020]**

...If the lender obtains clearance before any interest has been paid, then

for the period of the clearance all the interest accruing on the loan can be paid without deduction, or paid subject to a lower rate of income tax, depending on the DTA. However, a problem arises when the benefits set out in the DTA have not yet been obtained and the company paying the yearly interest does so - for whatever reason - without withholding and accounting for the income tax.

Once treaty clearance has been granted (following a successful certified DTA application), income tax will either no longer be withheld or may be withheld at a lower rate, it must also be recognised that clearance applies only to arm's length interest payments made after the clearance is granted. The obligation to deduct income tax from yearly interest paid prior to clearance will not have been removed, and therefore remains enforceable. For payments of interest made before clearance is notified, double taxation is relieved by the lender making a claim for repayment of the income tax withheld. Forms available on the HMRC website allow repayment claims to be made at the same time as the certified application for treaty benefits, although the repayment relief can only go back 5 years after the 31st January next following the year of assessment to which it relates (TMA70/S43(1)).

#### **TMA70/S87 - late payment interest**

In addition to the unpaid income tax remaining due and payable on payments of yearly interest not covered by a treaty clearance notice, late payment interest will accrue under TMA70/S87 on any unpaid tax, from the due date (normally 14 days after the quarter in which the yearly interest was paid) until payment. It will accrue whether or not the income tax has been assessed, and while any income tax paid can be repaid if it is subject to a valid repayment claim from the lender. For non intra EU loans and royalty transactions, there is no relief or discharge from the TMA70/S87 interest charge on the payer.

The TMA70/S87 late payment interest charge is both mechanical and neutral, and accrues at the same rate irrespective of the reason for late payment. While it is not a penalty (though penalties are available for failure to make a return under Part X of TMA70), it stands to reason that if the loan is large, and the tax is outstanding for a long time, the interest charge will be correspondingly greater than in other circumstances.

This is the position for pre-clearance interest payments which have been made gross, even after a DTA clearance application has been made, and clearance granted. While the UK may give up its taxing rights, HMRC does not give up its right to recompense for the late payment of the income tax from the time when it was due. UK taxing rights do not simply disappear following a DTA clearance application, taking with

them all associated obligations. HMRC surrenders primary taxing rights to the tax authority of the claimant's country of residence, but retains the power to assess income tax which has not been accounted for and which has not been paid gross under a notice giving permission to do so. Interest payments made before the date on which clearance takes effect are not subject to the clearance. This is the statutory position, unaffected by the fact that assessment and collection of the tax might take place after a certified DTA clearance application has been lodged, in circumstances where it would be immediately repayable to the applicant (assuming a successful claim).

However, in circumstances where there is an established entitlement to repayment, HMRC will by concession, circumvent the assessment and repayment process, and if assessments are raised, they will be "interest only" assessments to collect the TMA70/S87 interest.

#### **Assessing only the TMA70/S87 late payment interest - concession**

Despite the existence of the powers mentioned above to recover the tax owing, HMRC considers that in circumstances where it is clear that

- the overseas recipient of the interest has applied for, and has been granted, clearance to receive future interest payments from the source in question without deduction of income tax under SI 1970/488; and
- the lender would be entitled to repayment of the tax for the period for which income tax should have been withheld, so that it is clear that if tax had been accounted for each period concerned, ultimately HMRC would not have retained it

the right to assess and collect the tax will be set aside and only the TMA70/S87 interest will be sought. This will of course be limited to tax which is at the time of the concession both collectible and repayable. For more detail, see the Thin Cap Practical guidance from INTM510000 onwards.

The notion that tax collected from the payer will inevitably be repayable to the overseas recipient is not one that may be assumed. It must be established as a fact and a legal right. It is not a reason for not withholding. ...

### **25.36 Claim procedure: Critique**

The deduction scheme for royalties allows self-certification in all cases. It is suggested that a similar system should be introduced for interest.

## CHAPTER TWENTY SIX

# EXEMPT INTEREST OF NON-RESIDENTS

26.1

### 26.1 Exempt interest: Introduction

This chapter considers exemptions for interest received by non-residents on securities issued by the UK or public bodies:

- (1) FOTRA securities
- (2) Foreign currency securities
- (3) International securities

For the policy issues here, see 25.17 (Non-residents on UK interest: Outline).

### 26.2 “FOTRA securities”

Section 713(2) ITTOIA provides:

In this Chapter “FOTRA security” means—

- (a) a security issued with a condition about exemption from taxation authorised by section 22 of F(No.2)A 1931,
- (b) a gilt-edged security which was issued before 6th April 1998 and without any such condition (other than 3½% War Loan 1952 Or After), or
- (c) 3½% War Loan 1952 Or After.

FOTRA stands for ‘Free of Tax to Residents Abroad’.

#### 26.2.1 *The exemption condition*

Section 713 ITTOIA provides:

(3) In this Chapter “the exemption condition” has the meaning given by subsections (4) to (6), according to the kind of FOTRA security involved.

(4) In relation to a security within subsection (2)(a), it means the condition authorised by section 22 of F(No 2)A 1931.

(5) In relation to a security within subsection (2)(b), it means a condition with which 7.25% Treasury Stock 2007 was first issued, being a condition treated by section 161(1) of FA 1998 (non-FOTRA securities)—

(a) as a condition with which the security within subsection (2)(b) was issued, and

(b) as a condition authorised in relation to its issue by section 22 of F(No 2)A 1931.

(6) In relation to 31/2% War Loan 1952 Or After, it means a condition of its issue authorised by section 47 of F(No 2)A 1915.

For these provisions see 71.5 (FOTRA exemption conditions).

### **26.3 Interest withholding tax**

Withholding tax on public revenue dividends is governed by Chapter 5 Part 15 ITA. I do not discuss this here in full. However note that s.893(1) ITA provides:

A payment of a UK public revenue dividend is payable gross if—

(a) it is a payment of interest on gross-paying government securities, and

(b) no deduction at source application has effect in respect of the securities at the time the payment is made (see section 895).

Thus there are three conditions for gross payment. First the security must be a UK public revenue dividend, defined s.891 ITA:

In this Chapter “UK public revenue dividend” means any income from securities which—

(a) is paid out of the public revenue of the UK or Northern Ireland, but

(b) is not interest on local authority stock.

Secondly the security must be a gross-paying government security, defined s.893(2) ITA:

In this Chapter “gross-paying government securities” means—

- (a) gilt-edged securities (see section 1024), or
- (b) securities which are the subject of a Treasury direction under section 894(1) or (3).

Thirdly, holders may ask for tax to be deducted at source. It must be rare to want to apply for tax to be deducted, though it might perhaps be convenient for a basic rate taxpayer who does not otherwise have to put in a return.

## **26.4 FOTRA exemption**

Section 714 ITTOIA provides:

- (1) No liability to income tax arises in respect of profits from a FOTRA security if conditions A and B are met. ...
- (3) Condition A is that the profits are stated in the exemption condition to be exempt from income tax.
- (4) Condition B is that any requirements for obtaining the exemption imposed by the security's conditions of issue are met.

A non-resident individual or company would qualify for non-resident IT relief on the interest, so the FOTRA exemption only matters in unusual cases, such as split years (where non-resident IT relief does not apply).

### **26.4.1** *s.624/s.720*

Section 714 ITTOIA provides:

- (5) Whatever the exemption condition provides, amounts charged under the provisions specified in subsection (6) are not exempted by subsection (1).
- (6) The provisions are—
  - Chapter 5 of Part 5 (settlements: amounts treated as income of settlor) so far as it applies to income within section 619(1)(a) or (b), and
  - Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

These anti-avoidance provisions override FOTRA exemption.

### **26.4.2** *Trading receipts/deductions*

It may happen that:

- (1) A non-resident is carrying on a trade in the UK through a UK branch

or PE, and

(2) FOTRA interest is a trading receipt.

In these circumstances, the FOTRA exemption in principle applies.<sup>1</sup>

Section 716 ITTOIA provides:

(1) A person who meets conditions A and B may not bring into account for income tax purposes—

- (a) any amount relating to changes in the value of a FOTRA security, or
- (b) expenses related to holding it or to any transaction concerning it.

(2) Condition A is that the person is the beneficial owner of the security.

(3) Condition B is that the person is a person who would be exempt from tax on the security under this Chapter.

The trade receipt may be excluded from computations of profit, but previously, related expenses may still be deductible in computing trade profits; see *Hughes v Bank of New Zealand* 21 TC 472.

Special rules apply to non-resident Lloyds underwriters, which are not discussed here.<sup>2</sup>

## 26.5 Beneficial ownership

For a general discussion of beneficial ownership, see 71.6 (English-law beneficial ownership). The International Manual provides:

### **368040. The FOTRA condition** [Dec 2019]

...

#### *Beneficial ownership of the security*

To demonstrate beneficial ownership of the security, the claimant must hold the security on the interest date. In strictness a person who has sold a FOTRA security but receives the next interest payment due (an ex-dividend sale) ceases to be the beneficial owner of the security when he sells it.

It would be strange if an ex-dividend sale caused the interest received post

---

1 See 71.20 (Characterisation). At one time, gilt prospectuses restricted the FOTRA exemption so it did not apply to interest received as part of a UK trade, but this practice ceased in 1996.

2 See LLM2150 Premium Trust Fund Assets: FOTRA Gilts.

sale to become taxable, and I doubt if that can really be correct. In practice perhaps it does not often happen.<sup>3</sup>

## 26.6 FOTRA securities: Trust

### 26.6.1 *Interest in possession trust*

The TSE Manual formerly provided:

#### **Interest in possession trust**

For any beneficiary who is not ordinarily resident in the UK the interest is not taxable. Trustees should not include it on the returns. The authority for this is *Williams v Singer* 7 TC 387 (TSEM7070).

In any other circumstances the interest is taxable. It must go on the trust returns.

This book formerly commented:

Thus (although not clear from the statute) all that matters is the residence of the life tenant. That is sensible.

The Manual passage was deleted in 2014. If HMRC wish to change a longstanding practice<sup>4</sup> their customers might reasonably expect a little more than to quietly delete a sentence or two from the Manual. But it is unclear whether HMRC seek to resile from the former Manual position.

ESC B18 is consistent with the former HRMC view.<sup>5</sup>

### 26.6.2 *Discretionary trust*

The position has altered by the abolition of ordinary residence in 2013. In order to follow the transitional rules, one needs to know the original and

---

3 For completeness, The INT Manual continues:

“There is a column on the A1 claim form with the heading ‘If sold, date of sale or write still held’. Entries in this column will alert you to a sale before the interest date. You should obtain guidance from Technical Advice Group before you take any action if

- a FOTRA security was sold before the interest date
- that column is left blank” ...

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed.

4 I do not know when the practice originated, but it predates the Taxhub archive which started in 2006.

5 See 38.10 (ESC B18: non-resident trust).

the current versions of s.715 ITTOIA. It is helpful to set them out in track change format:

- (1) This section applies if—
- (a) a FOTRA security is held on trust, and
  - (b) apart from this section, interest payable on the security would not be exempt from income tax under section 714 because of the security not being in the beneficial ownership of a ~~person not ordinarily UK resident~~ non-UK resident person.
- (2) For the purposes of determining whether the interest is exempt under section 714 it is to be assumed that the security is in the beneficial ownership of a ~~person not ordinarily UK resident~~ non-UK resident person if none of the beneficiaries of the trust<sup>6</sup> is ~~ordinarily UK resident at the time when~~ is UK resident for the tax year in which the interest arises.

Para 52 sch 46 FA 2013 provides the transitional relief:

In relation to a FOTRA security issued before 6 April 2013, the amendments made by this paragraph apply only if the security was acquired by the trust on or after that date.

EN ITTOIA change 116 provides:

**Change 116: Interest from FOTRA securities held on trust: s.715**

This change gives statutory effect to a practice relating to interest arising from FOTRA securities held on trust.

FOTRA exemptions apply where gilt-edged securities are in the beneficial ownership of persons who are not ordinarily resident in the UK. The source legislation, principally section 154 of FA 1996, is rewritten in Chapter 6 of Part 6 of this Act. The beneficial ownership

---

6 Defined in s.715:

- (3) In subsection (2) “beneficiaries of the trust” includes any person known to the trustees as a person—
- (a) who is, or will or may become, entitled under the terms of the trust to receive income under the trust, or
  - (b) to whom or for whose benefit such income may be paid or applied.
- (4) In subsection (3) “income under the trust” includes any property held on the terms of the trust and falling to be treated as capital so far as it is or represents amounts received by the trustees as income.

test lies within the definition of “FOTRA security” as it is part of the exemption condition of the securities. (See, in particular, section 22 of F(No 2)A 1931).

Although in the case of bare trusts and trusts with an interest in possession, it is fairly clear where the beneficial ownership lies, in the case of discretionary or accumulation trusts it can be difficult to apply the beneficial ownership test. In some types of trust the beneficial ownership of an asset is, in effect, in suspense. In others, while it may be clear where the beneficial ownership lies, it may belong to a different person from the person entitled to the income.

The author does not have a sound grasp of the English law concept of beneficial ownership, but it does not matter, as the passage continues:

In practice, where interest from FOTRA securities held in trust arises to trustees and none of the beneficiaries of the trust is ordinarily resident in the UK, the beneficial ownership test is regarded as met whatever kind of trust is involved and no account is taken of whether the trustees themselves are resident or ordinarily resident. So if all the potential beneficiaries of a discretionary or accumulation trust (that is, those who have the right, at the discretion of the trustees, to benefit from the trust income or accumulated income) are not ordinarily resident in the UK, the FOTRA beneficial ownership test is treated as having been met.

Section 715 of this Act gives effect to this practice. So, for the purposes of determining whether interest arising from a FOTRA security held in trust is exempt from income tax under section 714 of this Act, it is to be assumed that the security is in the beneficial ownership of a person who is not ordinarily resident if none of the beneficiaries of the trust is resident when the interest arises. (See section 715(1) and (2)). Section 715(3) defines “beneficiaries of the trust” widely so as to cover all potential income beneficiaries of discretionary and accumulation trusts. Section 715(4) brings in beneficiaries receiving accumulated income. This change is in taxpayers’ favour in principle. But it is expected to have no practical effect as it is in line with current practice.

This applies even to a UK resident trust.

The TSE Manual provides:

**TSEM3185 Trust income: FOTRA securities - resident trustees**  
[Mar 2018]

...

**Trustees of non-bare trusts**

Trustees in receipt of FOTRA income need to know whether or not to Self-Assess liability on the trust return. ITTOIA/S715 provides that where:

- all the beneficiaries are not ordinarily resident in the UK (where securities were acquired before 6 April 2013) or
- all the beneficiaries are not resident in the UK (where securities were acquired after 5 April 2013).

the trustees are treated as being the beneficial owner of the securities, and exempt from tax on the income. S715(3) and (4) define ‘beneficiaries of the trust’ widely so as to cover beneficiaries of discretionary and accumulation trusts as well as IIP beneficiaries. The trustees should exclude from the income from the trust return income. In any other circumstances the interest is taxable. It must go on the trust returns.

Relief is available under ESC B18 in a case where:

- (1) some beneficiaries are UK resident (so the requirements of this relief are not met) but
- (2) the trustees distribute income to a non-resident beneficiary.<sup>7</sup>

## 26.7 FOTRA exemption and DT relief

A person who is treaty-resident in a foreign state may qualify for DT relief on UK source interest. However DT relief is not needed where FOTRA exemption applies or where non-resident IT relief gives exemption. There are a few gaps where DT relief could be useful, for instance, an individual who is UK-law UK resident but is treaty-resident outside the UK (under the tie-breaker). The International Manual provides:

### **368110. FOTRA and DT claims** [Dec 2019]

A person entitled to exemption from UK income tax on interest payments from a FOTRA security may claim repayment of some or all of the tax deducted under the terms of an interest article in a DTA. You should treat any such claim as a claim under the interest article. It follows that the claimant must satisfy the conditions of the DTA rather than the conditions for FOTRA exemption. In effect the payment loses the label of FOTRA and is treated in the same way as any other interest payment.

---

<sup>7</sup> See 38.9.2 (ESC B18: UK trust).

In practical terms it makes no difference if the claimant is entitled to full relief under the DTA. However the person who received the FOTRA interest may be able to claim repayment of the tax deducted by meeting the requirements of the DTA without meeting the beneficial ownership condition for FOTRA exemption.

If the claimant is only entitled to partial repayment of the tax deducted under the DTA he will probably receive credit for the UK tax retained against his liability to tax on the interest in his country of residence. You should therefore make the payment as claimed because to increase the payment may cause the claimant inconvenience when settling his liability to tax in the country of residence. You could explain to the claimant that full repayment would be available if he made a claim on form A1.

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed. But the underlying points are still correct.

## 26.8 Exempt foreign currency securities

### 26.8.1 *Securities qualifying for relief*

Section 755 ITTOIA provides:

- (1) This section applies to interest on—
- (a) such foreign currency securities issued by a local authority or a statutory corporation as the Treasury direct, and
  - (b) such foreign currency loans made to a statutory corporation<sup>8</sup> as the Treasury direct.

I refer to securities within s.755 as “**exempt foreign currency securities**”.

---

8 Terms are defined in s.755(4) ITTOIA:

In this section—

“company” means a company, as defined in section 1(1) of the Companies Act 2006 (c 46),

‘foreign currency’, in relation to loans and securities, has the meaning given by section 756, and

‘statutory corporation’ means—

- (a) a corporation incorporated by an Act (other than a company), or
- (b) any other corporation on which functions connected with carrying on an undertaking are conferred by an Act or by an order made under or confirmed by an Act.

Section 756 ITTOIA defines “foreign currency” security:

- (1) For the purposes of section 755, a security or loan is a foreign currency one if under its terms the currency to be used for repayment is not sterling.
- (2) Subsection (1) is subject to the following qualifications.  
[Subsections (3) and (4) are transitional rules for securities issued before 6 April 1982.]
- (5) If in the case of a security there is an option as to the currency to be used for repayment, the security is only to be treated as a foreign currency one if the option is exercisable only by its holder.
- (6) If in the case of a loan there is an option as to the currency to be used for repayment, the loan is only to be treated as a foreign currency one if the option is exercisable only by the person for the time being entitled to repayment or eventual repayment.

### 26.8.2 *Tax exemption*

Section 755(2) ITTOIA provides:

No liability to income tax arises in respect of interest to which this section applies if—

- (a) in the case of interest on a security, its beneficial owner is a non-UK resident, and
- (b) in the case of interest on a loan, the person for the time being entitled to repayment or eventual repayment is a non-UK resident.

A non-resident individual or company would qualify for non-resident IT relief on the interest, so the exemption does not matter in practice.

### 26.8.3 *Withholding tax exemption*

Section 981 ITA provides:

Despite the provisions of this Part there is no duty to deduct a sum representing income tax from a payment of interest within section 755(1) of ITTOIA 2005 (interest on foreign currency securities etc owned by non-UK residents).

### 26.8.4 *Ss. 624 and 720*

Section 755(3) ITTOIA provides:

But interest is not exempt under subsection (2) because a person is a non-UK resident if it is treated as another person's income under—

Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), or

Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

This is the same as the rule for FOTRA securities.<sup>9</sup>

EN ITTOIA provides:

Subsection (3) of the section is an anti-avoidance provision. Section 581(3) of ICTA is very widely drafted: “where any income of any person is by virtue of any provision of the Income Tax Acts to be deemed to be income of any other person, that income shall not be exempt ..”. In fact, there are only two sets of provisions under which this type of income could be deemed to be income of another person. The relevant provisions are listed in subsection (3) of the section.

### 26.8.5 *Critique*

If the aim is to encourage investment in local authority and similar securities, why should the exemption be limited to foreign currency securities? It seems the object when the rules were introduced in 1969 was to encourage loans from foreign lenders who would not wish to lend in sterling; borrowers fared badly because of the devaluation in the subsequent sterling crisis.

Alignment of the foreign currency security with the FOTRA rules would be a small but worthwhile simplification. However the Treasury when asked for a list of exempt foreign currency securities stated that they did not hold the information and could locate no record of a direction having been given under s.755 ITTOIA! It may well be that no exempt foreign currency securities exist, and the legislation is dead letter law. I would be grateful for readers comments on that.

## **26.9 International organisation security**

### 26.9.1 *Inter-American Development Bank*

Section 773 ITTOIA provides:

---

<sup>9</sup> See 26.4.1 (Ss. 624 and 720).

- (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by the Inter-American Development Bank if the liability only arises because one or more of circumstances A to C apply.
- (2) Circumstance A is that the security is issued in the UK or in sterling.
- (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
- (4) Circumstance C is that the Bank maintains an office or other place of business in the UK.

This reflects Section 9 of the Agreement Establishing the IDB:

- (c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
  - (i) which discriminates against such obligation or security solely because it is issued by the Bank; or
  - (ii) if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.
- (d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:
  - (i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or
  - (ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.<sup>10</sup>

## 26.9.2 *Designated organisations*

Section 774 ITTOIA provides:

- (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by an organisation if—
  - (a) the organisation has been designated by the Treasury for the purposes of this section, and
  - (b) the liability only arises because one or more of circumstances A to C apply.

---

<sup>10</sup> <http://idbdocs.iadb.org/wsdocs/getdocument.aspx?docnum=781584>

- (2) Circumstance A is that the security is issued in the UK or in sterling.
- (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
- (4) Circumstance C is that the organisation maintains an office or other place of business in the UK.

These are the same circumstances as for the IDB. Section 774 ITTOIA continues:

- (5) The Treasury may by order designate for the purposes of this section—
  - (a) any of the Communities,
  - (b) the European Investment Bank,
  - (c) any international organisation that meets conditions A and B.
- (6) Condition A is that one of its members is the UK or any of the Communities.
- (7) Condition B is that the agreement under which that member became a member provides for the same kind of exemption from tax for income from securities issued by the organisation as this section provides.

See the Bretton Woods Agreement Order in Council, 1946 (SR&O 1946 No 36); International Finance Corporation Order 1955; International Development Association Order 1960; International Monetary Fund (Immunities and Privileges) Order 1977; International Organisations (Tax Exempt Securities) Order 1984; European Communities (Tax Exempt Securities) Order 1985; International Organisations (Tax Exempt Securities) Order 1991.

## CHAPTER TWENTY SEVEN

# ACCRUED INCOME PROFITS

### 27.1 Accrued income profits

#### *Cross references*

The following topic is discussed elsewhere:

92.11 (Unremittable accrued income profits)

### **27.1 Accrued income profits**

The provisions are in Part 12 ITA, which I call the “**accrued income code**”.

The subject needs a book to itself. It would be an unrewarding labour since the rules are “widely ignored by both taxpayers, their advisers and within HMRC”.<sup>1</sup> This chapter focuses on the questions closest to the themes of this book, but one can only approach those questions after understanding how the provisions operate.

I do not consider specialist topics such as variable rate securities or conversions of securities.

The provisions apply on a transfer of securities. The accrued income code does not apply for corporation tax.

### **27.2 AIP securities**

Section 619(1) ITA defines “securities”:

In this Chapter “securities” includes—

---

1 Inland Revenue, “Responses to Consultation Exercise on Reform of the AIP” (2004); consistent with that, several of the worked examples in the SAI Manual are difficult to justify.

Reform was promised in 2006 but radical change was rejected and the matter was dropped.

- (a) any loan stock or similar security other than an excluded security, and
  - (b) shares in a building society which are qualifying shares for the purposes of section 117(4) of TCGA 1992 (qualifying corporate bonds),
- but (subject to para (b)) it does not include any shares in a company.<sup>2</sup>

I refer to securities within this definition as “**AIP securities**”. Section 619(3) ITA sets out seven categories of “excluded securities”:

- (3) In this section “excluded securities” means—
- (a) national savings certificates (including Ulster Savings Certificates as defined in section 693(7) of ITTOIA 2005),
  - (b) war savings certificates,
  - (c) uncertificated eligible debt security units as defined in section 986,
  - (d) certificates of deposit (see section 1019),
  - (e) a security which is a right falling within section 552(1)(c) of ITTOIA 2005 at the time of the transfer in question,
  - (f) a security that meets the redemption conditions (see subsection (5))<sup>3</sup>, and
  - (g) a security that is a deeply discounted security within the meaning of Chapter 8 of Part 4 of ITTOIA 2005.<sup>4</sup>

---

2 Section 619(2) ITA adds:

“(2) For the purposes of subsection (1)(a), it does not matter—

- (a) whether the security is of the government of the UK, any other government, any public or local authority in the UK or elsewhere, or any company or other body,
- (b) whether or not the security is secured,
- (c) whether or not the security carries a right to interest of a fixed amount or at a fixed rate percentage of the nominal value of the security, or
- (d) whether or not the security is in bearer form.”

This can only be for the avoidance of doubt, because it only expresses the usual meaning of “security”.

3 Defined s.619(5) ITA:

“The redemption conditions are that—

- (a) the security is redeemable,
- (b) the amount payable on its redemption exceeds its issue price, and
- (c) no return other than the amount of that excess is payable on it.”

4 Section 619(4) ITA contains a transitional exception: “But subsection (3)(g) does not include a security if, on its transfer, Chapter 8 of Part 4 of ITTOIA 2005 would apply subject to the rules in sections 454 to 456 of that Act (listed securities held since 26 March 2003).”

Thus deeply discounted securities are not AIP securities: (subject to the 2003 transitional rule) the DDS rules take priority over the AIP rules.

### 27.2.1 Securities “of the same kind”

This expression is strictly understood. Section 619(6) ITA provides:

Securities are treated as being of the same kind for the purposes of this Chapter if they—

- (a) are treated as being of the same kind by the practice of a recognised stock exchange, or
- (b) would be so treated if dealt in on such an exchange.

SAI Manual provides:

**4040 Accrued Income Scheme: what are “securities”** [Dec 2019]

... For example, Treasury 5% 2004 is not the same kind as Treasury 5% 2012. This is similar to the capital gains tax concept of securities of a particular class. ...

## 27.3 “Transfer”

In outline, the definition is in s.620(1) ITA:

References in this Chapter to the transfer of securities are—

- (a) to the transfer of securities by way of sale, exchange, gift or otherwise,
- (b) to the conversion of securities in any case where there is no transfer of the securities within para (a),
- (c) to the redemption of variable rate securities in any case where there has been a transfer of the securities at any time before redemption, or
- (d) to a transaction or event treated as a transfer under—
  - (i) section 648(1) or (3) (strips of gilt-edged securities),
  - (ii) section 649(4) (new securities issued with extra return),
  - (iii) section 650(2), (4) or (6) (trading stock appropriations etc),
  - (iv) section 651(2) (owner becoming entitled to securities as trustee), or
  - (v) section 652(2) (securities ceasing to be held on charitable trusts).

Thus there are altogether eight types of transfer. In this book I focus on the first type, which are transfers in the normal sense of the word. Section

620(2) provides one exception:

But subsection (1)(a) does not include—

(a) the vesting of securities in personal representatives on death...<sup>5</sup>

## 27.4 Transfer “with accrued interest”

### 27.4.1 *The commercial background*

The Debt Management Office explains the terminology “**clean**” and “**dirty**” price:

The following example is taken from the DMO website for 30 November 2004 and shows close of business data for 5% Treasury Stock 2014:

**5TY145 | Treasury 2014 | GB0031829509 | 103.17 | 104.344033 | 4.592604**

The first three fields are all means of identifying the gilt. The first is the DMO’s internal identifier code and the second a shortened form of the gilt’s name. The third field is the ISIN number (the International Security Identification Number – an identifier number used by the London Stock Exchange).

The next three fields give price and yield information. The two prices shown of £103.17 and £104.344033 are known as the ‘clean’ and ‘dirty’ price respectively. Clean prices do not include accrued interest whereas dirty prices do (see the section on accrued interest on page 15). The clean price is typically the price, which is quoted when agreeing a purchasing or selling price. However, the actual amount of money which will change hands is based on the dirty price and will reflect settlement on the business day after the transaction.

So, on the basis of the reference price on 30 November 2004, every £1,000 nominal of 5% Treasury Stock 2014 was worth £1,043.44.<sup>6</sup>

Note that for tax purposes the consideration for a gilt is “the actual amount of money which will change hands” - the dirty price.

SAI Manual explains the terminology ex-dividend and cum-dividend:

**4020. Transfers “with accrued interest” and “without accrued interest” [Dec 2019]**

**... Sales with accrued interest (“cum div”)**

5 Paragraph (b) is a transitional rule for pre-2003 DDS (not discussed here).

6 A Private Investor’s Guide to Gilts, Dec 2004  
<https://www.dmo.gov.uk/media/14702/pig201204.pdf>

Most sales of marketable securities are “cum div”. That is, the buyer is entitled to the next interest due. As an interest payment date on a security approaches, its market price increases to reflect the increase in value of the buyer’s right to the interest. In other words, the price reflects accrued interest.

For example, £100,000 8% Treasury Stock 2002–06 is transferred cum div on 19 April. 14 days’ interest has accrued since interest was last paid on 6 April. Accrued interest is £307 ( $14/365 \times 8\% \times 100,000$ )...

#### **Sales without accrued interest (“ex div”)**

Not all sales of securities are “cum div”. This is because gilt-edged securities, and some corporate bonds, have an “ex div” or “ex coupon” date. The next interest coupon is paid to the person who is registered as the holder of the security at that date. So if the security is sold in the “ex div” period, the seller collects and keeps the next interest due after the sale. For gilts, the “ex div” period is 7 business days before the coupon date (except for 3 ½% War Loan stock, for which it is 10 business days). Other securities may have a similar, or shorter, “ex div” period.

Consequently the market price of a security sold “ex div” reflects the fact that the purchaser will own the security for a short period from the date of purchase to the next interest payment date. This is a period over which interest accrues but for which the interest is received not by him but by the seller. The interest accrued over such a period is known as rebate interest. It is treated in the opposite way to the more normal accrued interest associated with a “cum div” sale.

For example, £100,000 8% Treasury Stock 2002–06 is transferred ex div on 29 March. 7 days’ interest has accrued from the day after the transfer to the next interest date, 6 April. Accrued interest is £153 ( $7/365 \times 8\% \times 100,000$ ). ...

#### 27.4.2 “With/without accrued interest”

Section 623(1) ITA provides a commonsense definition:

The general rule is that securities are transferred with accrued interest for the purposes of this Chapter if they are transferred with the right to receive interest payable—

- (a) in a case where the settlement day is an interest payment day, on the settlement day, and
- (b) in any other case, on the first interest payment day after the settlement day.

Section 624(1) ITA provides the corresponding definition of a transfer

“without accrued interest”:

The general rule is that securities are transferred without accrued interest for the purposes of this Chapter if they are transferred without the right to receive interest payable as mentioned in section 623(1)(a) or (b).

The definitions are comprehensive so every transfer must be with/without accrued interest, and they are simply English paraphrases of the technical expressions *cum/ex dividend* (or cum-div/ex-div).

The terms “interest” “settlement day” and “interest period” are defined but the definitions are not considered here.

Thus whether a market sale is with or without accrued interest depends only on the date of the sale, whether it is before or after the ex div date. Vendors and purchasers have no choice in the matter except by timing the sale. Whether an off-market sale is with or without accrued interest is a matter for the parties to agree.

## 27.5 Deemed interest/credit/debit

Section 632(1) ITA provides:

In the case of a transfer of securities with accrued interest, for the purposes of this Chapter a payment is treated as made by the transferee to the transferor in the interest period in which the settlement day falls.

It is useful to have some terminology to describe this. I refer to this payment as a “**deemed interest payment**”. The transferor (deemed to receive the payment) has a “**deemed interest credit**”. The transferee (deemed to make the payment) has a “**deemed interest debit**”.

Section 632 then defines the amount of the deemed payment. In outline:

- (2) The amount of that payment depends on whether the transfer is under an arrangement by which the transferee accounts to the transferor separately—
  - (a) for the consideration for the securities, and
  - (b) for gross interest accruing to the settlement day.
- (3) If the transfer is under such an arrangement, the amount of the payment is the amount of gross interest which the transferee accounts for.
- (4) If—
  - (a) the transfer is not under such an arrangement, and
  - (b) the settlement day is itself an interest payment day for the securities, the amount of the payment is the amount of interest payable on the securities on that day.

(5) If—

- (a) the transfer is not under such an arrangement, and
- (b) the settlement day is not an interest payment day for the securities, the amount of the payment is an amount equal to—

$$I \times (A \div B)$$

where—

- I is the interest payable on the securities on the first interest payment day after the settlement day (“the payment day”),
- A is the number of days in the period beginning with the first day on which that interest accrues and ending with the settlement day, and
- B is the number of days in the period beginning with the first day on which that interest accrues and ending with the payment day.

Why are there two alternative methods of ascertaining the amount of the deemed interest payment, in subsections (3) and (4)(5)? SAI Manual provides:

**4140. Payments on transfers with accrued interest** [Dec 2019]

... The [deemed interest] payment is the amount of the gross interest accruing to the settlement day, which in most cases is shown separately from the consideration for the securities, under the arrangement (that is, the contract note) by which the transferee accounts to the transferor. This is commonly known as the “clean price” basis.

In exceptional cases – for example, sales off market, gifts, settlements, and deemed transfers – there will be no contract note and it will be necessary to compute the amount of the [deemed interest] payment. Where this is done, the formula  $I \times A/B$  is used...

The Manual offers a straightforward example of the two methods of computation on a single sale with accrued interest:

*Example*

Harriet sells corporate bonds to Howard on 15 March 2015. Interest is paid on the bonds on 31 March, 30 June, 30 September and 31 December. Howard will receive the interest coupon due on 31 March 2015, that is, the sale is cum div. The interest Howard receives is £200. If Harriet agrees to sell the bond to Howard for a “clean price” of £10,000 plus an additional £165 for accrued interest, she is taxable on accrued income profits of £165 in 2014–15. Howard will reduce his accrued income profits by £165.

Suppose that, instead, Harriet simply agrees to sell the bond to Howard for £10,165. The relevant interest period is 1 January to 31 March 2015, so B is 90 days. The number of days up to and including 15 March (A)

is 74. So the “accrued amount” is  $£200 \times 74/90 = £164.44$ . Again, Harriet’s taxable accrued income will be £164, and Howard’s reduced by £165 (following the principle of rounding in the taxpayer’s favour).

In practice the two methods normally give the same result (as is the case in the HMRC example) though there could be cases where the parties account for accrued interest in some manner which is not the same as the formula  $I \times A/B$ .

It is possible for the amount of the deemed interest payment to be nil, eg in the case of a transfer on the interest payment day.

Section 633 ITA contains corresponding rules on a transfer without accrued interest.

The SAI Manual gives a straightforward example of a sale with accrued interest:

**4160. Examples of transfers with and without accrued interest** [Dec 2019]

*Example 1*

Anthony has a holding of £100,000 Treasury Stock 8¼% 2007, a British Government security which pays interest on 16 January and 16 July each year. He arranges for his holding to be sold on the Stock Exchange on 19 March 2006. The contract note from his stockbroker, dated 19 March 2006 contains the following information:

£100,000 Treasury Stock 8¼% 2007 sold @ 114	£114,000
Plus 56 days’ accrued interest	<u>£1,315</u>
Payable to you on 20 March 2006	<u>£115,315</u>

The contract note contains all the information that is needed for the purposes of the AIS.

- Treasury Stock 8¼% 2007 falls within the definition of “securities” – Section 619 ITA 2007
- the securities have been transferred, and the transfer is treated as taking place on 19 March because there was a contract for their sale made on that date – Section 620 ITA 2007
- the settlement day for the transfer is 20 March because under Stock Exchange rules bargains in gilt-edged securities are settled on the next business day – Section 674 ITA 2007
- the transfer is with accrued interest because the purchaser gets the right to the interest payable on 16 July 2006, the next interest payment day to fall after 20 March 2006 – Section 623 ITA 2007
- under Stock Exchange rules, accrued interest on gilts is accounted for separately from the bargain price, so the accrued amount is £1,315 – Section 632 ITA 2007
- the interest period in which the settlement day falls is the period 17 January 2006–16 July 2006 – Section 673 ITA 2007.

Accordingly in this interest period Anthony (the transferor) is treated as having received a payment £1,315 and the transferee as having made a payment of £1,315 (Section 632 ITA 2007).

The Manual then gives a straightforward example of a sale without accrued interest (ex-div):

*Example 2*

Facts as in Example 1, except that the sale takes place on 1 July 2006 which falls within the “ex-dividend” period for the stock.<sup>7</sup> The contract note from the stockbroker shows:

£100,000 Treasury Stock 8¼% 2007 sold @ 114	£114,000
Minus 15 days’ rebate interest	<u>- £352</u>
Payable to you on 2 July 2006	<u>£113,648</u>

The transfer of securities is treated as made on 1 July 2006. The settlement day is 2 July 2006. The transfer is without accrued interest because this is an “ex-div” sale where the seller retains the right to the interest payable on 16 July 2006 (Section 633 ITA 2007). The rebate amount is £352 and the relevant interest period is that from 17 January–16 July 2006

Accordingly in this interest period Anthony (the transferor) is treated as having made a payment of £352 and the transferee as having received a payment of £352.

The Manual then gives a straightforward example of an off-market sale with accrued interest (cum-div):

*Example 3*

Stuffed Dodos Ltd is a UK company which has issued unquoted unsecured loan stock paying interest each year on the Tuesday following Easter Day. Thus in 2015 interest is payable on 7 April and in 2016 interest is payable on 29 March. Joe Smith owns £10,000 nominal of this stock and agrees to sell £4,000 to his aunt Matilda. Under the agreement, which was made on 8 July 2015, Matilda is to pay £5,000 for the stock on 19 August. The interest payable on 29 March 2016 is at the rate of £5.50 per £100 nominal (5.5%).

Even though the loan stock is unsecured, it constitutes ‘securities’ for the purpose of the scheme. The securities are treated as transferred on 8 July 2015 – ITA07/S620(3).

The settlement day is 19 August because that is the day Matilda has agreed to pay for the securities and it falls before the next interest payment day following the agreement– ITA07/S674 (3). The transfer is with accrued interest

---

<sup>7</sup> This is not factually correct: a sale 15 days before the interest payment date would not be ex dividend. That does not spoil the illustrative force of the example but using correct figures would emphasise the triviality of the amounts involved, even in substantial transactions.

(ITA07/S623).

Because the accrued interest is not accounted for separately, in calculating the accrued amount, the formula in ITA07/S632 (5) is used. A is the period from 7 April 2015 to 19 August 2015. B is the period from 7 April 2015 to 29 March 2016. I is the interest applicable to the securities for the period ( $5.5\% \times \text{£}4,000 = \text{£}220$ ). The accrued amount is thus  $135/361 \times \text{£}220 = \text{£}82$ .

The interest period in which the settlement day falls is that from 7 April 2015 to 6 April 2016. Accordingly in that interest period Joe is treated as receiving as payment of £82 and Matilda as having made a payment of £82.

## 27.6 Accrued income profits and losses

Tax is *not* charged on deemed interest credits. But armed with the concept of deemed interest payments, we can turn to the terms “accrued income profits” (and “accrued income losses”) which are defined in ss.628 and 629 ITA:

### **628 Making accrued income profits and losses: general rule**

(1) This section sets out the general rule for determining whether a person is treated as making accrued income profits or accrued income losses where securities are transferred by or to the person. ...

(3) A separate calculation is to be made for each kind of security that is transferred by or to the person and for each interest period of each such kind of security.

(4) Each such calculation is to find—

- (a) the total amount (“A”) of the payments treated under this Chapter as made to the person in the interest period in question in respect of transfers of securities of the particular kind, and
- (b) the total amount (“B”) of the payments treated under this Chapter as made by the person in that period in respect of such transfers.

(5) A person is treated as making accrued income profits in an interest period as a result of transfers of securities of a particular kind if A exceeds B.

(6) A person is treated as making accrued income losses in an interest period as a result of transfers of securities of a particular kind if B exceeds A. ...

### **629 Calculating accrued income profits and losses where section 628 applies**

(1) If section 628(5) applies, the amount of the accrued income profits treated as made is equal to the excess mentioned in section 628(5).

(2) If section 628(6) applies, the amount of the accrued income losses

treated as made is equal to the excess mentioned in section 628(6).

Thus deemed interest debits are first set against deemed interest credits of the interest period for securities of the same kind. If or so far as they cannot be set against those interest credits, they constitute accrued income losses.

## 27.7 Charge on AIP income

I refer to the accrued income profits treated as made under s.628 ITA as “**AIP income**”.

Section 616 ITA imposes the charge on AIP income:

Income tax is charged on accrued income profits.

## 27.8 Accrued income loss relief

Section 679 ITA allows accrued income losses to be set against interest from securities of the same kind:

- (1) This section applies if—
  - (a) a person is liable for income tax on interest on securities of any kind which is due at the end of an interest period of the securities,
  - (b) in that period accrued income losses are made as a result of transfers of those securities, and
  - (c) the period ends with an interest payment day.
- (2) No liability to income tax arises in respect of the interest to the extent that it does not exceed the losses.

SAI Manual provides:

### **4120. Calculating accrued income profits and losses: relief for losses**

[Dec 2019]

... In other words, the losses always reduce the interest subsequently received on those securities, and cannot be used to offset accrued income profits for earlier interest periods or arising on securities which have different interest periods. Where the interest period spans the tax year, losses are therefore not allowed until the interest on the securities is taxed in the following tax year.

For the interaction of loss relief and DTR, see 27.16 (DT relief: AIP income).

## 27.8.1 HMRC examples

SAI Manual provides 3 examples. The first example is a straightforward sale and purchase of one kind of security with accrued interest, looking at the position of the seller:

**4130 Calculating accrued income profits and losses: examples** [Dec 2019]

... Antoinette has £100,000 Treasury Stock 7¼% 2006, which has interest dates of 8 March and 8 September. She makes the following transactions in the stock.

<b>Transaction</b>	<b>Profit/loss<sup>8</sup></b>
19 March 2006 sells £100,000	£2,107
21 March 2006 buys £50,000	(£1,361)
12 May 2006 sells £50,000	<u>(£131)</u>
	<b>£615</b>

The aggregate [accrued income] profit is £615, taxable for 2006–07, the tax year in which the interest period ended, even though two of the transactions occur in 2005–06.

The second example includes purchases and sales, with and without accrued interest, and involving two different kinds of security, looking at the position of the seller:

Jean made the following transactions in securities between 28 February 2005 and 5 April 2006:

19 Mar 2005	bought £100,000 Treasury Stock 7½% 2006 (interest payment dates 7 June and 7 December)
26 May 2005	bought £50,000 Treasury Stock 7½% 2006 ex div
15 Sept 2005	sold £20,000 Treasury Stock 7½% 2006
22 Sept 2005	bought £50,000 Treasury Stock 4½% 2007 (interest payment dates 7 March and 7 September)

The [accrued income] profits and losses arising on these transactions are:

<b>Transaction date</b>	<b>Interest period</b>	<b>Profit/loss</b>
19 March 2005	08/12/04–07/06/05	(£1,395)
26 May 2005	08/12/04–07/06/05	£82
15 Sept 2005	08/06/04–07/12/05	£271
22 Sept 2005	08/09/04–07/03/05	(£778)

The profits and losses for 2005–06 are:

- Loss of £1,313 (£1,395 minus 82) against interest of £3,750 ( $£100,000 \times 7\frac{1}{2}\% \times \frac{1}{2}$ ) received on Treasury Stock 7½% 2006 on 7 June 2005.

---

8 This refers to deemed interest credits/debits, not the commercial profit/loss but I am unable to see how the figures of 2107, 1361 and 131 are derived: can any reader explain?

- Profit of £271 (Treasury Stock 7½% 2006, interest period 8 June 2005–7 December 2005)
- Loss of £778 against interest of £2,250 received on Treasury Stock 4½ % 2007 on 7 March 2006.

The third example is a straightforward sale of a security with accrued interest, looking at the position of the purchaser:

*Example 3*

See Example 3 in SAIM4160 [set out below]. Joe Smith sells £4,000 unsecured loan stock in Stuffed Dodos Ltd to his Aunt Matilda on 19 August 2015. Interest is payable on 5 April 2015 and 18 April 2016. Neither Joe nor Matilda had any other transactions in securities.

The settlement day falls within the interest period 5 April 2015 to 4 April 2016. Joe is taxable on £79 for 2015–16 in respect of this interest period.

Matilda's loss of £79 is carried forward to 2016–17 to be set against the interest receivable for the period 5 April 2015 to 18 April 2016 (Section 637 ITA 2007 – see SAIM4120).

## 27.9 AIP remittance basis

Section 670A ITA provides:

- (1) This section applies if—
  - (a) accrued income profits are made by an individual as a result of a transfer of foreign securities, and
  - (b) section 809B, 809D or 809E (remittance basis) applies to the individual for the tax year in which the profits are made.
- (2) Treat the accrued income profits as relevant foreign income of the individual. ...
- (4) For the purposes of this section securities are “foreign” if income from them would be relevant foreign income.

This brings in the remittance basis. AIP income is fictional, deemed income, which could not be remitted. This is dealt with by s.670A(3) ITA which provides different rules depending on whether the individual receiving the AIP income is the transferor (the usual case of a sale with accrued interest) or the transferee. It is helpful to consider these two cases separately.

For the transferor, s.670A(3) ITA provides:

For the purposes of Chapter A1 of Part 14 (remittance basis)—

- (a) if the individual<sup>9</sup> is the transferor—
  - (i) treat any consideration for the transfer as deriving from the accrued income profits...

Thus the proceeds of sale of the securities are treated as containing the AIP income.

- (ii) if on the transfer the individual does not receive consideration of an amount equal to or exceeding the market value of the securities, treat the securities as deriving from the accrued income profits

Section 670A(3)(a)(ii) is the equivalent of the CGT rule for deemed gains on non-market value disposals.<sup>10</sup>

For the transferee, s.670A(3) ITA provides:

- (b) if the individual<sup>11</sup> is the transferee, treat the securities as deriving from the accrued income profits.

If the taxpayer is the transferee, the AIP securities in the hands of the transferee are deemed to contain the AIP income. It makes no difference whether or not the sale is for market value.

The SAI Manual provides:

**4380 - Accrued Income Scheme: remittance basis** [Dec 2019]

... In some cases, a remittance basis taxpayer will make an accrued income profit on a transfer of securities, but will not receive consideration equal to the market value of the securities.

[1] This may happen when the securities are transferred ‘ex-div’ and the taxpayer is the transferee.

[2] It may also happen where the taxpayer is the transferor, and makes a gift of the securities, or where the AIS rules treat an event as a transfer (for example, an appropriation of securities to trading stock).

In such cases ITA07/S670A(3) provides that the securities themselves are treated as deriving from the accrued income profits. This means that a charge will arise on the taxpayer when they, or some other ‘relevant person’, either bring the securities to the UK (if they are held in bearer form) or remit money or property deriving from the securities. ...

---

9 That is, the individual to whom the accrued income profits arise.

10 See 17.33 (Gain on disposal at undervalue).

11 That is, the individual to whom the accrued income profits arise.

### 27.9.1 Relief for losses

What about accrued income losses accruing to a remittance basis taxpayer? The SAI Manual provides:

**4380 - Accrued Income Scheme: remittance basis [Dec 2019]**

... Remittance basis taxpayers are able to obtain relief for accrued income losses. Losses arising on transfers of securities of a particular kind are set against interest received on securities of the same kind at the end of the relevant interest period, and will therefore reduce the amount of an individual's interest on those securities. There is an example of the interaction of the accrued income loss rules and the remittance basis rules at SAIM4390.

### 27.9.2 Mixed fund: Transferor

The consideration received by the transferor (vendor) for the sale of AIP securities with accrued interest will be a mixed fund, consisting in part of AIP income, and the mixed fund rules will apply. In strict law one cannot separate the AIP income from the other proceeds of sale. There are three reasons for this.

First, assume that:

- (1) P will pay a single sum for the security to V's broker (the total price).
- (2) The broker will then divide the total price into two parts (accrued interest and clean price) and pay the two parts into two separate accounts of the vendor.

There is already a mixed fund on receipt of the payment by the broker on behalf of the client at stage (1), and the broker's act in transferring the single payment into two accounts is an offshore transfer under the mixed fund rules. In theory one might avoid this difficulty if P could pay two separate sums, one in respect of accrued interest and one in respect of the clean price; but in practice on a market sale that would not be possible.

Secondly, the AIP income is a fictional, notional amount which is distinct from the sum paid for the accrued interest. It is like the CFC income in *Brikom*.<sup>12</sup>

Even if that were wrong, however, there is a third obstacle in s.670A(3) ITA, which provides:

---

<sup>12</sup> See 103.22 (Characterisation).

For the purposes of Chapter A1 of Part 14 (remittance basis)

- (a) if the individual is the transferor –
  - (i) treat *any* consideration for the transfer as deriving from the accrued income profits.

Thus even if (contrary to my view) the amount that V, the transferor, received for the accrued interest could in principle be separated and did in principle constitute the AIP income, the effect of s.670A(4) is that any consideration for the securities sold by V is treated as deriving from the AIP income.

However HMRC do not take that view. The RDR Manual provides:

**33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [Jan 2019]

Where a security is sold with accrued income and the proceeds paid into an account, the part of the proceeds representing accrued income will be taxable as income and subject to income tax under the Accrued Income Scheme (AIS)....

Where an individual is chargeable on the remittance basis, accrued income profits arising from on transfers of a ‘foreign security’ are treated as relevant foreign income...

For consistency of treatment between the AIS and the remittance basis regime, HMRC will follow the tax treatment delivered by the AIS and accept that an ‘income amount’ can be transferred to a separate ‘income account’ immediately upon transfer, that is, the proceeds are ‘split’ into two separate accounts immediately upon receipt into the individual’s account. This ‘income’ could then be identified and taxed as such, without creating a mixed fund....

To the extent that the remainder of the proceeds consist of capital or UK or non-taxable income (as opposed to, say, untaxed foreign income or gains) originally used in the purchase of the security ... the remainder of the proceeds could therefore be separately identified and remitted as such.<sup>13</sup> ...

---

13 Similarly SAI Manual:

**“4400. Remittance basis: Further examples** [Dec 2019]

... The disposal of a bond may be structured such that separate payment is made for the capital and the accrued income elements which may be paid into separate accounts. In this situation Section 632 ITA 2007 provides that the taxable amount shall be taken as the amount of gross interest accruing to the settlement day, which

### 27.9.3 Mixed fund: Transferee

The Manual does not expressly consider the alternative situation where a security is sold without accrued interest and the transferee makes an accrued income profit. There is no difference between the two situations, so the purchaser (transferee) could divide up the purchased securities into an AIP income fraction and a clean capital fraction and hold the two in separate security accounts. However the amounts involved will generally be trivial.

### 27.9.4 Mixed fund: Actual interest

A similar problem arises on receipt of the interest payment after the sale. I refer to this as the “**actual interest payment**”. The recipient will be the purchaser (on a sale with accrued interest) or the seller (on a sale without accrued interest). Either way, the recipient will not normally be subject to income tax on the full amount of the interest as an deemed interest debit will normally generate an accrued income loss which can be set against the interest. The actual interest payment will therefore be a mixed fund. It is suggested that one can separate the actual interest payment on receipt into income and capital elements.

### 27.9.5 HMRC examples

The SAI Manual provides:

**4390 - Accrued Income Scheme: remittance basis: examples**  
[Dec 2019]

The application of the remittance basis to the AIS is not without complication.

The problem is identifying what is or represents the AIP income where there are deemed interest debits (in the statutory terminology, amount B's) to set against deemed income credits (amount A's.) There is no statutory solution.

---

is separately identified as such.

An individual who has received separate payments into two separate accounts in this way will not be regarded as having two mixed funds. In this situation a remittance of the capital element will not be regarded as a remittance of relevant foreign income.”

The following examples set out line HMRC takes in particular circumstances.

*Example 1*

Ann holds foreign securities ‘of the same kind’ X and Y which are disposed of in an interest period. They realise the following A and B amounts. ...

<b>Security</b>	<b>Proceeds</b>	<b>Amount A</b>	<b>Amount B</b>
X	100	10	
Y	60		(5)

There is an accrued income profit of £5,000 which will be treated as deriving from the proceeds of sale of security X. Assuming the proceeds are paid into a new bank account, there will be a mixed fund comprising capital of £95,000 and an accrued income profit of £5,000.

*Example 2*

Isabelle has 3 holdings of the same kind of foreign security, X, Y and Z. They are disposed of in an interest period and the proceeds are paid into separate accounts. They realise the following A and B amounts.

<b>Security</b>	<b>Proceeds</b>	<b>Amount A</b>	<b>Amount B</b>
X	100	7	
Y	200	-	(10)
Z	70	4	

In this situation there is an accrued income profit of £1,000. If the proceeds of disposal of all 3 bonds are paid into a single account there will be a mixed fund with capital of £369,000 and an accrued income profit of £1,000.

That is the easy case as there is only one possible answer.

If the proceeds were paid into separate accounts HMRC would expect the accrued income profit to be allocated pro rata in proportion to the Amount A of securities X and Z or, if this would create an unreasonable result, by any reasonable method.

Careful time of purchases and sales would avoid the problem. The last example is somewhat theoretical and I set it out for completeness only:

**4400. Remittance basis: Further examples [Dec 2019]**

It is unlikely that there are many situations where UK and foreign securities will be ‘securities of the same kind’ for the purposes of the

AIS scheme. It may, however, happen in the case of bearer securities. The following example outlines such a situation.

Sam has both overseas and UK bonds 'of the same kind' and they are disposed of in the same interest period with the following results.

*Example 3*

<b>Security</b>	<b>Proceeds</b>	<b>Amount A</b>	<b>Amount B</b>
X (overseas)	100,000	7,000	
Y (overseas)	200,000	-	(10,000)
Z (UK)	70,000	4,000	

In this case the accrued income profit of £1,000 does not arise as the result of a transfer of foreign securities. There is a net Amount B of £3,000 as the result of the transferred foreign securities. There is therefore no relevant foreign income which Sam might remit to the UK. There is a UK accrued income profit of £1,000 which is taxable on an arising basis.

There are several odd things in this example. First it is assumed that if the bearer security is in the UK, the interest is UK source. That is not the test of the location of a source of interest. Perhaps it is assumed that the income is received in the UK. Secondly, one would have expected the deemed interest debit (amount B) to be set against the deemed interest credits pro rata, not set against foreign income first. But since in practice the point will never arise, it is not necessary to pursue that further.

### 27.9.6 Pre-2008 transitional rules

Until 2008/09 a foreign domiciled individual was wholly outside the scope of the AIP rules on foreign securities.

Para 160 Sch 7 FA 2008 provides:

The amendments made by paras 156 to 159 have effect in relation to transfers of securities where the settlement day is on or after 6 April 2008.

The new rules therefore catch all AIP securities even if held before the law changed in 2008.

### 27.9.7 AIP remittance basis: Critique

When one contemplates the complications of the AIP remittance basis, one appreciates the wisdom of the rule, which applied from the inception

of the accrued income scheme in 1985 until 2008, under which the accrued interest scheme did not apply to foreign securities of remittance basis taxpayers. CGT filled the gap. The problems were not discussed, and as far as is known were not even considered, when the law was changed in 2008.

Most if not all readers who have studied the text to this point will agree that the current rule does not give sufficient weight to the desiderata of simplicity and administrative workability. The pre-2008 rule ought to be restored.

### **27.10 Excluded persons**

The AIP exemptions use the concept of excluded transferor/transferee. Section 638 ITA provides:

- (1) This section applies if there is a transfer of securities in relation to which a person (“P”) is an excluded transferor or excluded transferee.
- (2) In determining whether P has made accrued income profits or accrued income losses under section 628 (making accrued income profits and losses: general rule) and the amount of any such profits or losses, no account is to be taken of any payment treated as made by or to P on the transfer.

A person is not an excluded transferor/transferee in isolation. One is excluded in relation to a transfer of securities. An excluded person is broadly outside the AIP scheme.

### **27.11 AIP arising to non-resident**

Section 643 ITA provides:

- (1) A person is—
  - (a) an excluded transferor in relation to a transfer by the person, and
  - (b) an excluded transferee in relation to a transfer to the person, if the person is non-UK resident throughout the tax year in which the transfer occurs.

The exemption avoids the AIP charge on UK and foreign AIP securities.<sup>14</sup>

---

<sup>14</sup> Section 1015 ITA (if needed) could also restrict the territorial scope of the AIP charge, but the rules discussed here leave it no room to operate.

It also withholds the AIP relief. EN ITA explains the policy behind the rule:

1897. In practice it would be very difficult to apply the scheme to such non-residents consistently. While non-residents could take the benefit of relief for accrued income losses to get repayments of tax suffered if tax is deducted at source, it would be difficult to enforce the charge to tax on accrued income profits.

A person coming to or leaving the UK might time disposals to obtain AIP relief while UK resident, while making disposals on which a charge would apply while non-resident.

The temporary non-residence rules do not apply. However CGT may fill some of the gap. The gain on the disposal of AIP securities may be subject to CGT if the CGT temporary non-residence rules apply.

## **27.12 Trusts**

### *27.12.1 Application to trustees*

The TSE Manual provides:

#### **3325. Do AIS provisions apply to trustee or beneficiary? [Mar 2017]** ***Accrued Income Scheme charge***

If trustees (other than bare trustee – TSEM3320) transfer securities, any Accrued Income Scheme PROFIT is that of the trustees. The trustees are chargeable at the trust rate, under Sections 481 and 482 ITA.

The Accrued Income Scheme profit on a transfer of securities does not form the income of any beneficiary.

#### ***Accrued Income Scheme allowance***

The treatment of the loss depends on who received the income against which relief is due. If the trustees received the interest, they are entitled to the relief.

The trustees may have mandated the interest to a beneficiary. The beneficiary should claim the loss against the interest.

### *27.12.2 Transfer to trust*

The TSE Manual provides:

#### **3330. Securities go into trust: Accrued Income Scheme [Mar 2017]**

When securities go into trust there is a transfer, for Accrued Income Scheme purposes. The transfer is from the settlor to the trustee.

This includes

- a settlor creates a new trust by transferring securities to the trustee
- a person who holds securities for his own benefit declares he will in future hold them as trustee
- at the end of an administration period, a personal representative starts to hold securities as trustee of a will trust.

### 27.12.3 *Transfer from trustees*

The TSE Manual provides:

**3335. Beneficial interest in trust changes: Accrued Income Scheme**  
[Mar 2017]

***Change results from the terms of the trust***

The terms of a trust may often result in changes in beneficial interests. For example, on the death of a life tenant the trust assets may pass absolutely to another beneficiary. Such changes in beneficial interest have no accrued income scheme consequences. Either there is no actual transfer, or the transfer simply produces self-cancelling deemed profits and losses.

SAI Manual makes the same point:

**4050. What is a transfer?** [Dec 2019]

... The AIS is based on transfers of the legal ownership of securities, not the transfer of the underlying beneficial ownership. Thus, for example, there is no transfer for the purposes of the AIS if a beneficiary under a trust becomes absolutely entitled as against the trustees to securities forming part of the trust fund. ...

Returning to the TSE Manual:

**3335. Beneficial interest in trust changes: Accrued Income Scheme**  
[Mar 2017] ...

***Change follows an action by the trustees***

Sometimes a change is not a direct result of the terms of the deed. Trustees can use their powers to advance interests or appoint property. The exercise of these powers can amount to a transfer.

That seems inconsistent with what was said above.

***'Stranded' Accrued Income Scheme loss***

A change in beneficial owner can result in an Accrued Income scheme loss being 'stranded'. It is no longer available to set against the interest.

For example, the trustee could have bought securities ‘cum dividend’ (with a right to the dividend). Shortly afterwards a beneficiary could become absolutely entitled to the trust assets following a contingency. The contingency does not involve any transfer for Accrued Income Scheme purposes. This means the trustee’s Accrued Income Scheme loss is lost. The beneficiary was never entitled to the loss, so cannot set it against subsequent interest.

