This section considers the second of the two remittance bases which may apply to UK resident foreign domiciled employees.<sup>50</sup> HMRC call this “**overseas workday relief**”. That label is not particularly apt,<sup>51</sup> though the number of overseas workdays will generally be a relevant matter. I use the term “**OWR remittance basis**”. I refer to those who qualify for the relief as “**OWR employees**”.

The relief originally applied to employees who were UK resident but not ordinarily resident. Following the abolition of ordinary residence the rules were recast without using the term ordinary residence, but covering similar ground. The development of the relief can be traced in the residence consultation papers<sup>52</sup> but that is now of historical interest only.

HMRC have issued guidance in RDR4.<sup>53</sup>

The OWR remittance basis does not require a formal claim or election, but where the relief applies the individual must tick box 2 in SA109 (Residence, remittance basis etc) (2020/21). The rubric to this box provides: “If you are eligible for overseas workday relief... put ‘X’ in the box.”

#### 33.22.1 OWR remittance basis

Section 26(1) ITEPA provides:

This section applies to general earnings for a tax year where

---

<sup>50</sup> See 33.8 (“Taxable earnings”).

<sup>51</sup> **EIM77020: Appendix 2: General earnings in respect of duties performed in the UK** [May 2020] recognises this: “Although the amount that is not taxable is sometimes referred to as “overseas workday relief”, it is not a statutory relief from tax subject to the claims machinery in Section 42 TMA 1970.”

<sup>52</sup> See 5.1 (Concepts of residence).

<sup>53</sup> HMRC “Guidance Note: Overseas Workday Relief”

<https://www.gov.uk/government/publications/rdr4-overseas-workday-relief-owr/overseas-workday-relief-rdr4>

- [i] section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and
  - [ii] the employee meets the requirement of section 26A [recent arrival] for that year,
- if the general earnings meet all of the following conditions—
- (a) they are neither—
    - (i) general earnings in respect of duties performed in the UK, nor
    - (ii) general earnings from overseas Crown employment subject to UK tax,<sup>54</sup> and
  - (b) if the tax year is a split year as respects the employee, they are attributable to the UK part of the year.

Statute frequently refers to:

general earnings within section 26(1) of ITEPA

On one occasion this is abbreviated to “section 26(1) earnings.” For clarity I gloss this as “**OWR earnings**”.

Section 26(2) ITEPA provides the remittance basis for OWR earnings:

The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year.

Section 26(6) ITEPA provides:

Section 15(1) does not apply to general earnings within subsection (1).

Thus OWR earnings are taken from the arising basis (s.15) and moved the remittance basis; but earnings which do not qualify for OWR remittance basis continue to fall under the s.15 arising basis.

In short, a remittance basis taxpayer who qualifies for OWR remittance basis pays tax:

- (1) on an arising basis on general earnings in respect of duties performed in the UK; and
- (2) on a remittance basis on other earnings.

If the s.26A requirements (recent arrival) are met, it is easier to qualify for

---

54 See 33.40 (Overseas Crown employment).

OWR than the COE remittance basis:

- (1) It is not necessary to have a foreign employer
- (2) It is not necessary that duties are performed *wholly* outside the UK

Much of the wording of the OWR remittance basis repeats that found in the COE remittance basis; so the reader is referred back to 33.13 (COE remittance basis).

See too 33.23 (OWR mixed fund rule).

### 33.22.2 s.26A conditions: *Recent arrival*

Section 26A ITEPA provides:

- (1) An employee meets the requirement of this section for a tax year if the employee was—
  - (a) non-UK resident for the previous 3 tax years, or
  - (b) UK resident for the previous tax year but non-UK resident for the 3 tax years before that, or
  - (c) UK resident for the previous 2 tax years but non-UK resident for the 3 tax years before that, or
  - (d) non-UK resident for the previous tax year, UK resident for the tax year before that and non-UK resident for the 3 tax years before that.
- (2) The residence status of the employee before the 3 years of non-UK residence is not relevant for these purposes.

Statute frequently refers to:

the requirement of section 26A

For clarity I gloss this as [recent arrival].

If someone who has never been in the UK comes to the UK and remains:

<b>Year</b>	<b>Qualifies</b>	<b>s.26A(1) para</b>
1 (year of arrival)	Yes	(a)
2	Yes	(b)
3	Yes	(c)
4	No	-

That applies even if year 1 (or year 4) is a split year.

RDR4 provides:

6. The number of tax years you can be eligible for OWR in your lifetime

is not limited. As long as there’s a period of three consecutive tax years where you weren’t resident in the UK, you may be eligible for OWR even if you’ve already previously benefited from the relief.

That all seems quite straightforward, but RDR4 gives four examples to hammer the points home. I think they can be conveniently summarised in a table:

Year	A		B		C		D	
	Resid	OWR	Resid	OWR	Resid	OWR	Resid	OWR
2010/11-2012/13	NR	n/a	NR	n/a	R in 2010/11		NR	n/a
2013/14	Split R	Yes	NR	n/a	Split R	No	R	No*
2014/15	R	Yes	R	Yes	R	No	NR	n/a
2015/16	R	Yes	R	Yes	R	No	Split R	Yes
2016/17	R	No	R	Yes	R	No	R	No
2017/18	NR	n/a	NR	n/a	NR	n/a	R	No

Key: R: Resident  
 NR: Non-resident  
 Spilt R: Split resident year  
 \* does not claim remittance basis

**Example 1 (Abdul)**

A arrives in the UK on 1 February 2014 to begin a work secondment. He hasn’t previously been to the UK and so has not been resident here before. He leaves the UK on 5 April 2017.

Under the SRT, A is resident in the UK for the tax year 2013 to 2014 and is eligible for split year treatment. The UK part of his split year begins on 1 February 2014.

A is also resident in the UK for the tax years 2014 to 2015, 2015 to 2016 and 2016 to 2017. He claims the remittance basis of taxation for the tax years 2013 to 2014, 2014 to 2015, 2015 to 2016 and 2016 to 2017. He isn’t resident in the UK for the tax year 2017 to 2018.

A’s foreign earnings for 2013 to 2014 (from 1 February 2014), 2014 to 2015 and 2015 to 2016 are eligible for OWR and are only taxable in the UK if and when they’re remitted to the UK. In 2016 to 2017 A isn’t eligible for OWR as he’s received the relief in the three preceding tax years. As such his foreign earnings for 2016 to 2017 are fully taxable in the UK.

Provided A remains not resident in the UK for three consecutive tax years following 2016 to 2017 he may be eligible for OWR again from the 2020 to 2021 tax year.

A would have done better to postpone his arrival so he did not become resident until 2014/15; then he would qualify for OWR remittance basis in 2016/17. HMRC quietly make the point in example 2:

**Example 2 (Burril)**

B arrives in the UK on 1 March 2014 to begin a work secondment. He hasn't been to the UK previously and so has not been resident here. He leaves the UK on 5 April 2017.

He is not resident in the UK under the SRT for the tax year 2013 to 2014. He's resident in the UK for the tax years 2014 to 2015, 2015 to 2016 and 2016 to 2017. He claims the remittance basis of taxation for the tax years 2014 to 2015, 2015 to 16 and 2016 to 2017. He isn't resident in the UK for the tax year 2017 to 2018.

B's foreign earnings for 2014 to 2015, 2015 to 2016 and 2016 to 2017 are eligible for OWR and are only taxable in the UK if and when they are remitted to the UK.

Unlike A, B isn't resident in the UK in 2013 to 2014 (the tax year in which his UK secondment commenced). B is therefore eligible for OWR for 2016 to 2017 because this is the third year for which he is UK resident.

Provided B remains not resident in the UK for three consecutive tax years following 2016 to 2017 he may be eligible for OWR from the 2020 to 2021 tax year.

**Example 3 (Colar)**

C arrives in the UK on 1 February 2014 to begin a work secondment. He's previously been resident in the UK. He ceased to be resident in the UK on 5 April 2011.

He was not resident in the UK for the tax years 2011 to 2012 and 2012 to 2013. He leaves the UK on 5 April 2017.

He's resident in the UK for the tax year 2013 to 2014 under the SRT and is eligible for split year treatment. The UK part of his split year begins on 1 February 2014.

He's resident in the UK for the tax years 2014 to 2015, 2015 to 2016 and 2016 to 2017. He claims the remittance basis of taxation for the tax years 2013 to 2014, 2014 to 2015, 2015 to 2016 and 2016 to 2017. He is not resident in the UK for the tax year 2017 to 2018.

C has not been non-resident in the UK for three consecutive tax years immediately prior to his secondment to the UK. He's not eligible for OWR for 2013 to 2014, 2014 to 2015, 2015 to 2016 or 2016 to 2017. If

he remains not resident in the UK for three consecutive tax years following 2016 to 2017 he may be eligible for OWR from the 2020 to 2021 tax year.

C would have done better to postpone his arrival so as to become resident in 2014/15. In that case he would have qualified for OWR.

The last example concerns an employee who does not claim the remittance basis. The point is that a failure to claim the remittance basis in one year does not allow an extension of the OWR remittance basis in a later year:

**Example 4 (Drey)**

D is employed by a US company and has visited the company's group office in the UK on short business projects on a number of occasions in each of several tax years prior to 2013 to 2014. He has not been UK resident prior to 2013 to 2014.

In 2013 to 2014 D works on a short business project in the UK and is resident for the year under the SRT. He has further business visits to the UK during 2014 to 2015 but is not resident in the UK for that year. He's seconded to work at the company's group office in the UK for three years from 1 May 2015. D leaves the UK on 5 April 2018.

D is resident in the UK for the tax year 2015 to 2016 and is eligible for split year treatment. The UK part of his split year begins on 1 May 2015. He is resident in the UK for the tax years 2016 to 2017 and 2017 to 2018. He does not claim the remittance basis of taxation for 2013 to 2014. He claims the remittance basis of taxation for 2015 to 2016, 2016 to 2017 and 2017 to 2018.

In 2013 to 2014 D was not eligible for OWR because, even though he wasn't resident in the UK for the three previous consecutive tax years, he hadn't claimed the remittance basis of taxation for that year.

D's foreign earnings for (the UK part of) 2015 to 2016 are eligible for OWR because 2015 to 2016 is one of three tax years immediately following three consecutive tax years for which he was not resident.

His earnings for 2016 to 2017 and 2017 to 2018 are not eligible for OWR because neither year is one of three tax years immediately following three consecutive tax years for which he was not resident.

### 33.22.3 *Split years*

RDR4 provides:

7. Where the tax year for which OWR applies is a split year for you, OWR will only apply to foreign earnings which relate to the UK part of the year. For these purposes it doesn't matter whether the year is split into a UK part and then an overseas part of the year or the other way round.

8. Where the tax year for which OWR applies isn't a split year, OWR will apply to foreign earnings relating to duties in any part of that tax year.

This sets out the rules in s.26 ITEPA.

9. OWR doesn't apply to earnings which relate to duties you perform overseas in the overseas part of a split year. Such earnings aren't taxable in the UK, even if they're remitted. Earnings which relate to duties you perform in the UK in the overseas part of a split year are taxable in full unless they're exempt from UK tax under the terms of a Double Taxation Arrangement.

10. OWR doesn't apply to earnings which relate to duties you perform overseas in a tax year for which you're not resident in the UK. Such earnings aren't taxable in the UK, even if they're remitted. Earnings which relate to duties that you perform in the UK in a tax year for which you're not resident in the UK are taxable in full unless they're exempt from UK tax under the terms of a Double Taxation Arrangement.

#### 33.22.4 *Earnings the year is "for"*

RDR4 provides:

12. Earnings are usually received shortly after you earn them. However you may receive some earnings in a year, such as a bonus, which is for an earlier period because it relates to duties you performed in that period.

13. You may perform duties in one tax year but receive some of the earnings for those duties in a later tax year. Or you may perform duties in an overseas or UK part of a split year, but receive payment in the other part of the split year (UK or overseas), or indeed in another tax year altogether.

14. It's your circumstances in the period that the earnings are for that determine your eligibility to OWR in relation to those earnings, and not, if they're different, your circumstances in the year you receive them.

15. The following examples demonstrate how the rules apply in practice. In each example, unless otherwise stated, the individual is not domiciled in the UK throughout the period and performs employment duties partly

in the UK and partly overseas.

**Example 5 (Drey)** [This continues on from example 4 above]

In January 2017 D receives his 2016 performance bonus which is in respect of his duties throughout the calendar year 2016.

He isn't eligible for OWR for 2016 to 2017 when he receives his bonus but as part of it was earned in respect of duties performed in 2015 to 2016, that part is eligible for OWR.

See 33.10 (Earnings "for" tax year).

### 33.22.5 *Deemed domicile/OWR interaction*

A deemed domiciled individual cannot claim the remittance basis and cannot claim OWR. RDR4 gives 2 straightforward examples:

**Example 10 (Guy)**

G arrives in the UK on 6 August 2017. He performs his duties partly in the UK and partly abroad, and he claims OWR.

G leaves the UK on 2 September 2020, having claimed OWR for 2017 to 2018, 2018 to 2019 and 2019 to 2020. He cannot claim OWR for 2020 to 2021, the year of his departure (OWR is only available for the first 3 years).

G remains overseas for the following 3 full UK tax years – 2021 to 2022, 2022 to 2023 and 2023 to 2024, and returns to the UK on 8 July 2024. He claims OWR for the next 3 years, and leaves the UK on 10 August 2027.

If G continues his pattern of working both overseas and in the UK indefinitely the maximum number of years G will be resident in the UK in any 20 year period is 12 years and so he will never meet Condition B of the deemed domicile legislation [15-year rule].

**Example 11 (Francoise)**

F was born in the UK with a UK domicile of origin.

F moved to New Zealand with her family at age 14 and acquires a domicile of dependency there which became a domicile of choice. She doesn't return to the UK until 12 October 2015 when she is 24 and takes up employment based partly in the UK and partly in Germany.

F meets the pre 6 April conditions for claiming OWR, and claims it for the 2015 to 2016 tax year (a split year), the 2016 to 2017 tax year (year of arrival plus 1).

However due to the changes applicable from the 6 April 2017 F will not

be able to claim OWR for 2017 to 2018. She meets Condition A of Section 835BA, and will be treated as deemed domicile from 6 April 2017. She cannot therefore claim remittance basis and so fails the conditions necessary to make a valid claim to OWR.

F will be taxable for both those duties performed in the UK and those in Germany, in the UK from 6 April 2017.

### 33.23 OWR mixed funds

This section considers the position where:

- (1) An OWR employee receives earnings for duties performed partly in and partly out of the UK
- (2) The earnings are received abroad

The earnings constitute a mixed fund consisting of:

- (1) Earnings taxed on an arising basis under s.15 ITEPA
- (2) Earnings taxed on the remittance basis under s.26 ITEPA (“OWR earnings”)

The usual mixed fund rules are in s.809Q ITA; see 19.1 (Mixed funds: Introduction). Under these rules, in short:

- (1) s.15 earnings (UK earnings, mixed fund category (a)) are remitted before s.26 earnings (OWR earnings, mixed fund category (b)); but
- (2) Later years’ earnings are remitted before earlier years

So employees who wish to avoid taxable remittances would generally need:

- (1) to pay each year’s earnings in a separate account and
- (2) not remit more than the UK earnings in that account

In the past, relief was allowed by concession. After consultation and response papers<sup>55</sup>, FA 2013 introduced a statutory rule in s.809RA -

---

55 HMRC, “Reform of the taxation of non-domiciled individuals: a consultation” (2011).  
HMRC, “Legislation of Statement of Practice 1/09 (SP1/09): summary of responses and draft legislation” (2012).

<https://www.gov.uk/government/consultations/reform-of-the-taxation-of-non-domiciled-individuals>

HMRC, “Legislation of Statement of Practice 1/09 (SP1/09): second summary of responses and draft legislation” (2013)

<https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attach>

809RD ITA. The heading to s.809RA is “Special mixed fund rules” but for clarity I prefer the term “**OWR mixed fund rules**”.

Section 809R(1A) ITA provides:

But this section must be read subject to section 809RA.

Thus the OWR mixed fund rules have priority over the normal mixed fund rules.

HMRC have issued 11 pages of guidance under the title FAQs; (“**OWR mixed fund FAQs**”).<sup>56</sup>

### 33.24 OWR: Qualifying account

The OWR mixed fund rules apply to payments out of a qualifying account and it helpful to consider this concept first.

Claire Lillie reports:

We have seen a lot of recent focus from HMRC on SMF account eligibility, particularly around whether qualifying criteria for the SMF account is maintained, and there has been little leniency from HMRC when individuals do not carefully follow SMF conditions. Some recent examples of HMRC challenges have been regarding the correct nomination of the SMF account in the tax return (which must be done by the normal filing date without extension for the amendment window) and a focus on prohibited sums being deposited to the SMF account (without corrective action being taken) during the qualifying period. Given the popularity of reliance on SMF conditions applying, it is important that both individuals and advisors remain vigilant of the rules, and for the qualifying status of the account to be regularly reviewed.<sup>57</sup>

The starting point is that an individual may nominate their qualifying account. Section 809RB ITA provides:

(1) An individual may by notice to the Commissioners nominate an account to be a qualifying account of the individual for the purposes of

---

*hment\_data/file/88349/09\_\_ -\_Second\_Summary\_of\_responses.pdf*

<sup>56</sup> Issued July 2013, updated October 2013 [2013] STI Issue 40 (10 Oct 2013)

<https://www.gov.uk/government/publications/residence-domicile-and-remittance-basis-rules-uk-tax-liability>

<sup>57</sup> Tax Journal, 5 July 2019.

section 809RA.

(2) The notice must specify the qualifying date for the account.

### 33.24.1 *How to nominate*

Nomination is a formal matter. Section 809RB(7) ITA provides:

A notice under subsection (1) or (6) must be in writing and include such information as the Commissioners may reasonably require.

OWR Mixed Fund FAQs provide:

#### **How do I tell HMRC which account is my qualifying account?**

You can notify HMRC which account was your qualifying account for the tax year in the whitespace notes of your tax return. Where you have changed qualifying accounts part way through the year, you must include details of all qualifying accounts which you have used during the year. You will need to set out which accounts you have used as qualifying accounts for the tax year and the dates on which each account was a qualifying account.

### 33.24.2 *“Qualifying date”*

The concept of qualifying date is relevant for several purposes:

- (1) It is the date from which the account is a qualifying account
- (2) It is a date on which various conditions must be satisfied
- (3) It is relevant to the time limit for nominating an account

Section 809RB ITA provides:

(3) “The qualifying date” for the account is the first date on which there is paid into the account sums falling within subsection (4) which (in total) are more than £10.

(4) A sum falls within this subsection if it is, or derives wholly (whether directly or indirectly) from, general earnings of the individual from an employment for a tax year which is a relevant tax year in relation to the employment.

Section 809RB(5) ITA defines “relevant tax year”:

A tax year is a “relevant” tax year in relation to an employment if the general earnings which the individual has for the tax year from the employment include both

[a] general earnings within section 15(1) of ITEPA 2003 [UK earnings]

and

[b] general earnings within section 26(1) of that Act [OWR earnings].

### 33.24.3 *Change of nomination*

The nomination may be changed. Section 809RB(6) ITA provides:

The individual may withdraw the nomination by giving a further notice to the Commissioners, specifying the date with effect from which the nomination is withdrawn.

A new account can then be nominated.

OWR mixed fund FAQs provides:

***Can an account that has been my qualifying account in the past be my qualifying account again in the future?***

If an account has been your qualifying account in the past but then ceased to be your qualifying account for whatever reason, it cannot later be used as your qualifying account again. This is because an account can only become a qualifying account on its “qualifying date”. An account can only have one qualifying date, and so cannot become a qualifying account a second time. ...

Note that you may use the same qualifying account from one year to the next - a qualifying account does not automatically cease to be a qualifying account at the end of the tax year.

### 33.24.4 *Time limit for nomination*

There are time limits for:

- (1) Nominating a qualifying account
- (2) Withdrawing a nomination

Section 809RB(8) ITA provides:

A notice under subsection (1) or (6) must be given no later than—

- (a) 31 January in the tax year following the tax year in which falls, as the case may be—
  - (i) the qualifying date for the account, or
  - (ii) the date with effect from which the nomination is withdrawn,or
- (b) such later date as the Commissioners may allow.

OWR mixed fund FAQs provides:

***What happens if I arrive and become resident in the UK part way through the tax year?***

If, part way through the tax year you become UK resident for that year, you will need to consider whether the qualifying date for the account that you wish to nominate as your qualifying account has already passed. This might be the case if, for example, you are continuing the same employment that you had prior to becoming resident and your salary prior to that date was being paid into that account.

If the qualifying date for an account has passed you will have to nominate a different account as your qualifying account.

HMRC say:

*Please can HMRC explain the circumstances in which a late nomination for a Special Mixed Fund will be accepted as valid? Could HMRC be more flexible on this matter for tax years prior to 2018-19 given the requirement to nominate only came in with effect from 2013-14?*

5.2 HMRC explained this has been checked with technical colleagues locally. Notification should be made to the Commissioners by 31 January following the end of the tax year. The Commissioners take into account factors in SACM10040 in regard to the acceptance of a late claim. HMRC does not anticipate flexibility on the date of accepting a late notification. Exceptional circumstances are detailed in the Claims manual, however HMRC doesn't envisage circumstances other than being incapacitated by illness or accident.

5.3 If there is no acceptance of a late notification, HMRC expect a consequential claim to be made via S43A TMA 1970 and S36(2) TMA 1970. To be accepted, the claimant (and anyone representing them) would have to demonstrate that they took reasonable care (as S43C restricts any claims if an individual or their representative has been careless). This is the current approach, and HMRC do not see any flexibility in regard to years prior to 2018-19.<sup>58</sup>

There is a small Covid-related extension for 2021:

5.1 ... the SA Filing deadline remained as 31 January 2021 for the

---

58 Joint Expatriate Forum on Tax and NICs (April 2019)

<https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions>

2019-20 tax returns. However, the £100 late filing penalty was not chargeable on any tax returns filed on or before 28 Feb 21.

5.2 HMRC advised that following this easement, it received some queries related to the late filing of returns and their contents.

5.3 One query was around the nomination of a qualifying special mixed fund account (S809RB(8)(b)ITA2007) which are usually made on the SA Return and need to be nominated by 31 January (or a date by which the Commissioners can allow). HMRC confirmed that it is able to allow nominations of qualifying special mixed fund accounts within returns if they are made on or before 28 February 2021.<sup>59</sup>

### 33.24.5 *Ordinary bank account*

Section 809RB(10) ITA provides:

The account is not to be a qualifying account at all if—

- (a) at any time on the qualifying date, the account is not an ordinary bank account held by and for the benefit of the individual (alone or jointly with others)

Section 809RB(15) ITA provides a commonsense definition of “ordinary bank account:

For the purposes of this section an account is an “ordinary bank account” if it is a cash account in a bank (whether a current or savings account) where sums standing to the credit of the account from time to time represent a debt owed by the bank to the account-holder.

The object is presumably to exclude accounts holding securities.

### 33.24.6 *No funds at qualifying date*

Section 809RB(10) ITA provides:

The account is not to be a qualifying account at all if..

- (b) immediately before the qualifying date, the account has a credit balance of more than £10.

The object is to prevent other funds taking advantage of the OWR mixed

---

59 Joint Expatriate Forum on Tax and NICs (April 2021)

<https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions>

fund rule.

HMRC mixed fund FAQs provides:

***I could have been using the new rules since the beginning of the tax year, but have only just found out about them. Can I use the account that I've been having my salary paid into as my qualifying account?***

If the account had a balance of no more than £10 on the qualifying date for that account, then it may be nominated as a qualifying account from that date. If not you will need to use a different account, or open a new account, in order to use the special mixed fund rules.

### 33.24.7 OWR remittance basis foreign earnings in year

Section 809RB(11) ITA provides:

The account is not to be a qualifying account at all if the qualifying date falls in a tax year—

- (a) for which the individual has no general earnings within section 26(1) of ITEPA 2003

It is necessary to have s.26 earnings (OWR earnings) in each year. But if the employee does not have such earnings, they do not need the OWR special mixed fund rules.

HMRC say:

#### *Question*

[The question refers to the FAQ statement that the only funds that can be paid into the account are *general earnings from an employment for a tax year when the individual is resident, qualifies for OWR and performs duties of that employment both in the UK and overseas (if the year is a 'split year' for residence purposes, then those duties must be performed in the UK part of the year).*]

The question is - does this mean you have to qualify for OWR and perform UK + non UK duties in the year you receive the earnings, or the year you earned the earnings, or both?

For instance if you have to qualify for OWR and have worked in and out of the UK in the year you receive the income, this would mean if you received a bonus in year 4 when you couldn't qualify for OWR but which was at least partly earned in an earlier year while you did qualify for OWR, you would not be able to pay this into a special mixed fund rules qualifying account and so avoid the normal mixed fund rules.

If on the other hand, they're saying you look to the period when the income was earned, and if you qualified for OWR and worked in and out of the UK throughout that period, then you're ok and can get paid into a special mixed fund rules qualifying account after you cease to qualify for OWR on your current year earnings.

[The question refers to the FAQ which addresses the issue of bonuses<sup>60</sup> and continues:]

So that would mean you would be OK paying in a bonus in year 1 part of which was earned before you became resident, but implies that after the end of the three year initial OWR period, any earnings paid subsequently which were earned while the taxpayer still qualified for OWR (bonus, share related remuneration, etc) cannot be paid into a special mixed fund rules qualifying account even though could still claim OWR?

*HMRC answer:*

An account ceases to qualify in any year the individual has no general earnings within section 26(1) ITEPA 2003 (see section 809RB(9)(v) ITA 2007). General earnings under section 26(1) ITEPA 2003 will only arise when the individual meets the requirements of section 26A ITEPA 2003. In year 4 the section 26A ITEPA 2003 requirements will not be met so the account will no longer be a qualifying account. Any prior year bonuses containing section 26(1) ITEPA 2003 income paid into the account will be dealt with under the existing mixed fund rules ...<sup>61</sup>

### 33.24.8 *Breach of deposit rule*

Section 809RB(11) ITA provides:

The account is not to be a qualifying account at all if the qualifying date falls in a tax year...

- (b) in which there is a breach of the deposit rule which is not remedied or cannot be remedied.<sup>62</sup>

---

<sup>60</sup> See 33.28.1 ("Prohibited sum").

<sup>61</sup> Joint Expatriate Forum on Tax and NICs (July 2014)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/347913/140731\\_Expatriate\\_Forum\\_Minutes.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expatriate_Forum_Minutes.pdf)

<sup>62</sup> Section 809RB(12) ITA provides: "Subsection (9)(b)(iv) or (11)(b) (as relevant) is to be ignored if the breach occurs on or after a date falling within subsection (9)(b)(i) to (iii)."

See 33.28 (The deposit rule).

### 33.24.9 *Only 1 qualifying account*

Section 809RB(13) ITA provides:

If, apart from this subsection, an individual might have nominated two or more accounts for which the qualifying date would be the same, the individual may nominate only one of those accounts.

HMRC mixed fund FAQs provides the reason for this rule:

If multiple qualifying accounts were permitted, there are situations where it would be impossible to calculate the tax liability. For this reason, the rules are restricted to having only one qualifying account.

### 33.24.10 *Joint account*

Section 809RB(14) ITA provides:

If, apart from this subsection, an account would be a qualifying account of two or more individuals at any time, it is not to be a qualifying account of either or any of them at that time or any other time.

OWR mixed fund FAQs provides:

***I have a joint account with my partner. Can I use that as my qualifying account?***

Yes, provided that the account meets all the conditions for being a qualifying account, and that your partner doesn't make any financial contribution to the account (that is, they do not make any deposits to the account apart from their share of interest earned by the account).

The same is true for accounts held jointly with anyone, not just those held jointly with a spouse or partner.

But if you have nominated a joint account as a qualifying account, nobody else can nominate that account as their own qualifying account.

***I already have an overseas sterling bank account. Can I use that as my qualifying account?***

Provided it meets the criteria set out above, any bank account may be used as a qualifying account. You will need to make sure the account balance is no more than £10 before qualifying earnings are first paid into the account.

33.24.11 *Qualifying account period*

Section 809RB(9) ITA provides:

If an individual nominates an account under this section, the account is a “qualifying account” of the individual throughout the period—

- (a) beginning with the qualifying date, and
- (b) ending with the date before the earliest of the following dates—
  - (i) the date on which the account is
    - [A] closed or
    - [B] ceases to be an ordinary bank account held by and for the benefit of the individual (alone or jointly with others);
  - (ii) the date with effect from which the nomination is withdrawn under this section;
  - (iii) the qualifying date for another qualifying account of the individual;
  - (iv) 6 April in a tax year in which there is a breach of the deposit rule which is not remedied or cannot be remedied;<sup>63</sup>
  - (v) 6 April in a tax year for which the individual has no general earnings within section 26(1) of ITEPA 2003 [OWR earnings].

HMRC say:

*Question:*

Client qualifying account was set up on the 13th Sept.

He was paid into the account on the 30th Sept but his income paid into the account was for the full month of Sept.

Per the rules the account is considered a qualifying account from the date on which the first deposit of earnings is paid into it. Therefore as these earnings are for the month of Sept I would think it reasonable to calculate OWR from 1 Sept. Or should we only be calculating OWR from 30th Sept? We believe it is 1 September but please can this be confirmed?

*HMRC answer:*

We agree that all salary payments made to a qualifying account will be eligible for the special mixed fund rules provided all other qualifying

---

63 Section 809RB(12) ITA provides: “Subsection (9)(b)(iv) or (11)(b) (as relevant) is to be ignored if the breach occurs on or after a date falling within subsection (9)(b)(i) to (iii).”

conditions are met.<sup>64</sup>

### 33.24.12 *Minor definitions*

Section 809RA ITA provides:

- (11) For the purposes of this section and sections 809RB to 809RD—
- (a) “employment” is to be read in accordance with section 4(1) of ITEPA 2003, and includes an office (as read in accordance with section 5(3) of that Act),
  - (b) whether general earnings are “for” a tax year is to be determined as for the purposes of the employment income Parts of ITEPA 2003<sup>65</sup> (see section 3(2) of that Act),
  - (c) a reference to anything “paid into” an account includes anything credited to the account by whatever means, and
  - (d) references to a breach of the deposit rule are to be read in accordance with section 809RC.

## 33.25 **OWR mixed fund rule**

### 33.25.1 *Requirements for relief*

Section 809RA ITA provides:

- (1) This section applies if—
- (a) an individual has general earnings from an employment for a tax year,
  - (b) those earnings include both
    - [i] general earnings within section 15(1) of ITEPA 2003 (“section 15(1) earnings”) and
    - [ii] general earnings within section 26(1) of that Act (“section 26(1) earnings”),
  - (c) at least some of the section 15(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 15(1) earnings, are paid into an account in that tax year at a time (a “relevant time”) when the account is a qualifying account of the individual, and

---

64 Joint Expatriate Forum on Tax and NICs (July 2014)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/347913/140731\\_Expatriate\\_Forum\\_Minutes.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expatriate_Forum_Minutes.pdf)

65 Parts 2-7A ITEPA; see 33.2 (Employment income Parts).

- (d) at least some of the section 26(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 26(1) earnings, are also paid into the account in that tax year at a relevant time.

OWR Mixed Fund FAQs provide:

**I no longer qualify for Overseas Workday Relief but I still have money in what was my qualifying account. Can I still use the Special Mixed Fund rules?**

No. You are only eligible to use the Special Mixed Fund rules where the conditions set out in the answer to Q1 are met. As one of the conditions is that you qualify for OWR, the special mixed fund rules can't apply to the account after you have ceased to qualify for OWR.

Before turning to the rule, it is necessary to set out two more definitions.

### 33.25.2 “Condition A transfer”

Section 809RA(6) ITA provides:

A transfer from the account is a “condition A transfer” if and to the extent that—

- (a) condition A in section 809L is met,<sup>66</sup> and
- (b) either—
  - (i) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, the transfer, or
  - (ii) the transfer, or anything deriving (wholly or in part, and directly or indirectly) from the transfer, is used as mentioned in section 809L(3)(c) [used in respect of relevant debt].

In short, a condition A transfer is an onshore transfer from the account.

### 33.25.3 “Other transfer”

Section 809RA(7) ITA provides:

A transfer from the account is an “other transfer” if and to the extent that it is not a condition A transfer.

---

<sup>66</sup> In short, property is received in the UK: see 17.12 (Remittance condition A: UK link).

Section 809RA(8) ITA provides:

Treat a transfer as an “other transfer” if and to the extent that, at the end of the tax year—

- (a) it is not a condition A transfer, and
- (b) on the basis of the best estimate that can reasonably be made at that time, it will not become a condition A transfer.<sup>67</sup>

In short, an “other transfer” is an offshore transfer from the account.

#### 33.25.4 OWR mixed fund rule

Armed with these definitions, we can at last turn to the OWR mixed fund rule.

Section 809RA ITA provides:

(2) If this section applies, the composition of each transfer made from the account in that tax year at a relevant time is to be determined as follows—

*Step 1* Suppose that all the condition A transfers made from the account in the tax year at a relevant time had been a single transfer made from the account at the end of the tax year.

*Step 2* Suppose that all the other transfers made from the account in the tax year at a relevant time had been a single offshore transfer made at the end of the tax year immediately after the single transfer mentioned in step 1.

*Step 3* Applying those suppositions—

- (a) find under section 809Q(3) the extent to which the single transfer mentioned in step 1 is of the individual’s income or chargeable gains, and
- (b) find under section 809R(4) the content of the single offshore transfer mentioned in step 2.

*Step 4* Each transfer made from the account in the tax year at a relevant time is to be treated as containing the specified proportion of each kind of income or capital contained in the relevant deemed transfer.

“The specified proportion” is the amount of the transfer divided by the amount of the relevant deemed transfer.

“The relevant deemed transfer” is—

- (a) if the transfer is a condition A transfer, the single transfer

---

<sup>67</sup> This is the equivalent of s.809R(6) ITA; see 19.5.2 (“Offshore” transfer).

mentioned in step 1, and

(b) otherwise, the single offshore transfer mentioned in step 2.

(3) Subsection (2) applies in determining the composition of a transfer for the purposes of sections 809Q and 809R but it does not otherwise affect the date on which a transfer is considered to occur for the purposes of this Chapter [Chapter A1, remittance basis].

OWR mixed fund FAQs provide a summary:

If the employee uses the Special Mixed Fund rules they will not have to operate the normal mixed fund rules on each transaction from their qualifying account in order to determine whether any remittance they make is taxable. Instead they can total up all the remittances to the UK for the tax year and treat that as a single remittance made at the end of the year. Likewise, they can total the amount of offshore transfers made in the tax year and treat that as a single offshore transfer made at the end of the year...

***How do the Special Mixed Fund rules work?***

Under the Special Mixed Fund rules, all remittances and offshore transfers made from a qualifying account in a tax year are treated as a single remittance and a single offshore transfer, both made at the end of the year.

In other words, instead of applying the normal mixed fund rules to each transfer from the account as it is made over the year to work out the composition of each transfer from the account, at the end of the year the individual must—

- work out the proportion of UK income and overseas income in the account for the year (this is normally based on the proportion of UK and overseas workdays)
- identify all the different categories of income and gains in the account
- add together all remittances made to the UK from the qualifying account during the year and treat them as having been a single remittance made from the account at the end of the tax year
- add together all of the offshore transfers made from the account during the year and treat them as having been a single offshore transfer made from the qualifying account at the end of the tax year
- apply the normal ordering of the mixed fund rules to the single remittance in the third bullet point above
- apply the normal ordering of the mixed fund rules to the single

offshore transfer in the fourth bullet point above

### 33.25.5 *Benefit in kind*

HMRC mixed fund FAQs provide:

***I receive UK and overseas benefits from my employer—how do I deal with these?***

You add the value of the benefits to the rest of your income, and apportion as normal. UK benefits are treated as having been remitted to the UK, and that remittance is treated as coming primarily from the earnings of the employment relating to UK duties. Overseas benefits are treated as consisting primarily of earnings from the employment relating to overseas duties.

You should note that because the value of the benefit has been included in the calculation of the apportionment of your earnings, this will mean that the ratio of earnings for UK and non-UK duties that are in your qualifying account may differ from your UK/ non-UK workday split.

***Example***

Mr C has an employment where he performs 75% of his duties in the UK and 25% of his duties overseas.

Mr C receives an annual salary of £150,000 and has a UK based benefit of £30,000 in respect of his children's school fees.

The HMRC analysis is as follows:

First Mr C must apportion his earnings between UK and non-UK duties, based on work days. Based on this Mr C has:

Total earnings for apportionment: £180,000 (£150,000 salary + £30,000) benefit.

£135,000 relating to UK duties ( $£180,000 \times 75\%$ )

£45,000 relating to non-UK duties ( $£180,000 \times 25\%$ )

The UK benefit is treated as having been remitted to the UK and consists primarily of earnings relating to UK duties. As Mr C has more than £30,000 of earnings relating to UK duties, all £30,000 of the UK benefit is treated as being from those earnings.

Therefore Mr C's remaining earnings consist of:

£105,000 relating to UK duties.

£45,000 relating to non-UK duties.

### 33.25.6 *Account becomes/ceases qualifying*

An account may become a qualifying account. Section 809RA(4) ITA provides:

If the tax year is the tax year in which the account becomes a qualifying account, for the purpose of applying section 809Q(3) in relation to the single transfer mentioned in step 1 of subsection (2), treat the part of the tax year falling before the qualifying date for the account as a separate tax year.

An account may cease to be a qualifying account. Section 809RA(5) ITA provides:

If the account ceases to be a qualifying account of the individual during the tax year other than as a result of a breach of the deposit rule—

- (a) subsection (2) has effect as if references to the end of the tax year were to the end of the day on which the account ceases to be a qualifying account, and
- (b) for the purpose of applying section 809Q(3) in relation to the single transfer mentioned in step 1 of subsection (2), treat the part of the tax year falling after the day mentioned in paragraph (a) as a separate tax year.

(9) If the account ceases to be a qualifying account of the individual during the tax year other than as a result of a breach of the deposit rule, subsection (8) has effect as if the reference to the end of the tax year were to the end of the day on which the account ceases to be a qualifying account.

OWR mixed fund FAQs provides:

When you change your qualifying account during the year, you should treat the date on which you changed the account as if it is the end of the tax year for the purposes of the special mixed fund rules, so that the single remittance and single offshore transfer are deemed to be made on that date. In other words, you will have to work out how the rules applied to the first qualifying account until the point that it ceased to be a qualifying account (part way through the year), and must work out how they applied to the later qualifying account from the point it becomes a qualifying account to the end of the tax year.

But you can still apportion your earnings between UK and overseas duties for the whole year.

At the actual end of the tax year you will need to carry out the same

procedure for the income in the new qualifying account - the single remittance and single offshore transfer will cover transactions made in the period between the date you first used the new qualifying account and the end of the tax year.

***Can an account that has been my qualifying account in the past be my qualifying account again in the future?***

If an account has been your qualifying account in the past but then ceased to be your qualifying account for whatever reason, it cannot later be used as your qualifying account again. This is because an account can only become a qualifying account on its “qualifying date”. An account can only have one qualifying date, and so cannot become a qualifying account a second time. ...

Note that you may use the same qualifying account from one year to the next - a qualifying account does not automatically cease to be a qualifying account at the end of the tax year.

### 33.26 Two or more employments

HMRC FAQs provide:

**I have more than one employment for which I perform duties both in the UK and overseas. I pay the earnings for all of these employments into my qualifying account. When I apportion my earnings, can I add together the workdays from all of my employments for calculating what proportion of my workdays were overseas?**

No You have to apportion the income from each of the employments individually.

***Example***<sup>68</sup>

Ms B has two employments. For the first employment, Ms B performs 25% of the duties in the UK and 75% overseas, and has an annual salary of £40,000. For the second employment Ms B performs 50% of the duties in the UK and 50% overseas, and has an annual salary of £30,000. Ms B must apportion the earnings from each employment separately between UK and non-UK duties.

So from the first employment Ms B has:

relating to UK duties ( $£40,000 \times 25\%$ )	£10,000
relating to non-UK ( $£40,000 \times 75\%$ )	<u>£30,000</u>

---

68 I have altered the layout for clarity.

total	<u>£40,000</u>
And from the second employment Ms B has:	
relating to UK duties (£30,000 × 50%)	£15,000
relating to non-UK duties (£30,000 × 50%)	£15,000
total	<u>£30,000</u>

### 33.27 Salary paid into 2 accounts

HMRC mixed fund FAQs provides:

**If my pay is paid partly in the UK and partly overseas, how do I calculate what I have remitted?**

Payments into a UK account will be a remittance and so will be primarily UK taxable income following the ordering in section 809Q(4) ITA 2007. The composition of the overseas account will be the remainder of the apportioned income

**Example**

Mrs B has a salary of £100,000 of which £60,000 is paid into a UK account for general living expenses and £40,000 is paid into an overseas account. The workday split calculated at the end of the year is 75% UK workdays; 25% overseas workdays. Of the £75,000 UK earnings, £60,000 will have been paid into the UK account and the balance of £15,000 will be in the overseas account together with the £25,000 foreign earnings.

If the workday split had been 50:50 the UK account would have contained £50,000 UK income and £10,000 overseas employment income which would be regarded as remitted.

**If my pay is paid into two separate overseas accounts, one of which is my qualifying account, how will the mixed fund rules apply to remittances from the qualifying account**

Each payment of salary will be a mixture of UK and overseas earnings however the proportion of each can not be calculated until the workday apportionment is completed at the end of the year. In addition the mixed fund rules operate by giving preference to remittances to the UK over offshore transfers (section 809R(5) ITA 2007). Although the technical analysis of the accounts is complicated the result is that remittances from the qualifying account will come first from the UK earnings

**Example<sup>69</sup>**

Mr C is paid a salary of £1,000,000 in the year split equally between a qualifying Jersey account and a non qualifying USA account. The workday apportionment determines that £750,000 of the salary relates to UK duties. Mr C remits £400,000 to the UK in the year from the qualifying account. The special mixed fund rules will look first at the combined £400,000 remittance which will, because section 809Q ITA 2007 takes preference over section 809R ITA 2007, consist entirely of UK earnings. The balance of £600,000 will be split proportionally between the amounts remaining in the 2 accounts.

So the £100,000 remaining in the qualifying account will consist of

UK earnings	£58,333
overseas earnings	<u>£41,667</u>
total	<u>£100,000</u>

the £500,000 in the USA account will be

UK earnings	£291,667
overseas earnings	<u>£208,333</u>
total	<u>£500,000</u>

HMRC mixed fund FAQs provides:

**My salary is paid into two separate accounts, one in my home country and one sterling overseas account. The sterling account is my qualifying account. How do I decide how much of the salary in the sterling account relates to my UK workdays?**

Where your salary is paid into two separate accounts in a “split-payroll” scenario the normal mixed fund rules determine what earnings are paid into each account.

In general, if you remit income from your qualifying account it will relate to income from your UK workdays in preference to income from your overseas workdays, provided that you receive more income relating to your UK workdays for that year than the amount you remit.

If earnings relating to UK duties from the employment remain after taking account of all remittances from the qualifying account, then how those earnings are split between your qualifying account and your non-qualifying account depends on whether you have made any remittances (directly or indirectly) from your non-qualifying account.

If you have not made any remittances from your non-qualifying account, then the proportion of the earnings in your sterling account which relate

---

69 I have altered the layout for clarity.

to UK earnings (after the remittance but before the single offshore transfer) can be calculated using the formula:

$$(U - R) / (E - R)$$

Where

U is the total of your earnings from the employment for the year that relate to UK duties,

R is the amount of the remittance, and

E is your total earnings from the employment for the year.

### 33.27.1 *Non-qualifying account*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

#### Question

#### Assumptions

Individual is paid £120,000 p.a., £10,000 pcm via the US payroll.

He is paid 60% into a qualifying US account (US\$) and 40% into a non-qualifying account in Jersey (GBP)

Despite the fact that the Jersey account is non-qualifying, the only monies that have ever been paid into the account are assignment related earnings

The individual is entitled to OWR and performs 20% of his duties outside of the UK

The only money remitted to the UK is £3,600 pcm from the Jersey account.

#### Assumed UK tax position

There are no remittances from the US qualifying account so the SMFRs [OWR special mixed fund rules] are not in point.

Per HMRC's analysis, the amount credited to each account would, in the first instance be:

- US qualifying account - £4,800 of s.15 income and £1,200 of s.26 income pcm
- Jersey non-qualifying account - £3,200 of s.15 income and £800 of s.26 income pcm

However, £3,600 is remitted to the UK from the Jersey account each month so s.809R(4) is overridden by s.809R(5) such that the rules in s.809Q are applied. The remittance of £3,600 pcm is less than the amount of s.15 income received each month and so all of the amount remitted is regarded as s.15 income

This analysis is repeated each month so the balance on the Jersey account is:

<b>Month</b>	<b>s.15</b>	<b>s.26</b>
--------------	-------------	-------------

April	£3,600	£400
Less remittance	<u>-£3,600</u>	<u>0</u>
Balance	<u>£0</u>	<u>£400</u>
May	£3,600	£400
Less remittance	<u>-£3,600</u>	<u>0</u>
Balance	<u>£0</u>	<u>£800</u>
<i>Etc</i>		

The amounts remaining in each account at the end of the tax year are:

- U S qualifying account – £52,800 of s.15 income and £19,200 of s.26 income
- Jersey non-qualifying account - £0 of s.15 income and £4,800 of s.26 income

The above assumes that you do not re-apportion the balance of the two accounts at year end.

*HMRC answer:* We would agree with the analysis on the facts given and the assumption there are no “other transfers” from the qualifying account. However there may be a different result if there were “other transfers” from the qualifying account. Because the qualifying account must be looked at in priority to the non-qualifying account “other transfers” would reduce the amount of s.15 and s.26 income available to remit from the non-qualifying account.

To take an example, if you assume that all of the payments made to the qualifying account were spent overseas in the year (£72,000 in total) it would remove £57,600 s.15 income and £14,400 s.26 income as an “other transfer” within section 809RA(2) ITA. The only monthly amounts available for remittance from the non-qualifying account would be £3,200 s.15 income and £800 s.26 income credited to it. Each monthly remittance of £3,600 on a transactional basis would therefore consist of £3,200 s.15 income and £400 s.26 income.

The Joint Forum on Expatriate Tax and NICs returned to this issue in July 2014. HMRC say:

*Question:* I’m afraid that we don’t completely understand how the rules are being interpreted and applied.

The first example deals with the position where payments are made by the employer into two non-UK accounts, one of which is a qualifying account. We agree that each account should be treated as containing the same pro-rata share of s.15 and s.26 income. We also agree that remittances from the non-qualifying account are from s.15 income in that

account in priority to s.26 income. We don't however understand the statement, "Because the qualifying account must be looked at in priority to the non-qualifying account, "other transfers" would reduce the amount of the s.15 and s.26 income available to remit from the non-qualifying account." HMRC's example shows that if all the funds in the US qualifying account are spent outside the UK, that reduces the funds in that account pro-rata, in accordance with the rule in s.809RA(2). Consequently the £72,000 spent from the qualifying account would be £57,600 s.15 earnings and £14,400 s.26 earnings. According to the example, the £4,000 (s.15 £3,200 and s.26 £800) credited to the non-qualifying account are not affected by the offshore transfer from the qualifying account, which appears to contradict the sentence quoted above. Could HMRC please explain or clarify this?

*HMRC answer:*

The qualifying account is looked at in priority to the non-qualifying account because of section 809Q(1A) ITA 2007.

In the original question there were no remittances or offshore transfers from the qualifying account. The subsequent remittances from the non-qualifying account will follow the ordering rules in sections 809Q and 809R ITA 2007 as described in the second part of the question below. Each monthly remittance of £3,600 will therefore have a pool of £8,000 s.15 ITEPA 2003 and £2,000 s.26 ITEPA 2003 income for the mixed fund rules to operate on (i.e. the total amount deposited monthly to both accounts). The monthly remittance of £3,600 will therefore consist of s.15 ITEPA 2003 income (section 809Q(4)(a) ITA 2007).

In HMRC's original response we contrasted the above position with one where all of the money paid to the qualifying account was the subject of an offshore transfer in the year. As the qualifying account is looked at in priority to the non-qualifying account all of the income in the qualifying account is regarded as removed from it under the single offshore transfer in section 809RA ITA 2007. On subsequently dealing with the non-qualifying account using the transaction by transaction mixed fund rules, the monthly pool of income available for remittance is only £3,200 s.15 ITEPA 2003 and £800 s.26 ITEPA 2003 income. Each monthly remittance from the non-qualifying account therefore consists of £3,200 s.15 ITEPA 2003 and £400 s.26 ITEPA 2003 income under the normal operation of section 809Q ITA 2007. We are not entirely sure what the problem here is and suspect it may just be one of the language we used in the original response. Of course the offshore transfers do not *reduce* what is in the non-qualifying account in any way. We hope this further

explanation is helpful in your understanding of the legislation.

### 33.27.2 Example: *Qualifying/non-qualifying accounts*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

#### Question

#### Assumptions

Individual is paid £120,000 p.a., £10,000 pcm via the US payroll.

He is paid 60% into a qualifying US account (US\$) and 40% into a non-qualifying account in Jersey (GBP)

Despite the fact that the Jersey account is non-qualifying, the only monies that have ever been paid into the account are assignment related earnings

The individual is entitled to OWR and performs 20% of his duties outside of the UK

The individual remits £3,600 pcm to the UK from the Jersey account and also makes a one-off remittance of £20,000 to the UK from the qualifying US account in December after the earnings for November have been paid into the account but before the earnings for December have been added.

#### Assumed UK tax position

There is a remittance from the US qualifying account so the SMFRs [OWR (recent arrivals) mixed fund rules] are in point

Per HMRC's analysis, the amount credited to each account would, in the first instance be:

- US qualifying account - £4,800 of s.15 income and £1,200 of s.26 income pcm or £57,600 of s.15 income and £14,400 of s.26 income per annum
- Jersey non-qualifying account - £3,200 of s.15 income and £800 of s.26 income pcm

The SMFRs take precedence over the normal MFRs and so the position on the US account needs to be analysed first.

	<b>s.15</b>	<b>s.26</b>
Apportionment of earnings for the year	£57,600	£14,400
Less remittance	<u>£20,000</u>	<u>0</u>
Position after applying s.809RA but before s.809R	<u>£37,600</u>	<u>£14,400</u>

The next step is to analyse the Jersey account which must be analysed on a month by month basis. The starting point for the Jersey account is that £3,200 of s.15 and £800 of s.26 income is paid into the account each month. However, s.809R(4) is overridden by s.809R(5) which

allows us to apply s.809Q to the monthly remittance. This is where we run into difficulty because of the interaction with the SMFRs that have been applied to the US qualifying account. We do not know how HMRC intend to apply the rules but one possible approach is to say that if you ignored the SMFRs there would have been £38,400 of s.15 income in the US qualifying account immediately prior to the one-off remittance of £20,000. This leaves £18,400. The amount of 'extra' s.15 income we need to allocate to the non-qualifying Jersey account is £400 per month and  $\frac{£18,400}{8}$  is £2,300 which is more than £400 and so the amount remitted each month from the Jersey account is regarded as s.15 income only, i.e.

<b>Month</b>	<b>s.15</b>	<b>s.26</b>
April	£3,600	£400
Less remittance	<u>-£3,600</u>	
Balance	<u>£0</u>	<u>£400</u>
May	£3,600	£400
Less remittance	<u>-£3,600</u>	
Balance	<u>£0</u>	<u>£800</u>
Etc.		

The amounts remaining in each account at the end of the year are:

- US qualifying account – £32, 800 of s.15 (£57,600 – £20,000 – (£400×12\*)) and £19,200 of s.26
- Jersey account - £0 of s.15 and £4,800 of s.26

\*£400 is the amount reallocated each month from the US account to the Jersey account as a result of s.809R(5).

Our analysis of the example is as follows:

- a) We agree you must look at the qualifying account first
- b) After the £20,000 condition A transfer has been accounted for, the balance of income remaining is £76,000 s.15 income and £24,000 s.26 income (£100,000 total) - assuming there are no "other transfers" (see example (a)).
- c) HMRCs view is the income is apportioned between the 2 accounts proportionately (see the final example in the FAQs) following the offshore transfer rule in section 809R ITA. Of course that will only total £100,000 (£76,000 + £24,000) so the £20,000 already identified as a remittance from the qualifying account must be included to match the apportionment with the amounts paid into the 2 accounts on a monthly basis. For the purposes of this example we

- will call this “remitted income” as it has already been identified as remitted s.15 income.
- d) Each monthly salary payment to the qualifying account will consist of:
    - £3,800 s.15 income
    - £1,200 s.26 income
    - £1,000 “remitted income”
  - e) Each monthly salary payment to the non-qualifying account will consist of:
    - £2,533 s.15 income
    - £800 s.26 income
    - £667 “remitted income”
  - f) There is enough s.15 income in the monthly payments to the offshore accounts to ensure the £3,600 monthly remittance is entirely of s.15 income. This is the same result as CIOTs calculation, but arrived at via a slightly different methodology.
  - g) We believe this methodology ensures the transfers identified by the special mixed fund rules are not double counted when looking at remittances from the non-qualifying account and the transaction by transaction basis of the normal mixed fund rules can be calculated accurately.
  - h) For example, if the condition A transfers from the qualifying account totalled £72,000 rather than £20,000 the monthly payments to the qualifying account would be £1,200 s.15 income:
    - £1,200 s.26 income and
    - £3,600 “remitted income”Monthly payments to the non-qualifying account would be:
    - £800 s.15 income,
    - £800 s.26 income and
    - £2,400 “remitted income”.The £3,600 monthly remittance from the non-qualifying account would consist of £2,000 s.15 income (£1,200 + £800) and £1,600 s.26 income.<sup>70</sup>

The Joint Forum on Expatriate Tax and NICs returned to this issue in July 2014. HMRC say:

---

70 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

In the second example (remittances from both the qualifying and non-qualifying accounts) we find it difficult to understand the method applied. We agree that the first step is to identify the remittance of £20,000 from the qualifying account, which is all s.15 income. However, we do not understand why the remaining £100,000 is apportioned in the way it is on a monthly basis between the qualifying and non-qualifying accounts. For instance, if the £20,000 is remitted from the qualifying account, why is it subsequently split between the qualifying and non-qualifying accounts (pro-rata to the overall allocation of payments between them)? At f) HMRC say that there is enough s.15 income in the monthly payments to the offshore accounts to ensure the £3,600 monthly remittance is entirely of s.15 income. However, on HMRC's figures at e) the unremitted monthly s.15 income in the non-qualifying Jersey account is only £2,533. The only way in which the individual's monthly remittance of £3,600 from the non-qualifying account can be treated as entirely s.15 is to look across to the qualifying account and bring in the s.15 income in that account. Is that HMRC's interpretation?

Looking at HMRC's variation to the second example, where £72,000 is remitted from the qualifying account, it is again not clear how the earnings attributed to each account match with the funds in it. For instance, we're told that after factoring in the £72,000 remittance (which it appears is all s.15 income) we have to identify the monthly income credited to the qualifying account as s.15 £1,200, s.26 £1,200 and £3,600 remitted. In fact there is only £4,000 left in the account after the £72,000 remittance, so for HMRC's approach to work we have again to "borrow" s.15 income from the non-qualifying account and in effect treat the two accounts as one for the purpose of identifying the s.15 and s.26 income in them. Is that the intention?

In summary, it would be helpful to have a clear statement of the principles applied where there are two or more offshore accounts from both of which remittances are made to the UK and from both of which offshore transfers are also made. Please consider

- Condition A transfer from a qualifying account
- "Other transfers" from a qualifying account
- Remittances from a non-qualifying account
- Offshore transfers from a non-qualifying account.

*HMRC answer:*

It is HMRC's view that the mixed fund rules begin to apply to a salary

payment at a point just before it is paid to employee. As each salary payment is a mixture of s.15 ITEPA 2003 and s.26 ITEPA 2003 income, the mixed fund rules will apply to determine the composition of each offshore account. As section 809R(5) ITA 2007 gives priority to section 809Q ITA 2007 the composition of each salary payment can not finally be determined until the single remittance from the qualifying account (and the single offshore transfer if there is one) has been dealt with. It is not possible to know in real time what the composition of either account is. The proportional rule in section 809R(4) ITA 2007 applies to the balance remaining after the single end of year condition A transfer. Having determined the composition of each salary payment into the accounts, the mixed fund rules will apply to each transaction from the non-qualifying account on a transaction by transaction basis through the year. It is HMRC's view that dealing with the accounts in this way will avoid any potential double counting of income when dealing with the non-qualifying account on the transaction by transaction basis.

On the second point, again because HMRC's view that the mixed fund rules begin to apply at a point just before it is paid to the employee and the legislation gives priority to section 809Q ITA 2007, a remittance from the non-qualifying account will be s.15 ITEPA 2003 income to the extent that such income has been paid into either offshore account at that time. This was the basis of the original question 1 where only £3,200 s.15 ITEPA 2003 income was paid into the non-qualifying account but each monthly remittance of £3,600 was treated as remitted. This is HMRC's view of the correct operation of the mixed fund rules in sections 809Q and 809R ITA 2007 in these circumstances and we do not recognise the concept of "borrowing" mentioned in the question. HMRC's view on when the mixed fund rules begin to apply in a situation where salary is split between accounts should, in most circumstances, be beneficial to employees. It ensures remittances from the qualifying account will be of s.15 ITEPA 2003 income to the extent that such income has been paid into either offshore account and from the non-qualifying account to the extent that either account contains s.15 ITEPA 2003 income at the time of the remittance.<sup>71</sup>

### 33.28 The deposit rule

#### 33.28.1 “Prohibited sum”

Section 809RC(6) ITA provides:

A “prohibited sum” is anything other than a sum that is, or derives wholly (whether directly or indirectly) from, any of the following kinds of income or capital—

There are 5 permitted categories and everything else is prohibited. The permitted categories are:

- (a) general earnings of the individual from an employment for a tax year which is a relevant tax year in relation to the employment,
- (b) general earnings of the individual from an employment which consist of money and are paid in a tax year which is a relevant tax year in relation to the employment,
- (c) an amount of specific employment income which, by virtue of Part 6, 7 or 7A of ITEPA 2003 or any other enactment, counts as employment income of the individual in respect of an employment for a tax year which is a relevant tax year in relation to the employment,
- (d) interest on the account, or
- (e) consideration for the disposal of employment-related securities or employment-related securities options in the circumstances described in subsection (7).

HMRC say:

(25.3) If an employer pays an expense reimbursement into a Special Mixed Fund, and the expense reimbursement is exempt under Part 4 ITEPA 2003, can HMRC confirm that the payment is not a breach of the deposit rule as defined by s809RC ITA?

**Answer**

(25.3) We can confirm that a payment of an exempt expense into a Special Mixed fund will not be a breach of the deposit rule.<sup>72</sup>

Section 809RC(7)(8) ITA deals with employment-related securities, a

---

<sup>72</sup> Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

topic not discussed here.

Section 809RC(9) ITA defines “relevant tax year”:

For the purposes of this section a tax year is a “relevant” tax year in relation to an employment if—

- (a) the individual has general earnings from the employment for the tax year,
- (b) those earnings include both general earnings within section 15(1) of ITEPA 2003 (“section 15(1) earnings”) and general earnings within section 26(1) of that Act (“section 26(1) earnings”),
- (c) at least some of the section 15(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 15(1) earnings, are paid into the account in the tax year, and
- (d) at least some of the section 26(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 26(1) earnings, are also paid into the account in the tax year.

### 33.28.2 *Deposit rule*

Section 809RC(1) ITA provides:

There is a breach of the deposit rule if a prohibited sum is paid into the account on or after the qualifying date.

### 33.28.3 *30-day grace period*

The employee should take care not to pay (say) dividend income into the qualifying account. But it is (just) possible to remedy a breach of the deposit rule. Section 809RC ITA provides:

- (2) A breach of the deposit rule is remedied if, within 30 days beginning with the day on which the individual became or ought reasonably to have become aware of the payment of the prohibited sum, the required amount is transferred out of the account by way of a single one-off transfer.
- (3) “The required amount” is an amount equal to—
  - (a) the prohibited sum, plus
  - (b) all the other prohibited sums (if any) that have been paid into the account since that sum was paid in.

The policy seems to be “three strikes and you are out”. Section 809RC(4) ITA provides:

If there are 3 breaches of the deposit rule in any 12 month period, subsection (2) does not apply to the third breach and, accordingly, the third breach cannot be remedied.

Section 809RC(5) ITA provides:

The payment of a prohibited sum (“the later prohibited sum”) into the account does not result in a breach of the deposit rule if—

- (a) a breach resulting from an earlier payment of a prohibited sum into the account is remedied, and
- (b) the later prohibited sum is represented by the required amount in relation to that breach.

The drafting is clumsy but it works. The point is that if there is an error, all errors must be cleared by the remedial steps.

OWR mixed fund FAQs offers a straightforward example:

Mr A has a qualifying account at the beginning of 2015/16 into which his employment income is paid.

On 15 May 2015 Mr A deposits some rental income from a property he has in Spain.

This is a breach of the deposit rule. Realising this could affect the qualifying status of the account, Mr A transfers the full amount deposited to another of his offshore accounts on 29 May 2015. As the breach has been remedied within the 30 day period allowed, the account remains a qualifying account.

On 30 June Mr A receives some dividends from a foreign company (not connected to his employment) and deposits them into his qualifying account. This is again a breach of the deposit rule and, once again, realising his mistake, Mr A transfers the full amount of the dividend to another offshore account within the 30 day period. The qualifying account again remains a qualifying account.

On 15 September a further sum of income from the property in Spain is deposited into the qualifying account. As this is the third breach of the deposit rule in a 12 month period it can not be remedied and the account is treated as a normal mixed fund from 6 April 2015. The simplified mixed fund rules will no longer apply to the account for the year 2015/16.

OWR mixed fund FAQs provides:

***If I breach the deposit rule, do I need to report it to HMRC?***

You do not need to report a breach of the deposit rule to HMRC. You will however need to remedy the breach within 30 days of finding out about it if you can do so and want to maintain the qualifying account status. If you do not remedy the breach the account will operate as a normal mixed fund for the whole tax year in which the breach occurred.

HMRC mixed fund FAQs provides:

**I have one employment with UK duties, and one with overseas duties. Can I use the Special Mixed Fund rules for both?**

No The Special Mixed Fund rules can only be used in relation to employments where the individual performs UK and overseas duties in the same tax year for the same employment.

**I have one employment which requires me to work in the UK and overseas, and another employment where I only work overseas. Can I pay the salaries for both employments into my qualifying account?**

No Income from an employment for which you have only UK or only overseas duties would be a prohibited sum, and cannot be deposited into a qualifying account.

**My employer paid last year's bonus into my qualifying account. Does that count as an error?**

No Any earnings from the employment that are paid in a year when you qualify for Overseas Workday Relief and have both UK and overseas duties of that employment can be deposited into the qualifying account, even where those earnings are for an earlier year.

### 33.28.4 30-day deadline met

Section 809RD ITA provides:

- (1) This section applies if the required amount in relation to a breach of the deposit rule was transferred out of the account in accordance with section 809RC(2).
- (2) Sections 809Q and 809R have effect as if—
  - (a) the intervening transactions had never taken place, and
  - (b) each prohibited sum represented by the required amount had instead been transferred directly (at the time that sum was paid into the qualifying account) into the account or other property into which the required amount was transferred by virtue of the single one-off transfer.

- (3) Each of the following is an “intervening transaction”—
  - (a) each payment into the qualifying account of a prohibited sum represented by the required amount, and
  - (b) the single one-off transfer out of the qualifying account.
- (4) If it is supposed under step 1 or 2 of section 809RA(2) that a single transfer had been made in the intervening period, re-apply section 809Q or 809R in relation to that transfer taking account of subsection (2).
- (5) “The intervening period” is the period—
  - (a) beginning with the day on which the breach occurred, and
  - (b) ending with the day on which the single one-off transfer was made in accordance with section 809RC(2).
- (6) If more than one transfer of a sum equal to the required amount was transferred out of the qualifying account within the 30-day grace period, the first of those transfers is assumed to be the single one-off transfer.
- (7) “The 30-day grace period” is the period of 30 days mentioned in section 809RC(2).

### 33.29 Non-resident employee

Section 27 ITEPA provides:

- (1) This section applies to general earnings for a tax year for which the employee is not resident in the UK if they are—
  - (a) general earnings in respect of duties performed in the UK, or
  - (b) general earnings from overseas Crown employment subject to UK tax.<sup>73</sup>
- (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of “taxable earnings” from the employment in that year.
- (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

This applies regardless of domicile. DTA short-term business visitors relief may override this charge.<sup>74</sup>

There are two concepts in para (1)(a):

- (1) Duties performed in the UK; and
- (2) Earnings in respect of those duties.

It is best to consider these separately.

---

<sup>73</sup> See 33.40 (Overseas Crown employment).

<sup>74</sup> See 36.6 (Short-term business visitors).

The employer will also need to consider whether the non-resident employee constitutes a foreign permanent establishment.

### 33.30 Where are duties performed

The question of where duties are performed (or at least, whether they are performed in the UK) is relevant for two purposes discussed in this chapter:

<b>Purpose</b>	<b>Why it matters</b>	<b>See para</b>
Workday relief	Arising/remittance basis	33.22
Non-resident employee	Taxable/tax-free earnings	33.29

The expression is one of a cluster of (more or less) identical terms or concepts:

<b>Expression</b>	<b>Matters for</b>	<b>See para</b>
Where duties performed	<i>See above</i>	<i>Discussed here</i>
Where employment exercised	DT relief	36.5
Where work done	Statutory residence test	5.22
Where services provided	Remittances	17.13
Where services performed	Foreign tax credit; DIMF	106.8.2, 69.8
Where trading income arises	Source of income from services	20.13

There are differences of context and statutory wording, but discussion on one of these expressions is generally helpful in considering the others.

Duties are performed in the place where the employee is physically present when performing the activities. Thus an employee outside the UK who is on the phone/Skype/Zoom/Teams with a person in the UK is performing his duties outside the UK.

Duties are performed in the UK even if the employee is stranded here because of Covid. That is self-evident. EIM explains why HMRC do not allow a concession on this point:

**EIM77045 COVID-19 considerations for non-residents and non-domiciled employees for 2020 to 2021 [Jan 2021]**

For UK residents eligible for Overseas Workday Relief (that is UK resident employees with a period of non-residence within the 3 previous tax years) a day spent working in the UK will continue to be treated as a UK workday, even if they have been prevented from leaving the UK as a result of COVID-19 travel restrictions.

The rationale for this is as follows:

The UK has a claim to tax the worldwide income of UK resident employees, but has chosen to restrict that right for those who meet the conditions of section 26 ITEPA, allowing them to receive Overseas Workday Relief. OWR allows for employment income which relates to duties performed overseas to be taxable only to the extent that it is remitted to the UK, provided certain relevant conditions are met. It is a condition of s26(1)(a) that the income eligible for OWR cannot be ‘general earnings in respect of duties performed in the United Kingdom’. Therefore, if a UK resident performs duties related to their employment in the UK, even if they are stranded in the UK as a result of COVID-19 travel restrictions, the requirements of s26 will not be met and they will be ineligible for OWR on income earned during those days.

Only the UK can establish any rights to tax the income for the period or periods the UK resident taxpayer spends in the UK, it is therefore reasonable for the UK to charge tax on its residents for work performed in the UK as no other state will have a claim to tax any earnings for such work.

With regards to taxpayers chargeable under section 22 with a dual contract, the duties of the overseas employment cannot be performed in the UK without removing the earnings from treatment as overseas chargeable earnings (subject to sections 38 and 39). As this is effectively an all or nothing charge, section 41ZA is not relevant.

### 33.30.1 *Absence from employment*

During a period of absence from employment, the employee is not actually performing duties in the UK or anywhere else. However s.38 ITEPA provides:

- (1) This section applies if a person ordinarily performs the whole or part of the duties of an employment in the UK.
- (2) General earnings for a period of absence from the employment are to be treated for the purposes of this Chapter as general earnings for<sup>75</sup> duties performed in the UK except in so far as they would, but for that absence, have been general earnings for duties performed

---

<sup>75</sup> Section 38 refers to earnings “for” duties performed in the UK, whereas ss.26, 27 ITEPA refer to earnings “in respect of” duties performed in the UK, but the meaning must be the same.

outside the UK.<sup>76</sup>

EI Manual provides a straightforward example:

**EIM40202 Location of duties: Absence from duties** [Nov 2019]

... *Example*

An employee who is not [ordinarily]<sup>77</sup> resident in the UK performs the duties of the employment in Manchester. Illness meant that a holiday in Florida was unexpectedly extended so the days normally spent in the UK were lost. The Inspector received a calculation of earnings chargeable under s.15 [ITEPA]<sup>78</sup> that excluded salary attributable to the days of absence.

The Inspector successfully contended that s.38 [ITEPA] applied on the basis that the duties of the employment were normally performed in the UK. The earnings that had been excluded were therefore UK-based earnings within s.15 [ITEPA]

### 33.31 Earnings “in respect of” UK duties

The identification of earnings in respect of UK duties is relevant for two purposes:

Purpose	Why it matters	See para
Workday relief	Arising/remittance basis	33.22
Non-resident employee	Taxable/tax-free earnings	33.29

Section 41ZA ITEPA provides:

The extent to which general earnings are in respect of duties performed in the UK is to be determined under this Chapter [Chapter 5 Part 2, Remittance basis & non-resident employees] on a just and reasonable basis.

This provision was introduced in 2013, as part of the project to put SP 1/09 on a statutory footing.<sup>79</sup> The pre-2013 guidance and case law will

<sup>76</sup> Special rules apply for:

(1) duties on board vessels or aircraft: s.40 ITEPA

(2) duties performed in the UK sector of the Continental Shelf: s.41 ITEPA

<sup>77</sup> The Manual has not been revised following the abolition of ordinary residence in 2013, but that does not affect the point made here.

<sup>78</sup> The reference from 2008/2009 is now s.26 ITEPA.

<sup>79</sup> The reader may wonder whether s.41ZA was really needed; but it is here now, and does no harm. For the SP 1/90 consultation and response papers, see 33.23 (OWR

continue to apply.

SP1/09 provides:

13. Where the duties of a single office or employment are performed both in and outside the UK, an apportionment is required to determine how much of the general earnings are attributable to the UK duties. Apportionment of general earnings is essentially a question of fact, but for many years HMRC has accepted time apportionment, based on the number of days worked abroad and in the UK, except where this would clearly be inappropriate.

For example, in the case of an employee with 200 working days in the UK and 50 working days outside the UK, the proportion of general earnings attributable to UK duties would be 200/250.<sup>80</sup>

It is difficult to see what other rule there could be.

There have been two cases discussing whether earnings are “in respect of” duties performed in the UK. I discuss them in more detail elsewhere:

Case	Topic	See para
<i>Taylor v Provan</i>	International business travel	33.31.2
<i>Perro v Mansworth</i>	Tax equalisation	33.43

EI Manual provides an outline:

**EIM77020. Appendix 2: General earnings in respect of duties performed in the UK** [Nov 2019]

... In *Taylor v Provan* (49 TC 579), the courts agreed that the touchstone must be the wording of the statute. In that case, travel expenses paid to a director to come to the UK in order to perform duties here were considered to be “emoluments in respect of duties performed in the UK”. In *Perro v Mansworth* [2001] (SpC286), a Special Commissioner found that the payment by an employer of an employee’s liability to tax on UK-based earnings (Case II Schedule E) was itself “an emolument in respect of duties performed in the UK”.

Where an attribution is required, Statement of Practice 5/84<sup>81</sup> approves time apportionment according to the number of days worked abroad and

---

mixed funds); but the purpose (if any) of s.41ZA is not discussed.

80 SP 1/90 continues: “This practice does not, of course, apply where the charge arises under Section 15 ITEPA and relief is due under Part 5 Chapter 6 ITEPA (Deductions from seafarers’ earnings).”

81 Author’s footnote: This was later replaced by SP 1/09.

in the UK except where this would clearly be inappropriate. The *Perro* case is an example of where time apportionment is not appropriate. The starting point for the SP5/84 approach to time apportionment is that the employee's contractual right to earnings for the work performed usually accrues from day to day.

There have also been some cases on the former relief for UK resident employees who worked 30 or more days abroad.<sup>82</sup> But as was pointed out in *Perro v Mansworth*, the wording of that relief is not the same, and the context is different, so little if any guidance is to be had from those cases. EIM77020 does however refer to them:

Authority for this view comes from *Varnam v Deeble* (58 TC 501), although that case was not directly concerned with attributing earnings to UK duties for the purposes of the charge to UK tax. In *Platten v Brown* (59 TC 408), it was held that correct attribution on a time apportionment basis should employ units of days rather than hours.

The courts have consistently taken the view that time apportionment should not be applied to earnings that can be specifically allocated either to duties performed in the UK or to duties performed elsewhere. So time apportionment would be inappropriate in a case where the contract of employment specifically allocated earnings to periods spent working in the UK or overseas. Provisions in a contract of employment that regulate the amount of time to be devoted to the employment, dealing with matters such as the number of days to be worked, the length of holidays or how to calculate compensation do not amount to an allocation of particular parts of remuneration to particular days of work.

This appendix gives examples of how the time apportionment approach envisaged by SP5/84 applies in practice. Self-Assessment Helpsheet IR211<sup>83</sup> approaches apportionment by calculating the earnings from the employment that are not taxable in the UK. The total earnings are multiplied by a fraction where the numerator is the number of days worked outside the UK and the denominator is the number of days worked in pursuit of the employment during the tax year. Where there are no UK-based earnings taxable under either section 25 or section 27 ITEPA, the resultant figure will be entered at Box 1.31 on the

---

82 *Varnam v Deeble* 58 TC 501; *Platten v Brown* 59 TC 408; *Coxon v Williams* 60 TC 659. The relief survives in an attenuated form for seafarers, not discussed here: see Part 5 Chapter 6 ITEPA.

83 Now HS211 (Employment - residence and domicile issues (2017))

employment page as foreign earnings not taxable in the UK...

Note 4 to IR211 clarifies what is meant by days worked overseas. They are defined as those days that have been spent outside the UK substantially performing the duties of the employment.<sup>84</sup> “Substantially” should be taken as meaning “for the most part”.

In *Platten v Brown* there is the example of an employee who spends a whole day working in the UK but then leaves the country that evening on an overseas business trip. It would be difficult to say as a matter of contract that the employee’s earnings for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the earnings for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas. There are two questions of fact to be addressed in order to attribute the earnings for a particular day. These are:

- whether the day has been spent substantially performing the duties of the employment
- where those duties have been performed.

Employees should retain evidence such as travel documents and business diaries to demonstrate how they have calculated the earnings from overseas workdays...

### 33.31.1 HMRC example

EI Manual provides:

**EIM77020 General earnings in respect of duties performed in the UK** [Nov 2019] *Example (Monica)*

M is resident but not ordinarily resident in the UK. Her salary of £100,000 is paid directly into an offshore bank account. Her contract of employment provides for a five-day 40-hour working week with 22 days holiday plus public holidays - a total of 230 workdays.

During 2005-06, her employer sent her to work at its branch in India for the whole of October and November, a period of 45 weekdays. She also attended the branch office in India on the first Saturday and Sunday in October and spent three other Saturdays working on her employer’s Indian premises. She received a special bonus of £15,000 awarded solely in recognition of her work in India.

---

<sup>84</sup> Now Note 5 HS211, which provides: “Days worked overseas are those days which have been spent outside the UK substantially performing the duties of the employment.”

In addition, she attended her employer's Munich office on five separate occasions during the year. On four of these occasions, she left the UK after work and stayed overnight before returning to the UK on the following evening. On the final occasion, she left the UK on a Friday evening and spent the weekend in Munich. She spent three hours of the Sunday reading papers relevant to a meeting on the following day. She returned to the UK on Monday evening.

The HMRC analysis is as follows:

M was substantially performing the duties of her employment on the five non-weekdays spent working in India, giving a total 50 workdays in India. The Sunday in Munich was not an overseas workday so her duties in Germany encompassed five workdays. The special bonus was on the facts solely attributable to the performance of duties in India.

Time apportionment produces the following result –

UK duties - Salary  $100,000 \times 180/235 = 76,595$  (Section 25 ITEPA)

Overseas duties - Salary  $100,000 \times 55/235 = 23,405 + 15,000 = 38,405$

***Example - variation A***

Following her return to the UK, M's employer gave her time off in lieu of the weekends spent working in India. The denominator in the fraction would become 230 and not 235.

UK duties - Salary  $100,000 \times 175/230 = 76,086$  (Section 25 ITEPA)

Overseas duties - Salary  $100,000 \times 55/230 = 23,914$  plus  $15,000 = 38,914$

***Example - variation B***

Facts are as variation A plus M spent the whole of Sunday 30 September travelling to India and was granted a further day off in lieu when she returned to the UK. That day should also be counted as an overseas workday increasing the numerator by one to 56.

UK duties - Salary  $100,000 \times 174/230 = 75,652$  (Section 25 ITEPA)

Overseas duties - Salary  $100,000 \times 56/230 = 24,348 + 15,000 = 39,348$

### 33.31.2 *International travel*

*Taylor v Provan* concerned reimbursed travel expenses of a non-resident employee.<sup>85</sup>

It was submitted that the taxpayer's travelling expenses to and from the

---

<sup>85</sup> 49TC 579 at p.607. The deductibility of the expenses was a separate issue; see 34.14 (Travel in performance of duties).

United Kingdom ... were ... not emoluments in respect of duties performed in the United Kingdom'. I am unable to accept this submission. The taxpayer was not resident in the United Kingdom, and when he travelled to and from the United Kingdom in order to perform such part of his duties as had to be performed in the United Kingdom he was reimbursed his travelling expenses. I consider that the sums that he received were emoluments 'in respect of' his duties performed in the United Kingdom.

Note 5 HS211 provides:

Days worked overseas are those days which have been spent outside the UK substantially performing the duties of the employment. This may include travelling, where the journey is itself part of the duties.

This is not exactly guidance. EI Manual provides something more specific:

**EIM77020 General earnings in respect of duties performed in the UK [Nov 2019]**

***... international business travel***

The time of departure or arrival and the duration of international business travel can make it extremely difficult to decide whether a particular day should be regarded as a UK or an overseas workday. In these specific circumstances, HMRC is prepared to accept that the following treatment provides a reasonable basis for determining the status of such a day:

International flight or journey lasting no more than seven hours

- Morning arrival – UK workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – UK workday

International flight or journey lasting more than seven hours

- Morning arrival – half UK workday and half overseas workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – half UK workday and half overseas workday

A morning or afternoon arrival or departure is judged according to the time that the aircraft, vessel or train actually arrives or departs, not the scheduled times.

Where a journey involves more than one international flight, a one hour transfer addition may be added to the actual flight times to determine

whether the total flight time lasts more than seven hours. International business travel that takes place on a Saturday, Sunday or Bank Holiday is subject to the same treatment as any other day.

Note: HMRC may accept alternative approaches to quantifying overseas workdays if the available evidence indicates that such an approach better reflects the facts.

### 33.31.3 *Work in UK due to Covid*

HMRC guidance provides:<sup>86</sup>

**If you're a non-UK resident and were stuck in the UK because of coronavirus (COVID-19)**

If you could not leave the UK when you intended because of coronavirus, you will not have to pay UK tax on employment income that:

- you earned between the dates you intended to leave and when you actually left
- you paid tax on in your home country

**Example**

You missed your departure flight because you were self-isolating and you worked in the UK until you could rearrange a flight home. As long as you pay tax on your wages in your home country, you will not have to pay tax in the UK.

You must file a Self Assessment tax return, together with a completed SA109 form. Use the 'other information' section of your SA109 to include:

- the dates you were stuck in the UK because of coronavirus
- what you earned in that time
- confirmation you paid tax on these earnings in another country

...HMRC may ask you for proof that you:

- could not leave the UK when you intended, for example an NHS isolation note
- paid tax in another country on what you earned while stuck in the UK

---

86 HMRC, "Tax on your UK income if you live abroad"

<https://www.gov.uk/tax-uk-income-live-abroad>

EIM77045 (COVID-19 considerations for non-residents and non-domiciled employees for 2020 to 2021) refers to this, but it does not provide further details so it need not be set out here.

- left the UK as soon as you reasonably could  
You may have to pay tax in the UK if you cannot prove you were unable to leave the UK and did not leave as soon as you could.

HMRC say:

5.5 HMRC advised that, since the last forum meeting, it has received a few queries regarding the guidance Tax on your UK income if you live abroad, which HMRC previously referred to as “s41ZA guidance” at previous forum meetings.

5.6 This is the guidance which means that, in certain circumstances, individuals will not have to pay UK tax on employment income relating to days stuck in the UK because of Coronavirus.

5.7 HMRC advised that, following feedback from the forum, the guidance page has been amended to make it clear that this relates to non-residents. The rationale for only applying to non-residents is held at the EIM Appendix which was previously shared...

5.9 A claim can only be made by an individual on a Self-Assessment Tax Return. HMRC specialists have confirmed that the guidance cannot be used to determine the amount on which PAYE is operated.

5.10 Therefore, when operating PAYE, an employer should not anticipate any claim which may be made by the employee and should instead operate PAYE as normal i.e. not excluding any employment income relating to days stuck in the UK because of Coronavirus. Employees should then file a tax return if they wish to make a claim for PAYE tax deducted to be refunded.

5.11 A consequence of this is that employees on an Appendix 8 scheme, who would not normally be required to submit a tax return, will need to file a return to make a claim.

5.12 Another consequence is that the days ‘stuck’ in the UK because of Coronavirus will count towards the 60 or less UK workdays criteria of an Appendix 8 scheme.

### **33.32 Remitting after year earnings are for**

Suppose:

- (1) T receives earnings for year 1; the earnings are taxed on the remittance basis and are not remitted in that year.
- (2) The earnings are remitted in year 2.

For the COE remittance basis, s.22 ITEPA provides:

- (1) This section applies to general earnings for a tax year, to the extent

that they are chargeable overseas earnings for that year, if—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
  - (b) the employee does not meet the requirement of section 26A [recent arrival] for that year.
- (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year. ...

Similarly, for the OWR remittance basis, s.26 ITEPA provides:

- (1) [a] This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee meets the requirement of section 26A [recent arrival] for that year, if
  - [b] the general earnings are neither—
    - (a) general earnings in respect of duties performed in the UK, nor
    - (b) general earnings from overseas Crown employment subject to UK tax.
- (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year.

The earnings are “taxable earnings from the employment in that year” ie year (2). In year (1) the earnings are not “taxable earnings” (as defined).

### **33.33 Remittance after employment**

Section 22(3) ITEPA provides:

Subsection (2) [charge on remittance of COE] applies whether or not the employment is held when the earnings are remitted.

Section 26(3) ITEPA provides the same rule for the OWR remittance basis.

### **33.34 Earnings for year employee non-resident**

To be “overseas earnings” the earnings must be “for” a year of assessment in which the employee was resident in the UK. Accordingly, any earnings “for” a year during which the employee was not UK resident can be remitted at any time without a charge to tax.

### 33.35 Remittance when non-resident

Suppose earnings taxable on the remittance basis are remitted in a year when the employee is non-resident. In the HMRC view the earnings are taxable. EI Manual provides:

**EIM42371. Foreign earnings taxed at time of receipt in UK:**  
**Example** [Nov 2019]

An employee is resident in the UK and meets the conditions of section 26A in 2014/15. She has earnings for that year of £10,000 in respect of duties performed outside the UK. She is paid the £10,000 in New York in 2015/16. In 2016/17 she remits £5,000 of those earnings to the UK. The result is that this employee is chargeable under Section 26(2) ITEPA 2003 on £5,000 in 2016/17.

This employee is likely to be resident in the UK in the year of remittance but she is assessable on the remittance even if she is not. What matters is her residence status in the year when the money was earned (see EIM42201). She will also be assessable on any further remittances out of the £5,000 balance that remains.

Note that the employee is chargeable on any remittances to the UK even if her employment ceases in 2015/16 (see EIM42370).

Is this correct? It is a surprising anomaly compared to the position for RFI, and enforcement may be difficult, but this is the natural reading of the legislation. The TNR rules are drafted on that basis: hence they apply to RFI but not to employment income.

### 33.36 Receipt/remittance after death

Section 13(4) ITEPA provides:

If the tax is on general earnings received, or remitted to the UK, after the death of the person to whose employment the earnings relate, the person's personal representatives are liable for the tax.

EI Manual provides:

**EIM42380. Basis of assessment for general earnings: earnings received after the death of an employee or office holder** [Nov 2019]

When an employee or office holder dies, earnings received (or, if the employee was subject to the special rule for certain foreign earnings, received in the United Kingdom) after the date of death are assessable on the personal representatives in the same way as if they had been received by the employee or office holder (see generally EIM42201).

The earnings will, of course, all have been earned in periods before the date of death and in many cases, adopting the statutory position could place an additional burden upon the personal representatives and family of the deceased but may not result in materially different overall tax liability. Sensible administrative procedures should be used in this type of case and a review should be undertaken to determine the assessing basis which is most financially beneficial to the personal representative. Note. The strict basis of assessment should always be applied when requested, and follow EIM42390.

When no request to apply the strict basis has been received and it is beneficial not to apply the strict basis you should take the pay and tax shown on the deceased's P45 as received in the period before the date of death (see generally EIM74101 for taxation of all pensions and annuities). Furthermore, when the death occurs close to the end of the tax year, a payment received in the year following death should also be treated in the way most beneficial to the estate. This is particularly relevant if the deceased was not liable to tax up to the date of death. Note: State pension is treated as accrued income and is treated as income received prior to the date of death irrespective whether it is paid after. The tax chargeable on the personal representatives is a debt due from and payable out of the deceased's estate.

As regards:

If it is contended that earnings cannot be attributed to any particular period during the lifetime of the deceased employee or office holder, see EIM40005.

So it is the place where duties were performed and the residence and ordinary residence status of the employee when the remuneration was earned that counts. The residence position of the personal representatives at the time the earnings are received (or, where the special rules for certain foreign earnings apply, received in the United Kingdom) is irrelevant.

In cases where an employee or office holder has died the employer will follow the instructions at page 12 of the Employer's Further Guide to PAYE. By following those instructions the employer will account for tax in the following way:

- when payments are made in a tax year following that in which the employee died the employer will prepare a new deductions working sheet and will use code OT Week1/Month1.

**EIM42390 earnings received after the death of an employee or office holder: the charge on personal representatives [Nov 2019]**

If an employee or office holder dies and earnings are received after the date of death, the personal representatives are charged to tax on them (see EIM42380). They are charged:

- at the OT rate only
- in the year the earnings are received (or, where the special rules for certain foreign earnings apply, received in the United Kingdom)
- without any allowances, deductions or reliefs except for the deductions, reliefs and exemptions that would have been due to the employee had they lived.

The personal representatives cannot claim deductions for expenses that they incur separately themselves. The main deductions due are therefore:

- expenses within Sections 336 to 338 ITEPA 2003 incurred by the employee or office holder (see EIM31620 onwards)
- balancing allowances due to the employee or office holder; balancing charges will also fall on the personal representatives (see EIM36500 onwards)
- foreign travel and accommodation expenses within Sections 341, 342 and 370 to 376 ITEPA 2003 incurred by the employee or office holder (see EIM34000 onwards)
- professional fees and subscriptions within Sections 343 and 344 ITEPA 2003 (see EIM32880 onwards)
- where a lump sum is assessable under the “golden handshake” provisions the various exemptions that are available under Sections 404 to 414 ITEPA 2003 (see EIM13500 onwards).

A deduction that is due is not limited to expenses actually paid by the deceased. The personal representatives can have a deduction for an expense that the deceased was due to pay but that the representatives actually settle.

As regards:

- the time limit for assessing personal representatives, see EIM42400
- the treatment of earnings received up to the date of death, see EIM42410.

Where the arising basis applies, there is clearly a tax charge for earnings received after death by the PRs.

Where the remittance basis applies, it is difficult to see how there could be a charge on earnings received in the UK after the death of the employee, since the tax charge only arises on receipt by a relevant person, and there are no relevant persons after the death of an employee.

### 33.37 Earnings from Ireland

In the following discussion:

**“Irish earnings”** means earnings from an Irish resident employer; it is assumed that the conditions for the remittance basis are in principle all met (duties performed outside the UK, etc).

**“Pre-2008 earnings”** means earnings arising before 6 April 2008.

The UK/Ireland DTA also needs to be considered but it is not discussed here.

Similar points arise in relation to RFI; see 16.22 (RFI from Ireland).

#### 33.37.1 *Earnings from 2008/09*

The position for earnings from 2008/09 is straightforward. The ITA remittance basis treats Irish earnings in the same way as any other foreign earnings. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish earnings were taxed on an arising basis.

#### 33.37.2 *Pre-2008 earnings*

This change raised the problem of transition. Para 82 sch 7 FA 2008 provides:

(1) This paragraph applies in relation to an individual’s general earnings for the tax year 2007–08 or any earlier tax year (“the relevant tax year”) if the individual—

- (a) was UK resident in that year, but
- (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year...

(3) In relation to the general earnings, the definition of “foreign employer” in section 721(1) of ITEPA 2003 has effect as if at the end there were inserted “and not resident in the Republic of Ireland”.

Amended as para 82(3) directs, s.721(1) ITEPA provides:

“foreign employer” means an individual, partnership or body of persons resident outside the UK and not resident in the UK *and not resident in the Republic of Ireland*.

Thus (although this might surprise the residents of Eire) an Irish resident employer was not (for this purpose) a “foreign employer” so pre-2008

Irish earnings were not “chargeable overseas earnings” so the remittance basis does not apply to them. Para 82(3) is simply a roundabout way of disapplying the remittance basis charge for pre-2008 Irish earnings.

EN FB 2008 provides:

395. Subsection (3) ensures that the existing restriction on the application of the remittance basis in the case of employment income from employers resident in the Republic of Ireland continues to apply in relation to the remittance on or after 6 April 2008 of general earnings arising before that date. This will prevent double taxation as the general earnings have already been taxed when they arose.

In short, if:

- (1) Irish earnings arose before 2008/09; and
  - (2) The earnings are remitted on or after 2008/09
- there is no tax charge on remittance.

### 33.37.3 *Why is para 82(3) needed?*

Before 2008, s.721 ITEPA provided:

*“foreign employer” means*

- (a) *in the case of an employee resident in the UK, an individual, partnership or body of persons resident outside the UK and not resident in the UK or the **Republic of Ireland**,*

Under this definition, earnings from an Irish resident employer could not have been chargeable overseas earnings so at first it seems that para 82(3) is not needed. It may be that para 82(3) is otiose; it is inserted by mistaken analogy with para 83(3) (which is needed). However para 82(3) is needed on the assumption that where

- (1) earnings arose before 2008/09 and
- (2) the earnings are remitted from or after 2008/09

the question of whether the earnings qualify as chargeable overseas earnings is to be determined by the legislation as it stands in the year of remittance, and not by the legislation as it stood at the time that the earnings arose.

### 33.37.4 *Pre-2008 Irish earnings: Position pre-2008/09*

As noted above, according to statute, the remittance basis did not apply if the employer was resident in the Republic of Ireland: pre-2008 Irish

earnings were taxable on the arising basis and not the remittance basis. The discrimination against Ireland was contrary to EU law.<sup>87</sup> Under para 82(3) discussed above, pre-2008 Irish source income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish source income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance. But the point will not now often arise.

### 33.38 Termination payments

A termination payment is charged under Part 6 ITEPA. A full discussion would need a long chapter.

Special rules which apply to seafarers are not discussed here.

#### 33.38.1 *Post-employment notice pay*

Certain termination awards (post-employment notice pay) are taken out of s.403, and taxed as general earnings: s.402A-402E ITEPA. I hope to consider this in detail in a future edition.

Expatriate log Q&A provides:

**Question:** The query that I raised yesterday is confirmation of HMRC's views on the period for which PENP general earnings is earned, for the purposes of the ITEPA 2003 sections that assess general earnings. FA (2) 2017 s 5(2) imported the s 402B PENP into the ITEPA 2003 s 7(5) list of amounts treated as general earnings (in sub-para (ca)). In HMRC's view, is the PENP earned for assessment purposes by reference to the period for which it is calculated as set out in the ITEPA 2003 s 402E rules?

As another Forum attendee mentioned, HMRC's views would also be appreciated on the meaning of basic pay in s 402D(1) for PENP calculation in expatriate employee situations (in particular, taxequalised individuals).

**HMRC answer:** PENP is 'for' the year it is received, unless the employment is not held in that year in which case s17 or s30 ITEPA will apply. In practice, this means that PENP will always be 'for' the year of termination.

If the year of termination is a split year, PENP may be within s15 or it may be excluded earnings if it is attributable to the overseas part of the split year. Employers should decide to what extent PENP is attributable

---

87 The point was discussed in the 6th edition of this book para 9.51 and 10.4.2.

to the overseas part of the split year by considering where the employee would have worked during the period of notice, in line with Paragraph 2.6 of the commentary to the OECD model.

For a tax-equalised employee, basic pay will be the total of:

- The net amount of pay stipulated by the employment contract or assignment agreement
- Any gross-ups on basic pay
- Any gross-ups on disregarded amounts (e.g. allowances)<sup>88</sup>

The law in this area is to change next year. HMRC have published a policy paper, “Changes to the treatment of termination payments and post-employment notice pay for Income Tax” (July 2020). In short, the new rule is to be that non-residents are charged to tax and NICs on PENP to the extent that they would have worked in the UK during their notice period.

### 33.38.2 *Charge on termination payments*

In outline, s.401(1) ITEPA provides:

This Chapter [Chapter 3 Part 6, termination payments] applies to payments and other benefits<sup>89</sup> which are received<sup>90</sup> directly or indirectly in consideration or in consequence of, or otherwise in connection with—

- (a) the termination of a person’s employment
  - (b) a change in the duties of a person’s employment, or
  - (c) a change in the earnings from a person’s employment,
- by the person, or the person’s spouse or civil partner, blood relative, dependant or personal representatives.

The charge is on the amount of the benefit: s.403(1) ITEPA provides:

The amount of a payment or benefit to which this Chapter applies counts as employment income of the employee or former employee for the relevant tax year if and to the extent that it exceeds the £30,000 threshold.

---

88 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/897729/HMRC\\_Joint\\_Expatriate-Tax\\_NICs\\_minutes-11-June-2020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expatriate-Tax_NICs_minutes-11-June-2020.pdf)

89 Benefit is defined in s.402 ITEPA (not considered here).

90 Receipt is defined in s.401(3) ITEPA (not considered here).

### 33.38.3 Territorial exemption

Termination payments are categorised as specific employment income rather than general earnings. The consequence is to disapply the usual territorial rules. Instead, s.413(1) ITEPA provides a different territorial exemption:

- (A1) This section applies to a payment or other benefit if—
  - (a) the payment or other benefit is within section 401(1)(a), and the employee or former employee is non-UK resident for the tax year in which the employment terminates, or
  - (b) the payment or other benefit is within section 401(1)(b) or (c).
- (1) This Chapter [Chapter 3 Part 6, termination payments] does not apply if the service of the employee or former employee in the employment in respect of which the payment or other benefit is received included foreign service comprising—
  - (a) three-quarters or more of the whole period of service ending with the date of the termination or change in question, or
  - (b) if the period of service ending with that date exceeded 10 years, the whole of the last 10 years, or
  - (c) if the period of service ending with that date exceeded 20 years, one-half or more of that period, including any 10 of the last 20 years.

The key term is “foreign service”. The definition covers the entire history of the taxation of employment income. Section 413(2) ITEPA provides:

- (2) In subsection (1) “foreign service” means service to which subsection (2A), (3), (4) or (6) applies.
- (2A) This subsection applies to service in or after the tax year 2013-14—
  - (a) to the extent that it consists of duties performed outside the UK in respect of which earnings would not be relevant earnings, or
  - (b) if a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers’ earnings).
- (3) This subsection applies to service in or after the tax year 2003–04 but before the tax year 2013-14 such that—
  - (a) any earnings from the employment would not be relevant earnings, or
  - (b) a deduction equal to the whole amount of the earnings from the

employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers' earnings).

(3ZA) In subsection (2A)(a) “relevant earnings” means earnings for a tax year that are earnings to which section 15 applies and to which that section would apply even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year.

(3A) In subsection (3)(a) “relevant earnings” means—

- (a) for service in or after the tax year 2008–09, earnings—
  - (i) which are for a tax year in which the employee is ordinarily UK resident,
  - (ii) to which section 15 applies, and
  - (iii) to which that section would apply, even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year, and
- (b) for service before the tax year 2008–09, general earnings to which section 15 or 21 as originally enacted applies.

(4) This subsection applies to service before the tax year 2003–04 and after the tax year 1973–74 such that—

- (a) the emoluments from the employment were not chargeable under Case I of Schedule E, or would not have been so chargeable had there been any, or
- (b) a deduction equal to the whole amount of the emoluments from the employment was or would have been allowable under a foreign earnings deduction provision.

(5) In subsection (4) “foreign earnings deduction provision” means—

- (a) paragraph 1 of Schedule 2 to FA 1974,
- (b) paragraph 1 of Schedule 7 to FA 1977, or
- (c) section 192A or 193(1) of ICTA.

(6) This subsection applies to service before the tax year 1974–75 such that tax was not chargeable in respect of the emoluments of the employment—

- (a) in the tax year 1956–57 or later, under Case I of Schedule E, or
- (b) in earlier tax years, under Schedule E,

or it would not have been so chargeable had there been any such emoluments.

A payment satisfying the above conditions can be remitted free of income tax to the UK. It is a moot point why the payment does not give rise to CGT, but in practice HMRC do not take that point.

Section 414 ITEPA provides:

- (1) This section applies if—
  - (za) either—
    - (i) the payment or other benefit is within section 401(1)(a), and the employee or former employee is non-UK resident for the tax year in which the employment terminates, or
    - (ii) the payment or other benefit is within section 401(1)(b) or (c),
  - (a) the service of the employee or former employee in the employment in respect of which the payment or other benefit is received includes foreign service, and
  - (b) section 413(1) does not except the payment or other benefit from the application of this Chapter.
- (2) The taxable person may claim relief in the form of a proportionate reduction of the amount that would otherwise—
  - (a) be treated as earnings by section 402B(1), or
  - (b) count as employment income as a result of section 403.
- (3) The proportion is that which the length of the foreign service bears to the whole length of service in the employment before the date of the termination or change in question.
- (4) A person's entitlement to relief under this section is limited as mentioned in subsection (5) if the person is entitled—
  - (a) to deduct, retain or satisfy income tax out of a payment which the person is liable to make, or
  - (b) to charge any income tax against another person.
- (5) The relief must not reduce the amount of income tax for which the person is liable below the amount the person is entitled so to deduct, retain, satisfy or charge.
- (6) In this section "foreign service" has the same meaning as in section 413(2).

**EIM13680 Section 401 ITEPA 2003: Exceptions: Foreign Service: General [Jan 2020]**

**Section 413 ITEPA 2003**

A payment or other benefit which falls within section 401 ITEPA 2003 is excepted from charge to income tax if a sufficient proportion of the employee's, or former employee's service in the employment in respect of which the payment or other benefit is received counts as 'foreign service'. EIM13690 explains the rules for determining whether the employment included sufficient 'foreign service'. Foreign service has a special meaning for this purpose (see EIM13690).

With effect from 6 April 2018, this exception is no longer available for payments and other benefits that fall within section 401(1)(a) ITEPA 2003, if all of the following criteria are met:

- the employee or former employee is UK resident for the tax year in which the employment terminates (see EIM42800)
- the employment is terminated on or after 6 April 2018
- the payment, or other benefit is received after 13 September 2017

...

EIM13692 explains how to treat termination payments that are no longer excepted from a charge to income tax because the employee, or former employee is UK resident for the tax year in which the employment was terminated.

Where the exception is available, it applies to:

- termination awards not benefiting from the £30,000 threshold and treated as general earnings
- a payment or other benefit which is chargeable to income tax as specific employment income by section 403 ITEPA 2003

In order to determine whether a sufficient proportion of the employee's or former employee's service counts as 'foreign service' it's necessary to obtain the following information:

- the relevant date (this is the date of the termination (or change) in question) and
- the amount of foreign service during the employment down to that relevant date - EIM13690 explains how to do this

**EIM13690 Section 401 ITEPA 2003: Exceptions: 'Foreign Service': Definition** [Jan 2020]

### **Section 413 ITEPA 2003**

EIM13680 explained that a payment or other benefit which falls within section 401 ITEPA 2003 may be fully excepted from a charge to income tax if a sufficient proportion of the employee's service counts as 'foreign service'. Foreign service has a special meaning for this purpose.

### **Meaning of 'foreign service'**

For a payment or other benefit within section 401 ITEPA 2003 to which the exception may apply, it is necessary to establish whether a sufficient proportion of the employee's service counts as 'foreign service'. 'Foreign service' means service to which a), b), c) or d) below apply:

- a) Service in or after the tax year 2013 to 2014 to the extent that it consists of duties performed outside the United Kingdom in respect of which earnings would not be relevant earnings.
- b) Service in or after the tax year 2013 to 2014 if a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 ITEPA 2003 (deductions from seafarers' earnings) (see EIM33000).
- c) Service in or after the tax year 2003 to 2004 but before the tax year 2013 to 2014 such that any earnings from the employment would not be relevant earnings.
- d) Service in or after the tax year 2003 to 2004 but before the tax year 2013 to 2014 such that a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 ITEPA 2003 (deductions from seafarers' earnings) (see EIM33000).

This guidance deals only with the legislation relating to periods of service after 5 April

2003. If service before 6 April 1974 is involved, see EIM13705.

If there is a period of service when there are no earnings from the employment, apply the guidance as if there were.

Up to 5 April 2008, ‘relevant earnings’ means earnings to which section 15 or section 21 ITEPA 2003 as then enacted applies (see EIM40002). So if the earnings fall within any other provision, the period counts as ‘foreign service’.

From 6 April 2008, ‘relevant earnings’ means earnings which are for a tax year in which the employee is ordinarily resident in the UK and to which section 15 ITEPA 2003 applies (see EIM40002). So if any other situation applies to the earnings, the period counts as ‘foreign service’.

Combine the periods within the duration of the employment that count as ‘foreign service’ by applying the definitions above and then give the full exception if any one of the requirements from the table below are met (see example EIM13970).

<b>Total period of service down to the relevant date</b>	<b>Requirement for full exception to be given</b>
All cases of whatever duration	Three-quarters or more of the whole period of service comprises of foreign service.
More than 10 years	The whole of the last 10 years comprises of foreign service.
More than 20 years	One-half or more of the whole period of service (including any 10 of the last 20 years) comprises of foreign service.

For this purpose treat successive employments with different members of the same group of companies as if they were a single continuing employment where the payment takes account of that service, see example EIM13975.

With effect from 6 April 2018, the exception from income tax is no longer available where certain criteria are met. EIM13680 lists these criteria and the circumstances in which the exception is no longer available.

EIM13692 explains how to treat termination payments that are no longer excepted from a charge to income tax for ‘foreign service’ because the employee, or former employee was UK resident for the tax year in which the employment was terminated.

Note: a taxpayer with some foreign service who does not meet the requirements in the table above may be able to claim a foreign service reduction instead, see EIM13700.

#### **EIM13692 Foreign Service: Interaction With PENP [Jan 2020]**

With effect from 6 April 2018, ‘termination awards’ (see EIM13872) are split into 2 elements:

- termination awards not benefiting from the £30,000 threshold and treated as general earnings (see EIM13874)
- termination awards subject to section 403 ITEPA 2003 (see EIM13876)

With effect from 6 April 2018, exception from and reduction of income tax are no longer available where certain criteria are met. EIM13680 and EIM13700 list these criteria and the circumstances in which the exception and reduction are no longer available.

Where the exception from and reduction of income tax for “foreign service” are no longer available because the employee or former employee is UK resident for the tax year in

which the employment was terminated consider the following treatment.

### **Post-employment notice pay (PENP)**

Post-employment notice pay (PENP) is part of the element of the termination award which does not benefit from the £30,000 threshold and which is chargeable to income tax as general earnings for the tax year in which the employment ended. Section 15 ITEPA 2003 applies to general earnings for the tax year in which the employee is resident in the UK (see EIM40101 and RDR1 for further guidance on the application of split year treatment). In the case of a split year, a charge to income tax does not arise if the general earnings are attributable to the overseas part of the split year. Any attribution should be done on a just and reasonable basis.

### **Termination awards subject to section 403 ITEPA 2003**

Termination awards subject to section 403 ITEPA 2003 are chargeable to income tax as specific employment income. The rules in Chapters 4 and 5 of Part 2 ITEPA 2003 don't apply to specific employment income. The amount of the termination award is chargeable to income tax irrespective of the employee, or former employee's residence status. However, in these circumstances it is necessary to consider any double taxation agreement (DTA) provisions in place (see EIM40601 and EIM13695) and the OECD commentary in Article 15 in respect of termination payments as appropriate (see EIM13698). These documents will determine which country has taxing rights over the income and how employers should comply with UK PAYE and foreign withholding tax requirements.

Foreign Service Relief is only available where the employee is non-UK resident for the tax year in which the employment terminates. EIM13877 explains the chargeability of post-employment notice pay for non-UK resident employees.

**EIM13700 Section 401 ITEPA 2003: Foreign Service: Reduction Of Charge** [Jan 2020]

### **Section 414 ITEPA 2003**

EIM13690 explained that if an employee whose service includes 'foreign service' fails to satisfy the conditions for full exception, the employee might still qualify for a reduction in the charge to income tax for payments and other benefits that fall within section 401 ITEPA 2003.

### **Eligibility for reduction**

With effect from 6 April 2018, the same restrictions apply to the availability of this reduction as apply to the full exception for "foreign service" (see EIM13680). A reduction of the charge to income tax is no longer available for payments or other benefits that fall within section 401(1)(a) ITEPA 2003, where all of the following criteria are met:

- the employee, or former employee is UK resident for the tax year in which the employment terminates (see EIM42800)
- the employment is terminated on or after 6 April 2018
- the payment or other benefit is received after 13 September 2017

However, the legislation, which removes the reduction in the circumstances above does not apply if the service of the employee or former employee includes 'foreign seafaring service' (see EIM33101). So, on, or after 6 April 2018, a reduction in the charge to income tax remains available for payments, or benefits received in connection with the

termination of a person's employment if that employment included 'foreign seafaring service'. EIM13685 includes the definition of 'foreign seafaring service'.

If service before 6 April 1974 is involved, see EIM13705.

EIM13702 explains how the reduction applies where the employee or former employee is eligible for the reduction and their employment included 'foreign seafaring service'.

### **Calculation of reduction**

Where an employee or former employee is eligible for the reduction and their employment included 'foreign service' follow the rules below.

The reduction for 'foreign service' applies to both the element of any termination payment that is post-employment notice pay (PENP) (see EIM13874) and the element which is subject to section 403 ITEPA 2003 (see EIM13872).

However, the reduction of each element must be calculated separately (see the examples at EIM13985).

The amount of the reduction in PENP is the amount of PENP multiplied by the length of 'foreign service' and divided by the length of total service before the relevant date (the meaning of relevant date is the same as in EIM13680).

EIM13877 explains the chargeability of post-employment notice pay for non-UK resident employees.

For the element which is subject to section 403 ITEPA 2003, the £30,000 threshold must be deducted before calculating the reduction (see example EIM13980). The excess over the threshold is called the 'amount charged to tax' (in section 414(2) ITEPA 2003 it is called the amount that would otherwise count as employment income).

The amount of the reduction is the 'amount charged to tax' multiplied by the length of 'foreign service' and divided by the length of total service before the relevant date. The result can be deducted from the 'amount charged to tax' if the qualifying conditions are met.

### **Note**

The taxpayer can claim the foreign service reduction by notice in writing at any time up to 4 years from the end of the year of assessment to which the claim relates (for claims made before 2 April 2010 the limit is 5 years after 31 January following the end of the relevant year of assessment).

## **33.39 Relocation expenses**

Section 271(1) ITEPA provides a somewhat limited relief for relocation expenses.

- (1) No liability to income tax in respect of earnings arises by virtue of—
  - (a) the provision of removal benefits to which this section applies, or
  - (b) the payment or reimbursement of removal expenses to which this section applies.

A full discussion of this relief requires a chapter to itself, but one point is relevant here. Section 271(2) ITEPA disapplies the relief for employees taxed on the remittance basis:

Subsection (1) does not apply if (disregarding this section) the earnings are general earnings to which either of the following sections applies—

- (a) section 22 (chargeable overseas earnings for year when remittance basis applies and employee outside section 26), or
- (b) section 26 (foreign earnings for year when remittance basis applies and employee meets section 26A requirement).

However this is relaxed by informal concession:

HMRC were asked to clarify whether or not the exemption for relocation expenses within Section 271 ITEPA 2003 was available against earnings taxed on the remittance basis. HMRC confirmed that the current legislation does not provide for relocation exemption to be available where the remittance basis is claimed. However HMRC were aware of existing practice whereby the relocation exemption was applied before apportionment in respect of non-UK workdays. Although this methodology was not consistent with the existing legislation HMRC were content to allow the practice to continue.<sup>91</sup>

### 33.40 Overseas Crown employment

General earnings from overseas Crown employment subject to UK tax<sup>92</sup> are taxed on an arising basis, regardless of residence, domicile and place of work. In the case of UK resident and ordinarily resident employees, such earnings are charged in the normal way under s.15 ITEPA and excluded from the remittance basis because the Crown is not a foreign employer. In the case of a UK resident employee, the earnings are charged in the normal way under s.15 and excluded from OWR by s.26(1)(b) ITEPA.<sup>93</sup> In the case of a non-resident employee, the charge is under s.27 ITEPA.<sup>94</sup>

The 1955 Royal Commission Report explains the reason:

International comity does not permit the salary of the servant of one

---

91 Joint Forum on Expatriates Tax and NICs Note of Meeting (September 2008)  
<http://webarchive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/consultation/s/expat-mins-180908.htm>

92 The expression “general earnings from overseas Crown employment subject to UK tax” is defined in s.28 ITEPA.

93 See 33.22 (Overseas workday relief).

94 See 33.29 (Non-resident employee).

State to be taxed by another State: consequently a Crown servant, even if spending his whole time on work abroad, is not amenable to the local taxing jurisdiction and, if he is to be taxed at all, must be taxed by the UK taxing authority. No doubt the scale of remuneration for Crown servants abroad is fixed with these considerations in mind.<sup>95</sup>

### 33.40.1 *Low paid crown employee*

The EI Manual provides:

**EIM40209: text of Board’s Order under section 28(5)** [Nov 2019]  
 ... On 19th June 2003 the Commissioners of Inland Revenue made an Order (“the 19th June Order”) in exercise of the powers conferred upon them by section 28(5) of the Income Tax (Earnings and Pensions) Act 2003 (“the Act”).

The Commissioners for Her Majesty’s Revenue and Customs now make this revised Order in exercise of the powers conferred upon them by section 28(5) of the Act.

**Interpretation**

In this Order

“General earnings” has the same meaning as in Section 7(3) of the Act.  
 “Overseas Crown employment” has the same meaning as in Section 28 of the Act.

**General earnings excepted from the operation of section 27(2) Income Tax (Earnings and Pensions) Act 2003**

General Earnings from overseas Crown employment in respect of an employee who-

- a. is not resident in the United Kingdom;
  - b. was engaged outside the United Kingdom; and
  - c. is employed in a grade the maximum rate of pay of which is less than the maximum rate of pay of a senior executive officer (or equivalent) employed in the same department of the United Kingdom Civil Service and working in inner London,
- is excepted from the operation of Section 27(2) of the Act.”

Amendments made to the 19th June Order by the Commissioners for Her Majesty’s Revenue and Customs on 13th June 2006 and 26th March 2008 under section 28(5) of the Act continue to have effect so that paragraph 2 of this Order shall not apply to:

- a. Queen’s Gurkha Officers or any other members of the Brigade of

---

95 Cmd 9474 para 307.

Gurkhas who were recruited for that Brigade in Nepal; and  
b. Members of the Royal Gibraltar Regiment.

### **33.41 Seafarers**

The rules relating to seafarers and duties performed on vessels and aircraft are not considered here; see s.39(3), s.40, s.372 and Chapter 6 Part 5 ITEPA.

### **33.42 Lower-paid employee exemption**

BN55 (22 April 2009) provides:

#### Individuals with small amounts of foreign employment income

5. Individuals employed in the UK are currently required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. This is the case even where there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.

6. This obligation to file a return will be removed with effect from 6 April 2008 where such individuals have overseas employment income of less than £10,000 and overseas bank interest of less than £100 in any tax year, all of which is subject to a foreign tax.

EN FB 2009 provides:

11. This clause introduces a new income tax exemption for low-income employees working in the UK who meet certain conditions. Such individuals will typically be migrant workers employed in seasonal work in the agricultural or service sectors in UK and in other countries in the same tax year and whose overseas income is subject to tax where it is earned. Previously they were required to file a Self Assessment tax return, even in situations where there was no, or very little, tax to pay. This exemption removes that requirement in most cases.

According, s.828A ITA provides:

This Chapter provides for an exemption from liability to income tax for an individual for a tax year if-

- (a) the individual is UK resident in the tax year but not domiciled in the UK in the tax year,
- (b) section 809B does not apply to the individual for the tax year, and

(c) conditions A to F in section 828B are met.

I refer to these conditions as “**LPE conditions A to F**”.

Section 809B will only apply if the individual makes a claim under s.809B, which where the LPE conditions are satisfied will never happen, so the important requirements are the LPE conditions.

### 33.42.1 *LPE cond. A: UK employment*

Section 828B(1) ITA provides:

Condition A is that in the tax year the individual has income from an employment the duties of which are performed wholly or partly in the UK.

Section 828D ITA defines “employment”:

- (1) This section applies for the purposes of this Chapter.
- (2) “Employed” and “employment” have the same meaning as in the employment income Parts of ITEPA 2003<sup>96</sup>: see Chapter 1 of Part 2 of that Act.

If these were income-tax wide definitions it would not be necessary to say this here.

### 33.42.2 *LPE cond. B: Cap on RFE*

Section 828B(2) ITA provides:

Condition B is that, if the individual’s income for the tax year consists of or includes relevant foreign earnings—

- (a) the amount of the relevant foreign earnings does not exceed £10,000, and
- (b) all of that amount is subject to a foreign tax.

Section 828D(5) defines “relevant foreign earnings”:

“Relevant foreign earnings”, in relation to an individual, means what would be the individual’s relevant foreign earnings for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(3)).

---

<sup>96</sup> Parts 2-7A ITEPA; see 33.2 (Employment income Parts).

Section 828D(4) ITA defines “foreign tax”:

“Foreign tax” means any tax chargeable under the law of a territory outside the UK.

See 104.14 (“Subject to tax”).

The £10k limit for relevant foreign earnings applies for the full year and is not affected by split year treatment. So an individual who has already earned more than £10,000 abroad in the UK tax year before he or she arrived is not eligible.

The £10k limit has not changed since 2008.<sup>97</sup>

### 33.42.3 *LPE cond. C: Cap on interest*

Section 828B(3) ITA provides:

Condition C is that, if the individual’s income for the tax year consists of or includes income that is relevant foreign income by virtue of section 830(2)(e) of ITTOIA 2005—

- (a) the amount of that income does not exceed £100, and
- (b) all of that amount is subject to a foreign tax.

In order to understand the reference to s.830(2)(e) ITTOIA one needs to read it together with s.830(1):

- (1) In this Act “relevant foreign income” means income which—
  - (a) arises from a source outside the UK, and
  - (b) is chargeable under any of the provisions specified in subsection (2) (or would be so chargeable if section 832 did not apply to it).
- (2) The provisions are ...
  - (e) Chapter 2 of Part 4 (interest)

### 33.42.4 *Cond. D: No other income/gains*

Section 828B(4) ITA provides:

Condition D is that the individual has no other foreign income and

---

<sup>97</sup> See 40.18 (Inflation/fiscal drag).

gains<sup>98</sup> for the tax year.

33.42.5 *Cond. E: Higher rate taxpayer*

Section 828B(5) ITA provides:

Condition E is that the individual would not for the tax year be liable to income tax at a rate other than

- [a] the basic rate,
- [b] the savings basic rate,
- [c] the savings nil rate,
- [d] a Scottish rate below the Scottish basic rate,
- [e] the Scottish basic rate,
- [d] the Scottish intermediate rate or
- [e] the starting rate for savings

if this Chapter did not apply to the individual for the tax year.

33.42.6 *LPE cond. F: No tax return*

Section 828B(6) ITA provides:

Condition F is that the individual does not make a return under section 8 of TMA 1970 for the tax year.

Since a return is due if HMRC choose to require it, the position is that HMRC have a power to withdraw the exemption (by requiring a return). The rule is thus: no tax is due unless HMRC happen to ask for it. This is a new development in tax policy; one hopes it does not become standard. HMRC say:

HMRC sought to clarify the intention behind the new legislation which was to remove the obligation on overseas migrant workers on low incomes to file an SA return in cases where there was little or no tax to pay in the UK. It was true that such individuals would no longer qualify for the tax exemption if they filed a return to claim a tax repayment, but the tax exemption was merely the vehicle for delivering the administrative saving. External delegates failed to understand why the

---

98 Section 828D(3) ITA incorporates the standard commonsense definition of “foreign income and gains”:

““Foreign income and gains”, in relation to an individual, means what would be the individual’s foreign income and gains for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(2)).”

exemption should also be lost if the individual filed not a tax return but an R40 to claim repayment of PAYE on UK income.<sup>99</sup>

In fact, the R40 form is not a tax return under s.8 TMA: *Osborne v Dickinson* [2004] STC (SCD) 104.

The RDR Manual provides:

**RDRM32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income** [Jan 2019]

Individuals employed in the UK are usually required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. However in many cases there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.

From 6 April 2008 there is no obligation for individuals who are resident but not domiciled in the UK for a tax year to file a return as long as the individual is not claiming the remittance basis under ITA07/s809B and meets all of the following conditions (ITA07/s828A).

[The Manual summarises conditions A - F and continues:] If all of these conditions apply, the individual receives an exemption from liability to income tax, in so far as that liability is attributable to the individual's foreign income or gains for the tax year (termed the 'relevant amount'). Broadly, the relevant amount is deducted from what would otherwise be the amount of the individual's liability to income tax for the tax year under ITA07/s23.

This means that the individual is automatically taxed on the Arising Basis for that tax year, and does not have to complete a return.

Most individuals who fulfil Conditions A to F are expected to use the Arising Basis and not complete a return. However there may be a small number of non-domiciled individuals who fulfil these conditions but who wish to use the remittance basis in respect of their foreign income and gains and are within the 'below £2,000 threshold' user group (ITA07/s809D). Such individuals will have to complete a return in order to claim the remittance basis under s809D; this will of course mean that Condition F of ITA07/s828A is no longer met, refer to RDRM32110

---

99 Joint Forum on Expatriates Tax and NICs July 2009

<http://webarchive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/consultation/s/expat-mins-160709.htm>

Unremitted foreign income and gains below £2,000 threshold. ...

### 33.42.7 *The exemption*

Section 828C ITA provides:

(1) The exemption is given by deducting the relevant amount from what would otherwise be the amount of the individual's liability to income tax for the tax year under section 23.

(2) "The relevant amount" is so much of the amount of the individual's liability to income tax as is attributable to the individual's foreign income or gains for the tax year.

I refer to this as the "**Lower-paid employee exemption.**"

### 33.42.8 *Restriction on exemption*

Section 828C ITA provides:

(3) But if for the tax year the individual's total income is reduced by any deductions which fall to be made at Step 3 of the calculation in section 23 from the individual's foreign income or gains for the tax year, subsection (2) has effect as if the individual's foreign income or gains for the tax year were reduced by the amount of the deductions.

(4) And if the individual is entitled under.

(a) sections 2 and 6 of TIOPA 2010(double taxation arrangements: relief by agreement), or

(b) section 18(1)(b) and (2) of that Act (relief for foreign tax where no double taxation arrangements),

to a tax reduction in respect of the individual's foreign income or gains for the tax year, what would otherwise be the relevant amount is reduced by the amount of that reduction.

### 33.42.9 *Administration: Avoid SA return*

HMRC say:

HMRC stressed that, whilst the exemption was not designed for employees on inter-company transfers, it had become clear that the exemption could be applied to certain assignees, in particular those from India and China.

3 The main issue was the difficulty in identifying the relevant individuals. Unless informed that they qualify for filing exemption, HMRC would issue SA returns, thereby preventing them from taking

advantage of s828A. HMRC had designed an election letter for Expats to meet this need: agents should submit this letter at the same time as the 64-8, and after the P46 (Expat) had been filed, which would ensure that no SA return is issued.

This is essential as if a SA return is issued, the relief is lost. For the form of the letter, see Fisher, “Expat Exemption”, *Taxation* 3 March 2011 p.18. HMRC continue:

There was a separate issue with employers using EPM App 6 with a month 12 adjustment to eliminate any residual liability whose employees are required to submit a SA return. However, as some had very simple tax affairs, there was a case for allowing them to use s828A whilst remaining within EPM6. HMRC will seek to engage with such employers to reach a suitable agreement for their employee base. In such cases, the election letter will need to be completed but retained by the employer. If there are individuals who do not qualify, the employer or agent will need to submit an SA1 to request a return.

A similar case existed for NR individuals who submit SA returns to get personal allowances under DTAs.<sup>100</sup>

### 33.42.10 *Critique*

Almost every requirement of the lower-paid employee exemption is anomalous. If the aim is to remove obligations to file a return where there is little or no UK tax at stake, why is it so limited? The provision presumably reflects effective lobbying by special interest groups concerned with lower-paid employees rather than a serious attempt to address compliance cost issues.

### 33.43 **Tax equalisation**

The EIM provides:

**EIM77040. Appendix 4: Not ordinarily resident employees: Tax equalisation** [Nov 2019]

... In addition to salaries and benefits, employers may also provide their employees with the benefit of tax equalisation. This usually means that the employer undertakes to meet on the employee’s behalf any additional tax payable above the tax that the employee

---

100 Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note

<http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/expat-mins-290710.pdf>

would have paid in his home country. It is well established that such payments made on behalf of employees form part of their earnings. But before 2002, there was a difference of view between the then Inland Revenue and a number of accountancy firms about the extent to which such tax equalisation payments represent earnings in respect of duties performed in the UK.

The issue matters for NOR and NR employees: see 33.29 (Non-resident employee).

The view taken by the Inland Revenue and subsequently by HMRC is that tax equalisation payments represent earnings wholly referable to duties performed in the UK where the underlying tax liability is similarly wholly referable to duties performed in the UK. Therefore, where an employer pays a tax liability arising under section 25 on an employee's behalf, that payment will itself represent earnings wholly chargeable under section 25.

This view was approved by a Special Commissioner in 2001 in the case of *Perro v Mansworth* [2001] STC (SCD) 179. The Special Commissioner stated that it was an inescapable fact that the payment of tax by the appellant's employer was an emolument (earnings) in respect of UK duties since that tax was only payable because of the performance of duties in the UK.

Ms Perro's net earnings were time apportioned in accordance with SP5/84 in order to find the net attributable to UK duties as there was no specific attribution of salary or other benefits between UK and overseas duties. Following *Perro*, it has been accepted practice to gross up this net figure on the basis that the payment of tax on UK-based earnings represents additional earnings wholly referable to duties performed in the UK.

The Special Commissioner did not consider the treatment of reimbursement of tax on income other than employment income chargeable under what is now section 25. The employer of a tax-equalised employee may reimburse UK tax on investment income or capital gains. Employers may also pay foreign tax liabilities on the employee's behalf. Following the decision in *Perro*, the Inland Revenue was asked to give its view on the treatment of such reimbursements.

When apportioning earnings between sections 25 and 26, it is necessary first to consider whether those earnings are wholly referable to UK or non-UK duties on the facts. Clearly if this is so, there is no need to consider time apportionment. If the earnings are not wholly referable either to UK or non-UK duties, then time apportionment will be necessary in accordance with SP5/84.

If an employer reimburses personal tax liability arising on non employment income<sup>101</sup> such as bank interest, dividends or capital gains, then the first question is whether that reimbursement is a payment of earnings that relates wholly to either UK or non-UK

---

101 Author's footnote: Employees are likely to claim the remittance basis so the tax charge is only on remitted income and remitted foreign gains. It is not clear that the employer ought to pay the charge on remitted income or gains as remittance is a decision of the employee. However it may be appropriate to do so.

duties. We do not consider that the physical presence of the employee in the UK in order to perform employment duties is sufficient justification for treating such reimbursements as wholly in respect of duties performed in the UK. In the absence of unusual facts, we believe that such earnings should be time apportioned. This will produce net section 25 earnings that will then need to be grossed up. The gross up will be on the basis that the payment of UK tax on earnings within section 25 is itself a payment of earnings wholly chargeable under section 25.

With regard to foreign tax payments, the attribution between sections 25 and 26 will depend upon the facts and circumstances. If the foreign tax relates solely to overseas duties, then the payment of that tax by the employer will comprise earnings wholly referable to duties performed outside the UK that cannot be charged to tax under section 25. Alternatively, the foreign tax may be charged on worldwide income so that time apportionment is likely to provide the only practical mechanism for determining the attribution between sections 25 and 26.

With regard to the treatment of employer payment / reimbursement of tax chargeable under section 26, SP5/84 states that provided the earnings chargeable under section 25 are arrived at in a reasonable manner; HMRC is prepared to accept that a charge under section 26 will arise only where the aggregate of earnings received in the UK exceeds the amount chargeable under section 25 for that year. The amount chargeable under section 26 is therefore restricted to the excess of the aggregate over the amount chargeable under section 25.

Where the employer meets UK tax liability under section 26, the payment of that tax to HMRC will clearly be remitted to the UK. It is logical that the payment of the section 26 liability will itself be a payment of earnings chargeable under section 26 and as the tax payment will be remitted to the UK, the related gross up will also be wholly chargeable under section 26.

There can be significant practical difficulties in identifying whether earnings relate solely to non-UK duties and therefore fall within section 26. In such cases, HMRC would not generally dispute time apportionment between sections 25 and 26 on the basis of working days. If any earnings were allocated solely to section 26 as attributable wholly to non-UK duties, evidence should be available to justify the attribution, in the event of an HMRC enquiry.

### ***Non resident employees***

Some tax-equalised employees are not resident in the UK. They may perform substantive duties of their employment in this country. Unless the specific terms of a Double Taxation Agreement confer an exemption from UK tax on UK source employment income, such employees will be liable under section 27 ITEPA on earnings in respect of duties performed in the UK. Earnings for duties performed outside the UK will fall outside of the charge to UK tax on employment income. HMRC adopts the same approach to tax equalisation for non-resident employees as for those resident but not ordinarily resident employees whose earnings are apportioned between sections 25 and 26.