#### 27.12.4 *Appointment of new trustees*

The TSE Manual provides:

**3340. Accrued income scheme: change of trustees [Mar 2017]**

***Trustees remain resident in the UK***

There are no Accrued Income Scheme consequences when trustees change, but the trustees of the settlement (see TSEM1461) remain resident in the UK. The change simply produces self-cancelling deemed profits and losses.

***Trustees change from resident to non-resident***

As the new trustees are not resident, they do not satisfy the ‘residence requirement’ of the Accrued Income Scheme. The appointment of non-resident trustees is a transfer of the securities by the resident trustees. ...

***Trustees change from non-resident to resident***

As the old trustees were not resident, they do not satisfy the ‘residence requirement’ of the Accrued Income Scheme. The change of trustees is a transfer of securities to the resident trustees.

This may have been right before 2006, but now that trustees are treated as a single person (distinct from the actual trustees) it is considered that the appointment of new trustees (wherever resident) is not a transfer for AIS purposes.

### 27.13 **Settlor-interested trusts**

#### 27.13.1 *UK resident trust*

Section 667(1) ITA provides:

If the trustees<sup>15</sup> of a settlement are treated as making qualifying accrued

---

<sup>15</sup> Defined in s.667(4)(b) ITA.

income profits,<sup>16</sup> those profits are to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

I am not sure if this is necessary. Perhaps it could have been argued that although “tax is charged on accrued income profits” (s.616) such profits are nevertheless not “income arising under a settlement”. Perhaps the provision is just for symmetry with the provision which follows for non-resident trusts.

The rate of tax in the absence of s.624 is the trust rate, 45%, so s.624 can only reduce the tax rate (or make no difference).

### 27.13.2 *Non-resident trust*

In the absence of express provision, AIP income of non-resident trustees would not fall within the settlor-interested trust code because the trustees are non-UK resident. However s.667 ITA deals with this and so the provisions apply to AIP income:

- (2) Subsection (3) applies if the trustees of a settlement—
  - (a) are non-UK resident or domiciled<sup>17</sup> outside the UK throughout a tax year in which an interest period or part of an interest period falls, and
  - (b) would have been treated as making an amount or an additional amount<sup>18</sup> of qualifying accrued income profits in the interest period if the trustees had been UK resident or domiciled in the UK during a part of each such tax year.
- (3) The amount or additional amount of qualifying accrued income profits that the trustees would have been treated as making is to be taken

---

16 Defined in s.667(4)(a) ITA:

“qualifying accrued income profits’ means accrued income profits which are treated as made—

- (i) under section 628(5), or
- (ii) under section 630(2) in respect of a transfer of variable rate securities.”

The drafting is misleading: as far as I can see, all accrued income profits are “qualifying” accrued income profits.

17 The references to domicile in s.667(2) are otiose, but they do no harm. They are there for historical reasons, as before 2008 foreign domiciled trustees qualified for the remittance basis on trust income.

18 The references to “an additional amount” are otiose but they do no harm.

to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005.

Thus the AIP income of a settlor-interested trust is in principle within the scope of s.624 ITTOIA.<sup>19</sup>

Non-resident trustees would not qualify for AIP loss relief,<sup>20</sup> so s.680 ITA extends the relief:

- (1) This section applies if—
  - (a) the trustees of a settlement are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period of securities falls,
  - (b) the trustees' income is or includes interest from those securities,
  - (c) the interest falls due at the end of that interest period, and
  - (d) had the trustees been UK resident, or domiciled<sup>21</sup> in the UK, during a part of each such tax year the interest would have been wholly or partly exempt from income tax under section 679.
- (2) No liability to income tax arises as a result of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor) in respect of so much of the interest as would have been exempt from income tax under section 679.

### 27.14 ToA rules/AIP income

In the absence of express provision, AIP income would not fall within the transfer of asset abroad provisions because the person abroad would qualify for the AIP non-residence defence (or more accurately, the person abroad would not receive income).<sup>22</sup> However, s.747 ITA deals with this and so the ToA provisions apply to AIP income:

- (1) This subsection applies if a person—
  - (a) would have been treated as—
    - (i) making qualifying accrued income profits, or
    - (ii) making qualifying accrued income profits of a greater amount,

---

19 Subject to s.624 protected trust relief, if applicable; see 27.15 (AIP: Protected-trust reliefs).

20 See 27.8 (Accrued income loss relief).

21 The references to domicile in ss.667 and 680 ITA is otiose from 2008 but it does no harm.

22 See 45.15 (Income of person abroad).

- in an interest period, but
- (b) is not so treated because of being resident or domiciled<sup>23</sup> outside the UK throughout any tax year in which the interest period (or part of it) falls.
- (2) If subsection (1) applies, this Chapter applies as if the amount which the person would be treated as making or, as the case may be, the additional amount were income becoming payable to the person.
- (3) Accordingly, any reference in this Chapter to income of (or payable or arising to) a person abroad must be read as including a reference to such an amount.

It has been suggested that this leaves a gap where AIP securities are held by a non-resident company. Section 747(1) ITA applies only if the company would have fallen within the AIP rules but did not do so “because of being resident outside the UK”. But if the company had been UK resident, it would be within the charge to corporation tax and outside the scope of AIP. That is correct on a literal construction. However, the context shows that the deeming is not intended to be applied to that extent, and a comparable argument in a CGT context was resoundingly dismissed in *de Rothschild v Lawrenson* 67 TC 300 (“I do not believe that our processes of statutory construction are so wanting in technique and imagination ...”).<sup>24</sup>

The person abroad (if non-resident) would not qualify for AIP loss relief, so s.747(4)(5) ITA extends the relief:

- (4) This subsection applies if income consisting of interest which falls due at the end of an interest period—
    - (a) would have been income as respects which a person is entitled to an exemption, or an exemption of a greater amount, from liability to income tax under section 679 (interest on securities involving accrued income losses: general), but
    - (b) is not such income because it is income of a person who is resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.
- (5) If subsection (4) applies, for the purposes of this Chapter the interest is treated as reduced by the amount of the exemption or, as the case may

---

<sup>23</sup> The reference to domicile is otiose from 2008 but it does no harm.

<sup>24</sup> See App. 7.1 (Deeming provisions: Introduction).

be, the additional exemption.

### 27.14.1 Definitions

Section 747 ITA provides definitions for s.747:

- (6) In this section—
  - (a) expressions which are also used in Chapter 2 of Part 12 (accrued income profits) have the same meaning as in that Chapter (but see subsection (7)), and
  - (b) “qualifying accrued income profits” means accrued income profits which are treated as made—
    - (i) under section 628(5), or
    - (ii) under section 630(2) in respect of a transfer of variable rate securities.
- (7) In the case of qualifying accrued income profits within sub-paragraph (ii) of the definition of that expression in subsection (6)(b)—
  - (a) references in subsection (1)(a) to making qualifying accrued income profits in an interest period are to be read as making them in the tax year in which the settlement day falls, and
  - (b) the reference in subsection (1)(b) to the interest period is to the period—
    - (i) beginning with the day after the last day of the only or last interest period of the securities, and
    - (ii) ending with the settlement day.

The expression “qualifying” accrued income profits is misleading: as far as I can see, all accrued income profits are qualifying.

For the interaction with s.731, see 47.21.2 (Stock dividend/accrued income).

### 27.15 AIP: Protected-trust reliefs

The wording is (more or less) the same as for offshore income gains,<sup>25</sup> which suggests that the position is as follows:

- (1) If the settlor/transferor makes a remittance basis claim, AIP income is protected income, and qualifies for s.624/s.720 protected-trust reliefs.
- (2) If the transferor does not make that claim (either because they are

---

<sup>25</sup> See 64.12.2 (OIG: Protected s.720 income?).

deemed domiciled and cannot claim the remittance basis; or because they chose not to do so) then AIP income is not protected income; so it is taxable on the transferor/settlor on an arising basis.

The CIOT argument relating to OIG and deemed source does not arise in this context.<sup>26</sup> But a purposive construction is just about arguable.

## **27.16 DT relief: AIP income**

### *27.16.1 DT exemption*

OECD Commentary provides:

20.1 The amount that the seller of a bond will receive will typically include the interest that has accrued, but has not yet become payable, at the time of the sale of the bond. In most cases, the State of source will not attempt to tax such accrued interest at the time of the alienation and will only tax the acquirer of the bond or debenture on the full amount of the interest subsequently paid (it is generally assumed that in such a case, the price that the acquirer pays for the bond takes account of the future tax liability of the acquirer on the interest accrued for the benefit of the seller at the time of the alienation). In certain circumstances, however, some States tax the seller of a bond on interest that has accrued at the time of the alienation (e.g. when a bond is sold to a tax-exempt entity). Such accrued interest is covered by the definition of interest and may therefore be taxed by the State of source. In that case, that State should not again tax the same amount in the hands of the acquirer of the bond when the interest subsequently becomes payable.

See 25.26.5 (DTA definition of interest).

### *27.16.2 AIP: Foreign Tax Credit*

In the absence of express provision there would be no Foreign Tax Credit, as the AIP income is not taxable in the other state.

Section 10 TIOPA provides relief:

- (1) Subsection (2) applies if—
  - (a) a person is treated under section 628(5) of ITA 2007 as making

---

<sup>26</sup> Because that argument rests on s.830(2)(o) ITTOIA, and there is no equivalent provision in s.830(2) for accrued income profits. See 64.12.3 (Deemed source argument).

- accrued income profits in an interest period,
- (b) the person would, were the person to become entitled in the relevant tax year<sup>27</sup> to any interest on the securities concerned, be liable in respect of the interest to tax chargeable under ITTOIA 2005 on relevant foreign income, and
  - (c) the person is liable under the law of the territory to tax in respect of interest payable on the securities at the end of the interest period or the person would be so liable if the person were entitled to that interest.

I cannot see the need for (b) as it will be satisfied whenever (a) is satisfied. Section 10(2) provides the relief:

(2) Credit is to be allowed against income tax calculated by reference to the accrued income profits.

(3) The amount of the credit allowed under subsection (2) is given by—  

$$\text{AIP} \times \text{FTR}$$

where—

AIP is the amount of the accrued income profits, and

FTR is the rate of tax to which the person is or would be liable as mentioned in subsection (1)(c)...

Section 39 TIOPA restricts DT relief where there is relief for accrued income losses.<sup>28</sup>

The SAI Manual provides:

**4370. Double taxation relief** [Dec 2019]

Where an AIS charge arises on a foreign stock on which the interest would have suffered foreign tax eligible for credit relief if interest had been received, credit for foreign tax is allowable for the lower of

- the rate of UK tax charged on the accrued income profit, and
- the rate of foreign tax suffered on the interest payable at the end of the interest period for which the charge arises.

If there is an accrued income loss to be set against foreign interest, reduce the credit for foreign tax in the proportion which the allowance bears to the interest.

---

27 Defined subsection (5): “In subsection (1)(b) ‘the relevant tax year’ means the tax year in which, under section 617(2) of ITA 2007, the accrued income profits are treated as made.”

28 See 27.8 (Accrued income loss relief).

*Example*

Taxpayer holds foreign stock on which the interest suffers tax eligible for credit at 15%. Interest paid on 30 June and 31 December.

In the interest period to 30 June 2015, the taxpayer makes transactions resulting in an AIS loss of £200. He receives interest (gross) of £1,000 less £150 foreign tax.

In August 2016 he sells the entire holding and there is an AIS profit of £300. He is liable to UK tax at 22%. His double taxation relief is as follows

Foreign interest		£1,000
Less Accrued Income relief		- <u>£200</u>
		<u>£800</u>
Foreign tax deducted	£150	
Credit restricted to	$£1000 - £200 \times £150/£1000$	= £120
Accrued income profit		£300
Allow credit for foreign tax on AIS charge £300 @ 15%		= £45
Total double taxation relief	$£120 + £45$	= £165

The double taxation relief given can exceed the foreign tax suffered (£165 exceeds the £150 suffered).

**27.17 AIP/CGT interaction**

Section 119(1) TCGA disapplies the normal CGT rules in ss.37 and 39 TCGA:

(1) Where there is a transfer of securities within the meaning of Chapter 2 of Part 12 of ITA 2007 (accrued income profits)—

- (a) if a payment is treated as made to the transferor under section 632 of that Act or by the transferor under section 633 of that Act, section 37 shall be disregarded in computing the gain accruing on the disposal concerned;
- (b) if a payment is treated as made by the transferee under section 632 of that Act or to the transferee under section 633 of that Act, section 39 shall be disregarded in computing the gain accruing to the transferee if he disposes of the securities;

but subsections (2) and (3) below shall apply.

Section 119 TCGA goes on to set out its own rules:

(2) Where the securities are transferred with accrued interest (within the meaning of that Chapter)—

- (a) if a payment is treated as made to the transferor under section 632 of ITA 2007, an amount equal to the amount of that payment shall be excluded from the consideration mentioned in subsection (8) below;
  - (b) if a payment is treated as made by the transferee under that section, an amount equal to the amount of that payment shall be excluded from the sums mentioned in subsection (9) below. ...
- (8) The consideration is the consideration for the disposal of the securities transferred which is taken into account in the computation of the gain accruing on the disposal.

Section 119(3)(9) contains corresponding rules for a transfer without accrued interest:

- (3) Where the securities are transferred without accrued interest (within the meaning of that Chapter)—
- (a) if a payment is treated as made by the transferor under section 633 of ITA 2007, an amount equal to the amount of that payment shall be added to the consideration mentioned in subsection (8) below;
  - (b) if a payment is treated as made to the transferee under that section, an amount equal to the amount of that payment shall be added to the sums mentioned in subsection (9) below...
- (9) The sums are the sums allowable to the transferee as a deduction from the consideration in the computation of the gain accruing to him if he disposes of the securities.

## 27.18 Foreign currency securities

SAIM provides:

### **4310. Special calculations: Foreign currency securities [Dec 2019]**

#### **Foreign securities: Translation into sterling**

Section 664 ITA 2007 provides rules for translation into sterling of the payments made on the transfer of securities where the interest on securities is payable in a currency other than sterling.

If the interest is accounted for separately between transferor and transferee, and the parties specify in their contact what the sterling equivalent of the accrued or rebate interest is, the sterling amount so specified is to be used in the AIS calculations. Otherwise, the amount is to be determined in the foreign currency according to the usual rules, and then translated into sterling at the rate of exchange prevailing on the

settlement day for the transfer, calculated by reference to the London closing rate of exchange for the day concerned.

The nominal value of foreign securities is also determined (under Section 677 ITA 2007) as the sterling equivalent of that value on any day, calculated by reference to the London closing rate for that day.

Where unrealised interest is payable in a foreign currency, Section 665 ITA 2007 provides that the amount of the accrued income profits under Section 631 ITA 2007 is the sterling equivalent on the settlement day, or in the case of interest in default (SAIM4290), the value on the day of receipt.

Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently.

## CHAPTER TWENTY EIGHT

# DEEPLY DISCOUNTED SECURITIES

28.1

### 28.1 DDS code

Deeply discounted securities are governed by Chapter 8 Part 4 ITTOIA (“**DDS code**”).

A full discussion of this topic would need a book to itself. This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole.

In outline, profits arising on the disposal of a deeply discounted security (“**DDS**”) are subject to income tax (rather than CGT).

The following specialist topics are not discussed:

- securities issued in tranches
- earn-out rights
- strips
- exchanges and conversions

I do not discuss the position of companies which issue or hold deeply discounted securities, which is governed by the loan relationship rules.

### 28.2 “Deeply discounted security”

For the meaning of “security” see App. 2.14 (“Security” in DDS code). Section 430(1) ITTOIA provides:

The general rule is that a security is a “deeply discounted security” for the purposes of this Chapter [chapter 8 part 4 ITTOIA, DDS code] if, as at the time it is issued,

- [a] the amount payable on maturity or any other possible occasion of redemption (“A”)
- [b] exceeds or may exceed the issue price

[c] by more than  $A \times 0.5\% \times Y$ ,  
 where Y is the number of years in the redemption period or 30,  
 whichever is the lower.

I refer to this as the “**0.5% DDS test**”.

Section 430 ITTOIA defines “redemption period”:

(2) If the redemption period is not a number of complete years, for the purposes of subsection (1) the incomplete year is expressed as twelfths, treating each complete month and any remaining part of a month as one-twelfth.

(3) In this section “redemption period” means the period between the date of issue and the date of the occasion of redemption in question.

Interest is disregarded for the purpose of the 0.5% DDS test. Section 430(4) ITTOIA provides:

Interest payable on an occasion of redemption is ignored in determining for the purposes of this section the amount payable on that occasion.

In other words, the profit on redemption must be a capital premium, rather than interest. For the distinction, see 25.4 (Premium).

SAI Manual gives three examples. The first example is an RPI-index bond. Note that HMRC here accept that RPI indexation is not interest:

**3020 Meaning of deeply discounted security** [Dec 2019]

*Example 1*

Company A issues securities for £1,000 which are redeemable in 10 years time for the subscription amount increased by the percentage movement in the Retail Price Index over the same period. As the linkage to the RPI may give more than a 5% increase in value (10 years  $\times$  0.5%) over that period, the securities are deeply discounted securities.

In the next example there is just a possibility of a fixed premium:

*Example 2*

Company B issues a 12-month security for £950. It is redeemable for £950 at maturity or, depending on events, for £1,000 after 6 months. The occasion of early redemption is not disregarded under Section 431 ITTOIA 2005 (SAIM3030). The difference between the issue and early redemption prices is £50 and is therefore more than £2.50 ( $\text{£1,000} \times 0.5\% \times 6/12$ ). The security is therefore a DDS.

The next example is a FTSE 100 indexed bond:

*Example 3*

Bank C issues a 5-year security that is linked to the FTSE 100 share index. Each security has a nominal value to £100. If the index rises, the investor receives on redemption £100 multiplied by the percentage rise in the index. For example, the index has risen to 150% of its starting value, the investor receives £150. If the index falls, the investor is guaranteed to receive back his or her £100, so the security is not an excluded indexed security (SAIM3050). Since the security may give more than a 2.5% increase in value over the period (5 years  $\times$  0.5%), it is a DDS, even though there is no certainty as to the redemption amount.

**28.3 “Issued”**

*Savva v HMRC* comments on this word:

What will amount to an “issue” of a security in a given case is likely to be highly fact-specific, and the case law shows that it can be a very difficult question to answer. For present purposes, it is enough to say that, if the rights which Mr Savva received from UBS did constitute a separate security, we doubt whether there is any demonstrable error of law in the FTT’s conclusion that the security was “issued” by UBS.<sup>1</sup>

**28.4 Foreign currency security**

In the following discussion a “**foreign currency security**” is one issued for a foreign currency and redeemable in that currency.

**28.4.1 Foreign currency security: DDS**

Consider for instance a US Treasury Note issued for \$1,000 and redeemable on maturity at \$1,000 and carrying interest at a market rate. Is the security deeply discounted? The question (in short) is whether:

the amount payable on maturity may exceed the issue price

This raises a currency translation issue. If:

- (1) “issue price” means the sterling equivalent of the issue price at the time of issue; and
- (2) “amount payable on maturity” means the sterling equivalent of that

---

<sup>1</sup> [2015] UKUT 141 (TCC) at [40].

amount at the time of maturity

then a foreign currency security is a DDS, because currency fluctuations could lead to a gain measured by £ sterling.

If “issue price” means the dollar price and “the amount payable on maturity” means the dollar amount, then the two are equal and the security is not a DDS.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is for several reasons. First, the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations. The absence of relief on losses would operate very unfairly. Secondly, if that were not the case, all foreign currency securities would be within the DDS regime.<sup>2</sup> That would be surprising (and not EU-law compliant).<sup>3</sup>

HMRC agree. The SAI Manual provides:

**3020 Meaning of deeply discounted security [Mar 2017]**

The test for deep discount is carried out in the currency of issue.

#### 28.4.2 *Foreign currency DDS*

The above paragraph is considering a security whose dollar issue price equals its dollar maturity price. Of course, a foreign currency security would in principle be a DDS if the redemption price may sufficiently exceed the issue price. It is understood that US treasury bills (which do not carry interest) are normally DDSs. I refer to such a security as a “**foreign currency DDS**”.

How does one compute the profit on the disposal of a foreign currency DDS? The profit is:

the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.

- 
- 2 Unless they contained a cap to limit the gain to a sterling amount, which would not normally be the case.
  - 3 The arguments are more fully set out in Ghosh, “Corporate Bonds: If The Cap Does Not Fit” *Taxation Magazine*, 7 February 2002 p.439; but since HMRC have accepted this view since the publication of Tax Bulletin 9, it is not necessary to consider that here.

This raises another currency translation issue. Suppose a person acquires a security on issue for dollars and redeems it for dollars. Is the amount paid to acquire the security:

- (1) The sterling equivalent of the purchase price at the time of issue? Or
- (2) The dollar amount? If so, it is deducted from the dollar amount payable on disposal, to give a dollar profit, translated into sterling at the time of disposal.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is consistent with the approach to the definition of a DDS: see above. The same point applies: the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations.

The solution to the same problem for CGT is different.<sup>4</sup> The reason for this is explained in *Capcount Trading v Evans* 65 TC 545. One important factor in that decision was the provision in the CGT legislation that currency other than sterling is an asset for CGT. There is no similar provision for IT. However HMRC may not agree. SAIM provides:

**SAIM3070 Taxation: Profit On Disposal** [Dec 2019]

Where a security is denominated in a foreign currency the profit is the difference between the sterling equivalents of the acquisition and disposal amounts, using the spot rates at the material dates.

## 28.5 Excluded occasions of redemption

Section 431(1) ITTOIA provides:

An occasion of redemption of a security other than maturity is ignored for the purposes of section 430(1) if the third-party option conditions or the commercial protection conditions are met.

Section 431(4) ITTOIA provides:

Subsection (1) does not apply to an occasion just because the occasion coincides or may coincide with an occasion meeting the third-party option conditions or the commercial protection conditions.

### 28.5.1 *Third-party option conditions*

---

<sup>4</sup> See 91.2 (CGT: currency conversion date).

## Section 431(2) ITTOIA provides:

The third-party option conditions are that—

- (a) the security may be redeemed on the occasion at the option of a person other than its holder,
- (b) the security is issued to a person who is not connected with the issuer, and
- (c) the obtaining of a tax advantage by any person is not the main benefit, or one of the main benefits, that might have been expected to accrue from the provision in accordance with which the security may be redeemed on the occasion.

28.5.2 *Commercial protection conditions*

## Section 431(3) ITTOIA provides:

The commercial protection conditions are that—

- (a) the security may be redeemed on the occasion as the result of an exercise of an option that is exercisable only on the occurrence of—
  - (i) an event adversely affecting the holder (see subsection (8))<sup>5</sup>,
  - or
  - (ii) a default by any person, and
- (b) as at the time of the security's issue it appears unlikely that the option will be exercisable on the occasion.

28.5.3 *Connected third party*

## Section 431 ITTOIA provides:

(5) If—

- (a) the only reason that a security is not a deeply discounted security is that an occasion on which it may be redeemed is ignored because the third-party option conditions are met, and
- (b) at some time after its issue the security is acquired by, or its holder becomes, a person connected with the issuer,

in relation to that time and later this Chapter [chapter 8 part 4 ITTOIA,

---

5 “(8) In this section “event adversely affecting the holder”, in relation to a security, means an event the occurrence of which appears, as at the time of the security's issue, likely to have an adverse effect on the interests of its holder at the time of the event if there were no provision for redemption on its occurrence.”

DDS code] applies as if the security were a deeply discounted security.

- (6) If a person (“P”) who is not connected with the issuer acquires—
- (a) a security which is only a deeply discounted security because it was issued to a person connected with the issuer and so fails to meet the condition specified in subsection (2)(b), or
  - (b) a security within subsection (5),

this Chapter applies in relation to P as if the security ceased to be a deeply discounted security on the acquisition.

(7) For the purposes of the application of this section to a security, the question whether persons are connected is determined without regard to the security or any other security issued under the same prospectus.

## 28.6 Securities outside DDS code

### 28.6.1 Securities under other regime

Section 432(1) ITTOIA provides:

The following are not deeply discounted securities—

- (a) shares<sup>6</sup> in a company,
- (b) gilt-edged securities that are not strips,
- (c) life assurance policies, and
- (d) capital redemption policies.<sup>7</sup>

### 28.6.2 Securitised derivatives

The SAI Manual provides:

#### **3040. Securities not deeply discounted securities** [Dec 2019]

[The Manual sets out s.432(1) and continues:] In practice, therefore, most deeply discounted securities will be securities in the nature of debts, that is, where the issuer has an obligation to make some form of return to the investor.

Until 2011, this SAI Manual paragraph provided:

#### **Securitised derivatives**

Securitised derivatives present particular problems. These are investment products where the amount which the investor gets back at the end

---

6 Defined s.460(1) ITTOIA: “In this Chapter “share”, in the case of a share in a company, means any share under which an entitlement to receive distributions may arise, but does not include a share in a building society.”

7 See 62.2.3 (“Capital redemption policy”).

depends on the performance of a share index, or a particular share or shares, or (less commonly) some other asset. The capital initially subscribed by the investor may be completely or partly protected, or it may be possible for the investors to lose the whole of their money.

Some such products, properly analysed, are options, for which the investor pays a premium (these are often described as ‘warrants’). Others may be contracts for differences, or other derivatives. These will not be deeply discounted securities; disposal of an option, or of a financial future within Section 143 TCGA 1992, will give rise to a capital gain or allowable loss. See also SAIM7000 on the tax treatment of derivatives that generate an interest-like return.

Other securitised derivatives, however, create a debt (in technical terms, they are structured as a debt security plus one or more options or other derivatives). These will be deeply discounted securities, unless they fulfil the stringent conditions to be ‘excluded indexed securities’ (SAIM3050). You should seek advice from CT & VAT (Financial Products and Services Team) if it is unclear whether or not a particular instrument is a deeply discounted security.

It is, I think, implied that a DDS must be a debt security as opposed to a non-debt security. There are some deep conceptual issues here.

## **28.7 Excluded indexed security**

Section 432(2) ITTOIA provides:

An excluded indexed security (see section 433) is only a deeply discounted security if treated as such under section 431(5) (acquisition by a person connected with the issuer or holder becoming such a person).

For the s.431(5) exception, see 28.5.3 (Connected third party).

### *28.7.1 “Excluded indexed security”*

Section 433(1) ITTOIA provides:

In this Chapter [chapter 8 part 4 ITTOIA, DDS code] “excluded indexed security” means a security under the terms of which the amount payable on redemption<sup>8</sup> is determined by applying to the amount for which the

---

<sup>8</sup> Section 433(7) ITTOIA provides: For the purposes of this section ... (b) “redemption”, in relation to a security, does not include its redemption on an occasion

security was issued the percentage change (if any) over the security's redemption period in—

- (a) the value of chargeable assets of a particular description, or
- (b) an index of the value of such assets.

The SAI Manual provides:

**SAIM3050 excluded indexed securities** [Dec 2019]

**... The percentage change**

The percentage change is the full percentage change in the value of the chargeable assets, or of any index of the value of such assets, over the redemption period. The percentage change is to be applied to the full issue price - that is without issue costs having been deducted.

28.7.2 *Capital protection*

Section 433(2) ITTOIA provides for a security which pays at least a minimum amount, but only a small one:

The fact that the terms under which the security is issued include a provision to the effect that the amount payable on its redemption must be at least a specified percentage of the amount for which it was issued only prevents it from falling within the definition in subsection (1) if that percentage exceeds 10%.

The SAI Manual provides:

**SAIM3050 excluded indexed securities** [Dec 2019]

**... Capital protection**

The terms of the security may provide for the investor to get back a percentage of his or her original stake money, even if the value of the relevant chargeable assets plummets. This will not prevent it being an excluded indexed security provided the specified percentage is not more than 10% of the issue price. It should be noted this does not mean investors can invest £100 and get a minimum of £110 back; it means they can invest £100 and get not more than £10 back, losing the other £90 of their original capital. Unless they can lose at least 90% of the amount invested it is not an excluded indexed security, and will be a deeply discounted security.

Some products provide that the investor's principal will be fully at risk

---

which is to be ignored under section 431(1) (excluded occasions of redemption).

if an index such as the FTSE 100 falls below a specified threshold. Provided that there is a realistic prospect of such an event occurring, such products will be regarded as having capital protection of 10% or less in determining whether or not they are excluded indexed securities. Some products are structured so that the security issued to the investor is linked to the value of shares in a special purpose vehicle, warrants or other instruments. HMRC's view is that the effect of any instruments linked to the security must be taken into account in determining whether or not the terms under which that security is issued includes a provision that provides capital protection.

The SAI Manual provides:

**SAIM3055 excluded indexed securities: chargeable assets** [Dec 2019]

... **Amount payable on redemption**

The investor must have an entitlement to the issue price increased by the relevant change in the value of the chargeable assets (or index). Where the redemption value is to be satisfied by receipt of the linked chargeable assets themselves, with the result that the investor obtains more than the percentage change, the conditions would not be met. Nor is the condition satisfied if the return to the investor is geared, for example, if on redemption the investor receives twice the increase in the index (or some other multiple).

**Total return index**

The value of a 'total return' equity index reflects not only the price of the shares comprised in the relevant index, but also a measure of income in the computation of the level of that index. The value of the index may, for example, reflect an amount in respect of rolled-up dividends. Provided the index is a standard, commercially used index of the total return from shares, HMRC consider that it will be an index of the value of chargeable assets for the purposes of ITTOIA05/S433.

The SAI Manual provides:

**SAIM3055 excluded indexed securities: chargeable assets** [Dec 2019]

Where a security is linked to an index of chargeable assets, changes in the components of the index can be ignored so long as the index continues to reflect the population it was set up to mirror.

Cases where the condition may not be satisfied, for example, where [1] a new index is used, or

[2] the linkage is to shares in only one company, which then changes, should be referred to BAI (Financial Products and Services Team).

### 28.7.3 *Interest payable on redemption*

Section 433(3) ITTOIA provides:

Interest payable on redemption is ignored in determining for the purposes of this section the amount payable on redemption.

### 28.7.4 *“Redemption period”*

Section 433(4) ITTOIA provides:

In subsection (1) “redemption period” means—

- (a) the period beginning with the date of issue and ending with the date of redemption, or
- (b) a period which is or includes almost all that period and only differs from it for purposes connected with giving effect to a valuation in relation to rights or liabilities under the security.

The SAI Manual provides:

**SAIM3050 excluded indexed securities** [Dec 2019]

#### **...The redemption period**

This is the period between the date of issue and the date of redemption. The rules allow slightly different dates to be used where there are difficulties in obtaining valuations on the issue or redemption dates, and for no other reason.

### 28.7.5 *“Chargeable asset”*

Section 433 ITTOIA provides:

(5) An asset is a chargeable asset for the purposes of subsection (1) if a gain accruing to a person on its disposal would be a chargeable gain for the purposes of TCGA 1992 on the assumptions specified in subsection (6).

(6) The assumptions are that—

- (a) the asset is an asset of the person,
- (b) the person is not entitled to the exemption conferred by section 100 of TCGA 1992 (exemption for authorised unit trusts etc),
- (c) disposal of the asset by the person would not be treated for income tax purposes as a disposal in the course of a trade, profession or vocation, and

- (d) section 116(10) of TCGA 1992 is ignored (chargeable gains on subsequent disposals of qualifying corporate bonds acquired in reorganisations, conversions and reconstructions).

### 28.7.6 *Exclusion of RPI indexation*

Section 433(7) ITTOIA provides:

For the purposes of this section—

- (a) neither the retail prices index nor any similar general index of prices published by the government of a territory or by an agent of such a government is an index of the value of chargeable assets

## 28.8 “Disposal”

Section 437(1) ITTOIA provides:

References in this Chapter [chapter 8 part 4 ITTOIA, DDS code] to the disposal of a deeply discounted security are—

- (a) to its redemption,
- (b) to its transfer by sale, exchange, gift or otherwise, including a transfer treated as made by subsection (3) [death of holder], and
- (c) so far as not covered by para (a) or (b), to its conversion under its terms into shares in a company or other securities (including other deeply discounted securities).

### 28.8.1 *“Person making a disposal”*

Section 437(2) ITTOIA provides:

The person treated as making a disposal is—

- (a) in the case of a disposal within subsection (1)(a), the person entitled as the security’s holder to any payment on the disposal,
- (b) in the case of a disposal within subsection (1)(b), the transferor, and
- (c) in the case of a disposal within subsection (1)(c), the person who would be entitled as the security’s holder to any payment on the disposal, if such a payment were made.

### 28.8.2 *Death of holder*

Section 437(3) ITTOIA provides:

A person who dies while entitled to a deeply discounted security is

treated as transferring it immediately before death to the personal representatives.

### 28.8.3 *Date of disposal/acquisition*

Section 438 ITTOIA provides:

- (1) This section applies if—
  - (a) a transfer or acquisition of a deeply discounted security is made under an agreement, and
  - (b) the transferee or the person making the acquisition becomes entitled to the security at the time the agreement is made.
- (2) The transfer or acquisition is treated as occurring at that time.
- (3) For this purpose a conditional agreement is taken to be made when the condition is met.

This is a Plain English rewrite of the CGT rules.<sup>9</sup>

## 28.9 “Profit”

Section 439 ITTOIA provides:

- (1) A person’s profit on a disposal is the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.
- (2) No account is to be taken of any incidental expenses incurred in connection with the disposal or acquisition.

I refer to this as “**DDS income**”.

### 28.9.1 *Market value disposal*

Section 440 ITTOIA provides:

- (1) On the disposal of a deeply discounted security by a transfer of a kind specified in subsection (2), for the purposes of this Chapter [chapter 8 part 4 ITTOIA, DDS code] an amount equal to the market value<sup>10</sup> at the time of the disposal is treated as payable.
- (2) The transfers are—
  - (a) a transfer made otherwise than by a bargain at arm’s length,
  - (b) a transfer between connected persons,

---

<sup>9</sup> See 53.8 (Date of disposal/acquisition).

<sup>10</sup> CGT valuation rules are incorporated by reference: s.460(3) ITTOIA.

- (c) a transfer for a consideration which is not wholly in money or money's worth,
- (d) a transfer treated as made by section 437(3) (death), and
- (e) a transfer by personal representatives to a legatee.<sup>11</sup>

I refer to the profit on a disposal within this section as “**deemed DDS income**”.

### 28.9.2 *Market value acquisition*

Section 441 ITTOIA provides:

- (1) A person who acquires a deeply discounted security on a disposal of a kind specified in subsection (2) is treated for the purposes of this Chapter as acquiring it by the payment of an amount equal to its market value at the time of the disposal.
- (2) The disposals are—
  - (a) a transfer within section 440(2)...<sup>12</sup>

What is the position if a security is issued for no consideration or at an undervalue? One would expect a market value acquisition cost, for the purpose of computing the holder's profit on a disposal; though it needs a purposive construction to reach a sensible conclusion.

## 28.10 Charge to tax on DDS income

Sections 427 and 428 ITTOIA impose the charge:

### **427 Charge to tax on profits from deeply discounted securities**

- (1) Income tax is charged on profits on the disposal of deeply discounted securities.
- (2) The profits are treated as income for income tax purposes if they would not otherwise be income.

### **428 Income charged**

- (1) Tax is charged under this Chapter [chapter 8 part 4 ITTOIA, DDS code] on the full amount of profits arising in the tax year.
- (2) The profits on a disposal are to be taken to arise when the disposal occurs.

---

11 The definition of legatee in s.440(6)(7) is a Plain English rewrite of the CGT definition; see 92.5.2 (“Legatee”).

12 See 45.9.1 (Market value disposal). Section 441 also deals with conversions but conversions are not discussed here.

**429 Person liable**

(1) The person liable for any tax charged under this Chapter is the person making the disposal.

**28.11 DDS remittance basis**

Section 428(3) ITTOIA provides:

If the profits arise on a disposal of securities that are outside the UK—

- (a) they are treated for the purposes of section 830 (meaning of “relevant foreign income”) as arising from a source outside the UK,<sup>13</sup> and
- (b) subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis for a DDS that is outside the UK.

The section uses the words “treated as” because it may be said that DDS income does not have a source, at least in the normal UK tax sense.<sup>14</sup>

How does one decide whether a security is “outside the UK”? The wording is from the former schedule D case III.<sup>15</sup>

In the HMRC view the test is the residence of the issuer. The former Inspectors Manual para 1541 provided:

Where the security was issued by a UK resident any profit is assessable under Case III of Schedule D. Where the security was issued by a non-UK resident, any profit is assessable under Case IV of Schedule D.

This is not obviously right, but it is as good a test as any other and (in relation to a non-resident issuer) at least we should know where we stand.<sup>16</sup> This passage is omitted in the SAIM but there is no indication that HMRC practice has changed.

This approach is consistent with the rule that interest from a security with a non-resident issuer is (at least generally) regarded as non-UK source income.<sup>17</sup> This will usually come to the same thing and I doubt if the

13 For this wording, see 15.6 (No source/deemed source).

14 See 15.6 (Income without a source).

15 See 25.9 (The situs approach).

16 The position should not change if the issuer changes residence is less clear, by analogy with the *Bank of Greece* case: see 25.9.3 (*Bank of Greece*).

17 See 25.14 (Source of interest: conclusion). Because the rules concerning the location of the source of interest are so unclear, it is impossible to say in what (if any)

point will ever need to be decided.<sup>18</sup>

For completeness: another possible approach is that “outside the UK” means situated outside the UK applying common law situs rules. This view is less attractive since (1) common law situs do not always produce a sensible result; (2) common law situs is not generally relevant for IT; (3) one would have expected the drafter to use the word “situate” if it was intended to incorporate a situs rule.

Strictly, one cannot segregate income from capital (for no identifiable part of the proceeds represents the income). But since HMRC do not apply that rule for the accrued income scheme,<sup>19</sup> they should logically not take the point in this context either. There is however no discussion in the RDR Manual.

Deemed DDS income (eg on a gift) cannot be remitted and so is tax free.<sup>20</sup>

## 28.12 UK resident trust

### 28.12.1 *UK trust not settlor-interested*

A UK resident trust is in principle subject to income tax on its DDS income. Tax is charged at the trust rate.<sup>21</sup>

### 28.12.2 *UK settlor-interested trust*

DDS income accruing to UK trustees is not “income” in the general sense and in the absence of express provision it would not fall within s.624

circumstances the source of the income might be different from the residence of the issuer.

This would be consistent with the AIP scheme, where the test is whether income from the security has a foreign source: see 27.9 (AIP remittance basis). However, the two cases are not the same, because a DDS may not yield any income, so the question whether income from the DDS has a foreign source could be a hypothetical question.

18 If it mattered, the view that income source was the test should be rejected, for if the drafter intended to apply an income-source test, one would have expected the wording to match that used elsewhere for income-source tests. The wording is not very far from the former case IV in s.18 ICTA 1988 (“income arising from securities out of the UK”) but there the words “out of the UK” govern “arising” and not “securities”.

19 See 27.9 (AIP remittance basis).

20 The CGT rule does not apply here; see 17.33 (Gain on disposal at undervalue).

21 See 38.2.3 (Trust-rate income).

ITTOIA which only applies to income. However s.427(2) ITTOIA directs that the profits are “treated as income for income tax purposes” so it does fall within s.624 ITTOIA. For good measure, s.457 ITTOIA provides:

- (1) This section applies if profits are taken to arise on a disposal of a deeply discounted security by trustees.
- (2) For the purposes of Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), the profits are to be taken to be income arising under the settlement from the security. ...

Thus DDS income does fall within the settlor-interested trust code.

If the settlor is a remittance basis taxpayer the s.624 remittance basis is available, ie the settlor is not taxed on unremitted foreign DDS income.<sup>22</sup>

The rate of tax in the absence of s.624 is the trust rate, ie the top rate, so s.624 can only reduce the tax rate (or make no difference).

### **28.13 Non-resident individual**

Section 368 ITTOIA provides the necessary exemption for non-residents.<sup>23</sup> In short non-resident individuals are not chargeable if the security is out of the UK. They are theoretically chargeable if the security is in the UK but non-resident IT relief is usually available.<sup>24</sup>

### **28.14 Non-resident trust**

In the absence of express provision, non-resident trustees would not be charged on foreign DDS income but could be charged on UK DDS income. However s.458(1) ITTOIA provides:

Tax is not charged under this Chapter [chapter 8 part 4 ITTOIA, DDS code] if the disposal is made by the trustees of a settlement<sup>25</sup> and they are non-UK resident.

So non-resident trusts are not subject to tax on DDS, whether UK or foreign.

---

22 See 44.8 (s.624 remittance basis).

23 See 15.2 (Source: IT territorial limit).

24 See 42.1 (Non-residents IT relief: Introduction).

25 “Settlement” here means settlement-arrangement: see s.458(3) which provides:

“In this section ‘settlement’ has the same meaning as in Chapter 5 of Part 5 (see section 620).”

It is considered that s.624 applies to non-resident settlor-interested trusts as it applies to UK resident trusts. Section 458 does not provide relief since the charge on settlor-interested trusts is not a charge “under this chapter”.

### **28.15 Transfer of assets abroad**

A DDS profit accruing to a non-resident is not “income” so in the absence of express provision it would not fall within the ToA provisions even if it accrued to a person abroad within s.720 or 731. However s.427(2) ITTOIA directs that the profits are “treated as income for income tax purposes” so it does fall within the ToA provisions. For good measure, s.459 ITTOIA provides:

- (1) This section applies if profits are taken to arise on the disposal of a deeply discounted security by a person resident or domiciled outside the UK (“A”).
- (2) For the purpose of determining whether a UK resident individual is liable for income tax in respect of the profits, Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) has effect as if the profits, when arising, constituted income becoming payable to A.
- (3) For this purpose it does not matter if A is not liable to income tax under this Chapter [chapter 8 part 4 ITTOIA, DDS code] because of section 458 (non-UK resident trustees).

Thus DDS profits do fall within the scope of the ToA provisions.

#### **28.15.1 s.731 ITA**

The charge is on the actual profit, not a fictional profit. The proceeds of the disposal represent that profit.

How does the rule that distributed income is not relevant income<sup>26</sup> operate in this context? Is it necessary merely to distribute an amount equal to the DDS profit or is it necessary to distribute the entire proceeds of the transfer (sale) of the security? The matter is analogous to the CGT issue which arose when a UK resident foreign domiciled beneficiary sold a non-UK situate asset and realised a chargeable gain. Prior to the 2008 mixed fund rule, if the individual remitted (say) one-half of the proceeds

---

<sup>26</sup> See 47.28 (Income distributed as income in year it arises) to 47.32 (Distributed income: HMRC view).

of sale, they were regarded as remitting one-half of the gain.

Inspectors Manual para 1567 explained:

This is because, whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The same reasoning would apply here. Thus the only way to avoid relevant income by distribution would be to distribute the entire proceeds of an arm's length disposal. It is conceivable that HMRC will not apply the law on this point strictly, but do not rely on this without clearance.

If there are only fictional profits, because the market value rule applies<sup>27</sup> then s.731 does not apply because fictional income cannot be used to benefit a beneficiary, so it cannot be relevant income.

## **28.16 Non-resident company**

Section 368 ITTOIA provides the necessary exemption for non-residents.<sup>28</sup> In short, they are not chargeable if the security is outside the UK. They are theoretically chargeable if the security is in the UK, but see 42.1 (Non-resident IT relief). The company DDS income is within the scope of the ToA provisions.

## **28.17 Interaction with CGT**

### **28.17.1 DDS is a QCB**

Section 117(1) TCGA provides the usual definition of corporate bond. Section 117(2AA) provides:

For the purposes of this section “corporate bond” also includes any asset

- [i] which is not included in the definition in subsection (1) above and
- [ii] which is a deeply discounted security for the purposes of Chapter 8 of Part 4 of ITTOIA 2005 (see section 430).

Thus a DDS is a corporate bond.

Section 117(7) TCGA defines “qualifying” corporate bond as (in short)

---

<sup>27</sup> See 28.9 (“Profit”).

<sup>28</sup> See 15.2 (Source: IT territorial limit).

any corporate bond issued after 13 March 1984.

Thus (in short) a DDS is in principle a qualifying corporate bond (“QCB”).

### 28.17.2 *Significance of QCB status*

Section 115(1) TCGA provides exemption for QCBs:

A gain which accrues on the disposal by any person of—

- (a) gilt-edged securities or qualifying corporate bonds, or
- (b) any option or contract to acquire or dispose of gilt-edged securities or qualifying corporate bonds,

shall not be a chargeable gain.

The DDS profit is subject to income tax, and so would not be subject to CGT in any event. One consequence of QCB status is that a loss on a DDS is not an allowable loss for CGT purposes. QCB status is also relevant for conversions/reorganisation relief (not discussed here).

### **28.18 DDS/CGT compared**

Although the DDS code occasionally adopts CGT-type rules, there are many differences, in particular:

- (1) Expenses of acquisition/disposal are disallowed.
- (2) Death, and transfer from PR to legatee, are occasions of charge.
- (3) There is no group relief so an inter-group transfer may give rise to a charge.

## CHAPTER TWENTY NINE

# DIVIDEND INCOME

29.1 shareholder  
29.8.13 Co in 3rd State: Dual resident

### *Cross references*

The following topics are considered elsewhere:

- 9.3.1 (Split year: Pt 4/5 ITTOIA Income)
- 10.12 (TNR dividends regime)
- 14.6 (When are dividends recognised)
- 40.5.7; 40.10 (Dividend rates)
- 52.1 (Transactions in securities)

## 29.1 Dividends and distributions

A full discussion of the taxation of dividends and distributions needs a book to itself. This chapter focuses on matters closest to the themes of this book.

The taxation of dividends/distributions is scattered across 3 Chapters of ITTOIA:

<b>My term</b>	<b>Type of income</b>	<b>Company</b>	<b>ITTOIA</b>
<i>UK dividend regime</i>	Dividend/distribution	UK resident	Chap 3 Pt 4
<i>Offshore dividend regime</i>	(a) Dividend	Non-resident	Chap 4 Pt 4
	(b) Income-distribution	Non-resident	Chap 8 Pt 5

I do not discuss the corporation tax treatment of dividends/distributions received by UK resident companies.

Unfortunately there are (at least) *five* definitions of dividend/distribution! Each set of provisions discussed here has a distinct definition, with CT (not discussed here) different again. The definition of distribution for company law purposes is different from the tax definitions. I have considered devising distinct terminology, but it is clearest to follow the statutory terminology – as long as one bears in mind that dividend/

distribution have distinct meanings in each context. Where appropriate I abbreviate dividend/distribution to dividends, leaving distribution to be understood.

### 29.1.1 *Dividend taxation: Critique*

In *Shirley v HMRC*:<sup>1</sup>

it is not possible to ascertain a consistent and logical basis in the legislation for the taxation of dividends. Whilst there might have been some sort of logical underpinning to the basis of taxation of dividends in the early 1970s, when the partial imputation system was introduced (with ACT and tax credits)—any such logic had long disappeared as a result of the many amendments to dividend taxation in the period leading to the enactment of ITTOIA. Parliament has chosen to legislate for a system of great complexity, involving different tax rates, tax credits, deemed payments of tax, grossing up and various other matters. There are no logically consistent principles (as it were) underpinning the taxation of dividends, against which the result of a literal interpretation can be compared—in order to reach a judgment that a literal interpretation results in an anomaly or absurdity.

There has subsequently been another round of reform, introduced in breach of the Tax Consultation Framework,<sup>2</sup> but I think this gloomy assessment remains valid. If one can ignore the dividend nil rate - the law is conceptually simpler than it was pre-2016, though the administrative work is greater than before as basic rate taxpayers now have tax to pay.

## 29.2 UK dividend regime

### 29.2.1 *The charge to IT*

Section 383(1) ITTOIA imposes the charge:

Income tax is charged on dividends and other distributions of a UK resident company.

It does not matter whether the receipt is a dividend or “other distribution”; hence I refer to “dividends/distributions”.

---

1 *Shirley v HMRC* [2014] UKFTT 1023 (TC) at [108].

2 See 1.12.2 (Compliance with Framework).

Section 384(1) ITTOIA provides:

Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year. ...

There is no reference to the remittance basis rules in Part 8 ITTOIA, so dividends/distributions from UK resident companies are taxed on the arising basis (even for remittance basis taxpayers). This is because dividends/distributions from UK resident companies are regarded as UK source income.<sup>3</sup>

For rates of tax, see 40.10 (Application of dividend rates).

### 29.2.2 *Dividend of capital nature*

Section 383 ITTOIA extends the charge to distributions of a capital nature, for instance, bonus issues of shares or securities:

- (2) For income tax purposes such dividends and other distributions are to be treated as income.
- (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

## 29.3 “Distribution”

Section 989 ITA applies the wide and elaborate CT definition of “distribution” (with minor tinkering):

The following definitions apply for the purposes of the Income Tax Acts—  
“distribution” has the meaning given by Chapters 2 to 5 of Part 23 of CTA 2010, disregarding section 1027A of that Act.

A full discussion of this definition would need a long chapter. I do not attempt that here.<sup>4</sup>

## 29.4 Non-resident recipient

Section 399 ITTOIA provides:

- (1) This section applies if—
  - (a) a person’s income for a tax year includes a distribution of a

---

3 For the source of dividend income, see 29.5.1 (Dividend: IT charge).

4 But for one aspect of the definition, see 29.6.6 (Dividend from share premium).

- company, and
- (b) the person is non-UK resident.
- (2) The person is treated as having paid income tax at the dividend ordinary rate on the amount or value of the distribution.
- (6) The income tax treated as paid under subsection (2) is not repayable.

Does this apply if a distribution is received by a person abroad, within the scope of s.720 ITA?

Does it apply to foreign source distributions? Presumably not.

The non-resident recipient should be entitled to credit relief, ie to set the UK IT which is treated as paid against foreign tax in the person's country of residence. But that is a matter for the foreign tax law to determine.

## 29.5 Offshore dividend regime

### 29.5.1 *Dividend: IT charge*

Section 402(1) ITTOIA imposes a charge to tax on dividends from non-resident companies:

Income tax is charged on dividends of a non-UK resident company.

Section 403 ITTOIA provides:

- (1) Tax is charged under this Chapter on the amount of the dividends arising in the tax year.
- (2) Subsection (1) is subject to
  - [a] section 406(2) and (3) (later charge where cash dividends retained in SIPs are paid over),
  - [b] section 407(3) (dividend payment when dividend shares cease to be subject to SIP), and,
  - [c] Part 8 (foreign income: special rules).

Section 403(2)[c] ITTOIA incorporates the remittance basis for foreign source dividends.

### 29.5.2 *Location of source of dividend*

When do dividends have a foreign source? There are many possible connecting factors, but the House of Lords decided in *Bradbury v English*

*Sewing Cotton*<sup>5</sup> that the source of income from shares is situated in the place where the company is resident – not where it is incorporated or where the share register is kept. (This illustrates how IT source rules may differ from IHT/private international law situs rules.)

Thus the application of a DTA (which affects company residence) may also affect the location of a source. EN ITTOIA Vol II discusses the point in relation to OEICs:

50. The definition of an open-ended investment company ... carries a limitation that the company should be incorporated in the UK<sup>6</sup> ... All open-ended investment companies within the definition ... are therefore subject to the company residence rule [the incorporation rule]. Open-ended investment company interest distributions treated as made by a UK resident company will be UK source income. [The company DTA residence rule] could in theory also apply to make such companies non-resident (as explained in connection with industrial and provident societies).<sup>7</sup> In that case interest distributions made will be treated as dividends from non-resident companies.

### 29.5.3 *Definition of “dividend”*

Section 402(4) ITTOIA provides:

In this Chapter “dividends” does not include dividends of a capital nature.

One might refer to s.402 as a charge on “income-dividends” but I think it is sufficient to refer to dividend and leave the income requirement to be understood.

Apart from that, “dividend” is (sensibly) undefined so it has its ordinary meaning, whatever that is. There is no definition in tax or company legislation.

EN ITTOIA provides:

187. The term “dividend” is not defined in this Act. “Dividend” is a widely used and understood term and is defined only in very specific circumstances not applicable in this context... It is not thought

---

<sup>5</sup> 8 TC 481.

<sup>6</sup> See App.2.8 (Open-ended investment co).

<sup>7</sup> See 25.16 (Co-operative & community benefit society income).

appropriate to attempt to define “dividend” here. It will usually be a matter of referring to the relevant company law to determine whether or not a payment made by a company is a dividend.

CT Manual provides:

**CTM15205: dividends, distributions and company law** [Sep 2020]  
Some foreign jurisdictions may provide for a definition, and that definition may be relevant if a particular payment is made by a company in that jurisdiction. *HMRC v First Nationwide*<sup>8</sup> concerned dividends paid by a Cayman Islands registered company. The Court of Appeal rejected the idea of dividends as necessarily payments out of income (based on the historical system of retaining tax from payments out of income, which had applied to dividends) and decided, in the context of a payment directly out of share premium (permissible under Cayman Islands law) that it is the form or mechanism of the payment and not its origin which determines whether a payment is a dividend.

#### 29.5.4 *Income-distribution: IT charge*

Section 402 only applies to dividends. It is possible to have a receipt from a non-resident company which

- (1) is not a dividend and
- (2) is of an income nature (not a capital receipt)

This is charged under s.687 ITTOIA (Misc Sweep-up Income).<sup>9</sup> I refer to that as an “**income-distribution**” as the receipt (though not a dividend) will be a distribution in the general sense of the word.

The remittance basis applies for foreign source income-distributions.<sup>10</sup> Income-distributions have a foreign source if the company is non-UK resident: the same test applies as for dividends.

Thus we have two distinct charging provisions for receipts from a non-resident company:

<b>Section</b>	<b>Charge</b>
402	Dividends
687	Income-distributions (my term)

<sup>8</sup> [2012] EWCA Civ 278; see 86.1.2 (Foreign law terminology).

<sup>9</sup> See 32.1 (Misc Sweep-up Income).

<sup>10</sup> See 32.14 (Sweep-up income: Remittance basis).

EN ITTOIA Vol. II explains why:

184. Income which, under the source legislation, is charged to tax under Schedule D Cases IV or V, has, where appropriate, been fully integrated with the equivalent income arising from a UK source. In the case of dividends from non-UK resident companies there is no exact equivalent in terms of UK source income. The closest equivalent is the charge to tax on dividends and other distributions from UK resident companies (section 20 of ICTA, Schedule F in the source legislation). But there is no precise overlap. The UK charge, by the adoption of the definition of “distribution” from Part 6 of ICTA ... can include dividends or distributions of a capital nature and can also operate to convert payments that would otherwise be treated as interest into distributions. Any charge on distributions from non-UK resident companies must be confined to income only. For this reason ... it is not thought appropriate to integrate the charges. So a separate charge is needed to cover dividends from non-UK resident companies. ...

186. ... It is possible that a non-UK resident company may make a distribution of income which would not fall within Chapter 4 of Part 4 of this Act because it is not a “dividend”. But if the distribution comprises income it will fall to be dealt with either under alternative specific charges (eg interest) or within “income not otherwise charged”, the charge on which appears in Chapter 8 of Part 5 of this Act.

In practice it does not usually matter whether a receipt from a non-resident company is classified as a dividend (chargeable under s.402) or as an income-distribution (chargeable under s.687). In either case the receipt is taxable if it is income and not capital in nature.

## **29.6 Non-resident company: Income/capital**

### *29.6.1 Why income/capital matters*

“*Income tax is a tax on income.*” This witticism is less true now than when it was formulated in 1900;<sup>11</sup> but the principle still applies for receipts from non-resident companies:

- (1) The charge on dividends excludes dividends of a capital nature.
- (2) The charge on income-distributions applies only to “income”; this

---

<sup>11</sup> See 15.6 (No source/deemed source); 32.3 (General principles).

comes to the same thing: it excludes receipts of a capital nature.

### 29.6.2 *Trust law principles applied*

The income/capital issue also arises in a trust law context: if trustees hold shares on trust for A for life, and receive a distribution from the company, the distribution is payable to A if it is income, and not if it is capital.

Except where there are specific statutory rules, or specific terms in a trust (which is not usual), the income/capital distinction is one of the general law. That is, UK tax law adopts the UK trust law rule. Hence many of the cases are trust cases, not tax cases, and discussion in trust law textbooks is relevant here.

There is large body of case law, discussed in the Law Commission Consultation Paper, “Capital and Income in Trusts”,<sup>12</sup> which deserves to be read in full, but is too long to set out here.

After 1965, the income/capital distinction ceased to matter for the taxation of distributions from UK resident companies, because distributions of a capital nature fell within the charge.<sup>13</sup> (The distinction still matters for trust law). However pre-1965 tax cases relating to UK resident companies remain relevant to the classification of distributions from non-resident companies.

### 29.6.3 *The company law approach*

In UK company law, and in jurisdictions which follow UK law, shareholder has the right to participate in:

- (1) distributable profits while the company is a going concern;
- (2) the distribution of company assets in a liquidation, and
- (3) a distribution to shareholders on an actual or notional reduction of capital.

---

12 <https://www.lawcom.gov.uk/project/capital-and-income-in-trusts-classification-and-apportionment/> (2004) part II. The subsequent report (Law Com 315, 2009) contains a shorter discussion. The report led to the Trusts (Capital and Income) Act 2013 but this Act does not affect the issues discussed here.

Scots trust law is discussed in Scot Law Com Discussion Paper No 124, *Apportionment of Trust Receipts and Outgoings* (2003) para 2.2-2.7  
[https://www.scotlawcom.gov.uk/files/4512/7816/0465/dp124\\_trust\\_receipts.pdf](https://www.scotlawcom.gov.uk/files/4512/7816/0465/dp124_trust_receipts.pdf)

It seems clear that the same principles apply in both jurisdictions.

13 See 29.2.2 (Dividend of capital nature).

*Courtaulds Investments v Fleming* identified these categories and summarised the law as follows:<sup>14</sup>

Anything received under the first head is treated by English law as income of the recipients for both tax purposes and trust purposes (but subject as to the latter to any special provision of the trust) notwithstanding that the source of the distribution may be a profit not of the company's business but on capital account...<sup>15</sup>

Anything received under the second head is treated by English law as capital both for tax purposes and, subject as aforesaid, for trust purposes. So also is anything received under the third head.

I refer to this as the “**company law approach**” to the capital/income distinction.

#### 29.6.4 *No restriction on distributing capital*

What is the position if the applicable foreign company law is different, and a company *can* distribute in excess of its distributable profits? In Jersey, for instance, a distribution is (in short) permitted as long as the company remains solvent. The discussion of redeemable share capital below suggests that even the distribution out of share capital should be treated as income. But perhaps the issue will not often arise, as such companies are not likely to have a substantial share capital.

#### 29.6.5 *Dividend from co capital gain*

In *IRC v Reid's Trustees*:

Prima facie a dividend paid on shares is income.<sup>16</sup>

In that case:

- (1) The company realised capital gains on the sale of properties
- (2) The company distributed the capital gains by dividend.

The distribution was still of an income nature.

---

<sup>14</sup> 46 TC 111 at p.124.

<sup>15</sup> See 29.6.5 (Dividend from capital profit).

<sup>16</sup> 30 TC 431 at p.446. Similarly *Bouche v Sproule* (1885) 12 App Cas 385 at p.397: “what is paid by the company as dividend goes to the tenant for life”.

if a foreign company chooses to distribute its surplus profits as dividend, the nature and origin of those profits does not and cannot be made to affect the quality of the receipt for the purposes of income tax.<sup>17</sup>

There are exceptions or apparent exceptions to this rule, in particular:

- (1) A dividend to trustees is a capital receipt if the trustees act in breach of trust in procuring what would otherwise be an income distribution.<sup>18</sup>
- (2) A dividend in breach of company law is not income.<sup>19</sup>

### 29.6.6 Dividend from share premium

In *HMRC v First Nationwide*:<sup>20</sup>

11. In the UK, prior to 1948, share premium was freely distributable as 'profits'. It was not assimilated to paid-up share capital. It did not fall within the scope of rules designed to protect against reduction of capital...