The following simple examples are intended to illustrate the basic approach to tax equalisation earnings described in this appendix. It is recognised that many cases will have much more complex facts and that the ensuing calculations will be similarly

complex.

**Example (Tanya)**

T has been sent to the UK to work at her employer's UK branch for two years from 1 January 2005. She is resident but not ordinarily resident in the UK from the day of her arrival. In addition to her UK duties, her employer requires her to make regular and extensive visits to an overseas branch of its business in order to monitor an important project. Whilst assigned to the UK, T is subject to her employer's policy on tax equalisation which provides for her to receive the same net salary and benefits as if she had remained in her home state.

During 2005-06, T performed the duties of her employment on 225 days. She spent 158 days working in the UK and 67 days working overseas. Net salary and benefits from her employment were £100,000 of which £60,000 was received in the UK. Her employer was obliged to pay her tax liabilities in accordance with its tax equalisation policy. For simplicity, all calculations assume that T's income is chargeable to UK tax at 40%.

**Scenario 1**

T's only tax liability was incurred in the UK on the earnings from her employment.

**Calculation of UK tax for 2005-06**

Net salary and benefits	100,000
Less amount attributable to overseas workdays – 67/225 (30%)	(30,000)
Attributable to the performance of UK duties	70,000
Gross up for UK tax at 4/6	46,666
UK-based earnings taxable under section 25 ITEPA	116,666
Tax at 40%	46,666
Remitted to the UK - 60,000 plus section 25 tax of 46,666	106,666
Section 26 ITEPA - SP5/84	Nil

**Scenario 2**

Facts as above but T's employer also paid UK tax liability of £5,000 on her investment income. As the £5,000 is not directly referable to the performance of duties inside or outside the UK, it falls to be time apportioned in accordance with SP5/84. Therefore, the £5,000 has been added to net salary and benefits before calculating and deducting the amount attributable to overseas workdays.

**Calculation of UK tax for 2005-06**

Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to UK - 60,000 + s.25 tax 49,000 + other UK tax 5,000	114,000
Section 26 ITEPA - SP5/84	Nil

**Scenario 3**

Additionally, T's employer pays overseas tax liability of £5,000 direct to an overseas tax authority. The overseas tax is referable solely to the performance of duties outside the UK

and is therefore excluded from the section 25 calculation.

**Calculation of UK tax for 2005-06**

Net salary and benefits	110,000
Less overseas tax payment	(5,000)
Salary and benefits to be time apportioned	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to UK - 60,000 + s.25 tax 49,000 + other UK tax 5,000	114,000
Section 26 ITEPA - SP5/84	Nil

**Scenario 4**

Facts are the same as in Scenario 2 except that £70,000 out of the £100,000 net salary and benefits has been remitted to the UK.

**Calculation of UK tax for 2005-06**

Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to UK - 70,000 + s.25 tax 49,000 + other UK tax 5,000	124,000
Net section 26 ITEPA - SP5/84	1,500
Gross up for UK tax at 4/6	1,000
Foreign earnings taxable under section 26	2,500
Total taxable earnings (sections 25 and 26)	125,000
Tax at 40%	50,000

### 33.44 Accountancy services benefit

Joint Forum on Expatriates Tax and NICs records a discussion on tax return preparation fee benefits:

It was made clear that these discussions and any proposals or guidance based on them will relate only to circumstances where:

- due to tax equalisation arrangements, the employer pays for accountancy services relating to the preparation and submission of the individual assignees' Tax Returns
- tax return preparation is part of a wider bundle of services provided by the adviser as negotiated with the employer
- S9A enquiry services are not included as part of the bundle

In such circumstances HMRC accept that the level of benefit in kind should be arrived at by apportionment based on the facts. The mechanics of how the apportionment should be calculated are an operational issue and CPTT had already shared with delegates (within the meeting notes of 30 August 2007) an exchange with Ernst & Young LLP on this topic. CPTT did not have authority to agree fixed round sum figures applicable in all cases. Indeed, it was clear from the evidence submitted that there is no 'one size fits all'. However, CPTT were prepared, in due course, to provide some clarity of the level at which they perceive there to be a risk worthy of enquiry.

The intention therefore would be to:

- establish a level of tax return preparation benefit which if returned or exceeded will not prompt any enquiry
- continue to allow for different figures to be reported based on the available facts
- highlight that where levels of tax return preparation benefits are reported below this level it remains open to HMRC/CPTT to enquire into the precise figures and apportionment methodology to check the accuracy of Returns submitted

CPTT is still analysing the information provided but Martin Dwyer was able to say that the available evidence suggested that a level of around £600 per head would be reflective of a situation where a home and host country Return was completed.

HMRC remain of the view that any accountancy fees paid in respect of S9A enquiry work should be reported as benefits in kind. HMRC will continue to look for evidence of the payment of such fees and their position will be as clarified within the meeting notes of the Forum held on 30 August 2007, as follows:

‘Where we find evidence to indicate that the costs of accountancy services related entirely to resolving the S9A enquiry, we will regard these costs as giving rise to a taxable benefit in kind. If your clients are unable to accept this treatment, we will need to refer an appropriate case to the Commissioners.’

Subsequent to the meeting HMRC has now completed its analysis of the information provided. From this we conclude that the levels of benefits which appear both realistic and reasonable are £650 per head where a home and host country Return is completed and £250 per head where only the host country (UK) Return is completed. Under existing circumstances these figures will represent levels which if returned or exceeded will not prompt an enquiry from CPTT. However, it has been

recently highlighted by external representatives that the proposed levels of analysis necessary to support access to the remittance basis from 6 April 2008 is likely to lead to increases in the costs charged for UK Tax Return preparation where the remittance basis is claimed. If this proves to be the case there would be a need to recognise this and revise the figures for 2008-09 onwards accordingly.

HMRC reiterate that the sums quoted above are not intended to represent an agreed level of benefits which must be reported across the board. We recognise that there is unlikely to be consistency in the precise make up of the bundle of accountancy services provided across different cases and by the variety of advisers involved. Rather, the aim is to indicate a level at which CPTT perceive the level of risk to be worthy of enquiry.<sup>102</sup>

A subsequent meeting of the forum records:

**Q10: Accountancy fees in regard to partially tax-equalised employees**

It is not clear which partially tax-equalised cases are covered by the agreement announced in the 18 September 2008 forum notes. By 'partially tax-equalised' we mean when the employer agrees to tax-equalise part of the employee's income/gains but not the whole. This is very common, often employers will tax equalise only employment income and even then might exclude elements such as share options.

The notes mention 'due to tax equalisation arrangements, the employer pays for accountancy services' which perhaps suggests the precise nature of the equalisation arrangements is not in point. However, Appendix 6 of HMRC's Employment Procedures Manual – 'Modified PAYE' arrangements – says that those arrangements may be applied only to tax-equalised employees and, for that purpose, 'tax-equalised' means that:

'... the employer must equalise liability to UK Income Tax on all general earnings (see note) subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.

Note: Where the employee is tax-equalised on all general earnings but not, for example, on taxable awards of securities options or the award of securities at undervalue (which is specific employment income) the employee may still be included within the arrangement

---

102 Note of Meeting 18 September 2008

<http://webarchive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm>

as long as all the other conditions are satisfied’.

It would seem rather restrictive to take the same approach in relation to accountancy fees as an employee’s tax equalisation computations can be just as (possibly more) complex if only part of the earnings are equalised.

**HMRC Answer:** It is the case that the guidance contained within the Forum meeting notes of 18 September 2008 was intended to relate to ‘fully’ tax equalised cases including those capable of inclusion within an EP Appendix 6 agreement.

Where partial tax equalisation applies it seems to me that the extent to which the accountancy advice directly benefits the individual rather than the employer must increase and I would expect this to be reflected within the level of benefits reported.

As in the case of tax equalised individuals, where HMRC wishes to check the amounts reported we will look at the amounts paid for the basket of services provided and seek to establish those parts of this basket which directly benefit the employer. It should then be possible to calculate a benefit in kind figure by reference to the balance on a per head basis.

...

HMRC were asked to give clarification regarding whether or not the levels of accountancy fees, clarified at the meeting held on 18 September 2008, could be applied in respect of the 2008-09 SA Tax Returns. Martin Dwyer confirmed that these amounts were intended to reflect levels below which HMRC perceive there to be a risk and above which it was unlikely that HMRC would make an enquiry into the matter of accountancy fees relating to Tax Return preparation. They were not intended to represent mandatory levels of benefits which should be included on Tax Returns as HMRC accept that there will be cases where the true level of benefit varies from the figures provided for guidance. Against this background, however, HMRC confirmed that the same guidance could be extended to apply to 2008-09 SA Returns. As was confirmed in the answer to Q10, however, that guidance was intended to relate to fully tax equalised cases, including those capable of inclusion within an EP Appendix 6 agreement. Whilst it was accepted that this would include cases where tax equalisation applied to all employment income other than share based remuneration, the guidance was not intended to apply to circumstances where partial tax equalisation arrangements are in place which can often apply to a small proportion of

the overall compensation package.<sup>103</sup>

The figures have since been increased:

HMRC has .. taken a view to increase the levels for 2014-15 benefits in kind to £275 for one return and £700 for a home and host country return. The next review will be in April 2016.

Members were reminded that the amounts are applied to fully tax equalised employees and are for tax return preparation fees only. Further benefits in kind should be reported where employers also bear the agent's fees for dealing with Section 9A enquires.<sup>104</sup>

## CHAPTER THIRTY FOUR

# TRAVEL EXPENSES: EMPLOYMENT INCOME

### 34.1 Introduction

#### 34.1 Introduction

The deduction of travel expenses matters for two purposes:

- (1) Taxation of employment income, obviously; and also
- (2) Residence: time travelling counts as working if travel expenses are deductible, and time spent working in/out of the UK is important in ascertaining residence.<sup>1</sup>

Thus rules drafted for one purpose have been made to apply to a completely different purpose, for which they are rather less suitable.

The rules are set out in ss.337 - 342 ITEPA.

The development of the law can be traced through a series of consultation papers:

- Employee Travel & Subsistence (May 1996)
- Tax relief for travel expenses: temporary workers and overarching employment contracts<sup>2</sup>

These are now of historical interest only.

OTS have issued two reports<sup>3</sup> and HMRC issued a consultation paper in

---

1 See 5.21.8 (Travel).

2 [http://webarchive.nationalarchives.gov.uk/20080924231230/http://www.hm-treasury.gov.uk/media/F/2/travelexpenses\\_210708.pdf](http://webarchive.nationalarchives.gov.uk/20080924231230/http://www.hm-treasury.gov.uk/media/F/2/travelexpenses_210708.pdf) (July 2008)

3 OTS, "Review of employee benefits and expenses: Interim report" (August 2013) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/227088/ots\\_employee\\_benefits\\_interim\\_report.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/227088/ots_employee_benefits_interim_report.pdf)

OTS, "Review of employee benefits and expenses: final report" (July 2014)

2015, but announced in Budget 2016 that it had decided not to make any changes.<sup>4</sup>

HMRC have issued guidance: Booklet 490 (Employee travel)<sup>5</sup> which I call “**HMRC travel guidance**” and the EI Manual contains almost 100 pages of guidance.

In outline, travel is deductible if the employee’s attendance is necessary. There are two disallowance rules which override the general rule:

- (1) Ordinary commuting
- (2) Private travel

It may be helpful to have a summary:

<i>Journey from/to</i>	<b>Home</b>	<b>Temp workplace</b>	<b>Permanent workplace</b>	<b>Non-workplace</b>
<b>Home</b>		Deductible	Ordinary commuting	Private Travel
<b>Temp workplace</b>	Deductible	Deductible	Deductible	Deductible
<b>Perm workplace</b>	Ord commuting	Deductible	Deductible	Ord commuting
<b>Non-workplace</b>	Private travel	Deductible	Ordinary commuting	Private travel

In this chapter a journey is “**deductible**” if the expenses of travel are deductible from earnings.

I first consider the definitions of workplace, temporary and permanent.

### 34.2 “Workplace”

Section 339(1) ITEPA provides:

In this Part “workplace”, in relation to an employment, means a place at which the employee’s attendance is necessary in the performance of the duties of the employment.

A home may be a workplace, but it does not matter because of the disallowance for ordinary commuting.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/227088/ots\\_employee\\_benefits\\_interim\\_report.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/227088/ots_employee_benefits_interim_report.pdf)

4 HMRC, “Travel and subsistence: discussion paper” (2015)  
<https://www.gov.uk/government/consultations/travel-and-subsistence-framework-discussion-paper/travel-and-subsistence-discussion-paper>  
 HMRC, “Travel and Subsistence Summary of Responses” (March 2016)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/510330/Travel\\_and\\_Subsistence\\_-\\_summary\\_of\\_responses.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510330/Travel_and_Subsistence_-_summary_of_responses.pdf)  
 5 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/321897/490.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/321897/490.pdf)

Workplaces are divided into permanent and temporary.

### 34.2.1 *Necessary attendance*

Necessity comes up twice in the provisions:

- (1) In the definition of workplace: somewhere that “attendance is necessary” in general.
- (2) In the attribution requirement: deductible expenses must be attributable to the employee’s “necessary attendance” at a place.<sup>6</sup>

These rules may overlap but one may apply without the other.

Suppose the employee goes to visit an aunt, not in the performance of their duties, then:

- (1) the aunt’s house is not a workplace; and
- (2) the attribution requirement is not met.

Suppose the employee goes to the office just to meet a friend, then:

- (1) the office is a workplace; but
- (2) the attribution requirement is not met.

Suppose the employee goes from X to office in order to work.

- (1) W is (assume) a permanent workplace and the attribution condition is met.
- (2) However deductibility depends on the status of X: the expense is deductible if X is a temporary workplace but not if it is a home or a non-workplace.

It is therefore best to consider separately the questions:

- (1) whether a place is a workplace
- (2) whether a journey is necessary.

#### **EIM32270 The Necessary Attendance Rule [Nov 2019]**

A workplace is defined by Section 339(1) ITEPA 2003 to mean a place at which the employee’s attendance is necessary in the performance of his or her duties, see EIM32055.

This means that a deduction for the cost of travel to a temporary workplace<sup>7</sup> will only be due where the employee can demonstrate that his or her attendance at that place was necessary on that occasion, in a real

---

<sup>6</sup> See 34.8 (Deduction rule).

<sup>7</sup> Author’s footnote: or indeed any other travel cost.

sense, to perform the duties of that employment.

Usually the position will be straightforward and the requirement of the duties will be identical to the requirements of the employer. However, the strict test for a deduction is that the travel must be dictated by the duties of the employment. A deduction is only due where the travel or the attendance is an objective requirement of those duties, see EIM31647. The personal convenience of the employee, or the employer, is not the factor that determines whether a deduction is due, see example EIM32271. ...

**EIM32271 The Necessary Attendance Rule: Example** [Nov 2019]

A technical writer normally works at his employer's head office. However, to enable him to look after an aunt who is unwell, his employer tells him<sup>8</sup> to work at his aunt's home for a few weeks.

The employee's attendance at his aunt's home is not an objective requirement of the duties of his employment, see EIM32270. Even though he works from his aunt's home it is not a workplace, see EIM32055. ...

That is correct

Therefore, no deduction is due for the cost of travel between his home and his aunt's home.

More analytically, there are two grounds for non-deduction (either of which would suffice): the attribution requirement is not met, and the private travel rule.

**EIM32272 The Necessary Attendance Rule: Example** [Nov 2019]

An employee works for a firm of estate agents that has branches across the West Midlands. She lives in Wolverhampton and works at the branch in Coventry. She has a number of business phone calls to make that can be made at any time during the day. Her employer tells her to stop off at the Birmingham branch on the way to her permanent workplace in Coventry in order to make some of the phone calls.

No deduction is due for the cost of her travel from Wolverhampton to Birmingham. Her ordinary commuting journey does not become a business journey because she stops off at the Birmingham branch. The

---

8 Author's footnote: It seems more likely that the employer would *permit* the employee to work at the aunt's home rather than *instruct* the employee to do so. But the result is the same either way.

Birmingham branch is not a workplace on this occasion because her visit is not an objective requirement of the duties of her employment, see EIM32270.

More analytically, whether or not the Birmingham branch is a workplace, there is no deduction as the attribution requirement is not met.

It is not correct to say that the Birmingham branch is not a workplace “on this occasion.” If it is a workplace as defined, it does not cease to be on the occasion of this visit. We are not told enough to say whether it is a workplace or not.

Similarly, she is not entitled to relief for the cost of her journey from Birmingham to Coventry. Birmingham is not a workplace on this occasion and so the travel to her permanent workplace in Coventry is ordinary commuting, see EIM32055.

More analytically, there are two possibilities:

- (1) The Birmingham branch might be a non-workplace. In that case the Birmingham to Coventry travel is disallowed under the ordinary commuting rule.
- (2) The Birmingham branch might be a workplace, temporary or permanent. In that case the travel is disallowed as substantially ordinary commuting, since Birmingham is more or less on the commuting route from home (Wolverhampton) to the permanent workplace (Coventry).

### 34.3 “Permanent” workplace

Section 339(2) ITEPA provides:

In this Part “permanent workplace”, in relation to an employment, means a place which-

- (a) the employee regularly attends in the performance of the duties of the employment, and
- (b) is not a temporary workplace...

#### 34.3.1 “Regularly”

The EI Manual provides:

**EIM32070 Permanent Workplace: Regular Attendance** [Nov 2019]

An employee regularly attends a particular workplace if the attendance is frequent, or it follows a pattern, or if the place is one at which the

employee usually attends for all or almost all of the period for which he or she holds, or is likely to hold, that employment.

The proportion of an employee's working time spent at a particular workplace is a factor in determining whether or not it is treated as a permanent workplace but it is not the only factor. Even if the employee attends the workplace only on one or two days a week, if it is on a regular basis, the workplace may still be a permanent workplace.

The last sentence is confirmed by *Kirkwood v Evans* where the employee worked four days a week at home, and one day a week in an office. The office was a permanent, not a temporary workplace.

### 34.4 “Temporary” workplace

The rule that travel to a temporary workplace is deductible is sometimes known as temporary workplace relief.

Section 339(3) ITEPA provides:

In subsection (2) “temporary workplace”, in relation to an employment, means a place which the employee attends in the performance of the duties of the employment-

- (a) for the purpose of performing a task of limited duration, or
- (b) for some other temporary purpose.

There are few words more vague than “temporary”.<sup>9</sup> Section 339 restricts the concept specifying that three situations are not a temporary workplace (so they are classified as a permanent workplace). These relate to:

- (1) Base of operations: s.339(4)
- (2) Period of continuous work: s.339(5)
- (3) Area of operations: s.339(8)

The second of these is the most important.

#### 34.4.1 *Temporary purpose*

HMRC understand this quite liberally:

**EIM32150 Attendance For A Temporary Purpose** [Jan 2020]

...An employee may attend a workplace regularly and perform duties there that are not of limited duration without that workplace becoming

---

<sup>9</sup> “Permanent” is also surprisingly flexible; see 8.12.2 (“Permanent”).

a permanent workplace, provided that the purpose of each visit is temporary.

Where a visit is self-contained (that is, arranged for a particular reason rather than as part of a series of visits to the same workplace for the continuation of a particular task) it is likely to be for a temporary purpose.

HMRC give four examples of a temporary purpose:

<b>EIM para</b>	<b>Job title</b>	<b>Frequency of Visit</b>
32151	Safety Officer	Monthly
32152	Finance Director	Monthly
32153	Company Director	Monthly
32154	Teacher	Bi-weekly

**EIM32151 Attendance For A Temporary Purpose: Example** [Nov 2019]

An employee is a safety officer. He regularly visits a particular factory every month to carry out a safety check. His responsibility for that factory has been a duty of his employment for a period already spanning twenty years (so it is not of limited duration). However, the tasks he performs on each visit are self-contained and the purpose of each visit, considered alone, is temporary. So a deduction is due for the full cost of his travel.

He visits the factory regularly for the performance of his duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. His attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So the factory is a temporary workplace.

**EIM32152 Attendance For A Temporary Purpose: Example** [Nov 2019]

An employee is finance director of a large company based in Scunthorpe. Once a month her duties take her to the company’s production unit in the south east. Her visits are to consider individual investment proposals but she takes the opportunity to discuss local welfare issues as a representative of senior management. A deduction is due for the full cost of travel between her home and the production unit.

She visits the production unit regularly for the performance of her duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. Her attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So the

production unit is a temporary workplace.

**EIM32153 Attendance For A Temporary Purpose: Example** [Nov 2019]

An employee lives in Sidcup and has a permanent workplace in Broadstairs. He is a director of a company that has a number of regional offices. He has to attend a directors meeting on the last Friday of each month in Farnham. A deduction is due for the cost of travel between his home and Farnham.

He visits Farnham regularly for the performance of his duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. His attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So Farnham is a temporary workplace.

**EIM32154 Attendance For A Temporary Purpose: Example** [Nov 2019]

An employee is employed as a school teacher in Oswestry, which is a permanent workplace. Every fortnight she goes to an education authority meeting in Bridgnorth. A deduction is due for the full cost of travel between her home and Bridgnorth.

She visits Bridgnorth regularly for the performance of her duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. Her attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So Bridgnorth is a temporary workplace.

### 34.5 Period of continuous work

Section 339(5) ITEPA provides:

A place is not regarded as a temporary workplace if the employee's attendance is-

- (a) in the course of a period of continuous work at that place-
  - (i) lasting more than 24 months, or
  - (ii) comprising all or almost all of the period for which the employee is likely to hold the employment, or
- (b) at a time when it is reasonable to assume that it will be in the course of such a period.

A short term (ie temporary) job can and usually will have a “permanent”

workplace.<sup>10</sup>

Section 339(6) ITEPA provides:

For the purposes of subsection (5), a period is a period of continuous work at a place if over the period the duties of the employment are performed to a significant extent at the place.

The EI Manual provides:

**EIM32080 Limited Duration, The 24 Month Rule** [Nov 2019]

...you should treat duties as performed to a significant extent at any workplace if the employee spends 40% or more of his or her working time at that place. ...

The test is whether the employee has spent, or is likely to spend, 40% or more of his or her working time at that particular workplace over a period that lasts, or is likely to last, more than 24 months. Where that is the case the workplace is not a temporary workplace and so it is a permanent workplace. Travel between that place and home will be ordinary commuting and so is not deductible....

**EIM32081 Temporary Workplace: Example** [Nov 2019]

An employee has worked for 5 years at her employer's head office in Warrington. She is sent by her employer to perform duties at a branch office in Wigan for 18 months. A deduction is available for the full cost of her travel between home and the workplace in Wigan.

Although the period in Wigan is a period of continuous work, because it is 40% or more of her working time (see EIM32080), that period does not exceed 24 months and so Wigan is a temporary workplace.

The next example is a straightforward application of the 24 month rule:

**EIM32082 Temporary Workplace: Example** [Nov 2019]

An employee has worked for his employer for 10 years and is sent to perform full-time duties at a workplace for 28 months. No deduction is due for the cost of travel between his home and that workplace because it is ordinary commuting.

The workplace is capable of being a temporary workplace because his

---

10 This is self-evident but if authority is needed see *Kirkwood v Evans* [2002] STC 231 at [15]: "Commuting to and from work at a temporary job is ... ordinary commuting because the locus in quo is a 'permanent workplace' within [s.339(2)] and not a temporary one."

attendance is for a limited duration, see EIM32075. However, the workplace is excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance is in the course of a period of continuous work (he works there for 40% or more of his working time) and it is known from the outset that it will exceed 24 months. So the workplace is treated as a permanent workplace.

The next examples illustrate the expectation test:

**EIM32083 Temporary Workplace: Example** [Nov 2019]

An employee has worked for her employer for 3 years and is sent to perform full-time duties at a workplace for 28 months, but the posting is unexpectedly ended after 18 months. No deduction is due for the cost of travel between her home and the workplace, because her attendance is expected to exceed 24 months (even though in fact it does not).

The workplace is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. However, the workplace is excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works there for 40% or more of her working time) and it is expected at the outset that it will exceed 24 months. So the workplace is treated as a permanent workplace. The workplace is a permanent workplace even though, as it turned out, her actual attendance does not exceed 24 months.

**EIM32084 Temporary Workplace: Example** [Nov 2019]

An employee has worked for his employer for 3 years. He is sent to perform full-time duties at a workplace for 18 months. After 10 months the posting is extended to 28 months. A deduction is due for the full cost of travel to and from the workplace during the first 10 months but not after that.

The workplace is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. At the outset the workplace is not excluded from being a temporary workplace by the further rule explained in EIM32080. Although his attendance is in the course of a period of continuous work (he works there for 40% or more of his working time) it is not expected at the outset that it will exceed 24 months. So the workplace is a temporary workplace at that time.

After 10 months the expectation changes. The workplace is now excluded from being a temporary workplace by the further rule. His attendance is in the course of a period of continuous work and that period

is expected to exceed 24 months. Therefore after 10 months the workplace becomes a permanent workplace.

In the next example the expectation test cuts both ways:

**EIM32085 Temporary Workplace: Example** [Nov 2019]

An employee has worked for her employer for 7 years and is sent to perform full-time duties at a workplace for 28 months. After 10 months the posting is shortened to 18 months. No deduction is due for the cost of travel to and from the workplace during the first 10 months but a deduction is available for the full cost of travel during the final 8 months. The workplace is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. At the outset the workplace is excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works there for 40% or more of her working time) and it is expected at the outset that it will exceed 24 months. So the workplace is a permanent workplace at that time.

After 10 months the expectation changes. The workplace is no longer excluded from being a temporary workplace by the further rule. Her attendance is still in the course of a period of continuous work but it is no longer expected that the period will exceed 24 months. Therefore after 10 months the workplace becomes a temporary workplace.

In the next example the employee has two workplaces, one temporary and one permanent:

**EIM32086 Temporary Workplace: Example** [Nov 2019]

An employee lives and works in New Brighton where he is employed as an engineer. His employer sends him to work in Wrexham for 1½ days a week for 28 months. For the rest of the week he continues to work in New Brighton. A deduction is due for the full cost of travelling between the employee's home and Wrexham but not for the cost of travelling between his home and the workplace in New Brighton.

New Brighton is and remains a permanent workplace of the employee. He attends it regularly for the performance of the duties of his employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Wrexham is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. Wrexham is not excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance in Wrexham is not in the course of a period

of continuous work because he does not work there for 40% or more of his working time. The 24-month test does not need to be considered. Wrexham is a temporary workplace and the employee is entitled to a deduction for the full cost of travel there and back.

In the next example the employee has two workplaces, both permanent:

**EIM32087 Temporary Workplace: Example** [Nov 2019]

An employee is employed as a food scientist by a manufacturer of ice cream cones. She lives in Porthmadog and works in Dolgellau. Her employer opens a new plant in Llandrindod Wells. She is sent to work there 4 days a week and expects to be there for 30 months. No deduction is due for the cost of travel between her home and Llandrindod Wells, or for travel between her home and Dolgellau.

Dolgellau remains her permanent workplace. She attends it regularly to perform the duties of her employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Llandrindod Wells is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. However, it is excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works there for 40% or more of her working time) and it is known from the outset that it will exceed 24 months. So the workplace is treated as a permanent workplace.

**EIM32088 Temporary Workplace: Example** [Nov 2019]

An employee is employed as a financial adviser working in Brighton. His employer sends him to an office in Bournemouth for one day a week over a 10 month period. He travels to Bournemouth directly from his home in Hastings. A deduction is due for the full cost of his travel between his home and Bournemouth but not for the cost of travel between his home and Brighton.

Brighton remains his permanent workplace. He attends it regularly to perform the duties of his employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Bournemouth is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. Bournemouth is not excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance is not in the course of a period of

continuous work because he does not work there for 40% or more of his working time. The 24 month test does not need to be considered. Bournemouth is a temporary workplace.

In the next example the employee retains a permanent workplace and acquires a temporary workplace:

**EIM32091 Temporary Workplace: Example** [Nov 2019]

An employee is employed as a seal doctor at a zoo on the south coast. She is sent to Morecambe to supervise a seal sanctuary for one day each month. She was originally asked to undertake this task for 5 years. A deduction is due for the cost of travel between her home and Morecambe. The south coast zoo remains her permanent workplace. She attends it regularly to perform the duties of her employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Morecambe is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. Morecambe is not excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is not in the course of a period of continuous work because she does not work there for 40% or more of her working time. The 24 month test does not need to be considered. Morecambe is a temporary workplace.

**EIM32092 Temporary Workplace: Example** [Nov 2019]

An employee lives in Knaresborough and has a part-time employment working two days a week in Harrogate as a telephonist for an insurance company. He is asked to spend one of his two working days covering for a colleague at a branch in Ripon for a period of 32 months. No deduction is due for the cost of travelling between his home and Ripon or between his home and Harrogate.

Harrogate remains his permanent workplace. He attends it regularly to perform the duties of his employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Ripon is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. However, Ripon is excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance is in the course of a period of continuous work (he works there for 40% or more of his working time) and it is known from the outset that the period will exceed 24 months. So Ripon

is treated as a permanent workplace.

This example shows that the percentage of working time at a workplace is determined by reference to the employee's actual working time and not by reference to a notional amount of working time appropriate to a full-time worker.

#### 34.5.1 24 month rule: Evidence

The EI Manual provides:

**EIM32100 The 24 Month Rule: How To Find Out The Expected Period Of Time At A Workplace [Nov 2019]**

Usually it will be clear whether or not an employee expects to spend more than 40% of his or her working time at a particular workplace over a period of 24 months. Where there is some uncertainty you should decide cases on the facts that you can uncover.

An obvious starting point is what the employer has told the employee. Another point to consider may be whether the employee has moved home as a result of the change in workplace. An employee may be less likely to relocate for a posting that is expected to last for less than 24 months and more likely to relocate for one that is expected to last longer. That is not to say that, if someone does move home as a result of a change of workplace, it necessarily means they expect the new workplace to be permanent, or that if they do not move home they necessarily expect the new workplace to be temporary. Moving home is not a test, it is only one factor to be taken into consideration, but it is an important one.

You should look at each case in the round and consider not only any statements made by the employee and the employer, but also the expected duration of any project to which the employee is seconded and any agreements between the parties, whether or not they have been committed to writing. You may wish to look in more detail at any case in which the employee spends more than 24 months at a workplace and we had been told that he or she would not.

In some cases there may have been a change in circumstances that has led to a change in the length of the secondment. The workplace will be a temporary workplace during any time in which the reasonable expectation was that the secondment would be for a period not exceeding 24 months, see EIM32080. Therefore we cannot conclude in all cases that a continuation of the secondment beyond the 24 month limit must mean that the workplace could not have been a temporary workplace at

some stage. ...

### 34.5.2 *Continuous work*

The EI Manual provides:

**EIM32105 The 24 Month Rule: Breaks In Attendance** [Nov 2019]

...A period of continuous work can remain continuous even where there is a break in attendance. This is illustrated by the examples beginning at EIM32106.

In the next example a 1 week break does not affect continuity:

**EIM32107 The 24 Month Rule: Breaks In Attendance: Example** [Nov 2019]

An employee is employed to work full-time on a construction contract that is expected to last for 6 years. Each time he gets close to having worked on the site for nearly two years his employer moves him to another workplace for a week before returning him to the long term project site. No deduction is due for the cost of travel between his home and the long term construction site.

The site is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. However, the site is excluded from being a temporary workplace by the further rule explained in EIM32080. His duties are performed to a significant extent (he works there for 40% or more of his working time) and the period on site is greater than 24 months. So the site is treated as a permanent workplace.

In the next example a 3 month break does not affect continuity:

**EIM32108 The 24 Month Rule: Breaks In Attendance: Example** [Nov 2019]

An employee is employed as a human resources consultant. She works full-time at a client's site for 17 months developing a new staff appraisal system and then deals with unexpected priority work elsewhere for 3 months. She then returns to the client's site for a further 6 months to coordinate the roll-out of the new system, as had been planned from the outset of the project. A deduction is due for the full cost of travel from her home to the client's site for the first 17 months but no deduction is due for travel costs for the further 6 months.

The client's site is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. For the first 17 months the client's site is not prevented from being a temporary

workplace by the further rule explained in EIM32080. Her attendance is in a period of continuous work (she works there for 40% or more of her working time) but it is not expected at the outset that the period will exceed 24 months. So for the first 17 months the client's site is a temporary workplace.

For the further 6 month period the expectation has changed. She now expects to spend 40% or more of her working time at the client's site for a period that exceeds 24 months ( $17 + 3 + 6 = 26$ ). Therefore, for the further 6 months the client's site is treated as a permanent workplace.

### 34.5.3 *Change of temporary/permanent status*

The EI Manual provides:

**EIM32221 workplace ceases to be permanent: example** [Nov 2019]

A full-time bank employee is sent to work for 6 months in a newly opened branch in another town. At the end of that period she accepts a promotion and stays at the new branch.

For the first six months the new branch is a temporary workplace. Her attendance is for a limited duration, see EIM32075. A deduction is due for the full cost of travelling between her home and the new branch. After 6 months the new branch becomes a permanent workplace. Her attendance is not for a limited duration or for a temporary purpose, see EIM32065. A deduction is no longer due for her travel costs.

Two years later she is asked to return to the old branch for 2 months to cover for an absent colleague. The old branch is now a temporary workplace because her attendance is for a limited duration, even though the old branch was a permanent workplace the last time she worked there. Her circumstances have changed and she is entitled to a deduction for the full cost of travelling between her home and the old branch.

## 34.6 **Minor workplace changes**

Section 339(7) ITEPA provides:

An actual or contemplated modification of the place at which duties are performed is to be disregarded for the purposes of subsections (5) and (6) [period of continuous work at a place] if it does not, or would not, have any substantial effect on the employee's journey, or expenses of travelling, to and from the place where they are performed.

The EIM gives a straightforward example:

**EIM32089 Temporary Workplace: Example** [Nov 2019]

A computer consultant is the only employee of a company that she controls. She is a specialist in banking systems. She spends 18 months working full-time at the headquarters of a merchant bank in Lombard Street in the City of London. She then moves next door to design a new computer system for a different bank where she expects to stay working full-time for 22 months. After that assignment she moves to a bank close by on Cheapside for 17 months. The employee expects to work continuously in the City of London albeit on the premises of different banks. Her travel from home to work will be broadly the same every day. No deduction is due for the cost of travel between her home and any of these workplaces.

...Each of these workplaces would be capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. Each workplace taken in isolation would not be excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works at each workplace for 40% or more of her working time) but her time at each workplace taken in isolation does not exceed 24 months. However, when we ignore the change of workplace and consider the length of time spent at the three workplaces as if they were a single workplace, the total time spent does exceed 24 months. Therefore each of these workplaces is a permanent workplace.

**EIM32280 Changes To A Workplace** [Nov 2019]

An employee may change his or her workplace without that change having any substantial effect on his or her journey to work. If a change of workplace does not have any substantial effect on the employee's journey, or the expense of that journey, the change is ignored for the purposes of

- the 24 month rule (see EIM32100) and
- the fixed term appointment rule (see EIM32125).

The two workplaces are treated as a single workplace. So if an employee changes his workplace from Cardiff to Edinburgh that change would be recognised, while if the change is only to the office next door it would not be recognised.

The effect of this rule may be, for example, that two temporary workplaces are treated as a single permanent workplace. There will then be no deduction for the cost of travelling between the employee's home and either workplace because it will be treated as ordinary commuting. Sometimes it may be difficult to decide whether a change of workplace

should be recognised. The basic principle is that a change in the location or the boundaries of a workplace will be recognised as a change of workplace where the change has a substantial effect on:

- the journey an employee has to make to get to work and, in particular,
- the cost of that journey.

In practice you should recognise the change of workplace in all cases except where the change has made no significant difference to the commuting journey.

Where these conditions are met the new location is a new workplace even if it is close to the old workplace. The practical application of this rule is examined in examples EIM32281, EIM32282 and EIM32283.

#### **EIM32281 Changes To A Workplace: Example [Nov 2019]**

An employee is employed on a construction site for a period that is expected to last no longer than 18 months. At the end of that time his employer buys an adjacent plot to extend the site. The employee moves to work on the new plot and is expected to remain there for a further 9 months. His journey to work (and, in particular, its cost) does not change significantly.

The first site is a temporary workplace. His attendance is for a limited duration, see EIM32075. The site is not prevented from being a temporary workplace by the further rule explained in EIM32080. Although he attends it in a period of continuous work (40% or more of his working time), the period is not expected to last more than 24 months. So he can deduct the cost of travel between his home and the first site for that 18 month period.

The second site is not recognised as a new workplace because the change of site has no substantial effect on the employee's journey to work, see EIM32280. The two sites are treated as a single workplace. Although the attendance at that single workplace is for a limited duration the workplace is prevented from being a temporary workplace by the further rule explained in EIM32080. The attendance is in a period of continuous work that is expected to last for more than 24 months ( $18 + 9 = 27$  months).

#### **EIM32282 Changes To A Workplace: Example [Nov 2019]**

An employee works for an employer who has several offices close to each other in London. Her employer rotates staff around the offices every 18 months. She works at one office and is then moved to another. She travels to work on the Underground and, although she now gets off ten

stops further on than previously, her journey is largely unaltered and the price of her ticket does not change.<sup>11</sup>

The new office is not recognised as a new workplace because the change of site has no substantial effect on her journey to work, see EIM32280. Although her attendance at the new office is expected to be for a limited duration it will not be a temporary workplace. Her expected attendance at the single workplace represented by the two offices will be in a period of continuous work that is expected to exceed 24 months, see EIM32080. The new office is a permanent workplace and she cannot deduct the cost of travel between her home and the new office.

**EIM32283 Changes To A Workplace: Example** [Nov 2019]

An employee is employed on a major bridge construction project. To begin with he works on the north shore for a period that is not expected to exceed 16 months. At the end of that period he is transferred to the south shore for a further 16 months. Crossing the river is inconvenient (which is why a new bridge is needed) and it takes him longer to travel to the south shore than it did to travel to the north shore. It also costs him more. The two sites are not far apart as the crow flies and could be described as a single construction site. However the move from one part of the site to another has had a substantial effect on his journey to work. The two sites are separate workplaces and are not treated as the same workplace, see EIM32280. His attendance is for a limited duration and the sites are not prevented from being temporary workplaces by the further rule in EIM32080 because he does not expect to be at either for more than 24 months. So a deduction is due for the full cost of travel between his home and each site.

**EIM32285 Changes To A Workplace: A Change In The Journey With No Change In Cost** [Nov 2019]

The test for a change of workplace has two conditions, see EIM32280. So far we have focussed on a change in the cost of the journey. However, where the journey to the new workplace is significantly different to the journey to the old workplace we can recognise a change of workplace even where the cost of the two journeys is similar. This is illustrated by example EIM32286.

**EIM32286 Changes To A Workplace; A Change In The Journey With No Change In Cost: Example** [Nov 2019]

---

11 Author's footnote: This seems unlikely.

An employee lives near Ludlow. Each day she used to drive 25 miles north to her workplace in Shrewsbury. Her job is moved and she now drives 25 miles south each day to her new workplace in Hereford. Her mode of transport is the same, the time taken is the same and the cost of her journey is the same. However, this is an accidental consequence of where she lives. If she lived elsewhere the change in workplace might have had a substantial effect on the cost of her travel. The location of her new workplace is significantly different from the location of her old and her commuting journey is also significantly different. The new location is a new and different workplace, see EIM32285.

### 34.7 Workplace a base

Section 339(4) ITEPA provides:

A place which the employee regularly attends in the performance of the duties of the employment is treated as a permanent workplace and not a temporary workplace if-

- (a) it forms the base from which those duties are performed, or
- (b) the tasks to be carried out in the performance of those duties are allocated there.

The EIM has a discussion which is not set out here.

### 34.8 Deduction rule

Section 338(1) ITEPA provides:

A deduction from earnings is allowed for travel expenses if-

- (a) the employee is obliged to incur and pay them as holder of the employment, and
- (b) the expenses are attributable to the employee's necessary attendance at any place in the performance of the duties of the employment.

I refer to s.338(1)(b) as the “**attribution requirement.**” The place at which the employees attendance is necessary will *ex hypothesi* be a workplace (as defined). But the relief applies not just to travel to that workplace, but to travel expenses *attributable* to that attendance. That would in principle include travel to the workplace and travel back from the workplace. Suppose an employee in California needs to attend a director's meeting in Peterborough. They may fly to London, and then catch a train to Peterborough the next day. One might say there are two journeys,

California/London and London/Peterborough. But even if that is so, the California/London journey may be deductible on the grounds that the expense is attributable to the attendance at the meeting in Peterborough.

#### 34.8.1 *Necessary attendance on occasion of travel*

The EI Manual provides:

**EIM32270 The Necessary Attendance Rule** [Nov 2019]

...A deduction is only available where the employee **has** to attend a temporary workplace on that particular occasion in order to carry out the duties of the employment, see example EIM32272.

There will be cases where the position is not clear cut. You should closely examine any case where an employee appears to have been sent by his or her employer to a temporary workplace just to get a deduction for travel expenses.

### 34.9 Ordinary commuting

Section 338(2) ITEPA provides:

Subsection (1) does not apply to the expenses of

- [a] ordinary commuting or
- [b] travel between any two places that is for practical purposes substantially ordinary commuting.

Section 338(3) defines ordinary commuting:

In this section “ordinary commuting” means travel between-

- (a) the employee’s home<sup>12</sup> and a permanent workplace, or
- (b) a place that is not a workplace and a permanent workplace.

The disallowance applies even if the home is a workplace.<sup>13</sup>

#### 34.9.1 *Substantially ordinary commuting*

The EI Manual provides:

---

<sup>12</sup> See 5.20 (“Home”).

<sup>13</sup> This is self-evident, but if authority is needed, see *Kirkwood v Evans*: “The fact that his home was also a ‘workplace’ does not prevent it from being his home. [Section 338(3)](a) and (b) are alternatives. They do not both have to be satisfied for the definition of ‘ordinary commuting’ to apply.”

**EIM32300 Journeys Treated As Ordinary Commuting** [Nov 2019]

Sometimes an employee may travel to a temporary workplace without that journey being significantly different from his or her ordinary commuting journey. A journey that is for practical purposes substantially the same as the employee's ordinary commuting journey is treated as if it were also ordinary commuting. Therefore, no deduction is allowed for the journey, see EIM32055.

This is intended as a common sense rule that applies where the journey between home and a temporary workplace is broadly the same as the employee's ordinary commuting journey. In particular, it will deny relief where employees or employers seek to turn an ordinary commuting journey into a business journey to try to get a tax deduction.

Applying this rule will depend on the facts of the particular case and some common cases are illustrated by the examples beginning with example EIM32301. However, you should not try to argue that a journey to or from a temporary workplace is substantially ordinary commuting where the extra distance involved is 10 miles or more each way, see example EIM32306.

A journey to a temporary workplace that takes the employee in a completely different direction to his or her ordinary commuting journey is not substantially ordinary commuting even if the distance is the same. Conversely, a journey that is made in broadly the same direction and is substantially the same length as the ordinary commuting journey is substantially ordinary commuting even if the employee takes a different route. The effect of this rule is illustrated by the examples beginning with example EIM32307.

The EI Manual gives 10 straightforward examples. In summary:

<b>EIM no</b>	<b>Temp/Permanent workplace distance</b>	<b>Special features</b>	<b>Relief</b>
32301	0.3 mile		no
32302	12 miles		yes
32303	15 miles	on route to permanent workplace	yes
32304	1.5 miles	on route to permanent workplace	no
32305	1.5 miles	different mode of transport	no
32306	11 miles beyond permanent workplace	drove past PW on the route	yes
32307	1 mile		no
32308	1 mile	two commuting routes	no
32309	15 miles		yes
32310	0.5 mile	outside normal working hours	no

In the first example the temporary workplace is 450 metres away from the permanent workplace:

**EIM32301 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

A health and safety inspector lives in Leicester and is employed in an office in Nottingham. His office is 500 yards from a bean processing plant that he has to inspect. He travels direct from home to the plant.

Although the plant is a temporary workplace his journey to the plant is substantially the same as his ordinary commuting journey. Therefore his travel is treated as ordinary commuting and the cost is not deductible, see EIM32300.

In the next example the distance is 12 miles further:

**EIM32302 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee lives in Pudsey and works 5 miles away in Leeds as a reprographics manager. One day she is asked to go to Ilkley to stand in for a colleague who is sick and so she travels an extra 12 miles.

Ilkley is a temporary workplace and her journey to Ilkley is very different to her ordinary commuting journey to Leeds. The journey to Ilkley is not substantially ordinary commuting and so she is entitled to a deduction for the cost of the journey, see EIM32300.

In the next example the temporary workplace is on the commuting route but not close to the permanent workplace:

**EIM32303 Journeys Treated As Ordinary Commuting: Example**  
[Mar 2020]

An employee is a production manager. He normally drives to a permanent workplace 18 miles from his home. One day he has to visit a client to discuss in detail the specifications for a new product. The client's office is 3 miles along his ordinary commuting route. After he has seen the client he drives the remaining 15 miles along his ordinary commuting route to his permanent workplace.

The client's office is a temporary workplace. The 3-mile journey to that workplace is on the same route as the employee's ordinary commuting journey but it is much shorter. So it is not substantially ordinary commuting, see EIM32300. The cost of the remaining 15-mile journey from the client's office to the employee's permanent workplace is also

deductible as he is travelling between 2 workplaces, see EIM32360. The employee is entitled to mileage allowance relief for the full 18-mile journey, see EIM31330.

This example can usefully be contrasted with example EIM32304.

In the next example the temporary workplace is on the commuting route and close to the permanent workplace:

**EIM32304 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee is a housing officer who normally drives to a permanent workplace 4½ miles from her home. One day she has to visit a client who lives 3 miles along her ordinary commuting route. After seeing the client she drives the remaining 1½ miles along her ordinary commuting route to her permanent workplace.

Her client's home is a temporary workplace. The journey to that workplace is along the same route as her ordinary commuting journey and is substantially the same length. So it is substantially ordinary commuting, see EIM32300. No deduction is due for the cost of the journey.

This example can usefully be contrasted with example EIM32303. Although the two visits to clients are journeys of a similar length the outcome is different. The journeys have to be considered by reference to the ordinary commuting journey and cannot be considered in isolation.

The next example the temporary workplace is 1.5 miles from the permanent workplace:

**EIM32305 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee is a teacher who normally travels the 15 miles to his school by moped. One day he has to visit a parent of one of his pupils to discuss the child's end of term report. The parent lives 1½ miles beyond the school. To save time he takes his car and drives along his ordinary commuting route, past the school and on to the parent's home. After his discussion with the parent he drives the 1½ miles back to school.

The parent's home is a temporary workplace. The journey from home to the parent's home is along the same route as the employee's ordinary commuting journey and is substantially the same length. So it is substantially ordinary commuting, see EIM32300. No deduction is due for the cost of the journey.

The fact that the employee uses a different mode of transport from normal does not effect the outcome. Regardless of the mode of transport this is substantially ordinary commuting.

In the next example the distance is 11 miles:

**EIM32306 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee is a human resources manager who normally drives 9 miles to the office that is her permanent workplace. One day she has to visit a factory to discuss possible redundancies. The factory is 11 miles beyond her office. She drives the 20 miles to the factory along her ordinary commuting route and past her permanent workplace.

The factory is a temporary workplace. The journey from home to the factory is along the same route as her ordinary commuting journey but is substantially longer. So it is not substantially ordinary commuting. She is entitled to mileage allowance relief for the whole journey.

This example illustrates the practice of not treating a journey from home to a temporary workplace as ordinary commuting where the extra distance is 10 miles or more each way, see EIM32300.

In the next example the distance is one mile:

**EIM32307 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee is a customer support manager for a computer company. He normally drives the 9 miles to his permanent workplace. One day he has to visit a client to sort out some problems with a computer. The client's premises are only a mile from his permanent workplace. His journey to the client is the same length as his ordinary commuting journey and is in almost exactly the same direction, although he does not follow exactly the same route.

The client's premises are a temporary workplace. The employee's journey to the client is in almost exactly the same direction as his ordinary commuting journey and it is the same length. So it is substantially ordinary commuting, see EIM32300. No deduction is due for the cost of his travel.

In the next example the employee uses two commutes:

**EIM32308 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee is a clerk in an insurance company. She works flexi-time and normally drives to the office that is her permanent workplace. The route she takes depends on what time she leaves the house. If she leaves before 8am she drives 8 miles along the A road. If she leaves later she drives 10 miles along the B road and drops her daughter off at school on the way. One day she has an early morning meeting with clients at their office which is 9 miles along the B road from her home. The early start means she cannot take her daughter to school.

The client's office is a temporary workplace. The employee's journey from home to the client's office is along the same route as one of her ordinary commuting journeys and is substantially the same length. It is therefore substantially ordinary commuting, see EIM32300. No deduction is due for the cost of the journey.

The fact that she has more than one commuting journey and that the journey to the client's office does not follow the route that she would take at that time is irrelevant. The journey is substantially an ordinary commuting journey.

In the next example the distance is 15 miles

**EIM32309 Journeys Treated As Ordinary Commuting: Example**  
[Mar 2020]

An employee is a senior executive in a publishing company. He normally drives 5 miles north from his home to the office that is his permanent workplace. One day he has to visit a client to discuss proposals for a new magazine. The client's office is 5 miles south of his home. After the meeting he drives 10 miles to his permanent workplace.

The client's office is a temporary workplace. The 5-mile journey from home to the client's office is the same length as the employee's ordinary commuting journey but is in a completely different direction. So it is not substantially ordinary commuting, see EIM32300. He is entitled to mileage allowance relief for that journey. The cost of his 10-mile journey from the client's office direct to his permanent workplace is also deductible because it is a journey between 2 workplaces, see EIM32360. The employee is entitled to mileage allowance relief on the full 15-mile journey, see EIM31330.

**EIM32310 Journeys Treated As Ordinary Commuting: Example**  
[Nov 2019]

An employee is an accountant. She normally works from Monday to Friday and drives the 20 miles to the office that is her permanent

workplace. She needs to see a client who lives ½ mile away from her office. The client can only find time to discuss his accounts at the weekend. So one Saturday she drives to the client’s home, travelling 19½ miles along her ordinary commuting route. After she has seen the client she carries on to her office to catch up on some paperwork.

The client’s home is a temporary workplace. The journey to the client’s home is along the employee’s ordinary commuting route and is substantially the same length. So it is ordinary commuting, see EIM32300. No deduction is due for the cost of the travel.

This example is a reminder that a journey can be ordinary commuting, or substantially ordinary commuting, even if it is made outside the employee’s normal working hours, see EIM32240.

### 34.10 Private travel

Section 338(4) ITEPA provides:

Subsection (1) does not apply to the expenses of

- [a] private travel or
- [b] travel between any two places that is for practical purposes substantially private travel.

Section 338(5) ITEPA defines private travel:

In subsection (4) “private travel” means travel between-

- (a) the employee’s home<sup>14</sup> and a place that is not a workplace, or
- (b) two places neither of which is a workplace.

Para (a) is only needed where the home is a workplace.

Travel between a non-home and a workplace is not private travel, but it may be substantially private travel.

#### 34.10.1 *Substantially private travel*

The EI Manual provides:

**EIM32320 Journeys Treated As Private Travel [Nov 2019]**

... Substantially private travel means journeys where the business purpose of the journey is merely incidental to some private purpose, or the journey is made substantially for private purposes rather than business purposes. ...

---

14 See 5.20 (“Home”).

This adopts a purpose test, which is not the statutory test, but perhaps it is a reasonable way of approaching it, and in practice it should lead to the same result.

The EIM sets out some (apparently) straightforward examples of journeys with/without a main business purpose:

**EIM32321 Journeys Treated As Private Travel: Example** [Nov 2019]

An employee is harbour master at Larne. One day he travels to Belfast to visit his elderly mother but while he is there he calls in at a colleague's office to deliver some new charts of the Irish Sea.

The purpose of the visit to Belfast was private and the trip to his colleague's office was merely incidental. So the journey is private travel, see EIM32320. No deduction is due for the cost of the journey.

More analytically, the journey was substantially home to Belfast (non-workplace); and so substantially private travel.

**EIM32322 Journeys Treated As Private Travel: Example** [Nov 2019]

An employee works in a dry cleaners in Carlisle. Her employer sends her to the Darlington branch to repair a machine that has been damaging clothes. While there she visits her ex-husband to discuss maintenance arrangements. She spends a longer time dealing with her private affairs than in fixing the machine.

Her main purpose in going to Darlington was to fix the machine. The discussion with her ex-husband was time consuming but was merely incidental to her business travel. So this is not substantially private travel, see EIM32320. She can deduct the cost of travel between her home and Darlington.<sup>15</sup>

---

<sup>15</sup> There is another similar example, which does not add anything:

“EIM32324 Journeys Treated As Private Travel: Example [Nov 2019]

An employee lives and works in Norwich, where he is an administrator for a manufacturing company. His sister lives in Peterborough and he visits her there in February. Two months later he has to return to Peterborough to attend a meeting of the company's focus group. The meeting takes all day and he visits his sister for 2 hours in the evening.

His main purpose in visiting Peterborough is to attend the focus group meeting. The visit to his sister on the same day is merely incidental to that business purpose. So the visit is not substantially private travel, see EIM32320. He can deduct the cost of his travel. It does not matter that he made the same journey for a private reason in February. That earlier journey was private travel but it does not follow that all travel

More analytically, the journey was substantially Carlisle (home or maybe non-workplace) to Darlington (non-workplace); and so substantially private travel.

The second example is made easier as it identified the main purpose. But who is to say whether the main purpose was the ex-husband or the machine? The EI Manual acknowledges the problem:

**EIM32320 Journeys Treated As Private Travel** [Nov 2019]

... You should not use this rule to deny a deduction where comparatively small sums and short distances are involved, see example EIM32325. It is sometimes not straightforward to identify journeys that are substantially private travel. It is easy enough to identify journeys that are substantially ordinary commuting because you can compare the journey to the ordinary commuting journey, see EIM32300. You do not have the same point of comparison to identify substantially private travel. As a result you may need to ask an employee about the purpose of particular journeys. Such enquiries need to be handled sensitively.

In the HMRC view:

- (1) whether travel is substantially ordinary commuting depends on the geographical difference between the actual travel and the ordinary commute.
- (2) whether travel is substantially private travel depends on identifying the main (substantial) purpose of the travel.

The first example involves a (relatively) short business extension or detour to a long private journey (US - home):

**EIM32323 Journeys Treated As Private Travel: Example** [Nov 2019]

An employee lives in Banbury and is employed as a systems analyst at an office in Aylesbury. He has a 3 week holiday in the USA. At the end of the holiday he flies back from New York to Heathrow. Instead of going home he drives direct from Heathrow to visit a client in Warwick who needs to see him urgently. The total cost of the journey from New York to Warwick is £2,500.<sup>16</sup>

Although the employee had to visit his client, the reason for the greatest

---

by him to Peterborough must be private travel.”

16 Author’s footnote: Presumably this employee travelled first class. The point of the figure is that it is not the “small sum” where can be disregarded.

part of the journey, and for its cost, was private, his return from holiday. His journey was substantially private travel, see EIM32320. No deduction is due for the £2,500 that the travel cost.

More analytically, the journey was substantially New York (non-work) to Banbury (home); and so substantially private travel. Another way to reach the same conclusion would be to rely on the attribution requirement, and say that the expense is not attributable to the work, it is attributable to the holiday. The concept of attribution is flexible enough to reach the intuitively right result. But it is not necessary for HMRC to rely on that point.

**EIM32325 Journeys Treated As Private Travel: Example** [Nov 2019]

An employee lives in Cannock and has a permanent workplace in West Bromwich. One weekend she visits her grandmother in Lichfield. On Monday morning she drives from Lichfield direct to visit a client in Stafford.

Although the employee began her journey from Lichfield for personal reasons, and her journey is 6 miles longer than it would otherwise have been, the journey is primarily made for a business reason. So it is not substantially private travel, see EIM32320. She is entitled to mileage allowance relief for that journey, see EIM31626.

This example shows that you should not use the rule against substantially private travel to deny a deduction where small sums and small distances are involved.

More analytically, the journey was Lichfield (non-workplace) to Stafford (workplace); it was not substantially Cannock (home) to Stafford (which would be substantially private travel).

### 34.11 What is the journey?

In order to apply the ordinary commuting and private travel rules, one has to identify the journey.

**EIM32230 Passing Work On The Way To Somewhere Else** [Nov 2019]

An employee may pass a permanent workplace on the way to or from a temporary workplace. If the employee stops and performs substantive duties at the permanent workplace then there are two journeys; ordinary commuting between home and the permanent workplace and a business journey between the permanent workplace and the temporary workplace.

A deduction will be due under Section 337 ITEPA 2003 for the cost of the second of these journeys, but there is no deduction for the first.

If the employee does not stop at the permanent workplace, or any stop is incidental to the journey to the temporary workplace, the whole of the journey is a single journey. A deduction will be due under Section 338 ITEPA 2003, because the single journey is to a temporary workplace, unless the journey is substantially ordinary commuting, see EIM32300. See also example EIM32231.

**EIM32231 Passing Work On The Way To Somewhere Else: Example** [Nov 2019]

An employee drives each day between his home in Southampton and his office in Winchester. One day he has to travel on business to Birmingham. He travels directly from home to Birmingham but stops off at his office to collect some papers.

His stop in Winchester is incidental to his business journey to Birmingham. Therefore the whole of the travel between Southampton and Birmingham is treated as a single journey to a temporary workplace, see EIM32075. A deduction is available for mileage allowance relief, see EIM31626.

### 34.12 Workplace an area

Section 339(8) ITEPA provides:

An employee is treated as having a permanent workplace consisting of an area if-

- (a) the duties of the employment are defined by reference to an area (whether or not they also require attendance at places outside it),
- (b) in the performance of those duties the employee attends different places within the area,
- (c) none of the places the employee attends in the performance of those duties is a permanent workplace, and
- (d) the area would be a permanent workplace if subsections (2), (3), (5), (6) and (7) referred to the area where they refer to a place.

Amended as s.339(8)(d) directs, s.339 provides:

(2) In this Part “permanent workplace”, in relation to an employment, means ~~a place~~ *the area* which—

- (a) the employee regularly attends in the performance of the duties of the employment, and
- (b) is not a temporary workplace.

This is subject to subsections (4) and (8).

(3) In subsection (2) “temporary workplace”, in relation to an employment, means ~~a place~~ *the area* which the employee attends in the performance of the duties of the employment—

- (a) for the purpose of performing a task of limited duration, or
- (b) for some other temporary purpose.

This is subject to subsections (4) and (5).

(4) ~~A place~~ *The area* which the employee regularly attends in the performance of the duties of the employment is treated as a permanent workplace and not a temporary workplace if—

- (a) it forms the base from which those duties are performed, or
- (b) the tasks to be carried out in the performance of those duties are allocated there.

(5) ~~A place~~ *The area* is not regarded as a temporary workplace if the employee’s attendance is—

- (a) in the course of a period of continuous work at that ~~place~~ *area*—
  - (i) lasting more than 24 months, or
  - (ii) comprising all or almost all of the period for which the employee is likely to hold the employment, or
- (b) at a time when it is reasonable to assume that it will be in the course of such a period.

(6) For the purposes of subsection (5), a period is a period of continuous work at ~~a place~~ *the area* if over the period the duties of the employment are performed to a significant extent at the ~~place~~ *area*.

(7) An actual or contemplated modification of the ~~place~~ *area* at which duties are performed is to be disregarded for the purposes of subsections (5) and (6) if it does not, or would not, have any substantial effect on the employee’s journey, or expenses of travelling, to and from the ~~place~~ *area* where they are performed.

The EIM has a discussion which is not set out here.

### 34.13 Remittance basis taxpayer

Section 335 ITEPA provides:

- (1) The availability of certain deductions under this Chapter depends on whether the earnings are earnings charged on receipt or earnings charged on remittance.
- (2) Sections 336 to 342-
  - (a) only apply if the earnings from which the deduction is to be made are earnings charged on receipt, and

- (b) apply subject to section 354(1) if the earnings from the employment also include other earnings.
- (3) Section 353 (which provides for a deduction for expenses of the kind to which sections 336 to 342 apply)-
  - (a) only applies if the earnings from which the deduction is to be made are earnings charged on remittance, and
  - (b) applies subject to section 354(2) if the earnings from the employment also include other earnings.
- (4) In this Part-
  - “earnings charged on receipt” means earnings which are taxable earnings under section 15 or 27, and
  - “earnings charged on remittance” means earnings which are taxable earnings under section 22 or 26.

That takes us to s.354 ITEPA which provides:

- (1) If the earnings from an employment for a tax year include both earnings charged on receipt and other earnings (except earnings charged under section 22), no deduction is allowed under sections 336 to 342 from the earnings charged on receipt for an amount paid in respect of duties of the employment to which the other earnings relate.
- (2) If the earnings from an employment for a tax year include both earnings charged on remittance under section 26 and other earnings, no deduction is allowed under section 353 from the earnings charged on remittance for an amount paid in respect of duties of the employment to which the other earnings relate.
- (3) This section is to be disregarded for the purposes of the deductibility provisions.

### 34.14 Travel in performance of duties

Section 337(1) ITEPA provides:

- A deduction from earnings is allowed for travel expenses if-
- (a) the employee is obliged to incur and pay them as holder of the employment, and
  - (b) the expenses are necessarily incurred on travelling in the performance of the duties of the employment.

This is very narrow.

**EIM32171 Employees Who Work At Home: Example** [Nov 2019]  
An employee is employed to train animals to help disabled people. It is

essential that these animals are familiar with a normal domestic environment and so most of the training takes place in his home. It is an objective requirement of his employment that his duties are carried out at his home.

The employee's home is a workplace. A deduction is due for the cost of travel between his home and other workplaces that he attends to carry out the duties of his employment. A deduction is due whether those other workplaces are permanent or temporary workplaces, see EIM32170.

**EIM32172 Employees Who Work At Home: Example** [Nov 2019]

An employee's duties are such that she often has to work late into the evenings. At such times she has no access to her employer's premises (her permanent workplace) and so she takes work home with her. It is nonetheless still a matter of personal choice where the work is done (it is not an objective requirement that it be done at home rather than elsewhere).

Her home is not a workplace. No deduction is due for the cost of travel between her home and her employer's premises because that is a permanent workplace. A deduction will be due for the cost of travel between her home and any workplace that is a temporary workplace, see EIM32170.

**EIM32173 Employees Who Work At Home: Example** [Nov 2019]

An employee works in his employer's office for 4 days every week but the requirements of the job dictate that he must work at home every Friday. It is accepted that his home is a workplace on Friday, see EIM32170.

His travel from home to his employer's office on Monday to Thursday is ordinary commuting because those premises are a permanent workplace, see EIM32065. His travel costs on those days are not deductible.

If he is unexpectedly required to visit the employer's premises on Friday to carry out the duties of his employment his travel costs are deductible under Section 337 ITEPA 2003. On that day he is travelling between two workplaces, see EIM32360.

**EIM32351 Introduction** [Nov 2019]

Section 337 ITEPA 2003 permits relief for travelling expenses necessarily incurred in travelling in the performance of the duties of the employment.

This was the original rule for employee travel expenses and was the only

rule under which expenses could be deducted before 6 April 1998. It is a very restrictive rule because it is limited to travel that is carried out in the course of performing the duties of the employment, see EIM31650. The extension of the rules for employee travel expenses from 6 April 1998 to include travel to temporary workplaces, see EIM32005, means that this rule is now only relevant to:

- travel between workplaces, see EIM32360 and
- travelling appointments, see EIM32366, and
- travel between home and work where
  - home is a workplace (see EIM32760), and
  - the place where the employee lives is dictated by the requirements of the job (see EIM32370).

### **EIM32356 Home To Work Travel** [Nov 2019]

The Courts have established as a clear general principle that the cost of travelling from an employee's home to his or her normal place of work is not travel in the performance of the duties, see EIM31650. The expense merely puts the employee into a position to perform his or her duties.

The cases that have established this principle are:

<i>Cook v Knott</i>	2 TC 246
<i>Revell v Directors of Elworthy Bros &amp; Co Ltd</i>	3 TC 12
<i>Andrews v Astley</i>	8 TC589
<i>Ricketts v Colquhoun</i>	10 TC 118, see EIM31641
<i>Nolder v Walters</i>	15 TC 380
<i>Burton v Rednall</i>	35 TC 435
<i>Parikh v Sleeman</i>	63 TC 75, see EIM32360
<i>Miners v Atkinson</i>	68 TC 629, see EIM32380
<i>Kirkwood v Evans</i>	74 TC 481, see EIM32374

The only exceptions to this rule are:

- travel from home to a temporary workplace, see EIM32000
- where the employee has a travelling appointment, see EIM32366
- where the employee's home is a place of work and the place where the employee lives is dictated by the requirements of the job, see EIM32370
- where the duties of the employment are carried out wholly or partly outside the UK, see EIM34020
- where a non-domiciled employee is working in the UK, see EIM35030
- emergency call-outs see EIM32386.

**EIM32360 Between Places Of Work** [Nov 2019]

Where an employee is required to travel between two places of work, in the same employment, in order to carry out the duties of that employment, the cost of travel is incurred in the performance of the duties.

The Courts have approved this practice, for example in *Taylor v Provan* (49 TC 579). On page 611 Lord Wilberforce commented:

“If a man has to travel from one place of work to another place of work, he may deduct the travelling expenses of this travel, because he is travelling on his work, but not those of travelling from either place of work to his home or vice versa.”

Note though that the expenses of travelling between two workplaces are not normally allowable when one of those places is the employee's home. See EIM32370.

*Travel between two different employments*

Where an employee has two employments and the duties of those employments are performed at different places, the cost of travelling between them is not travel in the performance of the duties of the employment.

This point is confirmed by the case of *Parikh v Sleeman* (63 TC 75), which concerned a doctor who had separate employments at three hospitals. When he was travelling between the hospitals he was not performing the duties of any of them and so no deduction could be given. There is an exception to this rule for individuals who are directors of two or more companies within a group of companies, see EIM32035.

**EIM32366 Travelling Appointments** [Nov 2019]

An employee who holds a travelling appointment can deduct all of their business travelling expenses as travel in the performance of the duties of the employment, even where the journey starts from home.

There is little guidance in case law about what constitutes a travelling appointment but a commercial traveller can be said to be typical. A commercial traveller is travelling on his or her work, as distinct from travelling to it, from the moment of leaving home. Another example is a service engineer who moves about from place to place during the day carrying out repairs to domestic appliances at clients' premises. Such employees are often described as itinerant.

If an employee has to report to and work at a particular office at the start and end of the day, travel between there and home is not travel in the performance of the duties, unless the calls at that office are fortuitous or

incidental.

Whether an employee is truly itinerant, or merely has two or more fixed places of work, is essentially a question of fact. There are bound to be marginal cases.

Many jobs require mobility, in the sense that an employee will have to work at a number of different places from week to week or month to month. But this does not mean that the duties themselves inherently involve travelling, merely that the employee will not always incur the same cost in getting to (or staying near) work. Clearly the frequency with which such changes take place is of major importance. There will be a strong presumption that anyone required to go to a number of different sites each day on an irregular basis will have a travelling appointment. Other factors, however, also need to be taken into account, such as the nature of the work itself and whether, for pay purposes, the employee is treated as starting work only on reaching each site.

It is important, therefore, when an employee considers that he or she has a travelling appointment, to obtain as much information as possible about work patterns. If necessary, ask for a record covering a typical period of weeks or months.

Even if the employee does not have a travelling appointment it is likely that for many such employees every place that they attend is a temporary workplace. So relief for their business travel is likely to be due under Section 338 ITEPA 2003, see EIM32005.

**EIM32368 Travelling Appointments: Deductible Expenses: Responsibility For An Area** [Nov 2019]

Where an employee has a travelling appointment the cost of travel between home and the place where work is done is usually travel in the performance of the duties of the employment, see EIM32366.

There is an exception where the employee's duties cover a particular area (for example, a county) but he or she chooses to live a significant distance outside that area.

In these circumstances the cost of travel between home and the boundary of the area is not travel in the performance of the duties. However, if the employee is travelling to a temporary workplace relief will be available for the full journey under Section 338 ITEPA 2003, see EIM32010.

A similar practice applies to travel for necessary attendance, see EIM32190.

**EIM32370 Travel To And From Home Where It Is A Place Of Work** [Nov 2019]

Where an employee's home is itself a place of work, the cost of travel between there and other permanent workplaces may sometimes be deductible under Section 337 as travel in the performance of the duties. A detailed explanation of the circumstances in which you can accept that an employee's home is a place of work is at EIM32760.

Note though that the fact that an employee's home is treated as a workplace for tax purposes is not enough, on its own, to enable the employee to obtain relief under Section 337 for the expenses of travelling to another permanent workplace. For most people, the place where they live is a matter of personal choice. So the expense of travelling from home to any other place is a consequence of that personal choice, not an objective requirement of their job. The case law discussed in the following pages demonstrates that the expenses of travelling from home to another workplace do not qualify for relief under Section 337 unless the location of the employee's home is itself dictated by the requirements of the job.

Even where that condition is met, the cost of travel between the employee's home and another permanent workplace is only deductible during those times when the home is a place of work, see EIM32170.

Employees who work at home are of course entitled to a deduction for the expenses of travelling to a temporary workplace in the same way as any other employee, see EIM32170.

### **EIM32371 Travel To And From Home Where It Is A Place Of Work: Case Law** [Nov 2019]

The Courts have considered employees' home to work travelling expenses on a number of occasions. Recent examples include *Miners v Atkinson* (68 TC 629), which concerned a director of a one-man service company, see EIM32380, and *Kirkwood v Evans* (74 TC 481), which concerned an employee who agreed to be based at home under a homeworking scheme, see EIM32374.

In two cases the House of Lords has accepted that in certain exceptional circumstances an employee's home to work travelling expenses qualified for relief under Section 337. The cases are:

- *Taylor v Provan* (49 TC 579), see EIM32372 and
- *Pook v Owen* (45 TC 571), see EIM32373.

### **EIM32372 Travel To And From Home Where It Is A Place Of Work: Taylor v Provan** [Nov 2019]

The case of *Taylor v Provan* (49 TC 579) illustrates how difficult it can be for an employee to obtain a deduction under Section 337 ITEPA 2003

for the expenses of travelling between their home and another workplace. Mr Taylor lived in Canada and was agreed to have unique and unrivalled knowledge and experience of arranging mergers of brewery companies. The terms on which he was employed acknowledged his unique experience and required him to perform his duties as far as he could from his home in Canada. The case concerned a deduction for the costs of travel from his home to other workplaces, costs that the Courts in *Ricketts v Colquhoun* had held to be not deductible as a general rule, see EIM31641.

In *Taylor v Provan* the Courts held that this general rule applies where the employee has to do part of his or her work at home. Lord Reid commented at page 605E:

“If the holder of an office or employment has to do part of his work at home the place where he resides is generally still his personal choice. If he could do his home work equally well wherever he lived then I do not see how the mere fact that his home is also a place of work can justify a departure from the *Ricketts* ratio.”

However, the Courts felt that an exception could be made in the very unusual circumstances of Mr Taylor’s case. Lord Morris commented at page 609D:

“The office or the employment was very special. There was probably no-one else who could have filled it. It was an office created to be held by one particular person.”

In effect, the view of the Courts was that Mr Taylor’s location was an integral, unavoidable and accepted element in determining the nature of the office or employment that he held. Mr Taylor was uniquely qualified to fill that post and his personal circumstances were central to the terms of his employment. Very few employees will be in a similar position.

### **EIM32373 Travel To And From Home Where It Is A Place Of Work: *Pook v Owen* [Nov 2019]**

The other key case dealing with deductions under Section 337 ITEPA 2003 is *Pook v Owen* (45 TC 571). Dr Owen was a general practitioner who also had a part-time appointment at a nearby hospital. His duties required him to be available for emergency call-outs from home. He would be contacted by telephone and then took responsibility for the patient as soon as he took the call. The Courts held that he was entitled to a deduction for the cost of travel between home and the hospital while on call-out. This case forms the basis for the guidance at EIM32386 .

The reason for the decision is not easy to follow from the judgements. It

is best explained in a comment by Lord Reid in *Taylor v Provan* at page 605F:

“I am sure that the majority did not intend to decide that in all cases where the employee’s contract requires him to work at home he is entitled to deduct travelling expenses between his home and his other place of work. Plainly that would open the door widely for evasion of the rule. There must be something more. I think that the distinguishing fact in Owen’s case was that there was a part time employment and that it was impossible for the employer to fill the post otherwise than by way of appointing a man with commitments which he would not give up. It was therefore necessary that whoever was appointed should incur travelling expenses.”

Thus it is not enough that there should be a contractual obligation to work from home. It is not enough that there should actually be work at home. What is required is something more; that the nature of the employment itself must necessarily require the employee to live in a particular location.

**EIM32374 Travel To And From Home Where It Is A Place Of Work: *Kirkwood v Evans* [Nov 2019]**

The case of *Kirkwood v Evans* (74 TC 481) illustrates the approach of the Courts to employees working at home under a voluntary homeworking scheme.

Mr Evans was a civil servant who lived in King’s Lynn and worked in Leeds. His employer introduced a voluntary homeworking scheme under which Mr Evans was permitted to work at home and to travel to Leeds on one day each week. Under the scheme Mr Evans lost his office space in Leeds but was provided with equipment to support an office at home. Either Mr Evans or his employer could terminate the homeworking agreement.

Mr Evans argued that travel between his home and Leeds was travel in the performance of the duties of the employment, see EIM32360. The High Court reviewed the cases discussed at EIM32372 and EIM32373, rejected that argument and commented:

“his choice to live in King’s Lynn rather than Leeds was historical and is unconnected with any term of his employment. The necessity of travelling to Leeds is dictated by his choice of the place where he lives and not by the nature and terms of the job itself.”

The High Court also rejected the Commissioners’ apparent finding that Leeds was not a permanent workplace for the purpose of section 339(2)

(see EIM32070). Mr Evans put forward no such argument, and conceded that the Commissioners' finding on the point was wrong.

Finally, Mr Evans argued that he was entitled to relief for the additional household costs he incurred while working at home. This was rejected because:

“the homeworking scheme was optional. Mr Evans was permitted to work from home but he was not required to do so. He took up the option because for perfectly understandable reasons it was more convenient for him to remain at home for most of the week rather than to travel to Leeds. Working at home was not therefore a necessary incident of his employment.”

The principle that underlies this decision is that sections 336 and 337 ITEPA 2003 only permit relief for those expenses that are incurred by a necessity arising from the nature of the employment, see EIM31641. They do not permit relief for expenses incurred out of choice, or because of the personal circumstances of the individual employee.

### **EIM32380 Travel To And From Home Where It Is A Place Of Work: Service Companies: *Miners v Atkinson* [Nov 2019]**

Directors of small companies operating in service industries such as computer consultancy frequently contend that their home is a place of work (see EIM32760). As a consequence the director will ask for a deduction for the cost of travel from home to the various places at which the company is required to provide services, together with accommodation costs if the director needs to stay away from home. In very many cases, those expenses will not qualify for relief under Section 337 ITEPA 2003. The reason can be illustrated by the case of *Miners v Atkinson* (68 TC 629).

Mr Miners was a computer consultant who provided his services through his own service company. The registered office of the company was at Mr Miners' home, 4 Sandringham Road. Most of Mr Miners' duties were carried out at the sites of the clients of his company but he did some work at home. The case concerned a deduction under Section 337 ITEPA 2003 for Mr Miners' travel expenses from his home to the sites at which he worked.

A deduction was not permitted. The duties that Mr Miners carried out at home were not the substantive duties of his employment, see EIM32780. However, the focus of the decision in the High Court was on whether there was an objective requirement that any work carried out by Mr Miners at home had to be carried on at that place.

The question that needed to be answered, and will need to be answered in similar cases, was expressed in these terms:

“The starting point is that 4 Sandringham Road was the appellant’s home. On the authorities, it seems to me that one must ask whether the appellant was working at home out of choice.”

In answer to that question the Special Commissioner had concluded that:

“it was not necessary for the work which Mr Miners carried out at 4 Sandringham Road to be done at that precise address. It could have been done anywhere.”

There was a clear finding by the High Court that there was no objective requirement for the work to be carried out at Mr Miners’ home. This conclusion applies in the same way to the great majority of one-man service companies. However, in very unusual circumstances, there may be exceptions. There is some practical advice at EIM32800.

The effect of this case is illustrated by examples EIM32805 and EIM32806.

Remember that even where relief for travel expenses cannot be permitted under Section 337 ITEPA 2003 it will still be available under Section 338 ITEPA 2003 where the place to which the employee is travelling is a temporary workplace, see EIM32170.

### **EIM32385 Employee On Standby [Nov 2019]**

The fact that an employee is on stand-by, or may be called out to work as and when needed, does not in itself affect the treatment of his or her travelling expenses.

In *Pook v Owen* (45 TC 571) Lord Wilberforce commented at page 595:

“The mere fact of being on stand-by duty is not enough”... [to qualify for a deduction] ... “Nor, in my opinion, is the mere fact sufficient that he might be called upon, or might volunteer, to give some professional advice on the telephone before setting out. There are persons who hold positions of importance, who carry their responsibility with them wherever they are: they too may be called to their offices after working hours.....But this does not mean that they have more than one working place: cf. *Newsom v Robertson* (33 TC 452). What is required is proof to the satisfaction of the fact-finding Commissioners that the taxpayer, in a real sense, in respect of the office or employment in question, had two places of work, and that the expenses were incurred in travelling from one to the other in the performance of his duties”.

The same principle applies to travel for necessary attendance, see

EIM32250.

**EIM32386 Emergency Callout** [Nov 2019]

No deduction is due for the cost of travel between an employee's home and his or her permanent workplace even where the employee is on stand-by, see EIM32385. In the same way, no deduction is due for the cost of travelling on an emergency call-out between an employee's home and his or her permanent workplace.

There is one exception. The cost of emergency call-out travel between an employee's home and his or her permanent workplace is deductible where the employee's home is a place of work, see EIM32760 and all of the following conditions are met:

- the employee must give advice on handling the emergency before starting the journey and
- responsibility for those aspects appropriate to the employee's duties must be accepted from that time and
- the employee must have a continuing responsibility for the emergency while travelling to the workplace.

### 34.15 Wholly and exclusively

The EI Manual provides:

**EIM31811 General: Introduction: Expenses Do Not Have To Be Wholly And Exclusively Incurred: Example** [Nov 2019]

An employee has to travel to New York on business for two weeks. While she is there she has a free weekend and spends it taking a break in Boston. The cost of her flight to New York and any other necessary travelling expenses are deductible. They have been necessarily incurred in travelling to a temporary workplace. The fact that the break in Boston means that the travelling expenses have not been incurred wholly and exclusively for business does not matter.

The costs of the break in Boston, such as travelling to Boston from New York and the cost of staying in Boston, are not deductible. These expenses are not attributable to attendance at the temporary workplace. You can find detailed instructions about the expenses incurred in attending overseas conferences, seminars or study tours at EIM31950

### 34.16 Conferences and seminars

The EI Manual provides:

**EIM31960 General: Overseas Conferences, Seminars And Study**

**Tours: Getting Evidence** [Nov 2019]

Before a deduction can be permitted for the cost of an overseas conference, seminar or study tour it needs to be demonstrated that attendance was necessary to carry out the duties of the employment of the person attending.

Some overseas trips are merely an incentive to reward or motivate employees, see EIM31970. This may be particularly the case where the trip is provided by a third party, see EIM31975.

An itinerary should be available for the trip showing precisely what activities were involved. It is not enough that the trip was authorised, or even required, by the employer. It is necessary to be able to demonstrate that the duties of the employment could not be performed without it, see EIM31647.

The insertion into an itinerary of a token business element, such as a meeting that could equally well have taken place at the employer's premises in the United Kingdom, does not make the travel cost necessarily incurred, see example EIM31991.

It is not enough to demonstrate that a trip had a personal educational value. Expenditure incurred by an employee to improve his or her qualifications for doing the job, or to keep his or her knowledge up to date, are not deductible, see EIM31650. This is illustrated by example EIM31990.

You should be particularly wary of those cases where the trip is made to an exotic or desirable location that appears to be unrelated to the subject matter of the trip, for example, a dentists convention in St Lucia. You need to consider critically the reason for the trip. ...

**EIM31965 General: Overseas Conferences, Seminars And Study Tours: Apportionment** [Nov 2019]

If you accept that a particular overseas trip has been made necessarily to carry out the duties of the employment you may still find that some expenses are not deductible. For example, a short break may be taken during an overseas conference.

You should not accept an apportionment of the total cost of the trip on a percentage basis, calculated by looking at the relative time spent on business and non-business activities. There is no basis in law for such an apportionment, see EIM31660. Instead you should examine the expenses individually and permit a deduction only for those that are necessarily incurred.

The correct approach is illustrated by example EIM31811.

**EIM31970 General: Overseas Conferences, Seminars And Study Tours: Overseas Trips As Incentives [Nov 2019]**

Overseas trips that are variously described as conferences, conventions or seminars are often no more than incentives intended to reward past performance or to motivate employees for the future. Commonly the business element is minimal, for example an address by a company executive. The itinerary will consist largely of social occasions, excursions and leisure activities. No deduction should be permitted for the cost of such trips, see example EIM31991.

A deduction is only due in the circumstances described in EIM31950. It can generally be demonstrated that the cost of incentive trips is not incurred necessarily by the participants, less successful colleagues doing the same or similar jobs will not have needed to incur the expense. Nor is it a duty of the employment to attend.

Any enquiries from the promoters of such events about the potential tax liabilities for participants should be dealt with in accordance with EIM11235 onward.

**EIM31990 General: Overseas Conferences, Seminars And Study Tours: Example [Nov 2019]**

A consultant neurologist attends the annual conference of the World Council of Neurology. The conference takes place in Geneva and takes 4 days. The conference consists of a series of meetings, lectures and seminars on medical matters. The neurologist's employer encourages her to attend and the conference is directly relevant to her work.

No deduction can be permitted for the cost of attending the conference. Attendance at the conference is not necessary expenditure, see EIM31950. Attendance at the conference is not one of the duties of her employment, see EIM31650.

## CHAPTER THIRTY FIVE

# PAYE

35.1

### 35.1 PAYE: Introduction

A full discussion of PAYE needs a book to itself. This chapter focuses on matters closest to the themes of this book.

The law is mostly contained in the Income Tax (Pay As You Earn) Regulations 2003 (which I call the “**PAYE regulations**”).

There is guidance in the PAYE Manual and CWG2 (Employer further guide to PAYE & NIC).

### 35.2 Relevant payment

The key term is “relevant payment”. “Relevant payment” is a label for a number of rules.

There is the usual cascade of definitions. Subject to some exceptions, not discussed here, reg. 4(1) PAYE regulations provides:

In these Regulations, any reference (however expressed) to relevant payments means payments<sup>1</sup> of, or on account of, net PAYE income...

#### 35.2.1 *Net PAYE income*

Regulation 3(1) PAYE regulations provides:

Net PAYE income means PAYE income less any—

- (a) allowable pension contributions, and
- (b) allowable donations to charity.

“Net” PAYE income is a label to introduce rules for deductions, not

---

<sup>1</sup> For the meaning of payment, see 14.3 (Recognition/attribution: Analysis).

discussed here.

### 35.2.2 *PAYE income*

Section 683(1) ITEPA defines “PAYE income”:

For the purposes of this Act and any other enactment (whenever passed) “PAYE income” for a tax year consists of—

- (a) any PAYE employment income for the year,
- (b) any PAYE pension income for the year, and
- (c) any PAYE social security income for the year.

### 35.2.3 *PAYE employment income*

Section 683(2) ITEPA defines “PAYE employment income”:

“PAYE employment income” for a tax year means income which consists of—

- (a) any taxable earnings from an employment in the year (determined in accordance with section 10(2)),<sup>2</sup> and
- (b) any taxable specific income from an employment for the year (determined in accordance with section 10(3)).<sup>3</sup>

I do not address the topics of PAYE pension/social security income. See too 35.6.3 (Deemed PAYE income).

## 35.3 **Employment/employer/employee**

Regulation 2(1) PAYE regulations incorporates the standard ITEPA definitions<sup>4</sup> with amendments:

“employment”, subject to regulations 10 to 12, has the meaning given in sections 4 and 5 of ITEPA; and “employer” and “employee” have corresponding meanings

---

<sup>2</sup> See 33.8 (“Taxable earnings”).

<sup>3</sup> For completeness: s.683 (3ZA) provides two narrow exceptions:

“PAYE employment income” for a tax year does not include any taxable specific income treated as paid or received in that tax year by section 394A or 554Z4A (temporary non-residents).

These relate to temporary non-residence charges for employer-financed retirement benefits and disguised remuneration, where operating PAYE is obviously impractical.

<sup>4</sup> See 33.3 (Employment/employer/employee).

Regulation 12(1) PAYE regulations provides:

For the purposes of these Regulations—

- (a) other payers are treated as employers;
- (b) other payees are treated as employees; and
- (c) an other payee’s “employment” with an other payer starts when relevant payments start and ends when relevant payments end.

Where it is necessary to distinguish between usual sense and the PAYE sense of employer/employee it is helpful to refer to “Payee-employer/employee”.

### 35.3.1 *Payer/payee*

Regulation 2(1) PAYE regulations provides:

- “payee” means an employee, agency worker, pensioner or other payee;
- “payer” means an employer, agency, pension payer or other payer;

## 35.4 Duty to deduct PAYE

Armed with these definitions, we can turn to the obligation to deduct PAYE. Reg 21(1) PAYE regulations provides:

On making a relevant payment to an employee during a tax year, an employer must deduct or repay tax in accordance with these Regulations by reference to the employee’s code, if the employer has one for the employee.

## 35.5 Employee works for non-employer

I do not discuss:

### **ITEPA Topic**

s.688 Agency workers

s.688A Managed service companies

s.688AA Workers' services provided through intermediaries

### 35.5.1 *Application conditions*

Section 689(1) ITEPA provides:

This section applies if—

- (a) an employee during any period works for a person (“the relevant person”) who is not the employer of the employee,

- (b) any payment of, or on account of, PAYE income of the employee in respect of that period is made by
  - [i] a person who is the employer or
  - [ii] an intermediary of the employer or of the relevant person,<sup>5</sup>
- (c) PAYE regulations do not apply to
  - [i] the person making the payment
  - [ii] or, if that person makes the payment as an intermediary of the employer or of the relevant person, the employer, and
- (d) income tax and any relevant debts are not deducted, or not accounted for, in accordance with the regulations by
  - [i] the person making the payment
  - [ii] or, if that person makes the payment as an intermediary of the employer or of the relevant person, the employer.

I refer to this as the “**s.689 application conditions**”.

The employer, being non-resident, may chose to operate PAYE but is not required to do unless the employer has a “UK presence”.<sup>6</sup>

### 35.5.2 *General rule*

Assuming the application conditions are satisfied, s.689 ITEPA provides:

- (2) If subsection (1C) does not apply, the relevant person is to be treated, for the purposes of PAYE regulations, as making a payment of PAYE income of the employee of an amount equal to the amount given by subsection (3).
- (3) The amount referred to is—
  - (a) if the amount of the payment actually made is an amount to which the recipient is entitled after deduction of income tax and any relevant debts due under the PAYE regulations, the

---

5 Section 689(5) provides: “For the purposes of this section a payment of, or on account of, PAYE income of an employee is made by an intermediary of the employer or of the relevant person if it is made—

- (a) by a person acting on behalf of the employer or the relevant person and at the expense of the employer or the relevant person or a person connected with the employer or the relevant person, or
- (b) by trustees holding property for any persons who include or class of persons which includes the employee.”

6 *Clark v Oceanic* 56 TC 183; see 15.13 (Territorial principle: Application). HMRC accept this; see ICAEW Taxguide 08/21 para 6.3: “If there is no PAYE presence for an overseas employer in the UK, there will be no requirement to operate PAYE.”

- aggregate of the amount of the payment and the amount of any income tax and any relevant debts deductible due, and
- (b) in any other case, the amount of the payment.

### 35.5.3 “Work”

Section 689(6) ITEPA provides:

- [a] In this section and sections 690 and 691 “work”, in relation to an employee, means the performance of any duties of the employment of the employee and
- [b] any reference to the employee’s working is to be read accordingly.

See 5.21.2 (Employment-work).

### 35.5.4 “Work for”

HMRC discuss the concept of “working for”:

4.15 HMRC has previously described “working for” as “paid by, working on behalf of, or to the benefit of”. HMRC does not regard “working for” as simply meaning “working for the benefit of”.

4.16 There must be an element of control or management akin to an employee employer relationship for Section 689 to apply. This is not a new concept and has been the basis of “working for” for S689 purposes and its predecessor ...

4.17 There will be straightforward situations where the employee is clearly working for his overseas employer whilst in the UK - a simple example being an employee of a US car plant manufacturer who installs equipment in the UK as part of the contract between the UK and US Companies.

4.18 HMRC does understand that individuals sent from group companies may be working for their foreign employer whilst working at the premises of separate UK entity. In the above example, the entities may be part of a multi national group.

4.19 In connection with employment services for treaty purposes, the OECD commentary on Article 15 at 8.13 refers to services which are integral to the business of and bearing the responsibility or risk for the results produced by the individual’s work.<sup>7</sup> HMRC does not regard the comments to be relevant in determining whether there is a domestic

---

<sup>7</sup> See 35.13 (PAYE exemption: EP App 4).

PAYE obligation although the concepts are similar and may result in the same conclusion.

4.20 It is the responsibility of the UK Company to decide whether there is a PAYE obligation based on the particular facts.<sup>8</sup>

### 35.5.5 *Special cases*

There are a number of exceptions to the general rule which are not discussed here:

<b>s.689</b>	<b>Topic</b>
(1ZA)	Oil and gas workers on the continental shelf
(1A)(4)(4A)	Disguised remuneration

The next provision relates to intermediaries of intermediaries:

(1B) Subsection (1C) applies if—

- (a) the employee worked for the relevant person during the period under or in consequence of arrangements made between the relevant person and a third person,
- (b) the third person did not make the payment of, or on account of, PAYE income of the employee, and
- (c) PAYE regulations would apply to the third person if the third person were to make a payment of, or on account of, PAYE income of the employee.

(1C) The third person is to be treated, for the purposes of PAYE regulations, as making a payment of PAYE income of the employee of an amount equal to the amount given by subsection (3).

## 35.6 PAYE clearance: s.690 direction

In the following cases it may be unclear how much employment income is taxable and so PAYE income:

- (1) Non-resident employee
- (2) Employee qualifying for overseas workday relief (recent arriver)
- (3) Split years

Section 690 ITEPA provides a clearance mechanism:

---

8 Joint Expatriate Forum on Tax and NICs (July 2014)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/347913/140731\\_Expat\\_Forum\\_Minutes.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf)

(1) This section applies in relation to an employee in a tax year if the employee—

- (a) [i] is either non-UK resident for the tax year or  
[ii] is UK resident but meets the requirement of section 26A for the tax year,<sup>9</sup> and
- (b) works or will work in the UK and also works or is likely to work outside the UK.

(1A) This section also applies in relation to an employee in a tax year if it appears to an officer of Revenue and Customs that—

- (a) the tax year is likely to be a split year as respects the employee, and
- (b) the employee works or will work in the UK and also works or is likely to work outside the UK.

Assuming one of these conditions is met, we move on to the relief:

(2) If in relation to an employee to whom this section applies and any tax year it appears to an officer of Revenue and Customs that—

- (a) some of the income paid to the employee by the employer<sup>10</sup> is PAYE income, but
- (b) some of that income may not be PAYE income, an officer of Revenue and Customs may, on an application made by the appropriate person,<sup>11</sup> give a direction for determining a proportion of any payment made in that year of, or on account of, income of the employee which is to be treated as PAYE income.

I refer to this as a **“s.690 direction.”**

(2A) For the purposes of subsection (2) as it applies in relation to an employee who is UK resident for a tax year but not domiciled in the UK in that tax year, the officer may treat section 809B of ITA 2007 (remittance basis) as applying to the employee for that year, even if no claim under that section has been made.

---

9 See 33.22.2 (s.26A conditions: Recent arrival).

10 Section 690(3)(b) ITEPA provides:

“any reference to a payment made by the employer includes a reference to a payment made by a person acting on behalf of the employer and at the expense of the employer or a person connected with the employer.”

11 Section 690(3)(a) defines appropriate person: “In this section—

(a) “the appropriate person” means the person designated by the employer for the purposes of this section and, if no person is so designated, the employer...”

HMRC Brief 17/09 explains s.690(2A) ITEPA is to correct an oversight in 2008:

**Section 690 ITEPA directions**

Prior to April 2008 non-domiciled individuals and not ordinarily resident individuals were automatically taxed on the remittance basis on their foreign employment income. However since April 2008 individuals have to make an annual claim to the remittance basis. Section 690 ITEPA was amended in FA 2008 to reflect this change for not ordinarily resident employees. Prior to April 2008 employers were able to ask for a section 690 direction which permitted them not to apply PAYE to certain employment income paid to not ordinarily resident employees entitled to be taxed on the remittance basis. These rules have been amended to allow this procedure to continue.

35.6.1 *Application for s.690 direction*

Section 690 ITEPA continues:

- (4) An application under subsection (2) must provide such information as is available and is relevant to the application.
- (5) A direction under subsection (2)—
  - (a) must specify the employee to whom and the tax year to which it relates,
  - (b) must be given by notice to the appropriate person, and
  - (c) may be withdrawn by notice to the appropriate person from a date specified in the notice.
- (6) The date so specified may not be earlier than 30 days from the date on which the notice of withdrawal is given.

35.6.2 *Effect of s.690 direction*

Section 690(7) ITEPA provides:

If—

- (a) a direction under subsection (2) has effect in relation to an employee to whom this section applies, and
- (b) a payment of, or on account of, the income of the employee is made by the employer in the tax year to which the direction relates,

the proportion of the payment determined in accordance with the direction is to be treated for the purposes of PAYE regulations as a

payment of PAYE income of the employee.

### 35.6.3 Deemed PAYE income

Section 690 ITEPA continues:

(8) If in any tax year—

- (a) no direction under subsection (2) has effect in relation to an employee to whom this section applies, and
- (b) any payment of, or on account of, the income of the employee is made by the employer,

the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

(9) Subsections (7) and (8) are without prejudice to—

- (a) any assessment in respect of the income of the employee in question, and
- (b) any right to repayment of income tax overpaid and any obligation to pay income tax underpaid.

HMRC say:

**Question:** This is a query with regard to inbound expats (business travellers), who are taxable on their UK workdays:

Background – business travellers (Non-resident in the UK), who are taxable on their UK workdays (e.g. because of economic employment in the UK) and for whom there is a “deemed employer” for PAYE withholding purposes (e.g. as required per s689, ITEPA).

HMRC guidance (CWG2, Page 70) states –

“Where, because work is performed both in the UK and abroad, it is unclear at the time of making a payment how much of the payment will ultimately be assessable as PAYE income, the whole payment should be subjected to PAYE unless we have directed otherwise.”

The question is, however, what one means by “unclear” in the above guidance. For example, some of our clients will obtain full UK / nonUK workday calendars from their business traveller population on a live basis each month. Such data, can be required, for example, to ensure that the overseas withholding (e.g. in Germany) is correctly calculated. As such, such employers do have a clear understanding of exactly what income relates to UK workdays. The question therefore is whether it is acceptable from an HMRC perspective to only account for PAYE withholding on the actual UK workdays in this case – or should they

still be getting a s690 ruling from HMRC for example (even though the s690 ruling would only be based on estimated data and is therefore innately less definitive than the live calendars that the employees provide each month).

**HMRC answer:** The legislation at s690(8) ITEPA 2003 is clear that where no direction under s690 (2) has effect, the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

However, in the case of a short term business visitor (STBV) who is taxable in the UK in relation to their UK workdays only, a s690 may not be appropriate. This could be, for instance, an STBV from a non-treaty country or from an overseas branch of a UK Company. The “relevant payment” processed through the UK shadow payroll would simply be the employment income relating to the UK workdays, and therefore a s690 is not required. In this example, there is no part of what would be considered to be the “relevant payment” which can be deemed to not be PAYE income, and so s690 is not applicable.<sup>12</sup>

#### 35.6.4 *HMRC practice*

The PAYE Manual provides:

**PAYE81545. UK employer’s duties [Jun 2020]**

...

**The employee works both inside and outside the UK and is not resident in the UK or, is resident, the remittance basis applies and the requirement of Section 26(A) ITEPA are met (a three year period of non residence)**

The employer can apply under Section 690 ITEPA 2003 for a direction from HMRC to operate PAYE only on the percentage of the employee’s total earnings that are for work in the UK. This applies to all payments made by the employer including termination payments and share based remuneration. An application for a direction must be sent to Self Assessment, HMRC, BX9 1AS UK, or Charities, Savings & International 3 HMRC, BX9 1AJ (see PAYE81555)

**PAYE: apply for a Section 690 or informal treaty direction (S690)**

The Section 690 application is only an estimate of the work done in and

---

<sup>12</sup> Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

outside the UK and the employee should complete an SA return to report the actual position. See PAYE81555 - PAYE81565 on how to handle applications under Section 690 ITEPA 2003.

If an employer does not make an application under Section 690 ITEPA 2003, then unless the employee is within an EP Appendix 6 arrangement (see PAYE81740),<sup>13</sup> they must operate PAYE on all payments made to the employee for work done both in and outside the UK. The employee can claim a repayment of the tax deducted on earnings for work done outside the UK on their SA Return.

You must set up an SA record for an employee who works both in and outside the UK, whether or not a Section 690 application is made.

If the employer provides Tax Equalisation arrangements for the employee, you should refer to PAYE81740.

### **Amendments to S690 Directions where individual's travel has been restricted due to COVID-19**

Where employees have suffered significant delay in travel restrictions caused by COVID-19, HMRC will allow employers to request amendments for the proportion of time to be changed in an existing S690 Direction. Requests should be made in writing to HMRC and sent to the relevant address contained within PAYE81555...

### **PAYE81550 PAYE Operation: Do Any Special Rules Apply For NICs? [May 2020]**

#### ***Arrivals in the UK***

The employer may ask you whether any special rules apply for NICs for a new arrival. Refer the employer to the CWG2 Employer Further Guide to PAYE and NICs, which provides specific guidance and points of contact for further help.

The employer should be advised that

- The rules governing tax and NICs are different and must be applied separately And
- HMRC decides whether the new arrival is liable to UK tax and NICs, and how PAYE should be applied

(Note: A direction under Section 690 ITEPA applies to the payment of income tax only.)

### **PAYE81555. Applications under Section 690 ITEPA 2003 - Who deals with the application? [May 2020]**

#### ***Arrivals in the UK***

---

13 See 35.15 (Tax equalisation: EP App 6).

On receipt of an application for a direction under Section 690 ITEPA 2003 you must decide which office is responsible for reviewing the application. Use the following table to determine the office and pass the application to them immediately.

<b>Situation</b>	<b>Responsible Office</b>
The employee is an Expat	Charities, Savings & International
All other employees	PT Operations

**PAYE81560. Applications under Section 690 ITEPA 2003 - reviewing the application** [May 2020]

***Arrivals in the UK***

Use the flowchart<sup>14</sup> to review an application under Section 690. It contains links to a number of draft letters you should use depending on the circumstances of the case. These letters are available on SEES Forms and Letters, in the general subdirectory 'Regulation/Payment letters'.

When an application is accepted, you must take the following action

- Set up an SA record for the employee if there is not one already
- Arrange for an SA return with the non-residence and employment pages to be issued for the year(s) the application covers
- Make an SA note as follows 'Sec 690 approval given for [year] for earnings from [employer's name]. PAYE to be operated on [%].'
- If the employee is resident/not ordinarily resident, the remittance basis applies and the requirements of Section 26A ITEPA are met (a three year period of non-residence
  - Amend their tax code to remove the basic personal allowance (and blind person's allowance if claimed)

- Place all the Section 690 papers in an SA Post batching range

**PAYE81565. Applications under Section 690 ITEPA 2003 - At the end of the tax year** [May 2020]

The employer must complete the employee's form P14, End of Year Summary or FPS, to show only

- The pay on which the employer has operated PAYE (this will include the amount representing the UK duties agreed by HMRC under Section 690 ITEPA and any other taxable pay) and the tax deducted from that pay

The employee should, when completing their SA return enter

---

14 See <http://www.hmrc.gov.uk/manuals/pommanual/payee81560.htm>

- The earnings from their P60 / P45 in box 1 on the Employment page including any cash earnings from that employment that have not been included on the P60 / P45
- The tax deducted from their P60 / P45 in box 2 on the Employment page
- The remainder of their earnings in box 3 on the Employment page including paid earnings overseas from an earlier year which were not liable to UK income tax unless they were remitted to the UK during the Tax Return year
- The amount of their total earnings which relates to work done abroad in box 12 under the section 'Share Scheme and Employment Lump Sum, Compensation and Deduction' on the 'Additional Information Page' (SA101)

No equivalent rule is needed for other UK resident non-domiciled employees, whose income is either taxable entirely on the remittance basis, or on the arising basis.

HMRC say:

### **Section 690 agreements**

*Question:* (28.1) Can HMRC allow employers to operate PAYE on the basis of a s690 percentage in advance of an actual s690 notice being issued, provided the employer submits the s690 request to HMRC within a reasonable time period following the date of the first payment? We would suggest a two month period would be reasonable. Where the percentage used is not the percentage later agreed by HMRC the employer could be obliged to correct the position in the next PAYE period following receipt of the notice from HMRC.

(28.2) Can HMRC allow employers to adjust the s690 percentage unilaterally during the tax year to more accurately reflect the employee's actual work pattern? The employer could be obliged to provide HMRC with written confirmation of the adjusted final percentage following the end of the tax year.

### **HMRC answer**

(28.1) An application for a direction under Section 690 ITEPA 2003 must be sent to HMRC to operate PAYE on a particular percentage of an employee's earnings. If an employer does not make an application under S690, then unless the employee is within an EP Appendix 6 arrangement, they must operate PAYE on all payments made to the employee for work done both in and outside the UK.

(28.2) The agreed s690 percentage cannot be adjusted unilaterally

during the tax year without HMRC's agreement. If the employee's work pattern drastically changes during the year then the office which approved the initial direction should be contacted. This should be done as soon as it becomes apparent that there are any changes to the employee's circumstances that could affect the limited operation of PAYE that has been agreed.<sup>15</sup>

### 35.6.5 Covid

ICAEW Taxguide 08/21 (Covid-19: Displaced Expatriate Employees)<sup>16</sup> provides:

#### 6.1 S690 Determinations

Many s690 determinations that were issued will now, with hindsight, be invalid due to stranded employees working in the wrong country. Could HMRC consider a temporary measure of allowing employers to adjust the determination percentage as they discover more accurate data regarding the location of their employees? There would obviously need to be an audit trail of why any revised percentage was used and the guidance could cover records that HMRC would expect to be kept if an employer used such a concession.

#### Reply from HMRC

HMRC published updated guidance<sup>17</sup> on 20 October 2020.

This confirmed that, if there is already a s690 agreement with HMRC in place, a customer will be able to ask to amend it, if the measures that have been introduced to stop the spread of coronavirus mean an employee has been unable to leave or return to the UK.

This will mean if the employee:

- has been unable to leave the UK in the 2020-2021 tax year, PAYE can be operated on 100% of their earnings (or another reasonable estimate)
- is unable to return to the UK indefinitely, UK tax could be reduced or may not be due, depending on the employee's circumstances.

## 35.7 Leaving UK: PAYE

HMRC say:

---

<sup>15</sup> Expat Forum Q&A log (July 2019) (informally circulated).

<sup>16</sup> <https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2021/taxguide-0821-covid-19-displaced-expatriate-employees.ashx>

<sup>17</sup> <https://www.gov.uk/guidance/new-employee-coming-to-work-from-abroad>

**Form P85 leaving the UK**

In the past form P85 has been used in advance of an expat leaving the UK for the purposes of generating an NT code where appropriate, to be in place by the time the individual leaves. We note that the form has recently been updated to say that it should only be used “when you have left” whereas the previous version also stated it could be used “when you are leaving”.

Can form P85 still be submitted in advance of departure to request an NT code?

**Answer:**

HMRC’s operations team have confirmed that normally form P85 would be rejected if there is still a continuing source of UK income. However, if the customer is leaving to work full time abroad for a UK employer for a period of at least a complete tax year, the form P85 can be completed to enable to customer to receive code NT.<sup>18</sup>

See 5.38.2 (Departure: Form P85).

**35.8 PAYE if no personal allowance**

RDR1 provides:

**What should you do if you have UK tax allowances and choose to use the remittance basis?**

8.9 If you decide during a tax year that you’re going to use the remittance basis and you’re still getting UK personal allowances through the PAYE system, you may not be paying enough UK tax.<sup>19</sup>

8.10 If you contact HMRC, we can arrange to amend your tax code to one which doesn’t give relief for personal allowances, thus reducing any potential tax bill arising from you getting the benefit of allowances you’re no longer entitled to. Your employer can’t do this for you as your tax affairs are confidential between you and HMRC. Until they receive a new tax code from us, your employer will continue to deduct tax from you based on the code we originally issued before you were claiming the remittance basis.

It is hard to imagine anyone wishing to do this, but it may save the need for submitting a tax return. HMRC say:

---

18 Expat Forum Q&A log (July 2019) (informally circulated).

19 See 57.5 (Allowances: remittance basis user).

Employers have expressed concern that the P46 (Expat) does not allow them to operate a 0T code (no personal allowance) even where they are aware that the employee will claim the remittance basis or has income in excess of £100K.

HMRC said that it was not the responsibility of employers to withdraw personal allowances and, if they did so, the New PAYE System (NPS) might reinstate the allowances when the P14 is filed and make a repayment to the individual.

HMRC said that, if employers agree with their employee that they will claim the remittance basis or if the individual's earnings will exceed £100K, they should request a formal change of code number from the Expat Team. This would ensure that HMRC records mirror those of the employer when the P14 is submitted.

HMRC confirmed that the Modified PAYE rules in EPM6 allows PAs to be withdrawn from remittance basis users but it would be sensible for Employers to notify the Expat Team of situations where that applies. They agreed to make the necessary changes to the EPM6 agreement to make this clear.<sup>20</sup>

### 35.9 PAYE repayment not remittance

The minutes of the Joint Expatriate Forum record:

HMRC had circulated a note explaining that the existing non-statutory practice could continue whereby remittances arising as a result of repayments of overpaid PAYE to non tax-equalised employees were disregarded. This statement was based on new legal advice and meant there was no need to provide for this treatment in primary legislation.<sup>21</sup>

This note is dated 7 October 2011 and provides:

HMRC's long standing practice in relation to repayments of income tax for employees who remain not ordinarily resident in the UK has been to treat PAYE tax overpaid as not constituting a remittance in cases where:

- under tax equalisation arrangements it would be refunded to the

---

20 Joint Expatriate Forum on Tax and NICs: (May 2010) Meeting Note

<http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf>

21 Joint Expatriate Forum on Tax and NICs (October 2011)

<http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/expat-mins-oct-2011.pdf>

- employer; or
- the employee instructs HMRC to refund the money to an overseas account.

The practice is however not consistent with the FA 2008 remittance basis legislation.

At a Expats Forum sub group meeting held on 18 May 2011, HMRC confirmed that repayments of tax overpaid to an employer under a tax equalisation arrangement would not constitute income as the employee is contractually entitled to net remuneration and the actual UK taxes due on that remuneration. The repayment of the tax overpaid is in effect a refund of overpaid earnings by employee to employer.

However, for gross paid employees, PAYE repayments represent a part repayment of earnings delivered in the UK and as such a remittance to the UK under section 809L ITA. HMRC agreed to consider the views expressed and how the matter could be resolved. In the meantime, the existing practice would continue until at least 5 April 2012.

The suggestion was made at the subgroup that, if the practice was ultra vires HMRC's management discretion, it should be legislated, possibly as part of the current review of non domiciled taxation.

HMRC has since taken further legal advice on this matter. This has confirmed that the current informal practice can continue as an informal concession. As such, there is no need for any legislative fix.

### 35.10 International employee schemes

The PAYE Manual sets out several special PAYE arrangements for internationally mobile employees/short term business visitors.

Some of these are known, confusingly, as "EP App [no. 4, 5, 6 etc]", after the appendices used in the Employment Procedures Manual. That Manual was withdrawn in 2011, and the material is now in the PAYE Manual, but these labels have survived. It would be sensible to use new names, but it does not matter.

In outline:

<b>Arrangement</b>	<b>For</b>	<b>Relief</b>	<b>See para</b>
NT code	STBV with DTA relief	Individual PAYE exemption	35.11
EP App 8	STBV with no DTA relief	Annual PAYE	35.12
EP App 4	STBV with DTA relief	General PAYE exemption	35.13
EP App 5	Provisional foreign tax credit relief		35.14
EP App 6	Tax equalisation		35.15

Two further arrangements deal with NIC:

EP App 7A: For employees subject to an EP App 6 agreement, who are assigned to work in the UK from abroad and have an employer or host employer in the UK liable for secondary UK NICs. The employee pays NICs on earnings in this employment above the annual upper earnings limit (UEL) for the year or on earnings at or above the UEL in each earnings period throughout the year

EP App 7B For employees employed by a UK employer who are assigned to work abroad for a period of limited duration, but for more than a complete tax year, who have an ongoing liability to UK NICs whilst abroad. The employee will be paid above the UEL in every earnings period throughout the tax year and will receive some earnings and benefits derived from the employment from sources other than the UK employer. The employee will not be liable to UK tax on the earnings from employment

### 35.11 DTA relief: PAYE NT code

The PAYE Manual provides:

**PAYE81625: employee's earning paid for by overseas employer: double taxation relief** [May 2020]

#### **Arrivals in the UK**

Where a new arrival's UK earnings are paid by an overseas employer, Double Taxation relief might be due. If so, you may be able to issue code NT to the UK employer. But before you do so, ensure that a claim has been made. It is up to the employee to make a claim for Double Taxation relief and prove this claim...

Always send any correspondence about Double Taxation relief claims to the employee, not the employer.

If you do issue code NT to cover UK earnings

- Send a separate instruction to the employer to confirm the date from which the tax code operates
- Tell the employer to refund any tax already deducted
- Do not carry code NT forward to the second year's coding - apply a cumulative tax code to all earnings

### 35.12 PAYE 60-day rule: EP App 8

### 35.12.1 *History and background*

This topic has been discussed in HMRC consultation and response papers:

Consultation on short-term business visitors: Consultation document (May 2018) (“**the STBV consultation paper**”)

Tax and Administrative Treatment of Short Term Business Visitors from Overseas Branches: Summary of Responses (Aug 2018) (“**the STBV consultation response paper**”)<sup>22</sup>

The current rules replace the scheme introduced in 2015. PAYE Manual provides:

**PAYE81950: PAYE special arrangement for short term business visitors** [May 2020]

The PAYE special arrangement for STBV introduced in 2015 under regulation 141 ceased on 5 April 2020. For information concerning the previous arrangement see PAYE81949.

... This arrangement has been agreed under Regulation 141 of the Income Tax (PAYE) Regulations 2003. This regulation allows HMRC to arrange for the collection of tax in respect of PAYE income, if the normal operation of PAYE is considered ‘impracticable’.

The arrangement is a contractual agreement between the employer and HMRC ...

This scheme is confusingly called “EP App 8” (though the EP, withdrawn in 2011, never actually had an appendix 8).

### 35.12.2 *Who may benefit*

This scheme is for short term business visitors (as defined) who do not qualify for DTA relief.

The PAYE Manual provides:

**PAYE81950: PAYE special arrangement for short term business visitors** [May 2020]

... **Who does it cover?**

UK based employers who operate internationally. Many countries will

---

<sup>22</sup> For these documents see

<https://www.gov.uk/government/consultations/tax-and-administrative-treatment-of-short-term-business-visitors-from-overseas-branches>

be covered by a Double Taxation Treaty with the UK, but not all. These employers may also have branches overseas.<sup>23</sup> It will often be normal business practice to require non-resident employees to come into the UK to work for them and a liability to UK PAYE will arise.

However, in most cases these non-resident employees will only work in the UK for a short period of time usually no more than a few days or weeks. There can be a significant employer burden in monitoring employee movements and keeping all the records that are required so that PAYE can be reported in real time. If the employees are eligible for personal allowances, then in most cases there is ultimately no UK tax liability.

This arrangement allows the employer to return the information at month 12. This means that employees with no overall liability do not need to have tax deducted and apply for repayments through Self Assessment.

There are two exceptions where the annual PAYE arrangement does not apply:

However, any STBVs who meet the conditions for EP Appendix 4 should be reported under that arrangement.<sup>24</sup> ...

Non-resident directors of the UK company must not be included in this arrangement.

Why are directors excluded? Perhaps they are assumed likely to have substantial earnings, or at least exceeding the personal allowance? The way forward for directors with taxable earnings under the personal allowance would be to seek a NT code; see 35.11 (DTA relief: PAYE NT code).

### 35.12.3 *Operation of EP App 8*

The PAYE Manual continues:

**What does it cover?**

The special arrangement covers relevant payments of PAYE income and / or taxable benefits in kind provided to the STBV for the tax year that the arrangement is signed and any subsequent tax years until it is either

---

23 Author's footnote: Employees of the foreign branch do not qualify for STBV relief; see 36.14 (Employer foreign PE of UK co).

24 See 35.13 (DTA PAYE exemption: EP App 4).

terminated or reviewed.

The UK employer will total all relevant payments made by both the UK employer and home country employer to the STBV for UK workdays in the year and pay the tax due to HMRC. This will take into account Personal Allowances where appropriate, based on the tax tables at month 12 of the relevant tax year. If the employee is covered by employer tax equalisation arrangements, the tax must be grossed up within the calculation.

If the UK employer provides a benefit in kind to a STBV, they are not required to prepare a Form P11D in respect of that benefit. However, they must include the cash equivalent of the benefit and any other benefit provided by the home country employer (calculated in accordance with relevant sections of the Income Tax (Earnings and Pensions Act 2003) within any month 12 calculations they are making for the PAYE income paid to these employees.

If the employer bears the tax on the provision of the benefit in kind, the amount of the tax must also be grossed up within the calculation.

#### 35.12.4 60 UK workdays cap

The PAYE Manual continues:

The arrangement only applies to a STBV whose UK workdays in the tax year total 60 days or less.<sup>25</sup>

This is a different test from the DTA 60-day rule<sup>26</sup> because:

- (1) One counts workdays, not days of presence.
- (2) The 60 days may form part of a more substantial period (eg straddling a tax year).

This limit will not be relaxed and the employer will not be able to pay any tax via other methods, such as PAYE Settlement Agreement. The employer must include any STBV whose UK workdays total more than 60 days in their regular payroll or, if applicable, in accordance with EP Appendix 6 [tax equalisation scheme] payroll.

The 60 UK workdays does not include any day where the conditions for a PAYE Special Arrangements under EP Appendix 4 are met in respect of a whole day.<sup>27</sup>

---

<sup>25</sup> The limit increased from 30 to 60 days in 2020/21; see 35.12.7 (2020 changes).

<sup>26</sup> See 36.10 (DTA 60-day rule).

<sup>27</sup> See 35.13 (PAYE exemption: EP App 4).

Employers must determine whether days of travel to or from the UK are to be counted as UK workdays. Employers may apply the rule of thumb at EIM77020.<sup>28</sup>

However, where the STBV undertakes UK work other than travel on the particular day, overseas workday should be replaced by half UK workday and half overseas workday.

HMRC say:

*Question:* How are the work days counted in respect of the STBV Special Arrangement for the following circumstances: an STBV with 2 distinctive roles, 1 of which can be included on the EP Appendix 4 (as the economic employer remains overseas), and the other role which results in taxable workdays in the UK.

Are all days counted? Or just those relating to the taxable role?

*HMRC answer:* The Special Arrangement at PAYE81950 defines a “UK Workday” within the arrangement as “a day (or part day) where duties are carried out in the United Kingdom for the UK Employer.”<sup>29</sup>

This means that, for the purposes of the Special Arrangement, the days relating to the duties/role performed for the overseas employer (and so qualifying under EP Appendix 4) are not counted as part of the 30 UK workdays, except where duties of the taxable role are performed on the same day. This is on the understanding that the facts do indeed support the basis that the individual remains economically employed by the overseas entity for the duties for which PAYE is relaxed under EP Appendix 4.<sup>30</sup>

### 35.12.5 Annual PAYE

The PAYE Manual continues:

#### **Annual PAYE scheme**

Upon receipt and acceptance of the Appendix 8 application, HMRC will set up an annual PAYE Scheme to enable the employer to account for the tax on the payments made and the cash equivalent of any benefits provided to employees covered by this arrangement.

---

28 See 26.30.2 (International business travel).

29 Author’s footnote: Where does it say this?

30 Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

The UK employer must report the relevant payments made and/or the cash value of any benefits in kind provided for the UK workdays to one or more STBV(s) in that tax year on an RTI submission. These schemes RTI submissions must be delivered to HMRC by 31 May following the end of the relevant tax year up until the scheme is closed by HMRC or the employer. If there are no employees eligible to be included in a tax year, a nil submission must be filed by the deadline of 31 May.

The return must be made using an approved method of electronic communications.

Only one Appendix 8 scheme is permitted per each individual UK company or UK branch of an overseas company covered by this arrangement.

### **Payment of tax**

Tax is due on the payments made and any benefits provided by 31 May following the end of the relevant tax year.

The payment must be made using a 17-character reference, which is made up of the 13-character Accounts Office reference, followed by the last two digits of the year and the month of the tax period. The month used should always be 12.

For example, using tax year ending 2021, the reference format would be 123PP001234562112.

Interest will be charged on any tax due which is paid late.

### **Treatment of any taxable benefits in kind**

The employer must gross up the tax liability on the benefits in kind unless they recover the tax from the employee. A gross up of tax on PAYE income will only be required where the STBV is covered by employer tax equalisation arrangements.

## *35.12.6 Making/ending the agreement*

The PAYE Manual continues:

### **Ending the Special Arrangement**

Both the employer and HMRC can terminate the Special Arrangement. The employer is entitled to cancel the arrangement by giving HMRC written notice of the cancellation. This will take effect from a date agreed by the parties or, if the parties cannot agree, the earlier of the end of a period of 3 months from the date of issue of the notice or 6 April following the tax year in which the cancellation notice is given.

If the employer terminates the arrangement, the PAYE Regulations will apply to the relevant payments and form(s) P11D must be prepared in respect of benefits in kind provided to a STBV by the UK employer

from the date that the cancellation notice takes effect.

If there is

- an amendment to legislation which has a consequential effect on the arrangement;
- any change to a material fact which was a relevant factor in HMRC's decision to enter into the arrangement; or
- any operational difficulty which arises as a result of operating this arrangement.

HMRC can review the arrangement and where it considers the employer has not complied with its terms, it can cancel it by giving a cancellation notice in writing. This will take effect from a date agreed or, if not agreed, the earlier of the end of a period of 3 months from the date of issue or 6 April following the tax year in which the cancellation notice is given.

Following cancellation, the employer will be required to submit:

- Payments in real time, and
- Form(s) P11D in respect of any benefits in kind provided

#### **Self Assessment**

HMRC does not expect employees under this arrangement to submit SA returns unless they have another UK tax liability.

If a STBV needs to complete a UK tax return for other reasons, then the STBV would also need to include all Appendix 8 earnings within the Employment page.

#### **National Insurance contributions**

The arrangement is agreed under the authority of the PAYE Regulations and there is no equivalent legislation for National Insurance. Any STBV who has a Class 1 NICs liability cannot be included and any Class 1 NICs must be paid within the relevant earnings period.

Any requests to review this decision should be referred to the Expat Team within Business Tax & Customs.

### *35.12.7 2020 changes*

The STBV consultation response paper provides:

3.1. On 29 October 2018, the government announced that two changes would be made to the PAYE special arrangement to better ease the administrative burden of operating PAYE on STBVs from foreign branches.

3.2. Firstly, the UK workday rule will be increased from 30 days or less to 60 days or less.

[1] This will open up the PAYE special arrangement to a greater

number of STBVs from branches, and  
[2] it will reduce the need for employers to monitor or restrict business travel when STBVs approach the 30 workday limit.

Perhaps the less said about the wording of point [2] the better.

3.3. Secondly, the existing PAYE reporting and payment deadlines of 19 April and 22 April will be changed to 31 May to allow employers more time to gather relevant information about their STBVs to operate PAYE accurately. It was clear that these deadlines are too restrictive to businesses and are making it difficult for them to comply with their obligations.

3.4. Both changes will be introduced from 6 April 2020.

HMRC Employer Bulletin provides:

If you are using the current PAYE special arrangement, you will need to sign-up to the new Appendix 8. We will write to you with more information on how to do this later this year.

Please note that the filing and payment deadlines for 2019 to 2020 annual return will remain as 19 April 2020 and 22 April 2020 respectively. The UK workday limit for the 2019 to 2020 tax year will remain as 30 workdays.<sup>31</sup>

But the PAYE Manual provides:

**PAYE81950: PAYE special arrangement for short term business visitors** [May 2020]

Important Note: Due to the recent COVID-19 outbreak and accompanying advice the Prime Minister and HM Government have issued, we recognise most customers and agents may either be in self-isolation or will be working from home, therefore access to your usual resources may be limited. Therefore, we've reassessed our position and outline the following:

- The deadline to return the end of year report has been extended from 31 May 2020 to 31 July 2020.

### 35.13 PAYE exemption: EP App 4

The STBV consultation paper provides a summary:

---

31 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/839773/English.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/839773/English.pdf) (Oct 2019).

1.5 In the UK an administrative easement is available to UK companies with STBVs arriving from their overseas subsidiaries. The UK company can apply to relax their obligation to operate Pay As You Earn (PAYE) on the relevant earnings of an individual who is:

- tax resident in a country with which the UK holds a DTA;
- coming to the UK to work for a UK company for less than 183 days in any twelve month period; and
- economically employed by a non-resident entity

The PAYE Manual provides:

**PAYE 82000 PAYE operation: international employments: EP appendix 4: criteria for short term business visitors [Jun 2020]**

**... Short Term Business Visitor Arrangements**

The CWG2 Employer Further Guide to PAYE and NICs advises employers that it may be possible to relax strict PAYE requirements for employees on short-term business visits to the UK, and tells employers to contact their HMRC Office.

This arrangement provides that PAYE can be disregarded in certain circumstances.

If an employer has only one or two employees potentially affected they may like to consider applying for an NT code (see PAYE81625) on an individual basis instead.<sup>32</sup>

### 35.13.1 *PAYE exemption: Conditions*

The PAYE Manual continues:

#### **Conditions**

This arrangement must only be applied where individuals are

- Resident in a country with which the UK has a Double Taxation Agreement under which the Dependent Personal Services / Income from Employment Article (Article 15 or the equivalent) is likely to be competent
- Coming to work in the UK for a UK company or the UK branch of an overseas company, or are
- Legally employed by a UK resident employer, but economically employed by a separate non resident entity
- Expected to stay in the UK for 183 days or less in any twelve month period

---

32 See 35.11 (DTA relief: PAYE “NT” code).

Provided that it can be shown that for specifically named employees whose presence in the UK is 60 days or more, the UK Company or branch will not in fact ultimately bear the remuneration specified.

In short, the arrangement applies where an employee can expect DT relief on UK source employment income. For DT relief, see 36.2 (Employment income DT relief).

Where agreement is reached and in all other aspects the employee falls within the guidelines, then that part of the remuneration not ultimately borne by the UK Company or branch can fall within this arrangement. See also the three 'Notes: Definitions' below regarding employees receiving some remuneration that is ultimately borne by the Company or branch and some which is not.

These arrangements will not apply where the expense of the remuneration is passed on to another UK Company or branch and not recharged overseas.

For those whose presence in the UK is 59 days or less, it is only necessary to show that the employees were paid via a non resident employer's payroll.

This arrangement must not be applied where individuals are employed by a UK resident employer including an overseas branch of a UK resident employer except where the individuals are sent abroad to work for a separate non resident entity and return to perform duties in the UK solely for that non resident employer. Such individuals are not covered by the 60 day rule.

### 35.13.2 *Remuneration ultimately borne by non-resident*

The PAYE Manual continues:

**Notes: Definitions**

Where used in this arrangement, the term remuneration has its widest possible meaning and includes salary, wages, benefits, allowances and expenses

Where an employee otherwise falling within this arrangement receives remuneration borne by companies in different countries then

1. Remuneration not ultimately borne in the UK - falls within this agreement<sup>33</sup>
2. Remuneration ultimately borne in the UK - does not fall within this

---

33 This is consistent with the OECD Model: see 36.3 (Salary/wages/ remuneration).

agreement unless the presence in the UK is for 59 days or less and those days do not form part of a longer period (see below) or HMRC Office has agreed a dispensation for it. It is therefore possible for an employee falling within this arrangement to also have a PAYE liability. If otherwise appropriate this PAYE liability can be met using modified PAYE procedures as described in EP Appendix 6, PAYE82002<sup>34</sup>

‘Ultimately borne’ means the company finally bearing the cost after all recharging of any nature

Although employee remuneration ultimately borne by the UK Company (except in 2 above) is not normally covered by this particular arrangement, the OECD commentary provides examples of situations where the UK Company would not be regarded as the economic employer and treaty exemption may therefore apply, including where the employee is present for 60 days or more. Employers may request agreement from HMRC for specified circumstances where these arrangements may be applied and PAYE deductions need not be made. Failing such agreements, a separate claim for treaty relief should be made by the employee. This further relaxation is initially for a trial period and may be withdrawn.

The employee does not have to claim treaty relief where a STBV scheme is in operation.<sup>35</sup>

HMRC refer to the last sentence, and say:

The trial period is continuing with no specific end date. HMRC will continue to monitor the position and will endeavour to liaise with Forum members before any further changes are made.<sup>36</sup>

The PAYE Manual continues:

**PAYE 82000 EP appendix 4: criteria for short term business visitors [Jun 2020]**

...