12. By s.56 Companies Act 1948 [now s.610 Companies Act 2006] share premium was assimilated to a company's subscribed capital and protected as if it were the paid-up capital of the company. The contrasting effect on the categorisation of payments out of share premium, before and after 1948, was clearly identified ... in *Re Duff's Settlement*.<sup>21</sup> The importance of that decision, which concerned the question whether payments out of share premium account should be treated as income or capital, lies in the emphasis the courts placed upon the mechanism of payment in order to draw the distinction between capital and income. By virtue of [s.610], the repayment of share premium, in that case, was made by order of the court on a petition under that section. It followed, the courts agreed, that in contrast to the position before the 1948 Act... the payments out of share premium account were payments of capital and not income.

13. In giving the judgment of the court, Jenkins LJ described s.56 as the essential provision on which the distinction between share capital and

---

17 30 TC 431 at p.450. This is the first of the three categories identified in *Courtaulds Investments*. If further authority is needed, see *re Doughty* [1947] Ch 263.

18 *Hill v Permanent Trustee* [1933] NSWStRp 52.

19 See 14.9 (Income recognition: Breach of trust).

20 [2012] EWCA Civ 278. I omit some references in the original.

21 [1951] Ch 923.

divisible profit depends.

“... A company, ... can (as it has been laid down) make a distribution amongst its members (otherwise than in a winding-up) in one of two ways - but only in one of two ways: that is by a distribution of divisible profit, that is, by way of dividend; and by way of a return of capital pursuant to an order of the court upon a petition for reduction of capital in accordance with the Act.”

14. The court continued by reflecting upon the nature of share premium. It recognised that it was essentially capital profit and not income. But,

“if distributed in cash before [s.610] came into operation (it) would...have been income in the hands of the shareholders, notwithstanding its capital character when considered as a receipt of the company”.

The same applies for an Italian company, where the company law is similar to post-1948 UK law:

18. The principle that it is the machinery by which the assets are distributed which determines whether they are capital or income finds expression, yet again, in *Courtaulds Investments Ltd. v Fleming* 46 TC 111. Italian law identified the distribution from a share premium reserve as a distribution of capital. It brought share premium within the scope of the rules for protection of capital in a manner similar to [s.610 Companies Act 2006]. Share premium could not be distributed while the legal reserve fell below 20% of the company's capital. Italian law introduced a new tax on the payment of dividends. To avoid that tax, the Italian company transferred profits of the year, which would have been distributed as dividends, to the legal reserve and thereby freed the share premium for distribution to shareholders. Such a distribution was, under Italian law, a distribution of capital free from the new imposta cedolare. ... Buckley J rejected the Revenue's contention that once the share premium was freely distributable it was, as in the UK before 1948, income. Italian law regarded the distribution as capital, and grafted the share premium onto the paid-up capital of the company.

The position is different for a Cayman Island company whose law is similar to pre-1948 UK law:

19. Cayman Island Companies Law has followed the reverse route to that adopted under UK company law. Prior to 1989, the law protected share premium as if it were paid-up share capital, in the same way as it

was protected after s.56 of the Companies Act 1948 was introduced in the UK. But by amendment in 1989, share premium was distributable by dividend. ...

20. If, as is clear, prior to 1948 share premium was distributable by way of dividend as income in the UK, it seems equally plain that it was distributable as income in the Cayman Islands following the freedom from restriction in 1989.

...

25. The character of the payment in the hands of First Nationwide is a matter for UK law, the law of the Cayman Islands being relevant, not determinative... UK law recognises only two species of payment in respect of shares: capital or income payments. Further, the jurisprudence establishes that it is the form by which the payments are made which determines their character. It is true that, under Blueborder's Articles of Association, had the First and Second Preference Dividends not been paid, the share premium would have been returned as capital on a winding-up or on a redemption. It is also true that, since those dividends were paid, the value of the capital rights which remained, on a winding-up or otherwise, was drastically diminished to £1m. But those features tell one nothing other than, had the mechanism or machinery adopted for distribution of the share premium account been a return of capital on a winding-up or otherwise, the payments would have been capital. Since the payments were made adopting the mechanism of distribution by way of dividend, ... that mechanism dictates the conclusion that the payments were income and not capital.

HMRC comment in relation to s.1000(1)B CTA 2010, which provides:

(1) In the Corporation Tax Acts “distribution”, in relation to any company, means anything falling within any of the following paragraphs.

A Any dividend paid by the company, including a capital dividend.

B [1] Any other distribution out of assets of the company in respect of shares in the company,

[2] except however much (if any) of the distribution—

(a) represents repayment of capital on the shares...

This is not quite the same as the charge on income-distributions of non-resident companies, but something within s.1000(1)(B)[2] is not an income-distribution chargeable to IT under s.687. HMRC say:

**What is the capital on the shares?**

For companies incorporated in the UK under the Companies Act 2006 or its predecessors, this will usually comprise nominal share capital. In addition, where shares are issued at a premium Part 23 CTA 2010 (see section 1025), consistently with section 610(4) Companies Act 2006, makes it clear that share premium is treated as part of the share capital for this purpose. Amounts subscribed for share capital or paid as share premium will be treated as “capital on the shares”.

For companies that do not have share capital, for example, companies limited by guarantee, Part 23 CTA 2010 extends the definition of share to include stock or any other interest of a member of the company.

For foreign companies, it may be less clear what capital on the shares consists of. The facts may vary between cases, but HMRC would normally expect to treat as a distribution an amount that:

- is distributable in accordance with the relevant company law, and
- is not made on winding up or as part of a procedure under the relevant company law for reducing share capital.

This is subject to section 1027A CTA 2010 which for the purposes of determining whether an amount is a repayment of capital on the shares, treats a distribution out of a reserve arising from a reduction of share capital as if it were made out of profits available for distribution otherwise than by virtue of the reduction. This will depend on whether section 1027A(4) applies or not to the reduction of share capital.

With regard to application of section 1025 CTA 2010, which treats a repayment of share premium as forming part of the share capital where the premium account was created in respect of new consideration received on the issue of the share capital, HMRC will normally, depending on application of the foreign company law, not treat a payment of out of a share premium account as a repayment of share capital in circumstances where under the foreign company law share premium is fully distributable and is not treated as forming part of the share capital.

### 29.6.7 *Partial liquidation*

In *Rae v Lazard Investment Co*, a Maryland company hived off part of its business by a procedure, unknown to UK company law, called partial liquidation: shares in a new company to which the hived off business was sold were distributed to shareholders in the Maryland company. The House of Lords held that the receipt by the shareholders on the partial

liquidation was of a capital nature, not income:

In deciding whether a shareholder receives a distribution as capital or income, our law goes by the form in which the distribution is made rather than by the substance of the transaction. Capital in the hands of the company becomes income in the hands of the shareholders if distributed as a dividend, while accumulated income in the hands of the company becomes capital in the hands of the shareholders if distributed in a liquidation. In the present case, the form of the distribution was one unknown to our law - distribution in a partial liquidation. By the law of Maryland, which governs the company and which authorised this distribution, the shares distributed were capital in the hands of the shareholders. Why, then, should we regard them as income? It is said that, if this had been an English company and it had done what [the Maryland company] did, these shares would have been income in the hands of the shareholders. But an English company could not do what [the Maryland company] did, for it could not distribute in a partial liquidation.<sup>22</sup>

#### 29.6.8 *Consolidation of accounts*

HMRC say:

##### **Fiscal and Administrative consolidation (Organschaft)**

Some jurisdictions provide for individual entities to enter into arrangements enabling those entities to consolidate their results for tax or administrative purposes. Such arrangements often involve the transfer or payment of amounts between the parties to consolidate results. HMRC takes the view that payments or transfers made as part of such arrangements and under the terms of a contract can be distributions provided that the:

- arrangement is dependent on the existing shareholder relationship for its existence, and
- payments / transfers between the members of the consolidated unit are made in respect of shareholdings (such that transfers or payments are in proportion to shareholdings).<sup>23</sup>

#### 29.6.9 *Demerger*

---

<sup>22</sup> 41 TC 1 at p.26.

<sup>23</sup> <http://webarchive.nationalarchives.gov.uk/20140109143644/http://www.hmrc.gov.uk/specialist/guidance-payments-uk-companies.pdf> published December 2012.

Judges have said from time to time that dividends are *prima facie* income,<sup>24</sup> which suggests in some circumstances dividends will not be of an income nature. But cases where a dividend is not income are exceptional. One example is *Sinclair v Lee*,<sup>25</sup> where a dividend by ICI (by allotment of fully paid-up shares in the new company Zeneca) was part of a company reconstruction by way of de-merger, under which a single company was replaced by two head companies and the trading entity divided into two smaller trading entities.

### 29.6.10 *Stock option*

The HMRC view was set out in the former Inspectors Manual. The material was deleted from the current SAI Manual, which deals with the issue only cursorily at 5210. I set out the old Inspectors Manual passages, as they probably reflect HMRC current practice:

**1611. Distributions/foreign cos: Not in cash: Option cases**

Published: 9/95

Where a foreign company declares a cash dividend but offers its shareholders, on their own initiative, the option of taking up further shares in lieu of the cash dividend, a shareholder who exercises the option to take up the shares is not assessable under Case V of Schedule D in respect of that dividend. If, however, a shareholder does not exercise the option but takes the dividend in cash, he is assessable under Case V of Schedule D on the amount of the cash dividend.

### 29.6.11 *Issue of shares/debentures*

The former Inspectors Manual continued:

**1612. Distributions/foreign cos: Not in cash**

Published: 9/95

Where a foreign company capitalises undivided [ie undistributed] profits and —

- a) issues to its shareholders the additional capital so created, in the form of its own shares or debentures, in proportion to the number of shares already held by them or
- b) satisfies a dividend out of such profits by the issue of its own

---

24 e.g. *Reid's Trustees* Lord Normand at p.374,375; Lord Morton at p.380.

25 [1993] Ch 497.

stocks or shares (for example, a “stock dividend” by a United States company), such a distribution does not constitute income for Case V purposes in the hands of the shareholder. This principle applies when the distribution is actually made in shares, whether or not an effective option was given to the shareholder to receive cash in place of shares (*IRC v Blott*, 8 TC 101; *Whitmore v IRC* 10 TC 645; *IRC v Fisher’s Executors*, 10 TC 302; *IRC v Wright* 11 TC 181) ...

In cases where the distribution is not actually made in shares and the shareholder accepts cash from the company under an option given to him to receive cash in place of shares, the cash is assessable as income in accordance with IM1610.

#### **1614. Distributions/foreign cos: Certificates of indebtedness**

Published: 9/95

As regards liability in respect of dividends received in the form of certificates of indebtedness redeemable at a future date, see *Associated Insulation Products v Golder* 26 TC 231.

### 29.6.12 *Dividend reinvestment plan*

The former Inspectors Manual continued:

#### **1615. Dividend reinvestment plans**

Published: 9/95

Some foreign companies, particularly in North America and Australia, establish dividend reinvestment plans for their shareholders. Such plans can be structured in a number of different ways, some of which result in liability under Case V when a dividend is declared, and others which do not. At one extreme is the pure bonus issue, when a dividend is declared payable in shares with no option for the shareholder to take cash. Alternatively a company may arrange for cash dividends to be paid to a third party, typically a bank, which then applies the dividends in the purchase of additional company shares in the market on behalf of the shareholder. The first situation falls within the principle of *IRC v Blott* (8 TC 107) – see IM1612. The second gives rise to a Case V charge because the reinvestment in the company is regarded as a voluntary application of income which has already arisen to the shareholder.

Between these two extremes lies a variety of situations, each of which must be considered by reference to their own facts to determine whether a Case V charge arises...

### 29.6.13 *Co law approach: Critique*

The Law Commission note the objections to the company law approach to the capital/income distinction:

#### **Questionable relevance of company law principles**

2.40 The principles of company law are of doubtful relevance when it comes to determining whether receipts should be classified as income or capital for trust purposes. As Lord Russell noted in the *Hill* case, the fact that a shareholder holds shares for him- or herself or as a trustee is immaterial to the company. No notice of a trust of shares can be entered on the register of companies and so the destination of the distribution is determined by the actions of the company directors who do not know (and do not consider) whether a shareholder is a trustee. It is of no consequence to the company whether the corporate profits are treated as trust income or trust capital. It is therefore not readily apparent why the legal principles which have been developed to regulate companies should be applied without modification to trusts.

2.41 Specifically, the rule in *Bouch v Sproule* conflates the concepts of share capital and trust capital. There is no reason why only those profits which become share capital (following capitalisation) should be treated as trust capital. Share capital, which cannot be returned to shareholders except by way of an authorised reduction or during a winding up, exists to protect creditors and other people who deal with a limited company. Trust capital on the other hand represents the full extent of the trust property. Where trust property consists of shares the capital value of the fund will be the combined market value of all the shares which are held. The value of those shares is in turn influenced by the total worth of the underlying companies. The total value of a company is not limited to the nominal value of the issued share capital. A company will often accumulate profits which are capable of distribution to use as “working capital”. If these accumulated profits are distributed as a dividend the share price of the company is likely to fall significantly with the result that the capital value of the trust fund will be diminished. Under the rule in *Bouch v Sproule* the distribution will nevertheless be treated as income.

2.42 Sir Donald Nicholls VC commented in *Sinclair v Lee*:

It is unsatisfactory to treat all accumulated profits as earmarked as income to the extent that any distribution of such profits, regardless of the amount or the circumstances, will belong to the tenant for life if made outside a winding up. Such a distribution may represent a serious erosion of the trust capital.

2.43 Similarly no distinction is drawn in company law (except for the purposes of taxation) between the distribution of current trading profits and capital

profits. This is not surprising because both types of profit are available for distribution to shareholders by way of dividend. This distinction between trading profits and capital profits is, however, hugely relevant to trustees and beneficiaries. It seems appropriate to consider dividends of current trading profits to be income. This is not the case with capital profits; as these represent profits on the realisation of the company's capital assets they are more naturally considered capital.

2.44 The application of company law principles therefore fails to hold a fair balance between the life tenant and remainderman.

That is a critique of the capital/income rules as applied to trusts. The same points apply where the same rules are applied for tax. It is certainly true that the rules do not produce satisfactory answers, because capital-like distributions are categorised as income. One might say that we have a formal rule rather than a substantive one.<sup>26</sup> It is the usual trade-off between rules which are easy to apply and rules which better track the economic reality. There is no perfect solution here.

Also, in a tax context, the current rules produce a closer alignment between the taxation of UK distributions (where all capital distributions are taxed) and foreign distributions (where capital distributions are not taxed, but capital is understood very narrowly).

But however that may be, the law is settled.

## **29.7 Gift to non-shareholder**

### *29.7.1 UK company law background*

A gift from a company to a non-shareholder is not a dividend.

The question arises as to whether it might be a distribution for company law purposes. The question arises because of the UK company law rule that a distribution must be made out of distributable profits, and in the absence of distributable profits, there is an unlawful (invalid) distribution.<sup>27</sup> It is well established UK company law that:

---

26 See 15.5 (Formal/substantive source rules).

27 The rule that a sale at an undervalue is a company law distribution has been modified by s.845 CA 2006, to facilitate sales at book value. But that does not affect the rule that

- (1) a payment from a company to a non-shareholder
- (2) a sale for less than book value

- (1) Whether a transaction constitutes a distribution is not a matter of form (unlike the question of whether a payment is a dividend, for which certain formalities are required).
- (2) The label which the parties use (eg gift, sale or remuneration) is not decisive.
- (3) A transaction between a company and a non-shareholder may constitute a distribution, if the company and the non-shareholder have the same ultimate beneficial owner.<sup>28</sup>

The classic cases involve a sale at an undervalue from one company to another with the same ultimate beneficial owner. A fortiori, a gift to or for the benefit of a shareholder or ultimate beneficial owner in principle constitutes a distribution.<sup>29</sup> See *Clydebank Football Club Ltd v Steedman*:

“Distribution” is not further defined than by [s.829 CA 2006] but it would appear that generally a distribution will be a transfer without consideration given by the recipient. The object of the statutory code is to prohibit the (gratuitous) return to shareholders, other than by specified means, of subscribed capital or assets representing the same. However, ... a transfer involving the passing of some consideration may in certain circumstances give rise to a distribution. That is because a transfer, albeit some consideration is given, may involve in substance a gift of capital to the transferee.<sup>30</sup>

How does one reconcile this with s.829 CA 2006 which provides:

In this Part [Part 23 CA 2006] “distribution” means every description of distribution of a company’s assets *to its members*...

The word “to” might be read loosely, as “to or at the direction of” or “to or for the benefit of”. Alternatively as there are two sets of company law rules governing distributions, statutory rules and common law rules, a

---

may be classified as a distribution for UK company law purposes, and so unlawful, in the absence of distributable profits.

28 See *Aveling Barford v Perion* [1989] BCLC 626: “The fact that the distribution was to Perion rather than to Dr. Lee or his other entities which actually held the shares in Aveling Barford is in my judgment irrelevant.”

29 Further consideration is needed in the case of a charitable gift.

30 [2000] ScotCS 250 at [55] approved in *Progress Property v Moorgarth Group* [2010] UKSC 55.

distribution to a non-shareholder could be said to be a “distribution” for the purposes of the latter.

This does not mean that all gifts by companies are distributions. For instance, a gift by a company to a charity (not its shareholder) is not a distribution.<sup>31</sup> But where one draws the line does not seem to be at all clear.

### 29.7.2 *Relevance of company law to company gift*

What is the tax position when a non-resident company makes a gift to a non-shareholder? The question is whether the receipt is of an income nature, in my terminology, an income-distribution.

On analogy with the company law approach, one might have thought that company law principles apply to answer this question: if the gift is a distribution, for company law purposes, it is an income receipt. But this was not the approach adopted by the UT in *Kerrison v HMRC*. Capital/income is decided by reference to a broad review of the facts. This seems a better solution because the relevant company law seems somewhat obscure and vague. See 32.5 (Source/voluntary transaction).<sup>32</sup>

## 29.8 Winding-up TAAR

Section 404A(1) ITTOIA provides an exception to the general rule that a distribution in a winding up is a capital receipt:

For the purposes of this Chapter, a distribution made to an individual in respect of share capital in a winding up of a non-UK resident company is a dividend of the company if—

- (a) Conditions A to D are met, and
- (b) the distribution is not excluded (see subsection (7))<sup>33</sup>.

I refer to this rule as the “**winding-up TAAR**”, and the conditions are “**winding-up conditions A to D**”.

The equivalent for UK resident companies is s.396B ITTOIA. This is not discussed here, but the rules are very similar.

---

31 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 17.9 (Position of charity receiving company gift) online version <https://www.taxationofcharities.co.uk>

32 See too 29.9.10 (Benefits to non-shareholder).

33 See 29.8.5 (Excluded distribution).

The rule does not apply to a distribution made to a trustee or other non-individual, but in cases where the winding-up TAAR does not apply, the transactions in securities rules would need consideration.<sup>34</sup>

The deemed dividend is RFI and so may qualify for the remittance basis.

The winding-up TAAR was preceded by shallow HMRC consultation and response documents<sup>35</sup> but these shed little light on the provisions.

HMRC have published guidance in the CTM, but this has had a poor review from the profession<sup>36</sup> and is not set out in detail here.

### 29.8.1 *Condition A: 5% interest*

Section 404A(2) ITTOIA provides:

Condition A is that, immediately before the winding up, the individual has at least a 5% interest in the company.

Section 404A ITTOIA provides:

(9) For the purposes of this section, a person has at least a 5% interest in a company if—

- (a) at least 5% of the ordinary share capital of the company is held by the individual, and
- (b) at least 5% of the voting rights in the company are exercisable by the individual by virtue of that holding.

(10) For the purposes of subsection (9) if an individual holds any shares in a company jointly or in common with one or more other persons, he or she is to be treated as sole holder of so many of them as is proportionate to the value of his or her share (and as able to exercise voting rights by virtue of that holding).

---

HMRC, “Company distributions: summary of responses” (2016)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/510263/Company\\_distributions\\_-\\_summary\\_of\\_responses.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510263/Company_distributions_-_summary_of_responses.pdf)

36 “Almost universally panned”, “pretty atrocious”, and “disgracefully jejune”: see Miller, “HMRC’s guidance on the company winding up TAARs” *Tax Journal*, 4 Aug 2017. But it seems to me that those who expect HMRC guidance to clarify vague anti-avoidance legislation will always be disappointed.

A life tenant would not meet condition A.

### 29.8.2 *Condition B: Close company*

Section 404A(3) ITTOIA provides:

Condition B is that the company—

- (a) is a close company when it is wound up, or
- (b) was a close company at any time in the period of two years ending with the start of the winding up.

Section 404A(8) ITTOIA provides:

In this section—

“close company” includes<sup>37</sup> a company which would be a close company if it were a UK resident company;

### 29.8.3 *Condition C: Phoenixing*

Section 404A(4) ITTOIA provides:

Condition C is that, at any time within the period of two years beginning with the date on which the distribution is made—

- (a) the individual carries on a trade or activity which is the same as, or similar to, that carried on by the company or an effective 51% subsidiary of the company,<sup>38</sup>

“Similar” is a vague term.

- (b) the individual is a partner in a partnership which carries on such a trade or activity,
- (c) the individual, or a person connected with him or her, is a participator<sup>39</sup> in a company in which he or she has at least a 5% interest and which at that time—

---

<sup>37</sup> This is standard form wording; see 99.29.1 (Non-resident close company). In the context of s.404A, which only concerns non-resident companies, the standard form is slightly inapt. The word “includes” means “means”; that is, this is an exclusive definition, not an inclusive definition. But it does not matter and perhaps the objection is pedantic.

<sup>38</sup> Section 404A(8) ITTOIA incorporates the standard definition: “In this section ... “effective 51% subsidiary” has the meaning given by section 170(7) of TCGA 1992”.

<sup>39</sup> Section 404A(8) ITTOIA incorporates the standard definition: “In this section ... “participator” has the meaning given by section 454 of CTA 2010”; see 99.22 (Definitions of participator).

- (i) carries on such a trade or activity, or
- (ii) is connected with a company which carries on such a trade or activity, or
- (d) the individual is involved with the carrying on of such a trade or activity by a person connected with the individual.

“Involved with” is an un-lawyerlike expression. Is an individual involved if they provide a loan?

#### 29.8.4 Condition D: Motive defence

Section 404A(5) ITTOIA provides:

Condition D is that it is reasonable to assume, having regard to all the circumstances, that—

- (a) the main purpose or one of the main purposes of the winding up is the avoidance or reduction of a charge to income tax, or
- (b) the winding up forms part of arrangements<sup>40</sup> the main purpose or one of the main purposes of which is the avoidance or reduction of a charge to income tax.

The wording “reasonable to assume, having regard to all the circumstances” is a common form, but makes no difference.<sup>41</sup>

The requirement to test (a) the purpose of the winding up *and* (b) the purpose of the arrangements is non-standard wording; it is hard to imagine a scenario where one paragraph was satisfied but not the other.

There must be IT avoidance: avoidance of IHT or CGT would not count. The CTM makes some general comments:

**CTM36340: company winding up TAAR: condition D** [Sep 2018]  
Ultimately, the legislation is asking whether the recipient of the distribution is continuing what amounts to the same business having extracted the accumulated profits in a capital form. This is inevitably a question of judgment to be made on the basis of facts in individual cases. The following issues are likely to be relevant:

---

40 Section 404A(8) ITTOIA provides the standard (unnecessary) IT definition of “arrangements”; see App 2.2.3 (Definitions of “arrangement”).

41 See App.2.21 (Reasonable-to-assume).

Section 404A(6) ITTOIA provides: “The circumstances referred to in subsection (5) include in particular the fact that Condition C [Phoenixing] is met.” But that is an otiose clarification of an otiose phrase.

- Is there a tax advantage, and if so, is its size consistent with a decision to wind-up a company to obtain it?
- To what extent does the trade or activity carried on after the winding-up resemble the trade or activity carried on by the wound-up company?
- What is the involvement in that trade or activity by the individual who received the distribution? To what extent have their working practices changed?
- Are there any special circumstances? For example, is the individual merely supplying short-term consultancy to the new owners of the trade?
- How much influence did the person that received the tax advantage have over the arrangements? Is it a reasonable inference that arrangements were entered into to secure this advantage?
- Is there a pattern, for instance have previous companies with similar activities been wound-up?
- What other factors might be present to lead to a decision to wind-up? Are these commercial and independent of tax benefits?
- Are there any events apparently linked with the winding-up that might reasonably be taken into account? For example, was the only trade sold to a third party, leaving just the proceeds of the sale?

It is impossible to give an exhaustive list or comprehensive examples as individual facts and circumstances will be paramount. The aim is to establish whether it is reasonable to assume that the company was wound-up as a way of converting into a capital transaction what would otherwise have been paid out as income. The essential question is whether an individual may reasonably be regarded as carrying on or continuing to be involved in the carrying on of the same business as before, having extracted the profits in a capital form. ...

### 29.8.5 *Excluded distribution*

Section 404A(1) ITTOIA provides a distribution in a winding up is a dividend if:

... (b) the distribution is not excluded (see subsection (7)).

“Excluded” is a label for two distinct reliefs.

Section 404A(7) ITTOIA provides:

A distribution to an individual is excluded if or to the extent that—

- (a) the amount of the distribution does not exceed the amount that

would result in no gain accruing for the purposes of capital gains tax, or

Thus distributions will not be treated as income to the extent that they represent the CGT base cost.

Section 404A(7) ITTOIA provides:

A distribution to an individual is excluded if or to the extent that ...

(b) the distribution is a distribution of irredeemable shares.

Thus the TAAR should not apply to a demerger which takes the form of liquidation and distribution of irredeemable shares. It is suggested that distribution is used informally to include an issue of shares; though since demergers will generally have HMRC clearance for other reasons, the point is probably academic.

#### 29.8.6 Clearance

The CTM provides:

##### **CTM36350 Requests For Clearance** [Feb 2018]

ITTOIA05/S396B/404A provides no statutory clearance procedure. Although there is a non-statutory clearance procedure (see the ONSCG manual), the applicant would not be uncertain about purpose, (!) which is a subjective matter.<sup>42</sup> It follows that a clearance application would not be appropriate unless it is limited to the application of specific rules in the legislation where there is genuine uncertainty about their application to a specific proposed transaction.

See 52.14 (TiS clearance).

#### 29.8.7 Sale of company: GAARable?

HMRC say:

Some scheme promoters claim to have come up with schemes that avoid the Income Tax charge and get around the TAAR legislation.

They claim that by making an artificial modification of the arrangements aimed at defeating the intention of the legislation (by selling the company to a third party rather than winding it up, for example) the

---

<sup>42</sup> Author's footnote: Note that HMRC do not consider the words "reasonable to assume, having regard to all the circumstances" impose an objective test.

TAAR will not apply.

These schemes do not work because:

- in many cases, the actual outcome is that the individual is receiving distributions in a winding up - as the individual carries on trading using a different vehicle these schemes are within the scope and purpose of the TAAR legislation
- phoenixism arrangements that claim to involve payments to shareholders taxed as capital instead of income are caught by the TAAR, or other provisions

HMRC will investigate any attempts to avoid the Income Tax charge. If it's claimed that the phoenixism TAAR does not cover the arrangements, HMRC will consider whether the General Anti-abuse Rule (GAAR) applies to these schemes.<sup>43</sup>

This gives only a vague indication of what is the arrangement which HMRC regard as caught by the GAAR. But it suggests that a relatively straightforward sale of a company with undistributed profits may in principle be regarded as the same as a liquidation and so potentially within the TAAR. If that were right it would be pushing the boundaries of the GAAR far beyond what has hitherto been regarded as abusive.<sup>44</sup> The transactions envisaged seem far from the themes of this book, but the outcome could have far-reaching implications for every aspect of taxation: it illustrates how in tax, everything is connected.

There have been no material developments since publication of this statement, so perhaps that was not what HMRC had in mind, or at least, HMRC do not pursue the point.

## 29.9 DT relief: Dividend income

It is necessary to consider separately:

- (1) A person treaty-resident in a foreign State who receives UK source dividends.
- (2) A person treaty-resident in the UK who receives dividends from a

---

43 HMRC, Spotlight 47 (2019)

<https://www.gov.uk/guidance/attempts-to-avoid-an-income-tax-charge-when-a-company-is-wound-up-spotlight-47>

The following three paragraphs, not set out here, threaten various penalties.

44 See 2.4.2 (Why distinctions matter). For well-aimed criticism, see Miller, "Misplaced spotlight" Taxation Magazine, 21 Feb 2019, p.10.

company resident in the foreign State; the person may be entitled to tax relief in the foreign State, but that is not discussed here.

- (3) A person who is UK-law UK resident but treaty-resident in a foreign State, and who receives dividends from a company resident in a third country.

### 29.9.1 OECD Model art10

Article 10 OECD Model provides:

1. Dividends paid<sup>45</sup> by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
2. [1] However, dividends paid by a company which is a resident of a Contracting State may also be taxed in that State according to the laws of that State,
  - [2] but if the beneficial owner<sup>46</sup> of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
    - a) 5% of the gross amount of the dividends if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends;
    - b) 15% of the gross amount of the dividends in all other cases...

I use the following terms:

**Source State:** the State where the company is resident

**Residence State:** the State where the shareholder is resident

**Treaty cap:** the 5/15 % limit on tax contained in art 10(2)

Thus there are two types of shareholder:

Label (traditional)	Form	Treaty Cap	Capital Holding	See
Direct investor	Company	5%	at least 25%	art10(2)(a)
Portfolio investor	Any person	15%	if co, under 25%	art10(2)(b)

The traditional labels, “direct/portfolio investors”, are opaque; but it is best to follow the established usage. Where used in connection with actual treaties (as opposed to the OECD Model) the details vary according to the wording of the treaty concerned.

45 See 14.10.2 (“Paid” and “payment”).

46 See 104.11 (DTA beneficial owner rule).

Art 10 may easier to follow if one specifies which State is which:

*Company UK resident; shareholder non-resident:*

1. Dividends paid by a company which is a resident of the UK to a resident of the foreign State may be taxed in the foreign State.
2. However, dividends paid by a company which is a resident of the UK may also be taxed in the UK ... , but if the beneficial owner of the dividends is a resident of the foreign State, the tax so charged shall not exceed [the 5%/15% cap]

*Company non-resident; shareholder UK resident:*

1. Dividends paid by a company which is a resident of the foreign State to a resident of the UK may be taxed in the UK.
2. However, dividends paid by a company which is a resident of the foreign State may also be taxed in the foreign State ... but if the beneficial owner of the dividends is a resident of the UK, the tax so charged shall not exceed [the 5%/15% cap].

29.9.2 2017 changes to art 10

The wording of the treaty cap changed in 2017:

**Pre-2017 Model art 10(2)(a)**

**Post-2017 Model art 10(2)(a)**

<p>5 per cent of the gross amount of the dividends if the beneficial owner is a company <del>(other than a partnership)</del> which holds directly at least 25 per cent of the capital of the company paying the dividends;</p>	<p>5 per cent of the gross amount of the dividends if the beneficial owner is a company <del>(other than a partnership)</del> which holds directly at least 25 per cent of the capital of the company paying the dividends <u>throughout a 365 day period that includes the day of the payment of the dividend</u> <u>(for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend);</u></p>
---	--

There are two changes.

- (1) The words “other than a partnership” are deleted.<sup>47</sup>
- (2) The minimum 365 day holding period. Article 8 BEPS MLI<sup>48</sup> proposed this, to prevent avoidance via dividend transfer transactions, but the UK opted out of that. There are no current treaties with this wording, and it seems unlikely that the wording will be used much in future UK treaties.

### 29.9.3 *Treaty-resident in foreign State*

In practice, non-resident individuals and non-resident companies do not need usually treaty relief for their UK dividends. They qualify for non-resident IT relief.<sup>49</sup> Treaty relief is relevant to:

- (1) Non-resident trusts (if they do not qualify for non-resident IT relief, because they have UK resident beneficiaries)<sup>50</sup>
- (2) Individuals who are UK-law UK resident, but treaty-resident in the foreign State (under the tie-breaker)
- (3) Tax year of arrival and departure

### 29.9.4 *“Company” in OECD Model*

“Company” is defined, and the term is used in four places in the OECD Model:

Article	Topic	See para
10	Dividends	<i>Discussed here</i>
5(7)	Permanent establishment	101.16
16	Directors’ fees	36.19
3	Definition of person	8.4

I discuss the definition here, as the article 10 context is the most important; OECD Commentary states that “The definition is drafted with special regard to the Article on dividends.”

Article 3(1)(b) OECD Model provides:

1. For the purposes of this Convention, unless the context otherwise requires ...

---

47 See 29.9.4 (Partnership restriction).

48 See 103.14 (BEPS multilateral instrument).

49 See 42.1 (Non-resident IT relief – Introduction).

50 See 42.10 (Trusts: UK beneficiary rule).

- b) the term “company” means
  - [i] any body corporate or
  - [ii] any entity that is treated as a body corporate for tax purposes;

OECD Commentary provides:

3. The term “company” means in the first place any body corporate. In addition, the term covers any other taxable unit that is treated as a body corporate for the purposes of the tax laws of the Contracting State of which it is a resident.

See 86.35 (US limited partnership).

### 29.9.5 *Partnership restriction*

The direct investor treaty cap in its pre-2017 form restricted this relief to a company “other than a partnership”.<sup>51</sup> I refer to this as the “**partnership restriction**”.

This wording is not in the current Model. But even before the change, the UK preferred not to include the partnership restriction, which is found only in a few pre-2017 treaties.<sup>52</sup> OECD Commentary provides:

11. Before 2017, [art 10(2)(a)] referred to a company “other than a partnership”. That exception was deleted in recognition of the fact that if a partnership is treated as a company for tax purposes by the Contracting State in which it is established, it is appropriate for the other State to grant the benefits of subparagraph a) to that partnership. Indeed, an entity or arrangement (e.g. a partnership) that is treated as a company for tax purposes qualifies as a company under the definition in [art 3(1)(b)<sup>53</sup>] and, to the extent that it is a resident of a Contracting State, is therefore entitled to the benefits of [art 10(2)(a), direct investor treaty cap] with respect to dividends paid by a company resident of the other State, as long as it holds directly at least 25% of the capital of that

---

51 See 29.9.2 (2017 changes to art 10).

52 11 UK treaties have this wording: Austria, Denmark, Faroes, Germany, Iceland, Israel, Korea, Turkmenistan, Uruguay, Zambia. Presumably the treaty partner wanted it. For discussion of the wording see “Some Reflections on the Proposed Revisions to the OECD Model and Commentaries, and on the Multilateral Instrument, with respect to Fiscally Transparent Entities” [2017] BTR 295 at p.338.

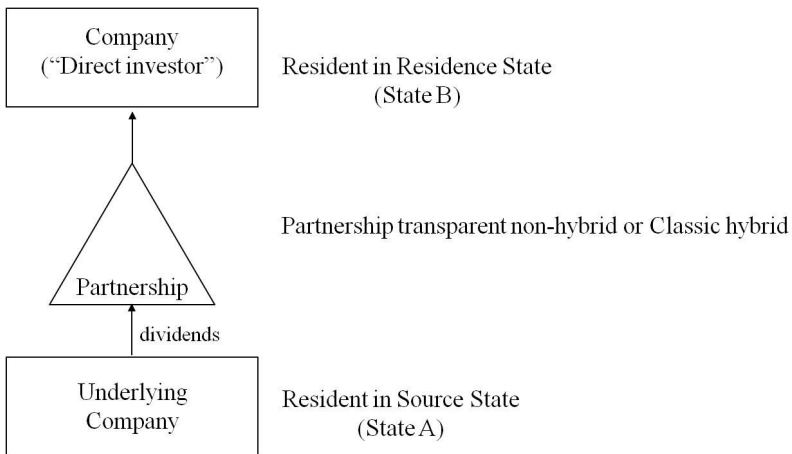

53 See 29.9.4 (“Company” in OECD Model).

company.<sup>54</sup>

This conclusion holds true regardless of the fact that the State of source of the dividends may regard that entity or arrangement as fiscally transparent. That conclusion is confirmed by the provision on fiscally transparent entities in [art 1(2), hybrid entity rule<sup>55</sup>].

### 29.9.6 Receipt via transparent entity

OECD Commentary considers a direct investor holding an underlying company through a partnership, thus:

11.1[Art 1(2), hybrid entity rule] ensures that the part of the dividend received by a fiscally transparent entity or arrangement that is treated as the income of a member of that entity or arrangement for purposes of taxation by the State of residence of that member will be considered as a dividend paid to that member for the purposes of Article 10 (see paragraph 12 of the Commentary on Article 1).<sup>56</sup>

Where, for example, a company resident of State A pays a dividend to a partnership that State B treats as a transparent entity, the part of that dividend that State B treats as the income of a partner resident of State B, will, for the purposes of [art 10(2)] of the convention between States A and B, be treated as a dividend paid to a resident of State B.

Also, for the purposes of the application of [art 10(2)(a)] in such a case,

54 But if that is right, would the partnership restriction ever apply?

55 See 87.4 (DTA hybrid-entity rules).

56 See 87.6.1 (Considered as income: Effect).

a member that is a company should be considered to hold directly, in proportion to its interest in the fiscally transparent entity or arrangement, the part of the capital of the company paying the dividend that is held through that entity or arrangement and, in order to determine whether the member holds directly at least 25% of the capital of the company paying the dividends, that part of the capital will be added to other parts of that capital that the member may otherwise hold directly.<sup>57</sup>

In the case of a partnership, it is possible to say that the partners hold the capital if one adopts a co-ownership analysis of a partnership share.<sup>58</sup>

### 29.9.7 “Dividends”

Article 10(3) OECD Model defines dividends:

The term “dividends” as used in this Article means

- [a] income from shares, “jouissance” shares or “jouissance” rights, mining shares, founders’ shares or other rights, not being debt-claims, participating in profits, as well as
- [b] income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident.

I think the correct reading of para [a] is:

income from

- [i] shares, “jouissance” shares or “jouissance” rights, mining shares, founders’ shares or
- [ii] other rights, not being debt-claims, participating in profits

---

57 The Commentary goes on to consider the 365-day rule (though that is not likely to be relevant for the UK):

“In that case, for the purposes of the application of the requirement that at least 25% of the capital of the company paying the dividends be held throughout a 365 day period, it will be necessary to take account of both the period during which the member held the relevant interest in the fiscally transparent entity or arrangement and the period during which the part of the capital of the company paying the dividend was held through that entity or arrangement: if either period does not satisfy the 365 day requirement, subparagraph a) will not apply and subparagraph b) will therefore apply to the relevant part of the dividend...”

58 See 82.3.1 (English partnership: 2 analyses).

That is, the words “not being debt-claims, participating in profits” govern “other rights” but do not govern the 5 categories within [i].

See Avery-Jones et al “The Definitions of Dividends & Interest in OECD Model: Something Lost in Translation?” [2009] BTR 406.

For the dividend/capital gain boundary, see 53.22.7 (Share buy-back/liquidation).

OECD Commentary provides:

1. By “dividends” is generally meant the distribution of profits to the shareholders by

[a] companies limited by shares, [*Sociétés anonymes*]

[b] limited partnerships with share capital, [*Sociétés en commandite par actions*]

[c] limited liability companies [*Sociétés à responsabilité limitée*] or

[d] other joint stock companies [*Sociétés de capitaux*].

Under the laws of the OECD member countries, such joint stock companies are legal entities with a separate juridical personality distinct from all their shareholders. On this point, they differ from partnerships insofar as the latter do not have juridical personality in most countries.

2. Many States consider that the profits of a business carried on by a partnership are the partners’ profits derived from their own exertions; for them they are business profits. So these States treat the partnership as fiscally transparent and the partners are ordinarily taxed personally on their share of the partnership capital and partnership profits.

3. The position is different for the shareholder; he is not a trader and the company’s profits are not his; so they cannot be attributed to him. He is personally taxable only on those profits which are distributed by the company (apart from the provisions in certain countries’ laws relating to the taxation of undistributed profits in special cases). From the shareholders’ standpoint, dividends are income from the capital which they have made available to the company as its shareholders.

OECD Commentary provides:

23. In view of the great differences between the laws of OECD member countries, it is impossible to define “dividends” fully and exhaustively. Consequently, the definition merely mentions examples which are to be found in the majority of the member countries’ laws and which, in any case, are not treated differently in them. The enumeration is followed up by a general formula....

24. The notion of dividends basically concerns distributions by

companies within the meaning of subparagraph b) of paragraph 1 of Article 3. Therefore the definition relates, in the first instance, to distributions of profits the title to which is constituted by shares, that is holdings in a company limited by shares (joint stock company). The definition assimilates to shares all securities issued by companies which carry a right to participate in the companies' profits without being debt-claims; such are, for example, "jouissance" shares or "jouissance" rights, founders' shares or other rights participating in profits.

... debt-claims participating in profits do not come into this category (see paragraph 19 of the Commentary on Article 11); likewise interest on convertible debentures is not a dividend.

25. Article 10 deals not only with dividends as such but also with interest on loans insofar as the lender effectively shares the risks run by the company, i.e. when repayment depends largely on the success or otherwise of the enterprise's business. Articles 10 and 11 do not therefore prevent the treatment of this type of interest as dividends under the national rules on thin capitalisation applied in the borrower's country. The question whether the contributor of the loan shares the risks run by the enterprise must be determined in each individual case in the light of all the circumstances, as for example the following:

- the loan very heavily outweighs any other contribution to the enterprise's capital (or was taken out to replace a substantial proportion of capital which has been lost) and is substantially unmatched by redeemable assets;
- the creditor will share in any profits of the company;
- repayment of the loan is subordinated to claims of other creditors or to the payment of dividends;
- the level or payment of interest would depend on the profits of the company;
- the loan contract contains no fixed provisions for repayment by a definite date.

### 29.9.8 *Distribution by partnership*

OECD Commentary provides:

26. The laws of many of the States put participations in a *société à responsabilité limitée* (limited liability company) on the same footing as shares. Likewise, distributions of profits by co-operative societies are generally regarded as dividends.

27. Distributions of profits by partnerships are not dividends within the

meaning of the definition, unless the partnerships are subject, in the State where their place of effective management is situated, to a fiscal treatment substantially similar to that applied to companies limited by shares (for instance, in Belgium, Portugal and Spain, also in France as regards distributions to *commanditaires* in the *sociétés en commandite simple*). ...

#### 29.9.9 *Non-cash dividends*

OECD Commentary provides:

28. Payments regarded as dividends may include not only distributions of profits decided by annual general meetings of shareholders, but also other benefits in money or money's worth, such as

[1] bonus shares,

[2] bonuses,

[3] profits on a liquidation or redemption of shares (see paragraph 31 of the Commentary on Article 13) and

[4] disguised distributions of profits.

The reliefs provided in the Article apply so long as the State of which the paying company is a resident taxes such benefits as dividends. It is immaterial whether any such benefits are paid out of current profits made by the company or are derived, for example, from reserves, i.e. profits of previous financial years.

Normally, distributions by a company which have the effect of reducing the membership rights, for instance, payments constituting a reimbursement of capital in any form whatever, are not regarded as dividends.

#### 29.9.10 *Benefits to non-shareholder*

OECD Commentary provides:

29. The benefits to which a holding in a company confer entitlement are, as a general rule, available solely to the shareholders themselves. Should, however, certain of such benefits be made available to persons who are not shareholders within the meaning of company law, they may constitute dividends if:

- the legal relations between such persons and the company are assimilated to a holding in a company (“concealed holdings”); and
- the persons receiving such benefits are closely connected with a shareholder; this is the case, for example, where the recipient is a relative of the shareholder or is a company belonging to the same

group as the company owning the shares.

30. When the shareholder and the person receiving such benefits are residents of two different States with which the State of source has concluded conventions, differences of views may arise as to which of these conventions is applicable. A similar problem may arise when the State of source has concluded a convention with one of the States but not with the other.

The Commentary has no solution to offer:

This, however, is a conflict which may affect other types of income, and the solution to it can be found only through an arrangement under the mutual agreement procedure.

#### 29.9.11 *Company capital*

This term matters because a direct investor only qualifies for the lower treaty cap if it is a company holding at least 25% of the company capital.

OECD Commentary provides:

15. In [art 10(2)(a), direct investor treaty cap], the term “capital” is used in relation to the taxation treatment of dividends, i.e. distributions of profits to shareholders. The use of this term in this context implies that, for the purposes of subparagraph a), it should be used in the sense in which it is used for the purposes of distribution to the shareholder (in the particular case, the parent company).

a) As a general rule, therefore, the term “capital” in subparagraph a) should be understood as it is understood in company law. Other elements, in particular the reserves, are not to be taken into account.

b) Capital, as understood in company law, should be indicated in terms of par value of all shares which in the majority of cases will be shown as capital in the company’s balance sheet.

c) No account need be taken of differences due to the different classes of shares issued (ordinary shares, preference shares, plural voting shares, non-voting shares, bearer shares, registered shares, etc.), as such differences relate more to the nature of the shareholder’s right than to the extent of his ownership of the capital.

d) When a loan or other contribution to the company does not, strictly speaking, come as capital under company law but when on the basis of internal law or practice (“thin capitalisation”, or assimilation of a loan to share capital), the income derived in respect thereof is treated as dividend under Article 10, the value of such loan or contribution is also

to be taken as “capital” within the meaning of subparagraph a).

e) In the case of bodies which do not have a capital within the meaning of company law, capital for the purpose of subparagraph a) is to be taken as meaning the total of all contributions to the body which are taken into account for the purpose of distributing profits.

#### 29.9.12 *Dividend paid through PE*

For the overlap between dividends and business profits, see 103.8.3 (Other business profit overlaps).

#### 29.9.13 *Dividend to foreign State co*

Article 10(5) OECD Model provides:

Where a company which is a resident of a Contracting State derives<sup>59</sup> profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company, except [a] insofar as such dividends are paid to a resident of that other State or [b] insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment situated in that other State, nor subject the company’s undistributed profits to a tax on the company’s undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State.

#### 29.9.14 *Co in 3<sup>rd</sup> State: Dual resident shareholder*

A person who is UK-law UK resident but treaty-resident in a foreign State may receive dividends from a company which is not a resident of the foreign State.

A person in this category does not qualify for relief under article 10. However relief from UK tax is available under art 21 OECD Model (“Other Income”).<sup>60</sup>

Dividends from companies in third countries are within the Other Income article, as they are “not dealt with in the foregoing Articles”.

The OECD Commentary provides:

---

<sup>59</sup> See 14.10.1 (“Deriving” income).

<sup>60</sup> See 32.16 (DT relief: “Other Income”).

8. [Art 10] deals only with dividends paid by a company which is a resident of a Contracting State and does not, therefore, apply to dividends paid by a company which is a resident of a third State. Dividends paid by a company which is a resident of a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State may be taxed by the first-mentioned State under [art 10(2)] but may also be taxed by the other State under paragraph 1 of Article 7 (see paragraphs 9 and 9.1 of the Commentary on Articles 23 A and 23 B concerning relief of double taxation in such cases).

## 29.10 Dividend nil rate/DTA interaction

### 29.10.1 UK dividends of non-resident

HMRC say:

#### Question

24.1 Please can HMRC confirm how the treaty cap should be applied in the case of a treaty non-resident individual who has UK source dividend income in excess of £5,000?<sup>61</sup>

We believe there are two possible approaches. Either:

- a. the treaty cap applies to the total UK source dividend income paid, so for example, someone with £15,000 of dividends paying £3,250 UK tax (being 32.5% on £10,000) is subject to a treaty cap of £2,250 (being 15% of £15,000 and assuming a 15% treaty cap rate applies); or
- b. the treaty cap applies to only the UK source dividend income that is chargeable to UK tax at more than 0%, so in the same example the 15% treaty cap would limit the UK tax to £1,500 (being 15% of the £10,000 UK dividend income remaining after deducting the £5,000 dividend allowance).<sup>62</sup>

In cases where the treaty non-resident individual is UK resident under SRT they may receive a combination of UK source dividend income and non-UK source dividend income.

#### Answer

Non-UK resident individuals with UK source income can be taxed in two ways. Under the normal rules, they are subject to income tax on

---

61 ie the income qualifies for the dividend nil rate. From 2018/19 the figure of £2,000 replaces the figure of £5,000. See 40.10.2 (Dividend nil rate).

62 Author's footnote: The statutory term is dividend nil rate, not dividend allowance, but it does not matter.

dividends in the same way as UK residents. The first £5,000 of dividends is tax free. The balance will be subject to tax but will be restricted in accordance with the treaty which limits the rate of tax to be applied.

Alternatively, non-UK residents can use the special rules in ITA 2007, s 811 to s 814. These limit the non-resident's UK income tax liability to tax paid at source on investment and pension income. In particular, no UK tax is payable on dividends from UK companies because the tax credit is treated as paid at source. All other UK income, such as employment income, is taxed in full, but no personal allowance can be claimed (assuming a claim for personal allowances is available).<sup>63</sup>

This summary of the taxation of UK dividends of non-residents is not correct. But as non-residents do not pay IT on dividends (after allowing for the tax credit) it is true to say that the issue of the dividend nil rate does not arise.

#### 29.10.2 *Foreign dividends DTA exempt*

HMRC say:

##### **Question**

24.2 - Assuming the non-UK source dividend income is exempt from UK tax under the treaty, do HMRC accept that it does not use up any dividend allowance because it is not included in "net income" as calculated at Step 2 s23 ITA 2007 (ITA)? If that is correct, can we assume that the existence of treaty exempt non-UK source dividend income would not change the way the treaty cap applies to the UK source dividend income?

##### **Answer**

If the treaty provides full relief on dividends then they will be exempt and will not be brought into the computation. The dividend allowance will still be available to use against other dividends.<sup>64</sup>

This question will hardly ever arise, as circumstances in which a UK

64 Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

resident qualifies for treaty exemption on dividends are extremely rare. The OECD Model generally provides that the residence State has a taxing right. But if it did happen,<sup>65</sup> it is correct to say that the exempt dividends do not affect the dividend nil rate.

---

65 Exemption from tax on foreign dividends of a UK resident might arise in two circumstances: (1) a non OECD Model form treaty might provide exemption. (2) Exemption may be applicable under the Model treaty to an individual who is UK resident under UK domestic law, but treaty non-resident; see 29.9.14 (Co in 3rd State: Dual resident shareholder).

CHAPTER THIRTY

**ANNUAL PAYMENTS**

30.1		30.10.4 Annual-Payment/Royalty
30.4.1	Post-cessation receipt formerly exempt	WHT:Priority

*Cross references*

The following topics are considered elsewhere:

51.5.1 (Annual Payments) - transfer of income stream

**30.1 Annual Payments: Introduction**

“Annual Payment” is an opaque technical term: it is a label for a category (or perhaps a set of categories?) of income, the meaning of which is discussed in a large and in parts difficult body of case law.<sup>1</sup> I write this term with initial capitals, to reflect the technical nature of the expression.

Annual Payments are subject to a set of rules which I call the “**Annual Payment code**”. The elements of this code are scattered across the Taxes Acts:

<b>Topic</b>	<b>Part/Chapter</b>	<b>Principal ss</b>	<b>See para</b>
Tax charge on payee	Chap 7 Pt 5 ITTOIA	s.683	30.5
Withholding tax on payor	Chap 6 Part 15 ITA	ss.900/901	30.10
Deduction for payor	Chap 4 Pt 8 ITTOIA	ss.448/449	30.11

The Annual Payment code gives a favourable outcome if:

- (1) the payor obtains a deduction; and
- (2) the payee is exempt, or where the rate of tax on the payee is less than the payor.

This code can apply whether the payors are individuals, trusts or

---

<sup>1</sup> See 30.1 (“Annual Payment”).

companies; but its application to individuals, once common, is now rare; application to trusts is also rare; so the most common case now would be its application to company payors.

I would focus on the themes of this book, but it is necessary to address the topic as a whole.

### 30.2 Charge on income

In order to understand the law, one needs to understand the historical term “charge on income”, and its tax treatment and rationale.

In *IRC v Frere*:<sup>2</sup>

... the annuity which is by legal right charged upon property, income primarily, capital by way of resort. A man comes in to the right to that income subject to the charge of the annuity. Under the tax system, as in ordinary thinking, his own income is reduced by the amount of the charge. The gross income accruing to him is divided in ownership right, a part equal to the annuity figure belonging to the annuitant, the balance to him. The reality of this situation was recognised and allowed for by the tax system, because, while the payer of the annuity was assessed and charged on the gross income, he was from the earliest days allowed to deduct from his payments [of the annuity] a proportionate part of the tax which he had borne or was to bear on the total. By this means his true taxable income was treated as being the residue left after the charge of the annuity, the burden of the tax being shifted from payer to recipient by the former's statutory right to recoup himself out of the payment due to the latter.

This recognition of a division of ownership between two or more persons entitled to rights in a single "fund" of income was not, however, confined to such cases as those where there was ... an annuity charge. ... the tax system can be seen to go further than this, for it applied the same idea of division of proprietary right to situations in which legal distinctions draw no dividing line. Thus an annual payment secured by personal covenant only, involving no charge on any actual security, whether income or capital, was treated in the same way for tax purposes.

So the expression “charge on income” has two main senses:

- (1) By etymology, and in property law, it suggests a right secured by a legal charge (or mortgage or similar security) over a right to income.

---

2 [1965] AC 402

- (2) In tax law, the meaning is extended to include an Annual Payment, payable out of income, under a simple covenant even though not secured by a legal charge.<sup>3</sup>

The history since 1969 has been a gradual reduction of charges on income within the former deduct and retain regime. Interest was taken out in 1969; and most Annual Payments were taken out by the Annual Payment exemption introduced in 1988. Gift Aid payments were taken out by the Tax Law Rewrite. Just a few dusty corners now remain.

In the Tax Law Rewrite, the term “charge on income” was sensibly retired,<sup>4</sup> and the old system of deduction and retention of tax was replaced by a system of deduction and relief (which is a simpler route to the same outcome).<sup>5</sup>

This is the historical context in which the meaning of the term Annual Payment has had to be ascertained. In taxation, as in life, the past is almost always present.

### 30.3 Annual Payment: Meaning

In *Hargreaves Lansdown v HMRC*:

Section 683 ITTOIA 2005 imposes the charge on “annual payments” not otherwise charged but does not define the term. The predecessor legislation to section 683 did not define the term either, though an indication to its interpretation can be found to an extent in the previous language, which referred to “interest, annuities and other annual payments”, and, following the separate taxation of interest, “any annuity or other annual payment”.<sup>6</sup>

In the same case in the UT:

[39] The term ‘annual payment’ is not further defined in legislation and

---

3 The term “security” has seen a similar extension, originally suggesting secured debts but now including some unsecured debts.

4 EN CTA 2010 comments on the old terminology: “749. For corporation tax purposes charges on income are now reduced to charitable donations only (see section 338A(2) of ICTA). A more accurate description [qualifying charitable donations] has therefore been substituted for “charges on income”. The term “charges on income” was dispensed with for income tax purposes by ITA and this Act now follows that path.”

5 See EN ITTOIA Change 82.

6 [2018] UKFTT 127 (TC) at [39].

its meaning is to be found in case law. ... the authorities establish that an annual payment is a payment which has four characteristics, as follows:

- (1) It must be payable under a legal obligation.<sup>7</sup>
- (2) It must recur or be capable of recurrence, although the obligation to pay may be contingent.
- (3) It must constitute income and not capital in the hands of the recipient.
- (4) It must represent ‘pure income profit’ to the recipient.

### 30.3.1 *Capable of recurrence*

The word “annual” is misleading. Section 582(7) ITTOIA (encapsulating earlier case law) provides:

The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of subsection (1).<sup>8</sup>

*Hargreaves Lansdown v HMRC* discusses “capable of recurrence”:

The authorities identify the characteristic in the context of establishing that a payment is not a “one-off” payment in the nature of capital, but has the “quality” of a payment which will or may recur. ...

[74] The Loyalty Bonus payments were not only “capable of recurrence”, but they did recur, over many months and for the periods in this appeal. They are not prevented from being recurrent by depending on a contingency, and, per *Smith v Smith*, were not prevented from being annual because they were made monthly provided they might continue beyond a month.<sup>9</sup>

### 30.3.2 *Pure income profit*

An Annual Payment must be assessed in the hands of the recipient as an Annual Payment. It must not be a mere item in an account from which the profits of the recipient are ascertained. This is expressed by saying the Annual Payment must be “pure income profit”.<sup>10</sup>

In *Hargreaves Lansdown v HMRC* the FTT said:

---

<sup>7</sup> See 32.4 (Source/voluntary transaction).

<sup>8</sup> This only applies for the purposes of s.582(1) ITTOIA but the provision is repeated elsewhere where needed; see s.683(3) ITTOIA.

<sup>9</sup> This passage was approved by the UT at [43].

<sup>10</sup> *Earl Howe v IRC* 7 TC 289; *Re Hanbury* 38 TC 588.

[77] The requirement for the receipt to be pure income profit lies at the heart of what is meant by an “annual payment”. It is therefore critical to understand the underlying rationale which led the courts to lay down this principle. It does not focus on the position of the payer, and in particular does not depend on an element of gratuity or bounty on the part of the payer. Rather, it is driven by the application of the deduction at source mechanism to annual payments. Under that mechanism someone other than the taxpayer (namely the payer) must collect and discharge all or part of the taxpayer’s liability for the receipt. That mechanism would operate improperly if the payment comprised anything other than a gross receipt of the payee. The rather archaic phrase “pure income profit” is no more than shorthand for this principle.

The UT approved this and said:

59. ... the category of annual payments is limited and the reason for the limitation lies in the fact that annual payments have been inseparably associated with payments from which tax is deductible. It has been thought to be inconsistent with the idea of tax being deducted at the source to allow payments that are likely to be gross receipts of the payee and not “pure income profit” to be classed as annual payments...<sup>11</sup>

60. Where the payee is a trader, the concept is easy to grasp in principle. ... the much-quoted example given by Scrutton LJ in *Earl Howe v CIR* 7 TC 289 at page 303:

It is not all payments made every year from which Income Tax can be deducted. For instance, if a man agrees to pay a motor garage £500 a year for five years for the hire and upkeep of a car, no one suggests the person paying can deduct Income Tax from each yearly payment. So, if he contracted with a butcher for an annual sum to supply all his meat for a year, the annual instalment would not be subject to tax as a whole in the hand of the payee, but only that part of it which was profits.

61. ... the question becomes more difficult where, as in this appeal, the recipient is not a trader. [Counsel for the taxpayer] relies on what was said by the Court of Appeal in *CIR v National Book League* 37 TC 455, a case concerning covenants entered into by members of the League to pay their subscriptions and whether payments made under those covenants were annual payments. The Crown had contended that the payments were received in consideration of the annual provision of

---

11 See *CIR v Whitworth Park Coal Co* 38 TC 531 at p.575.

goods and services and were not annual payments. At page 473 Lord Evershed MR placed emphasis on the counter-stipulations on the part of the League to provide membership benefits as follows:

“The question, therefore, as I see it, turns first upon this: looking at the substance and reality of the matter, can it be said that those who entered into these covenants have paid the sums covenanted without conditions or counter stipulations? On the whole I have come to the conclusion that they cannot so say. It seems to me that against the special background of this case, and having regard to the terms of the letter, there was here, in a real sense, a condition or counter stipulation on the part of the League against which the covenant was entered into. Without repeating what I said at the beginning of this judgment, I must guard myself again saying that whenever you find a covenantor in favour of a charity getting aloud to him certain privileges it therefore follows that such a covenant or no longer can say that he has paid without conditions or counter stipulations.”

62. However, it is clear that the presence of counter stipulations is only one of the circumstances to be considered. This point was emphasised by the House of Lords in *Campbell v CIR*:

“The truth is, in my opinion, that one cannot resolve the problem whether a payment is an annual payment... simply by asking the questions “Must the payee give or do something in return?” or “Did the payer make some counter-stipulation or receive some counter-benefit?” or “Was it pure bounty on his part?” Such questions come more easily to the mind perhaps where, as here, payment to a charity is involved. But there is no warrant in the Income Tax Acts for applying a special test in the case of charities. The test must be applicable to all annual payments; and the problem must continue to be resolved, in my opinion, on the lines laid down by Scrutton LJ in *Earl Howe’s* case. One must determine, in the light of all the relevant facts, whether the payment is a taxable receipt in the hands of the recipient without any deduction for expenses or the like—whether it is, in other words, “pure income” or “pure profit income” in his hands, as those expressions have been used in the decided cases. If so, it will be an annual payment ... If, on the other hand, it is simply gross revenue in the recipient’s hands, out of which a taxable income will emerge only after his outgoings have been deducted, then the payment is not such an annual payment... The test makes it necessary to decide each case on its

own facts.”<sup>12</sup>

How precisely does one decide whether a payment is pure income, or whether it is a “mere item in an account from which the profits of the recipient are ascertained”?

It has been said that one must look at the “quality and nature” of the payments but that by itself does not take the matter very much further.

Where the recipient is carrying on a trade, and the payment is a trading receipt then the payment obviously cannot be pure income. The colourful examples of *Scrutton LJ* are in this category

*British Commonwealth International Newsfilm Agency Ltd v Mahany* 40 TC 550 is another example of trading receipts. Payments to subsidise losses of the agency were held to be trading receipts. The payments were not for consideration and the payer did not receive any direct benefit; this might have suggested the payments were Annual Payments, but was overridden by other factors: both payer and payee were traders; the documentation suggested the payments were trade receipts; the payee was not a charity and not restricted to charitable activity.

However, the test is not simply to ask whether a receipt is a trading receipt. While no trading receipt can be an Annual Payment, other factors may show that a non- trading receipt may also fail to qualify as an Annual Payment. In *Essex County Council v Ellam* 61 TC 632 covenanted payments were made to the council which used them to pay a child’s school fees. It was held that the council could deduct the school fees from its receipt under the covenant; so the covenanted payments were not “Annual Payments”. The key factor in the decision, it is submitted, was that (i) the payments were “earmarked” for the purpose: (ii) the covenanted payment was fixed by reference to the school fees and (iii) there was no benevolent or charitable intention.

There are two cases on the other side of the line, both reported in 34 TC. Both were trading cases; in each case the Annual Payment was held not to be a trading receipt and to qualify as “pure income”.

The first is *IRC v Corporation of London (as Conservators of Epping Forest)* 34 TC 293. Here the recipient received payments to cover its losses in managing Epping Forest. The receipt was an Annual Payment. The deciding factor was that the payments were not in return for services,

---

12 45 TC 427 at p.475.

but”of a benevolent nature... primarily to achieve a public benefit of a charitable nature.”

The other case is *Leahy v Hawkins* 34 TC 28. Here a doctor received payments in lieu of a pension scheme. It was a condition of the payment that the doctor paid his own pension premiums. The payment was an Annual Payment. The deciding factor was that the amount of the payment bore no close relation to the amount the doctor had to pay under his own pension arrangements.

Unfortunately for taxpayers and their advisers, the Courts have declined to follow “the slippery slope of trying to define what ‘Annual Payment’ means”.<sup>13</sup> It seems there is no single general principle at all, but rather, a number of different considerations which may apply in different circumstances. The best guidance in the context of normal charitable covenants is in Lord Reid’s speech in *Epping Forest*, where he drew a distinction between:

- (1) “business payments, whether or not the payor gets any direct return” and
- (2) “payments of a benevolent nature - not of a business nature”.

It has to be said that this is a vague test. In a marginal case, the charity fundraising literature will be relevant and should be reviewed by someone familiar with the law before fundraising commences.

The mere fact that a person receives a benefit as a consequence of making a covenant does not of itself prevent the covenanted payment from qualifying as an Annual Payment.

*Ball v National & Grindlays Bank* is an illustration. In this case, the bank made covenants to children of employees. The Court of Appeal noted that the bank had obtained “very considerable benefit” thereby, it had “good value for its money”. Nevertheless, it was accepted that the covenanted payments were “Annual Payments”.

*Duke of Westminster v IRC* offers another illustration. The Duke made covenants to employees. He received a benefit in consequence: the employees accepted less than their full salary, because they received the covenanted payments. However, the Duke’s payments under the covenants were “Annual Payments”.

The source of confusion is *IRC v The National Book League* 37 TC 455

---

13 Harman J in *Leahy v Hawkins*.

where the judgment of Lord Evershed MR is confused and confusing. At one point he expounded the Earl Howe rule in these words:

Looking at the substance and reality of the matter, can it be said that those who entered into these covenants have paid the sums covenanted without conditions or counter-stipulations?

This formula was adopted as the correct test in *Taw & Torridge Festival Society v IRC* 38 TC 603. It might be taken as support for a pure bounty rule. That was, however, rejected by the House of Lords in *Campbell*.

Even in *The National Book League* Lord Evershed rejected a pure bounty rule:

I must guard myself against saying that whenever you find a covenantor in favour of a charity getting allowed to him certain privileges it therefore follows that such a covenantor no longer can say that he has paid without conditions or counter-stipulations.

The question was settled by the House of Lords in *Campbell v IRC*. *Campbell* raises a number of difficulties. However, there is no doubt that the pure bounty rule - for which the Revenue contended - was decisively rejected. Thus Lord Donovan at p 475:

The truth is, in my opinion, that one cannot resolve the problem whether a payment is an annual payment within Case III simply by asking the questions 'must the payee give or do something in return?' or 'did the payer make some counter-stipulation or receive some counter-benefit?' or was it 'pure bounty on his part?' Such questions come more easily to the mind perhaps where, as here, payment to a charity is involved. But there is no warrant in the Income Tax Acts for applying a special test in the case of charities. The test must be applicable to all annual payments: and the problem must continue to be resolved, in my opinion, on the lines laid down by Scrutton LJ in *Earl Howe's* case. One must determine, in the light of all the relevant facts, whether the payment is a taxable receipt in the hands of the recipient without any deductions for expenses or the like - whether it is, in other words 'pure income' or 'pure profit income' in his hands, as those expressions have been used in the decided cases. If so, it will be an annual payment under Case III. If, on the other hand, it is simply gross revenue in the recipient's hands, out of which a taxable income will emerge only after his outgoings have

been deducted, then the payment is not such an annual payment.<sup>14</sup>

### 30.3.3 HMRC examples

SAIM8050 provides 4 examples:

<b>Example: Facts</b>	<b>Comment</b>
1: Royalty after death of trader	See 30.4 (Post-cessation trade receipt)
2: Foreign source covenanted payments	Annual Payments
3: Credit card cashback	Not Annual Payments
4: Murabaha (Islamic interest-substitute)	Annual Payments

#### **Example 2** (Vivienne - Covenanted payments for consideration)

V, a UK resident, travels to the US to negotiate with a boat-building company, and buys an ocean-going yacht from them for \$2.6 million. In order to clinch the deal, the salesman makes an offer (later confirmed in writing by the company) to pay V \$60,000 a year for the next 5 years. Although the payments are expressed as a contribution towards the running costs of the yacht, there is no obligation on V to spend them in any particular way. She accepts the offer.

The agreement constitutes a legally enforceable contract, even though it is only documented informally. The payments are made in consideration of V's purchase of the boat. Once she has made the purchase, however, she does not have to do anything further in order to receive the payments (see the discussion of conditions and counter-stipulations at SAIM8040). They are therefore annual payments. Since the payments do not originate in the UK, V does not receive them with income tax taken off, and she must pay tax at both basic and higher rates on the income (although she can claim relief for any US withholding tax).

More analytically, since the payments do not arise in the UK, the Annual Payment exemption does not apply.

#### **Example 3** (William - Credit card cashback)

W signs up for a credit card offering a 'cashback' feature. Twice a year,

---

<sup>14</sup> Lord Guest made a similar comment: "It is apposite to note that Lord Normand [in the *Epping Forest* case 34 TC 293] did not say that if the payment was made with a condition or stipulation of a non-contractual character the payment would not be an annual payment. I can see no ground or reason or authority why there should be such a narrow construction of 'annual payment'..."

Viscount Dilhorne made similar comments at p 460, and Lord Upjohn at p 472.

the issuer credits to the card an amount equal to 1% of the payments W has made in the previous 6 months. Such credits are not annual payments. Each payment is contingent on his having charged amounts to the credit card in the previous period. In essence, each payment represents a one-off rebate of amounts that W has paid to the card issuer. Any future cashback received will be dependent on the cardholder making more purchases with the card and no further cashback will be received if there are no future card transactions.

**Example 4** (Tariq & Mohammed - Murabaha (Islamic interest-substitute) outside alternative finance code)

T, a carpenter, requires £12,000 to build a workshop on to his house, for the purposes of his trade. His uncle, M, agrees to advance him the funds, but for religious reasons he does not wish to make an interest-bearing loan to T. They therefore enter into a murabaha contract (see CFM11130). Under the agreement, M buys commodities for £12,000 and sells them to T, who immediately sells the commodities back into the market for £12,000, thus realising the necessary funds. However, under the terms of his purchase from M, he is granted 'credit terms', paying 48 monthly instalments of £275, a total of £13,200.

The arrangement does not fall within the alternative finance arrangement legislation in at ITA07/S564C, because M is not a 'financial institution'. M does not habitually deal in commodities: while it is possible for an isolated transaction of purchase and resale to be a trading transaction (see BIM20230) and each case must be judged on its own merits, the return of £1,200 which he derives from the transaction is unlikely to be a trading profit.

If it is not trading income, the £300 received by M each year, which is over and above 'repayment' of the capital sum advanced, will be an annual payment - it is pure income profit in M's hands.

### 30.4 Post-cessation trading receipt

A number of old (pre-1960) cases discuss the position after a cessation of trade. In each case the cessation was on the death of a trader (the PRs or legatee did not carry on the deceased's trade). But the same would apply on a retirement.

#### 30.4.1 *Post-cessation receipt formerly exempt*

Until 1960 there was no charge on post-cessation receipts, so the question was not to chose between two categories of taxable income, but whether

the receipt was taxable at all. See *Bennett v Ogston*:

When a trader or a follower of a profession or vocation dies or goes out of business - because [Counsel] is quite right in saying the same observations apply here - and there remain to be collected sums owing for goods supplied during the existence of the business or for services rendered by the professional man during the course of his life or his business, there is no question of assessing those receipts to Income Tax; they are the receipts of the business while it lasted, they are arrears of that business, they represent money which was earned during the life of the business and are taken to be covered by the assessment made during the life of the business, whether that assessment was made on the basis of bookings or on the basis of receipts.<sup>15</sup>

#### 30.4.2 *Post-cessation interest*

In *Bennett v Ogston* the taxpayer carried on the trade of moneylender, and during his lifetime, interest was treated as a receipt of the trade, not as interest.<sup>16</sup> But interest received after the death was taxable as interest:

When you are dealing with interest, it is true that under certain circumstances, in this case among others ... though you may treat the interest as the mere receipts of a trade and not as interest itself, I think it is quite impossible to say that interest which has to be borne next year, although you may have to secure it by a dealing this year, can be treated as a profit of this year. I do not understand that; I do not think that is possible. I think when you deal with interest as a receipt of a trade you must deal with it year by year, and the interest, as it comes in in the year as a receipt from the trade, if you like. If the trade stops then the securities which are outstanding which bear interest become securities apart from the trade, and interest upon them must bear Income Tax.<sup>17</sup>

#### 30.4.3 *Post-cessation Annual Payments*

*Bennett v Ogston* sets the scene for 3 cases concerning professional

---

15 15 TC 374 at p.378. This passage was approved in *Purchase v Stainer* 32 TC at p.410 and at p.412.

16 But during the trader's lifetime, the choice between interest/trading receipt would not have made a great deal of difference.

17 At p.379. But in *Purchase v Stainer* HL had "some doubt" as to whether this was a correct application of the principle set out just above; and in *Carson v Cheyney*, Lord Reid shared that doubt: 38 TC at p.265.

actors/authors.

The first was *Purchase v Stainer*. This concerned the actor/film director Leslie Howard.<sup>18</sup> His executors received contractual payments for his work. These were held not to be Annual Payments:

How else could these sums come to the hands of Mr. Howard or his executors than as the remuneration for his professional activities, the reward for services rendered by him during his life and unpaid for at his death? It appears to me wholly irrelevant that they were not payable until after his death and equally so that they were not and could not be quantified until after that event. They retained the essential quality of being the fruit of his professional activity...

The source of these payments was the professional activity of Mr. Howard: it was never anything else. It is true that his remuneration took the form of annual payments which, if other conditions were satisfied, might fall within Case III. But other conditions were not satisfied, for *ex hypothesi* the source of the remuneration was the exercise of a profession falling within Case II.

The decision is that these payments were not Annual Payments.

And again:

If Mr. Leslie Howard had stipulated for payment in blocks of shares or bonds, or any other instruments which by their independent vitality generate income, the dividends or interest might well have been taxable in the hands of his executors. The contracts in the present case enjoy, in my view, no such independent vitality. The consideration for what Mr. Howard was to do - to act or manage - was not the grant of a contract or contracts but the payment of money under the terms of those contracts. Mr. Howard acted for money: he did not act for contracts. The contracts were mere incidental machinery regulating the measure of the services to be rendered by him on the one hand, and on the other, that of the payments to be made by his employers: they were not the source but the instrument of payment. and his death, in my view, did nothing to divest them of that character.<sup>19</sup>

In two subsequent cases the Courts expanded the scope of this principle (or, depending on one's perspective, they chose not to restrict it). I refer

---

18 His stage name was Leslie Howard; his full name was Leslie Howard Stainer. Howard is best known for his role as Ashley Wilkes in *Gone with the Wind*.

19 at p.412.

to these as the authorship cases.

The first of the two is *Carson v Cheyney*. This concerned the author Peter Cheyney, a detective fiction writer. The difference between *Stainer* and *Cheyney* was that *Stainer* concerned mere contractual payments for services as an actor; Cheyney received *royalties for his copyright*. An author, unlike an actor, generally holds the copyright. But it made no difference to the outcome. In both cases, the payments were post-cessation receipts of the profession, not Annual Payments, and they did not become Annual Payments after the death:

In *Stainer's* case it could not be denied that the taxpayer acquired under his contracts certain contractual rights nor that those rights could in a certain context be called property. So it was argued that the payments were the income and the contracts were the "income-bearing assets". ... What else were these payments than the fruit of Peter Cheyney's professional activities? How is it relevant that in order to reap his harvest he had to enter into contracts under which he acquired rights and incurred obligations...? And how is it relevant that it was a term of those contracts that there should be vested in the publishers a right created by the law to protect him in the exploitation of his work? It was by entering into such contracts that he was able to carry on his profession gainfully. It was cause he did so that he was assessable to tax under Case II of Schedule D. I reject therefore the plea that the royalty payments could, whether during the carrying on of the 'profession or after its discontinuance, be regarded as "income from property" constituting "a substantive subject matter of taxation under Schedule D" - I use the words of the Crown's formal Case. I will only add, in deference to the ingenious argument of the Attorney-General, that the realities of the situation are not changed by saying that the royalties were throughout paid in consideration of the grant of a licence to use copyright and were therefore the income of property, that during the carrying on of the profession they could be regarded as income under Case VI, but that having always the character of income of property they became taxable in that character when the profession was no longer carried on. This is really only saying the same thing in other words and is to be similarly answered. First and last and all the time the payments are professional earnings, whatever be the mechanism through which they are paid.<sup>20</sup>

---

20 38 TC 240 at p.259.

And again:

An author is not in my opinion making a contract for services by entering into an agreement for the publication of a book already created by him. The position may approximate to a contract for services where the author binds himself to write a book and to transfer the copyright to a publisher, but I do not find in the agreements here any obligation to write a book. ... I prefer to treat the case from the angle of approach taken by the learned Attorney-General, that these are agreements relating to property of Mr. Cheyney already in existence or to come into existence.

In principle there is no difference between the case where an author sells the copyright and the case where he retains the copyright. What he has produced is not copyright but a book. Copyright is an incident attached by law to the book, fortifying that which he has produced and giving it a value which it would not have if it could be reproduced illegitimately in the shape of pirated editions. The property then from which the author obtains his income is the work produced by him, and the method by which that work can be turned to profit during his life is in his own hands and is but a projection of his professional activities, the means by which he earns his livelihood from his professional work. If I take the case where he retains the rights in his work and takes the profits to himself, it seems to me clear that when he dies any profits that come in afterwards from any issue published during his life are still the profits of what was his profession. It is not possible to say that they are mere income of property, "pure income profit" as it has been called. They are profits not only from writing the book but from bearing all the expenses of selling the book to the public, including the expenses of printing and publishing. They are akin to the profits of a trade but are more properly called the profits of a profession. So it is in my opinion where he sells his rights in return for royalties. It is quite unreal to regard these royalties merely as a return from property. They are the reward for all he has put into his work, his labour, his thought, his skill as a writer, and the expenses incurred in creating his book. The position is materially different where rights in a book in return for royalties are granted by another than the author. The elements to which I have referred are entirely absent in such a case. The book is there already made, and the idea of royalties as merely the income of property is a more intelligible conception. In Mr. Cheyney's case the position is in my opinion accurately and concisely summed up in the words of Jenkins, L.J., when he says

"it was just as much part of his profession to turn his literary labours to account by licensing the copyright he had created to publishers as it was to write the books in which the copyright subsisted."

He was treated by the Crown as earning money in the exercise of his profession by means of the contracts he made. It is not now said, nor could it in my opinion be said, that any change in the character of the payments received took place on his death.

The second of the authorship cases is *Home v Asquith*. This concerned the author Sir James Barrie, best known for *Peter Pan*. Barry bequeathed his copyrights (though not *Peter Pan*) to his secretary Lady Asquith. Lady Asquith assigned them to her son. So the difference between the earlier two cases and *Asquith* was that the payments were not received by the PRs. They were received by a legatee, (or more accurately, by an assignee of the legatee, but nothing turned on that.) The income was *still* not Annual Payments, and not still chargeable under sch D III (or at all):

Once the royalty contract comes into the hands of someone else, it is said, then the reasoning in *Stainer's* case and *Cheyney's* case has no application, one is left with a simple contract under which annual sums are payable, and in the hands of the owner of that contract the contract is a source of taxable income. I find it impossible to accept that contention consistently with the reasoning in the two cases. The reasoning in the two cases, as I understand it, is that, where an author enters into such a contract, that contract represents merely the machinery whereby he collects the return for his professional activities... It seems to me that, if that was the quality of the contracts in the hands of the author himself and of his personal representatives, who are in the same position, there could be no change in the quality of the contracts by reason of the fact that the benefit of the contracts passed from the personal representatives to a beneficiary under a will, or at a later stage from the beneficiary to someone in whose favour he disposes of the benefit of the contracts. If, immediately before the assent in favour of the beneficiary, a royalty contract possessed no independent vitality and was merely incidental machinery for the recovery of the payments due to the author, it seems to me that immediately after the assent the quality of the royalty contract was exactly the same. I do not see how it can be said that by reason of the assent in favour of the beneficiary the royalty contract in some way changed its character. What the beneficiary

received upon the assent was a piece of machinery<sup>21</sup> for collecting outstanding payments due to the deceased author. Unless the contract possesses independent vitality as a source of income, it is perfectly clear that payments received under it, representing as they do no more than outstanding receipts of the discontinued profession, do not possess the character of taxable income in the hands of anyone.<sup>22</sup>

#### 30.4.4 *The policy background*

The reader may find these 3 decisions surprising. Of course the Courts were not then applying the contemporary purposive approach, but even a traditional approach could have gone the other way. It is likely that one factor behind the decisions was an unspoken policy consideration, that tax free post-cessation receipts were a form of retirement benefit, at a time when there was no general scheme for retirement benefits for the self-employed.<sup>23</sup>

There is now a charge on post-cessation receipts, which would apply to executors, legatees and assignees. However the author cases are relevant to withholding tax. They do show that the receipts are not Annual Payments, and are not subject to withholding tax as Annual Payments. They are also said to show that professional receipts in the circumstances of *Stainer*, *Cheyney* and *Asquith* are not royalties, and so not subject to withholding tax as royalties.<sup>24</sup>

#### 30.4.5 *HMRC example*

The SAI Manual provides this example:

##### **SAIM8050 examples of annual payments**

##### **Example 1** (Peter & Teresa - Royalty after death of trader)

P carries on a trade as a software developer and software consultant. In the course of the trade, he develops a suite of computer programs in which there is commercial interest. He sets up a company, of which he and his wife T are directors, to exploit and market the software.

P enters into a licensing agreement granting the company a 25-year

---

21 See App.1.6 (Machinery/mechanism metaphor).

22 45 TC 251 at p.265.

23 Royal Commission on the Taxation of Profits and Income Cmd. 9474 (1955) chapter 12.

24 See 31.14 (Professional authors).

licence on the source code and intellectual property rights in the software, in exchange for a licence fee paid quarterly. The agreement does not require him to further develop or maintain the software, or supply technical advice to users - this is all done by the company.

The licence fees received by P are agreed to form part of the income of his trade as a software developer, and are included in the amount he returns as trading profits. However, P dies, and under the terms of his will, the intellectual property and the benefit of the licence agreement pass to T.

T does not carry on a trade of her own, and any work she does in connection with the software is done in her capacity as a director of the company. In her hands, the licence fees are annual payments. This is because the company is legally obliged under the licensing agreement to pay them, they are recurrent, and - in particular - they represent pure income profit to T. She does not have to do anything to earn them, and does not have to set outgoings against them.

The company is now making annual payments, and must deduct income tax at the basic rate from the licence fee payments and account for it on form CT61 (see SAIM9000 onwards).

T must enter the annual payments received in a tax year as 'other taxable income' on her self assessment return. If she is liable to tax only at the basic rate, she has no more tax to pay on the sums she receives.

In the light of the authorship cases, this is not correct. The receipts are not Annual Payments, but they are in principle taxable as post-cessation receipts. Has the author of this passage overlooked those cases? or chosen to ignore them? The author of the BIM acknowledges the question but does not stay for an answer:

**BIM50725 Authors And Royalties To Person Other Than Author**  
[Jan 2019]

Where it is claimed that royalties are not chargeable because of the decision in *Hume v Asquith* [1968] 45 TC 251, the case should be referred to Business Profits (Technical).

### 30.5 Charge on Annual Payments

Charging provisions on Annual Payments are scattered across ITTOIA:

ITTOIA	Applies to	See para
s.589	Royalties	31.5
Chapter 7 Part 4	Purchased life annuity	37.18
Chapter 4 Part 5	Telecommunication rights	-

s.683 Annual Payment not otherwise charged *Discussed here*

Section 683(1) ITTOIA provides:

Income tax is charged under this Chapter [Chapter 7 Part 5 ITTOIA] on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act.<sup>25</sup>

### 30.5.1 *Beneficiary on remittance basis*

Section 684 ITTOIA provides:

(1) Tax is charged under this Chapter on the full amount of the annual payments arising in the tax year.

(2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis if the Annual Payments have a foreign source.

Section 684(3) ITTOIA provides:

The amount charged under this Chapter in the case of certain payments made by trustees in the exercise of a discretion is subject to section 494 of ITA 2007 (grossing up of discretionary payments from trusts).

### 30.5.2 *Reliefs for AP charge*

Section 683(4) signposts a list of reliefs against this charge:<sup>26</sup>

<b>ITTOIA</b>	<b>Outline</b>	<b>See para</b>
ss.727 -730	Annual Payments exemption (for individuals)	30.6
s.731	Personal injury damages	
s.732	Compensation awards	
s.734	Payments from trusts for injured persons	
ss.735 - 743	Health and employment insurance	
ss.744 - 747	Payments to adopters	
ss.757 - 767	EU Interest royalty directive	
s.776	Scholarship income	

Most of the reliefs in this list are of somewhat specialist interest, and not discussed here.

### 30.5.3 *Source of Annual Payments*

<sup>25</sup> For this style of charging provision, see 11A.3.1 (Priority in charging provision).

<sup>26</sup> For clarity I have set this out in tabular form rather than the layout of the statute.

The location of the source of Annual Payments matters for the usual reasons, in particular:

- (1) A non-resident is not taxed on foreign source Annual Payments
- (2) Foreign source Annual Payments are RFI and qualify for the remittance basis
- (3) Foreign source Annual Payments are outside the scope of withholding tax

As the Annual Payment exemption only applies to UK source Annual Payments, it may happen that a taxpayer argues an Annual Payment has a UK source, and HMRC argue for foreign source.

There is not much authority. In *Bingham v IRC* 36 TC 254 a Dutch court ordered a UK resident individual to make maintenance payments to his ex-wife resident in the Netherlands. The payments were not UK source income.<sup>27</sup>

If Annual Payments are made in respect of the use of royalties, the situs should be the situs of the copyright.<sup>28</sup>

### 30.6 Annual Payment exemption

Section 727 ITTOIA provides:

- (1) No liability to income tax arises under Part 5 [ITTOIA Miscellaneous Income] in respect of an annual payment if it–
  - (a) is made by an individual,<sup>29</sup> and
  - (b) arises in the UK.
- (3) Subsection (1) also applies to a payment made by an individual's personal representatives if–
  - (a) the individual would have been liable to make it, and
  - (b) that subsection would have applied if the individual had made it.

I refer to this as the “**Annual Payment exemption**”.

The consequence of exempting Annual Payments is that withholding tax

<sup>27</sup> Had the wife been UK resident, she would now qualify for the relief for foreign maintenance payments.

<sup>28</sup> See 31.7 (Source of non-trade IP income).

<sup>29</sup> Section 727(4) ITTOIA provides: “For the purposes of subsection (1) and section 728, “individual” includes a Scottish partnership if at least one partner is an individual.” Strange.

does not apply. That may suit the payor as well as the payee.

### 30.7 Commercial Annual Payment

Section 728 ITTOIA provides:

A payment by an individual is not exempt from income tax under section 727(1) if it is made for commercial reasons in connection with the individual's trade, profession or vocation.

The paradigm example is an annuity payable to a retiring partner on purchase of a partnership share by the continuing partners. This used to be a common practice, I think. It is commercially attractive to the continuing partners, as they avoid the cash flow problems of raising a lump sum, and obtain an IT deduction. If the retiring partner's marginal IT rate is less than the continuing partners, it would be attractive from a fiscal viewpoint, and otherwise it is at least neutral in IT terms; and it avoids CGT on the disposal. But I wonder how often it is done, nowadays.

See 30.10.3 (Imposition of withholding tax).

### 30.8 Non-taxable consideration

Section 729 ITTOIA provides:

- (1) A payment that meets condition A is only exempt from income tax under section 727(1) if condition B or C is met.
- (2) Condition A is that—
  - (a) the payment is made under a liability incurred at any time for consideration in money or money's worth, and
  - (b) some or all of the consideration is not required to be brought into account in calculating the payer's income for income tax purposes.

If condition A is met, we turn to the escape conditions B and C:

- (3) Condition B is that the payment is income within section 627(1) (payments on dissolution or separation) in the recipient's hands.<sup>30</sup>
- (4) Condition C is that the payment is made to an individual under a liability incurred at any time in consideration of the individual

---

30 See 44.6 (Settlor-interested trust: Reliefs).

surrendering, assigning or releasing an interest in settled property<sup>31</sup> to or in favour of a person with a subsequent interest.

These exceptions to the exception are of fairly specialist interest. So an Annual Payment under a covenant made for non-taxable consideration is a trap which may unexpectedly bring the Annual Payment code into effect.

### 30.9 Foreign maintenance payments

The Annual Payment exemption only applies to UK source income: can any reader explain why? The restriction may not be EU-law compliant; but the point is not likely to arise.

So s.730 ITTOIA provides a further relief, but limited to foreign maintenance payments:

(1) No liability to income tax arises under Part 5 in respect of an annual payment if–

(a) it is a maintenance payment,<sup>32</sup>

(b) it arises outside the UK, and

(c) had it arisen in the UK it would be exempt from income tax under section 727 (certain annual payments by individuals).<sup>33</sup>

(6) Subsection (1) also applies to a payment made by an individual's personal representatives if–

(a) the individual would have been liable to make it, and

(b) that subsection would have applied if the individual had made it.

---

31 Section 739(4) deals with Scots terminology: “(5) In the application of subsection (4) to Scotland, the reference to settled property is to be read as a reference to property held in trust.” Is this actually necessary?

32 Defined in ss(2) “In subsection (1) “maintenance payment” means a periodical payment which meets conditions A and B.

(3) Condition A is that the payment is made under a court order or a written or oral agreement.

(4) Condition B is that the payment is made by a person–

(a) as one of the parties to a marriage or civil partnership to, or for the benefit of, and for the maintenance of, the other party,

(b) to any person under 21 for that person's own benefit, maintenance or education, or

(c) to any person for the benefit, maintenance or education of a person under 21.”

33 See 33.5 (Settlor-interested trust: Reliefs).

### 30.10 Annual-Payment withholding tax

For a general introduction to withholding taxes, see 25.17 (Withholding taxes: Introduction).

Section 903 ITA deals with patent royalties: I do not discuss this here.

#### 30.10.1 *Qualifying Annual Payment*

This term matters because “qualifying Annual Payments” are subject to Annual-Payment WHT.

Section 899 ITA provides:

- (1) In this Chapter [Chapter 6 Part 15, Annual Payments withholding tax] “qualifying annual payment” means an annual payment that meets the conditions in subsections (2) to (5).
- (2) The payment must arise in the UK.

Subsections (3)/(4) deal with non-company/company recipients.<sup>34</sup> It is helpful to see them side by side:

#### **Non-company recipient: s.899(3) ITA    Company recipient: s.899(4)**

- |  |  |
|--|--|
| <p>(3) If the recipient is a person other than a company, the payment<sup>35</sup> must be—</p> <p>(a) a payment charged to income tax under—</p> <p>(i) Chapter 7 of Part 4 of ITTOIA 2005 (purchased life annuity payments),</p> <p>(ii) section 579 of that Act (royalties etc from intellectual property),</p> <p>(iii) Chapter 4 of Part 5 of that Act (certain telecommunication rights: non-trading income), or</p> <p>(iv) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged), or</p> | <p>(4) If the recipient is a company, the payment must be—</p> <p>(a) a payment charged to income tax as mentioned in subsection (3)(a), [This can only apply to a non-resident company recipient as UK companies are charged to CT]</p> <p>or</p> |
|--|--|

<sup>34</sup> So it is necessary to ascertain the recipient; see 25.20 (To whom is interest paid).

<sup>35</sup> For the meaning of payment, see 14.3 (Recognition/attribution: Analysis).

(b) a payment charged to income tax under Part 9 of ITEPA 2003 because section 609 or 611 of that Act applies to it (certain employment-related annuities).

(b) a payment which is—  
 (i) required to be brought into account under Part 5 of CTA 2009 (loan relationships) as a non-trading credit, or  
 (ii) from a source in the UK and chargeable to corporation tax under [a] Chapter 7 of Part 10 of that Act (annual payments not otherwise charged) or [b] regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.

### 30.10.2 *Annual Payments outside WHT*

Section 899(5) ITA sets out 6 categories of payments which are not qualifying, and so not subject to Annual-Payment WHT:

The payment must not be—<sup>36</sup>

#### **Para Type of payment**

- (a) Interest
- (b) Corporate gift aid: qualifying payment for Chapter 2 Part 6 CTA 2010
- (c) Individual gift aid: qualifying donation for Chapter 2 Part 8 ITA
- (d) Discretionary trust income: within s.494(3) ITA<sup>37</sup>
- (e) A payment which would fall within paragraph (d) but for the fact that the trustees making the payment are non-UK resident
- (f) Annual payment for dividends or non-taxable consideration: s.904 ITA

Items (a)-(c) are not Annual Payments, so these paragraphs are otiose. They are there for historical reasons.

### 30.10.3 *WHT on Annual Payments*

Withholding tax on qualifying Annual Payments is imposed by s.900/901

---

<sup>36</sup> For clarity I set this out in tabular form, and in the terminology of this book, rather than the layout of the statute.

<sup>37</sup> See 38.4.1 (UK resident trust).

ITA for individuals/non-individual payors, and it is convenient to read them side by side:

**Individual payor: s.900 ITA**

**Non-individual payor: s.901 ITA**

(1) This section applies to any payment made in a tax year if—

(1) This section applies to any payment made in a tax year if—

(a) it is a qualifying annual payment,

[identical]

(b) the person who makes it is an individual, and

(b) the person who makes it is not an individual.

(2) But this section does not apply if—

(a) an individual’s personal representatives make the payment,  
(b) the individual would have been liable to make it if the individual had not died, and

(c) the payment would not have been made for genuine commercial reasons in connection with the individual’s trade, profession or vocation, had it been made by the individual.

(c) it is made for genuine commercial reasons in connection with the individual’s trade, profession or vocation.

The circumstances in which an individual is subject to Annual-Payment WHT are very limited. The paradigm example is an annuity payable to a retiring partner on purchase of a partnership share by the continuing partners.

Assuming Annual-Payment WHT does apply, we move on:

**Individual payor: s.900 ITA**

**Non-individual payor: s.901 ITA**

(2) The individual must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year.

(3) If the person who makes the payment has some modified net income for the tax year (see section 1025)—

(a) the person must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year, and

(3) Income tax equal to the sum required to be deducted is to be collected through the individual's self-assessment return (see Chapter 17).

(b) income tax equal to the sum required to be deducted is to be collected through the person's self-assessment return (see Chapter 17).

(4) If the person who makes the payment has no modified net income for the tax year the person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which the payment is made.

#### 30.10.4 *Annual-Payment/Royalty WHT: Priority*

Section 906(8) ITA provides:

If a payment to which this section applies is also one to which a provision of Chapter 6 applies, it is treated as not being a payment to which a provision of Chapter 6 applies.

So if a payment falls within Chapters 6 and 7, then Chapter 7 has priority. See 31.10 (Royalty withholding tax).

### 30.11 Relief for payor within WHT

#### **Relief for individual: s.448 ITA**

(1) This section applies to a payment made in a tax year if—  
 (a) the person who makes it is an individual,  
 (b) a sum representing income tax is required by section 900(2) (deduction from annual payments) to be deducted from it, and  
 (c) the payment is not deductible in calculating the individual's income from any source.

#### **Relief for non-individual: s.449 ITA**

(1) This section applies to a payment made in a tax year if—  
 (a) the person who makes it is not an individual,  
 (b) a sum representing income tax is required by section 901(3) (deduction from annual payments) to be deducted from it, and  
 (c) the payment is not deductible in calculating the person's income from any source.

(2) The individual is entitled to relief for the tax year equal to the gross amount of the payment.

(3) But this is subject to the restrictions in subsection (4)

(4) The total amount of relief given under this section to an individual for a tax year cannot be greater than the amount of the individual's modified net income for the tax year (see section 1025).

(5) The relief is given by deducting the amount of the relief in calculating the individual's net income for the tax year (see Step 2 of the calculation in section 23).

(2) The person who makes the payment is entitled to relief for the tax year equal to the gross amount of the payment.

(3) But this is subject to the restrictions in subsections (4)<sup>38</sup> and (5)

(5) The total amount of relief given under this section to a person for a tax year cannot be greater than the amount of the person's modified net income for the tax year (see section 1025).

(6) The relief is given by deducting the amount of the relief in calculating the person's net income for the tax year (see Step 2 of the calculation in section 23).

### 30.11.1 *Non-individual: additional rule*

Section 449(4) ITA provides:

Relief is not given for the payment so far as it is ineligible for relief (see section 450).

That takes us to s.450 ITA:

(1) This section sets out the circumstances in which a payment to which section 449 applies, or part of it, is ineligible for relief.

(2) The payment is ineligible for relief if, or so far as, it can lawfully be made only out of—

(a) capital, or

(b) income that is exempt from income tax.

(3) If the payment or any part of it is charged to capital, the payment or that part is ineligible for relief.

(4) If—

(a) the person who makes the payment treats it or any part of it as

---

38 See 30.11.1 (Non-individual: additional rule).

- made out of income that is exempt from income tax, and
- (b) the rights or obligations of any person are or may in the future be different from what they would have been if the payment or part had not been so treated,
- the payment, or the part concerned, is ineligible for relief.
- (5) If the payment or a part of it is not ultimately borne by the person who makes it, the payment or the part concerned is ineligible for relief.
- (6) But subsection (5) does not apply to a payment or part of a payment if—
- (a) the person who makes the payment is liable to income tax on an amount, and
- (b) it is because the person receives that amount or benefits from it in some other way that the payment or the part concerned is not ultimately borne by that person.

For the reasons for this, see EN ITA Change 82. But it will rarely if ever apply, so I do not set this material out here.

### **30.12 Annual Payment from RFI**

Section 839 ITTOIA provides:

- (1) In calculating the amount of relevant foreign income to be charged to income tax for a tax year, a deduction is to be allowed for an annual payment other than interest if it meets conditions A, B1 or B2 and C.
- (2) Condition A is that the payment is payable out of the relevant foreign income.
- (3) Condition B1 is that, had the payment arisen in the UK, it would have been chargeable to income tax under one of the following provisions –
- section 579 (charge to tax on royalties and other income from intellectual property),
- Chapter 4 of Part 5 (certain telecommunication rights: non-trading income),
- Chapter 7 of Part 5 (annual payments not otherwise charged) , or
- regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.
- (3A) Condition B2 is that, had the payment arisen in the UK it would have been–
- (a) required to be brought into account under Part 5 of CTA 2009 (loan relationships) as a non-trading credit, or
- (b) chargeable to corporation tax under Chapter 7 of Part 10 of that Act (annual payments not otherwise charged) or regulation 15

of the Unauthorised Unit Trusts (Tax) Regulations 2013.

(4) Condition C is that the payment is made to a non-UK resident.

Section 839(5) ITTOIA disapplies the relief if the remittance basis applies:

Subsection (1) does not apply if–

- (a) the relevant foreign income is received in the UK, or
- (b) it is charged for the tax year in accordance with section 832 (relevant foreign income charged on remittance basis).

No deduction is needed when the remittance basis applies, as income used in making the Annual Payments will not be remitted.

### **30.13 Annual Payments: Critique**

The reader who has studied the text to here will agree that there is scope for simplification.

It is suggested that the Annual Payment code ought to be abolished. In specific circumstances where a charge is needed, there ought to be an express charge, or it could fall under Misc Sweep-up Income. Annual-Payment WHT is not needed.

## CHAPTER THIRTY ONE

# INTELLECTUAL PROPERTY INCOME

- 31.1  
31.29 Opaque partnership taxable in full treaty territory
- 31.30 Body corporate transparent in full treaty territory

### *Cross references*

The following topics are considered elsewhere:

- 9.3.1 (Split year: Pt 4/5 ITTOIA Income)

## **31.1 IP income: Introduction**

This chapter considers the income taxation of intellectual property (IP).

I focus on matters closest to the themes of this book, but it is necessary to consider the topic in the round. I do not consider:

- (1) Corporation tax on IP (intangible fixed assets code)<sup>1</sup>
- (2) EU interest and royalties directive,<sup>2</sup> which applied to interest/royalty payments between associated companies in different member states, and is repealed, in short, from 1 June 2021.<sup>3</sup>
- (3) Diverted profits tax, Part 3 FA 2015
- (4) Averaging fluctuating profits of creative works, Chap 16 Part 2 ITTOIA
- (5) Disposal of know-how, s.584-596 ITTOIA

---

1 Part 8 CTA 2009. “Intangible fixed assets” includes royalties but excludes shares /financial assets. The intention was to avoid borderline issues between intellectual property and other intangible fixed assets; and to align the taxation of intangibles with the accountancy treatment.

For the interaction of this code and s.3 TCGA, see 60.5.5 (Derivatives and intangibles).

2 2003/49/EC (3 June 2003).

3 Section 34 FA 2021.

## (6) Sale of patents, s.587 - 599 ITTOIA

I hope to address some of these items in a future edition.

The current law has a long history. Background to the 2002 reforms can be found in Inland Revenue consultation and response papers:

- Innovating for the Future: Consultation Document (1998)
- Reform of the Taxation of Intellectual Property: Technical Note (1999)
- Reform of the Taxation of Intellectual Property, Goodwill and other Intangible Assets: the New Regime, Technical Note (June 2000)
- Reform of the Taxation of Intellectual Property, Goodwill and other Intangible Assets: the New Regime: the Next Stage Technical Note (November 2000)
- Taxation of Intellectual Property, Goodwill and other Intangible Assets: the New Regime, Technical Note (March 2001)

The focus of these papers is the CT regime, but there are also comments on IT, and they float the 2016 reforms which eventually came to pass.

HMRC have issued a technical note on the 2016 reforms (“**the Royalties Technical Note**”).<sup>4</sup>

## 31.2 IP: Terminology

### 31.2.1 *IP income/royalties*

Section 579 ITTOIA refers to “royalties and other income from intellectual property”. I refer to this as “**IP income**”.

Apart from the special cases of sale of patents/know-how, and trading, it is difficult to imagine income from IP which is not royalties. But the precise definition of royalties in s.579 does not normally arise.

OECD Model uses the term “royalties” in a defined sense which is (more or less) the same.

### 31.2.2 *Intellectual property*

Section 579(2) ITTOIA defines intellectual property:

In this section “intellectual property” means—

---

4 HMRC, “Deduction of income tax at source: Royalties - Updated Technical Note” (June 2016)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/532314/M1070\\_revised\\_TN\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/532314/M1070_revised_TN_final.pdf)

- (a) any patent, trade mark, registered design, copyright, design right, performer’s right or plant breeder’s right,
- (b) any rights under the law of any part of the UK which are similar to rights within paragraph (a),
- (c) any rights under the law of any territory outside the UK which correspond or are similar to rights within paragraph (a), and
- (d) any idea, information or technique not protected by a right within paragraph (a), (b) or (c).

I refer to this as the “s.579 definition”. This definition only applies for the purposes of s.579, so it has to be incorporated by reference in s.577A(5) ITTOIA.

### 31.2.3 Copyright

This is not the place to set out definitions of all IP terminology. However a note on copyright may be helpful. Section 1(1) Copyright, Designs and Patents Act 1988 provides:

Copyright is a property right which subsists in accordance with this Part in the following descriptions of work—

- (a) original literary, dramatic, musical or artistic works,
- (b) sound recordings, films [or broadcasts], and
- (c) the typographical arrangement of published editions.

Section 3(1) Copyright, Designs and Patents Act 1988 provides:

In this Part—

“literary work” means any work, other than a dramatic or musical work, which is written, spoken or sung, and accordingly includes—

- (a) a table or compilation other than a database,
- (b) a computer program,
- (c) preparatory design material for a computer program and
- (d) a database

Thus computer program royalties are treated in the same way as more conventional literary work.

### 31.3 Types of IP income

IP income is classified for income tax purposes in one of three ways. Statute does not provide much terminology, so I coin the following terms:

<b>My term</b>	<b>Outline</b>	<b>See para</b>
----------------	----------------	-----------------

Non-trade IP income	Not trade income, divided into:	31.4
(a) Annual Payment	Annual Payments	
(b) Non-Annual Payment IP income	Not Annual Payments	
Trade IP income	Trading receipts	31.8

These are not ideal labels, but I cannot think of better.

The three categories are recognised in *Noddy Subsidiary Rights v IRC*:

It seems to me that, where you have this position, that a person owns an asset of any kind, whether physical or not, and grants licences under it, [1] the activities which he carries on in connection with the grant of those licences may amount to a trade and then Case I of Schedule D applies [trading income].

[2] On the other hand, at the other end of the scale, the activities may amount to the mere holding of an investment, so that the receipt of income is in the nature of pure income profit and then Case III of Schedule D applies [Annual Payments].

[3] There may be intermediate cases in which Case VI of Schedule D might apply [now non-annual payment IP income or Misc Sweep-up Income].<sup>5</sup>

ITTOIA replaced the schedular scheme with its own categorisation scheme. It retained the 3 distinctions identified here, but IP income from the category of Misc Sweep-up Income to its own category, taxable under s.579 ITTOIA.

### 31.3.1 Trade/non-trade border

For general discussion of the concept of trade, see App.2.20 (Trade). I consider here what constitutes a trade in the context of IP income.

One example of a non-trade is casual authorship. In 1923, *Ryall v Hoare* considered “an instance which is particularly familiar at the present moment, perhaps”:

the case of casual authorship. Now, a man may carry on no business and no profession; he may not be a journalist, he may not be an author, but he may be called upon to write an article for a paper for reward. He may find that there would be a demand for a single book from his pen, as a traveller, a soldier, a sailor, or a statesman, or what not. Now, it

---

<sup>5</sup> 43 TC 458 at p.474.

seems to me that all cases of that kind... are instances of casual profits [ie, not trading] ...<sup>6</sup>

The BI Manual provides:

**BIM100205 authors** [Jun 2016]

An author who:

- organises their life so as to regularly spend time on their writing to produce work which has a commercial value, and
- combines this with a persistent and systematic marketing of the work for their own financial benefit,

is carrying on a profession and the profits are chargeable as trading income.

Someone who writes a book or article who is not carrying on a profession is taxable on their literary earnings under the sweep-up charge as miscellaneous income.

[The Manual cites the passage from *Ryall v Hoare* set out above and continues]:

Traditionally the type of author whose activities would not amount to a trade would include those whose prime motive may be the desire for fame or personal satisfaction, what is sometimes called ‘vanity publishing’.

It also includes those motivated by the desire to enhance their reputation in a particular field or the desire to leave the benefit of their knowledge to posterity.

**Modern technology and self publishing**

Modern technology provides many options for small scale publication. Computers enable more people to self publish, with the availability of ‘print on demand’ allowing production of small numbers of books.

The technology used does not change the position, and the same principles apply. Where the activities do not amount to a profession, any profits are taxable under the Miscellaneous Income provisions.

Another example of a non-trade is a casual inventor. In *IRC v Sangster* the taxpayer was an engineer and inventor. He received royalties for his patents, but manufacturing was done by his company, or other companies to whom he granted licences. He was not carrying on a trade or business. It would have been different if he had sold the patents he created:

---

<sup>6</sup> 8 TC 521 at p.527.

It is said ... in the argument in reply for the Crown, that it is all very well, but by giving these licences you are putting your patent on the market. So you are; but so is the man who builds a house and lets it putting it on the market, It seems to me that carrying on a business involves in a case like this the disposal of the article which you produce, as opposed to the retaining of it as a valuable thing in itself which you can treat itself as an investment, just as much as you could have treated what you bought with the money which you got for it if you had sold it.<sup>7</sup>

While it is well established that casual authorship is not a trade, it may be less clear whether the income should be regarded as:

- (1) Payment for services, taxed as Misc Sweep-up Income;<sup>8</sup> or
- (2) IP income

The answer should depend on the terms of the contract under which the income arises. But HMRC seem to accept option (1); see 31.14 (Professional authors).

The BIM provides:

**BIM50725 Authors And Royalties To Person Other Than Author**

[Jan 2019]

Copyright royalties received by an individual other than the author, composer etc (unless they form part of the receipts of a trade or represent post-cessation receipts - see BIM50740), are chargeable to Income Tax as miscellaneous income. A deduction should be given, where appropriate, for agents' commission...

### **31.4 Charge on non-trade IP income**

The income taxation of IP income is governed by Chapter 2 Part 5 ITTOIA.

Section 579(1) ITTOIA provides the charge to tax:

Income tax is charged on royalties and other income from intellectual property.

EN ITTOIA provides:

---

<sup>7</sup> 12 TC 208 at p.217.

<sup>8</sup> See 32.2 (Types of misc sweep-up income).

2262.[Section 579] sets out a new provision creating a specific charge to tax on royalties and other income from intellectual property. The source legislation uses general principles to tax such income. In the source legislation, income from intellectual property is charged:

- as annual payments under Schedule D Case III;
- as profits of a trade under Schedule D Case I;
- as annual profits or gains under Schedule D Case VI; or
- as income arising from possessions out of the UK under Schedule D Case V.

The new charge covers income charged in the source legislation under the heads mentioned above, except that trading income derived from intellectual property is to be taxed not under section 579 but under Part 2 [ITTOIA]. The rules set out in the section are not intended to widen or restrict the scope of the charges under Schedule D in the source legislation.

2263.The charge embraces royalties which are

- [1] UK source annual payments (Schedule D Case III in the source legislation),
- [2] overseas income from intellectual property (Schedule D Case V in the source legislation) and
- [3] casual profits of an income nature from the exploitation of intellectual property outside the course of a trade (Schedule D Case VI in the source legislation).

Thus the charge under s.579 applies to IP income whether Annual-Payments or Non-annual Payments.

The distinction between (non-trade) Annual-Payment/ Non-Annual Payment IP income matters for:

- (1) *Non-resident IT relief*: Annual-Payment IP income constitute disregarded income and qualify for that relief. Non-Annual Payment IP income does not.<sup>9</sup>
- (2) *Withholding tax*: UK source IP income paid to a UK resident is subject to WHT if Annual-Payments, but not if it is non-Annual-Payment IP income.<sup>10</sup>

Section 580 ITTOIA provides:

---

<sup>9</sup> See 42.7 (Disregarded Annual Payments).

<sup>10</sup> See 30.10 (Annual-Payment withholding tax).

(1) Tax is charged under section 579 on the full amount of the income arising in the tax year.

(2) Subsection (1) is subject to Part 8 (foreign income: special rules).

...

This incorporates the remittance basis for foreign-source royalty income; foreign source royalty income qualifies as RFI whether or not an Annual Payment.<sup>11</sup>

## 31.5 IP income: Income/capital

### 31.5.1 *Income/capital receipt: Trade*

BIM provides:

#### **BIM50705 Authors And Receipts** [Jan 2016]

Where the author etc. is chargeable to Income Tax on the profits of a profession, the profits are to be computed inclusive of all receipts from copyright and other sources, including lump sums received for the outright assignment of copyright (for example the assignment of copyright as a whole, or of serial rights or of rights in particular editions, or of film, television or radio rights). This is because the author's brain is his or her fixed capital. Copyright is a product of the author's brain. It is circulating capital and exploiting it gives rise to income. Similarly sales of manuscripts give rise to income (*Wain v Cameron* [1995] 67 TC 324). For more on the capital/revenue divide as it relates to authors, see BIM35725 - BIM35735.

The 18<sup>th</sup> century terms circulating/fixed capital are not helpful, and they are not much used in modern case law, but the general proposition that an author's sale of copyright is an income receipt was established already by the time of the Report of the Departmental Committee on Income Tax (1905):

44. The profits that an author derives from the publication of his work may be received by him in more ways than one. But the more usual forms are two, viz., (a) A royalty on copies as sold, (b) A lump sum paid to him by the publisher for the purchase outright of his entire interest in the work.

---

11 See 15.10.2 11B("Relevant foreign income").

45. Under the first plan no question can arise as regards the proper method of charging income tax. The receipts in each year constitute profits and gains for the year, and fall to be assessed in accordance with the rules of Schedule D.

46. Under the second, or lump sum, alternative, there is room for question whether when the purchase is made in respect of works of a permanent character the payment is not of the nature of capital rather than of income. For in that case it represents the estimated present value of a future income. There is much to be said for this view, which, in fact, is in accordance with the principle adopted in dealing with all other transactions of a similar character. But in practice it has become the well-established rule to treat such payments for copyright as income to the author, and to assess them in accordance with the rules of Schedule D...

48...it must be remembered as regard's the author that large payments for copyright are earned only by those who make literature their profession, either in whole; or in large part, and the money so earned is clearly in the nature of income derived from a profession, even though it is received at irregular intervals and in varying amounts.

### 31.5.2 *Income/capital receipt: Non-trade*

BIM provides:

#### **BIM50705 Authors And Receipts** [Jan 2016]

Where the author's income is chargeable as miscellaneous income, the profits should be similarly computed, except that lump sums received for the assignment of copyright only (see *Nethersole v Withers* [1948] 28 TC 501), as distinct from lump sum and similar payments associated with services (see *Hobbs v Hussey* [1942] 24 TC 153, and *Housden v Marshall* [1958] 38 TC 233), should be excluded. In this connection:

- a lump sum does not include a sum received on account of royalties or an amount arrived at by reference to a minimum or estimated number of copies of a book or performances of a work;
- an assignment, that is a transfer of ownership of a copyright, should be distinguished from a licence which permits the licensee to use copyrighted matter but does not involve any change in the ownership of the copyright;
- a lump sum payment not chargeable as miscellaneous income should be considered for Capital Gains Tax liability.

If, in an assignment case, the question of liability to Income Tax turns

on whether or not a profession is being exercised, consideration should be given to the taxpayer's activities both before and after the assignment.

### 31.6 Deductible expenditure

Expenses are deductible from non-Annual Payment royalties. Section 582 ITTOIA provides:

- (1) This section applies for calculating the amount of income charged under section 579 other than annual payments.
- (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible...<sup>12</sup>

There is no equivalent for Annual-Payment royalties, because Annual Payments by definition have no deductible expenses: they are pure income profit.

### 31.7 Source of non-trade IP income

The location of the source of IP income matters for the usual reasons, in particular:

- (1) A non-resident is not taxed on foreign source IP income
- (2) Foreign source IP income is RFI and qualifies for the remittance basis
- (3) Foreign source IP income is outside the scope of withholding tax<sup>13</sup>

So the question of source matters to both payor and recipient, though in many cases a DTA may make the issue irrelevant.

What is the test to determine the source of non-trade IP income?<sup>14</sup>

Looking at the matter from first principles, it makes good sense to say that the source of the income is the situs of the copyright or other IP; just as the source of income from land or chattel rentals is the location of the land or chattels. The situs of copyright is where it can be exploited or enforced.<sup>15</sup>

This view is also supported by authority. In *Curtis Brown v Jarvis*, three

12 This is a statutory codification of earlier case law: see 32.13 (Sweep-up income: Computation).

13 Because Royalty WHT condition A(c) is not met; see 31.10 (Royalty WHT conditions A & B).

14 For source issues generally, see 15.3 (Approach to locating source).

15 See 97.28 (Intellectual property).

authors not resident in the UK entered into contracts with UK publishers. (One of them was DH Lawrence, who contracted in 1920 to write “Women in Love”). The publishers paid royalties for the right to publish the books in the UK and elsewhere.

The authors were not carrying on a trade/profession/vocation even partly in the UK.<sup>16</sup> But the income was from “property in the UK” and taxable under sch D Case VI. The taxpayers’ main argument seems to have been that copyright was not property; which seems strange, but presumably that was not as clear in 1929 as it is now.

The Court commented on the question of whether the copyright was property in the UK:

whether the copyright is property within the UK, within the meaning of the enactment. Copyright is an intangible piece of property. It takes effect only as a right, it has no extension in space; but its taking effect, and its operation, is limited by locality, and when we speak, as we do in common parlance, of copyright in the UK, it seems to me that that phrase is absolutely accurate, it limits the extent - if I use the word “limits” I am using it in its technical sense - it defines the property as existing, perhaps, among places, in the UK.<sup>17</sup>

The Court did not consider whether the *contracts* might have been property in the UK. It is suggested that the contracts were mere machinery for the exploitation of the authors’ copyright, and had no independent vitality, so the Revenue were right not to take that as an alternative argument.<sup>18</sup>

The Court did not consider whether (so far as the books were published

---

16 Special Commissioners decision para 12, p.747; see 31.8.2 (Source of trade IP income).

17 14 TC 744 at p.751. On the question of whether the profession was carried on in the UK, it is relevant to note that (1) that the publishing contracts were made outside the UK; (2) all the writing work was done outside the UK.

For completeness: The assessment was on Curtis Brown as agent for the authors, under rule 5 of the ITA 1918 General Rules; the current UK representative rules are different. Copyright withholding tax also came in later, in s.25 FA 1927. But nothing turns on those points.

18 The taxpayer did not argue that payment was for services, rather than a royalty for copyright; but if, hypothetically, that had been the case, the question whether the contract was the source of income would have arisen.

outside the UK) the income might have been from copyright outside the UK. Perhaps the bulk of the sales were in fact made in the UK. Or perhaps the assessment was limited to UK sales, though the report does not discuss the point.

*Curtis Brown v Jarvis* was a pre-ITTOIA case where the issue was whether IP income was income from “property in the UK”. This is not necessarily identical to the issue of source under the contemporary legislation. But the issues may be regarded as analogous. It is a small step from one to the other. Indeed the difference could be completely overlooked by a non-historically minded court.<sup>19</sup> So *Curtis Brown* is a case which at least supports the view that the source of income is the situs of the copyright.

The INT Manual provides:

**342520 Copyright royalties** [Jun 2018]

If the copyright is exploited in the UK the royalty payment will be regarded as having a UK source and therefore within the provisions of [what is now s.906 ITA, withholding tax]. This is irrespective of the law governing the contract.

I refer to this as the place of exploitation test. This test is also supported in *Hughes & Payne*, “Payments for the use of computer software and the deduction of income tax therefrom” [2000] BTR 5 at p.10.

Another passage in the INT Manual proposes a different test:

**161130. The source rule – concessions** [Jan 2018]

... If the owner of a right such as a patent, trademark or copyright is not engaged in any trade to which the right relates but derives income by exploiting that right, the source of the income may be regarded for the purpose of credit as located in the country where the right is enforceable. ..

I refer to this as the place of enforcement test. But in relation to copyright, at least, place of enforcement may generally be the same as place of exploitation; if so this is (generally) the same test. If the place of enforcement is different, the place of exploitation should be preferred.<sup>20</sup>

It is considered that the multi-factorial test applicable to interest should

---

19 See 25.9.1 (Source in pre-ITTOIA legislation).

20 See 25.12.12 (Changes in international law).

not be adopted for the source of IP income. The situs of a debt is determined by arbitrary factors, such as the deed. So debt situs rules do not give a sensible answer to the location of the source of interest. For interest, there is no simple solution which works. The source of interest hard to pin down. IP income is different in all these respects.

There is a statutory territorial limitation for the charge on the sale of patents, but this does not shed much light on the source of IP income.<sup>21</sup>

The Hong Kong Inland Revenue Department give the following guidance:

***Where the IPR is purchased by the licensor***

74. If a taxpayer has purchased the proprietary interest of an IPR and licenses that IPR to another party for use outside Hong Kong, the royalties so derived will generally be regarded as non-Hong Kong sourced income and hence will not be subject to Hong Kong tax...<sup>22</sup>

This is (more or less) the same as the UK position for non-trade IP income, a place of exploitation test.

## **31.8 Trade IP income**

### **31.8.1 *Trading rules apply***

Trade IP income has a dual character: both a trading receipt and IP income. The charge on trading has priority.<sup>23</sup>

### **31.8.2 *Source of trade IP income***

The question whether trading income has a UK source is naturally to be decided according to the rules which apply to trades/professions. This is

---

21 Section 587 ITTOIA provides:

“(1) Income tax is charged on profits from sales of the whole or part of any patent rights.

(2) The tax is charged if–

(a) the seller is a UK resident, or

b) the seller is a non-UK resident and the patent is granted under the laws of the UK.”

22 Departmental Interpretation and Practice Notes No. 49 (2012)

<https://www.ird.gov.hk/eng/pdf/dipn49.pdf> See Mariani, “On the source and taxation of royalties in Hong Kong” Asia Pacific Tax Bulletin, 2016, Vol.22, No.3.

23 See 11A3.8 (Part 5 ITTOIA/trade income).

so even if the trading receipts are or include IP income.

Thus a UK resident trader has UK source trading profits even if the IP income comes from abroad, since the trade is at least in part carried on in the UK.<sup>24</sup>

What about a non-resident trader? The source is where the profits substantially arise.<sup>25</sup> There is commonwealth authority. In *Millin v IRC* the distinguished South African author Sarah Millin received royalties from foreign publishers for books which were written by her in South Africa, but printed and published in England and the USA. This was trading income (or more accurately, professional income but the trade/profession distinction should not matter here). The Appellate Division held that the income arose wholly from a source within South Africa:

... the source of the whole amount received for royalties was in the Union.<sup>26</sup> It is true that in this case no capital in the ordinary sense of that term was employed by Mrs. Millin. It was the exercise of her wits and labour that produced the royalties. They were employed in the Union, and it matters not, on the analogy of the *Overseas Trust* case,<sup>27</sup> that the grant to her publishers of the right to publish her book was contained in a contract made in England. Her faculties were employed in the Union both in writing the book and in dealing with her publishers, and, therefore, on the test applied in the cases cited, the source of the whole of her income would be in the Union.<sup>28</sup>

A cynical reader may wonder if the same decision would be reached by a tribunal sympathetic to the Revenue:

- (1) If the same facts were litigated in the UK; or
- (2) If the case was litigated in South Africa, but facts were reversed, and Mrs Millin wrote in England but received royalties from publishers in South Africa.