Full Payment Submissions do not need to be completed for EP Appendix 4 employees

The PAYE manual next discusses the various rules for application of

---

34 See 35.15 (Tax equalisation: EP App 6).

35 See STBV scheme consultation document para 3.16.

36 Expat Forum Q&A log (July 2019) (informally circulated).

treaty relief, but that need not be set out here, as it is fully discussed elsewhere.<sup>37</sup>

### 35.13.3 *Terms of EP App 4 agreement*

#### **General principles of an EP Appendix 4 arrangement**

1. It applies where there would otherwise under PAYE regulations be a requirement on the part of the host employer, UK branch or legal employer to make PAYE deductions
  2. It only applies to employees who have not become UK resident for tax purposes or if UK resident, are treaty resident in the treaty partner country
  3. In all cases involving short-term assignment of employees to the UK, the employer will put in place some form of internal reporting system to keep as accurate as possible a record of employees visiting the UK on business. It is expected that this system will have the following minimum requirement
    - Employees will periodically report days spent in the UK on business to the central point controlling this arrangement
    - Employees should not spend more than 30 days intermittently in the UK in any 12 month period without reporting to that central point
  4. All records that are kept under this arrangement are within Regulation 97 IT (Pay As You Earn) Regulations 2003 and so must be retained for the time limits that apply and produced for inspection
  5. Where liability is subsequently found to arise on payments of PAYE income made to an employee, the employer will be expected to pay the tax that ought to have been deducted from or otherwise paid in respect of each payment. Late payment of PAYE tax will attract interest in the usual way. Late filing and late payment penalties will not apply where HMRC accepts that the employer backdated the PAYE and filed the FPS as soon as could be reasonably expected following a change in circumstances preventing an employee from being included in this arrangement
  6. Should it become apparent that PAYE is not being applied in the case of employees who do not satisfy the relevant criteria, HMRC reserves the right to insist that PAYE be operated strictly for all employees from day 1
  7. Any employee who cannot fulfil the conditions set out below should have PAYE operated from day 1
  8. The treatment for NICs purposes of employees coming to the UK is covered in the CWG2 Employer Further Guide to PAYE and NICs
- The time limits given in EP Appendix 4 are administrative only and are over-ridden by any legislative time limits. For example if a taxpayer needs to complete a Self Assessment return then the normal rules relating to Self Assessment apply.

#### **Visitors to the UK covered by the 60 day rule<sup>38</sup> for 1 - 30 days**

---

37 See 36.13.2 (Counting days).

38 See 36.10 (The 60-day rule).

No requirements for either employer or employee to fulfil other than where the period is part of a longer period of 60 days or more.

**Visitors to the UK covered by the 60 day rule for 31 - 59 days**

For an employee who spends no more than 59 days in the UK during the tax year, PAYE can be disregarded provided it is confirmed that

1. there is no formal contract of employment with the UK employer
2. the 59 days do not form part of a more substantial period. (See DT1922 and above regarding the 60 day rule.)

**All visitors to the UK not covered by the 60 day rule for 1 - 90 days and other visitors to the UK for 60 - 90 days**

For an employee in the UK for not more than 90 days in the tax year, PAYE can be disregarded provided that the employer supplies the information below by 31 May following the end of the tax year

- Full name of employee
- Last known UK and overseas addresses of employee
- Nature of duties undertaken
- Date commenced
- Date ceased
- To which country a tax return covering worldwide income is submitted

And confirms that the UK Company does not

- Ultimately bear the cost of the employee's remuneration
- Function as the employee's employer during the UK assignment. (See DT1922 for further information)

**Visitors to the UK 91 to 150 days**

For an employee in the UK for a period of 91 days but not exceeding 150 days in the tax year PAYE can be disregarded provided that

1. All of the information requested for visitors up to 90 days is provided and in addition
2. In the case of non-US citizens and Green Card holders, the employee provides a statement from the overseas Revenue authority confirming residence in the other state for tax purposes throughout the period in the UK. This statement should be passed to the HMRC Office by 31 May following the end of the relevant overseas tax year. This arrangement is only provisional until the relevant certificate is received.

In the case of US citizens and Green Card holders it will only be necessary for the employee to provide evidence of continuing residence in the US. (See DT19861A for further information.)

**Visitors to the UK 151 to 183 days**

Applications will be made on a named individual basis for authority to include the employee in this arrangement. The application will be made as soon as it can reasonably be anticipated that the employee will be present in the UK for more than 150 days. The application will include

1. All of the information requested for visitors up to 90 days and confirmation that the statement from the overseas Revenue authority will follow by the relevant 31 May

2. A statement by the employee giving reasons why he/she considers himself/herself to be treaty resident in the treaty partner country by reference to the appropriate article in the Double Taxation Treaty

Helpsheet HS302 provides more information about dual residence generally and the tests to be applied to determine the country of tax residence.

HMRC will consider the circumstances and will

1. Notify the employer that the individual can be included in the Appendix 4 arrangement, or
2. Authorise code NT and issue a Self Assessment tax return, or
3. Confirm that PAYE should be applied and issue a Self Assessment tax return

Signed [etc]

Authorised on behalf of HMRC: Signed [etc]

Applications should be sent to: Charities, Savings & International 3, HM Revenue and Customs, BX9 1AJ

### 35.13.4 *EP App 4: Mistakes*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

3.9 Another common area that HMRC find errors is in respect of EP Appendix 4 Arrangements, particularly the practical operation.

3.10 The arrangement only applies where individuals are:

- Resident in a country with which the UK has a double Taxation Agreement under which the Dependent Personal Services/Income from employment article is likely to be competent.
- Coming to work in the UK for a UK company or the UK branch of an overseas company, or are
- Legally employed by a UK resident employer, but economically employed by a separate non-resident entity.
- Expected to stay in the UK for 183 days or less in any 12 month period.

3.11 HMRC has found the most common error is when individuals have been included even if the country in which they are resident has no DTA with the UK.

3.12 Recently a case has come to light where a customer came the UK from Hong Kong as a STBV. Whilst the UK and HK do have a DTA, there is a fourth condition within Article 14 Paragraph 2 which is not present in other DTAs. It states: d) the remuneration is taxable in the first-mentioned Party according to the laws in force in that Party. This means that for STBVs in the UK, the remuneration has to be taxable in Hong Kong for condition d) to be met and hence for double taxation relief to be claimed.

3.13 If an employee is employed by a Hong Kong company to work in

Hong Kong then their full income is chargeable in Hong Kong even if part of the duties are carried on outside Hong Kong. However, they may claim exemption of income or relief from tax under certain circumstances on a year-by-year basis.

3.14 In the case in question an employee of a UK employer that was assigned to work in Hong Kong made visits to the UK as a STBV.

They were included in an appendix 4 arrangement but subsequently the employer realised that the UK duties would not be assessable in Hong Kong and as such condition d) of para 2 Article 14 is not satisfied and treaty relief is not available. The remuneration from their duties in the UK should therefore be taxed in the UK.

3.15 HMRC wanted to flag this up to employers as there may be similar problems with STBVs coming from Singapore as this DTA contains a similar clause to the Hong Kong DTA<sup>39</sup>

### 35.13.5 *EP App 4: Administration*

HMRC say:

Unfortunately, Appendix 4 returns can no longer be filed via the mailbox. The available methods for filing are either via the postal system or via shared workspace.<sup>40</sup>

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

5.2 Please do not send EP Appendix 4 reports to us using more than one source. The preferred method is through our digital mail system, the postal address is:

HMRC Personal Tax International Operations S0733 PO Box 203  
BOOTLE L69 9AP

We have received a number of emails stating that the agent or employer has also sent a hardcopy of the report. This is not required – as it just duplicates our work and as this time of year is extremely busy for us, it creates major delays in us dealing with more pressing issues.

---

39 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/642764/JOINT\\_EXPATRIATE\\_FORUM\\_ON\\_TAX\\_AND\\_NICS\\_-\\_Minutes\\_12\\_July\\_2017.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/642764/JOINT_EXPATRIATE_FORUM_ON_TAX_AND_NICS_-_Minutes_12_July_2017.pdf) (12 July 2017)

40 Expats Forum: Q & A Log

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/897729/HMRC\\_Joint\\_Expatriate-Forum-Tax\\_NICs\\_minutes-11-June-2020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expatriate-Forum-Tax_NICs_minutes-11-June-2020.pdf)

5.3 we will no longer be acknowledging all EP 4 reports. If we need any further information we will write out and ask for it. This means that for reports only recording STBVs of less than 60 days no acknowledgement will be issued.

5.4 Not all Business areas within HMRC can accept and receive post via email. The reason being that not all emails are secure. Operations have been receiving an increasing amount of unsolicited emails from agents where correspondence really should be coming through DMS or through Shared Workspace.

5.5 HMRC can still receive post by fax. The fax number is 03000 533121.

5.6 Customer calls now go through to staff on another team. These customer operations staff have been trained to deal with general expat issues, however anything technical will still be dealt with by our expat operations team.

5.7 Finally when submitting information to HMRC regarding new starters, please:

- Supply the (correct) date of birth.
- Provide us with the correct PAYE ref for the employer
- Confirm when (if applicable) the first Full Payment Submission was made.<sup>41</sup>

### 35.14 Foreign tax credit: EP App 5

The PAYE Manual provides:

**PAYE82001: EP appendix 5: net of foreign tax credit relief** [May 2020]

... **Employer required to deduct foreign tax**

The CWG2 Employer Further Guide to PAYE and NICs, advises employers to contact HMRC if they have to do this. If they do, HMRC considers the position as set out in PAYE81715.

PT Operations North East England, BX9 1BX are responsible for authorising the employer to operate an Appendix 5 arrangement.

Appendix 5 arrangements

- Only apply to UK employers who are required to deduct foreign tax from payments being made to employees sent to work abroad whilst continuing to deduct UK PAYE from an employee's pay using their UK tax code and UK tax tables
- Allow provisional relief for double taxation for employees who must pay

---

41 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/642764/JOINT\\_EXPATRIATE\\_FORUM\\_ON\\_TAX\\_AND\\_NICS\\_-\\_Minutes\\_12\\_July\\_2017.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/642764/JOINT_EXPATRIATE_FORUM_ON_TAX_AND_NICS_-_Minutes_12_July_2017.pdf) (12 July 2017)

both UK tax (by a PAYE deduction) and foreign tax from the same payment of earnings

- Should not be followed by the employer or agent for any other contract(s) or employees not notified to HMRC without prior application and authorisation

All PAYE and NIC reporting requirements must still be fulfilled by the employer. There can be no question of abandoning PAYE/NIC altogether for the duration of the overseas contract.

### **Double taxation**

If the employee has to pay foreign tax direct to an overseas Revenue authority on payments taxed through PAYE, advance DTR can be given through the PAYE code (see PAYE81715).

In many overseas contract situations, where an employee is abroad for less than 6 months no overseas tax is ultimately found to be due. This is because the employee will usually have personal protection under the terms of many Double Taxation Agreements (DTA).

However, it cannot be assumed that DTA protection is available on the basis that the employee works in an overseas country for less than 183 days. The relevant DTA and the other authority should be consulted. In particular, the 183 day protection may not be available where

- The employee works for a resident of the overseas country who functions as their employer

Or

- Their contractual employer has an identifiable 'permanent establishment' in the overseas country

Or

- The DTA says so

If these circumstances apply, or where no DTA exists, overseas tax is due from day 1. The overseas country may also impose withholding at source obligations on the employer even though the UK employer is still required to operate PAYE/NIC on payments made to the employee.

It is in these specific circumstances or where the 183 days period is exceeded but the taxpayer remains UK resident, that HMRC may then authorise an Appendix 5 arrangement.

Note: If foreign tax is paid by the employer on the employee's behalf, HMRC would not authorise an Appendix 5 arrangement. Payment in this manner could also constitute a pecuniary liability.

### **Employers responsibilities under this arrangement**

The employer must only give credit by this method for foreign tax actually payable on and deducted from the employee's wages and paid to the overseas authority. Credit is given by reducing the amount of UK PAYE due from wages by the amount of foreign tax deducted in the same tax period.

- The credit is restricted to the amount of UK PAYE tax due from the employee's wages (NICs deductions and contributions are not affected in any way)

- Any net UK PAYE tax balance remaining due should be reported and paid to HMRC by the normal payment date with all the NICs due
- Any UK PAYE refunds due during the year because of a change of code number must be restricted to the net UK PAYE deducted from the employee during the tax year
- The employer and/or the employee must advise HMRC where any foreign tax has been refunded

If an employer advises that foreign tax is paid by the employer on the employee's behalf, HMRC would not authorise Appendix 5 if an application is made. Payment in this manner could also constitute a pecuniary liability.

#### **Employee redeployed, no longer overseas**

For employees who cease to work overseas but continue in the same employment in the UK or another location, the employer must

- Ensure details of pay and UK tax deducted up to the date of redeployment together with the foreign tax credit are reported
- Operate the employee's existing code on the Week 1 or Month 1 basis

#### **Employee leaves employment or dies**

Employers should take the following action where an employee leaves the employment or dies

- Submit a final FPS for the employee showing the date of leaving or death as appropriate and showing the code as if it had been operated on a Week 1 / Month 1 basis
- Any P45 issued to a leaver should be completed as if the tax code has been operated on the Week 1 or Month 1 basis, showing the net UK tax deducted. This is to ensure that any new employer does not operate it on a cumulative basis

A statement of the overseas tax deducted, for which credit has been given against UK PAYE, should be issued to the departing employee and it should contain

- The Total Taxable Pay to date
- The Total Foreign Tax deducted or paid
- The amount of UK PAYE that has been offset by the foreign tax

#### **HMRC action once Appendix 5 is authorised**

Where Employer Technical team authorise an Appendix 5 they

- Must confirm this in writing
- Request the name and NINO of each employee to be included in it (retrospective addition of employees cannot be authorised)
- Ask the employer to provide a quarterly tax year update of any changes in the number of employees included
- Use EBS Function AMEND EMPLOYER NOTES to record that an Appendix 5 arrangement has been agreed
- Record the employers details on a database spreadsheet

#### **At the end of the tax year**

At the end of the tax year the employer should send HMRC a statement showing

- The name and NINO of each employee included in the arrangement
- The total payment which both PAYE and foreign tax was operated on

- The total foreign tax deducted which was set off against that employees UK PAYE deductions due (foreign tax credit relief)
- The amount of foreign tax paid to the overseas authority - the employer should also provide evidence the foreign tax has been paid.

This information should be sent to a separate Employer technical team that completes an end of year tax review. Their address is HMRC, Appendix 5 team, The Triad, Stanley Road, Bootle, L75 1HW

This team takes the following actions in PAYE Service upon reviewing all employees in the arrangement

- Enter a Contact History note; 'employee is included in an Appendix 5 arrangement'
- Set the inhibit automatic reconciliation signal for CY and CY+1 (this should be set on the record for every year until the employment ceases)
- Set the PAYE direction indicator on the Employment details screen

For redeployments, leavers and deceased cases on receipt of the P45(1) or equivalent on each employee record

- Enter a Contact History note; 'Total tax to date (enter date of leaving or redeployment) is net of Foreign Tax Credit Relief'
- Update the current year's record to add a Week 1 / Month 1 basis to the latest code on the record

#### **Errors**

Employers should have included any net UK tax deducted on their employees Full Payment Submissions throughout the year and any errors should have been corrected before the end of the tax year.

If an error has not been corrected in the final FPS on or before 19 April, the employer must submit an Earlier Year Update (EYU).

Note: Employers should not use the FPS or EYU process to recover deductions of tax, where they discover the employee has overpaid foreign or UK tax.

Correction by FPS or submission of an EYU is only in respect of actual errors made by the employer. For instance showing a tax deduction of £1000 as £100, when £1000 was the amount actually deducted from pay – the employer would amend to increase tax by £900.

### 35.14.1 *Action once agreement authorised*

The PAYE Manual continues:

Following an agreement to the relaxation of PAYE in accordance with Appendix 5, you must take the following action

- On the employers record, use EBS Function AMEND EMPLOYER NOTES to record that an arrangement under Appendix 5 has been agreed
- The Employers Technical Team will update the database spreadsheet that records these schemes

#### **Notification of employees included in the arrangement**

The employer must send details of employees included in this arrangement and keep you up to date with changes to those details on a regular basis (at intervals

agreed between you and the employer).

On receipt of these details, you must take the following action to ensure that the taxpayer's liability is reviewed at the end of the year.

In all cases on each employee's record

- Enter a note on Contact History that the employee is included in an arrangement under Appendix 5
- Set the inhibit automatic reconciliation signal on the PAYE Service record for CY and CY+1 (this should be set on the record for every year until the employment ceases)
- Set the PAYE direction indicator on the Employment details screen

For redeployments, leavers and deceased cases on receipt of the P45(1) or equivalent on each employee record

- Enter the following note on Contact History 'Total tax to date (enter date of leaving or redeployment) is net of Foreign Tax Credit Relief'
- Update the current year's record to add a Week 1 / Month 1 basis to the latest code on the record

**Note:** A cumulative code for these cases cannot normally be restored in-year. If you receive a request for a cumulative code or an in-year repayment, you should tell the customer that this is not possible. If they press the matter you should contact Personal Tax Customer, Product & Process, PAYE Technical, Shipley for advice.

#### **At the end of the tax year**

The introduction of PAYE reporting in real time does not change the application of Appendix 5, where the employee is liable to pay foreign tax as well as UK PAYE.

Employers should have included any net UK tax deducted on their Full Payment Submissions throughout the year and any errors should have been corrected before the end of the tax year. If not corrected on the last FPS or by 19 April, the employer will have to submit an Earlier Year Update (EYU).

At the end of the tax year the employer should send HMRC a statement showing

- The name and NINO of each employee included in the arrangement
- The amount of income subjected to both PAYE and foreign tax
- The total foreign tax deducted
- The amount of foreign tax deducted and remitted to the overseas authority which was set off against that employees UK PAYE deductions due (foreign tax credit relief)

The employer should also provide evidence that the foreign tax has been paid.

This information should be sent in the first instance to

HMRC, Appendix 5 team, The Triad, Stanley Road, Bootle, L75 1HW.

#### **Action at employer level**

When the employer submits details of the foreign tax credit given with the evidence of foreign tax paid for each employee included in the arrangement, Bootle will follow their existing guidance and risk assess the cases by checking NPS and SA as appropriate.

#### **Action at employee level**

- On receipt of details provided by the employer, for each employee you should
- Make a note on Contact History to record the foreign tax credit given by that employer in that year
  - Proceed in accordance with the guidance at PAYE93038. ...

HMRC say:

**Individuals claiming FTCs with no other Self-assessment criteria**

We have recently had some conflicting advice from HMRC in relation to the claiming of FTCs for groups of individuals with no other Self-Assessment criteria. These were relatively low paid employees and the Appendix 5 net of foreign tax credit relief scheme was not used. For one client, HMRC processed individual repayment claims without tax returns but HMRC has confirmed that Self-Assessment tax returns must be sent in response to a similar request on behalf of another client. In both cases, the employees were entitled to relief for relatively small amounts of foreign tax paid on earnings which were also fully taxed in the UK via RTI. Most claims were for no more than a few hundred pounds and relevant data/ repayment mandates were provided. Please let us whether HMRC is willing to continue to consider claims without returns in these circumstances and if so the information which should be supplied as part of the claim.

**HMRC Answer**

A claim to Foreign Tax Credit Relief is not one of the SA criteria, the criteria for SA is someone having any foreign income other than dividends of £300 or less. For Appendix 5 employees, however, though they might carry out the duties of their employment abroad their earnings are paid in the UK through a UK payroll to a UK resident so we don't interpret them as being foreign income. We won't, therefore, put someone in SA just because they are in an Appendix 5 arrangement. If they don't meet the SA criteria for any other reason we will give them Foreign Tax Credit Relief through the NPS calculation.<sup>42</sup>

**35.15 Tax equalisation: EP App 6**

See 26.42 (Tax equalisation).

The PAYE Manual provides:

**PAYE82002 - PAYE operation: international employments: EP appendix 6: modified PAYE in tax equalisation cases [May 2020]**

---

42 Expat Forum Q&A log (July 2019) (informally circulated).

**Application for modified PAYE for tax equalised expatriate employees from 6 April 20\_\_**

Tax equalisation generally describes an arrangement between an employer (see Note 1) and a foreign national employee who comes to the UK to work. Under the terms of an agreement, the employee (see Note 2) is entitled to specified net cash earnings and non-cash benefits. The employer undertakes to meet the UK Income Tax liability arising from the earnings and to ensure that the employee’s UK tax affairs will be handled by a professional adviser or by an in-house specialist experienced in tax equalisation issues.

**For an employee to be included in an arrangement established under this application, the employer must equalise liability to UK Income Tax on all general earnings subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, or domiciled outside the UK.**

An application indicates that the employer agrees to operate PAYE on a gross-up of cash earnings and non-cash benefits for all employees eligible to be included in this arrangement and has undertaken with the employees to pay any residual UK liability on earnings based on each employee’s self assessment. Employers should ensure that employees complete their self-assessment returns in accordance with the guidance in Help Sheet IR212.

**Note 1:** For the purposes of this application, ‘employer’ includes a ‘relevant person’ for whom an employee works in terms of section 689 Income Tax (Earnings and Pensions) Act 2003 (ITEPA).

**Note 2:** For the purposes of this application, ‘employee’ includes an ‘office holder’.

**Note 3:** Where the employee is tax equalised on all general earnings but not on specific employment income, for example, on taxable share related events, or on restricted securities which are taxed both as general earnings on award and subsequently as specific employment income when restrictions are lifted, the employee may still be covered by the arrangement as long as all the other conditions are satisfied.

**Note 4:** Employers who payroll actual rather than estimated benefits in kind (excluding living accommodation, vouchers and credit cards , interest free and low interest (beneficial) loans) may register for the online Payrolling Benefits in Kind (PBIK) service. Where the PBIK service is used, forms P11D will not be required under paragraphs 15. and 16. below.

**Employer name:**.....

**Employer address:** .....

**Employer PAYE reference:** .....

**Calculation of estimated PAYE on tax equalised earnings**

1. We will prepare a best estimate of all earnings including cash allowances and non-cash benefits for the year at the beginning of each year, grossed-up for tax purposes and calculate PAYE tax without restriction for the 50 per cent ‘overriding limit’. We will use the Scottish rates of income tax for employees who are Scottish taxpayers. The best estimate will include, where relevant, the

annual salary, any cash bonus awards made to 5 April and non-cash benefits provided by a home country employer.

2. We will undertake an in-year review during the period December to April to take account of any material changes, and in particular, to ensure that

1. Calendar or tax year end bonuses are accounted for
2. Taxable share related events are accounted for

3. Where we do not equalise liability in respect of awards under 2(b) above

1. PAYE must be applied in accordance with all relevant statutory provisions and regulations and
2. In the case of notional payments, where an employee does not make good the due amount within the period of 90 days specified by section 222(1) (c) ITEPA 2003, we will include additional earnings in this arrangement equivalent to the due amount. These additional earnings will be grossed-up for tax purposes.

4. We will update the estimated PAYE calculation during the year to reflect arrivals and departures of employees subject to this application.

5. We will exclude from the estimated PAYE tax calculation contributions we make (employer contributions) to a qualifying overseas pension scheme in respect of an employee who is a relevant migrant member of that scheme. Subject to the conditions specified in paragraph 51 of Schedule 36 to the Finance Act 2004, we will exclude employer contributions to an overseas pension scheme in relation to which the employee received corresponding relief in 2005-06. We will also exclude employer contributions to overseas schemes where the employee is entitled to relief from UK tax under the terms of a Double Taxation Agreement.

6. We will take into account employee contributions to the overseas pension schemes referred to in paragraph 5 where we know the amounts involved and are satisfied that each employee is entitled to relief for contributions as a relevant migrant member or with pre-commencement entitlement to corresponding relief or under the terms of a Double Taxation Agreement.

7. Where we give provisional relief for overseas workday relief based on each employee's workday history or as anticipated by the employees where they join during the tax year, we will withdraw personal allowances, apply code 0T, or SOT for Scottish taxpayers and notify HMRC accordingly. Any tax gross-up will be applied after the earnings have been apportioned between UK and non-UK duties. We will enter code 0T, or SOT as applicable on the payroll record and Full Payment Submissions.

8. Where paragraph 7 does not apply, we will give personal allowances by applying the emergency code on a cumulative basis using the S prefix for Scottish taxpayers where applicable when calculating PAYE tax. We will enter that code on the payroll record and Full Payment Submissions.

9. We will take relief for foreign tax into account in respect of UK residents working abroad where an agreement has been reached with HM Revenue and Customs (HMRC) in accordance with the PAYE Manual EP Appendix 5. We note in particular the requirement that an overseas country imposes a withholding

at source obligation on earnings that are subject to PAYE.

10. We will not apply PAYE to the earnings of a tax-equalised employee covered under separate arrangements in EP Appendix 4 of the PAYE Manual. Where it later appears that such earnings are not exempt from UK tax under the terms of the relevant Double Taxation Agreement, we will include the employee in this arrangement and notify HMRC accordingly.

11. We will send one FPS each month no later than the 19th of the month following the end of the tax month. The FPS will show the estimated earnings and income tax calculated in accordance with this agreement. The FPS will include an entry in the Late Reporting Reason field to prevent late filing warning letters. Enter A – Notional payment: Payment to Expat by third party or overseas employer. We undertake to pay 1/12th of the estimated PAYE for the tax year each month by the 19th or 22nd of the following month (depending upon the payment method). Where the number of employees covered by this arrangement at any one time is five or fewer, we undertake to pay 3/12ths of the estimated PAYE tax on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April ('the quarterly basis'). If the number of employees covered by this arrangement increases to more than 5 at any one time in the course of a year and is likely to remain at that higher level, we will make payments of estimated PAYE by the 19th or 22nd of each month from the start of the following tax year. If the number of employees covered by this arrangement at any one time reduces to five or fewer in the course of a year and is likely to remain at that lower level, we will make payments of estimated PAYE on the quarterly basis from the start of the following tax year. Late payment penalties under schedule 56 of the Finance Act 2009 will not apply to payments under this arrangement providing that tax is paid at the agreed time. Schedule 56 penalties will be charged if the estimated tax is not paid as specified in this paragraph.

12. We agree that making an Earlier Year Update (EYU) is not appropriate for employees included in this arrangement. If a self-assessment tax return is submitted with an incorrect PAYE tax figure we undertake to ensure the return is amended, to reflect the correct figure, if we are within the amendment time limit (12 months from the original return deadline). If we need to amend the PAYE tax figure after the amendment limit we agree to

1. Write to HMRC to make an overpayment relief claim
2. Write to HMRC to make a disclosure of any further PAYE tax due

#### **Arrivals and departures**

13. We shall submit a Full Payment Submission which will confirm for each employee covered by this agreement

- That the employee is included in a EPM6 agreement
- A relevant starting date
- The length of time the seconded employee intends to work in the UK and if they intend to live here
- If they are from the European Economic area
- A leaving date - the actual leaving date may be entered on the final Full

Payment Submission for the year where a month 12 reconciliation is undertaken. In these circumstances, the Irregular Employment Pattern Indicator should be set to keep the record open.

**Year end requirements**

14. Forms P60 will be given to the employees by 31 May after the end of each tax year. The figure of pay for each employee will comprise all cash payments and non-cash benefits in respect of which PAYE tax has been calculated after grossing-up. The figure of tax will be the total amount of PAYE tax paid under this arrangement in respect of the employee concerned.

15. We accept that due to the inherent nature of these modified arrangements, over and underpayments of tax may arise compared with the amount of tax that would otherwise have been due if normal PAYE procedures had been applied. Provided that the procedures as outlined in these arrangements are followed, interest will not be charged in accordance with the PAYE regulations in respect of any residual income tax liabilities as shown by the employees' tax returns. However, it is accepted that interest will run on any part of the estimated PAYE for a tax year due to have been paid under this agreement which (depending upon the payment method) reaches HMRC after 19 or 22 April, as appropriate, following the end of the tax year.

16. We shall submit in respect of each employee covered by these arrangements a form P11D, or an approved substitute, and associated form P11D(b) by 31 January following the end of the tax year. We acknowledge that where all statements are not submitted by 31 January following the end of the tax year, penalties under Section 98 TMA 1970 may arise. This is on the basis that the earnings in question ought to have been provided on forms P11D or approved substitutes before 7 July following the end of the tax year.

**Submission of employee's self assessment tax return and calculation of tax liability**

17. We will have systems and procedures in place to ensure that each employee's self assessment will include actual cash remuneration, all benefits and reimbursed expenses payments and other amounts chargeable to tax as employment income, grossed up on a current year basis. Each employee's tax return will include a note in the notes section of the relevant Employment Page to the effect that the employee is tax equalised and Modified PAYE has been applied.

**Payment of residual Income Tax liability**

18. We will pay any additional tax found to be due under these arrangements following the submission of the employee's tax return by 31 January following the end of the tax year. Alternatively, if a refund is due, the appropriate repayment claim mandated to us or (if different) to the employee's contractual employer will be submitted. We understand that as a consequence of these arrangements there will be no requirement to make payments on account of tax liabilities. We acknowledge that a tax return for an employee covered by these arrangements should incorporate a claim to cancel payments on account. We further understand that HMRC should not issue Statements of Payments on

Account to employees included under these arrangements.

19. We understand that for employees who receive overseas workday relief any overpayments of PAYE will not be treated as a remittance of foreign earnings where repayment is mandated to an employer in the UK.

**National Insurance Contributions**

20. These arrangements do not apply to National Insurance Contributions (NICs). In cases where the employee is liable for Class 1 NICs and taxable benefits are provided that attract Class 1A NICs, NICs must be accounted for in the normal way unless separate arrangements are agreed with HMRC as set out in EP Appendix 7A of the HMRC PAYE Manual.

**Statement**

21. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law or should operational difficulties arise or the arrangements are seen to be deficient, for example

1. Where significant and / or regular underpayments of income tax on employment income have arisen in respect of employees’ self assessment returns and in the opinion of HMRC that tax ought to have been accounted for in the calculation of estimated PAYE provided for under these arrangements
2. Where an employer fails to pay tax on time and / or to ensure that returns and P11Ds are filed on time such that a liability arises to pay interest and / or penalties.

We accept that as a result of a decision to cancel these arrangements, HMRC may require the strict operation of PAYE. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of PAYE. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the previously stated 6 April or 3 months from the date when the written notice was given.

**35.16 NIC arrangements**

**PAYE82003: PAYE operation: international employments: EP appendix 7a: modified class 1 and class 1a national insurance contributions (NICs) for expatriate employees subject to an EP appendix 6 agreement [May 2020]**

Application for modified NICs for expatriate employees from 6 April 20\_\_

Employer name: .....

Employer address: .....

Employer PAYE reference: .....

**Part 1 - Scope of agreement**

1. This application applies only to those employees who
  1. Are subject to an EP Appendix 6 agreement, and
  1. Are assigned to work in the UK from abroad and have an employer or host employer in the UK liable for secondary UK NICs liabilities, and
  1. Pay NICs on earnings in this employment, above the annual upper earnings limit (UEL) for the year, or on earnings at or above the UEL in each earnings period throughout the year. If an employee joins, commences liability part way through an earnings period, or leaves the employment part way through an earnings period, that shall not invalidate the agreement, provided that
    - \* For employees with monthly earnings periods, NICs are calculated and paid on earnings at or above the UEL in all months other than the month in which the employee joined or left
    - \* For employees with an annual earnings period, NICs are calculated and paid on earnings to the person's pro-rata annual or annual UEL. (If an employee with an annual earnings period starts after tax week 1 they will have an annual pro-rata earnings period. If a person starts before or during tax week 1 they will have an annual earnings period irrespective of if and when they leave the employment)

**Part 2 - Operation of agreement**

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of earnings that are subject to Class 1 NICs. At the beginning of each year, or if liability commences after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, the annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.
3. In accordance with Part 3 of this agreement, we will calculate and pay Class 1 NICs on all the estimated earnings which are subject to NICs.
4. We shall for each employee, in respect of every tax month estimated earnings are calculated for that employee, complete and maintain a payroll record and include the details about the payment, the National Insurance category letter and NICs data items on a Full Payment Submission (FPS). The FPS must be submitted to Her Majesty's Revenue and Customs (HMRC) no later than the 19th of the month following the end of the tax month.
5. We will undertake an in-year review during the period December to 5 April to take account of any material changes and in particular, will ensure that amounts that are earnings, as defined in sections 3 and 4 of the Social Security Contributions and Benefits Act 1992, which
  - \* Must be included in the computation of a person's earnings when

assessing Class 1 NICs, and

- \* Are bonuses and / or NICs due on amounts which count as employment income in relation to employment-related securities to which sections 698 or 700 of the Income Tax (Earnings and Pensions) Act 2003 applies, for example, share related events are accounted for.

We will update the Class 1 NICs payable immediately following the review, amend payroll records and

- \* When completing the next FPS for submission to HMRC, adjust the year to date NICs data items to show the revised values to date, and
- \* Adjust the next payment to HMRC if too much or too little NICs have been paid.

6. During the year, we will update the estimated Class 1 NICs to be paid to reflect arrivals and departures of employees who are subject to this application, and changes in the scope of these arrangements as they apply to one or more employee.

7. We understand that where we have employees who are not ordinarily resident in the UK and who meet the conditions set out in Tax Bulletin 79 as workers for whom salary can be apportioned between UK and non-UK days, we can initially compute earnings for Class 1 NICs on the basis of an estimate of UK and non-UK workday that we have used for income tax purposes. When we complete our NIC Settlement Return, this initial estimate must be corrected using the statutory NICs rules for non-UK days set out in Tax Bulletin 79 and the correct NICs must be paid before 31 March following the end of the tax year.

Note: Due to the recent COVID-19 outbreak and accompanying advice from the Prime Minister and HM Government, we recognise most customers and agents may either be in self-isolation or will be working from home, with limited access to usual resources. To help with this, the 31 March 2020 deadline has been extended to 31 May 2020.

### **Part 3 - Payment of Class 1 NICs to HM Revenue and Customs (HMRC)**

8. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the estimated earnings. These payments will be made each month, by the 19th or 22nd of the following month (depending upon our payment method).

9. Where the number of employees covered by this arrangement at any one time is 5 or fewer, we undertake to pay the Class 1 NICs due on 3/12ths of the total estimated earnings for the tax year, on or before the 19 or 22 (depending upon the payment method) of July, October, January and April (the quarterly basis).

10. If the number of employees covered by this agreement increases to more than 5 at any one time in the course of the year, and is likely to remain at the higher level, we will make the payments of Class 1 NICs by the 19 or 22 of each month, from the start of the following year. If the number of employees covered by this agreement at any one time reduces to five or fewer in the course of the year and is likely to remain at the lower level, we will make payments of Class 1 NICs on the quarterly basis, from the start of the following year.

11. If the NICs are paid in accordance with the terms of this agreement, late

payment penalties under Schedule 56 of the Finance Act 2009, will not apply to payments under this arrangement. Schedule 56 penalties will be charged if the NICs due on the estimated earnings are not paid as specified in Part 3 of this agreement.

**Part 4 - Arrivals and departures**

12. We will notify HMRC of our intention to include new arrivals to the UK covered by this agreement. Similarly, we will notify HMRC of our intention to exclude an employee from the agreement in the event of the employee no longer being subject to PAYE under EP Appendix 6. We will make these notifications to HMRC in writing before the end of the relevant tax year.

**Part 5 - Interest**

13. We accept that due to the inherent nature of these modified arrangements, over and underpayments of Class 1 NICs may arise, compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return'. However, it is accepted that interest will run on any part of the NICs due on estimated earnings for a tax year due to have been paid under this agreement, which (depending upon the method of payment) reaches HMRC after 19 or 22 April following the end of the tax year.

14. It is accepted that if the payment of Class 1 NICs, due on estimated earnings payable by 19 or 22 April is paid late, HMRC will charge interest on amounts paid late.

**Part 6 - Class 1A NICs**

15. We understand that for individuals covered by this agreement we will have until 31 January following the end of the tax year in which to submit our P11D(b). By the normal statutory time of 19 July following the end of the tax year we will make a payment of Class 1A NICs based on a best estimate of Class 1A NICs due. We will calculate and pay to HMRC the correct amount of Class 1A by 31 March following the end of the tax year. However, we understand that when we make our best estimate of earnings for Class 1 NICs, it is permissible to include non-cash benefits that would statutorily attract a Class 1A NICs charge. Where our best estimate for Class 1 NICs includes payments and benefits that attract Class 1A NICs under the normal statutory provisions, and we have paid Class 1 NICs using that estimate, we are not then required to pay Class 1A NICs by the normal statutory time of 19 July. Where our best estimate of earnings for Class 1 NICs purposes includes non-cash benefits that would normally be subject to Class 1A NICs, we must correct this after the tax year end and pay the right amount of Class 1 NICs and Class 1A NICs using our NIC Settlement Return. The right amount of Class 1A NICs must be paid by 31 March following the end of the tax year.

16. We will submit form P11D(b) at the latest by 31 January following the end of the tax year. The P11D(b) will show the correct benefits for the tax year computed using the statutory rules. We will annotate the P11D(b) 'Appendix 7A'

applies.

17. We understand that if we do not pay the Class 1A NICs due by the date set out in this agreement, then regulation 67B of the Social Security (Contributions) Regulations 2001 may apply (late payment penalties).

18. We understand that where the P11D(b) is not submitted by 31 January following the year end, penalties may arise under Regulation 81(1) Social Security (Contributions) Regulations 2001 and that interest under Regulation 76(1) Social Security (Contributions) Regulations 2001, will accrue from the original 19 July statutory date.

We understand that where we submit an incorrect return under the terms of this agreement, penalties may arise under Regulation 81 of the Social Security (Contributions) Regulations 2001

- \* On the Class 1A NICs due for payment no later than 19 July following the end of the year in which benefits were provided; and
- \* That the earnings in question ought to have been included on forms P11D or approved substitutes and form P11D(b) before 7 July following the end of the tax year.

#### **Part 7 - Payment of residual Class 1 and Class 1A NICs Liability - NIC Settlement Return**

19. We accept that where additional Class 1 or Class 1A NICs are found to be due and are paid after 31 March following the end of the tax year, or errors in the NIC Settlement Return are discovered, interest and penalties will be charged in accordance with the legislation.

20. No later than 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 and Class 1A NICs due on all the employee's earnings and benefits both from the UK and abroad. We will calculate and pay to HMRC any additional Class 1 NICs and / or Class 1A NICs found to be due under these arrangements by the 31 March following the end of the tax year concerned. Any additional Class 1 or Class 1A NICs will be paid over to HMRC via a 'NIC Settlement Return' (NSR). An NSR will also account for any NICs due on any primary NICs paid on the employees' behalf under these arrangements, unless already accounted for.

Note: Due to the recent COVID-19 outbreak and accompanying advice from the Prime Minister and HM Government, we recognise most customers and agents may either be in self-isolation or will be working from home, with limited access to usual resources. To help with this, the 31 March 2020 deadline has been extended to 31 May 2020.

21. We agree that making an Earlier Year Update (EYU) is not appropriate for employees included in this arrangement. If an underpayment is identified after the submission of the NSR we agree to write to HMRC to make a disclosure of any further NIC due.

22. We will set out in the NSR the correct Class 1 and Class 1A NICs due for the year for each employee covered by this agreement taking into account what has been paid previously under parts 3 and 7 of this agreement. We will send HMRC the NSR no later than 31 March following the end of the tax year in which

earnings were paid.

Note: Due to the recent COVID-19 outbreak and accompanying advice from the Prime Minister and HM Government, we recognise most customers and agents may either be in self-isolation or will be working from home, with limited access to usual resources. To help with this, the 31 March 2020 deadline has been extended to 31 May 2020.

23. We understand that where the employee is social security equalised, the payment of the primary NICs on the 'best estimate' of gross earnings will represent a payment of earnings. Therefore, earnings should be grossed up to take account of these NICs met on the employee's behalf. Where primary NICs are met on behalf of the employee in respect of earnings included in the NSR, the earnings on the return should be grossed up to take account of the primary NICs met on the employee's behalf.

#### **Part 8 - Overpaid Class 1 NICs**

24. We understand that if we discover that NICs have been overpaid in relation to the 'best estimate' we can complete the NSR to reflect any secondary (employers) Class 1 or Class 1A NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the 'best estimate', but only where:

- The Class 1 NICs paid by the employer are paid as part of the equalisation process and have not been recovered from the employee's earnings, or
- The Class 1 NICs have been paid by the employer and recovered from the employee and the employee mandates the repayment to the employer in writing.

25. We agree that making an Earlier Year Update (EYU) is not appropriate for employees included in this arrangement. If an overpayment is identified after the submission of the NSR we agree to write to HMRC to make a NIC refund claim.

26. We understand that, in all other cases, the NSR must be submitted together with a covering letter asking for a refund. This will be passed to HMRC Personal Tax International for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or by offsetting overpayments of primary NICs in respect of one employee against NICs due in respect of another.

#### **Part 9 - Statement**

27. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example

- \* Where significant and / or regular underpayments of Class 1 and Class 1A NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 and Class 1A NICs ought to have been accounted for in the calculation of the estimated Class 1 and Class 1A NICs provided for under these arrangements
- \* Where an employer fails to pay the Class 1 or Class 1A NICs on time and / or to ensure that returns are filed on time, such that a liability arises

to pay interest and / or penalties.

28. We accept that as a result of a decision to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 and Class 1A NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 and Class 1A NICs.

29. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7A)' under which we will submit the NSR.

30. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

**PAYE82004: PAYE operation: international employments: EP appendix 7b: modified class 1 national insurance contributions (NICs) for employees assigned from the UK to work overseas [Oct 2019]**

Application for modified NICs for expatriate employees from 6 April 20\_\_

Employer name:.....

Employer address: .....

Employer PAYE reference: .....

**Part 1 - Scope of agreement**

1. This application applies only to those employees who
  - Are employed by a UK employer and are assigned to work abroad for a period of limited duration, but for more than a complete tax year, and
  - Have an ongoing liability to UK National Insurance contributions (NICs) whilst abroad; and
  - Earn above the upper earnings limit (UEL) in every earnings period throughout the tax year. (I understand that it shall not invalidate this agreement if an employee earns less than the UEL in the pay period they join the company, or in the pay period in which they leave, if in all other pay periods during the year, the UEL is exceeded. However, in the case of employees with annual pay periods, covered by the agreement, their earnings must exceed the annual UEL); and
  - Not liable to UK tax on their earnings from employment; and
  - Receive some earnings and benefits derived from the employment from

sources other than the UK employer.

**Part 2 - Operation of agreement**

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of earnings that are subject to Class 1 NICs. At the beginning of each year, or if liability starts after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. We shall for every payment of estimated earnings calculated for each employee, complete and maintain a payroll record and include the details about the payment, the National Insurance category letter and NICs data items on a Full Payment Submission (FPS). The FPS must be submitted to Her Majesty's Revenue and Customs (HMRC) on or before the payment of regular earnings by the UK employer or no later than the 19th of the month following the end of the tax month where all earnings are paid by the overseas employer.

4. We will undertake an in-year review during the period December to 5 April to take account of any material changes and in particular, will ensure that amounts that are earnings, as defined in sections 3 and 4 of the Social Security Contributions and Benefits Act 1992, which

- \* Must be included in the computation of a person's earnings when assessing Class 1 NICs, and
- \* Are bonuses and / or NICs due on amounts which count as employment income in relation to employment-related securities to which sections 698 or 700 of the Income Tax (Earnings and Pensions) Act 2003 applies, for example, share related events

are accounted for.

We will update the Class 1 NICs payable immediately following the review, amend payroll records and

- \* When completing the next FPS for submission to HMRC, adjust the year to date NICs data items to show the revised values to date, and
- \* Adjust the next payment to HMRC if too much or too little NICs have been paid

**Part 3 - Payment of Class 1 NICs to Her Majesty's Revenue and Customs**

5. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the total estimated earnings for the tax year. These payments will be made each month by the 19 or 22 of the following month (depending upon our payment method).

6. If the NICs are paid in accordance with the terms of this agreement, late payment penalties under Schedule 56 of the Finance Act 2009, will not apply to payments under this arrangement. Schedule 56 penalties will be charged if the NICs due on the estimated earnings are not paid as specified in Parts 2 and 3 of this agreement.

**Part 4 - Arrivals and departures**

7. We will notify HMRC of our intention to include any new employees entering

the agreement by providing details of the employees' departures from the UK. Similarly we will notify HMRC of our intention to exclude an employee from the agreement by providing details of the employee's return to the UK. We will make these notifications to HMRC in writing by the end of the relevant tax year.

8. We accept that in cases where an employee is repatriated to the UK before he/she has been overseas for a complete tax year and, as a result, his/her general earnings from the employment become chargeable to UK Income Tax, this agreement will no longer apply to that employee. In such cases, we will cease to use estimates in respect of all earnings paid and benefits received after the employee has returned to the UK, and use the statutory basis of calculating and returning both Class 1 and Class 1A NICs. We will carry out an exercise before the end of the tax year, to establish the correct amount of the earnings in the period covered by our earlier estimate.

For these employees, we will include on a Full Payment Submission for every payment of earnings subject to Class 1 NICs paid after the employee returns to the UK and the NICs data items relating to each payment, on or before each payment is made to HMRC. For these same employees, no later than the 19th April following the end of the tax year we will

- \* Record the correct earnings and NICs details for the period before the employee returned to the UK on that employee's payroll records, and
- \* Send a Full Payment Submission to HMRC to adjust the year to date NICs totals for each category letter to show the correct details for the year.

Forms P60 will be given to the employees by 31 May after the end of each tax year.

If the correct figures for Class 1 NICs exceed our earlier estimates, we will pay the balance to HMRC with our final payment for the year. Where Class 1A NICs becomes payable, we will make a P11D(b) return and pay Class 1A by 19 July following the end of the tax year.

#### **Part 5 - Year end requirements**

9. Forms P60 will be given to the employees by 31 May after the end of each tax year.

Where an employee leaves the UK part way through a tax year, we will

- \* Calculate Class 1A NICs payable to the date the employee left the UK
- \* Send HMRC a P11D(b) by the 19 July following the end of the tax year, and (For 2012-13 and later years, this concession will be withdrawn and so the P11D(b) filing date will be 6 July)
- \* Pay HMRC any Class 1A NICs due by 19 July following the end of the tax year

#### **Part 6 - Interest**

10. We accept that, due to the inherent nature of the modified arrangements, over and underpayments of Class 1 NICs may arise compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations

in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return' - See Part 8. However, it is accepted that interest will run on any part of the NICs due on the estimated earnings to have been paid under this agreement which (depending upon the method of payment) reaches HMRC after the 19 or 22 of April following the end of the tax year.

11. It is accepted that if the payment of Class 1 NICs, due on estimated earnings payable by 19 or 22 April, is paid late, HMRC will charge interest on amounts paid late.

**Part 7 - Impact of HMRC dispensation**

12. We accept that the terms of a dispensation will not apply to employees who do not have a 'taxable employment' as defined in Part 2 of the Income Taxes (Earnings and Pensions) Act 2003. Therefore, the 'best estimate' will reflect the total amount of earnings liable to Class 1 NICs taking into account any payments that can be disregarded from Class 1 earnings under the provisions of Regulation 25 and Schedule 3 of the Social Security (Contributions) Regulations 2001.

**Part 8 - Class 1A NICs**

13. With the exception of paragraph 12 of this agreement, we understand that any benefits provided to employees covered by this agreement will not fall to be chargeable to income tax under ITEPA as 'general earnings', therefore, liability for Class 1A NICs will not arise.

**Part 9 - Payment of residual Class 1 NICs liability - NIC Settlement Return**

14. No later than 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 NICs due on all the employee's earnings, both from the UK and from abroad. We will calculate and pay to HMRC Class 1 NICs on the difference between the correct figures for the year and those figures that we submitted to HMRC on our full payment submissions. Payment of the Class 1 NICs will be made by 31 March following the end of the tax year concerned. Any additional Class 1 NICs payable will be shown on our 'NIC Settlement Return' (NSR).

15. We will set out in the NSR the correct Class 1 NICs due for the year for each employee covered by this agreement taking into account what has been paid previously under parts 3 and 7 of this agreement. We will send HMRC the NSR no later than 31 March following the end of the tax year in which earnings were paid.

16. We accept that where the additional Class 1 NICs found to be due are paid after 31 March following the end of the tax year, or errors in the NSR are discovered, interest and penalties will be charged in accordance with legislation.

**Part 10 - Overpaid Class 1 NICs**

17. We understand that, if we discover that Class 1 NICs have been overpaid in relation to the 'best estimate', we can complete the NSR to reflect any secondary (employers) Class 1 NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the best estimate but only where

- The Class 1 NICs were paid by the employer and have not been recovered from the employee, or
- The Class 1 NICs are paid by the employer and recovered from the

employee, and then only if the employee mandates the repayment to the employer in writing.

18. We understand that, to claim the overpayment, the NSR must be submitted together with an application for a refund. This will be passed to HMRC Payment Reconciliation in the National Insurance Contributions and Employer Office for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or offsetting overpayments in respect of one employee against underpayments in respect of another employee.

**Part 11 - Statement**

19. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example, where

- Significant and / or regular underpayments of Class 1 NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 NICs ought to have been accounted for in the calculation of the estimated Class 1 NICs provided for under these arrangements
- An employer fails to pay the Class 1 NICs on time and / or to ensure that returns are filed on time such that a liability arises to pay interest and / or penalties.

20. We accept that, if a decision is made by HMRC to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 NICs.

21. We agree that a separate employer record will be opened with HMRC for this scheme in the name ‘[Company Name] (Appendix 7B)’ under which we shall submit the NSR.

22. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April, or such earlier date as is agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

HMRC say:

**Appendix 6 payroll**

**Question:** Guidance has been issued that Earlier Year Updates (EYUs) should not generally be used for EP Appendix 6 payrolls. The references seem to be for individuals who have been included in the arrangements, but needing to make amendments to the submissions made. Where there is a case that an individual has not been included in the Payroll for the year and should have been (eg ‘failed STBV’ type employees), what is the best action to take to correct the position?

The EYU still seems a reasonable route to take to ensure that some payroll reporting is undertaken and PAYE is paid across at the earliest point, with the final position still reconciled via a tax return, but this would seem to disagree with the guidance on first view. If that were the case, what would be the recommended alternative?

**HMRC Answer** HMRC does not consider EYUs to be appropriate for Modified PAYE/NICs schemes. This is also the case in situations where individuals were not included in the Modified payroll but should have been – i.e. using your example of ‘failed’ STBVs. Under the terms of the Modified PAYE arrangements (PAYE82002) any additional tax found to be due should be accounted for via the individual’s self-assessment tax return – please refer to section 18 of the agreement. Alternatively a disclosure can be made and these should be sent to HMRC using the following address:

*eddisclosures.international@hmrc.gsi.gov.uk*<sup>43</sup>

HMRC say:

**PAYE for tax equalised UK outbound assignees who remain UK treaty resident**

It is not that unusual for a UK employee to be sent on an overseas assignment but, for various reasons, the employee remains UK treaty resident. Normally this means that the UK employer must continue to operate PAYE withholding. If the employee is tax equalised for the assignment period, so they are contractually entitled to an amount of net pay after deduction of hypothetical tax, it can be difficult for the employer to operate the PAYE correctly.

PAYE is problematic for an employee who is tax equalised because the amount of PAYE calculated using the normal tax code approach is unlikely to match the final UK tax liability as determined following the tax reconciliation at the end of the tax year. These issues usually arise

---

43 Expat Forum Q&A log (July 2019) (informally circulated).

for a UK inbound assignee and are managed by using an Appendix 6 modified payroll. The issues are the same in the case of a UK outbound tax equalised assignee who happens to remain UK treaty resident and subject to PAYE but with the possible additional complexity of also requiring an appendix 5 net of tax agreement.

(26.1) Would HMRC allow the employer to include such individuals on an Appendix 6 modified payroll for the period they are on assignment and are tax equalised? If HMRC would not allow this, how should the employer manage the PAYE issues?

**Answer**

HMRC guidance at PAYE81900 states that the Modified PAYE arrangement can only be used for employees assigned to work in the UK from abroad who are tax equalised.

If employees of a UK employer are seconded abroad and their particular circumstances mean they continue to be liable to UK tax so the issue of a NT tax code is not appropriate, the employer is obliged to continue to deduct tax under PAYE.

If your question relates to a particular case, please provide HMRC with the full facts and details including a more detailed explanation of the specific nature of the difficulties. Please also state how and where the employees are paid.<sup>44</sup>

HMRC say:

**Interest charges on postponed payments on account**

Question: HMRC's systems are applying late interest charges to individuals on modified payrolls who have postponed payments on account which later become due. Can this be stopped from happening? Payments on account should not be reduced, in modified cases, via the tax return. The self-assessment system cannot recognise modified cases and consequently the normal rules are applied. The correct way to reduce payments on account is to write to HMRC separately, providing the customer's name and UTR and request that the payments on account are reduced.

UPDATE 27/07/2018

We are aware of the guidance contained within the Modified PAYE agreement (PAYE82002) which, at the time was correct. In the past, before internet filing, when self-assessment tax returns were processed, HMRC were able to remove payments on account where the return

---

44 Expat Forum Q&A log (July 2019) (informally circulated).

indicated it was a Modified PAYE case. With the advancement of online filing, fewer returns are manually processed and as such HMRC no longer have the chance to remove payments on account in appropriate cases.<sup>45</sup>

CHAPTER THIRTY SIX

**EMPLOYMENT INCOME: DT RELIEF**

36.1		36.16	Deemed employment/non-employment
36.9.11	Economic employer: HMRC view		

**36.1 DT employment reliefs**

I usually deal with DT relief for each category of income in the chapter on that type of income. But employment income DT relief needs a chapter to itself; a full discussion would require a book.

OECD Model has 4 DT reliefs which may apply to employment income:

<b>Model article</b>	<b>Topic</b>	<b>See para</b>
15	<i>Employment income</i>	
15(1)	Employment income generally	36.2
15(2)	Short term business visitors (STBV)	36.6
16	Directors fees	36.19
19	Government service	36.20

**36.2 Employment income DT relief**

Article 15(1) OECD Model provides:

- [A] Subject to the provisions of Articles
  - [i] 16, [directors]<sup>1</sup>
  - [ii] 18 [pensions]<sup>2</sup> and
  - [iii] 19 [government service]<sup>3</sup>,

---

1 See 36.19 (DT relief: Directors).  
2 See 37.8 (DT relief: Pension income).  
3 See 36.20 (DT relief: Government service).

salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State

[B] unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

In this chapter:

**“The residence State”** is the State where the employee is resident  
**“The work State”** is the State where the employment is exercised; OECD Commentary uses the term “source State”.

To follow art 15 one must keep in mind which Contracting State is which. It may be easier to follow if rewritten with this terminology thus:

1. ... salaries, wages and other similar remuneration derived by a resident *of the resident State* in respect of an employment shall be taxable only in that State  
 unless the employment is exercised *in the work State*. If the employment is so exercised *in the work State* such remuneration as is derived therefrom may be taxed *in the work State*.

In outline:

- (1) The general rule is that tax is charged only in the residence State: art 15(1)[A].
- (2) The work State may also charge tax: art 15(1)[B] but:
  - (a) This is subject to short term business visit relief, if that relief applies tax is in residence State only): art 15(2).
  - (b) If the work State charges tax, the residence State gives foreign tax credit relief.<sup>4</sup>

### 36.3 Salary/wages/remuneration

Article 15 refers to “salaries, wages and other similar remuneration”.

It is convenient to have a short label for this concept, and where context permits I call it **“art 15 remuneration”** or just **“remuneration”**.

For the remuneration/pension borderline, see 37.8.4 (Pension or employment income?).

---

<sup>4</sup> See 106.18.1 (FTCR: Employment income).

### 36.3.1 *Derived in respect of employment*

The remuneration must be derived by a person in respect of an employment. But that is not a separate requirement, because if a sum is remuneration it must by definition be derived in respect of an employment.

### 36.3.2 *What is remuneration?*

The OECD model does not define “salaries/wages/similar remuneration”. So we look to the UK tax law meaning of those words,<sup>5</sup> but it seems to me that such UK material as has been found does not tell us anything which we would not have known from the ordinary meaning.

The OECD Commentary provides:

2.1 Member countries have generally understood the term “salaries, wages and other similar remuneration” to include benefits in kind received in respect of an employment (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

The DTR Manual presumably had that in mind:

**DT1920 Employment** [May 2020]

... The words ‘salaries, wages and other similar remuneration’ should be understood in the broadest sense as covering all income from an employment, including benefits and share option gains ...

The question whether a sum constitutes remuneration can be problematic, and is discussed at some length in the OECD Commentary:

2.3 In some cases, it may be difficult to determine which part of salaries, wages and other similar remuneration paid to an individual is derived from the exercise of employment in a given State.

...

Regardless of the terminology used to describe these payments, it is essential to identify the real consideration for each such payment on the basis of the facts and circumstances of each case in order to determine [1] whether the payment constitutes “salaries, wages or other similar remuneration” and

[2] the extent to which the payment, or part thereof, may be considered

---

5 See 103.11 (Undefined treaty terms).

to derive from the exercise of employment in a given State...

### 36.4 *Pay for work when employed*

This is straightforward. The OECD Commentary provides:

2.4 Any remuneration paid after the termination of employment for work done before the employment was terminated (e.g. a salary or bonus for the last period of work or commissions for sales made during that period) will be considered to be derived from the State in which the relevant employment activities were exercised.

#### 36.4.1 *Holiday/sick pay*

The OECD Commentary provides:

2.5 A payment made with respect to unused holidays / sick days that accrued during the last year of employment is part of the remuneration for the period of work that generated the holiday or sick leave entitlement.

An employee may also be entitled, at the end of employment, to the payment for holidays and sick days related to a number of previous years that were unused during these years. Absent facts and circumstances showing otherwise, a payment received after termination of employment as compensation for holidays and sick days related to previous years that were unused during these years should be considered to have been a benefit for which the employee was entitled for the last 12 months of employment, allocated on a pro-rated basis to where the employment was exercised during that period. One situation where a different conclusion would be justified would be where it would be established, on the basis of the taxpayer's employment records, that these holidays and sick days clearly relate to specific periods of past employment and that the payment constitutes remuneration for these periods of employment.

States should take account, however, of the fact that the former employee may have been previously taxed on these holidays and sick days at the time of their accrual. Assume, for instance, that under a State's domestic tax law, holidays and sick days granted with respect to periods of work performed on the territory of that State are treated as a benefit taxable during the fiscal year during which the relevant work was performed and are taxed accordingly. In such a case, the State of residence of the former employee at the time of the subsequent payment with respect to the holidays / sick days would need to provide relief of

double taxation for such tax and any State in which the former employee may have worked during his last year of employment should similarly consider that any payment for previous years' unused holiday / sick days that were already taxed on an accrual basis did not relate to employment activities exercised during the last year.

### 36.4.2 *Pay in lieu of notice*

For the background to this and related topics, see OECD, "Tax Treaty Treatment of Termination Payments Discussion Draft" (2013).<sup>6</sup>

A payment in lieu of notice was held to constitute art 15 remuneration,<sup>7</sup> a view now supported by the OECD Commentary:

2.6 In some cases, the employer is required (by law or by contract) to provide an employee with a period of notice before terminating employment. If the employee is told not to work during the notice period and is simply paid the remuneration for that period, such remuneration is clearly received by virtue of the employment and therefore constitutes remuneration "derived therefrom" for the purposes of paragraph 1. The remuneration received in such a case should be considered to be derived from the State where it is reasonable to assume that the employee would have worked during the period of notice. The determination of where it is reasonable to assume that the employee would have worked during the period of notice should be based on all facts and circumstances. In most cases it will be the last location where the employee worked for a substantial period of time before the employment was terminated; also, it would clearly be inappropriate to take account of a prospective employment period in a State where the employee might have been expected to work but did not, in fact, perform his employment for a substantial period of time.

### 36.4.3 *Redundancy/severance pay*

OECD Commentary provides:

2.7 A different situation is that of a severance payment (also referred to as a "redundancy payment") which an employer is required (by law or by contract) to make to an employee whose employment has been

---

<sup>6</sup> [https://www.oecd.org/ctp/treaties/Termination\\_Payments.pdf](https://www.oecd.org/ctp/treaties/Termination_Payments.pdf)

<sup>7</sup> See *Squirrell v HMRC* [2005] STC (SCD) 717 and 36.4.4 (Compensation for breach of employment contract).

terminated. Such a payment is often, but not always, calculated by reference to the period of past employment with the employer. Absent facts and circumstances indicating otherwise, such a severance payment should be considered to be remuneration covered by the Article for the last 12 months of employment, allocated on a pro-rated basis to where the employment was exercised during that period; as such it constitutes remuneration derived from that employment for the purposes of the last sentence of paragraph 1.

Expat forum Q&A log provides:

**Question:** Termination Payments

We frequently come across scenarios where an employer's policy (sometimes driven by local labour laws) provides for a payment to be made on termination of employment by the employer calculated by reference to the total service in the employment. The amount payable might be subject to an overall cap or a maximum service period. This is a bit like UK statutory redundancy but the payments are not limited to redundancy cases and are often payable where the employer decides to terminate the employment for any reason (usually with an exception for cases of misconduct). The payments are not made if the employee chooses to resign so they are by no means guaranteed.

Our question is how HMRC would expect to source such payments for the purposes of the employment income article under a double tax treaty? A related question is how HMRC would expect to source the payment under UK domestic law?

In most cases we would expect these payments to be considered contractual and, therefore, taxable as earnings in the UK, but we would look to the OECD guidance on severance payments to determine treaty sourcing. Would HMRC expect to source these payments across the whole period of employment in respect of which the quantum of the payment is calculated? Or would HMRC take the view that although the payments are calculated by reference to the length of service they are not in fact earned unless and until the employer chooses to terminate the employment, so that they are earnings for the final tax year of employment only? For treaty purposes, does this common scenario fall into the OECD default "last 12 months" sourcing rule or is this the type of payment where the relevant facts and circumstances point to the longer alternative sourcing period?

**HMRC answer:** [HMRC refer to para 2.7 OECD Commentary and continue:] HMRC would therefore expect these payments to be sourced

based on the last 12 months of employment, regardless of whether they fall to be taxed as s62 earnings or as specific employment income under s401-s403.

#### 36.4.4 *Damages for breach of contract*

The OECD Commentary provides:

2.8 An individual whose employment is terminated may have legal grounds to claim that the employment was terminated in violation of the contract of employment, the law or a collective agreement; there may also be other legal grounds for claiming damages depending on the circumstances of the termination. This individual may receive a judicial award or settlement as damages for breach of the relevant contractual or legal obligations. The tax treaty treatment will depend on what the damage award seeks to compensate. For instance, damages granted because an insufficient period of notice was given or because a severance payment required by law or contract was not made should be treated like the remuneration that these damages replace.

Punitive damages or damages awarded on grounds such as discriminatory treatment or injury to one's reputation should, however, be treated differently; these payments would typically fall under Article 21 [Other Income].

#### 36.4.5 *Payment for restrictive covenant*

The OECD Commentary provides:

2.9 Under the provisions of an employment contract or of a settlement following the termination of an employment, a previous employee may receive a payment in consideration for an obligation not to work for a competitor of his ex-employer. This obligation is almost always time-limited and often geographically-limited. Whilst such a payment is directly related to the employment and is therefore "remuneration ... derived in respect of an employment", it would not, in most circumstances, constitute remuneration derived from employment activities performed before the termination of the employment. For that reason, it will usually be taxable only in the State where the recipient resides at the time the payment is received.

Where, however, such a payment made after the termination of employment is in substance remuneration for activities performed during the employment (which might be the case where, for example, the obligation not to compete has little or no value for the ex-employer),

the payment should be treated in the same way as remuneration received for the work performed during the relevant period of employment.

Also, in some States, part of an employee's monthly salary during employment constitutes consideration for an obligation not to work for a competitor during a certain period of time after termination of the employment so that no separate payment for non-competition is made after the termination of the employment; in such a case, the guidance in the first part of this paragraph is not applicable and the part of the remuneration received during the employment that is attributable to that obligation should be treated in the same way as the rest of that remuneration.

#### 36.4.6 *Deferred remuneration*

The OECD Commentary provides:

2.11 Payments may be made after the termination of employment pursuant to various deferred remuneration arrangements. Such a payment should be treated as remuneration covered by Article 15 and, to the extent that it can be associated to a specific period of past employment in a given State, it should be considered to be derived from the employment activities exercised in that State. Since many States would not allow the deferral of tax on employment remuneration even if the payment of that remuneration is deferred, it will be important for States that will tax deferred remuneration payments received after the termination of employment to ensure that double taxation is relieved.

#### 36.4.7 *Post-employment benefits in kind*

The OECD Commentary provides:

2.13 An employee may be entitled to medical or life insurance coverage for a certain period after termination of his/her employment. He/she may also be entitled to other benefits, such as the services of an employment consultant or agency. Absent facts and circumstances indicating otherwise, such benefits should be considered to be remuneration covered by the Article which is derived from the State where the employment was exercised when the employment was terminated (and when, therefore, the obligation to pay these benefits arose).

#### 36.4.8 *Compensation for loss of earnings*

The OECD Commentary provides:

2.14 Another type of payment that could be made on or after termination of an employment is a compensation payment for loss of future earnings following injury or disability suffered during the course of employment. The tax treaty treatment of such a payment would depend on the legal context in which it was made. For instance, payments under a social security system such as a worker's compensation fund could fall under Article 18 [pensions], 19 [Government service] or 21 [Other Income] (see paragraph 24 of the Commentary on Article 18).<sup>8</sup>

A payment that would constitute a pension payment would be covered by Article 18. A payment made because the employee has legal grounds for claiming damages from his employer with respect to a work-related sickness or injury would typically fall under Article 21. A payment made by the employer pursuant to the terms of the employment contract even though the sickness or injury is not work-related or the employer is not responsible for that sickness or injury should be dealt with in the same way as a severance payment: absent facts and circumstances indicating otherwise, such a payment should be considered to be remuneration covered by the Article for the last 12 months of employment, allocated on a pro-rated basis to where the employment was exercised during that period.

A short-term disability payment made in the course of employment, however, should be treated in the same way as the payment of sick days during the course of employment; such a payment would be covered by Article 15 (Article 17 in the case of entertainers and sportspersons) and taxable in the State in which the employee normally exercised the employment before becoming sick or being injured.

2.15 After termination of employment, a salesperson may receive a payment in relation to the loss of future commissions. The tax treaty treatment of such a payment will depend on the legal context in which the payment is made. Depending on the circumstances, this payment

- [1] could constitute deferred remuneration to which the salesperson was entitled in relation to previous sales or
- [2] could be made pursuant to a provision of the employment contract according to which the salesperson has a right to commissions on any future sales to a client that the salesperson brought to the employer;

---

8 See 37.8.5 (Social security income).

in both cases, the payment should be dealt with as remuneration for the employment services that gave rise to the entitlement to the commissions.

A payment that would constitute a compensation for future commissions that the salesperson would likely have earned if she had continued to work for the same employer may also constitute a compensation for unlawful dismissal or a form of severance payment; where that is the case, the payment should be dealt with accordingly.

#### 36.4.9 *Garden leave*

The OECD Commentary provides:

2.16 As part of a transitional arrangement leading to the termination of employment, an employee may receive a full or reduced salary for a period during which that employee will not work. Where the salary is paid by the employer for a period during which the employee is not required to work even though the employment has not been terminated, the salary is still received by virtue of the employment and therefore constitutes remuneration “derived therefrom” for the purposes of paragraph 1. The remuneration received in such a case should be considered to be derived from the State where it is reasonable to assume that the employee would have worked during that period, which will most often be the State where the employment activities were performed before the cessation of work.

#### 36.4.10 *Covid payments (furlough)*

OECD Covid guidance<sup>9</sup> provides:

***Income of cross-border workers that cannot perform their work due to COVID-19 restrictions (e.g. wage subsidies to employers)***

49. Where a government has stepped in to subsidise the keeping of an employee on a company’s payroll during the COVID-19 pandemic despite being unable to work, the income that the employee receives from the employer should be attributable to the place where the employment used to be exercised. In the case of employees that work in one jurisdiction but commute there from another jurisdiction where they

---

<sup>9</sup> [https://read.oecd-ilibrary.org/view/?ref=1060\\_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic](https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic)  
See 105.27.1 (OECD Covid guidance).

are resident (cross-border workers), this would be the jurisdiction they used to work in.

50. Some stimulus packages adopted or proposed by governments (e.g. wage subsidies to employers) are designed to keep workers on the payroll during the COVID-19 pandemic despite restrictions to the exercise of their employment. To the extent these may be the last payments received in respect of the employment, the payments resemble termination payments. These are discussed in paragraph 2.6<sup>10</sup> of the Commentary on Article 15 of the OECD Model, which explains that they should be attributable to the place where the employee would otherwise have worked. In most circumstances, this will be the place the person used to work before the COVID-19 pandemic. Alternatively the payments may resemble those which are routinely received during paid periods of absence the entitlement to which arises in connection with where the work was performed. Examples of such other routine payments include vacation pay, paid sick leave, or paid furlough, none of which have been known to cause difficulties in international taxation...

52. In conclusion, where an employee resident in one jurisdiction and who formerly exercised an employment in another jurisdiction receives a COVID-19 related government subsidy from the work jurisdiction to maintain the relationship with the employer, the payment would be attributable to the work jurisdiction under Article 15 of the OECD Model.

HMRC follow this.<sup>11</sup>

#### 36.4.11 *Pure termination payment*

HMRC say:

Attention was drawn to the agreement published in Germany in December 2011, whereby termination payments were to be treated as remuneration falling within the employment services article of the double tax treaty. HMRC confirmed that this treatment would not apply

---

<sup>10</sup> See 36.4.2 (Pay in lieu of notice).

<sup>11</sup> ICAEW Taxguide 08/21 para 6.5.1.

<https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2021/taxguide-0821-covid-19-displaced-expatriate-employees.ashx>

for the purposes of treaties other than the UK/German treaty.<sup>12</sup>

In *Resolute Management Services v HMRC*<sup>13</sup> a taxpayer received an ex gratia payment, after leaving her employment. For ITEPA purposes, it was not general earnings but it was a termination payment within Part 6 ITEPA.<sup>14</sup> For DT purposes, it was not art 15 remuneration. The ITEPA classification did not affect this:

35. ITEPA does not treat a termination payment as ordinary earnings (within which fall salary and wages and other similar remuneration) but as “an amount that counts as employment income”.<sup>15</sup> The categorization of termination payments as “specific employment income” does not indicate that such payments are not “other similar remuneration” because income related to share incentives and share options within Part 7 of ITEPA (which the Treaty parties and OECD member countries regard as other similar remuneration) also falls within the category of specific employment income rather than ordinary earnings. Nevertheless, the statutory description of items within Part 6 of ITEPA (“Income which is not earnings or share related”) suggest that items within that Part (e.g. termination payments) are not part of what would ordinarily be regarded as “salaries, wages and other similar remuneration”. In other words, the context of ITEPA at least indicates that termination payments are not what the Act regards as ordinary earnings (as salary and wages and other similar remuneration would ordinarily comprise) even though termination payments are taxed within the framework of ITEPA as something counting as employment income.

The termination payment qualified for exemption under the Other Income article.

Expat forum Q&A log provides:

### **Termination payments and DTAs**

**Question:** Now that foreign service relief is gone from termination payments to UK residents can we re-confirm whether HMRC’s standard

---

12 Minutes of Joint Expatriate Forum on Tax and NICs (January 2012)

<http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/epf-mins-jan12.pdf>

13 [2008] UKSPC SPC00710.

14 See 33.38 (Termination payments).

15 See 33.4 (Employment income/earnings).

view is that these are subject to employment income article of the treaty (and hence eligible for FTC offset) rather than the other income article and only taxed in country of residence (I assume this hasn't been an issue since the OECD change back in 2014 but was beforehand). However how will the issue of any conflicting domestic and treaty sourcing periods be resolved?

**HMRC answer:** A termination payment may comprise several elements, and these may be treated differently under UK tax legislation and/or international treaties. Paragraphs 2.4 to 2.16 of the OECD commentary on Article 15 explain how some of the more common elements should be treated.

Paragraph 2.7 says that a severance or redundancy payment required by contract or statute should be considered to be remuneration covered by Article 15 for the 12 months prior to the date of termination.

Paragraph 2.8 says that a compensatory payment should be treated like the remuneration that the damages replace.

In most cases, an "ex-gratia" termination payment will represent compensation for the loss of future earnings from the employment. In accordance with Paragraph 2.8 of the commentary, we consider that such a payment should be attributed to the State where the employee would have worked if not for the termination, using a similar method to that described in Paragraph 2.6 (concerning PILONs). In most cases this will be the last location where the employee worked for a substantial period of time before the employment was terminated.

HMRC would suggest the following approach:

1. Identify amounts for which the commentary mandates a particular treatment, such as:

- Arrears of earnings (para 2.4)
- Accrued holiday (para 2.5)
- Payments in lieu of notice (para 2.6)
- Statutory redundancy pay and similar (para 2.7)
- Consideration for restrictive undertakings (para 2.9)

2. Calculate PENP, which should be attributed to the State where notice would have been worked in line with Paragraph 2.6.

3. Attribute any remaining (ex-gratia) payment to the State(s) where the employee would have worked in future, as described above.

Where there is a conflict, relief should be given via Foreign Tax Credit

Relief in the first instance.<sup>16</sup>

### 36.5 Where is employment exercised

OECD Commentary on art 15(1) provides:

1. ... Employment is exercised in the place where the employee is physically present when performing the activities for which the employment income is paid.

This comment was followed in *Kljun v HMRC*.<sup>17</sup>

OECD Commentary provides:

2.2 The condition provided by the Article for taxation by the State of source is that the salaries, wages or other similar remuneration be derived from the exercise of employment in that State. This applies regardless of when that income may be paid to, credited to or otherwise definitively acquired by the employee.

#### 36.5.1 *Work abroad due to Covid*

OECD Covid guidance<sup>18</sup> provides:

***Teleworking from abroad i.e. working remotely from one jurisdiction for an employer of the other jurisdiction.***

59. A change in the place where the employment is exercised may give rise to a change in the allocation of taxing rights under the current treaty rules.

60. Accordingly, if the jurisdiction where employment was formerly exercised should lose its taxing right following the application of Article 15, additional compliance difficulties would arise for employers and employees. Employers may have withholding obligations, which are no longer underpinned by a substantive taxing right. These would therefore have to be suspended or a way found to refund the tax to the employee.

17 [2011] UKFTT 371 (TC) at [18]. See 33.30 (Where are duties performed).

18 [https://read.oecd-ilibrary.org/view/?ref=1060\\_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic](https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic)  
See 105.27.1 (OECD Covid guidance).

The employee would also have a new or enhanced liability in their jurisdiction of residence, which would result in new filing obligations.

61. Some examples illustrating changes in allocation of taxing rights over employment income are included below:

- Before the COVID-19 pandemic, an employee resident in Jurisdiction A normally exercised their employment in Jurisdiction B. The employee began to exercise his employment from Jurisdiction A due the COVID-19 pandemic. According to Article 15:
  - if the employer was resident in Jurisdiction B, Jurisdiction B is entitled to tax the income derived from the period during which the employee was physically present in Jurisdiction B (i.e., a reduction in Jurisdiction B's taxing right);
  - if the employer was not resident in Jurisdiction B or did not bear the cost of the employee's remuneration through a PE in that jurisdiction, Jurisdiction B would likely lose its taxing right under a treaty if the employee spent less than 183 days there (i.e., a complete loss of Jurisdiction B's taxing rights)
- Before the COVID-19 pandemic an employee was resident in Jurisdiction A, became stranded in Jurisdiction B and began to exercise his employment there. Under Article 15, Jurisdiction B would be permitted to tax the employment income if the employer was also resident in that jurisdiction or bore the cost of the employee's remuneration through a PE in that jurisdiction. In cases where the employer was resident elsewhere, Jurisdiction B would be entitled to tax the employment income only if the employee exceeds the 183 day threshold.

62. Exceptional circumstances call for an exceptional level of coordination between jurisdictions to mitigate the compliance and administrative costs for employees and employers associated with an involuntary and temporary change of the place where employment is performed. Where relevant, MAP should be applied efficiently and pragmatically to help resolve issues arising out of the COVID-19 pandemic. Jurisdictions have issued useful guidance and administrative relief to mitigate the unplanned tax implications and potential new burdens arising due to effects of the COVID-19 pandemic. A sample of that guidance is included in Box 4.

63. In conclusion, changes in the jurisdiction where an employee exercises their employment can impact where their employment income

is taxed: new taxing rights over the employee's income may arise in other jurisdictions and those new taxing rights may displace existing taxing rights. As payroll taxes are often withheld at source, addressing the change will result in compliance and administrative costs for the employer and employee. Some jurisdictions have issued guidance and administrative relief to mitigate the additional burden.

### 36.6 Short-term Business Visitors

This takes us to art 15(2) OECD Model:

2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:

- a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
- b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and
- c) the remuneration is not borne by a permanent establishment which the employer has in the other State.<sup>19</sup>

To follow this one must keep in mind which Contracting State is which. It is easier to follow if rewritten with my terminology thus:

2. ... remuneration derived by a resident of the resident State in respect of an employment exercised *in the work State* shall be taxable only in the *resident State* if:

- a) the recipient is present in *the work State* for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
- b) the remuneration is paid by, or on behalf of, an employer who is not a resident *of the work State*, and

---

19 For completeness, art 15(3) continues: "Notwithstanding the preceding provisions of this Article, remuneration derived in respect of an employment exercised aboard a ship or aircraft operated in international traffic, or aboard a boat engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated."

This is not discussed here; see OECD Commentary para 9.

- c) the remuneration is not borne by a permanent establishment which the employer has *in the work State*.

I refer to this as “**STBV relief**” (short-term business visitors).<sup>20</sup> The three conditions are “**STBV conditions (a) - (c)**”; and conditions (b) and (c) are the “**STBV payment conditions**”.

For PAYE issues, see 35.13 (PAYE exemption: EP App 4). For Hong Kong/Singapore, which have non-standard DTAs, see 35.13.4 (EP App 4: Mistakes).

### 36.6.1 *STBV relief: Policy*

OECD Commentary on art 15(2) provides:

8. There is a direct relationship between the principles underlying the exception of [art 15(2), STBV relief] and Article 7 (business profits). Article 7 is based on the principle that an enterprise of a Contracting State should not be subjected to tax in the other State [the source State] unless its business presence in that other State has reached a level sufficient to constitute a permanent establishment.<sup>21</sup> The exception of [art 15(2), STBV relief] extends that principle to the taxation of the employees of such an enterprise where the activities of these employees are carried on in the other State [the source State] for a relatively short period.

This neatly explains STBV condition (a) (183 day rule).<sup>22</sup>

OECD Commentary on art 15(2) provides:

---

20 The OECD term is: “the exception of paragraph 2 of Article 15”. This relief should not be confused with the annual PAYE scheme which is available to short term business visitors (differently defined) who do not qualify for DTA relief.

21 See 20.22 (DT relief: trading income).

22 The Commentary continues with an explanation of the policy behind STBV payment conditions which I find harder to follow:

“Subparagraphs b) and c) make it clear that the exception [STBV relief] is not intended to apply where the employment services are rendered to [ie, the individual is an employee of] an enterprise the profits of which are subjected to tax in a State either

[a] because it is carried on by a resident of that State or

[b] because it has a permanent establishment therein to which the services are attributable.”

6.2 The object and purpose of subparagraphs b) and c) of paragraph 2 are to avoid the source taxation of short-term employments to the extent that the employment income is not allowed as a deductible expense in the State of source because the employer is not taxable in that State as it neither is a resident nor has a permanent establishment therein. These subparagraphs can also be justified by the fact that imposing source deduction requirements with respect to short-term employments in a given State may be considered to constitute an excessive administrative burden where the employer neither resides nor has a permanent establishment in that State.

### **36.7 STBV payment condition (b)**

It is helpful first to consider STBV payment condition (b).

Article 15(2)(b) OECD Model provides:

2. ... remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if ...

(b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the UK [the work State],

Unpacking paragraph (b), 3 issues arise:

- (1) Identify the employer
- (2) Identify the residence of the employer (that may be easy once the employer is identified)

STBV relief only applies if there is a non-resident employer (ie not resident in the work State)

- (3) Does that employer pay the remuneration (directly or by someone on his behalf)?

These are logically distinct questions, but (1) and (3) may overlap because the question who pays remuneration may be relevant to identifying the employer.<sup>23</sup> I consider first some general comments on what amounts to paying remuneration, and then who is the employer.

---

<sup>23</sup> See item [3] in OECD Commentary para 8.14, set out at 36.9.9 (Identifying effective employer).

## 36.8 Who pays remuneration

### 36.8.1 “Ultimately borne”

The requirement is:

- b) the remuneration is *paid by, or on behalf of*, an employer who is not a resident of the other State [ie not a resident of the work State]

DTR Manual provides:

#### **DT1922 Employment** [May 2020]

##### **‘On behalf of’**

Payments may be made ‘on behalf of’ a non-resident employer in cases where the payment is physically made by a UK company. It may be accepted that remuneration has been paid or benefits provided ‘on behalf of’ a non-resident employer if that non-resident ultimately bears the cost of such remuneration and benefits.

“Ultimately borne” is a paraphrase but perhaps a useful one. That has been explained in turn as meaning “the employer finally bearing the cost after all recharging of any nature.”<sup>24</sup>

Recharging (ie reimbursement) can work both ways. A UK person might pay remuneration directly and be reimbursed by the non-resident employer. Then the remuneration is ultimately borne by the non-resident, and STBV condition (b) is met. Conversely the non-resident employer might pay remuneration directly and be reimbursed by a UK resident. Then the remuneration is not ultimately borne by the non-resident and STBV condition (b) is not met.

HMRC say:

**Question:** Do HMRC agree that a recharge, or series of recharges, whereby a cost is ultimately borne in the UK, is only relevant for Appendix 4 purposes [STBV PAYE scheme]<sup>25</sup> if that cost can be linked to both the specific employee’s remuneration (as defined in Appendix 4) and the period that the employee in question spent working in the UK? If HMRC do not agree, please can you explain why a cost borne in

---

<sup>24</sup> See 35.13.2 (Remuneration ultimately borne by non-resident).

<sup>25</sup> See 35.13 (Short-term visitor PAYE scheme).

the UK that cannot be linked to both of these factors would be relevant to the question of whether treaty exemption is available (and therefore to the application of Appendix 4)?

**HMRC answer:** PAYE82000 defines ‘Ultimately Borne’ as the company finally bearing the cost of the employees work in the UK after all recharging of any nature. This could either be by a direct recharge or as part of a management charge made by the non-resident employer.

If the formal employer charges the UK employer an amount that represents the remuneration, employment benefits and other employment costs for their time in the UK then this could be considered a direct recharge and therefore ultimately borne in the UK.

If the formal employer charges the UK employer an amount, or a series of amounts, representing a management charge that includes an employees’ remuneration relevant to their time in the UK then this could be considered being ultimately borne in the UK.<sup>26</sup>

### 36.8.2 *Employer deduction in work State*

Clearly, if the remuneration is ultimately borne by a non-resident employer, no person in the work State can claim a deduction.

There is a certain sense in allowing STBV relief and disallowing the deduction in the work State.

The DTR Manual provides:

**DT1922 Employment** [May 2020]

Where it is argued that remuneration has been paid ‘on behalf of’ an overseas employer, even though a UK company has paid the individual’s remuneration and the overseas employer has not reimbursed the cost, it should be pointed out that it is unlikely that, in these circumstances, the cost of the remuneration could be regarded as wholly and exclusively incurred for the purposes of the UK company’s trade and that, therefore, no deduction should be claimed for the cost of the remuneration in computing the UK company’s taxable profit. Reference should be made to the tax case of *Robinson v Scott Bader and Co Ltd* (54 TC 757) which considers the inadmissibility of remuneration paid on behalf of another employer.

---

<sup>26</sup> Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

The decision in the *Scott Bader* case makes clear that the object of the person making the payment is decisive in determining whether or not a deduction is permissible in accordance with [s.34 ITTOIA/s.54 CTA 2009, wholly & exclusively test].

In relation to seconded employees there are three possible situations

- the payment to the employee is made solely in the interests of the overseas company;
- the payment is made partly in the interests of the UK company and partly in the interest of the overseas company or
- the payment is made solely in the interests of the UK company.

Only in the third case is a deduction available to the UK company in computing its profits.

### 36.8.3 *DT relief: Benefits in kind*

A benefit in kind such as the occupation of land is not in the strict sense “paid” but the word should construed loosely, to include providing benefits in kind.<sup>27</sup> The question is then who “pays” the benefit in kind. The DTR Manual provides:

#### **DT1922 Employment** [Nov 2019]

##### **Benefits**

Even where basic remuneration continues to be paid by the overseas employer it is common for benefits (for example, the use of a flat) to be provided at the cost of the UK employer to whom the employee has been seconded. Subject to the other conditions in the Article, the basic remuneration may be exempt from UK tax but the condition in Article 15(2)(b) is not satisfied in relation to benefits in these circumstances because they are not ‘remuneration paid by, or on behalf of,’ the overseas employer (unless the cost of the benefits is borne by the overseas employer through a recharge).

### 36.8.4 *HMRC practice*

The DTR Manual provides:

#### **DT1922 Employment** [May 2020]

... Not only must the claimant remain an employee of the overseas company but the remuneration in respect of which the exemption is

---

<sup>27</sup> See 14.10.2 (“Paid” and “payment”).

claimed must be paid by the overseas employer and not, for example, by a UK subsidiary company to whom the employee may have been seconded. Any statement on this aspect of a claim should be checked to ensure that it is consistent with

- i) other information in the papers (for example what does the return show?) and
- ii) the position in other similar cases involving the same UK employer. If there is any doubt you should ask the agents to provide a statement from the UK company or the overseas employer, to confirm the extent to which, if at all, the overseas employer has continued to pay the claimant's remuneration either directly or by reimbursing the UK company...

Claims should not be admitted where

- [1] a UK company pays remuneration or incurs the cost of benefits and
- [2] does not receive reimbursement from the overseas employer.

Such payments and costs are incurred in the interest of the UK company and not on behalf of the overseas employer.

Unless the claimant offers evidence that the UK company was reimbursed the cost of the taxpayer's remuneration and benefits by the non-resident employer (and this can be checked with the relevant HMRC corporation tax specialist or Customer Compliance Manager dealing with the UK company's Corporation Tax affairs) a claim under Article 15(2) should be resisted.

## **36.9 Labour-hire arrangement**

An "employment" is essential to art 15, and (if there is one) the identity of the employer is, as noted, essential for STBV payment condition (b).

The terms employment/employer are not defined. Except for a few marginal points, there never is a definition. It has been left for the Courts to sort out.

### *36.9.1 Labour-hire terminology*

For the purposes of discussion we need some neutral terms, which may apply to employment/non-employment relationships. In this chapter:

The "**worker**" is the individual supplying service(s) whether

employed/self employed<sup>28</sup>

The “**client**” is the person to whom the worker’s services are supplied

A “**labour-hire**” arrangement is one under which there are two<sup>29</sup> contracts:

- (1) A contract of employment<sup>30</sup> between the worker and an “**intermediary**”, under which the intermediary is (or at least is expressed to be) the employer of the worker.
- (2) A contract between the intermediary and the “**end user**”, under which the intermediary provides the services of the worker to the end user. The worker is not (or at least is not expressed to be) a party to this contract.

The state of the end user is therefore the work State.

Other terminology which might be used includes:

- Secondment; and the worker is called a secondee
- Outsourcing
- A trilateral arrangement

If the worker and the intermediary are not resident in the work State (the State of the end user), that may be called an “**international labour-hire arrangement**”.

OECD Commentary uses different terminology:

<b>My term</b>	<b>OECD term</b>
Worker	<i>The individual</i>

---

28 This is not the usual employment law terminology, where “worker” has a narrower meaning; it means in short an individual who works under (a) a contract of employment, or (b) any other contract, whereby the individual undertakes to work personally for another person whose status is not that of a client or customer of a profession or business carried on by the individual; see s.230 Employment Rights Act 1996.

29 There could be more than one intermediary, with a series of contracts between them, but that would be unusual and I do not consider it here.

30 This contract might alternatively be a contract under which the worker is (or at least is expressed to be) self-employed, and provides business services to the intermediary; but in the discussion below I assume this contract is (or is at least expressed to be) a contract of employment.

End user      *The enterprise that acquires the services*  
 Intermediary *Formal employer/enterprise by which the individual is formally employed*

It may happen that form and substance diverge, so:

- (1) The intermediary is the *formal* or *de jure* employer
- (2) The end user is the *effective/economic*<sup>31</sup>/*functional* or *de facto* or *real*<sup>32</sup> employer

I refer to these as the formal/effective employer, or the employer in form/in substance.

The question then is which of the two is the “employer” for DTA purposes.

If (as I will conclude) the treaty has an autonomous meaning, it would be necessary to distinguish:

**“Domestic-law employer”**: the employer as a matter of domestic employment law

**“Treaty-employer”**: the employer for the purposes of the DTA

The same distinction is relevant in identifying the personnel of an enterprise, for the personnel condition of a PE.<sup>33</sup>

### 36.9.2 *Employer: OECD Commentary*

The Commentary has changed over time. In the following discussion:

**“1992 Commentary”** means the Commentary in its 1992 form

**“2010 Commentary”** means the 2010 form, which is the current form<sup>34</sup>

Prior to 1992 there was no discussion of labour-hire arrangements.

### 36.9.3 *1992 Commentary*

The 1992 Commentary was concise:

---

31 See App.6.5.1 (Economic terms with antonym).

32 The expression “real employer” was used in the 1992 OECD Commentary, but (wisely) dropped from the 2010 Commentary.

33 See 101.9.1 (Formal v effective employment).

34 For pre-2010 discussion see: Avery Jones, “Short-term Employment Assignments under Article 15(2) of OECD Model” (2009) 63 Bulletin for International Taxation 1,6.

8. [Article 15(2) STBV relief] has given rise to numerous cases of abuse through adoption of the practice known as “international hiring-out of labour”. In this system, a local employer wishing to employ foreign labour for one or more periods of less than 183 days recruits through an intermediary established abroad who purports to be the employer and hires the labour out to the employer. The worker thus fulfils prima facie the three conditions laid down by [art 15(2)] and may claim exemption from taxation in the country where he is temporarily working.

To prevent such abuse, in situations of this type, the term “employer” should be interpreted in the context of [art 15(2)].<sup>35</sup> In this respect, it should be noted that the term “employer” is not defined in the Convention but it is understood that the employer is the person having rights on the work produced and bearing the relative responsibility and risks. In cases of international hiring-out of labour, these functions are to a large extent exercised by the user. In this context, substance should prevail over form, i.e. each case should be examined to see whether the functions of employer were exercised mainly by the intermediary or by the user.

#### 36.9.4 2010 Commentary

The 2010 Commentary now divides States into 2 categories. Firstly:

8.2 In some States, a formal contractual relationship would not be questioned for tax purposes unless there were some evidence of manipulation and these States, as a matter of domestic law, would consider that employment services are only rendered where there is a formal employment relationship.

The reference to “manipulation” gives plenty of wriggle-room. This is the only place in the OECD Commentary that the word is used. What does it mean? Is it the same as abuse?<sup>36</sup> Would a case with a formal employer distinct from an effective employer (at least) normally involve

---

35 This might perhaps be interpreted to mean that the form over substance approach only applied in cases of abuse, though that does not seem the most natural reading. The point does not now arise: the 2010 Commentary does not limit the substance-over form approach to cases of abuse.

36 See 104.7 (OECD-concept abuse).

“manipulation”? If so, the distinction between form-over-substance States (within para 8.2) and substance-over-form States (within para 8.4) will (at least) normally not arise. For “manipulation” is essentially a substance-over-form concept.

However that may be, States in the second category do not have to consider what amounts to manipulation because they apply the substance-over-form approach proposed in the 1992 Commentary:

8.4 In many States, however, various legislative or jurisprudential rules and criteria (e.g. substance over form rules) have been developed for the purpose of distinguishing

[1] cases where services rendered by an individual to an enterprise should be considered to be rendered in an employment relationship (contract of service) from

[2] cases where such services should be considered to be rendered under a contract for the provision of services between two separate enterprises (contract for services) [ie the contract between the intermediary and the end user].

In the following discussion:

“**Form-over-substance States**” are those within para 8.2 (employment requires a formal contractual relationship)

“**Substance-over-form States**” are those within para 8.4

In short, the 1992 Commentary assumed that all States were form-over-substance states. But some States did not accept that, and the 2010 amendments were designed to accommodate them.

### 36.9.5 *Employment law background*

Where does the UK fall in this categorisation, in para 8.2 or 8.4? Is our law formal? or does substance prevail over form? The question is too broad, it does not have a yes or no answer at that level of generality. The answer depends on the issue which is being considered.

In short:

(1) *Is a contract an employment contract?* If the question is whether a contract made between A and B is one of employment/non-

employment, the English<sup>37</sup> employment law approach is one of substance, not form (ie the parties' description of the arrangement, or the wording of the contract, is not decisive).

- (2) *Who are the parties to the contract?* If the question is whether under a labour-hire arrangement, there is a contract of employment between the worker and the end user, the English employment law approach is better described as one of form,<sup>38</sup> and the parties' description of the arrangement and the wording of the contracts is decisive (unless a contract written formally is varied orally, or a sham, which would not be lightly inferred).

This is why there is legislation dealing with labour-hire arrangements in Part 2 ITEPA:

Chapter	Topic
7	Agency workers
8	Intermediaries
9	Managed service companies

This view is supported by *The Independent Workers' Union, (R, oao) v Central Arbitration Committee*.<sup>39</sup> In this case the University of London (the end user) outsourced its front of house (security guards, receptionists etc, "the workers"). The workers had a formal contract of employment with a third party ("the intermediary"). The question was whether the University was the employer of the workers. The University did not have a contract with the workers. It did have significant involvement in determining their terms and conditions of employment.<sup>40</sup> The Court said:

*A de facto* employer is not a known or recognised concept... Organisations are entitled to adopt outsourcing arrangements, should

---

37 Further consideration would be needed for Scots or foreign law. Oxford Pro Bono Publico, "Joint Employers and Agency Workers" (2017) considers the position in USA, Canada, South Africa, New Zealand and Ireland; see [https://www.law.ox.ac.uk/sites/files/oxlaw/3.\\_joint\\_employers\\_and\\_agency\\_workers.pdf](https://www.law.ox.ac.uk/sites/files/oxlaw/3._joint_employers_and_agency_workers.pdf)

38 Though a substance/form dichotomy is not as straightforward or clear cut as those terms may suggest.

39 [2019] EWHC 728 (Admin).

40 It was assumed that the University substantially determined the terms and conditions of the workers.

they wish to do so, as a legitimate means of organising their activities.<sup>41</sup>

Likewise in Australia. *Wilton & Cumberland v Coal & Allied Operations*<sup>42</sup> considered whether workers provided through a labour-hire arrangement were employees of the end user. The end user did not discuss essential contractual terms with the workers. The workers did not act in a way that indicated they regarded themselves as being employed by the end user. The Court held that there was no employment relationship between the workers and the end user. There was no contract between them at all.

### 36.9.6 Do domestic-law rules apply?

OECD Commentary continues:

That distinction [form-over-substance/substance-over-form] keeps its importance when applying the provisions of Article 15, in particular those of subparagraphs 2 b) and c). Subject to [a] the limit described in paragraph 8.11 and [b] unless the context of a particular convention requires otherwise, it is a matter of domestic law of the State of source to determine whether services rendered by an individual in that State are provided in an employment relationship and that determination will govern how that State applies the Convention.

Thus where the UK is the work State, the question whether the end user is the employer, which is key for STBV relief in labour-hire arrangements, is said in principle to be a matter of UK domestic law.<sup>43</sup> But this is subject to two wide exceptions:

- (1) Where the context of a particular convention requires otherwise. This does not refer to the case where a convention does not have standard OECD Model wording; it refers to a case where the domestic law of a State (which applies to undefined treaty terms) requires some other interpretation of OECD Model wording.
- (2) The limit described in para 8.11: see 36.9.8 (Limit on work State powers).

---

41 [2019] EWHC 728 (Admin) at [74], [81].

42 [2007] FCA 725.

43 See 103.11 (Undefined treaty terms); 33.3 (Employment/employer/employee).

In short, UK domestic law is not the only consideration in determining the meaning of the term ‘employer’, and the identity of the employer, for the purposes of STBV relief. The context, object and purpose of the relief, and the payment conditions in particular, need to be considered in interpreting the term ‘employer’.

### 36.9.7 *Effective employment*

OECD Commentary provides:

8.5 In some cases, services rendered by an individual to an enterprise may be considered to be employment services for purposes of domestic tax law even though these services are provided under a formal contract for services between,

[1] on the one hand, the enterprise that acquires the services, and,

[2] on the other hand, either

[a] the individual himself

[b] or another enterprise [the Intermediary]

[i] by which the individual is formally employed or

[ii] with which the individual has concluded another formal contract for services.

The focus of discussion is on case 2[b][i], ie what I call labour-hire arrangements.

8.6 In such cases, the relevant domestic law may ignore the way in which the services are characterised in the formal contracts. It may prefer to focus primarily on the nature of the services rendered by the individual and their integration into the business carried on by the enterprise that acquires the services to conclude that there is an employment relationship between the individual and that enterprise.

8.7 Since the concept of employment to which Article 15 refers is to be determined according to the domestic law of the State that applies the Convention (subject to the limit described in paragraph 8.11 and unless the context of a particular convention requires otherwise),<sup>44</sup> it follows that a State which considers such services to be employment services will apply Article 15 accordingly. It will, therefore, logically conclude that the enterprise to which the services are rendered [the end user] is in

---

44 See Commentary para 8.4, set out at 36.9.2 (Employment: OECD Commentary).

an employment relationship with the individual so as to constitute his employer for purposes of subparagraphs 2 b) and c) [STBV payment conditions].

The OECD Commentary supports that approach:

That conclusion is consistent with the object and purpose of [art 15(2), STBV relief] since, in that case, the employment services may be said to be rendered to a resident of the State where the services are performed.

... 8.10 The approach described in the previous paragraphs therefore allows the State in which the activities are exercised [the work State] to reject the application of [art 15(2), STBV relief]

[1] in abusive cases and

[2] in cases where, under that States's domestic law concept of employment, services rendered to a local enterprise by an individual who is formally employed by a non-resident are rendered in an employment relationship (contract of service) with that local enterprise.

### 36.9.8 *Limit on work State powers*

In short, the work State may refuse STBV treaty relief if it determines that the end user is the employer, rather than the intermediary. But the model treaty does not allow the work State an unfettered power to determine the “who is the employer” issue in an arbitrary way:

8.11 The conclusion that, under domestic law, a formal contractual relationship should be disregarded must, however, be arrived at on the basis of objective criteria. For instance, a State could not argue that services are deemed, under its domestic law, to constitute employment services where, under the relevant facts and circumstances, it clearly appears that these services are rendered under a contract for the provision of services concluded between two separate enterprises. The relief provided under paragraph 2 of Article 15 [STBV relief] would be rendered meaningless if States were allowed

[1] to deem services to constitute employment services in cases where there is clearly no employment relationship or

[2] to deny the quality of employer to an enterprise carried on by a non-resident where it is clear that that enterprise provides services, through its own personnel, to an enterprise carried on by a resident.

This conclusion has a knock-on effect for taxation of the intermediary:

Conversely, where services rendered by an individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises, that State should logically also consider that the individual is not carrying on the business of the enterprise that constitutes that individual's formal employer; this could be relevant, for example, for purposes of determining whether that enterprise has a permanent establishment at the place where the individual performs his activities.<sup>45</sup>

### 36.9.9 *Identifying effective employer*

If we adopt an effective employment test, how do we determine whether there is an employment relationship between the worker and the end user? The 1992 Commentary provided:

*It is therefore up to the Contracting States to agree on the situations in which the intermediary does not fulfil the conditions required for him to be considered as the employer within the meaning of [art 15(2)2, STBV relief].*

*In settling this question, the competent authorities may refer not only to the above-mentioned indications [who has rights to work produced/who bears responsibility and risks] but to a number of circumstances enabling them to establish that the real employer is the user of the labour (and not the foreign intermediary).<sup>46</sup>*

The 2010 Commentary is longer, and there are some differences of detail

---

45 See 101.9.1 (Formal v effective employment).

46 The pre 2010 Commentary then gave a list of factors which are an earlier version of the factors in the current OECD Commentary:

- [1] Responsibility/risk for results produced by the employee's work; now Commentary para 8.13
- [2] Authority to instruct the worker; now Commentary 8.14 [1]
- [3] Control/responsibility of place where work performed; now Commentary 8.14 [2]
- [4] Remuneration to the hirer calculated on the basis of the time utilised/or in other ways a connection between this remuneration and wages received by the employee; now Commentary 8.14[3]
- [5] Provision of tools and materials; now Commentary 8.14[4]
- [6] Number/qualifications of employees; now Commentary 8.14[5]

between the 1992 and 2010 Commentary, but the 1992 Commentary no longer matters. The 2010 Commentary provides:

8.12 It will not always be clear, however, whether services rendered by an individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises. Any disagreement between States as to whether this is the case should be solved having regard to the following principles and examples (using, where appropriate, the mutual agreement procedure).

8.13 The nature of the services rendered by the individual will be an important factor since it is logical to assume that an employee provides services which are an integral part of the business activities carried on by his employer. It will therefore be important to determine whether the services rendered by the individual *constitute an integral part of the business of the enterprise* to which these services are provided. For that purpose, a key consideration will be which enterprise *bears the responsibility or risk for the results* produced by the individual's work.

The tests offered here (emphasis added) are (1) whether the worker is an integral part of the enterprise, and (2) responsibility/risk. These are evaluative tests and may not offer much help in practice.

Clearly, however, this analysis will only be relevant if the services of an individual are rendered directly to an enterprise. Where, for example, an individual provides services to a contract manufacturer or to an enterprise to which business is outsourced, the services of that individual are not rendered to enterprises that will obtain the products or services in question.

This seems rather shallow. What constitutes outsourcing is not explored.

8.14 Where a comparison of

[a] the nature of the services rendered by the individual with

[b] the business activities carried on

[i] by his formal employer and

[ii] by the enterprise to which the services are provided

points to an employment relationship that is different from the formal contractual relationship, the following additional factors may be relevant to determine whether this is really the case:

[1] who has the authority to instruct the individual regarding the manner in which the work has to be performed;

- [2] who controls and has responsibility for the place at which the work is performed;
- [3] the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided (see paragraph 8.15 below);<sup>47</sup>
- [4] who puts the tools and materials necessary for the work at the individual's disposal;
- [5] who determines the number and qualifications of the individuals performing the work;
- [6] who has the right to select the individual who will perform the work and to terminate the contractual arrangements entered into with that

---

47 OECD Commentary para 8.15 explains the term “directly charged”:

Where an individual [the worker] who is formally an employee of one enterprise [the intermediary] provides services to another enterprise [the end user], the financial arrangements made between the two enterprises will clearly be relevant, although not necessarily conclusive, for the purposes of determining whether the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided. For instance, if the fees charged by the enterprise that formally employs the individual

[1] represent the remuneration, employment benefits and other employment costs of that individual for the services that he provided to the other enterprise,

[2] with no profit element or with a profit element that is computed as a percentage of that remuneration, benefits and other employment costs,

this would be indicative that the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided.

That should not be considered to be the case, however,

[1] if the fee charged for the services bears no relationship to the remuneration of the individual or

[2] if that remuneration is only one of many factors taken into account in the fee charged for what is really a contract for services (e.g. where a consulting firm charges a client on the basis of an hourly fee for the time spent by one of its employees to perform a particular contract and that fee takes account of the various costs of the enterprise),

provided that this is in conformity with the arm's length principle if the two enterprises are associated.

It is important to note, however, that the question of whether the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided is only one of the subsidiary factors that are relevant in determining whether services rendered by that individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises.

- individual for that purpose;  
 [7] who has the right to impose disciplinary sanctions related to the work of that individual;  
 [8] who determines the holidays and work schedule of that individual.

### 36.9.10 OECD examples

The OECD Commentary gives 6 examples.<sup>48</sup> I consider these in the following order:

Eg no.	Facts	STBV relief		Residence State	Work State
1	Training co provides trainer	Yes		Aco	Bco
2	Group co provides market strategist	Yes		Cco	Dco
6	Group co provides HR manager	Yes		Eco	Fco
		<i>Form Substance</i>			
3	Group co provides receptionist	Yes	No	Gco	Hco
4	Agency engineer	Yes	No	Ico	Jco
5	Engineering co provides engineer	Yes	No	Kco	Lco

We start with 3 cases (no. 1, 2 and 6) where labour hire arrangements are effective, ie the effective employer is the intermediary, not the end user:

#### 8.16 Example 1 [Training co provides trainer]:

Aco, a company resident of State A, concludes a contract with Bco, a company resident of State B, for the provision of training services. Aco is specialised in training people in the use of various computer software and Bco wishes to train its personnel to use recently acquired software. X, an employee of Aco who is a resident of State A, is sent to Bco's offices in State B to provide training courses as part of the contract.

The OECD analysis is as follows:

#### 8.17 In that case, State B could not argue

- [1] that X is in an employment relationship with Bco or  
 [2] that Aco is not the employer of X for purposes of the convention between States A and B.

X is formally an employee of Aco whose own services, when viewed in light of the factors in paragraphs 8.13 and 8.14, form an integral part of the business activities of Aco. The services that he renders to Bco are rendered on behalf of Aco under the contract concluded between the two enterprises. Thus, provided that X is not present in State B for more

---

48 See too the Australian version of the examples in TR 2013/1EC.

than 183 days during any relevant twelve month period and that Aco does not have in State B a permanent establishment which bears the cost of X's remuneration, the exception of [art 15(2) STBV relief] will apply to X's remuneration.

That seems straightforward.

The next two examples concern company groups:

**8.18 Example 2:** [Group co provides marketing strategist]  
Cco, a company resident of State C, is the parent company of a group of companies that includes Dco, a company resident of State D. Cco has developed a new worldwide marketing strategy for the products of the group. In order to ensure that the strategy is well understood and followed by Dco, which sells the group's products, Cco sends X, one of its employees who has worked on the development of the strategy, to work in Dco's headquarters for four months in order to advise Dco with respect to its marketing and to ensure that Dco's communications department understands and complies with the worldwide marketing strategy.

The OECD analysis is as follows:

8.19 In that case, Cco's business includes the management of the worldwide marketing activities of the group and X's own services are an integral part of that business activity. While it could be argued that an employee could have been easily hired by Dco to perform the function of advising the company with respect to its marketing, it is clear that such function is frequently performed by a consultant, especially where specialised knowledge is required for a relatively short period of time. Also, the function of monitoring the compliance with the group's worldwide marketing strategy belongs to the business of Cco rather than to that of Dco. The exception of [art 15(2) STBV] should therefore apply provided that the other conditions for that exception are satisfied.

**8.26 Example 6:** [Group co provides HR manager]  
Kco, a company resident of State K, and Lco, a company resident of State L, are part of the same multinational group of companies. A large part of the activities of that group are structured along function lines, which requires employees of different companies of the group to work together under the supervision of managers who are located in different States and employed by other companies of the group.

X is a resident of State K employed by Kco; she is a senior manager in charge of supervising human resources functions within the multinational group. Since X is employed by Kco, Kco acts as a cost centre for the human resource costs of the group; periodically, these costs are charged out to each of the companies of the group on the basis of a formula that takes account of various factors such as the number of employees of each company. X is required to travel frequently to other States where other companies of the group have their offices. During the last year, X spent three months in State L in order to deal with human resources issues at Lco.

The OECD analysis is as follows:

8.27 In that case, the work performed by X is part of the activities that Kco performs for its multinational group. These activities, like other activities such as corporate communication, strategy, finance and tax, treasury, information management and legal support, are often centralised within a large group of companies. The work that X performs is thus an integral part of the business of Kco. The exception of paragraph 2 of Article 15 [STBV] should therefore apply to the remuneration derived by X for her work in State L provided that the other conditions for that exception are satisfied.

Note that in example 2, marketing services are “frequently performed by a consultant” and in example 6, HR is “often centralised within a large group of companies.”<sup>49</sup> There is a normative test lurking here; labour-hire arrangements which are regarded as standard practice within company groups are acceptable.

I turn to consider the 3 OECD examples of labour-hire arrangements where the intermediary is the formal employer, but the end user is the effective employer. These are examples no. 3, 4 and 5:

8.20 **Example 3** [Group co provides receptionist]

A multinational owns and operates hotels worldwide through a number of subsidiaries.

Eco, one of these subsidiaries, is a resident of State E where it owns and operates a hotel. X is an employee of Eco who works in this hotel.

---

49 Is this in fact correct? and would it need to be proved by evidence to a tribunal, or would a tribunal be expected to know what is normal for international groups?

Fco, another subsidiary of the group, owns and operates a hotel in State F where there is a shortage of employees with foreign language skills. For that reason, X is sent to work for five months at the reception desk of Fco's hotel. Fco pays the travel expenses of X,<sup>50</sup> who remains formally employed and paid by Eco, and pays Eco a management fee based on X's remuneration, social contributions and other employment benefits for the relevant period.

The OECD analysis is as follows:

8.21 In that case, working at the reception desk of the hotel in State F, when examined in light of the factors in paragraphs 8.13 and 8.14, may be viewed as forming an integral part of Fco's business of operating that hotel rather than of Eco's business. Under the approach described above, *if*, under the domestic law of State F, the services of X are considered to have been rendered to Fco in an employment relationship, State F could then logically consider that Fco is the employer of X and the exception of paragraph 2 of Article 15 [STBV] would not apply.

8.22 **Example 4** [Agency provides engineer]

Gco is a company resident of State G. It carries on the business of filling temporary business needs for highly specialised personnel.

Hco is a company resident of State H which provides engineering services on building sites. In order to complete one of its contracts in State H, Hco needs an engineer for a period of five months. It contacts Gco for that purpose. Gco recruits X, an engineer resident of State X, and hires him under a five month employment contract. Under a separate contract between Gco and Hco, Gco agrees to provide the services of X to Hco during that period. Under these contracts, Gco will pay X's remuneration, social contributions, travel expenses and other employment benefits and charges.

The OECD analysis is as follows:

8.23 In that case, X provides engineering services while Gco is in the business of filling short-term business needs. By their nature the services rendered by X are not an integral part of the business activities of his formal employer. These services are, however, an integral part of

---

50 Author's footnote: The analysis would not be different if Eco pays the travel expenses.

the business activities of Hco, an engineering firm. In light of the factors in paragraphs 8.13 and 8.14, State H *could* therefore consider that, under the approach described above, the exception of paragraph 2 of Article 15 [STBV] would not apply with respect to the remuneration for the services of the engineer that will be rendered in that State.

**8.24 Example 5:** [Engineering co provides engineer]

Ico is a company resident of State I specialised in providing engineering services. Ico employs a number of engineers on a full time basis.

Jco, a smaller engineering firm resident of State J, needs the temporary services of an engineer to complete a contract on a construction site in State J. Ico agrees with Jco that one of Ico's engineers, who is a resident of State I momentarily not assigned to any contract concluded by Ico, will work for four months on Jco's contract under the direct supervision and control of one of Jco's senior engineers. Jco will pay Ico an amount equal to the remuneration, social contributions, travel expenses and other employment benefits of that engineer for the relevant period, together with a 5% commission. Jco also agrees to indemnify Ico for any eventual claims related to the engineer's work during that period of time.

The OECD analysis is as follows:

8.25 In that case, even if Ico is in the business of providing engineering services, it is clear that the work performed by the engineer on the construction site in State J is performed on behalf of Jco rather than Ico. The direct supervision and control exercised by Jco over the work of the engineer, the fact that Jco takes over the responsibility for that work and that it bears the cost of the remuneration of the engineer for the relevant period are factors that could support the conclusion that the engineer is in an employment relationship with Jco. Under the approach described above, State J *could* therefore consider that the exception of paragraph 2 of Article 15 [STBV] would not apply with respect to the remuneration for the services of the engineer that will be rendered in that State.

In these 3 cases, OECD do not say that the end user *is* the employer. They say that the work State *could* consider the end user to be an employer, *if* it is a substance-over-form State. (The emphasis has been added to make the point.) But the UK is a substance-over-form State.

None of the examples involve tax avoidance or abuse: they are (as far as

one can tell from the facts given) commercial, non-tax motivated arrangements.

In each of the examples the intermediary (the formal employer) carried on a genuine independent enterprise, and did not lack substance; but the effective employer was the end user. The focus is on the circumstances of the individual employee.

In making the form/substance distinction, the examples do not systematically identify and review the 8 factors identified in para 8.14 of the Commentary. Most of the factors are not expressly mentioned, though in some cases one might make an inference. The focus is almost exclusively on the two key factors of integration/risk:

<b>Example</b>	<b>Trainer</b>	<b>Marketing analyst</b>	<b>Group HR manager</b>	<b>HR Receptionist</b>	<b>Agency Engineer</b>	<b>Surplus Engineer</b>
Example no	1	2	6	3	4	5
Integral part of end user business	no	no	no	yes	yes	infer yes
End user responsibility/risk	-	-	-	-	-	yes
End user may instruct	-	-	-	-	-	yes
End user controls place of work	infer yes	infer yes	infer yes	infer yes	infer yes	infer yes
Remuneration directly charged on end user	-	-	no	yes	infer yes	yes
End user provides tools/materials	-	-	-	-	-	-
End user determines worker no/qualifications	-	-	-	-	-	-

**36.9.11 Economic employer: HMRC view**

In 1995 HMRC changed its practice to adopt the 1992 Commentary’s effective employment test. Tax Bulletin 15 (1995) provides:

[The Bulletin refers to art 15(2) (STBV relief) and continues:] In many cases, it is clear that the employer is the non resident company for whom

the taxpayer was working before he or she came to the UK. In other cases, the employee may have been seconded by his or her overseas employer to work for a UK company, or the overseas employer may carry on a business of hiring out staff to other companies. A formal contract of employment remains with the overseas employer, but the employee works in the business of the UK company, which obtains the benefits and bears any risks in relation to the work undertaken by the employee. In economic terms this state of affairs is recognised by the overseas employer recharging the cost of the employee's remuneration to the UK and the UK company might be described as the "economic employer".

As mentioned in paragraph 1920(b) of the Inland Revenue's recently published Double Taxation Relief manual,<sup>51</sup> we have in the past accepted, other than in cases involving tax avoidance, that where the employee continued to be paid by the overseas employer and had no contract of employment with the UK company, the condition that the employee's remuneration must be "paid by or on behalf of an employer" who is not resident in the UK, was met regardless of the relationship between the employee and the UK company.

More recently, the question of the identity of the employer in cases like these has been the subject of guidance in the 1992 and 1994 Editions of the Commentary on the OECD Model Double Taxation Convention. The Commentary concludes that the context of the provision concerning exemption for short stay employees requires that it is the "economic employer", and not the formal employer, who should be considered as the employer for the purposes of applying the provision.

The UK is a member country of the OECD and the terms of modern UK double taxation agreements, including the condition concerning payment of remuneration, are based on the OECD Model Convention. The Revenue seeks, as far as possible, to apply double taxation agreements consistently with the guidance in the Commentary on the Model Convention. Consequently, the Revenue now intends to take an approach consistent with the guidance in the Commentary on the Model Convention in cases where remuneration is paid by a non-resident but the cost of that remuneration is borne by an "economic employer" in the UK. Inspectors dealing with claims to exemption from employees who

---

51 I expect this refers to the text now in DT1922, see 36.11 (Labour-hire: Avoidance motive).

commenced a work assignment in the UK after 1 July 1995 and with all claims for 1996-97 onwards, will take into account the terms of the Commentary on the OECD Model Convention. They will not accept claims where the cost of an employee's remuneration is borne by a UK company which acts as the "economic employer".<sup>52</sup>

This made sense in the light of the 1992 Commentary, which adopted an effective employment rule and did not offer any alternative.

The 2010 Commentary recognised that some States did not adopt this rule;<sup>53</sup> but HMRC practice has not changed.<sup>54</sup>

There is some support for this in *Kljun v HMRC*.<sup>55</sup> For a number of reasons, the authority of the case is quite weak. HMRC were not represented by Counsel, and the taxpayer was not represented at all. This was a case where the individual did not pay tax in the residence State and the Tribunal seems to have regarded that as significant.<sup>56</sup> More fundamentally, the treaty in point was in non-OECD model form, best seen in comparison with the OECD Model form:

**Art 15(2)(b) Yugoslavia DTA (1981) Art 15(2)(b) OECD Model**

---

52 HMRC adopted the view that changes in the Commentary affect existing as well as future treaties; see 103.10.2 (Changes to OECD Commentary).

53 See 36.9.4 (2010 Commentary).

54 See the STBV consultation paper which states that STBV relief does not apply where the individual is "legally employed by a UK resident employer, but economically employed by a separate non-resident entity".

<https://www.gov.uk/government/consultations/tax-and-administrative-treatment-of-short-term-business-visitors-from-overseas-branches> para 1.5, 3.7.

Similarly PAYE Manual:

**82000 PAYE operation: international employments: EP appendix 4: criteria for short term business visitors** [Jun 2020]: "the OECD commentary provides examples of situations where the UK Company would not be regarded as the economic employer and treaty exemption may therefore apply".

55 [2011] UKFTT 371 (TC). The name is pronounced *Kleón*.

56 Though that is considered to be wrong; see 103.5 (Double non-taxation).

the remuneration is paid by, or on behalf of, a person to whom, or for whose benefit, the relevant dependent personal services are rendered and who is not a resident of the other State;	the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State
---	--

The Yugoslavia treaty wording (which is unusual)<sup>57</sup> is wider. But the Tribunal considered that made no difference:

The Tribunal finds that “person” is capable of wider interpretation than “employer” but the test for paragraph 2(b) is essentially the same insofar as the entity which receives the economic benefit of the Appellant’s work requires to be identified and therefore the Commentaries are of assistance.<sup>58</sup>

Lastly, the case concerned years before the 2010 changes to the Model Commentary and (though argued after the 2010 changes) did not refer to them. The reference was to the 1992 form of the Commentary.<sup>59</sup>

Still, it is clear that the Tribunal fully accepted that “employer” in the context of STBV relief meant the economic employer. On the facts it was reasonably clear that the UK end user was the economic employer, and so the claim to STBV relief was refused.

### 36.9.12 *Basis of HMRC view*

The point could be argued, but it is considered that a Court is likely to approve of HMRC’s approach. If UK employment law does not have an effective employment test, as argued above, this entails the conclusion that DTA employer is different from the employer as determined by UK domestic employment law.

One could simply say that treaty-employment has an autonomous

---

57 This wording now survives only in what is left of the Yugoslavia treaty, which applies in Serbia.

58 *Kljun* at [17].

59 See at [22] citing the text of the 1992 version of the Commentary. The treaty in point was made before the change to the Commentary; but this aspect was not noticed, or if noticed, was not considered worth mentioning.

meaning,<sup>60</sup> but that is not supported by the 2010 Commentary which states that domestic tax law meanings apply.

I think the best argument in support this view is that the UK tax code offers (at least) two definitions of employer:

- The standard ITEPA definition<sup>61</sup>
- PAYE definition<sup>62</sup>

The PAYE definition effectively includes an economic employer. But given the variety of UK tax definitions, the way is easy to say that the default rule (undefined treaty terms have UK tax meanings) does not have much strength, and the context supports an effective employer approach.

### 36.9.13 *Practice in Australia*

This is also consistent with the practice in Australia which adopts an effective employment test. The Australian Revenue comment:

Even though ... an employment contract is not to be implied lightly, the substance over form approach may lead to a conclusion that an entity other than the party specified in the written contract of employment should be regarded as the employer for the purposes of the short-term visit exception where:

[1] the conduct of the parties is not consistent with the terms of the written contract of employment or another contract with a third party... or

[2] under the contractual terms, the true nature of the relationship(s) between the parties are misrepresented or disguised.<sup>63</sup>

85. The terms and conditions of the contract, whether express or implied, are of considerable importance to the proper characterisation of the relationship.

86. However, the parties cannot deem the relationship between themselves to be something that it is not. The parties to an agreement cannot alter the true substance of the relationship by simply giving it a different label...

---

60 Dziurdz, “Article 15 of the OECD Model: The 183-day rule and the meaning of “employer” [2013] BTR 95.

61 See 33.3 (Employment/employer/employee).

62 See 35.3 (Employment/employer/employee); 35.5 (Employee works for non-employer).

63 Author’s footnote: Points [1] and [2] appear to amount to the same thing.

[1] and [2] may fall under what OECD Commentary calls “manipulation”.<sup>64</sup>

The Australian Revenue discuss the issue at some length. I set out here the main part, though the whole of it is worth study:

88. In *Damevski*, the Federal Court found that a worker remained an employee despite his employer’s attempt to end the employment relationship and deal with the employee as a contractor through a labour hire agency. In this case, the interposition of the labour hire agency was not genuine. The true nature of the relationship was that the worker remained an employee of his putative former employer because the labour hire agency did nothing more than pay his wages, while the putative former employer continued to direct the employee

89. In some circumstances, an intermediary firm may perform an agency role to bring about a contractual relationship between the worker and the end user. In this case, the worker will be an employee of the user enterprise, not the intermediary. However, the manner in which the relationship is described is not conclusive of the nature of the legal relationship between the parties. In *Swift Placements*, the Industrial Relations Commission rejected the argument that the relationship between Swift Placements and the worker was one of agency, notwithstanding that the business of Swift Placements was described as an employment agency.

### **Key indicators of employment relationship**

90. While the factors discussed below are key indicators of whether an individual is an employee or independent contractor at common law, they are also relevant in determining who should be regarded as the employer for the purposes of the short term visit exception.

91. No one factor is determinative and not all factors will be relevant in a particular case...

### **Control**

92. An important factor to consider is the degree of control which an enterprise engaging an individual to perform work has over that individual in terms of what, how and where work is to be done...

93. However, the importance of control lies in the right of the employer to exercise it, rather than its actual exercise, even though the actual exercise can still be relevant...

96. ... it is the ultimate or legal control over the individual non-resident which is most relevant, rather than practical control.

---

64 See 29.9.4 (2010 Commentary).

97. Ultimate control would, amongst other things, enable the relevant entity to withdraw the worker from an assignment and terminate the contract with the worker.

98. However, specifying in detail how contracted services are to be performed does not of itself necessarily imply an employment relationship.

99. Similarly, in international labour hire arrangements, it will not necessarily be inferred that the user enterprise is the employer for the purposes of the short-term visit exception merely because the user enterprise exercises practical control over the individual by having the work performed at the premises of the user enterprise and under their direction...

### **Integration**

101. It is relevant to consider the nature of the services rendered by the individual and whether they are an integral part of the business activities carried on by the enterprise to which the services are provided.

102. ... the distinction between an employee and independent contractor is 'rooted fundamentally in the difference between a person who serves his employer in his, the employer's business, and a person who carries on a trade or business of his own.'...

104. Where the facts indicate that individuals are not working on their own account, this points to the relationship being one of employment.

105. Furthermore, Mason J in *Stevens v. Brodribb* described the relevance of the integration test:

...For my part I am unable to accept that the organization test could result in an affirmative finding that the contract is one of service when the control test either on its own or with other indicia yields the conclusion that it is a contract for services. Of the two concepts, legal authority to control is the more relevant and the more cogent in determining the nature of the relationship.

106. In relation to international labour hire arrangements, it will not necessarily be inferred that the user enterprise is the employer for the purposes of the short-term visit exception merely because the work is being performed for the benefit of the user enterprise rather than the intermediary...

107. Accordingly, a non-resident individual engaged by an intermediary may be directed to work for the benefit of the user enterprise without the user enterprise becoming the employer for the purposes of the short-term visit exception.

### **Remuneration**

108. The identity of the entity paying remuneration to an employee for their work is a factor to consider in determining the identity of the employer...

110. However ...payment of wages by a third party, or .. an 'intermediary', is not

fatal to the existence of a contract of employment between a worker and a putative employer.

111. The identity of the entity that determines the amount of the remuneration will also be relevant...

### **Terms of engagement**

112. ... the actual terms and terminology in the contract will be of considerable importance to the proper characterisation of the relationship between the parties, particularly where the criteria are balanced. ...

113. However, how the arrangement between the parties is labelled in a written contract is not conclusive of the nature of the legal relationship...

114. Terms of engagement also refers to such matters as length of assignment and the relevant role of the worker, rates of pay, workers compensation insurance, deduction of PAYG, superannuation contributions and other employee benefits.

### **Risk**

115. A key consideration of whether there is an employment relationship is who bears the responsibility or risk for the individual's work...

### **Results**

118. The notion of 'payment for result' is a strong (but not conclusive) indication that the contract is one for services, rather than of service. ... Undertaking the production of a given result has been considered to be a mark, if not the mark, of an independent contractor...

119. However, this notion is not necessarily inconsistent with a contract of service. ..

120. To the extent such a contract involves an employment relationship, who determines the results to be achieved is a factor to take into account in determining the identity of the employer.

### **Provision of tools and equipment and payment of business expenses**

121. The provision of assets, equipment and tools and the incurring of expenses and other overheads by an individual have been held to be an indicator that the individual is an independent contractor.

122. However, the provision of necessary tools and equipment is not necessarily inconsistent with an employment relationship. ...

### **Delegation**

124. The power to delegate or subcontract (in the sense of the capacity to engage others to do the work, or parts of the work) is a significant factor to determine whether a worker is an employee or an independent contractor. For example, if a worker is required contractually to perform work personally, then this is an indication that the worker is an employee.

125. In international labour hire arrangements, the power of delegation may be

relevant in determining the nature of the relationship between the intermediary and the worker. The contract between the labour hire agency and the worker in most cases would require the worker to perform the relevant work for the client themselves with no ability to delegate the work to others...<sup>65</sup>

The assumption here is that the well established criteria which determine whether a contract is one of employment/self-employment can also be used to identify where there is clearly an employment, and the question is which of two competing parties are the employer. But the questions are entirely distinct. If that is right the definition of employer proposed in this passage is not the domestic (in this case, Australian) employment law definition. But that does not matter if the treaty term has an autonomous meaning under which the DTA-employer may be different from the domestic-law employer.

#### 36.9.14 *Hybrid employment/enterprise*

The OECD Commentary continues:

This approach ensures that relief of double taxation will be provided in the State of residence of the individual even if that State does not, under its own domestic law, consider that there is an employment relationship between the individual and the enterprise to which the services are provided.

This is considering a hybrid employment/enterprise, ie an activity which is categorised as

- (1) an employment in the work State
- (2) an enterprise (in UK tax terms, a trade) in the residence State.

Indeed, as long as

[1] the State of residence acknowledges that the concept of employment in the domestic tax law of the State of source or

[2] the existence of arrangements that constitute an abuse of the Convention allows that State to tax the employment income of an individual in accordance with the Convention,

it [the residence State] must grant relief for double taxation pursuant to the obligations incorporated in Articles 23 A and 23 B [foreign tax credit relief] (see paragraphs 32.1 to 32.7 of the Commentary on these

---

65 TR 2013/1EC; footnotes omitted.

Articles).<sup>66</sup>

The mutual agreement procedure provided by paragraph 1 of Article 25 will be available to address cases where the State of residence does not agree that the other State has correctly applied the approach described above and, therefore, does not consider that the other State has taxed the relevant income in accordance with the Convention.