---

24 See 20.4.1 (UK resident trader: IT).

25 See 20.4 (IT territorial limit: Trading); 16.9 (Where is trading income source).

26 The Union of South Africa (1910-1961) was the predecessor to the present Republic of South Africa.

27 *Overseas Trust Corporation v IRC* [1926] AI 444, 2 SATC 71.

28 [1928] AD 207 at p.216. The point mattered for a resident of South Africa, because at the time South Africa taxed its residents only from income from a source in South Africa, not on their worldwide income.

In *Curtis Brown v Jarvis*, non-resident authors receiving UK royalties were likewise held not to be carrying on a profession even partly in the UK, But an assessment to UK tax was upheld on other grounds.<sup>29</sup>

The Hong Kong Inland Revenue Department give the following guidance:

72. ... The Department's views regarding the source of royalty income are set out in the following paragraphs.

***Where the IPR is created or developed by the licensor***

73. If an IPR is created or developed by a taxpayer carrying on business in Hong Kong and is licensed by the taxpayer to another party for use outside Hong Kong, the royalties so derived will generally be regarded as Hong Kong sourced income and hence will be subject to Hong Kong tax. This is because the royalty income is primarily generated by the taxpayer using his wits and labour to create or develop the IPR in Hong Kong...

The wording (“wits and labour”) show that the author has read and is following *Millin*.

***Where the IPR is not owned by the licensor***

75. If a taxpayer only obtains a licence to use an IPR from its owner (i.e. the taxpayer has not obtained the proprietary interest of the IPR) and then sub-licenses the IPR to another party for use outside Hong Kong, the Department will, in ascertaining whether the royalties so derived are Hong Kong sourced income, take the place of acquiring and granting the licence as the source of income. As such, if the taxpayer acquires in Hong Kong the licence for use of the IPR, and grants a sub-licence also in Hong Kong, the royalties derived from sub-licensing the IPR will be regarded as derived from Hong Kong...

This is also a case of trading.

76. The above are some general examples which illustrate the Department's views on the application of broad guiding principle. It must be emphasised that whether royalties derived from the licensing of IPRs by taxpayers carrying on business in Hong Kong are subject to tax will be a question of fact to be determined by the totality of the facts

---

29 See 31.7 (Source of non-trade IP income).

and circumstances in each case.<sup>30</sup>

This is (more or less) the same approach as the UK for trades carried on by a non-resident.<sup>31</sup>

### 31.8.3 *IP income from UK PE*

Section 577A(1) ITTOIA provides:

References in section 577<sup>32</sup> to income which is from a source in the UK include income arising where—

- (a) a royalty or other sum is paid in respect of intellectual property by a person who is non-UK resident, and
- (b) the payment is made in connection with a trade carried on by that person through a permanent establishment<sup>33</sup> in the UK.

In the following discussion:

The **IP income deemed-source rule**” is the rule in s.577A(1)

I refer to IP income within this rule as **“IP income from a PE”**

A **“UK trade”** means a trade carried on through a UK PE

This is based on the OECD model.<sup>34</sup>

Section 577A ITTOIA addresses apportionment when the trade is partly a UK trade:

- (2) Subsection (3) applies where a royalty or other sum is paid in respect of intellectual property by a person who is non-UK resident in

30 Departmental Interpretation and Practice Notes No. 49 (2012)

<https://www.ird.gov.hk/eng/pdf/dipn49.pdf>

31 See 16.9 (Where is trading income source).

32 Section 577 concerns the territorial scope of the charge under Section 579(1) ITTOIA. In particular, s.577(2) provides: “Income arising to a non-UK resident is chargeable to tax under this Part [Part 5 ITTOIA] only if it is from a source in the UK.” See 15.2 (IT territorial limit).

33 Section 577A(5) ITTOIA applies the UK-law definition: “In this section ... “permanent establishment”—

(a) in relation to a company, is to be read (by virtue of section 1007A of ITA 2007) in accordance with Chapter 2 of Part 24 of CTA 2010, and

(b) in relation to any other person, is to be read in accordance with that Chapter but as if references in that Chapter to a company were references to that person.”

See 101.2 (PE: UK-law/OECD Model meanings).

34 See 103.8.3 (Other business profit overlaps).

connection with a trade carried on by that person only in part through a permanent establishment in the UK.

(3) The payment referred to in subsection (2) is to be regarded for the purposes of subsection (1)(b) as made in connection with a trade carried on through a permanent establishment in the UK to such extent as is just and reasonable, having regard to all the circumstances.

There are strictly two distinct questions:

- whether a payment is made in connection with a UK trade: ss (1)
- the amount of the payment made in connection with the trade: ss(2)(3)

But in practice the two questions may overlap. The royalties technical note provides:

4.8 Royalties payable under licence agreements between independent parties are typically determined by reference to sales made by the licensee from using IP rather than the profits the licensee made. In most cases therefore it will be appropriate to determine the quantum of the royalty that has a UK source, because it is connected with the activity carried on in the UK through the UK PE, by reference to sales made by the non-resident through the UK PE.

4.9 Where the royalty is determined by reference to a factor other than sales, it might, depending on the activity carried on in the UK PE, be appropriate to determine the quantum of the royalty that comes from a source in the UK on a basis other than sales. However, in all cases the obligation to pay a royalty must be connected with the activities carried on in the UK by the UK PE in order for it to be considered that the royalty comes from a source in the UK.

4.10 In all cases, however, there will be no direct link between the separate rules

- [a] for attributing profits to a UK PE under section 19 CTA 2009 and
- [b] the rules for determining whether a royalty paid by a non-resident comes from a source in the UK.

The test is not for a royalty to be considered to come from a source in the UK only when it is deductible directly or indirectly in computing the profits of a UK PE that are chargeable to corporation tax. Rather, the approach is for a royalty to be considered to have a UK source when the obligation of a non-resident person to make the royalty payment is connected with the activities that the non-resident person carries on in the UK through the UK PE.

#### 31.8.4 *IP income connected to PE*

4.11 Where the activity carried on in UK relates to the sale of goods, services or other property by the non-resident, the obligation of the non-resident to pay the royalty must arise because of the exploitation of the IP in carrying out those sales activities in the UK through the UK PE. That connection will be clear to see with dependent agent PEs because it is the activity of the non-resident person in concluding contracts for sale that creates the PE in the first instance. Any obligation of the non-resident to pay a royalty is clearly connected to the sales activity carried on through the UK PE.

4.12 There are other circumstances where activities carried on through the UK PE are connected to the sales by the non-resident but do not result in the conclusion of a sales contract between the non-resident and the customer. This could be, for example, because the sales process is automated and the contract is concluded online but it is the activities of personnel in the UK PE that have contributed to that customer entering into the online contract with the non-resident. The obligation of the non-resident to pay the royalty is connected to the trade it carries on in the UK through the UK PE because the activity it carries on through the UK PE that has contributed to the making of a sale by the non-resident that in turn leads to its obligation to pay a royalty.

4.13 Similarly where the activity carried on in the UK through the UK PE is to market goods, services or other products provided by the non-resident or to manage relationships with customers, that activity will be connected with the obligation of the non-resident to pay the royalty where the activity carried on through the UK PE is a part of the process that leads to a sale of goods, services or other property by the nonresident in respect of which the royalty is paid.

### 31.8.5 *Apportionment*

4.14 The royalty payable by the non-resident is unlikely to be restricted to sales made through the UK PE and will typically be in respect of a licence to use the IP across a wider geographical area. Subsections (2) and (3) of new section 577A ITTOIA provide that where a royalty payment is made in connection with a trade of a non-resident only carried on in part through a UK PE, only that part connected with the activities of the non-resident carried on in the UK will be considered to come from a source in the UK. In the case of a royalty related to sales made by a non-resident, only the proportion of the royalty payable in respect of sales in which the UK PE has played a part will be

considered to come from a source in the UK.

4.15 Subsection (3) of new section 577A ITTOIA provides that the apportionment of a royalty to amounts connected with a trade carried on only in part in the UK through a UK PE should be calculated on a just and reasonable basis, having regard to all the circumstances. In the case of a royalty related to sales made by a non-resident, such a just and reasonable apportionment should be made on the basis of the proportion of the non-UK resident's total sales in arise compared to the proportion of the sales in respect of which the royalties arise that are made through, or that are connected to the trade carried on through, the UK PE. This is illustrated through the following example:

The royalties technical note provides an extremely simplified example:

The non-UK resident has income in respect of sales as follows:<sup>35</sup>

sales through PE in the UK	£30m
sales through PE in France	£30m
sales through PE in Germany	£30m
sales in country of residence	<u>£30m</u>
<b>Total</b>	<b><u>£120m</u></b>

The non-UK resident makes a royalty payment of £40m. This royalty relates only to the goods sold through its PEs in the UK and France and not those sold through its PE in Germany or in its country of residence.

A just and reasonable apportionment allocates £20m of the royalty to a UK source with reference to that part of the sales of the non-resident that create the obligation to pay the royalty. That is:

$$\text{Total royalty (£40m)} \times \text{UK PE Sales (£30m)} \div \text{Total sales (£60m)} = \text{£20m}$$

### 31.8.6 IP income from UK PE: TAAR

Section 577A(4) ITTOIA provides:

In determining for the purposes of section 577 whether income arising is from a source in the UK, no regard is to be had to arrangements<sup>36</sup> the main purpose of which, or one of the main purposes of which, is to avoid the effect of the rule in subsection (1).

This TAAR only applies for the purposes of s.577/577A (territorial

<sup>35</sup> I have set out the data in tabular form for clarity.

<sup>36</sup> Section 577A(5) ITTOIA provides the standard (unnecessary) IT definition of “arrangements”: see App 2.2.3 (Definitions of “arrangement”).

limitation), but there is another TAAR for IP withholding tax.

### 31.9 IP/AP WHT: Introduction

For a general introduction to withholding taxes, see 25.17 (Withholding taxes: Introduction).

Withholding taxes are contained in Part 15 ITA. The provisions relevant to IP income are:

<b>Topic</b>	<b>Chapter:</b> section	<b>Payment to</b>
Annual Payment WHT	<b>6:</b> ss.899-905	Resident or non-resident; see 30.10
IP WHT	<b>7:</b> ss.906-909	Non-resident
DTAs	<b>8:</b> ss.911-917A	

I do not discuss patents, but list the references here for completeness:

Use of patent	<b>6:</b> s.903	Resident or non-resident
Sale of patent	<b>7:</b> ss.910	Non-resident

In this book I coin the following terms:

**IP WHT:** withholding tax on IP income under post-2016 Chapter 6

**Annual-Payment WHT:** withholding tax on Annual Payments under Chapter 7<sup>37</sup>

**Pre-2016 copyright WHT:** withholding tax on (in short) copyright royalties under s.906 in its pre-2016 form

There is a set of general WHT exemptions discussed at 25.22 (Withholding tax: Exceptions).

Copyright WHT was introduced in 1927, following recommendations of the Royal Commission on Income Tax (1920),<sup>38</sup> and extended to IP WHT in 2016.

#### 31.9.1 IP/AP WHT compared

IP WHT only applies if the payment is to a person whose usual place of abode is outside the UK. If the payment is an Annual Payment, Annual Payment WHT will in principle apply, on a payment to a UK resident.

---

37 See 30.10 (Annual-Payment withholding tax). This include Annual-Payment IP income, if not caught by IP WHT.

38 Para 160. The Royal Commission deal with the topic in a couple of brief sentences.

### 31.10 IP WHT conditions A&B

Section 906(1) ITA provides:

This section applies to any payment<sup>39</sup> made in a tax year where condition A or condition B is met.

I refer to “**IP WHT conditions A and B**”.

Conditions A and B are in fact sets of conditions. Condition B is a variant of condition A, in cases of assignment of intellectual property, and it is convenient to see them side by side:

#### Condition A: s.906(2) ITA

Condition A is that—

(a) the payment is a royalty, or a payment of any other kind, for the use of, or the right to use, intellectual property (see section 907),

(b) the usual place of abode<sup>40</sup> of the owner of the intellectual property is outside the UK, and

(c) the payment is charged to income tax or corporation tax.

#### Condition B: s.906(3) ITA

Condition B is that—

(a) the payment is a payment of sums payable periodically in respect of intellectual property,

(b) the person entitled to those sums (“the assignor”) assigned the intellectual property to another person,

(c) the usual place of abode of the assignor is outside the UK, and

[identical]

#### 31.10.1 “Intellectual property”

This term is key to the application of WHT conditions A/B.

Section 907(1) ITA provides:

In section 906 “intellectual property” means—

<sup>39</sup> For the meaning of payment, see 14.3 (Recognition/attribution: Analysis).

<sup>40</sup> See 25.21 (Usual place of abode).

- (a) copyright of literary<sup>41</sup>, artistic or scientific work,
- (b) any patent, trade mark, design, model, plan, or secret formula or process,
- (c) any information concerning industrial, commercial or scientific experience, or
- (d) public lending right in respect of a book.

This is not worded the same way as the (standard) s.579 definition of IP;<sup>42</sup> but (except for films) the differences do not seem to matter.

### 31.10.2 *2016 extension of IP WHT*

The royalties technical note provides:

1.9 ... the government decided to bring the definition of UK royalties on which non-residents are taxable into line with the internationally-accepted definition contained in the OECD model tax treaty.<sup>43</sup> It will do this by applying the familiar withholding requirements to those payments that are classified as royalties for the purposes of the OECD model tax treaty. At present, for example, payments for the right to use trade names and trademarks are subject to a royalty withholding tax only if they are “annual payments”. Under the new approach, all such payments will be subject to withholding tax.

1.10 One effect of conforming the UK’s rules to the internationally-accepted definition of royalties is that the reciprocal balance in the UK’s tax treaties will be better maintained. Where a bilateral treaty preserves the right of the source state to tax a royalty payment, in whole or in part, the UK will now be able to tax the same categories of payments as its treaty partner. And where a treaty is being abused, and its benefits are disappplied by the anti-abuse rule, the UK will be able to tax in full all royalty payments, as it would where no tax treaty was in existence. ...

3.10 The clause replaces the definition of a ‘relevant intellectual property right’ in section 907 ITA with a broader definition of ‘intellectual property’. This will follow the definition of rights, payments in respect of which are defined as royalties by the OECD model tax treaty. The withholding rules will therefore be broadly

---

41 “Literary” should have the wide sense used in copyright law; see 31.2.3 (Copyright).

42 See 31.2.2 (Intellectual property).

43 See 31.16.1 (“Royalties”).

aligned with the taxing rights allocated to the UK under its tax treaties. It follows from this alignment that the UK will consider the commentary to Article 12 of the OECD model tax treaty in determining whether a payment is one to which the deduction of tax applies by virtue of the amended section 906 and 907 ITA.

...

3.12 The change will simplify (!) the rules relating to payments of royalties by requiring deduction of tax from all types of payment. Withholding will no longer depend on whether a particular type of royalty is an annual payment.

The wording of IP WHT condition A and the definition of Intellectual Property both (broadly) follow the wording of the OECD Model, and the OECD Commentary will be relevant.

The wording of IP WHT condition B was left unchanged, and follows the pre-2016 form. I wonder if that was deliberate. But it will not often matter.

### 31.10.3 *Films*

Section 907(2) ITA provides:

In this section “copyright of literary, artistic or scientific work” does not include copyright in—

- (a) a cinematographic film or video recording, or
- (b) the sound-track of a cinematographic film or video recording, except so far as it is separately exploited.

This retains the exemption from copyright WHT in the pre-2016 law. The exemption goes back to the beginning of copyright WHT, in FA 1927, when the film industry was in its early days.

## 31.11 **Application of IP WHT**

Assuming IP WHT conditions A or B are satisfied, s.906(5) ITA imposes the withholding tax:

The person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year. ...

### 31.11.1 *Exported copies*

Section 906(4) ITA provides:

But this section does not apply if the payment is made in respect of copies of works, or articles, which have been exported from the UK for distribution outside the UK.

This point was discussed when copyright WHT was introduced in 1927, and Hansard gives some idea of the quality of tax debate a century ago:

**Captain Macmillan:**<sup>44</sup> “It is quite clear that the sums which are received as royalties in respect of sales effected in the United Kingdom should be subject to Income Tax if the author or owner is resident abroad, but the argument seems to me to be strained when you say that those who reside abroad and draw profits for the sales of their works abroad should contribute through the Income Tax towards the general taxation of the country. It may not be within the knowledge of the Treasury that the publishing business in this country carry on their trade in many parts of the world; and what we are seeking to provide is that the sums payable to non-residents, or foreign authors, should not be liable to English Income Tax, merely because of the fact that their works are published by English publishing firms. If an English publishing house is carrying on business in France, or India, or Egypt, and a native of one of these countries, by the mere fact that he is doing business with a firm whose headquarters are in London, makes himself liable to Income Tax in this country, the result would be to drive away the business for English publishing houses, which would mean a loss to the Treasury and the publishing business. At present an English business carrying on a large part of its work in foreign countries, the profits on the business abroad and in England are subject to English Income Tax. We want to ensure that while in respect of the sales in this country it is right that Income Tax should be deducted for royalties paid to non-resident authors, there should not be brought about by this Clause a situation abroad which would reflect injuriously on the business carried on by such firms who have had the enterprise to carry their work into different parts of the world. ... I am sure it is not the intention of the Treasury to enact a Clause, the result of which would be to deprive English business firms of the opportunity of competing, in this respect, on equal terms with firms native to the countries where they are working. ... we are only seeking to tax non-resident authors in respect of the sums which they draw from sales of their works to the public of the United Kingdom.

It may be necessary to add that certain complications arise from the fact that in the case of many books by foreign authors, English publishers try to retain,

---

44 Author’s footnote: This is how Harold Macmillan was named in Hansard.

where possible, the Dominions market as well as the United Kingdom market. For instance, many American books are sold to English publishers who handle them in the Canadian and Australian markets as well as in the English market. If the royalties in respect of sales made in Australia were made subject to English Income Tax—

**Mr Couper:** The hon. and gallant Member is referring to some Income Tax which is unknown in this country...

**Captain MacMillan:** I am sorry if I have offended the hon. Member. If the mere fact of dealing with a British house made the author in that case liable to British Income Tax, the tax could easily be evaded by not giving the books in question to the British firms for marketing in the Dominions. That would be a loss both to the firms and to the Treasury.

**The Attorney-general (Sir Douglas Hogg):** My hon. and gallant Friend has accurately stated the intention of the Government in introducing this Clause. It is to carry out the recommendations of the Royal Commission on Income Tax to ensure that foreign authors who get royalties from the sale of their works in this country shall not escape the effective charge of Income Tax. It is certainly not the intention of the Government that, under the guise of a Clause to tax foreign authors' royalties in this country, we should do anything to discourage the printing and publishing in this country of foreign works which are going to be sold in the Dominions or abroad.<sup>45</sup>

### 31.11.2 IP WHT: TAAR

Section 40(5) FA 2016 provides a TAAR:

In determining whether section 906 of ITA 2007 applies to a payment, no regard is to be had to any arrangements the main purpose of which, or one of the main purposes of which, is to avoid the effect of the amendments made by this section.

The unallowable purpose which triggers this TAAR is an arrangement which seeks to avoid the effect of the *amendments* made by s.40, that is, to seek to avoid WHT which would apply under the post-2016 IP WHT, but not under the pre-2016 copyright WHT. The amendments, in short,

---

45 Hansard, 30 June 1927

<https://api.parliament.uk/historic-hansard/commons/1927/jun/30/clause-23-payment-of-income-tax-on>

extended the scope of withholding tax.<sup>46</sup> A purpose to seek to avoid the consequences of the rule in the pre-2016 s.906 is not caught. The reader may think that rather odd. Fortunately, the point will not often arise. Perhaps a purposive construction should be applied.

If the unallowable purpose condition is met, the consequence is to disregard the arrangement. In my terminology, this is a disregard-style TAAR; see 2.10.5 (Consequence of TAAR).

31.11.3 *Deduction for commission*

Section 908 ITA provides a deduction for commissions:

- (1) If—
  - (a) a payment to which section 906 [IP withholding tax] applies is made through an agent who is UK resident, and
  - (b) the agent is entitled as against the owner of the right to deduct a sum as commission for services provided,
 section 906(5) and Chapters 8 (deduction at special rates), 15 and 16 (collection) apply as if the amount of the payment were the amount net of the sum deductible as commission.
- (2) But if the person by or through whom the payment is made does not

---

46 For this purpose it could therefore be necessary to compare the pre/post-2016 law. In brief, the two versions of s.907(1) ITA are:

<b>Post-2016 wording</b>	<b>Pre-2016 wording</b>
In section 906 “intellectual property” means— (a) copyright of literary, artistic or scientific work,	In section 906 “a relevant intellectual property right” means— (a) a copyright,
(b) any patent, trade mark, design, model, plan, or secret formula or process,	(b) a right in a design, or
(c) any information concerning industrial, commercial or scientific experience, or	
(d) public lending right in respect of a book.	(c) the public lending right in respect of a book.

know the commission is payable, or does not know its amount—

- (a) the sum representing income tax required to be deducted under section 906 must be calculated in the first instance on the total amount of the payment, and
- (b) the return to be made under Chapter 15 or the account of the payment under Chapter 16, must be based on that total amount.

#### 31.11.4 *Timing*

Section 909(1) ITA is a timing provision:

A payment to which section 906 [withholding tax] applies is treated for all income and corporation tax purposes as made when it is made by the first person who makes it, not when it is made by or through any other person.

#### 31.11.5 *Contracting out*

Section 909(2) ITA prevents contracting out:

If, under section 906, a sum representing income tax must be deducted from a payment, any agreement to make the payment without deduction of that sum is void.

### 31.12 IP WHT: DT relief

The UK operates a self-certification system. Section 911 ITA provides:

- (1) This section applies if—
  - (a) a company pays a royalty from which it is required to deduct a sum representing income tax under Chapter 6 or 7,
  - (b) the income tax in respect of the payment is collectible under Chapter 15 or 16, and
  - (c) the company reasonably believes that, at the time the payment is made, the payee is entitled to relief in respect of the payment under double taxation arrangements.
- (2) The company may calculate the sum to be deducted from the payment under Chapter 6 or 7 by reference to the treaty rate.<sup>47</sup>
- (3) But, if the payee is not at the time entitled to such relief, this Part

---

47 Defined s.911(4) ITA: “In this section “the treaty rate” means the rate of income tax appropriate to the payee under the arrangements.” Where the OECD model form is followed, 100% relief is available, and the treaty rate is 0%

has effect as if subsection (2) had never applied in relation to the payment.

This only applies to company payors. In other cases, advance clearance is needed under the procedure discussed in the context of interest.<sup>48</sup>

Section 912 ITA allows HMRC to require withholding:

- (1) This section applies if an officer of Revenue and Customs is not satisfied that the payee will be entitled to relief under double taxation arrangements in respect of one or more payments of royalties that a company is to make.
- (2) The officer may direct the company that section 911 is not to apply to the payment or payments.
- (3) A direction under subsection (2) may be varied or revoked by a later direction.

Section 913 provides supplementary definitions:

- (1) In sections 911 and 912 “royalty” includes—
  - (a) a payment received as consideration for the use of, or the right to use, a copyright, patent, trade mark, design, process or information, and
  - (b) the proceeds of the sale of the whole or part of any patent rights.
- (2) In sections 911 and 912 “payee” means the person beneficially entitled to the income in respect of which the payment is made.<sup>31.13</sup>

### **31.13 IP WHT: Treaty override**

Section 917A ITA provides what HMRC describe as an anti-treaty shopping provision.

The royalties technical note provides:

1.3 It is a feature of most countries’ tax systems that non-residents are taxable on certain types of income that arise in that country. Royalties typically fall within those types of income and, to enforce their taxing right, countries will generally require the payer of the royalty to withhold tax from the payment and account for it to the tax authorities. The UK is no exception to this practice.

1.4 The tax treatment of cross-border payments of royalties is governed

---

48 See 25.28 (DT relief: Withholding tax).

by the EU Interest and Royalties Directive (IRD) and tax treaties, also known as double taxation agreements or DTAs, of which the UK has over 120. Many of these DTAs follow the OECD model tax treaty, which stipulates that royalties are taxable only in the country of residence of the beneficial owner of the royalties. A provision of this sort therefore removes the taxing right of the country in which the royalty arises, on a reciprocal basis. The Government thinks that that this is an appropriate treatment, which removes tax obstacles to cross-border investment and provision of services.

1.5 However, countries give up their taxing rights in these circumstances in the expectation that the royalties will be paid for the benefit of a resident of a treaty partner. It is a frustration of the purpose of a tax treaty if a person resident in a third country uses a bilateral tax treaty with the UK to extract tax-free royalties from the UK, especially if no tax is paid on the receipt and no substantive activity is taking place in that third country. It is for this reason that tax treaties contain anti-abuse provisions to prevent so called “treaty shopping” by these third country residents.

1.6 In a world economy where multinational groups derive large sums from the exploitation of intellectual property (IP), cross-border royalty payments have become increasingly prevalent, and the need to ensure that they are taxed in an appropriate way is more important than ever.

1.7 The Government is concerned that some multinational groups have put in place arrangements under which IP is held by a group company in a jurisdiction where no tax is paid and no substantive activity takes place, and have structured the payments of royalties to that company in a way that takes advantage of the UK’s tax treaties with other countries. This deprives the UK, as the country in which the royalty arises, of the right to tax. Had the royalty been paid direct to that ultimate jurisdiction, the UK would have retained its taxing rights on the basis that there was no treaty in place between the UK and that jurisdiction.

Section 917A(1) ITA provides:

This section applies if and to the extent that—

- (a) a person (“the payer”) makes an intellectual property royalty payment,<sup>49</sup>

---

49 Defined s.917A(4) ITA: In this section ... “intellectual property royalty payment” means a payment referred to in section 906(2)(a) or (3)(a)”.

For these references, see 30.10 (Annual-payment withholding tax); 31.10 (Non-annual

- (b) the payment is received<sup>50</sup> by a person (“the payee”) who is connected with the payer, and
- (c) the payment is made under DTA tax avoidance arrangements.

Where these conditions are met, s.917A(2) provides a treaty override:

- (2) Any duty under Chapter 6 or 7 to deduct a sum representing income tax at any rate applies without regard to any double taxation arrangements.
- (3) Any income tax deducted by virtue of subsection (2) may not be set off under section 967 or 968 of CTA 2010.

### 31.13.1 “Connected”

Section 917A(5) ITA provides a non-standard definition:

For the purposes of this section the payer is connected with the payee if the participation condition<sup>51</sup> is met as between them.

It is poor drafting to use the expression “connected with” in a non-standard sense, but no harm is done.

### 31.13.2 DTA avoidance arrangement

Section 917A(4) ITA provides:

In this section—

“DTA tax avoidance arrangements” means arrangements<sup>52</sup> where, having regard to all the circumstances, it is reasonable to conclude that—

- (a) the main purpose, or one of the main purposes, of the

IP WHT).

50 Widely defined in s.917A(4): “In this section ... “receive” means receive—

- (a) directly or indirectly;
- (b) by one payment or by a series of payments”.

51 Section 917A(6) incorporates the standard definition by reference: “Section 148 of TIOPA 2010 (when the participation condition is met) applies for the purposes of subsection (5) as for the purposes of section 147(1)(b) of that Act, but as if references to the actual provision were to the provision made or imposed between the payer and the payee in respect of the arrangements under which the payment is made.”  
See 100.1, 14.1 (Participation).

52 Section 917A(4) provides the standard (unnecessary) IT definition of “arrangements”: see App 2.2.3 (Definitions of “arrangement”).

- arrangements was to obtain a tax advantage<sup>53</sup> by virtue of any provisions of a double taxation arrangement, and
- (b) obtaining that tax advantage is contrary to the object and purpose of those provisions;

The royalties technical note provides:

2.8 ... the rule in new section 917A is modelled closely on the OECD anti-abuse rule (principal purpose test or PPT) that was designed as part of the OECD/G20 BEPS project.<sup>54</sup> [The OECD] commentary will help to explain how the rule will operate and how it is to be interpreted. HMRC will follow that commentary when applying new section 917A. However, the OECD rule covers treaty abuse of all types, whereas the domestic rule in new section 917A is a targeted provision confined to royalty payments between connected parties. The section 917A rule will therefore operate in a similar manner to the existing “main purpose” tests contained in the dividend, interest, royalty and other income articles of many of the UK’s bilateral tax treaties. It is therefore likely that if those tests do not presently apply to a transaction or arrangement, the section 917A rule will not apply either.

Example 1 concerns a conduit arrangement:

2.9 An example of a case where the section 917A rule (and therefore an existing “main purpose” treaty rule) would apply would be where the payer of a UK royalty paid it as part of a conduit arrangement. Here, the payee could be a resident of a country with which the UK had a DTA that assigned exclusive taxing rights over royalties to the state where the beneficial owner was a resident. But if that person (even though he was the beneficial owner<sup>55</sup>) paid the royalty on, perhaps through a licence/sub-licence agreement, directly or indirectly, to an affiliate in another jurisdiction, and the main purpose of the arrangement was to obtain a tax advantage by virtue of a provision of the DTA, section 917A would apply.

Example 2 is an inter-group transfer:

---

53 Defined by reference in s.917(A(4): “In this section ... “tax advantage” is to be construed in accordance with section 208 of FA 2013.” See 2.12.1 (Tax advantage: Definitions).

54 See 104.8 (Principal purpose test).

55 Author’s footnote: But as the beneficial owner rule has been hijacked to become an anti-conduit rule, the recipient in this example is not likely to be a beneficial owner.

2.10 Another example of circumstances where the rule could apply is where a multinational group assigned IP to an affiliate in a country with which the UK had a treaty providing for residence state only taxation of royalties. Even if that affiliate had a substantive operation and, for example, had a large R&D function of its own, if, on the facts of the case, one of the main purposes of the transfer of the IP was to obtain a tax advantage by virtue of a provision of the DTA, section 917A would apply.

2.11 In both cases, the section 917A rule would not apply where the person could show either that no tax advantage was obtained or that granting the benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of the DTA.

The technical note considers cases where the TAAR “might not apply”. In example 3 there is no UK tax advantage:

This might be the case in the following example. A multinational group develops and holds IP in Country X whose DTA with the UK provides for the taxation of royalties only in the residence state. The group then decides to consolidate its IP in a regional hub and chooses Country A, whose DTA with the UK also provides for residence state only taxation, in preference to Country B, whose treaty with the UK allows a source state taxing right. Even though one of the reasons for transferring the IP to Country A rather than Country B might have been to obtain the benefits of the DTA between Country A and the UK, section 917A would not be likely (?) to apply to deny those treaty benefits as there was no tax advantage as a result of the transfer of IP from the first country.

In example 4 there is “substantive economic activity”:

2.12 It might also be the case in the following example. A multinational group wants to establish a research and development centre through a subsidiary in Europe. This subsidiary will develop IP in its country of residence through staff engaged for that purpose which it is then expected to licence either to other group companies or third parties. In deciding to establish its subsidiary in State Y, the group considers a number of factors, including the availability of staff with the appropriate skills, infrastructure, reliable legal system, the local tax regime and the comprehensive DTA network of State Y, including its DTA with the UK. In this example, merely reviewing the effect of the DTA between State Y and the UK on future payments of royalties does not enable a

conclusion to be drawn about the purposes of the group in establishing the State Y subsidiary. The subsidiary will conduct substantive economic activity in State Y using real assets and controlling the economically significant risks, and will conduct that activity through its own staff located in State Y. As a result, the granting of a treaty benefit in these circumstances would be likely (?) to be in accordance with the object and purpose of the DTA and section 917A would not apply to deny treaty benefits in respect of future royalty payments unless the State Y subsidiary enters into other specific transactions to which section 917A would apply.

### 31.14 Professional authors

The International Manual provides:

#### **342590. Professional authors** [Jun 2018]

Copyright royalties that are payable to an author/originator of a literary, dramatic, musical or artistic work that has been created in the ordinary course of his profession (an “author by profession”) fall into the same category as fees for professional services and do not come under [withholding tax rules]. Payments that are made to an author by profession who usually lives overseas are therefore not subject to deduction of UK income tax at source. This follows the decisions in *Carson v Cheyney’s Executor* (38 TC 240) and *Hume v Asquith* (45 TC 251) ...

A Professional Author can be classed as such if he is clearly the originator of the work(s) concerned. If the claimant is not the originator of the work but has acquired the rights from that person they may not be treated as a professional author. ...

This practice was confirmed in a parliamentary statement in 1969:

Mr Ashton asked the Chancellor of the Exchequer what steps he takes to recover tax on fees<sup>56</sup> paid to British Nationals living abroad by publishers in this country.

Mr Roy Jenkins: [Withholding tax for royalties] requires any person making such payments to deduct tax at the [basic] rate and to pay it over to the Inland Revenue. I am advised that this does not apply to payments

---

56 Note that Joe Ashton carefully used the word “fees” rather than “royalties”.

made to those who are authors by profession...<sup>57</sup>

It is obviously correct that IP withholding tax only applies to IP income, and not to fees for services. A barrister who writes an Opinion receives a fee for services, not IP income, and the fee paid to a non-resident barrister would not be subject to IP withholding tax. But the proposition that professional authors receive fees for services, rather than IP income, is a curious one. *Cheyney* and *Asquith* the cases decided a different point, that post-cessation receipts of professional authors were not taxable as Annual Payments or Misc Sweep-Up Income (then, sch D Cases III and VI); I wonder if it necessarily followed that receipts are not royalties for the purposes of IP withholding tax.

Certainly this practice, if correct, frustrated the intention of parliament in introducing copyright withholding tax in 1927, which was aimed specifically at non-resident authors.<sup>58</sup>

It only matters in practice where the author is resident in a jurisdiction without a DTA conferring relief. That may be unusual, which may explain why the practice has survived.

The same rule must apply to post-cessation receipts. Payments to the executors of an author which are exempt from IP withholding tax during the life of the author, (because they are not IP income) should continue to be exempt from IP WHT after the death of the author.

Hughes and Payne say:

In terms, only professional authors are covered but it is generally considered that the scope extends to professionals other than authors, for example, professional photographers and designers whose works are also protected by copyright. It is also thought that it should extend to individuals whose profession consists in writing computer programs. They are, after all, properly called authors and their output is protected

---

57 Hansard HC debate (10 November 1969) vol 791 col 31

[https://hansard.parliament.uk/Commons/1969-11-10/debates/287b6ab7-aab4-48ac-8d46-c57bab8d26e3/OverseasBritishNationals\(PublicationFees\)](https://hansard.parliament.uk/Commons/1969-11-10/debates/287b6ab7-aab4-48ac-8d46-c57bab8d26e3/OverseasBritishNationals(PublicationFees))

In *Curtis Brown v Jarvis* 14 TC 744 a non-resident author was taxed on UK royalties under sch D case VI (now, in my terminology, non-Annual Payment royalties); but this would not be the case under current HMRC practice and understanding of *Cheyney* and *Purchase v Stainer* 32 TC 367; see [2000] BTR 10 at p.12. But *Curtis Brown* is still cited on other points.

58 See 31.11.1 (Exported copies).

by copyright.

A similar distinction has been reached in South Africa. The South African Institute of Chartered Accountants say:

In *Millin v CIR*,<sup>59</sup> it was held that the true source of royalties accruing from a book was the author's wits, labour and intellect. Therefore if these activities are carried out in the Republic, the true source is in the Republic. The principle from Millin's case also applies to royalties accruing to inventors from patents and similar assets. If the inventor applies his wits, labour and resources in the Republic, any resulting income accruing to him is from a true source in the Republic.

When a royalty is earned by a person who is not the original author or inventor, for example, by a person who has purchased the royalty-producing asset from the original author or inventor, since the royalties would then be derived not from the wits, labour or intellect of the recipient but from the ownership of the royalty-producing asset...<sup>60</sup>

#### 31.14.1 *Company authors*

Hughes and Payne consider the position of companies:

The question is: does the principle of the *Stainer* and *Cheyney* cases extend to such a trading company, with the result that the royalties would not be subject to UK tax at all? The argument in support would have to proceed along the lines that:

(a) just as copyright royalties of an overseas, professional author are not subject to UK tax because such royalties are professional earnings taxable only under Case II, which does not extend to non-residents if the profession is carried on entirely outside the UK; so also,

(b) copyright royalties of an overseas trading company are not subject to UK tax because such royalties are trading income taxable only under Case I, which does not extend to non-residents if the trade is carried on entirely outside the UK.

The phrase "taxable only under Case II" was emphatically endorsed again and again throughout the *Cheyney* and *Stainer* cases by the House of Lords because the source of the copyright royalties was held to be nothing but the professional activity of the individuals concerned. Can it be said that copyright royalties of a trading company are taxable only under Case I because the source of the royalties is nothing but the trading activity of the company? If so, with which

---

<sup>59</sup> See 31.8.2 (Source of trade IP income).

<sup>60</sup> [https://www.saica.co.za/integritax/2001\\_March\\_Special\\_issue/3\\_7\\_Royalties.htm](https://www.saica.co.za/integritax/2001_March_Special_issue/3_7_Royalties.htm)

activity of the company can the source of copyright royalties be identified?

In the cases of the professional individuals, the activity identified as the source of the royalties was held to be the actual writing of the books or the producing of or acting in the films. In the case of a professional author of computer programs, the identified activity (and therefore source) would be the actual writing of the programs.

... The parallel with the *Cheyney* and *Stainer* cases would then imply that royalties sourced from such activities were taxable only as Schedule D Case I trading income, with the result that, if the activity was carried on entirely overseas by a non-resident company, the profits would not be subject to UK taxation.

That sort of situation, where the overseas trading company itself (albeit through employees or contractees) generates copyrights in the course of its activities is at one end of a spectrum of possibilities. Towards the other end is an example such as *Noddy Subsidiary Rights Limited* referred to above. In that case the company did not actually generate any copyrights itself in the course of its activities, but it was still held to be taxable under Case I on its royalty receipts because it was actively engaged in exploiting the copyrights that it had licensed from other parties.

The authors consider that, if an overseas company operated in the same way as *Noddy Subsidiary Rights Limited* and received UK copyright royalties as part of its trading income, the principle of the *Cheyney* and *Stainer* cases would not extend to debar a charge to UK taxation on the grounds that the royalties were taxable by the UK only as trading income under Case I, which would not apply in the absence of a UK trade. This is because there would be no overseas activity equivalent to the professional activity in the *Cheyney* and *Stainer* cases that could be identified as the non-UK source of the company's royalties. If the principle in the *Stainer* and *Cheyney* cases did not apply, the royalties would remain taxable under Case VI as annual profits or gains arising from property within the UK. Between the two extremes there will obviously be a range of possibilities and it will be a matter of facts and circumstances as to how close to the principle in the *Cheyney* and *Stainer* cases any particular arrangements would lie.

As an analogy, take the case of an overseas bank that carries on its trade entirely outside the UK but also lends to UK borrowers. The interest on the loans is readily accepted as being UK source and a Case III assessment on the interest income of the overseas bank therefore seems entirely appropriate even though, had the bank been operating within the UK, the interest income would normally have been assimilated with its other trading income and assessed under Case I. This supports the conclusion that the principle of the *Cheyney* and *Stainer* cases does not apply generally to the trades of companies so that, if those profits

include interest income or copyright royalties, it will remain open to the Inland Revenue to assess that element under Case III or Case VI as appropriate.

This is consistent with the provisions of the OECD Model Tax Convention and most UK tax treaties. Under the terms of the Business Profits Article a non-resident is not taxable in the source country if the enterprise does not carry on business there. But, if the business profits include interest or royalties, the non-resident cannot usually claim exemption under the Business Profits Article from source country tax on these items because it will usually be provided that the Interest and Royalties Articles take precedence, so that the withholding tax rates stipulated can apply. Thus, under the terms of its typical treaties, the UK retains the right to tax the UK-source interest and royalty income of non-resident businesses not carrying on business in the UK, even where those items of income constitute business profits.

While the matter is not free from doubt, the authors' conclusion is that in the same way domestic law allows the UK to charge income tax on UK-source interest income of non-residents not carrying on a trade in the UK, even where that income constitutes trading income of the non-resident, so, also, domestic law allows the UK to tax the UK copyright royalty income of non-residents not carrying on a trade in the UK, even where those royalties constitute trading income of the non-resident. Case law, however, has established that the right of the UK to tax UK-source copyright royalties does not extend to royalties of non-resident, professional authors because, on the principle of the *Stainer* and *Cheyney* cases, such royalties are professional earnings taxable only under Case II, which does not apply to non-residents. The authors consider that this principle can extend to non-resident trading companies but only if the royalties derive from copyrights generated in the course of the company's trading activity. The principle would not, however, extend generally to trading income of non-resident companies, in particular it would not apply where the royalties arose from acquired copyrights, even if those copyrights were actively exploited in the course of a trade.<sup>61</sup>

These issues should be covered by clear statutory rules. But there seems little prospect of that.

### 31.15 Films and sound recordings

Special rules apply to the exploitation of films and sound recordings. Section 609 ITTOIA provides:

---

61 [2000] BTR 1.

(1) Income tax is charged on income from a business involving the exploitation of films or sound recordings where the activities carried on do not amount to a trade.

Such a business is referred to in this Chapter as a “non-trade business”.

(2) Expressions which are used in this Chapter and in Chapter 9 of Part 2 (trade profits: films and sound recordings) have the same meaning in this Chapter as they do in that Chapter.

Section 610 ITTOIA provides:

(1) Tax is charged under this Chapter on the full amount of the income arising in the tax year. ...

(3) This section is subject to Part 8 (foreign income: special rules).

The charge applies to UK and foreign source income, but this incorporates the remittance basis for foreign source income.

Section 612 ITTOIA provides:

(1) This section applies for calculating the amount of income charged under this Chapter.

(2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible. ...

Section 613 ITTOIA provides:

The provisions of Chapter 9 of Part 2 apply in relation to non-trade businesses as they apply in relation to trades but as if—

(a) references to a basis period were to a tax year, and

(b) references to anything not constituting trading stock of a trade were omitted.

### **31.16 DT relief: Royalties**

Article 12 OECD Model Convention provides:

1. Royalties arising in a Contracting State and beneficially owned<sup>62</sup> by a resident of the other Contracting State shall be taxable only in that other State.

In short, the right to tax rests with the residence state and not the source state.

OECD Commentary on art 12 provides:

---

62 See 104.11 (DTA beneficial owner rule).

5. The Article deals only with royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State. It does not, therefore, apply

[1] to royalties arising in a third State as well as

[2] to royalties arising in a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State

(for these cases see paragraphs 4 to 6 of the Commentary on Article 21).

### 31.16.1 “Royalties”

Article 12(2) OECD Model Convention provides:

The term “royalties” as used in this Article means payments<sup>63</sup> of any kind received as a consideration for the use of, or the right to use,

[a] any copyright of literary, artistic or scientific work including cinematograph films,

[b] any patent, trade mark, design or model, plan, secret formula or process, or

[c] for information concerning industrial, commercial or scientific experience.

See Avery Jones & Bobbett, “The Treaty Definition of Royalties” 60 *Bulletin for International Taxation* 1 (2006).

### 31.16.2 “Consideration for use”

OECD Commentary on art 12 provides:

8. [The commentary refers to the art 12(2) definition of royalties and continues:] The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a license and compensation which a person would be obliged to pay for fraudulently copying or infringing the right.

8.1 The definition does not, however, apply to payments that, whilst based on the number of times a right belonging to someone is used, are made to someone else who does not himself own the right or the right to use it (see, for instance, paragraph 18 below).

---

63 See 14.10.2 (“Paid” and “payment”).

### 31.16.3 *Sale of IP*

OECD Commentary on art 12 provides:

8.2 Where a payment is in consideration for the transfer of the full ownership of an element of property referred to in the definition, the payment is not in consideration “for the use of, or the right to use” that property and cannot therefore represent a royalty. As noted in paragraphs 15 and 16 below as regards software, difficulties can arise in the case of a transfer of rights that could be considered to form part of an element of property referred to in the definition where these rights are transferred in a way that is presented as an alienation. For example, this could involve the exclusive granting of all rights to an intellectual property for a limited period or all rights to the property in a limited geographical area in a transaction structured as a sale. Each case will depend on its particular facts and will need to be examined in the light of the national intellectual property law applicable to the relevant type of property and the national law rules as regards what constitutes an alienation but in general, if the payment is in consideration for the alienation of rights that constitute distinct and specific property (which is more likely in the case of geographically-limited than time limited rights), such payments are likely to be business profits within Article 7 or a capital gain within Article 13 rather than royalties within Article 12. That follows from the fact that where the ownership of rights has been alienated, the consideration cannot be for the use of the rights. The essential character of the transaction as an alienation cannot be altered by the form of the consideration, the payment of the consideration in instalments or, in the view of most countries, by the fact that the payments are related to a contingency.

### 31.16.4 *Royalties paid through PE*

For the overlap between royalty income and business profits, see 103.8.3 (Other business profit overlaps).

### 31.16.5 *Transfer pricing*

Article 12(4) OECD Model Convention provides the usual rule:

Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties, having regard to the use, right or information for which they are paid, exceeds the amount which would have been

agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

### 31.16.6 *Foreign tax credit: royalties*

It can happen that:

- (1) IP income are trading receipts, received by a person subject to UK tax on the trading profits
- (2) Foreign tax may be deducted at source from the IP income

In these circumstances, ESC B8 provides:

**B8 Double taxation relief: income consisting of royalties and “know-how” payments**

Payments made by a person resident in an overseas country to a person carrying on a trade in the UK as consideration for the use of, or for the privilege of using, in the overseas country any copyright, patent, design, secret process or formula, trademark or other like property

[1] may in law be payments the source of which is in the UK,

[2] but are nevertheless treated for the purpose of credit (whether under double taxation agreements or by way of unilateral relief) as income arising outside the UK except to the extent that they represent consideration for services (other than merely incidental services) rendered in this country by the recipient to the payer.

[1] is wrong or poorly expressed. The payments are not “payments the source of which is in the UK”. They are receipts of a trade, and the *trading profits* (which are distinct from the payments) is income whose source is in the UK.

[2] is law and not concession, but it does not matter.

INT Manual expands on this:

**161130. The source rule – concessions** [Jan 2018]

(B) *Extra-Statutory concession ESC/B8 - DTR: royalties and ‘know how’ payments*]

[The Manual sets out ESC B8 and continues:]

- b) Traders resident in the UK are not entitled to claim credit for any tax which is levied in the foreign country in respect of payments for services which are rendered in the UK and are not merely incidental

services. In any such case the net amount of the payment (after deduction of any foreign tax borne by them on the payments) is included in the computation of profits for UK tax purposes.

The prohibition on credit for foreign tax charged on payments for services rendered in the UK may be overruled by the terms of those double taxation agreements which have a royalties Article which includes technical services in the definition of royalties (see INTM153130) or a separate technical fees Article (see INTM153140) and those agreements deem the source of such payments to be in the country of which the payer is a resident. In such cases, even though the services are rendered in the UK, credit is due for the foreign tax charged on these payments. ...

### 31.16.7 *Source of royalties for DTA*

The royalties technical note provides:

1.12 The OECD model tax treaty contains no definition of source for royalties because it was thought that one was unnecessary – on the basis that sole taxing rights belong to the state of residence of the beneficial owner. However, a definition is necessary where, for example, an anti-abuse measure is applied and the taxing rights are returned to the state of source.

1.13 In the comparable interest article of the OECD model (which provides for a 10% rate of source state taxation), the source of the interest payment is defined as the country where the payer is resident, except where the payer has a PE in one of the treaty partners, the interest is borne by that PE, and the debt is connected with it. In that case, the source of the interest is the state where the PE is situated.<sup>64</sup>

1.14 The Government has introduced a similar treatment for royalties under domestic law, so that a royalty will have a UK source where the payment is connected to a PE that the payer has in the UK. Royalties paid by a non-resident to another non-resident which are connected to a trade carried on through a UK PE of the payer will now be taxable in the UK and the non-resident payer will be expected to withhold tax and account for it to HMRC. But where there is a tax treaty between the UK and the country of residence of the beneficial owner, that treaty will govern the taxation of the payment. Where that treaty follows the OECD model and the anti-abuse rule does not apply, taxation rights will belong

---

64 See 25.26.6 (Source of interest for DTA).

exclusively to that other country.

Some DTAs apply the same rule as the OECD Model applies to interest,<sup>65</sup> ie royalties arise in the source where the payer is resident (except for royalties from a PE). That is sensible.

Formerly, it was presumably considered that this source rule was not needed, because the royalties article provided 100% exemption (apart from interest from PEs); so the source did not matter. But as the 100% exemption is restricted by the Savings Clause and a Limitation of Benefit clause, the question of source will now arise.

### 31.17 Offshore receipts from IP

The code for Offshore Receipts in respect of Intangible Property (ORIP) was introduced in 2019 and is found in Chapter 2A Part 5 ITTOIA.

The provisions are numbered 806A to 806Z, with subsequent provisions slotted in.<sup>66</sup>

The background can be found in:

Consultation and response papers

HMRC policy paper “Income Tax: Offshore receipts in respect of intangible property”, October 2019<sup>67</sup> (“ORIP policy paper”)

HMRC have issued draft guidance (“ORIP draft guidance”).<sup>68</sup>

#### 31.17.1 Policy objective

ORIP draft guidance provides:

##### 1.2 ORIP - Purpose and design

ORIP was conceived as an extension to UK withholding tax on royalties that would apply to all payments made by resident and non-resident companies in respect of low tax IP that has been used to make UK sales.

---

65 In short, the source is the residence of the payer, See 25.26.6 (Source of interest for DTA).

66 See 11.3 (Section numbering system).

67 <https://www.gov.uk/government/publications/income-tax-changes-to-offshore-receipts-in-respect-of-intangible-property/income-tax-offshore-receipts-in-respect-of-intangible-property>

68 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/839609/Draft\\_technical\\_guidance\\_Offshore\\_Receipts\\_in\\_respect\\_of\\_Intangible\\_Property\\_\\_October\\_2019\\_.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/839609/Draft_technical_guidance_Offshore_Receipts_in_respect_of_Intangible_Property__October_2019_.pdf)

However, following consultation, the measure was amended to provide for a direct income tax charge on persons in low tax territories that hold IP and where income arises from that IP where it is used to support UK sales.

...The measure is consistent with the UK's international obligations, and thus respects the situations in which the UK has ceded taxing rights over the income of a nonresident person under a double taxation agreement.

The ORIP policy paper provides:

The policy targets multinational groups that generate significant income from intangible property through UK sales, and have made arrangements such that the income is received in offshore jurisdictions where it is taxed at no or low effective rates. The rules tax the proportion of that income which is referable to the sale of goods or services in the UK.

This measure will reduce the opportunities for large multinationals to gain an unfair competitive advantage by holding their intangible property in low tax offshore jurisdictions, levelling the playing field for businesses operating in UK markets.

The rules may be aimed at multi-national groups, but they apply more widely.

### **31.18 ORIP charge**

Section 608A ITTOIA provides:

- (1) This section applies if-
  - (a) at any time in a tax year, a person is not UK resident and is not resident in a full treaty territory, and
  - (b) UK-derived amounts arise to the person in the tax year.
- (2) Income tax is charged on the UK-derived amounts.

Section 608A(4) ITTOIA provides:

References in the Tax Acts to income from a source in the UK include UK-derived amounts.

Why does source matter, given that there is a self-standing charge?

Section 608B ITTOIA imposes the charge on the arising basis in standard form:

Tax is charged under section 608A on the full amount of the

UK-derived amounts arising in the tax year.

Section 608C ITTOIA identifies the person liable in standard form:

The person liable for any tax charged under section 608A is the person receiving or entitled to the UK-derived amounts.

### **31.19 Residence**

Residence matters as the charge only applies to a person who is:

- (1) not UK resident and
- (2) is not resident in a full treaty territory

UK residence is decided by general principles of UK residence. Resident in a territory needs definition.

#### *31.19.1 Resident in a territory*

Section 608D ITTOIA provides a definition based on OECD model:<sup>69</sup>

- (1) This section applies for the purposes of this Chapter.
- (2) A person is “resident” in a territory if, under the laws of the territory, the person is liable to tax there-
  - (a) by reason of the person’s domicile, residence or place of management, but
  - (b) not in respect only of-
    - (i) income from sources in that territory or capital situated there, or
    - (ii) such income and capital, and amounts remitted to or otherwise received in the territory.

Section 608D(3) ITTOIA provides

Where-

- (a) a person is resident in a territory outside the UK generally for the purposes of the laws of the territory or for particular purposes under those laws, and
  - (b) the laws of the territory have no provision for a person to be resident there for tax purposes,
- the person is “resident” in the territory.

That may be relevant for states with no direct tax, such as Saudi Arabia,

---

<sup>69</sup> See 8.3 (Residence under art 4(1)).

and states which only tax income from sources in that state, such as Singapore and Hong Kong.

### 31.19.2 *DTA which excludes relief*

Section 608D(4) ITTOIA provides:

Despite subsections (2) and (3), a person is treated as not resident in a full treaty territory if-

- (a) the double taxation arrangements made in relation to the territory contain provision expressly excluding persons of a particular description from relief under the arrangements, and
- (b) the person is of that description.

A Limitation of Benefit clause does not count for this purpose. Section 608D(5) ITTOIA provides:

In subsection (4) the reference to provision of the kind mentioned there does not include provision corresponding to the provision made by paragraphs 1 to 7 of article 29 of the OECD Model Tax Convention on Income and on Capital (entitlement to benefits), published on 21 November 2017.

See 105.1 ( Limitation on Benefits)

### 31.19.3 *Full treaty territory*

Section 608E(1) ITTOIA provides:

For the purposes of this Chapter a territory is a “full treaty territory” if-

- (a) double taxation arrangements have been made in relation to the territory, and
- (b) the arrangements contain a non-discrimination provision.

For the meaning of “Non-discrimination provision” see 107.8 (“Non-discrimination provision”).

## **31.20 UK-derived amount**

The tax charge is on UK-derived amounts.

Section 608F ITTOIA provides:

(1) For the purposes of this Chapter an amount is a “UK-derived amount” if-

- (a) it is an amount (whether of a revenue or capital nature) in

respect of the enjoyment or exercise of rights that constitute any intangible property, and

- (b) the enjoyment or exercise of those rights (or of any rights derived, directly or indirectly, from those rights) enables, facilitates or promotes UK sales (directly or indirectly).

(2) It does not matter whether the amount relates to UK sales in the tax year mentioned in section 608A or any other tax year.

### 31.20.1 *UK sales*

Section 608F(3) ITTOIA provides:

In this Chapter “UK sales” means any services, goods or other property-

- (a) provided in the UK, or
- (b) provided to persons in the UK.

### 31.20.2 *Provision for resale*

Section 608F ITTOIA provides:

(4) In subsection (3) the reference to anything being provided does not include it being provided for resale.

(5) For the purposes of subsection (4) a thing is provided “for resale” where it is provided to a person who obtains it for the purpose of providing it to another person in the following circumstances-

- (a) there is no change in the thing itself, and
- (b) if what is provided differs in any way from what was obtained, the difference is merely incidental to the provision of the thing.

### 31.20.3 *Online advertising*

Section 608F(6) ITTOIA provides:

For the purposes of this Chapter a service consisting of the provision of online advertising constitutes a UK sale so far as the advertising is targeted at persons in the UK.

## **31.21 Apportionment**

Section 608G ITTOIA provides:

(1) This section applies where-

- (a) a person receives or is entitled to an amount in respect of the enjoyment or exercise of rights that constitute any intangible property, and that enjoyment or exercise enables, facilitates or

- promotes UK sales and other sales, or
- (b) a person receives or is entitled to an amount in respect of-
    - (i) the enjoyment or exercise of rights that constitute any intangible property, where that enjoyment or exercise enables, facilitates or promotes UK sales, and
    - (ii) anything else.
- (2) The amount is to be regarded for the purposes of this Chapter as constituting a UK-derived amount to such extent as is just and reasonable.
- (3) In a case within subsection (1)(a) it is to be presumed, unless the contrary is shown, that the proportion of the amount that is just and reasonable is-
- $$(X) / (X + Y)$$
- where X is the value of UK sales and Y is the value of other sales.

### 31.22 De minimis rule

Section 608GA ITTOIA provides:

- (1) This section applies where-
  - (a) a person (A) receives or is entitled to a UK-derived amount,
  - (b) the services, goods or other property in question are not provided in the UK, or to persons there, by A or a person connected with A, and
  - (c) the UK sales in question are enabled, facilitated or promoted to an insignificant extent by the enjoyment or exercise of the rights in question.
- (2) For the purposes of this Chapter no account is to be taken of A's receipt of, or entitlement to, the UK-derived amount.
- (3) For the purposes of subsection (1)(b), anything provided by a reseller (including anything treated as so provided by virtue of this subsection) is to be treated as provided by the person who provided it to the reseller.
- (4) For this purpose "reseller" means a person to whom a thing is provided for resale (within the meaning of section 608F(5)).

### 31.23 "Intangible property"

"Intangible property" matters because a "UK-derived amount" it is an amount in respect of the enjoyment or exercise of rights that constitute any intangible property,

Section 608H ITTOIA provides:

- (1) In this Chapter "intangible property" means any property except-

A set of 6 exceptions then follow:

- (a) tangible property,
  - (b) an estate, interest or right in or over land,
  - (c) a right in respect of anything within paragraph (a) or (b),
  - (d) a financial asset,
  - (e) a share or other right in relation to the profits, governance or winding up of a company, or
  - (f) any property of a prescribed description.
- (2) In this section-  
“financial asset” has the meaning given by section 806 of CTA 2009;  
“prescribed” means prescribed by regulations made by the Treasury.

### 31.23.1 *Financial asset*

A financial asset is not “intangible property”. The terminology seems strange to a lawyer, but there it is.

Section 608H(2) ITTOIA provides:

In this section-  
“financial asset” has the meaning given by section 806 of CTA 2009

That takes us to s.806 CTA 2009:

- (2) In this Part “financial asset” has the same meaning as it has for accounting purposes.
- (3) “Financial asset” includes—
- (a) loan relationships (see Parts 5 and 6),
  - (b) derivative contracts (see Part 7),
  - (c) contracts or policies of insurance or capital redemption policies,
  - (ca) assets so far as they are derived from, or are referable to, contracts or policies of insurance or capital redemption policies, and
  - (d) rights under a collective investment scheme within the meaning of FISMA 2000 (see section 235 of that Act).

That takes us to FRS 102 which defines financial asset as follows:

Any asset that is:

- (a) cash;
- (b) an equity instrument of another entity;
- (c) a contractual right:
  - (i) to receive cash or another financial asset from another

- entity, or
- (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or
- (d) a contract that will or may be settled in the entity's own equity instruments and is:
- (i) a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments; or
  - (ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments

### 31.24 Exemptions

The ORIP code provides the following exemptions:

Section	Exemption	See para
608J	UK sales under £10m	31.25
608JA	Co resident in specified territory	31.26
608K	Business undertaken in territory of residence	31.27
608L	Foreign tax at least half of UK tax	31.28
608MA	Opaque partnership taxable in full treaty territory	31.29
608MB	Body corporate transparent in full treaty territory	31.30
608MC	Double taxation within control group	31.31

### 31.25 UK sales below £10m

Section 608J ITTOIA provides:

(1) Section 608A does not apply in relation to a person for a tax year if the total value of the person's UK sales in that tax year does not exceed £10,000,000.

(2) Where-

- (a) a person (A), or a person connected with A, receives or is entitled to an amount (whether of a revenue or capital nature), and
- (b) the amount relates (wholly or in part, and directly or indirectly) to the provision of services, goods or other property constituting

UK sales,  
the UK sales are regarded for the purposes of subsection (1) as A's UK sales.

£10m is a substantial sum, though the reader may doubt whether the figure will ever be increased for inflation.

### **31.26 Company in specified territory**

Section 608JA ITTOIA provides:

- (1) Section 608A does not apply in relation to a company for a tax year if-
- (a) the company is resident in a specified territory throughout the tax year,
  - (b) UK-derived amounts arising to the company in the tax year are chargeable to tax under the laws of the territory,
  - (c) where those amounts are chargeable only if remitted or otherwise received in the territory, the amounts are remitted or otherwise received there in the tax year,
  - (d) the amount of tax which is paid in the territory in respect of the UK-derived amounts is not determined under designer tax provisions, and
  - (e) the company is not, at any time in the tax year, involved in an arrangement the main purpose, or one of the main purposes, of which is to obtain a tax advantage for itself or any other person.

#### *31.26.1 Residence*

Section 608JA ITTOIA incorporates the s.608D definition with amendments:

- (2) For the purposes of this section-
- (a) section 608D (meaning of residence) applies as if subsections (2)(b), (4) and (5) were omitted;

Amended as directed, the relevant part of the definition provides:

- (2) A person is "resident" in a territory if, under the laws of the territory, the person is liable to tax there-
- (a) by reason of the person's domicile, residence or place of management,
- (3) Where-
- (a) a person is resident in a territory outside the UK generally for

- the purposes of the laws of the territory or for particular purposes under those laws, and
- (b) the laws of the territory have no provision for a person to be resident there for tax purposes, the person is “resident” in the territory.

### 31.26.2 *Specified territory*

- (b) “specified territory” means a territory specified in regulations made by the Commissioners.

## 31.27 Business undertaken within territory of residence

Section 608K ITTOIA provides:

- (1) Section 608A does not apply in relation to a person (“the relevant person”) for a tax year if-
- (a) the relevant person is resident in a territory throughout the tax year,
  - (b) all (or substantially all) relevant activity in relation to relevant intangible property is, and has at all times been, undertaken in that territory,
  - (c) there is no relevant connection between relevant intangible property and a related person, and
  - (d) the person makes a claim under this section.
- (1A) For the purposes of this section, section 608D (meaning of residence) applies as if subsections (2)(b), (4) and (5) were omitted.
- (2) For the purposes of this section intangible property is “relevant” if any UK-derived amount arising to the person in the tax year relates to it.
- (3) In subsection (1)(b) “relevant activity”, in relation to relevant intangible property, means anything done (by any person)-
- (a) for the purpose of creating, developing or maintaining any of the relevant intangible property; or
  - (b) for the purpose of generating, for the relevant person, amounts (whether of a revenue or capital nature) that relate, wholly or in part and directly or indirectly, to the enjoyment or exercise of rights that constitute any of the relevant intangible property.
- (4) For the purposes of subsection (1)(c) there is a “relevant connection” between relevant intangible property and a related person if any relevant intangible property-
- (a) has been transferred (directly or indirectly) from a person related to the relevant person,

- (b) derives (directly or indirectly) from anything so transferred, or
  - (c) derives (directly or indirectly) from intangible property held by a person related to the relevant person.
- (5) See section 608T for the meaning of two persons being “related” .

### **31.28 Foreign tax at least half of UK tax**

Section 608L ITTOIA provides:

- (1) Section 608A does not apply in relation to a person for a tax year if:
  - (a) the person is resident in a territory outside the UK in that year,
  - (b) the amount of tax (“the local tax amount”) which is paid in the territory in respect of UK-derived amounts arising in the tax year is at least half of the corresponding UK tax, and
  - (c) the local tax amount is not determined under designer tax provisions.
- (2) See section 608M for provisions about the local tax amount.
- (3) “The corresponding UK tax” means the amount of income tax that would be charged under this Chapter in respect of UK-derived amounts arising in the tax year, calculated on the following basis-
  - (a) section 608A applies in relation to the UK-derived amounts, and
  - (b) the person is not entitled to any relief or allowance for the tax year.
- (5) For the purposes of this section, section 608D (meaning of residence) applies as if subsections (2)(b), (4) and (5) were omitted.

#### *31.28.1 Local tax amount*

Section 608M ITTOIA provides:

- (1) This section applies for the purposes of section 608L.
- (2) Where an amount of tax is paid in the territory in respect of-
  - (a) UK-derived amounts arising in the tax year, and
  - (b) other amounts,the amount of tax is to be apportioned between the amounts mentioned in paragraph (a) and paragraph (b) on a just and reasonable basis.
- (3) Where-
  - (a) in the territory any tax falls to be paid in respect of UK-derived amounts arising in the tax year,
  - (b) under the laws of the territory, a repayment of tax, or a payment in respect of credit for tax, is made to any person, and
  - (c) that repayment or payment is directly or indirectly in respect of

the whole or part of the tax mentioned in paragraph (a), the local tax amount is to be reduced by the amount of that repayment or payment (but this is subject to subsections (4) and (5)).

(4) Subsection (5) applies if the repayment or payment mentioned in subsection (3)(b) is in respect of-

- (a) the tax mentioned in subsection (3)(a), and
- (b) other tax.

(5) The amount of the repayment or payment is to be apportioned between the tax mentioned in subsection (3)(a) and the other tax on a just and reasonable basis, and the reduction under subsection (3) is limited to the amount apportioned to the tax mentioned in subsection (3)(a).

(6) Any reduction under subsection (3) is to be undertaken after any apportionment under subsection (2).

### **31.29 Opaque partnership taxable in full treaty territory**

Section 608MA ITTOIA provides:

- (1) This section applies where-
  - (a) under the laws of a full treaty territory, a partnership is regarded for tax purposes as an entity separate and distinct from the partners,
  - (b) the partnership is resident in the territory throughout a tax year,
  - (c) UK-derived amounts arise to the partnership in the tax year, and
  - (d) the UK-derived amounts are chargeable to tax under the laws of the territory.
- (2) In the application of section 608A to a partner for the tax year, no account is to be taken of the UK-derived amounts.
- (3) For the purposes of subsection (1)(b), the partnership is “resident” in a territory if (and only if) it is resident there by virtue of section 608D(2) (references there to be a person being read as references to the partnership).

### **31.30 Body corporate transparent in full treaty territory**

Section 608MB ITTOIA provides:

- (1) This section applies where-
  - (a) a body corporate formed under the laws of a full treaty territory (“the relevant territory”) is not regarded under those laws, for tax purposes, as an entity separate and distinct from its members,

- (b) the body is not resident, at any time in a tax year, in a territory that is not a full treaty territory,
  - (c) UK-derived amounts arise to the body in the tax year, and
  - (d) each relevant member is resident in the relevant territory throughout the tax year.
- (2) In the application of section 608A to the body for the tax year, no account is to be taken of the UK-derived amounts.
- (3) The relevant members are to be determined as follows-
- (a) each member of the body is a relevant member (subject to paragraph (b));
  - (b) if a body corporate that meets the conditions in subsection (4) would otherwise be a relevant member, that body's members are relevant members (and that body is not a relevant member);
  - (c) paragraph (b) applies in relation to a body that would otherwise be a relevant member by virtue of that paragraph (as well as in relation to a body that would otherwise be a relevant member by virtue of paragraph (a)).
- (4) The conditions referred to in subsection (3)(b) are-
- (a) that the body is formed under the laws of the relevant territory;
  - (b) that under those laws, the body is not regarded for tax purposes as an entity separate and distinct from its members;
  - (c) that the body is not resident, at any time in the tax year, in a territory that is not a full treaty territory.

### **31.31 Double taxation on control group**

Section 608MC ITTOIA provides:

- (1) This section applies where-
- (a) two persons (A and B) are in the same control group throughout a tax year,
  - (b) neither A nor B is, at any time in the tax year, involved in an arrangement the main purpose, or one of the main purposes, of which is to obtain a tax advantage for A, B or any other person,
  - (c) income tax is charged under section 608A on a UK-derived amount arising to A in the tax year, and A is not entitled to any relief in respect of the UK-derived amount,
  - (d) the UK-derived amount is a direct or indirect payment from B to A in respect of rights ("relevant rights") that-
    - (i) constitute any of B's intangible property, and
    - (ii) derive, directly or indirectly, from rights that constitute any of A's intangible property.

(2) In the application of section 608A to B for the tax year, the amount of any UK-derived amount arising to B in the tax year in respect of B's relevant rights is to be reduced (but not below nil) by the amount of the UK-derived amount mentioned in subsection (1)(c).

(3) For the purposes of this section where a UK-derived amount is in respect of relevant rights and anything else, the amount is to be regarded as being in respect of relevant rights to such extent as is just and reasonable.

### **31.32 Collection from control group**

Section 608O ITTOIA provides:

- (1) This section applies where-
  - (a) an amount of income tax has been assessed on a person ("the taxpayer") for a tax year by virtue of this Chapter, and
  - (b) the whole or any part of that amount, or of any interest on that amount, is unpaid at the end of the period of 6 months after the relevant date.
- (2) A designated officer may give a notice to a relevant person requiring that person, within 30 days of the giving of the notice, to pay any unpaid tax and interest.
- (3) The notice must state-
  - (a) the amount of income tax and interest that remains unpaid,
  - (b) the date when the income tax first became payable, and
  - (c) the relevant person's right of appeal.
- (4) A notice under this section may not be given more than 3 years and 6 months after the relevant date.
- (5) In this section "relevant person" means any person who was in the same control group as the taxpayer at any time in the tax year (see section 608S for the meaning of being in the same "control group").
- (6) In this section "the relevant date" means-
  - (a) in relation to an amount of income tax determined under section 28C of TMA 1970, the date on which the determination was issued;
  - (b) in relation to an amount of income tax under a self-assessment in a case where the taxpayer's return under section 8 or 8A of TMA 1970 was delivered after the last day for delivering it in accordance with that section, the date on which the return was delivered;
  - (c) in any other case, the date the amount mentioned in subsection (1)(a) became due and payable.

(7) A notice may be given anywhere in the world, to any relevant person (whether or not UK resident).

(8) In this section-

“assessment” : any reference to an amount of income tax that has been assessed on a person includes an amount of income tax that has been determined under section 28C of TMA 1970 in relation to the person; “designated officer” means an officer of Revenue and Customs who has been designated by the Commissioners for the purposes of this Chapter.

### 31.32.1 *Payment notice: effect*

Section 608P ITTOIA provides:

(1) This section applies where a notice under section 608O is given to a person.

(2) For the purposes of the recovery from the person of any unpaid tax and interest (including interest accruing after the date of the notice), the person is treated as if-

- (a) the amount of income tax assessed as mentioned in section 608O(1)(a) had been assessed on the person,
- (b) that amount became due and payable when the tax mentioned in section 608O(1)(a) became due and payable, and
- (c) any payments made in respect of the amount mentioned in section 608O(1)(a) (or in respect of interest on that amount) had been made in respect of the amount treated as assessed by virtue of paragraph (a) of this subsection (or in respect of interest on that amount).

(3) Nothing in subsection (2) gives the person a right to appeal against the assessment mentioned in section 608O(1)(a) (or against any assessment treated as made by virtue of subsection (2) of this section).

(4) Any appeal by the taxpayer against the assessment mentioned in section 608O(1)(a) does not affect the liabilities arising by virtue of the giving of the notice.

### 31.32.2 *Payment notice: appeal*

Section 608Q ITTOIA provides:

(1) This section applies where a notice under section 608O is given to a person.

(2) The person may appeal against the notice, within the period of 30 days beginning with the date on which it is given, on the ground that the person is not a relevant person (as defined by section 608O).

- (3) Where an appeal is made, anything required by the notice to be paid is due and payable as if there had been no appeal.
- (4) Section 56 of TMA 1970 (payment of tax where further appeal) applies in relation to any further appeal against the notice, but the relevant court or tribunal may, on the application of Her Majesty's Revenue and Customs, direct that section 56(2) does not apply to anything required by the notice to be paid.
- (5) A direction may be given if the relevant court or tribunal considers it necessary for the protection of the revenue.
- (6) In this section "relevant court or tribunal" has the same meaning as in section 56 of TMA 1970.

### 31.32.3 *Effect of making payment*

Section 608R ITTOIA provides:

- (1) This section applies where a notice under section 608O is given to a person.
- (2) A person who pays an amount in pursuance of the notice may recover that amount from the taxpayer.
- (3) In calculating the person's income, profits or losses for any tax purposes-
  - (a) a payment in pursuance of the notice is not allowed as a deduction, and
  - (b) the reimbursement of any such payment is not regarded as a receipt.
- (4) Any amount paid by the person in pursuance of the notice is to be taken into account in calculating-
  - (a) the amount unpaid, and
  - (b) the amount due by virtue of any other notice under section 608O relating to the amount unpaid.
- (5) Similarly, any payment by the taxpayer of any of the amount unpaid is to be taken into account in calculating the amount due by virtue of the notice (or by virtue of any other notice under section 608O relating to the amount unpaid).

### 31.33 **Control group**

Section 608S ITTOIA provides:

- (1) Two persons are in the same control group at any time if-
  - (a) they are consolidated for accounting purposes for a period which includes that time,

- (b) one of them has a 51% investment in the other at that time, or
- (c) a third person has a 51% investment in each of them at that time.

“51% investment” is defined in s.698U ITTOIA; see 100.8 (% investment tests).

### 31.33.1 *Consolidated for accounting purposes*

Section 608S(2) ITTOIA provides:

Two persons are consolidated for accounting purposes for a period if-

- (a) their financial results for the period are required to be comprised in group accounts,
  - (b) their financial results for the period would be required to be comprised in group accounts but for the application of an exemption, or
  - (c) their financial results for the period are in fact comprised in group accounts.
- (3) In this section “group accounts” means accounts prepared under-
- (a) section 399 of the Companies Act 2006, or
  - (b) any corresponding provision of the law of a territory outside the UK.

### 31.33.2 *Related person*

Section 608T ITTOIA provides:

- (1) Two persons are “related” at any time if-
  - (a) at that time-
    - (i) they are in the same control group,
    - (ii) one of them has a 25% investment in the other, or
    - (iii) a third person has a 25% investment in both of them, or
  - (b) at any time in the period of 6 months beginning or ending at that time-
    - (i) one of them directly or indirectly participates<sup>70</sup> in the

---

70 Section 608T(2)/s.608V ITTOIA incorporate the definition by reference:

“(1) This section applies for the purposes of section 608T.

(2) A person is directly participating in the management, control or capital of another person at a particular time only if section 157 of TIOPA 2010 so provides.

(3) A person is indirectly participating in the management, control or capital of another person at a particular time only if section 159 or 160 of TIOPA 2010 so provides.

- management, control or capital of the other, or
- (ii) a third person directly or indirectly participates in the management, control or capital of both of them.

See 100.8 (% investment tests).

### **31.34 Offshore IP receipts: TAAR**

Of course there is a TAAR. Section 608W ITTOIA provides:

- (1) This section applies if a person has entered into any arrangements<sup>71</sup> the main purpose, or one of the main purposes, of which is to obtain a tax advantage<sup>72</sup> for the person as a result (wholly or partly) of-
- (a) anything not being subject to the charge under section 608A, or
  - (b) any provisions of double taxation arrangements having effect in a case where the advantage is contrary to the object and purpose of the provisions.
- (2) The tax advantage is to be counteracted by the making of such adjustments as are just and reasonable.
- (3) The adjustments may be made (whether by an officer of Revenue and Customs or the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.
- (4) Where this section applies by virtue of subsection (1)(b), the counteraction has effect despite section 6(1) of TIOPA 2010.

This is a counter-action style TAAR: see 2.10.5 (Consequence of TAAR).

The treaty-override is based on the OECD principal purpose test.<sup>73</sup>

### **31.35 Interaction with other provisions**

Section 608X ITTOIA provides:

- (1) This section applies where section 608A applies in relation to a person for a tax year (or would apply, if the following provisions of this section applied).
- (2) Part 6 (exempt income) does not apply in relation to UK-derived

---

See 100.1, 14.1 (Participation).

71 Section 608Z ITTOIA provides the standard (unnecessary) IT definition of “arrangements”: see App 2.2.3 (Definitions of “arrangement”).

72 Section 608W(5) sets out the GAAR definition of “tax avoidance”; see 2.12.1 (Tax advantage: Definitions).

73 See 72.7 (OECD principal purpose test).

amounts arising to the person in the tax year.

(3) For the purposes of calculating the person's liability to income tax for the tax year-

- (a) Chapter 1 of Part 14 of ITA 2007 (limits on liability to income tax of non-residents) does not apply in relation to UK-derived amounts arising to the person in the tax year;
- (b) accordingly, the person's liability is the sum of-
  - (i) the person's liability as regards UK-derived amounts (with that Chapter not applying), and
  - (ii) the person's liability as regards anything else (with that Chapter applying, to the extent it would otherwise apply).

### **31.36 ORIP appeals**

Section 608Y ITTOIA provides:

(1) This section applies where a person ("the taxpayer") makes an appeal in relation to an amount of income tax charged on the taxpayer under section 608A.

(2) Section 55(3) to (8A) of TMA 1970 (application for postponement of payment of tax pending appeal) do not apply in relation to the tax charged (and no agreement as to the postponement of payment of any of that tax, or of interest on it, may be made).

(3) In the case of a further appeal, the relevant court or tribunal (as defined by section 56 of TMA 1970) may, on the application of Her Majesty's Revenue and Customs, direct that section 56(2) of TMA 1970 does not apply to the tax charged.

(4) A direction may be given if the relevant court or tribunal considers it necessary for the protection of the revenue.

(5) Nothing in this section applies in relation to a liability arising as a result of the giving of a notice under section 608O.

### **31.37 Definitions**

Section 608Z ITTOIA provides:

In this Chapter-

"control group" has the meaning given by section 608S;

"designer tax provisions" means provisions which appear to the Commissioners to be designed to enable persons to exercise significant control over the amount of tax which they pay in respect of UK-derived amounts;

"double taxation arrangements" means arrangements that have

effect under section 2(1) of TIOPA 2010;  
“full treaty territory” has the meaning given by section 608E;  
“intangible property” has the meaning given by section 608H;  
“related” : references to two persons being related are to be read in accordance with section 608T;  
“resident” : references to being resident in a territory are to be read in accordance with section 608D;  
“tax” : any reference (however expressed) to tax payable or paid under the laws of a territory outside the UK is a reference to a tax which-

- (a) is charged on income, and
- (b) corresponds to income tax or corporation tax;

and for this purpose tax may correspond to income tax or corporation tax even though it is payable under the laws of a province, state or other part of a country or is levied by or on behalf of a municipality or other local body;

“tax advantage” has the meaning given by section 608W(5);  
“UK-derived amount” has the meaning given by section 608F;  
“UK sales” has the meaning given by section 608F.

## CHAPTER THIRTY TWO

# MISC SWEEP-UP INCOME

32.1

### 32.1 Misc Sweep-up Income

This chapter deals with income taxed under Chapter 8 Part 5 ITTOIA/Chapter 8 Part 10 CTA 2009 (“Income not otherwise charged”).

I focus on matters closest to the themes of this work, but the topic can only be understood in the context of the provisions as a whole, so I include a general discussion.

Statute does not provide a name for income in this category. As the heading of Part 5 is itself “miscellaneous income”<sup>1</sup> the drafter describes this category of income as “miscellaneous income: income not otherwise charged”. It is, one might say, *miscellaneous* miscellaneous income. HMRC refer to Chapter 8 as “miscellaneous income sweep-up provisions”. I refer to income within s.687/979 as “**Misc Sweep-up Income**”. That is a clumsy label, but it is difficult to think of a better one. I use initial capitals, to reflect the technical nature of the expression.

Some categories of income are charged as Misc Sweep-up Income by statute, such as OIGs<sup>2</sup> and gains from funds invested in non-reporting offshore funds.<sup>3</sup> These have nothing in common with the case law categories set out above, and are not discussed in this chapter.

---

1 For the general scheme of income categorisation in the taxes acts, see 13.2.2 (ITTOIA/CTA income categories).

The term “miscellaneous income” might also be used for income of the types listed in s.1015 ITA, which includes Misc Sweep-up Income in a ragbag of about 40 types of income.

2 See 65.4 (Taxation of reporting-fund income).

3 Reg 85N Authorised Investment Funds (Tax) Regulations 2006.

Some types of income categorised as Misc Sweep-up Income before the tax law rewrite are now taxed under other provisions; for instance, non-trade Non-Annual Payment royalties.<sup>4</sup>

I do not discuss:

- the small allowance in Part 6A ITTOIA
- misc sweep-up losses

### 32.1.1 *Current/previous charging clause*

The current law is as follows:

#### **s.687(1) ITTOIA**

Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.<sup>5</sup>

#### **s.979(1) CTA 2009**

The charge to corporation tax on income applies to income that is not otherwise within the application of that charge under the Corporation Tax Acts.

In order to follow the older cases, one needs to bear in mind that the pre-rewrite legislation was different, or at least differently worded, from the current legislation:

#### **s.18 ICTA 1988 (sch D case VI)**

Tax under this Schedule shall be charged in respect of ...

#### **current law: s.687 ITTOIA**

Income tax is charged under this Chapter on

---

<sup>4</sup> See 31.3 (Types of IP income).

<sup>5</sup> For this style of charging provision, see 13.3.1 (Priority in charging provision).

(b) all interest of money, annuities and other annual profits or gains not charged under Schedule A, B, C or E, and not specially exempted from tax

(2) Tax under Schedule D shall be charged under the Cases set out in subsection (3) below...

(3) The Cases are ...

Case VI: tax in respect of any annual profits or gains not falling under any other Case of Schedule D and not charged by virtue of Schedule A, B, C or E.

income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.

There are two differences or apparent differences:

- (1) “Annual profits and gains” (ICTA) has become “income” (in ITTOIA)
- (2) ITTOIA requires that the income is “*from any source*”: this is new

Of these two changes, the move from “annual profits and gains” to “income” is not significant: that phrase has always been understood to mean income<sup>6</sup>, and is best regarded as just an archaic term meaning income. One only needs to bear the old terminology in mind in order to understand the older cases and modern cases which discuss them.

The new (ITTOIA) reference to source does seem significant, but pre-rewrite cases refer to “source” even though the word was not in the legislation before 2005.<sup>7</sup> So perhaps it only states expressly what was previously understood.

### 32.1.2 *Income from a source*

It is clear from the words of the charging provision that:

- (1) There must be “income”; and
- (2) For IT,<sup>8</sup> the income must be “from any source” ie:
  - (a) there must be a source; and

<sup>6</sup> See 14.11 (Income/gains/profits).

<sup>7</sup> See eg the quote from *AG v Black* in 32.3 (General principles).

<sup>8</sup> The CT provision lacks the words “from any source”.

(b) the income must be from that source

EN ITTOIA provides:

1187. The charge under this Chapter is restricted to amounts that are “income” on first principles. That is, they are “annual profits or gains” under section 18(1) of ICTA, as that phrase has been interpreted by case law, and are not profits or gains of a capital nature ...

This is indicated

[1] by the use in section 687(1) of the words “from any source” and

[2] by the disapplication of the definition of “income” in section 878(1) [ITTOIA] by section 687(4).

I would have thought that the rule that the charge only applies to amounts that are income is indicated by the word “income”; and the two points listed seem rather obscure ways to indicate that (if indeed they do). The drafter of the CTA provision possibly agreed, at least as to point [1], since it omits the words "from any source". But it does not matter.

### 32.1.3 *Deemed income*

#### **s.687 ITTOIA**

(4) The definition of “income” in s.878(1) does not apply for the purposes of this section.<sup>9</sup>

#### **s.979 CTA 2009**

(2) Subsection (1) does not apply to ...  
(c) deemed income.

Deemed income will generally be expressly charged under some other provision. But there might be deemed income without a charge (s.731 income of non-residents, for instance) and it does no harm to expressly exclude this from the Misc Sweep-up Income charge.

### 32.1.4 *Priority rules*

Statute sets out some priority rules:

#### **s.687(2) ITTOIA**

#### **s.979(2) CTA 2009**

---

<sup>9</sup> The disapplied definition states:

‘Income’ includes amounts treated as income (whether expressly or by implication).

Subsection (1) does not apply [i] to annual payments or [ii] to income falling within Chapter 2A of Part 4 [Disguised interest].

Subsection (1) does not apply to-  
(a) annual payments ...

Those types of income are taxed elsewhere.<sup>10</sup>

**s.687 ITTOIA**

(3) Subsection (1) does not apply to income that would be charged to income tax under or as a result of another provision but for an exemption.

**s.979 CTA 2009**

(2) Subsection (1) does not apply to ...  
(b) income in respect of which no liability to corporation tax arises because of an exemption, or

That prevents the charge from overriding tax exemptions.

## 32.2 Types of Misc Sweep-up Income

Misc Sweep-up Income can be classified into the following broad categories:

**(1) Income from services** *eg:*

Providing information  
Photography  
Film and TV  
Commission for introducing customers; cash-backs

**(2) Income from finance** *eg:*

Guarantee fees  
Lender's fees  
Swaps

**(3) Income from assets** *eg:*

Hire of chattels  
Stock loans  
Payment for allowing filming  
Tolls  
Distributions from a non-resident company<sup>11</sup>

<sup>10</sup> See 25.24 (Disguised interest); 30.1 (Annual Payments: Introduction).

<sup>11</sup> See 29.5.4 (Income-distribution: IT charge).

**(4) Restraint of trade****32.3 General principles: Income**

In *AG v Black*:<sup>12</sup>

The words in [sch D case VI] are very extensive. My Brother Martin says, “It seems impossible that any net could be extended more widely; every possible source of income seems included.” Not, however, that every kind of income derived by a corporation, in whatever way it may come to them, would be included in it. They would not be liable except in respect of something of the same nature and kind as what had been previously mentioned.

*Leeming v Jones*<sup>13</sup> cited the “memorable and often quoted words” of Lord Macnaghten in the *London County Council* case,<sup>14</sup> that “income tax was a tax on income”.

In *Ryall v Hoare*.<sup>15</sup>

it is quite clear that anything in the nature of a capital accretion is outside the words “profits or gains”, as used in these Acts; that, of course, follows from the scope of the Act, and it is sanctified by the usage now of a century. That rules out, of course, the well-known case of a casual profit made upon an isolated buying and selling of some article; that is a capital accretion, and unless it is merged with other similar transactions in the carrying on of a trade, and the trade is taxed, no tax is exigible in respect of a transaction of that kind. “Profits or gains” mean something which is in the nature of interest or fruit, as opposed to principal or tree.

*Kerrison v HMRC* reviewed the old (pre-rewrite) authorities and came up with this:<sup>16</sup>

The receipt must:

12 (1871) L.R. 6 Exch 308 at p.309, quoting Martin B at first instance (1871) LR 6 Exch 78 at p.85. The case went to a further appeal, dismissed very briefly, reported in 1 TC 54, but the TC report does not include these earlier judgments.

13 15 TC 333 at p.359.

14 *London County Council v Attorney General* 4 TC 265.

15 8 TC 521 at p.525.

16 [2019] UKUT 8 (TCC) at [68] referring to: *Ryall v Hoare* 8 TC 521 at p.526; *Leeming v Jones* 15 TC 333 at p.359.

- (1) have the nature of “annual profits”. That simply means that the receipts must be capable of being “calculated in any one year”. It does not mean that the income must recur every year;
- (2) be of an income nature;
- (3) be analogous to some other head of charge under what was previously Schedule D – this is the *eiusdem*<sup>17</sup> *generis* principle;
- (4) be the recipient's income<sup>18</sup>

But points (1), (2) and (4) are 3 different ways of saying the same thing, or more or less the same thing, and they are self-evident from the current (post-rewrite) statutory words, so they need no authority.<sup>19</sup> It seems to me that point (3) is not materially different, though it is hard to say, as “analogous” may mean little or much. The Latin terminology - to be deprecated in modern law - merely hides the imprecision.

The courts have found the capital/income border difficult to define and the reader may think the analysis is sometimes insufficiently rigorous.

## 32.4 Source/voluntary transaction

### 32.4.1 Source requirement

Since the charge is on “on income from any source” it is clear that (1) there must be income and (2) the income must (at least after ITTOIA) be from a source.<sup>20</sup> But the words *income* and *source* and *from* (suggesting a causation/derivation test) all need elucidation.

### 32.4.2 Gift/voluntary transaction

---

<sup>17</sup> The spelling *eiusdem* is more common, but both are found.

<sup>18</sup> *Spritebeam v HMRC* [2015] UKUT 75 (TCC) at [54]; reported at first instance under the name *Versteegh v HMRC* [2013] UKFTT 642 (TC). Would it not be convenient if cases did not change their name when they went on appeal?

<sup>19</sup> For points (1) and (2), see 32.1.2 (Income from a source); for point (4) see 14.2.1 (Receiving/entitled: Person liable).

<sup>20</sup> See 32.1.2 (Income from a source). For completeness: *Kerrison v HMRC* is slightly tentative on the point:

“... s. 687(1) expressly refers to “income from any source” which suggests (?) to us that in order for income to be taxable ... it requires a source ... although we would be minded to accept that a receipt taxable under s.687(1) ITTOIA must have a source, it is not necessary for us to reach a decision on this point.”

[2019] UKUT 8 (TCC) at [70]. But even if there was doubt on this point before the tax law rewrite, there can be no doubt about it now.

In *Ryall v Hoare*:<sup>21</sup>

The other class of case that one can rule out is that of gifts. A person may have an emolument by reason of a gift ... or he may acquire an emolument by finding an article of value or money, or he may acquire it by winning a bet. It seems to me that all that class of cases must be ruled out, because they are not profits or gains at all.' ...

In *Stepford v Below*:<sup>22</sup>

it has been held again and again that a mere voluntary gift ... is not, in the true sense of the word, income. It is merely a casual payment which depends upon somebody else's good will...<sup>23</sup>

It is well established that a voluntary transaction (for brevity I use the term gift) is not taxable:

- (1) as Misc Sweep-up Income or
- (2) as an Annual Payment<sup>24</sup>

But is that because:

- (1) a gift is not income (though gifts may be income for accountancy purposes)? or
- (2) a gift does not have a source (though the donor's benevolence could be called a source)?

The answer is, surely, both. The concepts of gift/source/income are conceptually distinct, but they interrelate, and discussion easily segues from one to another. But having decided that a gift is not taxable, subsequent cases may simply ask if there is a gift, and not considered the analysis further.

Unfortunately, the concept of gift itself needs elucidation. On a number of occasions taxpayers have argued that payments are voluntary, and so not taxable; sometimes successfully and sometimes not.

21 8 TC 521 at p.525.

22 16 TC 505 at p.521

23 This is so even for a series of gifts, which might look more like income: at p.521  
 "The case is only an instance of a succession of voluntary payments, each of which is voluntary and none of which need necessarily be continued."

24 See 30.3 (Annual Payment: Meaning).

Early in the history of income tax, it was argued that payments from a discretionary trust were voluntary, and so not taxable, but no:

I do not assent to the proposition that a voluntary payment can never be charged,<sup>25</sup> but it is enough to say that these were not voluntary payments in any relevant sense. They were payments made in fulfilment of a testamentary disposition for the benefit of the children in the exercise of a discretion conferred by the will.<sup>26</sup>

Emphasis added: the underlined words recognise, which is important to remember, that “voluntary” has a range of meanings.

*Spritebeam v HMRC* concerned a CT avoidance scheme where (in short) a lender lent money to a borrower, on terms that the borrower paid interest, not to the lender but to a third party (Spritebeam).<sup>27</sup> The lender was able to enforce the borrower’s obligation to pay, but did not receive anything. The third party Spritebeam received the payments, but was not entitled to enforce them.

Spritebeam argued that it received a voluntary payment and so not taxable. But it was held to be taxable as Misc Sweep-up Income<sup>28</sup>:

it is immaterial that the recipient cannot enforce payment; what matters is whether there is an obligation on the payer to pay... the obligation was in no sense voluntary.<sup>29</sup>

It was common ground that the loan agreement was a source. The unusual feature in *Spritebeam* was Spritebeam did not own this property or have any interest in it. The taxpayer argued that there was a charge only if it had an interest in the source (which it did not). The reader may think that was uncontroversial. But no:

the required connection between taxpayer and source need not be

---

25 Author’s footnote: When might voluntary payments be charged? Perhaps the point here is that a gift might be charged as trading income or employment income. But there needs to be something more than just a gift.

26 *Drummond v Collins* 6 TC 525 at p.539. The point was re-argued, hopelessly, in *Cunard’s Trustees v IRC* with the same outcome: 27 TC 112 at p,133,

27 All companies were in the same group, so the transaction made commercial sense, but nothing turned on that for present purposes.

28 It could not be taxed as interest for reasons related to the loan relationship rules.

29 at [68], [85].

limited to legal rights but can include the situation where the payment is made pursuant to any legal duty owed by the payer.<sup>30</sup>

That is a sensible outcome. But what in fact is the connection required between taxpayer and source? The UT stated that what is needed is “sufficient connection” to the source (a “sufficient-connection test”). No-one had ever suggested that before: *Spritebeam* is new law.

“Sufficient connection” is evaluative and vague, and all we know that it was sufficient connection that the borrower was obliged to pay to *Spritebeam*. There is some risk of outcome-dependent analysis: that a tribunal first decides the outcome, and then determines the issue, whether there is a sufficient connection test, in order to reach that outcome. Income is not taxable because the tribunal decides it has sufficient connection: it has sufficient connection because the tribunal decides it should be taxable.

For instance: No-one says that a payment from a charitable trust, or charitable company, to a beneficiary of the charity, is taxable (either as Misc Sweep-up Income or as an Annual Payment). Before *Spritebeam* one would have said that there was no charge as a beneficiary of a charity has no interest in the charity, but we now know that is not a requirement. Presumably there is insufficient connection. But why is there an insufficient connection? Perhaps because there is no equivalent of the lender, in *Spritebeam*, who could enforce the obligation. But the Charity Commission and Attorney General can enforce the charity’s duties.<sup>31</sup> Why should that not be enough?

*Spritebeam* raised the example a contract between employer and employee requiring payments to a third party, and EBT:

The employment contract obliges the employer to make contributions to an approved retirement benefit scheme. The trustees are not parties to the contract but have an absolute obligation to the employee. Trustees are not taxed on the contributions to the scheme and [Counsel for *Spritebeam*] maintained that this was because the trustees did not have the necessary connection to the employment contract source. However, without expressing a concluded view, we would maintain that the case ... is probably distinguishable. Even if (a moot point) the payments are

---

30 at [84].

31 assuming English law or English law principles apply.

regarded as the trustees' income, the basis for the employer's payment is to settle income on the employee in the form of a trust. This basis may well be insufficient to generate the necessary connection between the trustees and the source.<sup>32</sup>

No-one doubts the outcome; but the reader may think this a feeble analysis.

### 32.4.3 *Position post-ITTOIA*

*Spritebeam* was a pre-ITTOIA case. After ITTOIA, unlike the pre-rewrite legislation, the charge on Misc Sweep-up Income requires income *from* a source: this suggests a causation/derivation test. So *Spritebeam* might have been decided the same way today, but on the basis that its income was derived from the source (the obligations of the borrower). Though causation/derivation tests are themselves evaluative and vague, so I am not sure whether this approach could be said to be more precise, or whether it would ever give a different outcome from a sufficient connection test.

In *Kerrison*, a post-rewrite case, the UT uncritically adopted the *Spritebeam* "sufficient link" test.<sup>33</sup> So a "sufficient-link" test (or sufficient connection, the meaning is the same) seems settled at FTT level, likely to be followed at UT level, though still open to review at the level of the Court of Appeal. But even if the "sufficient-link" test may be agreed, the question of what "sufficient link" actually means remains wide open for argument.

### 32.4.4 *Loan waiver by non-resident company*

*Kerrison v HMRC*<sup>34</sup> concerned an avoidance scheme intended to generate a tax loss. So far as relevant here, the facts were:

(1) A company with A and B shares held a subsidiary ("SubsidCo");

---

32 at [87].

33 see eg at [65].

34 [2019] UKUT 8 (TCC).

- (2) In June 2006 SubsidCo made a loan of £155m to the B shareholders in order for them to purchase B shares.
- (3) In November 2006 SubsidCo waived the loan (and the shares became more or less worthless).

This was therefore a case of a gift from a company to individuals who:

- (1) were not direct shareholders, but
- (2) were indirect shareholders; the B shareholders no doubt held (more or less) all the value of SubsidCo

The question was whether this was an income receipt, and the answer was no, for the following set of reasons:<sup>35</sup>

- (1) The waiver was voluntary; though this was just “a factor”.
- (2) The waiver was a one-off event.
- (3) The waiver was for a capital purpose, because the waived loan was itself made for a capital purpose, (namely, to repay a an earlier loan which the B shareholders had taken out at an earlier stage of the scheme)
- (4) It did not matter that:
  - (a) Ordinary shares in TopCo remained intact after the waiver,
  - (b) there was no reduction or repayment of capital,
  - (c) TopCo approved the waiver,

Apparently there was no analogy between the waiver and a distribution in respect of the shares of TopCo. In any case, the waiver was apparently not

---

35 at [72] ff.

made in respect of the shareholders' B shares.

The reader may think HMRC had the better argument. The loss scheme failed on other grounds (value shifting) and underling the decision might perhaps have been the unstated consideration, with which many (though not all) may agree:<sup>36</sup> that although the taxpayer should not obtain a loss from a circular (self-cancelling) transaction, nor should they pay tax when, taking the scheme as a whole, they had not received anything. Though of course the decision was not expressed in those terms, and nor could it be.<sup>37</sup>

### 32.4.5 Gift by non-resident company

Suppose:

- (1) a non-resident company is owned by A, an individual ("the shareholder"), and
- (2) the company makes a gift to B.

The shareholder (if UK resident) will be chargeable to tax on the distribution if a person receiving or entitled to the dividend.<sup>38</sup> Appropriate documentation would of course achieve this, but in the absence of a payment to the shareholder, it is wrong to regard them as receiving or entitled to income.

After *Kerrison*, it seems clear that B is also not in receipt of income.

This is why the rules for UK resident close companies extend the meaning of distribution to include benefits to associates of participators.

What if the company is owned by a discretionary trust, and the company makes a gift to B, a beneficiary? There are six possible solutions:

- (1) The gift is income of the trustees in the form of a distribution and
  - (a) income of B in the form of an annual payment
  - (b) income of B in the form of a distribution, or
  - (c) a capital receipt by B

36 That view is not self-evident, because the taxpayer was playing with fire; see 2.5.3 (Pro-avoidance rationale).

37 See **App 6.10** (Cardinal principle reaffirmed).

38 See 14.6.6 (Offshore dividend regime). In the tax avoidance case of *McGuckian v IRC* 69 TC 1, a shareholder-trustee sold the right to a dividend of £400k for £396k (99% of the value) to a third party purchaser. The receipt of the sale price was held to be a receipt of income, but the trustees (and life tenant) were subject to income tax on the amount the trustees (and life tenant) received, ie the sale price; not the (slightly) greater amount of the dividend (which was received by the purchaser).

- (2) The gift is not income of the trustees, and
- (a) income of B in the form of an annual payment
  - (b) income of B in the form of a distribution, or
  - (c) a capital receipt by B

Appropriate documentation would of course bring the matter into any of solutions (1)(a)(b)(c) but in the absence of a payment to the trustees, it must be wrong to regard them as receiving or entitled to income.<sup>39</sup>

Solution (2)(b) seems sensible but is inconsistent with the rule that discretionary trusts are not transparent.<sup>40</sup>

The choice is therefore between solutions (2)(a) or (c).

It seems clear that:

- (1) A company held by a trust may make a capital payment (within the s.87 definition) to a beneficiary<sup>41</sup>
- (2) A company may make a transfer of value (for IHT purposes)<sup>42</sup>

That is assumed in CGT and IHT provisions (which will need separate consideration).<sup>43</sup>

It is considered that the gift may be Annual Payment income of B (solution (2)(a)), or a capital receipt (solution (2)(c)), depending on the circumstances of the distribution: the same principles apply as any trust distribution: what power are the trustees using when they authorise the company to make the distribution?<sup>44</sup>

The position is different if a company held by a *Baker* trust makes a gift to a life tenant. The trust is transparent, the life tenant has an interest in the company, and the distribution is taxable as an income-distribution. See 29.7 (Gift to non-shareholder).

39 See 39.2.1 (Income mandated to life tenant).

40 See 38.3.1 (Discretionary trust: source).

41 See 57.10 (Payment from close co: s.96(1)). But capital payment for that purpose would include allowing a beneficiary to use or occupy property owned by the company, which is not a distribution for IT purposes; so the CGT provision does not shed much light on the issue discussed here.

42 See 77.1 (Transfer of value by close co). The transactions in securities code may also need to be considered.

43 See 75.14 (Transfers to/from underlying co).

44 See 38.8 (Trust payment: Income/capital). Could it make a difference if the distribution was to the ultimate beneficial owner of the company?

### 32.4.6 Partnership profit allocation

The scope of Misc Sweep-up Income in the context of partnership profit allocation is discussed in a trio of what should turn out to be leading cases; but discussion should wait until these decisions are final.<sup>45</sup>

## 32.5 Disposal of asset

The BI Manual provides:

### **BIM100135 isolated sales of assets** [Jun 2016]

Casual profits made from the isolated buying and selling of assets may be taxable as trading income: see BIM20230 for further guidance.

If the activity falls short of a trade then the question is whether the profits come from the increase in value of a capital asset. A capital profit is not taxable as miscellaneous income.

### **Sales of single assets**

A profit on the sale of a single item that is not a trading venture will be a capital accretion and not taxable as miscellaneous income.

This has been made clear in a number of cases. [The Manual refers to *Ryall* and repeats the quote set out in BIM100105 and continues:]

A similar point was made in *Leeming v Jones* [1930] 15 TC 333 where Lawrence LJ said at p.354 in a judgment approved in the House of Lords:

‘It seems to me in the case of an isolated transaction of purchase and resale of property there is no middle course open. It is either an adventure in the nature of trade, or else it is simply a case of sale and resale of property.’

### **BIM100140 series of sales of assets** [Jan 2018]

When looking at whether or not the profits from a series of sales of assets are taxable as income you should first consider whether it amounts to a trade before you consider the miscellaneous income provisions.

[The Manual continues with some comments on what constitutes

---

<sup>45</sup> *BlueCrest Capital Management v HMRC* [2020] UKFTT 298 (TC); *Odey Asset Management v HMRC* [2021] UKFTT 31 (TC); *HFFX v HMRC* [2021] UKFTT 36 (TC). But if one was to hazard a comment, the reader might think that the cases give too many pages to citation of authority and insufficient to analysing the underlying principles.

trading, which are not set out here.]

The courts have found the trade/non-trade border difficult to define.

In *Andrew v HMRC*:

147. Case VI applies to “annual profits or gains” that are not taxed under the other Cases of Schedule D. However, as Viscount Dunedin pointed out in *Leeming v Jones*, it does not extend to every profit that is not otherwise subject to tax. He said this at page [359]:

“Now, Case VI sweeps up all sorts of annual profits and gains which have not been included in the other five heads, but it has been settled again and again that that does not mean that anything that is a profit or gain falls to be taxed. Case VI necessarily refers to the words of Schedule D, that is to say it must be a case of annual profits and gains

...

148. Viscount Dunedin then goes on to explain that the word “annual” in the phrase “annual profits or gains” does not require that a receipt or profit recurs year after year. However, it does require that the receipt must be of the nature of income. Furthermore, the phrase “profits and gains” within Case VI must be profits and gains that are “ejusdem generis with the profits and gains specified in the preceding five cases”.

149. On that basis, and as the House of Lords held in *Leeming v Jones* itself, a profit arising from an isolated purchase and sale of an asset could not fall within Schedule D Case VI. Such a profit could only be subject to tax as income if the transaction was in the nature of a trade and so within Case I ... If not, the profit arising would be of a capital nature and so not within Case VI.

150. The same may not apply where the transaction is not an isolated transaction but is repeated over a number of years (see *Cooper v Stubbs*) offers another example.<sup>46</sup>

*Andrew* was a variant of a straightforward purchase and sale:

- (1) Trustees were given an asset (an option over gilts)
- (2) The trustees were paid a sum to release the option

The profit was not taxable as Misc Sweep-up Income:

the transactions are akin to the isolated transaction which was the subject of the House of Lords decision in *Leeming v Jones*. The NA

---

46 [2019] UKFTT 177 (TC).

Trustee acquired rights to the Call Option and disposed of its rights in a single transaction by electing to cancel the Call Option for the cash cancellation price. There is no evidence before the Tribunal that these transactions were part of a repeated pattern of behaviour (as in *Cooper v Stubbs*). The receipt of the cash cancellation price was capital in nature and so cannot fall within Schedule D Case VI. The timing of the transactions, and in particular the short timeframe between the acquisition and disposal of the option rights, and the short term nature of the option rights themselves do not disturb that conclusion.<sup>47</sup>

### 32.6 Services

In *Ryall v Hoare*.<sup>48</sup>

Without pretending to give an exhaustive definition, I think one may take it as clear that where an emolument is received, or, rather, where an emolument accrues, by virtue of some service rendered by way of action or permission, or both, at any rate that is included within the words “profits or gains” [now, Misc Sweep-up Income].

The term sometimes used here is “casual income”.

This category of Misc Sweep-up Income involve activity which comes close to a trade of providing services but falls short. Of course, if the activity passes the trading borderline, then the trading income charge takes priority.

The BI Manual provides:

**BIM100110 scope of the provisions: services** [Jan 2019]

A casual receipt is taxable under the miscellaneous income sweep-up provisions where it is received for a service performed as agreed/arranged for reward. This contrasts with a simple gift as a ‘thank you’, for example, after performing a casual service where there was no agreement/arrangement/common expectation that such was for reward. Voluntary gifts are not taxable under the miscellaneous income provisions. This can be a difficult area depending on the facts of the specific case. The treatment contrasts with treatment of voluntary receipts from a trade or profession, see BIM41801.

---

47 at [153].

48 8 TC 521 at p.525. The word “emolument” nowadays would be reserved for employment income; but the meaning is clear, and nothing turns on the use of that word.

The distinction was set out by Lord Hanworth MR in *Brocklesby v Merricks* [1934] 18 TC 576 at p.584:

‘He was in a position to say: “A part of the profit which has been earned does, under the arrangement made between us, in fact belong to me.”’

...

### **BIM100115 services - contracts and arrangements** [Jun 2016]

The distinction which determines whether income is within the miscellaneous income sweep-up charge is between a gratuitous payment and a payment where it was agreed that the service would be for reward.

#### **Contracts**

Clearly if the payment is made under a contract for services, this shows that it is not gratuitous. The contract can be in writing or it can be verbal. The importance of the contract is that it shows that it was agreed that the service was not gratuitous and that there was going to be a reward.

It is important to remember that the fact that a payment is made under a contract is not enough to make the payment taxable under the miscellaneous income sweep-up provisions. Lord Denning MR said, in *Scott v Ricketts* [1967] 44 TC 303 at p.3211 - p.322B:

‘The judge seems to have thought that, as the payment was made under a contract, that was enough to bring within [the charge]. I cannot agree with him. It must be a contract for services or facilities provided, or something of that kind.’

For payments under a contract to be taxable under the sweep-up provisions, the contract must be one that produces income.

#### **Implied contracts**

In cases where there is no express contract, a party may still be able to take action in the courts to obtain a payment where there is evidence that shows that the work was not to be done gratuitously.

An example is a quantum meruit payment - a payment by reference to what the work carried out was worth. A contract may be ‘implied in fact’ if it is suggested by the facts and circumstances that there is a mutual intention to contract.

If a realistic view of the facts shows that a service was provided for reward, it is not a gratuitous payment and is taxable under the sweep-up provisions.

#### **Void contracts**

A contract or agreement may be void for reasons of public policy, for example because it is illegal and therefore not enforceable, but this does

not alter the fact that there was an intended agreement that a service was to be provided for reward and thus a taxable source.

Brightman J in *Alloway v Phillips* [1980] 53 TC 372 at p.381 dismissed the argument that a sum was not taxable because the contract was unenforceable as void:

‘Nor have I been referred to any authority for the proposition that money received and retained under a contract void as against public policy escapes taxation for that reason.’

This comment was obiter, and on the appeal the Court of Appeal laid stress on the existence of a valid contract. But the issue of void contracts will rarely if ever arise.

### **Arrangements**

The parties may have entered an arrangement under which one would pay the other for a service. A payment under such an arrangement is not gratuitous and is taxable under the miscellaneous income sweep-up provisions.

[The Manual makes some general comments on the meaning of “arrangement” and continues:]

### **BIM100120 services - amount of work done** [Jan 2019]

That an agreement does not require much work to be done does not affect the fact that the sum received is a payment for services, and is chargeable under the miscellaneous income sweep-up provisions.

However, lack of proportion may be an indication that, where there is some other potential reason for the payment, the payment comes from that alternative reason and not from the service.

That the service being provided does not need to be large can be seen from the judgment of Finlay J in *Brocklesby v Merricks* [1934] 18 TC 576. In this case the taxpayer had got a favourable contract because he had previously rendered voluntary services. Finlay J said (in a judgment approved by the Court of Appeal) at p.583:

‘It seems to me that it was a payment made to the appellant for services rendered. It is perfectly true that he did very little ... but I cannot doubt that this was a contract for remuneration in respect of services rendered.’

Similarly in the case of *Bradbury v Arnold* [1957] 37 TC 665 Upjohn J said at p.669:

‘There is no doubt that a contract for services may, and clearly does, form a matter for assessment under [the sweep-up provisions] and

not the less so that the services to be rendered are trivial or that they are to be rendered once and for all so that the remuneration may be regarded as a casual profit arising out of a single and isolated transaction.’

Upjohn J confirmed the point that, where the payment is large and the services trifling, the Tribunal may draw the inference that there was some other reason for payment:

‘It was submitted on behalf of Mr. Arnold, amongst other things, that any services of introduction of the kind rendered to Major Martineau by Mr. Arnold could not have been other than trifling and that a payment of £9,000 would not be attributable to such services. The Commissioners make no finding on that point, but I think ... they must have accepted that view and I do not understand Counsel for the Crown seriously to challenge that.’

This shows the importance of establishing all the facts around the payment.

### **BIM100125 sweep-up - introduction** [Jan 2019]

The scope of the miscellaneous income sweep-up provisions is extremely wide covering any income that:

- is not otherwise taxable; and
- is income of the type and nature that falls within the scope of Income Tax or Corporation Tax on income; that is not a gift, gratuity, wager or bet.

By their very nature the provisions apply to unusual situations. For example several of the cases that have been heard by the courts involved income arising under unsuccessful avoidance schemes.

When considering whether particular income is taxable under the provisions, it is important to establish the facts and to apply the principles set out by Viscount Dunedin in *Leeming v Jones* [1930] 15 TC 333 and by Rowlatt J in *Ryall v Hoare* [1923] 8 TC 521 (see BIM100105). You should be careful not to apply judicial commentary specific to the particular facts of an unusual case to a substantially different fact pattern.

The decided cases are, however, illustrative of the breadth of the scope of the provisions.

The charge to tax under the sweep-up provisions covers income received under an agreement or arrangement. It does not need to be received for any service and can be almost pure income profit (see SAIM8030), provided that it is income of the type and nature that falls within the scope of Income Tax or Corporation Tax on income.

[The Manual sets out some examples not printed here as they are closely based on the cases discussed below].

**BIM100130 sweep-up - judicial comment** [Jun 2016]

...The Special Commissioners' case of *Property Company v Inspector of Taxes* [2004] SpC433 concerned a series of transactions including a tax avoidance scheme.

Under a 'business sale agreement', 'Property Company' agreed to sell to another company in the C Group, all its assets excluding a payment of rental income (the retained rent payment), recoverable tax and cash. 'Property Company' was then sold out of the C Group.

At that point 'Property Company' had the right to the retained rent payment, less the expected tax thereon, and a liability in respect of an inter-group debt which was paid off out of the rent. The intention was to offset the retained rent payment by creating a deduction in 'Property Company', the benefit of the tax saving from which would be split between the C Group and the new owners of 'Property Company'. However, the proposed tax avoidance scheme to create a deduction did not work.

The question was whether 'Property Company' was taxable on the retained rent payment either as property income, or alternatively under the miscellaneous income sweep-up charge.

The Commissioners determined that part of the money was a post cessation receipt from its letting business, but the remainder was not income from land, but arose from the agreement, and was taxable under sweep-up provisions:

'The balance arises solely from the business sale agreement. The balance stands in the shoes of the remainder of the retained rent payment but it is not rent and it has no legal connection with land because the effect of the [Landlord and Tenant (Covenants) Act 1995] is that it is not possible to retain such an interest in land. The only property right relates to CGP's ownership of land that it, as successor in title to the appellant, has exploited by continuing to let it to CGI pursuant to the 1996 Agreement for Lease. The balance is a sum equal to the rent receivable from CGI but the fact that it is measured by reference to rent does not give it the necessary connection with land so as to be able to say that the source of it is derived from land. It is in the nature of income that is *ejusdem generis* with [property] income and, not being taxable under any other [provision], is accordingly taxable under [the miscellaneous income provisions].'

The case of *Black Nominees Ltd v Nicol* [1975] 50 TC 229 involved an elaborate scheme designed to reduce the taxable income of the actress, Julie Christie. As part of the scheme, Julie Christie entered into a service agreement under which she became an employee. The Court held that Black Nominees were not carrying on a trade of exploiting the professional services as an actress of Julie Christie, nor were they taxable as receiving profits of gains from a profession as Julie Christie had ceased to carry on her profession when she entered the service agreement. Templeman J held that:

‘Tax is charged under [the sweep-up charge] in respect of annual profits or gains not falling under any other [provision]. In my judgment, the moneys received by Black Nominees in consequence of the transactions entered into in December 1965 fit within this description. If it were not for the trick with the £475,000, no one would suggest that the moneys received by Black Nominees were capital. Once the trick is exposed the moneys are seen to be what they are: namely, annual profits or gains. They escape any other [provision] and fall into [the sweep-up charge].’

Templeman J further held that:

‘The sources of the moneys received by Black Nominees were the contracts between Cymbeline as assignee of Rosebroom and the film or theatrical companies for the services of Miss Christie, not the contract between Rosebroom and Miss Christie which, together with the transfer agreement, enabled Cymbeline to fulfil its contractual obligations to the film and theatrical companies by making available the services of Miss Christie.’

Templeman J held that the income was taxable under the sweep-up provisions...

In *Andrew v HMRC* a transaction was intended to yield a benefit for the settlor, (a tax loss on the grant of the option); but that did not amount to providing a service:

155.... the NA Trustee was provided with a valuable asset (its rights under the Call Option Agreement) and then realized its value. The provision of the valuable asset to the NA Trust was a key aspect of the scheme, but I find it difficult to characterize the provision of that asset to the trust or the subsequent realization of that asset through its cancellation as a reward for a separate service beyond the transactions

themselves ...<sup>49</sup>

### 32.6.1 Providing information

The BI Manual provides:

#### **BIM100130 Sweep-up - judicial comment** [Jun 2016]

##### **...Income from “property”**

The case of *Alloway v Phillips* [1980] 53 TC 372 involved the wife of one of the Great Train Robbers. Whilst living in Canada, she received £39,000 from a newspaper. It was not in dispute that she had provided information to the newspaper which led to the newspaper publishing a series of articles. It was found that she had entered into an agreement, governed by English law, to assist the newspaper.

This was clearly Misc Sweep-up Income.<sup>50</sup>

The BI Manual provides:

#### **BIM100230 newspaper stories** [Jan 2019]

Fees received for providing information to a newspaper are assessable as miscellaneous income under the sweep-up provisions if not otherwise taxable.

In *Hobbs v Hussey* [1942] 24 TC 153 it was held that a solicitor’s clerk, who had never carried on the profession of an author, was chargeable in respect of a payment received from a newspaper for the serial rights of his life story. It was contended for the taxpayer that the transaction was a sale of the copyright of the series of articles and, therefore, resulted in a sale of capital and not a revenue receipt. At p.156, Lawrence J held that the fact that a service involved an element of the sale of a capital asset did not prevent it being a service.

‘... it is also true, in my opinion, that the performance of services, though they may involve some subsidiary sale of property (e.g., dentures sold by a dentist), are in their essence of a revenue nature, since they are the fruit of the individual’s capacity which may be regarded in a sense as his capital but are not the capital itself.’

The question then was: what is the nature of the transaction?

‘Does then the fact that the present transaction involved the sale of the copyright in the Appellant’s series of articles, constitute

---

49 [2019] UKFTT 177 (TC) at [155]. For another aspect of this case, see 32.5 (Disposal of asset).

50 The issue was the location of the source: see 32.15.2 (Source: Income from services).

therefrom capital; or is the sale merely subsidiary to what was in its essence a performance of services by the Appellant? In my opinion, the true nature of the transaction was the performance of services. The Appellant did not part with his notes or diaries or his reminiscences.’

As Hobbs was being paid for his services, he was taxable under the miscellaneous income sweep-up provisions.

The case of *Housden (Inspector of Taxes) v Marshall* [1958] 38 TC 233 differed in that Marshall, a famous jockey, did not write the articles. He agreed to make available, to a newspaper, reminiscences of his racing career together with certain documents relating to it. The agreement granted the newspaper the first British serial rights in the reminiscences and gave the right to publish the article under the taxpayer’s name and to use a facsimile of his signature. In return, the taxpayer was to receive two payments of £750.

Subsequently, a journalist employed by the newspaper wrote four articles about the taxpayer. These articles were written as a result of the journalist’s own researches and the taxpayer’s only contribution was to suggest certain minor amendments. Because of a national newspaper strike only one article was published and the taxpayer received only one of the two proposed £750 payments.

The taxpayer appealed against an assessment under the miscellaneous income provisions in respect of the £750 payment. The Special Commissioners held that the agreement provided predominantly for a sale of publication rights, any services rendered being incidental and subsidiary, and that the £750 was therefore not assessable.

Harman J held that the Special Commissioners had misunderstood the agreement with the newspaper:

‘I do not think that he sold any publication rights in his reminiscences. He had no reminiscences of which he could sell the rights. The reminiscences which he communicated to the journalist, if they had been used - which in the upshot they were not - were as I say not his; he had no secrets to impart, his life was open. He was not selling anything of which he had the property like the copyright. He was not selling anything secret. He was merely talking to the journalist and allowing the journalist's write-up to be put forward as his.’

As a result he reversed their decision holding that the £750 was assessable under the miscellaneous income sweep-up provisions as a payment for services.

This case shows the importance of understanding exactly in relation to what is money being paid. It is not simply a case of reading the agreement; it is important to see what was actually done as a result.

Giving a judgment in the High Court of Australia in the case of *Brent v FCT* [1971] 71 ATC 4195, Gibbs J said that:

‘I have not been referred to any case in which it has been held that information which was not acquired or used in connection with a business should be treated as a capital asset whose disposal would result in the receipt of a capital gain rather than of income.’

He distinguished information from copyright saying that:

‘In *Trustees of Earl Haig v. I.R. Commrs.* (1939) 22 TC 725, the trustees who had the right to publish the war diaries of Earl Haig gave to an author the right to make full use of the diaries so far as the public interest permitted and the sum received by the trustees as consideration for so doing was held to be a capital payment and not assessable to income tax. However, in that case, the trustees had the copyright in the diaries, which was indubitably property, and they did not merely sell information to the author, but in effect partially realised their copyright.’

### 32.6.2 *Photography*

The BI Manual provides:

#### **BIM100235 photography** [Jan 2019]

If someone, other than by way of trade, makes a profit by selling a photograph they are chargeable under the miscellaneous income sweep-up provisions.

However if they sell the copyright then it is a capital transaction if the sale is not done as part of a trade and they are not liable under those provisions.

This comes from the decision of Lord Simon in *Nethersole v Withers* [1948] 28 TC 501 at p.517 where he said that the assignment of copyright in a film:

‘amounts to a sale of property by a person who is not engaged in the trade or profession of dealing in such property, and the proceeds of such a sale is, for Income Tax purposes, in the nature of untaxed capital and not in the nature of taxable revenue.’