It is possible that the residence and work States may agree there is an employment but take different views as to who is the employer:

<b>Work state</b>				<b>Residence State</b>		
<i>Approach</i>	<i>Employer is</i>	<i>STBV relief</i>	<i>Source State tax</i>	<i>Approach</i>	<i>Employer is</i>	<i>Residence State tax</i>
Form over substance	Intermediary	Yes	No	Substance over form	End user	Yes
Substance over form	End user	No	Yes	Form over substance	Intermediary	Yes

In the second case, the income is taxable in both states; but there should not be double taxation, as the residence State should give credit for work State tax.

### 36.10 DTA 60-day rule

Tax Bulletin 68 provides:

#### **Non-Residents Working In The UK For Short Periods: The “60-Day” Rule**

... [Tax Bulletin 25 stated] that the Inland Revenue would not consider that a short term business visitor was sufficiently integrated into the business of a UK company for it to be regarded as the employer where:

[1] the employee concerned is in the UK for less than 60 days in a tax year; and

[2] that period does not form part of a more substantial period when the taxpayer is present in the UK.

This has become known as the “60-day rule”.

I refer to this as the “**DTA 60-day rule**”.

The point is that if the conditions of the DTA 60-day rule are met, HMRC will accept that the formal (foreign) employer is the employer, and the UK company is not the effective employer, for the purposes of the

---

<sup>66</sup> See 106.9 (Tax in accordance with DTA).

STBV payment conditions, so the conditions for STBV relief can be met.

**Does the worker have to be from a country with which we have a full double tax agreement for the 60-day rule to apply?**

The 60-day rule is framed in terms of accepting without enquiry that the conditions in a DTA for short-term business visitors to be solely taxed in their country of residence have been satisfied. That exemption, and consequently the 60 day rule, is therefore only relevant if the person is resident in a country with which we have signed a comprehensive double tax agreement. If not, domestic legislation will apply in full.

Obviously.

**Is the 60-day exemption available if the employee is on the UK payroll?**

No. The FST’s statement was made in the context of workers who were paid via a non-resident employer’s payroll but whose economic employer might be in the UK.

“On the UK payroll” is layman’s language. In legal terms, it is here assumed to mean (1) the worker is an employee of the UK company, and (2) the UK company pays the remuneration. On that basis the answer is self-evident.

36.10.1 *How to count 60 days*

The question is whether the employee “is in the UK for less than 60 days in a tax year”. Tax Bulletin 68 provides:

**How do you count the days for the 60-day rule?**

It is based on physical presence in the UK in the same way as the 183 days are counted for the purposes of Article 15(2) of the OECD model Tax Convention.<sup>67</sup>

The test is days of presence, not just workdays.

36.10.2 *Position if 60 days exceeded*

Tax Bulletin 68 provides:

**Is the 60 days a fixed limit? For example, an employer has a**

---

67 See 36.13 (STBV condition a: 183-day rule).

**succession of people who work for him and he bears their wages, but they may be in the UK up to 90 days.**

The 60-day rule represents a balance between a loss of tax revenue which may be due to the UK and the compliance costs to both employers and the Revenue of ascertaining and collecting such tax for very short-term visitors. There are no plans for it to be altered. However individuals working in the UK may be exempt under the relevant DTA anyway, for example if their earnings are

- [1] paid by an overseas company,
- [2] not recharged in any form to [ie, reimbursed by] a UK company or permanent establishment<sup>68</sup> and
- [3] no UK company acts as their employer.

### 36.10.3 60-day rule for PE

Tax Bulletin 68 provides:

**Is the 60-day rule available where the earnings have been recharged [ie reimbursed] to a UK permanent establishment rather than a UK-resident company?**

Although not covered in the actual wording of the 1996 statement, the Revenue accepts the 60-day rule should apply in these circumstances also.

### 36.10.4 Part of substantial period

The requirement is that:

- [1] The employee is in the UK for less than 60 days in a tax year; and
- [2] That period does not “form part of a more substantial period” when the taxpayer is present in the UK.

Tax Bulletin 68 provides:

**How should the phrase “part of a more substantial period” be interpreted?**

The aim is to provide consistency:

- Between very short-term workers, regardless of the particular dates involved; and
- Between short-term workers seconded from overseas and the normal workforce of the UK employer.

---

68 See 36.8.1 (“Ultimately bourne”).

The most obvious example met is where less than 60 days are worked up to 5th April and less than 60 days after, but the overall period is more than 60 days. In these circumstances, the 60-day exemption will not be available, to be consistent with periods of more than 60 days worked over, say, November to January.

**What if there is a gap between two shorter periods of employment?**

To consider whether the 60-day period has been exceeded, the following factors may be relevant:

- Is there an expectation that the employee will return to the UK when they depart initially?
- How long is the gap between visits in comparison to the length of those visits?
- How frequently does the employee return to the UK?
- How integral to the business are the duties performed?

It is impossible to give an exact formula that will cover all circumstances. However, the following examples should assist in seeing how the Revenue will approach this question.

HMRC give 5 examples. In outline:

<b>Number: Facts</b>	<b>Part of substantial period</b>
<b>1a:</b> 35 UK days Feb/Mar; short holiday; + 40 days Apr/May (planned)	Yes
<b>1b:</b> as 1a, but no plan to return in Apr/May	Yes but from April only
<b>2:</b> 35 UK days year 1; 7 month gap; 40 UK days year 2 (unplanned)	No
<b>3:</b> Financial controller works 55-59 UK days p/a (planned)	Yes
<b>4:</b> 50 UK days in year 1; 15 UK days in year 2	Yes but for year 2 only

**Example 1 (Alain)**

**A visits the UK for 35 days in Feb/March 2003, then returns to Austria for a fortnight’s holiday, and returns again to the same contract for 40 days in April/May.**

The 75 days would be regarded as one period. The gap here is insignificant compared to the two periods either side and liability to UK tax would be consistent with a person who works for 75 days here continuously. As the periods are part of the same contract, the employer would be expected to operate PAYE from day one.

That is an easy example. Perhaps the point is to introduce the next example:

**[Example 1(b)]** If there had been no expectation of returning during the first 35 days we would expect PAYE to be operated only for the second

period even though liability to UK tax would exist for both for A. This is because the 60 days is an objective test whilst PAYE is based on “reasonable expectation” that payments are liable to UK tax.<sup>69</sup>

**Example 2 (Beatrice)**

**B visits the UK for 35 days in Year 1. She returns to Belgium but unexpectedly is asked to return in Year 2, after a 7 month gap, and does so for 40 days.**

Each episode in the UK would be regarded as separate periods of less than 60 days. B’s return was unexpected, and after a relatively long gap. So there is no UK liability for either and no PAYE is due.

That is an easy example.

**Example 3 (Cedric)**

**C is the financial controller for a Canadian group. Each year he visits the UK subsidiary for 55-59 days.**

Once there is an expectation that this will be the work pattern, the Revenue would consider that the episodes of work here were part of a more substantial period. A financial controller will be significantly integrated into the business, whether this is of the UK subsidiary or possibly a permanent establishment of the parent company. PAYE will apply from when it is clear that visits will recur as part of a regular and integrated pattern, although C may have to consider whether he is also liable under self assessment to UK tax for an earlier period of work, as for A in Example 1.<sup>70</sup>

That is not self-evident. But for the purposes of the DTA 60-day rule, the requirement that the 60-days does not form “part of a more substantial period” has to be understood in the light of HMRC’s explanation.

What if C’s work pattern was less that 55-59 days? It is suggested that if it was less than 20 days, so it would need 4 years to reach the 60 day cap, it does not form part of a more substantial period. The same might apply if it was less than 30 days (requiring 3 years to pass the 60 day cap).

**Example 4 (Danielle)**

---

69 See 35.13.3 (Terms of EP App 4 agreement).

70 The passage concludes with a rhetorical flourish: “C and the group will then be able to decide the duration and timing of visits to the UK on business grounds rather than for individual tax considerations.” But there is no need to pursue that.

**D spends 50 days working in UK between 10 April and 15 January, with visits averaging 3 days each. Then from 1 June to 6 October a further 15 days are spent visiting UK for business meetings on the same piece of work.**

[1] Although D is taxable from the very start, we would not expect either her or the company to be able to recognise this.

[2] However, the Revenue would expect PAYE to be operated in Year 2.

That is far from self-evident. On point [1] is it assumed that the 15 days in year 2 were not expected in year 1?

### **36.11 Labour-hire: Avoidance motive**

The DTR Manual provides:

#### **DT1922 Employment** [Nov 2019]

... Claims should not be admitted where payment by an overseas company forms part of an arrangement to avoid UK tax. PAYE Technical will advise in cases where, for example,

[1] the overseas employer is based in a tax haven or

[2] the employee is nominally employed by a company which exists to provide his services to the UK user of those services.

Cases where an employment which existed prior to the employee's assignment to the UK continues during that assignment usually do not cause difficulty. Cases where the employee has taken up a new formal employment with an overseas company at the time of assignment should be reviewed critically.

An avoidance motive prevents relief under the DTA 60-day rule.

OECD Commentary provides:

8.1 ... While the [1992] Commentary previously dealt with cases where arrangements were structured for the main purpose of obtaining the benefits of the exception of paragraph 2 of Article 15 [STBV relief],<sup>71</sup> it was found that similar issues could arise in many other cases that did not involve tax-motivated transactions and the Commentary was amended to provide a more comprehensive discussion of these questions.

---

71 See 36.9.3 (1992 Commentary).

In cases where the requirements of the 60 day-rule are not met, the question is who is the effective employer, and avoidance as such is not necessary; though in practice where the effective employer is not the formal employer, avoidance is quite likely to be present.

### 36.12 STBV payment condition (c): PE

Article 15(2)(c) provides:

2. ... remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if ...

c) the remuneration is not borne by a permanent establishment which the [non-resident] employer has in the UK [the work State].

There is no practical difference between remuneration *paid by or on behalf of*, in para (b), and remuneration *borne by*, in para (c). The thinking is that a PE (not being a legal person) cannot directly *pay* remuneration, but it can *bear* remuneration.<sup>72</sup>

The issues for payment condition (c) are:

- (1) Does that employer have a PE in the work state, and if so
- (2) does the PE bear the remuneration

See Dziurdz, “Article 15 of the OECD Model: The 183-Day Rule and the Meaning of Borne by a Permanent Establishment” Bulletin for International Taxation (2013).<sup>73</sup>

#### 36.12.1 PE deduction in work State

OECD Commentary on art 15(2) provides:

7. ... The phrase “borne by” must be interpreted in the light of the underlying purpose of subparagraph c) of the Article, which is to ensure that the exception provided for in [art 15(2), STBV relief] does not apply to remuneration that could give rise to a deduction, having regard to the principles of Article 7 and the nature of the remuneration, in computing the profits of a permanent establishment situated in the State

---

<sup>72</sup> See App.2.4.1 (Bear tax by deduction or otherwise).

<sup>73</sup> [https://www.wu.ac.at/fileadmin/wu/d/i/taxlaw/institute/staff/publications/dziurdz\\_bulletin\\_2013\\_122.pdf](https://www.wu.ac.at/fileadmin/wu/d/i/taxlaw/institute/staff/publications/dziurdz_bulletin_2013_122.pdf)

in which the employment is exercised.<sup>74</sup>

It makes sense that a remuneration which qualifies for STBV relief should not be deductible by a PE in the work State. Although that is not stated expressly in the OECD Model, it would follow from the rule that the PE must not bear the remuneration.

7.1 The fact that the employer has, or has not, actually claimed a deduction for the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether any deduction otherwise available with respect to that remuneration should be taken into account in determining the profits attributable to the permanent establishment. That test would be met, for instance, even if no amount were actually deducted as a result [1] of the permanent establishment being exempt from tax in the source country or [2] of the employer simply deciding not to claim a deduction to which he was entitled.

The test would also be met where the remuneration is not deductible merely because of its nature (e.g. where the State takes the view that the issuing of shares pursuant to an employee stock-option does not give rise to a deduction) rather than because it should not be allocated to the permanent establishment.

Para (c) applies where there is a UK PE of a foreign company (the foreign company is the employer).

The DTR Manual provides:

**DT1923 Employment** [Nov 2019]

... [Payment condition (c)] should be considered carefully in all cases where the employee has not apparently been assigned to work in the UK for a UK-resident company. If an employee has simply been seconded by his overseas employer to work here for a UK-resident company it will not usually be necessary to consider this condition. [Instead payment condition (b) is relevant.]

[The Manual makes some comments on what is a PE and continues] If operations in the UK are carried out through a permanent establishment, it should be assumed in the absence of evidence to the contrary that the cost of remuneration of an employee seconded to the permanent

---

74 See 36.6.1 (STBV relief: Policy).

establishment is a deduction in computing the profits of the permanent establishment. This will be the normal basis of allocating costs in accordance with international tax principles. The permanent establishment should therefore be regarded as bearing the cost of that individual's remuneration unless there is evidence that the overseas Head Office continues to pay the employee and the cost is not allocated to the UK permanent establishment for UK tax purposes. A permanent establishment cannot be said to 'bear the remuneration' unless it is charged against its profits without a corresponding credit, for example by way of a management charge. In doubtful cases advice may be sought from the Inspector dealing with the accounts of the permanent establishment.

Sometimes dealing with the PAYE District may be the first contact which an overseas company has with the UK Revenue and it may not yet have been established whether or not the company has a permanent establishment in the UK. If the company has had no prior contact with the Revenue the Corporation Tax District which would have responsibility for the company (the District dealing with the area where the business premises of the company are located) should be asked to advise whether or not a permanent establishment exists in the UK (see DT1715 in cases of difficulty).

### **36.13 STBV condition a: 183-day rule**

Article 15(2)(a) provides:

2. ... remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:

- a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, ...

#### *36.13.1 The 12 month period*

OECD Commentary on art 15(2) provides:

4. ... The first condition is that the exemption is limited to the 183 day period. It is further stipulated that this time period may not be exceeded "in any twelve month period commencing or ending in the fiscal year concerned". This contrasts with the 1963 Draft Convention and the 1977 Model Convention which provided that the 183 day period should

not be exceeded “in the fiscal year concerned”, a formulation that created difficulties where the fiscal years of the Contracting States did not coincide and which opened up opportunities in the sense that operations were sometimes organised in such a way that, for example, workers stayed in the State concerned for the last 5 ½ months of one year and the first 5½ months of the following year. The present wording of subparagraph 2 a) does away with such opportunities for tax avoidance. In applying that wording, all possible periods of twelve consecutive months must be considered, even periods which overlap others to a certain extent. For instance, if an employee

[1] is present in a State during 150 days between 1 April 01 and 31 March 02 but

[2] is present there during 210 days between 1 August 01 and 31 July 02,

the employee will have been present for a period exceeding 183 days during the second 12 month period identified above even though he did not meet the minimum presence test during the first period considered and that first period partly overlaps the second.

4.1 The reference to the “fiscal year concerned” must be interpreted as a reference to a fiscal year of the Contracting State in which a resident of the other Contracting State has exercised his employment and during which the relevant employment services have been rendered. Assume, for example,

[1] that the fiscal year of State S runs from 1 January to 31 December and

[2] that a resident of State R is present and performs employment services in State S between 1 August 00 and 28 February 01.

For the purposes of subparagraph 2 a), any twelve month period that begins between 1 January and 31 December 00 or ends between 1 January and 31 December 01 and that includes any part of the period of employment services would be relevant. For instance, the twelve month period of 1 August 00 to 31 July 01, which begins in the fiscal year 00 and during which the person was present in State S for more than 183 days, would include the employment services rendered in that State between 1 August and 31 December 00; similarly, the twelve month period of 1 March 00 to 28 February 01, which ends in the fiscal year 01 and during which the person was present in State S for more than 183 days, would include the employment services rendered in that State between 1 January and 28 February 01. The taxation of the remuneration for the relevant services need not take place in the fiscal year concerned:

as explained in paragraphs 2.2 above and 12.1 below, the Article allows a State to tax the remuneration derived from employment exercised in that State in a particular year even if the remuneration for these employment services is acquired, or the tax is levied, in a different year.

### 36.13.2 *Present in the State*

5. Although various formulas have been used by Member countries to calculate the 183 day period, there is only one way which is consistent with the wording of this paragraph: the “days of physical presence” method. The application of this method is straightforward as the individual is either present in a country or he is not. The presence could also relatively easily be documented by the taxpayer when evidence is required by the tax authorities. Under this method the following days are included in the calculation: part of a day, day of arrival, day of departure and all other days spent inside the State of activity such as Saturdays and Sundays, national holidays, holidays before, during and after the activity, short breaks (training, strikes, lock-out, delays in supplies), days of sickness (unless they prevent the individual from leaving and he would have otherwise qualified for the exemption) and death or sickness in the family. However, days spent in the State of activity in transit in the course of a trip between two points outside the State of activity should be excluded from the computation. It follows from these principles that any entire day spent outside the State of activity, whether for holidays, business trips, or any other reason, should not be taken into account. A day during any part of which, however brief, the taxpayer is present in a State counts as a day of presence in that State for purposes of computing the 183 day period.

This is similar to SRT rules.

5.1 Days during which the taxpayer is a resident of the source State should not, however, be taken into account in the calculation. Subparagraph a) has to be read in the context of the first part of paragraph 2, which refers to “remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State”, which does not apply to a person who resides and works in the same State. The words “the recipient is present”, found in subparagraph a), refer to the recipient of such remuneration and, during a period of residence in the source State, a person cannot be said to be the recipient of remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting

State. The following examples illustrate this conclusion:

*Example 1:*

From January 01 to December 01, X lives in, and is a resident of, State S.

On 1 January 02, X is hired by an employer who is a resident of State R and moves to State R where he becomes a resident.

X is subsequently sent to State S by his employer from 15 to 31 March 02.

In that case, X is present in State S for 292 days between 1 April 01 and 31 March 02 but since he is a resident of State S between 1 April 01 and 31 December 01, this first period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

*Example 2:*

From 15 to 31 October 01, Y, a resident of State R, is present in State S to prepare the expansion in that country of the business of ACO, also a resident of State R.

On 1 May 02, Y moves to State S where she becomes a resident and works as the manager of a newly created subsidiary of ACO resident of State S.

In that case, Y is present in State S for 184 days between 15 October 01 and 14 October 02 but since she is a resident of State S between 1 May and 14 October 02, this last period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

The DTR Manual provides:

**1921 Short term visitor exemption 183 day rule** [Nov 2019]

...From 6th April 2009 onwards, when counting to 183 days under Article 15(2)(a), any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and he would otherwise have qualified for the exemption) and death and sickness in the family should be included in the calculation as a day the person is present in the country of activity.

Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded from the computation.

From 2008/09 onwards (this overlaps for a year with the previous day counting method), days during which the tax payer is a resident of the UK should not be included in the calculation. The conditions in the

treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State. For example if a person is a resident of the UK but is hired by an employer in another State, moves to that State where he becomes resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.

Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

### 36.13.3 *183-day rule: Older version*

The DTR Manual provides:

**1921 Short term visitor exemption 183 day rule** [Nov 2019]

The first condition for exemption under Article 15(2) is that the employee must not be present in the UK for more than 183 days either [1] ‘in the tax year concerned’ (as in Article 15(2)(a) of the 1980 UK/USA agreement) or [2] ‘in any period of 12 months’ (found in Article 15(2)(a) of the 1985 UK/Norway agreement).

I refer to wording type [1] as modern wording and wording type [2] as the old wording.

The 2001 USA/UK DTA now uses the modern wording However the Manual is still relevant to DTAs which use the old wording.

It is important to distinguish between these formulae. The latter formula is a much tighter test than that used in the agreement with the USA.

For example, a US resident seconded to work in the UK for a two year assignment arrives here on 15 October 1990 and leaves the UK on 1 October 1992. Depending on all the circumstances, he could be taxable in the UK only for the year 1991-92. For the years 1990-91 and 1992-93 he could meet the condition in Article 15(2)(a) because in both periods he was not present in the UK for 183 days ‘in the tax year concerned’. By contrast, a Norwegian resident working in the UK would be taxable

here throughout the period 15 October 1990 to 1 October 1992 under the test in the agreement with Norway.

Our agreements with Azerbaijan, Belgium, Bolivia, Denmark, Estonia, France, Ghana, Guyana, Iceland, Indonesia, Ivory Coast, Kazakhstan, Korea, Latvia, Malta, Mexico, Mongolia, Pakistan, Papua New Guinea, Sweden, Uganda, Ukraine, Uzbekistan, Venezuela and Vietnam also use the wording of the Norwegian agreement; and the agreement with New Zealand is similar. Most of the UK's agreements, however, use the tax/fiscal year formula.

#### 36.13.4 *Presence due to Covid*

OECD Covid guidance<sup>75</sup> provides:

***Stranded worker: exceeding days of presence threshold due to travel restrictions***

53. The COVID-19 pandemic has caused individuals who are resident in one jurisdiction and exercised an employment in another jurisdiction to become stranded in that other jurisdiction. Where an individual resident in one jurisdiction and exercising employment activities in another jurisdiction:

a) is prevented from leaving that other jurisdiction by COVID-19 restrictions, and

b) would otherwise have left that other jurisdiction and qualified for the exemption from source taxation in Article 15(2), some jurisdictions believe it is appropriate, given the exceptional circumstances, to disregard days to which these conditions apply when asserting a taxing right under the 183-day test ...

54. Where a person is resident in one jurisdiction and is exercising an employment in the other jurisdiction (the source jurisdiction), the source jurisdiction may tax the remuneration from the employment in certain circumstances –one of which is where the employee is present in the source jurisdiction for more than 183 days. Paragraph 5 of the Commentary on Article 15 explains that all days of presence count (working days or not) –and provides several examples, one of which is “days of sickness”. But it contains an exception: if those days of sickness “prevent the individual from leaving and he would have

---

<sup>75</sup> [https://read.oecd-ilibrary.org/view/?ref=1060\\_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic](https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic)

See 105.27.1 (OECD Covid guidance).

otherwise qualified for the exemption”, they do not count towards the days of presence test in Article 15(2)(a).

55. Given the nature of the COVID-19 public health measures of many governments, the exception can be understood to apply where conditions (a) and (b) above are satisfied. This may cover situations where an employee is prevented from travelling because they are in quarantine due to exposure to the COVID-19 virus. In addition, it may cover situations where either government has banned travelling and cases where it is, in practice, impossible to travel due, for example, to cancellation of flights. This may not cover the situation where an individual does not travel based on a mere recommendation by the governments involved to avoid unnecessary travel. Any decision to disregard days spent in a source jurisdiction as a result of COVID-19 restrictions may result in the source jurisdiction not exercising taxing rights allocated to it under the terms of a double tax treaty which it would be entitled to do.

56. In conclusion where an employee is prevented from travelling because of COVID-19 public health measures of one of the governments involved and remains in a jurisdiction, it would be reasonable for a jurisdiction to disregard the additional days spent in that jurisdiction under such circumstances for the purposes of the 183 day test in Article 15(2)(a) of the OECD Model. Some jurisdictions may however take a different approach or may have issued specific guidance outlining their approach to such ...

***Special provisions in some bilateral treaties that deal with the situation of cross-border workers***

57. A change of place where cross-border workers exercise their employment may also affect the application of the special provisions in some bilateral treaties that deal with the situation of cross-border workers. These provisions apply special treatment to the employment income (and in some cases replacement income such as short-time work compensation) of cross-border workers and may often contain limits on the number of days that a worker may work outside the jurisdiction they regularly works before triggering a change in their status.

58. Some jurisdictions have agreed special treaty provisions with neighbouring jurisdictions to which employees frequently commute for work. These provisions allocate the taxing rights in a different way to Article 15 of the Model Convention. For example, under some of those provisions employees commuting to a neighbouring jurisdiction are taxable on their employment income only in the home jurisdiction

provided any employment activity carried on elsewhere is limited to a maximum stated period (typically ranging from 4 to 6 working weeks). Some of those treaties include provisions according to which teleworking days are considered working days within the work jurisdiction. Some jurisdictions have agreed to treat the COVID-19 pandemic as force majeure or an exceptional circumstance and, accordingly, the time spent by the employee teleworking in their home jurisdiction will not be included in the calculation of the maximum work days outside the work jurisdiction limitation for the purposes of the treaty.

HMRC say:

the sickness is required to be that of the employee, rather than a relative or the pandemic in general.<sup>76</sup>

HMRC say:

periods where an individual is forced to self-isolate will also count as days of 'sickness' for the purpose of counting 183 days. As with all exemptions/relaxations, individuals should ensure they have evidence to support any position they take.<sup>77</sup>

### **36.14 Employer foreign PE of UK co**

HMRC say:

Whereas an overseas subsidiary of a UK Company is a separate legal entity and is regarded as a 'person' within the meaning of a Double Taxation Convention, that is not the case for an overseas Branch of the UK Company. The Branch is not a separate legal entity and is not resident in the other country. It is merely part of a UK resident Company that carries out the business of the UK Company in that country.

In short, an overseas PE of a UK company is excluded from STBV relief.

---

76 Joint Expatriate Forum on Tax and NICs (Sep 2020)

<https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions>

77 Joint Expatriate Forum on Tax and NICs (Dec 2020)

<https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions>

It is hard to see any good reason for that rule, but the position is clear.<sup>78</sup>

The 2018 STBV consultation paper suggested extending the relief to cover this, but the proposal was abandoned. The STBV response paper provides:

2.31. The government recognises that the contrasting tax treatment of STBVs from branches and subsidiaries creates different administrative obligations for some employers. However, this position is determined by the UK's double taxation treaties, which follow the OECD Model Tax Convention replicated across the globe.

2.32. A unilateral tax exemption on the employment income of STBVs would remove the underlying difference in tax treatment, particularly if this applied to STBVs from both branches and subsidiaries in the same way.

2.33. It would also remove the obligation for UK companies to operate PAYE on the remuneration of STBVs from foreign branches. This would reduce administrative burdens and costs, and would prevent UK companies from restricting business travel to the UK. It would particularly benefit key business sectors, including financial services and asset management.

2.34. However, the UK generally has the primary taxing right under DTAs where the STBV comes from a foreign branch. A tax exemption would mean that the UK would be unilaterally giving away its taxing right and its tax revenue to foreign jurisdictions without reciprocation.

2.35. Whilst the tax exemption might make the UK a more attractive place to do business, there is little evidence to suggest that it would influence the decision of multinational businesses to headquarter in the UK.

2.36. The government must consider its wider commitments to reducing the deficit. Such a tax exemption would only benefit a relatively small number of UK businesses, but would cost many millions of pounds each year. The government thinks this does not represent good value for money. The government will continue to consider the points raised by respondents to the consultation and will keep the area under review.<sup>79</sup>

---

78 See 101.1 (PE: Introduction).

*<https://www.gov.uk/government/consultations/tax-and-administrative-treatment-of-short-term-business-visitors-from-overseas-branches>*

### **36.15 Employer a partnership**

OECD Commentary on art 15(2) provides:

6.1 The application of the second condition in the case of fiscally transparent partnerships presents difficulties since such partnerships cannot qualify as a resident of a Contracting State under Article 4 ...<sup>80</sup> While it is clear that such a partnership could qualify as an “employer” ... the application of the condition at the level of the partnership regardless of the situation of the partners would therefore render the condition totally meaningless.

6.2 ... In order to achieve a meaningful interpretation of subparagraph b) that would accord with its context and its object,<sup>81</sup> it should therefore be considered that, in the case of fiscally transparent entities or arrangements such as partnerships, that subparagraph applies at the level of the partners or members. Thus, the concepts of “employer” and “resident”, as found in subparagraph b), are applied at the level of the partners or members rather than at the level of a fiscally transparent entity or arrangement. This approach is consistent with the approach under paragraph 2 of Article 1<sup>82</sup> under which the benefit of other provisions of tax conventions must be granted with respect to income that is taxed at the partners’ or members’ level rather than at the level of an entity or arrangement that is treated as fiscally transparent.

This raises less difficulty for English partnerships, because as a matter of English employment law, employees are employees of the partners and not of the partnership as such.

The OECD Commentary continues:

While this interpretation could create difficulties where the partners or members reside in different States, such difficulties could be addressed through the mutual agreement procedure by determining, for example, the State in which the partners who own the majority of the interests in the entity or arrangement reside (i.e. the State in which the greatest part of the deduction will be claimed).

OTS say:

---

80 See 8.22.2 (Partnership “liable to tax”).

81 See 36.6.1 (STBV relief: Policy).

82 See 103.3.2 (OECD hybrid-entity rules).

There is a technical argument that treaty relief under Article 15 (income from employment) is not available to employees of a partnership as they could be argued not to have a non-resident employer<sup>83</sup>. This could mean it may be argued that a short-term secondee from another country does not qualify for treaty protection even if their remuneration is borne by the non-UK branch of the same company.<sup>84</sup> We understand that in practice, HMRC do sometimes accept treaty relief is available.

... In practice, HMRC has treated the employer as a non-UK one if the individual is under the control and instruction of non-UK resident partners.... HMRC also told us that there is no general policy of denying this exemption to employees of partnerships. Eligibility will depend on whether the employing partnership is resident outside the UK based on the residence status of the partners.<sup>85</sup>

## 36.16 Deemed employment/non-employment

### 36.16.1 *Deemed non-employment*

In *Fowler v HMRC*<sup>86</sup> the taxpayer was an employed diver, whose employment was exercised in the UK, and so his remuneration was in principle taxable in the UK. There is a special rule for North Sea divers: for IT purposes their employment is treated as a trade. But the deemed trade fiction did not apply for treaty purposes. I discuss this point in 103.22.6 (Deemed classification).

Section 6(5) ITEPA provides:

Employment income is not charged to tax under this Part if it is within the charge to tax under—<sup>87</sup>

<b>Section</b>	<b>Topic (in outline)</b>
<i>ITTOIA</i>	<i>CTA 2009</i>

83 Author's footnote: More analytically, the argument is that the employer is not a "resident of the foreign state", within the meaning of the treaty.

84 Author's footnote: This sentence is muddled, but the passage makes sense if one ignores it.

85 OTS, "Review of partnerships: final report" (2015) para 4.30-31.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/396668/ots\\_partnerships\\_report\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/396668/ots_partnerships_report_final.pdf)

86 [2020] UKSC 22.

87 For clarity I have set this out in tabular form and with my own wording, rather than that in the statute.

s.15	-	Divers and diving supervisors
s.16A	-	Voluntary office with public body: compensation for incidental trading loss
s.16B	40A	Company directorship incidental to professional partnership
s.16C	40B	Office/employment incidental to professional partnership

Would the principle in *Fowler* apply to the other cases, ie those to which s.16A-16C applies? That is, would income within those cases be classified as employment income or trading income for DT purposes? The difference is that in the s.16A-16C cases, unlike *Fowler*, the individual is carrying on an actual trade/profession. The income concerned has a dual character. Sections 16A-16C merely reverse the usual priority rule that ITEPA prevails over trading income.<sup>88</sup> On that basis it is suggested that income within s.16A-16C should be categorised as business income for DT purposes and falls within the scope of OECD Model art 7.

The amounts involved are not likely to be substantial.

### 36.16.2 *Deemed employment*

What about disguised employment? Section 863A ITTOIA provides:

- (1) Subsection (2) applies at any time when conditions A to C in sections 863B to 863D are met in the case of an individual (“M”) who is a member of a limited liability partnership in relation to which section 863(1) applies [ie the LLP is treated as a partnership for tax purposes].
- (2) For the purposes of the Income Tax Acts—
  - (a) M is to be treated as being employed by the limited liability partnership under a contract of service instead of being a member of the partnership, and
  - (b) accordingly, M's rights and duties as a member of the limited liability partnership are to be treated as rights and duties under that contract of service.

Is the income of M employment income or business income for DT purposes?

## 36.17 Share options

### 36.17.1 *Grant of share option*

---

<sup>88</sup> See 11A.3.9 (Trade/employment (ITEPA) income).

Share options granted by reason of employment are in principle earnings and subject to income tax on the grant of the option.<sup>89</sup> For UK resident employees, s.475 ITEPA overrides that charge. That does not however apply to non-resident employees, and it is not uncommon to find non-resident employees who have taxable duties in the UK. In this case, the grant of an option falls outside of chapter 5 of part 7 ITEPA 2003 and therefore in principle subject to income tax on the grant of the option. DT relief is however likely to be available if the employee is resident in a jurisdiction with a DT relief in OECD Model form. In particular, the requirement of article 15(2)(c) is met: the remuneration is will not be borne by a permanent establishment which the employer has in the UK. For the remuneration is not borne by the company over whose shares the share option is issued. If anyone, it is the shareholders in that company who bear the burden of the remuneration.

### 36.17.2 *Exercise of share option*

Some gains on shares or share options are taxed as employment income. The profit (to use a neutral term) falls within the employment income article as earnings, and within the CG article as gains,<sup>90</sup> but some commentators take the view that the earnings article has priority and excludes the CG article.<sup>91</sup>

The USA/UK DTA (more or less) follows OECD form. The Exchange of Notes for this treaty provides:

With reference to Article 14 (Income from employment)—  
it is understood that any benefits, income or gains enjoyed by employees under share/stock option plans are regarded as “other similar remuneration” for the purposes of Article 14.

It is further understood that where an employee—

- (a) has been granted a share/stock option in the course of an employment in one of the Contracting States;
- (b) has exercised that employment in both States during the period between grant and exercise of the option;

---

<sup>89</sup> *Abbott v Philbin* 39 TC 82.

<sup>90</sup> See 53.22.2 (Gain subject to income tax).

<sup>91</sup> See 103.8.4 (Other DTA category overlaps).

(c) remains in that employment at the date of the exercise; and  
(d) under the domestic law of the Contracting States, would be taxable by both Contracting States in respect of the option gain, then, in order to avoid double taxation, a Contracting State of which, at the time of the exercise of the option, the employee is not a resident will tax only that proportion of the option gain which relates to the period or periods between the grant and the exercise of the option during which the individual has exercised the employment in that Contracting State. With the aim of ensuring that no unrelieved double taxation arises the competent authorities of the Contracting States will endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of Article 14 and Article 24 (Relief from double taxation) in relation to employee share/stock option plans.

### **36.18 DT claims & procedure**

The DTR Manual provides:

**DT1920: Employment** [May 2020]

... claims to exemption from UK tax in respect of employment income are made as part of the taxpayer's self assessment on the claim form attached, depending on the circumstances, to either Help Sheet IR302 (Dual-Residents) or Help Sheet IR304 (Non-Residents - Relief under Double Taxation Agreements). Both forms require the taxpayer to establish the fact of his residence in the other country for the purpose of the agreement (see INTM154000) and to declare that the relevant provisions of the particular agreement are considered to have been fulfilled. All claims under Article 15(2) should be checked carefully by reference to terms of the agreement and, where appropriate, to the guidance at DT1921 - DT1923, and enquiries raised in suitable cases.

The DTR Manual makes a few administrative comments:

**DT1924 Employment** [May 2020]

Refer to Employment Income Technical all claims to the exemption of employment income from UK tax (DT1920 onwards) where

- the tax at stake in that case exceeds £50,000, or
- the company claimed to be the employer is apparently based in a tax haven, or
- difficulty is experienced in applying the guidance at DT1920 onwards in a particular case...

See 103.19 (Claim for DT relief).

### **36.19 DT relief: Directors**

Article 16 OECD Model provides:

Directors' fees and other similar payments derived <sup>92</sup> by a resident of a Contracting State in his capacity as a member of the board of directors of a company<sup>93</sup> which is a resident of the other Contracting State may be taxed in that other State.

OECD Commentary on art 16 provides:

1. This Article relates to remuneration received by a resident of a Contracting State, whether an individual or a legal person, in the capacity of a member of a board of directors of a company which is a resident of the other Contracting State.

The main significance of the provision is that STBV relief is not available for directors.

#### *36.19.1 Fees and similar payments*

OECD Commentary on art 16 provides:

1.1 Member countries have generally understood the term "fees and other similar payments" to include benefits in kind received by a person in that person's capacity as a member of the board of directors of a company (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

See 36.3 (Salary/wages/remuneration).

2. A member of the board of directors of a company often also has other functions with the company, e.g. as ordinary employee, adviser, consultant, etc. It is clear that the Article does not apply to remuneration paid to such a person on account of such other functions.

While it is clear that a director may be an employee,<sup>94</sup> disentangling the duties and remuneration for the two roles is another matter.

---

92 See 14.10.1 ("Deriving" income").

93 See 29.9.4 ("Company" in OECD Model).

94 *Lee v Lee's Air Farming Ltd* [1961] AC 12.

Documentation will be important, though not necessarily decisive, in determining whether a payment is made in the capacity as a director.

### 36.19.2 *Directors share options*

OECD Commentary on art 16 provides:

3.1 Many of the issues discussed under paragraphs 12 to 12.15 of the Commentary on Article 15 in relation to stock-options granted to employees will also arise in the case of stock-options granted to members of the board of directors of companies. To the extent that stock-options are granted to a resident of a Contracting State in that person's capacity as a member of the board of directors of a company which is a resident of the other State, that other State will have the right to tax the part of the stock-option benefit that constitutes director's fees or a similar payment (see paragraph 1.1 above) even if the tax is levied at a later time when the person is no longer a member of that board. While the Article applies to the benefit derived from a stock-option granted to a member of the board of directors regardless of when that benefit is taxed, there is a need to distinguish that benefit from the capital gain that may be derived from the alienation of shares acquired upon the exercise of the option. This Article, and not Article 13, will apply to any benefit derived from the option itself until it has been exercised, sold or otherwise alienated (*e.g.* upon cancellation or acquisition by the company or issuer). Once the option is exercised or alienated, however, the benefit taxable under this Article has been realised and any subsequent gain on the acquired shares (*i.e.* the value of the shares that accrues after exercise) will be derived by the member of the board of directors in his capacity of investor-shareholder and will be covered by Article 13. Indeed, it is at the time of exercise that the option, which is what the director obtained in his capacity as such, disappears and the recipient obtains the status of shareholder (and usually invests money in order to do so).

### 36.19.3 *Directors DT relief: Critique*

Why distinguish directors (Model art 16) from employees (art 15)?  
OECD Commentary provides:

Since it might sometimes be difficult to ascertain where the services are performed, the provision treats the services as performed in the State of residence of the company.

It is no more difficult to ascertain where directors services are exercised than where employees services are exercised; and UK domestic law treats directors and employees in (more or less) the same way. But there it is. Instead we have to ascertain the meaning of director, and whether earnings are received in the capacity of director. Both questions are “sometimes be difficult to ascertain”.

Perhaps the reasoning was that directors services (unlike non-director employees) are likely to be in the same State as the company. That was more likely to be the case formerly than now. There is something to be said for removing art 16, and treating directors/employees in the same way; but established treaty rules are difficult to change, and the change is not worth the trouble involved.

### **36.20 DT relief: Government service**

Article 19 OECD Model provides:

1. a) Salaries, wages and other similar remuneration paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
- b) However, such salaries, wages and other similar remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident of that State who:
  - (i) is a national of that State; or
  - (ii) did not become a resident of that State solely for the purpose of rendering the services.
2. [This deals with pensions; see 37.8.7 (Government pension)]
3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

OECD Commentary on art 19(1) provides:

2.2 Member countries have generally understood the term “salaries, wages and other similar remuneration ... paid” to include benefits in kind received in respect of services rendered to a State or political

subdivision or local authority thereof (e.g. the use of a residence or automobile, health or life insurance coverage and club memberships).

Of course remuneration includes benefits in kind; the point is that such benefits may be said to be “paid”, ie “paid” is not construed narrowly; see 14.10.2 (“Paid” and “payment”).

## CHAPTER THIRTY SEVEN

# PENSION AND ANNUITY INCOME

- 37.1 condition B
- 37.6.2 Non-registered occupational pension scheme annuity
- 37.7.1 Commonwealth pension condition A
- 37.7.2 Commonwealth pension
- 37.7.3 Commonwealth pension condition C
- 37.13.5 Contribution relief: Remittance basis

### 37.1 Pensions & annuities: Introduction

This chapter considers:

- (1) Pension income
- (2) Annuity income
- (3) Alimony (maintenance)

Pension taxation has a technical language of its own, and needs a book to itself. I would focus on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole.

The legislation is in part 9 ITEPA. This follows the format of the charge on employment income in Part 2.<sup>1</sup> One might expect Part 9 to begin with a provision saying that income tax is charged on pension income. In fact this is implied rather than expressed. Section 566(1) ITEPA provides:

#### **Nature of charge to tax on pension income and relevant definitions**

- (1) The charge to tax on pension income under this Part is a charge to tax on that income excluding any exempt income.

### 37.2 Pension income of split year

Section 575(1A) ITEPA provides:

---

<sup>1</sup> See 33.6 (Charge on employment income) and following.

- [a] If the person liable for the tax under this Part [Part 9 ITEPA] is an individual and the tax year is a split year as respects that individual, the taxable pension income for the tax year is the full amount of the pension income arising in the UK part of the year,
- [b] subject to
- [i] subsection (3) [remittance basis] and
  - [ii] section 576A [temporary non-residents].

This applies to all types of pension income.

### **37.3 Types of pension scheme**

#### *37.3.1 “Occupational pension scheme”*

Section 150(5) FA 2004 provides:

In this Part “occupational pension scheme” means a pension scheme established by an employer or employers and having or capable of having effect so as to provide benefits to or in respect of any or all of the employees of—

- (a) that employer or those employers, or
- (b) any other employer, whether or not it also has or is capable of having effect so as to provide benefits to or in respect of other persons).

#### *37.3.2 “Registered pension scheme”*

Section 989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts...

So we turn to s.150(2) FA 2004:

A pension scheme is a registered pension scheme for the purposes of this Part at any time if it is at that time registered under Chapter 2.

### **37.4 s.569 UK pension**

Section 569 ITEPA provides:

- (1) This section applies to any pension paid by or on behalf of a person who is in the UK.
- (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as “**a s.569 UK pension**”. Registered pension schemes fall within chapter 5A, rather than under this residual category.

The EI Manual provides:

**EIM74003 UK pensions** [Nov 2019]

...Section 569 ITEPA 2003 charges pensions paid by or on behalf of a person in the UK. This includes pensions payable by the Crown. Section 569 does not apply to pensions charged under any other provision of Part 9 ITEPA 2003. For example, section 579A ITEPA 2003 charges pensions under registered pension schemes.

Annuities paid by the Crown generally have the character of pensions and will therefore be chargeable to tax under section 569. See example EIM74004, which describes two payments charged by section 569.

**Payments to residents of another country**

The charge includes payments to people who live abroad as well as payments within the UK. Examine carefully claims for double taxation exemption or relief. These payments may be in respect of Government service and the UK usually retains primary taxing rights. ...

**EIM74005 Pensions paid by or on behalf of a person who is in the UK** [Nov 2019]

...The legislation does not consider the residence status of the pensioner. If a pensioner is resident in another state it is necessary to consider the terms of the relevant double taxation treaty...

**EIM74004 - Examples of United Kingdom pensions paid by the Crown** [Nov 2019]

The following types of income payable by the Crown fall within the definition of pension and are therefore chargeable as UK pensions under Section 569 ITEPA 2003:

- pensions paid to certain seamen under the Greenwich Hospital Act 1865
- life annuities paid to certain farmers who have given up uncommercial holdings of land under the Agriculture Act 1967.

37.4.1 “*Pension*”

Section 570 ITEPA provides a short, inclusive, definition of “pension” for the purposes of s.569 UK pensions:

In this Chapter “pension” includes a pension which is paid voluntarily or is capable of being discontinued.

The definition (perhaps for historical reasons) is different from the definition which applies for s.573 foreign pensions.

The EI Manual provides:

**EIM74002 The meaning of pension and annuity** [Nov 2019]

A pension is a periodical payment made by or on behalf of an employer, usually in recognition of past services. It may be paid either to the person who provided those services or to his or her spouse or any dependant.

A recipient of a pension will usually be entitled to it under his or her contract of employment or under the rules of a pension scheme...

**EIM74005 Pensions paid by or on behalf of a person who is in the UK** [Nov 2019]

**... Voluntary pensions**

The cases of *Benyon v Thorpe* (14 TC 1) and *Stedeford v Beloe* (16 TC 505) established the principle that pensions paid voluntarily by a former employer were not chargeable as income because they had the character of gifts. Section 570 ITEPA 2003 ensures that section 569 will apply to any pension, which is voluntary or capable of being discontinued. Isolated gifts to former employees are unlikely to be pension income but could possibly be chargeable as employment income either as general earnings or because they are in connection with the termination of the employment ...

Section 571 ITEPA provides:

If section 569 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

Thus (as one would expect) a UK pension is taxed on an arising basis.

### **37.5 Foreign pension**

Chapter 4 deals with foreign pensions. Section 573(1) ITEPA provides:

This section applies to any pension paid by or on behalf of a person who is outside the UK to a person who is resident in the UK.

I refer to this as “**a s.573 foreign pension**”.

Section 573(2) ITEPA provides:

But this section does not apply to a pension if any provision of Chapters

5 to 14 of this Part applies to it.

Chapter 10, in particular, has priority over this chapter. So in practice I expect that not many pensions fall within the s.573 category.

I do not discuss s.840 ITTOIA (relief for backdated pensions charged on arising basis).

### 37.5.1 “Pension”

Section 574 ITEPA sets out an inclusive definition of “Pension” for the taxation of s.573 foreign pensions. The definition (perhaps for historical reasons) is different from the definition which applies for UK pensions. Section 574(1) ITEPA sets out five types of foreign pension which are included in the term:

For the purposes of this Chapter “pension” includes—

- (a) an annuity under, or purchased with sums or assets held for the purposes of, or representing acquired rights under, a relevant non-UK scheme or an overseas pension scheme,

The next three categories concern income withdrawals:

- (b) an amount paid under a relevant non-UK scheme or an overseas pension scheme which, if the scheme were a registered pension scheme, would be income withdrawal (within the meaning of paragraph 7 of Schedule 28 to FA 2004),
- (ba) an amount paid under a relevant non-UK scheme or an overseas pension scheme which, if the scheme were a registered pension scheme, would be dependants’ income withdrawal or nominees’ income withdrawal (within the meaning of paragraphs 21 and 27D of Schedule 28 to FA 2004),
- (bb) an amount paid under a relevant non-UK scheme or an overseas pension scheme which, if the scheme were a registered pension scheme, would be successors’ income withdrawal (within the meaning of paragraph 27J of Schedule 28 to FA 2004), and
- (c) if conditions A and B are met, a pension which is paid voluntarily or is capable of being discontinued.

I refer to voluntary pension conditions A and B. Section 574 ITEPA then sets out those conditions:

- (2) Condition A is that the pension is paid to—
  - (a) a former employee or a former office-holder,

- (b) the widow or widower or surviving civil partner of a former employee or a former office-holder, or
  - (c) any child, relative or dependant of a former employee or a former office-holder.
- (3) Condition B is that the pension is paid by or on behalf of—
- (a) the person—
    - (i) who employed the former employee, or
    - (ii) under whom the former office-holder held the office, or
  - (b) the successors of that person.

Section 574(4) sets out supplemental definitions:

In this section—

“office” includes in particular any position which has an existence independent of the person who holds it and may be filled by successive holders;<sup>2</sup>

“overseas pension scheme” has the same meaning as in Part 4 of FA 2004 (see section 150(7) of that Act);

“relevant non-UK scheme” is to be read in accordance with paragraph 1(5) of Schedule 34 to FA 2004.

Section 575(1) ITEPA provides:

If section 573 applies, the taxable pension income for a tax year is the full amount of the pension income arising in the tax year, but subject to [a] subsections (1A)[split years] and [b] [subsection] (3) [remittance basis].

The FA 2017 removed the 10% deduction formerly allowable from foreign pensions, a reform which this book had advocated for many years.

### 37.5.2 *Remittance basis*

Section 575(3) ITEPA provides:

The full amount of the pension income arising in the tax year, or (as the case may be) the UK part of the tax year, is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of ITTOIA 2005 (relevant foreign income: remittance basis and deductions and reliefs).

---

<sup>2</sup> This is the standard form definition: see 33.3.1 (Offices).

The significance of treating the income as RFI is that the foreign pension income can qualify for the remittance basis.

## **37.6 Employment-related pension**

### *37.6.1 Annuity for dependants*

Section 609 ITEPA provides:

- (1) This section applies to any annuity which was granted for consideration consisting in whole or in part of sums—
  - (a) which, in the tax year 2012-13 or an earlier tax year, satisfied the conditions for relief under section 273 of ICTA or section 459 of ITA 2007 (obligatory contributions to secure an annuity for the benefit of dependants), or
  - (b) which fall within subsection (3).
- (2) But this section applies to an annuity which arises from a source outside the United Kingdom only if it is paid to a person resident in the United Kingdom.
- (3) A sum falls within this subsection if—
  - (a) in the tax year 2013-14 or a later tax year, the sum is paid by an individual, or is deducted from an individual's earnings,<sup>3</sup> under an Act or the individual's terms and conditions of employment,
  - (b) the sum is for the purpose of—
    - (i) securing a deferred annuity after the individual's death for the individual's surviving spouse or civil partner, or
    - (ii) making provision after the individual's death for the individual's children, and
  - (c) the individual—
    - (i) is UK resident for the tax year in which the sum is paid or deducted, or
    - (ii) at any time in that tax year, falls within any of paragraphs (a) to (f) of section 460(3) of ITA 2007 (matters relating to residence).<sup>4</sup>

---

3 Defined by reference in s.609(5): "In subsection (3)(a) "earnings" has the meaning given by section 62."

4 Section 609(4) provides: "Subsection (3)(a) does not cover contributions paid by a person under—

(a) Part 1 of the Social Security Contributions and Benefits Act 1992, or

(b) Part 1 of the Social Security Contributions and Benefits (Northern Ireland) Act

### 37.6.2 *Non-registered occupational pension scheme annuity*

Section 610 ITEPA provides:

- (1) This section applies to—
  - (a) any annuity paid under an occupational pension scheme<sup>5</sup> that is not a registered pension scheme, and
  - (b) any annuity acquired using funds held for the purposes of such an occupational pension scheme.
- (2) But this section applies to an annuity which arises from a source outside the United Kingdom only if it is paid to a person resident in the United Kingdom.

Section 610(3) deals with an overlap of pension schemes:

- (3) This section does not apply to an annuity to which Chapter 5A of this Part applies.

Section 610 originally referred to a sponsored superannuation scheme; and s.610(3) originally provided:

This section does not apply to an annuity to which any provision of Chapter 6, 7, 8 or 9 of this Part applies.

EN ITEPA provides:

2434. Subsection (3) ensures there is no overlap with other sections in the pension income Part. The definition of "sponsored superannuation scheme" in section 624(1) of ICTA predates the introduction of approved retirement benefits schemes in Chapter 1 of Part 14 of ICTA. An approved retirement benefits scheme is likely to be within the definition of "sponsored superannuation scheme". In ICTA an annuity paid by an approved retirement benefits scheme is taxed under Schedule E. The annuities identified in this section are taxed under Schedule D. A Schedule E charge takes priority over a Schedule D charge. This subsection preserves that order of priority.

### 37.6.3 *Annuity for another's services*

---

1992.”

5 Section 610(4) ITEPA provides a referential definition: “In this section “occupational pension scheme” has the same meaning as in Part 4 of FA 2004 (see section 150(5) of that Act).”

Section 611 ITEPA provides:

- (1) This section applies to any annuity purchased by any person in recognition of another person's services in any office or employment.
- (2) But this section applies to an annuity which arises from a source outside the United Kingdom only if it is paid to a person resident in the United Kingdom.
- (3) This section does not apply to an annuity to which Chapter 5A of this Part applies.
- (4) For the purposes of this section "office" includes in particular any position which has an existence independent of the person who holds it and may be filled by successive holders.

#### 37.6.4 *UK source annuities*

Section 612 ITEPA provides:

- (1) The taxable pension income for an annuity to which section 609, 610 or 611 applies is determined in accordance with this section if the annuity arises from a source in the United Kingdom.
- (2) The taxable pension income for a tax year is the full amount of the annuity arising in that year.

#### 37.6.5 *Foreign source annuities*

Section 613 ITEPA provides:

- (1) The taxable pension income for an annuity to which section 609, 610 or 611 applies is determined in accordance with this section if the annuity arises from a source outside the United Kingdom.
- (2) The taxable pension income for a tax year is the full amount of the annuity arising in the tax year, but subject to subsection (4).

#### 37.6.6 *Remittance basis*

Section 613(4) ITEPA provides

The annuity is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of ITTOIA 2005 (relevant foreign income: remittance basis and deductions and reliefs).

The significance of treating the income as RFI is that the foreign pension income can qualify for the remittance basis.

For completeness, s.613(5) ITEPA provides:

But if the annuity arises in the Republic of Ireland, section 839 of that Act (annual payments payable out of relevant foreign income)<sup>6</sup> applies with the omission of conditions B1 and B2 (and the reference to them in subsection (1) and subsection (5)(a)).

This specialist topic is not pursued here.

I do not discuss s.840 ITTOIA (relief for backdated pensions charged on arising basis).

### 37.7 Commonwealth pension

Section 615(1) ITEPA provides:

This section applies to a pension if conditions A, B and C are met.

I refer to “**commonwealth pension conditions A - C**”.

Section 615(7) ITEPA provides:

In this Chapter “pension” includes a pension which is paid voluntarily or is capable of being discontinued.

I refer to pensions within this definition as “**commonwealth pensions**” (though that is not a wholly accurate label).

I would be interested to hear from readers with experience in this area whether there are in fact many commonwealth pensions still payable.

#### 37.7.1 *Commonwealth pension condition A*

Section 615 ITEPA provides:

(2) Condition A is that the pension—

(a) is payable—

(i) to a person who has been employed in overseas government service, or

(ii) to the widow, widower, surviving civil partner, child, relative or dependant of a person who has been employed in overseas government service, and

(b) is payable in respect of that service...

(6) In condition A the references to a person being employed in overseas government service are to the person being employed outside the UK—

---

<sup>6</sup> See 30.12 (Annual Payment from RFI).

- (a) in the service of the Crown, or
- (b) in service under the government of a country or territory which falls within subsection (4).

### 37.7.2 *Commonwealth pension condition B*

Section 615 ITEPA provides:

- (3) Condition B is that the pension—
  - (a) is payable in the UK, and
  - (b) is payable to a person who is resident in the UK.

### 37.7.3 *Commonwealth pension condition C*

Section 615 ITEPA provides:

- (4) Condition C is that the pension is payable by or on behalf of the government of—
  - (a) a country which forms part of Her Majesty's dominions,
  - (b) any other country which is for the time being mentioned in Schedule 3 to the British Nationality Act 1981, or
  - (c) any territory under Her Majesty's protection.
- (5) But condition C is not met if the pension is payable out of the public revenue of the UK or Northern Ireland.

There are 53<sup>7</sup> countries in schedule 3:

Antigua and Barbuda	Canada	Jamaica
Australia	Republic of Cyprus	Kenya
The Bahamas	Dominica	Kiribati
Bangladesh	Fiji	Lesotho
Barbados	The Gambia	Malawi
Belize	Ghana	Malaysia
Botswana	Grenada	
Brunei	Guyana	Malta
Cameroon	India	Mauritius

---

<sup>7</sup> By contrast, there are currently 52 Commonwealth countries, including the UK. This is because often there is a delay between a country withdrawing from the Commonwealth and a consequential amendment to Sch 3. For present purposes, it is Sch 3 that is determinative. There is currently one country on the list that is not a member of the Commonwealth: Zimbabwe withdrew in 2003 but reapplied to join in May 2018; that application is pending approval.

Mozambique	Saint Lucia	Tanzania
Namibia	Saint Vincent and the Grenadines	Tonga
Nauru	Seychelles	Trinidad and Tobago
New Zealand	Sierra Leone	Tuvalu
Nigeria	Singapore	Uganda
Pakistan	Solomon Islands	Vanuatu
Papua New Guinea	South Africa	Western Samoa
Rwanda	Sri Lanka	Zambia
Saint Christopher and Nevis	Swaziland	Zimbabwe

The EI Manual provides:

**74006. Certain overseas government pensions paid in the UK** [Nov 2019] ...

***Her Majesty's dominions***

The Dependant Territories are:

Anguilla, Bermuda, British Antarctic Territory, British Indian Ocean Territory, British Virgin Islands, Cayman Islands, Falkland Islands, Gibraltar, Montserrat, Pitcairn, Henderson, Ducie and Oeno Islands, St Helena, St Helena Dependencies (Ascension Island, Tristan da Cunha), South Georgia and South Sandwich Islands, Turks and Caicos Islands

...

***Territories under Her Majesty's protection***

There are no longer any protectorates or protected states. ...

**37.7.4 *Commonwealth pension: Charge***

Section 616 ITEPA provides:

If section 615 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

The remittance basis is not applicable, perhaps because the pensions are “payable within the UK” and so regarded as received here.

Section 617 ITEPA provides for a 10% deduction:

A deduction of 10% is allowed from an amount of taxable pension income determined under section 616 (see section 567).

This seems to have been overlooked by the drafter of the FA 2017 which was intended to abolish the 10% deduction.

## **37.8 DT relief: Pension income**

Article 18 OECD Model Convention provides:

Subject to the provisions of paragraph 2 of Article 19 [government service],<sup>8</sup> pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State.

Where context permits, I use the word pension to include “other similar remuneration”.

### *37.8.1 Reason for residence taxation*

Why does OECD Model choose to tax pensions in the state of residence, rather than the state of source? OECD Commentary provides:

1... Various policy and administrative considerations support the principle that the taxing right with respect to this type of pension, and other similar remuneration, should be left to the State of residence. For instance, the State of residence of the recipient of a pension is in a better position than any other State to take into account the recipient’s overall ability to pay tax, which mostly depends on worldwide income and personal circumstances such as family responsibilities. This solution also avoids imposing on the recipient of this type of pension the administrative burden of having to comply with tax obligations in States other than that recipient’s State of residence.

These two arguments are invalid as they apply equally to every type of income, not just pensions. But the commentary later gives a better reason, the old difficulty of identifying the location of the source:

19. ... alternative provisions under which there is either exclusive or limited source taxation rights with respect to pensions require a determination of the State of source of pensions. Since a mere reference to a pension “arising in” a Contracting State could be construed as meaning either a pension paid by a fund established in that State or a pension derived from work performed in a State, States using such wording should clarify how it should be interpreted and applied.

19.1 Conceptually, the State of source might be considered to be the

---

8 See 37.8.7 (Government pension).

State in which the fund is established, the State where the relevant work has been performed or the State where deductions have been claimed. Each of these approaches would raise difficulties in the case of individuals who work in more than one State, change residence during their career or derive pensions from funds established in a State other than that in which they have worked. For example, many individuals now spend significant parts of their careers outside the State in which their pension funds are established and from which their pension benefits are ultimately paid. In such a case, treating the State in which the fund is established as the State of source would seem difficult to justify. The alternative of considering as the State of source the State where the work has been performed or deductions claimed would address that issue but would raise administrative difficulties for both taxpayers and tax authorities, particularly in the case of individuals who have worked in many States during their career, since it would create the possibility of different parts of the same pension having different States of source.

OECD Model adopts the pragmatic solution, but it is not surprising that there is a wide variety of provision in actual treaties. Some possibilities are discussed in OECD Commentary, but that need not be set out here.

Some pre-OECD Model treaties confer relief only if the income is subject to tax in the foreign state; see 104.14 (“Subject to tax”).

### 37.8.2 *Pension/similar remuneration*

OECD Commentary provides:

3. The types of payment that are covered by the Article include not only pensions directly paid to former employees but also to other beneficiaries (e.g. surviving spouses, companions or children of the employees) and other similar payments, such as annuities, paid in respect of past employment. The Article also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provisions of paragraph 2 of Article 19.

### 37.8.3 *One-off payment*

OECD Commentary provides:

5. While the word “pension”, under the ordinary meaning of the word,

covers only periodic payments, the words “other similar remuneration” are broad enough to cover non-periodic payments. For instance, a lump-sum payment in lieu of periodic pension payments that is made on or after cessation of employment may fall within the Article.

#### 37.8.4 *Pension or employment income?*

OECD Commentary discusses the pension/employment income boundary:

6. Whether a particular payment is to be considered as other remuneration similar to a pension or as final remuneration for work performed falling under Article 15 is a question of fact. For example, if it is shown that the consideration for the payment is the commutation of the pension or the compensation for a reduced pension then the payment may be characterised as “other similar remuneration” falling under the Article. This would be the case where a person was entitled to elect upon retirement between the payment of a pension or a lump-sum computed either by reference to the total amount of the contributions or to the amount of pension to which that person would otherwise be entitled under the rules in force for the pension scheme. The source of the payment is an important factor; payments made from a pension scheme would normally be covered by the Article. Other factors which could assist in determining whether a payment or series of payments fall under the Article include: whether a payment is made on or after the cessation of the employment giving rise to the payment, whether the recipient continues working, whether the recipient has reached the normal age of retirement with respect to that particular type of employment, the status of other recipients who qualify for the same type of lump-sum payment and whether the recipient is simultaneously eligible for other pension benefits. Reimbursement of pension contributions (e.g. after temporary employment) does not constitute “other similar remuneration” under Article 18. Where cases of difficulty arise in the taxation of such payments, the Contracting States should solve the matter by recourse to the provisions of Article 25 [mutual agreement].

#### 37.8.5 *Social security income*

OECD Commentary provides:

24. Depending on the circumstances, social security payments can fall under this Article as “pensions and other similar remuneration in

consideration of past employment”, under Article 19 as “pension[s] paid by, or out of funds created by, a Contracting State [...] in respect of services rendered to that State...” or under Article 21 as “items of income [...] not dealt with in the foregoing Articles”. Social security pensions fall under this Article when they are paid in consideration of past employment, unless paragraph 2 of Article 19 applies.<sup>9</sup> A social security pension may be said to be “in consideration of past employment” if employment is a condition for that pension. For instance, this will be the case where, under the relevant social security scheme:

- the amount of the pension is determined on the basis of either or both the period of employment and the employment income so that years when the individual was not employed do not give rise to pension benefits,
- the amount of the pension is determined on the basis of contributions to the scheme that are made under the condition of employment and in relation to the period of employment, or
- the amount of the pension is determined on the basis of the period of employment and either or both the contributions to the scheme and the investment income of the scheme.

25. Paragraph 2 of Article 19 will apply to a social security pension that would fall within Article 18 except for the fact that the past employment in consideration of which it is paid constituted services rendered to a State or a political subdivision or a local authority thereof, other than services referred to in paragraph 3 of Article 19.

26. Social security payments that do not fall within Articles 18 or 19 fall within Article 21. This would be the case, for instance, for payments made to self-employed persons as well as a pension purely based on resources, on age or disability which would be paid regardless of past employment or factors related to past employment (such as years of employment or contributions made during employment).

### 37.8.6 *Consideration: Past employment*

The INTM provides:

**INTM153200 Pensions** [Jan 2018]

... Social security and old age pensions are not paid in consideration of past employment and do not, therefore, come within the pensions

---

<sup>9</sup> See 37.8.7 (Government pension).

Article. They are within the other income Article (INTM153240). However, two agreements (Denmark, Finland) provide for sole source state taxation and two others (Luxembourg and Sweden) provide that pensions paid under social security legislation may be taxed by the source country.

OECD Commentary provides:

3... [Article 18] only applies, however, to payments that are in consideration of past employment; it would therefore not apply, for example, to an annuity acquired directly by the annuitant from capital that has not been funded from an employment pension scheme. The Article applies regardless of the tax treatment of the scheme under which the relevant payments are made; thus, a payment made under a pension plan that is not eligible for tax relief could nevertheless constitute a “pension or other similar remuneration” (the tax mismatch that could arise in such a situation is discussed below)...

7. Since the Article applies only to pensions and other similar remuneration that are paid in consideration for past employment, it does not cover other pensions such as those that are paid with respect to previous independent personal services. ...

### 37.8.7 *Government pension*

Article 19 OECD Model provides:

2. a) Notwithstanding the provisions of paragraph 1 [government service],<sup>10</sup> pensions and other similar remuneration paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
- b) However, such pensions and other similar remuneration shall be taxable only in the other Contracting State if the individual is a resident of, and a national of, that State.
3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

---

<sup>10</sup> See 36.20 (DT relief: Government service).

### 37.9 Australia/UK DTA

Article 17(1) Australia/UK Convention provides:

Pensions (including government pensions) and annuities paid to a resident of a Contracting State shall be taxable only in that State.

The Australian Revenue have given two rulings concerning compensation payments.

**Income tax: are periodic workers' compensation payments made by Comcare, 'pensions' for purposes of the pensions articles in Australia's double taxation agreements?**

1. Yes. The term 'pension' is not defined in any of the DTAs and therefore takes the meaning it has under domestic law. A pension is defined in the Macquarie Dictionary as '1. a fixed periodical payment made in consideration of past services, injury or loss sustained, merit, poverty etc. 2. an allowance or annuity.' The meaning of the term 'pension' was considered by Hill J. in the Federal Court in *Tubemakers of Aust Ltd v FCT* 93 ATC 4207. His Honour concluded that the essential characteristic of a pension is only that there be periodical payments. Payments made by Comcare under [a statutory compensation scheme] are fixed periodical payments made in consideration of injury or loss of wages. They are therefore pensions within the ordinary meaning of that term and fall within the operation of the Pensions Article in Australia's DTAs.

2. Under Australia's DTAs, pensions paid by the Australian Government are generally included in the Pensions Article and are taxable only in the country of residence of the recipient. Although, in some DTAs, government pensions paid in respect of services rendered to that government are dealt with under the Government Services Article rather than the Pensions Article, this does not affect the treatment of Comcare payments made under section 19. This is because the Comcare payments are made in consideration of injury or loss of wages and not for past services to the Government.<sup>11</sup>

The second ruling is as follows:

---

11 TD 93/151

<http://law.ato.gov.au/atolaw/view.htm?docidTXD/TD93151/NAT/ATO/00001>

**Facts** A non-resident individual (the taxpayer) who is a UK resident for the purposes of the [Australia] UK Convention, received loss of earnings payments from Australia as a result of injury suffered in a transport accident in the State of Victoria.

The payments comprised weekly statutory compensation payments [under a statutory compensation scheme]... for loss of income due to the injury.

The payments are calculated by reference to the recipient's pre-accident earnings.

**Reasons for Decision**

[The ruling cites art.17 of the DTA and continues:] Therefore, pensions paid from Australia to an individual who is a resident of the UK shall be taxable only in the UK.

Article 3(3) of the UK Convention provides that any term not defined in the Convention shall, unless the context requires otherwise, have the meaning it has under the domestic laws in respect of the taxes to which the Convention applies.<sup>12</sup> The term 'pension' is not defined in the UK Convention or in Australia's domestic taxation law.

[The ruling referred to the authorities cited in Taxation Determination TD 93/151 and continued:]

The loss of earnings payments made under [the statutory compensation scheme] have the essential characteristic of a 'pension' as per Hill J. in *Tubemakers* and fall within the Macquarie dictionary definition of 'pension' as they are fixed periodic payments made in consideration of injury or loss sustained. Accordingly, the periodic compensation payments made to the taxpayer ... are a 'pension' for the purposes of the Pension Article of the UK Convention.

Therefore, the Pension Article applies to give the UK, as the country of residence of the taxpayer, sole taxing rights over the compensation payments.<sup>13</sup>

It is different if OECD Model wording is used, which only applies to pensions "in consideration of past employment".

### 37.10 USA/UK DTA: Pension income

OECD Model only deals with pension income. The commentary

---

12 Author's footnote: this is OECD Model form; see 103.11 (Undefined treaty terms).

13 ATO ID 2008/145.

considers other aspects of cross border pensions: taxation of contributions, relief for contributions, income arising in the scheme, transfers between schemes. I here consider the USA/UK DTA which addresses these issues.

### 37.10.1 “Pension scheme”

Article 3(1)(o) USA/UK DTA provides a restrictive definition of “pension scheme”:

the term “pension scheme” means any plan, scheme, fund, trust or other arrangement established in a Contracting State which is—

- (i) generally exempt from income taxation in that State; and
- (ii) operated principally to administer or provide pension or retirement benefits or to earn income for the benefit of one or more such arrangements.

I refer to this as a “**pension scheme (as defined in the treaty)**”. This is not the OECD Model wording but there are some similarities.<sup>14</sup>

The DTA Exchange of Notes provides:

With reference to sub-paragraph (o) of paragraph 1 of Article 3 (General definitions)—

it is understood that pension schemes shall include the following and any identical or substantially similar schemes which are established pursuant to legislation introduced after the date of signature of the Convention—

- (a) under the law of the UK,
  - [i] employment-related arrangements (other than a social security scheme) approved as retirement benefit schemes for the purposes of Chapter I of Part XIV of ICTA 1988, and
  - [ii] personal pension schemes approved under Chapter IV of Part XIV of that Act; and
- (b) under the law of the United States,
  - [i] qualified plans under section 401(a) of the Internal Revenue Code,
  - [ii] individual retirement plans (including
    - [A] individual retirement plans that are part of a simplified employee pension plan that satisfies section 408(k),

---

<sup>14</sup> See 8.24 (Treaty-residence: Pension fund).

- [B] individual retirement accounts,
- [C] individual retirement annuities,
- [D] section 408(p) accounts, and
- [E] Roth IRAs under section 408A),
- [iii] section 403(a) qualified annuity plans, and
- [iv] section 403(b) plans.

This is an inclusive definition.

The DT Manual provides:

**19876B. Pension Contribution** [Jan 2020]

... The term “pension scheme” is defined for the purposes of the treaty at Article 3(1)(o). This means that Treaty benefits are for approved schemes only. As section 615 ICTA 1988 schemes [now Chapter 18 Part 9 ITEPA], which are UK established trusts for non-residents, are not approved they do not come within the definition of “pension scheme” in Article 3(1)(o) because they are not “generally exempt from income taxation in that State”. They are therefore not included in the list in the Exchange of Notes.

So called US section 401(k) plans are included within the definition of a pension scheme as they are within the definition of a pension scheme in Article 3(1)(o) because they are a type of section 401(a) plan.

The requirement that a pension fund must be “established in” a treaty state requires some nexus between the pension fund and the state, but the exact meaning is not precisely expressed.

The Upper Tribunal has held that the World Bank pension scheme was “established in” the US and so was a pension scheme (as defined in the treaty):

- (a) “established in” refers to a pension scheme’s physical location and
- (b) a pension scheme need not necessarily be “generally exempt from taxation” as such.<sup>15</sup>

The word “physical” is not apt for a non-tangible thing such as a pension scheme, but the important point is the rejection of the HMRC argument that a pension is “established” in a state if it is established in conformity with that State’s tax legislation relating to pension schemes.

The Australian Revenue takes a similar approach on whether a pension

---

<sup>15</sup> *Macklin v HMRC* [2015] UKUT 39 (TCC) at [46].

fund is “established in Australia” for the purposes of domestic (Australian) legislation:

100. ... there appears to be no case law which provides guidance on the location of the establishment of a superannuation fund. In the absence of such guidance, it is considered that a superannuation fund will be established in Australia when the initial contribution that establishes the fund is paid to and accepted by the trustee in Australia.<sup>16</sup> It is not necessary that the deed for the fund is signed and executed in Australia. Whether the initial contribution to establish the fund occurred in Australia is a question of fact which is determined by reference to the circumstances of each case.

101. If there is a situation where the initial contribution to establish the fund occurred outside Australia, notwithstanding that one or more of the signatories executed the deed in Australia, the fund will not be established in Australia.<sup>17</sup>

It seems to me that this is the natural meaning of a trust being “established in” a state. The difficulty of applying the natural meaning in the treaty definition is that some arrangements which the DTA Exchange of Notes recognises would not be included.<sup>18</sup> A court could well have found that a pension scheme was established in a state if it was set up there *or* if it qualified for pension exemption there. The treaty and international law background of the World Bank might also benefit from examination. It seems anomalous that employment income of World Bank employees should be exempt, but pension income, which is deferred remuneration, is taxable.

### 37.10.2 *DTA relief for pension*

---

16 Footnote original: Those superannuation schemes that are established by or under the law of the Commonwealth, or of a State or Territory - see paragraph (a) of the definition of ‘public sector superannuation scheme’ in section 10 of the SISA - are established in Australia.

17 Taxation Ruling TR 2008/9, “Income tax: meaning of ‘Australian superannuation fund’ in subsection 295-95(2) of the Income Tax Assessment Act 1997” <http://law.ato.gov.au/atolaw/view.htm?DocIDTXR/TR20089/NAT/ATO/00001&PiT99991231235958>

18 EU companies may establish registered schemes, and these are not likely to be set up by a payment in the UK.

Article 17(1) USA/UK DTA provides:

- (a) Pensions and other similar remuneration beneficially owned by a resident of a Contracting State shall be taxable only in that State.

The DTA Exchange of Notes provides:—

With reference to paragraph 1 of Article 17 ... it is understood that a payment shall be treated as a pension or other similar remuneration under paragraph 1 of Article 17 if it is a payment under a pension scheme as defined in sub-paragraph (o) of paragraph 1 of Article 3 (General definitions) of the Convention.

This is an exclusive definition, that is, if a payment is not under a pension scheme (as defined in the treaty) then it does not count as a pension for treaty purposes (even if it is a pension in the normal sense of the word.)<sup>19</sup>

In the case of payments which are not from pension schemes (as defined) the Other Income article may apply, though that (unlike article 17(1)) is subject to the US Savings Clause.

### 37.10.3 *Exemption recognition*

Article 17(1) USA/UK DTA continues:

- (b) Notwithstanding sub-paragraph (a) of this paragraph, the amount of any such pension or remuneration paid from a pension scheme established in the other Contracting State that would be exempt from taxation in that other State if the beneficial owner were a resident thereof shall be exempt from taxation in the first-mentioned State.

It is easier to follow a paraphrase identifying which Contracting State is which, and filling in the reference in the word “such”:

- (b) ... the amount of any pension or remuneration [beneficially owned by a resident of the UK] paid from a pension scheme established in [the USA] that would be exempt from taxation in [the USA] if the beneficial owner were a resident [of the USA] shall be exempt from taxation in

---

<sup>19</sup> If this view were wrong, the provision in the Exchange of Notes would not be necessary. This view is consistent with the approach in the commentary to the US Model Treaty: “The phrase “pensions and other similar remuneration” is intended to encompass payments made by *qualified* private retirement plans...”.

<http://www.treasury.gov/press-center/press-releases/Documents/hp16802.pdf>

[the UK].

The USA/UK DTA Technical Explanation provides:<sup>20</sup>

... Thus, for example, a distribution from a U.S. "Roth IRA" to a U.K. resident would be exempt from tax in the UK to the same extent the distribution would be exempt from tax in the United States if it were distributed to a U.S. resident. The same is true with respect to distributions from a traditional IRA to the extent that the distribution represents a return of non-deductible contributions. Similarly, if the distribution were not subject to tax when it was "rolled over" into another U.S. IRA (but not, for example, to a U.K. pension scheme), then the distribution would be exempt from tax in the UK.

The Tribunal has said:

We do not accept that the purpose of the exemption under article 17(1)(b) of the DTA is to provide equal treatment for pensioners resident in either Contracting State with regard to the taxation of pension income. It is, as we discern it, to give exemption in both Contracting States to pension income which the parties to the DTA have chosen to exempt from income taxation under their respective domestic laws because they are schemes operated principally to administer or provide pension or retirement benefits, etc.<sup>21</sup>

#### 37.10.4 *Savings clause and art 17(1)*

The USA/UK DTA Technical Explanation provides:<sup>22</sup>

[Article 17(1)(a)] is subject to the saving clause of paragraph 4 of Article 1 (General Scope)<sup>23</sup> while subparagraph 1(b) is not, by reason of the exception in subparagraph 5(a) of Article 1. Thus, a U.S. citizen who is a resident of the UK and receives a pension will be subject to U.S. tax on the payment, notwithstanding the rules in those paragraphs that give the State of residence of the recipient the exclusive taxing right. However, a U.S. citizen who receives a distribution from a pension scheme established in the UK will be taxable on only the portion of the pension distribution that is taxable in the UK.

---

20 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

21 *Macklin v HMRC* [2014] SFTD 290 at [110].

22 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

23 See 104.9.5 (US Savings Clause).

### 37.10.5 *Lump sum payment*

Article 17(2) USA/UK DTA continues:

Notwithstanding the provisions of paragraph 1 of this Article, a lump-sum payment derived from a pension scheme established in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in the first-mentioned State.

It may be easier to keep track of this by identifying the states expressly. In the case of a UK resident:

... a lump-sum payment derived from a pension scheme established in [the USA] and beneficially owned by a resident of [the UK] shall be taxable only in [the USA].

In the case of a US resident:

... a lump-sum payment derived from a pension scheme established in [the UK] and beneficially owned by a resident of [the USA] shall be taxable only in [the UK].

The USA/UK DTA Technical Explanation provides:<sup>24</sup>

Paragraph 2 is intended to deal with a particular type of double non-taxation that arose under the prior Convention because the UK does not tax lump-sum distributions from pension funds. Under the prior Convention, a lump-sum payment was treated in the same way as any other pension, and was taxable only in the country of residence of the beneficial owner. Accordingly, a person who anticipated receiving a lump-sum distribution from a U.S. pension scheme with respect to employment in the United States could avoid U.S. withholding tax on the distribution by establishing residence in the UK for the year in which he received the distribution. The person would not be subject to tax in either the United States or the UK with respect to the lump-sum distribution, resulting in a significant windfall.

Paragraph 2 prevents this unanticipated benefit by providing that, notwithstanding the exclusive residence-country taxation of paragraph 1, any lump-sum payment derived by a resident of a Contracting State from a pension scheme established in the other Contracting State shall

---

<sup>24</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

be taxable in that other State.

This problem arises because of the exemption for lump sum payments from UK pension schemes, which may be politically unassailable even if economically unjustifiable.

### 37.10.6 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:<sup>25</sup>

Paragraphs 2 and 4 of Article 17 also are subject to the saving clause. Accordingly, a U.S. citizen who is a resident of the UK will be subject to U.S. tax on a lump-sum distribution from a pension scheme or an annuity, notwithstanding the rules in those paragraphs that give exclusive taxation rights to the State of source or residence, as the case may be.

The DTR Manual provides:

#### **19876A. Pensions from 2003** [Jan 2020]

##### **... Lump Sums**

Under the old Agreement, a lump-sum payment from a pension scheme was taxable only in the country of residence. So if an individual moved from the US to the UK before receiving a lump sum from a US pension scheme, they would be taxable on the lump sum neither in the US (because of the treaty) nor in the UK (which does not tax lump sums anyway).

The new provision prevents this occurring by providing that a lump-sum payment derived by a resident of one State from a pension scheme established in the other State shall be taxable only in that other State.

The provision preserves the exemption from income tax of a lump sum relevant benefit where it is paid by a UK approved pension scheme to a beneficial owner who is a US resident. However, Article 1(4) will apply in respect of US citizens as the provisions of Article 17(2) are not amongst those listed at Article 1(5). So the US are able to tax lump sums received by US citizens from UK schemes.

## **37.11 Income of pension fund**

Article 18(1) USA/UK DTA provides:

---

<sup>25</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

Where an individual who is a resident of a Contracting State is a member or beneficiary of, or participant in, a pension scheme established in the other Contracting State, income earned by the pension scheme may be taxed as income of that individual only when, and, subject to paragraphs 1 and 2 of Article 17 (Pensions, social security, annuities, alimony, and child support) of this Convention, to the extent that, it is paid to, or for the benefit of, that individual from the pension scheme (and not transferred to another pension scheme).

It may be easier to keep track of this by identifying the states expressly. In the case of a UK resident, in short:

Where an individual who is a resident of [the UK] is a member or beneficiary of, or participant in, a pension scheme established in [the US], income earned by the pension scheme may be taxed as income of that individual only when ... it is paid to, or for the benefit of, that individual from the pension scheme (and not transferred to another pension scheme).

The USA/UK DTA Technical Explanation provides:<sup>26</sup>

Thus, for example, if a U.S. citizen contributes to a U.S. qualified plan while working in the United States and then establishes residence in the UK, paragraph 1 prevents the UK from taxing currently the plan's earnings and accretions with respect to that individual. When the resident receives a distribution from the pension scheme, that distribution may be subject to tax in the State of residence, subject to paragraphs 1 and 2 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support).

The DTR Manual provides:

**19876A. Pensions from 2003** [Jan 2020]

***IRAs***

...An IRA is a trust (or similar arrangement known as a custodial account) set up for the exclusive benefit of the taxpayer and, on his death, nominated beneficiaries, which satisfies certain conditions imposed by United States tax law. Contributions to an IRA are tax deductible in the United States and the funds can be invested in a wide range of investments. IRA funds can be withdrawn at any time, but if

---

<sup>26</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

withdrawals are made before the taxpayer reaches the age of 59½ he must pay an additional penalty tax of 10% unless he is disabled.

...

***IRAs: Year 2003/04 et seq.***

... The new Agreement ... will mean that no liability will arise until it would have done so under US tax law. Under US law, this will be when distributions are made. As indicated above, this will generally not be before age 59½ but must be before age 70½. The important point to note is that income will no longer be assessable in the UK on the basis of income arising within the IRA. Any case of doubt or difficulty should be referred to HMRC, Customs & International, Tax Treaty Team.

The taxation of the pension scheme itself is outside the scope of this book, but note that the term “person” is defined in the DTA to include pension schemes and employee benefit trusts and arrangements. This is now also in the OECD Model.<sup>27</sup>

### 37.11.1 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:<sup>28</sup>

Paragraph 1 is not subject to the saving clause of paragraph 4 of Article 1 (General Scope) by reason of the exception in subparagraph 5(a) of Article 1. Accordingly, a U.S. citizen who is a resident of the UK will not be subject to tax in the United States on the earnings and accretions of a U.K. pension fund with respect to that U.S. citizen.

## 37.12 **Transfer between schemes**

The minutes of the Joint Forum on Expatriate Tax and NICs provides:

**UK tax charges and transfers to US**

*Question:* It is common practice for funds to be transferred between US pension schemes, particularly from a 401(k) to an IRA (individual retirement account). Although it is not necessarily a requirement, most people transfer their pension savings when they move employment.

[The minutes refer to article 18 and continue]

Where Article 18(1) is otherwise in point, is it HMRC’s position that any unauthorised payments charge applies to the whole of the UK tax-

---

<sup>27</sup> See 8.24 (Treaty-residence: Pension fund).

<sup>28</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

relieved contributions deemed to be transferred to the IRA, treating those as transferred in priority to any fund income, or does Article 18(1) somehow confer total or partial exemption from this charge (if so, how)? The cumulative rate of charge on UK tax-relieved contributions (unauthorised payment charge and surcharge) is 55%, which is more than the tax relief originally given on the contributions. Does this mean that part of the tax represents a charge on fund growth, which would be prevented by Article 18(1) if the treaty is allowed to have any application to Schedule 34 FA 2004 charges? Or is Article 17 the provision that would relate to a transfer from a 401(k) to an IRA?

*HMRC answer:* The provisions of the UK/US double taxation convention will not apply where both the individual and the pension scheme are in the US.

Where a member of a US pension scheme is resident in the UK and receives UK tax relief on their pension savings that part of their pension savings will be subject to the provisions of Schedule 34 FA 2004 (the member payment provisions). If a transfer is made between a 401(k) and an IRA and the IRA is not a qualifying recognised overseas pension scheme (QROPS), the transfer will be an unauthorised payment. Any tax charge will be on the UK element of the pension savings and not to the investment growth in relation to the contributions. The wording of Article 18 refers to “income earned by the pension scheme” (in this case the US 401(k)). However, the income earned by the pension scheme would not be subject to UK tax charges.

We do not see a transfer between pension schemes as being within Article 17 of the UK/US double taxation convention.<sup>29</sup>

### 37.13 Relief for pension contribution

Article 18(2) USA/UK DTA provides:

Where an individual who is a member or beneficiary of, or participant in, a pension scheme established in a Contracting State exercises an employment or self-employment in the other Contracting State—

- (a) contributions paid by or on behalf of that individual to the pension scheme during the period that he exercises an employment or self-employment in the other State shall be deductible (or

---

29 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

excludable) in computing his taxable income in that other State

The USA/UK DTA Technical Explanation provides:<sup>30</sup>

Paragraph 2 [of article 18] provides certain benefits with respect to cross-border contributions to a pension scheme, subject to the limitations of paragraphs 3 and 4 of the Article. It is irrelevant for purposes of paragraph 2 whether the participant establishes residence in the State where the individual renders services (the “host State”). The benefits provided in paragraph 2 are similar to the benefits the U.S. Model provides with respect to contributions.

Subparagraph (a) of paragraph 2 allows an individual who exercises employment or self-employment in a Contracting State to deduct or exclude from income in that Contracting State contributions made by or on behalf of the individual during the period of employment or self-employment to a pension scheme established in the other Contracting State. Thus, for example, if a participant in a U.S. qualified plan goes to work in the UK, the participant may deduct or exclude from income in the UK contributions to the U.S. qualified plan made while the participant works in the UK. Subparagraph (a), however, applies only to the extent of the relief allowed by the host State (e.g., the UK in the example) for contributions to a pension scheme established in that State.

### 37.13.1 *Contribution by employer*

Article 18(2) USA/UK DTA provides:

Where an individual who is a member or beneficiary of, or participant in, a pension scheme established in a Contracting State exercises an employment or self-employment in the other Contracting State ...

(b) any benefits accrued under the pension scheme, or contributions made to the pension scheme by or on behalf of the individual’s employer, during that period shall not be treated as part of the employee’s taxable income and any such contributions shall be allowed as a deduction in computing the business profits of his employer in that other State.

The reliefs available under this paragraph shall not exceed the reliefs that would be allowed by the other State to residents of that State for contributions to, or benefits accrued under, a pension scheme established

---

30 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

in that State.

The USA/UK DTA Technical Explanation provides:<sup>31</sup>

Subparagraph (b) of paragraph 2 provides that, in the case of employment, accrued benefits and contributions by or on behalf of the individual's employer, during the period of employment in the host State, will not be treated as taxable income to the employee in that State. Subparagraph (b) also allows the employer a deduction in computing business profits in the host State for contributions to the plan. For example, if a participant in a U.S. qualified plan goes to work in the UK, the participant's employer may deduct from its business profits in the UK contributions to the U.S. qualified plan for the benefit of the employee while the employee renders services in the UK.

As in the case of subparagraph (a), subparagraph (b) applies only to the extent of the relief allowed by the host State for contributions to pension schemes established in that State. Therefore, where the United States is the host State, the exclusion of employee contributions from the employee's income under this paragraph is limited to elective contributions not in excess of the amount specified in section 402(g). Deduction of employer contributions is subject to the limitations of sections 415 and 404. The section 404 limitation on deductions is calculated as if the individual were the only employee covered by the plan.

### 37.13.2 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:<sup>32</sup>

Paragraph 2 is not subject to the saving clause by reason of subparagraph 5(b) of Article 1. Accordingly, the benefits of paragraph 2 will be available to residents of the United States who are not citizens of the United States nor admitted for permanent resident ("green card" holders) in the United States.

The DT Manual provides:

**19876B. Pension Contribution** [Jan 2020]

...It is a feature of several UK treaties from 2003 onwards that pension

---

31 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

32 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

contributions made in one country are recognised for tax purposes in the other.

The general premise of these is that if a member of a pension scheme established in one country goes to work (as an employee or in a self-employed capacity) in the other country, the state of residence will not tax the scheme member on income earned by the scheme unless it is paid to him (or for his benefit). Nor will tax be payable if income is transferred to another pension scheme until the benefits are actually received.

Under the new Agreement, contributions to the scheme by that member (or those paid on his behalf) will be tax-deductible in the state of residence. In the same way, benefits accrued under the scheme, or employer contributions to the scheme, will not be treated as part of his taxable income and those contributions will be tax-deductible for the employer. The reliefs available cannot exceed those allowed by the state of residence for contributions of the same amount to a scheme established in the state of residence.

The conditions for getting the relief are as follows

- contributions were made by or on behalf of the individual or (in the case of an employee) his employer to the pension scheme (or to a similar scheme for which it was substituted) before the individual began to exercise an employment or self-employment in the other contracting state, and
- the competent authority of the other State agrees that the pension scheme generally corresponds to a pension scheme established in that other State. ...

### 37.13.3 *Pre-existing scheme*

Article 18(3) USA/UK DTA provides:

The provisions of paragraph 2 of this Article shall not apply unless—

- (a) contributions by or on behalf of the individual, or by or on behalf of the individual's employer, to the pension scheme (or to another similar pension scheme for which the first-mentioned pension scheme was substituted) were made before the individual began to exercise an employment or self-employment in the other State

The DT Manual provides:

**19876B. Pension Contribution** [Jan 2020]

...

Where someone comes to work in the UK we will regard the first condition as having been met if the individual was a member of the US scheme before beginning to exercise an employment or self-employment in the UK. ...

The USA/UK DTA Technical Explanation provides:<sup>33</sup>

Paragraph 3 limits the availability of benefits under paragraph 2. Under subparagraph (a) of paragraph 3, paragraph 2 does not apply to contributions to a pension scheme unless the participant already was contributing to the scheme, or his employer already was contributing to the scheme with respect to that individual, before the individual began exercising employment in the State where the services are performed (the “host State”). This condition would be met if either the employee or the employer was contributing to a scheme that was replaced by the scheme to which he is contributing. The rule regarding successor schemes would apply if, for example, the employer has been taken over by a company that replaces the existing scheme with its own scheme, rolling membership in the old scheme over into the new scheme.

#### 37.13.4 *Corresponding scheme*

Article 18(3) USA/UK DTA provides:

The provisions of paragraph 2 of this Article shall not apply unless...

(b) the competent authority of the other State has agreed that the pension scheme generally corresponds to a pension scheme established in that other State.

The DTA Exchange of Notes provides:

With reference to sub-paragraph (b) of paragraph 3 and sub-paragraph (d) of paragraph 5 of Article 18 (Pension schemes)—

it is understood that the pension schemes listed with respect to a Contracting State in this exchange of notes in connection with sub-paragraph (o) of paragraph 1 of Article 3 (General definitions)<sup>34</sup> shall generally correspond to the pension schemes listed in this exchange of notes with respect to the other Contracting State.

---

<sup>33</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

<sup>34</sup> See 37.10.1 (“Pension scheme”).

The USA/UK DTA Technical Explanation provides:<sup>35</sup>

In addition, under subparagraph (b) of paragraph 3, the competent authority of the host State must determine that the recognized plan to which a contribution is made in the other Contracting State generally corresponds to the plan in the host State. According to the notes, it is understood for this purpose that U.S. pension schemes eligible for the benefits of paragraph 2 include qualified plans under section 401(a), individual retirement plans (including individual retirement plans that are part of a simplified employee pension plan that satisfies section 408(k)), individual retirement accounts, individual retirement annuities, section 408(p) accounts and Roth IRAs under section 408A), section 403(a) qualified annuity plans, and section 403(b) plans.

#### 37.13.5 *Contribution relief: Remittance basis*

Article 18(4) USA/UK DTA provides:

Where, under sub-paragraph (a) of paragraph 2 of this Article, contributions to a pension scheme are deductible (or excludable) in computing an individual's taxable income in a Contracting State and, under the laws in force in that State, the individual is subject to tax in that State, in respect of income, profits or gains, by reference to the amount thereof which is remitted to or received in that State and not by reference to the full amount thereof, then the relief that would otherwise be available to that individual under that sub-paragraph in respect of such contributions shall be reduced to an amount that bears the same proportion to that relief as the amount of the income, profits or gains in respect of which the individual is subject to tax in that State bears to the amount of the income, profits or gains in respect of which he would be subject to tax if he were so subject in respect of the full amount thereof and not only in respect of the amount remitted to or received in that State.

The USA/UK DTA Technical Explanation provides:<sup>36</sup>

Paragraph 4 limits the availability of benefits under paragraph 2 of this article. Paragraph 4 provides a special rule in cases where income dealt

---

35 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

36 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

with by the Convention is taxable to a resident of a Contracting State only if and to the extent it is remitted to or received by that person. In such cases, paragraph 4 reduces proportionately the deduction or exclusion of contributions to a pension scheme under subparagraph (a) of paragraph 2 based upon the amount of income subject to tax in the State of residence. Although this rule is written in bilateral fashion, it presently applies to residents of the UK only, because the United States does not tax on a remittance basis. Paragraph 4 would apply, for example, if a U.S. citizen resident in the UK earns income in the United States that is not subject to tax in the UK because the income is not remitted to the UK. In this case, paragraph 4 would reduce proportionately the amount of any deduction or exclusion allowed in the UK to the U.S. citizen by subparagraph (a) of paragraph 2 for contributions to a U.S. pension scheme.

The DT Manual provides:

**19876B. Pension Contribution** [Jan 2020]

...Relief will be restricted where contributions to a pension scheme are deductible or excludable in computing a person's taxable income in the host country if he is subject to tax there not on his total income but only on amounts remitted to that country. Relief is available only on a corresponding proportion of the pension contributions.

*An example*

Individual's total income, profits and gains	£100,000
Income, profits and gains remitted to the UK	£90,000
Individual's contributions to US pension scheme	£5,000

Contributions deductible in computing individual's UK taxable income - £4,500 (i.e. 90% of individual's total contributions). ...

### 37.14 Cross border contribution relief

Article 18(5) USA/UK DTA provides:

- (a) Where a citizen of the United States who is a resident of the UK exercises an employment in the UK the income from which is taxable in the UK and is borne by an employer who is a resident of the UK or by a permanent establishment situated in the UK, and the individual is a member or beneficiary of, or participant in, a pension scheme established in the UK,
  - (i) contributions paid by or on behalf of that individual to the pension scheme during the period that he exercises the

- employment in the UK, and that are attributable to the employment, shall be deductible (or excludable) in computing his taxable income in the United States; and
- (ii) any benefits accrued under the pension scheme, or contributions made to the pension scheme by or on behalf of the individual's employer, during that period, and that are attributable to the employment, shall not be treated as part of the employee's taxable income in computing his taxable income in the United States.

This paragraph shall apply only to the extent that the contributions or benefits qualify for tax relief in the UK.

The USA/UK DTA Technical Explanation provides:<sup>37</sup>

Paragraph 5 generally provides U.S. tax treatment for certain contributions by or on behalf of U.S. citizens resident in the UK to pension schemes established in the UK that is comparable to the treatment that would be provided for contributions to U.S. schemes. Under subparagraph (a) of paragraph 5, a U.S. citizen resident in the UK may exclude or deduct for U.S. tax purposes certain contributions to a pension scheme established in the UK. Qualifying contributions generally include contributions made during the period the U.S. citizen exercises an employment in the UK if expenses of the employment are borne by a U.K. employer or U.K. permanent establishment. Similarly, with respect to the U.S. citizen's participation in the U.K. pension scheme, accrued benefits and contributions during that period generally are not treated as taxable income in the United States.

There are three restrictions.

#### 37.14.1 *Cap by US tax rules*

Article 18(5) USA/UK DTA provides:

- (b) The reliefs available under this paragraph shall not exceed the reliefs that would be allowed by the United States to its residents for contributions to, or benefits accrued under, a generally corresponding pension scheme established in the United States.

---

<sup>37</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

The USA/UK DTA Technical Explanation provides:<sup>38</sup>

The U.S. tax benefit allowed by paragraph 5, however, is limited to the lesser of the amount of relief allowed for contributions and benefits under a pension scheme established in the UK and, under subparagraph (b), the amount of relief that would be allowed for contributions and benefits under a generally corresponding pension scheme established in the United States.

Article 18(5) USA/UK DTA provides:

- (c) For purposes of determining an individual's eligibility to participate in and receive tax benefits with respect to a pension scheme established in the United States, contributions made to, or benefits accrued under, a pension scheme established in the UK shall be treated as contributions or benefits under a generally corresponding pension scheme established in the United States to the extent reliefs are available to the individual under this paragraph.

The USA/UK DTA Technical Explanation provides:<sup>39</sup>

Subparagraph (c) provides that the benefits an individual obtains under paragraph 5 are counted when determining that individual's eligibility for benefits under a pension scheme established in the United States. Thus, for example, contributions to a U.K. pension scheme may be counted in determining whether the individual has exceeded the annual limitation on contributions to an individual retirement account.

Article 18(5) USA/UK DTA provides:

- (d) This paragraph shall not apply unless the competent authority of the United States has agreed that the pension scheme generally corresponds to a pension scheme established in the United States.

The USA/UK DTA Technical Explanation provides:<sup>40</sup>

Under subparagraph (d), paragraph 5 does not apply to pension contributions and benefits unless the competent authority of the United States has agreed that the pension scheme established in the UK

---

38 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

39 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

40 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

generally corresponds to a pension scheme established in the United States. The notes provide that certain pension schemes have been determined to "generally correspond" to schemes in the other country. Since paragraph 5 applies only with respect to persons employed by a U.K. employer or U.K. permanent establishment, however, the relevant U.K. plans are those that correspond to employer plans in the United States. Accordingly, it applies with respect to retirement benefit schemes for the purpose of Chapter I of Part XIV of ICTA1988.

### 37.14.2 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:<sup>41</sup>

Paragraph 5 is not subject to the saving clause of paragraph 4 of Article 1 by reason of the exception in subparagraph 5(a) of Article 1. Accordingly, U.S. citizens who are resident in the UK will receive the benefits provided by paragraph 5 with respect to contributions made to pension schemes established in the UK.

### 37.15 **Canadian RRSP and RRIF**

The DT Manual formerly provided:

**DT4617 Withdrawals from Canadian RRSPs/RRIFs** [Jun 2016 - Feb 2017]]

Canadian Registered Retirement Savings Plans (RRSPs) and Registered Retirement Income Funds (RRIFs)

Where a UK resident makes a lump sum withdrawal from an RRSP or an RRIF, Canada imposes a 25 per cent withholding tax. No tax credit relief is allowable in the UK in respect of the tax withheld, however, because the Canadian tax is imposed upon the lump sum withdrawal (which does not itself give rise to a tax charge in the UK), whereas any UK tax charge is on the disposal of assets held within the Plan or Fund to enable the lump sum to be withdrawn (and no tax is levied on the disposal of fund assets in Canada). The Elimination of Double Taxation Article (Article 21) obliges the UK to give credit for Canadian tax paid only against UK tax computed by reference to the same profits, income or chargeable gains by reference to which the Canadian tax is computed. Since no UK tax is computed by reference to the subject of Canadian tax (that is, the withdrawal), no tax credit relief is allowable. Similarly, where the

---

41 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

disposal of fund assets to facilitate a withdrawal gives rise to a UK tax charge, no tax credit relief is allowable since the disposal does not attract a tax charge in Canada.

This passage was withdrawn Feb 2017<sup>42</sup> and may now be of historical interest only.

Expat Q&A log provides:

### **Canadian RRSPs**

**Question:** Does HMRC regard an RRSP as an “overseas pension scheme” under FA 2004 s150? Does the treatment set out in the IM1622 with regard to an RRSP still apply?

If an RRSP is not an overseas pension scheme, is the group version of it an employer-financed retirement benefits scheme for the purposes of s393A ITEPA?

### **HMRC Answer**

The response provided on 27/11/06 above<sup>43</sup> remains appropriate for periods prior to 6th April 2017. Subsequent to this date, HMRC consider that if the funds accrue in an RRSP or RRIF then we will tax them in the UK as a foreign pension. This change in approach regarding lump sums stems from the introduction of taxation of lump sums to UK residents from all foreign pension schemes introduced in FA 2017. If the funds have accrued in an RRSP or RRIF since 6 April 2017 they may be liable to tax in the UK (as a pension) and therefore from a treaty perspective we would rely on the conditions set out in the Pensions article of the UK/Canada Tax treaty. Prior to 6 April 2017 our position is outlined in the guidance at DT4605.<sup>44</sup>

## **37.16 Annuity income: Introduction**

I would concentrate on the themes of this book, but the subject can only be understood in the context of the provisions as a whole.

---

42 The passage is still online, see

<https://www.gov.uk/hmrc-internal-manuals/double-taxation-relief/dt4617>

But it does not appear in the index pages so someone browsing the manuals will not find it. It may be an accidental leftover or it may still be current.

43 The text is set out in the original 2020/21 edition para 30.15 (Canadian RRSP and RRIF) but is now of historical interest only.

44 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/897729/HMRC\\_Joint\\_Expat-Forum-Tax\\_NICs\\_minutes-11-June-2020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf)

Annuity income may be:

- (1) pension income
- (2) non-pension annuity income:
  - (a) income from a purchased life annuity (see below)
  - (b) misc sweep-up income
  - (c) exempt (tax free)

The ITEPA charges on pension income have priority over the ITTOIA charge on annuity income.<sup>45</sup>

Non-pension annuities should perhaps be placed in a different chapter, but it is convenient to deal with them here.

A contract for a purchased life annuity in principle falls within the chargeable event rules.<sup>46</sup> So chargeable-event gains arising from the contract are in principle taxable.

I do not discuss deduction at source rules.

### 37.17 Annuity terminology

#### 37.17.1 “Annuity”

The word “annuity” is used in many tax contexts and as far as I know, never defined. IPT Manual discusses the meaning:

#### **1130. What is an annuity?** [Jun 2016]

There is no single definition in the taxes acts. There is an ancient definition in Stroud’s Judicial Dictionary, quoting Coke on Littleton:

An annuity is a yearly payment of a certaine summe of money granted to another in fee, for life, or yeares, charging the person of the grantor onely.<sup>47</sup>

From an early case called *Foley v Fletcher*<sup>48</sup> the judgment of Watson B at 784-5 is often quoted:

But an annuity means where an income is purchased with a sum of money, and the capital has gone and has ceased to exist, the principal having been converted into an annuity.

From this and other cases, notably *Southern-Smith v Clancy*, 24 TC 1, the

45 See 13.3.6 11A(S & I Income/ITEPA income).

46 See 62.2.4 (“Life annuity”); 62.3.1 (Policies within charge).

47 *Stroud’s Judicial Dictionary of Words and Phrases* (9<sup>th</sup> ed., 2016) pp. 129.

48 (1858) 157 ER 678; 28 LJ Ex 100; 3 H & N 769 accessible <http://www.commonlii.org/uk/cases/EngR/1858/1107.pdf>

following factors emerge as needing to be present

- the payments must be made under a legal obligation
- those payments must be ‘pure income profit’
- they must be capable of being characterised as ‘annual’, so being capable of recurrence on a periodic basis by reference to an annual time frame
- the purchase sum must pass absolutely to the provider
- no debtor/creditor relationship is created in relation to that sum; it is replaced by the annuity
- the annuitant’s only right is to demand payments when due
- the payments must not be instalments of pre-existing debt.

### 37.17.2 “Purchased life annuity”

Section 423 ITEPA provides:

(1) In this Chapter [Chapter 7 part 4 ITTOIA] “purchased life annuity” means an annuity—

- (a) granted for consideration in money or money’s worth in the ordinary course of a business of granting annuities on human life, and
  - (b) payable for a term ending at a time ascertainable only by reference to the end of a human life.
- (2) For this purpose it does not matter that the annuity may in some circumstances end before or after the life.

The definition of “annuity contract” in s.554V ITEPA is in the same terms.

In the UK, only insurance companies and friendly societies carry on the business of granting annuities. Outside the UK, a wider range of bodies may do so.

The IPT Manual discusses condition (1)(b) (“a term ending at a time ascertainable only by reference to the end of a human life”) and identifies three types of annuity which meet this condition:

#### **IPTM4210 guaranteed and temporary annuities** [Jun 2016]

Annuities are flexible products and may take several forms.

[1] A life annuity may, for example, be guaranteed to run for a specified period, even if the life ends before that period comes to an end, but will continue as a life annuity if the life survives the period.

[2] Alternatively, there may be a guarantee that the purchase consideration will always be returned in full, even if the life ends before the end of the expected term. In this situation, the balance of the purchase

price will usually continue to be paid out as continuing annuity payments following death. Naturally, all these potential benefits will be factored into the price of the annuity on actuarial principles.

[3] Another variation is a temporary annuity, where the annuity comes to an end if the life survives beyond a specified period but otherwise terminates on the dropping of the life.

For tax purposes, these arrangements are still dependent on human life, there is a life contingency, and payments made will be treated as purchased life annuities rather than as annuities certain, including those payments made in consequence of the guarantee, after the life has dropped.

### 37.17.3 “Annuity certain”

The IPT Manual provides:

#### **IPTM4200 - Purchased life annuities: different types of annuity: annuities certain [Jun 2016]**

Annuities certain provide a series of payments, usually in return for a single lump sum, that is payable for a fixed term. In particular, the term is not subject to alteration by the death of any person. In other words, there is no life contingency. If such an annuity is purchased from an insurance company or friendly society, part of each annuity payment is treated as a return of capital. This result, unlike the situation in relation to a life annuity, follows from first principles as determined by the Court - see *Perrin v Dickson* (1929), 14 TC 608. The reasoning is that, as the term is known from the start, it is straightforward and correct to determine the amount of exempt capital comprised within each payment. Only the interest, or income, element is treated as income for tax purposes. And it is taxed as interest rather than as an annual payment. Annuities certain are not annuities in the true sense at all. The tax treatment of the payments is thus similar to that of purchased life annuities, but they are not within the scheme described at IPTM4300 as the dissection arises on first principles. If written by an insurance company they are in fact a variety of capital redemption policy, see IPTM1120, and consequently are potentially within the chargeable events regime, see IPTM3300, though they are not likely to give rise to chargeable events, see IPTM3400. A UK-resident insurance company will deduct tax at the basic rate from the payments it makes, but from the interest parts only. In total, the interest parts will be equal to the amount by which the sum of the annuity payments exceeds the purchase price of

the annuity.

The author is right to say that “annuities certain are not annuities in the true sense” and it would be better not to use the term annuity in this context.

### **37.18 Purchased life annuity: Charge**

This is dealt with in Chapter 7 Part 4 ITTOIA.

Section 422(1) ITTOIA provides:

Income tax is charged on annuity payments made under a purchased life annuity.

Section 424 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the annuity payments arising in the tax year.
- (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Subsection (2) incorporates the remittance basis for foreign source annuity income.

Section 422(2) ITTOIA lists exemptions:

For exemptions, see in particular—

- (a) section 717 (exemption for part of purchased life annuity payments),
- (b) section 725 (annual payments under immediate needs annuities),
- (c) section 731 (periodical payments of personal injury damages), and
- (d) section 732 (compensation awards).

These exemptions are not discussed here.

The IPT Manual explains:

#### **IPTM4100 - Purchased life annuities: background** [Jun 2016]

...In 1956, following the 1954 Report of the Committee on the Taxation Treatment of Provisions for Retirement, legislation was introduced that ... provides for the creation of what ICTA88 calls a ‘capital element’, and ITTOIA05 an ‘exempt sum’, or ‘exempt proportion’, depending on the type of calculation involved, see IPTM4310. It reflects the amount of exempt capital comprised within each of the annuity payments. In broad terms, the exempt capital amount is obtained by dividing the purchase price of the annuity by the subject’s life expectation, determined according to prescribed mortality tables.

## CHAPTER THIRTY EIGHT

# DISCRETIONARY TRUSTS: INCOME TAX

- |  |  |   |
|--|--|---|
| 38.1   |  | 38.9 Discretionary trust transparency:<br>Beneficiary reliefs |
| 38.3 Tier 3: Discretionary payment<br>charge |  | 38.9.1 UK trust, foreign income: s.111<br>relief              |
| 38.8.3 Accumulated income paid as<br>capital |  | 38.12 UK trust, non-resident<br>beneficiary: DT relief        |
| 38.8.5 Accumulated income paid as<br>income  |  |   |

### *Cross references*

The following topics are considered elsewhere:

- 15.2 (Source: IT territorial limit)
- 9.3.1 (Split year: Pt 4/5 ITTOIA Income)

I do not consider:

- the vexed topic of trust expenses; but see 38.10.1 (ESC B18: HMRC example)
- the standard rate band, which gives relief for the first (small) slice of trust income
- corporate beneficiaries
- share incentive plans

## 38.1 Discretionary trusts: Introduction

This chapter is concerned with the income taxation of discretionary trusts. The topic needs a book to itself. This chapter focuses on the matters closest to the themes of this work but it is necessary to review the general rules to understand these matters in their context.

The starting point is to appreciate that a receipt from a discretionary trust may in the hands of the recipient be:

- (1) income (“income distribution” or “income receipt”) or
- (2) capital (“capital distribution”)

I use the term “**discretionary income payment**” to refer to a payment from a discretionary trust to a beneficiary, which is income (not capital) in the hands of the beneficiary. The statutory term is “discretionary

payment” (it is assumed that the payment is an income distribution).

The legislation in Part 9 ITA (settlements and trustees). Section 462 ITA provides an overview. Perhaps we need it:

<b>Chapter</b>	<b>Topic</b>
2	General provisions and definitions
3	Trust rates
4	Trust expenses
5	Approved share incentive plans
6	First slice of trust income exempt from trust rate
7	Trust distributions

In this chapter when I refer to a trust, I am referring to a discretionary trust, and assume that the trust is not settlor-interested (or if it is, that s.624 does not apply). I do not consider the rules for trust expenses or the small relief for the first slice of trust income.

### 38.1.1 *Outline: 3 tiers*

In outline, there are three tiers of IT charges:

<b>Tier: My term</b>	<b>Paid by</b>	<b>When paid</b>
1: Trust charge	Trustees	On receipt of income
2: Trust withholding tax	Trustees	On discretionary income payment
3: Beneficiary charge	Beneficiary	On discretionary income payment

#### *Tier 1: Trust charge: on receipt of income*

At this tier it is necessary to distinguish resident/non-resident trustees:

- (a) UK resident trustees are charged on all their income
- (b) Non-resident trustees are charged on UK source income only

#### *Tier 2: Trust withholding tax: on making discretionary income payment*

At this tier it is also necessary to distinguish resident/non-resident trustees:

- (a) UK resident trustees pay trust withholding tax
- (b) Non-resident trustees do not pay this

#### *Tier 3: Beneficiary charge: on receiving discretionary income payment*

At this tier it is necessary to distinguish resident/non-resident beneficiaries:

- (a) UK resident beneficiaries: charge on all trust income
- (b) Non-resident beneficiaries: charge on UK source trust income (ie

from UK resident trusts) only

Trustees may consider creating an interest in possession to avoid these rules, and move to the simpler system under which there is a single tax charge. (This move generally has no IHT consequences.)

### 38.1.2 *Trust tax-credit systems*

The 3 tiers of taxation would generally result in triple taxation, but two distinct tax credits generally avoid this:

- (1) Tax paid at tier 1 enters a “tax pool” and is allowed as a credit against withholding tax at tier 2. If the tax pool is large enough, no WHT is paid at tier 2. I refer to this as “**trust tax-pool credit**”.
- (2) Withholding tax at tier 2 is allowed as a credit for tax at tier 3. So for a UK trust (subject to WHT at tier 2) no additional tax is paid at tier 3. On the contrary, beneficiaries who are not top rate taxpayers, or who are entitled to some relief, may reclaim tax. I refer to this as “**beneficiary WHT (withholding tax) credit**”.

I refer to this together as the “**trust tax-credit systems**”.

In a purely domestic situation (UK trust, UK beneficiaries, UK source income) the trust tax credit systems work, so there is effectively a single tax charge and not a double or triple tax charge.<sup>1</sup>

Where there is a foreign element (non-resident trust, non-resident beneficiary, or foreign source income) the trust tax credit-systems would not work, and so needs to be supplemented by further reliefs:

- (1) s.111 TIOPA (UK trust, foreign source income)
- (2) ESC B18

## 38.2 Tier 1: Trust charge on income receipt

The starting point is that trustees are persons, and so when trustees receive income they are subject to income tax under the usual charging provisions. There is no special charging provision for trusts. Accordingly:

- (1) UK trustees are subject to tax on all their income
- (2) Non-resident trustees are subject to tax on UK source income (except so far as non-resident IT relief is available)

---

<sup>1</sup> See 38.7 (Examples).

The trustees can qualify for the usual reliefs.

### 38.2.1 *Discretionary-trust IT rates*

There are special rules dealing with the rates of income tax. Section 479(1) ITA provides:

This section applies if—

- (a) accumulated or discretionary income arises to the trustees of a settlement, and
- (b) the income does not arise under a charitable trust.

The key term is “accumulated or discretionary income”. Section 480 ITA provides:

- (1) Income is accumulated or discretionary income so far as—
  - (a) it must be accumulated, or
  - (b) it is payable at the discretion of the trustees or any other person, and it is not excluded by subsection (3).
- (2) The cases covered by subsection (1)(b) include cases where the trustees have, or any other person has, any discretion over one or more of the following matters—
  - (a) whether, or the extent to which, the income is to be accumulated,
  - (b) the persons to whom the income is to be paid, and
  - (c) how much of the income is to be paid to any person.

This covers common form discretionary trusts. Assuming we have a trust in that form, we read on. Section 479 ITA provides:

- (2) Income tax is charged on the income at the rates referred to in this section instead of at the rates which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)).
- (3) Income tax is charged on the income at the dividend trust rate so far as the income is dividend income.
- (4) Otherwise, income tax is charged on the income at the trust rate.

The rates are the top income tax rates (the Blair/Brown administrations disapproved of trusts and subsequent administrations have not changed the policy). Section 9 ITA provides:

- (1) The trust rate is 45%.
- (2) The dividend trust rate is 38.1%.

### 38.2.2 *Settlor-interested trust*

Section 480 continues with 3 exceptions, of which only the first is relevant here.<sup>2</sup> Section 480(3) ITA provides:

- Income is excluded for the purposes of subsection (1) so far as—
- (a) before being distributed, it is the income of any person other than the trustees...

I would have thought that this applies to the income of settlor-interested trusts, so far as s.624 ITTOIA applies, but HMRC do not agree: see TSE Manual 3011 set out above, at para [b].

### 38.2.3 *Trust-rate income*

Section 481 ITA provides:

- (1) This section applies if—
  - (a) the trustees of a settlement are liable for income tax on an amount of a type set out in section 482,
  - (b) the trustees are not trustees of a unit trust scheme,<sup>3</sup> and
  - (c) the amount is not income arising under a charitable trust.
- (2) Income tax is charged on the amount at one of the rates referred to in this section instead of at the rate which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)). This is subject to subsection (5).
- (3) If the amount is within Type 1 or Type 12 as set out in section 482, [purchase of own shares/arrangements offering a choice of income or

- 
- 2 The other exceptions are of specialist interest. For completeness, s.480 continues:
    - (3) Income is excluded for the purposes of subsection (1) so far as ...
      - (b) it is income from property within subsection (4), or
      - (c) it is income from service charges which are paid in respect of dwellings in the UK and are held on trust.
    - (4) Property is within this subsection if it—
      - (a) is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies, but
      - (b) is not held as a member of a property investment LLP.
    - (5) In subsection (3)(c) “service charges” has the meaning given by section 18 of the Landlord and Tenant Act 1985 (but as if that section also applied in relation to dwellings in Scotland and Northern Ireland).
  - 3 Para (1) is otiose as unit trust trustees are not “trustees of a settlement”,

capital return] income tax is charged on the amount at the dividend trust rate.

(4) Otherwise, income tax is charged on the amount at the trust rate.

I refer to types of income within s.482 as “**trust-rate income**”.

This rule applies to all trusts, IIP as well as discretionary, but it is convenient to deal with it here.

Section 481 continues with 4 exceptions:

(5) Income tax is not to be charged as mentioned in subsection (2) so far as the amount—

(a) is accumulated or discretionary income,

(b) would be accumulated or discretionary income apart from section 480(3)(a) or (c), or

(c) is income from property within subsection (6).

(6) Property is within this subsection if it is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies.

#### 38.2.4 *Types of trust-rate income*

Section 482 ITA specifies 12 types of income, mostly fairly exotic categories, which constitute capital for trust purposes but income for tax purposes:

The types of amount referred to in section 481 are as follows.

##### *Type 1: Purchase of own shares*

A payment—

(a) which is made to the trustees or to which the trustees are entitled, and

(b) which is made by way of distribution by a company on the redemption, repayment or purchase of shares in the company or on the purchase of rights to acquire such shares.

##### *Type 2: Accrued income profits*

Accrued income profits treated as made by the trustees under section 628(5) or 630(2) [ITA].

##### *Type 3: Offshore income gains*

Income treated as arising to the trustees under regulation 17 of the Offshore Funds (Tax) Regulations 2009.

##### *Type 4: Employee share ownership trusts*

Income which the trustees are treated as receiving under section 68(2) or 71(4) of FA 1989 (which relate to employee share ownership trusts).

*Type 5: Lease premiums*

A sum to which Chapter 4 of Part 3 of ITTOIA 2005 (which provides for certain amounts to be treated as receipts of a property business) applies.

*Type 6: Deeply discounted securities*

A profit in relation to which the trustees are liable for income tax under section 429 of ITTOIA 2005 (profits from deeply discounted securities).

*Type 7: Life insurance gains*

A gain in relation to which the trustees are liable for income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc), other than a gain to which subsection (7) of that section applies.

*Type 8: Transactions in deposits*

A profit or gain in relation to which the trustees are liable for income tax under section 554 of ITTOIA 2005 (transactions in deposits).

*Type 9: Futures & options*

A profit or gain—

- (a) in relation to which the trustees are liable for income tax under section 557 of ITTOIA 2005 (disposals of futures and options), and
- (b) which does not meet any of conditions A to C in section 568 of ITTOIA 2005.

*Type 10: Foreign dividend coupons*

Proceeds in relation to which the trustees are liable for income tax under section 573 of ITTOIA 2005 (sales of foreign dividend coupons).

*Type 11: Transactions in land*

Income treated as arising to the trustees under Part 9A of this Act [ITA] (transactions in land).

*Type 12: Arrangements offering a choice of income or capital return*

Income treated as arising to the trustees under section 396A of ITTOIA 2005 (arrangements offering a choice of income or capital return).

### **38.3 Tier 3: Discretionary payment charge**

Beneficiaries income is categorised as Annual Payments, charged under

Chapter 7 Part 5 ITTOIA.<sup>4</sup> But although the charge is housed under Chapter 7, many of the rules which apply to Annual Payments are disapplied, or amended for trust income distributions, so this is more like a category of income in itself.

The income is not dividend income, so it does not qualify for the dividend nil rate.

### 38.3.1 *Discretionary trust: Source*

For source issues generally, see 15.3 (Approach to locating source) ff.

Where the trust is a common form discretionary trust, and a beneficiary receives trust income in the exercise of the trustees' discretion, the trust is the source (not the underlying trust assets):

A discretionary trust ... is not transparent. No beneficiary is entitled unless and until the trustees exercise their discretion in his or her favour, and the trustees' exercise of discretion is regarded as ... creating a new source of income...<sup>5</sup>

---

4 See 30.1 (Annual Payments: Introduction).

5 *Memec v IRC* 71 TC 77 (HC) at p.95. The same point was made in *IRC v Berrill* 55 TC 429 at p.444.

For completeness: Venables expressed a dissenting view in “*Memec and the Source of Discretionary Income Payments from Trusts*” PTPR (1999) Vol. 7 p.87 <http://www.khpplc.co.uk/reviews>; and Venables, *Non-Resident Trusts* (8<sup>th</sup> ed., 2000), para 16.3 (Taxation of Beneficiary):

“Where there are discretionary trusts of income ...and the trustees distribute income in the exercise of their discretion, the taxability of the recipient beneficiary is a matter of some controversy. My own opinion is that in exercising their discretion the trustees simply perfect the settlor's gift so that the position at the end of the day is the same as if the trust instrument had expressly provided that the beneficiary should receive the income. Thus, the income which the beneficiary receives is the same income as that which the trustees received, the beneficiary's source is the same as the trustees' source and any tax paid by the trustees is to be treated as having been paid on account of the beneficiary.”

Before 1973 this view might have been held. Venables cites *Drummond v Collins* 6 TC 525 though it seems to me that this point was not considered. But in *Cunard's Trustees v IRC* 27 T 122 at p.134 the payments are described as sch D case III. However that may be, the discretionary trust code introduced in FA 1973, now Chapter 7 Part 9 ITA, clearly assumes that a discretionary trust is a separate source, and so provides a statutory basis (if needed) to confirm the view that discretionary trusts are not transparent.

The beneficiary's income is categorised as Annual Payments (regardless of the type of income received by the trustees). HMRC agree. The TSE Manual provides:

**TSEM3756. Individual beneficiary receives discretionary income payment from a resident trust (not settlor-interested) [Mar 2017]**

In the case of trusts or settlements that are not settlor-interested a discretionary income payment is treated as an amount that is net of tax at the trust rate. The beneficiary's income is the net amount grossed at the trust rate. It carries tax credit at that rate. It is available for relief or repayment.

The gross amount is an annual payment. It is a new source of income, usually not identified with the underlying trust income. *Cunard's Trustees v IRC* (27 TC 122) supported the view that when the trustees exercised their discretion, a new source of income came into existence.

...

If a discretionary trust becomes interest in possession in form, the trustees' discretion over income comes to an end and the source has ceased.<sup>6</sup> But the cessation of a source is not now significant for tax purposes.

*Memec* also considers annuities:

Similarly, the rights of an annuitant under a trust are regarded as a source of income distinct from that of the underlying trust investments.<sup>7</sup>

But trust annuities are now rarely, if ever, found; so this is of academic interest only.

Where the trust is the source, how does one decide its location? There are (as usual) a variety of possible connecting factors, including: the residence of the trustees, the country in whose courts the trust will be enforced, the place where the discretion is exercised. It is suggested that trust residence is the deciding factor, and this is consistent with s.493(1)(b) ITA and s.899(5)(d) ITA.<sup>8</sup> HMRC agree. Normally all these

---

The argument was mentioned in the Court of Appeal in *Memec*, but not addressed: 77 TC at p.111.

6 *IRC v Berrill* at p.444.

7 See too *R v Special Comrs ex p. Shaftesbury Homes & Arethusa Training Ship* 8 TC 367; *Inchyra v Jennings* 42 TC 388.

8 See 30.10.2 (Annual Payments outside WHT).

factors will point the same way so the issue will not arise.

### 38.3.2 *Time income arises*

Is the relevant time:

- (1) the time of payment or
- (2) the earlier of:
  - (a) the time of payment or
  - (b) the time that the beneficiary is irrevocably entitled to payment<sup>9</sup>

Usually, I expect, there is no formal trustee resolution, and informal resolution/payment are at the same time. HMRC accept view (1) and there is a little authority for that.<sup>10</sup> It would be more in line with principle if the relevant time is the date of payment.<sup>11</sup> But the point will rarely if ever arise.

Solution (2) would govern the date that a benefit is received for s.731 purposes, and the date of a capital payment for s.87 purposes.

### 38.3.3 *Tax return: Trust income*

Discretionary trust income from non-resident trusts is entered in box 41 of the Foreign pages of the tax return, SA106 (2019/20): the side note to this box refers to “discretionary income from non-resident trusts”.

HMRC Helpsheet 262 (2020) provides:

---

9 If the trustees resolve to make a payment, that would be understood to be irrevocable (unless the resolution otherwise provides, which would not be usual).

10 TSEM provides:

**TSEM3759. Beneficiary receives discretionary income payment from a resident trust: when payment made** [Mar 2018]

For tax purposes the beneficiary receives a payment on

- [1] The date the trustees made the payment or
- [2] The date the beneficiary became legally entitled to require the trustees to pay over the income. This could be when the payment indefeasibly vested, following the trustees' resolution.

The Manual refers to *Cunard's Trustees v IRC* 27 TC 122 but this does not discuss the timing issue at all. The Manual view is perhaps supported by a comment in *Drummond v Collins* 8 TC 525 at 540 (“so soon as their discretion is exercised in favour of the [beneficiary], the resulting payment seems to me ... to be a payment of income to which the [beneficiary] is entitled...”) But again, the timing point was not an issue.

11 See 14.5.2 (Interest due, not paid).

If you've received a discretionary payment from the non-UK resident trust, enter all of the income in box 41 on page F6 of the 'Foreign' pages...<sup>12</sup>

For UK resident trusts, the income is entered in box 1 of the Trusts etc pages, SA107 (2019/20).

#### 38.3.4 *Scottish beneficiaries*

HMRC say:

46. Income flowing through [discretionary] trusts loses its character - in other words, irrespective of whether the income arising to the trust was savings or non-savings income all the income would be treated as non-savings income in the hands of the beneficiaries. Income payments from discretionary trusts will therefore be liable at the Scottish rate when paid to Scottish beneficiaries.<sup>13</sup>

47. In broad terms the trustees of non-resident discretionary trusts are only liable to income tax at the trust rate on the UK source income that they receive. They are not liable to UK income tax on foreign source income although they may be liable to tax on this income in the overseas jurisdiction. Discretionary income distributions from non-UK resident trusts are treated as untaxed income of the beneficiary irrespective of whether the trustees have suffered tax on the trust income. The beneficiary may if certain conditions are met claim credit for some of the tax paid by the trustees. Such income should be included by Scottish taxpayer beneficiaries as part of their total income in the normal way, and this would be liable at the Scottish rate of income tax. This would be consistent with the current tax treatment and simple (!) to administer.<sup>14</sup>

### 38.4 Beneficiaries tax credit

---

12 The helpsheet continues: "... unless the situation mentioned in the next paragraph applies." The next paragraph refers to the special rules for settlor-interested trusts; see 44.10.2 (Relief for non-settlor).

13 See 40.5.2 (Scottish rates).

14 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/395155/technote-scot-taxrate.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/395155/technote-scot-taxrate.pdf)

### 38.4.1 *UK resident trust*

The tax credit is in s.494 ITA, which is introduced by s.493 ITA:

- (1) Sections 494 and 495 apply for income tax purposes if—
- (a) in a tax year the trustees of a settlement make an annual payment to a person ('the beneficiary') in the exercise of a discretion (whether exercisable by the trustees or any other person),
  - (b) the trustees are UK resident for the tax year, and
  - (c) condition A or condition B is met.

The usual case is condition A. Section 493(2) ITA provides:

Condition A is that what is paid to the beneficiary is, only because of the payment, income of the beneficiary for income tax or corporation tax purposes. 'Income' does not include employment income.

Condition B relates to payments to minor children of the settlor.<sup>15</sup>

Section 494 ITA provides the beneficiaries tax credit and grossing up. Grossing up comes first:

- (1) The discretionary payment is treated as if it were made after the deduction of a sum representing income tax at the trust rate on the grossed up amount of the discretionary payment.
- (2) The grossed up amount of the discretionary payment is the actual amount of the discretionary payment grossed up by reference to the trust rate.

Then the beneficiaries tax credit:

- (3) The person mentioned in subsection (4) is treated as having paid income tax of an amount equal to the sum deducted as mentioned in subsection (1).
- (4) That person is—
  - (a) if condition A in section 493 is met, the beneficiary, and
  - (b) if condition B in section 493 is met, the settlor.

### 38.4.2 *Non-resident trust*

---

<sup>15</sup> Section 494(3) ITA provides: "Condition B is that the payment is treated for income tax purposes as the income of a settlor under section 629 of ITTOIA 2005 (income paid to relevant children of settlor)." See 44.15 (Payment to settlor's child).

The beneficiary WHT credit (along with withholding tax at tier 2) only apply if the trustees are UK resident: s.493(1)(b) ITA.

EN ITA Change 89 provides:

This change makes it explicit that the Chapter dealing with the taxation of discretionary payments by trustees applies only to payments made and tax suffered while the trustees are UK resident.

... section 493 contains the condition that it only applies to UK resident trustees. It follows that where a payment is made by non-UK resident trustees:

- the payment does not carry any tax credit in the hands of the beneficiary; and
- the trustees are not liable for any tax in respect of the payment.

As a corollary to the provisions of section 687 of ICTA not applying to non-UK resident trustees, tax only enters the trustees' tax pool if it is tax suffered on income arising while the trustees are UK resident - see section 497.

This change does not affect the operation of ESC B18, which enables UK resident beneficiaries who receive discretionary payments to have a credit for the tax paid by non-UK resident trustees on UK source income.

### **38.5 Tier 2: Trust withholding tax**

Although a trust distribution is an Annual-Payment, the payment is taken out of the scope of Annual-Payment withholding tax.<sup>16</sup> Instead, s.496 ITA provides the trust withholding tax:

- (1) Income tax is charged for a tax year if—
  - (a) in the tax year the trustees of a settlement make payments as a result of which income tax is treated as having been paid under section 494,<sup>17</sup> and
  - (b) amount A is greater than amount B.
- (2) Amount A is the total amount of the income tax treated under section 494 as having been paid.
- (3) Amount B is the amount of the trustees' tax pool available for the tax year (see section 497).

---

<sup>16</sup> See 30.10.2 (Annual Payments outside WHT).

<sup>17</sup> ie under s.494(3): see 38.4 (Beneficiaries tax credit).

(4) The amount of the tax charged under this section is equal to the difference between amounts A and B.

(5) The trustees are liable for the tax.

I do not discuss the special case where the trust income is employment income or the trust is an EBT; s.496A, 496B ITA.

### **38.6 Trust tax-pool credit**

Section 497(1) ITA deals with the trust tax pool:

Take the following steps to calculate the amount of the trustees' tax pool available for a tax year ('the current tax year').

This is subject to subsections (2) and (3).

*Step 1* Take the amount of the trustees' tax pool available for the previous tax year and deduct from that amount (but not so that it goes below nil)—

- (a) the total amount of income tax treated under section 494 as having been paid as a result of payments made by the trustees in the previous tax year, and
- (b) the amount to which the trustees are entitled under section 496B [relief for payments by discretionary trust taxable as employment income] in respect of the previous tax year.

*Step 2* Add together all amounts of income tax for which the trustees are liable for the current tax year and which are of a type set out in section 498.

*Step 3* Add the sum calculated at Step 2 to the amount resulting from Step 1.

Section 498 ITA provides the list of types of income which qualify for the tax pool. It is (more or less) all the income tax paid by the trustees. In full detail:

(1) The types of amount referred to at Step 2 in section 497 are as follows.

*Type 1* The amount of any tax on income (other than income of a kind mentioned below in relation to Type 3A) charged at the dividend trust rate or at the trust rate...

*Type 4* The amount of any tax on income on which tax is charged as a result of section 491 [£1k discretionary trust allowance].

The remaining rules concern specialist topics:

*Type 3A* The amount of tax at the nominal rate<sup>18</sup> on any amount in respect of which—

- (a) the trustees are liable to income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc),
- (b) the trustees are liable to income tax at the trust rate by virtue of section 482 above, and
- (c) tax at the basic rate is treated as having been paid by virtue of section 530 of ITTOIA 2005 (life insurance).

*Type 5* The amount of tax on any income determined in accordance with section 26 of FA 2005 (special tax treatment for trusts for the benefit of vulnerable persons).

(3) In relation to Types 1 to 4, references to income do not include income the tax on which is reduced in accordance with section 26 of FA 2005.

### 38.6.1 *Immigrant/new trusts*

Section 497(2) ITA deal with the special cases of immigrant trusts and new trusts:

If the trustees were non-UK resident for the previous tax year, references in subsection (1) to the previous tax year are to be read as references to the last tax year prior to the current tax year for which the trustees were UK resident.

Section 497(3) ITA deal with the special cases of new trusts:

If—

- (a) the current tax year is the tax year during which the settlement is established, or
- (b) the trustees have been UK resident for no tax year prior to the current tax year,

ignore Steps 1 and 3 and, accordingly, the trustees' tax pool available for the current tax year is the sum calculated at Step 2.

### 38.6.2 *Pre-2008 transitional rule*

ITA 2007 sch 2 para 104 provides:

(1) Section 497 applies with the following modifications in relation to

---

18 Defined in s.498(2A): "In relation to Type 3A, the reference to the nominal rate is a reference to a rate equal to the difference between the trust rate and the basic rate."

the trustees of a settlement established prior to the tax year 2007–08 if the current tax year is the tax year 2007–08.

(2) It also so applies if—

- (a) the current tax year is a tax year subsequent to the tax year 2007–08, and
- (b) the trustees have been UK resident for no tax year prior to the current tax year or the last tax year prior to the current tax year for which they were UK resident is a tax year prior to the tax year 2007–08.

(3) It applies as if in subsection (1) for Step 1 there were substituted—  
‘Step 1

Take the amount of the trustees’ final section 687(3) tax pool and deduct from that amount (but not so that it goes below nil) the total of all tax (if any) treated under section 687(2)(a) of ICTA as being paid as a result of payments made by the trustees in the tax year 2006–07.

‘The amount of the trustees’ final section 687(3) tax pool’ is the total amount—

- (a) available to the trustees under section 687(3) of ICTA for setting against tax assessable on them under section 687(2)(b) of that Act for the tax year 2006–07, or
- (b) which would have been so available had tax been so assessable.’

(4) It applies as if subsections (2) and (3) were omitted.

## 38.7 Examples

### 38.7.1 UK trust, dividend income

Here is an example from Taxation Magazine.<sup>19</sup> Suppose a UK discretionary trust has dividend income of £9k in 2016/17. To simplify matters, assume there are no trust expenses.

<b>Tier 1: Tax on dividend income</b>	£1,000	7.50%	£75
	<u>£8,000</u>	38.10%	<u>£3,048</u>
Total	<u>£9,000</u>		<u>£3,123</u>

### **Tier 3: Tax paid by beneficiary**

Net payment to beneficiary:	£4,950
Gross up at trust rate 45%	£9,000

---

<sup>19</sup> 27 October 2016 (Mark Wallace).

Tax paid by beneficiary	£9,000	45%	£4,050
less beneficiary tax credit			<u>-£4,050</u>
Tax due			<u>£0</u>

**Tier 2: Trust withholding tax**

Amount A: Beneficiary tax credit	£4,050
Amount B: Tax pool	<u>-£3,123</u>
Tax charge	<u>£927</u>

**Total tax payable to HMRC**

On dividend	£3,123
On distribution	<u>£927</u>
Total	<u>£4,050</u>

## 38.7.2 TSE Manual example

The TSE Manual provides an example from 2010/11 (when dividends carried tax credits):

**TSEM3024 The tax pool - trustees calculate maximum discretionary payment [Mar 2018]**

In this example, in the tax year 2010-2011 a trustee of a discretionary trust receives a net dividend of £1,350 (tax credit £150). The trustee is chargeable at 42.5%, which is partly covered by the 10% non-payable tax credit.

**Description**

Dividend received	£1,350	
Plus non-payable tax credit	£150	
Gross income	<u>£1,500</u>	
Tax at 10% on first £1,000 (standard rate band)		£100
Tax at 42.5% on the remainder £500×42.5%		<u>£212.50</u>
Total tax		<u>£312.50</u>
Less non-payable tax credit		- £150
Tax payable by trustee - goes into tax pool		<u>£162.50</u>
Net income after tax		<u>£1187.50</u>

The trustee now has net income of £1,187.50 (net dividend of £1,350 less tax paid of £162.50). Only £162.50 of the total tax goes into the tax pool because the £150 dividend tax credit is not payable.

If the trustee pays the net income of £1,187.50 to the beneficiary, the tax

credit of 50% on that net payment is £1,187.50 (gross amount of £2,375 at 50%). But if the tax pool has nothing brought forward from the previous year and there is no other income on which tax has been paid, the tax pool of £162.50 will not cover the tax credit of £1,187.50 on the payment made. Under s.496 the trustee would have to pay £1,187.50 less £162.50 = £1,025, but there are no funds available.

Instead, the trustees can calculate the maximum amount of discretionary payment as follows:-

### Description

Net income after tax		£1,187.50
Add tax in tax pool		<u>£162.50</u>
Total amount to cover payment to beneficiary & tax credit @50%		<u><u>£1,350.00</u></u>
Tax credit at 50%	£ 675.00	£675.00
Less tax paid in tax pool		<u>£162.50</u>
Additional tax to be paid by trustee		<u><u>£512.50</u></u>
Net payment to beneficiary	£ 675.00	

The beneficiary is paid net income of £675 with a tax credit of £675, which is equivalent to gross income of £1,350 with tax credit at 50%. The trustee pays a total of £675 tax to HMRC, £162.50 tax on the dividend received and the additional £512.50 under S496. So if the trustee is relying on the dividend income to fund both the payment to the beneficiary and the additional tax there are sufficient funds to release only 50% of the actual dividend, that is  $£1,350 \times 50\% = £675$ .

HMRC offer an online tax pool calculator to do the computations, in simple cases.<sup>20</sup>

## 38.8 Trust payment: Income/capital

*“Income tax is a tax on income.”* This slogan is less true now than when it was formulated in 1900;<sup>21</sup> but the question whether a trust distribution is an Annual Payment (ie, income) or not (ie, capital) continues to matter:

- (1) The IT charge on a beneficiary receiving the distribution (tier 3) applies if the distribution is income.
- (2) Trust withholding tax (tier 2) applies if the distribution is income.

<sup>20</sup> <http://www.hmrc.gov.uk/tools/trusts/calculator.htm>

<sup>21</sup> See 15.6 (No source/deemed source).

(3) Section 87 and s.731 apply if the distribution is capital.<sup>22</sup>

The position depends on the terms of the power under which the payment is made.

### 38.8.1 *Power over income*

A common form discretionary trust<sup>23</sup> provides this type of power over trust income:

The Trustees may pay or apply the trust income to or for the benefit of any Beneficiaries, as the Trustees think fit.

If trustees receive income and make a payment under such a power, the receipt is income and not capital. This has never been doubted.

### 38.8.2 *Power over capital*

A common form discretionary trust also provides this type of power over trust capital:

The Trustees may pay or apply the capital of the Trust Fund to or for the advancement or benefit of any Beneficiary.

If trustees make a payment under such a power the receipt is capital and not income. This is the case even if:

- (1) the payments satisfy an “income purpose”, eg maintenance of a beneficiary; and
- (2) the payments are recurrent (eg annual or even monthly).

This follows from *Stevenson v Wishart*.<sup>24</sup>

### 38.8.3 *Accumulated income paid as capital*

Suppose:

---

22 See 47.16 (s.731 capital condition); 57.7.4 (Chargeable to IT).

23 For discussion of the drafting, see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), Chap 15 (Discretionary Trust).

24 59 TC 740. The judgment of Knox J is clearer on this point than the Court of Appeal; this view is adopted in *Pierce v Wood* [2010] WTLR 253 at [29] “An appointment or advance of trust capital, in exercise of a power over capital, even if it were to meet an income need of the beneficiary, is normally a capital receipt in the beneficiary’s hands.”

- (1) trustees accumulate income and add it to capital; and
- (2) the trustees pay that capital to a beneficiary in exercise of a power like that in para 38.8.2 (Power over capital).

The receipt is still capital and not income. This follows from *Stevenson v Wishart*. In that case the distributions which HMRC sought to tax as income represented original trust capital and not accumulated income. It is considered that this makes no difference. *Stevenson v Wishart* is authority for the proposition that the income/capital question is governed by the terms of the power concerned.<sup>25</sup>

It might be different in an extreme case, where for tax planning reasons there was an arrangement under which:

- (1) income was accumulated;
- (2) the trustees pay that capital to a beneficiary (by exercise of a common form power of advancement or appointment) shortly afterwards.

HMRC would have an attractive argument that the receipt should be regarded as income under general principles (or perhaps under the GAAR but it would not be necessary to rely on that).

In practice it should be possible to avoid this by ensuring that advances of capital are not neatly identifiable with accumulated income.

#### 38.8.4 *HMRC view*

HMRC agree with the views set out above. The TSE Manual provides:

**TSEM3781 - Trust income and gains: beneficiaries: payment from trust capital - normally capital in beneficiary's hands [Nov 2018]**

A payment made out of trust capital including

- accumulated income
  - a capital receipt that is deemed to be income for tax purposes
- is normally regarded as capital of the beneficiary and so is not taxable. This view was supported in the case of *Stevenson v Wishart* (59 TC 740).

Where

- there is no pre-existing interest in income, or
- the payment is made under an interest in capital that is separate from

---

<sup>25</sup> Provisions such as ss.631(1)(2) and 633 ITTOIA assume this is correct (deeming payments out of accumulated income to be treated as income).

an interest in income payments out of trust capital constitute capital in the hands of the recipient.

Examples that illustrate the normal rule are:

- Anthony has no interest in income at all. But the trustees may advance capital to or for him at their discretion. Payments are capital and not taxable on him.
- Barbara has a discretionary interest in income. The trustees may also advance capital to or for her at their discretion. Payments are capital and not taxable on her.
- Carina has an annuity of £10,000 and in addition, the trustees have the power to apply capital at their discretion for her benefit. Payments are capital and not taxable on her.

The Manual notes three exceptional cases:

**TSEM3783 - Trust income and gains: beneficiaries: payment from trust capital - exceptions to normal rule** [Nov 2018]

There are certain circumstances in which payments from trust capital are treated as income of the beneficiary. They are:

- [1] express gift of an annuity (TSEM3784)
- [2] payments to supplement or augment an income interest (TSEM3785)
- [3] compensation for loss of income (where beneficiary entitled to compensation) (TSEM3786)

Exceptions [1] and [3] are of specialist interest and not considered here.

The Manual explains the second exception in this way:

**TSEM3785 payment to supplement or augment income** [Jul 2020]

The cases of *Cunard's Trustees v IRC* (27 TC 122) and *Brodie v IRC* (17 TC 432) established that where there is a pre-existing income interest (whether in the form of an annuity or interest in possession) payments out of trust capital to supplement or augment income constitute income in the hands of the recipient.

Where the beneficiary has a pre-existing annual income entitlement, and the trustees can or have to supplement or augment the trust income out of capital:

- if they can use capital in this way, i.e. it is discretionary, ITA/S494 will apply
- if they have to use capital in this way, the annual payments treatment will apply.

**Example:***Dilwar*

D lives rent-free in trust property. The deed provides for income to be used to pay rates and other property expenses, while the rest of income is to be used for his benefit. If the income is insufficient, the trustees are empowered to use capital at discretion to keep the beneficiary at same level of comfort as in the past. D has a pre-existing income entitlement, so the payment from capital is treated as income in his hands. ITA/S494 applies to the capital payments.

*Elena*

E has an annuity of £10,000 a year. If the trust income is less than £10,000, the trustees have to make up the shortfall from trust capital. E has a pre-existing income entitlement, so the payment from capital is treated as income in her hands. The whole £10,000 is taxable as income and the annual payments treatment applies.

In practice UK trusts today do not use wording of the kind considered in these examples, though the issue might arise for foreign trusts.

### 38.8.5 *Accumulated income paid as income*

The Manual considers the special case of a payment of trust capital under s.31(2) Trustee Act 1925. In order to follow this, it is necessary to set out the terms of s.31. The section is intricate, and I set out the relevant parts as they normally apply:

(1) Where any property is held by trustees in trust for any person for any interest whatsoever... then...

(i) during the infancy of any such person, ... the trustees may... apply for or towards his maintenance, education, or benefit, the whole or such part, if any, of the income of that property as the trustees may think fit ...

(2) During the infancy of any such person... the trustees shall accumulate all the residue of that income ... and shall hold those accumulations as follows ...

(ii) In any other case the trustees shall ... hold the accumulations as an accretion to the capital of the property from which such accumulations arose, and as one fund with such capital for all purposes, ...

[iii] but the trustees may, at any time during the infancy of such person ... apply those accumulations, or any part thereof, as if

they were income arising in the then current year.<sup>26</sup>

The Manual argues that a payment under s.31(2)[iii] is a capital receipt:

**TSEM3782 payment from trust capital - normally capital in beneficiary's hands - S31 Trustee Act 1925 [Nov 2018]**

The concluding words of Section 31(2) Trustee Act 1925 allow the trustees to apply accumulations 'as if they were income arising'.

These words do not have the effect of de-capitalising the accumulations concerned. Once accumulated income is forever capitalised. Where such accumulations have been released the money must therefore have been received by the beneficiary as capital. The phrase 'as if they were income arising in the then current year' should be regarded as simply meaning that the trustees are bound by the proviso to Section 31(1), just in the same way as they would be if they were deciding whether or not to release current income to or for the benefit of the minor.

When paid by virtue of this provision the payment is capital in the beneficiary's hands, so it would not fall within ITA/Ss493-494, i.e. there is no tax credit to the beneficiary. Such a payment may be subject to the application of ITTOIA/S629 to charge the amount as income of the settlor - see TSEM4300+.

The payment of a sum under s.31(2) TA 1925 seems to me a clear case of an income receipt, under the principle of *Cunard's Trustees* to which HMRC refer in the Manual passage set out above. HMRC are correct to say that the accumulated income is capitalised, ie it becomes and remains capital in the hands of the trustees. But that does not answer the question as it is clear that a payment out of trust capital may still constitute income in the hands of the beneficiaries. The important point is that the terms of the relevant provision of the settlement link the payment with an income interest of a beneficiary.<sup>27</sup>

I have wondered if it might perhaps be clearer if the trust accounts recorded an "Accumulated Income Fund" (instead of recording accumulated income as increasing the capital fund). However, the accounting treatment should make no difference.

---

26 The provision has been amended by the Inheritance and Trustees' Powers Act 2014 but the amendments make no difference to the capital/income issue discussed here.

27 See the comment of Knox J in *Stevenson v Wishart* 59 TC 740 at p.757D.

The view that the receipt is a capital receipt will more often favour HMRC, but sometimes it will favour the taxpayer. The taxpayer cannot be criticised for adopting HMRC's official view when it suits them.

It has been said that two Special Commissioner decisions from the 1970s have held that the exercise of the s.31(2) power did not have the effect of making the payments income in the hands of the beneficiary.<sup>28</sup> But unreported Special Commissioner decisions cannot be cited as precedents.<sup>29</sup>

A common form discretionary trust generally has express powers similar to s.31. This allows trustees to accumulate income, adding it to trust capital, and typically gives the trustees power "to apply the accumulations as if they were income arising in the then current year". If trustees make a payment out of trust capital under such a power it is considered that the receipt is an income receipt of the beneficiary.

### **38.9 Discretionary trust transparency reliefs**

In some cases discretionary trusts are treated as transparent in order to confer some relief.

#### **38.9.1 UK trust, foreign income: s.111 relief**

Where UK trustees receive foreign income, subject to foreign tax, they will in principle qualify for foreign tax credit relief. That reduces the UK tax that they pay at tier 1, but it also reduces the tax pool, and so reduces the tax pool credit available for trust withholding tax, tier 2. The trust tax-credit systems would not work, and the benefit of the foreign tax credit relief would effectively be lost.

Section 111 TIOPA deals with this:

- (1) Subsection (6) applies if each of conditions A to D is met.
- (2) Condition A is that a payment is made by trustees of a settlement.
- (3) Condition B is that income tax is treated under section 494 of ITA 2007 (treatment of discretionary payments by trustees) as having been

---

28 Sheasby, "Accumulations of Income" [2000] TACT Review issue 11  
<http://www.tact.uk.net/review-index/accumulations-of-income/>

29 See *Ardmore v HMRC*[2014] UKFTT 453 (TC), [2014] SFTD 1077, at [9] - [23].  
 The point was not discussed on the appeal.

paid in relation to the payment.

The reference to s.494 restricts s.111 relief to UK resident trusts.<sup>30</sup>

(4) Condition C is that the income arising under the settlement includes taxed overseas income.<sup>31</sup>

(5) Condition D is that the trustees certify—

- (a) that the payment is one made out of income consisting of, or including, taxed overseas income of an amount, and from a source, stated in the certificate, and
- (b) that the amount of taxed overseas income arose to the trustees not earlier than 6 years before the end of the tax year in which the payment is made.

Where these conditions are satisfied, s.111(6) TIOPA provides the relief:

The person to whom the payment is made may claim that the payment, up to the certified amount, is to be treated for the purposes of this Part [Part 2 TIOPA, double taxation relief] as income received by the person—

- (a) from the certified source, and
- (b) in the tax year in which the payment is made.

The beneficiary's income is deemed to come from the foreign source, and so the beneficiary enjoys the benefit of the DT relief. The trust is treated as transparent in the sense that the source of the beneficiary's income is the underlying asset and not the trust.

The deeming only applies for the purposes of DT relief. For instance, the beneficiary's income does not qualify for the remittance basis, because it is UK source income and the s.111 deeming does not alter that.

The TSE Manual discusses when a payment is made out of taxed overseas income:

**TSEM3675. Relief for overseas tax: expenses of discretionary trust**  
[Mar 2018]

If trustees are claiming relief for overseas tax they will usually regard expenses as paid out of UK income. This means they can certify the overseas income to the beneficiaries [what is now s.111 TIOPA].

---

30 See 38.4 (Beneficiaries tax credit).

31 This term is defined in s.111(7) TIOPA: "In this section "taxed overseas income", in relation to a settlement, means income in respect of which the trustees are entitled to credit under this Part for tax under the law of a territory outside the UK."

They may sometimes regard expenses as paid from overseas income. This could be because there is not sufficient UK income to cover the expenses. Or maybe certification is not advantageous to the beneficiary. Trustees cannot certify, under [s.111 TIOPA], the overseas income they set against the expenses.

**TSEM3680. Trustee's certificate of overseas taxed income** [Mar 2018]

...

**Limits of the amounts certified**

The trustees must ensure that:

- the amounts they certify do not exceed the gross equivalent of the payments they made
- the gross amounts they certify do not exceed, in the aggregate, the gross income they received.

Trustees can accumulate, for future certification, overseas income that they have not paid out. Income ceases to be available for certification six years after the start of the tax year in which it arose.

**TSEM3685. Relief for overseas tax: mixed trust** [Mar 2018]

A mixed trust has both a discretionary interest and an interest in possession.

The trustees may claim double taxation relief in respect of overseas tax that qualifies for relief. The instructions at TSEM3655 apply to income that the beneficiary is entitled to receive. The instructions at TSEM3670 apply to the balance of the income.

### 38.9.2 *ESC B18: UK trust*

ESC B18 provides:

**UK resident trusts**

A beneficiary may receive from trustees a payment to which [s.494(1) ITA] applies.<sup>32</sup> Where that payment is made out of the income of the trustees in respect of which, had it been received directly, the beneficiary would—

- [1] have been entitled to exemption in respect of FOTRA securities issued in accordance with [s.714 ITTOIA]; or
- [2] have been entitled to relief under the terms of a double taxation agreement; or

---

32 The reference to s.494 restricts this relief to UK resident trusts. See 38.4 (Beneficiaries tax credit).

[3] not have been chargeable to UK tax because of their [ie the beneficiary's] not resident [and/or not ordinarily resident<sup>33</sup>] status the beneficiary may claim that exemption or relief or, where the beneficiary would not have been chargeable, repayment of the tax treated as deducted from the payment (or an appropriate proportion of it).

For this purpose, the payment will be treated as having been made rateably out of all sources of income arising to the trustees on a last in first out basis.

There are three reliefs (or sets of reliefs) here:

- (1) Relief for interest on FOTRA securities (beneficiary non-resident)
- (2) DT relief (beneficiary treaty-resident outside the UK)<sup>34</sup>
- (3) Other exemptions for non-residents<sup>35</sup>

ESC B18 goes on to specify the conditions for the relief:

Relief or exemption, as appropriate, will be granted to the extent that the payment is out of income which arose to the trustees not earlier than six years before the end of the year of assessment in which the payment was made, provided the trustees—

[1] have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required, and

[2] have paid all tax due, and any interest, surcharges and penalties arising; and

[3] keep available for inspection any relevant tax certificates.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.<sup>36</sup>

The INT Manual expands on B18 and provides a worked example. The Manual is not up to date, for example in the tax rates; I omit text referring to the position before 2004.

---

33 Author's footnote: Ordinary residence is not relevant from 2013.

34 But s.111 TIOPA covers this.

35 See 42.1 (Non-Residents Income Tax Relief).

36 Author's footnote: This time limit is out of line with the standard claim time limit, now 4 years, but it does not matter.

**INTM367790. What methods of relief are available on discretionary payments from UK resident trustees** [Dec 2019]

The way in which relief is calculated will depend on the terms of the treaty under which relief is claimed.

- Under an “other income” article which does not exclude payments from trusts, relief is given in full.<sup>37</sup> ...
- Where there is no other income article or the article excludes trust income, relief is given by “looking through” to the underlying sources of the income. The way in which we “look through” is determined by ESC B18
- Because payments are made at the discretion of trustees, it is not possible to allow relief at source to a beneficiary of a discretionary trust.

...

**INTM367820. Extra Statutory Concession B18** [Dec 2019]

Under ESC/B18, income underlying a discretionary payment is treated as arising from the sources of income received by the trustees in the tax year that the payment is made. Income is considered as arising rateably from the sources of income. By rateably we mean the beneficiary’s payment contains the same proportion of each strand of income as the total received by the trustees.

If there is not enough income arising in the year the payment is made to fund all of the payments made by the trustees (that is, if the trustees are drawing on accumulations – that is, income received by trustees in excess of payments out of trust income – made in previous years) we need to apply the proportions of trustees’ income from the year(s) in which the accumulations were made. This is known as “spreading back” (see INTM367910).

**INTM367830. ESC/B18 and dividends taxed at the dividend trust rate** [Dec 2019]

When the Schedule F trust rate (now the dividend trust rate) was introduced in 1999/2000 at 25%, the wording of ESC/B18 was revised to exclude the element of tax credit included in that tax. For example, where trustees receive a dividend of £90, with a tax credit of £10, their liability is £15 (that is, £25 less £10 tax credit). However, when applying a beneficiary’s share of dividends to a dividend article of a treaty, the tax credit is excluded from the calculation. Therefore for the purposes of ESC/B18, the ‘gross’ to which the restriction in the dividend article is applied is £90, the tax £15, and the net £75.

This is superseded now by the 2016 dividend tax reforms, which abolished the tax credit for UK residents.

A dividend article with a 15% restriction would apply to the dividend element underlying a beneficiary’s distribution as follows:

- Restriction:  $£90 \times 15\% = £13.50$
- Tax £15 less restriction  $£13.50 = £1.50$

**367840. ESC/B18 and trustees’ tax returns** [Dec 2019]

---

37 See 38.12.1 (Other Income article).

It is a condition of ESC/B18 that in order to allow a beneficiary's claim to repayment, the trustees must have made their tax return for the year of the distribution, and paid over any tax due to HMRC.

It is therefore possible that a beneficiary's claim form can be received before the conditions of ESC/B18 are satisfied.

**INTM367850. ESC/B18 and Self Assessment** [Dec 2019]

As the conditions for relief under ESC/B18 include actions by trustees, we do not consider a claim as being valid until these actions have been carried out. We cannot accept that the beneficiary has made a valid claim until the trustees have met the conditions set out in ESC/B18.

In practical terms this means that a beneficiary's claim is not valid until the trustees have sent in their tax return for the year in which the distribution was made and paid any tax due.

**INTM367860. Dealing with claims by non-resident beneficiaries of UK discretionary trusts under ESC/B18** [Dec 2019]

***How to identify a repayment claim***

The claim will usually be supported by a tax certificate on form R185, or an equivalent certificate prepared by the payer, showing tax deducted from the payment at 40%...

If the tax certificate is missing, the schedule will show that tax on the income is at 40% ...

Exceptionally, you may receive a claim on a payment from a UK discretionary trust where tax is not shown as having been paid at the Rate Applicable to Trusts (see INTM367950).

***Procedure***

You will need to request the trust file (the UTR for this should be quoted on the tax certificate) together with the trustees' tax return for the year of the distribution and all earlier years in date for time limit purposes during the year of distribution (you will need these if a 'spreadback' calculation is necessary). You will need to advise the claimant or their agent that you have requested information from the trust's tax office to enable you to deal with the claim.

**INTM367870. Calculating relief due under ESC/B18** [Dec 2019]

When the trust file is received the information concerning trust income and distributions provided by the trustees in their returns is extracted and used to calculate the relief due to the beneficiary.

Due to the complexity of the calculations, a computer program is used to apportion the trust income to the beneficiary's share.

If necessary a calculation can be made manually (INTM367890).

**INTM367880. How to manually calculate relief due under ESC/B18** [Dec 2019]

Although the apportionment of the income will normally be performed using a computer program, if necessary the calculation can be performed manually, as follows:

1. Deduct any expenses and other obligations, for example Trust Management Expenses (see INTM367920) and annuities (see INTM367770), from the income

received by the trustees.

2. For each income source (after deductions at 1 above) calculate the net amount available for distribution, that is the amount after deduction of tax at the rate applicable to trusts or the dividend trust rate as appropriate.

3. Calculate the total net distribution made to the discretionary beneficiaries.

4. Check that the total net distribution made to the discretionary beneficiaries is less than (or equal to) the total net available for distribution. If it is greater than the total net available for distribution, you will need to apply a 'spreadback' calculation (see INTM367910).

5. Allocate the net amount of each source of income arising to the trustees to the beneficiary's net distribution, by the following formula (each source of income must be treated separately because of the different tax rates to which the trust income is subjected):

$(a \div b) \times c = \text{beneficiary's share of income source, where}$

- a = net income from source
  - b = total income available to distribute
  - c = beneficiary's net distribution
6. Calculate the beneficiary's gross share of each income source by reference to ESC/B18. For UK dividends the calculation for 2004–05 onwards is
- $(a \div 67.5) \times 90 = \text{beneficiary's gross share of dividends for the purposes of ESC/B18, where}$
- a = beneficiary's share of dividends

...

For other income (including foreign dividends) the calculation for 2004–05 onwards is

$(a \div 60) \times 100 = \text{beneficiary's gross share of dividends for the purposes of ESC/B18, where}$

- a = beneficiary's share of income

...

7. Calculate the tax applying to each income source under ESC/B18 by deducting the net (calculated at 4) from the gross (calculated at 5).

8. Calculate the repayment due by reference to the relevant treaty articles, and/or UK legislation allowing relief to non-residents. Where repayment is restricted under a double taxation agreement, calculate the amount to restrict as a percentage of the ESC/B18 gross (calculated at 5) and deduct it from the tax (calculated at 6).

#### **INTM367890. Non-resident beneficiaries of UK trusts [Dec 2019]**

##### ***Example of a manual calculation under ESC/B18***

In the tax year 2004–2005 a trust had income from the sources shown below (gross except for dividends paid). The trustees made net distributions of £1000 each to one beneficiary in Canada (who has made a claim to us) and to one beneficiary in the UK.

[Trust income is:]

- |                     |       |
|---------------------|-------|
| • UK dividends paid | £1292 |
| • UK interest       | £1000 |

- Rents £500
- Foreign dividends £880
- Foreign interest £1000

Trustees net management expenses were £500

First, deduct trust management expenses from dividends: 1292 less 500 = 792

Then calculate income available for distribution:

Dividends	792
plus (tax credit at one ninth of the dividend)	88
less (dividend trust rate 25%)	<u>-220</u>
	<u>660</u>
Interest	1000
less (tax at rate applicable to trusts 34%)	<u>-340</u>
	<u>660</u>
Rents	500
less (tax at rate applicable to trusts 34%)	<u>-170</u>
	<u>330</u>
Foreign dividends	880
less (tax at dividend trust rate 25%)	<u>-220</u>
	<u>660</u>
Foreign interest	1000
less (tax at rate applicable to trusts 34%)	<u>-340</u>
	<u>660</u>

Total available for distribution: 2970

Distribution:  $(2 \times 1000) = 2000$ ; this is less than the total available for distribution, so no spreadback required

Allocation to beneficiary:

Dividends:	$(660 \div 2970) \times 1000 = 222.22$
Interest:	$(660 \div 2970) \times 1000 = 222.22$
Rents:	$(330 \div 2970) \times 1000 = 111.11$
Foreign dividends:	$(660 \div 2970) \times 1000 = 222.22$
Foreign interest:	$(660 \div 2970) \times 1000 = 222.22$

Grossing up and deducting net to find tax attributable under ESC/B18:

Dividends:	$(222.22 \div 75) \times 90 = 266.66 - 222.22 = \text{tax } 44.44$
Interest:	$(222.22 \div 66) \times 100 = 336.70 - 222.22 = \text{tax } 114.48$

Rents: (there is actually no need to calculate this, as there is no relief, but the calculation would be as follows)

$$(111.11 \div 66) \times 100 = 168.35 - 111.11 = \text{tax } 57.24$$

Foreign dividends:	$(222.22 \div 66) \times 100 = 336.70 - 222.22 = \text{tax } 114.48$
Foreign interest:	$(222.22 \div 66) \times 100 = 336.70 - 222.22 = \text{tax } 114.48$

**Calculating the repayment due**

In this example the claimant is claiming under the Double Taxation Convention with Canada on dividends and interest, and under UK legislation applying to non-residents on foreign income. Under the treaty there is a 15% restriction on dividends and a 10% restriction on interest.

Dividends: Gross	$266.64 \times 15\% = 40$	restriction	Tax	44.44 less 40 =	4.44
Interest: Gross	$336.70 \times 10\% = 33.67$	restriction	Tax	114.48 less 33.67 =	81.21
Foreign dividends: Gross	336.70		Tax		114.48
Foreign interest: Gross	336.70		Tax		<u>114.48</u>
Total repayment					<u><u>314.61</u></u>

This content has been withheld because of exemptions in the Freedom of Information Act 2000.

**INTM367900. Notes on types of underlying income in a discretionary trust**  
[Dec 2019]

- UK dividends: includes stock dividends.
- UK interest
- Dividends and interest are the most common types of income that you will see in discretionary trusts. With the exception of UK dividends, all of the tax associated with a particular source is considered for the purposes of ESC/B18 to be tax on that source. You may also see:
- Foreign income: relief is given under domestic legislation. Although foreign dividends are taxed in the hands of the trustees at the dividend trust rate of 32.5% ... , the beneficiary is treated as having been taxed at 40% ...
- Rental income: there are no double taxation agreements that allow relief to individuals on rental income. No repayment is due on any part of the tax applicable to rental income.
- Accrued income: income returned under the 'accrued income' scheme cannot be relieved under double taxation agreements.
- Royalties: these are unusual in discretionary trusts. Relief is given at the appropriate agreement rate.
- FOTRA securities: you may be considering relief under an agreement which has an interest article that restricts relief. However, income shown on the trust return as interest may be derived from FOTRA securities on which full relief is available to non-residents. As there is no indication in the trust return that income is derived from FOTRA securities, you will not usually be able to consider repayment on this as a separate source from interest. However, if there is any indication of the amount of FOTRA securities in the papers submitted with the return, or in figures originating from the trustees and provided by the claimant or their agent, you should use these to allow relief on the FOTRA securities.

### 38.9.3 *Carry back (spreadback)*

The INT Manual continues:

**INTM367910. What happens if the total net distributed in a year exceeds the total net available for distribution ('overdistribution') [Dec 2019]**

If the trustees have distributed more money in one year than is available to distribute from the income received in that year, you will need to analyse the balance from undistributed income arising in earlier years.

This is known as a 'spreadback' calculation. The income arising in earlier years can be analysed using the trust report program.

When spreading back we start with the most recent year in which income has been accumulated. If the trustees have over-distributed in earlier years we may have already made a spreadback calculation and used income accumulated in an earlier year. It is important that we do not use that accumulation again in the current spreadback. You cannot go back more than six years before the year in which the distribution was made. So if the trustees have made an excess distribution in 2003/04 you can only go back to 1998/99. But you only go back to accumulations made in that year if you have used up all the income accumulated in 2002/03, then 2001/02 and so on. The residence position of the beneficiary in the year(s) that the income was accumulated is not relevant.

#### 38.9.4 Confidentiality

The INT Manual provides:

**INTM367630. Claims by non-resident beneficiaries of non-resident discretionary trusts [Dec 2019]**

...

*Confidentiality when advising a beneficiary or agent about a payment*

A beneficiary of a discretionary trust has no rights against the income of the trust. Trustees may favour one potential beneficiary rather than another. Therefore, to provide information to a beneficiary about the income of a trust that you have used to calculate relief due under ESC/B18 will infringe the confidentiality of the trustees.

Because of this we cannot provide a breakdown of the underlying income comprising the repayment. The claimant (and their agent) only has a right to the final figure of the repayment we have calculated. However, if the beneficiary obtains the written permission of a trustee we can release information concerning the underlying trust income.

Sometimes a trustee will act as the nominated agent of the beneficiary. In that case you can release details of the computation to the trustee without seeking further written permission. If you are providing this information, you will need to show a full calculation. If the original apportionment of income was calculated using the computer program, you will need to make a full manual calculation (see INTM367890).

It is a strange state of affairs where a taxpayer is not entitled to know how their tax is computed, or whether it is correctly computed, and it is considered that HMRC could properly disclose the information.<sup>38</sup> No doubt a tribunal would order disclosure in an appropriate case.

### 38.9.5 Tax return: ESC B18 claim

HMRC say:

It is a stand-alone claim and does not affect how the beneficiary completes his or her Self Assessment tax return.<sup>39</sup>

I think the point is that there is no box in the tax return for the figures to be entered.

## 38.10 ESC B18: Non-resident trust

Where a non-resident trust has UK source income, and makes a payment to a *UK* beneficiary, then:

- (1) The foreign trustees are subject to UK tax on their income.
- (2) They are not subject to trust withholding tax (tier 2) on making a distribution.
- (3) The UK beneficiary is subject to tax on the distribution, but does not receive the beneficiary WHT credit.

The trust tax-credit systems do not operate, and there would effectively be double taxation.

Where a non-resident trust has UK source income, and makes a payment to a *foreign* beneficiary, then:

- (1) The foreign trustees are subject to UK tax on their income.
- (2) They are not subject to trust withholding tax (tier 2) on making a distribution
- (3) The foreign beneficiary is not subject to tax on the distribution

The trust tax-credit systems do not operate. If the foreign beneficiary would have been entitled to some relief on the trust income, had it been received directly, the benefit of that relief is lost.

ESC B18 deals with these two problems. It provides:

---

<sup>38</sup> See 48.2.3 (Taxpayer confidentiality).

<sup>39</sup> “HMRC Residency: Non-resident trusts” <https://www.gov.uk/non-resident-trusts>

**Non-resident trusts**

A similar concession will operate where a beneficiary receives a payment from discretionary trustees which is not within [what is now s.494(1) ITA, trust withholding tax] (ie where non-resident trustees exercise their discretion outside the UK).

[1] Where a non-resident beneficiary receives such a payment out of income of the trustees in respect of which, had it been received directly, it would have been chargeable to UK tax, then the beneficiary—

- [a] may claim relief under [now s.56 ITA] (personal reliefs for certain non-residents); and
- [b] may be treated as receiving that payment from a UK resident trust but claim credit only for UK tax actually paid by the trustees on income out of which the payment is made.
- [c] The beneficiary may also claim exemption from tax in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA] to the extent that the payment is regarded as including interest from such securities.<sup>40</sup>

[2] A UK beneficiary of a non-resident trust may claim appropriate credit for tax actually paid by the trustees on the income out of which the payment is made as if the payments out of UK income were from a UK resident trust and within [s.494(1) ITA] .

There are three distinct sets of reliefs here:

- (1) Personal reliefs for non-resident beneficiaries
- (2) Credit for tax paid by the trust as if the trust were UK resident
- (3) Relief for interest on FOTRA securities: I suspect that this is in practice academic, though strictly it applies if:
  - (a) the trust receives income from FOTRA securities;
  - (b) the trustees are outside the FOTRA exemption for trustees;<sup>41</sup>
  - (c) the income is paid to a beneficiary who is not UK resident and so is within the FOTRA exemption; and
  - (d) the trust complies with UK tax requirements

ESC B18 goes on to specify the conditions for the relief, which are similar to the conditions for UK resident trusts:

---

40 Para (c) assumes that FOTRA interest is exempt if payable to a non-resident life tenant: see 26.6 (FOTRA securities: Trust).

41 Because there are UK beneficiaries: see 26.6.2 (Discretionary trust).

This treatment will only be available where the trustees—

- have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and
- have paid all tax due and any interest, surcharges and penalties arising; and
- keep available for inspection any relevant tax certificates.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set off under s 687(2) if that section applied, and that tax is not repayable (for example on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the beneficiary under this concession.

There is no reference to a time limit here, but *Murphy v HMRC*<sup>42</sup> held that the relief is nevertheless limited to a payment out of income which arose to the trustees not earlier than 6 years before the end of the year of assessment in which the payment was made. The reader may think that far from obvious from the text of the concession; but comment will have to wait until the case is final. In the meantime, it may be appropriate for trustees of non-resident trusts with taxable foreign income to adopt a policy of distribution within 6 years, in order to retain the foreign tax credit.

### 38.10.1 *ESC B18: HMRC example*

The TSEM provides a worked example:<sup>43</sup>

#### **TSEM10455 ESC B18 - example** [Aug 2019]

Non-resident discretionary trust

#### **Trust income for year 2013-14:**

	<i>Income</i>	<i>Basic rate IT deducted at source</i>
UK Property Income	£10,000	£2,000

42 [2021] EWHC 1914 (Admin).

43 I have slightly amended the wording and layout for the sake of clarity.

UK Bank Interest	£20,000	£4,000
Foreign Bank Interest	<u>£1,000</u>	<u>0</u>
Total	<u>£31,000</u>	<u>£6,000</u>

Allowable trust management expenses = £5,000

Discretionary income payment to UK resident beneficiary 2013-14 = £4,000

On these simple facts we turn to the complex computations:

**Amount of income on which the trustees are chargeable to income tax, and income tax chargeable** (In my terminology, the tier 1 charge)

<i>Income taxed at basic rate</i>	<i>Amount</i>	<i>Rate</i>	<i>Tax</i>
1 <sup>st</sup> slice of income (interest)	£1,000	20%	£200
trust management expenses <sup>44</sup>	<u>£6,049</u>	20%	<u>£1,209.80</u>
total	<u>£7,049</u>		<u>£1,409.80</u>
<i>Income taxed at trust rate</i>			
UK Bank Interest	£19,000		
UK Property Income	<u>£10,000</u>		
Total	<u>£29,000</u>		
Less trust expenses	<u>£6,049</u>		
Chargeable at trust rate	<u>£22,951</u>	45%	<u>£10,327.95</u>
Total tax chargeable			<u>£11,737.75</u>

Tax paid at source = £6,000.00

Tax due = £5,737.75

*Expenses computation*

The expenses are to be reduced by the proportion of income arising to trustees which is untaxed foreign income (ITA/S487(2)):

	<i>Income</i>
UK Property Income	£10,000
UK Bank Interest	£20,000
Foreign Bank Interest	<u>£1,000</u>
Total	<u>£31,000</u>

Expenses relating to foreign bank interest:

$(£1,000 \times £5,000) \div £31,000 = £161$

Expenses allowed in arriving at income chargeable to Income Tax at the special

44 Trust management expenses are set against income to arrive at the amount chargeable to Income Tax at the special trust rates. [See expenses computation].

trust rates are £4,839 (£5,000 – £161).

Allowance due = £6,049 (£4,839 grossed up by reference to basic rate on savings income - ITA/S486(1) - Step 5). (See TSEM8245)

**Amount of available income for each source of income, out of which discretionary income payment treated as made:**

	<i>Amount</i>	<i>Rate</i>	<i>Tax</i>
UK Bank Interest			
Trust Management Expenses:	£6,049	20%	£1,209.80
Standard rate band	£1,000	20%	£200.00
Special trust rate	<u>£12,951</u>	45%	<u>£5,827.95</u>
Total	<u>£20,000</u>		<u>£7,237.75</u>

UK Bank interest	£20,000
Less trust management expenses <sup>45</sup>	- £4,839
total	<u>£15,161</u>
Less tax charge	- £7,237.75
Net available	<u>£7,923.25</u>

	<i>Amount</i>	<i>Rate</i>	<i>Tax</i>
UK Property Income	£10,000	45%	£4,500

UK property income	£10,000
Less tax charge	- £4,500
Net available property income	<u>£5,500</u>

Foreign Bank Interest	£1,000
Less trust management expenses	-£161
Net available foreign income	<u>£839</u>

*net available income*

UK interest	£7,923.25
UK prop income	£5,500
Foreign interest	£839
Total	<u>£14,262.25</u>

**The discretionary income payment of £4,000 is treated as met out of the following income:**

---

45 Footnote original: Although the expenses have been grossed up for purposes of computing tax due, it is the actual amount of expenses paid by trustees which is to be taken into account in arriving at the amount of income available, out of which a payment could be made to beneficiary.

Net available	
UK Bank Interest: $(£7,923.25 \times £4,000) \div £14,262.25$	£2,222
UK Property Income: $(£5,500 \times £4,000) \div £14,262.25$	£1,543
Foreign Bank Interest: $(£839 \times 4,000) \div £14,262.25$	£235
Total	<u>£4,000</u>
<b>Relief due to beneficiary under ESC B18:</b>	
UK Bank Interest: $(£2,222 \times 7,237.75) \div £7,923.25$	£2,030
UK Property Income: $(£1,543 \times £4,500) \div £5,500$	£1,262
Total tax credit	<u>£3,292</u>

### 38.10.2 *Who makes the claim?*

After considering the case of a settlor-interested trust<sup>46</sup> the International Manual continues:

**INTM339550. Claims by non-resident trustees of discretionary trusts** [Jun 2016]

You may receive a claim or application from non-resident trustees of a discretionary trust. ... If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD...

***What to do if one or more beneficiaries of the trust has a residential address in the UK***

If the completed form 4467(trustee)/FD shows any beneficiaries with UK residential addresses, Specialist Personal Tax, PT International Advisory will refer the papers to Specialist PT, Trusts & Estates, who will consider whether the trustees will need to make UK tax returns.

***What to do if all of the beneficiaries are resident in the same country as the trustees and the settlor of the trust is excluded from benefit***

If all of the beneficiaries of the trust are resident in the same country as the trustees and the settlor of the trust is excluded from benefit, you can allow relief to the trustees.

### 38.11 s.629 income: Settlor's child

For this topic generally, see 44.15 (Payment to settlor's child).

ESC A93 provides the equivalent of ESC B18:

---

46 See 56.20.2 (Settlor treaty-resident outside UK).

Income arising to a trust within the scope of Section 686 ICTA 1988 is charged to tax on the trustees at the rate applicable to trusts or the Schedule F trust rate. Where such income is distributed to or for the benefit of an unmarried minor child, of the settlor, it is treated as the income of the settlor and becomes chargeable on them for the year in which it is distributed under Section 660B ICTA 1988.

Section 687 ICTA 1988 provides for the settlor of a resident trust to be given full credit against tax due from them under Section 660B for tax paid by the trustees at the rate applicable to trusts in respect of income distributed. Section 687 does not, however, apply where the trustees exercise their discretion outside the UK. The settlor of such a trust could therefore be liable to tax under Section 660B without being able to claim credit against their liability for any tax paid by the trustees.

By concession, the settlor will be able to claim credit against their liability to tax under Section 660B for tax paid by the trustees, as if the payments out of UK income were from a UK resident trust. This will apply to the extent that the distribution is made out of income which arose to the trustees not earlier than 6 years before the end of the year of assessment in which the distribution was paid.

For this purpose, the distribution will be treated as having been made rateably out of the total of the various sources of income arising to the trustees on a last in first out basis. Credit will be given to the settlor for the tax paid by the trustees on the income to the extent that:

- the distribution is regarded as being made from income chargeable to UK tax; and
- such income has not previously been allocated to earlier distributions on a last in, first out basis.

This concession will only apply where the trustees:

- have made trust returns, giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and
  - have paid all tax due, and any interest, surcharges and penalties arising; and
- keep available for inspection any relevant tax certificates.

Credit will be granted to the settlor on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set-off under Section 687(2) if that section applied, and that tax is not repayable (for example

on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the settlor under this concession.

## **38.12 UK trust, non-resident beneficiary: DT relief**

### *38.12.1 Other Income article*

OECD Model article 21(1) (“**Other Income article**”) provides:

Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

This wording would apply to UK source income from a UK discretionary trust so with a treaty in this form, a beneficiary who is treaty-resident will qualify for treaty relief on all their discretionary trust income (the tier 3 beneficiary charge).

After some vacillation, HMRC agree. SP 3/86 provides:

#### **Payments to a non-resident from UK discretionary trusts..**

##### **Introduction**

1 This statement explains how relief from UK tax under double taxation agreements will be given in respect of payments made to a non-resident [from] a UK discretionary trust or a UK estate.

##### **Background**

###### ***Discretionary trusts***

2 Generally speaking, a non-resident beneficiary receiving payments from a UK discretionary trust is not entitled to repayment of the tax paid by the trustees on the trust income. However, under concession B18 (which embodies a longstanding practice) HMRC ‘looks through’ the trust income to the underlying component parts of that income. The purpose of this ‘looking through’ is to allow the recipient of the income any relief that would have been available to him under the Taxes Acts had the income come to him direct instead of through the trustees.

3 Where the beneficiary is resident in a country with which the UK has a double taxation agreement, further relief under the ‘looking through’ principle may be due. Thus, for example, if the agreement provides for a withholding rate on interest of 15% and interest liable to UK tax formed part of the trust income which had suffered tax at 40% (ie the

rate applicable to trusts)<sup>47</sup> then, under the ‘looking through’ principle, the beneficiary would be repaid the amount of tax suffered in excess of the withholding rate, in this case 25%.

4 Some of the UK’s double taxation agreements include an ‘other income’ Article. The purpose of this Article is to determine in which country income not expressly dealt with elsewhere in the agreement should be taxed. In the UK’s agreement the article sometimes gives sole taxing rights in respect of such income to the recipient’s country of residence.

5 It has been the practice of HMRC to apply the ‘looking through’ principle to all cases where relief in respect of the discretionary payment was sought and to refuse claims where full repayment of UK tax was claimed under the provision of [the] ‘other income’ Article in the agreement.

[Para 6 deals with estates: see 85.17 (Non-resident beneficiary of UK estate: DT relief).]

### **Change of practice**

7 Following a review of their practice in these two areas, HMRC have accepted that if a payment made by trustees out of a UK discretionary trust falls to be treated as a net amount in accordance with TA 1988 s 687(2) [now s.494 ITA], the ‘looking through’ principle is not appropriate where the beneficiary is resident in a country with which the UK has a double taxation agreement and the ‘other income’ Article gives sole taxing rights in respect of such income to that country. (This will usually be the case where income from trusts is not specifically excluded from the Article.) This means that tax paid by the trustees in respect of the discretionary payment will be repayable to the beneficiary, provided that any conditions set out in the ‘other income’ Article are met. For example, the recipient may be required to show that he is subject to tax on the income in his country of residence.

8 [This deals with estates]

9 Where the ‘other income’ Article does not give sole taxing rights to the country of residence in respect of the trust or estate income or there is no double taxation agreement with the country concerned, the existing ‘looking through’ practice will continue to be applied where it is to the advantage of the beneficiary.

The DTAs which confer relief under the Other Income article on

---

47 Now 45%.

discretionary payments made by UK resident trustees are mostly the older generation of treaties. I think the reason is that before 1973, discretionary trusts were regarded as transparent, so distributed income of discretionary trust was not regarded as falling under the Other Income article.<sup>48</sup> DTAs made from the 1980's onwards usually exclude trust and estate income from the Other Income article.

The International Manual sets out a list of the countries whose DTAs provide relief for discretionary payments made by UK resident trustees. It is not however up to date and for convenience I divide it into two parts:

**INTM367800 - DT applications and claims: Non-resident beneficiaries of UK trusts** [Dec 2019]

DTAs where relief is available under the 'other income' article on discretionary payments made by UK resident trustees

Armeia (to 5/4/2002) <sup>1</sup>	Macedonia <sup>2</sup>
Austria	Moldova (to 5/4/2002) <sup>1</sup>
Barbados	Montenegro <sup>2</sup>
Belarus <sup>1</sup>	Morocco
Bosnia Herzegovina <sup>2</sup>	Namibia
Cote d'Ivoire	Portugal
Croatia <sup>2</sup>	Romania
Egypt	Serbia <sup>2</sup>
France	Slovenia <sup>2</sup>
Georgia (to 5/4/2002) <sup>1</sup>	South Africa (to 5/4/2002)
Germany	Spain
Hungary	Sudan
Israel	Swaziland
Jamaica	Tajikistan <sup>1</sup>
Kenya	Tunisia
Kyrgyzstan (to 5/4/2002) <sup>1</sup>	Tukmenistan <sup>1</sup>
Lithuania (to 5/4/2002) <sup>1</sup>	Zambia

<sup>1</sup> Armenia, Belarus, Georgia, Kyrgyzstan, Lithuania, Moldova, Tajikistan, Turkmenistan: relief is given under the terms of the UK/USSR Double Taxation Convention.

<sup>2</sup> Bosnia-Herzegovina, Croatia, Macedonia, Montenegro, Serbia, Slovenia: relief is given under the terms of the UK/Federal Republic of Yugoslavia

---

48 See 38.3.1 (Discretionary trust: source).

## Double Taxation Convention.

The following countries are still mentioned in the INT Manual list but should be deleted following new treaties (date of treaty in brackets):

Barbados (2012)	Poland (2006)
Hungary (2011).	Slovenia (2007)
France (2008)	South Africa (2002)
Germany (2010)	Spain (2013, in force 12/6/2014)
Macedonia (2007)	

38.12.2 *Other Income article restricted*

UK DTAs from the 1980's onwards mostly exclude trust and estate income from the Other Income article. Art 23(1) of the France/UK DTA is typical:

Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention, *other than income paid out of trusts or the estates of deceased persons in the course of administration*, shall be taxable only in that State.

This leaves relief to be claimed under ESC B18.

Interestingly, the UK/Germany treaty (2010) deals with the point expressly.<sup>49</sup> Article 21 provides:

- 1) Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.
- 2) Notwithstanding the provisions of paragraph 1, the following provisions shall apply with respect to income paid out of trusts or the estates of deceased persons in the course of administration:  
Where such income is paid to a beneficiary who is a resident of Germany by trustees or personal representatives who are residents of the UK out of income received by those trustees or personal representatives which would, if those trustees or personal representatives had been residents of Germany, have fallen within other Articles of this Convention, the beneficiary shall be treated as having received an amount of the income received by the trustees or personal representatives corresponding to the income received by him and any tax paid by the trustees or personal

---

<sup>49</sup> Barbados (2012) is the same, so perhaps this will be the new standard form.

representatives on that amount shall be treated as having been paid by the beneficiary.

Why? Presumably the German authorities do not like German residents to be taxed by law and untaxed by HMRC extra-statutory concessions such as ESC B18 and A14. Those who believe that tax law should be statutory and not concessionary will approve.

It is curious that the programme to legislate ESCs, which has legislated many trivial ESCs, has not covered the important ESC B18. No explanation has been given, so it is tempting to speculate. Perhaps it has been filed as too difficult; perhaps HMRC are planning changes to the law; perhaps legislation will come eventually.

In the USA/UK DTA the treaty excludes trust and estate income in the standard wording, and point is dealt with by the DTA Exchange of Notes:

With reference to paragraph 1 of Article 22 (Other income)—  
it is understood that the purpose of the exclusion from the paragraph for income paid out of trusts or the estates of deceased persons in the course of administration is to allow a recipient of such income the relief that would have been available to him under the provisions of the Convention had he received the income direct instead of through the trust or estate.

More accurately, the purpose is to prevent the recipient of such income from receiving more than the relief that would have been available to a person under the provisions of the Convention and ESC B18 had they received the income direct instead of through the trust or estate. But it comes to the same thing.

### **38.13 Dual-resident trustees**

Suppose

- (1) Trustees are dual resident (resident in the UK and in another state); but treaty-resident in the state (treaty non-resident under the tie-breaker).
- (2) The beneficiary is solely resident in the UK
- (3) The trustees receive income which is not subject to UK tax under the treaty

Tier 1: The trustees qualify for treaty relief for the charge at tier 1. That reduces the UK tax that they pay at tier 1., but it also reduces the tax pool, and so reduces the tax pool credit available for trust withholding tax (tier 2).

Tier 2: The distribution is subject to trust withholding tax. There is no double taxation relief for that charge.

Tier 3; The beneficiary is subject to tax on the distribution. There may be some foreign tax credit relief, under s.111 TIOPA, but not the full relief which applies to a treaty non-resident.

In short, for dual-resident trusts the trust tax-credit systems do not fully work, and the benefit of the DT relief may effectively be lost.

## IIP TRUSTS: INCOME TAX

39.1

### 39.1 Introduction and terminology

This chapter considers the income taxation of interest in possession trusts (“**IIP trusts**”), that is, in short, trusts where the income is paid to a beneficiary. I call that beneficiary the “**life tenant**”; HMRC use the term “IIP beneficiary” which is more accurate, but perhaps more opaque. The trustees may be called “**IIP trustees**”.

### 39.2 Taxation of IIP trustees

Trustees are in principle subject to tax on income arising to them if it is UK source income or if they are UK resident. This applies even to trustees of transparent IIP trusts.<sup>1</sup> There are however a number of exceptions for trustees of IIP trusts as exemptions for life tenants enure for the benefit of the trustees.

The TSE Manual provides:

**TSEM9310. Ownership and income tax: income tax principles - receiving or entitled to [Jul 2020]**

[TSE Manual refers to the principle that tax liability rests on those receiving or entitled to the income,<sup>2</sup> and continues:]

The ‘receiving’ basis enables you to tax the person in receipt of the income, even if you cannot trace the person entitled to it. But ultimately you want to tax the person who is entitled. For example, in an interest in possession trust (TSEM1105), the trustees are initially taxable on the trust income because they receive it. But the IIP

---

1 See 14.8 (Receipt by nominee/trustee).

2 See 14.2.1 (Person liable: receiving/entitled).

beneficiary is ultimately taxable on the trust income because he or she is entitled to it. So you tax the beneficiary on the income on the 'entitled' basis, and give credit for any tax paid by the trustees who received it.

In sum, for the purpose of taxation of income, you want to establish who is 'entitled to' the income.

### 39.2.1 *Income mandated to life tenant*

The TSE Manual provides:

**TSEM3040. trustees - beneficiary receives trust income directly**  
[Jul 2020]

Sometimes there are instructions or arrangements for income to bypass the trustees of an interest in possession (IIP) trust. If trust income passes directly or indirectly to a beneficiary without going via the trustees, for example income passes through an investment manager to the IIP beneficiary, there is no statutory basis for charging the trustees to income tax in respect of this income, because the trustees are neither entitled to it nor in receipt of it (TSEM3761).

Trustees of interest in possession trusts (IIPs) (TSEM1564) exclude such income from the Trust and Estate Tax Return.

See TSEM3763 about the beneficiary's and settlor's positions.<sup>3</sup>

The TSE Manual later expands on this:

**TSEM3763 beneficiary receives trust income directly, the beneficiary's return** [Jul 2020]

Sometimes there are instructions or arrangements for income to bypass the trustees of an interest in possession (IIP) trust. If trust income passes directly or indirectly (for example, through an investment manager) to a beneficiary without going via the trustees the beneficiary needs to ensure that it is returned correctly on their tax return:

The beneficiary should return all income on the relevant pages of their tax return, in addition to their direct personal income. For example, include:

- dividends and interest on the SA100;
- rental income on the SA105 (UK property);
- foreign income on the SA106 (Foreign)

---

<sup>3</sup> Also see 44.11 (Trustees of settlor-interested trust).

However, if income bypasses the trustees and the trust:

- is settlor interested (TSEM4200 onwards), or
- is not settlor interested but the trust income passes directly to the settlor's relevant minor child (TSEM4300 onwards)

then the settlor includes the income on his or her personal return.

Other beneficiaries do not.

See TSEM3040 about the trustee's position.

### **Income received via the trustees**

The beneficiary should use the SA107 (Trusts etc) to return all other trust income, which will have passed through the trustees (with the exception of foreign income, which is returned on the SA106 (Foreign)).

CIOT say:

CIOT and ICAEW, in response to questions raised by members sought HMRC's view as to what actually constitutes "mandated income". Our view is that (until it is revoked) any standing instruction given by the trustees as to the payment of income before it falls entirely under their control would constitute a mandate. HMRC were asked to consider the following examples:

1. The registrar of a company is given a mandate to pay the dividends directly to the beneficiary's bank account
2. The bank/building society is instructed to pay the interest as it arises into the beneficiary's bank account
3. The investments are held by an investment manager in nominee accounts the manager is instructed to pay the income as it arises into the beneficiary's bank account
4. The investments are held by an investment manager in nominee accounts and the manager has a standing instruction to pay the income periodically, say quarterly, into the beneficiary's bank account
- 5 The registrar of a company is given a mandate to pay the dividends directly to the trustees' bank account and the trustees forward the income to the beneficiary
6. The bank/building society is instructed to pay the interest as it arises into the trustees' bank account and the trustees forward the income to the beneficiary
7. The investments are held by an investment manager in nominee accounts and the manager is given ad hoc instructions to pay the income into the beneficiary's bank account.

8. Land where the life tenant manages the property including repairs, and collects and returns the rent directly

**HMRC response**

“In simple terms the IIP trust income is mandated to the beneficiary when the beneficiary will receive that income directly from the source.

So, any scenario where the trust income does not go via the trustees’ bank account, but straight to the beneficiary’s is one within TSEM 3763. In these circumstances there is no basis for taxing the trustees, because they are not in receipt of the income. The beneficiary is chargeable on the income because they are entitled to it.

The examples given in your question are all within the TSEM 3763, except numbers 5 and 6 where the trustees receive the income directly from the source, they are therefore taxable as being in receipt of the income. They therefore include this on the Trust and Estate tax return (SA900).

The term ‘mandated’ has been causing the confusion so we are in the process of amending our guidance to clarify this matter.”<sup>4</sup>

Strictly, the correct question, in the words of the statute, is not whether the trustees have *mandated* income, but whether they have *received* income.<sup>5</sup> In cases of doubt, one should focus on the concept of receipt. But in general, “mandating income” is a convenient paraphrase for trustees “not receiving income”; and “receiving” is itself a somewhat imprecise concept which takes some of its meaning from context.

The principle that trustees of an IIP trust were not taxable on mandated income was assumed without question in *Trustees of the Paul Hogarth Life Interest Trust v HMRC*<sup>6</sup> which discusses the implications of the rule in the context of penalties for failing to deliver a tax return.

### 39.2.2 *Life tenant non-resident*

The taxation of UK trustees of an IIP trust (assuming they have not mandated the income to a life tenant) is affected by the residence of the

---

4 <https://www.tax.org.uk/policy-technical/technical-news/mandated-trust-income-%E2%80%93-interest-possession-trust-%E2%80%93-trust-tax-return>

5 See 14.2.1 (Person liable: receiving/entitled).

6 [2018] UKFTT 595 (TC).

life tenant. TSE Manual provides:

**TSEM3160. Resident trustees with trust income from abroad: beneficiary is not resident** [Jul 2020]

These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.

The trustees' income tax liability is based on the beneficiary's residence position. Trustees are not chargeable in respect of the share of income from abroad payable to the non-resident beneficiary. They exclude it from the Trust and Estate Tax Return. [See] *Williams v Singer* 7 TC 387

39.2.3 *Life tenant remittance basis user*

The taxation of UK trustees of an IIP trust (assuming they have not mandated the income to the life tenant) similarly depends on whether the life tenant is a remittance basis taxpayer. TSE Manual provides:

**TSEM3165. Resident trustees with trust income from abroad: beneficiary is resident but not domiciled** [Jul 2020]

These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.

The trustees' income tax liability is based on the beneficiary's domicile. The beneficiary must make a claim for any year that the remittance basis is to apply.

If in any year the beneficiary claims the remittance basis the trustees' liability on the share of income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.

If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.

[See] *Williams v Singer* 7 TC 387

Form SA904(Notes) Notes on Trusts & Estate Foreign 2020/21 provides:

If the beneficiaries of the trust has an absolute interest in the trust (including a life tenant) and it's known that they will make a claim for the tax year to be taxed only on the amount of their foreign income

and gains that is remitted to the UK, then do not include these amounts of foreign savings income remitted to the UK on page TF 2.

The reason for this is that where dividend income is taxed on a remittance basis, the rate of tax on trustees is the Default Basic Rate, not the dividend ordinary rate. This is consistent with the statutory rules for the taxation of individuals.<sup>7</sup> It is somewhat impractical for trustees to know whether income has been remitted.

What if income is remitted in a year after receipt? In practice I expect tax is paid by the life tenant and such income is not entered on the trust tax return.

#### 39.2.4 *Life tenant's foreign tax credit*

The TSE Manual provides:

**TSEM3655. Relief for overseas tax: beneficiary entitled to trust income** [Jul 2020]

These instructions apply to taxed overseas trust income that is treated as a beneficiary's income as it arises.

The trustees can claim, and receive, tax credit relief on behalf of the beneficiary. The amount is based on the beneficiary's marginal rate and residence status. INTM367730+ onwards has instructions about tax credit relief.

If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

A paying agent may have allowed provisional tax credit relief on overseas income. If that provisional relief is excessive, the beneficiary accounts for the excessive relief.

The Manual continues with a comment on annuities, but that is so rare in practice it is not set out here.

#### 39.2.5 *Rates of IT on trustees*

In the absence of express provision, the rates of tax payable by IP trustees are the Default Basic Rate, or for dividends, the dividend ordinary rate.<sup>8</sup>

---

<sup>7</sup> See 40.10 (Application of dividend rates).

<sup>8</sup> See 40.6.5 (Application of Default Rates); 40.10.4 (Dividends: Non-individual).

### 39.3 Taxation of life tenant

#### 39.3.1 *Source of income of beneficiary*

The life tenant is of course subject to tax on income received from the trust if it is UK source income or if the life tenant is UK resident. For this purpose it is necessary to identify the source. The choice is between:

- (1) regarding the trust as the source of trust income; or
- (2) regarding the trust assets as the source, in which case one “looks through” the trust and it is described as “transparent”.<sup>9</sup>

The answer depends on the terms of the trust, construed in accordance with the proper law of the trust.

Similar issues arise for unit trust income, see 66.1 (Unit Trusts – Introduction).

For the position where the life tenant pays the income (eg pays interest or rent to the trustees) see 47.10.5 (Loan to life tenant).

#### 39.3.2 *England and “Baker” trusts*

The source of the life tenant’s income is the underlying trust assets (not the trust) if, under the terms of the trust, construed in accordance with the proper law of the trust, the beneficiary is entitled to the income of each trust asset as it arises. This is the case for a standard form interest in possession trust governed by English law.<sup>10</sup> In other words, an IIP trust is transparent for IT purposes.

The TSE Manual provides:

**TSEM10425 Non-resident trusts: beneficiary’s chargeability: trust income - interest in possession trust: foreign law - Baker type trust [Jul 2020]**

The beneficiary of a Baker type trust is entitled to his or her share of each source of income arising to the trust, less any amounts to which

<sup>9</sup> See 86.2 (“Transparent” and “opaque”).

<sup>10</sup> *Baker v Archer-Shee* 11 TC 749. This issue has given rise to academic debate ever since the House of Lords reached its 3:2 decision in *Baker*. See Waters, “The Nature of the Trust Beneficiary’s Interest” (1967) 45 Can Bar Rev 219; Schabe, “The Trust Conduit Principle: A Foundationless Theory?” [1999] Journal of Australian Taxation 17 <http://www.austlii.edu.au/au/journals/JATax/1999/17.html>

the beneficiary is not entitled (see (TSEM3762)).

Credit may be given to the beneficiary for tax deducted at source or paid by the trustees on the income. This includes tax credit relief where tax has been paid by the trustees on trust income in another jurisdiction.

**Example**

Interest in possession beneficiary has entitlement to all income of non-resident trust

**Year 2013-14 - Trust income**

UK Property Income	£10,000
Tax paid	<u>£2,000</u>
Net income	<u>£8,000</u>

Trust management expenses £1,000

**Trustees' position**

Gross UK Property Income	£10,000
Less tax due	- £2,000
Less expenses	<u>- £1,000</u>
Net income	<u>£7,000</u>

**Beneficiary's position - TSEM8345**

Net UK Property Income = £7,000

Grossed amount ( $£7,000 \times 100 \div 80$ ) = £8,750

The beneficiary will need to include the amount of £8,750 property income as his or her income for income tax purposes, and will receive credit for £1,750 tax paid by trustees.

Rather surprisingly, this applies even if the life interest is subject to an annuity: *Nelson v Adamson* 24 TC 36. But in practice annuities are not used so the point is of academic interest only.

For completeness: it has been suggested, tentatively and *obiter*, that this does not apply to trading income, at least for the purposes of DTAs;<sup>11</sup> however there is no sound basis for that distinction and the correct view is that the transparency principle applies generally.

It is possible to draft an English law trust so that under the terms of the trust the beneficiary is not entitled to a proprietary interest in the income as it arises, but merely has the right to call on the trustees to

---

11 *Huitson (R, oao) v HMRC* [2010] STC 715 at [54]. The point was not considered on appeal, see [2011] STC 1860.

transfer to them a sum equal to the net income.<sup>12</sup> Then the trust (not the underlying assets) will be the source. In practice this is not normally done.<sup>13</sup>

### 39.3.3 New York and “Garland” trusts

Common form interest in possession type trusts governed by some foreign trust laws do not give the beneficiary the right to income as it arises, but only the right to recover a sum from the trustees.<sup>14</sup> The right is *in personam* not *in rem*. In this case the trust is not transparent and the beneficiary’s income is classified as an Annual Payment (regardless of the type of income arising to the trustee).<sup>15</sup> The location of the source is where the trustee is resident.

This is so even if the beneficiary is described as “life tenant” and is, in economic reality, in the same position as a life tenant under an English law trust. In this respect, a *Garland* trust is like an English law estate of a deceased person, not an English law trust.

The TSE Manual provides:

**TSEM10430 interest in possession trust - foreign law - Garland type trust [Jul 2020]**

The beneficiary of a Garland type trust is entitled to his or her share of the net trust income remaining after the trustees have ascertained the balance available after meeting the expenses of administering the trust.

The nature of the income that arose to the trustees is irrelevant, and the amount to which the beneficiary is entitled is regarded as an untaxed source of foreign income. Consequently, in the example at

---

12 *R v Special Comrs ex p Shaftesbury House & Arethusa Training Ship* 8 TC 367 appears to be an example. But that case was decided before *Baker*, and it should be decided differently now.

13 Except perhaps unit trusts: see 66.4.3 (Unauthorised UT: Foreign trustees).

14 This assumes that the trust income consists of money. What if there is income in specie, such as a dividend in specie? The question has not been explored in the case law, but in principle the life tenant should have the right to receive the asset in specie, so one would apply a *Baker* analysis rather than a *Garland* analysis. That supports the view that *Garland/Baker* is a strange distinction to draw.

15 *Garland v Archer Shee* 15 TC 693.

TSEM10425,<sup>16</sup> the entitlement of the interest in possession beneficiary would be to foreign income (untaxed) of £7,000 and not to UK property income.

If the trustees have paid tax on some of the income chargeable, and the beneficiary wishes to obtain credit for the tax, refer to Trusts & Estates Nottingham.

#### 39.3.4 *Scots trusts*

A liferent (the Scottish term for a life interest) under a Scots trust in common form is not transparent.<sup>17</sup>

This has been reversed for UK resident Scots trusts; s.464 ITA provides:

- (1) This section applies if—
  - (a) income arises to trustees under a trust having effect under the law of Scotland,
  - (b) the trustees are UK resident, and
  - (c) a beneficiary under the trust (“B”) would have an equitable right in possession to the income if the trust had effect under the law of England and Wales.
- (2) B is treated for income tax purposes as having an equitable right in possession to the income (even though B has no such right under the law of Scotland).

---

16 See 39.3.2 (England and “Baker” trusts).

17 *Inland Revenue v Clark’s Trustees* [1939] SC 11 at p.24:

“There is no difference between the law of Scotland as regards the beneficiary’s rights and the law which is admitted in the record to be the law of the State of New York;” “the right of property in the estate of the trust is vested in the trustees to the exclusion of any competing property, and the right of the beneficiary, ... as under the law of New York, is merely a right *in personam* against the trustees to enforce their performance of the trust.”

<https://www.kessler.co.uk/wp-content/uploads/2012/04/CIR-v-ClarksTrustees.pdf> approved *Leedale v Lewis* 56 TC 501 at p.538. See too Scottish Law Commission, *Discussion Paper on the Nature and the Constitution of Trusts* (2006) para 2.5:

“The beneficiary has a ... right to compel the trustee to administer the trust funds in accordance with the provisions of the declaration of trust. This is a personal right. It is axiomatic that in Scots law the beneficiaries do not have a real right or a quasi-real right in the trust property. They have no proprietary interest in the trust fund.” <http://www.scotlawcom.gov.uk> See Smith, “Scottish trusts in the common law” [2013] Edin LR 283.

It is difficult to see why the statutory rule only applies to UK resident trusts. It is difficult to see why it applies to Scotland and no other *Garland* jurisdictions. The reason is that it is not part of a coherent regime for the taxation of trusts but a late Finance Bill amendment to deal with a narrow domestic anomaly.<sup>18</sup> In practice it will not often matter.

One can create a transparent Scots law trust with appropriate wording.<sup>19</sup>

### 39.3.5 Critique

The tax rules strictly require one to ask whether every trust jurisdiction is:

- (1) a *Baker* jurisdiction (where the life tenant of a standard form IIP trust has a right to income as it arises); or
- (2) a *Garland* jurisdiction (where the life tenant only has a right against the trustee).

That is a somewhat metaphysical question as it is difficult to pin down any practical consequence (other than tax) which arises from the answer.

The distinction between *Baker* and *Garland* trusts should be abolished. It has no economic substance and precious little legal basis. It is to a large extent undone by concession. This could easily be done by extending s.464 ITA to apply to all *Garland* trusts.<sup>20</sup>

## 39.4 Beneficiary's credit for trustees tax

### 39.4.1 Tax on trustees or at source

The TSE Manual provides:

**TSEM3764. Beneficiary entitled to trust income - grossing up** [Jul 2020]

18 See Scottish Law Commission, *Discussion Paper on Apportionment of Receipts and Outgoings* (2003) para 4.5 [http://www.scotlawcom.gov.uk/download\\_file/view/49/](http://www.scotlawcom.gov.uk/download_file/view/49/)

19 "Scottish Trust beneficiaries are not entitled to specific items of trust property *unless that is expressly provided for in the Trust Deed.*" Discussion Paper on Apportionment of Receipts and Outgoings para 4.5.

20 For a precedent, see 86.6.3 (Garland trust: SDLT).

If the trustees receive income that is taxed at source, or if they pay tax on it under self assessment, the beneficiary will receive a net amount. But he or she is entitled to the gross amount. Consequently he or she is taxable on the gross amount.

For example, the trustees have gross bank interest of £1,000 on which tax is deducted at source £200. They pay £800 to the beneficiary. The beneficiary is entitled to the gross amount £1,000, and is taxable on that amount.

**TSEM3765. Beneficiary entitled to trust income - credit for trustees' tax** [Jul 2020]

If the trustees have paid tax or have received income with tax taken off, the beneficiary is given credit for that tax.

For example, in 2009-10 the trustees have gross rental income of £2,000 on which they pay tax £400. They pay £1,600 to the beneficiary. The beneficiary is entitled to the gross amount £2,000, and is taxable on that amount. He or she is given credit for the £400 tax paid by the trustees.

If the beneficiary is a higher rate taxpayer, he or she will have further tax to pay see example in TSEM3766. If the beneficiary is a non-taxpayer, he or she may claim a repayment.

The beneficiary is given credit for trustees' tax only if the beneficiary is taxable on the same item. If the IIP trustees receive an amount that is capital in trust law and deemed to be income for tax purposes (see TSEM3201 and TSEM3768), the beneficiary is not given credit for the trustees' tax. The IIP beneficiary would not be entitled to such a receipt, as it would not be trust income, and would not be taxable on the receipt...

**TSEM3766. Beneficiary entitled to trust income - grossing up and credit for trustees' tax example** [Jul 2020]<sup>21</sup>

An IIP trust where the Settlements legislation does not apply (see TSEM3765) receives income in 2009-2010: rental income £2,000 and bank interest £800 (basic rate tax of £200 deducted at source).

***Trustee's position***

	Rent	Interest
gross income	2,000	1,000
tax due	<u>400</u>	<u>200</u>
net income	<u>1,600</u>	<u>800</u>

21 Author's footnote: I have slightly altered the wording of the examples to enhance clarity.

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £220 tax.<sup>22</sup>

**Beneficiary's position (Beneficiary is a higher rate taxpayer)**<sup>23</sup>

	Rent	Interest
net income (as above)	1,600	800
grossed up (@ 20%)	<u>2,000</u>	<u>1,000</u>
Beneficiary is a higher rate taxpayer		
tax at 40%	800	400
less credit	<u>-400</u>	<u>-200</u>
further tax to pay	<u>400</u>	<u>200</u>

For an example involving TMEs, see TSEM8345-8350.

**TSEM3767. Beneficiary entitled to trust income - form R185 (Trust Income) [Jul 2020]**

In the example in TSEM3766 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

	Net amount	Tax paid
Box 3 non-savings income	£1600	£400
Box 4 savings income	£800	£200

The beneficiary uses the information on form R185 (Trust Income) to make his or her tax return or to claim repayment.

## 39.5 Trustees expenses

### 39.5.1 Deduction for trustees

The TSE Manual provides:

**TSEM8310. IIP trustees: basic rate, etc tax [Jul 2020]**

In taxing the trustees of an IIP trust at rates up to basic rate, the usual deductions against various sources of income (e.g. deductions to arrive at net trading profit or rental income) are allowed. But the trustees do not get relief at those rates of tax for any 'trustees' expenses' whatsoever.

The tax case of *Aikin v Macdonald's Trustees* (3 TC 306 -1894), concerned with income remitted to the UK from abroad, confirmed the general principle that trust management expenses are not to be taken into account in arriving at the measure of taxable income of the trustees. The case found that the full amount of income received in the

22 Author's footnote: The correct figure is £400.

23 Author's footnote: If the beneficiary is a basic rate taxpayer, there is no further tax due.

UK was taxable without any deduction in respect of expenses incurred in this country in managing the trust. As Lord McLaren said, ‘the only kind of deductions allowed is expenditure incurred in earning the profits there is no deduction under any circumstances allowable for expenditure incurred in managing profits which have already been earned and reduced into money’ (p309).

**TSEM8315. IIP trustees: deemed income** [Jul 2020]

Unlike the trustees of accumulation/discretionary trusts, the trustees of IIP trusts are not normally chargeable to the special trust rates. Consequently there is generally no equivalent question of allowing TMEs against the special trust rates - but see ‘Practical considerations’ below.

For IIP trusts, there are certain items that are capital in trust law but deemed to be income for tax purposes, and are also taxable at the special trust rates. (See TSEM3201.)

...

From 6 April 2007 Section 484 ITA provides for all the deemed income items in ITA/482, now including accrued income, to be given relief for allowable TMEs

***Practical considerations***

In practice, if an IIP trust incurs allowable TMEs, they will reduce the beneficiary’s entitlement to trust income and will not normally be taken into account for the trustees’ deemed income purposes. A capital receipt would normally not find its way into the hands of an IIP beneficiary, as it would not be trust income. (But see exceptions in TSEM3786 to TSEM3787.) So, the fact that the trustees were liable to the special trust rates on certain receipts would have no direct effect on the income beneficiary, and Section 484 ITA TMEs would not come into question. But if there is a high enough level of allowable income expenses such that they reduce the IIP beneficiary’s entitlement to nil, and at the same time there is deemed income taxable on the trustees at the special trust rates, excess income expenses could be used against the trust rate income.

39.5.2 *Deduction for life tenant*

The TSE Manual provides:

**TSEM8320. IIP beneficiaries: case law** [Jul 2020]

There is case law in *Murray v CIR* (11 TC 133), *MacFarlane v CIR* (14 TC 540), and *CIR v Dewar* (16 TC 93-94). A beneficiary with an

absolute interest in income (for example a life tenant) is entitled to the amount arising to the trustees that is available after any management and administration expenses etc. of the trustees have been provided for. Consequently the beneficiary is taxable on the net amount - *CIR v Hamilton of Dalzell (Lord)* (10 TC 406).

**TSEM8325. IIP beneficiaries: TMEs not a tax deduction** [Jul 2020]

In an IIP trust, the income beneficiary is entitled to the income as it arises out of trust assets, with the exception of any part of that income that is properly paid away on trust expenses and some other items (see TSEM3762). TMEs are considered as part of establishing what net income the beneficiary is entitled to in law. That entitlement then provides the measure on which to tax the beneficiary. So, ‘allowable’ TMEs for an IIP beneficiary do not constitute a tax deduction or a tax relief, because they represent sums of money that the beneficiary was not entitled to in the first place.

**TSEM8330. IIP beneficiaries: tax law** [Jul 2020]

ITA Sections 499 to 503 provide generally for the IIP beneficiary’s income to be reduced by allowable TMEs for tax purposes.

ITA Sections 501 and 502 provide for relief for allowable TMEs for non-resident IIP beneficiaries.

Section 500 ITA provides:

- (1) Expenses of the trustees can be used to reduce the beneficiary’s income for income tax purposes only so far as—
  - (a) the expenses are incurred by the trustees in the current tax year or in an earlier tax year, and
  - (b) as a result of the expenses being chargeable to income as mentioned in subsection (2) or (3), the beneficiary’s entitlement to the beneficiary’s income is reduced by reference to the expenses.

“Chargeable to income tax” is defined in s.500 ITA:

- (2) Expenses are chargeable to income for the purposes of subsection (1)(b) if they are chargeable to income by the trustees under a term of the settlement (subject to any overriding law which prevents the expenses from being so chargeable).
- (3) Expenses are also chargeable to income for the purposes of subsection (1)(b) if they—
  - (a) are not chargeable to income by the trustees under a term of

- the settlement, but
- (b) are chargeable to income by the trustees in accordance with any law (subject to any overriding term of the settlement which prevents the expenses from being so chargeable).

Section 500(4) ITA prevents double counting (for the avoidance of doubt):

Expenses cannot be used to reduce the beneficiary's income for income tax purposes so far as they are expenses which have fallen, or may fall, to be taken into account for the purpose of calculating the trustees' liability to income tax for any tax year.

### 39.5.3 *Non-resident beneficiaries*

Section 501 ITA provides:

- (1) This section applies if—
  - (a) expenses of the trustees are to be used to reduce the beneficiary's income for income tax purposes, and
  - (b) a proportion of the beneficiary's income is untaxed income (see section 502).
- (2) A proportion of those expenses is not to be so used.
- (3) That proportion is the same as the proportion of the beneficiary's income which is untaxed income.
- (4) In subsection (3) the references to the beneficiary's income and untaxed income do not, in either case, include so much (if any) of that income as is equal to the amount of income tax, or of any foreign tax, for which the trustees are liable on that income.
- (5) "Foreign tax" means any tax which—
  - (a) is of a similar character to income tax, and
  - (b) is imposed by the laws of a territory outside the UK.

Section 502 ITA provides a commonsense definition of "untaxed income":

- (1) For the purposes of section 501 the beneficiary's income is untaxed income so far as the beneficiary is not liable to income tax on it wholly or partly because the beneficiary—
  - (a) has been non-UK resident, or
  - (b) has been treated as resident in a territory outside the United Kingdom under double taxation arrangements.
- (2) If the income tax charged on the beneficiary for the beneficiary's

income is limited under Chapter 1 of Part 14 (limits on liability to income tax of non-UK residents), the untaxed income includes so much of the beneficiary's income which is disregarded income (within the meaning of that Chapter) except so far as the disregarded income is within subsection (3).

- (3) The disregarded income is within this subsection so far as—
- (a) sums representing income tax have been deducted from the income, or
  - (b) sums representing income tax have been treated as deducted from or paid in respect of the income.

Against which income does one set expenses? This question did not arise when all types of income were taxed at the same rates. Now we need s.503 ITA which provides the answer:

- (1) This section applies if the beneficiary's income is to be reduced for income tax purposes by expenses of the trustees.
- (2) The beneficiary's income is to be reduced in the following order—  
first, reduce dividend income within subsection (3) (if any),  
second, reduce dividend income not within that subsection (if any),  
third, reduce savings income (if any), and  
fourth, reduce other income (if any).
- (3) Income is within this subsection so far as it is—
  - (a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
  - (b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or
  - (c) chargeable under Chapter 6 of that Part (release of loan to participator in close company).
- (4) If the trustees are liable for income tax charged on a component of the beneficiary's income at a particular rate, then any reduction of that component is to be made in accordance with the steps set out in subsection (5).
- (5) Here are the steps.
 

*Step 1* Deduct from the component the amount of income tax charged on it at the particular rate for which the trustees are liable.

*Step 2* Take the result from Step 1 and reduce it (but not below nil) by the amount of the trustees' expenses so far as they have not already been used to reduce other components of the beneficiary's income.

*Step 3* Take the result from Step 2 and gross it up by reference to the

particular rate. The result is the reduced amount of the component of the beneficiary's income.

ITA change 91 provides:

**Change 91: Settlements: trustees' expenses reducing beneficiary's income: sections 500, 503 and Schedule 1 (section 646A of ITTOIA)**

This change makes explicit some of the rules about the way expenses incurred by trustees in connection with income to which a beneficiary is entitled reduce the amount of the beneficiary's income for tax purposes. There are only two provisions in ICTA that concern the tax treatment of expenses in relation to income to which a beneficiary is entitled before it is distributed (where the beneficiary is regarded as having an interest in possession). These are:

- section 689A, which deals with the disregard of some expenses in the case of a non-resident beneficiary; and
- section 689B, which concerns the order in which expenses reduce the beneficiary's income.

While there are additional provisions in section 686(2AA) of ICTA that give some rules on the treatment of trustees' expenses in relation to accumulation or discretionary income, there is no corresponding provision for interest in possession trusts. The practices that have become established and which are reflected in these sections are based on the principle that the income of a beneficiary is the income arising to the trustees so far as the beneficiary is entitled to it.

There are two ways in which this principle operates.

First, if the trustees' expenses are chargeable to income under a provision of the settlement, then irrespective of whether they would be so chargeable in the absence of that provision, the expenses are to be taken into account. This is subject to the existence of any law that in a particular case (for example by way of a court order) overrides the provision in the trust deed.

This is different from the rule that operates in relation to accumulated or discretionary income where the terms of the settlement are to be ignored, and from what it appears that section 689A of ICTA provides for in this context. If the deed is silent on whether a particular expense is chargeable to income then the expense is taken into account if it would be chargeable to income under general trust law.

These rules are reflected in section 500. They mean that an expense is allowable if it is chargeable to income under the trust deed, even if it would be chargeable to capital under general trust law. Conversely, in cases where general trust law would require an expense to be charged to income, but the

trust deed charges it to capital, then the change means that the expense is not allowable.

The second area concerns how trustees' expenses are taken into account in such cases.

The expenses do not affect the amount of income on which the trustees are chargeable to tax, but operate to reduce the amount of the beneficiary's income. It is not that the beneficiary gets relief for the expenses as such; it is simply that the beneficiary is not entitled to the income used to pay the expenses. So, the beneficiary's income (as reduced by allowable expenses) is grossed up at the normal rate appropriate to that income to arrive at the gross amount which is to be treated as part of the beneficiary's total income.

This is not set out in the source legislation but, based on the decision in *CIR v Lord Hamilton of Dalzell* (1926), 10 TC 406 CS, it is the accepted way that expenses are taken into account. Section 503 reflects this.

This change also provides rules about cases where the trustees' expenses exceed a beneficiary's income. Section 500(1) applies in relation to the tax year in which the beneficiary's entitlement to income is reduced, whether the expense was incurred in that tax year or an earlier tax year. The reference to an earlier tax year means that the section covers cases where the trustees' expenses in an earlier tax year exceed the income in that earlier year and so the trustees are carrying forward the excess.

This change is in principle adverse to some taxpayers and favourable to others. But it is expected to have no practical effect as it is in line with current practice.

The TSE Manual continues:

**TSEM8335. IIP beneficiaries: tax law: Section 500 ITA [Jul 2020]**

S.500 provides that if, as a result of the expense being chargeable to income it reduces the beneficiary's entitlement to income, it reduces the measure of the beneficiary's income for tax purposes.

An expense can reduce the beneficiary's entitlement in two ways:

If it is chargeable to income under general trust law and there is no specific provision about the expense in the trust deed.

If it is chargeable to income under the trust deed, whether it is chargeable to income or capital in general trust law.

In cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, the expense is not allowable, as it does not reduce the beneficiary's entitlement to income

In sum:

- if an expense is properly chargeable to capital in general trust law, but

- charged to income under the trust deed, the expense is allowed;
- if an expense is properly chargeable to income in general trust law, but charged to capital under the trust deed, the expense is not allowed.

The legislation for interest in possession trusts specifies that one must give priority to the provisions of the trust deed over general trust law when establishing whether the expense is an allowable trust management expense for tax purposes. In practical terms the provisions result in the IIP beneficiary being taxed on his or her entitlement to income.

**TSEM8340. IIP beneficiaries: trust deed** [Jul 2020]

The IIP beneficiary is taxed on the income of the trust net expenses properly chargeable to income.

‘Properly chargeable to income’ in the IIP trust context means properly chargeable to income under all four sources of trust law referred to in TSEM8020. By contrast with discretionary trusts, where Section 484 ITA specifically excludes provisions in the trust deed, this term for IIP beneficiaries includes expenses whose final incidence falls on income by virtue of the terms of the trust deed - Section 500(2) ITA.

So if an IIP trust deed allows the trustees to pay what are normally capital expenses out of income, those expenses reduce the measure of the beneficiary’s income. If an IIP trust deed allows trustees to pay what are in general trust law income expenses out of capital, again the trust deed has priority over general trust law, and consequently the IIP beneficiary’s income is not reduced by such expenses.

In the absence of a specific provision in the trust deed, general trust law applies. If the trustees pay expenses out of income that are properly chargeable to capital in general trust law, then the IIP beneficiary is taxable on the amount of income used to pay the expenses, even though he or she does not receive it.

**TSEM8345. IIP beneficiaries: measure of income: net and gross amounts** [Jul 2020]

Tax is charged on the beneficiary’s entitlement. The beneficiary receives

- income net of tax and income expenses including TMEs (that receipt referred to below as ‘the net amount’), but is actually entitled to
- the untaxed amount of the income, net of income expenses including TMEs (that entitlement referred to below as ‘the gross amount’).

So the net amount is grossed up at the appropriate tax rates to arrive at the amount included in the beneficiary’s income for income tax purposes.

**Example**

Trustees income is £1,000; allowable TMEs are £250, income tax due is £200 (£1,000 at 20%).

The 'net amount' is £550

The 'gross amount' is £687.50 (£550 grossed up  $\times 100 \div 80$ ).

**TSEM8350. IIP beneficiaries: measure of income: tax paid by trustees**  
[Jul 2020]

The income tax paid by the trustees on that part of the income used for TMEs and other items excluded from the IIP beneficiary's entitlement is not part of the beneficiary's entitlement, because the income out of which the tax is paid is not part of the beneficiary's entitlement. But the rest of the tax paid by trustees represents income to which the IIP beneficiary is entitled.

The beneficiary is given credit for the tax already paid by the trustees (or deducted at source) on the amount included in the beneficiary's income for income tax purposes. That credit, i.e. tax already paid on the income to which the beneficiary is entitled, will necessarily be represented by the difference between the gross amount and the net amount as described in TSEM8345.

**TSEM8355. IIP beneficiaries: Section 500 ITA: basis of allowance** [Jul 2020]

Section 500(1)(a) ITA provides that allowable TMEs are allowed on the 'incurred' basis. So the beneficiary's entitlement in any tax year is income arising less allowable TMEs incurred.

Section 500 provides for unused allowable TMEs incurred in an earlier year to be used against the current tax year. In a year where allowable TMEs incurred exceed income arising the beneficiary's income entitlement will be nil. The excess allowable TMEs will be taken into account in later year/s. For an expense to be properly chargeable to income in trust law the trustees must have authority to put the final burden of that expense on the income fund. Which fund they use to pay it out of temporarily is not relevant.

In a year where there is not enough income, trustees may borrow from capital to pay income expenses, and in the next year reimburse capital from income. If an expense is properly chargeable to income, but the trustees pay all or part of it from trust capital in year 1 because there is no income or not enough income that year, the beneficiary's net income in year 1 will be reduced to nil. If in year 2 the trustees reimburse capital from income, that amount will be allowable against the beneficiary's income for tax purposes in year 2.

**Example**

Year 1, trust income £1,000, allowable TMEs £2,000.

Trustees pay £1,000 TMEs out of income, and £1,000 out of capital.

Beneficiary's taxable income £1,000 less TMEs £1,000 = nil.

Year 2, trust income £3,000, allowable TMEs £1,000.

Trustees pay £1,000 TMEs of current year out of income, and reimburse capital £1,000 for income expenses of previous year.

Beneficiary's taxable income £3,000 less £2,000 = £1,000.

**TSEM8360. IIP beneficiaries: tax law: order of set-off** [Jul 2020]

Section 503(2) ITA provides the order of set-off for TMEs to reduce the income of an IIP beneficiary. The order of set-off of TMEs in an IIP beneficiary's tax calculation is the same as for accumulation/discretionary trustees (TSEM8250). But there is no grossing up of expenses as there is for accumulation/ discretionary trustees.

**TSEM8365. IIP beneficiaries: tax law: order of set-off** [Jul 2020]

**Example**

An IIP trust receives income in 2010-11:

rental income £1,000

bank interest £800 (basic rate tax of £200 has been deducted at source).

Trustee pays TMEs properly chargeable to income of £250.

**Trustee's position**

	Rent	Interest
Gross income	£1,000	£1,000
Tax due	<u>£200</u>	<u>£200</u>
Net income	<u>£800</u>	<u>£800</u>

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £200 tax on the rent. TMEs do not affect the trustee's position.

**Beneficiary's position**

	Rent	Interest
Net income (as above)	£800	£800
Minus TMEs (set first against savings income)		<u>-£250</u>
	<u>£800</u>	<u>£550</u>
grossed up (@ 20%)	<u>£1,000</u>	<u>£687.50</u>

**TSEM8370. IIP beneficiaries: tax law: form R185 (Trust Income)** [Jul 2020]

In the example in TSEM8365 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

	Net amount	Tax paid
Box 3 non-savings income	£800.00	£200.00
Box 4 savings income	£550.00	£137.50

The beneficiary uses the information on form R185(Trust Income) to make his or her tax return or to claim repayment.

39.5.4 Mandated income: Expenses

The TSE Manual continues:

**TSEM8375. IIP beneficiaries: mandated income [Jul 2020]**

Where

[1] trustees mandate income (see TSEM3762) and

[2] the beneficiary pays TMEs that are properly chargeable to income,

such a beneficiary may set the TMEs against income chargeable at higher rate only.

This practice of charging such income at no higher than the basic rate necessarily follows from the case law propositions that

- there is no income tax relief at basic rate for income used to meet TMEs (see TSEM8310)
- although an IIP beneficiary receives income mandated to him, to the extent that it is used to meet expenses properly borne by income it is not a part of his entitlement (see TSEM8325).

## 39.6 Scots IT rates

HMRC say:

Payments from interest in possession trusts and from deceased estates are subject to a deduction of tax at the basic rate when they are made to beneficiaries by trustees and personal representatives respectively. This means that beneficiaries who are basic rate taxpayers will have no further tax to pay.

The Technical Note<sup>24</sup> proposed that the deductions by trustees and personal representatives should continue to be made at the UK basic rate (irrespective of whether the beneficiary was a Scottish taxpayer), but also that the income should always be taxed at UK rates in the hands of the beneficiary. This was to avoid basic rate taxpayer beneficiaries facing potentially small over or underpayments of tax if the Scottish basic rate differed from the UK basic rate.

However, when preparing the legislation to achieve this, it has proved extremely complex to identify this income separately in the hands of the beneficiary so that a different treatment can be applied to it – in law, such income is currently grouped with any other income of the same type arising to the beneficiary (e.g. property income from a trust

---

24 HMRC, “Clarifying the Scope of the Scottish Rate of Income Tax Technical Note” (May 2012).

in this scenario is not distinct from property income arising to the individual in their own right).

Given the degree of complexity for taxpayers that the necessary legislative changes would have brought about, the Government has instead decided that income from interest in possession trusts and deceased estates should be taxed at the Scottish rates when arising to Scottish taxpayer beneficiaries (no legislative change is required to achieve this).

This decision has been taken on the basis that, although it is recognised that this could cause some administrative issues if the Scottish and UK rates diverge in future, such an eventuality is preferable to making an already complex area of legislation even more challenging for taxpayers.<sup>25</sup>

### 39.7 DT relief

In relation to trusts, three states may be concerned:

- (1) The state where trust income arises
- (2) The state where the trustees are resident
- (3) The state where the beneficiary is resident

In this book I only consider the matter from a UK perspective: it will be necessary to consider foreign law viewpoints but that is outside the scope of this book.

In this chapter “beneficial ownership” is used in the treaty sense.<sup>26</sup> See Avery Jones, “The Treatment of Trusts under the OECD Model Convention [1989] BTR 65.

#### 39.7.1 *Beneficial ownership reliefs*

Article 10 OECD Model convention provides:

1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
2. However, dividends paid by a company which is resident of a

---

<sup>25</sup> HMRC, “Clarifying the Scope of the Scottish Rate of Income Tax Technical Note” (Dec 2014)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/389889/SRIT\\_Consequential\\_TechNote\\_vFinal.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/389889/SRIT_Consequential_TechNote_vFinal.pdf)

<sup>26</sup> See App 2.3 (Beneficial ownership: Meanings).

Contracting State may also be taxed in that State according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:

- a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company which holds directly at least 25 per cent of the capital of the company paying the dividends through a 365 day period that includes the day of the payment of the dividend (for the purpose of computing that periods, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend);
- b) 15 per cent of the gross amount of the dividends in all other cases.

Thus relief for UK dividends requires that the beneficial owner of the dividends is treaty-resident in the foreign jurisdiction.

Article 11 OECD Model convention provides:

1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.
2. However, interest arising in a Contracting State may also be taxed in that State according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.

Thus relief for UK interest similarly requires that the beneficial owner of the interest is treaty-resident in the foreign jurisdiction.

Article 12(1) OECD Model convention provides:

Royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Thus relief for UK royalties similarly requires that the beneficial owner of the royalties is treaty-resident in the foreign jurisdiction.

In some treaties beneficial ownership is added as a requirement even where it is not in OECD Model.

### 39.7.2 *Baker trusts*

In the case of Baker trusts, for the purposes of DT reliefs:

- (1) The trust is transparent ie the underlying trust income is regarded as

the income of the beneficiary.

- (2) The life tenant is the beneficial owner of the trust income payable to the life tenant. So if the trust receives (say) interest income, the income of the beneficiary is classified as interest, and if the beneficiary is treaty-resident in a treaty jurisdiction with an article providing exemption from UK source interest, the income qualifies for this DT relief.
- (3) The trustees (if otherwise taxable) qualify for DT relief to the extent that the beneficiary qualifies for the relief. This is another case of the trustees enjoying reliefs applicable to life tenants.
- (4) The position is different for a receipt which is income for tax purposes and capital for trust law purposes: in that case the trustees are the beneficial owner of the income.

HMRC agree. International Manual provides:

**INTM339540. Baker and Garland Trusts** [May 2020]

...

***Baker trusts***

Where 'Baker' applies, you cannot treat the trustees as being beneficial owners of a trust's income as it arises. Instead it is the beneficiaries who are the beneficial owners.

That is correct. The Manual continues:

Strictly, each beneficiary should claim in his or her own right.

This is not strictly correct. A trustee could in principle claim third-party DT relief in a case where a beneficiary failed to do so.<sup>27</sup> But nothing turns on that since HMRC do not apply what they identify as the strict law:

In practice it is acceptable to allow relief to the trustees, provided that you can be satisfied that the beneficiaries are entitled to relief under the same double taxation agreement as that under which the trustees have claimed. If this is not the case you may allow partial relief to the trustees by reference to the percentage of the interests that are relievable under the same DTA as the trustees. The beneficiaries who are not resident in the same country as the trustees will need to make

---

<sup>27</sup> See 103.21 (Third-party DT relief).

their own claims against the income distributed to them.

### 39.7.3 *Garland trusts*

In the case of *Garland* trusts, for the purposes of DT reliefs:

- (1) The trustee is the beneficial owner of the trust income.
- (2) The income of the beneficiary will qualify for DT relief under the “Other Income” article in OECD Model form (but not under the UK preferred form): see 38.12 (UK trust - non resident beneficiary: DT relief).
- (3) Point (2) would cause great difficulties. However by concession HMRC will regard a *Garland* trust as transparent *Baker* trust for DT purposes. I refer to this as the “**Garland concession**”.

International Manual provides:

#### **INTM339540. Baker and Garland Trusts** [May 2020]

...

##### ***Garland trusts***

Where ‘Garland’ applies, you can, for the purposes of the double taxation agreement, treat the trustees as the beneficial owners of trust income as it arises and allow relief. This treatment is given because we consider that the beneficiary’s right to income from the trust is against the trustees, rather than in the underlying assets held in trust. However, you should still establish the identity and residence of the beneficiaries. If any beneficiary is in the UK you should notify their tax office.

International Manual provides:

#### **INTM166030. Garland trusts** [May 2020]

In the case of income of a non-discretionary foreign trust of the type considered in the case of *Garland v Archer Shee* 15 TC 693, the beneficiaries are not concerned with the source of the trust income and whether or not it has borne UK tax. It is the practice to allow relief to beneficiaries, other than annuitants, in respect of the proportion of the income assessable as foreign income which is regarded as being derived from trust income which has borne United Kingdom tax. It is a condition of the relief that the amount of the income for higher rate purposes is to be treated as the sum of the amount assessable and the amount of tax on a grossed up basis which is applicable to the part of the assessment on which relief has been

given.

Submit the first claim from a beneficiary for this relief to CSTD, BAI, Assets Residence & Valuation before admitting the claim.

**INTM166040. Foreign tax** [May 2020]

Where foreign tax has been paid on trust income (including, in the case of dividends, any underlying tax where, exceptionally credit for such tax is due under the terms of an agreement – see INTM164410), it is the practice, in the case of a trust of a type referred to in INTM166030, to allow credit relief to beneficiaries, other than annuitants, for that foreign tax. Credit relief is given in the same way and to the same extent as if each beneficiary were entitled to his proportionate share of the underlying investments of the trust.

### 39.8 Baker or Garland trust jurisdiction?

The English courts assume that foreign trust jurisdictions apply English law principles in the absence of evidence to the contrary. But the Scottish courts will, I expect, assume Scots law principles, in the absence of evidence, with the opposite result. In practice HMRC have helpfully published a list which would constitute evidence which (in the absence of other evidence) a tribunal should be expected to accept.<sup>28</sup> This list only represents the HMRC view and could be challenged on the basis of expert evidence. The list assumes the trust has standard form wording. It is in principle possible to draft a non-transparent trust in a *Baker* jurisdiction. It may be possible to draft a transparent trust in a *Garland* jurisdiction by using non-standard wording.

The HMRC list is as follows. The endnotes are my own.

Argentina	No Trust Law	Canada <sup>2</sup>	
Australia <sup>1</sup>		British Columbia	Baker
New South Wales	Baker	Nova Scotia	Baker
Queensland	Baker	Ontario	Baker
South Australia	Baker	Saskatchewan	Baker
Victoria	Baker	Quebec	Garland <sup>3</sup>
Western Australia	Baker	Cayman Islands	Baker
Bahamas	Baker	Denmark	Garland
Barbados	Baker	Egypt	Baker
Belgium	No Trust Law	Estonia	Baker
Belize	Baker	Fiji	Baker

---

28 TSEM10423 [Jul 2020].

France <sup>4</sup>	No Trust Law		Law <sup>11</sup>
Ghana	Baker	New Hebrides	Baker
Gibraltar	Baker	New Zealand	Baker
Guernsey	Baker	Nigeria	Baker
Guyana	Baker	Norway	Garland
Hong Kong	Baker	St Helena	Baker
Hungary	Baker	St Vincent	Baker
India	Garland <sup>5</sup>	Singapore	Baker
Ireland, Republic of <sup>6</sup>	Baker	South Africa	Garland <sup>12</sup>
Isle of Man	Baker	South Yemen	Baker
Italy	No Trust Law <sup>7</sup>	Spain	No Trust Law
Japan	No Trust Law	Sri Lanka	Baker

Monaco	No Trust Law	Wisconsin	Garland
Montserrat	Baker	All other states <sup>14</sup>	Baker
Namibia	Garland	Zambia	Baker
Netherlands	No Trust	Zimbabwe	Garland

1 The list omits Tasmania, Northern Territory and Australian Capital Territory. It is considered that these are *Baker* jurisdictions.

2 This seems correct: see *Minister of National Revenue* [1956] SCR 49 especially [1953] Ex CR 292 at p.297 <https://www.kessler.co.uk/wp-content/uploads/2012/04/Minister-of-National-RevenuevTrans-Canada.pdf> The list of Canadian jurisdictions omits Alberta, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nunavut, Prince Edward Island and Yukon. It is suggested that these are the same as the other Canadian common law jurisdictions, i.e. *Baker* jurisdictions.

3 This seems well founded in Art. 1261 Code Civil Québec:

Le patrimoine fiduciaire, formé des biens transférés en fiducie, constitue un patrimoine d'affectation autonome et distinct de celui du constituant, du fiduciaire ou du bénéficiaire, sur lequel aucun d'entre eux n'a de droit réel.

The trust patrimony, consisting of the property transferred to the trust, constitutes a patrimony by appropriation, autonomous and distinct from that of the settlor, trustee or beneficiary *and in which none of them has any real right.*

See also Gretton, "Trusts without Equity" (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5.

4 France was omitted (accidentally?) from the version of the list published 1 April 2008, but the comment in the earlier version of the list is printed here as it is correct.

5 *Duncan's Executors v Adamson* (1935) 14 ATC 22 so held. This seems soundly based on s.3 [India] Trusts Act 1882: "The 'beneficial interest' or 'interest' of the beneficiary is his right against the trustee as owner of the trust-property."

6 The list omits Northern Ireland: this is a *Baker* jurisdiction.

- 7 This is wrong: Italy does have a trust law.
- 8 Harriet Brown agrees: see *Jersey Law of Trusts* (4th ed., 2013), 2.52.
- 9 I think this will apply to any Liechtenstein entities which is classified as a trust; see 86.9 (Foundation: Stiftung); 86.11 (Treuunternehmen/Trust Enterprise).
- 10 This is wrong: Malta has had a trust law since at least 1989. Section 9 [Malta] Trusts and Trustees Act 1989 provides: "A beneficiary has an entitlement, called a beneficial interest, in or to the trust property..."; so Malta is a *Baker* jurisdiction.
- 11 This is wrong: The Netherlands does have a trust law.
- 12 Honoré agrees: *South African Law of Trusts* (5<sup>th</sup> ed., 2002), para 349.
- 13 New York was (rather implausibly) found to be a *Garland* jurisdiction in *Garland v Archer-Shee* 15 TC 693. The finding of fact in *Garland* was also made in *Timpson's Executors v Yerbury* 20 TC 155 at p.157, and was accepted as common ground in *Astor v Perry* 19 TC 255. See "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", Avery Jones in *Studies in the History of Tax Law*, 2004 p.46, <https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf> for contrary views as to US law. Since foreign law is a question of fact, a court would not be bound by those decisions, but in practice they are not likely to be challenged.
- 14 This may not be correct for all the other states. In particular, Ohio and New Jersey have been found to be *Garland* jurisdictions. See *The Marchioness of Ormond v Brown* 17 TC 333 at p.341, *Kelly v Rogers* 19 TC 692 at p.696. But see the above footnote. In *Lawson v Rolfe* 46 TC 199 it was common ground that California was a *Baker* jurisdiction.

## CHAPTER FORTY

# RATES OF INCOME TAX/CGT

40.1

### *Cross references*

The following topics are considered elsewhere:

38.2.1 (Discretionary-trust IT rates)

## **40.1 IT Rates: Introduction**

Rates of income tax vary according to:

- (1) The type of income:
  - (a) Savings Income
  - (b) Dividend Income
  - (c) Other income (not Savings/Dividend Income)
- (2) The type of person receiving the income:
  - (a) Individuals:
    - (i) Scottish/Welsh taxpayers
    - (ii) Other UK residents: England/Northern Ireland taxpayers
    - (iii) Non-residents
  - (b) Non-individuals:
    - (i) Trusts
    - (ii) Others
- (3) The amount of income of an individual

This topic requires a book to itself.

## **40.2 23 IT rates in outline**

IT rates on individuals are as follows:

<b>Name</b>	<b>Rate</b>	<b>Charge on amount</b>	<b>Applies to</b>
<i>Main Rates</i>			England/N. Ireland
Basic rate	20%	up to basic rate limit	

Higher rate	40%	above basic rate limit	
Additional rate	45%	above higher rate limit	
<i>Default Rates</i>			Non-residents
Default Basic Rate	20%	up to basic rate limit	
Default Higher Rate	40%	above basic rate limit	
Default Additional Rate	45%	above higher rate limit	
<i>Dividend rates</i>			Everywhere
Dividend nil rate	0%		
Dividend ordinary rate	7.5%	up to basic rate limit	
Dividend upper rate	32.5%	above basic rate limit	
Dividend additional rate	38.1%	above higher rate limit	
<i>Savings Income rates</i>			Everywhere
Starting rate for savings	0%	up to starting rate limit	
Savings nil rate	0%		
Savings basic rate	20%	up to basic rate limit	
Savings higher rate	40%	above basic rate limit	
Savings additional rate	45%	above higher rate limit	
<i>Scottish rates</i>			Scotland
Scottish starter rate	19%	up to £2,097	
Scottish basic rate	20%	£2,049-£12,726	
Scottish intermediate rate	21%	£12,726 - £31,092	
Scottish higher rate	41%	£31,092 - £150,000	
Scottish top rate	46%	above £150,000	
<i>Welsh rates</i>			Wales
Welsh basic rate	20%	up to basic rate limit	
Welsh higher rate	40%	above basic rate limit	
Welsh additional rate	45%	above higher rate limit	

It is therefore necessary to distinguish:

- (1) The *names* of IT rates, of which we have twenty three
- (2) The *numbers* ie *percentages*, of which we have ten: 0; 7.5; 19; 20; 21; 32.5; 38.1; 40; 45; 46%

In outline, the rates are imposed as follows:<sup>1</sup>

<b>Type of taxpayer</b>	<b>Rates on</b>		
<i>Individuals</i>	<i>Savings Income</i>	<i>Dividend Income</i>	<i>Other income</i>
England/N Ireland	Savings rates	Dividend rates	Main Rates
Scottish taxpayer	Savings rates	Dividend rates	Scottish rates
Welsh taxpayer	Savings rates	Dividend rates	Welsh rates
Non-UK resident	Savings rates	Dividend rates	Default Rates

---

<sup>1</sup> This is a reworked version of the summary table in s.9A ITA.

*Non-individual*

IP trust/non-res. co.	Default Basic Rate	Dividend ord. rate	Default Basic Rate
Discretionary trust	Trust rate	Dividend trust rate	Trust rate

40.2.1 *Names of rates: Terminology*

The terminology used in the names is unhelpful:

- (1) The 5 rates called “additional” rates are in fact the top rates.<sup>2</sup>
- (2) The 5 rates called “higher” rates are in fact intermediate rates, in the sense that they fall between the lowest rates and the top rates.
- (3) Similarly, the dividend “upper” rate is an intermediate rate, in the sense that it falls between the dividend ordinary rate (which is not “ordinary”) and the top dividend rate.
- (4) The Scottish “intermediate” rate is intermediate, in the sense that it falls somewhere between the lowest and the top Scottish rates, but it is one of 3 rates which do that, any of which could be described as intermediate.
- (5) The 3 rates called “Default Rates” are not “default” in the normal sense of the word: they do not apply by default. They apply to non-resident individuals and non-individuals.
- (6) The term “Main Rates” (used to describe the basic/higher/additional rates) is inapt: they are not “main” in the normal sense of the word.
- (7) The starting rate for savings is 0%, and so would more naturally be called a nil rate; but that term has already been taken by the savings nil rate.

I adopt the statutory terminology, as anything else would be even more confusing, but for clarity:

- I refer to the 5 “additional” rates as “**additional (top) rates**”
- I write Main Rates/Default Rates with initial capitals

When studying this topic it is important to keep these points of terminology in mind, or the reader may become confused.

For distinctions between nil-rates and allowances, see 41.1.1 (Allowances terminology).

40.3 **Devolution issues**

---

<sup>2</sup> The terminology is better in Scotland, which uses the term “top rate” and does not use the term “additional rate”.

### 40.3.1 *Why devolve IT rates?*

The Institute for Government provide some wider context:<sup>3</sup>

The choice of which taxes to devolve to Scotland and Wales reflects several constraints. The easiest taxes to devolve are those relating to land or property, given that revenue is very easy to attribute geographically, and these fixed assets cannot easily be moved in search of jurisdictions with lower tax. Of the larger taxes, income tax was judged to be the best option for devolution, partly because of its high visibility to taxpayers, but also because of difficulties that would have arisen from devolving other taxes. The UK-wide system for national insurance would have been particularly complicated to break up due to the link between the National Insurance Fund and benefit payments (which are not devolved in Scotland and Wales). Meanwhile, devolving control of VAT rates would not have been compatible with EU law, and would also have created new costs for businesses operating across the UK's four nations, and corporation tax was ruled out as an option for devolution in Scotland and Wales as it could (?) have resulted in unwelcome tax competition within Great Britain.<sup>4</sup>

### 40.3.2 *Complexity*

While devolution requires separate Scottish/Welsh rates, why do we have *four* types of basic rate (basic rate and Scottish/Welsh/Default basic rates); and likewise for the higher and additional (top) rates? This is to satisfy constitutional proprieties:

(1) The Scots/Welsh rates allow Scotland/Wales to set different tax rates

---

<https://webarchive.nationalarchives.gov.uk/20140605075122/http://commissionondevolutioninwales.independent.gov.uk>

- (2) The basic/Default Rates satisfy the requirements of EVEL (English votes for English laws); it allows the Main Rates (which affect England/Northern Ireland) to be voted on separately from the Default Rates (which do not).

It is complicated; but devolution and simplicity are conflicting values. CIOT anticipated the complexity:

3.5 Scottish taxpayers will face a more complex system than taxpayers in the rest of the UK, since

[1] their savings [and dividend] income will be subject to UK income tax rates and

[2] their [non-savings non-dividend] income will be subject to Scottish income tax rates... This could make it difficult for many Scottish taxpayers to fully understand their tax calculations and liabilities.<sup>5</sup>

In the 2018/19 edition of this work I said:

This comment implies that UK taxpayers outside the Scottish rate system “fully understand” their tax calculations which readers of this chapter may think highly improbable.

But the challenge is not just for taxpayers but also for HMRC. In 2019 HMRC issued a number of tax calculations to Scottish taxpayers which incorrectly apply UK-wide rates instead of specific Scottish rates.<sup>6</sup> Readers might speculate what penalties HMRC would consider appropriate if a taxpayer made a similar mistake.

#### 40.3.3 *Public understanding*

CIOT comment plaintively on public understanding of the Welsh rates:

... awareness and understanding of the WRIT by the public in Wales remains low despite considerable efforts to engage the public. Low levels of understanding in relation to the tax system are a national not

---

5 CIOT response to the paper implausibly entitled “Scotland in the United Kingdom: An enduring settlement” (2015)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/150331%20Scotland%20in%20the%20United%20Kingdom%20-%20An%20enduring%20settlement%20-%20CIOT%20comments.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/150331%20Scotland%20in%20the%20United%20Kingdom%20-%20An%20enduring%20settlement%20-%20CIOT%20comments.pdf?download=1)

Also see Eden, “All fur coat and nae knickers” [2018] BTR 25.

6 CIOT News Service for CTAs (11 Jan 2019).

just a devolved taxes issue. ... Realistically it is however challenging to generate interest when rates are aligned so the practical effect for most Welsh taxpayers is limited to the PAYE C code.<sup>7</sup>

Would anyone expect otherwise? It is rational to be clueless about the Welsh rates of income tax. There is no financial penalty for being wrong. The same is often true of the tax system more generally.

#### 40.3.4 *IT competition within UK*

The Scottish Government have considered this:

On the one hand, behavioural effects between Scottish and rUK taxpayers may be even more significant than standard assumptions because labour mobility between Scotland and the rest of the UK could be larger than between the UK and, say, the rest of Europe. This is because there are no cultural or language barriers and many individuals have much closer ties with the rest of the UK and may therefore relocate easily. In addition, many top rate taxpayers may be able to choose their residency within the UK, particularly if they are employed or working in UK-wide businesses. It would also be possible for individuals to live in England but continue to work in Scotland or vice versa. In addition, instead of migrating physically, high-income Scottish taxpayers could move their residence by rearranging their domestic affairs – for example by deciding to spend more time at a London flat than in an Edinburgh house, and making the flat their base.

On the other hand, income tax in Scotland will apply to non-savings non-dividend income only. Since this is largely income from employment, there are fewer opportunities for individuals to artificially minimise their tax liabilities compared to income from savings and dividends. Therefore, for those serving the Scottish market or based in Scottish institutions, it may be more difficult to engage in behaviours that reduce their Scottish tax burden. This could reduce the scale of the potential behavioural response.<sup>8</sup>

7 CIOT, “The fifth Welsh Parliament” Mar 2021

[https://www.tax.org.uk/sites/default/files/210308%20The%20fifth%20Welsh%20Parliament%20-%20joint%20CIOT%20and%20LITRG%20comments\\_Redacted.pdf](https://www.tax.org.uk/sites/default/files/210308%20The%20fifth%20Welsh%20Parliament%20-%20joint%20CIOT%20and%20LITRG%20comments_Redacted.pdf)

8 The Scottish Government, “The impact of an increase in the additional rate of income tax from 45p to 50p in Scotland” (2016)

<http://www.gov.scot/Resource/0049/00497818.pdf>

The practical effect of these considerations was to prevent the Scottish Government from raising the Scottish rate of income tax to 50%.<sup>9</sup>

In 2018, CIOT said:

The decision to freeze the higher rate threshold is unlikely to result in a rush to legitimately avoid paying higher rates of Scottish tax – for example by relocating to other parts of the UK or choosing to incorporate a business in order to benefit from lower rates of UK corporation and dividend tax.

But they do lend themselves to a growing perception that Scotland is taking a different tax tack to the rest of the country, particularly as the UK income tax regime moves in the opposite direction.<sup>10</sup>

For some individuals with homes in Scotland and rUK, it can be finely balanced whether they are Scottish taxpayers or not: a small change in lifestyle may make the difference. In computing the loss to Scotland of a taxpayer moving jurisdiction, or incorporating an unincorporated business, one must bear in mind that the loss to Revenue Scotland is not the (relatively small) difference between the Scots/rUK rates; it is the whole of the income tax payable by that individual (which after migration is credited to rUK, not to Scotland).<sup>11</sup>

Similar considerations apply in Wales.<sup>12</sup>

#### 40.3.5 *Devolved rates: DTAs*

HMRC say:

---

9 2018 saw the Scots higher/additional rates nudge up to 41%/46%, but an increase to 50% was again rejected for the same reason: Scottish Government, “The Role of Income Tax in Scotland’s Budget” at p.23

<http://www.gov.scot/Resource/0052/00527052.pdf>

10 CIOT press release 9 Jan 2019

<https://www.tax.org.uk/media-centre/press-releases/press-release-chartered-institute-taxation-comments-scottish-budget>

11 Except so far as Scotland may benefit from an increased grant, under the Barnett formula.

12 See Welsh Parliament Finance Committee, “Impact of variations in national and sub-national income tax” (2020)

<https://senedd.wales/laid%20documents/cr-ld13276/cr-ld13276-e.pdf>

As the Scottish rate of income tax is not a discrete tax<sup>13</sup> it remains covered by existing UK double taxation agreements.<sup>14</sup>

## 40.4 Dividend/Savings Income

It is helpful next to consider the definitions of these terms.

### 40.4.1 “Dividend Income”

Dividend Income is defined in s.19 ITA:

- (1) This section applies for the purposes of the Income Tax Acts.
- (2) “Dividend income” is income which is—

There are 5 categories of Dividend Income:<sup>15</sup>

<b>ITTOIA</b>	<b>Type of income</b>	<b>See para</b>
Chap 3 Part 4	Dividend/distribution of UK resident company	29.2
Chap 4 Part 4	Dividends of non-UK resident company	29.5.1
Chap 5 Part 4	Stock dividends of UK resident company	<i>Not discussed</i>
Chap 6 Part 4	Release of loan to participator in close co	<i>Not discussed</i>
Chap 8 Part 5	Relevant foreign distributions <sup>16</sup>	29.5.4

That applies to distributions of non-resident companies other than dividends (which are Dividend Income as they are within Chapter 4). The drafting is cumbersome, but it works.

“Dividend Income” is not wholly apt to describe these categories of income, but it serves as a short label. “Dividend-type income” would be slightly more accurate but it seems best to adopt the statutory terminology. I write it with initial capitals to reflect the technical nature of the term.

13 Author’s footnote: This is self-evident, but if authority is needed, see *London County Council v Attorney General* 4 TC 265.

14 HMRC, “Clarifying the Scope of the Scottish Rate of Income Tax Technical Note” (2012).

15 For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

16 Defined s.19(3) ITA:

“In subsection (2) “relevant foreign distribution” means a distribution of a non-UK resident company which—

(a) is not chargeable under Chapter 4 of Part 4 of ITTOIA 2005, but

(b) would be chargeable under Chapter 3 of that Part if the company were UK resident.”

#### 40.4.2 “Savings Income”

Savings Income is defined in s.18 ITA:

- (1) This section applies for the purposes of the Income Tax Acts.
- (2) “Savings income” is income—
  - (a) which is within subsection (3) or (4), and
  - (b) which is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

There are five categories of Savings Income within s.18(3) and (4). Section 18(3) ITA lists interest and interest-like income:

Income is within this subsection if it is—

There are 4 categories of income within s.18(3):<sup>17</sup>

Provision	Type of income	See para
<i>ITTOIA</i>		
Chap. 2 Part 4	Interest	25.1
Chap. 7 Part 4	Purchased life annuity payments <sup>18</sup>	<i>Not discussed</i>
Chap. 8 Part 4	Deeply discounted securities	28.1
<i>ITA</i>		
Chap. 2 Part 12	Accrued income profits	27.1

Section 18(4) ITA is chargeable event income:<sup>19</sup>

Income is within this subsection if—

- (a) it is chargeable under Chapter 9 of Part 4 of ITTOIA 2005 (gains from contracts for life insurance etc), and
- (b) an individual is, or personal representatives are, liable for income tax on it (under section 465 or 466 of that Act).

“Savings Income” is not apt to describe these categories of income, but it serves as a short label and there is no better term. I write it with initial capitals to reflect the technical nature of the term.

There is again no good short term to describe these categories. “Earned

<sup>17</sup> For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

<sup>18</sup> other than income from annuities specified in s.718(2) ITTOIA (annuities purchased from certain life assurance premium payments or under wills).

<sup>19</sup> See 62.1 (Policies: Introduction).

income” is misleading, though it might be used as a shorthand term in some simple contexts.

#### 40.4.3 *Savings/Dividends top of income*

Section 16 ITA(1) provides:

This section has effect for determining—<sup>20</sup>

The section then identifies six purposes for which s.16 rules apply, numbered, non-numerically of course, (za) to (b):

##### **Para Topic**

##### **See para**

- (za) which part of a Scottish taxpayer's income consists of savings income
- (zb) the rate at which IT would be charged on the non-savings income of a Welsh taxpayer apart from s.11B ITA
- (a) the extent to which income up to the starting rate limit for savings consists of savings income,
- (aa) the extent to which income above the starting rate limit for savings consists of savings income, and
- (ab) the rate at which IT would be charged on savings income above the starting rate limit for savings apart from sections 11D and 12A,
- (b) the rate at which IT would be charged on dividend income apart from s.13.

Section 16(1) is just a signpost provision; s.16(2) ITA applies the s.16 rules more widely:

It [s.16] also has effect for all other income tax purposes except for the purposes of—

- (a) section 491 (special rates not to apply to first slice of trustees' trust rate income), and
- (b) sections 535 to 537 of ITTOIA 2005 (gains from contracts for life insurance etc: top slicing relief).

Section 16 ITA then provides the rules:

- (3) If a person has savings income but no dividend income,<sup>21</sup> the

<sup>20</sup> For clarity I have set this out in slightly abbreviated tabular form, rather than a precise quote of the statute.

<sup>21</sup> Section 16(7) ITA provides: “References in this section to dividend income do not include dividend income which is relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance

savings income is treated as the highest part of the person's total income.

(4) If a person has dividend income but no savings income, the dividend income is treated as the highest part of the person's total income.

(5) If a person has both savings income and dividend income—

- (a) the savings income and dividend income are together treated as the highest part of the person's total income, and
- (b) the dividend income is treated as the higher part of that part of the person's total income.

In short, Dividend Income comes at the top, then Savings Income, then other income.

Section 16(6) ITA provides:

See section 1012 for the relationship between—

- (a) the rules in this section, and
- (b) other rules requiring particular income to be treated as the highest part of a person's total income.<sup>22</sup>

## 40.5 IT rates: The numbers

This paragraph sets out the provisions which specify the *amounts* or *percentages* of the 23 IT rates; the paragraphs which follow identify identifies the types of income to which each of those rates apply.

### 40.5.1 Main Rates

Section 6(1) ITA defines the expression “Main Rates”:

The main rates at which income tax is charged are—

- (b) the basic rate,
- (c) the higher rate, and
- (d) the additional rate.

What are the rates? Section 6(2) ITA provides:

The basic rate, higher rate and additional rate for a tax year are the rates determined as such by Parliament for the tax year.

So we turn to s.2 FA 2021:

---

basis).”

<sup>22</sup> See App.2.22 (Highest part of income).

For the tax year 2021-22 the main rates of income tax are as follows—

- (a) the basic rate is 20%;
- (b) the higher rate is 40%;
- (c) the additional rate is 45%.