### 32.6.3 *Commission for introduction*

SP 4/97 (Taxation of commission, cashbacks and discounts) provides:

**Case VI—receipts**

19 Commission etc may sometimes be received by a person as consideration for introducing a customer to a supplier of goods or services, other than in circumstances where the commission would be taxable as income under Case I or II of Schedule D (see para 11 above) or as employment income (see para 25 below). Subject to para 20 below, if the commission arises under an enforceable contract, it should be brought into account as a taxable receipt in calculating the profit from the transaction under Case VI of Schedule D...

**Case VI—deductions**

21 Where, in the circumstances described in para 19 above, some or all of the commission etc in question is passed on to the customer, a deduction is due where the customer requires the commission to be passed on as a condition of entering into the transaction or where for some other reason the payment is necessary to earn the commission.

32.6.4 *Cashback*

Commissions for introduction must be distinguished from cashbacks to the customer/client.

SP 4/97 (Taxation of commission, cashbacks and discounts) provides:

**Case VI—receipts**

20 A sum, however described, which is received by an ordinary retail customer as consideration for the purchase by the customer of goods or services should not be regarded as a taxable receipt in computing profits under Case VI. This is the case whether the payer is the provider of the goods or services or another party with an economic interest in ensuring the transaction takes place.

The BI Manual provides:

**BIM100210 cash-backs** [Jan 2019]

... When a customer, not carrying on a trade or property business, decides to take their business to one concern rather than another, they are not providing that concern with a recognisable service such as to bring them within the scope of the miscellaneous income sweep-up provisions. This applies even if a commission or cash-back which may be received by the customer as consideration for the purchase of goods or services is paid under an enforceable contract separate from the contract for the supply of the goods or services itself.

However, if someone is paid for introducing some other customer to the

supplier of goods or services then they are taxable under the miscellaneous income sweep-up provisions if:

- they are not otherwise chargeable; and
- the payment is not gratuitous (see BIM100110).

One-off cash-backs should be distinguished from regular payments, which are not Misc Sweep-up Income, but may be Annual Payments.<sup>51</sup>

## 32.7 Income from finance

Income from finance may be regarded as a particular kind of service, rather than a separate category.

### 32.7.1 *Guarantor fee*

The BI Manual provides:

#### **BIM100215 guarantees** [Jun 2016]

If a person agrees to act as guarantor in return for a reward, then they are chargeable under the miscellaneous income sweep-up provisions, if they are not otherwise chargeable.

In *Sherwin v Barnes* [1931] 16 TC 278, a guarantee was given in respect of an overdraft in return for the payment of a bonus of £1,000. The guarantor was assessed to Income Tax in respect of his share of that £1,000. Rowlatt J said at p.280-281:

‘The question is simply this: first of all, is this receipt in the nature of income? If it is in the nature of income, then does it fall within the year? That is the way Lord Atkin put it, and I think everybody agreed that that was right. Earning a commission by pledging your credit was held, and considered rightly held, in *Ryall v Hoare*, to be in the nature of income. There it is, and I cannot get away from that.’

### 32.7.2 *Lender fee*

The BI Manual provides:

#### **BIM100225 loans** [Jan 2019]

If a person makes a loan or provides money and receives a reward not otherwise chargeable to Income Tax, this is taxable as miscellaneous

---

51 See HMRC Brief 4/13 (Payments of “trail commission” on investment products); *HMRC v Hargreaves Lansdown Asset Management* [2019] UKUT 246 (TCC).

income under the sweep-up provisions.

This can be seen from the case of *Ruskin Investments Ltd v Copeman* [1943] 25 TC 187. In this case, the company had made a loan to a builder. The debt was settled by the builder transferring the ground rents of properties to the company.

The difference between the amount of the loan and the value of the ground rents received was held to be taxable as miscellaneous income. In his judgment at p.198, Scott LJ stated:

‘The result was that the reversion and ground rents of the 249 plots were received primarily in repayment of the capital loan of £15,000; the balance of their rather speculative value was the Company’s remuneration for the service of the loan, taxable [as miscellaneous income].’

In the case of *Wilson v Mannooch* [1937] 21 TC 178, the taxpayer was a partner in a firm of solicitors. He verbally agreed with a building company, who were clients of the firm, that, in consideration of the respondent personally lending or arranging for the loan to the company of the purchase price of certain property, the respondent should receive, on the re-sale of the property, one-third of any resulting profit, with a limit of £500. The greater part of the purchase money was provided on first mortgage by certain clients of the respondent's firm, and the remainder on second mortgage carrying interest at 6 per cent by the respondent personally. The sum of £500 was duly paid to the respondent. Lawrence J said at p.185:

‘In my judgment, the sums received in the present case are not analogous to the appreciation of capital upon the sale of an article, but are, in reality payments to the Respondent for the finding of money, and have the character of income, and not capital.’

## **32.8 Futures and options**

### *32.8.1 Derivatives law terminology*

The meaning of “derivative” is as follows:

A transaction under which the future obligations of one or more of the parties are linked in some specified way to another asset or index, whether involving the delivery of the asset or the payment of an amount calculated by reference to its value or the value of the index. The transaction is therefore treated as having a value which is separate (although derived) from the values of the underlying asset or index. As a result, the parties' rights and obligations under the transaction can be

treated as if they constituted a separate asset and are typically traded accordingly.<sup>52</sup>

The definition in FRS102 is as follows:

A financial instrument or other contract with all three of the following characteristics:

- (a) its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable (sometimes called the ‘underlying’), provided in the case of a non-financial variable that the variable is not specific to a party to the contract;
- (b) it requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and
- (c) it is settled at a future date.

I do not think the differences between these definitions are material. Firth states:

All derivatives transactions fall into one of three basic categories:

- (1) swaps and related products,
- (2) options and swaptions and
- (3) futures and forwards.<sup>53</sup>

### 32.8.2 *Futures/Options: IT relief*

Section 779(1) ITTOIA provides:

No liability to income tax arises as a result of Chapter 8 of Part 5 (income not otherwise charged) in respect of a gain arising to a person in the course of dealing<sup>54</sup> in—

---

52 *Lomas v JFB Firth Rixson* [2012] EWCA Civ 419 at [2] citing Firth’s “important monograph” *Derivatives Law and Practice* (looseleaf) para 1.004 (What are derivatives?).

53 Firth, *Derivatives Law and Practice* (looseleaf) para 1.005 (Categories of transaction).

54 Defined s.779(2) ITTOIA: “The reference in subsection (1) to a gain arising in the course of dealing in commodity or financial futures includes a gain regarded as so arising under section 143(3) of TCGA 1992 (gains arising from transactions

- (a) commodity or financial futures,
- (b) traded options, or
- (c) financial options.

In short, futures and options are excluded from the Misc Sweep-up Income charge. These transactions must either be trading or capital transactions. This makes obsolete some antique case law under which transactions in futures were held to be non-trading but constituted Misc Sweep-up Income.

It is therefore necessary to consider the meaning of these terms.

### 32.8.3 “Commodity/financial future”

Section 779(3) ITTOIA provides a partial definition:

In this section—

“commodity or financial futures” means commodity futures or financial futures that are for the time being dealt in on a recognised futures exchange<sup>55</sup>

That leaves the terms substantially undefined.

SP 3/02 provides:

1 This statement of practice sets out the HMRC's views on the tax treatment of transactions in futures and options of the sorts defined in TCGA 1992 s 143 and relating to shares, securities, foreign currency or other financial instruments.

[The SP specifies some purposes for which the SP does not apply, not relevant here. and continues:]

4 “Financial futures” is a wide term. It includes-

[a] contracts for future delivery of shares, securities, foreign currency or other financial instruments;

[b] [i] contracts that are settled by payment of cash differences determined by movements in the price of such instruments (including contracts where settlement is based on the

---

otherwise than in the course of dealing on a recognised futures exchange, involving authorised persons).”

55 Defined s.288(6) TCGA: “In this Act “recognised futures exchange” means the London International Financial Futures Exchange and any other futures exchange which is for the time being designated for the purposes of this Act by order made by the Board.”

- application of an interest rate or a financial index to a notional principal amount),
- [ii] as well as contracts settled by delivery; and
- [c] both exchange traded and over the counter contracts.

See 32.9 (Swaps).

### 32.8.4 *Traded/financial options*

Section 779(3) ITTOIA provides:

In this section ...

“financial option” has the meaning given by section 144(8)(c) of TCGA 1992, and

“traded option” has the meaning given by section 144(8)(b) of that Act.

So we turn to s.144(8) TCGA:

- (b) “traded option” means an option which, at the time of the abandonment or other disposal, is listed on a recognised stock exchange or a recognised futures exchange; and
- (c) “financial option” means an option which is not a traded option, as defined in paragraph (b) above, but which, subject to subsection (9) below—
  - (i) [A] relates to currency, shares, securities or an interest rate and
    - [B] is granted (otherwise than as agent) by a member of a recognised stock exchange, by an authorised person within the meaning given by section 143(8); or
  - (ii) [A] relates to shares or securities which are dealt in on a recognised stock exchange and
    - [B] is granted by a member of such an exchange, acting as agent; or
  - (iii) [A] relates to currency, shares, securities or an interest rate and
    - [B] is granted to such an authorised person as is referred to in sub-paragraph (i) above and concurrently and in association with an option falling within that sub-paragraph which is granted by that authorised person to the grantor of the first-mentioned option; or
  - (iv) [A] relates to shares or securities which are dealt in on a recognised stock exchange and
    - [B] is granted to a member of such an exchange, including

such a member acting as agent.

## 32.9 Swaps

Firth defines a swap as follows:

A swap is a contract which involves an exchange of payment streams, each of which is calculated on a different basis from the other.

The classic example of such a contract is the interest rates swap, under which one party pays a variable or floating rate of interest on a specified notional amount and the other party pays a fixed rate on the notional amount, or a floating rate calculated on a different basis. Typically, the notional amount is not exchanged between the parties ... and so unlike a loan, no borrowing is involved.<sup>56</sup>

Income from swaps not otherwise taxable is Misc Sweep-up Income. RI 263 (Swaps held by non-corporates, 2003) provides:

5 Our general view is that profits or losses on a swap held by a non-corporate, if they are not within Case I of Schedule D, will fall within Case VI.

6 Case I takes priority over any other possible charge to tax. [The SP discusses when swaps constitute trading and continues:]

7 Where a swap is taken out by a non-corporate to hedge interest payments which are deductible in computing the profits or losses of a Schedule A business [now called a UK property business], then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that Schedule A business. ...

8 Profits or gains that are not of a capital nature, and which are not within Case I or Schedule A, will constitute “annual profits or gains not falling under any other Case of Schedule D” and will therefore be chargeable under Case VI (unless, exceptionally, they are within Case V). Periodic payments under a swap are not annual payments within Case III because they are not pure income profit—the person who receives them has counter-obligations under the swap contract. It follows that such sums are payable without deduction of income tax....

10 Users of swaps may sometimes receive or pay lump sums. For example, one party may pay a premium to enter into a swap, or a lump sum representing the net present value of outstanding rights and obligations under the contract may change hands if a swap is assigned

---

<sup>56</sup> Firth, *Derivatives Law and Practice* (looseleaf) para 1.006 (Swaps - meaning).

or terminated early. Such lump sums will also be within Case VI if they are on revenue account. Whether a receipt or payment is capital or income is a question of fact in any particular case. But in general all cashflows made or exchanged under or in connection with a swap will be income, whether they take the form of periodic payments or are rolled up into a lump sum payable at any point.

If a swap were a listed “financial future” it would be taken out of the Misc Sweep-up Income charge.<sup>57</sup> But a swap is not a future. RI 263 (Swaps held by non-corporates, 2003) provides:

11 It is sometimes contended that certain swaps are “financial futures” that, if not within Case I [trading], are taken out of [IT] by [s.779 ITTOIA] and are chargeable to capital gains tax by virtue of TCGA 1992 s 143. Statement of Practice 3/02 ... is sometimes quoted in support of this view.

12 We do not agree. Paragraph 4 of SP 3/02 makes the point that the statutory phrase “financial futures” is a wide term, encompassing cash-settled contracts as well as those settled by delivery, and over the counter contracts (including forward rate agreements) as well as exchange-traded contracts.<sup>58</sup> But, wide as it is, it can only cover derivatives that are “futures”. The word “future” must be interpreted in its normal commercial sense. And—while there is some fluidity in commercial usage—the market will generally see swaps as falling into a different category from futures.<sup>59</sup>

## 32.10 Income from assets

### 32.10.1 *Hire of chattels*

The BI Manual provides:

**BIM100220 hire of equipment** [Jan 2019]

The profits from the hire of movable objects, whether or not of a casual or occasional nature, are taxable under the miscellaneous income sweep-up provisions where they are not otherwise taxable, for example because the activity does not amount to a trade.

---

57 See 32.8.2 (Futures/Options: IT relief).

58 See 32.8.3 (“Commodity/financial future”).

59 See 32.8.1 (Derivatives law terminology).

### 32.10.2 *Stock loans*

The CTM provides:

**CTM47210 Investment trusts: conditions for approval: income**  
 [Mar 2017]  
 Stock lending fees are income chargeable under Case VI of Schedule D ...

### 32.10.3 *Payment to permit filming*

The BI Manual provides:

**BIM100245 film and television** [Jun 2016]  
 If someone receives a fee for allowing a property to be used for filming, then this is chargeable under the miscellaneous income sweep-up provisions if it is not taxable as income from property.

This is a straightforward licence fee for use of the property.

However, funds paid out to local residents as compensation for the disturbance caused by filming are likely to be of a gratuitous nature and so will not be taxable as miscellaneous income.

The point is that the victims of disturbance had no legal claim for compensation. But I wonder how often such payments are made.

### 32.10.4 *Tolls*

The BI Manual provides:

**BIM100250 tolls** [Jan 2019]  
 Income from tolls, dues etc which arises because the taxpayer owns or occupies the land is taxed as trading income: see BIM60201.  
 Profits derived from tolls, dues etc which do not arise from the ownership or occupation of lands etc and therefore are not taxable as trading income are taxable as miscellaneous income under the sweep-up provisions.  
 In the case of *CIR v The Forth Conservancy Board* [1931] 16 TC 103 the Conservancy Board was empowered to levy dues on vessels, goods and passengers coming within its jurisdiction.  
 In the House of Lords it was held that the Conservancy Board's surplus revenues from these dues were profits within the sweep-up provisions. It was not disputed that the assessment could not be greater than the surplus of the dues over the Conservancy Board's expenses.

### 32.11 Restraint of trade

The BI Manual provides:

**BIM100240 restraint of trade** [Jan 2019]

A payment for agreeing not to do something may be chargeable as miscellaneous income under the sweep-up provisions.

The case of *Higgs v Olivier* [1952] 33 TC 136 relates to a payment made to Sir Laurence Olivier. Following the making of the film of Henry V, Olivier agreed not to act in, produce or direct a film for any other person for a period of eighteen months in return for a payment of £15,000. This was held not to be taxable as income from his profession as an actor/director.

It was considered that a payment not to do something was not a trading receipt (see BIM35600), however the question of whether such a payment was taxable under the sweep-up provisions was not considered in this case.

Judicial comments in later cases have indicated that such payments are a payment for a service chargeable under the sweep-up provisions.

In *Murray v ICI Ltd* [1967] 44 TC 175, Cross J said at p.207:

‘The Crown made no alternative argument under [the sweep-up provisions] on the basis that the £15,000 was a payment for a service rendered by Sir Laurence Olivier at the request of the film company. Had it done so, then the question might well have arisen whether it was a casual profit of a revenue nature or a payment for parting with a capital asset: see the judgement of Rowlatt J. in *Ryall v Hoare* 8 TC 521. It may be - I say no more - that, had the claim been put that way, the Crown would have succeeded.’

The Court of Appeal approved Cross J’s judgment in full.

### 32.12 US economic impact payments

Economic Impact Payments are made under the [USA] Coronavirus Aid, Relief, and Economic Security Act 2020 to eligible US citizens and green card holders.

The minutes of the Joint Expatriate Forum on Tax & NICs provide:

**Question:** The vast majority of Americans in the UK will be entitled to an economic impact payment from the US if they haven’t already received it. It is \$1,200 per individual and \$500 for children. I am aware that one individual has had correspondence confirming that HMRC

would not view these payments as subject to UK tax, but the basis for this is not entirely clear... This is likely to affect over 100,000 people in the UK.

**HMRC Answer:** You are correct that the answer we provided was that the economic impact payments are not taxable as income in the UK.

**Question:** The technical reason why the US Stimulus payments are not taxable in the UK is that they are an advance refund of 2020 US taxes, and US tax refunds are not taxable in the UK.<sup>60</sup>

### 32.13 Sweep-up income: Computation

Section 688(1) ITTOIA provides:

Tax is charged under this Chapter on the amount of the income arising in the tax year.

This gives no guidance on how to quantify the amount of income. In *Curtis Brown v Jarvis* expenses of collecting royalties (then assessable as Misc Sweep-up Income) were deductible:

I do not feel very much impressed by the words "full amount of profits and gains" in [what is now s.688 ITTOIA] because the question is, what are the profits and gains? ... I do not feel justified in differing from the Commissioners. After all, it is the right thing to do, if I may put it that way. The annual profits and gains derived from property in this country seem to me prima facie to indicate what can be got in the ordinary course of business from the property in this country, what can be received by it abroad - I will not say received abroad, but sent off from here to abroad, which is perhaps a more accurate way of putting it."

The Tax Law Rewrite replaced the former wording, "full amount", with the current wording, "amount"; which is perhaps more apt in the light of that decision.

RI 263 provides:

The case of *Curtis Brown v Jarvis* (14 TC 744) makes it clear that in assessing receipts under Case VI it is permissible to deduct associated

---

<sup>60</sup> [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/897729/HMRC\\_Joint\\_Expatriate-Forum-Tax\\_NICs\\_minutes-11-June-2020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expatriate-Forum-Tax_NICs_minutes-11-June-2020.pdf)

payments. And, under s 69 [ICTA],<sup>61</sup> income tax under Case VI is charged on the full amount of profits or gains for the year of assessment. So the amount to be taxed under Case VI (or the Case VI loss) for a year of assessment will be the net amount receivable (or payable) under the swap contract in that year. If, however, the non-corporate prepares accounts and accounts for the swap on either an accruals or a mark to market basis, there is no objection to using the accounts figure as the measure of the “full amount of profits or gains”, provided that the accounts bring in the full economic profit on the swap over the life of the contract.

The BI Manual provides:

**BIM100150 calculating the profits** [Jun 2016]

For Income Tax, the sweep-up charge is on income arising in the tax year. For Corporation Tax, the sweep-up charge is on income arising in an accounting period...

**Non Cash Receipts**

As with trading income, the miscellaneous income sweep-up provisions charge money or money's worth.

*Example*

A non-transferable holiday offered as an alternative to a sum of money as payment for a 'story' by a newspaper is taxable as miscellaneous income. The sum for assessment being the amount of the cash alternative.

A non-transferable holiday provided, with no cash alternative, as payment for a 'story' by a newspaper is not taxable as miscellaneous income as it cannot be converted into money....

**BIM100155: Miscellaneous income: deductions** [Jan 2019]

**Expenses**

Expenses are allowable in computing income within the sweep-up charge, but there is only limited legislation on exactly what expenses are deductible. For example, there are rules disallowing business entertaining expenditure (similar to those which apply to trade profits - see BIM45000) where the activity concerned is a business.

In practice you should follow the rules governing trade profits, so far as they are applicable (see the speech of Rowlatt J in *Curtis Brown Ltd v*

---

61 Now rewritten in different terms in s.688(1) ITTOIA, but I think without changing the law on this point.

*Jarvis* [1929] 14 TC 744 at pages 752-753).

### **Capital Allowances**

There is normally no entitlement to capital allowances in respect of miscellaneous income. You should refer any case of doubt or difficulty to Business Profits.

### **Interest**

Interest paid is normally not an allowable deduction in arriving at the profits chargeable under the miscellaneous income sweep-up provisions. This is because in the case of profits of a casual or occasional nature it is difficult for interest to satisfy the ‘wholly and exclusively’ test, and raising funds to support the activity would itself point to trading.

### **VAT**

If any expenses deductible in computing miscellaneous income have borne VAT, which is irrecoverable, the deduction should be the amount inclusive of VAT. Otherwise, if the VAT is recoverable, then the allowable expense is the amount net of VAT.

## **32.14 Sweep-up income: Remittance basis**

Section 688 ITTOIA provides:

- (1) Tax is charged under this Chapter on the amount of the income arising in the tax year.
- (2) Subsection (1) is subject to ...<sup>62</sup>
  - (c) Part 8 (foreign income: special rules).

Section 688(2)(c) ITTOIA incorporates the remittance basis for foreign source Misc Sweep-up Income.

## **32.15 Misc Sweep-up Income: Source**

The location of the source matters for the usual reasons, in particular:

- (1) A non-resident is not taxed unless there is a UK source
- (2) Foreign source royalties are RFI and qualify for the remittance basis<sup>63</sup>

There is very little authority on the location of the source of Misc Sweep-

---

62 The exceptions in (a)(b) are specialist topics (rent a room relief and qualifying care relief) not discussed here.

63 For source issues generally, see 15.3 (Approach to locating source).

up Income. As there are many different types of sweep-up income,<sup>64</sup> the test will vary according to the type of income. The different types of sweep-up income have little in common except the absence of a charge under any other provision. It would be absurd to apply the same test to all types of the income. There is no single test to apply to all types of sweep-up income.

### 32.15.1 Source: Income from assets

Where the income arises from the exploitation of assets, the source is where the assets are situated.

If there is a simple hire<sup>65</sup> of an asset (without a trade) the source of income is the asset (not the contract) and one would expect the location of the income source to be where the asset is situated.

In *IRC v Hang Seng Bank*, the Privy Council said:

If the profit was earned by the exploitation of property assets as by letting property ... the profit will have arisen in or derived from the place where the property was let ...<sup>66</sup>

But this was tactfully “explained” in *IRC v HK-TVB*:

When Lord Bridge used the words “place where the property was let” he must have been referring to the place where the property was situated and not to the place or places where the lease happened to have been signed.<sup>67</sup>

Although the comment was made in the context of immovable property, it is considered that the same applies to chattels and other personal property.

Likewise in Australia:<sup>68</sup>

The location of the property will be significant [to determine the source of income when the income is derived from property

---

64 See 32.2 Types of misc sweep-up income).

65 References to a hire here include a licence: the distinction does not matter for present purposes.

66 [1990] STC 733 at p.740b.

67 [1992] STC 723 at p.729e.

68 *CT v Resource Capital Fund IV LP* [2019] FCAFC 51 at [52] citing: *FCT v United Aircraft Corporation* [1943] HCA 50.

It is true that chattels may be moved, but most chattels do not move often. If (say) a picture (subject to an existing chattel lease) was moved permanently, it is unclear whether the source changes. It is tentatively suggested that the source changes with a permanent move, but not with a temporary one.

If the chattel were a mobile asset (a plane or yacht) then it is suggested that one should not adopt the rule that the source is where the asset is situated. It is rational to have a separate rule for ships and aircraft. The IHT/CGT situs rules are also different for such assets.

If the hiring constitutes a trade, then trading principles apply to determine the source; see 20.17 (Hire of chattels).

### 32.15.2 *Source: Income from services*

*Alloway v Phillips* concerned a payment for services: the taxpayer, wife of a great train robber, received a fee for providing information to a journalist. The taxpayer was non-resident in the year that the income arose but payment was made under a contract which was a UK situate chose in action (UK resident payor and enforceable in the UK).

Section 108(1) ICTA 1970 then provided:

Tax under this Schedule [schedule D] shall be charged in respect of -

- (a) the annual profits or gains arising or accruing ...
  - (iii) to any person, whether a British subject or not, although not resident in the UK, from any property whatever in the UK ...

*Alloway* was a pre-ITTOIA case where the issue was whether a payment was income from “property in the UK” (a subtly different question from source under the contemporary legislation<sup>69</sup>):

This contract gave to Mrs. Alloway a number of rights in which she could have sued in the UK if necessary. She had no property in Canada capable of producing profits. The information about her husband was not property. It required this contract to convert it into property. This sum of £39,000 was in my opinion a profit or gain arising from property in the UK. It is entirely within s.108(1)(a)(iii) [ICTA 1988]. It does not fall within any other class of Schedule D, and therefore is correctly

---

<sup>69</sup> See 21.8.1 (Source in pre-ITTOIA legislation).

charged under Case VI.<sup>70</sup>

*Alloway* concerns the provision of services. It would be a mistake to say that *Alloway* governs the location of the source of other types of (what is now) Misc Sweep-up Income, such as income from assets. The court stressed that Mrs Alloway had no property in Canada. The only property was a contractual right (a chose in action) situated in the UK. These two points are related: it was because *Alloway* concerned the provision of services that the taxpayer had no property in Canada. She did not need property to provide those services.

Even in relation to the source of Misc Sweep-up Income from the provision of services, ie the facts of *Alloway* itself, the law has changed since *Alloway* was decided in 1980:

- (1) In the case of the source of interest, the courts have moved from the view that the location of the source depended on the situs of the debt (or something very close), to a multi-factorial approach.<sup>71</sup>
- (2) The charge under the pre-rewrite legislation depended on the location of property in the UK.<sup>72</sup> It made some sense that the courts applied a situs test, both for interest and in *Alloway*. But the charge under ITTOIA depends on the location of the source of the income. The statutory test is now different.

It may be said that *Alloway* is one of those result-determined cases where the court decided the result first and the reasoning second.<sup>73</sup> The reader may have some sympathy for the argument, rejected by the court that the

---

70 53 TC 372 at p.389. Lord Denning made the same point at p.387: “This case comes under Case VI of Schedule D. It seems to me clear that this wife had property in the UK. She had a chose in action here. [Lord Denning referred to Dicey & Morris, *The Conflict of Laws* and continued:] The truth is that she had a chose in action in England. It was property in England: but she had no property at all in Canada. She had no copyright there. She only had the information in her head which she told to the newspaper reporter. That is not a species of property known to the law of England ....”

71 See 25.8 (Interest: Location of source).

72 See s.18(1) ICTA 1988 previously s.108 ICTA 1970, set out above.

73 “If the criminals or their wives get money by relating their stories to newspapers, they ought to pay tax on their profits and gains. That is this very case. The wife is now in England. She is outside the jurisdiction of the Canadian courts. She received the money here and ought to pay tax here ...”; 53 TC 372 at p.387.

contract was mere machinery for collection of a payment for services. But however that may be, the decision is no longer relevant. The law has changed.

If the same facts arose today, Mrs Alloway should claim relief under the UK/Canada DTA. When her income arose she was treaty-resident in Canada, and even if the income were UK source it would not be taxable in the UK.<sup>74</sup>

It is considered that the correct test for the source of Misc Sweep-up Income for the provision of services is now in principle the place where the work is done, the same as the trading test: where does the profit substantially arise.<sup>75</sup>

### 32.15.3 Source: futures and swaps

*Bayfine v HMRC* discussed the source of income from a forward contract between a US and a UK company:

[36] [Counsel for the taxpayer] submits that ... the broad guiding principle is that the source is treated where the service was rendered or the profit-making activity was carried on. Thus in the case of a forward contract the court should attach great weight to the place where the contract was performed.<sup>76</sup> In the case of investment income (which, as I understand it, would include investment income earned from short-term contracts such as the forward contracts in this case), factors such as the identity of the debtor, the law governing the debt instrument, the location of the assets to which the investment relates and currency of payment may have greater weight than in trading asset cases.<sup>77</sup> In this case ... this was US source income. The counterparty to this was a US resident operating from the US and the forward contract was negotiated in part in the US. It was executed in the US, governed by US law and related to assets with a US situs and it was enforceable

---

74 See 32.16 (DT relief: “Other Income”). The DTA in force at the relevant time did not contain an “Other Income” article, and it was unlikely that any treaty exemption applied.

75 See 20.13 (Services).

76 The Court cited: *IRC v Hang Seng Bank* [1990] STC 733 at p.740.

77 The Court cited what is taken (though wrongly) to be the leading case on the source of interest: *National Bank of Greece v Westminster Bank Executor and Trustee Co* [1971] AC 945 at p.954–955.

in the US. It also had to be settled in US dollars. All of those factors point to the US. The only factor that points the other way is that one of the contracting parties ... was a UK resident. The fact that a party is a UK resident does not mean that its income has a UK source. Otherwise there would be no distinction between the source of a profit as a basis of taxation and residence.

[54] As to source, if domestic law principles had applied ... I would have preferred the submissions of [counsel for the taxpayer] ... that the source of the ... profit was not in the state of residence [of the taxpayer] but in the US, where the profit was substantially generated.

[63] [Counsel for the Revenue] ... refers to the test ... ‘Where do the operations take place from which the profits in substance arise?’<sup>78</sup> He argues that on the basis of this test the profit was profit arising in the UK. However, in my judgment this argument is unpersuasive, even on [that test] when all the factors ... are taken into account. Thus, I consider that the ... profit was income ‘arising’ outside the UK for the purposes of [unilateral tax credit relief].<sup>79</sup>

This identifies two tests of source:

- (1) The test for the source of interest
- (2) The test for the source of trading income

These are two distinct tests, but so far as they both apply a multi-factorial approach, they may be regarded as a common test.

Interest is not closely analogous, as an important factor in the source of interest is what the borrowed money is used for. There is no equivalent in the case of a derivative. The source of trading income is closely analogous, as Misc Sweep-up Income is only just short of amounting to a trade (requiring a payment for services or in relation to assets) and is computed in a similar manner to trading income, ie receipts net of expenses. So the test is where the profits substantially arise. That can be difficult to apply, but it works quite well here.<sup>80</sup>

---

78 The Court cited the classic trading source cases: *Smidth v Greenwood* 8 TC 193 at p.203–204, and *Yates v GCA International* 64 TC 37 at p.55–56.

79 *Bayfine v HMRC* [2011] STC 717 at [36], [54]. See 106.1 (Credit for foreign tax). For completeness: The issue in *Bayfine* was source for the purposes of the US/UK DTA, but there is nothing in the DTA to suggest that treaty-source for this type of income is distinct from domestic-law source.

80 See 16.11 (Where profits in substance arise).

In relation to derivatives, it is suggested that the most significant factor should be the asset (if there is one) to which the derivative relates. A swap relating to a particular security is situate where that share is situate. That is where the profit is generated. A swap relating to an index such as the S&P 500 is situate in the US, as that is where substantially all the securities in the S&P 500 are situate. A swap relating to interest rates has no underlying asset, and one falls back on place of enforceability.

Residence of the debtor is clearly not the decisive test of source. Otherwise then the profit would be UK source if the market moved one way and the UK company received the profit, and US source if the market moved the other way and the US company received the profit; that would be an odd result.

### 32.16 DT relief: “Other Income”

Article 21(1) OECD Model provides:

Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

I refer to income within this article as “**Other Income**”, with initial capitals to reflect the technical nature of the term.

Article 21(2) deals with the overlap between the Other Income article and business income.<sup>81</sup>

Article 21 includes more than Misc Sweep-up Income. For other contexts where the Other Income article is important, see:

<b>Topic</b>	<b>See para</b>
Discretionary trust/estate income	38.12 (UK trust, non-resident beneficiary)
s.720	46.24.3 (Transferor treaty non-resident)
s.731	47.57.2 (Beneficiary treaty non-resident)
Income from third State	29.9.14 (Co in 3rd State: Dual resident shareholder)

---

81 See 103.8.3 (Other business profit overlaps).

## CHAPTER THIRTY THREE

# EMPLOYMENT INCOME

### 33.1

#### *Cross references*

The following topics are considered elsewhere:

- 35.1 (PAYE – Introduction)
- 36.2 (Employment Income DT Relief)
- 81.2 (Employment-related loans)
- 43.1 (National insurance contributions)
- 79.2 (The benefits code)

### **33.1 Employment income: Introduction**

The taxation of employment income is mainly governed by ITEPA. Though dwarfed by the CTAs 2009 and 2010, ITEPA was for its day (2003) a mammoth Act: the table of contents was 36 pages long. How many dozen volumes would be required for a full discussion?

The drafter of ITEPA was fond of signpost provisions, preferred repetition to cross referencing, and believed very firmly in the value of dotting *I*'s and crossing *T*'s. That may be useful to a non-lawyer reading the statute unmediated by any other assistance: that reader needs all the help they can get! I find this approach makes a textbook exposition rather more difficult, as there is more statutory text to navigate than need have been. Behind what appear to be stylistic issues lie deeper questions: who are tax statutes written for? and how best to cater for readers with different needs? Be that as it may: we must take the text as we find it.

This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole, so I begin with a general outline. Most readers will no doubt cut to the chase, but they will later find themselves referring back to these fundamentals.

I do not discuss employment-related securities, or employment income provided through third parties (disguised remuneration), though I hope to do so in a future edition.

### 33.2 Employment income Parts

Section 3(1) ITEPA provides:

The structure of the employment income Parts is as follows-<sup>1</sup>

Part	Content
2	Charge to tax, computation of charge, who is liable
3	Earnings
4	Exemptions
5	Deductions
6	Miscellaneous ITEPA income: retirement benefits, termination payments
7	Employment-related securities
7A	Employment income provided through 3 <sup>rd</sup> parties (disguised remuneration)

Section 3(2) ITEPA provides:

In this Act “the employment income Parts” means this Part [Part 2] and Parts 3 to 7A.

### 33.3 Employment/employer/employee

Traditional employment-law terminology is somewhat opaque:

“**Contract of service**” means a contract of employment, ie between employer and employee; I prefer to use the term “**contact of employment**”

“**Contract of services**” (in the plural) means a contract which is not an employment, ie between an independent contractor/self-employed person and their client

Section 4 ITEPA provides an inclusive definition:

(1) In the employment income Parts<sup>2</sup> “employment” includes in particular—

- (a) any employment under a contract of service,
- (b) any employment under a contract of apprenticeship, and

---

1 For clarity I have set this out in tabular form, in my own words, rather than the layout and wording of the statute.

2 Parts 2-7A ITEPA; see 33.2 (Employment income Parts).

- (c) any employment in the service of the Crown.
- (2) In those Parts “employed”, “employee” and “employer” have corresponding meanings.

Employment/contract of service are employment law terms which are elucidated in case law rather than the statutory provision. This topic needs a book to itself; it is too far from the themes of this book to discuss here.

EN ITEPA comments on the definition of employment:

... the decisions of the courts have given rise to a number of different tests, none of which has proved to be definitive. Given the diversity of approach in the courts it seems unlikely that an exhaustive definition of “employment” could be produced, or indeed that one could produce more than an incomplete list of criteria that might or might not be useful in a given case for determining whether an employment exists.

On the other hand it is thought that it would be helpful to have a non-exhaustive explanation which gave an indication of the core meaning of “employment” by listing certain arrangements that on any view constitute an employment. As such, it would not attempt to delineate the boundary between employment and self-employment.

Section 4 of the Act contains such an explanation. [The EN summarises the section and continues:]

The reference to “any employment in the service of the Crown” is specifically included because it is not settled that all Crown servants have contracts of service.

The OECD Commentary uses similar terminology:

“employment relationship (contract of service)”

“services rendered in an employment relationship”

But the concept is slightly different; see 36.9 (Labour-hire arrangement).

Salaried partners may be treated as employees under s.863A ITTOIA. This topic needs a chapter to itself, and is not discussed here.

### 33.3.1 *Offices*

Section 5 ITEPA extends the term “employment” to include an office. The most common example is company directorship. This is needed because a company director need not as a matter of employment law have an employment (a contract of service):

(1) The provisions of the employment income Parts<sup>3</sup> that are expressed to apply to employments apply equally to offices, unless otherwise indicated.

(2) In those provisions as they apply to an office—

- (a) references to being employed are to being the holder of the office;
- (b) “employee” means the office-holder;
- (c) “employer” means the person under whom the office-holder holds office.

Section 5(3) ITEPA provides an inclusive definition of “office”:

In the employment income Parts “office” includes in particular any position which has an existence independent of the person who holds it and may be filled by successive holders.

EN ITEPA comments on the definition of office:

The concept of an “office” is one that has also been considered by the courts: see in particular *Great Western Railway Company v Bater* (1922) 8 TC 231 and *Edwards v Clinch* (1981) 56 TC 367. But in this case it does seem possible to construct a definition based on the guidelines established by the courts. However, since these are only guidelines, any explanation can, again, only be non-exhaustive.

Section 5(3) of the Act contains such an explanation. ....

I refer to the definition of employment (etc) in s.4, 5 ITEPA as the **“standard ITEPA definition”**.

A shadow director does not hold an office, and so (in the absence of a contract of employment) is not an employee within the standard ITEPA definition.<sup>5</sup>

All these definitions are expressed to apply only in the employment income Parts, so elsewhere they have to be repeated verbatim,<sup>6</sup> or incorporated by reference.<sup>7</sup> (If there were taxes-act-wide definitions, that

3 Parts 2-7A ITEPA; see 33.2 (Employment income Parts).

4 For employment/employee in the OECD model, see 36.9 (Labour-hire arrangement).

5 A shadow director is not an employee unless expressly specified, eg as in the benefits code; see 79.6.4 (Application of the benefits code to shadow directors).

6 See eg 37.4.1 (“Pension”).

7 See eg 5.25.1 (“Employment”).

would not be necessary.)

### 33.4 Employment income/earnings

This section considers the following ITEPA terminology:

<b>Term</b>	<b>See para</b>
Ordinary earnings (my term)	33.4.1
General earnings	33.4.2
Specific employment income	33.4.3
Employment income	33.4.4

Items (2)-(4) are opaque technical terms, defined in s.7 ITEPA which begins:

(1) This section gives the meaning for the purposes of the Tax Acts of “employment income”, “general earnings” and “specific employment income”.

#### 33.4.1 “Ordinary” earnings

Section 62 ITEPA defines “earnings”.

Section 62 is the only section in Chapter 1 Part 3 ITEPA. The legislation refers on a number of occasions to earnings “within Chapter 1 of Part 3” (or “as defined in Chapter 1”). This seems a rather cumbersome way of referring to s.62, but there it is.

Section 62 ITEPA provides:

- (1) This section explains what is meant by “earnings” in the employment income Parts<sup>8</sup>.
- (2) In those Parts “earnings”, in relation to an employment, means—
  - (a) any salary, wages or fee,
  - (b) any gratuity or other profit or incidental benefit of any kind obtained by the employee if it is money or money’s worth,<sup>9</sup> or
  - (c) anything else that constitutes an emolument of the employment.

---

8 Parts 2-7A ITEPA; see 33.2 (Employment income Parts).

9 Defined in s.62(3) ITEPA: “For the purposes of subsection (2) “money’s worth” means something that is—

- (a) of direct monetary value to the employee, or
- (b) capable of being converted into money or something of direct monetary value to the employee.”

“Earnings” is not an ideal label, and I call it “**ordinary**” earnings to distinguish it from the (wider) concept of “general earnings” discussed below.

### 33.4.2 “General earnings”

“General earnings” is a technical term. Section 7(3) ITEPA provides:

“General earnings” means—

- (a) earnings within Chapter 1 of Part 3, [ordinary earnings]<sup>10</sup> or
  - (b) any amount treated as earnings (see subsection (5)),
- excluding in each case any exempt income.

Section 7(5) ITEPA specifies 5 categories of earnings, or deemed earnings, classified as general earnings:

Subsection (2)(b) or (3)(b) refers to any amount treated as earnings under—<sup>11</sup>

<b>Provision</b>	<b>Topic</b>	<b>See para</b>
Chap 7-10 Part 2	Agency worker/intermediary/managed service company	
Chap 2-10 Part 3	The benefits code	79.2
Chap 12 Part 3	Misc payments treated as earnings	<i>Not discussed</i>
s.402B	Termination awards (Post-employment notice pay)	33.38
s.262 CAA 2001	Balancing charge treated as earnings	<i>Not discussed</i>

### 33.4.3 “Specific employment income”

Section 7(4) ITEPA provides:

“Specific employment income” means any amount which counts as employment income (see subsection (6)), excluding any exempt income...

Section 7(6) ITEPA sets out four categories of deemed employment income classified as specific employment income:

Subsection (2)(c) or (4) refers to any amount which counts as employment income by virtue of—<sup>12</sup>

<b>Provision</b>	<b>Topic</b>	<b>See para</b>
------------------	--------------	-----------------

<sup>10</sup> See 33.4.1 (“Ordinary” earnings).

<sup>11</sup> For clarity, I set this out in a table format, and abbreviate the section descriptions.

<sup>12</sup> For clarity, I set this out in a table format, and abbreviate the section descriptions.

Part 6 ITEPA	“Income which is not earnings or share-related”:	
	Retirement benefits	
	Termination payments	33.36
Part 7 ITEPA	Employment-related securities	79.8
Part 7A ITEPA	Disguised remuneration	<i>Not discussed</i>
Any other enactment		

Specific employment income includes some important if specialist categories. The focus of this chapter is on general employment income, but I hope to cover these topics in a future edition.

### 33.4.4 “Employment income”

Section 7(2) ITEPA provides:

“Employment income” means—

- (a) earnings within Chapter 1 of Part 3 [ordinary earnings]<sup>13</sup>,
- (b) any amount treated as earnings (see subsection (5)) [other general earnings], or
- (c) any amount which counts as employment income (see subsection (6)) [specific employment income].

In summary:

### 33.5 Earnings causation tests

Statute provides two causation or derivation tests:

Test applies to	Statutory wording/Pre-rewrite wording	See para
Ordinary earnings	Emoluments <i>of</i> employment/ <i>from</i> employment <sup>14</sup>	<i>Here</i>

13 See 33.4.1 (“Ordinary” earnings).

14 Section 19 ICTA 1988 provided: “Schedule E: Tax under this Schedule shall be charged in respect of any office or employment on emoluments therefrom”.

Benefits in kind      Benefit provided *by reason of* employment      79.10

In each case there must be a nexus between the employment and the earnings/benefit, but what that nexus must be has been left to the Courts to sort out.

EIM provides:

**EIM20503: The benefits code** [Jan 2021]

... Section 62 is based on what was previously Section 19 ICTA 1988, which charged to tax emoluments “from an employment”. Case law shows that the phrase “by reason of the employment” [in the benefits code] has a wider meaning than “from the employment” (EIM00600). The words “from the employment” are not reproduced in Section 62 but earnings chargeable under that section include emoluments “of the employment” and in this context “of the employment” has the same meaning as “from the employment”...

The tax law rewrite, unhelpfully, changed the preposition, from *therefrom* (s.19 ICTA) to *of* (s.62 ITEPA). But there is no change of meaning: the old case law continues to apply. HMRC agree:

**EIM00600 earnings are not taxable unless they are from the employment** [Jan 2021]

Section 19(1) ICTA 1988 referred to taxable emoluments, or earnings, as "emoluments therefrom". That is, emoluments that come from the employment and not from elsewhere. Section 62(2) ITEPA 2003 refers to earnings as "anything that constitutes an emolument of the employment". The words have changed, but not their meaning. So we can still use the case law relating to Section 19 ICTA 1988 (and its statutory predecessors) to help us decide if a particular payment is or is not earnings within Section 62(2) ITEPA 2003.

I refer to that as “**s.62 case law**”. This case law is voluminous: EIM devotes more than 60 pages to the topic.

### 33.5.1 *Latin causation test rejected*

We start with *Hochstrasser v Mayes*:<sup>15</sup>

---

<sup>15</sup> 38 TC 673 at p 705; likewise at p.709: “The Court must be satisfied that the service agreement was the *causa causans* and not merely the *causa sine qua non* of the receipt of the profit.”

the issue turns ... upon whether the fact of employment is the *causa causans* or only the *sine qua non* of benefit, which perhaps is only to give the natural meaning (!) to the word "therefrom" in the Statute,

Latin terminology is not (or at least, not nowadays) a helpful way to express a causation test. *Causa sine qua non* is simply an erudite way to refer to a "but for" test and *causa causans* means, I think, the same as operative or proximate cause (which is itself an elusive and evaluative concept).

Criticism of this Latin terminology has a long history. In *Pritchard v Arundale* (1971):<sup>16</sup>

I cannot help deprecating the use of Latin or so called Latin phrases in this way. They only distract the mind from the true problem which is to apply the principles of English law to the realities of the case. ... English law can furnish in its own language expressions which will more fitly state the problem in any case of this type...

... the expression *causa causans* ... has no certain meaning for legal purposes, or, if it has, ... its use in some cases was catachrestic. It can be a dress for what would otherwise be a naked *petitio principii* (!).

... in the *Hochstrasser* case, Lord Radcliffe and Lord Denning eschew Latin.

### 33.5.2 *What is the test?*

EIM starts with basic principles and avoids Latin:

**EIM00600 earnings are not taxable unless they are from the employment** [Jan 2021]

... In *Laidler v Perry* (42 TC 351), Lord Reid put succinctly the question that has to be answered in all cases:

"Did this profit arise from the employment? The answer will be no if it arose from something else."<sup>17</sup>

Judges have tried to explain the meaning of the words from the employment in various ways. As Lord Radcliffe pointed out in *Hochstrasser v Mayes* their attempts help to illustrate the idea expressed in the words of the statute but they do not replace those words. He went

---

<sup>16</sup> 47 TC 680 at 687; see too 79.9.2 (What is the test?).

<sup>17</sup> 42 TC 351 at p.363.

on to say:<sup>18</sup>

"For my part I think that their meaning is adequately conveyed by saying that, while it is not sufficient to render a payment assessable that an employee would not have received it unless he had been an employee, it is assessable if it has been paid to him in return for acting as or being an employee."

In *Shilton v Wilmshurst* (64 TC 78), Lord Templeman explained the statutory words in this way.

"An emolument from employment means an emolument from being or becoming an employee. The authorities are consistent with this analysis and are concerned to distinguish in each case between an emolument which is derived from being or becoming an employee on the one hand, and an emolument which is attributable to something else on the other hand.

Note that to be taxable as earnings a payment does not have to be remuneration or a reward for services (see EIM00610). Many other types of payment fall within the statutory definition of earnings.

This is in effect a capacity test. Perhaps it is the best that can be done; but one person may have many capacities and matching an act to a capacity is not so easy.<sup>19</sup>

### **EIM00610 earnings from employment: important principles** [Jan 2021]

... Section 62 is not restricted to payments such as salaries, wages and tips in return for the performance of services. It also taxes other types of employment related payment, such as:

- payments made to employees solely in recognition of changes made in their conditions of service. Such payments relate to the employment and to nothing else. They are from the employment. They come to the employee because he or she is an employee and for no other reason (see EIM00600) and
- payments made solely for the purpose of inducing a prospective employee to enter into a contract of employment. Payments of this kind usually come from the prospective employer, but they may also be paid by a third party who has no interest in the performance of the services which the employee will undertake under his contract

---

<sup>18</sup> 38 TC 673 at 707.

<sup>19</sup> Such as Pooh-Bah in *The Mikado*; see 8.21.1 (Trust law background).

of employment (see EIM00700).

In the High Court in *Hochstrasser v Mayes* (38 TC 673) Upjohn J said that to be a profit from the employment a payment "must be in the nature of a reward for services past, present or future". Decisions in later cases have shown that the words "reward for services" should not be taken literally. In *Bray v Best* (61 TC 704) Lord Oliver said:

"I cannot read the phrase reward for services as anything more than a conventional expression of the notion that a particular payment arises from the existence of the employer-employee relationship and not, to use Lord Reids words in *Laidler v Perry* (42 TC 351), from something else" (page752).

Other decided cases that demonstrate that taxable earnings do not have to be remuneration or reward for services include *Brumby v Milner* (51 TC 583) (see EIM00740) and *Hamblett v Godfrey* (59 TC 694) (see EIM00690).

- Payments for services under a contract of employment are taxable. A sum that an employee receives for her services under her contract of employment is taxable as earnings within Section 62 whatever the payment is called. There is more about this at EIM00630.
- Taxable earnings may be paid by a person who is not the employer. A payment may be from the employment and therefore taxable as earnings within Section 62, even if it is paid by somebody other than the employer. What matters is that the payment is made because the recipient holds the employment, or as a reward for services provided in the employment, and not for any personal reasons. Some tax cases that illustrate this principle are shown in the table below.
- Payments made voluntarily can be taxable earnings. The cases listed below also demonstrate that the absence of a legal obligation on a person to make a payment does not prevent it being taxable as earnings within Section 62. A hairdressers tip is an example of earnings that are paid voluntarily. A voluntary payment is taxable as earnings if it is from the employment (see EIM00600). The mere fact that it stems from the generosity of the payer on whom the employee has no legal claim does not prevent it being taxable. A gift that does not come from the employment is not taxable under Section 62 (see EIM01460). But there may be a charge under the benefits code ...

But once we have agreed the words which express the causation test, which must be general words, we then have to apply them to the facts of

individual cases; and as the following 60 pages of the Manual can attest, that is where the real difficulty lies, and that is where the effective guidance can be found.

The decision on the facts of *Hochstrasser v Mayes* (reimbursement of loss on a disposal of property occasioned by moving work location - not taxable) should be seen as out of line with subsequent decisions.<sup>20</sup>

### **33.6 Charge on employment income**

One might expect ITEPA to begin with a provision saying that income tax is charged on employment income. In fact this is implied rather than expressed; s.6(1) ITEPA provides:

#### **Nature of charge to tax on employment income**

- (1) The charge to tax on employment income under this Part is a charge to tax on—
- (a) general earnings, and
  - (b) specific employment income.

Still, the imposition of the charge is clear enough.

### **33.7 Amount charged to tax**

Section 6(2) provides:

The amount of general earnings or specific employment income which is charged to tax in a particular tax year is set out in section 9.

So we turn to s.9 ITEPA which provides:

- (1) The amount of employment income which is charged to tax under this Part for a particular tax year is as follows.
- (2) In the case of general earnings, the amount charged is the net taxable earnings from an employment in the year....
- (4) In the case of specific employment income, the amount charged is the net taxable specific income from an employment for the year.

Thus the legislation draws a distinction between:

- (1) What is charged: employment income; and
- (2) The amount which is charged; that is:

---

<sup>20</sup> This was not the view taken in the doubtful decision *Murphy v HMRC* [2021] UKUT 152 (TCC) but further consideration must wait until the decision is final.

- (a) net taxable earnings (or net taxable specific income)
- (b) from an employment.

ITTOIA adopts a similar distinction.<sup>21</sup>

“Taxable” earnings is a label which brings in a large number of rules, for in the various situations where the statute desires to bring earnings into charge in a year it provides that they are “taxable” earnings from the employment in that year.

“Net” taxable earnings is a label which brings in rules relating to deductions, not discussed here.

Section 9(6) ITEPA provides:

Accordingly, no amount of employment income is charged to tax under this Part for a particular tax year unless—

- (a) in the case of general earnings, they are taxable earnings from an employment in that year ...

### 33.8 “Taxable earnings”

Section 10 ITEPA provides the starting point of the definition:

- (1) This section explains what is meant by “taxable earnings” and “taxable specific income” in the employment income Parts<sup>22</sup>.
- (2) “Taxable earnings” from an employment in a tax year are to be determined in accordance with Chapters 4 and 5 of this Part.

So we move on to Chapters 4 and 5 Part 2 ITEPA. The pace is leisurely. We eventually find four sections that identify amounts of taxable earnings: ss.15, 22, 26 and 27 ITEPA. There are four bases of taxation of employment income.

- (1) UK residents: the arising basis applies (unless one of the remittance bases applies)
- (2) Foreign domiciled UK residents: a remittance basis applies to two types of earnings:
  - (a) Chargeable overseas earnings (“COE”)
  - (b) Overseas workday relief earnings (“OWR earnings”)

These might be considered two routes to qualify for the remittance

---

21 See 2.4.1 (Unremitted RFI “chargeable”).

22 Parts 2-7A ITEPA; see 33.2 (Employment income Parts).

basis; but the remittance basis rules differ so much between the two that they are better considered as distinct remittance bases:

<b>Remittance basis (my term)</b>	<b>See para</b>
COE remittance basis	33.13
OWR remittance basis	33.22

(3) Non-residents: charged on UK earnings only 33.29

The taxation of general earnings can be summarised in this table:

	<b>UK Resident</b>	<b>UK Domicile</b>	<b>Taxable earnings</b>	<b>ITEPA Section</b>	<b>Part 2 Chap</b>
Arising basis	Yes	n/r	All earnings: AB	15	4
COE Rem. Basis	Yes	No	(1) COE: RB (2) Other earnings: AB	22(2) 15	5
OWR Rem. Basis	Yes	No	(1) OWR earnings: RB (2) Other earnings: AB	26(2) 15	
Non-resident	No	n/r	(1) Foreign earnings: no tax (2) UK earnings: AB	27 –	5

Key AB: Arising basis

COE: Chargeable Overseas Earnings

OWR: Overseas workday relief

RB: Remittance basis

### 33.9 Earnings for year/from employment/received

ITEPA uses three distinct expressions:

<b>Term</b>	<b>Section</b>	<b>See para</b>
Earnings <i>“for”</i> tax year	16, 29	33.10
Earnings <i>from employment in tax year</i>	18-19	
Earnings <i>received in tax year</i>		

Earnings which are “for” one year may be earnings from the employment in a different year.

### 33.10 Earnings “for” tax year

It is clumsy to refer to the year which earnings are “for”. ITEPA sometimes resorts to quotation marks to help the reader grasp the elusive preposition. I adopt the statutory usage as a paraphrase is even more confusing; but sometimes a paraphrase such as earnings “attributable to” or “relating to” or “earned in” a year would be easier to follow.

The concept is fundamental as the taxability of earnings depends on the employee's residence and domicile in the year which the earnings are "for". The policy behind this is that the timing of receipt may be arranged to ensure receipt in a year of non-residence; but one cannot so easily modify the year which earnings are "for".

The concept is (slightly) elucidated in s.16 ITEPA:

- (1) This section applies for determining whether general earnings are general earnings "for" a particular tax year for the purposes of this Chapter.
- (2) General earnings that are earned in, or otherwise in respect of, a particular period are to be regarded as general earnings for that period.
- (3) If that period consists of the whole or part of a single tax year, the earnings are to be regarded as general earnings "for" that tax year.
- (4) If that period consists of the whole or parts of two or more tax years, the part of the earnings that is to be regarded as general earnings "for" each of those tax years is to be determined on a just and reasonable apportionment.
- (5) This section does not apply to any amount which is required by a provision of Part 3 to be treated as earnings for a particular tax year.<sup>23</sup>

Since this section only applies for the purposes of Chapter 4, it has to be repeated verbatim in s.29 ITEPA for Chapter 5. (If there had been an ITEPA-wide definition the duplication would not have been necessary.)

This is only intended to set out the natural meaning that would have applied in the absence of a definition. EN ITEPA Note 6 provides:

Sections 16 and 29 of the Act therefore spell out that general earnings are "for" a particular period consisting of the whole or part of a tax year if they are general earnings earned in or otherwise in respect of that period. It is thought that this reflects the meaning that a court would give to "for" if the point ever arose.

The EI Manual provides:

**EIM40008. The year that earnings are "for"** [Nov 2019]

... This question has no relevance when deciding the tax year in which the tax charge arises. Earnings are assessed to tax in the tax year in which they are "received". The definition of "received" is set out in Section 18 (see EIM42200).

---

23 This is a reference to s.72(2) ITEPA; see too s.222(2) ITEPA and 223(4) ITEPA for definitions in specialist circumstances.

***Why is it important to know the tax year that earnings are “for”?***

Section 16 establishes the year that earnings are “for”. Once this has been done, the next step is to decide which of the rules in Part 2 Chapters 4 and 5 apply to calculate taxable earnings.

For the majority of UK Resident and Ordinarily Resident (R/OR)<sup>24</sup> and domiciled employees, the question of the year earnings are “for” has little consequence. This is because all of their earnings are chargeable to UK income tax in consequence of their residence and domicile status. In addition, most earn and receive their earnings in the same tax year. However, for those employees who are other than R/OR and UK domiciled and who receive earnings in different years from those in which they earn them, the question continues to be relevant.

***Principles from case law***

The absence of statutory provision in ICTA 1988 and earlier enactments resulted in various cases being litigated through the 20th century.

- *Edwards v Roberts* (19 TC 618)
- *Hunter v Dewhurst*, (*Henry v Foster*) (16 TC 605)
- *Draycup v Radcliffe* (27 TC 188)
- *Heasman v Jordan* (35 TC 518)
- *Board of Inland Revenue v Suite* ([1986] 2 All ER 577)
- *Griffin v Standish* (67 TC 317)
- *Bray v Best* (61 TC 705)

Before 1989, the year that earnings were “for” also dictated the year in which income tax was assessed. “Receipts basis” replaced “earnings basis” in 1989.

The case of *Bray v Best* (61 TC 705), was heard by the House of Lords in 1988. Lord Oliver set out the preferred approach at page 752:

“The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances.”

Lord Oliver’s approach to determining the year that earnings are “for” continues to apply. Section 16 simply confirms the recommended approach.

**40009. The year that earnings are “for” - arrangement of guidance [Nov 2019]**

In 2007 and 2008, HMRC consulted with professional advisers with particular expertise regarding the treatment of foreign nationals coming to work in the UK and UK residents leaving the UK to work abroad. Many of the advisers’ clients have complex remuneration packages. Some are members of Long Term Incentive Plans or participants in other deferred remuneration schemes. The aim of the exercise was to establish principles for determining the tax year that earnings, delivered by these arrangements, are “for”.

The guidelines set out on the following pages were adopted by HMRC with effect from 28 February 2008. They are intended to be comprehensive but do not claim to cover every plan and set of circumstances that will arise.

---

24 The Manual has not been revised following the abolition of ordinary residence in 2013, but that does not affect the points made here.

... The guidance sets out general principles and indicates the views HMRC is likely to take in specified circumstances. It is intended to aid and inform fact finding and decision making. It is not a substitute for obtaining all of the relevant information and exercising good judgment by applying the principles to the facts. This is not an easy task as you may be required to balance one set of conditions against others. (This content has been withheld because of exemptions in the Freedom of Information Act 2000)...

**40011. The year that earnings are “for” - the approach to take** [Nov 2019]

[The Manual repeats the quote from *Bray v Best* set out in EIM 40008 above, and continues;]

***Finding out the facts***

An essential starting point is to obtain contemporaneous evidence. This may include all or any of the following:

- An understanding of the intention of the employer in developing the incentive programmes
- Bonus plans
- Award letters
- Notes of meetings
- Correspondence between the parties
- Obtain an analysis of amounts paid out
- An explanation of how awards are treated in the employer-company accounts

These documents may indicate the understanding of the parties regarding the performance period that awards are intended to be “for”. The intention of the employer as disclosed to the employee and the understanding of the employee are particularly significant.

Unsubstantiated recollections of the employee regarding intention should be considered but given less weight than contemporaneous documented statements.

If plan documents and contemporaneous information do not provide clarity, it’s reasonable to make inferences from available evidence.

You may ask the Large Business Team or Customer Compliance Manager dealing with the Corporation Tax affairs of the employer company how the bonus awards have been treated in the employer company accounts. The company may claim a deduction for a single year or may create provisions to spread the deduction over a longer period. This may indicate the period the employer considers the award to be “for”. The accounting treatment is not conclusive, but it is significant. In the absence of clear statements in the plan documents the accounting treatment may be evidence of the employer’s understanding of what the scheme was intended to achieve.

Lump sums may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are “for” different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

**40012. Annual bonuses awarded for meeting corporate, team or personal targets** [Nov 2019]

Many employers operate annual bonus schemes for their employees. There are usually performance criteria. These may require employees to meet corporate, team or individual targets.

Bonuses may be paid out by the employer or through a trust - usually an employee benefit trust (EBT). The identity of the payer is not relevant when determining the year that the award is “for”. However, see the guidance below on “discretion”.

In some schemes, particularly those referenced to company performance, employees may accrue entitlement to receive bonuses as the performance period passes. In others, entitlement is conditional on remaining in employment until a specified date (see below). The performance period and therefore the period that the bonus is “for” may be set out in the scheme documents.