Section 989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts—

“basic rate” means the rate of income tax determined in pursuance of section 6(2),

“higher rate” means the rate of income tax determined in pursuance of section 6(2),

“additional rate” means the rate of income tax determined in pursuance of section 6(2)

In other words, references to basic/higher/additional rates are, unless otherwise indicated, references to the Main Rates.

#### 40.5.2 *Scottish rates*

Section 80C(1) Scotland Act 1998 provides:

The Scottish Parliament may by resolution (a “Scottish rate resolution”) set the Scottish basic rate, and any other rates, for the purposes of section 11A of the Income Tax Act 2007 (which provides for the income of Scottish taxpayers which is charged at those rates).

The resolution was made 25 February 2021 and provides:

That the Parliament agrees that, for the purposes of section 11A of the Income Tax Act 2007 (which provides for income tax to be charged at Scottish rates on certain non-savings and non-dividend income of a Scottish taxpayer), the Scottish rates and limits for the tax year 2021-22 are as follows—

- (a) a starter rate of 19%, charged on income up to a limit of £2,097,
- (b) the Scottish basic rate is 20%, charged on income above £2,097 and up to a limit of £12,726,
- (c) an intermediate rate of 21%, charged on income above £12,726 and up to a limit of £31,092,
- (d) a higher rate of 41%, charged on income above £31,092 and up to a limit of £150,000, and
- (e) a top rate of 46%, charged on income above £150,000.

Scottish tax rates are distinct not just in amount but also by distinct Scottish bands.

#### 40.5.3 Scots rates: Analysis

The starter rate is symbolic. In round terms, a 1% discount on the first £2k of income saves the taxpayer some £20.

Different rates raise the issue of tax equalisation for those posted to Scotland (and in due course, Wales).<sup>23</sup> Until 2018, tax equalisation was only an issue for those posted abroad.<sup>24</sup>

See too 1.2.3 (Tax competition within UK).

#### 40.5.4 Welsh rates

Section 116D(1) Government of Wales Act 2006 provides:

The Assembly may by resolution (a “Welsh rate resolution”) set one or more of the following—

- (a) a Welsh rate for the purpose of calculating the Welsh basic rate;
- (b) a Welsh rate for the purpose of calculating the Welsh higher rate;
- (c) a Welsh rate for the purpose of calculating the Welsh additional rate.

Section 6B(1) ITA provides:

The Welsh basic rate, the Welsh higher rate and the Welsh additional rate for a tax year are calculated as follows.

*Step 1* Take the basic rate, higher rate or additional rate.

*Step 2* Deduct 10 percentage points.

*Step 3* Add the Welsh rate (if any) set by the National Assembly for Wales for that year for the purpose of calculating the Welsh basic rate,

---

<sup>23</sup> The issue has arisen in the context of the armed forces: “The UK government is looking at ways to “counter tax rises” for armed forces personnel based in Scotland.... Gavin Williamson (defence secretary) confirmed an “urgent review” is under way to look at how to counter “the unjustified raid on pay packets”: (2018) <http://www.bbc.co.uk/news/uk-scotland-43363923>

But the wording is tendentious and the story is political, not fiscal. Just as “the art of taxation consists in so plucking the goose as to procure the largest quantity of feathers with the least possible amount of hissing”, the art of opposition is to maximise the hiss.

<sup>24</sup> See 33.43 (Tax equalisation).

the Welsh higher rate or the Welsh additional rate (as the case may be).

The relevant resolution provides:

- a) the proposed Welsh rate for the basic rate of income tax is 10p;
- b) the proposed Welsh rate for the higher rate of income tax is 10p; and
- c) the proposed Welsh rate for the additional rate of income tax is 10p.<sup>25</sup>

So the Welsh basic higher/additional rates are the same as for England/Northern Ireland.

The Welsh rules are based on the Scottish Variable Rate, which was introduced by the Scotland Act 1998 but later replaced by the current Scottish rules.

#### 40.5.5 *Default Rates*

Section 6C ITA provides:

The default basic rate, default higher rate and default additional rate for a tax year are the rates determined as such by Parliament for the tax year.

So we turn to s.3(1) FA 2021:

For the tax year 2021-22 the default rates of income tax are as follows—

- (a) the default basic rate is 20%;
- (b) the default higher rate is 40%;
- (c) the default additional rate is 45%.

#### 40.5.6 *Savings Income rates*

Section 7 ITA provides:

- (1) The starting rate for savings is 0%.
- (2) The savings nil rate is 0%.

Section 7A ITA provides:

The savings basic rate, savings higher rate and savings additional rate for a tax year are the rates determined as such by Parliament for the tax year.

---

<sup>25</sup> <http://record.assembly.wales/Plenary/5417?lang=en-GB#A47984>

The rate might more clearly be expressed as 10%, not 10p, but it does not matter.

So we turn to s.3(2) FA 2021:

For the tax year 2021-22 the savings rates of income tax are as follows—

- (a) the savings basic rate is 20%;
- (b) the savings higher rate is 40%;
- (c) the savings additional rate is 45%.

I refer to these together as “**savings rates**”.

#### 40.5.7 *Dividend rates*

Section 8 ITA provides:

- (A1) The dividend nil rate is 0%.
- (1) The dividend ordinary rate is 7.5%.
- (2) The dividend upper rate is 32.5%.
- (3) The dividend additional rate is 38.1%.

I refer to these together as “**dividend rates**”.

### 40.6 IT rates: Application

Armed with the relevant terminology, I turn to identify the types of income to which each IT rate applies.

#### 40.6.1 *Application of Main Rates*

Section 10 ITA imposes the charge at the Main Rates (basic/higher/additional rates):

- (2) Income tax on an individual’s income up to the basic rate limit is charged at the basic rate.
- (3) Income tax is charged at the higher rate on an individual’s income above the basic rate limit and up to the higher rate limit.
- (3A) Income tax is charged at the additional rate on an individual’s income above the higher rate limit.

So the Main Rates apply to an individual’s income, ie they apply generally unless disapplied by other provisions. They are, in a sense, default rates (though the term Default Rates is used elsewhere, and there are so many exceptions that the Main Rates are frequently disapplied.

Section 10(4) ITA signposts exceptions. In short:

<b>Section</b>	<b>Topic</b>
s.11A	Scottish rates
s.11B	Welsh rates
s.11C	Default Rates: non-UK residents
s.11D	Savings basic/higher/additional rates
s.12	Starting rate for savings
s.12A	Savings nil rate
s.13	Dividend rates

#### 40.6.2 “Basic/higher rate limits”

Section 10 ITA provides the figures:

- (5) The basic rate limit is £37,700.
- (5A) The higher rate limit is £150,000.

For the effect of freezing these limits, see 40.18 (Inflation/fiscal drag).

#### 40.6.3 *Application of Scottish rates*

Section 11A ITA provides:

- (1A) Income tax is charged at Scottish rates on the non-savings income of a Scottish taxpayer.<sup>26</sup>
- (4) For the purposes of this section, “non-savings income” means income which is not savings income.

So the Scottish rates apply to Scottish taxpayers non-Savings income unless disapplied by other provisions. Section 11A(5) ITA signposts exceptions; the main one is s.13 (dividend rates).<sup>27</sup> So Scottish rates apply to non-Savings/Dividend Income of a Scottish taxpayer.

#### 40.6.4 *Application of Welsh rates*

Section 11B ITA provides:

- (1) Income tax is charged at the Welsh basic rate on the income of a Welsh taxpayer<sup>28</sup> which—
  - (a) is non-savings income, and

---

<sup>26</sup> See 5.45 (Scottish/Welsh taxpayers).

<sup>27</sup> The remittance basis charge is another exception, see 16.12.13 (Scottish/Welsh taxpayer).

<sup>28</sup> See 5.45 (Scottish/Welsh taxpayers).

- (b) would otherwise be charged at the basic rate.
- (2) Income tax is charged at the Welsh higher rate on the income of a Welsh taxpayer which—
  - (a) is non-savings income, and
  - (b) would otherwise be charged at the higher rate.
- (3) Income tax is charged at the Welsh additional rate on the income of a Welsh taxpayer which—
  - (a) is non-savings income, and
  - (b) would otherwise be charged at the additional rate.
- (4) For the purposes of this section, “non-savings income” means income which is not savings income.

Section 11B(5) ITA signposts exceptions; the main one is s.13 (dividend rates).<sup>29</sup> So Welsh rates apply to non-Savings/Dividend Income of a Welsh taxpayer.

#### 40.6.5 *Application of Default Rates*

Section 11(1) ITA provides:

Income tax is charged at the default basic rate on the income of persons other than individuals.

So the Default Basic Rate applies to:

- (1) trustees where the trust rates does not apply
- (2) non-resident companies where subject to IT
- (3) PRs

The Default Basic Rate applies unless disapplied by other provisions.

Section 11(2) ITA signposts exceptions, in short:

- (1) s.14 ITA (dividend ordinary rate)
- (2) Chapters 3 to 6 Part 9 ITA (trusts<sup>30</sup>)

Section 11C ITA provides:

- (1) Income tax on a non-UK resident individual’s income up to the basic rate limit is charged at the default basic rate.
- (2) Income tax is charged at the default higher rate on a non-UK

---

<sup>29</sup> The remittance basis charge is another exception, see 16.12.13 (Scottish/Welsh taxpayer).

<sup>30</sup> For rates of tax on trustees, see 38.2 (Tier 1: Income receipt: trust charge).

resident individual's income above the basic rate limit and up to the higher rate limit.

(3) Income tax is charged at the default additional rate on a non-UK resident individual's income above the higher rate limit.

The Default Rates apply to non-UK resident individual's income unless disapplied by other provisions. Section 11C(4) ITA signposts exceptions, in short:

<b>Section</b>	<b>Topic</b>
s.11D	savings basic/higher/additional rates
s.12	starting rate for savings
s.12A	savings nil rate
s.13	dividend rates

## 40.7 Application of savings rates

Section 11D ITA provides:

(1) Income tax is charged at the savings basic rate on an individual's income which—

- (a) is saving income,<sup>31</sup> and
- (b) would otherwise be charged at the basic rate or the default basic rate.

Since the savings basic rate, the basic rate and the Default Basic Rate are all 20%, this does not have any effect.

(2) Income tax is charged at the savings higher rate on an individual's income which—

- (a) is savings income, and
- (b) would otherwise be charged at the higher rate or the default higher rate.

Since these rates are all 40%, this does not have any effect.

(3) Income tax is charged at the savings additional rate on an individual's income which—

- (a) is savings income, and
- (b) would otherwise be charged at the additional rate or the default additional rate.

---

31 This is a slip for Savings Income.

Since these rates are all 45%, this does not have any effect.

These savings rates apply to Savings Income unless disapplied by other provisions. Section 11D(4) ITA provides:

Subsections (1) to (3)–

- (a) have effect after sections 12 and 12A [starting rate for savings/savings nil rate] have been applied (so that any reference in subsections (1) to (3) to income which would otherwise be charged at a particular rate does not include income charged at the starting rate for savings or at the savings nil rate), and
- (b) are subject to any other provisions of the Income Tax Acts (apart from sections 10 and 11C [Main Rates, Default Rates]) which provide for income to be charged at different rates of income tax in some circumstances.

Section 11D(6) ITA provides:

In relation to an individual who is a Scottish taxpayer or Welsh taxpayer, references in this section to income which would otherwise be charged at a particular rate are to be read as references to income that would, if the individual were neither a Scottish taxpayer nor a Welsh taxpayer (but were UK resident), be charged at that rate (and subsection (5) is to be read accordingly).

## **40.8 Starting rate for savings**

Section 12(1) ITA provides:

Income tax is charged at the starting rate for savings on so much of an individual's income up to the starting rate limit for savings as–

- (a) is savings income, and
- (b) would otherwise be charged at the basic rate or the default basic rate.

As the starting rate for savings is 0%, this is in effect an allowance or exemption.

Section 12(3) ITA provides:

The starting rate limit for savings is £5,000.

As to how one identifies an individual's "income up to the starting rate

limit”, see 40.4.3 (Savings/Dividends top of income).

In short, the starting rate for savings is not available to a taxpayer who has non-Savings Income in excess of the starting rate limit for savings. So in practice the benefit of the starting rate for savings is limited to:

- (1) UK resident individuals with very low income
- (2) Non-resident individuals with very low UK source income

The starting rate for savings applies to Savings Income unless disappplied by other provisions. Section 12(2) ITA provides:

This is subject to any provisions of the Income Tax Acts (apart from section 10) which provide for income of an individual to be charged at different rates of income tax in some circumstances.

## 40.9 Savings nil rate

### 40.9.1 “Step 3 income”

The legislation uses the term “Step 3 income”, defined s.12A(7) ITA:

For the purposes of this section, an individual’s “Step 3 income” is the individual’s net income less allowances deducted at Step 3 of the calculation in section 23.

The allowances deducted are the personal allowance and the blind person’s allowance.

### 40.9.2 *The nil rate*

Section 12A(1) ITA provides:

- (1) This section applies in relation to an individual if—
  - (a) the amount of the individual’s Step 3 income is greater than £L, where £L is the amount of the starting rate limit for savings, and

“L” stands for the starting rate Limit [£5k].

- (b) when the individual’s Step 3 income is split into two parts—
  - (i) one (“the individual’s income up to the starting rate for savings”) consisting of the lowest £L of the individual’s Step 3 income, and
  - (ii) the other (“the individual’s income above the starting rate limit for savings”) consisting of the rest of the individual’s

Step 3 income,  
some or all of the individual's income above the starting rate limit for savings consists of savings income (whether or not some or all of the individual's income up to the starting rate limit for savings consists of savings income).

Section 12A(2) ITA defines two more letters. In short:

“A” is the individual's savings allowance  
X (for “**ex**cess”) is Savings Income above A (the individual's savings allowance). In full detail s.12A(2) ITA provides:

In this section—

£A is the amount of the individual's savings allowance (see section 12B),

“the excess” is so much of the individual's income above the starting rate limit for savings as consists of savings income, and  
£X is the amount of the excess.

Armed with the meaning of these letters, we can turn to the relief. Section 12A ITA provides:

(3) If £X is less than or equal to £A, income tax is charged at the savings nil rate (rather than the basic, higher or additional rate) or the default basic, default higher or default additional rate on the excess.

(4) If £X is more than £A, income tax is charged at the savings nil rate (rather than the basic, higher or additional rate) or the default basic, default higher or default additional rate on the lowest £A of the excess.

The reader may think that this could have been more clearly expressed.

The savings nil rate applies unless disapplied by other provisions. Section 12A(5) ITA provides:

Subsections (3) and (4) are subject to any provisions of the Income Tax Acts (apart from sections 10 and 11C) which provide for income to be charged at different rates of income tax in some circumstances.

### 40.9.3 *Amount of savings allowance*

Section 12B ITA provides:

(1) Subsections (2) to (4) determine the amount of an individual's savings allowance for a tax year.

(2) If any of the individual's income for the year is additional-rate

income, the individual's savings allowance for the year is nil.

(3) If—

- (a) any of the individual's income for the year is higher-rate income, and
- (b) none of the individual's income for the year is additional-rate income,

the individual's savings allowance for the year is £500.

(4) If none of the individual's income for the year is higher-rate income, the individual's savings allowance for the year is £1,000.

These are cliff-edge rules, so an additional £1 income may cost £100 in tax. But anything else would have been even more complicated.

Section 12B(8)(a)(b) ITA define additional-rate/higher rate income. The definitions follow the same template so it is helpful to consider them side by side:

(8) For the purposes of this section—

(a) each of the following is “additional-rate income”—

(i) income on which income tax is charged at the additional rate, default additional rate or dividend additional rate,

(ii) income on which income tax would be charged at the additional rate, or default additional rate, but for section 12A (income charged at savings nil rate),

(iii) income on which income tax would be charged at the dividend additional rate but for section 13A (income charged at dividend nil rate), and

(b) each of the following is “higher-rate income”—

(i) income on which income tax is charged at the higher rate, default higher rate or dividend upper rate,

(ii) income on which income tax would be charged at the higher rate, or default higher rate, but for section 12A (income charged at savings nil rate),

(iii) income on which income tax would be charged at the dividend upper rate but for section 13A (income charged at dividend nil rate), and

(iv) income of an individual who is a Scottish taxpayer or Welsh taxpayer which would, if the individual were not a Scottish taxpayer or Welsh taxpayer (as the case may be), be income on which income tax is charged at the additional rate or default additional rate

(iv) income of an individual who is a Scottish taxpayer or Welsh taxpayer which would, if the individual were not a Scottish taxpayer or Welsh taxpayer (as the case may be), be income on which income tax is charged at the higher rate or default higher rate.

#### 40.9.4 Interest under remittance basis

If the remittance basis applies, foreign interest income<sup>32</sup> (if remitted) is taxed at

- (1) the Main Rates, ie, at 20%, 40%, 45%, or
- (2) for Scottish/Welsh taxpayers, the Scottish/Welsh rates

This is achieved by the clumsy but effective technique of providing that such income is not Savings Income. But in practice the amount at stake will be trivial, or most likely, nil.

### 40.10 Application of dividend rates

#### 40.10.1 Dividend rates for individuals

Section 13(1)-(2A) ITA adopt the same template so it is helpful to consider them side by side:

<b>Dividend ordinary rate</b>	<b>Dividend upper rate</b>	<b>Dividend additional rate</b>
(1) Income tax is charged at the dividend ordinary rate on an individual's income which—	(2) Income tax is charged at the dividend upper rate on an individual's income which—	(2A) Income tax is charged at the dividend additional rate on an individual's income which—
(a) is dividend income,	[identical]	[identical]

---

32 Including the interest-like income of the other categories specified in s.18(4) ITA.

(b) would otherwise be charged at the basic rate or the Welsh basic rate and	(b) would otherwise be charged at the higher rate or the Welsh higher rate, and	(b) would otherwise be charged at the additional rate or the Welsh additional rate, and
(c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).	(c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.	[identical to 2]

These rates apply unless disapplied by other provisions. Section 13(3) ITA provides:

Subsections (1) to (2A) are subject to any provisions of the Income Tax Acts (apart from section 10 or 11A or 11B) which provide for income to be charged at different rates of income tax in some circumstances.

Section 13(4) ITA provides:

Section 16 has effect for determining the extent to which an individual's dividend income would otherwise be charged at the basic, higher or additional rate or the Welsh basic, higher or additional rate.

See 40.4.3 (Savings/Dividends top of income).

Section 13(5) ITA provides:

In relation to an individual who is a Scottish taxpayer, references in this section to income that would otherwise be charged at a particular rate are to be read as references to income that would, if the individual were not a Scottish taxpayer, be charged at that rate (and subsection (4) is to be read accordingly).

The scheme of s.13 is to replace the basic/higher/additional rates with different rates. Thus the rates of tax on UK Dividend Income are the dividend ordinary/upper/additional rates: 7.5%, 32.5%, 38.1%. I refer to that as “**dividend rates**”.

Foreign Dividend Income is taxed at the dividend rates when the arising basis applies.

#### 40.10.2 *Dividend nil rate*

SA110 Notes (Tax calculation summary notes) 2019/20 provides:

Where an individual receives dividend income that would otherwise be chargeable at the dividend ordinary, upper or additional rate, and the income is less than or equal to £2,000, the dividend nil rate will apply to all of the dividend income. Where the dividend income is above £2,000, the lowest part of the dividend income will be chargeable at 0%, and anything received above £2,000 is taxed at the rate that would apply to that amount if the dividend nil rate did not exist.

The rules are in s.13A ITA, which refers to:

D: Dividends charged at **D**ividend ordinary rate<sup>33</sup>

U: Dividends charged at dividend **U**pper rate

M:  $M = D - £2,000$ <sup>34</sup>

A: Dividends charged at dividend **A**dditional rate

X:  $X = (D + U) - £2,000$

Section 13A ITA provides:

(1) Subsection (2) applies if, ignoring this section, at least some of an individual's income would be charged to income tax at the dividend ordinary rate, the dividend upper rate or the dividend additional rate.

(2) Income tax is charged at the dividend nil rate (rather than the dividend ordinary rate, dividend upper rate or dividend additional rate) on one or more amounts of the individual's income as follows—

*Step 1*

Identify the amount (“D”) of the individual's income which would, ignoring this section, be charged at the dividend ordinary rate.

*Rule 1A:* If D is more than £2,000, the first £2,000 of D is charged at the dividend nil rate (rather than the dividend ordinary rate), and is the only amount charged at the dividend nil rate.

*Rule 1B:* If D is equal to £2,000, D is charged at the dividend nil rate (rather than the dividend ordinary rate), and is the only amount charged

---

33 “O” would have been a better choice of letter.

34 What is “M” meant to stand for? Perhaps Middle; or Muddle.

at the dividend nil rate.

*Rule 1C:* If D is less than £2,000 but more than nil, D is charged at the dividend nil rate (rather than the dividend ordinary rate).

*Step 2*

If D is less than £2,000, identify the amount (“U”) of the individual’s income which would, ignoring this section, be charged at the dividend upper rate.

*Rule 2A:* If the total of D and U is more than £2,000—

- (a) the first £M of U is charged at the dividend nil rate (rather than the dividend upper rate), where £M is the difference between £2,000 and D, and
- (b) the amounts charged under this Rule and Rule 1C are the only amounts charged at the dividend nil rate.

*Rule 2B:* If the total of D and U is equal to £2,000, U is charged at the dividend nil rate (rather than the dividend upper rate), and the amounts charged under this Rule and Rule 1C are the only amounts charged at the dividend nil rate.

*Rule 2C:* If the total of D and U is less than £2,000 but more than nil, U is charged at the dividend nil rate (rather than the dividend upper rate).

*Step 3*

If the total of D and U is less than £2,000, identify the amount (“A”) of the individual’s income which would, ignoring this section, be charged at the dividend additional rate.

*Rule 3A:* If the total of D, U and A is more than £2,000, the first £X of A is charged at the dividend nil rate (rather than the dividend additional rate), where £X is the difference between—  
£2,000, and

the total of D and U,

and the amounts charged under this Rule, and Rules 1C and 2C, are the amounts charged at the dividend nil rate.

*Rule 3B:* If the total of D, U and A is less than or equal to £2,000, A is charged at the dividend nil rate (rather than the dividend additional rate), and the amounts charged under this Rule, and Rules 1C and 2C, are the amounts charged at the dividend nil rate.

Why is the drafting so convoluted? It appears to be a clumsy application

of step-based drafting.<sup>35</sup>

The dividend nil rate is sometimes called the dividend allowance, but it is better to use the statutory term.<sup>36</sup>

See too 29.10 (Dividend nil rate/DTA interaction).

#### 40.10.3 *Dividends: Remittance basis*

Foreign Dividend Income taxed on the remittance basis does not fall within:

- (1) s.13 (dividend rates): it does not meet the condition in s.13(1)(c) or s.13(2)(c) or s.13(2A)(c). The Main Rates apply (which are higher).
- (2) s.13A (dividend nil rate): it does not meet the condition in s.13A(1).

The amounts involved may be substantial. The result is that for a remittance basis taxpayer who remits, foreign Dividend Income is taxed more heavily than UK Dividend Income.

The discrimination is contrary to EU law: it is a restriction on free movement of capital, so there is a breach whether the dividends arise in a members state or a third country. The discrimination is unlawful even though a taxpayer could avoid it by (1) not electing for the remittance basis or (2) not remitting the Dividend Income.<sup>37</sup> But the consequences would need to be reviewed in the light of Brexit.

#### 40.10.4 *Dividends: Non-individual*

Section 14(1) ITA provides:

Income tax is charged at the dividend ordinary rate on the income of persons other than individuals which—

- (a) is dividend income,
- (b) would otherwise be charged at the basic rate, and
- (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).<sup>38</sup>

---

<sup>35</sup> See 57.15.7 (Method statements: Critique).

<sup>36</sup> See 41.1.1 (Allowances terminology).

<sup>37</sup> See 102.18 (Option to be treated as resident).

<sup>38</sup> Section 14(1)(c) is otiose from 2008, since the remittance basis can only apply to individuals; but it does no harm.

This applies to:

- (1) trustees where the trust rates do not apply
- (2) non-resident companies
- (3) PRs

#### **40.11 Settlor-interested trust IT rate**

Section 619 ITTOIA provides (so far as relevant):

- (1) Income tax is charged on—
  - (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest),
  - (b) income which is treated as income of a settlor as a result of section 629 (income paid to relevant children of settlor)...
- (2) For the purposes of Chapter 2 of Part 2 of ITA 2007 (rates at which income tax is charged), where income of another person is treated as income of the settlor and is charged to tax under subsection (1)(a) or (b) above, it shall be charged in accordance with whichever provisions of the Income Tax Acts would have been applied in charging it if it had arisen directly to the settlor.

What about foreign Dividend Income which qualifies for the s.624 remittance basis, but is later remitted and becomes taxable under the s.624 remittance basis?<sup>39</sup> This is taxable at the dividend rates.

#### **40.12 s.720: transferor IT rate**

The starting point is that s.720 income is taxed at:

- (1) the Main Rates or
- (2) for a Scots/Welsh taxpayer, the Scots/Welsh rates

Section 745(4) ITA applies the dividend rates where the income of the person abroad is Dividend Income. The wording is convoluted. First, s.745(1)(1A)(1B)(2) provide the transferor's credit.<sup>40</sup> With this in mind we can continue to s.745(3)(4):

- (3) Subsection (4) applies to income treated as arising to an individual under section 721 or 728 so far as none of subsections (1), (1A) and

---

<sup>39</sup> See 44.8 (s.624 remittance basis).

<sup>40</sup> See 48.2.1 (Transferor's credit).

(1B) applies to it.

(4) The charge to income tax under section 720 or 727 operates by treating the income as if it were income within section 19(2) (meaning of “dividend income”) if the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad<sup>41</sup>] would be dividend income were it the income of the individual.

Dividend Income is taxed at the rates applicable to dividends: the dividend ordinary/dividend upper rates. What about foreign dividends of the person abroad, taxed under the s.720 remittance basis? That is still Dividend Income, so is still taxed at the dividend rates.

Section 745 ITA provides a special rule for Dividend Income. It says nothing about Savings Income. Accordingly, interest and other Savings Income within s.720 is taxed at the main (or Scottish/Welsh) rates.

### 40.13 CGT rates: Introduction

#### 40.13.1 Summary

Rates of CGT vary according to:

- (1) The type of gain:
  - (a) Ordinary gain
  - (b) Residential property/carried interest gain
- (2) The type of person receiving the gain:
  - (a) Individuals
  - (b) Non-individuals:
    - (i) Trusts
    - (ii) Others
- (3) The amount of income/gains of the individual

There are four rates of CGT:

<b>Rate</b>	<b>Basic rate taxpayer</b>	<b>Higher rate taxpayer/trust/PRs</b>
10%	Ordinary gain	
18%	Residential/carried interest gain	
20%		Ordinary gain
28%		Residential/carried interest gain

There are three types of gain:

---

41 See 46.10 (Condition A: Power to enjoy).

<b>Type of gain</b>	<b>Definition</b>	<b>See para</b>
Residential property gain	sch 1B TCGA	54.37
Carried interest gain	s.1H TCGA	40.13.2
Other gain (“Ordinary gain”)	-	-

#### 40.13.2 “Carried interest gain”

Section 1H TCGA provides the definition:

(9) For the purposes of this section chargeable gains are “carried interest gains” if they accrue to an individual (“X”)—

- (a) under section 103KA(2) or (3) (investment management services), or
- (b) as a result of carried interest arising to X under arrangements not involving a partnership under which X performs investment management services directly or indirectly in respect of an investment scheme.

(10) A gain is not a carried interest gain under subsection (9)(b) if the carried interest constitutes a co-investment repayment or return.

Section 1H(11) TCGA provides referential definitions:

Expressions used in subsection (9) or (10) have the same meaning as they have in Chapter 5 of Part 3.

See 69.15 (Carried interest).

### 40.14 CGT rates: Individuals

Section 1H(1) TCGA provides:

This section makes provision about the rates at which capital gains tax is charged but has effect subject to—

- (a) section 169N (business asset disposal relief: rate of 10%), and
- (b) section 169VC (investors’ relief: rate of 10%).

#### 40.14.1 Residential/carried interest gain

Section 1H(2) TCGA provides:

Chargeable gains accruing in a tax year to an individual that are—

- (a) residential property gains (see Schedule 1B), or
  - (b) carried interest gains (see subsections (9) to (11)),
- are charged to capital gains tax at a rate of 18% or 28%.

#### 40.14.2 *Individual: Ordinary gain*

I refer to gains which are not residential/carried interest gains as **“ordinary gains”**.

Section 1H TCGA provides:

- (3) Other chargeable gains accruing in a tax year to an individual are charged to capital gains tax at a rate of 10% or 20%.
- (4) The question as to which of the rates applies to the gains concerned is determined by section 1I (income taxed at higher rates or gains exceeding unused basic rate band).

#### 40.14.3 *Basic/higher CGT rates*

This takes us to s.1I TCGA which provides:

- (1) If any of an individual’s income for a tax year is chargeable to income tax at a higher income tax rate,<sup>42</sup> gains accruing to the individual in the tax year are charged—
  - (a) at the rate of 28% (if they are residential property gains or carried interest gains), or
  - (b) at the rate of 20% (if they are other kinds of gains).
- (2) If—
  - (a) none of an individual’s income for a tax year is chargeable to income tax at a higher income tax rate, but
  - (b) the individual is chargeable to capital gains tax for the tax year on an amount that exceeds the unused part of the individual’s basic rate band,the excess (“the higher rate excess”) is charged at the rate of 28% (so far as comprising residential property gains or carried interest gains) or at the rate of 20% (so far as comprising other kinds of gains).
- (3) The remainder of this section sets out special rules which apply depending on the nature of the gains within subsection (2)(b).  
[Subsections (4) to (6) concern business asset disposal relief not

---

42 Section 1J(1) TCGA provides:

- (1) For the purposes of section 1I—
  - a “higher income tax rate” means—
    - (a) the higher rate or the default higher rate,
    - (b) the savings higher rate, or
    - (c) the dividend upper rate

discussed here]

(7) The individual may allocate so much of the unused part of the individual's basic rate band as then remains to—

- (a) any residential property gains or carried interest gains, or
- (b) any other gains.

(8) The effect of the allocation is that the gains to which the allocation is made are charged—

- (a) at the rate of 18% (if they are residential property gains or carried interest gains), or
- (b) at the rate of 10% (if they are other kinds of gains).

(9) Any gains to which no allocation is made are charged—

- (a) at the rate of 28% (if they are residential property gains or carried interest gains), or
- (b) at the rate of 20% (if they are other kinds of gains).

#### 40.14.4 *Scots/Welsh CGT payers*

Section 1J(6) TCGA provides:

In the application of section 1I in the case of any individual it is to be assumed that the individual is not a Scottish or Welsh taxpayer.

CGT rates tax depend on the UK rates and thresholds. So, a Scottish taxpayer with earned income and chargeable gains has to consider UK and Scottish rates and thresholds. CIOT comment:

... this is something that could make it difficult for many taxpayers to fully understand their tax calculations and liabilities.<sup>43</sup>

But there it is.

#### 40.15 **CGT rates: PRs**

Section 1H TCGA provides:

(5) Chargeable gains accruing in a tax year to the personal representatives of a deceased individual that are—

---

43 CIOT response to the paper implausibly entitled “Scotland in the United Kingdom: An enduring settlement” (2015)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/150331%20Scotland%20in%20the%20United%20Kingdom%20-%20An%20enduring%20settlement%20-%20CIOT%20comments.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/150331%20Scotland%20in%20the%20United%20Kingdom%20-%20An%20enduring%20settlement%20-%20CIOT%20comments.pdf?download=1)

- (a) residential property gains, or
  - (b) carried interest gains,
- are charged to capital gains tax at a rate of 28%.
- (6) Other chargeable gains accruing in a tax year to the personal representatives of a deceased individual are charged to capital gains tax at a rate of 20%.

#### 40.16 CGT rates: Trusts

Section 1H TCGA provides:

- (7) Residential property gains accruing in a tax year to the trustees of a settlement are charged to capital gains tax at a rate of 28%.
- (8) Other chargeable gains accruing in a tax year to the trustees of a settlement are charged to capital gains tax at a rate of 20%.

UK trusts are treated in the same way as higher rate taxpayers.

#### 40.17 CGT rates: Critique

FA 2016 made a significant reduction in CGT rates. HMRC say:

The government wants to create a strong enterprise and investment culture. Cutting the rates of CGT for most assets is intended to support companies to access the capital they need to expand and create jobs. Retaining the 28% and 18% rates for residential property is intended to provide an incentive for individuals to invest in companies over [residential] property.<sup>44</sup>

This is not serious policy analysis: it is advocacy. That is not to say that it might not be right, as far as the reduction concerns gains from shares. Complexity, and, for upper rate assets, the CGT lock-in effect, are serious issues, but not addressed.

#### 40.18 Inflation/fiscal drag

I consider rates in this chapter and allowances in the next. But for policy discussion one needs to consider them together. IFS comment:

---

44 HMRC, “Overview of Tax Legislation and Rates” (2016)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/513073/OOTLAR\\_complete\\_for\\_publication.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/513073/OOTLAR_complete_for_publication.pdf)  
The passage also appears in EN FB 2016.

The personal allowance has risen by almost 60% in real terms over the past decade, reducing income tax revenue by an eye-watering £25 billion per year and meaning that 40% of adults do not pay any income tax at all. The planned freeze, representing a 7% real-terms cut, undoes only a small share of that rise, and brings another 1.3 million people into the income tax system.

By contrast, the higher-rate threshold is already 9% below its 2009 peak in real terms, and the freeze will bring it 16% below. It has not kept up with earnings growth over recent decades, meaning that steadily more and more people have become subject to it. While fewer than 4% of adults paid higher-rate tax in 1990, by the time the freeze is over that figure will likely be more than 10%.<sup>45</sup>

The rising number of people subject to the higher rate was a point that Boris Johnson raised in his campaign for Conservative Party leadership, with a uncosted headline proposal to raise the threshold to £80k.

The £150k higher rate limit has not been increased since introduced in 2009.

IFS say:

Unlike many other countries, the UK routinely – and sensibly – uprates the cash values of most tax thresholds and benefit rates each year in line with inflation, in order to maintain their real value.

In a number of cases, however, this routine uprating has now been cancelled for extended periods:

- The inheritance tax threshold has been fixed at £325,000 since 2009–10.
- The VAT registration threshold has been frozen at £85,000 since April 2017, and the last Budget announced that it would remain frozen until April 2022.

Some of these policies raise revenue; others give money away<sup>46</sup>. But in neither case is it sensible policymaking.

When George Osborne announced a four-year freeze to benefit rates in his 2015 post-election Budget, he presumably did not intend that this would lead to an average loss among benefit recipients of zero in year 1 and £70 in year 2 before jumping to £270 in year 3 and £420 in year

---

<sup>45</sup> <https://www.ifs.org.uk/budget-2021>

<sup>46</sup> Author's footnote: but that is quite rare.

4 as inflation rose. The government might believe that benefits should be more or less generous, but the extent of any change in generosity should be thought through and justified, not the arbitrary and accidental result of what the rate of inflation turns out to be.

Yet at least these cases are ostensibly temporary...

Perhaps more insidious is the gradual retreat from the assumption that inflation adjustments are the norm. When governments introduce new thresholds into the tax system, they are increasingly tending to build in the assumption that these thresholds will not routinely keep pace with inflation.

There have always been some thresholds that have not kept pace with inflation. Thresholds for SDLT, for example, are not increased routinely in line with inflation (let alone property price growth); instead, the rather unsatisfactory approach seems to be that the thresholds are kept frozen in cash terms until the number of purchases being dragged into tax reaches levels deemed unacceptable, and the threshold is then suddenly doubled (as happened in both 1993 and 2005, in both cases after more than a decade of being essentially frozen).

But over the past decade or so, this has moved from being a rare exception to being commonplace. New features of the tax landscape – from the apprenticeship levy allowance to the employment allowance in National Insurance, from the lifetime allowance for entrepreneur's relief to the personal savings allowance and the dividend allowance [dividend nil rate]– are frozen by default. In all of these cases, this builds in an assumption of rising taxes over time – tax rises which are both opaque (some would say stealthy) and depend arbitrarily on the rate of inflation...

As for the withdrawal of the personal allowance, the number of people affected is growing much more rapidly as the bottom of the 60% band is frozen while the width of the band rises twice as quickly as the personal allowance, which the government has not merely been uprating with inflation but increasing rapidly in real terms.<sup>47</sup>

The list of non-indexed amounts mentioned above is just a start. The £2k and £10k remittance basis claim limits have not been increased since

---

47 Extracts from: IFS, “Dragging people into higher rates of tax” IFS Briefing Note BN247 (2019) <https://www.ifs.org.uk/uploads/publications/bns/BN247.pdf>

I have omitted references to benefits and other matters outside the focus of this book.

introduced in 2008. CGT allowable expenditure (base cost) is not indexed, so CGT is a tax on inflationary gains as well as economic gains.

The IFS are right, and the point is worth making. But taxation by stealth is a difficult temptation to refuse, and it would need a strong norm in favour of indexation to overcome that. Rates and allowances are at the heart of the interface of taxation and politics: they are salient and (relatively) easy to state.

As far as tax is concerned, inflation is the chancellor's friend.

## 40.19 Corporation tax rates

The CT rate remains at 19% for the financial year 2022/23.

### 40.19.1 CT rates: *The future*

From 1 April 2023:

- (1) The CT main rate increases to 25% for companies with profits over £250k.
- (2) We will return to the complexities of a small profits rate. Companies with profits of up to £50k will pay at 19%. Companies with profits of £50k - £250k will pay at the main rate reduced by a marginal relief providing a gradual increase in the effective Corporation Tax rate.

The issue of LLP *v* company choice will need to be recomputed. But perhaps not quite yet. Paul Johnson (IFS director) says:<sup>48</sup>

The rise in corporation tax is of historic proportions. If the Budget numbers are to be believed the increase in the main rate to 25% could see revenues rise by more than £17 billion by 2025. That would take the UK well up the international league table for corporation tax revenues and would certainly take revenues well above their level back in 2010 when the coalition government set about its series of rate reductions.

Whether that rise in the corporation tax will actually be delivered without additional concessions we will wait and see. I reckon 50-50 at best.

## CHAPTER FORTY ONE

# PERSONAL ALLOWANCES

41.1 Significance  
41.9.1 Nonresidents allowances:

### *Cross references*

The following topics are considered elsewhere:  
35.8 (PAYE to recover personal allowance)  
App. 9.2.4 (Visiting forces: Personal allowances)

## 41.1 Personal allowances: Introduction

This chapter considers:

- (1) IT personal allowances
- (2) CGT annual exemption

CGT is relatively straightforward, but a full discussion of IT personal allowances would need a short book. I focus on the aspects closest to the themes of this book.

An HM Treasury consultation paper (the “**PA Consultation Paper**”) provides some interesting background.<sup>1</sup>

### 41.1.1 *Allowances terminology*

Act	Statutory term	My Term
ITA	Personal allowances	IT personal allowances
TCGA	Annual exemption	CGT annual exemption

I refer to these together as “**IT/CGT personal allowances**”.

CIOT comment on the term “allowance”:

---

1 HM Treasury, “Restricting non-residents’ entitlement to the UK personal allowance” (2014) <https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance>

[The term “allowance”] is commonly understood to mean an amount that can be deducted from income, before calculating the tax on that income, for example, in the case of the personal allowance.

However, the personal savings allowance and dividend allowance<sup>2</sup> ... cause confusion, because they are not allowances in the commonly understood sense of the term. Rather, they are 0% bands of tax. That is, the taxpayer does not deduct them from income before working out their tax; instead, they apply them when they are calculating the actual tax due using the rates and bands of income tax.

Another example is the marriage allowance. Although the giver of the marriage allowance transfers part of their personal allowance to their partner (say £1,250 in 2019/20), the recipient does not receive additional personal allowance. Rather, they receive 20% of the amount transferred (say £250 in 2019/20), which they can offset against their income tax liability – it is thus a tax reducer or a tax credit in the hands of the recipient, rather than an allowance.<sup>3</sup>

Is that criticism pedantic? Discuss.

The meaning of “allowances” could matter if other provisions contained references to “allowances”, but I cannot think of any actual examples.

## 41.2 CGT annual exemption

### 41.2.1 *Annual exemption: Individuals*

Section 1K(1) TCGA provides the CGT annual exemption:

If an individual is (or, apart from this section, would be) chargeable to capital gains tax for a tax year on chargeable gains, the annual exempt amount for the year is to be deducted from those gains (but no further than necessary to eliminate them).

This applies to resident and non-resident individuals, though non-residents are less likely to pay CGT, so they may not need the exemption.

---

2 See 40.8 (Starting rate for savings); 40.9 (Savings nil rate). The terms “dividend allowance” and “personal savings allowance” were used in the 2016 press releases, but not in the legislation, so perhaps PCO agreed.

3 CIOT, Response to consultation The future of Welsh law: classification, consolidation, codification (Jan 2020).  
<https://www.tax.org.uk/sites/default/files/200130%20The%20Furture%20of%20Welsh%20Law%20-%20CIOT%20and%20LITRG%20joint%20response.pdf>

Unlike the IT personal allowance, a claim is not needed. But a person who has gains (even within the annual exemption) is required to notify HMRC, if they do not otherwise put in a tax return.<sup>4</sup>

Section 1K(2) TCGA specifies the amount:

The annual exempt amount for a tax year is £12,300.

Section 1K(4) TCGA deals with the interaction with loss relief:

The deduction of the annual exempt amount—

- (a) is made after the deduction of allowable losses accruing in the tax year, but
- (b) is made before the deduction of allowable losses accruing in a previous tax year or, if section 62 applies, in a subsequent tax year.

#### 41.2.2 *Annual exemption: PRs*

Section 1K(7) TCGA provides:

For the tax year in which an individual dies and for the next two tax years, this section applies to the individual's personal representatives as if references to the individual were to those personal representatives.

#### 41.2.3 *Exemption used in best way*

Section 1K(5) TCGA provides:

The annual exempt amount may be deducted from gains in whatever way is most beneficial to a person chargeable to capital gains tax (irrespective of the rate of tax at which the gains would otherwise have been charged).

Contrast 63.9 (Losses used in best way).

#### 41.2.4 *Annual exemptions: Trusts*

Para 5 sch 1C TCGA 1992 provides:

- (1) This paragraph applies if settlement is not a settlement for the benefit of a disabled person for a tax year.
- (2) Section 1K applies in relation to the trustees of the settlement for the

---

<sup>4</sup> See 115.3 (Duty to notify: Exemption).

year<sup>5</sup> as it applies in relation to an individual for the year but as if the annual exempt amount for the year were one-half of the amount available for the individual for the year.

- (3) This paragraph needs to be read with—
- (a) paragraph 6 (cases where settlement is qualifying UK settlement comprised in a group), and
  - (b) paragraph 8 (sub-fund settlements).

For application to S87 gains, see 57.6.1 (S.1(3) amount: Exemptions/reliefs).

#### 41.2.5 *Grouped trusts*

Para 6 sch 1C TCGA provides:

- (1) This paragraph reduces the annual exempt amount for trustees of a settlement for a tax year if the settlement is one of two or more qualifying UK settlements comprised in a group.
- (2) [This concerns disabled trusts, not discussed here.]
- (3) In the case of any other settlement, the annual exempt amount for the year is to be reduced so that it is equal to—
  - (a) one-tenth of an individual's amount for that year, or
  - (b) the amount resulting from dividing half of an individual's amount for that year by the number of settlements in the group, whichever is the greater.
- (4) In this paragraph "an individual's amount", in relation to a tax year, means the annual exempt amount applying to an individual for the year under section 1K.
- (5) For the purposes of this paragraph all qualifying UK settlements in relation to which the same person is the settlor constitute a group.
- (6) If—
  - (a) two or more persons are settlors in relation to a settlement, and
  - (b) a settlement is consequently comprised in two or more groups comprising different numbers of settlement, sub-paragraphs (2)(b) and (3)(b) have effect by reference to the largest group.

Para 7 sch 1C TCGA provides:

---

5 Para 1 sch 1C TCGA provides:

- (4) In this Schedule any reference to the application of section 1K in relation to an individual for a tax year is to its application in relation to an individual who is resident and domiciled in the United Kingdom for the year.

- (1) In this Schedule “qualifying UK settlement”, in relation to a tax year, means any settlement in relation to which both of the following conditions are met—
- (a) the trustees of the settlement are resident in the United Kingdom during any part of the tax year, and
  - (b) the property comprised in the settlement is not held for a charitable or pensions purpose.
- (2) Property comprised in a settlement is held for a charitable purpose if (and only if)—
- (a) it is held for charitable purposes only, and
  - (b) it cannot become applicable for other purposes.
- (3) Property comprised in a settlement is held for a pensions purpose if (and only if) it is held for the purposes of—
- (a) a registered pension scheme,
  - (b) a superannuation fund to which section 615(3) of the Taxes Act applies, or
  - (c) an occupational pension scheme (within the meaning of section 150(5) of the Finance Act 2004) that is not a registered pension scheme.
- (4) For this purposes of any provision of this Schedule other than paragraph 8 a settlement is not a qualifying UK settlement if—
- (a) in the case of one for the benefit of a disabled person, it was made before 10 March 1981, or
  - (b) in any other case, it was made before 6 June 1978.

### 41.3 IT personal allowances

Chapter 2 Part 3 ITA contains two allowances, the personal allowance and the blind person’s allowance. I do not consider the latter.

Section 35(1) ITA provides:

An individual who makes a claim is entitled to a personal allowance of £12,500 for a tax year if the individual meets the requirements of section 56 (residence etc).

The personal allowance has political salience, as a result of which it has increased substantially in recent years. The full picture, as always in tax, is more complicated.<sup>6</sup>

---

<sup>6</sup> See 40.6.2 (“Basic/higher rate limits”).

The PA consultation paper claimed that the UK has the highest personal allowance in the G20 and one of the largest in OECD and the EU.<sup>7</sup> No attempt was made to explain the basis of that claim. I expect it was based on a simple comparison of headline rates. That is likely to mislead, because what matters is not only the amount of the allowance but also the terms on which it is available. It is like comparing headline rates of tax without considering the tax base. A serious study of the point would paint a more complicated picture. I do not attempt that here.

#### 41.4 Allowance in year of birth/death

Section 41(1) ITA provides:

Any allowance to which an individual is entitled under this Chapter for any tax year, including the tax year in which the individual dies, is given in full.

That seems a generous rule, but it makes for simplicity.

#### 41.5 IT allowances: high earners

Section 35(2) ITA provides:

For an individual whose adjusted net income exceeds £100,000, the allowance under subsection (1) is reduced by one-half of the excess.

Thus (at 2021/22 rates) taxpayers with “adjusted net income” between £100k and £125,000 the marginal rate of income tax is 60% (61.5% in Scotland).

The £100k limit has not been increased since introduced in 2009.<sup>8</sup>

This rule was a parting shot from the Blair/Brown administration. It has incurred strong criticism from the IFS<sup>9</sup> (“the absurd and arbitrary marginal income tax band”). And IFS as usual have done the graph for us:<sup>10</sup>

7 HM Treasury, “Restricting non-residents’ entitlement to the UK personal allowance” (July 2014) para 3.1.

<https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance>

8 See 40.18 (Inflation/fiscal drag).

9 IFS, *Tax By Design* (2011) para 4.3.1. (A Straightforward Income Tax Schedule).

10 Marginal tax rate schedule on earned income, Scotland and the rest of the UK, 2018–19 <https://www.ifs.org.uk/publications/12903>

But no-one has taken any notice.

The definition of “adjusted net income” is best approached in three stages:

Term	Definition	See para
Total income	s.23 ITA Step 1	41.5.1
Net income	s.23 ITA Step 2	41.5.2
Adjusted net income	s.58 ITA	41.5.3

### 41.5.1 Total income

Section 23 ITA provides:

To find the liability of a person (“the taxpayer”) to income tax for a tax year, take the following steps.

*Step 1* Identify the amounts of income on which the taxpayer is charged to income tax for the tax year.

The sum of those amounts is “total income”.

Each of those amounts is a “component” of total income.

In *Asplin v White*:

“total income” is necessarily beneficial income, and so sums received

in a fiduciary capacity could not be included<sup>11</sup>

#### 41.5.2 *Net income*

Section 23 ITA provides:

*Step 2* Deduct from the components the amount of any relief under a provision listed in relation to the taxpayer in section 24 to which the taxpayer is entitled for the tax year.

See sections 24A and 25 for further provision about the deduction of those reliefs.

The sum of the amounts of the components left after this step is “net income”.

This takes us to s.24 ITA which has a list of about 20 reliefs (some quite obscure):<sup>12</sup>

<b>ITA</b>	<b>Relief</b>
s. 72	early trade losses relief
Chap 6 Part 4	share loss relief
Chap 3 Part 8	gift of securities/land to charity
s.457/458	trade unions or police organisations
s. 64	trade loss relief against general income
s. 83	carry-forward trade loss relief
s. 89	terminal trade loss relief
s. 96	post-cessation trade relief
s. 118	carry-forward property loss relief
s. 120	property loss relief against general income
s. 125	post-cessation property relief
s. 128	employment loss relief
s. 152	loss relief: misc. income
Chap 1 Part 8	interest payments
Chap 1A Part 8	irrecoverable peer-to-peer loans
Chap 4 Part 8	Annual Payments
s.574	manufactured dividends
s. 579	manufactured interest
<b>Other Acts</b>	<b>Relief</b>
s. 193(4) FA 2004	pension schemes

11 49 TC 93; for further discussion of this case, see 14.8 (Receipt by nominee/trustee).

12 For clarity, I set this out in a table format, and abbreviate the relief description; I set out the list for individuals; a different list applies for non-individuals.

s. 194(1) FA 2004	pension schemes
s.258 CAA 2001	plant/machinery
s.479 CAA 2001	patent allowances
s. 555 ITEPA	liabilities of former employment
s. 446 ITTOIA	government security strips: losses
s. 454(4) ITTOIA	listed securities held 26/3/2003: losses
s. 600 ITTOIA	patent expenses

### 41.5.3 *Adjusted net income*

“Adjusted net income” is defined in s.58(1) ITA:

For the purposes of Chapters 2 and 3, an individual’s adjusted net income for a tax year is calculated as follows.

There are 3 adjustments. In short:

#### **Step Adjustment**

- 2 Deduct gross gift aid donations
- 3 Deduct pension relief
- 4 Add back relief for payments to trade unions/police organisations

In full detail:

*Step 1* Take the amount of the individual’s net income for the tax year.

*Step 2* If in the tax year the individual makes, or is treated under section 426 as making, a gift that is a qualifying donation for the purposes of Chapter 2 of Part 8 (gift aid) deduct the grossed up amount of the gift.

*Step 3* If the individual is given relief in accordance with section 192 of FA 2004 (relief at source) in respect of any contribution paid in the tax year under a pension scheme, deduct the gross amount of the contribution.

*Step 4* Add back any relief under section 457 or 458 (payments to trade unions or police organisations) that was deducted in calculating the individual’s net income for the tax year.

The result is the individual’s adjusted net income for the tax year.

(2) The grossed up amount of a gift is the amount of the gift grossed up by reference to the basic rate for the tax year.

(3) The gross amount of a contribution is the amount of the contribution before deduction of tax under section 192(1) of FA 2004.

Gift aid relief (including carry-back relief) makes it possible to avoid the worst unfairness of the withdrawal of allowances for high earners, as a

donor with income marginally above £100k can avoid the 60% band by gift aid donations.

#### 41.6 Allowances: remittance basis user

Section 809G ITA disapplies IT personal allowances for remittance basis claimants:

- (1) This section applies if s.809B (claim for remittance basis to apply) applies to an individual for a tax year.
- (2) For that year, the individual is not entitled to-
  - (a) any allowance under Chapter 2 of Part 3 (personal allowance and blind person's allowance),
  - (b) any tax reduction under Chapter 3 of that Part (tax reductions for married couples and civil partners), or
  - (c) any relief under s.457 or 458 (payments for life insurance etc).

This does not apply to remittance basis taxpayers in the de minimis categories (sub-£2k taxpayers and non-taxpayers): they retain their allowances.

The editor of *Taxation* commented acerbically on s.809G(2)(c):

So what are these valuable reliefs which it would be unfair to allow those claiming the remittance basis to enjoy? They are relief from tax on half of the premiums paid to trade unions and police organisations for superannuation, life insurance or funeral benefits, or to the employer so that benefits can be paid after the employee's death to their dependants, but limited to £100 a year of relief in each case.

What on earth is the point of removing a relief like that for the non-domiciles? It is pointless complexity for the sake of a few tenners in tax which will have no impact whatsoever on the non-domiciles concerned. Unless there is some issue related to European law, or human rights (which seem to be the normal culprits in these situations) I really cannot see why the parliamentary draftsman should have been troubled with the need to include them. And, frankly, if there is some such problem, then given the minuscule levels of relief they offer even to those not on the remittance basis, wouldn't it be simpler to just abolish the sections altogether? That would at least be simplification.<sup>13</sup>

Likewise s.1K(6) TCGA disapplies the CGT annual exemption:

---

<sup>13</sup> Mike Truman, *Taxation* 21 Feb 2008 p.161.

An individual is not entitled to an annual exempt amount for a tax year if section 809B of ITA 2007 (claim for remittance basis) applies to the individual for the year.

A DTA will occasionally restore the personal allowances and the CGT annual exemption, which are otherwise disappplied for remittance basis claimants.<sup>14</sup>

Individuals with income above £125k are not concerned with the loss of IT personal allowances since these are withdrawn anyway; they only suffer the loss of the CGT annual exemption.

The IT personal allowance and the CGT annual exemption are only lost in the year that a remittance basis claim is made. So an individual who has unremitted gains from earlier years, but who does not make a remittance basis claim in later years, may remit the exempt amount each year and set it against the CGT annual exemption.<sup>15</sup>

## **41.7 Entitlement to IT personal allowances**

There are ten categories of individuals who qualify for IT personal allowances under Chapters 2 and 3 Part 3 ITA. In short:

- (1) UK residents
- (2) Non-residents:
  - (a) Seven categories listed in s.56(3) ITA
  - (b) Those entitled under DTAs
  - (c) Visiting forces<sup>16</sup>

### *41.7.1 History and rationale*

Originally, personal allowances were available to non-residents and residents alike. The Departmental Committee on Income Tax 1905 recommended personal allowances should not be available to non-residents and explains why:

128. First, while persons resident in, the United Kingdom obtain their total income from all sources is within the prescribed limits, in the case

---

14 See 41.8.2 (Personal allowances under DTAs: remittance basis claimants).

15 Note that a CGT loss election may also disapply the CGT annual exemption: see 61.18 (Effect of loss election).

16 See App.9.2.4 (Visiting forces: Personal allowances),

of persons resident abroad only the income derived from the United Kingdom is taken into account. Thus a foreign millionaire who derives an income of £160, and no more, from investments in the United Kingdom is granted exemption on that £160, and similarly as regards abatements. This view of the law ... appears to us, on grounds of justice and common sense, indefensible.

[The Committee note the issue of fraudulent tax reclaims by non-residents, and continue]:

129. Further, one of the main motives of equity in granting relief to persons in receipt of small incomes is that such persons contribute to the public revenue by means of indirect taxation in fair proportion to their taxable capacity. This ground for relief does not apply to residents abroad. We therefore recommend that the grant of exemption or abatement by reason of smallness of income should be abolished in the case of persons resident outside the United Kingdom. We believe that very few (if any) of the foreigners who invest in British securities have total incomes within the prescribed limits. If it be thought well to make an exception for British subjects residing abroad, relief should be granted only on a certificate from a British Consular officer (or, in a British colony, from the colonial fiscal authorities) that the claimant has produced proper evidence showing that his income from all sources is within the limits.<sup>17</sup>

Restrictions were first introduced in F(1919-10)A 1910, though not adopting the recommendation in the last sentence; with further reforms subsequently.<sup>18</sup>

#### 41.7.2 *IT allowances: UK resident*

Section 56(2) ITA sets out the first category of individuals who qualify for IT personal allowances, which is UK residents:

The individual meets the requirements of this section if the individual—  
(a) is UK resident for the tax year...

#### 41.7.3 *IT allowances: Non-resident*

---

<sup>17</sup> The proposal was more straightforward at a time when there were no progressive rates of tax and IT was mainly collected at source.

<sup>18</sup> For further historical background, see para 61-66 Royal Commission on the Income Tax Cmd.615 (1920).

Section 56(2) ITA continues:

The individual meets the requirements of this section if the individual...  
(b) meets the condition in subsection (3).

So we turn to s.56(3) ITA which sets out the next seven categories, which apply to non-residents. Non-residents who do not fall within one of these categories do not qualify for personal allowances.

In many but not all cases, the significance of personal allowances to non-residents is limited or nil.<sup>19</sup>

#### 41.7.4 *IT allowances: EEA national*

Section 56(3) ITA provides:

An individual meets the condition in this subsection if, at any time in the tax year, the individual—  
(za) is a national of an EEA state

The first and most significant category is EEA nationals. These are presumably included because a relief for UK residents but not for EEA nationals would not be EU-law compliant.<sup>20</sup> Before Brexit, this category overlapped with UK residents, in that most UK residents were EEA nationals.

HMRC discuss the impact of Brexit:

**Question:** Will EU nationals only be able to claim UK personal tax allowances for 2020/21 onwards by a claim under a competent UK double tax treaty?

**Answer:** EU nationals will continue to receive UK personal tax allowances on their UK income when the UK leaves the EU...

**Question:** Non-resident UK nationals will cease to qualify for UK tax allowances after Brexit, by virtue of nationality of an EEA state (ITA 2007, s56(3)). Will this legislation be changed?

**Answer:** It is not the government's intention that non-UK resident UK nationals will lose their access to personal tax allowances when the UK leaves the EU. The Government will legislate to ensure that non-UK resident UK nationals continue to be able to access their personal tax

---

19 See 41.9.1 (Non-residents allowances: Reform).

20 See 102.17 (Discrimination on grounds of nationality).

allowances.<sup>21</sup>

#### 41.7.5 *IT allowances: Misc*

The remaining categories are a strange ragbag. Section 56(3) ITA provides:

An individual meets the condition in this subsection if, at any time in the tax year, the individual ...

- (a) is resident in the Isle of Man or the Channel Islands,<sup>22</sup>
- (b) has previously resided in the UK and is resident abroad for the sake of the health of—
  - (i) the individual, or
  - (ii) a member of the individual's family who is resident with the individual,
- (c) is a person who is or has been employed in the service of the Crown,
- (d) is employed in the service of any territory under Her Majesty's protection,<sup>23</sup>
- (e) is employed in the service of a missionary society, or
- (f) is a person whose late spouse or late civil partner was employed in the service of the Crown.

There is scope here for simplification: there is a strong case for repeal of s.56(3)(a)-(f), ie the entire list apart from EEA nationals (subject to some transitional relief).

#### 41.7.6 *Commonwealth citizens*

Before 2010/11 there was an additional category: Commonwealth citizens. The Tax Law Rewrite considered that this was not Human Rights compliant.<sup>24</sup> Accordingly this category was deleted by the FA 2009. EN FA 2009 provides:

---

21 Expat forum EU Exit QA log, May 2019 (circulated informally).

22 This category has been included since 1910: I would be grateful for any reader who could suggest the reason.

23 British Protectorates ceased to exist well before the date of the ITA, so this provision has lapsed. The last British protectorate was the Solomon Islands which became independent in 1978. The last British protected state was Brunei became independent in 1984.

24 EN ITA para 135.

14. Previously, there was an entitlement for some individuals to claim purely by virtue of being a Commonwealth citizen but by meeting no other condition. Commonwealth citizens will no longer qualify for personal allowances, married couple's allowance, blind person's allowance and relief for life assurance premiums by reference to their Commonwealth citizenship status alone. They may, of course, continue to qualify under the other conditions or through DTA provisions if appropriate.

15. This change will mainly affect citizens of the following countries: Bahamas; Cameroon; Cook Islands; Dominica; Maldives; Mozambique; Nauru; Niue; St Lucia; St Vincent & the Grenadines; Samoa; Tanzania; Tonga; and Vanuatu.

The objection was that granting personal allowances to an individual solely on the basis that they are a Commonwealth citizen would be discriminatory on the grounds of nationality.<sup>25</sup> The rewrite did not consider that there was the unlawful discrimination in providing allowances to EEA nationals, as the discrimination between EEA nationals and the rest of the world is justified by the distinct relationship which the UK has with the EEA.<sup>26</sup> No doubt that will be reviewed post-Brexit.

This rule was just about the last remaining example of special treatment for Commonwealth citizens in UK tax legislation, so the issue does not have immediate tax implications in other areas, but it does illustrate two interesting points: a significant restriction on the UK's ability to impose tax; and the insignificance of the Commonwealth, at least in a Human Rights context. The Tax Law Rewrite rejected the argument that the UK's relationship with the Commonwealth would justify the discrimination.

## 41.8 Personal allowances under DTAs

The last category of individuals entitled to personal allowances relates to DTAs.

### 41.8.1 *Non-residents*

---

<sup>25</sup> Article 14 ECHR (Prohibition of discrimination) in conjunction with art 1 protocol 1 (Right to property).

<sup>26</sup> Private correspondence.

OECD Model Convention does not affect the rule that personal allowances are limited to UK residents (and other specific categories).<sup>27</sup> However most UK treaties are different. The PA consultation paper explains the position:

Most tax treaties between the UK and other states extend entitlement to UK Personal Allowances to nationals of those states who are not entitled to claim a UK Personal Allowance under UK domestic statute. This is because of the interaction between the UK domestic statute and the UK's obligations under the non-discrimination articles in those tax treaties.

Current UK statute provides that UK nationals are entitled to UK Personal Allowances wherever they are resident. The non-discrimination provisions found in most UK tax treaties extend the entitlement to UK Personal Allowances to nationals of the treaty partner state who are also resident there. Some of the UK's tax treaties also expressly provide that UK Personal Allowances will be granted to residents of the partner state regardless of nationality, or nationals of the partner state wherever they are resident....

The UK's tax treaties do not all entitle overseas residents to a UK Personal Allowance. Some, such as that with the United States, do not contain a non-discrimination article of this sort or specifically exclude entitlement to Personal Allowances from the non-discrimination article.<sup>28</sup>

For instance, art. 25(1) Austria/UK DTA provides:

Subject to the provisions of paragraph (3) of this Article, individuals who are residents of Austria shall be entitled to the same personal allowances, reliefs and reductions for the purposes of UK tax as British

---

27 OECD Model Convention art. 24(3) provides:

“This provision [non-discrimination] shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents.”

28 HM Treasury Consultation Paper, “Restricting non-residents’ entitlement to the UK personal allowance” (July 2014)

<https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance>

subjects<sup>29</sup> not resident in the UK. ...

Non-resident British subjects qualify for personal allowances as they are nationals of an EEA state (the UK) so individuals who are treaty-resident in Austria will likewise do so.

Sometimes there is a restriction. Article 25(3) Austria/UK DTA provides:

Nothing in this Convention shall entitle an individual who is a resident of a Contracting State [Austria] and whose income from the other Contracting State [UK] consists solely of dividends, interest or royalties (or solely of any combination thereof) to the personal allowances, reliefs and reductions of the kind referred to in this Article for the purposes of taxation in that other Contracting State.

One could avoid the restriction by procuring income other than dividends, interest and royalties (maybe Annual Payments) but the amounts involved are small.

A list of DTAs which confer personal allowances on non-residents is set out in SA109 (Notes), with more details in HMRC, “Digest of Double Taxation Treaties”.

The relief is claimed in form SA109 or else in form R43.

The practical significance of DTAs conferring personal allowances on non-residents is limited, since in many cases a claim for the relief is effectively cancelled by non-residents IT relief.<sup>30</sup> Also of course the personal allowance is only needed for UK source income which remains taxable in the UK under the treaty.

#### 41.8.2 *Remittance basis claimants*

Remittance basis claimants (who would in principle qualify for personal allowances as they are by definition UK resident) lose their IT/CGT personal allowances on making a remittance basis claim.<sup>31</sup> This disallowance is overridden (so the right to IT/CGT personal allowances

---

29 Defined in s.51 British Nationality Act 1981.

30 See 42.3 (Amount B (disregarded income and reliefs)).

31 See 41.6 (Withdrawal of IT personal allowances & CGT annual exemption for remittance basis claimants).

is restored) by a DTA if applicable.<sup>32</sup> The treaties which confer personal allowances are those set out in the lists mentioned above, with the exception of Greece and Myanmar.<sup>33</sup>

This treaty relief only affects remittance basis taxpayers who make a remittance basis claim, ie where:

- (1) the individual is UK resident (so a remittance basis claim is made);  
and
- (2) the individual is treaty-resident in the jurisdiction concerned (so that DT relief applies).

So this point will not be a common one, though it will arise from time to time.

## 41.9 Non-residents allowances: Reform

### 41.9.1 *Nonresidents allowances: Significance*

The proposal discussed here is abolition of the UK personal allowances for non-residents. Reform proposals first require an analysis of the significance of personal allowances for non-residents. Needless to say, the picture is a complicated one. The PA consultation paper provides:

#### **6.1 Impact on individuals**

HMRC estimate there to be at least 400,000 individuals claiming Personal Allowances in the UK who are non-resident for tax purposes. Based on the data available, if non-residents were not entitled to the UK Personal Allowance most of them would face increased UK tax liabilities. However most of these individuals would be able to claim relief overseas either in the form of a credit for tax paid in the UK or exemption from tax in their home state. Therefore most individuals would not generally pay more tax overall than they do now. However this will depend on the relative level of tax rates and allowances between the UK and their country of residence. Those living in low tax

---

32 Jane Kennedy (Financial Secretary to the Treasury) accepted this in the public Bill committee debate on the Finance Bill, Hansard 19 June 2008 col 818

<http://www.publications.parliament.uk/pa/cm/200708/cmpublic/finance/080619/am/80619s05.htm>

33 The antique treaties of Myanmar and Greece only grant personal allowances to residents of Myanmar/Greece who are not UK-law UK resident; they do not help UK-law UK residents even if also residents of Myanmar/Greece.

jurisdictions are likely to pay more tax overall than they do now if they were not able to claim the UK Personal Allowance than they do now...

### **6.2 High income individuals**

Around 5,000 high earning non-residents already have their Personal Allowance tapered away because their UK income is greater than £100,000...

### **6.3 Middle income individuals**

There are more than 110,000 migrant taxpayers with incomes over the level of the Personal Allowance and a significant proportion of this group are middle income non-residents. This includes, for example, professionals or managers seconded to the UK for a few months to work on specific projects. Individuals in this cohort who are not tax resident in the UK but pay UK tax on their earnings are likely to earn in excess of the Personal Allowance, so they have UK tax to pay on their earnings.

Actually there are two classes of non-resident employees who perform some duties in the UK:

- (1) Those who qualify for DTA relief as short term business visitors. These do not need UK allowances.
- (2) Those who do not qualify (or do not fully qualify) for DTA relief, who do need the allowances.<sup>34</sup>

The paper is interested in group (2):

Even without any policy change they are likely to claim double taxation relief in their country of residence to offset the UK taxation on their UK earnings. These individuals will not generally face a significant cash loss from the withdrawal of the UK Personal Allowance;

Instead the loss falls on the foreign Revenue authority; as often happens when the UK imposes tax on non-residents. It would be relevant to consider the converse situation: does the foreign state allow a personal allowance to residents in the UK who work in the foreign state (and so increasing UK tax revenues). If so, would the result of abolishing UK personal allowances be to encourage the foreign state to abolish theirs?

however this will depend on the relative level of tax rates and allowances between the UK and their country of residence. Those living

---

34 See 35.12 (Short-term visitor PAYE scheme).

in low tax jurisdictions may face a cash loss...

#### **6.4 Low income individuals**

Around 250,000 migrants, many of whom are non-residents, receive UK income below the Personal Allowance. Although some will have higher incomes overseas, some of this group will have a very low overall income. This group includes a significant group who may not pay sufficient tax overseas to claim relief for any UK tax payable and might face a cash loss if their entitlement to a UK Personal Allowance is withdrawn.

#### **6.5 Non-resident landlords and others with UK property income**

There are around 175,000 non-UK resident taxpayers with rental income. Non-resident landlords will generally be taxed on their UK rental income in their country of residence as well as the UK. Although some may currently not need to claim double taxation relief as their UK income is below the Personal Allowance, many non resident landlords would be able to claim double taxation relief and so should not face an overall cash loss without a UK Personal Allowance...

#### **6.6 Pensioners**

Pensioners who live overseas are a significant group of British national expatriates, estimated by DWP at around 1,200,000 individuals. Most UK national pensioners living overseas would not be affected by any restriction on non-residents entitlement to the Personal Allowance. This is because:

- some are still resident in the UK for tax purposes and so would not be affected by any change
- provisions of tax treaties generally mean that UK state pensions, personal pensions or private sector occupational pensions are only taxable in recipients' states of residence and not in the UK
- many non-resident UK national pensioners do not have any other income (i.e. employment or property) which is taxable in the UK and would not be affected by losing their Personal Allowance

However, under double tax treaties, UK sourced government service pensions (a wide category which includes, amongst others, some NHS staff and those employed by local authorities) are generally only taxed in the UK, regardless of recipients' residence status. This can also be the case with some other forms of income under specific treaties. The withdrawal of the UK personal allowance from non-residents in receipt of a UK government service pension would result in them paying more tax overall as there is no overseas tax liability against which the additional UK tax could be relieved.

In addition, in relation to UK investment income, the practical significance of allowances for non-residences is limited, since in many cases any claim for a personal allowance is effectively cancelled by non-residents IT relief.<sup>35</sup>

#### 41.9.2 *Nonresidents allowances: Reform*

Budget 2014 announced:

**Personal allowances for non-residents** – To ensure the UK personal allowance remains well targeted, the Government intends to consult on whether and how the allowance could be restricted to UK residents and those living overseas who have strong economic connections in the UK, as is the case in many other countries, including most of the EU.

The issue has become more important because of the increase in personal allowance in recent years. But proposal is an old one, first proposed in 1905.<sup>36</sup> I wonder if the authors of the proposal were aware of that. but this time the withdrawal of allowances was intended to be targeted:

The government is concerned that individuals, like those in receipt of government service pensions, who are not eligible for double taxation relief, would be disproportionately affected by the removal of the UK Personal Allowance.

The government does not intend to raise taxes on vulnerable groups or in situations where the UK is the principal taxing authority and an individual has no recourse to relief as a result of the UK having sole taxing rights under a tax treaty. If the government were to restrict non-residents' entitlement to the Personal Allowance, it would intend this to apply to types of income which are taxable both in the UK and overseas (such as that from immovable property) but to retain the Personal Allowance on income that is taxable exclusively in the UK.<sup>37</sup>

---

35 See 42.3 (Amount B: Non-disregarded income/reliefs).

36 See 57.7.1 (History and rationale).

37 HM Treasury Consultation Paper, "Restricting non-residents' entitlement to the UK personal allowance" (July 2014)

<https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance>

The Autumn Statement 2014 put the reform back to 2017<sup>38</sup> and in earlier edition of this work I commented:

Withdrawal of allowances for non-residents poses particularly difficult problems in the case of employers, who will need to know how to operate PAYE for employees whose residence may be difficult to ascertain or may simply be unknown until after the end of the tax year. I expect that nothing will happen.

That prediction seems to have been correct.

CHAPTER FORTY TWO

**NON-RESIDENTS INCOME TAX RELIEF**

42.1

**42.1 Non-residents IT relief: Introduction**

This chapter considers the IT relief for UK source income of non-residents. I use the following terminology:

<b>Term</b>	<b>ITA</b>	<b>Applies to</b>
Non-resident individual/trustee relief	s.811	Individuals/trustees
Non-resident company relief	s.815	Companies

I refer to these together as “**non-residents IT relief**”.

In accordance with the principles of the Tax Law Rewrite, the two reliefs are written out separately, though the rules are more or less the same.

In the absence of relief:

- (1) non-resident individuals and trustees are subject to tax on UK source income at the same rates as UK residents. So non-resident individuals may be subject to income tax at higher/additional rates, and non-resident trustees may be subject to tax at the trust rate.
- (2) Non-resident companies are in principle subject to income tax on UK source income at the basic rate/dividend ordinary rate.

In short, the relief is that UK source interest, dividend and pension income of non-residents is not subject to UK tax beyond withholding tax (where applicable).

Section 811/815 ITA provide the relief:

**s.811(1) ITA (individuals/trusts)**

**s.815(1) ITA (companies)**

<p>This section applies to income tax to which—                  (a) a non-UK resident, other than a company, is liable, or                  (b) a non-UK resident company is liable as a trustee.<sup>1</sup></p>	<p>This section applies to income tax to which a non-UK resident company is liable, otherwise than as a trustee.</p>
--	--

The relief is as follows:

**s.811(3) ITA (individuals/trusts)**

**s.815(2) ITA (companies)**

<p>The non-UK resident’s liability to income tax for a tax year is limited to the sum of amounts A and B.</p>	<p>The non-UK resident company’s liability to income tax for a tax year is limited to the sum of amounts A and B.</p>
---	---

There is no equivalent CGT relief but that is not needed as a non-resident is not usually subject to CGT. It is possible to envisage a case where a non-resident would be subject to CGT on gains made through an investment manager, but it would be unusual, in practice no-one would expect compliance, and HMRC probably turn a blind eye. The former International Tax Handbook stated at ITH970:

*it would be very rare to find a situation where a non-resident would be liable on capital gains made through an investment manager.*

We next need to ascertain amounts A and B.

**42.2 Amount A: Tax deducted at source**

**s.811(4) ITA (individuals/trusts)**

**s.815(3) ITA (companies)**

<p>Amount A is the sum of—</p>	<p>Amount A is the sum of—</p>
--------------------------------	--------------------------------

---

1 Section 811(1)(b) is strictly otiose since a trustee is a separate person for income tax; see 6.3 (Trustees a distinct person). But it does no harm.

(a) any sums representing income tax deducted from the non-UK resident’s disregarded income for the tax year (see section 813), and	(a) any amounts representing income tax deducted from the non-UK resident company’s disregarded company income for the tax year, and
(b) any sums representing income tax that are treated as deducted from or paid in respect of that income.	(b) any amounts representing income tax that are treated as deducted from or paid in respect of that income.

The wording is effectively the same.

The disregard in para (a) is:

- (1) for non-companies: “the non-UK resident’s disregarded income”
- (2) for companies: “the non-UK resident co’s disregarded company income”

But the meaning is more or less the same. I refer to such income as “**disregarded income**”. I refer to other income as “**non-disregarded income**” which is a clumsy term but I cannot think of better.<sup>2</sup>

Simplifying slightly: amount A is tax deducted at source on disregarded income.

### 42.3 Amount B: Non-disregarded income/reliefs

We turn to amount B. Section 811(5) ITA provides:

**s.811(5) ITA (individuals/trusts)**

**s.815(4) ITA (companies)**

Amount B is the amount that, apart from this section, would be the non-UK resident’s liability to income tax for the tax year,	Amount B is the amount that, apart from this section, would be the non-UK resident company’s liability to income tax for the tax year
--	---

---

<sup>2</sup> The attentive reader will also note that (for no good reason) the word *sums* has become *amounts*.

<p>if the following were left out of account—</p> <p>(a) the non-UK resident’s disregarded income for the tax year, and</p>	<p>if the non-UK resident company’s disregarded company income for the tax year were left out of account.</p>
<p>(b) any relief mentioned in subsection (6) to which the non-UK resident is entitled for the tax year as a result of—</p> <p>(i) section 56(3) or 460(3) of this Act (residence etc of claimants), or</p> <p>(ii) double taxation arrangements.</p>	

I refer to the reliefs within s.811(5)(b) as “**disregarded reliefs**”.

The wording is effectively the same except that for companies there is no reference to the disregarded reliefs (which makes sense as those reliefs only apply to individuals).

Thus one has a hypothetical tax computation which differs from the individual’s normal tax computation by ignoring two matters:

- Ignore disregarded income: the effect is to decrease the tax liability
- (For individuals): Ignore disregarded reliefs: the effect is to slightly increase the tax liability.

Since one only ignores disregarded income in computing amount B, UK tax on non-disregarded income is included in computing amount B, ie tax on non-disregarded income remains payable in full.

Moreover although amount B is computed by ignoring disregarded income, tax deducted at source on disregarded income comes into amount A, so the result at the end of the day is that UK tax on disregarded income is limited to withholding tax. The wording is convoluted, but it works.

#### 42.4 Disregarded reliefs

Section 811(6) ITA sets out the list of disregarded reliefs:

The reliefs referred to in subsection (5) are—<sup>3</sup>

<sup>3</sup> For clarity I set this out in tabular form, and in the terminology of this book, rather than the layout of the statute.

Para Relief	Reference	See para
(a) Personal allowance, blind person’s allowance	Chap 2 Part 3 ITA	41.8.1
(b) Tax reduction for spouse born before 1935	Chap 3 Part 3 ITA	
(c) <sup>4</sup> Trade union/police organisation subscriptions	s.457, 458 ITA	
(e) Life assurance premium relief (pre-1984 policies)	s.266 ICTA	

The most important item in this list is the personal allowance.<sup>5</sup> The others are not likely to be significant.

These reliefs are not disapplied. The individual can in theory claim them. But that claim increases amount B, so reduces the benefit of non-residents IT relief. A higher rate taxpayer will often be no better off at all; sometimes there may be a small saving but it may be insufficient to justify the accountancy cost of making the claim.

In short, a non-resident individual must choose between (1) personal allowances and (2) non-residents IT relief: they cannot have both.

### 42.5 Disregarded income

The definition of “disregarded income” is crucial since disregarded income qualifies for non-residents IT relief and other income does not.

In practice, the most important categories are dividends and interest.

The definition is complex. There are six categories of disregarded income:

**s.813(1) ITA (individuals/trusts)**

**s.816 ITA (companies)**

For the purposes of this Chapter [Chapter 1 Part 14 ITA] income arising to a non-UK resident is “disregarded income” if it is—	(1) For the purposes of this Chapter [Chapter 1 Part 14 ITA] income arising to a non-UK resident company is “disregarded company income” if it is—
(a) disregarded savings and investment income (see section 825), <sup>6</sup>	[identical]

4 There is no para (d).

5 See 41.8.1 (Personal allowances under DTAs: Non-residents).

6 See 42.6 (Disregarded savings & investment income).

(b) disregarded annual payments (see section 826), <sup>7</sup>	[identical]
(c) disregarded pension income, (d) disregarded social security income,	
(e) disregarded transaction income (see section 814), <sup>8</sup> or	(c) income arising from a transaction carried out through a broker in the UK acting as an agent of independent status in the ordinary course of the broker's business, (d) income arising from a transaction carried out through an investment manager in the UK acting as an agent of independent status in the ordinary course of the investment manager's business, <sup>9</sup> or
(f) income of such other description as the Treasury may by regulations designate for the purposes of this section. [No regulations have been made].	(e) [identical to (f)]

The wording for companies is effectively the same. There are two apparent differences:

- (1) References to pension or social security income are omitted (as they do not apply to companies).
- (2) There are differences in the wording of s.816(1)(c)(d) which are the equivalent of the individual's exemption for "transaction income" but I cannot see they are of any significance.

Thus we have to turn to another five definitions. But first, s.813(2) ITA brings in an important exception:

<sup>7</sup> See 42.7 (Disregarded Annual Payments).

<sup>8</sup> See 68.3 (IME non-resident IT relief); 68.5.3 ("Transaction income").

<sup>9</sup> See 68.1 (Investment manager exemptions).

But income in relation to which the non-UK resident has a UK representative for the purposes of Chapter 2B is not disregarded income.

See 118.3 (UK representative).

## **42.6 Disregarded savings & investment income**

Section 825(1) ITA provides the definition:

For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is “disregarded savings and investment income” if—

There are two categories of disregarded savings & investment income: dividends and interest.

### *42.6.1 Dividends*

Section 825(1) ITA provides:

For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is “disregarded savings and investment income” if—

- (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies)

Non-residents IT relief is not needed for dividends arising to:

- (1) individuals who are not higher rate taxpayers
- (2) non-resident companies
- (3) interest in possession trustees

Persons in these categories pay only at the dividend ordinary rate,<sup>10</sup> and they qualify for a dividend tax credit which covers that.<sup>11</sup>

But non-residents IT relief is relevant for non-resident individuals who are higher rate taxpayers, and to discretionary trusts.

### *42.6.2 Interest*

Section 825(1) ITA continues:

For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is

---

<sup>10</sup> Or, for an individual with income of less than £2k, at the dividend nil rate, but the end result is the same.

<sup>11</sup> See 29.4 (Non-resident recipient).

“disregarded savings and investment income” if ...

- (b) [i] it is within subsection (2) and  
[ii] is not relevant foreign income<sup>12</sup>.

So we turn to s.825(2) ITA, which deals with interest and interest-like income:

Income is within this subsection if it is chargeable under—<sup>13</sup>

Para	ITTOIA Part 4	Type of income
(a)	Chapter 2	Interest
(b)	Chapter 7	Purchased life annuity payments
(c)	Chapter 8	Deeply discounted securities
(e) <sup>14</sup>	Chapter 11	Transactions in deposits
(f)	Reg 15 UUTTR <sup>15</sup>	Distributions from unauthorised unit trusts

The terminology is not ideal, as “Savings & Investment Income” is a technical term best used as a label for income within Part 4 ITTOIA (which is headed Savings & Investment Income). But no harm arises as long as one remembers that the term does not carry quite that meaning here:

- (1) it includes item (f), which is not in Part 4, and  
(2) it does not include some categories of income which are in Part 4:

Topic	Part 4 Chap.	Comment
Disguised interest	2	Accidental omission, perhaps
Non-UK dividends	4	Relief not needed
Life policies: chargeable-event gains	9	Relief not needed

## 42.7 Disregarded Annual Payments

Section 826 ITA provides the definition:

For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is “disregarded annual payments” if it is not relevant foreign income and is chargeable under—

- (a) section 579 of ITTOIA 2005, so far as it relates to annual

12 Why is para [ii] needed?

13 For clarity I set this out in tabular form, and in the terminology of this book, rather than the layout of the statute.

14 There is no para (d).

15 Unauthorised Unit Trusts (Tax) Regulations 2013.

- payments (royalties etc from intellectual property),
- (b) Chapter 4 of Part 5 of that Act, so far as it relates to annual payments (certain telecommunication rights: non-trading income), or
- (c) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged).

Thus royalties which are Annual Payments are disregarded income, but royalties which are not Annual Payments are not.<sup>16</sup> In practice DT relief will often apply, so the distinction may not matter. But it is submitted all royalties ought to be treated in the same way.

## **42.8 Disregarded pension/social security income**

Section 813(3) ITA provides:

Income is “disregarded pension income” if it is chargeable under Part 9 of ITEPA 2003 (pension income) because any of the following provisions of that Act applies to it—  
section 577 (UK social security pensions),  
section 579A (pensions under registered pension schemes) (but see subsection (4) below),<sup>17</sup>  
section 609 (annuities for the benefit of dependants),  
section 610 (annuities under non-registered occupational pension schemes), or  
section 611 (annuities in recognition of another’s services).

Section 813(5) ITA provides:

Income is “disregarded social security income” if—  
(a) it is a taxable benefit listed in Table A in section 660 of ITEPA 2003, other than income support or jobseeker’s allowance, and  
(b) it is chargeable under Part 10 of that Act (social security

---

<sup>16</sup> For the distinction, see 31.4 (Non-trade royalties).

<sup>17</sup> Section 813(4) ITA provides:

“Income chargeable under Part 9 of ITEPA 2003 because section 579A of that Act applies to it is disregarded pension income only if the registered pension scheme in question—

- (a) falls within para 1(1)(f) of Schedule 36 to FA 2004, and
- (b) was, immediately before 6 April 2006, a retirement annuity contract to which section 605 of ITEPA 2003 applied.”

income).

## 42.9 Individuals: Split years

Section 810(4) ITA provides:

In relation to an individual—

- (a) a reference in this Chapter [Chapter 1 Part 14 ITA] to a non-UK resident’s liability to income tax is a reference to the liability of someone who is non-UK resident for the tax year for which the liability arises, and
- (b) accordingly, enactments under which income arising to a UK resident in the overseas part of a split year is treated as arising to a non-UK resident are of no relevance to this Chapter.

Thus non-residents IT relief does not apply for a split year of an individual. This seems unfair and inconsistent with the general scheme of the split-year rules. Perhaps the reason is that a tax return is needed for the split year, one object of the relief is to save the need for a tax return, so the relief is not appropriate in a split year.

The planning moral is that where possible leavers should defer UK source income until after the end of a split year; and arrivers should arrange UK source income to accrue before the beginning of a split year.

## 42.10 Trusts: UK beneficiary rule

Section 812(1) ITA provides:

Section 811 does not apply to income tax to which non-UK resident trustees are liable for a tax year, if there is a beneficiary of the trust who is—

- (a) an individual who is UK resident, or
- (b) a UK resident company.

I refer to this as the “**UK beneficiary rule**”. One UK beneficiary may disqualify the entire trust from the relief.

Non-resident’s IT relief is available if:

- (1) The trust is settlor-interested and the settlor is non-UK resident as the income is treated as the income of the settlor, not the trustees.<sup>18</sup>
- (2) The trust is an IIP trust and the life tenant is non-resident.

---

<sup>18</sup> See 44.9.2 (Non-resident trust, non-resident settlor).

It does not matter if the trustees do not qualify for relief in their own capacity, due to the UK beneficiary rule. The trustees may take the benefit of the non-resident individual's IT relief applicable to the settlor or life tenant.

#### 42.10.1 “Beneficiary”

Section 812 ITA defines “beneficiary”:

- (2) For the purposes of subsection (1) a person is a beneficiary of the trust if—
  - (a) the person is an actual or potential beneficiary of the trust, and
  - (b) condition A or B is met in relation to the person.
- (3) Condition A is that the person is, or will or may become, entitled under the trust to receive some or all of any income<sup>19</sup> under the trust.
- (4) Condition B is that some or all of any income under the trust may be paid to or used for the benefit of the person in the exercise of a discretion conferred by the trust.

At first sight it appears that a trust with power to add beneficiaries would not qualify for relief, since UK residents are potential beneficiaries. But such powers are standard form in offshore trusts, so if that were right, offshore trusts would not normally qualify. In practice I understand that HMRC do not take that point.

#### 42.10.2 HMRC example

The TSE Manual provides a straightforward example:

**TSEM10220 effect of ITA/S811 [Aug 2019]**

... *Example*

Year 2013-14

Income of non-resident trust:

UK bank interest = £1,000. Tax deducted at source = NIL

UK property income = £2,000. Tax deducted = NIL

The trust is within ITA/S479, and all the beneficiaries (income and

---

<sup>19</sup> Income is in turn defined in s.812(5) ITA:

“The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income.”

capital) are not resident in the UK for the year 2013-14. The provisions of ITA/S811 apply to cap the liability to income tax on bank interest.

Income tax liability is limited to the sum of:

- (a) (ITA/S811(4) the income tax deducted from bank interest ('disregarded income') -NIL and
- (b) (ITA/S811(5) the income tax liability on property income - £2,000:

Income chargeable at the standard rate band is £1,000 @ 20% = £200.

Income chargeable at the trust rate = £1,000 @ 45% =£450

The Income Tax liability is £650 for the year 2013-14.

## 42.11 Critique

Non-residents IT relief originated in a long standing concession, put on a statutory basis in 1995. As far as I know, no public discussion of the reasons for non-residents IT relief has taken place. Several different policy aspects can be identified.

- (1) Tax competition considerations:
  - (a) Non-residents are not likely to invest in UK securities if they had to pay progressive IT rates.
  - (b) Even the imposition of basic rate tax may be a deterrent; this is typically dealt with by withholding tax exemptions which (together with non-residents IT relief) result in total exemption.<sup>20</sup>
- (2) The practical difficulty in seeking to collect tax in excess of tax deducted at source. Tax collection would be possible in countries which have mutual assistance agreements so this is less of a problem than it once was. But perhaps collection may still not be easy. Also it would perhaps be odd to have one rule for the those countries and another for the rest of the world.
- (3) Various policy considerations tend to suggest that higher and additional rates of UK tax ("progressive IT rates") are not appropriate for non-resident individuals:
  - (a) Progressive rates of UK tax would not be applied to all non-residents income (most of their income may be foreign source income and not subject to UK tax).
  - (b) Non-resident individuals are likely to be taxed in their country of residence, with credit for UK tax.

---

<sup>20</sup> See 1.2.2 (Other tax competition).

- (c) If every country applied its own progressive rates, taxpayers would have to fill in tax returns in as many countries as they held investments, which would be impractical for a worldwide portfolio.
- (d) Insofar as the right to tax is justified by the benefit principle,<sup>21</sup> the benefit provided to a non-resident individual is less than that provided by a UK resident.

These considerations form the basis for a general international acceptance that progressive rates are mainly a matter for the country of residence.<sup>22</sup>

Two important categories of UK income are not disregarded income: employment income and property income. These types of income do not qualify for non-residents IT relief and are therefore subject to progressive rates of tax if received by an individual.

The treatment of employment income is understandable since (1) tax competition may be less of a concern; (2) PAYE makes collection of tax easy in most cases; and (3) disparity compared to other employees might be regarded as unacceptable.

The treatment of property income is strange. Deduction at source on rent is limited to the basic rate, though enforcement of progressive rates would theoretically be possible because of the situation of assets in the UK (not to mention mutual enforcement treaties). In the past, the Inland Revenue did not attempt to collect progressive rates on UK property income of non-residents.<sup>23</sup> This is not the current practice, at least officially. However one wonders how often tax strictly due is actually collected. Of course

---

21 That is, the principle that in an equitable tax system, taxpayers should contribute in proportion to the benefits they receive from government expenditure.

22 This view is expressed in "A Platform for Consultation" (Australia) para 30.61 (2010) <http://www.rbt.treasury.gov.au/publications/paper3/index.htm>

23 The point arose in *Burns v HMRC* [2009] UKSPC SPC00728 where HMRC argued that transfers of land from (supposedly) non-resident individuals to non-resident companies in 1980 and 1982 were made to avoid higher rate income tax on UK property income. The taxpayers argued that could not be correct, since the Inland Revenue did not collect higher rate tax. The Special Commissioner stated that in the 1980's there was "a certain level of expectation" that HMRC did not seek to collect higher rate tax on UK source rental income of non-residents. The practice was perhaps a routine blind eye, rather than anything more formal; though a thorough review of Inland Revenue files would be needed to find the answer.

well-advised non-residents will generally hold investment properties in non-resident companies, so there will not often be much progressive rate tax even strictly due.

Logically:

- (1) the collection of tax at source rules on UK property ought to be extended to progressive rates, where land is vested in an individual or a trust; or (if this is thought to be too onerous to administer)
- (2) property income ought to be disregarded income and so qualify for non-residents IT relief. Tax would be limited to deduction at source.

This aspect of non-residents IT relief reflects a lack of consistent thinking or an uneasy compromise between conflicting policy considerations.

The rule that non-residents IT relief effectively disallows personal allowances ensures that what can be deducted at source is retained in full, and simplifies administration for HMRC and for taxpayers.

## CHAPTER FORTY THREE

# NATIONAL INSURANCE CONTRIBUTIONS

43.1

### 43.1 NICs: Introduction

Of course NICs are a tax:

It is now a common view, accepted by virtually all tax experts outside of HMRC and HM Treasury, that NICs are no more than an additional tax on earnings. There is just the slightest relationship between whether they are paid and rights to some benefits. There is almost no relationship at all between how much is paid and rights to anything. They are a tax.<sup>1</sup>

NICs should be regarded as a collection of seven (more or less) distinct taxes. They are numbered semi-numerically. Section 1(2) SSCBA summarises them but it is easier to read in a table:

Para	Class: Section	Payable by
<i>Earnings-related</i>		
(a)	<i>Class 1</i> : s.6	
(i)	primary Class 1	employed earners
(ii)	secondary Class 1	employers/persons paying earnings
(b)	<i>Class 1A</i> : s. 10	persons liable to pay secondary Class 1 contributions/certain others
(bb)	<i>Class 1B</i> : s.10A	persons accountable in accordance with a PAYE settlement agreement;
<i>Flat-rate</i>		
(c)	<i>Class 2</i> : s.11	self-employed earners;
(d)	<i>Class 3</i> : s.13, 13A	earners and others voluntarily, to obtaining benefits;
(da)	<i>Class 3A</i> : s.14A	eligible people voluntarily, to obtain units of additional pension

---

1 Johnson, "Tax without Design: Recent Developments in UK Tax Policy" (2014) Fiscal Studies vol 35, p.243.

- (e) *Class 4: s.15* in respect of profits/gains of a trade, profession or vocation, or  
       : s.18 in respect of equivalent earnings.

The Institute of Directors say:

To promote tax transparency, and in advance of ultimately merging income tax and national insurance contributions, the employees' contribution should be re-named 'earnings tax' and the employers' contribution 'employment tax'.<sup>2</sup>

That would be a good idea, and it might prevent misleading claims such as "We will take everyone earning less than £12,500 out of Income Tax altogether";<sup>3</sup> but there seems little prospect of it happening.

Each class of NIC needs a book to itself, except for class 1 which requires many volumes. I focus on matters closest to the themes of this book. I do not consider the special rules for mariners, aircrew, diplomats and service personnel.

SSCBA does not apply in Northern Ireland<sup>4</sup> so it refers to "Great Britain". (Northern Ireland has its own legislation, not discussed here.) SSCR applies throughout the UK, so it usually refers to the UK, or to "GB and Northern Ireland".

## **43.2 Employment/employed/self employed**

### *43.2.1 Employment/employed*

Section 122(1) SSCBA provides an artificial definition:

"employment" includes any trade, business, profession, office or vocation and "employed" has a corresponding meaning

### *43.2.2 Employed/self employed earner*

Section 2(1) SSCBA provides:

In this Part of this Act and Parts II to V below—

- (a) "employed earner" means a person who is gainfully employed in Great Britain

---

2 Institute of Directors, "GE2015: The IoD's Key Priorities for Tax Reforms" (2015)

3 Conservative Party Manifesto, 2015.

4 Section 177(6) SSCBA provides: "Except as provided by this section, this Act does not extend to Northern Ireland."

- [i] either under a contract of service, or
  - [ii] in an office (including elective office)<sup>5</sup> with general earnings; and
- (b) “self-employed earner” means a person who is gainfully employed in Great Britain otherwise than in employed earner’s employment (whether or not he is also employed in such employment).

SSCBA, confusingly, (mis)defines the word “employment” to include trades and professions. But the terms “employed/self employed earner” are given (more or less<sup>6</sup>) their ordinary meanings.

In this chapter I use the word “**employee**” to mean an “employed earner” and “**self-employed**” means a “self-employed earner”.

### 43.3 “Secondary contributor”

Section 6(4) SSCBA provides:

The primary and secondary Class 1 contributions referred to in subsection (1) above are payable as follows—

- (a) the primary contribution shall be the liability of the earner; and
- (b) the secondary contribution shall be the liability of the secondary contributor; ...

The identity of the secondary contributor is clearly crucial.

Section 7(1) SSCBA provides:

For the purposes of this Act, the “secondary contributor” in relation to any payment of earnings to or for the benefit of an employed earner, is—

- (a) in the case of an earner employed under a contract of service, his employer;
- (b) in the case of an earner employed in an office with earnings, either—
  - (i) such person as may be prescribed in relation to that office;
  - or
  - (ii) if no person is prescribed, the government department,

---

5 The odd expression “elective office” is not defined and the words in brackets are otiose.

6 To add to the confusion, SSCER deems some persons actually self-employed to be employees for NIC purposes and vice versa.

public authority or body of persons responsible for paying the earnings of the office...

SSCER reg. 5(1) prevents avoidance by foreign employers seconding to the UK:

For the purposes of section 4 of the Act<sup>7</sup> (Class 1 contributions), in relation to any payment of earnings to or for the benefit of an employed earner in any employment described in any paragraph in column (A) of Schedule 3 to these regulations, the person specified in the corresponding paragraph in column (B) of that Schedule shall be treated as the secondary Class 1 contributor in relation to that employed earner.

...

**Column (A)** [Employment]

**Column (B)** [Secondary Contributor]

9 Employment-

9 Where the employment is-

(a) (not being an employment described in sub-paragraphs (b) to (f)) by a foreign employer where the employed person, under an arrangement involving the foreign employer and the host employer, provides, or is personally involved in the provision of services, to a host employer;

(a) employment within paragraph 9(a) of column (A), the host employer;

(b) under or in consequence of a contract between a foreign agency and an end client where the worker provides services to that end client;

(b) employment within paragraph 9(b) of column (A), the end client;

(c) by a foreign employer where the worker provides services to an end client under or in consequence of a contract between that end client and a UK agency;

(c) employment within paragraph 9(c) of column (A), the UK agency who has the contractual relationship with the end client;

---

<sup>7</sup> Section 4 Social Security Act 1975 is now s.7 SSCBA.

(d) by a foreign agency where the worker provides services to an end client under or in consequence of a contract between that end client and a UK agency;

(e) by a UK employer where the worker provides services to a person outside the UK under or in consequence of a contract between that person and a UK agency and the worker is eligible to pay contributions in the UK in relation to that employment; or

(f) by a foreign employer where the worker provides services to a person outside the United Kingdom under agency who has the contractual or in consequence of a contract relationship with the person between that person and a UK agency and the worker is eligible to pay contributions in the UK in relation to that employment.]

(d) employment within paragraph 9(d) of column (A), the UK agency who has the contractual relationship with the end client;

(e) employment within paragraph 9(e) of column (A), the UK employer or UK agency who has the contractual relationship with the person outside the UK; or

(f) employment within paragraph 9(f) of column A, the UK agency who has the contractual relationship with the person outside the United Kingdom;

(g) employment within paragraphs 9(c) or (d) of column (A) and the end client provides at any time to the UK agency fraudulent documents in connection with the control, direction or supervision which is to be exercised over the employed person, the end client; or  
 (h) employment within paragraphs 9(c) or (d) of column (A) and a person who is resident in Great Britain (who is not the end client) with a contractual relationship with the UK agency provides at any time to the UK agency fraudulent documents in connection with the purported deduction or payment of contributions in connection with the employed person, the person who provides the fraudulent document.]

Where the employment is as a mariner, this paragraph only applies where the duties of the employment are performed wholly or mainly in category A, B, C or D waters.]

#### 43.4 Territorial limitation: Outline

There are three categories:

- (1) EU, EEA and Switzerland now governed by Brexit treaties
- (2) Countries governed by specific bilateral Social Security agreements (Reciprocal Agreements & Double Contribution Conventions)
- (3) Rest of the World: where neither TCA nor bilateral agreements apply.

#### 43.5 Bilateral social security agreements

The NI Manual provides:

##### **NIM33010 What is a Reciprocal Agreement?** [Apr 2019]

A Reciprocal Agreement country is a country outside the EEA, including Switzerland, with which the UK has a bi-lateral convention on Social Security matters.

The Social Security Conventions are more commonly referred to as Reciprocal Agreements.

There are two types of Social Security Conventions:

- A full Social Security Agreement which may include some benefit and health care provisions; or
- A Double Contributions Convention (DCC) - these relate to contribution matters only and have no benefit or health care provisions.

The countries with whom the UK has DCCs are: Canada, Japan, Republic of Korea, Chile

Reciprocal Agreements are made between two countries to:

- Give equality of treatment to people who are insured in one country and live or work in another country; and
- Ensure that a person is not liable to pay Social Security Contributions in both countries for the same period.

Each agreement is different.

For a full list of all the countries with who the UK have agreements see NIM33012

The UK also has Reciprocal Agreements with some countries in the EEA. In situations where it is not possible to apply European legislation then the Reciprocal Agreements may apply.

#### **NIM33012 Reciprocal Agreement Countries** [Jul 2019]

Barbados Bermuda Canada Chile Isle of Man Israel Jamaica Japan Jersey and Guernsey Republic of Korea Mauritius Philippines Turkey USA

Republic of Former Yugoslavia (includes Bosnia-Herzegovina, Serbia, Kosovo, Montenegro, and the Republic of Macedonia). Croatia and Slovenia joined the EU in 2013 and 2004 respectively so the EC Regulations apply to those countries instead of the RA...

#### **Isle of Man**

The Isle of Man agreement is limited and liability is generally determined under place of residence.

Contributions can only be paid in one country. As a general rule an employee will be insurable in the country where they work. Where a person falls within UK legislation they are treated as being ordinarily resident in the UK and are liable for Class 1 from the outset of employment in the UK.

I do not discuss reciprocal agreements in this book.

## **43.6 ROW: Employed in GB**

I turn to consider what the NI Manual calls “ROW” (rest of the world) rules.

Unless the individual is employed *in* GB, they are not an employed or self-employed earner, and so in principle no NIC liability arises.<sup>8</sup> I refer to this as the “**GB employment rule**”.

Tax Bulletin 79 explains:

This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed.

#### 43.6.1 *UK board meetings concession*

CA44 (2020/21) (National Insurance for company directors) provides:

Director, who is neither resident or ordinarily resident in the UK:

- comes to work for a company in the UK
- from a country outside the EEA, and
- the only work the director does in the UK is to attend board meetings

We will not seek payment of UK NICs if:

- they attend no more than ten board meetings in a tax year and each visit to the UK during which a board meeting takes place lasts no more than 2 nights
- there is only 1 board meeting in a tax year and the visit to the UK during which that board meeting takes place lasts no more than 2 weeks

This is not an example. If the director’s attendance for board meetings does not fit the criteria above, the special concession will not apply.

This concession does not apply to a director who comes to work in the UK from an EEA country.

#### 43.6.2 *First year abroad*

Reg. 146 SSCR provides an extension to the GB employment rule:

(1) Where

[a] an earner is gainfully employed outside the UK, and

---

<sup>8</sup> See 43.2.2 (“Employed” and “self-employed”).

[b] that employment, if it had been in Great Britain or Northern Ireland, would have been employed earner's employment, that employment outside the UK shall be treated as employed earner's employment for the period for which under para (2)(a) contributions are payable in respect of the earnings paid to the earner in respect of that employment provided that—

- (a) the employer has a place of business in Great Britain or Northern Ireland (as the case may be);
- (b) the earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be); and
- (c) immediately before the commencement of the employment the earner was resident in Great Britain or Northern Ireland (as the case may be).

(2) Where, under para (1), the employment outside the UK is treated as an employed earner's employment, the following provisions shall apply in respect of the payment of contributions—

- (a) primary and secondary Class 1 contributions shall be payable in respect of any payment of earnings for the employment outside the UK during the period of 52 contribution weeks from the beginning of the contribution week in which that employment begins to the same extent as that to which such contributions would have been payable if the employment had been in Great Britain or Northern Ireland (as the case may be);
- (b) subject to regulations 148 and 148A, any earner by or in respect of whom contributions are or have been payable under sub-para (a) shall be entitled to pay Class 3 contributions in respect of any year during which the earner is outside the UK from and including that in which the employment outside the UK begins until that in which he next returns to Great Britain or Northern Ireland (as the case may be);
- (c) Class 1A contributions and Class 1B contributions shall be payable in respect of the period specified in sub-para (a).

In short, employment outside the UK is treated as employment in the UK (and so subject to NIC) for 52 weeks, provided the following conditions are satisfied:

- (1) The employer has a place of business in the UK.
- (2) The employee is ordinarily resident in UK.
- (3) The employee was UK resident immediately before the employment commenced.

NI Manual provides:

**NIM33535 people going to or coming from abroad: row: change of employment** [Dec 2018]

**Change of employment overseas with the same employer**

The 52 week period of continuing liability may cease when an employee changes employment. Whether or not an employee has entered into a new employment will be a question of fact. The contracts of employment will indicate if this were so.

**Example**

- Ralph was posted by the UK company to work in Australia for a period of 2 years as a General Manager of the Sydney office
- After 6 months he applied for promotion as a Overseas Sales Executive with a separate department of the UK company
- He was successful and immediately took up his new position in Malaysia

The subsequent posting from Australia to Malaysia would be considered to arise in connection with the new employment with the UK Company. The 52 week period would cease.

Had the UK employer simply posted him to Malaysia in connection with the original occupation/employment as a General Manager then the 52 week period would have continued in full.

The position depends on the documentation relating to the contract of employment.

HMRC say:

The 52 week contributions rule will not apply to individuals working between the UK or an EU/EEA State or Switzerland after Brexit. Payment of National Insurance will be determined under the retained EU social security coordination rules.<sup>9</sup>

### 43.7 ROW: Residence requirements

Section 1(6) SSCBA provides a supplement to the GB employment rule:

No person shall—

- (a) be liable to pay Class 1, Class 1A, Class 1B or Class 2 contributions unless he fulfils prescribed conditions as to

---

<sup>9</sup> Expat forum EU Exit QA log, May 2019 (circulated informally).

- residence or presence in Great Britain;
- (b) be entitled to pay Class 3 contributions unless he fulfils such conditions; or
- (c) be entitled to pay Class 1, Class 1A, Class 1B or Class 2 contributions other than those which he is liable to pay, except so far as he is permitted by regulations to pay them.

Reg. 145 SSCR provides five different sets of residence requirements.

#### 43.7.1 *Primary Class 1 NIC*

Reg. 145(1)(a) SSCR provides that the requirement is:

as respects liability of an employed earner to pay primary Class 1 contributions in respect of earnings for an employed earner's employment, that the employed earner is

- [i] resident or present in Great Britain or Northern Ireland
- [ii] (or but for any temporary absence would be present in Great Britain or Northern Ireland)

at the time of that employment or

- [iii] is then ordinarily resident in Great Britain or Northern Ireland (as the case may be).

There are four possible territorial connections, and if any one of them is satisfied Primary Class 1 NIC is in principle payable:

- (1) Residence in UK.
- (2) Presence in UK.
- (3) Temporary absence from UK.
- (4) Ordinary residence in UK.

Tax Bulletin 79 explains:

The effect of Regulation 145 (1) SSCR 2001 is to provide for a kind of constructive presence for periods outside the UK which are merely a "temporary absence". This concept of temporary absence requires that:

- i. the person's absence be temporary,
- ii. that if he were not absent he would be present in the UK.

This means that an employee who has employment based in the UK who goes abroad for a time on a short business trip or holiday abroad, and who departs from or returns to the UK, can continue to be within the UK scheme.

An example of this would be the person who flies to a board meeting outside the UK and then returns to their UK based employment.

That seems obvious. The Bulletin continues:

Taken together, Section 2(1)(a) SSCBA 1992 and Regulation 145 (1)(a) SSCR 2001 is enough to keep a person within Class 1 NIC if their employment is based here and their absence abroad is of a temporary or incidental nature. However, crucially, an employee who is not ordinarily resident in the UK and who normally works overseas cannot be said to be merely “temporarily absent” from employed earners employment in the UK if they are departing overseas for a time, to work for their foreign employer. In such a situation, the person is not performing duties which is merely incidental to the employed earner’s employment in the UK but is returning to an employment based outside the UK. In the absence of an express contractual provision as to the attribution of the earnings, the earnings must be apportioned between the employed earner employment in the UK and the overseas duties for the foreign employer.

#### 43.7.2 *First year in UK exemption*

Reg. 145(2) SSCR provides an exception, in a sentence so long and convoluted that it almost makes one appreciate the style of the Tax Law Rewrite:

Where

[1] a person is ordinarily neither resident nor employed in the UK and,  
 [2] in pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK (whether or not he also has a place of business in the UK) that person is employed for a time in Great Britain or Northern Ireland (as the case may be) as an employed earner and,

[3] but for the provisions of this paragraph, the provisions of sub-para (a) of para (1) would apply,

[4] the conditions prescribed in that sub-paragraph and in sub-para (b) of that paragraph shall apply subject to the proviso that—

- (a) no primary or secondary Class 1 contribution shall be payable in respect of the earnings of the employed earner for such employment;
- (b) no Class 1A contribution shall be payable in respect of something which is made available to the employed earner or to a member of his family or household by reason of such employment; and

(c) no Class 1B contribution shall be payable in respect of any PAYE settlement agreement in connection with such employment,<sup>10</sup>

after the date of the earner's last entry into Great Britain or Northern Ireland (as the case may be) and before he has been resident in Great Britain or Northern Ireland (as the case may be) for a continuous period of 52 contribution weeks from the beginning of the contribution week following that in which that date falls.

In short, employment in the UK is not subject to NIC for 52 weeks provided the following conditions are satisfied:

- (1) employee not ordinarily resident in UK;
- (2) employee not ordinarily employed in UK;
- (3) employment mainly outside the UK;
- (4) employer has a place of business outside the UK.<sup>11</sup>

NI Manual provides:

**NIM33515 people going to or coming from abroad: row: exemption**  
[Jul 2019]

**Regulation 145(2) SSCR 2001**

This regulation provides exemption from the payment of primary and secondary Class 1 NICs for posted workers arriving in GB for a continuous period of 52 contribution weeks provided the worker is

- not ordinarily resident in GB; and
- not ordinarily employed in GB; and
- in pursuance of an employment that is mainly outside the UK;
- by an employer with a place of business outside the UK; and
- is employed for a time in GB as an employed earner

The exemption lasts until the employee has been resident in GB for a continuous period of 52 weeks starting from the beginning of the contribution week following the week in which the worker arrives in GB to take up employment.

---

10 I have corrected a disastrous typographical error in the SSCR by inserting a paragraph break here. The last paragraph (beginning "after the date") governs paras (a), (b) and (c). This can be seen to be correct from context and by comparing the predecessor, reg.119(2) SSCR 1979.

11 It might be inferred that the relief only applies if the employer's principal place of business is outside the UK, but the better view is that any place of business outside the UK is sufficient, and this is consistent with reg.146(2).

A further 52 week period may commence where an employee returns to the overseas employment and then commences a new secondment in GB  
The exemption does not apply to:

- EEA nationals as this would contravene the principle behind Regulation 883/04 see NIM33020
- RA countries where a person is treated as being ordinarily resident in the UK if they fall within UK domestic legislation see NIM33400
- To decide whether a person coming to the UK is ordinarily resident in the UK for NIC purposes, apply the tests suggested in NIM33505 and NIM33510.

**NIM33520 example** [Feb 2017]

A doctor works for a hospital in Egypt as a surgeon and sees an advert in a medical journal for surgeon's position in Newcastle for a 2 year period. The position will enable him to obtain further advanced surgical qualifications.

He applies and is successful. The Egyptian employer agrees to keep his employment position open until he returns. The doctor signs a contract of employment with the hospital in Newcastle for two years.

In this case the 52 week exemption tests are satisfied. He is not ordinarily resident or employed in GB. He is employed for a time in GB as an employed earner. A major indicator in this example is the continuing employment in Egypt and the employee being able to return after the period of employment in GB.

In order to satisfy the "in pursuance of employment" test the employment in GB must be related to the particular employment that the employee has outside of GB. The fact that the employee may be pursuing their own goals is not relevant. It is characteristic of much skilled work that the employer's interests in a person's improved skills will coincide with the employee's interest in advancing their career and marketability. Provided that the facts support that the employment in GB and obtaining of advanced qualifications (in this case advanced surgical qualifications) are required for the employment abroad then the test may apply

A different conclusion may have been reached if the employment and qualifications obtained in GB were diverse from the employment in Egypt.

43.7.3 *Secondary Class 1, 1B, NICs*

Reg. 145(1)(b) SSCR provides that the requirement is:

as respect<sup>12</sup> liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions

[i] that the person who, but for any conditions as to residence or presence in Great Britain or Northern Ireland (as the case may be and including the having of a place of business in Great Britain or Northern Ireland),<sup>13</sup> would be the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as “the employer”) is

[A] resident or

[B] present

in Great Britain or Northern Ireland when such contributions become payable or

[C] then has a place of business in Great Britain or Northern Ireland (as the case may be),

[ii] so however that nothing in this paragraph shall prevent the employer paying the said contributions if he so wishes.

Thus there are three possible connecting factors and if any of them is satisfied, secondary Class 1 NIC is due:

- (1) employer resident in UK
- (2) employer present in UK
- (3) employer has a place of business in UK

The first year in UK and student exemptions may apply.

### 43.8 Class 1 NIC: HMRC examples

Tax Bulletin 79 provides:

**Example 1 (Angus)**

**Sent from ROW country to work in the UK - contractual employer in ROW country but seconded to the UK “host” employer.**

---

12 This is a slip for “*as respects ...*” but nothing turns on that.

13 The long phrase beginning “but for” (and continuing to the close of brackets which follows) appears to be otiose. The paragraph means:

“as respects liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who is the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as ‘the employer’) is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland ...”

**An Australian employer assigns A, who normally works in Australia to the UK for 2 years. Residence status is resident in the UK but not ordinarily resident in years 1 and 2.**

A meets the criteria for a 52 weeks exemption from NIC because he is not ordinarily resident in the UK and he is not ordinarily employed in the UK and is working for his overseas employer and is in the UK in continuance of that employment. His Australian employer has no place of business in the UK.

Once the first 52 weeks period in Regulation 145(2) SSCR 2001 has expired, A will become liable for contributions in the UK. As his contractual employer has no place of business in the UK, the UK “host” employer to whom personal service is made available is the secondary contributor - liable for the employer part of the National Insurance. [Para 9 to Regulation 3, Social Security Categorisation of Earners Regulations 1978].

When he is in the UK, A is in employed earner’s employment and meets the residence criteria in Regulation 145 (1) SSCR 2001 because he is present in the UK at the time of his employment.

**A makes a short trip back to Australia in year 2 to brief the Australian company.**

After 14 months in the UK, A returns to Australia for the month of June - 20 days holiday and 5 days working for the Australian company. He then returns to the UK to complete the rest of his assignment. A remains under contract to the Australian company and the costs of his employment in the UK is met by the Australian employer. There is no apportionment of salary specified in the contract. There can be apportionment of his salary for the days working outside the UK.

When A is in earners employment in the UK he is liable for NICs on his salary because he meets the criteria of residence and presence in Regulation 145 (1) SSCR 2001.

When in Australia, A is not in employed earners employment in the UK - his employment is one which is normally based outside the UK - so that the days working in Australia are not an incidental part of employed earners employment in the UK.

**What if the employment had been funded by the UK company?**

We would consider this a strong indicator that A was performing his duties in Australia for the purposes of the business of the UK “host” employer and his time in Australia was merely a “temporary absence” from employed earner’s employment for the purposes of Regulation 145(1) SSCR 2001.

What if there is a letter of secondment - attaching A to his UK employer?

We consider that this would be a strong indicator that A’s normal base is the UK and he can be considered to be merely “temporarily absent” for the purposes of Regulation 145(1) SSCR 2001 - the duties in Australia are incidental to the employment in the UK for which he is paid his salary.

**What if A had travelled to China for 3 days to act on behalf of the UK company?**

A’s normal base is the UK and he can be considered to be merely “temporarily

absent” for the purposes of Regulation 145(1) SSCR 2001 - the duties in China are incidental to the employment in the UK. No apportionment is required.

**What if A had travelled to China for 3 days to act on behalf of the Australian company?**

The duties are not further to the employment in the UK and cannot be regarded as merely a temporary absence. An apportionment is required.

**What if A has been sent to the UK and become ordinarily resident here?**

If A’s normal base is the UK he will be in employed earner’s employment in Great Britain. As he is ordinarily resident he meets the residence criteria in Regulation 145(1) SSCR 2001 - the duties in Australia are merely incidental to the employment in the employed earner’s employment in the UK for which he is paid his salary. No apportionment is required.

**Exactly how many days amounts to a “temporary absence”?**

Whether an absence is a temporary absence is a question of fact and degree, which depends upon the nature of the circumstances. Examples of what we would consider to be temporary absence would include short business trips or holidays.

**Method of Time Apportionment**

In the absence of contractual provision, there is to be an apportionment between UK and non-UK workdays under Section 2 of the Apportionment Act 1870. Under the Apportionment Act, salary accrues on a daily basis. The earnings are to be multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer’s business and the denominator is the total number of days in employment – in a full year this will be 365 days.

Where the employee is monthly or weekly paid, the computation has to take account of the “pay period” basis for computing NIC.

**Example 2 (Patel)**

Mrs P is ordinarily resident in India and is sent to the UK by her employer to work in the UK at the offices of a UK company which is part of the group. She remains under contract to the Indian employer and the Indian employer bears the cost of the employment. Her salary is £100,000. Her employer recalls her to India to advise on a hostile take-over for a period of 5 days - From 1 June until 5 June. The substantial part of 2 of those days is spent flying to India and back. The earnings are multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer’s business and the denominator is the total number of days in employment.

If Mrs P has an annual pay period, then the appropriate fraction can simply be applied to her annual salary.

Gross Pay  $£100,000 \times 5/365$

Amount attributable to overseas workdays less £1369.87

NIC is operated on the gross pay attributable to the UK £98,630.13

However, if Mrs P is monthly paid, the employer has to account for NIC each month as a payment is made, and is unable to “look back” over a year and know what percentage needs to be applied. So the apportionment has to be done in the

monthly pay period.

In June, no NICs are due on the salary paid in respect of the work in India.

The earnings on which NICs are to be calculated are those for the month of June – after an apportionment to take account of the 5 days which were not in respect of the employed earners employment.

Monthly salary  $£8333.33 \times 5 / 365 \times 100,000$  less  $£1369.87$

Amount attributable to non-UK workdays  $£1369.87$

NIC is operated on the monthly gross pay attributable to the UK **£6963.46**

### **Holidays**

If Mrs P were to take a holiday in India, the holiday may need to be brought into the calculation of non-UK workdays in the apportionment – depending on the contractual provisions and whether the holiday is attributable to the UK or overseas employment.

In Example 2, if in June Mrs P took 10 days holiday in India – in the absence of contractual provisions setting out how holiday accrues, these would be added to the 5 days working in India:

Salary  $£8333.33 \times 15 / 365 \times £100,000$

amount attributable to non-UK workdays =  $£4109.59$

Earnings in the Month on which NIC must be operated =  $£4223.74$

*What about part of a day worked in the UK and part overseas?*

We operate the practice in SP 5/84 with regard to days spent working partly in the UK and partly outside the UK. That is to say, if a day is substantially worked overseas for the overseas business then it will count as a non-UK work day in the apportionment computation. Where an employee spends a whole day working in the UK but then leaves the country that evening on an overseas business trip, it would be difficult to say as a matter of contract that the employee's emoluments for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the emoluments for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

### **Records**

Employees are required to retain evidence such as travel documents and business diaries to demonstrate how they have calculated non-UK workdays for tax. Where records of “non-UK workdays” for tax have been kept, these may be used as the basis for identifying non-UK days for National Insurance.

Expats forum Q&A log provides:

### **Employee of UK company who is based overseas, but visits the UK**

**Question:** We have recently received several queries from different UK companies regarding the National Insurance position in relation to employees who are based overseas and usually perform their work duties in a country which is outside the EU and does not have a reciprocal social security agreement with the UK (for example, South Africa). However, these employees are required to visit the UK for a

small number of days each year (between 10 and 30 workdays per annum).

Based on our understanding of the facts, all of the employees concerned are not ordinarily resident in the UK. This is because they continue to live overseas, together with their family, and maintain a home overseas, and merely stay in hotels in the UK when required to stay overnight for work purposes. However, we understand the 52 week exemption under regulation 145(2) of Social Security (Contributions) Regulations 2001 would not apply, as they are employed by a company with a place of business in the UK.

In accordance with our review of the applicable legislation and the publication Tax Bulletin 79, we understand that there is no liability to pay Class 1 National Insurance unless there is an employed earners employment (or employment treated as employed earners employment) here in the UK. Accordingly, an individual is defined as an "employed earner" by Section 2(1)(a) of the Social Security Contributions and Benefits Act, which states:

... "employed earner" means a person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office) with general earnings...

As such, in order to confirm whether a liability to Class 1 National Insurance is applicable, we have concluded it is necessary to determine whether such employees fulfil the criteria of being 'gainfully employed in Great Britain' under their UK employment contract. We understand this phrase is not defined in legislation, and therefore takes its ordinary meaning.

A view as to the meaning is expressed in Tax Bulletin 79 (which, although archived, is not marked as superseded), as follows:

An employed earner is defined in Section 2(1)(a) as a "person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office) with general earnings chargeable to income tax under ITEPA 2003".

This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed. Based on above interpretation provided in Tax Bulletin 79, we understand that the employees concerned would be 'gainfully employed in Great Britain' only when the employment duties physically take place in the UK and are usually performed here. In this regard, any temporary or incidental

duties performed in the UK would be ignored.

In addition, the employees concerned would not be captured by reg. 146, as they are not ordinarily resident in the UK and therefore cannot be treated as performing an employed earner's employment here. Therefore, we should be grateful if you could confirm our opinion that the employees concerned would not be liable to pay Class 1 National Insurance on their earnings from the UK company.

**HMRC answer:**

Each case must be considered on its own facts however, Regulation 145 of the SSCR sets out, for the purposes of section 1(6) of the Social Security Contributions and Benefits Act 1992, the conditions as to residence or presence in Great Britain or Northern Ireland for the purposes of liability or entitlement to pay National Insurance contributions. Regulation 145(2) of the SSCR also provides for a limited exemption from paying Class 1 NICs (for up to 52 weeks) for workers coming to work in the UK for a time from a country outside of the European Economic Area (EEA), or with whom there is no reciprocal agreement on social security - in other words those coming to the UK from somewhere we categorise as being a "rest of the world" country. In order for the exemption at regulation 145 (2) of the SSCR to apply, all of the following conditions must be met:

- The person is not ordinarily resident in the UK, and
- The person is not ordinarily employed in the UK, and
- In pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK, and
- The person is employed in the UK for a time

From the information provided, the employees referred to would not meet all of the above criteria for the exemption in regulation 145 (2) of the SSCR to apply. In particular, whilst working in the UK they are not pursuing employment which is mainly employment outside the UK by an employer whose place of business is outside the UK. In fact, whilst back in the UK working they are actually working in the UK for their UK employer. As such, the exemption provided by regulation 145(2) would not apply. Furthermore, whilst in the UK they will be 'present' in the UK for the purposes of regulation 145(1)(a) SSCR which provides that a liability for primary (employee) Class 1 NICs will arise on any earnings they receive. The UK employer, having its place of business here, would also have a liability for secondary Class 1 NICs on

those earnings under regulation 145(1)(b) SSCR.<sup>14</sup>

### 43.9 ROW: Class 2 NIC

Reg. 145(1) SSCR provide that the requirements are:

- (c) as respects entitlement of a self-employed earner to pay Class 2 contributions, that that earner is present in Great Britain or Northern Ireland (as the case may be) in the contribution week for which the contribution is to be paid;
- (d) as respects liability of a self-employed earner to pay Class 2 contributions, that the self-employed earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be), or, if he is not so ordinarily resident, that before the period in respect of which any such contributions are to be paid he has been resident in Great Britain [or Northern Ireland]<sup>15</sup> (as the case may be) for a period of at least 26 out of the immediately preceding 52 contribution weeks under the Act, the Social Security Act 1975 or the National Insurance Act 1965 or under some or all of those Acts.

Thus there are two possible connecting factors and if either is present, Class 2 NIC is due:

- (1) ordinary residence in UK;
- (2) residence for 26 out of 52 contribution weeks.

### 43.10 ROW: Class 3 NIC

Reg. 145(1)(e) SSCR provides that the requirement is:

as respects entitlement of a person to pay Class 3 contributions in respect of any year, either that—

- (i) that person is resident in Great Britain or Northern Ireland (as the case may be) throughout the year,
- (ii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and has been or is liable to pay Class 1 or Class 2 contributions in respect of an earlier

---

<sup>14</sup> [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/897729/HMRC\\_Joint\\_Expatriate-Tax\\_NICs\\_minutes-11-June-2020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expatriate-Tax_NICs_minutes-11-June-2020.pdf)

<sup>15</sup> These words are omitted (presumably accidentally) from the SSCR but the context requires them.

- period during that year,
- (iii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and was either ordinarily resident in Great Britain or Northern Ireland (as the case may be) throughout the whole of that year or became ordinarily resident during the course of it, or
  - (iv) that person not being ordinarily resident in Great Britain or Northern Ireland (as the case may be), has arrived in that year or the previous year and has been continuously present in Great Britain or Northern Ireland (as the case may be) for 26 complete contribution weeks, entitlement where the arrival has been in the previous year arising in respect only of the next year.

### 43.11 Place of business in UK

Tax Bulletin 49 provides:

#### **Place of business in UK**

We would normally accept as a strong indication that there is a place of business in the UK if a company is registered under the Companies Act 1985.<sup>16</sup> But whether there is a place of business in the UK is a question of fact based on the individual case. Case law has shown that a company establishes a place of business in the UK if it carries on part of its business here. Such business activity need not be either a substantial part of, or more than incidental to, its main objects (*South India Shipping Corporation v Export-Import Bank of Korea* [1985] 2 AER 219). However there must be a more or less permanent location, not necessarily owned or leased by the company but associated with the company, from which its business is conducted habitually or with some degree of regularity (*Re Oriel* [1985] 3 AER 216). In Canadian law the premises of a group company are not sufficient in themselves to be a place of business for another group member (*Imperial Oil v Oil Workers International* 69 WWR 702).

We would not seek to claim in isolation that there is a place of business where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK

---

16 [Author's Note] Regulations made under s.1043 Companies Act 2006 impose a registration duty on a foreign incorporated company which establishes a place of business in GB; Northern Ireland has equivalent legislation.

business.<sup>17</sup>

### 43.12 Residence and ordinary residence

The NIC legislation does not define residence or ordinary residence. For residence, the NI Manual states:

**NIM29009 DL Conditions of domicile or residence** [Feb 2017]

You should operate Residence, Domicile and Remittance Basis Manual guidance in deciding whether a person is domiciled or resident. Any difficulties on residence should be submitted to Marine NICs in Cardiff (see NIM29034).

For residence, the pre-SRT IT rules should strictly speaking be applied, but in practice I expect close regard will be had to the SRT (which is supposed to represent the former common law rules).

For ordinary residence, the NI Manual states:

**NIM33560 Meaning of “ordinarily resident” – Factors to consider** [Jul 2019]

... In considering whether a person is "ordinarily resident", you should take into account the following factors,

- Will the person be returning to Great Britain or Northern Ireland during the period of employment abroad?
- Will the person's family - spouse/partner and/or children - be staying in the UK?
- Will the person retain a home in Great Britain or Northern Ireland during their period abroad?
- If the person retains a home, will it be available for their use when they return?
- Will the person be returning to Great Britain or Northern Ireland at the end of the period abroad?

The list is not exhaustive but, answering yes to any, or all, of the above questions is an indicator the individual remains "ordinarily resident". Answers of no would indicate it is less likely that the person will remain ordinarily resident.

Additional questions you could consider include;

- How long has the person lived in Great Britain or Northern Ireland

---

17 This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.

prior to going abroad?

- What will be the purpose(s) of the any return visit(s)?

For guidance on the definition of "ordinarily resident" for tax purposes, see the Residence, Domicile and Remittance Basis Manual, RDRM.

The seven factors are unhelpful as no guidance is given how to deal with the practical problems when different factors point in different directions.

There are no statutory provisions on ordinary residence so case law is all we have. The leading case is *R v Barnet LBC ex p Shah*.<sup>18</sup> This is not a tax case but the expression "ordinary residence" is said to have a natural and ordinary meaning which is the same in tax and non-tax contexts.<sup>19</sup>

In *Shah* the House of Lords noted that ordinary residence was distinct from domicile and rejected a "real home" test (which was similar to a domicile test).

What is the test? A number of dicta were approved, saying (more or less) the same thing in different words:

I think that [ordinary residence] connotes residence in a place with some degree of continuity and apart from accidental or temporary absences.<sup>20</sup>

"Ordinarily resident" refers to a man's abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or long duration.<sup>21</sup>

The important requirement is the residence must have the degree of continuity, or in other words, it must be "for settled purposes." What does that mean?

There must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or

---

18 [1983] 2 AC 309. The case is noteworthy for the fact that oral argument over the two words "ordinarily resident" lasted 9 days.

19 *Shah* at p.340.

20 *Shah* at p.341 citing Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.528

21 *R v Barnet LBC ex p. Shah* [1983] 2 AC 309 at p.343. This passage has often been cited with approval.

profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled.<sup>22</sup>

#### 43.12.1 *Accommodation*

*Turberville* at [9] notes that accommodation held long term is consistent with being non-ordinarily resident:

We consider the retention of the house and flat in the UK as fairly neutral; he had retained these (or predecessor properties) throughout the time he was working abroad.

Accommodation is however a relevant factor in deciding whether a person is “settled”.

#### 43.12.2 *Minimum period*

One would have thought that if a person settled in a country, they became ordinarily resident immediately. This was the view expressed in HMRC6.

In *Tuczka v HMRC*<sup>23</sup> however the Upper Tribunal suggested that there was a minimum time (though the minimum is not very long):

12. ...After referring also to the dicta in the tax cases, Lord Slynn concluded that it was “plain that as a matter of ordinary language a person is not habitually resident in any country unless he has taken up residence and lived there for a period.” Lord Slynn continued (at 1942G-1943B):

“It seems to me impossible to accept the argument at one time advanced that a person who has never been here before who says on landing, “I intend to settle in the UK” and who is fully believed is automatically a person who is habitually resident here. Nor is it enough to say I am going to live at X or with Y. He must show residence in fact for a period which shows that the residence has become “habitual” and, as I see it, will or is likely to continue to be habitual...”

The requisite period is not a fixed period. It may be longer where

---

<sup>22</sup> *Shah* at p.344.

<sup>23</sup> [2011] UKUT 113 (TCC).

there are doubts. It may be short (as the House accepted in *In re S (A Minor) (Custody: Habitual Residence)* [1998] A.C. 750, my speech at p.763A, and *F (A Minor) (Child Abduction)* [1992] 1 FLR 548, 555, where Butler-Sloss L.J. said: “A month can be ... an appreciable period of time”).”

13. Even assuming for the purpose of argument that “habitually” and “ordinarily” mean the same thing, we do not regard *Nessa* as in any way departing from Lord Scarman’s clear rejection of any requirement to establish an intention to reside permanently or for an indefinite period. All that *Nessa* established in that regard is that a person would not qualify as “habitually resident” immediately on arrival, save in a case where he resumed his previous habitual residence. Some period of time is therefore needed to establish “habitual residence”. But the fact that this period need not be long can be seen not only from Lord Slynn’s reference to the observation of Butler Sloss LJ quoted above but from the resolution of the *Nessa* case itself. The House of Lords upheld the decision of the Court of Appeal that the case be remitted for rehearing before a social security appeal tribunal to determine whether the claimant had established habitual residence by the date of the initial tribunal hearing (ie, 6 December 1994, and thus less than four months after her arrival in the UK) or “even earlier”: see at 1943D.

This overlooks the fact that the question of ordinary residence is determined with an element of hindsight: see 8.16.1 (Enquiry period: Habitual abode). It is considered that there is no minimum period.

### 43.12.3 *Intention*

In *Shah*, Lord Scarman said:

There are two, and no more than two, respects in which the mind of the “propositus” is important in determining ordinary residence. The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is.

The “voluntary” requirement does not have much practical role to play, as it only concerns imprisoned, kidnapped or shipwrecked taxpayers.<sup>24</sup>

---

<sup>24</sup> “The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with

The speech continues:

And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the “propositus” intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled. The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose.

In *Tuczka v HMRC* [2010] UKFTT 53 the tribunal said:

The test requires objective examination of immediately past events, and not intention or expectation for the future ([1983] 2 AC 309 at 345).

It is considered that the concept of being “settled” necessarily requires an examination of intention or expectation for the future.

#### 43.12.4 *Acquiring ordinary residence*

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) the taxpayer came to the UK to work and intended to stay 33 months (2.5 years). There were other facts which suggested he was settled, in particular that his girlfriend came to join him.

---

no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is.” *Shah* at p.344.

It was argued that an intention to reside here for that period was too short to constitute a “settled purpose”. The argument was rejected. Even a period of just over one year could be sufficient.<sup>25</sup>

#### 43.12.5 *Losing ordinary residence*

In *Turberville v HMRC* [2010] UKFTT 69 the taxpayer left the UK in July 2001 to work abroad. The taxpayer remained ordinarily resident until July 2001 even though he had formed the intention to leave earlier, in February 2001:

8. In relation to 2001-02, while it was clear in February 2001 that he would go to Dallas in July 2001 we do not consider that this changes the quality of his residence between 6 April 2001 and 30 June 2001, which was a continuation of his residence during the previous four tax years. Although it was then known that such residence would cease about 1 July 2001 it was nevertheless part of his residence for settled purposes and the fact that the Appellant’s state of mind was such that he would be leaving the UK at around that time does not, until his actual departure, alter the position.

In July 2001 the taxpayer ceased to be ordinarily resident.

In October 2001 the taxpayer unexpectedly lost his job, but remained non-ordinarily resident. The judgment at [8] continues:

From the date of actual departure, we consider that in deciding whether there was then a distinct break one should look at the position as it was in July 2001 without the benefit of hindsight. The three-year employment contract coupled with his expenditure on furnishing the apartment rented by his employer point to a distinct break.

In the absence of purchase of accommodation, three years has traditionally been regarded as the period of residence which is sufficient to amount to settled.

#### 43.12.6 *Habitual/ordinary residence compared*

Schuz explains the concept of “Habitual residence”

---

<sup>25</sup> At [17] citing relying on *Reed v Clark* quoted at [15]; but *Clark* was not considering ordinary residence of the taxpayer (which was not an issue).

Habitual residence has been chosen as the main connecting factor in many of the multinational conventions concluded under the auspices of the Hague Conference on Private International Law for nearly one hundred years.<sup>26</sup> It is now also used in other international conventions and in the domestic legislation of a number of countries, including England and Canada. However, there was very little discussion as to the meaning of the concept until the explosion of litigation under the Hague Convention on the Civil Aspects of Child Abduction began in the 1980s. Under this Convention, the determination of habitual residence is often critical to the outcome of an application for the return of the child in international abduction cases.<sup>27</sup>

The term is not found in tax legislation.

If the concept was the same as “ordinary residence” then cases on habitual residence might be valuable for tax. In principle the terms habitual residence and ordinary residence could be regarded as synonymous. The natural meaning of the two expressions is the same (or at least, equally vague). However the case law has not been consistent. In some cases the expressions are regarded as the same.<sup>28</sup> Some cases suggest that habitual residence is “something more than” ordinary residence,<sup>29</sup> though that “something more” is elusive. It has been said that the concepts merely share a “common core of meaning”.<sup>30</sup> In the context of the Hague Abduction Convention, at least, “habitual residence” has been held to have an autonomous meaning (ie a meaning distinct from that in the domestic law of the parties to the Convention) and the Supreme Court refused to follow *Shah*.<sup>31</sup>

While it would be desirable that a person’s habitual residence and ordinary residence should be in the same place for all purposes, the desire

---

26 It was first used in the Hague Convention on Guardianship in 1902, and is the main connecting factor in the Hague Convention on Jurisdiction and Foreign Judgments in Civil and Commercial Matters.

27 Schuz, “Policy Considerations in Determining the Habitual Residence of a Child and the Relevance of Context” (2001) 11 *Journal of Transnational Law and Policy* 101, <http://international-family-law.eu/wp-content/uploads/2012/12/Habitual-residence-of-a-child-by-Rhona-Schuz1.pdf>

28 *Mark v Mark* [2006] 1 AC 98 at [33].

29 *Cruse v Chittum* [1974] 2 All ER 940 at p.943.

30 *Nessa v Chief Adjudication Officer* [1999] 1 WLR 1937 at p.1941.

31 *A v A* [2014] AC 1 at [54].

for conceptual simplicity should not override the need to give effect to the purpose of the legislation in question.

In any case, the authorities on “habitual residence” do not provide a clear definition or explanation of the term, and the authorities on the Abduction convention are best understood in the light of the policy considerations relevant to abduction.<sup>32</sup> In borderline cases, at least, the meaning of the term will vary according to the context. In a family law context, at least, the words are regarded as distinct:

... the Law Commissions deliberately adopted “habitual” rather than “ordinary” residence, because the latter frequently occurred in tax and immigration statutes and they thought that its use in the wholly different context of family law was a potential source of confusion.<sup>33</sup>

#### 43.12.7 *Residence/ordinary residence compared*

*Tuczka* significantly reduced the difference between residence (the common law, pre-SRT concept) and ordinary residence or (if one prefers) it shows that the difference is not as great as had generally been thought:

[18] Nor is it correct to suggest that a finding that Dr Tuczka was ordinarily resident in the UK in the tax year 1998-99 erodes a fundamental distinction between the concepts of residence and ordinary residence. The distinction is not as wide or as basic as the present appellant seeks to suggest. Hence, in *Levene*, Viscount Cave LC stated at p507:

“The expression “ordinary residence” is found in the Income Tax Act of 1806 and occurs again and again in the later Income Tax Acts, where it is contrasted with the usual or occasional or temporary residence; and I think that it connotes residence in a place with some degree of continuity and apart from accidental or temporary absences. So understood, the expression differs little in meaning from the word “residence” as used in the Acts...”

---

32 Habitual residence is “a question of fact to be determined by the circumstances of each case”: [2014] AC 1 at [36]; and see Schuz, “Policy Considerations in Determining the Habitual Residence of a Child and the Relevance of Context” (2001) 11 *Journal of Transnational Law and Policy* 101.

[http://law-wss-01.law.fsu.edu/journals/transnational/vol11\\_1/schuz.pdf](http://law-wss-01.law.fsu.edu/journals/transnational/vol11_1/schuz.pdf)

33 *A v A* [2014] AC 1 at [38], see Law Com. No 138 *Family law, custody of children : jurisdiction and enforcement within the United Kingdom* (1985) para 4.15.

Unless the courts step back from this, HMRC6 was more generous than the law on the subject.

Ordinary residence needs to be reviewed in the light of *Carey v HMRC* [2015] UKFTT 466; *Ward v HMRC* [2016] TC 04902; *Milton Keynes Council* [2015] CSOH 156; *Mackay v HMRC* [2018] BTC 529.

### 43.13 EU/EEA/Switzerland

#### 43.13.1 Outline

In summary: Cross-border workers are only liable to pay social security contributions in one state at a time:

- (1) *General rule*: this will be in the country where work is undertaken, regardless of (a) whether the worker resides in the EU or the UK, and (b) whether the employer is based in the EU or the UK.
- (2) *“Detached worker” rule*: UK workers sent by their employer to work temporarily in an EU Member State pay social security contributions in the UK only. Similarly, if an EU worker is sent by their employer to work temporarily in the UK from a Member State they pay contributions in that EU Member State only.

The rules were formerly in Regulation 883/2004 on the coordination of social security systems, and are now in the Protocol on Social Security Coordination (“SSC”) which is part of the TCA.

These agreements also cover social security benefits but this chapter only considers the NIC aspects.

I focus here on the SSC but hope to cover EEA and Switzerland in a future edition.

The rules, unsurprisingly, continue the approach which formerly applied under and similar pre-Brexit rules. But there are changes, and I set out the old Reg 883/2004 rules side by side, so the changes can be identified.

The transitional protection for those who started working abroad before 1/1/2021 is not discussed here.

HMRC have published guidance (“**NIC guidance**”)<sup>34</sup> and pre-2021 guidance is also useful, though it needs to be reviewed to check whether the law has changed.

---

34 <https://www.gov.uk/tax-right-retire-abroad-return-to-uk>

## 43.14 Definitions

Art SSC.1: provides:

For the purposes of this Protocol, the following definitions apply:

(a) "activity as an employed person" means any activity or equivalent situation treated as such for the purposes of the social security legislation of the State in which such activity or equivalent situation exists;

(b) "activity as a self-employed person" means any activity or equivalent situation treated as such for the purposes of the social security legislation of the State in which such activity or equivalent situation exists;...

(t) "period of employment" or "period of self-employment" mean periods so defined or recognised by the legislation under which they were completed, and all periods treated as such, where they are regarded by that legislation as equivalent to periods of employment or to periods of self-employment;

(v) "period of residence" means periods so defined or recognised by the legislation under which they were completed or considered as completed;

(aa) "residence" means the place where a person habitually resides;

## 43.15 Persons covered

### Article SSC.2

This Protocol shall apply to persons, including stateless persons and refugees, who are or have been subject to the legislation of one or more States, as well as to the members of their families and their survivors.<sup>35</sup>

### Art 2 reg 883/2004

1. This Regulation shall apply to nationals of a Member State, stateless persons and refugees residing in a Member State who are or have been subject to the legislation of one or more Member States, as well as to the members of their families and to their survivors.

---

<sup>35</sup> In the UK, NICs (other than the voluntary Class 3 NIC) are only paid by employed or self-employed, so the reference to "members of their families and their survivors" is irrelevant for NIC, though it may be relevant for other purposes.

2. It shall also apply to the survivors of persons who have been subject to the legislation of one or more Member States, irrespective of the nationality of such persons, where their survivors are nationals of a Member State or stateless persons or refugees residing in one of the Member States.

### 43.16 General rules

Article SSC.10(1) provides there can only be one charge to tax:

1. Persons to whom this Protocol applies shall be subject to the legislation of a single State only. Such legislation shall be determined in accordance with this Title.

Art SSC.10(2) defines “pursuing an activity”:

2. For the purposes of this Title, persons receiving cash benefits because or as a consequence of their activity as an employed or self-employed person shall be considered to be pursuing the said activity. This shall not apply to invalidity, old-age or survivors' pensions or to pensions in respect of accidents at work or occupational diseases or to sickness benefits in cash covering treatment for an unlimited period.

Article SSC.10(3) provides the general rule:

3. Subject to Articles SSC.12 [Pursuit of activities in two or more States] and SSC.13 [Voluntary insurance or optional continued insurance]:

(a) a person pursuing an activity as an employed or self-employed person in a State shall be subject to the legislation of that State;

The article continues with some more specialist rules:

(b) a civil servant shall be subject to the legislation of the State to which the administration employing them is subject;

(c) any other person to whom points (a) and (b) do not apply shall be subject to the legislation of the State of residence, without prejudice to other provisions of this Protocol guaranteeing them benefits under the

legislation of one or more other States...

### 43.17 Detached workers

Article SSC.11 provides:

1. By way of derogation from Article SSC.10(3) [General rules] and as a transitional measure in relation to the situation that existed before the entry into force of this Agreement, the following rules as regards the applicable legislation shall apply between

[i] the Member States listed in Category A of Annex SSC-8 [Transitional provisions regarding the application of Article SSC.11]<sup>36</sup> and

[ii] the United Kingdom:

We move on to the rule. It may be helpful to compare SSC and its predecessor:

#### SSC art 11 (post 1/1/21)

(a) a person who

[A] pursues an activity as an employed person in a State for an employer which normally carries out its activities there

[B] and who is sent by that employer to another State to perform work on that employer's behalf

shall continue to be subject to the legislation of the first State, provided that:

#### Reg 883/2004 (pre 1/1/21)

A person who

pursues an activity as an employed person in a Member State on behalf of an employer which normally carries out its activities there

and who is posted by that employer to another Member State to perform work on that employer's behalf

shall continue to be subject to the legislation of the first Member State, provided that

---

36 This wording was to allow Member States to opt in to the detached worker rules; but all Member States chose to opt in: Official Journal 16 Feb 2021  
<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=OJ%3AC%3A2021%3A055%3AFULL>

- |  |  |
|--|--|
| (i) the duration of such work does not exceed 24 months; and     | the anticipated duration of such work does not exceed twenty-four months and |
| (ii) that person is not sent to replace another detached worker. | that he is not sent to replace another person.                               |

The term “posted” is replaced by “sent” but the meaning is the same. There are other changes.

There is now no power to extend the 24 month period.

SSC continues:

- (b) a person who normally pursues an activity as a self-employed person in a State who goes to pursue a similar activity in another State shall continue to be subject to the legislation of the first State, provided that the anticipated duration of such activity does not exceed 24 months.

This provides a rough equivalent of the ROW year abroad rule for employees, but the period here is 2 years.

EC guidance on the pre-brexit rules remains useful.<sup>37</sup>

#### 43.17.1 *Where activities normally carried out*

The NI Manual provides:

**NIM33080 Meaning of “Which normally carries out its activities there”** [Nov 2019]

The expression “which normally carries out its activities there” means an undertaking which ordinarily carries out substantial activities in the territory of the Member State in which it is established. If the undertakings activities are confined to internal management, the undertaking will not be regarded as normally carrying out its activities in that Member State. In determining whether an undertaking carries out substantial activities, account must be taken of all criteria characterising the activities carried out by the undertaking in question. The criteria must be suited to the characteristics of each undertaking and the real nature of the activities carried out.

---

<sup>37</sup> “Practical guide on posting”

<https://op.europa.eu/en/publication-detail/-/publication/8ac7320a-170f-11ea-8c1f-01aa75ed71a1/language-en>

The following factors are of particular importance

- the place where the posting undertaking has its registered office and its administration.
- the number of administrative staff present in the posting State compared to the State of employment.
- the place of recruitment of the postal worker.
- the place where the majority of contracts with clients are concluded.
- the law applicable to the contracts signed by the posting undertaking with its clients and with its workers.
- The turnover achieved by the posting undertaking in the posting State and in the State of employment during an appropriate typical period (e.g. turnover of approximately 25% of total turnover in the posting state could be a sufficient indicator, but cases where turnover is under 25% would warrant greater scrutiny).

But the list of criteria outlined above is not an exhaustive.

#### 43.17.2 *Sent to perform work*

The NI Manual provides:

##### **NIM33085 Meaning of “Direct Relationship”** [Nov 2019]

A direct relationship must continue to exist between the posting undertaking and the posted worker throughout the period of posting. There are some indicators of the existence of such a direct relationship, including:

- It must be evident that the contract was and still is applicable to the parties involved in drawing it up and stems from the negotiations that led to the recruitment;
- The power to terminate the contract of employment (dismissal) must remain exclusively with the posting undertaking;
- The posting undertaking must retain the power to determine the nature of the work performed by the postal worker, not in terms of defining the details of the type of work to be performed and the way it is to be performed, but in the more general terms of determining the end product of that work or the basic service to be provided;
- The obligation with regard to the remuneration of the worker rests with the undertaking which concluded the contract, irrespective therefore of who actually makes the payment.

There are some situations where it is impossible for someone to remain insured in the sending Member State under [Article SSC.11]:

- The undertaking to which the worker has been posted places him/her

at the disposal of another undertaking in the Member State in which it is situated;

- The undertaking to which the worker is posted places him/her at the disposal of an undertaking situated in another Member State;
- The worker is recruited in a Member State in order to be sent by an undertaking situated in a second Member State to an undertaking in a third Member State;
- The worker is recruited in one Member State by an undertaking situated in a second Member State in order to work in the first Member State.

### 43.17.3 *Hire for immediate posting*

The NI Manual provides:

#### **NIM33090 Workers hired for immediate posting** [Apr 2019]

There are some additional restrictions in place in relation to workers hired and then immediately posted.

The rules on posting may also apply to workers recruited in one Member State with a view to being posted in another provided certain conditions are met.

One of these conditions is that:

- Immediately before the start of his/her employment the person is already subject to the legislation of the Member State in which the undertaking which employed him/her is established.

That is not quite what the legislation now says,<sup>38</sup> but it will not often matter.

A period of at least one month can be considered as meeting this requirement, with shorter periods requiring a case by case evaluation taking account of all the factors involved.

The other posting conditions also have to be met. So the “posting” undertaking must normally carry out its activities there and the worker must pursue an activity on behalf of the employer, there must exist throughout the period of posting a direct relationship between the posting employer and the posted worker, the posting undertaking must also be one which carries out substantial activities in the posting State, and so on.

---

38 See 43.15 (Persons covered by SSC).

The point here is that the person does not need to have been employed by that particular employer before they are sent to work abroad, but they should have been in the UK and been insured when they are hired to be sent abroad. They can be UK insured by paying contributions, or because they are in receipt of UK benefits if out of work, or simply by being resident in the UK if they are not working and not in receipt of benefits. The purpose of the posting regulation is to let someone continue their existing contribution and benefit record in the sending Member State.

## 43.18 Forms

### 43.18.1 *Pre-brexit forms*

The NIC guidance discusses pre-brexit forms:

The EU Regulations provide for a system of forms so that employers and employees can demonstrate that they are entitled to operate the legislation of one Member State and be exempt contributions under the legislation of another...

For employees coming to the UK from the other Member States, you should operate National Insurance contributions from the start of the employment unless you hold a valid E101 (or from 1 May 2010 Form A1 or an E101) showing that they are exempt National Insurance in the UK and subject to the legislation of another Member State.

For employees going to work in another Member State, you should apply to HMRC NIC&EO to find out whether the employee should remain in UK National Insurance and you can be issued Form E101 (or Form A1 after 1 May 2010). As long as the UK's legislation continues to apply, you should continue to operate employer and employee National Insurance rather than the contributions of the other Member State.

The NI Manual provides:

#### **NIM33065 Posted workers general information** [Nov 2019]

... In certain circumstances a person who is sent by their employer in one Member State to work temporarily in another Member State can continue to pay contributions only in their home state.

A system of portable documents (A1) exists within the European Union to ensure that the worker does not also have to pay contributions in the Member State they are posted to.

A worker sent to the UK claiming to be exempt under Article 12 should be able to produce to HMRC a Portable Document A1 issued by the

authorities in the Member State they have come from as proof of this exemption. If they do not then you should charge primary and secondary National Insurance until they produce the Portable Document A1.

You should give the worker and their employer a reasonable amount of time to produce an A1. A delay of several months is not uncommon for the other Member States to issue the form.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

#### **NIM33070** [Apr 2019]

... PT Ops International Caseworker (ICW) deals with people posted from the UK to other Member States and are in charge of issuing Portable Documents A1.

You should liaise with NIC&EO International Caseworker before giving advice on whether a worker posted from the UK should continue to pay UK National Insurance -

International Caseworker, PT Operations North East England, HM Revenue and Customs, BX9 1AN

A worker who meets the conditions for posting at NIM33065 will continue to be liable for Class 1 National Insurance whilst abroad throughout the period of the posting.

Where these posting rules apply, the residence rules at NIM33505 and NIM33510 do not apply

### 43.18.2 *Forms from 1 Jan 2021*

HMRC say:<sup>39</sup>

#### **Your circumstances**

#### **Form to complete**

Your employer sends you to work temporarily in the EU, Iceland, Liechtenstein, Norway or Switzerland. Form CA3822

You're normally self-employed in the UK and you're going to temporarily carry out some activities in the EU, Iceland, Liechtenstein, Norway or Switzerland. Form CA3837

You're working in 2 or more of the UK, EU, Iceland, Liechtenstein, Norway or Switzerland. Form CA8421

You're flight or cabin crew with a home base in the UK. Form CA8421

You're a UK civil servant or other government worker Form CA3822

You're a UK resident who works on a vessel at sea with a UK flag or an EU, Norwegian, Icelandic or Swiss flag but you're paid by someone based in the UK. Form CA3822

---

<sup>39</sup> <https://www.gov.uk/guidance/national-insurance-for-workers-from-the-uk-working-in-the-eea-or-switzerland>

### 43.19 Activity in 2 states: Tie-breaker

The place of employment rule needs a tie-breaker if there are two places of employment.

#### 43.19.1 *2 places of employment*

Article SSC.12 provides:

1. A person who normally pursues an activity as an employed person in one or more Member States as well as the United Kingdom shall be subject to:

(a) the legislation of the State of residence if that person pursues a substantial part of their activity in that State; or

(b) if that person does not pursue a substantial part of their activity in the State of residence:

(i) the legislation of the State in which the registered office or place of business of the undertaking or employer is situated if that person is employed by one undertaking or employer; or

(ii) the legislation of the State in which the registered office or place of business of the undertakings or employers is situated if that person is employed by two or more undertakings or employers which have their registered office or place of business in only one State; or

(iii) the legislation of the State in which the registered office or place of business of the undertaking or employer is situated other than the State of residence if that person is employed by two or more undertakings or employers, which have their registered office or place of business in a Member State and the United Kingdom, one of which is the State of residence; or

(iv) the legislation of the State of residence if that person is employed by two or more undertakings or employers, at least two of which have their registered office or place of business in different States other than the State of residence.

#### 43.19.2 *Two places of self-employment*

Article SSC.12 provides:

2. A person who normally pursues an activity as a self-employed person in one or more Member States as well as the United Kingdom shall be subject to:

(a) the legislation of the State of residence if that person pursues a

substantial part of their activity in that State; or  
(b) the legislation of the State in which the centre of interest of their activities is situated, if that person does not reside in one of the States in which that person pursues a substantial part of their activity.

#### 43.19.3 *Substantial*

What is “substantial”? The NI Manual provides:

**NIM33100 Normally working in two or more Member States** [Dec 2018]

... In assessing whether a substantial part of the activity is carried out in the Member State of residence, a number of criteria are taken into account including:-

- Working time
- Remuneration

If it is apparent that at least 25% of working time or earnings arise in the Member State of residence, this shall indicate that the substantial part of the activities is pursued in that Member State.

Other relevant criteria can also be taken into account when making this assessment.

Marginal activities which account for less than 5% of working time or remuneration in a Member State are not taken into account in making this assessment.

#### 43.19.4 *Employment & self-employment*

Article SSC.12 provides:

3. A person who normally pursues an activity as an employed person and an activity as a self-employed person in two or more States shall be subject to the legislation of the State in which that person pursues an activity as an employed person or, if that person pursues such an activity in two or more States, to the legislation determined in accordance with paragraph 1.

4. A person who is employed as a civil servant by a State and who pursues an activity as an employed person or as a self-employed person in one or more other States shall be subject to the legislation of the State to which the administration employing that person is subject.

#### 43.19.5 *Two employers*

Article SSC.12 provides:

5. A person who normally pursues an activity as an employed person in two or more Member States (and not in the United Kingdom) shall be subject to the legislation of the United Kingdom if that person does not pursue a substantial part of that activity in the State of residence and that person:

(a) is employed by one or more undertakings or employers, all of which have their registered office or place of business in the United Kingdom;

(b) resides in a Member State and is employed by two or more undertakings or employers, all of which have their registered office or place of business in the United Kingdom and the Member State of residence;

(c) resides in the United Kingdom and is employed by two or more undertakings or employers, at least two of which have their registered office or place of business in different Member States; or

(d) resides in the United Kingdom and is employed by one or more undertakings or employers, none of which have a registered office or place of business in another State.

6. A person who normally pursues an activity as a self-employed person in two or more Member States (and not in the United Kingdom), without pursuing a substantial part of that activity in the State of residence, shall be subject to the legislation of the United Kingdom if the centre of interest of their activity is situated in the United Kingdom.

7. Paragraph 6 shall not apply in the case of a person who normally pursues an activity as an employed person and as a self-employed person in two or more Member States.

8. Persons referred to in paragraphs 1 to 6 shall be treated, for the purposes of the legislation determined in accordance with these provisions, as though they were pursuing all their activities as employed or self-employed persons and were receiving all their income in the State concerned.

### **43.20 Class 4 contributions**

Section 15 SSCBA provides:

(1) Class 4 contributions shall be payable for any tax year in respect of all profits which—

(a) are immediately derived from the carrying on or exercise of one or more trades, professions or vocations,

(b) are profits chargeable to income tax under Chapter 2 of Part 2 of the Income Tax (Trading and Other Income) Act 2005 for the

- year of assessment corresponding to that tax year and
- (c) are not profits of a trade, profession or vocation carried on wholly outside the UK.
- (2) Class 4 contributions in respect of profits shall be payable—
- (a) in the same manner as any income tax which is, or would be, chargeable in respect of those profits (whether or not income tax in fact falls to be paid), and
- (b) by the person on whom the income tax is (or would be) charged, in accordance with assessments made from time to time under the Income Tax Acts...
- (3A) Where income tax is (or would be) charged on a member of a limited liability partnership in respect of profits arising from the carrying on of a trade or profession by the limited liability partnership, Class 4 contributions shall be payable by him if they would be payable were the trade or profession carried on in partnership by the members.
- (5) For the purposes of this section the year of assessment which corresponds to a tax year is the year of assessment (within the meaning of the Tax Acts) which consists of the same period as that tax year.

A trade carried on wholly outside the UK is exempt from class 4 NIC. This is almost impossible for a sole trader, though it may be possible for a partnership.<sup>40</sup> But in such a case the self-employed earner would not be employed in the UK, and so would be exempt anyway.

What about unremitted trading profits of a remittance basis taxpayer? It is considered that unremitted profits of a remittance basis taxpayer, (un)taxed on the remittance basis, do not count as “chargeable”<sup>41</sup> so a remittance basis taxpayer pays class 4 NIC on taxable (remitted) profits only. That is consistent with the general scheme of the remittance basis.

### 43.21 Partnerships

Para 4 sch 2 SSCBA provides:

- (1) Where a trade or profession is carried on by two or more persons jointly, the liability of any one of them in respect of Class 4 contributions shall arise in respect of his share of the profits of that trade or profession (so far as immediately derived by him from carrying it on); and for this purpose his share shall be aggregated with his share of the

---

40 See 20.4 (UK resident trader: IT).

41 See 2.4.1 (Unremitted RFI “chargeable”).

profits of any other trade, profession or vocation (so far as immediately derived by him from carrying it on or exercising it).

(2) Where sub-paragraph (1) above applies, the Class 4 contributions for which a person is liable in respect of the profits of the trade or profession carried on jointly (aggregated, where appropriate, as mentioned in that sub-paragraph) shall be charged on him separately.

The BI Manual provides:

**BIM82060 Sleeping And Inactive Partners: Nics** [Jun 2016]

Following a change of view taking effect from 6 April 2013, HMRC consider that sleeping and inactive partners in a partnership are gainfully employed as self-employed earners and so are liable to Class 2 and Class 4 National Insurance Contributions....

**BIM82150 Limited Liability Partnership: NIC** [Jun 2016]

The NIC position of members of a LLP is the same as that of partners in an ordinary partnership. Thus the members of a LLP are liable to Class 2 and Class 4 NIC as appropriate.

CHAPTER FORTY FOUR

**SETTLOR-INTERESTED TRUST CODE**

44.1

*Cross-references*

The following topics are considered elsewhere:

- 46.21 (s.720/s.624 interaction)
- 51.8.1 (Transfer to partnership/trust)
- 40.11 (Settlor-interested trust IT rate)
- 89.14 (s.624 spouse exemption)
- 94.1 (Who is the settlor?)
- 1.2 (Definitions of “settlement”)
- 95.1 (Trust with multiple settlors)
- 96.1 (Statutory tax indemnities) - indemnity to settlor

I deal elsewhere with specialist types of settlor-interested trust income:

<b>Type of income</b>	<b>See</b>
Chargeable event gain	62.11
Offshore income gain	64.8.2 (UK trust); 64.10.1 (Non-resident trust)
Accrued income profits	27.1
Deeply discounted securities	27.13.1 (UK trust); 28.14 (Non-resident trust)

This chapter considers the IT rules. For CGT see 56.1 (Gains of non-resident settlor-interested trusts).

**44.1 Settlor-interested trust code**

Chapter 5 Part 5 ITTOIA contains a set of loosely related anti-avoidance rules:

<b>Rule</b>	<b>ITTOIA</b>	<b>See para</b>
Settlor-interested trust	s.624	44.5
Income paid to child of settlor	s.629	44.15
Capital sum paid to settlor by trust/connected body	s.633/641	44.14
<i>Added by protected-trust regime in 2018:</i>		
- s.643A charge: benefit to settlor/close-family	s.643A - G	44.19
- s.643A settlor-attribution/onward-gift rules	s.643H - N	44.27/44.30

These were formerly called the “**IT settlement provisions**”. Now that Chapter 5 is just one of many provisions dealing with settlements, this label has become opaque and potentially confusing. I coin the term “**settlor-interested trust code**”, which is not wholly accurate, but no short label could encapsulate these disparate charges.<sup>1</sup>

Settlement has the settlement-arrangement meaning.<sup>2</sup>

The code has a century long history (it dates back to 1922) and a large case law (some of which is now obsolete). The rules were recast in 1995, following the proposals of the Trusts Consultative Document (1991), but the consultative document is now of historical interest only.

#### 44.1.1 *Effect of protected-trust regime*

The reforms of F(no.2)A 2017 and FA 2018 made two changes:

- (1) They introduce protected-trust reliefs for the settlor-interested trust code charges. Where the settlor is foreign domiciled, this reduces the scope of the charges. See 88.1 (Protected-trust regime).
- (2) They introduce protected-trust charges. I discuss the s.643A charge in this chapter, for lack of anywhere better.

#### 44.2 “Income” arising under a settlement

“Income arising under a settlement” is a term used throughout the settlor-interested trust code. One might abbreviate that to “**Settlement Income**”.

In this section I consider what is income, and quantum of income; and in the next section I consider what is meant by income “arising under a settlement”.

Section 648(1) ITTOIA provides what is in effect a referential definition of income:

References in this Chapter [Chapter 5 Part 5, the settlor-interested trust code] to income arising under a settlement include—<sup>3</sup>

- (a) any income chargeable to income tax by deduction or

---

1 The heading of Chapter 5 is now: “Settlements: amounts treated as income of settlor or family”.

2 See 1.5 (Settlement-arrangement definition).

3 The context suggests this is an exhaustive definition, ie the word “include” really means “mean”, and only items within (a) and (b) fall within the expression “income arising under a settlement”.

- otherwise,<sup>4</sup> and
- (b) any income which would have been so chargeable if it had been received in the UK by a person domiciled and resident there.

EN ITTOIA provides:

In consequence [of this definition] the appropriate measure of income chargeable and the tax year of charge are provided by the charging sections of other Chapters of this Act (or the appropriate sections of the Income Tax Acts).

So “income” means “income for income tax purposes” which is a different concept from “income for trust law purposes” or “income for accountancy purposes”.

The points made in 45.15 (Capital receipts deemed to be income) and 45.16 (Income of person: Quantum) apply also for ascertaining “income arising under a settlement”.

Income may arise under the settlement (and so may be treated as the income of the settlor) even if the settlor is paying the income (eg if the settlor pays rent or interest to a settlor-interested discretionary trust).<sup>5</sup>

#### 44.2.1 *Property business income*

The Property Income Manual discusses how to calculate property income for the purposes of the settlor-interested trust code:

**PIM1045. Life interest trusts** [Mar 2018]

... Where the income [within s. 624] is property income, the normal property income rules apply in calculating the income. (S.623 ITTOIA)...

This is correct. It follows that interest paid by the trustees is in principle deductible in computing property income for s.624 purposes.

#### 44.2.2 *Property business losses*

The Property Income Manual considers the treatment of losses:

**PIM1045. Life interest trusts** [Mar 2018]

---

4 See App.2.4.1 (Bear tax by deduction or otherwise).

5 See *Ang v Parrish* 53 TC 304. But it is different if the settlor is also life tenant; see 47.10.5 (Loan to life tenant).

*Trusts and the settlor - losses*

... The more common case is where the trustees carry on the rental business but the settlor is caught by Section 619(1). Under these circumstances the settlor can't set any trust rental business losses against personal rental business income.

Similarly the settlor can't merge personal rental business losses and the trust rental business profits, which are deemed to be the settlor's income and charged under Section 619(1). Thus:

- Where the trustees have a rental business loss and the settlor has a personal rental business profit, the trust loss is carried forward and the settlor is taxed on their personal rental business profit; the amount of the trustees' rental business profit charged on the settlor in the following year under Section 619(1) will be reduced by the trust loss carried forward.
- Where the trustees have a rental business profit and the settlor has a personal rental business loss, the settlor is taxed on the trust rental business profit under Section 619(1); the settlor's personal rental business loss can't be merged with the trust profit; but, as a separate matter, the settlor may in some cases be able to set a personal rental business loss sideways against other income, including any Section 619(1) income deemed to arise from the trustees' rental business; see PIM 4220.

The position is different where the taxpayer is:

- the settlor, and
- the life tenant, and
- carries on the rental business.

Under these circumstances the settlor can merge their personal property losses with the deemed income from the trust and vice versa. ...

This is thought to be correct. See too 23.6 (Losses of overseas property business).

#### 44.2.3 *Trust expenses*

Section 624(1A) ITTOIA provides:

If the settlement is a trust, expenses of the trustees are not to be used to reduce the income of the settlor.

EN ITA provides:

3323. New subsection (1A) makes it explicit that trustees' expenses are not taken into account in measuring the income of a settlor under section

624 of ITTOIA. This follows from the fact that it is the income arising that is deemed to be the settlor's and the income arising is the gross amount out of which the trustees may pay expenses.

This is important because if s.624 does not apply, expenses do reduce the income of the life tenant.<sup>6</sup>

#### 44.2.4 *Income must be ascertainable*

Section 624 assumes that one can *ascertain* the amount of income which arises under the settlement. If that is not possible then it is considered that s.624 does not operate.<sup>7</sup> In straightforward cases ascertaining the amount of income is not a problem. The issue can arise where there are two settlors<sup>8</sup> or on the supply of services.<sup>9</sup>

### 44.3 Arising under a settlement

There must be a link between the income and the settlement; exactly what that link is has been left to the Courts to sort out.

#### 44.3.1 *Property comprised in a settlement*

The wording of (what is now) s.624 has changed over time. In the 1938 version, what was treated as income of the settlor was:

any income arising under the settlement from the property comprised in the settlement<sup>10</sup>

The underlined phrase was dropped in the ICTA 1988 consolidation. Under the current law, what is treated as income of the settlor is:

income which arises under a settlement

Presumably the underlined phrase was thought to be unnecessary, as “income arising under the settlement” and “income from the property comprised in the settlement” were two ways of saying the same thing. Although the wording has changed, the meaning is the same.

---

6 See 39.5 (Trustees expenses).

7 The same point applies to the ToA provisions; see 45.9.2 (Income must be identifiable).

8 See 95.2.2 (Loan/guarantee/paying trust expenses).

9 See 94.25 (Provision of services)..

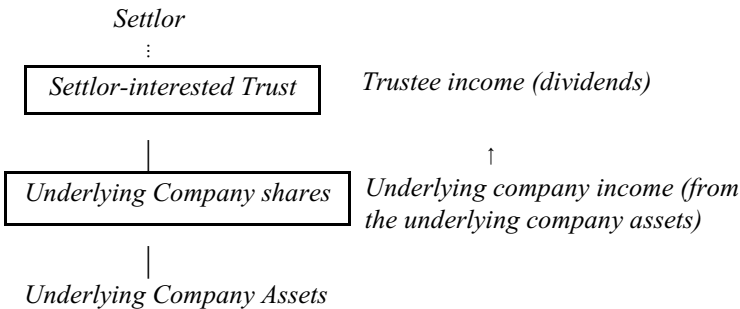

10 Section 38 FA 1938.

I set out this history because it is necessary to have the older wording in mind when considering pre-1988 case law, such as *Chamberlain*. These cases focus on the (now deleted) phrase “property comprised in the settlement”. Once that property is identified, the income arising under the settlement (which is treated as income of the settlor) is identified: it is income from that property. These cases are still relevant under the current legislation.

The old expression “property comprised in the settlement” still survives in a few dusty corners of the current legislation. However the more usual expression now is “*property from which the income* [ie the Settlement Income] *arises*”. So one first needs to identify “the income arising under the settlement”, and then the property from which that income arises. But the end result is the same.

44.3.2 *Underlying company income*

Suppose a settlor-interested trust holds an underlying company, thus:

The trustees’ income (dividends) is income arising under a settlement and taxed under s.624.

The company’s income is not “income arising under the settlement” and not within the scope of s.624. This was decided in *Chamberlain v IRC*.<sup>11</sup>

Simplifying to bare essentials, *Chamberlain* concerned an arrangement with just two key steps. The settlor:

- (1) transferred assets to the underlying company in exchange for securities; and

---

<sup>11</sup> 25 TC 317.

(2) transferred some shares in the underlying company to a trust.<sup>12</sup>

*Chamberlain* is a case on the 1938 version of the settlement provisions, where the relevant wording was “income arising under the settlement from the property comprised in the settlement”. The issue was whether the property comprised in the settlement was:

- (1) the underlying company assets or
- (2) the trust fund (the underlying company shares).

But this also determines the issue of whether (adopting today’s statutory terms) the income arising under the settlement is:

- (1) the underlying company income or
- (2) the trustee income (dividends).<sup>13</sup>

Lord Thankerton gave the speech of the majority;<sup>14</sup> Macmillan and Romer agreed with the outcome, but their speeches are less important and Macmillan’s has different reasoning.<sup>15</sup>

The answer was that the property comprised in the settlement was the trust property, the underlying company shares; not the underlying company assets. This begins with a disclaimer:

I may premise that, in seeking the due application of [s.38 FA 1938, now s.624], each case is apt to depend on its own facts, and other cases are not likely to be of material assistance.

Some wriggle room there.<sup>16</sup> But we move on to the analysis:

... it seems to me that, while the word "settlement" is defined in the widest terms, the more crucial point is likely to be the determination of

12 In point of detail, the settlor transferred cash to 5 trusts which subscribed for shares in the underlying company; but nothing turns on that.

13 See 44.3.1 (Property comprised in a settlement).

14 Viscount Simon and Lord Atkin agreed with this speech.

15 Macmillan took the view that the arrangement consisted of the classic trust alone, and the first step (transfer of assets to the underlying company in exchange for an issue of shares) was “merely preparatory”. See App 2.2.4 (Identifying the arrangement). But this was a minority view.

16 Likewise *Vestey v IRC* 31 TC 1 at p.120:

“I do not think that any hard and fast rule is laid down in *Chamberlain's* case. The ingenuity of those who devise these schemes is such that it might be rash to say that property can never be comprised in a settlement unless it is charged with rights in favour of others, but I think that as a general rule this must now be the test”.

what the "property comprised in the settlement" consists of in the particular case. The present case affords, in my opinion, a good illustration of this point, and the question may be thus stated. Did the property comprised in the settlement consist of

- [1] the whole assets of Staffa [the underlying company], or  
 [2] is the property comprised in the settlement to be found separately comprised in each of the five deeds of settlement [ie the 5 trust funds]...

My Lords, I am of opinion that the latter alternative provides the correct view ... the sums settled under [the trust] deeds were the funds provided for the purpose of the settlement within the meaning of Section 41(4) (c).<sup>17</sup> Staffa [the underlying company], though controlled by the Appellant, did not, in my opinion, hold its assets as part of the provisions settled on the children. I am of opinion that the whole assets of Staffa [the underlying company] did not constitute the property comprised in the settlement ...<sup>18</sup>

This was followed in *Vestey v IRC* (the first *Vestey* case):<sup>19</sup>

even if the lease and the deed of settlement may both be properly treated as components of the "arrangement", yet the property "comprised in the settlement" is the property settled by the deed of settlement, that is the rents under the lease, and not the property or properties which were the subjects of the lease.

---

17 This provided: "a person shall be deemed to have made a settlement if he has made or entered into the settlement directly or indirectly, and in particular ... if he has provided ... funds directly or indirectly for the purpose of the settlement".

18 25 TC 317 at p.329.

19 31 TC 1 at p.89; likewise at p.107:

"I do not dissent from the Crown's contention that the lease and the deed of trust together constitute an "arrangement" within Section 41 (4) (b) of the Act of 1938 and are consequently a "settlement" for the purposes of Part IV of that Act. In my view, however, whether one looks for this purpose at the deed of trust alone, or at the deed of trust and the lease together, the only property comprised in the settlement" at any time was the rent payable by Union under the lease, together with any property resulting from the investment of the rent and from the accumulation of the income arising from such investment."

But the rule is not absolute. At p.120:

"I think that *Chamberlain's* case shews that the most profitable course to follow is first to determine what was the property comprised in the settlement, and that the way to find that property is to look for property charged with rights in favour of beneficiaries."

HMRC agree. In explaining why s.624 protected-trust relief<sup>20</sup> applies to a trust but not to its underlying company, they say:

The settlor charges under the settlements legislation will not need to be dis-applied to foreign income of any corporate structure underlying the settlement, because the settlements legislation only applies to income arising to a settlement.<sup>21</sup>

HMRC only seek to apply the settlor-interested trust code to the dividends and not to the company income.

What is the reason for this? One might think that a trust and the underlying company could in principle constitute one arrangement, so that both the company income and the trust income (dividends) could be described as income arising under the settlement-arrangement. *Chamberlain* gives the answer but no clear reason for that answer. It is considered that the context supports their conclusion.

The policy background is that the use of a UK company to save the difference between IT and CT rates is not in principle regarded as objectionable even if the arrangement involves:

- (1) A key employee providing services to the company at an undervalue (so increasing income subject to CT and decreasing income subject to IT)<sup>22</sup>
- (2) Extracting profits taxed at rates less than the marginal rate of the key employee

In the film star case, *Crossland v Hawkins*:<sup>23</sup>

The heavy incidence of Surtax [now higher rate income tax] on large incomes has for some time led artistes and others in the world of entertainment to adopt the device of forming a limited company which they control, and giving the company, by means of a service agreement, the right to their services. In return the company pays the artiste some

20 See 88.10 (s.624 protected-trust relief).

21 Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.3.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf)

22 This is now subject to the limited exception of the mixed partnership code; see 83.3 (Mixed partnership code). But the exception confirms the general rule.

23 39 TC 493 at p.502.

modest salary. The company then hires the artiste out to whomsoever requires his services and itself obtains the consideration for them. ... In this way Surtax on the whole of the artiste's earnings is reduced to Surtax on the salary he gets from the company plus such dividend as is distributed to him; and when eventually the company is wound up the accumulated reserves of past years will come to him as capital.<sup>24</sup>

All this is perfectly legitimate and indeed, in the case of persons whose high earnings may be short-lived, understandable.

That this is still the policy is confirmed by the repeal of the former s.681(2)(b) ICTA (which had deemed income of an underlying close company to be "income arising under a settlement").<sup>25</sup>

It is considered that income of a unit trust held by trustees is similarly not "income arising under a settlement" (unless the unit trust is transparent in which case the income arises to the trustees).<sup>26</sup>

The position is different where trustees are members of a partnership. Insofar as income is distributed from the partnership to the trust it clearly constitutes income arising under the settlement. But even if income is retained by the partnership, the trustees share of the partnership income is income of the trustees, since partnership income is regarded as arising to the partners.<sup>27</sup>

Income of a non-resident company or unit trust which is not "income arising under a settlement" may fall within the ToA rules.

#### 44.3.3 *Underlying Co subject to CT*

If the company income is subject to corporation tax (eg if the company is UK resident) there is an additional reason why the settlor-interested trust

24 If winding up the company now, one would need to consider Chapter 4 Part 13 ITA (sale of occupation income) and 29.8 (Winding-up TAAR).

At the time of *Crossland v Hawkins* there were close company apportionment rules, but they were not so harsh. The court explained: "From its profits the company must distribute a reasonable dividend if it is to avoid Surtax on the whole of its profits - see s.245 Income Tax Act 1952 - but it is allowed to make such reserves as are required for the maintenance and development of the business; and where the business depends on the fortunes of a particular artiste these reserves may be considerable."

25 See sch 17 FA 1989. This was part of the repeal of the former close company apportionment provisions.

26 See 66.4.3 (Unauthorised unit trust: Foreign trustees).

27 See 82.15 (Partnership transparency: IT/CT).

code does not apply. Section 3(1) CTA 2009 provides:

The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—

- (a) the company is UK resident, or
- (b) the company is not UK resident and it is chargeable to corporation tax in respect of the income, or would be so chargeable but for an exemption.

Section 624 is a “provision of the Income Tax Acts relating to the charge of income tax” so it does not apply to income subject to corporation tax.

This makes good sense, because if the income is subject to corporation tax, HMRC do not need the settlor-interested trust code. But if it is correct that company income generally is not income arising under a settlement, this particular point does not arise here.<sup>28</sup>

#### 44.3.4 *Income of life tenant (not settlor)*

Income payable under the trust to a life tenant is “income arising under a settlement”. Admittedly, such income is usually regarded for tax purposes as the income of the life tenant, not of the trustees.<sup>29</sup> But that is not relevant, because:

- (1) The expression is “income arising under a settlement”, not “income arising to trustees”.
- (2) “Settlement” has the very wide meaning of settlement-arrangement.<sup>30</sup>

This can be seen to be the case by considering a trust made by S, revocable by S, under which income is payable to B for life. It could hardly be argued that such income falls outside the scope of s.624 ITTOIA.

#### 44.3.5 *Income of life tenant settlor*

Where the settlor has an interest in possession, trust income actually received by the settlor is not within s.624 ITTOIA. It is subject to income tax under general principles. But the rates of tax are the same in either

---

28 I discuss the point in more detail in the context of the ToA provisions, where it is important: see 45.5.1 (Non-resident company within CT).

29 See 39.3 (Taxation of life tenant).

30 See 1.5 (Settlement-arrangement definition).

case,<sup>31</sup> so the issue does not now arise.<sup>32</sup>

#### 44.4 Settlor deductions/reliefs

Section 623 ITTOIA provides:

For the purpose of calculating liability to tax under this Chapter [Chapter 5 Part 5, the settlor-interested trust code] (but for no other purpose), a settlor shall be allowed the same deductions and reliefs as if any amount treated under this Chapter as income of the settlor had actually been received by the settlor.

The legislation does not identify what deductions and reliefs are applicable. The wording derives from s.5 FA 1914, where it was understood to allow the costs of collection and payment of foreign income. It was copied from there to FA 1938 which is the original version of the settlor-interested trust code. But now these costs are deductible whether or not the income is actually received.<sup>33</sup> As far as I can see, this provision survives only for historical reasons, and has no effect: it should be repealed.

#### 44.5 Settlor-interested trust

Section 624(1) ITTOIA provides:

Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone if it arises—

- (a) during the life of the settlor, and
- (b) from property in which the settlor has an interest.

I refer to income which is treated as the settlor's income under this section as "**s.624 income**". Section 624 raises a number of issues:

<b>Issue</b>	<b>See para</b>
<i>Identify the settlement:</i>	

---

31 See 40.11 (Settlor-interested trust IT rate).

32 The point was discussed in the 4th ed. of this work at 11.4.3 (Income of life tenant settlor). Trust income not received by the life tenant settlor is within s.624 ITTOIA. That applies to income used for trust expenses, and income for tax purposes which is capital for trust law purposes.

33 See 15.11 (RFI collection costs). The background is set out in EN ITTOIA Change 137 and 138.

Is there a settlement	1.2
What is the settlement	App 2.2.4
Identify the settlor	94.2
Identify income arising under the settlement	44.2
Identify property from which that income arises	44.3.1
Whether the settlor has an interest in that property	44.6
<i>Do reliefs apply:</i>	
Protected-trust relief	88.8
s.624 spouse exemption	89.14
Minor s.624 reliefs	44.7

I refer to this as the “**s.624 issue list**”. In the case of a settlement-arrangement that is a classic trust, that is generally straightforward. More thought is needed for a settlement-arrangement which is not, or not just, a classic trust, such as:

<b>Topic</b>	<b>See para</b>
Outright gift to spouse	89.14
Dividend-waiver settlement	94.19
Alphabet shares	94.20
Partnership-settlement	94.21

## 44.6 Meanings of “settlor-interested”

### 44.6.1 *Concepts of “settlor-interested”*

The term “settlor-interested”, first coined in the FA 2000, is used in connection with various provisions of which the most important are:

- (1) IT settlor-interested trust code (discussed in this chapter)
- (2) CGT settlor-interested trust rules<sup>34</sup>

Consistent with the patchwork nature of UK tax, these provisions have significant differences, though they share a common framework. “Settlor-interested” is a convenient label, but not a wholly accurate one.

### 44.6.2 *“Settlor-interested” for s.624*

---

<sup>34</sup> See 56.5 (Settlor-interested condition). Other examples, not discussed in this work, are:

- (1) Hold-over relief restriction on gift to settlor-interested trust: s.169B-169G TCGA
  - (2) Disposal of interest in a settlor-interested trust: sch 4A TCGA
- “Power to enjoy” in the ToA code is a similar concept with a different label. GWR is a comparable but not identical concept.

## Section 625(1) ITTOIA provides:

A settlor is treated for the purposes of section 624 as having an interest in property if there are any circumstances in which the property<sup>35</sup> or any related<sup>36</sup> property—

- (a) is payable to the settlor or the settlor’s spouse or civil partner,
- (b) is applicable for the benefit of the settlor or the settlor’s spouse or civil partner, or
- (c) will, or may, become so payable or applicable.

This is of course a wide definition. In particular, a settlor has an “interest” in property given outright to their spouse. When the definition is used in this context, scare quotation marks are appropriate.

Section 625(2)(3) ITTOIA contain half a dozen exceptions, which are not discussed here as they rarely arise. In practice, under a classic trust the settlor and spouse are usually expressly included as beneficiaries or expressly excluded.<sup>37</sup>

A trust is not settlor-interested merely because:

- (1) The trustees may lend to the settlor, or purchase an asset from the settlor, on commercial terms; or
- (2) The trustees do lend to the settlor, or purchase an asset from the settlor, on commercial terms.

Those transactions involve a payment of the money lent or the purchase price but “payable” in para (a) means payable in a manner conferring a benefit. That is why there needs to be a separate provision dealing with capital sums paid to the settlor.<sup>38</sup>

#### 44.6.3 “Spouse” in settlor-interested trust code

---

35 “The property” refers back to s.614: it means the property from which the Settlement Income arises.

36 “Related property” is defined in s.625(5) ITTOIA:

In this section “related property”, in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it.

See App 2.11 (“Representing” assets).

37 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), Chapter 13 (Settlor Exclusion and Default Clauses).

38 See 44.14 (Settlor receives capital sum).

Section 625(4) ITTOIA gives the expression “spouse” an artificial and slightly narrow meaning:

In subsection (1) “the settlor’s spouse or civil partner” does not include—

- (a) a spouse or civil partner from whom the settlor is separated under an order of a court or a separation agreement,
- (b) a spouse or civil partner from whom the settlor is separated where the separation is likely to be permanent,<sup>39</sup>
- (c) the widow or widower or surviving civil partner of the settlor, or
- (d) a person to whom the settlor is not married but may later marry or a person of whom the settlor is not a civil partner but of whom the settlor may later be a civil partner.

The ToA provisions and the s.86 provisions do not contain the same provision, which is anomalous, but that is the patchwork nature of UK tax. Fortunately it does not often matter.

For the general meaning of spouse, see App 3.2 (“Spouse”).

#### 44.6.4 *Beneficial loan or guarantee*

Beneficial loans and guarantees to trustees raise three distinct questions, so far as settlor-interested trusts are concerned:<sup>40</sup>

- (1) Is the lender/guarantor a settlor by virtue of the loan/guarantee? (This question generally arises only if the lender/guarantor is not the original settlor, though it could also arise if one had to consider whether the settlor has provided additional property and so tainted the settlement).
- (2) If so, what property has the lender/guarantor provided?
- (3) Does the lender/guarantor have an interest in the trust property by virtue of the loan/guarantee? (This question does not arise if the lender/guarantor already has an interest in the trust property.)

It is necessary to distinguish between loans which are (1) interest-free (2) beneficial but not interest-free, eg, at low interest; and (3) commercial

---

<sup>39</sup> Para (a)(b) copies standard form wording to refer to a separated spouse: see App 3.4.3 (Living together: married couple). It could have been expressed more economically by taking advantage of the ITA definition, but it does not matter.

<sup>40</sup> For other issues raised by loans, see 58.1.1 (Loan tax issues: Navigation).

loans. Guarantees are not the same as loans, but the issues overlap, so I also consider them in this section.

There are many possible permutations, which makes an exposition rather more difficult.

To start with the simplest case: suppose the settlor lends interest-free to a trust from which he or she is otherwise excluded. The HMRC view is that the trust is settlor-interested as the settlor may benefit by repayment of the loan:

In *Jenkins v IRC* (26 TC 265) the Court of Appeal found that the making of an interest-free loan brought the settlement into what is now [s.624]. In the *Jenkins* case, the dispute was about whether certain income received by the trustees of the settlement could be assessed on the settlor under the provisions of FA 1938 s38(4). That provision contained an extended definition of retaining an interest in income that is in similar terms to the definition [in s.624].

The effect of the decision in *Jenkins* was that a settlor who has made an interest-free loan to his/her trust has brought himself or herself within the scope of s38(4), and by implication [s.624] (albeit that there would be no charge [under s.624] unless income actually arose to the trustees).<sup>41</sup>

The contrary is faintly arguable<sup>42</sup> but for practical purposes this should be accepted as correct.

The same applies if the settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest. However a settlor (if otherwise excluded) has no interest if the loan is on commercial terms, as repayment of such a loan is not a benefit.

If an individual other than the original settlor lends interest-free to a trust, the loan makes the lender a settlor.<sup>43</sup> There is then a trust with two settlors, the original settlor and the lender. The lender will be within the scope of s.624 on the income originating from the lender, if one can

---

41 Letter from HMRC to the Association of British Insurers, September 2004  
<https://www.kessler.co.uk/tfd-archive>

42 The point was conceded in *Jenkins v IRC* 26 TC 265 but the concession was held to be correct in *Wachtel v IRC* 46 TC 543. So the issue remains (just) arguable at the level of the Court of Appeal.

43 A person who is not otherwise a settlor in principle becomes a settlor by virtue of making an interest-free loan: see 94.26 (Loans).

identify it.<sup>44</sup>

If an individual other than the original settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest, the loan still makes the lender a settlor. However the lender will not be within the scope of s.624 unless one can identify the income originating from the lender, which is not usually the case.<sup>45</sup>

If the settlor (“the guarantor”) guarantees a loan or other obligation of the trustees, the trust is not settlor-interested (assuming the settlor is otherwise excluded). A guarantor’s claim against a solvent trust would only arise if the trustees failed to meet their primary contractual obligations and the words “in any circumstance whatsoever” do not extend to a breach of contract of that kind.

If someone other than the settlor gives a guarantee, the guarantor would not fall within s.624, unless:

- (1) one could identify the income originating from the guarantor (which is not usually the case) and
- (2) the guarantor had an interest in that income under the trust (the existence of the guarantee alone does not constitute an interest).

#### 44.6.5 *Settlor interest in part of trust*

The IT settlor-interested trust provisions only apply to income from property in which the settlor has an interest. So if the settlor is excluded from part of the trust fund, the IT provisions do not apply to that part. HMRC agree. The TSE Manual provides:

**TSEM4200 settlor retains an interest** [Mar 2018 ]

**...Settlement only partially settlor-interested**

Where the settlor has retained a clearly defined interest in a distinct part of the settlement, for example in one fund forming part of a trust, only a corresponding part of the income is caught. In other cases of a settlor retaining a partial interest in a trust, you should submit the case to HMRC Trusts & Estates Technical Edinburgh for advice.

The TSE Manual provides:

**TSEM4513 - Tax paid by trustees where trust is not wholly settlor**

---

44 See 95.2.2 (Beneficial loans, guarantees, payments of trust expenses).

45 See 95.2 (Just & reasonable apportionment).

**interested** [Jul 2017]

The income tax paid by trustees for a tax year may be paid partly on income attributable to a settlor and partly on income from property from which a settlor is excluded from benefit. The tax paid on income attributable to the settlor does not enter the tax pool - see TSEM4512. Tax paid on other income enters the tax pool in the normal way - see TSEM3756 onwards,

**Example**

A settles property into the A discretionary settlement. The settlement consists of two funds.

Fund A contains a house which is let and a block of shares in A plc.

Fund B contains a block of shares in B plc.

Under the terms of the settlement the settlor and any spouse or civil partner of the settlor are excluded from benefiting from Fund B.

In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:<sup>46</sup>

<i>Fund A</i>	<i>Amount</i>	<i>Rate (2009/10)</i>	<i>Tax</i>
Rental Income	£1,000	20%	£200
	£9,000	40%	£3,600
Dividend Income	£ 5,000	32.5% (but 10% tax credit) <sup>47</sup>	<u>£1,625</u>
Total			<u>£5,425</u>

The settlor is given credit for the tax paid on the income attributable to the settlor - £5,425. Where the tax paid by the trustees exceeds the settlor's own income tax liability the tax (excluding the £500 non payable tax credit attached to the dividends) may be repaid to the settlor.

*Fund B*

Dividend Income	£15,000	32.5% (but 10% credit)	<u>£4,875</u>
Total			<u>£4,875</u>

As the settlor is excluded from benefiting from Fund B, this tax is not available to the settlor. The normal rules apply and £3,375 of the tax paid (£4,875 less £1,500 non payable tax credit attached to the dividends) enters the tax pool.

44.6.6 *Settlor-interest ceases*

If the settlor originally had an interest in trust property but is later

46 Author's footnote: I have slightly changed the layout for greater clarity.

47 The tax credit was abolished 2016, so the Manual is out of date, but this does not spoil the point being made here.

excluded (together with the settlor's spouse) then s.624 ITTOIA ceases to apply to income arising after the date of the exclusion.<sup>48</sup>

If the settlor is excluded from part of the trust fund, then they are within the scope of s.624 only on the income arising from the part in which they still have an interest.

The TSE Manual provides:

**TSEM4513 - Tax paid by trustees where trust is not wholly settlor interested [Jul 2017]**

**... Trust ceases to be, or becomes, settlor interested**

A trust may cease to be settlor interested part way through a tax year, for example when the settlor dies.

Similarly, a trust may become settlor interested part way through a tax year, for example the settlor may marry or enter into a civil partnership with an existing beneficiary of the trust.<sup>49</sup>

Where this happens the tax paid by the trustees should be apportioned on a time basis so the part is available to cover the settlor's liability and the other part dealt with in the normal way.

**Example**

In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:<sup>50</sup>

	<i>Amount</i>	<i>Rate (2009/10)</i>	<i>Tax</i>
Savings Income	1,000	20%	£200
	<u>9,000</u>	40%	<u>£3,600</u>
Total	<u>10,000</u>		<u>£3,800</u>

The settlor of the trust dies on 5 January 2010. The trust ceases to be settlor interested on that date because ITTOIA/S624 applies only to income arising under a settlement during the life on the settlor.

The settlor is taxed on £7,500 and is given credit for £2,850 (75% of £3,800).

The balance of the tax, £950 goes into the tax pool.

I would have expected to apportion by reference to the date income arises, not by time apportionment, but the end result will not usually be very

48 Contrast 46.10 (Condition A : Power to enjoy); 56.5 (Settlor-interested condition).

49 Author's footnote: In theory it is possible for a trust to become settlor-interested, on marriage of the settlor to a beneficiary. But in practice this is unlikely to happen; and standard form trusts would exclude the settlor and spouse from benefit.

50 Author's footnote: I have slightly changed the layout for greater clarity.

different.

#### 44.6.7 *Transfer to new trust*

If the trust fund is transferred to a new settlement from which the settlor is not excluded, then s.624(1) ITTOIA continues to apply. The original settlor is the settlor of the new trust.<sup>51</sup>

If the entire trust fund is transferred to a new trust from which the settlor (and spouse) are excluded then s.624 ceases to apply, and if they are excluded from part, it ceases to apply in part.

#### 44.6.8 *Settlor-interested: non-trust*

In *Vandervell v IRC*,<sup>52</sup> the taxpayer gave shares to a charity subject to an option which allowed the settlor to repurchase them. This was a settlor-interested settlement.

TSEM gives a similar example:

##### **TSEM4200 Settlor Retains An Interest** [Mar 2018]

###### *Example 3- gifted shares with conditions attached*

Mr C is a higher-rate taxpayer who owns all the 100 issued shares in C Ltd. He wants to give his brother, a basic rate taxpayer £25,000 but Mr C's money is tied up in the company. To avoid a higher-rate charge on dividends paid out of the company, Mr C transfers 50 shares to his brother on the understanding that the shares are to be returned to him a month later. Mr C declares and the company pays a dividend of £500 per share so that £25,000 is paid to each shareholder. ...

The HMRC analysis is as follows:

The plan, under which the gifted property is expected to return to the donor is an arrangement where the donor or settlor has retained an interest in the property so the income paid to the brother is deemed to be Mr C's under ITTOIA/S624.

That would clearly be the case if the “understanding” constituted a contract. What if the arrangement was non-contractual? It seems difficult to say that C has an interest. But the GAAR might perhaps apply.

---

51 See 94.11.2 (Appointment rule conditions).

52 43 TC 519.

The income streams code also needs consideration here.<sup>53</sup>

#### 44.7 Minor s.624 reliefs

Section 626 ITTOIA provides a relief for inter-spouse transfers, discussed elsewhere.<sup>54</sup>

Section 627 contains a further set of reliefs which I mention here for completeness. Section 627(1) deals with divorce situations:

The rule in section 624(1) does not apply to income which—

(a) arises under a settlement made by one party to a marriage or civil partnership by way of provision for the other—

(i) after the dissolution or annulment of the marriage or civil partnership, or

(ii) while they are separated under an order of a court, or under a separation agreement, or where the separation is likely to be permanent, and

(b) is payable to, or applicable for the benefit of, the other party.

Section 627(2) ITTOIA provides:

The rule in section 624(1) does not apply to income which consists of—

(a) annual payments made by an individual for commercial reasons in connection with the individual's trade, profession or vocation

This is unnecessary, as these Annual Payments would not constitute a settlement. Perhaps it is there for historical reasons.<sup>55</sup>

(b) qualifying donations for the purposes of Chapter 2 of Part 8 of ITA 2007 (gift aid), or

This ceased to be needed when qualifying donations ceased to be a charge on income.

(c) a benefit under a relevant pension scheme.<sup>56</sup>

A relevant pension scheme is not likely to constitute a settlement.

Section 628 ITTOIA provides a relief for temporary charitable trusts,

---

53 See 51.1 (Transfer of income streams).

54 See 89.14 (S.624 spouse exemption).

55 See 30.7 (Commercial Annual Payment).

56 Defined in ss(3) but I need not set that out here.

which I doubt is ever used in practice.<sup>57</sup>

## 44.8 s.624 remittance basis

### 44.8.1 *Scope of s.624 remittance basis*

Section 648 ITTOIA provides a relief for a settlor who is a remittance basis taxpayer; I call this the “**s.624 remittance basis**”.

It will be rare for this to apply, because in almost all cases where the conditions for the s.624 remittance basis are met, protected-trust relief will be available.<sup>58</sup>

It is possible to envisage cases where the s.624 remittance basis would still apply, eg:

- (1) A deemed domiciled settlor adds property to a trust (and so it ceases to be a protected trust),
- (2) The settlor ceases to be UK resident and ceases to be deemed domiciled.
- (3) The settlor subsequently becomes UK resident again.

### 44.8.2 *Remittance basis rule*

The legislation uses the clumsy but effective drafting technique of restricting the definition of “income arising under a settlement”. That term has a commonsense definition in s.648(1)<sup>59</sup> but s.648(3) ITTOIA then provides:

And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor ...

That is, if the settlor is a remittance basis taxpayer.

... references in this Chapter [Chapter 5 Part 5, the settlor-interested trust code] to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax.

---

57 See Kessler, Wong and Birkbeck, *Taxation of Charities and Nonprofit Organisations*, 2019/20 ed, para 31.5 (Settlor-interested trusts).

58 See 88.10 (s.624 protected-trust relief).

59 See 44.2 (“Income” arising under a settlement).

This applies to relevant foreign income arising under the settlement. Foreign source income of a non-resident settlor-interested trust is in general RFI.<sup>60</sup>

There are two aspects to this: unremitted income is not taxed, and remitted income is taxable.

In practice this mainly concerns settlor-interested discretionary trusts. Income of a trust where the settlor has an interest in possession is in principle outside the scope of s.624;<sup>61</sup> though s.624 could apply:

- (1) If the trustees have a receipt which is income for tax purposes but capital for trust purposes.
- (2) If the trustees have expenses deductible from the life tenant's income.

#### 44.8.3 *Charge on remitted s.624 income*

The charge under s.648(5) arises if two conditions are satisfied:

- (1) The income "is remitted to the UK".
- (2) The circumstances are "such that, if the settlor remitted it, the settlor would be chargeable to income tax".

For post-2008 income, the usual ITA remittance basis applies, so s.624 income is treated as remitted if it is brought/received/used in the UK by a relevant person (including the trustees).

The same rule applies to s.629 income (income of minor child of settlor). Receipt by the child in the UK after the child has reached the age of 18 is not in principle a taxable remittance, because the child is then not a relevant person in relation to the settlor.

#### 44.8.4 *Remittance basis timing rule*

Section 648(5) ITTOIA provides an artificial timing rule:

Where subsection (3) [s.624 remittance basis] applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

---

60 See 15.10.2 (Relevant foreign income). I have wondered whether income of a non-resident settlor-interested trust meets the condition in s.830(1)(b) ITTOIA, that it is chargeable under one of the specified provisions. Foreign income of a non-resident is not in principle chargeable. But income of a non-resident settlor-interested trust is treated as income of the settlor, so this requirement is satisfied.

61 See 44.3.5 (Income of life tenant settlor).

In the protected-trust regime this rule is disapplied, with the standard form (repeated whenever required):

Section 648(3) to (5) (relevant foreign income treated as arising under settlement only if and when remitted) do not apply for the purposes of this section.<sup>62</sup>

#### 44.8.5 *Pre-2008 income: Transitional*

In the following discussion I use the term “**pre-2008 s.624 income**” to mean foreign income arising under a settlor-interested trust before 6 April 2008, which

- (1) fell within s.624 ITTOIA, but
- (2) qualified for relief under the s.624 remittance basis.

There was no tax charge when the income arose if it was not received in the UK.

Para 86(4) sch 7 FA 2008 provides (so far as relevant):

... in relation to an individual’s income ... for the tax year 2007–08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

The point is that there is a taxable remittance of pre-2008 s.624 income only if it is brought/received/used in the UK *by the settlor*. Receipt (etc) by a relevant person does not count.<sup>63</sup>

For this purpose it is necessary to decide whether s.624 income is income of the individual for the tax year 2007/08 or before. The artificial remittance basis timing rule<sup>64</sup> might treat pre-2008 income as post-2008 income and so disapply the transitional relief. Para 86(4A) sch 7 FA 2008, inserted with retrospective effect in 2009, deals with this:

For the purposes of sub-paragraph (4), section 648(2) to (5) of ITTOIA 2005 (and corresponding earlier enactments) do not apply (so that relevant foreign income which arose under a settlement in the tax year 2007-08 or any earlier tax year is to be treated as income for the tax year in which it arose).

---

62 s.628A(13) ITTOIA; s.628C(3) ITTOIA; s.630A(3) ITTOIA;

63 See 17.9 (Relevant person: Pre-2008 income/gain).

64 See 44.8.4 (Remittance basis timing rule).

The RDR Manual provides:

**31490 Relevant persons and foreign income and gains arising to a settlement before 6 April 2008** [Jan 2019]

... Where a settlor claims to use the remittance basis, section 648 provides for the trust income to be treated as arising in the year in which it is remitted. Because of the narrower definition of remittance which applied before 6 April 2008 this would produce an inequitable result where relevant foreign income that arose to a settlement before 6 April 2008 is remitted and becomes chargeable on the settlor after 6 April 2008.

*Transition*

The transitional rule provides that in establishing whether there has been a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at s.809L ITA ... are applied as if references to 'relevant person' are to the individual.

For the purpose of applying this transitional rule only, that is, for the purpose of determining whether there is any benefit under the provisions of paragraph 86(4) only the income is treated as arising in the year that it arose to the settlement.

*Effect*

This means that income arising under a settlement in tax years prior to 5 April 2008 but which is remitted after 6 April 2008 is not treated as remitted by the settlor unless it has been brought to, received by or used in the UK for his benefit.

I had thought that under the pre-2008 rules, there was taxable remittance if trustees of a settlor-interested trust brought s.624 income to the UK - even though the settlor did not receive the income. However HMRC presumably did not agree, as that is not now the position for pre-2008 s.624 income. There is a remittance only if the settlor actually becomes entitled to the pre-2008 s.624 income and brings/receives/uses it in the UK.

#### **44.9 Non-resident settlor**

The legislation again uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That

term has a commonsense definition in s.648(1)<sup>65</sup> but s.648(2) then continues:

But if, in a tax year, the settlor is not UK resident, references in this Chapter [Chapter 5 Part 5, the settlor-interested trust code] to income arising under a settlement do not include income arising under the settlement in that tax year in respect of which the settlor, if actually entitled to it, would not be chargeable to income tax by deduction or otherwise<sup>66</sup> because of not being UK resident.

Where the settlor is non-resident, UK source trust income is within the scope of s.624, but foreign income is not.<sup>67</sup> Contrast s.720 ITA which does not apply at all unless the transferor is resident.

#### 44.9.1 *UK resident trust, non-resident settlor*

The trustees are taxed in full on foreign source income. This prevents s.624 applying where it might benefit the taxpayer.

However the settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if non-resident IT relief applies.<sup>68</sup>

#### 44.9.2 *Non-resident trust, non-resident settlor*

Neither the trustees nor the settlor are taxed on foreign source income.

The settlor is taxed on UK source income. This is beneficial if:

- (1) The settlor's marginal rate is less than the top rate of income tax.
- (2) Non-resident IT relief is available to the settlor and not to the trustees, which could happen because of the UK beneficiary rule.<sup>69</sup>

If the settlor is UK resident but the year is a split year, the income of the offshore part of the year will qualify for split year treatment.

#### 44.9.3 *Remittance of trust income*

Where the settlor is non-resident, it does not matter if trust income is

65 See 44.2 ("Income" arising under a settlement).

66 See App.2.4.1 (Bear tax by deduction or otherwise).

67 This is clear on the words of the section, but if authority is needed, see *IRC v Countess of Kenmare* 37 TC 383.

68 See 42.1 (Non-resident IT relief).

69 See 42.1 (Non-resident IT relief).

remitted.

Suppose:

- (1) Foreign income arises to the trustees of a settlor-interested trust while the settlor is non-resident (“**non-resident period income**”).
- (2) The income is remitted by the trustees when the settlor is resident and a remittance basis taxpayer.

Section 648(3) ITTOIA provides that where the settlor is a remittance basis taxpayer:

... references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax...

(5) Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

It may seem at first sight that the non-resident period income is caught as it is treated under s.648(5) as arising in the year of remittance. However that is not the case, for two reasons:

- (1) The circumstances are not “such that, if the settlor remitted the non-resident period income, the settlor would be chargeable to IT”. Unless the settlor is UK resident when the income arises, the settlor would not be taxed on it when remitted later, even if it had been the settlor’s income all along.
- (2) Non-resident period income is not “income arising under the settlement” by virtue of s.648(2).

The result is sensible and consistent with rule that income of an individual arising during a non-resident period is not taxable if remitted during a resident period.<sup>70</sup>

#### 44.10 Beneficiary of settlor-interested trust

If income of a settlor-interested trust is paid to a beneficiary there might in principle be a double charge to tax:

- (1) The settlor is taxed under s.624

---

<sup>70</sup> See 16.21 (RFI/gains of non-resident, remitted when resident).

(2) The beneficiary could be taxed under normal trust tax principles

Section 685A ITTOIA avoids the double charge by giving relief to the beneficiary; I refer to this as “**s.624 beneficiary relief**”.

For tax return disclosure when this relief applies, see 38.3.3 (Tax return: Trust income).

#### 44.10.1 *Beneficiary relief conditions*

Section 685A(1) ITTOIA provides:

This section applies if—

3 conditions then follow, which I call “beneficiary relief conditions”:

- (a) a person receives an annual payment in respect of income from the trustees of a settlement,
- (b) the payment is made in the exercise of a discretion (whether of the trustees of the settlement or any other person), and
- (c) a settlor is charged to tax under section 619(1) on the income arising to the trustees of the settlement (whether in the current year of assessment or in a previous year of assessment) out of which the annual payment is made.

A settlor is not charged to tax, within the meaning of (c), if:

- (1) s.624 protected-trust relief applies
- (2) the s.624 remittance basis applies and the income is (un)taxed under the remittance basis.

In these cases, s.624 beneficiary relief does not apply.

Section 685A(2) ITTOIA provides:

This section applies only in respect of that proportion of the annual payment which corresponds to the proportion of the total income arising to the trustees of the settlement in respect of which a settlor is chargeable to tax under section 619(1).

Section 685A(2) may apply where:

- (1) A settlement is partly settlor-interested (because there are two settlors or the settlor is partly excluded).
- (2) A non-resident settlor is charged on part of the trust income (UK source income only).
- (3) A remittance basis taxpayer settlor is charged on part of the trust income (UK source and remitted income only).

### 44.10.2 Relief for non-settlor

Section 685A ITTOIA provides beneficiary relief by way of a tax credit:

(3) If and in so far as this section applies, the recipient of the annual payment shall be treated for the purposes of this Chapter [Chapter 5 Part 5, the settlor-interested trust code] as having paid income tax at the applicable rate in respect of the annual payment.

(3A) For the purposes of subsection (3), the “applicable rate” means—

- (a) in the case of a Scottish taxpayer, the highest Scottish rate,
- (b) in the case of a Welsh taxpayer, the Welsh additional rate, or
- (c) in any other case, the additional rate.

Section 685A(4) ITTOIA prevents the beneficiary from using the tax credit except against the charge on the trust income:

But—

- (a) tax which the recipient is treated by virtue of this section as having paid is not repayable,
- (b) tax which the recipient is treated by virtue of this section as having paid may not be taken into account in relation to a tax liability of the recipient in respect of any other income of his...

EN FB 2008 provides:

10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable ‘notional’ tax credit ... which covers all the tax liability on that income.

The TSE Manual provides:

#### **4570 Payments to beneficiary other than the settlor** [Nov 2018]

... For 2006-07 onwards the law provides that discretionary payments to the beneficiary are treated as though the beneficiary had paid tax at the additional rate (see TSEM3757). The amount of the actual payment (it is not grossed up) should be shown in the beneficiary’s return and it is included in the calculation of that person’s total income. The tax credit ensures the beneficiary has no further liability in respect of the payment but it is ring-fenced so that no part of it can be repaid or set against liability arising from any other income of the beneficiary.

Section 685A(5A)(5B) ITTOIA provide:

(5A) If the recipient of the annual payment is treated by subsection (3) as having paid income tax in respect of the annual payment, the amount of the payment is treated as the highest part of the recipient's total income for all income tax purposes except the purposes of sections 535 to 537 (gains from contracts for life insurance etc: top slicing relief).

(5B) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—

- (a) the rule in subsection (5A), and
- (b) other rules requiring particular income to be treated as the highest part of a person's income.<sup>71</sup>

EN FB 2008 explains subsections (5A)(5B):

10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit ... which covers all the tax liability on that income.

11. However, under current statutory ordering rules income from a trust is charged before savings and/or dividend income. The result is that a beneficiary of such a trust who also has savings and/or dividend income may find that the non-trust income is pushed into higher rates so that more tax is due overall.

12. The measure amends this ordering rule, so that income from a settlor-interested trust is treated within section 1012 ITA 2007 as one of the highest slices of income instead of being treated as part of the lowest slice.

13. The amending legislation backdates the correct position to 6 April 2006 to ensure that those affected are not disadvantaged by the omission.

The problem arose because the relief takes the form of a non-repayable tax credit rather than an exemption for the trust distribution (which comes to the same thing but seems simpler). The reason for that drafting technique is not clear to me.

Two points arise from this which ought to raise serious questions about the Rule of Law in relation to the UK tax system. First the tax system is so complex that it took two years for the error in the FA 2006 to be noticed. (I confess I did not notice it myself.) Secondly, the error was corrected by casual retrospective legislation.

---

<sup>71</sup> See App.2.22 (Highest part of income).

#### 44.10.3 *Relief for settlor*

Section 685A(5) ITTOIA provides:

If the recipient of the annual payment is a settlor in relation to the settlement, if and in so far as this section applies the annual payment shall not be treated as his income for the purposes of the Income Tax Acts (and subsection (3) does not apply).

The TSE Manual provides:

**4570 Payments to the settlor** [Nov 2018]

Where you tax the settlor on the income arising to the trust, discretionary payments out of the trust to the settlor are not further taxable. [The Manual comments on the position up to 2005-06 and then continues:] For 2006-07 onwards discretionary payments made by the trustees to the settlor are taken out of charge by ITTOIA/S685A(5).

The legislation distinguishes between non-settlor beneficiaries and the settlor. Beneficiaries are given a credit but the settlor is exempt. At first sight this seems strange, but a reason will emerge.

The payment to the settlor is not a capital payment for s.87 purposes: see 57.7.4 (Chargeable to IT).

#### 44.10.4 *Life tenant (not settlor) of settlor-interested trust*

Suppose a settlor-interested trust under which a beneficiary (“B”, not the settlor) has an interest in possession. Section 624 beneficiary relief only applies to discretionary trusts. But if a trust confers an interest in possession (not on the settlor) then no relief is needed: the life tenant is not taxable as the trust income is the income of the settlor and of the settlor alone, so that B cannot be taxable on it.

If the settlor is non-resident, B is taxable on foreign income as that is not within s.624.

If the settlor is a remittance basis taxpayer, B is taxed on unremitted foreign trust income as that is not within s.624. The settlor will be taxed on the same income in a later year in which the income is remitted. Once remitted in that later year, the income will become “income arising under the settlement” and therefore income of the settlor and of the settlor alone B can then reclaim tax wrongly paid, at least if in time to do so. This may not work in practice, as a life tenant will not necessarily know when a settlor has remitted the income, but no doubt we muddle through.

## 44.11 Trustees of settlor-interested trust

### 44.11.1 Tax on trust income

If s.624 applies, the trust income is the income of the settlor “and of the settlor alone”. So one might think that the trustees are not subject to tax on the income.<sup>72</sup> However s.646(8) ITTOIA provides:

Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.<sup>73</sup>

Thus:

- (1) The trustees are subject to tax at the appropriate rate (including tax at the trust rate, if a discretionary trust).<sup>74</sup>
- (2) The settlor is *also* subject to tax (allowing a credit for tax paid by the trustees) and pays further tax or reclaims tax.

Malcolm Gunn (former editor of Taxation Magazine) described this rule as “ridiculous”,<sup>75</sup> and the reader will probably agree; but there it is. It is suggested that trustees should be liable only if the settlor fails to pay (IHT liability rules offer a precedent).

For IIP settlor-interested trusts, the trustees are similarly liable at the basic or the dividend ordinary rates. In the past that liability was usually be covered by deduction at source (or a tax credit), but that is no longer the case for UK resident trusts.

Mandating income can avoid the liability. HMRC Trusts and Estates Newsletter (December 2010) provides:

**Trusts and Estates - mandated income of settlor-interested trusts**

... Step 1 of the Trust and Estate Tax Return (SA900 page 2) does not require a full return to be made, nor income tax to be paid, where all income is mandated to an IIP beneficiary.<sup>76</sup> However, that practice does

72 For completeness: that would be supported by a comment of Lord Russell in *Perry v Astor* 19 TC 255 at p.282 considering identical wording in a predecessor provision; this was a dissenting judgement, but the majority did not disagree on that point.

73 See 14.2.1 (Receiving/entitled: Person liable).

74 This is self-evident, but if authority is needed, see *Rogge v HMRC* [2012] UKFTT 49 (TC) at [41].

75 See Gunn, “Tax Charge Doubled!” Taxation Magazine, 22 Feb 2007.

76 See 39.2.1 (Income mandated to life tenant).

not currently apply where the trust is settlor interested. Following a review of that practice, HMRC has concluded that where income is mandated to an IIP beneficiary of a settlor-interested trust there is no statutory basis for taxing the trustees as being in receipt of the income. The settlor is taxed on any income (or income from property) in which he or she has a retained interest...

HMRC will no longer require a fully completed return from trustees of settlor interested trusts in respect of income that is mandated to an IIP beneficiary.<sup>77</sup>

A discretionary trust which wishes to distribute all income to a beneficiary (typically, but not necessarily, the settlor) may consider creating a non-estate IIP and mandating the income to the life tenant,<sup>78</sup> in order to reduce the administrative costs.

#### 44.11.2 *Distribution by trustees*

There is usually a charge on trustees making an income distribution from a discretionary trust.<sup>79</sup> Section 685A(6) ITTOIA confers relief:

Sections 494 and 495 of ITA shall not apply in relation to an annual payment if and in so far as this section applies.

#### 44.12 Interaction of s.624/CGT

The general rule is that where the person making a disposal is subject to income tax on the proceeds, IT has priority over CGT, and there is no double charge.<sup>80</sup> This rule does not work where X makes a disposal but the income is treated as the income of Y; this is the case when s.624 applies, the income is treated for IT purposes as income of the settlor and not the trustees!

HMRC suggest a creative application of s.32 TMA may solve the problem. CG Manual provides:

**CG14304. Sums chargeable as income [Jun 2019]**

This exclusion does not apply to ... situations where the income in

---

<sup>77</sup> <https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters> accepting the argument in Malcolm Gunn's article.

<sup>78</sup> Or indeed to anyone else, at the direction of the life tenant.

<sup>79</sup> See 38.5 (Tier 2: Trust withholding tax).

<sup>80</sup> See s.37 TCGA, discussed at 53.3.4 (Interaction of IT/CGT).

question is not treated as the income of the person making the disposal. Typically this is a case of a settlor interested trust where the income is taxed on the settlor. If in this situation the settlor is assessable to both income tax and capital gains tax then relief may be available under s.32 TMA 1970.

Suppose a settlor-interested discretionary trust. Income accrues to the trustees. The settlor pays income tax. What stops the trustees realising a chargeable gain, on which the trustees may be chargeable if UK resident, or which may be s.1(3) amounts (trust gains) if the trust is not UK resident? This solution does not lie in s.32 TMA as it is not the case that the settlor is assessable to both IT and CGT. There is nothing obvious to stop the trustees realising a chargeable gain. But no-one suggests that there is a charge. The solution must be in a general implied rule that receipts of an income nature are not within the scope of CGT.

#### **44.13 s.624/s.720 compared**

Sections 624 ITTOIA and 720 ITA cover similar ground. For a full comparison one would need to read all the relevant sections in this book. It may be helpful to summarise the major differences:

<b>Section 624</b>	<b>Section 720</b>
Applies to trusts	Applies to non-resident trusts & companies
Requires settlement-arrangement	Requires a transfer of assets
Bounty required	Bounty not required
No motive defence	Motive defence
Settlor indemnity	No indemnity for transferor
Applies to non-resident settlor	Does not apply to non-resident transferor

The rates of tax are slightly different, a (probably accidental) result of the FA 2006.<sup>81</sup>

Section 624 has priority over s.720: see 46.21 (Interaction of s.720 /s.624).

#### **44.14 Settlor receives capital sum**

Section 633 ITTOIA provides:

---

<sup>81</sup> See 40.11 (Settlor-interested trust IT rate).

- (1) Any capital sum<sup>82</sup> paid directly or indirectly<sup>83</sup> in any tax year by the trustees of a settlement to the settlor is treated for income tax purposes as follows.
- (2) The sum is treated as the income of the settlor for the tax year so far as the amount of the sum falls within the amount of income available up to the end of the year.

#### 44.14.1 “Available income”

The key term is “available income.” Section 635 ITTOIA provides the definition:

- (1) For the purposes of section 633 the amount of income available up to the end of any tax year is, in relation to any capital sum paid as mentioned in subsection (1) of that section by the trustees of a settlement, calculated as follows.
- (2) Add together the amount of unprotected<sup>84</sup> income arising under the settlement in that year and any previous year which has not been distributed.
- (3) Deduct from that figure—
  - (a) the amount of that income taken into account under section 633 in relation to that sum in any previous year or years,
  - (b) the amount of that income taken into account under section 633 in relation to any other capital sums paid to the settlor in any year before that sum was paid,
  - (c) any income arising under the settlement in that year or any previous year which has been treated as income of the settlor under section 624 or 629 ...

Section 633 is generally irrelevant to settlor-interested trusts, because, in short:

- (1) Trust income will be treated as accruing to the settlor under s.624, or
- (2) If the income is protected income, neither s.624 nor s.633 apply, or

---

82 Section 634 ITTOIA provides an artificial definition of “capital sum” which is (more or less) the same as for the transfer of asset rules; see 46.18.2 (“Capital sum”).

83 Section 634 ITTOIA provides a wide definition of “paid to the settlor” which is the same as for s.87: see 57.8 (Receipt from trustees).

84 Section 635(4) ITTOIA provides: “In subsection (2) “unprotected income” means income which is not protected foreign-source income, and sections 628A(2) to (13) and 628B (meaning of “protected foreign-source income”) have effect also for this purpose.” See 88.10 (s.624 protected-trust relief).

- (3) If the settlor is non-resident, or if (which will be rare after 2017) the s.624 remittance basis applies, the income will not be “income arising under the settlement”.

In each case, there is no “available income”.

Section 633 is (in short) intended to catch capital sums paid to the settlor from a trust which is not settlor-interested. It is the settlement provision equivalent of the s.727 capital sum charge, which applies where a transferor does not have power to enjoy but receives a capital sum.

Accordingly I shall not discuss the section further here. Where such payments are in point, see too 46.17 (Transferor receives capital sum).

#### 44.14.2 *Sum paid by connected person*

Section 641 ITTOIA expands the scope of s.633:

- (1) This section applies if—
  - (a) a capital sum is paid to the settlor in a tax year by any body corporate connected with the settlement in that year, and
  - (b) an associated payment has been, or is, made directly or indirectly to the body by the trustees of the settlement.
- (2) The capital sum is, in accordance with this section, treated for the purposes of section 633 as having been paid to the settlor by the trustees of the settlement.

#### 44.15 **Payment to settlor’s child**

Section 619(1)(b) ITTOIA imposes the charge:

- (1) Income tax is charged on ...
  - (b) income which is treated as income of a settlor as a result of section 629 (income paid to relevant children of settlor)

I refer to income which is treated as the settlor’s income under this section as “**s.629 income**”.

So we turn to s.629 ITTOIA:

- (1) Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone for a tax year if, in that year and during the life of the settlor, it—
  - (a) is paid to, or for the benefit of, a relevant child of the settlor, or
  - (b) would otherwise be treated (apart from this section) as income

of a relevant child of the settlor...<sup>85</sup>

...

(7) In this section and sections 631 and 632—

- (a) “child” includes a stepchild,
- (b) “minor” means a person under the age of 18 years, and “minor child” is to be read accordingly,
- (c) references to payments include payments in money’s worth, and
- (d) “relevant child” means a minor child who is unmarried or not in a civil partnership.

The TSE Manual provides:

**TSEM10315 - Non-resident trusts: settlor’s chargeability: income tax - minor unmarried child** [Aug 2019]

[The Manual summarises s.629 and continues:]

Where the payment is made from income, because the provisions of ITA/S493 do not apply to non-resident trusts, there is no grossing up and no tax credit. The payment is regarded as untaxed foreign income (TSEM10255) and should be taken into account by the settlor when considering his or her liability to income tax for the year - but see TSEM10320 regarding the operation of ESC A93.

Where there is a discretionary trust, see 38.4.1 (UK resident trust); 38.11 (s.629 income: settlor’s child).

44.15.1 *Interaction of s.624/s.629*

Section 629(2) ITTOIA provides:

Subsection (1) does not apply to income which is treated as income of the settlor under section 624.

Thus the settlor-interested trust rule has priority.

44.15.2 *De minimis rule*

---

<sup>85</sup> I mention for completeness two very minor exemptions:

Section 629(5) ITTOIA provides: “Subsection (1) does not apply so far as provided by section 630 (exception for gifts to charities).” I cannot see how this could ever apply; but it does not matter.

Section 629(8) ITTOIA provides: “Subsection (1) is subject to section 28A of FA 2005 [vulnerable persons trusts].” But this rarely if ever arises.

Section 629 ITTOIA provides:

(3) Subsection (1) does not apply in relation to a child's relevant settlement income in any tax year if, in that year, the total amount of that income does not exceed £100.<sup>86</sup>

(4) In subsection (3) a child's "relevant settlement income" means income—

- (a) which is paid to or for the benefit of, or otherwise treated as income of, the child, and
- (b) which (apart from subsection (3)) would be treated as income of the settlor under subsection (1).

#### **44.16 Corporate settlor**

It is common for a company to make a settlement in the standard CGT/IT sense. These are typically commercial trusts (pension trusts or employee benefit trusts) so the trust is not a settlement in the settlement-arrangement sense, for lack of bounty.<sup>87</sup> However it is possible (albeit not usual) for a company to make a settlement in the settlement-arrangement sense.

Section 627(4) ITTOIA provides:

The rule in section 624(1) does not apply in relation to income which—

- (a) arises under a settlement, and
- (b) originates from any settlor who was not an individual.

This provision was introduced in 2012. EN FA 2012 provides:

The purpose of the amendments to the settlements legislation is to confirm that income arising under a settlement is treated as that of the settlor only where the settlor is an individual. The proposed changes would close avoidance schemes that seek to exploit the settlements legislation by using corporate settlors of 'interest in possession' settlor-interested trusts to try to avoid income tax at higher or additional rates which would otherwise be due on dividends paid by a subsidiary of the corporate settlor. The amendments would ensure that the relevant provisions do not apply to settlors who are not individuals and hence that the income would not be treated as that of the settlor in those situations.

---

86 This limit was set in 1995, see s.660B(5) ICTA 1988, so the relief, which was never very large, has died by inflation.

87 See 94.39 (Pension/employee benefit trust).

Even before 2012, the correct view was that s.624 did not apply to a corporate settlor.<sup>88</sup> It is helpful to have clarified the law, even if the reason for the change was to stop a tax avoidance scheme which did not work.

#### 44.17 Tax return: s.624 income

The trustees may inform the settlor of the s.624 income by completing form R185(Settlor) (Statement of trust income chargeable on settlor).

The settlor reports s.624 income in boxes 7-15 of form SA107 (Trusts etc) 2019/20. SA107 Notes (2019/20) provides:

##### **Income chargeable on settlors**

Use the figures in boxes 7 to 15 on your R185 (Settlor) to fill in this section. If you do not have this, ask the trustees for the details.

Do not include any foreign income in these boxes. Fill in the 'Foreign' pages instead.

#### 44.18 DT relief: s.624 income

In the case of a settlor-interested trust, there are four states potentially involved:

- (1) the state where the settlor is resident (here assumed to be the UK)
- (2) the state where the trustees are resident
- (3) the state where a beneficiary is resident
- (4) the state where the source of the income arises

There are several ways s.624 could lead to double taxation:

- (1) The settlor will be taxed if UK resident or if the trust has UK source income
- (2) The trustees may be subject to foreign tax in another state
  - (a) on income with a source in that state
  - (b) on any income if they are resident in that state
- (3) In the case of an IIP trust, the life tenant may be subject to foreign tax in another state
  - (a) on income with a source in that state
  - (b) on any income if they are resident in that state

---

<sup>88</sup> The point is now of historical interest only; but see the 10<sup>th</sup> edition of this work para 24.16 (Corporate Settlor); Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 20.2.2 (Loan by company) online version <https://www.taxationofcharities.co.uk>

#### 44.18.1 *Foreign tax credit relief*

Where trust income is subject to a foreign tax, foreign tax credit relief in principle applies for the benefit of a settlor within s.624. That follows from first principles but if authority were needed, see s.623 ITTOIA.<sup>89</sup> HMRC agree. The TSE Manual provides:

**TSEM4017 Calculation of Income - S623 ITTOIA** [Jul 2017]

ITTOIA/S623 allows the settlor ‘the same deductions and reliefs’ the settlor would have been entitled to had the settlor actually received the income. Thus reliefs which can only be set against a particular type of income, such as a credit under a DTA for foreign tax suffered by the trustees on foreign source income, is available to the settlor even though the charge on the settlor is under ITTOIA/Part 5 (‘Miscellaneous Income’). ...

I doubt if it is necessary to rely on s.623 to reach this result,<sup>90</sup> but it does not matter.

The INT Manual considers the position where a beneficiary is taxed in the UK and a settlor is taxed in some other country under a foreign equivalent of s.624:

**INTM161040. Same income** [May 2019]

The credit Article in an agreement and the corresponding provision for unilateral relief in s.9 TIOPA 2010 are concerned with relief from double taxation on income or gains. For credit to be allowed, it is not a requirement that the foreign tax on income or gains has to be borne by the same person who is liable to UK tax on the same income or gains. For example, if the foreign country taxes a settlor on the income of a UK resident beneficiary, who is chargeable to UK tax on that income, credit may be given to the beneficiary for the foreign tax paid by the settlor. However, it must be the same income which is being taxed in both countries. ...

#### 44.18.2 *Trustees treaty-resident outside UK*

This section considers whether DT exemptions are available where:

(1) Income accrues to a settlor-interested trust whose trustees are treaty-

---

<sup>89</sup> See 44.4 (Settlor deductions/reliefs).

<sup>90</sup> See 44.4 (Deductions & reliefs).

resident in a foreign state.

(2) The settlor is not treaty-resident in a foreign state.

The settlor is subject to tax under s.624. It is considered that the settlor can in principle claim third-party DT relief.

Section 619 and 624 ITTOIA must be read together:

**619(1)** Income tax is charged on ... (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) ...

**624(1)** Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone...

Section 624 imposes a deeming which changes the recipient, that is, the income which actually arises to the trustees is deemed to accrue to the settlor. The character of the income is not altered. That is, the income which is “treated as the income of the settlor” is the actual income of the trustees, and not different (notional) income.<sup>91</sup>

It follows that the settlor can in principle claim third-party DT relief provided that the income is of a type which qualifies for DT relief.

Why in fact is there a charge to tax under s.619? If the settlor is treated as receiving (say) interest income, the income would be chargeable to tax under the charging provisions relating to interest. No separate charge to tax is needed. The drafter is in my view slightly muddled as to whether the income of the settlor is the settlement income or notional income. The confusion is understandable, for the distinction between the two is metaphysical: they amount to exactly the same thing.

It might be argued that since the income is deemed to be the income of the settlor and of the settlor alone, it is deemed not to be the income of the trustees, so the deeming disappplies the DT exemption. But that construction would put the UK in breach of the treaty, so it should not be regarded as correct. In any case, in the HMRC view, s.624 is not a defence to trustees from an assessment.

#### 44.18.3 *Settlor treaty-resident outside UK*

This section considers whether DT exemptions are available where:

(1) income accrues to a settlor-interested trust whose trustees are not

---

<sup>91</sup> See 103.21 (Third-party DT relief).

treaty-resident in a foreign state (so the settlor cannot claim indirect treaty relief).

(2) The settlor is treaty-resident in a foreign state.

The settlor is in principle subject to tax under s.624. It is considered that the settlor can claim DT exemption directly.

In some cases, DT exemption only applies if the income is “beneficially owned” by the settlor. In the case of a common form settlor-interested discretionary trust, the income is not “beneficially owned” by the settlor as a matter of English property/trust law. But since for tax purposes it is deemed to be the income of the settlor, this requirement is deemed to be satisfied. OECD Commentary is helpful here:

The term “beneficial owner” is not used in a narrow technical sense (such as the meaning that it has under the trust law of many common law countries<sup>92</sup>), rather, it should be understood in its context and in light of the object and purposes of the Convention ...<sup>93</sup>

In the US/UK DTA, this is expressly dealt with: see 87.7.8 (s.624/720 income; s.3/86 gain).

#### 44.18.4 *HMRC view*

The TSE Manual provides:

**3665. Relief for overseas tax: trust income deemed not to be the beneficiary’s** [Mar 2018]

For tax purposes, income may be deemed to be that of someone other than a beneficiary. For example, the anti-avoidance provisions may treat trust income as that of the settlor. The trustees can claim tax credit relief on the income.

If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

The International Manual raises some of these questions but does not tell

---

92 Footnote original: For example, where the trustees of a discretionary trust do not distribute royalties earned during a given period, these trustees, acting in their capacity as such (or the trust, if recognised as a separate taxpayer) could constitute the beneficial owners of such income ... even if they are not the beneficial owners under the relevant trust law.

93 See 104.11 (DTA beneficial owner rule).

us what HMRC regard as the answers:

**339550 DT applications and claims: Applicants/claimants - Trusts**  
[Jun 2018]

**Claims by non-resident trustees of discretionary trusts**

You may receive a claim or application from non-resident trustees of a discretionary trust. For specific information about claims by non-resident trustees see the country specific pages. If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD.

***What to do if the settlor of a discretionary trust is not excluded from benefit under the trust***

Where the settlor of a non-resident discretionary trust is not excluded from benefit under the trust, the trust may be subject to the provisions of [s.624 ITTOIA]. In this situation the trust may be described as a 'caught settlement'. The settlor will be chargeable on the income of the trust as their own personal income, regardless of whether the income is accumulated or distributed.

Where we have a claim or application from trustees of a discretionary trust from which the settlor is not excluded from benefiting, Specialist Personal Tax, PT International Advisory will need to refer the papers to Specialist PT, Trusts & Estates for advice. They will also consider whether the settlor or the trustees need to make a UK tax return.

If the settlement is caught, a claim by the trustees will not be valid.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000) ...

#### **44.19 s.643A charge: Outline**

This section discusses the close-family charge introduced in 2018. This is one of the charges introduced by the protected-trust regime.<sup>94</sup>

In outline, where the settlor/close-family of the settlor receive a benefit from a protected trust, the recipient is subject to tax. I refer to this as the **"s.643A close-family charge"**.

Where the close-family beneficiary is non-resident (and so outside the scope of the charge) the settlor (if UK resident) is liable instead. I refer to this as the **"s.643A settlor-attribution charge"**.

This is a new charge to tax. Before 2018, where there was a foreign

---

<sup>94</sup> See 88.1 (Protected-trust regime).

domiciled settlor-interested trust, there were income tax charges on:

- (1) income distributions to UK beneficiaries
- (2) remittance of s.624 income

However it was in principle possible to provide some benefits to the settlor or close-family, without those charges. Now benefits are in principle chargeable (subject to the s.643A remittance basis).

#### 44.19.1 *Section 643A/s.731 compared*

Sections 643A ITTOIA and 731 ITA cover similar ground: they apply on the receipt of a benefit not otherwise chargeable to income tax. It may be helpful to summarise the main differences:

	<b>s.643A</b>	<b>s.731</b>
Basic requirement	settlement-arrangement	transfer of assets abroad
Applies to	protected trusts	all trusts & companies
Tax on benefit to	settlor/close family	anyone
Tax limited by ref to	available protected income	relevant income
Motive defence	no	yes

Section 731 has priority over s.643A. So the main case where s.643A applies will be benefits from protected trusts, with income at trust level (eg no underlying company), where the motive defence applies for s.731.

#### 44.20 **s.643A application conditions**

Section 643A(1) ITTOIA is easier to follow if it is split into parts, the first part setting out the conditions for the application of the rule, and the second part containing the rule.

The first part of s.643A(1) ITTOIA provides:

- [a] If an individual [settlor/close-family beneficiary]<sup>95</sup>
- [b] has an untaxed benefits total for a settlement for a tax year (see section 643B),
- [c] [i] an amount
- [ii] equal to so much of that total as does not exceed the settlement's available protected income up to the end of the

---

<sup>95</sup> Section 643A(1)[a] appears to apply to any individual. But the effect of the definition of Untaxed Benefits Total is that it only applies to an individual who is the settlor or close-family; so I gloss it as "individual [settlor/close-family beneficiary]".

year (see section 643C)  
[iii] is [s.643A income]

We can regard para [a] and [b] as a set of conditions for the s.643A charge and I refer to it as the “**s.643A application conditions**”.

The amount specified in s.643A(1)[c] is “**s.643A income**”.<sup>96</sup>

The amount of s.643A income is the lower of:

- (1) Untaxed Benefits Total
- (2) Available Protected Income

Although not the statutory usage, I write these expressions with initial capitals, to reflect the technical nature of the expression.

The definitions require:

- (1) Settlor/close-family receive a benefit
- (2) Protected s.624 income

However the benefit does not have to be provided out of the protected income, or derived from it, or matched with it.

#### **44.21 Untaxed Benefits Total**

Untaxed Benefits Total matters for two reasons:

- (1) If the UBT is nil, there is no s.643A income, because the condition in s.643A(1)[b] is not met.
- (2) The amount of s.643A income is the lower of (1) Untaxed Benefits Total and (2) Available Protected Income.

Section 643B(1) ITTOIA provides:

For the purposes of section 643A, whether an individual has an untaxed benefits total for a settlement for a tax year (“the current year”), and (if so) its amount, are determined as follows-

The subsection sets out four steps:

- 1: Identify benefit to settlor/close-family beneficiary
- 2: Value the benefit
- 3: Deductions where benefit otherwise taxed
- 4: Conclusion

The drafting and terminology is loosely based on the computation of s.731

---

<sup>96</sup> The statutory term is “deemed income”.

income, in s.733 ITA.<sup>97</sup>

#### 44.21.1 “Provided by trustees”

UBT Step 1 refers to benefits “provided by the trustees”. Benefits provided by other persons do not count. Before considering the steps, it is helpful first to set out the definition of this phrase. As one would expect, it is widely defined.

Section 643B provides two definitions: (4) defines “provided by the trustees” and (5) defines “provided by trustees to an individual”. It is easier to follow if the provisions are read side by side with differences highlighted:

#### **Provided by trustees: s.643B(4)      Provided by trustees to individual: ss(5)**

(4) In this section and sections 643C to 643M, a reference to

a benefit provided by trustees of a settlement is to-

(a) a benefit treated by subsection (6) as provided by the trustees, or

(b) any other benefit if it is provided by the trustees directly, or indirectly, out of-

(i) property comprised in the settlement, or

(ii) income arising under the settlement.

(5) [same]

a benefit provided by trustees of a settlement to an individual is to-

(a) a benefit treated by subsection (6) as provided by the trustees to the individual, or

(b) any other benefit if it is provided by the trustees to the individual directly, or indirectly, out of-

(i) [same]

(ii) [same]

s.643B(4)(5) say (more or less) the same thing twice over. It could have been more neatly expressed, but it works.

#### 44.21.2 *Provided by trustees: IIP trust*

Section 643B(6) ITTOIA provides:

---

<sup>97</sup> See 47.18 (Computation of s.731 income).

Where-

- (a) income arises under a settlement, and
- (b) the income, before being distributed, is the income of a person other than the trustees,
  - a benefit
    - [i] is for the purposes of subsection (4)(a) treated as provided by the trustees and
    - [ii] is for the purposes of subsection (5)(a) treated as provided by the trustees to the person.

The wording at (b) is drawn from s.480 ITA.<sup>98</sup> It seems a clumsy way to refer to an interest in possession trust.

Income within s.643B(6) will normally be taxable, so it will not be added to the untaxed benefits total.<sup>99</sup> But this subsection may be needed for the case where the life tenant is non-resident and the income is foreign source income, so it is not taxable.

Section 643B(7) ITTOIA provides:

A benefit treated as provided by subsection (6) is treated-

- (a) as consisting of the income mentioned in that subsection, but after any reduction in accordance with Chapter 8 of Part 9 of ITA 2007 for trustees' expenses, and
- (b) as provided at the time that income arises.

#### 44.21.3 Step 1: Identify benefits

Armed with the definition of benefits “provided by the trustees”, we can turn to UBT Step 1 in s.643B(1) ITTOIA. The rule depends on whether the benefit is provided to the settlor or to a close-family beneficiary. It is easier to follow if the two provisions are read side by side:

##### **Benefit to settlor**

If the individual [settlor/close-family beneficiary] is the settlor, identify each benefit provided by the trustees to the individual at a time-

##### **Benefit to close-family of settlor**

If the individual [settlor/close-family beneficiary] is not the settlor [identical]

<sup>98</sup> See 38.2.2 (Settlor-interested trust).

<sup>99</sup> See 44.21.5 (Step 3: Benefit liable to IT).

(a) when the individual is not relevantly [taxable] domiciled,<sup>100</sup> and

(a) when the individual is a close member of the settlor's family (see section 643H),<sup>101</sup> and

(b) in a tax year that is the current year or an earlier tax year<sup>102</sup>.

[identical to (b)]

If the settlor is relevantly-taxable domiciled the s.624 charge would usually apply. It is possible to envisage cases where the settlor will be better off if UK domiciled, but that will be rare.

It does not matter where the close-family beneficiary is domiciled.

Benefits to persons other than the settlor or close-family do not count.

#### 44.21.4 *Step 2: Value benefits*

Section 643B(1) ITTOIA provides:

##### *Step 2*

Identify the amount or value<sup>103</sup> of each benefit identified in the individual's [settlor/close-family beneficiary's] case at Step 1, and calculate the total of those amounts and values.

This is (relatively) straightforward.

100 Section 643B(2) ITTOIA provides the definition:

“For the purposes of Step 1 in subsection (1), an individual is “relevantly domiciled” at any time if at that time-

(a) the individual is [actually] domiciled in the UK, or

(b) the individual is regarded for the purposes of section 809(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect because of Condition A in that section being met [formerly domiciled resident].”

The wording also used in the equivalent ToA rule; for discussion, see 47.15.1 (“Relevantly domiciled”). I refer to this as “**relevantly-taxable domiciled**”.

101 See 57.27 (“Close Family”).

102 Pre-2018/19 years are ignored: see 44.26 (s.643A commencement).

103 Section 643B(3) ITTOIA incorporates the ToA statutory valuation rules:

“Sections 742C to 742E of ITA 2007 (value of certain benefits) apply for the purpose of calculating the value of a benefit for the purposes of this section as they apply for the purpose of calculating an income tax charge under Chapter 2 of Part 13 of ITA 2007.”

See 47.9 (Statutory valuation rules).

#### 44.21.5 Step 3: Benefit liable to IT

Section 643B(1) ITTOIA provides four deductions to avoid double taxation:

##### *Step 3*

Take the total calculated at Step 2 and deduct from it the following-

- (a) any part of it on which the individual [settlor/close-family beneficiary] is liable to income tax<sup>104</sup> otherwise than under section 643A,
- (b) any income treated by
  - [i] section 643A or
  - [ii] [section] 643J<sup>105</sup> or
  - [iii] [section] 643L<sup>106</sup>as arising, to a person for a tax year earlier than the current year, by reference to any of the benefits identified in the individual's [settlor/close-family beneficiary's] case at Step 1,
- (c) where the whole or part of a benefit identified in the individual's [settlor/close-family beneficiary's] case at Step 1 is taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 [ToA s.731], the amount or value of so much of the benefit as is taken into account in doing that

Section 731, if applicable, has priority over s.643A.

- (d) any amount required to be deducted by section 643D(2) (gains treated as accruing in a year before the current year).

#### 44.21.6 Benefit taxed under s.87

UBT Step 3(d) takes us on to s.643D ITTOIA, which provides:

(1) Subsection (2) applies if-

- (a) in the case of a settlement, benefits provided to an individual [settlor/close-family beneficiary] as mentioned at Step 1 in section 643B(1) are received in a tax year, and
- (b) chargeable gains<sup>107</sup> are treated by

---

104 See App 2.4 (Chargeable/liable to tax),

105 See 44.33 (s.643A onward-gift donee charge).

106 See 44.35 (S.643A onward-gift settlor-attribution rule).

107 Section 643D(3) ITTOIA extends the deduction to offshore income gains: "References in this section to chargeable gains treated as accruing to an individual

- [i] section 87,
  - [ii] 87K, [Onward-gift CGT rule]
  - [iii] 87L [Onward-gift to close-family] or
  - [iv] 89(2) [s.87 charge for immigrating trusts] of,
  - [v] or paragraph 8 of Schedule 4C [sch 4C charge] to,
- TCGA 1992 as accruing to a person in that or a subsequent tax year by reference (direct or indirect) to the whole or part of any benefits so provided.

(2) In the calculation under section 643B of the individual's [settlor/close-family beneficiary's] untaxed benefits total for the settlement for any tax year after the one in which such chargeable gains are so treated, the amounts to be deducted at Step 3(d) of that calculation include the amount of those gains.

This arises if:

- (1) A close-family beneficiary receive a benefit which:
  - (a) is not taxed under s.643A because there is no Available Protected Income
  - (b) is taxed under s.87, as it is matched with trust gains
- (2) Available Protected Income arises later

In these circumstances, sensibly, the s.87 charge has priority over s.643A. This is an approximate equivalent of s.734 ITA.<sup>108</sup>

#### 44.21.7 *Result: Untaxed Benefits Total*

Section 643B(1) ITTOIA provides:

*Step 4:*

If the result of the calculation at Step 3 is an amount greater than nil, that amount is the individual [settlor/close-family beneficiary]'s untaxed benefits total for the settlement for the current year.

### 44.22 Available Protected Income

---

include offshore gains treated as arising to the individual (see regulations 20 and 22 to 24 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001)).”

For completeness, para 22 sch 10 FA 2018 provides: “The new section 643D(3) of ITTOIA 2005 is to be treated as inserted by the Treasury under the powers to make regulations conferred by section 354 of TIOPA 2010.” I think the point of that is that the provision could be repealed or amended by regulations, without an Act of Parliament.

<sup>108</sup> See 47.19 (Deduction for s.87 charge).

Available Protected Income matters because the amount of s.643A income is the lower of (1) Untaxed Benefits Total and (2) Available Protected Income. If there is no API, there is no s.643A income.

Section 643C(1) ITTOIA provides:

For the purposes of the application of section 643A(1) in the case of an individual [settlor/close-family beneficiary] and a settlement, the settlement has available protected income up to the end of a tax year if-

$$\text{PFSI} - \text{TOAA} > \text{TI}$$

and, if the settlement has available protected income up to the end of a tax year, its amount is given by-

$$\text{PFSI} - \text{TOAA} - \text{TI}$$

That is clumsy drafting, but it works.

In short:

<i>Term</i>	<i>Stands for</i>
PFSI	<b>Protected Foreign-Source Income</b>
TOAA	<b>Transfer Of Assets Abroad Amount</b>
TI	<b>Taxable Income</b>

#### 44.22.1 PFSI

Note that the term PFSI does not have the same meaning as the term “protected foreign-source income” (which itself has 3 distinct definitions).<sup>109</sup> This is bad drafting; but it is best to adopt the statutory terminology as anything else is even more confusing.

There are two types of PFSI, which I call “**s.624 PFSI**” and “**s.629 PFSI**”. They are easier to follow if set out side by side. PFSI is the total of-

**s.624 PFSI: s.643C(2)(a)**

(a) any protected foreign-source income<sup>110</sup> -

**s.629 PFSI: s.643C(2)(b)**

(b) [identical]

109 See 88.8 (“Protected income: Terminology”).

110 In my terminology, this is protected s.624 income; s.643C(3) ITTOIA provides the definition by reference: “protected foreign-source income” has the meaning given by sections 628A(2) to (13) and 628B. See 88.9 (Protected s.624 income).

(i) arising under the settlement in the year or in any earlier tax year, <sup>111</sup>	(i) [identical]
(ii) that would be treated under section 624 as income of the settlor but for section 628A [s.624 protected-trust relief], <sup>112</sup>	(ii) that would be treated under section 629 as income of the settlor but for section 630A, [s.629 protected-trust relief] <sup>113</sup> and
(iii) that can be used directly or indirectly to provide benefits for the individual, <sup>114</sup> and	[no equivalent]
(iv) on which the individual is not liable to income tax (ignoring for this purpose any liability under section 643A)	(iii) on which the relevant child concerned (see section 629) is not liable to income tax (ignoring for this purpose any liability under section 643A)

Section 643C(3) ITTOIA disapplies the artificial remittance basis timing rule.<sup>115</sup>

If the settlor is non-resident, there is no PFSI.

It may be possible to avoid API by distributing trust income. That may be advantageous if the beneficiary receives benefits in the UK, but the trust income is (un)taxed under the remittance basis.

#### 44.22.2 TOAA

TOAA (ToA amount) is deductible in computing Available Protected Income.

Section 643C(2) ITTOIA provides:

---

111 Pre-2018/19 years are ignored: see 44.26 (s.643A commencement).

112 See 88.10 (s.624 protected-trust relief).

113 See 88.11 (s.629 protected-trust relief (child of settlor)).

114 The wording is derived from the definition of relevant income; see 47.20 (“Relevant income”: Definition).

115 Section 643C(3) provides: “As regards the definition of PFSI in subsection (2)-  
 (a) section 648(3) to (5) (relevant foreign income treated as arising under settlement only if and when remitted) do not apply for the purposes of that definition,  
 (b) that definition has effect as if section 648(3) to (5) do not apply for the purposes of sections 624 and 629.”

See 44.8.4 (Remittance basis timing rule).

In this section ...

TOAA is so much of PFSI as is, in respect of benefits provided by the trustees in the year or in an earlier tax year<sup>116</sup>, taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) for the year or any earlier tax year

### 44.22.3 TI

TI (taxable income) is deductible in computing Available Protected Income.

Section 643C(2) ITTOIA provides:

In this section ...

TI is the total of-

- (a) so much of PFSI as is, by reference to benefits provided by the trustees to the individual [settlor/close-family beneficiary], are treated by
  - [i] section 643A or
  - [ii] [section] 643J<sup>117</sup> or
  - [iii] [section] 643L<sup>118</sup>as income for any earlier tax year<sup>119</sup>, and
- (b) so much of PFSI as is, by reference to benefits provided by the trustees to other individuals [settlor/close-family beneficiary], are treated by
  - [i] section 643A or
  - [ii] [section] 643J<sup>120</sup>
  - [iii] [section] 643L<sup>121</sup>as income for the year or any earlier tax year<sup>122</sup>.

### 44.23 s.643A income charge

Assuming the s.643A application conditions are met,<sup>123</sup> we can move on to consider the charge on s.643A income.

---

116 Pre-2018/19 years are taken into account: see 44.26 (s.643A commencement).

117 See 44.33 (s.643A onward-gift donee charge).

118 See 44.35 (S.643A onward-gift settlor-attribution rule).

119 Pre-2018/19 years are ignored: see 44.26 (s.643A commencement).

120 See 44.33 (s.643A onward-gift donee charge).

121 See 44.35 (S.643A onward-gift settlor-attribution rule).

122 Pre-2018/19 years are ignored: see 44.26 (s.643A commencement).

123 See 44.20 (s.643A application conditions).

Section 643A(1) ITTOIA provides:

...<sup>124</sup>

[s.643A income] is

- (a) where the individual is UK resident for the year, treated for income tax purposes as income of the individual [settlor/close-family beneficiary] for the year, subject to subsections (2) to (5).
- (b) where the individual is non-UK resident for the year, treated for the purposes of
  - [i] subsection (2) and
  - [ii] sections 643I to 643L
  - [iii] (but no other purpose)
 as income of the individual for the year,
  - [c] subject to subsection (5).

Thus there are two types of s.643A income. I coin the following terminology:

- (1) **UK resident's s.643A income:** s.643A income accruing to a UK resident. This is **chargeable s.643A income** under para (a)
- (2) **Non resident's s.643A income:** s.643A income accruing to a non-UK resident. This is **non-chargeable s.643A income**

Section 643A(7) ITTOIA provides:

If-

- (a) an enactment other than this section contains a reference (however expressed) to-
    - (i) income treated as arising by this section, or
    - (ii) an amount treated as income by this section, and
  - (b) the reference mentions this section without mentioning any particular provision of this section,
- the reference is (in accordance with subsection (1)(b)) to be read as not including amounts treated as income by subsection (1)(b) [non-chargeable s.643A income] except so far as they are treated as income of the settlor of a settlement by subsection (3) or (4).

#### 44.23.1 *No double charge*

---

124 The omitted words contain the s.643A application conditions: see 44.20 (s.643A application conditions).

Section 643A(5) ITTOIA provides:

If there is a choice about the individuals in whose case income is to be treated as arising by subsection (1) (before the application of subsections (3) and (4))-

- (a) income is to be treated as arising to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and
- (b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

The wording is based on ToA double-counting relief.<sup>125</sup>

#### 44.24 s.643A remittance basis

Section 643F applies the remittance basis for:

- (1) Close-family beneficiaries taxed under s.643A(1); and
- (2) the settlor taxed under the s.643A settlor-attribution rule<sup>126</sup>

Section 643F(1) ITTOIA provides:

This section applies where-

- (a) in the case of a settlement, income (“the deemed [s.643A] income”) is treated by section 643A as arising to an individual for a tax year, and
- (b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

Assuming these conditions are satisfied, we read on. Section 643F(2) ITTOIA provides:

The deemed [s.643A] income is treated as relevant foreign income of the individual.

The significance is that this incorporates the remittance basis.

Section 643F(3) ITTOIA provides:

In the application of section 832 to the deemed [s.643A] income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) s.643A income is

---

125 See 48.4 (Double-counting relief).

126 See 44.27 (s.643A settlor-attribution rule: Outline).

taxable if it is remitted during the overseas part of a split year.<sup>127</sup> There is no good reason for this, but it is consistent with the s.731 rule.<sup>128</sup>

Section 643F(4) ITTOIA provides:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) treat

[a] a benefit, or

[b] any protected income,<sup>129</sup>

that relates<sup>130</sup> to any part of the deemed [s.643A] income as deriving from that part of the deemed income.

This wording is drawn from s.735 ITA: for a discussion, see 47.39.1 (S.731 remittances: Operation).

#### **44.25 s.643A income matching rule**

Section 643F(5) ITTOIA provides:

In subsection (4) “relates” has the meaning given by section 643G.

Se we move on to s.643G(2) ITTOIA. This begins:

For the purposes of section 643F(4) ...

But s.643G(2) is applied by reference in all circumstances where it is necessary to match (relate) s.643A income and benefits. This is achieved by a clumsy formula, referring to s.643A income which:

would, if section 643G applied also for this purpose, be matched under that section with the benefit

127 See 16.13.1 (Remittance in split year).

128 See 47.47 (s.731 settlor-attribution remittance-basis).

129 Section 643F(6) ITTOIA provides: “In this section and section 643G- “protected income” means the income that forms PFSI in the calculation of the settlement’s available protected income in the case of the relevant individual for the year, and

“the relevant individual”-

(a) where the deemed income is treated as income of an individual by section 643A(1)(a) both before and after the application of section 643A(3) and (4) [settlor-attribution], means that individual, and

(b) where the deemed income is treated as income of the settlor by section 643A(3) or (4) [settlor-attribution] after having been treated as income of another individual by section 643A(1), means that other individual.”

130 See 44.25 (s.643A income matching rule).

The wording of the s.643A matching rule is based on s.735A ITA, the s.731 matching rule. I abbreviate the discussion here, for a more detailed discussion, see 47.40 (s.731 matching rules).

Section 643G(2) ITTOIA provides:

For the purposes of section 643F(4)–

*Place benefits in date order*

- (a) place the benefits identified at Step<sup>131</sup> 1 in the order in which they were received by the individual (starting with the earliest benefit received),

*Deductions from benefits*

- (b) where a deduction is allowed by any of paragraphs (a), (c) and (d) of Step 3<sup>132</sup> by reference to the whole or part of any of those benefits, reduce the benefit by the amount of the deduction,

*Place protected income in order*

- (c) place the protected income in the order in which it arose (starting with the earliest income to arise),

*Deduction from protected income*

- (d) where the whole or part of an item of the protected income is, in respect of benefits provided by the trustees in the year or in any earlier tax year, taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) for the year or any earlier tax year, reduce the item by so much of itself as is so taken into account,
- (e) where the whole or part of an item of the protected income is, by reference to benefits provided by the trustees to individuals other than the relevant individual, treated by section 643A or

---

131 Section 643G(1) ITTOIA provides: “In this section - (a) references to a step are to a step under section 643B(1) as it applies in the case of a year and the relevant individual...”. See 44.21.3 (Step 1: Identify benefits).

(b) “protected income” and “the relevant individual” have the meaning given by section 643F(6), and

(c) “the settlement” and “the year” mean, respectively, the settlement and tax year mentioned in section 643F.

132 See 44.21.5 (Step 3: Benefit liable to IT).

643J<sup>133</sup> or 643L<sup>134</sup> as income for the year or any earlier tax year, reduce the item by so much of itself as is so treated,

*s.643A income in date order*

- (f) place the income treated by section 643A(1) (before the application of section 643A(3) and (4)) as arising to the relevant individual in respect of the benefits referred to in paragraph (a) in the order in which it is treated as arising (starting with the earliest income treated as having arisen), and

*The matching rule*

- (g) treat the income mentioned in paragraph (f) as related to—  
 (i) the benefits referred to in paragraph (a), and  
 (ii) the protected income,  
 by matching the income mentioned in paragraph (f) with those benefits and the protected income (in the orders mentioned in paragraphs (a), (c) and (f)).

44.25.1 *s.643A/s.731 matching compared*

It may be helpful to set the two rules side by side:

**s.643G(2) ITTOIA**

For the purposes of section 643F(4)—

- (a) place the benefits identified at Step 1 in the order in which they were received by the relevant individual (starting with the earliest benefit received),  
 (b) where a deduction is allowed by any of paragraphs (a), (c) and (d) of Step 3 by reference to the whole or part of any of those benefits, reduce the benefit by the amount of the deduction,  
 (c) place the protected income in the order in which it arose (starting with the earliest income to arise),

**735A(1) ITA**

For the purposes of section 735—

- (a) place the benefits mentioned in Step 1 in the order in which they were received by the individual (starting with the earliest benefit received),  
 (b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains,  
 (c) place the income mentioned in Step 3 for the tax years mentioned in Step 4 (“the relevant income”) in the order determined under subsection (3),

133 See 44.33 (s.643A onward-gift donee charge).

134 See 44.35 (S.643A onward-gift settlor-attribution rule).

(d) where the whole or part of an item of the protected income is, in respect of benefits provided by the trustees in the year or in any earlier tax year, taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) for the year or any earlier tax year, reduce the item by so much of itself as is so taken into account,

(e) where the whole or part of an item of the protected income is, by reference to benefits provided by the trustees to individuals other than the relevant individual, treated by section 643A or 643J or 643L as income for the year or any earlier tax year, reduce the item by so much of itself as is so treated,

(f) place the income treated by section 643A(1) (before the application of section 643A(3) and (4)) as arising to the relevant individual in respect of the benefits referred to in paragraph (a) in the order in which it is treated as arising (starting with the earliest income treated as having arisen), and

(g) treat the income mentioned in paragraph (f) as related to—  
(i) the benefits referred to in paragraph (a), and  
(ii) the protected income,

by matching the income mentioned in paragraph (f) with those benefits and the protected income (in the orders mentioned in paragraphs (a), (c) and (f)).