If the performance period spans more than one tax year, Section 16(4) ITEPA 2003 applies. The bonus should be apportioned to the relevant tax years on the basis of a just and reasonable apportionment.

Section 16 attributes general earnings to one or more tax years. You should not accept that awards can be “for” a shorter period, even a day, to which the rules in Part 2 Chapters 4 and 5 can be applied. Employers may spontaneously award “spot-bonuses” to all employees in post on a particular date, or entitlement to a performance bonus may crystallise when a particular performance factor is satisfied. Even though these events make take place on a particular day, the resultant awards should be treated as general earnings “for” the tax year in which the event occurred.

Unless there is evidence to the contrary, HMRC takes the view that performance bonuses are “for” the performance period. This may be a calendar year or the company accounting period. In the case of specific projects, it may be the period beginning on the date when work started and ending when the specified outcomes were achieved.

#### ***Impact of Extra Statutory Concession A11 (ESC A11)***<sup>25</sup>

ESC A11 is a non-statutory concession that permits tax years to be split. It is usually relevant to years in which individuals arrive in or depart from the UK. In consequence of arrival or departure, there are discrete periods of non-residence (NR) and ordinary residence (OR) for tax purposes. If the conditions are satisfied, the tax year is split and each part treated as a separate tax year.

Where entitlement to spot bonuses or conditional bonuses arises on a single day the advice set out above indicates that the award is to be treated as earnings “for” the year in which that days falls. In ESC A11 cases this will be that part of the split year in which the relevant day falls.

Evidence suggests spot bonuses and similar payments are relatively unusual and will be seen infrequently. If you suspect that the timing of entitlement has been manipulated to gain a tax advantage from the use of ESC A11, HMRC may decide to set aside the Concession and treat the individual as resident in the UK for the whole tax year. ...

**40013. Bonuses and deferred remuneration plans - the effect of conditionality and employer’s discretion** [Nov 2019]

#### ***Conditionality***

Many bonus schemes are referenced to performance periods, but awards will not be paid

---

25 The Manual has not yet been revised for the 2013 changes which have put the ESC on to a statutory basis, but the general points made here still apply.

unless employees are in employment on the date of payment. For example, a bonus is referenced to company profits for year ended 31 December but is not paid until the following 30 June. Employees who worked for the employer during the performance year forfeit their entitlement if they leave employment before 30 June.

Up to 28 February 2008, HMRC took the view that the bonus award could only be “for” the year in which unfettered entitlement to receive it arose. The year that the bonus was “for” was the year in which the employment condition was satisfied. Since 28 February 2008, HMRC has adopted the principles set out in EIM40008 and subsequent pages.

### ***Good and bad leavers***

Many of the plans with employment conditions identify “good” and “bad” leavers and prescribe different treatments for the 2 categories. “Good leavers” are employees who cease employment before the bonus payment date through retirement, redundancy or ill-health. “Bad leavers” are those who are dismissed for cause or resign to join a competitor.

It’s possible to take various views on the year that such bonus awards are “for” where there is an employment condition:

- The performance period
- The performance period plus the period from the end of the performance period to the date of payment, sometimes referred to as the “vesting period”
- The year in which the date of payment falls

Your decision should take account of what the bonus scheme is intended to achieve. If this is not clear from the documents, you may base judgments on how the employer treats good and bad leavers.

Plans that:

- are designed to provide incentives to employees for performance periods, but,
- do not pay out unless the participants are still in employment at the specified date, but,
- do not specify any additional performance conditions in the period beginning after the original performance period and ending on the payment date,

are likely to pay out awards that are “for” the original performance period. However, if the plan introduces additional performance conditions for the second period the period that the award is “for” is likely to be the aggregate of both periods.

If “good leavers” are entitled to receive awards; that may indicate that the awards are “for” the original performance period. Entitlement to pro-rated awards may indicate that entitlement is “for” the performance and the vesting periods.

Some schemes provide for deferred bonuses to be paid out when ownership of the company changes hands. This may be an indicator that the bonus is earned by that date and is “for” the relevant performance period.

Even though these contingencies may not occur for all or any of the plan participants, their existence may shed light on the period the bonus is intended to be “for”.

It is sometimes argued that the employment condition is never just about being in employment on the specified date; that the intention of the employer in introducing this condition is to obtain satisfactory performance in the period ending on the date of payment. This may well be the case. If evidence can be found to support the contention you should accept that the period the awards from the plan are “for” is the combined

performance and vesting periods.

### ***Employers' discretion***

Some bonus schemes give the employer absolute discretion to award or refuse to award bonuses. The discretion may lie with the trustees if an Employee Benefit Trust (EBT) pays out the awards. The courts have held that, whatever the plan says, an employer's discretion in awarding or withholding a bonus is not unfettered. However wide the discretion appears to be, the employer is required to exercise his discretion rationally and in good faith, and not irrationally or perversely.

There may be a pattern of awards that may indicate the year the awards are "for". Employees may also have an understanding of how the bonus scheme works, and the period awards are referenced to, while accepting the employer's discretion.

A discretionary bonus may therefore be "for" the performance period, the combined performance and "vesting" period or the year in which discretion is exercised and payment is made. It is important to consider all of the relevant information.

### **40014. Long Term Incentive Plans and Deferred Remuneration [Nov 2019]**

Various schemes exist to reward and provide incentives to employees. Not all intended outcomes will be the same. The intention of the employer and the intended behavioural effect will influence the design of the scheme. For example, plans may be intended to:

- Tie-in valued employees and create a disincentive for leaving and moving to a competitor, or,
- Motivate and reward outstanding performance by aligning the interests of employees with those of the shareholders

Schemes intended to aid retention may include the following features:

- Bonuses are paid after 3 – 5 years of satisfactory employment
- The employer has discretion to award or deny bonuses for good or bad leavers
- Part bonuses are paid year on year with other entitlement remaining in the Plan
- Part entitlement to bonuses "vests" each year, but is not paid until a later year

Schemes intended to motivate and reward outstanding performance may include:

- Employment targets linked to growth in the company's:
  - share price
  - turnover
  - net profits
  - expansion of certain markets
  - market share
- Granting employees real stocks and shares or "phantom" shares in the company. (In the phantom schemes, no stocks or shares are assigned to the employees. Bonus entitlement is calculated by reference to a notional share portfolio.)

Payments may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

Awards from both types of schemes are likely to be "for" the whole performance or reference period. If this is greater than one tax year then the final award should be apportioned over the tax years falling into the performance period on a reasonable basis.

**40015. The year that awards from Long Term Incentive Plans and other deferred remuneration arrangements are “for”** [Nov 2019]***Entry to Long Term Incentive Plans (LTIPs)***

If employees perform exceptionally well, they may be invited to participate in an LTIP. LTIPs run for pre-determined period that can be as long as 10 years. This process may repeat year after year so that employees are simultaneously members of several Plans. In any particular year they may receive part awards from some and entire awards from others.

The initial investment is often funded by part of the participant’s bonus for the previous year. The employee may be obliged to defer all or part of the previous year’s bonus or may do so voluntarily. Plans may require a mixture of the two. The initial contribution may be guaranteed, in the sense that it cannot be lost, and/or it may have the potential to increase and decrease dependant on what the Plan tracks, for example, share price or company turn-over.

Other plans, particularly phantom share schemes, may simply award notional stock without any requirement for deferral from an earlier bonus.

In addition to the anticipated growth in the share price that adds value to the participants’ awards, employers may make additional awards of stock to increase the value of the notional portfolio. These “matching awards” may be granted throughout the life of the scheme at times specified in the plan document.

***Deferred bonuses and matching awards***

Employers may defer the payment of bonuses and make eventual payment subject to conditions. For example, the employer awards a bonus of £100,000 referenced to a performance period. £75,000 is paid in cash immediately following the bonus year; £25,000 is to be paid three years later in cash or shares, if the employee has not resigned or been dismissed before the vesting date. Such a deferral may be imposed by the employer, or it may be entered into voluntarily by the employee. To develop the example, the £25,000 deferral may be required by the employer but the employee has the choice of voluntarily deferring a further £25,000. In both scenarios, the employer may offer an enhancement or matching award. The matching award may be delivered in the form of shares or cash. The matching award may be added to the LTIP at the beginning of the period. Additional matching awards may be added at specified dates during the deferral or vesting period.

***What year are LTIP awards “for”?***

It is important to consider all of the relevant facts. The deferred bonus may be “for” the original bonus year, or for the whole deferral period. If there is particular emphasis on the employee remaining in service at a future date, it may be for the tax year in which that condition is met. However, this feature is unlikely to exist in isolation as the employer wants to motivate the employee to perform well while remaining in employment. In order to determine the period that the deferred bonus is “for”, it is necessary to consider all of the relevant information and weigh the emphasis given to each factor.

In general terms, simple deferred bonuses will remain earnings for the original bonus period, and growth or matching awards will be “for” the deferral period. In more sophisticated schemes where the deferred bonus is “awarded” and “vests” after the bonus

year, and especially where there are further performance conditions relating to this period, the deferred bonus may be earnings for the period between award and vest.

There may also be circumstances where “growth” in the value of the fund is treated as being “for” the performance period of the original deferred bonus. This view is likely where no additional performance criteria are imposed during the deferral period or, if there are, the conditions are the same as for the deferred bonus.

If the conditions are significantly different, e.g. the matching awards are conditional upon new performance criteria, the “growth” or matching awards are likely to be “for” the deferral or vesting period itself.

If the conditions of the matching award are referenced solely to the employee remaining in employment on the vesting or payment date in order to receive payment, the matching award is likely to be earnings for the tax year in which entitlement to receive the award matures.

Enhancements or matching awards may be paid out of LTIPs at the same time as deferred bonuses. Awards may be aggregated amounts that are “for” different periods. It is important to understand how sums are calculated and whether different performance periods should be considered.

#### **40016. Long Term Incentive Plans and Deferred Remuneration – staged vesting** [Nov 2019]

Some Long Term Incentive Plans (LTIPs) pay out awards in tranches. The details of different schemes will vary. For example, an LTIP fund containing deferred bonuses and matching awards may pay out 20% per annum over five years or nothing in Years 1 and 2 and 33% per annum in Years 3 to 5. Entitlement may be conditional upon participants meeting performance conditions and remaining in employment.

The period that each tranche is “for” has to be determined. If the evidence shows that the Plan is intended to reward performance over the period from award to vest, each part of the final payment is “for” the period from the original award date until it vests, calculated as per Section 16(4) on a just and reasonable apportionment. In the first example, 20% is “for” Year 1; 20% is “for” Years 1 and 2, and so on. Alternatively, if there are no performance conditions and the Plan emphasises being in employment at each vesting date, each payment may be treated as earnings “for” the tax year of receipt.

### **33.11 Pre/post-employment earnings**

There are special rules for pre-commencement and post-cessation earnings. Section 17 ITEPA provides:

- (1) This section applies for the purposes of this Chapter in a case where general earnings from an employment would otherwise fall to be regarded as general earnings for a tax year in which the employee does not hold the employment.
- (2) If that year falls before the first tax year in which the employment is held, the earnings are to be treated as general earnings for that first tax year.

(3) If that year falls after the last tax year in which the employment was held, the earnings are to be treated as general earnings for that last tax year.

(4) This section does not apply in connection with determining the year for which amounts are to be treated as earnings under Chapters 2 to 11 of Part 3 (the benefits code).

Since this section only applies for the purposes of Chapter 4, it has to be repeated verbatim in s.30 ITEPA for Chapter 5.

The EI Manual provides:

**EIM40005. Special rules for determining the year that general earnings are “for”: Pre-commencement and post-cessation earnings** [Nov 2019]

...

It’s unlikely the rules will often apply in practice because general earnings can normally be attributed to periods in which the job is held.

**EIM40006. Effect of non-residence on pre-commencement and post-cessation earnings** [Apr 2015]

Where the special rules in [s.17 ITEPA] EIM40005 apply, instead of being taxable when they are received, general earnings will be taxable in the last or first year the taxpayer held the job if the provisions in sections 15 or 27 apply.

...

**EIM40007. Effect of non-residence on pre-commencement and post-cessation earnings: Examples** [Nov 2019]

This page provides examples of how the above sections apply. ...

The first example concerns pre-commencement earnings of an employee who is resident and domiciled throughout:

***Example 1***

An employee is approached by another employer. She is offered a job by the new organisation. As an inducement to change jobs she is paid £50,000 on 1 April 2013. She commenced work for the new employer on 1 May 2013. The employee is resident and domiciled in the UK so the relevant charging provision is Section 15 in Part 2 Chapter 4.

Section 17 operates to make the payment earnings of the year in which the employment commences. Even though paid in tax year 2012/2013 they are earnings “for” the year 2013/2014.

The Manual then considers whether domicile makes any difference:

The result will be the same if the employee is resident but not domiciled in the UK.

It is assumed that the earnings are not chargeable overseas earnings.<sup>26</sup> The Manual now considers someone becoming UK resident:

***Example 2***

An employee worked in Singapore for many years for a UK resident company. The employment ceased on 31 December 2012. For 10 years prior to that date the individual was not resident and not ordinarily resident although domiciled in the UK. On 6 April 2013 the employee returned to the UK. From the date of arrival he became resident.

6 months after the job ended the employer made a payment of £50,000 to the former employee in recognition of the contribution he had made to the expansion of business in the Far East.

Section 17 makes the payment earnings of the year in which the employment was last held, 2012-2013. In that year the employee was not resident in the UK and performed all of the duties in Singapore. In consequence, the payment does not fall into any of the charging provisions in Part 2 Chapters 4 and 5 and is therefore not chargeable to tax as general earnings.

### **33.12 UK resident/dom employee**

Section 15 ITEPA provides:

- (1) This section applies to general earnings for a tax year for which the employee is UK resident ...<sup>27</sup>
- (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of “taxable earnings” from the employment in that year.
- (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

Section 15 sets out the general rule: in short, earnings of a UK resident are “taxable earnings”, taxed on receipt, on an arising basis.

“Receipt” is defined in ss.18, 19 ITEPA (not discussed here).

---

<sup>26</sup> See 33.13 (COE remittance basis).

<sup>27</sup> The omitted words deal with split years and are considered below.

The s.15 rule has two exceptions:

- (1) COE remittance basis<sup>28</sup>
- (2) Overseas workday relief<sup>29</sup>

### 33.12.1 *Employment income: Split year*

Section 15(1)(1A) ITEPA need to be read together:

(1) This section applies to general earnings for a tax year for which the employee is UK resident except that, in the case of a split year, it does not apply to any part of those earnings that is excluded.

(1A) General earnings are “excluded” if they—

- (a) are attributable to the overseas part of the split year, and
- (b) are neither—
  - (i) general earnings in respect of duties performed in the UK,<sup>30</sup> nor
  - (ii) general earnings from overseas Crown employment subject to UK tax...<sup>31</sup>

Section 15(4) ITEPA deals with attribution:

Any attribution required for the purposes of subsection (1A)(a) is to be done on a just and reasonable basis.

### 33.13 COE remittance basis

This section considers the chargeable overseas earnings (COE) remittance

---

28 See 33.13 (COE remittance basis).

29 See 33.22 (Overseas workday relief).

30 Defined by reference: Section 15(5) ITEPA provides:

“The following provisions of Chapter 5 of this Part apply for the purposes of subsection (1A)(b) as for the purposes of section 27(2) ...

- (b) sections 38 to 41 (which contain rules for determining the place of performance of duties of employment), and
- (c) section 41ZA (which is about determining the extent to which general earnings are in respect of UK duties).”

31 Defined by reference: Section 15(5) ITEPA provides:

“The following provisions of Chapter 5 of this Part apply for the purposes of subsection (1A)(b) as for the purposes of section 27(2)—

- (a) section 28 (which defines “general earnings from overseas Crown employment subject to UK tax”)

See 33.40 (Overseas Crown employment).

basis, which is the first of the two remittance bases which may apply to earnings of a UK resident foreign domiciled individual.<sup>32</sup>

Section 809F ITA provides:

- (1) This section applies if section 809B, 809D or 809E applies to an individual for a tax year.
- (2) The individual's relevant foreign earnings for that year are charged in accordance with section 22 or 26 of ITEPA 2003.

So we turn to s.22 ITEPA which (somewhat repetitively) provides:

- (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
  - (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
  - (b) the employee does not meet the requirement of section 26A [recent arrival] for that year.

The point of para (b) is that Overseas Workday Relief (which is more generous) has priority, if it applies.

- (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year. ...

In short, the remittance basis applies to chargeable overseas earnings.

Section 22(7) ITEPA provides:

Section 15(1) does not apply to general earnings within subsection (1).

Thus earnings which are not chargeable overseas earnings continue to fall under the s.15 arising basis.

### 33.13.1 *Pre-2008 earnings*

Suppose:

- (1) Chargeable overseas earnings accrue to T before 2008/9 and
- (2) The earnings are remitted in 2008/9 or later (when T is still resident).

In the absence of a transitional rule, the earnings would not be taxable under s.22 ITEPA because the condition in s.22(1)(a) would not be met.

---

<sup>32</sup> See 33.8 (“Taxable earnings”).

Sections 809B, 809D or 809E did not apply before 2008. Para 82(2)(a) Para 82 sch 7 FA 2008 fills that gap:

(1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year (“the relevant tax year”) if the individual—

- (a) was UK resident in that year, but
- (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year.

(2) Section 22 or 26 of ITEPA 2003 (as amended by this Part of this Schedule) applies in relation to the general earnings as if—

- (a) section 809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year and
- (b) section 22(7) or 26(6) of ITEPA 2003 were omitted.

I think para 82(2)(b) is misconceived, though it does no harm.

### 33.14 Chargeable overseas earnings

The expression “chargeable overseas earnings” is a label which brings in two sets of requirements: the earnings must be “overseas” earnings and they must be “chargeable”. The key part of the definition is “overseas earnings”.

#### 33.14.1 “Overseas” earnings

Section 23(2) ITEPA provides:

General earnings for a tax year are “overseas earnings” for that year if—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year,
  - (aa) the employee does not meet the requirement of section 26A [recent arrival] for that year,
- (b) the employment is with a foreign employer, and
- (c) the duties of the employment are performed wholly outside the UK.

#### 33.14.2 “Chargeable” overseas earnings

The concept of “chargeable” overseas earnings brings in rules for deductible expenses and associated employments. Section 23(3) ITEPA provides:

(3) To calculate the amount of “chargeable overseas earnings” for a tax year—

*Step 1*

Identify—

- (a) in the case of a tax year that is not a split year, the full amount of the overseas earnings for that year, and
- (b) in the case of a split year, so much of the full amount of the overseas earnings for that year as is attributable to the UK part of the year.

*Step 2*

Subtract any amounts that would (assuming they were taxable earnings) be allowed to be deducted from the earnings identified under step 1 under—

- (a) section 232 or Part 5 (deductions allowed from earnings),
- (b) sections 188 to 194 of FA 2004 (contributions to registered pension schemes), or<sup>33</sup>
- (d) section 262 of CAA 2001 (capital allowances to be given effect by treating them as deductions from earnings).

*Step 3*

Apply any limit imposed by section 24 (limit where duties of associated employment performed in UK).

The result is the chargeable overseas earnings for the tax year.

Section 23(4) ITEPA provides:

Any attribution required for the purposes of step 1 or step 2 in subsection (3) is to be done on a just and reasonable basis.

### 33.14.3 *Pre-2008 earnings*

Suppose earnings accrue before 2008/09. At first sight the earnings cannot be “chargeable overseas earnings” within the definition of s.23(2) ITEPA since they do not meet the condition in s.23(2)(a): section 809B, 809D, or 809E did not apply before 2008/09. Moreover, para 82 which fills that gap in s.22 does not fill the gap in s.23. Construed strictly, therefore, pre-2008 earnings which were not remitted before 6 April 2008 have fallen out of charge!

However, I expect that the courts will to strive to construe the section

---

33 Para (c) has been deleted.

avoid that result. After all, it is obvious (and para 82 confirms) that this result was not intended. One way to do that is to say that if income arises before 2008, the question of whether it constitutes chargeable overseas earnings is to be decided by reference to the legislation in the year that it arises and not the legislation in the year that it is remitted. It has to be said that para 82(3) sch 7 FA 2008 would not then be necessary. The alternative is to read para 82(2) as if it applied to s.23 as well as to s.22 and 26. Neither of these solutions is comfortable reading, but the conclusion that all pre-2008 earnings fall out of charge seems even worse. This is only one of many infelicities in the 2008 legislation: but a modern court will strive to make it work.

### 33.15 Foreign employer

Section 23(2) ITEPA provides:

General earnings for a tax year are “overseas earnings” for that year if ...  
(b) the employment is with a foreign employer...

The definition is in s.721(1) ITEPA:

“foreign employer” means an individual, partnership or body of persons resident outside the UK and not resident in the UK.

EI Manual provides:

#### **EIM40106 Calculation of Chargeable Overseas Earnings - Section 23 ITEPA 2003** [Nov 2019]

##### *Practical issues*

An employee may maintain that general earnings are chargeable overseas earnings taxable on remittance under section 22 rather than on receipt ... This is likely to lead to a significant reduction in the amount of taxable earnings. You should examine the facts closely before accepting that earnings are chargeable overseas earnings within section 22. In particular you should find out whether the employer has any place of business in the UK.

While tax rules often turn on whether a person is resident in the UK, it is rare to see a requirement that they must be resident outside the UK.<sup>34</sup> It

---

<sup>34</sup> For an exception, see 45.6 (“Resident outside the UK”).

is suggested that this should be removed so that the only requirement is that the employer is non UK resident. It should not matter whether or not they are resident elsewhere. In practice I doubt it is possible to be non UK resident without being resident outside the UK, so this simplification makes no practical difference and has no cost implication.

### 33.16 Incidental duties in UK

Section 23(2) ITEPA provides:

General earnings for a tax year are “overseas earnings” for that year if ...  
 (c) the duties of the employment are performed wholly outside the UK.

Section 39 ITEPA qualifies “wholly” outside the UK:

- (1) This section applies if in a tax year an employment is in substance one whose duties fall to be performed outside the UK.
- (2) Duties of the employment performed in the UK whose performance is merely incidental to the performance of duties outside the UK are to be treated for the purposes of this Chapter as performed outside the UK.

In short, UK duties may be ignored if they are “merely incidental”. What are incidental duties? HMRC guidance is in:

- (1) A paper entitled “Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of ‘merely incidental’ duties” the (“**HMRC dual-contracts paper**”).<sup>35</sup>
- (2) EI Manual:
  - (a) EIM 40203 (Aug 2012), EIM 40204 (Aug 2012): this is a shorter version of the material in the HMRC paper, so it is not set out here.
  - (b) EIM77030: this was withdrawn in February 2016 but some aspects are discussed here as it may still reflect HMRC practice.<sup>36</sup>

The HMRC dual-contracts paper provides:

#### **Background to the exception for merely incidental duties**

---

<sup>35</sup> (2012) <https://www.gov.uk/government/publications/dual-contracts>

<sup>36</sup> An earlier version of the text was in Tax Bulletin 76 (also classified as RI 273). See Ladkin, “Domicile: Working at Home and Abroad” *Taxation Magazine*, 27 March 2003, p.632.

15. The Royal Commission Report [on the Taxation of Profits and Income]<sup>37</sup> published in 1955 stated (paragraph 300)

*“We recommend that work is not the less to be treated as performed wholly in one country because certain **merely incidental duties**, such as returning for report, to acquire samples, etc., are carried out in another.”*

16. [HMRC set out s. 11(3) FA 1956, now s.39 ITEPA, and continue:]

17. However, the term “merely incidental” duties was not defined in FA1956 or in subsequent legislation. Following a common dictionary definition of “incidental”, as something that is minor, casual or subordinate in nature, the Inland Revenue (as it was at the time) considered that a duty that formed part of the essential or fundamental requirements of the employment could not be incidental.

**Robson v Dixon (48 TC 527)**<sup>38</sup>

18. This is the only case where the courts have considered the meaning of “merely incidental” duties. It was decided in the High Court in 1972 and concerned section 10 and 11 of the FA 1956. Mr Robson was an airline pilot who lived in the UK but commuted to work in Amsterdam, where he was employed by a Dutch airline.

19. Robson flew aircraft on scheduled flights from Amsterdam to various parts of the world, mainly North and South America. None of the flights in the years under appeal commenced in the UK but of 811 take-offs and landings, 38 were made in the UK of which 16 were charter flights, which were outside his normal duties (he made in total only 22 charter flight landings and take-offs).

20. Robson contended that as his duties were performed substantially outside the UK, any duties in the UK were therefore merely incidental to his substantive duties abroad. Pennycuik VC disagreed –

*“The expression “merely incidental” is a striking one, and effect must be given to the natural meaning of the words. The words “merely incidental to” are upon their ordinary use apt to denote an activity (here the performance of duties) which does not serve any independent purpose but is carried out in order to further some other purpose.*

The judge set out the duties performed by Robson and went on:

*In the present case, the duties performed by the taxpayer, apart from his duties on the ground at Schiphol, mainly consisted (putting it shortly) of taking a plane up at Schiphol, flying it to whatever its destination was and then bringing it down. In the case of the flights from Schiphol to some destination (normally in America) on which there was a stop at England, his duties consisted of taking the plane up at Schiphol, flying it to England, bringing it down at Heathrow or elsewhere, and then taking it up again and flying it again to the next destination, in America. With the best will in the world, I find it impossible to say that the activities carried on in or over England are merely incidental to the performance of the comparable activities carried on in or*

---

37 Cmd 9474.

38 Robson v Dixon (H M Inspector of Taxes) [1972] 1 W.L.R. 1493

*over Holland or in or over the ultimate destination, in America. The activities are precisely co-ordinate, and I cannot see how it can properly be said that the activities in England are in some way incidental to the other activities. Going back to the words of the section, when one asks, 'What exactly are the other duties outside the UK to which the performance of the duties are incidental?', no satisfactory answer can be given. The other duties are simply co-ordinate duties.*

21. Pennycuick was clear as well that the test of “merely incidental duties” is one of quality not quantity –

*“Again, I think it is impossible to construe s 11(3) in the way in which it was sought to construe it in the taxpayer’s contentions in the case stated, as indicating merely relatively short periods of employment in the UK in relation to the period of employment outside the UK. It would have been quite simple for the section so to provide; and it may well be that if the condition were imported only by the expression ‘in substance’, that would be the result. But the second requirement is expressed in quite different terms and cannot, I think, be treated as referring merely to what has been described as a quantitative, in contra-distinction to a qualitative, basis. ...*

*It would be tempting to say that all the duties performed by a pilot are incidental to the purpose of transporting passengers from one place to another, but that approach clearly would not help here. What has to be shown is that the particular duties in the UK are incidental to the performance of other particular duties outside the UK.”*

22. Consequently duties performed in the UK that are the same or similar in nature to those performed overseas are not merely incidental to the overseas duties, even if performed for only a very short time. They are, in Pennycuick’s words, “precisely co-ordinate” and therefore of equal importance to the duties performed overseas.

#### **Tax Bulletin 76**

23. Inland Revenue published a Tax Bulletin article in April 2005 titled “Non-domiciled employees: dual contract arrangements” which referred to a range of issues relating to dual contract arrangements, including “merely incidental” duties and to the decision in *Robson v Dixon*.

24. TB76 explained that given the ease and speed of twenty first century communications, an employee who performs duties of one employment overseas and another in the UK, is liable to find it increasingly difficult whilst working in the UK to avoid performing substantive duties of their overseas employment. For example, HMRC take the view that an employee working in the UK under a UK contract to service the needs of UK clients, but also responsible under their overseas contract for servicing the business needs of overseas clients, who responds to a telephone call or email from an overseas client performs a substantive duty of the overseas employment. A response sent from the UK to an overseas client, is no different from a response sent from abroad to the same client. It represents a “precisely co-ordinate” duty.

**Statement of Practice A10 – de minimis**

25. In *Robson v Dixon*, Inland Revenue accepted that a landing in the UK caused by an emergency (e.g. due to weather conditions or mechanical trouble) might be regarded as incidental to duties performed outside the UK.

26. After the decision was handed down, counsel for Robson asked if the de minimis principle could apply to one of the years under appeal in which Robson completed only one take-off and landing in the UK. Despite his decision that the test of “merely incidental” duties was one of quality and not quantity, Pennycuik agreed that this would be “proper” for a single event in a year. SP A10 was published in 1975 as a response to Pennycuik’s comments.<sup>39</sup>

*“Where only a single take-off and landing in this country occurred in a year, the Inland Revenue will normally disregard this on de minimis grounds in considering whether any duties were performed in this country.”*

27. However, in another year, in which Robson performed four take-offs and landings in the UK (two for emergencies, plus two others for unspecified reasons) the Judge declined to accept the request for a de minimis exclusion.

**Director - duties never merely incidental**

28. The general principle in relation to a company director is that the management of a company is vested collectively in the board of directors. Therefore when a director attends a meeting of the board, HMRC takes the view that he or she performs a fundamental duty which is not “merely incidental” to other duties.

29. Consequently a director who in substance performs his duties overseas, except for visits to the UK to attend a meeting (whether as part of a formal board meeting or otherwise) cannot, in the view of HMRC, be within the exception in s39 [ITEPA]. Attendance at board meetings is part and parcel of a director’s core duties and therefore if performed in the UK cannot be incidental to duties performed abroad. A director’s attendance at other meetings (e.g. finance, strategy, personnel) is also likely to represent a substantive duty, because the director would not attend these meetings unless participation was deemed necessary.

[Para 30-32 discuss the former s.830 ITA; this concerns residence, not employment income.]

**Examples of duties that are “merely incidental”**

33. To determine whether duties performed in the UK are “merely incidental” to duties performed overseas, it is necessary to consider both the nature of the duties performed in the UK and their relationship to the duties performed abroad.

34. Ultimately each case will depend on its particular facts but the types of activities, if performed in the UK in relation to the duties of an overseas employment, which can be regarded as “merely incidental” duties include –

- arranging meetings and business travel;

---

39 Author’s footnote: SP A10 is now officially withdrawn; but there has been no announcement that HMRC adopt a different practice, and in view of its origin in the judge’s comments, it is likely that it will continue. That will no doubt

- feedback on employee performance and/or business results, if this does not involve the employee concerned in preparation or analysis whilst in the UK and as long as responsibility for these matters is not part of the employee's core duties of employment;
- input to team restructuring and staff matters, provided that the employee does not have a management role; and
- reading generic business emails that do not relate directly to the employee's role/responsibilities.

35. The examples below illustrate some situations where duties are regarded by HMRC as "merely incidental" -

A. A junior employee who works for an overseas subsidiary of a UK company who, on occasional visits to the UK headquarters, presents a report prepared by the overseas business to report on trade conditions or results overseas, and/or receive instructions for the next tour of duty overseas. The employee performs no other duties in the UK and has no control over the overseas activities on which he reports and is required only to pass on the report from his overseas employer and to take instructions from the UK company to take back to the overseas employer. These duties are regarded as "merely incidental" to his overseas duties.

B. An overseas employee visits the UK and whilst here arranges a meeting with a client overseas and the associated travel. As long as the employee does no more than arrange the meeting and travel, the duties performed are regarded as "merely incidental".

C. Whilst in the UK, an employee of an overseas subsidiary receives an email documenting the employer's global business results for the year. The employee is provided with the results for his information and is not required to take any further action or feedback to the sender of the email. The reading of such an email is "merely incidental" to those duties performed overseas. However, if the employee had any role or responsibility in producing the global results, and/or was involved in feedback or in confirming the results, reading the email is not a "merely incidental" duty.

**Examples of duties that are not "merely incidental"**

36. Types of activities performed by an employee that are not regarded as "merely incidental" duties include -

- instructions and/or guidance to colleagues and/or team members;
- work carried out on issues or projects that do not come to fruition;
- reporting on performance/business results where these matters are part of the employee's core duties;
- analysis of reports/information with the intention to produce results/recommendations that can be reported upwards in the organisation;
- preparation work carried out prior to discussions, meetings or presentations with customers/clients, colleagues, board members or shareholders and follow-up work after such discussions, meetings or presentations;
- discussions and meetings (including by telephone, teleconference or video conference) with customers/clients, colleagues, board members or

shareholders; and

- applying generally expertise in any role or function which the employee is contracted to perform in his or her duties for the employer.

37. The examples below illustrate some situations where duties are not “merely incidental” -

A. A courier for a tour operator visits many countries in the course of the employment. Visits to the UK, however few and however short, are of the same nature to the job as visits to other countries and therefore cannot be “merely incidental”.

B. Preparation in advance of a presentation to, and/or a meeting/discussion with, customers or potential customers, or actions subsequently which result from decisions taken in the presentation or meeting/discussion are not merely incidental to other duties, as preparation in advance and follow-up work afterwards are essential to an employee’s effective participation in a presentation and/or meeting/discussion.

C. A company director, who works overseas for a UK based multinational company, usually participates by video conference in board meetings held each month in the UK. However, sometimes the director visits the company headquarters in the UK and attends in person at monthly board meetings. As attendance at board meetings is a core function and fundamental joint duty of a board of directors to manage the company, attendance at a board meeting cannot represent “merely incidental” duties, regardless of the fact that the director does not normally attend the meeting in person.

D. A company director who is resident in the UK has two directorships within the same overseas based group. One role is as CEO of the UK subsidiary and the other as a board member of the overseas parent company. The parent company’s board meetings are held monthly in the overseas location and the director usually attends in person. However, sometimes he participates in the board meetings by telephone or video conference from the UK. As attendance at board/directors’ meetings is a fundamental and joint duty of a board of directors to manage the company, participation from the UK in the parent’s board meetings can not be “merely incidental” to duties performed overseas.

E. An employee of an international bank based in Frankfurt, visits a UK branch of the bank. Whilst in the UK branch, the employee responds to an investment enquiry sent by email from a customer of the bank in Germany. This represents a duty of his employment in Germany and by answering the email from the UK he performs a duty that is “precisely co-ordinate” with his duties in Germany. Consequently this cannot be a “merely incidental” duty.

### **Merely incidental duties: HMRC policy**

38. Over more than half a century since the Royal Commission Report was published in 1955 and the introduction of the term “merely incidental” duties in FA1956, working arrangements have changed considerably.

39. At that time it was unusual for one employee to perform duties of two or more

employments in different countries. Where such arrangements existed, there was likely to be a physical separation of duties between the two roles because of the restricted availability of effective international communications.

40. Clearly that is no longer the case but should the enormous advances in communications which allow an employee now to perform duties of an overseas employment and an UK employment consecutively, if not concurrently, be sufficient reason for HMRC to change its interpretation of, and policy for, “merely incidental” duties? The Royal Commission provided the example of a junior employee working in one country, returning to another country to report or to collect samples, as the type of duties that it considered should be “merely incidental”. These duties would be still regarded as such today – see Example A in paragraph 35 above.

41. On the other hand, where duties performed in the UK are the same as, or similar to, duties performed overseas, they cannot be “merely incidental” because they are “precisely co-ordinate” duties.

42. HMRC accepts that it may be difficult in some circumstances for an employee to avoid performing co-ordinate duties unless, for example, the employee declines whilst in the UK to answer a mobile telephone, or respond to an email, from an overseas client.

43. However, to apply a broader interpretation of “merely incidental” to duties performed in the UK, than would apply otherwise to similar duties performed overseas, in HMRC’s view would be not consistent with the Royal Commission in 1955, the case law in *Robson v Dixon* or the legislation.

44. Consequently HMRC does not believe there is good reason to revise its interpretation of “merely incidental” duties set out in the Tax Bulletin in 2005 and reiterated in this paper.

It is in practice just about impossible for a UK resident to satisfy the “incidental duties” requirement if it is understood in this way. Through the rigorous statutory interpretation of *Robson v Dixon*, HMRC have (more or less) achieved an arising basis for employment income which, in everyday language, is income of an overseas employment and so foreign income.<sup>40</sup>

This rule applies even though presence in the UK is due to Covid.<sup>41</sup>

If that is the policy, it would be sensible to repeal the COE remittance basis, which would be a simplification.

---

40 A similar process applied to bring foreign trading income on to the arising basis: see 20.4 (UK resident trader: IT).

41 ICAEW Taxguide 08/21 para 6.4

<https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2021/taxguide-0821-covid-19-displaced-expatriate-employees.ashx>

### 33.16.1 *Contract not to work in UK*

EIM formerly provided:

**EIM77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [Nov 2019]...

Where the commercial reality shows the existence of separate employment contracts, it is sometimes argued that contractual terms that prohibit the performance in the UK of duties connected with the business of the overseas employer, preclude HMRC offices from arguing that the employee has performed duties of the overseas employment in the UK. These arguments are based on the UK duties being “ultra vires”.

HMRC does not consider that the presence of such clauses allows the performance of duties in the UK that clearly benefit the overseas employer to be ignored. To that end, both employers ought to be closely monitoring the employee’s UK activities. For example, where the employee has performed substantive duties in the UK that directly benefit the overseas employer, HMRC would expect the UK employer to mark the fact that the employee is effectively abusing its time and take appropriate disciplinary action. And if the UK work in question was valuable, the overseas employer should take it into account when calculating bonus entitlement. It is possible that clauses like this are frequently waived or ignored and may be inserted to create a misleading impression.

This is in principle correct. If the contract of employment formally prohibits UK work, but UK work is done, with the knowledge and tacit consent of the employer, then it is likely that the contract term has been varied by agreement of the parties, and so has no effect.

### 33.17 **Dual contract arrangements**

Unless the OWR remittance basis applies, all earnings from an employment with duties performed in and outside the UK are taxable on an arising basis. Prior to 2014, it was common for an employee in this situation to have two employment contracts:

- (1) a contract covering the performance of duties in the UK and
- (2) a contract covering duties performed outside the UK.

The intention was that earnings from employment contract (2) should be chargeable overseas earnings and therefore taxable on the remittance basis.

### 33.18 Dual-contract rule

FA 2014 introduced what I call the “**dual-contract rule**”. It will prevent use of dual contracts in most cases. This is perhaps why the lengthy discussion of dual contracts formerly in EIM77030 was withdrawn in 2016.

Development of the rule can be traced through draft legislation, together with a TIIN published in January 2014, but that is now of historical interest only.

HMRC have issued guidance (“**HMRC dual-contract guidance**”).<sup>42</sup>

#### 33.18.1 *Relevant employer/employee; UK employment*

It is helpful first to deal with some straightforward definitions. Section 24A(4) ITEPA provides:

In this section—

- (a) “the relevant employee” means the employee in respect of the relevant employment,
- (b) “the relevant employer” means the employer in respect of the relevant employment, and
- (c) “UK employment” means an employment the duties of which are not performed wholly outside the UK and “UK employer” is to be read accordingly...

#### 33.18.2 *Dual-contract rule*

Section 24A(1) ITEPA provides:

This section applies in relation to an employment (“the relevant employment”) for a tax year (“the relevant tax year”) if—

- (a) one or more of the paragraphs in subsection (5) applies,<sup>43</sup>

---

42 Restrictions on the remittance basis – dual contracts (2014)

<https://www.gov.uk/government/publications/remittance-basis-of-taxation-dual-contracts-restrictions-for-foreign-domiciled-employees>

43 This will normally be the case. Section 24A ITEPA provides:

(5) The paragraphs referred to in subsection (1)(a) are—

(a) general earnings from the relevant employment which are for the relevant tax year would, apart from section 23(1A) and Step 3 in section 23(3), be “chargeable overseas earnings” under section 23(3);

- (b) conditions 1 to 4 are met, and
- (c) condition 5 is not met.

I refer to “**dual-contract conditions 1 - 5**”.

Section 24A(2) ITEPA provides:

The consequences of this section applying are set out in sections 23(1A), 41C(4A), 41H(5) and 554Z9(1A).

The main rule is in s.23(1A) ITEPA which provides:

But none of an employee’s general earnings from an employment for a tax year are to be “chargeable overseas earnings” if section 24A applies in relation to the employment for the tax year.

This disapplies the remittance basis and brings the earnings back to the arising basis.

Section 24A(3) ITEPA provides a restriction relating to PAYE:

But, for the purpose of determining if, and the extent to which, any provision of Part 11 (PAYE), or of PAYE regulations, applies in relation to any income, the application of any provision mentioned in subsection (2) in relation to the income is to be ignored.

### 33.18.3 Condition 1: UK employment

Section 24A(6) ITEPA provides:

Condition 1 is that the relevant employee holds a UK employment—

- (a) at a time in the relevant tax year when the relevant employee also holds the relevant employment, or

- 
- (b) employment income in respect of the relevant employment which is treated as accruing in the relevant tax year under section 41C(2) would, apart from sections 41C(4A), 41D and 41E, be “foreign” under section 41C(3);
  - (c) employment income in respect of the relevant employment which is treated as accruing in the relevant tax year under section 41H(2) would, apart from sections 41H(5), 41I and 41L, be “chargeable foreign securities income” under section 41H(3);
  - (d) section 554Z9(2) would, apart from section 554Z9(1A) and (4) and (5), apply to employment income in respect of the relevant employment which corresponds to the value of a relevant step, or a part of the value of a relevant step, which is “for” the relevant tax year as determined under section 554Z4.”

- (b) if the relevant tax year is a split year as respects the relevant employee, at a time in the UK part of the relevant tax year when the relevant employee also holds the relevant employment.

### 33.18.4 *Cond. 2: Associated employer*

Section 24A(7) ITEPA provides:

Condition 2 is that the UK employer is the same as, or is associated with, the relevant employer.

Section 24A(4) ITEPA provides:

...the rules in section 24(5) (“associated” persons) apply for the purposes of this section.<sup>44</sup>

### 33.18.5 *Cond. 3: Related employment*

The definition of related employment is wide and vague. Section 24A ITEPA provides:

(8) Condition 3 is that the UK employment and the relevant employment are related to each other.

(9) Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies—

- (a) it is reasonable to suppose that—
  - (i) the relevant employee would not hold one employment without holding the other employment, or
  - (ii) the employments will cease at the same time or one employment will cease in consequence of the other employment ceasing;
- (b) the terms of one employment operate to any extent by reference to the other employment;

HMRC dual-contract guidance provides:

**When might the terms of employments operate by reference to each other?**

Employments might operate by reference to each other in lots of

---

<sup>44</sup> See 33.21.1 (Associated employment).

different ways, and will depend on the individual circumstances. You should take into consideration the terms of your employment contract, as well as the commercial reality of the relationship between your employments.

For example, the contracts may take into account hours worked or leave taken under the other contract or may refer directly to duties performed under the other contract. There may be other circumstances in which the employments deal with the same customer or clients, so you will need to consider your individual circumstances.

Section 24A(9) ITEPA continues:

Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...

- (c) the performance of duties of one employment is (wholly or partly) dependent upon, or otherwise linked (directly or indirectly) to, the performance of duties of the other employment;

HMRC dual-contract guidance provides:

**How can the duties of different employments be linked?**

Generally, employment duties will be linked where one employment's duties enables the other employment duties to be carried out. For example, where an individual carries out research under one employment, and under their other employment carries out marketing work made possible by the research. Duties of different employments may be linked in a number of different ways, and will depend on the facts of your individual circumstances.

Section 24A(9) ITEPA continues:

Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...

- (d) the duties of the employments are wholly or mainly of the same type (ignoring the fact that they may be performed (wholly or partly) in different locations);

HMRC dual-contract guidance provides:

**When might the duties of the employments be of the same type?**

Where the duties of two or more employments are the same, but the client base or geographical location differs, the duties of the employments are of the same type. For example, marketing under a UK contract to UK clients has duties of the same type to an overseas contract involving marketing to clients in the rest of the world. There may be other circumstances in which the duties of the employments are of the same type, and you will need to consider your individual circumstances.

Section 24A(9) ITEPA continues:

Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...

- (e) the duties of the employments involve (wholly or partly) the provision of goods or services to the same customers or clients;

HMRC dual-contract guidance provides:

**When do employments deal with the same customer or clients?**

The employments will deal with the same customer or clients where duties are performed in the provision of goods or services to the same customer or client. For example, if you give financial advice to a client under one employment and manage that client's investments under another employment. This might apply equally to an individual client, a group of clients or a client base. There may be other circumstances in which the employments deal with the same customer or clients, and you will need to consider your individual circumstances.

Section 24A(9) ITEPA continues:

Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...

- (f) the relevant employee is—
  - (i) a director (as defined in section 67) of the UK employer or the relevant employer who has a material interest (as

- defined in section 68) in the UK employer or the relevant employer,
- (ii) a senior employee of the UK employer or the relevant employer, or
  - (iii) one of the employees of the UK employer or the relevant employer who receives the higher or highest levels of remuneration.

The term “senior employee” is not defined; it is a novel concept in tax law (or indeed in any area of the law). HMRC dual-contract guidance provides:

**What does the term senior employee mean?**

Whether you are a senior employee will depend on the facts of your case, taking into account your responsibilities and the size, nature and structure of your employer’s organisation. HMRC will generally consider that employees involved in higher-level management and decision-making will be senior. For example, the following might be classed as activities of senior employees:

- you are responsible for implementing higher-level or global business strategies
- you participate in higher-level decision-making relating to management issues, finance, corporate restructuring or governance

These indicators are not intended as a definitive list and you will need to consider your individual circumstances.

**What does higher or highest paid mean?**

The higher or highest levels of pay refers to the total pay from your UK and overseas employments, and whether your pay level is high relative to other employees in the same group of companies. There is no absolute level of pay that is relevant – rather it is a matter of comparing your overall remuneration from all your related employments to that of your fellow employees. HMRC considers that if you would be liable to tax at the additional rate on your combined pay (ignoring personal reliefs like donations to charities), it will be a good indication of an employee who is higher or highest paid. The UK additional rate of Income Tax is the highest rate for the tax year. Follow this link to see the UK’s Income Tax rates and taxable bands. Pay includes any amounts which would constitute earnings, an amount treated as earnings or specific employment income.

(10) In subsection (9)(f) references to the UK employer or the relevant

employer include references to—

- (a) any person with which the UK employer or the relevant employer (as the case may be) is associated, and
- (b) if the UK employer or the relevant employer (as the case may be) is a company, the following companies taken together as if they were one company—
  - (i) the UK employer or the relevant employer (as the case may be), and
  - (ii) all the companies with which the UK employer or the relevant employer (as the case may be) is associated.

The statute includes a power to amend this by statutory instrument.<sup>45</sup> I am not sure if that is because the drafter did not have complete confidence in this definition, or to anticipate criticism as to its breadth. I do not expect that the power will ever be used.

It is hard to see that many, if any, dual contracts would not be caught by the dual-contract conditions 1 - 3.

### 33.18.6 *Cond. 4: 65% foreign tax credit*

Section 24A ITEPA provides:

- (13) Condition 4 is that X% is less than Y%.
- (14) “X%” is given by the following formula —  $(C \div I) \times 100\%$   
See section 24B for the definitions of “C” and “I”.
- (15) “Y%” is 65% of the additional rate for the relevant tax year.
- (16) The Treasury may by regulations amend this section so as to amend the definition of “Y%”.

So we turn to s.24B ITEPA for the definitions of C and I. In short:

C is foreign tax **C**redit.

I is the dual-contract **I**ncome.

In full detail, s.24B ITEPA provides:

- (1) This section applies for the purposes of section 24A(14).
- (2) “C” is the total amount of credit which would be allowed under section 18(2) of TIOPA 2010 (double taxation relief by way of credit) against income tax in respect of all the employment income falling within section 24A(5)(a) to (d) were none of that income to be, as

---

<sup>45</sup> Section 24A(11)(12) ITEPA.

relevant—

- (a) “chargeable overseas earnings”,
  - (b) “foreign”,
  - (c) “chargeable foreign securities income”, or
  - (d) income to which section 554Z9(2) applies.
- (3) For this purpose, assume—
- (a) that all relief is claimed within the applicable time limit given by section 19 of TIOPA 2010, and
  - (b) that all reasonable steps are taken to minimise any amounts of tax payable as mentioned in section 33 of that Act.
- (4) “I” is the total amount of all the employment income falling within section 24A(5)(a) to (d).

This takes out cases where the foreign tax rate is  $65\% \times 45\% = 29.25\%$ . The effective overseas tax rate will be lower than the headline rate and in practice I expect that few arrangements will be excluded by this condition.

HMRC dual-contract guidance provides a straightforward worked example:

Overseas employment income for duties in country Z	£500,000
Country Z tax paid on overseas employment income for duties in country Z (Foreign Tax Credit Relief)	£120,000
Effective rate of country Z tax $\frac{£120,000}{£500,000} \times 100\%$	24% (X%)
UK additional rate	45%
UK additional rate $\times 65\%$	29.25% (Y%)
As X% is less than Y% Condition 4 is met.	

CIOT commented:

There will also be timing issues in regard to working out available foreign tax credits and in allowing sufficient time for amendments to Self-Assessment returns. In particular, if the arising basis is used on a return and later on it is determined that the remittance basis could be claimed, eg because the final foreign tax credit proves to be higher than expected (which given that the UK and overseas territories will not have coterminous tax years could take a couple of years or so to determine) then might not the taxpayer out of time to amend their return?<sup>46</sup>

---

46 CIOT, “Artificial use of dual contracts by non-domiciles: Response” (2014)  
<http://www.tax.org.uk/Resources/CIOT/Documents/2014/02/140219%20Dual%20>

HMRC dual-contract guidance provides:

**What if I do not know the foreign tax amount when I have to submit my UK Self Assessment tax return?**

Different tax laws in overseas territories may mean that you have to file a provisional UK tax return based on expected overseas taxes. When the actual amount of foreign tax is known you should submit an amended Self Assessment return, if necessary. You must do this within 12 months of the 31 January that follows the tax year in question.

**What should I do if I have paid too much or too little tax to the foreign tax authorities?**

You must tell HMRC as soon as possible so that any under or overpayment of UK Income Tax can be corrected.

**What should I do if I have paid the Remittance Basis Charge but my overseas employment income becomes taxable on the arising basis?**

If you are within the time frame to amend your return you may withdraw your claim to the remittance basis.

33.18.7 *Cond. 5: Offshore work*

Section 24A(17) ITEPA provides:

Condition 5 is that—

- (a) were the duties of the relevant employment to be duties of the UK employment instead, all or substantially all of them could not lawfully be performed in the relevant territory (whether on the meeting of any condition or otherwise) by virtue of any regulatory requirements imposed by or under the law of that territory, and
- (b) were the UK duties of the UK employment to be duties of the relevant employment instead, all or substantially all of them could not lawfully be performed in the part of the UK in which they are performed (whether on the meeting of any condition or otherwise) by virtue of any regulatory requirements imposed by or under the law of that part of the UK.

(18) In subsection (17)—

“the relevant territory” means the territory in which the duties of the

relevant employment are performed, and  
“UK duties” means duties performed in the UK.

HMRC dual-contract guidance provides:

Examples of regulatory requirements include:

- in order to get a work permit in some countries, you have to have an employment contract in that country
- in order to provide certain types of financial services in the UK, you have to be employed by a person authorised by the Financial Conduct Authority

### 33.18.8 *Dual-contract rule: Critique*

ICAEW stated:

Given that internationally mobile senior employees are the decision makers in a multi-national organisation targeting them in this manner could have significant long term implications for the competitiveness of the UK.<sup>47</sup>

The dual-contract rule was introduced on the grounds that dual contracts were (in general) artificial. One might debate whether that is so. But the policy issue is, or should be, not whether dual contracts are artificial, but what inducements the UK should offer for foreign domiciliaries to reside in the UK. The purpose of the remittance basis is to make the UK an attractive place for foreign domiciliaries to reside and to work.

I suspect there has been an inconsistency in government policy here. Those responsible for the HMRC dual-contracts paper in 2012 had little or no sympathy with the government policy decision in 2008 to accept and retain the principle of the remittance basis; so they sought to adopt as strict an interpretation of the law as was possible. When that statement did not produce the desired effect of preventing dual-contracts, this school of thought succeeded in introducing the s.24A dual-contract rule, which did. But there it is.<sup>48</sup>

---

47 TAXREP 14/14

<http://www.icaew.com/~media/Files/Technical/Tax/Tax-faculty/TAXREPs/2014/taxrep-14-14-artificial-use-of-dual-contracts-by-non-domiciles.pdf>

48 I discussed this topic at greater length in the 14th edition of the work para 22.16.9, but omit that now as it has become of historical interest only; there seems little

### 33.19 Dual contract outside s.24A rule

In cases where the dual-contract rule does not apply, HMRC may attack the planning in the following ways:

- (1) That what purport to be two contracts of employment are in fact only one contract of employment, of which some duties are performed in the UK.
- (2) Some duties of the overseas employment are performed in the UK
- (3) Incorrect apportionment of earnings between the two employments

Points (1) and (2) were formerly discussed at some length in EIM77030, parts of which were doubted in former editions of this work.<sup>49</sup> HMRC may have agreed, as the passage is now withdrawn. In brief:

- (1) Whether there is one or two contracts of employment is a question of contract/employment law, and should not be a problem if the matter is properly documented.
- (2) Whether duties are performed in the UK, depends on the terms of the employment contracts, and other facts.

There remains a legacy of pre-2014 dual contract arrangements currently being negotiated with HMRC.

#### 33.19.1 *Record keeping*

The HMRC dual-contracts paper provides:

4. For the purpose of enquiries into dual contract arrangements, HMRC considers it is reasonable to require access to the following documents, for some or all of the period under review:

- diaries
- emails
- expenses claims and supporting receipts
- telephone records
- client files.

5. A document means anything in which information of any description is recorded. This includes records held on a computer, on magnetic tape, optical disk (CD-ROM/DVD), hard disk, memory stick, flash drive,

---

current prospect of reform.

49 See the 14<sup>th</sup> edition (2015/16) para 22.15 (dual contract arrangements).

floppy disk or other recording media.

6. Where such records are in the possession of the employee, HMRC would expect the individual to comply with Section 12B TMA 1970 and retain any documents or information that would have enabled him or her to deliver a complete and correct return, until the later of either the closure of the enquiry window or, if applicable, the date an enquiry into the return is closed.

Section 12B(1) TMA provides:

Any person who may be required by a notice under section 8, 8A or 12AA of this Act to make and deliver a return for a year of assessment or other period shall—

- (a) keep all such records as may be requisite for the purpose of enabling him to make and deliver a correct and complete return for the year or period; and
- (b) preserve those records until the end of the relevant day ...

HMRC continue:

7. However where the employee does not have power or possession of the documents, HMRC will consider approaching the employer for the records they hold.

8. HMRC has sometimes experienced difficulty in obtaining documents which have not been retained by the employer. In a spirit of collaborative engagement HMRC asks all employers who utilise dual contract arrangements to implement a retention policy that will retain relevant documents for at least two years from the end of the tax year to which the document relates.

9. HMRC has also sometimes experienced difficulties in obtaining documents which have been retained by the employer or the employee. HMRC will not hesitate to use the powers in Schedule 36 FA 2008 to require production of documents. Where the individual is employed by an overseas employer and the information is not available to the individual, HMRC will make full use of Exchange of Information powers with the relevant overseas authorities.

**Multiple risks**

10. HMRC will address all avenues of enquiry into dual contract arrangements (e.g. those relevant to both employee and employer) as equal risks from the outset of the enquiry; no risks will be deferred pending the outcome of enquiries into others. This should serve to

mitigate some of the delays and other problems sometimes faced in obtaining the relevant records.

### 33.19.2 *Dual contract: Disclosure*

The HMRC dual-contracts paper provides:

#### **Self Assessment**

11. An employee who has dual (or multiple) contracts of employment is required to complete a separate Employment page of the Self Assessment Tax Return for each employment, as specified at page EN1 of the Tax Return Guide [now page EN 1 of the Employment Notes 2016/2017].

### 33.19.3 *Implications for employer*

The employer will need to consider the following points before entering into dual contract arrangements:

- (1) **Deductibility:** Is the cost of remunerating the individual under the contract for overseas duties effectively borne by a UK company and can it be claimed as a deduction for Corporation Tax?
- (2) **CFC and transfer of income abroad issues:** Do the individual's activities under the contract for overseas duties generate income, and if so to whom does it accrue? Is income which would otherwise accrue to a company liable to Corporation Tax being routed to an overseas company?
- (3) **Transfer pricing:** If the profits of a company within Corporation Tax are computed on a cost plus basis, are the costs being depressed by reason of the split employment?

## **33.20 Dual-contract apportionment**

Section 24 ITEPA prevents an unreasonable attribution of income between the two employments in favour of the foreign employment. I refer to this as the “**dual-contract apportionment rule**”). It can only arise where the dual-contract rule does not apply, so it now has a relatively small role, but I discuss it here for completeness.

Section 24(1) ITEPA provides:

This section imposes a limit on how much of an employee's general earnings are chargeable overseas earnings for a tax year under section 23 if—

- (a) in that year the employee holds

- [i] associated employments as well as
  - [ii] the employment to which subsection (2) of that section applies (“the relevant employment”), [ie an employment which gives rise to chargeable overseas earnings, taxable on the remittance basis]
- (b) the duties of the associated employments are not performed wholly outside the UK.

### 33.20.1 *Overseas earnings limit*

Assuming the conditions of s.24(1) are met, we move on to s.24(2) ITEPA which sets out the limit on chargeable overseas earnings:

The limit is the proportion of the aggregate earnings for that year from all the employments concerned that is reasonable having regard to—

- (a) the nature of and time devoted to each of the following—
  - (i) the duties performed outside the UK, and
  - (ii) those performed in the UK, and
- (b) all other relevant circumstances.

Section 24(3) ITEPA defines “aggregate earnings”:

For the purposes of subsection (2) “the aggregate earnings for a year from all the employments concerned” means the amount produced by aggregating the full amount of earnings from each of those employments for the year mentioned in subsection (1) so far as remaining after subtracting any amounts of the kind mentioned in step 2 in section 23(3).

Section 24(7) ITEPA provides:

If an amount of chargeable overseas earnings is reduced under step 3 in section 23(3) as a result of applying any limit imposed by this section, the amount of general earnings corresponding to the reduction remains an amount of general earnings within section 15(1).

Of course, even in a case where the conditions of s.24(1) are not met, HMRC may in an appropriate case be able to say that sums which are purport to be earnings are in fact something else.

### 33.21 *Split year*

Section 24(2A) ITEPA provides:

If the tax year is a split year as respects the employee, subsection (2) has effect as if for “the aggregate earnings for that year from all the

employments concerned” there were substituted “so much of the aggregate earnings for that year from all the employments concerned as is attributable to the UK part of that year”.

Amended as s.24(2A) directs, s.24(2) reads:

The limit is the proportion of ~~the aggregate earnings for that year from all the employments concerned~~ so much of the aggregate earnings for that year from all the employments concerned as is attributable to the UK part of that year that is reasonable having regard to—

- (a) the nature of and time devoted to each of the following—
  - (i) the duties performed outside the UK, and
  - (ii) those performed in the UK, and
- (b) all other relevant circumstances.

Section 24(3A) ITEPA provides:

Any attribution required for the purposes of subsection (2A) is to be done on a just and reasonable basis.

### 33.21.1 *Associated employment*

The definition of associated employment matters for the s.24A dual-contract rule, as well as for the dual-contract apportionment rule.

Section 24 ITEPA provides:

- (4) In this section—
  - (a) “the employments concerned” means the relevant employment and the associated employments;
  - (b) “associated employments” means employments with the same employer or with associated employers.

(5) The following rules apply to determine whether employers are associated—

*Rule A* An individual is associated with a partnership or company if that individual has control of the partnership or company.

*Rule B* A partnership is associated with another partnership or with a company if one has control of the other or both are under the control of the same person or persons.

*Rule C* A company is associated with another company if one has control of the other or both are under the control of the same person or persons.

(6) In subsection (5)—

- (a) in rules A and B “control” has the meaning given by section 995

- of ITA (in accordance with section 719 of this Act), and
- (b) in rule C “control” means control within the meaning given by sections 450 and 451 of CTA 2010 (meaning of expressions relating to close companies).

### 33.22 Overseas workday relief