(d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),

(e) place the income treated under section 732(2) as arising to the individual in respect of the benefits in the order in which it is treated as arising (starting with the earliest income treated as having arisen), and

(f) treat the income mentioned in paragraph (e) as related to—  
(i) the benefits, and  
(ii) the relevant income,

by matching that income with the benefits and the relevant income (in the orders mentioned in paragraphs (a), (c) and (e)).

Section 643G(3) ITTOIA provides:

For the purposes of subsection (2)(d), the whole or part of an item of the protected income is to be treated as taken into account in respect of a benefit so far as the item or part-

- (a) is matched under section 735A of ITA 2007<sup>135</sup> with notional income with which the benefit is matched under that section, or
- (b) would be matched under that section (if it applied also for this purpose) with notional income with which the benefit would be matched under that section (if it applied also for this purpose), and here "notional income" means income which is treated as arising under section 732 of ITA 2007

#### **44.26 s.643A commencement**

Para 21 sch 10 FA 2018 provides:

- (1) Subject as follows, the amendments made by paragraphs 3 to 19 have effect for the tax year 2018-19 and subsequent tax years.
- (2) [a] None of the references to an earlier tax year
  - [i] in Step 1 of the new section 643B(1) of ITTOIA 2005, or
  - [ii] in new section 643C(2) of ITTOIA 2005, includes any tax year earlier than the tax year 2018-19
- [b] except that, in the phrase "benefits provided by the trustees in the year or in an earlier tax year" in the definition of "TOAA" in new section 643C(2) of ITTOIA 2005, the reference to an earlier tax year does include tax years earlier than the tax year 2018-19.

#### **44.27 s.643A settlor-attribution rule: Outline**

Section 643A(2)(3) ITTOIA introduces what I call the "**s.643A settlor-attribution rule**". This is one of a set of three rules which I call s.731/s.643A/s.87 settlor-attribution rules; see 47.5.11 (Settlor-attribution rules: Introduction).

In outline, this rule applies where:

- (1) A close-family beneficiary receives a benefit
- (2) The close-family beneficiary is outside the s.643A charge (non-resident or remittance-basis exempt)
- (3) The settlor is UK resident (and so potentially chargeable)

The charge is on the lower of the value of the benefit and the amount of protected income.

It will be rare (though not unknown) for the s.643A settlor-attribution rule to apply, as it requires:

---

<sup>135</sup> Section 735A is the s.731 matching rule: see 47.40 (s.731 matching rules).

- (1) Benefit to a close-family beneficiary who is non-resident or a remittance basis taxpayer (and so not directly charged)
- (2) A settlor of a protected trust who is UK resident and not remittance basis exempt

A benefit to the settlor is not caught by the s.643A settlor-attribution rule, but it will usually be within s.643A under general principles.<sup>136</sup>

#### 44.28 s.643A attribution conditions

Section 643A(2) ITTOIA provides:

Subsections (3) and (4) apply if-

A set of 6 conditions then follow, which I call “**s.643A attribution conditions**”.

##### 44.28.1 *Cond. (a): s.643A income*

Section 643A(2) ITTOIA provides:

Subsections (3) and (4) apply if-

- (a) [i] an amount (“the [s.643A] deemed income”) is treated by subsection (1),
- [ii] before the application of subsections (3) and (4) [s.643A settlor-attribution rule],
- [iii] as income of an [close-family]<sup>137</sup> individual for a tax year

##### 44.28.2 *Cond. (b): not settlor*

Section 643A(2) ITTOIA provides:

Subsections (3) and (4) apply if...

- (b) the [close-family] individual is not the settlor

##### 44.28.3 *Cond. (c): close-family non-resident/rem. basis user*

Section 643A(2) ITTOIA provides:

Subsections (3) and (4) apply if ...

- (c) either-

---

<sup>136</sup> See 47.15 (Taxable-transferor defence).

<sup>137</sup> Section 643A(2)(a)[iii] appears to apply to any individual. But the individual must be close-family of the settlor, in order to receive s.643A income; see 44.20 (s.643A application conditions). So I gloss it as “[close-family] individual”.

- (i) the [close-family] individual is non-UK resident for the year, or
- (ii) the [close-family] individual is UK resident for the year and one of sections 809B, 809D and 809E of ITA 2007 (remittance basis) applies to the [close-family] individual for the year

44.28.4 *Cond. (d): Settlor UK resident*

Section 643A(2) ITTOIA provides:

Subsections (3) and (4) apply if ...

- (d) the settlor is UK resident for the year

44.28.5 *Cond. (e)(f): Non-dom Settlor*

Section 643A(2) ITTOIA provides:

Subsections (3) and (4) apply if ...

- (e) there is no time in the year when the settlor is domiciled in the UK, and
- (f) there is no time in the year when the settlor is regarded for the purposes of section 809B(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect because of Condition A in that section being met [formerly domiciled resident<sup>138</sup>].

44.28.6 *Settlor-attribution: Commencement*

Para 21(1) sch 10 FA 2018 provides:

Subject as follows, the amendments made by paragraphs 3 to 19 have effect for the tax year 2018-19 and subsequent tax years.

44.28.7 *IT attribution rules compared*

<b>643A(1)</b>	<b>733A(1)</b>	<b>s.643A condition</b>	<b>s.731 condition</b>
a	a	s.643A income	s.731 income
	b		match with protected income
b		not settlor	
	c		Non-resident trust
c		Close-family recipient is non-resident/rem. basis user	-

---

138 See 4.4.1 (Condition A: formerly dom).

d	d	Settlor UK resident	<i>same</i>
e+f	e+f	Settlor domicile	<i>same</i>

#### 44.29 s.643A settlor-attribution rule

Assuming the s.643A application conditions are satisfied, we move on to the rule.

Section 643A(3)(4) ITTOIA deal with 2 situations:

- (1) The close-family beneficiary may be fully exempt because they are non-resident, or because they are a remittance basis taxpayer and none of the income is remitted.
- (2) The close-family beneficiary may be partly exempt because they are a remittance basis taxpayer and only part of the income is remitted.

It is easier to follow if the provisions are read side by side:

##### **Beneficiary wholly exempt**

- (3) If the case is one-
- (a) where the condition in subsection (2)(c)(i) is met [beneficiary non-resident], or
  - (b) where [i] the condition in subsection (2)(c)(ii) is met [beneficiary remittance basis taxpayer] and

[ii] none of the deemed [s.643A] income is remitted to the UK in the year,

the deemed income is to be treated for income tax as income of the settlor for the year and, in a case within paragraph (b), not as income of the individual for the year

##### **Beneficiary partly exempt**

- (4) If the case is one-

(a) [identical]

(b) part only of the deemed [s.643A] income is remitted to the UK in the year,

the remainder of the deemed income is to be treated for income tax purposes not as income of the individual for the year but as income of the settlor for the year.

This is the equivalent of s.733A(3)(4) ITA.<sup>139</sup>

The remittance basis can apply: see 44.24 (s.643A remittance basis). Statute frequently refers to an amount:

---

139 See 47.44 (s.731 settlor-attribution rule).

treated by section 643A(1), before/after the application of section 643A(3) and (4), as income of an individual

For clarity, I gloss that as [attribution to settlor].

#### 44.30 s.643A onward-gift rule

Section 643I(1)(a) ITTOIA introduces what I call the “**s.643A onward-gift rule**”.

This is one of a set of three rules which I call s.643A/s.731/s.87 onward-gift rules; see 57.30 (Onward-gifts: Introduction).

It is helpful to review some (relatively commonsense) definitions. Three of these are (more or less) the same as the s.87 onward-gift definitions:

	<b>s.643A</b>	<b>s.87</b>
<b>Term</b>	<b>see para</b>	<b>see para</b>
Gift year	44.30.1 (s.643A “gift year”)	57.32.3 (“Gift year”)
Matching year	44.30.2 (s.643A “matching year”)	57.32.2 (“Matching year”)
Charging year	44.30.3 (s.643A “charging year”)	-

##### 44.30.1 s.643A “gift year”

Section 643I(7) ITTOIA defines gift year:

In this section (and sections 643J to 643L)—  
“the gift year” means the tax year in which the onward payment is made (but see subsection (4))

##### 44.30.2 s.643A “matching year”

Section 643I(1)(a) ITTOIA defines matching year:

If ... an amount is treated by section 643A(1),  
before the application of section 643A(3) and (4) [settlor-attribution rule], as income of an individual ... for a tax year (“the matching year”),

##### 44.30.3 s.643A “charging year”

Section 643I(7) ITTOIA defines charging year:

In this section (and sections 643J to 643L)—  
“the charging year” means the gift year or, if later, the matching year,

#### 44.31 s.643A onward-gift conditions

Section 643I(1) ITTOIA provides:

Sections 643J to 643L apply if-

A set of 8 conditions then follow, which I call “**s.643A onward-gift conditions**”.

44.31.1 *Cond. (a): s.643A income*

Section 643I(1) ITTOIA provides condition (a):

Sections 643J to 643L apply if-

- (a) in the case of a settlement, an amount—
  - (i) [a] is treated by section 643A(1)(a)[s.643A charge<sup>140</sup>],
    - [b] both before and after the application of section 643A(3) and (4)<sup>141</sup> [settlor-attribution rule],
    - [c] as income of an individual (“the original beneficiary”) for a tax year (“the matching year”), or
  - (ii) [a] having been treated by section 643A(1) [s.643A charge] before the application of section 643A(3) and (4) [settlor-attribution rule] as income of an individual (“the original beneficiary”) for a tax year (“the matching year”),
    - [b] is treated by section 643A(3) or (4) [settlor-attribution rule] as income of the settlor for the matching year, or
  - (iii)[a] is treated by section 643A(1)(b) [non-chargeable s.643A income of non-resident]<sup>142</sup>, before the application of section 643A(3) and (4) [settlor-attribution rule], as income of an individual (“the original beneficiary”) for a tax year (“the matching year”)
    - [b] but is not treated by section 643A(3), and is not treated by section 643A(4), as income of the settlor for the matching year

This is a model of how to create obscurity by excessive statutory cross referencing. Some readers may use stronger language. It is easier to follow if set out in a table:

Sections 643J to 643L apply if-

---

140 See 44.23 (s.643A income charge).

141 See 44.35 (S.643A onward-gift settlor-attribution rule).

142 See 44.23 (s.643A income charge).

(a) in the case of a settlement, an amount—

**Para (i)**

is treated by section 643A(1)(a)[s.643A charge<sup>143</sup>],

both before and after the application of section 643A(3) and (4)<sup>145</sup> [settlor-attribution rule],

as income of an individual (“the original beneficiary”) for a tax year (“the matching year”), or

**Para (ii)**

having been treated by section 643A(1) [s.643A charge]

before the application of section 643A(3) and (4) [settlor-attribution rule]

as income of an individual (“the original beneficiary”) for a tax year (“the matching year”),

is treated by section 643A(3) or (4) [settlor-attribution rule] as income of the settlor for the matching year, or

**Para (iii)**

is treated by section 643A(1)(b) [non-chargeable s.643A income of non-resident]<sup>144</sup>,

before the application of section 643A(3) and (4) [settlor-attribution rule],

as income of an individual (“the original beneficiary”) for a tax year (“the matching year”)

but is not treated by section 643A(3), and is not treated by section 643A(4), as income of the settlor for the matching year

This limits the scope of the s.643A onward-gift rule. There must be a gift from close family to close-family. I wonder if the drafter really intended that.

The s.643A onward-gift rules refer to this section extensively. For clarity, I gloss the cross references thus:

**Statutory expression**

the amount mentioned in subsection (1)(a)  
a case within ss.(1)(a)(i)  
a case within ss.(1)(a)(ii)

**Term in this book**

s.643A income  
directly-received s.643A income  
settlor-attributed s.643A income

#### 44.31.2 *Cond. (b): Match with benefit*

Section 643I(1) ITTOIA provides condition (b):

Sections 643J to 643L apply if ...

143 See 44.23 (s.643A income charge).

144 See 44.23 (s.643A income charge).

145 See 44.35 (S.643A onward-gift settlor-attribution rule).

- (b) [i] under section 643G (if it applied also for this purpose)<sup>146</sup>
- [ii] the amount [s.643A income] would be matched with
- [iii] a benefit provided in the matching year, or an earlier tax year, to the original beneficiary [donor]

s.643A onward-gift conditions (a)(b) are the rough equivalent of s.87 onward-gift condition (a)<sup>147</sup> but with the important difference that:

- (1) CGT condition (a) applies to all payments from non-resident trusts
- (2) s.643A condition (a)(b) requires:
  - (a) Close-family s.643A income (which requires a benefit to settlor/close-family beneficiary) and
  - (b) the close-family s.643A income is matched with a benefit received by the donor

Section 643I(3) ITTOIA provides:

The amount mentioned in subsection (1)(a) [s.643A income] need not be—

- (a) the whole amount that in the case of the settlement is treated by section 643A(1), before the application of section 643A(3) and (4)<sup>148</sup> [settlor-attribution rule], as income of the original beneficiary [donor] for the matching year;
- (b) the whole amount that would be matched with the benefit mentioned in subsection (1)(b).

#### 44.31.3 *Cond. (c): Intention to give*

Section 643I(1) ITTOIA provides:

Sections 643J to 643L apply if ...

- (c) at the time the benefit is provided to the original beneficiary [donor]-
  - (i) there are arrangements<sup>149</sup>, or there is an intention, as regards the (direct or indirect) passing-on of the whole, or part, of the benefit to another person, and

---

146 Section 643G is the s.643A income matching rule: see 44.25 (s.643A income matching rule).

147 See 57.31.1 (Cond. (a): Payment to donor).

148 See 44.29 (s.643A settlor-attribution rule).

149 Section 643I(7) ITTOIA provides the standard (unnecessary) definition; see App 2.2.3 (Definitions of “arrangement”).

- (ii) it is reasonable to expect that, in the event of the whole or part of the benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them,

This is effectively identical to s.87 onward-gift condition (c).<sup>150</sup>

#### 44.31.4 *Cond. (d): Gift & time limit*

Section 643I(1) ITTOIA provides:

Sections 643J to 643L apply if ...

- (d) the original beneficiary [donor] makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient") [donee]-
  - (i) [A] at the time the benefit is provided to the original beneficiary [donor],
    - [B] or at any later time in the 3 years beginning with the day containing the start time, or
  - (ii) at any time before the benefit is provided to the original beneficiary [donor] and, it is reasonable to assume, in anticipation of the benefit being provided,

Statute frequently refers to an onward payment (gift) “made as mentioned in subsection (1)(d)(ii)”. I refer to such a gift as a “**pre-benefit gift**”.

This is effectively identical to s.87 onward-gift condition (c).<sup>151</sup>

#### 44.31.5 *Cond. (d): “Start time”*

In outline, there are 3 possible start times:

<i>Para</i>	<i>Circumstances</i>	<i>Start time</i>
(5)(a)(i)	Normal	When benefit provided to donor
(5)(a)(ii)	Indirect gift to settlor/close family	When original benefit provided
(5)(b)	s.643A onward-gift rule	First occasion

Section 643I ITTOIA provides

- (5) For the purposes of subsection (1)(d)(i)—

<sup>150</sup> See 47.49.4 (Cond (c): Intention to give).

<sup>151</sup> 57.31.3 (Condition (c): Gift & time limit). Section 733B(13) provides the standard wide definition of making a gift, the same as s.87G(15) TCGA.

- (a) if the amount mentioned in subsection (1)(a) [s.643A income] is not one that is treated as arising by section 643K,<sup>152</sup> “the start time”—
  - (i) is the time the benefit mentioned in subsection (1)(b) is provided to the original beneficiary [donor], or
  - (ii) where that benefit is one that section 643M(3)<sup>153</sup> treats as provided, is the time the original benefit in that case (see section 643M(1)(a)) is provided, and
- (b) if the amount mentioned in subsection (1)(a) [s.643A income] is one that is treated as arising by section 643K in connection with the operation of this section and section 643K on a previous occasion, “the start time” is the time given by this subsection as the start time on that occasion.

#### 44.31.6 *Cond. (e): Gift from benefit*

Section 643I(1) ITTOIA provides:

Sections 643J to 643L apply if ...

- (e) the gift is of or includes-
  - (i) the whole or part of the benefit,
  - (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of the benefit, or
  - (iii) any other property, but only if the benefit is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee],

This is effectively identical to s.87 onward-gift condition (d).<sup>154</sup>

The s.643A onward-gift rules frequently refer to this provision with the formula:

so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e)

For clarity, I gloss that as [gifted benefit].

#### 44.31.7 *“Relevantly remitted”*

---

152 See 44.33 (s.643A onward-gift donee charge).

153 See 44.36 (Indirect gift to settlor/close family).

154 See 44.31.6 (Cond. (e): Gift from benefit).

Conditions (f)(g) use the term “relevantly remitted”. Section 643I(7) ITTOIA provides:

In this section (and sections 643J to 643L)—

- [a] “relevantly remitted” means remitted to the UK in a tax year for which the original beneficiary [donor] is UK resident
- [b] but, in a case within subsection (1)(a)(ii) [settlor-attributed s.643A income], means remitted to the UK in a tax year for which the settlor is UK resident.

The point is that income which is relevantly remitted is taxable on the remittance. (A remittance by a non-resident is not taxable.<sup>155</sup>) “Taxably remitted” would be a more transparent term. I refer to it as “**relevantly/taxably remitted**”.

#### 44.31.8 *Cond. (f)/(g): Non-chargeable s.643A income*

Section 643I(1) ITTOIA provides:

Sections 643J to 643L apply if ...

It is easier to follow if conditions (f) and (g) are read side by side:

<b>(f): Directly received s.643A income</b>	<b>(g) Settlor-attributed s.643A income</b>
---	---

in a case within paragraph (a)(i)  
[directly-received s.643A income],  
either—

in a case within paragraph (a)(ii)  
[settlor-attributed s.643A  
income],

(i) the original beneficiary [donor]  
is non-UK resident for the matching  
year, or

(ii)[A] section 809B, 809D or 809E  
of ITA 2007 (remittance basis)  
applies to the original beneficiary  
[donor] for the matching year and

[A] section 809B, 809D or 809E  
of ITA 2007 (remittance basis)  
applies to the settlor for the  
matching year and

---

155 See 16.18 (Remittance when non-resident).

[B] none of the amount [s.643A [B] [identical] income] is relevantly [taxably] remitted in the matching year or in any tax year later than the matching year but not later than the tax year in which the onward payment [gift] is made

#### 44.31.9 (h): Donee settlor/close family

Section 643I(1) ITTOIA provides:

Sections 643J to 643L apply if ...

- (h) the subsequent recipient [donee]-
  - (i) is the settlor, or
  - (ii) is a close member of the settlor's family (see section 643H)
    - [A] at the time the onward payment [gift] is made or,
    - [B] where that time is given by subsection (4),<sup>156</sup> at either or both of the time so given and the actual time the onward payment [gift] is made.

There is no CGT equivalent.

#### 44.31.10 Onward gifts commencement

Para 21(3) sch 10 FA 2018 provides:

New sections 643I to 643L and 643N of ITTOIA 2005 have effect only in relation to onward payments [gifts] made on or after 6 April 2018.

### 44.32 s.643A misc rules

#### 44.32.1 Relief for donor/settlor

Section 643I(2) ITTOIA provides:

- [a] Where, in a case within subsection (1)(a)(i) [directly-received s.643A income] and by reference to the amount mentioned in subsection (1)(a), income is treated by section 643J or 643L as arising to a person for a tax year, the original beneficiary is not liable to tax for any later tax year on so much of the amount mentioned in subsection (1)(a) as is equal to that income;

---

156 See 44.32.2 (Pre-benefit gift: date of onward payment).

- [b] and where, in a case within subsection (1)(a)(ii) [settlor-attributed s.643A income] and by reference to the amount mentioned in subsection (1)(a), income is treated by section 643J as arising to a person for a tax year, the settlor is not liable to tax for any later tax year on so much of the amount mentioned in subsection (1)(a) as is equal to that income.

#### 44.32.2 *Pre-benefit gift: date of onward payment*

Section 643I(4) ITTOIA provides:

Where the onward payment is made as mentioned in subsection (1)(d)(ii), [pre-benefit gift] the onward payment is to be treated—

- (a) for the purposes of the provisions of this section following subsection (1)(d), and
- (b) for the purposes of sections 643J to 643L, as made immediately after, and in the tax year in which, the benefit is provided to the original beneficiary [donor].

#### 44.32.3 *Valuation of benefits*

Section 643I(8) ITTOIA provides:

Sections 742C to 742E of ITA 2007 (value of certain benefits)—

- (a) apply for the purpose of calculating the value of the onward payment for the purposes of sections 643J to 643L as they apply for the purpose of calculating an income tax charge under Chapter 2 of Part 13 of ITA 2007, and
- (b) apply for that purpose as if their references to a benefit provided were references to a gift made.

#### 44.32.4 *Meaning of remittance*

Section 643I(9) ITTOIA provides:

Sections 809L to 809Z6 of ITA 2007 (remittance basis: rules about when income is remitted)—

- (a) apply for the purposes of this section and sections 643J to 643L, and
- (b) apply for those purposes in relation to references to remittance of the onward payment as if the onward payment were relevant foreign income of the subsequent recipient.

### 44.33 **s.643A onward-gift donee charge**

Assuming the s.643A onward-gift conditions are satisfied, we move on to the onward-gift rule in s.643J.

The layout is: s.643J (1)(2) set out application conditions; s.643J(3) sets out the rule where those conditions are satisfied. It is easier to follow if the 643J application conditions are read side by side:

**Donee arising basis taxpayer**

**Donee remittance basis taxpayer and benefit remitted**

- (1) Subsection (3) applies if—
  - (a) this section applies [s.643A onward-gift conditions are met] (see section 643I(1)), and
  - (b) the subsequent recipient [donee] is UK resident for the gift year, and
  - (c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and
  - (d) none of sections 809B, 809D and 809E of ITA 2007 (remittance basis) applies to the subsequent recipient [donee] for the charging year.

- (2) Subsection (3) also applies if—
  - (a) [identical] and
  - (b) [identical] and
  - (c) [identical] and
  - (d) section 809B, 809D or 809E of ITA 2007 [remittance basis] applies to the subsequent recipient [donee] for the charging year, and
  - (e) the whole, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the 643J application conditions are satisfied, we move on to the rule. Section 643J(3) ITTOIA provides the s.643A onward-gift charge:

For income tax purposes, an amount of income—

- (a) equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit], or
- (b) where
  - [i] this subsection applies because of subsection (2) [donee remittance basis user] and

[ii] part only of that much of the onward payment [gift] is remitted to the UK in the charging year, equal to the amount or value of that part, is treated as income of the subsequent recipient [donee] for the charging year, subject to subsection (4).

#### 44.33.1 *Donee otherwise taxable*

Section 643J(4) ITA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows—

- (a) deduct any part of the amount on which the subsequent recipient [donee] is liable to income tax otherwise than under this section

#### 44.33.2 *Gift exceeds donor's benefit*

Section 643J(4) ITA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows ...

- (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 643I(1)(a) [s.643A close-family income], deduct the excess.

### 44.34 **Donee not taxable: s.643A onward-giftable amount**

The layout is: s.643K(1)(2) ITTOIA set out application conditions; s.643K(3) sets out the rules where one of those conditions is satisfied. It is easier to follow if the 643K application conditions are read side by side:

#### **Donee non-resident**

- (1) Subsection (3) applies if
  - [x] this section applies (see section 643I(1)) [s.643A onward-gift conditions are met] and—
  - (a) the subsequent recipient [donee] is non-UK resident for the gift year, or

#### **Donee on remittance basis, gift remitted**

- (2) Subsection (3) also applies if—
  - (a) [identical to [x] opposite]
  - (b) the subsequent recipient [donee] is UK resident for the gift year, and

(b) the matching year is later than the gift year and the subsequent recipient [donee] is UK resident for the gift year but non-UK resident for the matching year.

(c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and

(d) section 809B, 809D or 809E of ITA 2007 [remittance basis] applies to the subsequent recipient [donee] for the charging year, and

(e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the 643K application conditions are satisfied, we move on to the rule. Section 643K(3) ITTOIA provides:

Section 643I(1)(a) has effect—

- (a) as if the subsequent recipient [donee] were an individual to whom, in the case of the settlement, income is treated by section 643A(1)(a), both before and after the application of section 643A(3) and (4) [settlor-attribution rule<sup>157</sup>], as arising for the charging year, and
- (b) as if, subject to subsection (4), the amount of that income—
  - (i) [A] were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit] and [B] is not treated as arising to the settlor as a result of the operation of section 643L,<sup>158</sup> or
  - (ii) were, where [A] this subsection applies because of subsection (2) [donee remittance basis user] and [B] part only of that much of the onward payment [gift]

---

157 See 44.29 (s.643A settlor-attribution rule).

158 See 44.35 (S.643A onward-gift settlor-attribution rule).

is remitted to the UK in the charging year,  
 equal to the amount or value of the remainder of that much  
 of the onward payment [gift].

The difference between 643J and 643K is:

643J: chargeable s.643A income arises to donee/settlor

643K: non-chargeable s.643A income arises to donee/settlor which is  
 taken into account for a future onward-gift charge.

It may be helpful to look at the s.643J/K rules side by side, with the key  
 differences underlined:

**Section 643J(3)**

For income tax purposes, an  
 amount of income—

(a) equal to the amount or  
 value of

so much of the onward  
 payment [gift] as is within  
 any of sub-paragraphs (i) to  
 (iii) of section 643I(1)(e)  
 [gifted benefit], or

(b) where  
 [i] this subsection applies  
 because of subsection (2)  
 [donee remittance basis user]  
 and

**Section 643K(3)**

Section 643I(1)(a) has effect—  
 (a) as if the subsequent recipient [donee]  
 were an individual to whom, in the case  
 of the settlement, income is treated by  
section 643A(1) as arising for the  
charging year, and

(b) as if, subject to subsection (4), the  
 amount of that income—

(i) were equal to the amount or value of

[A] so much of the onward payment  
 [gift] as is within any of sub-paragraphs  
 (i) to (iii) of section 643I(1)(e) [gifted  
 benefit] and  
 [B] is not treated as arising to the settlor  
 as a result of the operation of section  
 643L, or

(ii) were, where  
 [A] [identical to [i] opposite] and

<p>[ii] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,</p> <p>equal to the amount or value of that part,</p>	<p>[B] [identical to [ii] opposite]</p> <p>equal to the amount or value of the remainder of that much of the onward payment [gift].</p>
---	---

is treated as income of the subsequent recipient [donee] for the charging year, subject to subsection (4).

#### 44.34.1 *Gift exceeds s.643A income*

Section 643K(4) ITTOIA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows: if that amount exceeds the amount mentioned in section 643I(1)(a) [s.643A income] in the case of the original beneficiary [donor], deduct the excess.

#### 44.34.2 *Prior year s.643A charge*

Section 643K(5) ITTOIA provides:

Where the amount mentioned in section 643I(1)(a) is treated as arising by this section in connection with the operation of section 643I and this section on a previous occasion, section 643I(1) has effect—

- (a) with the omission of its paragraphs (b) and (c),
- (b) as if the references in its paragraph (d) to the benefit mentioned in its paragraph (b) were, instead, to what was the onward payment [gift] on that previous occasion,
- (c) as if the references in its paragraph (d) to when that benefit is provided were, instead, to when that onward payment [gift] was made, and
- (d) as if the references in its paragraph (e) to that benefit were, instead, to so much of that onward payment [gift] as was on that previous occasion within any of sub-paragraphs (i) to (iii) of that paragraph [gifted benefit].

### 44.35 **s.643A Onward-gift settlor-attribution rule**

For a general introduction to onward-gift settlor-attribution rules, see 57.26 (Settlor-attribution: Introduction).

Suppose an onward gift is made to a donee (not close-family). A direct benefit to close-family may be treated as made to the settlor, under the s.643A settlor-attribution rule.<sup>159</sup> Section 643L ITTOIA ensures that the same applies in the case of an onward gift to close-family. I refer to this as the “**s.643A OG settlor-attribution rule**”.

The layout is: s.643L(1)(2) set out application conditions; s.643L(3) sets out the rules where one of those conditions is satisfied. It is easier to follow if the 643L application conditions are read side by side:

**Donee remittance basis user: s.643L(1)      Donee non-resident: s.643A(2)**

- |  |   |
|--|---|
| <p>(1) Subsection (3) applies if—</p> <p>(a) this section applies (see section 643I(1)) [s.643A onward-gift conditions are met],</p> <p>(b) the subsequent recipient [donee] is a close member of the settlor’s family (see section 643H) when the onward payment [gift] is made,</p> <p>(c) the subsequent recipient [donee] is UK resident for the charging year,</p> <p>(d) section 809B, 809D or 809E of ITA 2007 [remittance basis] applies to the subsequent recipient [donee] for the charging year,</p> <p>(e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year,</p> <p>(f) there is a time in the charging year when the settlor is UK resident,</p> | <p>(2) Subsection (3) also applies if—</p> <p>(a)[identical]</p> <p>(b) [identical]</p> <p>(c) the subsequent recipient [donee] is non-UK resident for the charging year,</p> <p>(d) [identical to (f)]</p> |
|--|---|
- 

<sup>159</sup> See 57.26 (Settlor-attribution: Introduction).

(g) there is no time in the charging year when the settlor is domiciled in the UK, and (e) [identical to (g)]

(h) there is no time in the charging year when the settlor is regarded for the purposes of section 809B(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect because of Condition A in that section being met [formerly domiciled resident]. (f) [identical to (h)]

Assuming the 643L application conditions are satisfied, we move on to the rule. Section 643L(3) ITTOIA provides:

For income tax purposes, an amount of income—

- (a) equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit], or
- (b) where this subsection applies because of subsection (1) in a case where part only of that much of the onward payment [gift] is remitted to the UK in the charging year, equal to the amount or value of the remainder of that much of the onward payment [gift],

is treated as arising to the settlor for the charging year, subject to subsection (4).

Section 643L(5)(6) ITTOIA provides the settlor with the standard settlor-attribution indemnity.<sup>160</sup>

#### 44.35.1 *Settlor otherwise taxable/gift exceeds benefit*

Section 643L(4) ITTOIA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows—

---

<sup>160</sup> Section 643L(5) ITA provides: “Where any tax for which the settlor is liable as a result of subsections (3) and (4) is paid, the settlor is entitled to recover the amount of the tax from the subsequent recipient [donee].” See 57.28 (Settlor-attribution indemnity).

- (a) deduct any part of the amount on which the settlor is liable to income tax otherwise than under this section, and
- (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 643I(1)(a), deduct the excess.

### **44.36 Indirect gift to settlor/close family**

#### *44.36.1 Trust to A to settlor/close-family*

Section 643M(1) ITTOIA provides:

Subsection (3) applies if—

A set of 8 conditions then follow which I call **“indirect-gift conditions”**

#### *44.36.2 Benefit to non settlor/close family*

Section 643M(1) ITTOIA provides:

Subsection (3) applies if—

- (a) the trustees of a settlement provide a benefit (“the original benefit”) to an individual (“the original recipient”),
- (b) the original recipient is not the settlor,
- (c) at the time the original benefit is provided, the original recipient is not a close member of the settlor’s family (see section 643H),

#### *44.36.3 Beneficiary not taxable*

Section 643M(1) ITTOIA provides:

Subsection (3) applies if ...

- (d) the original recipient is not taxed on the original benefit (see subsection (7))

That takes us to s.643M(7) ITTOIA which provides:

- [a] For the purposes of subsection (1)(d), the original recipient is taxed on the original benefit if the original recipient is liable to income tax, or capital gains tax, by reference to the amount or value of the original benefit;
- [b] and where the original recipient is so liable by reference to the amount or value of part only of the original benefit, this section applies as if the two parts of the original benefit were separate benefits.

#### 44.36.4 *Onward-gift conditions satisfied*

Section 643M(1) ITTOIA provides:

Subsection (3) applies if ...

- (e) at the time the original benefit is provided—
  - (i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole, or part, of the original benefit to another person, and
  - (ii) it is reasonable to expect that, in the event of the whole or part of the original benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them,
- (f) the original recipient makes, directly or indirectly, a gift (“the onward payment”) to a person (“the subsequent recipient”)—
  - (i) [A] at the time the original benefit is provided to the original recipient,  
[B] or at any later time in the 3 years beginning with the day containing that time, or
  - (ii) at any time before the original benefit is provided to the original recipient and, it is reasonable to assume, in anticipation of the original benefit being provided,
- (g) the gift is of or includes—
  - (i) the whole or part of the original benefit,
  - (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of the original benefit, or
  - (iii) any other property, but only if the original benefit is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee], and

This repeats s.643A onward-gift conditions (c), (d), (e).<sup>161</sup>

#### 44.36.5 *Subsequent recipient is settlor/close family*

Section 643M(1) ITTOIA provides:

Subsection (3) applies if ...

---

<sup>161</sup> See 44.31.3 (Cond. (b): Match with benefit); 44.31.4 (Cond. (d): Gift & time limit); 44.31.6 (Cond. (e): Gift from benefit).

- (h) the subsequent recipient [donee]—
  - (i) is the settlor, or
  - (ii) is a close member of the settlor’s family
    - [A] at the time the onward payment [gift] is made or,
    - [B] where that time is given by subsection (4), at either or both of the time so given and the actual time the onward payment [gift] is made.

#### 44.36.6 *Indirect-gift rule*

Assuming the indirect-gift conditions are satisfied, we move on to the rule. Section 643M(3) ITTOIA provides:

So much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of subsection (1)(g) [gifted benefit] is treated for the purposes of Step 1 in section 643B(1) as a benefit provided by the trustees to the subsequent recipient [donee] at the time the onward payment [gift] is made.

This brings s.643A into play and imposes s.643A income on the donee.

#### 44.36.7 *Series of gifts ending with settlor/close-family*

Section 643M(2) ITTOIA provides:

Where—

- (a) there is a series of two or more gifts,
- (b) the first gift in the series is made, directly or indirectly, by the original recipient—
  - (i) [A] at the time the original benefit is provided,
  - [B] or at any later time in the 3 years beginning with the day containing that time, or
  - (ii) at any time before the original benefit is provided and, it is reasonable to assume, in anticipation of the original benefit being provided,
- (c) the recipient of a gift in the series is the person who makes, directly or indirectly, the next gift in the series,
- (d) the recipient of the last gift in the series is the settlor or, at the time that last gift is made, is a close member of the settlor’s family,
- (e) as regards any earlier gift in the series, its recipient—
  - (i) is not the settlor, and
  - (ii) is not, at the time that earlier gift is made, a close member of the settlor’s family, and

(f) the condition in subsection (1)(g) is met in relation to each gift in the series,  
the last gift in the series is to be treated for the purposes of subsection (1)(f) as if its maker were the original recipient (and not its actual maker).

#### 44.36.8 *Misc*

Section 643M ITTOIA provides:

(4) Where the onward payment [gift] is made as mentioned in subsection (1)(f)(ii) [pre-benefit gift], the onward payment [gift] is to be treated, for the purposes of subsections (1)(h) and (3), as made immediately after, and in the tax year in which, the original benefit is provided to the original recipient.

(5) Where subsection (1)(f) to (h) are met in any case, it is to be presumed (unless the contrary is shown) that subsection (1)(e) is also met in that case.<sup>162</sup>

(6) Where the benefit mentioned in section 643I(1)(b) is one that subsection (3) of this section treats as provided, section 643I(1) has effect with the omission of its paragraph (c).

#### 44.37 s.643A onward-gift remit. basis

Section 643N ITTOIA provides:

(1) This section applies in relation to income if—

- (a) the income is treated as arising to an individual for a tax year—
  - (i) by section 643J(3) and (4) where section 643J(3) applies because of section 643J(2), or
  - (ii) by section 643L,<sup>163</sup> and
- (b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

(2) The income is treated as relevant foreign income of the individual.

(3) For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) treat the onward payment [gift], or (as the case may be) the part of it whose amount or value is equal to the amount of the income, as deriving from the income.

(4) In the application of section 832 in relation to the income, subsection (2) of that section has effect with the omission of its

162 For this presumption, see 57.31.2 (Cond. (b): Intention to give).

163 See 44.35 (S.643A onward-gift settlor-attribution rule).

paragraph (b).

This follows the drafting of the s.643A remittance basis, in s.643F.<sup>164</sup> It should not have been necessary to set out the s.643A remittance basis twice over; but there it is.

---

164 See 44.24 (s.643A remittance basis). This in turn follows the drafting of the s.731 remittance basis: see 47.39 (s.731 remittance basis).

## CHAPTER FORTY FIVE

# TRANSFER OF ASSETS ABROAD: INTRODUCTION

45.1		45.13.5	Transfer to trust + trust migration post-2006
45.13	Income received as indirect consequence of transfer	45.16.4	Loan relationship and Forex income
45.13.1	A transfers to B + B to C: Clean-break test	45.18.10	EU-law defence: Commencement
45.13.2	Transfer to trust + trust migration pre-2006		

### 45.1 ToA: Introduction

Non-resident trusts and companies pay no UK tax on foreign income. A non-resident company may pay less tax on UK income. These rules present an obvious means of income tax avoidance. HMRC's first answer to this is Chapter 2 Part 13 ITA, entitled "Transfer of assets abroad" (the "ToA provisions").

There are two main<sup>1</sup> charging provisions:

- (1) The "**s.720 charge**" on the transferor; ToA draft guidance calls this "the income charge".
- (2) The "**s.731 charge**" on individuals who receive benefits; ToA draft guidance calls this "the benefits charge".

This chapter considers requirements these charges have in common. The next two chapters consider them individually.

In 1955, the Royal Commission picked out ToA as an example of

---

<sup>1</sup> There is a third charging provision in s.727 ITA but that is only a minor supplement to s.720. Some commentators regard the charge under enjoyment condition C as a separate charge, in which case there are said to be four charging provisions; but I would classify that as a sub-rule of the s.720 charge.

anti-avoidance legislation obscurely worded and drawn more widely than its purpose requires. But no-one took any notice of that.<sup>2</sup>

#### 45.1.1 *ToA guidance*

An earlier edition of this work grumbled about a dearth of HMRC guidance.<sup>3</sup> Be careful what to wish for! In 2013 HMRC published 150 pages of draft guidance (“**ToA draft guidance**”).<sup>4</sup> I set out relevant passages. That adds about 70 pages to this book, even though the most difficult issues are hardly addressed and almost every important statement is qualified by words such as *normally*, *generally*, *likely*, *usually*, *broadly*, *depending on*, etc. Overall, I do not think public knowledge of the provisions is much improved. Perhaps it was naive to expect otherwise. Recognising the difficulty and the importance of the subject, HMRC set up a working group to review the guidance.<sup>5</sup> But nothing happened subsequently, so presumably the draft guidance was filed as too difficult. So far as it goes, the draft may be taken as an indication of HMRC

---

2 See 2.7 (Avoidance legislation 1955 critique).

3 Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (2013/14 edition), para 28.1: “The discussion of the provisions in International Manual 600000 contains almost nothing significant, but 38 paragraphs are withheld “because of exemptions in the Freedom of Information Act 2000”. Information is withheld if disclosure would be likely to prejudice the collection of tax. No doubt parts of the withheld text identify tax avoidance possibilities or procedures to detect evasion and are correctly withheld. I expect that the bulk of the withheld text is simply a discussion of the law. Disclosure only prejudices tax collection if one takes the view that uncertainty in the scope of anti-avoidance law is desirable. This is constitutionally wrong. Legal certainty is at the heart of the rule of law. (That is the reason why the Manuals are published.) It is also pragmatically wrong. Legal certainty is in the interest of HMRC as well as private citizens. If HMRC are not prepared to state their view then private citizens must do as best they can. They can hardly be guilty of neglect if they form wrong views in this difficult area in which HMRC are themselves not prepared to comment, and this is likely to lead to loss of tax.”

4 <https://www.gov.uk/government/consultations/reform-of-an-anti-avoidance-provision-transfer-of-assets-abroad>

5 The members of the working group are listed in HMRC, “Reform of an anti avoidance provision: Transfer of Assets Abroad Outcome of Consultation” (2013) annex 4.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/270993/transfer\\_of\\_assets\\_outcome\\_of\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/270993/transfer_of_assets_outcome_of_consultation.pdf)

practice in 2013. It has not been updated.

In 2009 HMRC published guidance on the ToA remittance basis. This is headed TAH, presumably for **T**ransfer of **A**ssets **H**andbook, which may have been a similar project which was never completed.

## 45.2 Construction of ToA provisions

The provisions are broad and the courts construe them broadly. In *IRC v Brackett*.<sup>6</sup>

[What is now Chapter 2 Part 13 ITA] is a broad spectrum anti-avoidance provision which should not be narrowly or technically construed.

That is self-evident; no-one would argue otherwise.

In *Howard de Walden v IRC* (1942) the Court of Appeal went further:

The Section is a penal one and its consequences whatever they may be, are intended to be an effective deterrent which will put a stop to practices which the Legislature considers to be against the public interest... It scarcely lies in the mouth of the taxpayer who plays with fire to complain of burnt fingers.<sup>7</sup>

In peacetime, *Vestey v IRC* stepped back from the unfairness:<sup>8</sup>

One [argument] much used by the Revenue is that the section is a penal section. But this cuts both ways. In a case such as *Howard de Walden v IRC* this argument has much force. The transferor in that case, who derived a comparatively small benefit from the transferred assets, was taxed in respect of the whole income. It was an entirely valid argument, lucidly explained by Lord Greene MR, in support of so severe a liability, to say that the section was penal and meant to deter transfers abroad. In such a context his metaphor of burnt fingers is completely apposite. But the argument turns the other way when so draconian a tax (“astonishingly severe” were [Counsel for the Crown’s] words) is sought to be imposed upon persons who had no hand in the transfer, who may never benefit from it, who cannot escape from it, who remain

---

6 60 TC 134 at p.136.

7 25 TC 121 at p.134. Behind the issues of construction of the ToA code is of course a more general and more fundamental issue of attitudes to avoidance; as to which, see 2.5.2 (Judicial view in the past).

8 54 TC 503 at p.583-584.

under liability so long as they live or the settlement lasts. In relation to such persons equity and principle suggests that Parliament intended no such thing - or at least cannot be assumed from the veiled language used to have intended any such thing. To penalise is one thing, to visit the sins of the transferor on future generations is quite another. *Given the choice between a fair and an unfair outcome, the correct construction is to prefer the former where possible.*

The provisions are only penal in certain contexts or circumstances. But perhaps it depends on what one means by “penal”.

The ToA provisions are expressed in mandatory terms, and do not only apply at the option of HMRC. This view was rightly accepted by HMRC (despite the irritation of the judge) in *Anson v HMRC*.<sup>9</sup> What is sauce for the goose is sauce for the gander.

#### 45.2.1 *Target: Pre-1936 schemes*

It is relevant to note the pre-1936 schemes against which the ToA provisions were originally targeted:

The device at which [s.18 FA 1936, now s.720] is aimed ... In its simplest form it consists of a transfer of assets, for a consideration payable in debentures, to a foreign company in which all but a nominal proportion of the share capital is held by the transferor. ... the company is controlled abroad ... so as to be for tax purposes not resident in the UK.<sup>10</sup> The assets transferred either are, or are exchanged into, investments of which the income is not liable to British tax in the hands of a non-resident.

The income of the investments provides cash from which debentures can from time to time be redeemed to the extent required to satisfy the transferor’s current requirements. The sums so received by the transferor do not attract tax in his hands, since they are of the nature of a capital repayment.

The company declares no dividends... Surplus income is accumulated by the company and is available for distribution as capital whenever the time may be thought opportune for a winding up.

So long as the company is kept in being the transferor, as debenture

---

9 [2012] UKUT 59 (TCC) at [18]. For the difficulties which would arise on any other view, see 49.47 (Motive/EU defence: Disclaimer).

10 Author’s footnote: Canada was the usual jurisdiction of choice.

holder, is merely getting back his capital, but tax-free income is, in effect, being accumulated for his benefit as shareholder whenever he chooses to appropriate it by means of a winding up...  
There are many possible variations of such schemes.<sup>11</sup>

### 45.3 “Relevant transfer”

The key concept is “relevant transfer”. The ToA charges only apply if a relevant transfer occurs.

Section 716(1) ITA provides:

- A transfer is a relevant transfer for the purposes of this Chapter if—
- (a) it is a transfer of assets, and
  - (b) as a result of—
    - (i) the transfer,
    - (ii) one or more associated operations, or
    - (iii) the transfer and one or more associated operations, income becomes payable to a person abroad.

This sets out the following basic conditions:

- (1) *A transfer of assets*
- (2) *Income becomes payable to person abroad*
- (3) *Causation*: Condition (2) is caused by (i) the transfer, or (ii) associated operations, or (iii) both. I refer to this as “**relevant transfer causation conditions (i), (ii) or (iii)**”, or together, the “**relevant transfer causation conditions**”.

These conditions are the subject of this chapter. However the fact that there is a relevant transfer is not sufficient in itself to cause a tax charge. The further conditions in one of the charging sections must be satisfied. These are considered in the next two chapters.

### 45.4 “Transfer” of “assets”

Section 717(a) ITA provides a commonsense definition of “assets”:

In this Chapter [Chapter 2 Part 13 ITA] —

- (a) “assets” includes property or rights of any kind

---

<sup>11</sup> Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies’ sur-tax, children’s settlements* (1936) p.2.

Section 716(2) ITA provides an extended definition of “transfer”:

In this Chapter “transfer”, in relation to rights, includes the creation of the rights.

If two parties enter into a contract there are *two* transfers of assets, as both parties acquire rights.

In *Brckett v Chater*<sup>12</sup> T entered into a contract of employment with an offshore company. Rights under a contract of employment are an “asset”. Entering into a contract of employment is a “transfer”. T had power to enjoy the income of the company (which was held in a trust under which T was interested) so T was taxed on all income arising to the company as a result of the transfer.

If B borrows from L there are two transfers of assets, for B acquires the money borrowed and L acquires the benefit of the debt. If L is non-resident, then the interest is income arising to a person abroad.

The issue of shares is a transfer of assets.<sup>13</sup>

Note that there may be a “transfer of assets” in circumstances where there is no individual who is the “transferor”.

## 45.5 “Person abroad”

Section 718(1) ITA provides:

In this Chapter “person abroad” means—

- (a) a person who is resident outside the UK, or
- (b) an individual who is domiciled<sup>14</sup> outside the UK.

A UK resident foreign incorporated company is not a person abroad.<sup>15</sup>

In practice persons abroad take the form of trusts or companies. The rule that an individual could be the person abroad could be in point if, say, an individual entered into contractual arrangements with a UK transferor,

<sup>12</sup> 60 TC 134.

<sup>13</sup> This is self-evident, but if authority is needed, see *Dunsby v HMRC* [2020] UKFTT 271 (TC) at [159].

<sup>14</sup> Section 718(3) ITA provides: “Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b).” This is the standard wording to apply the deemed domicile rules.

<sup>15</sup> For the law before 2012/13, see the 2013/14 edition of this work para 28.4.1.

without constituting a trust; but that is not likely to happen in practice.

#### 45.5.1 Non-resident company within CT

A non-resident company is in some cases subject to corporation tax. Section 3(1) CTA 2009 provides:

The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—

- (a) the company is UK resident, or
- (b) the company is not UK resident and it is chargeable to corporation tax in respect of the income, or would be so chargeable but for an exemption.

It is considered that s.720 and s.731 are “provisions of the Income Tax Acts relating to the charge of income tax” so they do not apply to income of a non-resident company within the scope of Corporation Tax.

This makes sense, because if the profits are subject to corporation tax, HMRC do not need the ToA provisions. This view is also supported by EN CTA 2009:

46. [Clause 3] ensures that income of a company within the charge to corporation tax is not chargeable to income tax as well as corporation tax.

This argument was put in *IRC v Levy* (a case on the settlor-interested trust code, but the issue was the same<sup>16</sup>); unfortunately the judge expressed no view.<sup>17</sup>

The point arises for a non-resident company within ToA in 3 circumstances:

<b>Circumstance</b>	<b>See</b>	<b>ToA issue</b>
Company has a UK PE	20.5	Rarely arises intentionally
Company deals in/develops UK land	21.3	Not unusual
Company has UK property income	23.3.3	Common, from 2020/21

It appears that HMRC do not share this view.

In the HMRC view, CT paid by the person abroad is a credit against the

<sup>16</sup> See 44.3.2 (Underlying company income).

<sup>17</sup> 56 TC 58 at [87]. HMRC’s argument was based on s.9 ICTA 1988, but I cannot see how that helps.

charge on the transferor. It is difficult to see the statutory basis for that. HMRC Helpsheet HS262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts)<sup>18</sup> deals with the mechanics of claiming this credit:

... You should include the amount of tax for which you can claim relief in Column C and you should also include it in box 2 of the 'Foreign' pages. You should note Column E of your claim. In addition, you should send a schedule with the 'Foreign' pages, showing the amount of each item of income, and tax credit/tax paid on that income, which has been included in boxes 11 and/or 13, and Column C.

If the tax for which you're claiming a deduction is UK Corporation Tax then, in addition to entering the above details on the schedule, you should enter the full details of how you've calculated the amount of credit claimed, and particulars (name, address and, where appropriate, tax reference number) of the person or company which paid the tax in the 'Any other information' box, box 19, of your tax return. If you do not yet know the final amount of tax paid by the person abroad, you should estimate the amount of credit available and amend your tax return when the final details are known. You must draw attention to the estimate and explain the circumstances in the 'Any other information' box, box 19, of your tax return. If any additional tax becomes payable as a result of using an estimate the usual provisions for charging interest on tax paid late will apply.

What is the basis of the HMRC view? They note correctly that:<sup>19</sup>

- (1) Under the ToA code, the charge to income tax is on an individual and the amount of that charge is computed by reference to the income of a person abroad.
- (2) That is not the same as charging the company, the person abroad, to income tax. Section 720 does not tax the income of the company, but an amount equal to it.

---

18 (2020) updated 6 April 2020

<https://www.gov.uk/government/publications/income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-hs262-self-assessment-helpsheet/hs262-income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-2020>

19 Private correspondence.

But s.3 CTA 2009 does not say (in the style of a DTA) that profits of a company subject to CT are exempt from IT. It says that “the *provisions of the IT Acts relating to the charge to income tax* do not apply to income of a company.” That is wider. Section 720 is a provision of the IT Acts, and it relates to the charge to IT. Read in its normal sense, s.3 does disapply s.720; otherwise one *is* applying a provision of the IT Acts to the income of the company. HMRC may eventually back down. It must be a shock to discover that the extension of CT has had the presumably unanticipated consequence of restricting the ToA rules, but it happens all the time in tax.

In favour of the HMRC view, as far as it goes, is a comment in *R v Dimsey & Allen*. Lord Scott cited para 2 sch 2 FA 1936:

Tax at the standard rate shall not be charged by virtue of [what is now s.720 ITA] in respect of income which has borne tax at the standard rate by deduction or otherwise.

He continued:

53. This provision would have dealt with the case where the transferee's income included income sourced in the United Kingdom and from which tax had already been deducted at source. But the words "or otherwise" show that the provision would have covered also any case in which the transferee had paid tax on its income. It is worth repeating that in 1936 income tax was payable by individuals and by companies. This provision, too, did not distinguish between individual transferees and company transferees. It did not need to.

That is correct. He continued:

54. In 1965, when companies became liable to corporation tax, the provision should, I think, have been amended so as to prevent a transferor being charged tax on deemed income where the transferee had paid corporation tax on the actual income.

Lord Scott traced para 1 sch 2 FA 1936 Act through to its then equivalent.<sup>20</sup> He continued:

---

20 Section 743(1) ICTA 1988 provided: “Income tax at the basic rate shall not be charged by virtue of section 739 in respect of income which has borne tax at the basic rate by deduction or otherwise.” See now 48.2.1 (Transferor’s credit).

55. The provision, like its predecessors, caters for the deduction of tax at source. It would cater also for a case where the transferee, being an individual, had paid tax at the basic rate (or, now, the lower rate or Sch F ordinary rate) on the income in question. But it does not cover, expressly at any rate, the case of a company transferee that has paid corporation tax on the income. It seems to me clear that this must be the result of an inadvertent oversight.

The point was not argued, and it may seem less clear to the reader. Lord Scott continued:

If the point ever arose for decision I would be attracted by the view that s 743(1) should be construed so as to cover income which had been included in the computation of profits on which a company had paid tax. That construction would, in my opinion, accord with the Parliamentary intention. But it is not necessary to decide the point now...

Unfortunately the s.3(1) CTA point was not put to the House of Lords. A case is not authority against an argument which was not put.

## **45.6 “Resident outside the UK”**

Tax legislation usually refers to a person as being “resident in the UK” or “not resident in the UK” and those are well understood expressions. “Resident outside the UK” is unusual, though not unknown.<sup>21</sup> It is not necessarily the same as “not resident in the UK”.

I consider separately the position where the person abroad is a trustee, a personal representative (though this is largely theoretical), and a company.

### *45.6.1 Trustees resident outside UK*

Section 718(2) ITA provides:

For the purposes of this Chapter, the following persons are treated as

---

21 Other examples are:

- (1) Section 721(1) ITEPA: “foreign employer” defined as an individual, partnership or body of persons “resident outside the UK and not resident in the UK.”
- (2) Section 355(1) TIOPA: “Offshore fund” defined as a mutual fund constituted by a body corporate “resident out of the UK”.
- (3) Section 162(5) IHTA: IHT deduction for liability to person resident outside the UK.

resident outside the UK–

- (b)<sup>22</sup> the person treated as non-UK resident under section 475(3) (trustees of settlements)<sup>23</sup>

This is needed because the statutory provision tells us that trustees are UK resident, or non-UK resident, but it does not (or at least do not expressly) tell us when trustees are “resident outside the UK.” It might perhaps have been argued that trustees who are not resident in the UK are not resident anywhere else, so they are not “resident outside the UK.”

What if the trustees are UK resident but also resident in another state, ie dual resident?

#### 45.6.2 *PRs resident outside UK*

Section 718(2) ITA provides:

For the purposes of this Chapter, the following persons are treated as resident outside the UK...

- (c) persons treated as non-UK resident under section 834(4) (personal representatives).<sup>24</sup>

In practice persons abroad take the form of companies or trusts, not PRs, so this is somewhat theoretical. It is, perhaps, needed to avoid leaving a gap but it is not necessary to discuss the topic further.

#### 45.6.3 *Company resident outside UK*

There is nothing in the ToA code which tells us when a company is “resident outside the UK”. It is suggested that if a company is not UK resident, it should be regarded as resident outside the UK, on the grounds that central management and control must lie somewhere, if it is not in the UK.

If that is right, what is the test to determine whether a company is resident in the UK? Suppose a company is:

- (1) incorporated in the UK; but
- (2) its CMC is outside the UK.

---

22 There is no para (a).

23 See 6.4 (Trust residence for IT/CGT).

24 See 85.3 (Residence of PRs for IT).

The company is UK resident for CT purposes under the incorporation rule.<sup>25</sup> But this rule is expressed to apply only for the purposes of Corporation Tax. Perhaps the company might be a person abroad, if it was resident outside the UK under the common law test (central management and control). Perhaps a purposive (non-literal) construction is appropriate here. Fortunately this question is not likely to arise in practice.

## 45.7 Income “payable” to person abroad

The condition here is that income becomes payable to a non-resident or foreign domiciled person (the person abroad).

### 45.7.1 *Trading/partnership income*

In *Latilla v IRC*:<sup>26</sup>

- (1) A partnership of individuals carried on a trade (mining in Rhodesia).
- (2) Three of the 5 partners (who were UK resident) transferred their partnership shares to a company abroad.
- (3) The company received its share of the partnership’s trading profits.<sup>27</sup>

The taxpayer raised two arguments:

- (1) An argument based on the nature of trading income: Trading income is not income *payable* to the persons carrying on a trade. Trading income is the result of a computation made in trading accounts. The receipts of the trade are not the trading income. The income may be said to income *arising* to or *received* by the company, but not *payable* to it.
- (2) Arguments based on the nature of partnership income:
  - (a) Trading income (if it is *not* payable to the trader) does not become payable because it is received from a partnership.
  - (b) If trading income *is* payable to the partnership, it is still not payable to the partners.

---

25 See 7.3 (The incorporation rule). The same would apply to other statutory company residence rules, but it is difficult to see that the point could ever arise in practice.

26 25 TC 107. For another aspect of this case see 45.11.3 (“In relation to” assets).

27 If the same arrangement was made today it would be necessary to consider the mixed partnership code; see 83.3 (Mixed partnership code); 83.12 (A (transferor) not partner: s.850D).

These seem to me distinct issues, though they all depend on giving a narrow meaning to the word payable.

The court curtly dismissed both arguments in a single sentence. The word “payable” was wide enough to apply to trading income received by partners of a trading partnership:

If this is not income “payable” to the company, we do not know what it is.<sup>28</sup>

It seems surprising today that the point was thought arguable, but the 1936 textbook on the ToA provisions had supported the taxpayer’s side of the argument.<sup>29</sup> It is easy to forget how far the pendulum has swung from literal to purposive construction.

The court did not stop to analyse the nature of trading income, or partnership income, but it is clear that both arguments are wrong:

- (1) Trading income is “payable” to the persons or person<sup>30</sup> carrying on the trade.<sup>31</sup>
- (2) Partnership income is “payable” to the partners. In modern terminology, one would say that a partnership is transparent for ToA purposes (consistent with the general IT treatment of partnerships).<sup>32</sup>

In short, “payable” is equivalent to “arising” or “receiving or entitled”.<sup>33</sup>

28 The same conclusion was reached for the word “receipt” in *IRC v Thompson* 20 TC 422 at p.429: “[The taxpayer’s argument] was that “income” in that Rule meant the balance of profits and gains, and that the Receiver in receiving the money of the Company as it came in from time to time was not receiving the balance of profits and gains, and that therefore he was not the person who received within the meaning of that Rule. But there appears to me to be nothing in that contention. The Receiver in fact receives the proceeds of all the assets of the Company, whether they are capital or whether they are income, and in receiving the proceeds of assets which are income assets he receives the income within the meaning of that Rule.”

29 Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies’ sur-tax, children’s settlements* (1936) p.6.

30 In *Latilla* the person abroad was trading in partnership; but trading income is also “payable” to a sole trader: *Brackett v Chater* 60 TC 134 and 639, at p.147.

31 See 17.15.1 (What is trading income).

32 See 82.15 (Partnership transparency: IT/CT).

33 Thus the definition of relevant income is income which *arises* to a person abroad, see 47.20 (“Relevant income”: Definition), but the meaning is obviously the same. See

### 45.7.2 Transferred asset used to pay debt

Suppose T transfers money to a person abroad, and the person abroad uses the funds to repay a debt. In principle, no income arises to the person abroad as a result of the transfer, so the transfer does not satisfy the transfer of asset provisions.<sup>34</sup>

### 45.7.3 Person abroad transfers to another

Suppose assets are transferred from one person abroad to another, eg from offshore trustees to an offshore company. Can one argue that there is no relevant transfer because one cannot say that income *becomes* payable to a person abroad? It was payable to *a* person abroad even before the transfer! The argument is linguistically possible, but the context shows that it is wrong. If the argument was right then a transfer by a non-resident or foreign domiciled transferor would never be a relevant transfer, which is certainly not the case.

The condition is also satisfied where the transfer is to a UK resident and domiciled person who later becomes non-resident or foreign domiciled.<sup>35</sup>

## 45.8 Situs of asset transferred

The Chapter heading “transfer of assets abroad” might suggest a requirement that a UK situate asset must become non-UK situate; but that is obviously not the case. After all, the creation of rights may be a transfer of assets, and newly created assets are not situate anywhere before the transfer.

HMRC agree. ToA draft guidance provides:

**INTM600280 Where are assets located and does it matter?**

The location of assets either before or after a transfer does not affect the application of the provisions if one of the required outcomes of a

---

too 14.3 ( Recognition/attribution: Analysis).

34 The example is based on the facts of *Fynn v IRC* 37 TC 629 where the Revenue did not argue that s.720 applied, presumably because they accepted this view. Instead the Revenue argued s.727 applied: see 46.18.3 (“Connected with transfer”).

35 This is self-evident, but if authority is needed, see *Congreve v IRC* 30 TC 163 (a gift to a company which became non-resident), approved on this point in *IRC v Willoughby* 70 TC 57.

transfer is present. ...

The heading of Chapter 2 Part 13 ITA is ‘Transfer of Assets Abroad’ but in fact there is nothing within the legislation itself requiring that assets have to be located outside the UK or moved from the UK abroad. In his decision in the case of *IRC v Willoughby* (70 TC 57) at page 81 the Special Commissioner appears to share this view, saying, ‘In my opinion, and I so hold, this language [what was section 739(1) ICTA] may be satisfied whether the assets are transferred from the UK to outside the UK, or being outside the UK they are transferred to a person outside the UK’.

The taxpayer in *Willoughby* wisely abandoned this argument on appeal.

## 45.9 Transfer for full consideration

A relevant transfer may be made for full consideration<sup>36</sup> and need have no element of bounty (gratuitous intent). (Contrast the settlor-interested trust code).<sup>37</sup>

HMRC agree. ToA draft guidance provides:

### **INTM600240 Relevant Transaction: What is a transfer?**

... The fact that an individual may receive a payment or consideration in full for a movement of some form of property from one person to another does not preclude that action from being a transfer for the purposes of the transfer of assets rules.

Two principles<sup>38</sup> restrict what would otherwise be the unworkably wide extent of this rule:

- (1) Income must *become payable* to the person abroad as a result of the transfer
- (2) Income of the person abroad arising as a result of the transfer must be *identifiable*

### 45.9.1 *Income “becomes payable”*

A requirement of a relevant transfer is that income “becomes payable” to the person abroad as a result of the transfer.

36 See 45.9.4 (Transfer for issue of securities).

37 See 1.5 (Settlement-arrangement definition).

38 Double-counting relief might also apply, see 48.4 (Double-counting relief). But if the analysis in this section is correct, it is not necessary to rely on that.

Suppose T buys an asset from a person abroad for cash (“the purchase price”). At first glance, the payment of the purchase price is a relevant transfer. The payment is a transfer of assets. As a result of the payment, income (from the cash) will normally arise to the person abroad. However, it is considered that the transfer is not a relevant transfer if:

- (1) the asset would otherwise have yielded income to the person abroad;<sup>39</sup>
- (2) the purchase price does not exceed the value of the asset.

In these circumstances, the person abroad:

- (1) acquires the income arising from the purchase price which T transfers to them, but
- (2) loses the income arising from the asset which they sell to T.

If the two income streams are broadly equivalent, they cancel each other out, so it cannot be said that income “becomes payable” to the person abroad.

The same applies if T sells an asset to a person abroad for cash.

If that is right, the transfer of asset conditions are not satisfied every time someone sells an asset to (or buys an asset from) a non-resident person. That would be a sensible result, for two reasons:

- (1) If T sells assets to an offshore trust, say, or to an offshore company, it would be surprising if T’s only defence to ToA was the motive defence.<sup>40</sup>
- (2) Suppose a straightforward series of acquisitions and disposals:
  - (a) A transfers the trust fund to a non-resident trust with standard form power to add beneficiaries.
  - (b) The trustees purchases an asset from B.
  - (c) The trustees sell the asset to C.
  - (d) The trustees use the purchase price to purchase an asset from D
  - (e) The trustees sell the asset to E ... *etc*

39 The position would be different if T transfers assets to an offshore company in consideration of an issue of shares or debentures, or a life policy.

40 In such cases T would often have “power to enjoy”. Unless this is right, there is double taxation. T may be liable under s.720 for income tax on the income arising from the asset sold to the person abroad. T is also liable to income tax on income arising from the proceeds which T receives on the sale of the same asset.

If my view is wrong, then the motive defence should be generously applied in cases of a sale for full consideration.

It would be surprising if A, B, C, D and E were *all* transferors, *any* of whom could in principle be taxable on *all* the trust income under s.720 (and two more transferors may come into charge on every further transaction of sale and purchase).

#### 45.9.2 *Income is identifiable*

The provisions assume that one can *identify* the amount of income which arises to the person abroad as a result of the transfer. If that identification is not possible then the ToA provisions do not - indeed cannot - operate.

Avery Jones raises this question:

What about buying a ticket from a foreign airline, buying a meal or paying for a hotel room when abroad? There is a transfer of assets and it is clear that “income becoming payable” includes the receipt of sums which form part of the recipient’s trading profits. Oh, and there is my IFA subscription, my subscription to *European Taxation*, my purchase of that overpriced new edition of *OECD Model Tax Convention*, and the new edition of *Klaus Vogel on Double Taxation Conventions* direct from the publisher. Foreign entities all of them. I expect if I think for a moment I shall think of lots more. What about my (foreign) car? Did I buy it from an agent for the manufacturer or from a UK subsidiary, and does it make any difference anyway?<sup>42</sup>

These payments are all transfers of assets, as a result of which (additional) trading<sup>43</sup> income in principle becomes payable to the person abroad. But none of these transfers are relevant transfers because one cannot identify the amount of income which becomes payable as a result of them.<sup>44</sup>

An individual who subscribes for shares in (say) Microsoft Corp makes a transfer of assets, but one cannot identify what income becomes payable to Microsoft as a result of that transfer, so the ToA provisions do not apply.

---

41 Likewise for s.624; see 44.2.4 (Income must be identifiable).

42 [1998] BTR 392.

43 Except in the case of a purchase of the foreign car from a UK subsidiary, where the income arising to the person abroad would be the dividend (if any) from the subsidiary.

44 Of course in practice considerations of materiality might also arise.

An individual who enters into a contract of employment with a non-resident employer makes a transfer of assets, but (except for a one-man company) one cannot usually identify what income becomes payable to the employer as a result of that transfer, so the ToA provisions do not apply.

The question whether one can identify the income which arises to the person abroad as a result of a transfer sometimes overlaps with the question whether one can identify a transferor. In *IRC v Pratt* 57 TC 1 where a company made a transfer, the taxpayers were held not to be transferors because one could not identify income arising to the person abroad from what each individual taxpayer had contributed or done.<sup>45</sup> But the two questions are in principle distinct.

#### 45.9.3 *Deposit in offshore bank*

Suppose T deposits money with a non-resident bank. The deposit (in legal terms, a loan) is a transfer of assets but it is not a relevant transfer because one cannot identify the income which becomes payable to a person abroad as a result of it:

- (1) The trading income of the bank is increased. The increase may be reduced or almost cancelled by the interest the bank pays to T, but the bank's income is still increased, assuming the bank is profitable. However the amount of that increased income cannot be identified.
- (2) T receives interest, but T is not a person abroad.

Contrast the position if T lends money to a trust or underlying offshore company: that would be caught.

#### 45.9.4 *Transfer for issue of securities*

Suppose T transfers an asset to a foreign company in exchange for the issue of loan notes (debentures) in that company (set up for the purpose and wholly owned by a trust or structure set up by T). This may well be transfer for full consideration. It is nevertheless a relevant transfer. Indeed it is the paradigm ToA case.<sup>46</sup>

The same applies to a transfer in exchange for an issue of shares.

---

<sup>45</sup> See 46.4 (A procurement test).

<sup>46</sup> See 45.2.1 (Target: Pre-1936 schemes).

Contrast the position if T subscribes for shares or debentures in (say) a quoted foreign company or collective investment scheme. This is not a relevant transfer as one cannot identify the income which arises as a result of the transfer.

#### 45.9.5 *Transfer for issue of life policy*

The same applies if T pays a premium for a life policy issued by a large foreign institution (or subscribes for a contract or bond of a similar nature). One cannot normally identify the income arising to the institution as a result of the transfer so this is not a relevant transfer. However, if the policy is linked to particular investments actually made by the institution (as is typically the case for a personal portfolio bond), it would in principle be possible to identify the income, and there would be a relevant transfer.

### 45.10 **Income of person abroad: Causation**

It is not sufficient for a relevant transfer that (1) there is a transfer of assets and (2) income becomes payable to a person abroad. The income must become so payable as a result of the transfer (or associated operations). The test is one of causation.

In *Rialas v HMRC*<sup>47</sup> the facts were:

- (1) The taxpayer (“R”) transferred £10 to constitute an offshore trust (“the nominal cash transfer”).
- (2) Then:
  - (a) The trust acquired an underlying company (“F”).
  - (b) A third party sold shares in a company (“A”) to F. F borrowed the \$15m purchase price.
  - (c) F received dividends from the shares.<sup>48</sup>

No income arose as a result of the nominal cash transfer. The UT referred to the causation requirement and continued:<sup>49</sup>

... the establishment of [the Trust] and that trust’s acquisition of the

---

47 [2020] UKUT 367 (TCC). The case is not yet final.

48 The steps at (2) were not associated operations in relation to the nominal cash transfer, as they were not “effected in relation to the assets transferred” by the nominal cash transfer; see at [53].

49 at [52].

subscriber shares in F were necessary preconditions to the transfer of [the third party's] shares as those steps were important to the acquisition structure that R put in place. However, that is not the same thing as saying that A paid dividends to F in “by virtue or in consequence of” the establishment of [the Trust] or that trust's acquisition of the subscriber shares, or a combination of both. Put another way, the establishment of [the Trust], and the acquisition of the subscriber shares in F, did not themselves enable F to receive dividends on the Argo shares. The receipt of such dividends could only be guaranteed once [the third party] had, additionally, agreed to sell those shares and F had funds to pay the purchase price due.

#### 45.10.1 *Individual buys secondhand co*

Suppose T (UK resident) buys the shares of an already existing non-resident company (“**a secondhand company**”). Assume the company owns assets. That purchase involves a transfer of assets by T – payment of the purchase price<sup>50</sup> – which is described in the following discussion as the “**purchase-price transfer**”.

It is the case that income arises to a person abroad (the company). However, it cannot be said that the income became payable to the company as a result of the purchase-price transfer. The company merely continues to receive the income from its own assets, as it did before, and that is not in any way affected by the change in ownership of its shares. Thus if the vendor is UK resident and domiciled, the purchase-price transfer is not a relevant transfer.

Now suppose T purchases the shares from a person abroad. In that case the purchase-price transfer may be a relevant transfer because the vendor may invest the proceeds of sale and receive income as a result of that transfer. However, the income arising as a result of the purchase-price transfer would be the income arising to the vendor, not the company's income.

In these cases there will have been (at least) one other transfer of assets, the transfer of assets to the secondhand company (eg on a subscription for the company's shares). I call this the “**company-funds transfer**”. The

---

50 The sale in fact involves two transfers of assets: payment of the purchase price to the vendor and transfer of the shares to T.

company-funds transfer is a relevant transfer. If T is the transferor of that transfer then T will in principle be within s.720 and taxed on the secondhand company's income.<sup>51</sup> T may alternatively be subject to tax under s.731 if T receives benefits (unless the company-funds transfer qualifies for the motive defence).

The secondhand company may later make a relevant transfer.<sup>52</sup> If T procures that transfer, T is the transferor in relation to that transfer.

#### 45.10.2 Company buys secondhand co

Now suppose:

- (1) T transfers assets to H Ltd, a non-resident company ("**T's transfer to H**").
- (2) H uses its funds to purchase a secondhand company (the "**purchase-price transfer**").

Thus the position is:

A similar analysis applies:

- (1) T's transfer to H is in principle a relevant transfer. However, no income arises to a person abroad as a result of that transfer.<sup>53</sup>
- (2) The purchase-price transfer is not a relevant transfer. No income arises to the secondhand company as a result of that transfer. Income does arise to the secondhand company, but not as a result of T's transfer to H or the purchase-price transfer.

Suppose H Ltd then lends<sup>54</sup> funds to the secondhand company ("**the inter-**

51 As to whether T is the transferor, see 46.3 (Who is the transferor).

52 For instance, a transfer to a non-resident subsidiary. A straightforward sale of assets by the company may not be a relevant transfer because no income becomes payable. See 45.9.1 (Purchase from person abroad).

53 Assume no income arises to H (the secondhand company does not pay a dividend).

54 The same analysis applies if H Ltd subscribes for shares in the secondhand company.

**group transfer**”). T will then be subject to tax under s.720 on the income arising to the secondhand company from the additional funds, if that income can be identified, on the basis that:

- (1) The inter-group transfer is an operation associated with T’s transfer to H, and income arises to the secondhand company as a result of T’s transfer to H and that operation; or
- (2) T may also be a transferor of the inter-group transfer on the basis that T procured that transfer. (But if the associated operations rule applies, it is not necessary for HMRC to rely on that point.)

#### 45.11 Associated operation: Definition

Section 719(1) ITA provides just about the widest definition the drafter could devise:

In this Chapter [Chapter 2 Part 13 ITA] “associated operation”, in relation to a transfer of assets, means an operation of any kind effected by any person in relation to—

- (a) any of the assets transferred,
- (b) any assets directly or indirectly representing<sup>55</sup> any of the assets transferred,
- (c) the income arising from any assets within para (a) or (b), or
- (d) any assets directly or indirectly representing the accumulations of income arising from any assets within para (a) or (b).

I refer to items (a) to (d) as the “**assets transferred**”.

---

55 “Representing” is defined in s.717(b) ITA:

“references to assets representing any assets, income or accumulations of income include references to—

- (i) shares in or obligations of any company to which the assets, income or accumulations are or have been transferred, or
- (ii) obligations of any other person to whom the assets, income or accumulations are or have been transferred.”

Suppose:

- (1) T transfers assets to a company and
- (2) T transfers the shares in the company to another person.

The second transfer is an associated operation in relation to the first. This would not have been clear without the definition at (i).

I would be grateful to any reader who could find a cogent example of the application of the definition at (ii).

An associated operation does not exist in isolation, it exists in relation to a transfer. I refer to that as being associated with the transfer. There are two requirements:

- (1) There must be an “operation”.
- (2) It must be “effected in relation to” the assets transferred by the transfer.

The term “associated operations” is also used in IHT. The IHT definition is similar in some respects, and IHT cases will sometimes provide assistance.<sup>56</sup>

#### 45.11.1 “Operation”

“Operation” is (rightly) not defined but is clearly a word of wide import. It includes a company becoming non-resident.<sup>57</sup> It does not include death, but that does not matter because it does include the act of making a will.<sup>58</sup>

In *Herdman v IRC* 45 TC 394:

- (1) An individual transferred (sold) assets to an Irish company.
- (2) The company then “accumulated” income and “managed” its assets so as to be able to repay a loan to the transferor.

The steps at (2) were held to be “operations” by most of the judges but this is obiter and difficult to accept. Unlike IHT, operation does not include an omission. A company does not “accumulate” income (in the legal sense). If “management” is an operation then everything is an operation (all assets must be “managed”) and the expression makes no sense. Lords Pearce and Reid (more judiciously) left open the question of whether these were “operations”.

#### 45.11.2 *Effected “by any person”*

ToA draft guidance provides:

##### **INTM600300 Relevant Transaction: Associated operations**

---

<sup>56</sup> See 70.10.2 (ToA/IHT assoc ops compared).

<sup>57</sup> *Congreve v IRC* 30 TC 163.

<sup>58</sup> *Bambridge v IRC* 36 TC 313. This case contains the aphorism: “Death, as we know, is an awfully big adventure, but even the Crown admits that it is not an associated operation.” More prosaically, death is not an associated operation as it is not “effected by a person in relation to assets”.

... An operation effected by someone other than the transferor can be an associated operation as the legislation states it can be effected by any person...

This is straightforward. The guidance gives a couple of examples:

*Corbett’s Executrices v IRC* 25 TC 305 involved the transfer of an interest in an estate to a UK resident company which subsequently sold some of the investments transferred to a company resident overseas. It was held that the transfer to the overseas company was associated with the transfer to the UK resident company.

In *Herdman v IRC* 45 TC 394 it was held that following a transfer to a company the accumulation of income by that company and the management of the assets transferred was an operation associated with the original transfer.

#### 45.11.3 “In relation to” assets

In *Fynn v IRC*:<sup>59</sup>

- (1) In 1948 T transferred assets to an Irish company (“the original transfer”).
- (2) In 1952 T lent money to the company (“the 1952 loan”).

The 1952 loan was not an associated operation in relation to the original transfer, because it was not effected “in relation to” the assets transferred by the original transfer.

In *Carvill v IRC*:<sup>60</sup>

- (1) T transferred assets to a Bermudian company (B Ltd) in exchange for shares, and so became a majority shareholder in B Ltd (“the original transfer”).
- (2) T became a 100% shareholder in B Ltd by
  - (a) T purchasing shares and
  - (b) B Ltd purchasing its own shares.
- (3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were not operations associated with the original transfer,

---

<sup>59</sup> 37 TC 629. *HMRC v Rialas* [2020] UKUT 367 (TCC) at [53] offers a further, similar example; see 45.10 (Income of person abroad: Causation).

<sup>60</sup> [2000] STC (SCD) 143 at [80]-[85], 75 TC 477 (Special Commissioners).

as they were not effected in relation to the assets transferred by the original transfer.

On the other hand, in *Latilla v IRC*:<sup>61</sup>

- (1) Partners transferred a share in a trading partnership to a company abroad.
- (2) The company received its share of the partnership's trading profits.

The taxpayer argued that income became payable to the company not as a result of the transfer, but as a result of the subsequent activities of the partnership. One might have doubted that, as a matter of causation; but the court curtly held that the activities were associated operations, which is another route to the same destination.

#### 45.11.4 *Operation precedes transfer*

Section 719(2) ITA provides:

It does not matter whether the operation is effected before, after, or at the same time as the transfer.

This provision (introduced 2006) gives statutory effect to the view formerly expressed in RI 201.<sup>62</sup>

One can envisage an operation effected before the transfer. For instance, suppose an arrangement under which:

- (1) An individual transported a chattel from the UK to outside the UK (an operation but not a transfer).
- (2) The individual then transferred the chattel to an offshore trust or company.

But I cannot think of a case where s.719(2) would actually matter in practice, for the purposes of the ToA rules.

#### 45.11.5 *Mere historical association*

---

<sup>61</sup> 25 TC 107. For another aspect of this case see 45.7.1 (Trading/partnership income).

<sup>62</sup> "... an associated operation does not necessarily have to take place after a transfer of assets. A transaction undertaken 'in relation to' a transfer of assets can precede the transfer."

That seemed right. The FA 2006 gave no thought to transitional provisions but in the circumstances it does not matter.

On a simple reading of the definition, an operation can be associated with an earlier transfer even if the two were not part of a single plan or arrangement, and many years apart. Suppose:

- (1) A transfers an asset to B (who is UK resident) in 1970; and
- (2) B transfers the asset in the year 2010 to an offshore trust under which A may benefit.

On a simple reading, B's disposition is an operation associated with A's transfer even though:

- (1) They are not part of a single arrangement.
- (2) A is unaware of B's disposition.
- (3) B's disposition is itself a relevant transfer
- (4) one or both transfers is a disposal at arm's length.

The same would apply if A's transfer was made in 1870 or 1670. Indeed, anyone who purchases or disposes of an estate in English land is only effecting the most recent operation of a series of associated operations (dispositions of land) which may perhaps be traced back to the Norman Conquest, if not before; and only a lack of records prevents one tracing the sequence of associated operations to the dawn of civilisation. In fact this simple reading cannot be right, and a clean-break test should be implied.<sup>63</sup>

## 45.12 Why associated operations matter

It is not enough to establish that there is an operation associated with a transfer. This is just a first step. One must then go on to ask what (if anything) follows.

The term "associated operations" is used in two key definitions:

- (1) *Relevant transfer*: s.716(1) ITA provides:

A transfer is a relevant transfer for the purposes of this Chapter if—

- (a) it is a transfer of assets, and
- (b) as a result of—
  - (i) the transfer,
  - (ii) one or more associated operations, or
  - (iii) the transfer and one or more associated operations,

---

<sup>63</sup> See 45.13.1 (A transfers to B + B to C: Clean-break test).

income becomes payable to a person abroad.<sup>64</sup>

(2) *Relevant transaction*: s.715(1) ITA provides:

A transaction is a relevant transaction for the purposes of this Chapter if it is—

- (a) a relevant transfer, or
- (b) an associated operation.

The existence of associated operations is therefore relevant to:

(1) Provisions referring to relevant transfers:

- (a) *Section 720(1) ITA*: referring to avoiding of IT by individuals by means of relevant transfers<sup>65</sup>
- (b) *Section 721(2) ITA*: Individual has “power to enjoy” as a result of a relevant transfer and/or associated operations
- (c) *Section 732 ITA*: Individual receives benefit as a result of the relevant transfer or associated operations<sup>66</sup>
- (d) *Section 733 ITA*: “Relevant income” is income which can as a result of the relevant transfer or associated operations be used for providing a benefit<sup>67</sup>

(2) Provisions referring to relevant transactions:

- (a) *Section 729 ITA*: Individual receives capital sum connected with a relevant transaction
- (b) *Section 729A*: Definition of protected s.727 company income
- (c) *Motive defence*: All relevant transactions must satisfy the motive test<sup>68</sup>

Statute often refers to a relevant transfer and/or associated operations; but since the definition of relevant transfer includes associated operations, the second reference to associated operations seems otiose.

ToA draft guidance provides:

**INTM600300 Relevant Transaction: Associated operations**

64 See 45.3 (“Relevant transfer”).

65 See 45.13 (Income received as indirect consequence of transfer).

66 See 47.13 (Benefit causation condition).

67 See 47.35 (Income of co held by trust).

68 See 49.38 (Pre-2005 associated operations) and 49.39 (Post-2005 transfer + associated operations).

... The same associated operations do not have to be taken into account in every context where it is necessary to consider ‘associated operations’. For example, a transfer together with an associated operation may result in income becoming payable to a person abroad, but it may be a quite different associated operation in relation to a transfer that results in the power to enjoy that income.

This is correct, though it is hard to find a practical example.

### **45.13 Income received as indirect consequence of transfer**

#### 45.13.1 *A to B + B to C: Clean-break test*

Suppose:

- (1) In 1970 A transfers an asset to B (who is a UK resident individual) (“A’s transfer”).
- (2) In 2000 B transfers the asset to an offshore trust (“B’s trust”) under which A may benefit (“B’s transfer”).
- (3) A’s transfer and B’s transfer are not part of a single arrangement and A is unaware of B’s transfer.

B’s transfer is clearly a relevant transfer. The question is whether A’s transfer is a relevant transfer.

It may be helpful to recap the definition. Section 716(1) ITA provides:

A transfer is a relevant transfer for the purposes of this Chapter if—

- (a) it is a transfer of assets, and
- (b) as a result of—
  - (i) the transfer,
  - (ii) one or more associated operations, or
  - (iii) the transfer and one or more associated operations, income becomes payable to a person abroad.

I refer to part (b) of the definition, paras (i) to (iii), as “**transfer causation conditions (i) to (iii)**”.

A’s transfer meets part (a) of the definition: it is a transfer of assets.

Income becomes payable to a person abroad. Transfer causation condition (i) is not satisfied, that is, it is not as a result of A’s transfer alone that income has become payable to the offshore trustees. However, B’s transfer is at first sight an operation associated with A’s transfer. It seems at first sight that transfer causation condition (ii) is satisfied:

income becomes payable to the trustees as a result of the associated operation (B's transfer); so A's transfer is a "relevant transfer" and A is taxable under s.720 on the income of B's trust! This clearly cannot be right; but why not? The motive defence is not a satisfactory solution to this problem:<sup>69</sup> one must conclude that A's transfer is not a relevant transfer, that is, it does not satisfy transfer causation condition (ii) or (iii). How do we reach this result?

The best solution, now<sup>70</sup> the key to understanding associated operation rules, is to say that mere historical association is not enough to constitute "associated operations" for ToA purposes. There must be something more.<sup>71</sup> Parliament should not identified that "something more" and has left the job to the courts. The position is reminiscent of the definition of "settlement" (the settlement-arrangement definition) which includes any disposition, leaving the courts to devise their own test for what is caught (in that case, the courts eventually settling on a "bounty" test).

It is suggested that the test for associated operations is the "clean-break" test, ie is A a settlor of B's trust, did A provide the property indirectly?<sup>72</sup> If not, the operations are not associated.

This view is supported in *Corbett's Executrices v IRC*, where:

- (1) Individuals transferred assets to a UK company (Woodgate) in exchange for shares and debentures.
  - (2) The UK company sold the assets to a person abroad.
- The time gap between these steps was about 1½ years.

The interval during which the beneficiaries were thinking out their "associated operations" could not make any difference to the legal

69 The motive defence could not help if either A's transfer or B's transfer was made for tax avoidance reasons; or even if B's transfer was innocent but A was unable to prove it: see 49.38 (Associated operations and motive defence before 5 December 2005).

70 The provisions have a complex history: see the 2014/15 edition of this work para 28.11.2 (Position before 2007/08). But the obscurities of the pre-2007 law do not shed much light on the obscurities of the current law.

71 Contrast the approach to "disposition by associated operations" in *IRC v Brandenburg* [1982] STC 555, where Special Commissioners added a gloss that a disposition made by associated operations (for IHT purposes) must be "put in train" by one person: see Venables, "Gifts by Associated Operations" 5 PTPR 11 <http://www.khpplc.co.uk/reviews>

72 See 94.7 (A gives to B, B gives to trust).

conclusion, *unless the Special Commissioners had found as a fact that it negated the “conjunction” or association between the two operations - the transfer to and the transfer by Woodgate.*<sup>73</sup>

Thus although the two transactions in *Corbett* were associated, the position would have been different if some (more substantial) break had broken the “association” between the operations. What amounts to a sufficient break was a question of fact.

#### 45.13.2 *Transfer to trust + trust migration pre-2006*

Suppose:

- (1) In 1970, A transfers assets to a discretionary trust with UK trustees (“A’s transfer”);
- (2) In 2000, the UK trustees appoint foreign trustees and transfer the trust assets to them (“the appointment of foreign trustees”).

The appointment of foreign trustees is a relevant transfer. (The appointment of foreign trustees involves a transfer of assets, as a result of which income arises to the non-resident trustees.) The question is whether A’s transfer does likewise. That is, is it a relevant transfer?

A’s transfer meets part (a) of the definition: it is a transfer of assets.

A’s transfer alone does not satisfy transfer causation condition (i). Income becomes payable to a person abroad. But transfer causation condition (i) is not satisfied because it is not as a result of A’s transfer alone that income has become payable to the offshore trustees.

However, the appointment of foreign trustees is an operation associated with A’s transfer. Although a clean-break test is implied (to make the section work, as discussed above), in this example there is no clean break.<sup>74</sup>

---

<sup>73</sup> 25 TC 305 at p.314.

<sup>74</sup> A fiduciary thread binds the transfer and the operation: see 4.7.5 (Trust appointment: Filling blanks)

The position in 45.13.1 (A transfers to B + B to C: Clean-break test) is different. There, B’s transfer is independent in a way that trustees are not, because trustees are constrained by the fiduciary nature of their powers.

This view is supported by obiter dicta in *Congreve v IRC* 30 TC 163. This concerned a gift to a UK company which became non-resident. This was a relevant transfer without the association operations rule. See 45.7 (Income “payable” to person

### 45.13.3 *Transfer to trust + transfer to co*

This is in principle the same as 45.13.2 (Transfer to trust + trust migration pre-2006). This applies whether the transfer by the trustees is gratuitous or in exchange for shares, debentures or an offshore life policy. If the investment is for wholly commercial reasons, it might be argued that is not the case and so the income of the underlying company is not within the ToA provisions; but the better view is that there is no clean break here.

### 45.13.4 *Transfer to co + co migration*

This is a relevant transfer even without the associated operations rules.<sup>75</sup>

### 45.13.5 *Transfer to trust + trust migration post-2006*

Suppose the facts of 45.13.2 (Transfer to trust + trust migration pre-2006), but assume the migration occurred after 6 April 2006. The trustees are deemed to be a single continuing person.<sup>76</sup> The analysis is therefore different. The appointment of foreign trustees does not involve any transfer. Instead the analysis is the same as 45.13.4 (Transfer to co + co migration). The end result is the same, though the route to that destination is different.

## 45.14 **Income of person abroad**

The concept of “income of the person abroad” is relevant for several purposes of the ToA provisions:

- (1) There is a relevant transfer only if “income becomes payable” to a person abroad. If *no* income becomes payable then there is no relevant transfer and the ToA provisions do not come into effect.
- (2) The *identity* of the income payable to the person abroad as a result of the transfer is relevant:
  - (a) for s.720 ITA, as one must ask whether the transferor has power to enjoy that income;

---

abroad). But the House of Lords also held (at p.206) that the company becoming non-resident was an associated operation; and (by inference) income arose to the company abroad as a result of the transfer and associated operation.

<sup>75</sup> See above footnote.

<sup>76</sup> 6.3 (Trustees a distinct person).

- (b) for s.731 ITA, as one must ask whether that income can be used to benefit an individual.
- (3) The *amount* of income payable to the person abroad as a result of the transfer is relevant as ascertaining that amount is the first step in computing the amount of s.720 income, and the amount of relevant income for s.731.

There are different concepts of income, or, to put it another way, different codes of rules for computing income:

- income for income tax purposes
- income for corporation tax purposes
- income for trust law purposes
- income for accountancy purposes

The transfer of asset rules refer to “income”. This means income for income tax purposes, because the transfer of asset rules are part of the Income Tax Acts.

## 45.15 Capital receipts deemed income

ToA draft guidance provides:

### **INTM600400 Income becomes payable to person abroad: Income**

... As well as items that are specifically treated as income there are also items treated as income for some income tax purposes but which may not be income of a person abroad for the purpose of transfer of assets. In considering whether any item is income it is relevant to consider its character in the hands of the person who actually receives it. In the absence of a specific provision that identifies a particular item as income for all UK tax purposes or specifically for the purpose of the transfer of assets legislation, if it is not income in the hands of the person abroad who actually receives it then it is unlikely to be income for the purpose of transfer of assets....

### 45.15.1 *Dividends, etc*

Section 383(1) ITTOIA provides the charge on dividends and other distributions of a UK resident company and s.383 continues:

- (2) For income tax purposes such dividends and other distributions are to be treated as income.
- (3) For the purposes of subsection (2), it does not matter that those

dividends and other distributions are capital apart from that subsection.

This applies for ToA purposes and for s.624 ITTOIA, so the distribution on a purchase of own shares, for instance, is income for those purposes<sup>77</sup> even though it is a capital receipt for trust law purposes. Likewise a gain deemed to be income under the transactions in land rules.

The same applies to income deemed to arise under s.410 ITTOIA on a stock dividend of a UK company to a trust. HMRC point out that this provision does not however apply on a stock dividend to a company. ToA draft guidance provides:

**INTM601160 the income charge: what is the measure of income: stock or scrip dividends**

Where an individual owns shares in a UK resident company that makes a stock or scrip dividend payment (see CTM17005), in respect of those shares, that individual is treated for UK income tax as having received an amount of income equal to the appropriate amount in cash. The amount is however only regarded as the income of the individual and is not regarded as income for all purposes of the Taxes Acts. Thus if the person abroad is, for example, a company, that stock dividend from a UK company would not on the face of it be income in the company's hands. As such it would not be taken into account as income that becomes payable to a person abroad for the purposes of transfer of assets.

The position for a stock dividend from a foreign company may however be different. The provisions relating to stock dividends in Chapter 5 Part 4 ITTOIA only apply in respect of stock dividends from UK companies. In considering such an item received from a foreign company regard would need to be taken of the relevant foreign law as well as the character in the hands of the receiver. If it is not income in the hands of the person abroad or otherwise specifically treated as income it will fall outside the transfer of assets provisions.

On gains from offshore funds: see 64.10 (OIG arising to non-resident trust). On gains from life policies see 62.10 (ToA: chargeable-event gains).

## **45.16 Income of person: Quantum**

---

<sup>77</sup> This is assumed to be the case in the drafting of s.482 ITA.

This section considers the amount of the income arising to the person abroad as a result of the transfer and associated operations.

#### 45.16.1 *Administration costs*

In *Chetwode v IRC* 51 TC 647 an offshore company received dividends and interest of about £3,000 per annum. The transferor was taxed on the gross amount of that income, without deduction for (i) investment advice fees, (ii) management fees, (iii) safekeeping charges, (iv) security handling fees and bank charges, (v) registered office and executive office fees, totalling about £1,000 per annum. The approach of *Chetwode* was that s.720 should be construed so as to put the transferor in the same position as if they had retained the assets. Had he done so he could not have deducted these investment costs for the purposes of calculating his income. So there was no deduction for s.720 purposes. This is consistent with s.624.<sup>78</sup>

A deduction is allowed for the cost of collecting foreign income which would have been incurred had the investment income been instead received by the transferor in person.<sup>79</sup> But that does not come to much.

For s.731 purposes, expenses will be deducted in computing relevant income.

#### 45.16.2 *Trade income/loss of person*

Trading income can be calculated:

- (1) by accountancy principles, under which statutory non-deduction provisions such as s.34 or s.45 ITTOIA would not apply, and depreciation would in principle be allowed; or
- (2) by income tax principles applicable to calculating trading profits.

ToA is an income tax code, in the Income Tax Acts, and so IT principles apply.<sup>80</sup>

---

<sup>78</sup> See 44.2.3 (Trust expenses).

<sup>79</sup> See 15.11 (RFI collection costs).

<sup>80</sup> If authority is needed, see *Chetwode* at p.687 “In the case of a trade, it is necessary to strike a balance, in respect of a period, before any taxable “income” arises;” *Vestey v IRC* 54 TC at p.528 (Special Commissioners).

Trading income arises at the end of an accounting period; see 17.15.1 (What is trading income). Thus income for an accounting year ending (say) 30 June 2015 will

HMRC agree. ToA draft guidance provides:

**INTM601120 the income charge: trading companies**

The income of a trading company which is to be taken into account for the purposes of the income charge is generally the balance of profits that would be chargeable to tax in the UK. Therefore in arriving at this amount regard should be had to the provisions in Part 2 ITTOIA 2005 [which govern trading income].

It may be that deductions are claimed in respect of emoluments paid by a company to the individual who is subject to the income charge. If a deduction is allowable under ‘normal principles’ as above then, although the amount within the income charge is effectively reduced, emoluments are within the direct income tax charging rules.<sup>81</sup>

Profits are computed on a current year basis<sup>82</sup> but that does not much matter after the abolition of the preceding year basis (which formerly applied to trading income).

For losses, RI 201 provides:

The Revenue’s practice is only to allow trading losses to be carried forward and set against future trading profits. They cannot be offset against investment income of the same, previous or future years.<sup>83</sup>

ToA draft guidance makes the same point:

**INTM601120 the income charge: trading companies**

...In circumstances where an offshore company’s trading expenses exceed its income the result will be a loss. The transfer of assets provisions are charging provisions only and, specifically, charge income treated as being that of the individual. There is no provision for treating

---

be treated as arising in 2015/16.

81 For completeness: *Hoey v HMRC* [2019] UKFTT 489 (TC) at [162] - 169] offers a straightforward example, if one is needed. *Hoey* concerned an EBT scheme, see 49.34 (Employee benefit trusts). The person abroad/employer received fees from 3<sup>rd</sup> parties, and paid sums (i) to the employee/transferor and (ii) to an EBT; both counted as earnings of the employee. Both sums were deductible in computing the (trading) income of the person abroad. Further consideration will be needed when this case is final.

82 *Vestey v IRC* 54 TC at p.528 (Special Commissioners).

83 This is consistent with the position for property income losses. See 44.2.2 (Property business losses).

such a loss as that of the individual.

However it is HMRC's practice to allow an offshore company's trading losses to be carried forward and to be set off against the future profits of the company. They cannot be offset against the company's investment income of the same, previous or future years. ...

For s.731, losses will be deducted in computing relevant income if paid out of relevant income.

There is no group relief.

#### 45.16.3 *Property income*

The rules for measuring property income of the person abroad are the same as for the settlor-interested trust code; see 44.2.1 (Property business income). Transfer pricing may also need consideration here.

ToA draft guidance provides:

**INTM601280 the measure of income: income from property**

Where there is rental income, any profits should be arrived at in accordance with the rules in Part 3 ITTOIA 2005.<sup>84</sup>

#### 45.16.4 *Loan relationship and Forex income*

Since income is computed on IT principles, "income" does not include profits computed under loan relationships and Forex rules, which apply for CT and not for IT purposes. This is so even if the person abroad is a company.

HMRC agree. ToA draft guidance provides:

**INTM601120 the income charge: trading companies**

It should be noted that forex and loan relationship rules apply for Corporation Tax purposes only.

The same would apply for the CT intangible fixed assets code.

#### 45.16.5 *Exchange rate profits/losses*

ToA draft guidance provides:

---

<sup>84</sup> The draft guidance adds: [*and Part 4 Corporation Tax Act 2009?*] Part 4 CTA 2009 concerns corporation tax on property income. ToA requires income to be ascertained on IT, not CT principles; but I doubt any differences between IT and CT property income codes are relevant here.

**INTM601260 what is the measure of income: profit on exchange**

If the accounts of a person abroad show a profit on exchange, this should not be treated as income of the person abroad for the purposes of the income charge. The profit usually derives from a difference between the exchange rates in force when the income is credited in the accounts of the person abroad and the rates ruling:

- when that income is actually remitted to the person abroad, or
- if not remitted, at the date to which the accounts are made up.

The income as it arises to the person abroad is to be deemed to be that of the individual (*Chetwode v IRC*, 51 TC 647) and we are therefore concerned only with the exchange rates in force at the time when the income is receivable by the person abroad. A profit on exchange is merely a book-keeping entry necessary to ensure that the cash position of the person abroad tallies with the income actually remitted, or which could be remitted at the date at which the accounts are made up.

On the same basis, any loss on exchange should not reduce the income of person abroad in arriving at the income charge.

**45.17 EU-law ToA defences***45.17.1 Terminology*

I use the following terminology:

The “**statutory EU-law ToA defence**” is the defence to the ToA provisions in s.742A ITA.

The “**case law EU-law ToA defence**” is the defence read into the motive defence in *Fisher v HMRC*<sup>85</sup> in order to make the then ToA law EU-law compliant.

*45.17.2 ToA: EU-law background*

In 2011 the European Commission formally requested the UK to amend the ToA provisions.<sup>86</sup> The request took the form of a reasoned opinion, the second step of the infringement procedure.<sup>87</sup> The text of the reasoned opinion was not published, but an EC press release provided the main details:

---

85 See 45.19 (Case law EU-law defence).

86 And also s.3 TCGA. See 60.13 (EU-law compliance).

87 Art.258 TFEU.

The first infringement relates to the UK's "transfer of assets abroad" legislation. Under this legislation, if a UK resident individual invests in a company by transferring assets to it, and if this company is incorporated and managed in another Member State, then the investor is subject to tax on the income generated by the company to which he/she contributed the assets. However, if the same individual invested the same assets in a UK company, only the company itself would be liable for tax.

The EC analysis was as follows:

...the Commission considers there to be discrimination, seeing as investments outside the UK are taxed more heavily than domestic investments. The difference in tax treatment between domestic and cross-border transactions restricts two fundamental principles of the EU's Single Market, namely of the freedom of establishment and the free movement of capital ....

The Commission is of the opinion that both restrictions are disproportionate, in the sense that they go beyond what is reasonably necessary in order to prevent abuse or tax avoidance and any other requirements of public interest.<sup>88</sup>

The ToA rules (unlike s.3 TCGA) have no *de minimis* exception so the provisions fall within the free movement of capital rule and not just freedom of establishment. This is significant in relation to non-EU states.

In response parliament enacted the statutory EU-law defence.

The EC view was upheld in *Fisher v HMRC*, where HMRC made only a modest effort to defend the pre-2013 ToA rules. *Fisher* introduced the case law EU-law defence. That renders the statutory defence more or less a dead letter, and its many puzzles of interpretation should never need to be resolved; but I will discuss it here for completeness.

#### **45.18 Statutory EU-law defence**

The background can be traced through HMRC consultation and response documents<sup>89</sup> but these are now mainly of historical interest.

---

88 IP/11/158, 16 February 2011. CIOT had lobbied the EC to take this step.

89 HMRC, "Reform of two anti-avoidance provisions (i) the attribution of gains to members of closely controlled non-resident companies, and (ii) the transfer of assets abroad" (July 2012).

Section 742A(1) ITA provides:

Subsection (2) applies for the purpose of determining the liability of an individual to tax under this Chapter by reference to a relevant transaction if—

- (a) the transaction is effected on or after 6 April 2012, and
- (b) conditions A and B are met.

I refer to “**EU-law conditions A and B**”.

Assuming these conditions are satisfied, s.742A(2) ITA provides the relief:

Income is to be left out of account so far as the individual satisfies an officer of revenue and customs that it is attributable to the transaction.

The EU-law defence shares some features with the ToA motive defence, so the following topics are considered elsewhere:

49.44 (Tax return: Motive/EU defence).

49.45.1 (“Satisfies an officer”).

49.46 (Appeals).

49.47 (Motive/EU defence: Disclaimer).

#### 45.18.1 *Attribution of income*

The EU-law defence requires one to ascertain what income is attributable to the transaction. Suppose:

- (1) Before 2012, T makes a transfer of assets to non-resident company within s.720.
- (2) After 2012, the company uses the funds in a transaction which meets

---

HMRC, “Reform of two anti-avoidance provisions ... Summary of Responses” (December 2012)

HMRC, “Reform of an anti-avoidance provision: Transfer of Assets Abroad” (2013)

<https://www.gov.uk/government/consultations/reform-of-an-anti-avoidance-provision-transfer-of-assets-abroad>

HMRC, “Reform of an anti-avoidance provision: Transfer of Assets Abroad Outcome of Consultation” (December 2013)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/267976/Transfer\\_of\\_assets\\_outcome\\_of\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/267976/Transfer_of_assets_outcome_of_consultation.pdf)

EU-law conditions A and B, and which generates income. For instance:

- (a) the company buys and sells (in a trading transaction).
- (b) the company acquires income producing assets.

It is suggested that the income is attributable to the post-2012 transaction. Suppose:

- (1) A transfer of an asset before 2012.
- (2) Income arises from the asset after 2012.

Is step (2) still a relevant transaction?

#### 45.18.2 *Genuine transaction*

It is convenient to deal first with EU-law condition B.

Section 742A(5) ITA provides:

Condition B is that the individual satisfies an officer of Revenue and Customs that, viewed objectively, the transaction must be considered to be a genuine transaction having regard to any arrangements under which it is effected and any other relevant circumstances.

The requirement is that the transaction must be “genuine”. The rest is verbiage.

“Genuine” is best regarded as a label for a complex set of rules. In order for a transaction to qualify as genuine, the transaction must satisfy:

- (1) (a) The arm’s length requirement in s.742A(6); or
  - (b) The non-arm’s length requirement in s.742A(11)
- (2) The economically significant activities requirement in s.742A(8)

These rules are expressed to be “without prejudice to the generality of subsection (3)(a) or (5)” so the transaction must also be “genuine” in the ordinary meaning of the word. The word “genuine” has various meanings,<sup>90</sup> but none of them make sense here so it is suggested that a transaction which meets these conditions is “genuine”.

#### 45.18.3 *“Genuine”*: *Arm’s length*

---

<sup>90</sup> In a legal context, the meanings are primarily: (1) not a sham; (2) not tax avoidance (3) an intensifier; see 49.15.3 (“Genuine”).

Section 742A(6) ITA provides:

Without prejudice to the generality of subsection (3)(a) or (5), in order for the transaction to be considered to be a genuine transaction the transaction must not—

(a) be on terms other than those that would have been made between persons not connected with each other dealing at arm's length, or

(b) be a transaction that would not have been entered into between such persons so dealing,

having regard to any arrangements under which the transaction is effected and any other relevant circumstances.

I refer to this as the “**arm's length requirement**”.

The wording is derived from s.738(3) ITA; for discussion see 49.6.2 (Arm's length requirement). The last phrase (“having regard ...”) is otiose.

#### 45.18.4 “*Genuine*”: *Non-arm's length*

Section 742A(11) ITA provides:

Subsection (6) does not apply if—

(a) the relevant transfer is made by an individual who makes it wholly—

(i) for personal reasons (and not commercial reasons), and

(ii) for the personal benefit (and not the commercial benefit) of other individuals, and

(b) [i] no consideration is given (directly or indirectly) for the relevant transfer or otherwise for any benefit received by any individual mentioned in paragraph (a)(ii), and

[ii] all assets and income falling within subsection (12) are dealt with accordingly.

It is difficult to see what the legislation is trying to stop here. In practice straightforward gifts to trusts will qualify. EN FB 2013 offers this case as its sole example (though even that is expressed tentatively – note the *may*):

This may be the case where, for example, an individual settles assets into a non-resident trust for the benefit of his family.

This would not apply if trustees or a company make the relevant transfer.

It would not apply if there were some consideration as opposed to nil consideration. But why? The legislation seems disproportionate here, which would be another basis for saying that the statutory EU-law defence is (ironically) not EU-law compliant.

#### 45.18.5 *Assets within subs.(12)*

The expression “assets and income falling within subsection (12)” is used:

- (1) In the non-arm’s length transaction test (above); and
- (2) In the economically significant activities test (below).

Section 742A(12) ITA provides:

The assets and income falling within this subsection are—

- (a) any of the assets transferred by the relevant transfer;
- (b) any assets directly or indirectly representing any of the assets transferred;
- (c) any income arising from any assets within paragraph (a) or (b);
- (d) any assets directly or indirectly representing the accumulations of income arising from any assets within paragraph (a) or (b).

The wording is taken from the definition of associated operation.<sup>91</sup>

Section 742A(13) ITA provides:

In subsections (11) and (12) references to the relevant transfer are to—

- (a) if the transaction mentioned in subsection (1) is a relevant transfer, the transfer, or
- (b) if the transaction so mentioned is an associated operation, the relevant transfer to which it relates.

#### 45.18.6 *Economically significant*

Section 742A(7)(8) ITA must be read together to follow the sense:

- (7) [a] Subsection (8) applies if any asset or income falling within subsection (12)
  - [b] is used for the purposes of, or is received in the course of, activities carried on in a territory outside the UK
  - [c] by a person (“the relevant person”)
  - [d] through a business establishment which the relevant person has in that territory.

---

<sup>91</sup> See 45.11 (Associated operation: Definition).

(8) Without prejudice to the generality of subsection (3)(a) or (5), in order for the transaction to be considered to be a genuine transaction the activities mentioned in subsection (7) must consist of the provision by the relevant person of goods or services to others on a commercial basis and involve—

- (a) the use of staff<sup>92</sup> in numbers, and with competence and authority,
  - (b) the use of premises and equipment, and
  - (c) the addition of economic value, by the relevant person, to those to whom the goods or services are provided,
- commensurate with the size and nature of those activities.

I refer to this as the “**economically significant activities requirement**”. “Goods and services” should be construed widely to include letting of property or the licensing of intellectual property rights. Otherwise the provision would not be EU-law compliant.

For a discussion, see 102.15.5 (Genuine economic activities).

#### 45.18.7 “*Business establishment*”

“Business establishment” matters for s.742(7)[d].

Section 742A(10) ITA provides:

To determine if a person has a “business establishment” in a territory outside the UK, apply sections 1141, 1142(1) and 1143 of CTA 2010 as if in those provisions—

- (a) references to a company were to a person, and
- (b) references to a permanent establishment were to a business establishment.

In short, “business establishment” means the same as (in my terminology) a UK-law PE.<sup>93</sup> In parliament, David Gauke (Exchequer Secretary to the Treasury) said:

The legislation does not distinguish between trading and investment activities as such. It specifies that if there is an overseas business establishment the activities must consist of the provisions of goods or

---

92 Section 742A(9) ITA defines “staff” widely: “In subsection (8)(a) “staff” means employees, agents or contractors of the relevant person.”

93 See 101.2 (PE: UK-law/OECD Model meanings).

services on a commercial basis. The threshold for commercial activity can be met by an investment or holding company that provides services, as well as a trading entity. If unusually an investment or holding company does not carry out its activities through an overseas business establishment, a transaction may still be genuine, and the activities will not be subject to the test in subsections (7) and (8) of proposed new section 742A, but will be subject to the rest of the proposed new section and will be exempted if genuine. That means that it will always be possible for an investment or holding company to be exempt in accordance with EU law, if the overall arrangements are genuine and serve EU treaty aims.<sup>94</sup>

#### 45.18.8 *Partial relief*

Section 742A ITA provides:

(14) Subsection (15) applies if—

- (a) subsection (2) would apply in relation to a transaction but for the individual being unable to satisfy an officer of Revenue and Customs for the purposes of condition B that the transaction meets the requirements set out in subsection (6), but
- (b) the individual does satisfy an officer of Revenue and Customs that those requirements are met in relation to a part of the transaction.

(15) Subsection (2) applies as if the reference to the transaction were to that part of the transaction.

#### 45.18.9 *EU-law condition A*

Section 742A(3) ITA provides:

Condition A is that—

- (a) were, viewed objectively, the transaction to be considered to be a genuine transaction having regard to any arrangements under which it is effected and any other relevant circumstances, and
- (b) were the individual to be liable to tax under this Chapter by reference to the transaction,

---

94 Public Bill Committee 21 May 2013

<http://www.publications.parliament.uk/pa/cm201314/cmpublic/financeno2/130521/pm/130521s01.htm>

the individual's liability to tax would, in contravention of a relevant treaty provision, constitute an unjustified and disproportionate restriction on a freedom protected under that relevant treaty provision.

The hypotheses in 742A(3)(a)(b) add nothing:

(a) Para (a) repeats EU-law defence condition B.

(b) If there is no liability (para (b)) then the EU-law defence is not needed.

So condition A amounts to the condition that:

the individual's liability to tax [under the ToA provisions] would, in contravention of a relevant treaty provision, constitute an unjustified and disproportionate restriction on a freedom protected under that relevant treaty provision.

The relevant treaty is TFEU or the EEA agreement.<sup>95</sup> For the EU law, see 102.15 (Abuse).

ToA draft guidance provides:

**INTM603160 Genuine transactions exemption: Examples**

Creating an establishment overseas, whether or not the activities are carried on by a company, will attract exemption provided the activities are genuinely commercial and transactions take place at arm's length. But HMRC will examine the arrangements to ensure that, for example, they do not in reality reflect a UK establishment which is fronted by the foreign arrangements. Where activities do take place both overseas and in the UK, the UK activities will not fall within the exemption, as the arrangements in this respect would constitute artificial profit shifting and an abuse.

I am not sure what HMRC have in mind here.

For the purpose of determining where activities take place, the principles of profit attribution will be applied, having regard to actual situation of assets which generate profit, where key decisions are taken,

---

95 Section 742A(4) ITA provides: "In subsection (3) "relevant treaty provision" means—

(a) Title II or IV of Part Three of the TFEU,

(b) Part II or III of the EEA agreement, or

(c) the provision of any subsequent treaty replacing a provision mentioned in paragraph (a) or (b)."

where key decision making persons habitually reside, and where decisions are truly taken.

### **Assets managed abroad**

The offshore funds legislation in Part 8 of TIOPA 2010 is designed to charge offshore income gains and prevent the avoidance of tax on income accruing. The ToA provisions, among other things, prevent this legislation being circumvented through the transfer of assets into the hands of a manager based offshore. Although the overseas management activity may itself be rewarded on an arm's length basis, this does not mean that returns on the assets will escape UK tax where the conditions of the ToA provisions are satisfied.

I am not sure what HMRC have in mind here either.

There will be a movement of capital but in order to benefit from the engagement of freedom of movement of capital it will be necessary to demonstrate that the purpose of the freedom is served. The purpose of freedom of movement of capital is to secure its effective allocation, and that requires a link to the place of investment and not simply seeking to balance return and risk as a manager normally does according to instructions given. In order to engage the freedom it will be necessary to demonstrate that the beneficiary has influence over the disposition of the capital in a particular State in contrast merely to arranging for its management offshore.

#### 45.18.10 *EU-law defence: Commencement*

Para 9(2) Sch 10 FA 2013 provides:

The amendments made by paragraphs 3 to 8 above have effect for the tax year 2012-13 and subsequent tax years.

The relief applies from 2012/13.

Section 736(2A) ITA provides:

The exemption given by section 742A applies only in the case of a relevant transaction effected on or after 6 April 2012.

The same rule is imposed by s.742A(1)(a) ITA. Thus what matters is the date of the transaction, not the date that the income arises.

This seems a strange commencement rule. When UK law is amended to become EU-law compliant, the amendment is usually made prospectively, or not backdated very far, leaving taxpayers to pursue EU-

law remedies for earlier years. However one might have expected the new law to apply to income from 2012, not to transactions from 2012.

#### 45.18.11 *Is defence EU-law compliant*

It seems ironic to say that the statutory EU-law defence is not sufficient to make the law EU-law compliant; my terminology is not entirely apt. But there it is.

In February 2014 CIOT asked the EC to pursue its complaint on the grounds that the rules are still not EU-law compliant. CIOT's main complaint is EU-law condition B (genuine transaction). If condition A is met, there is necessarily a breach of EU law and it is a breach of EU law, to specify any further conditions which have to be satisfied as a defence to the ToA code. The EC has not withdrawn its complaint so the issue is ongoing.

In the meantime, however, *Fisher v HMRC* has solved the issue by creating a case law EU-law defence.

#### 45.19 Case law EU-law defence

In *Fisher v HMRC*, the UT held the ToA rules were in breach of the freedoms of movement and of establishment.<sup>96</sup>

The [s.720] tax charge in the present case is unjustifiable because it does not target wholly artificial arrangements (however widely that concept is interpreted) but also transactions which could not possibly be described as constituting or involving artificial arrangements. This case involved a bona fide transfer at market value of an ongoing business from one company to another. As the FTT found, SJG is a genuine trading company which pays tax on its profits in accordance with the tax regime in force in Gibraltar. These measures seek to tax the Fishers on the same profits, which are generated from activities carried on in Gibraltar. Making someone pay tax on profits from a genuine business that have already been taxed in the territory in question cannot be characterised as preventing tax avoidance, as that concept is recognised in EU law, and even if it could, it goes far beyond what might be regarded as proportionate to achieve that objective. The charge is

---

96 [2020] UKUT 62 (TCC) at [179]. The position will have to be reviewed when the case is final.

disproportionate because it provides for all income arising from the transfer and associated operations to be attributed to a "quasi-transferor" irrespective of whether that person has actually received it. Those profits are then taxed at income tax rates rather than corporation tax rates, and as such are subject to a higher tax charge.

The UT approved the conforming interpretation adopted by the FTT:

679. ... the conforming interpretation would recast the motive defence so as to construe tax avoidance in the more restricted European law sense of artificiality so that the provision did not operate so as to catch exercises of freedom of establishment and movement of capital protected by the Treaty...

681. We think a conforming interpretation along the lines the appellants suggest is possible with the following caveat. In seeking a conforming interpretation which ensures the relevant freedom is not infringed, we are mindful of the need to not go further than necessary. In our view the appellants' suggested conforming interpretation therefore needs a further gloss. This is that their reinterpreted more restrictive definition of "avoidance" in the motive defence need only be applied to those situations where the individual subject to the charge is exercising Treaty freedoms. A conforming interpretation, (using a narrow conception of avoidance) which applied irrespective of whether a person's treaty freedoms had been infringed would be going further than what was necessary to ensure compliance with s2 of EC Act 1972.<sup>97</sup> It would, for instance, apply the benefit of the more limited definition to movements to third countries....

683. Interpreted accordingly, in respect of [a citizen of one MS], the person charged to tax, who was exercising a freedom to establish in [another MS] "avoidance" in the motive defence would be construed in the narrower sense. When it is asked what was the purpose for which the transfer was made, the fact the purpose was to take advantage of lower betting duty ... would not mean the purpose was an avoidance purpose. ...

689. ...the conforming interpretation, if it is commensurate with the infringement which give rises to the need for the conforming interpretation in the first place, will not apply to persons whose

---

97 For s.2 European Communities Act 1972, see 102.5 (EU/UK law relationship).

situation does not fall within the scope of EU law.<sup>98</sup>

The position is more complex in the case of a transfer to Gibraltar, which is in the unique position of being outside the UK for the purposes of the ToA code, but part of the UK for the purposes of EU law. In this case s.720 could not apply to a transferor who was a UK resident citizen of Ireland. The husband of the Irish transferor was entitled to the same EU law defence, but their adult child was not. The reader may think that odd; the UT went as far as “counter-intuitive”. But this issue will not often arise.

#### 45.19.1 *EU-law defence: Critique*

In the 2014/15 edition of this work I said:

It is melancholic to compare the complexities of the statutory EU-law ToA defence with the relative simplicity of the [s.3 TCGA] equivalent.<sup>99</sup> It is suggested that the vast apparatus of s.742A should be replaced by a simple provision:

*This chapter shall not apply in relation to income arising from economically significant activities<sup>100</sup> carried on by the person abroad.<sup>101</sup>*

But subject to a review when the decision is final, *Fisher v HMRC* has offered an alternative solution. The statutory EU-law defence should be repealed and replaced by the case-law defence alone. There is no need to encode it into a statutory provision, and little point in trying to do so.

#### 45.20 Spouse of transferor

Section 714(4) ITA provides:

In this Chapter [Chapter 2 Part 13, ToA provisions] references to individuals include their spouses or civil partners.

There are many references to individuals in the ToA provisions.

---

98 [2014] UK FTT 804 (TC).

99 See 60.19 (Economically significant).

100 This term would be defined in line with the CGT equivalent.

101 Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (13<sup>th</sup> ed., 2014), Vol.1 p.69.

Definitions take effect subject to context. This extended definition cannot be intended to apply where statute provides that income is treated as accruing to an individual, whether to the transferor under s.721 or to a beneficiary under s.732: income should not be treated as accruing to the individual *and* the spouse.

The main purpose of the extended definition is no doubt to ensure that if the spouse has power to enjoy, then the transferor is regarded as having power to enjoy and so can fall within s.720. But in other places where the word individual is used, the extended definition should similarly apply, unless the context otherwise requires. For instance, the transferor's spouse may qualify for the taxable-transferor defence to s.731.<sup>102</sup>

See too 89.15 (Gift to spouse: s.720).

---

102 See 36.10.3 (Spouse of taxable-transferor).

## CHAPTER FORTY SIX

# TRANSFER OF ASSETS ABROAD: TRANSFERORS

### *Cross references*

The following topics are considered elsewhere:

- 44.13 (s.624/s.720 compared)
- 40.12 (s.720: Transferor tax rate)
- 88.15 (s.720: Protected-trust relief)

## 46.1 Transferor charge: Introduction

This chapter considers two IT charges on transferors:

### **ITA Applies if:**

- s.720 Transferor has power to enjoy income of person abroad
- s.727 Transferor receives capital sum

Section 720 is by far the more important.

In this book:

The “**s.720 charge**” is the charge under this section. ToA draft guidance calls it the “income charge”.

“**s.720 income**” is income which is charged under this section.

## 46.2 Charge on transferor

Section 720 ITA provides:

(1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.

(2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions)...

So far we have a charge, and (unusually for tax) a reason is given for it. Who is liable? We read on to s.720(5):

The person liable for any tax charged under this section is the individual to whom the income is treated as arising.

Thus s.720 does not tell us directly who is liable. We need to read on to s.721(1). But we find a further referential provision:

Income is treated as arising to such an individual as is mentioned in section 720(1) ...

The charge is imposed on “such an individual as is mentioned in s.720(1)”. So we turn back to s.720(1) to see who is the individual there mentioned.

The wise words of Garner are worth quoting here:

*Such* is a deictic (pointing) term that must refer to a clear antecedent.<sup>1</sup>

Failure to observe this point – obvious though it may seem – has given rise to a good deal of litigation.

There are broadly two possible views of what is required to be “such an individual” as is mentioned in s.720(1):

- (1) Individuals who are UK resident, and no more: (“the widest (*Congreve*) view”), or
- (2) Individuals who:

---

1 Garner, *Dictionary of Legal Usage* (3rd ed., 2011), entry under *Such*.

Pinter exploits the ambiguity in *No Man’s Land*:

“... there are some people who appear to be strong, whose idea of what strength consists of is persuasive, but who inhabit the idea and not the fact. What they possess is not strength but expertise. They have nurtured and maintain what is in fact a calculated posture. Half the time it works. It takes a man of intelligence and perception to stick a needle through that posture and discern the essential flabbiness of the stance. I am *such a man*.”

- (a) are UK resident; and who do something in addition:
- (b) avoid liability to IT “by means of relevant transfers” (“the limited view”)

The intention of the ITA rewrite was to rewrite the law, and so far as the law was unclear, to retain its ambiguity. It is because the rewrite had such limited remit that it achieved so little. Or perhaps if its remit had been wider, its work could not have been achieved at all?

However that may be, EN ITA provides:

2144. Sections 739(2) and (3) of ICTA indicate the person liable by using the expression “such an individual” – but do not make it clear how much of section 739(1) is implied by that expression. [Sections 721] and 728 ITA, which are based on section 739(2) and (3) ICTA, reproduce the expression “such an individual”, which has been the subject of case law: see, in particular, *Vestey v IRC* 54 TC 503.

After some vacillation, the question of what is meant by the expression “such an individual” has this answer: the widest (*Congreve*) view is not correct. In *Vestey v IRC*:<sup>2</sup>

There are undoubtedly two possible interpretations of [s.720], particularly having regard to the preamble [s.720(1)].

The first is to regard it as having a limited effect: to be directed against persons

[1] who transfer assets abroad;

[2] who by means of such transfers avoid tax,

[3] and who yet manage when resident in the UK to obtain or to be in a position to obtain benefits from those assets [ie have power to enjoy].

For myself I regard this as being the natural meaning of the section...

The second is to give the whole section an extended meaning, so as to embrace all persons, born or unborn, who in any way may benefit from assets transferred abroad by others [ie have power to enjoy]. ... This I regard as a possible but less natural meaning of the section.

---

2 54 TC 503 at p.583- 584. This passage is from the speech of Lord Wilberforce with which 2 others agreed.

In *HMRC v Rialas* [2020] UKUT 367 (TCC) at [30] - [49] the UT considered that other speeches in *Vestey* offered a different reason for their decision; but they accepted that the passage cited here should be taken as the reasoning binding on them.

... the better interpretation of the section is ... one limiting its operation and charging effect to the transferors of assets.

There are two distinct points here.

- (1) The court rejected the widest (*Congreve*) view.
- (2) The court understood the words in s.720(1), which under the limited view are incorporated by s.720(5)/s.721(1), require the individual to be charged to be “the transferor of assets”, in short, the transferor.

Point (1) is straightforward; but the implications of point (2) are still contentious and basic issues remain to be resolved. What is required to be a transferor? Or in other words: what is the link which is required between the individual and the transfer?

In *Vestey* itself, HMRC sought to assess non-settlor beneficiaries of a non-resident trust under s.720. The beneficiaries had no involvement at all with the transfer, they were not transferors in any sense, and so not taxable under s.720. So there was no need to pursue this question very deeply.

### 46.3 Who is the transferor

A person cannot be a transferor in the abstract. A person is a transferor in relation to some particular transfer. But where the context is clear it is permissible to refer to a transferor in isolation, leaving the transfer concerned to be understood.

If an arrangement involves several transfers, it is necessary to consider them separately.

It is difficult to imagine a transfer of assets without a transferor. But a company or any person may be the transferor, so the transferor need not be an individual. If there is no individual who is a transferor, the s.720 charge does not apply. An individual who is not a transferor (such as the successful appellants in *Pratt*) may instead fall within s.731, if they receive benefits.

Clearly, anyone who actually makes a transfer is a transferor, but the expression is understood a little wider than that. But the question is, how much wider?

There is next to no guidance in the statute. That refers to individuals who achieve a certain result “by means of relevant transfers”. Rejecting the widest (*Congreve*) view requires a link between the individual and the

transfer. Exactly what the link has been left to the Courts to sort out. The Courts have done so in *Vestey* by saying that the individual must be the transferor. That is a judicial gloss because the statute does not use the word “transferor”.<sup>3</sup> So the word, or concept, of transferor need not be interpreted rigidly.<sup>4</sup> The same applies to “quasi-transferor”.

#### 46.3.1 *Transferor: Reality test?*

Perhaps inevitably, we have references to a “real” transferor. This goes back to *Pratt v IRC*:<sup>5</sup>

notwithstanding that the transfer was a transfer made by [the company] itself, was the reality of the matter that somebody else was the real transferor?

But references to reality do not help much, if at all.<sup>6</sup> Reality needs to be identified. *Pratt* continues:

To answer that question, nobody has so far produced a better suggestion than that of ‘procurement’. It may not be completely apt, but it is far nearer an apt definition than anything else which has so far been suggested.

*Pratt* was *not* proposing a reality test of who is a transferor. Reality was a stepping stone towards the test actually adopted in *Pratt* which was a procurement test. This was a mistake taken by the UT in *Fisher* which actually favoured a reality test:<sup>7</sup>

... a director who is not a shareholder cannot be treated as being, in substance, the ‘real’ Transferor of the company’s assets, and a director who is a shareholder but who does not have a controlling interest cannot be treated as the ‘real’ Transferor instead of the company, merely

---

3 This is self-evident, but if authority is needed, see *HMRC v Fisher* [2021] EWCA Civ 1438 at [65]: “the limitation of liability to “transferors” might ... be termed a “gloss”.”

4 See [App 4.7.1](#) (A judicial gloss).

5 [1982] STC 756 at p.792.

6 See App.6.1 (What do we mean by “Real?”); [App 6.10](#) (Cardinal principle reaffirmed).

7 *Fisher v HMRC* [2020] UKUT 62 (TCC) at [72], [78]. This view of the UT decision in *Fisher* is supported by *HMRC v Rialas* [2020] UKUT 367 (TCC) at [42]: “the Upper Tribunal [in *Fisher*] held that the relevant question in such a case was ‘who was the real transferor?’.”

because he or she participated in the decision of the Board to agree to the sale, voted in favour, or took steps on behalf of the company to implement it”...

None of the Fishers, individually or collectively, did anything which would justify treating each of them as being the ‘real’ Transferor of SJA’s assets.

... The transfer in this case was made by [the company] and not by any of its individual shareholders or directors; there is no basis for treating any of them as the ‘real’ Transferor and [the company] as merely an instrument by which they effected the transfer of the assets.

The scare quotation marks (which are in the original judgment) indicate that the UT felt some unease with the word real; and CA did not adopt a reality test. I think the less said about reality the better.

#### 46.4 Transferor: Procurement test

In *Congreve v IRC* the question of who is a transferor did not arise, because the court adopted the wide view that s.720 applied to non-transferors (this point was reversed in *Vestey*). But the court commented:<sup>8</sup>

But even if we were prepared to accede to the argument that the preamble [now s.720(1) ITA] connoted activity by the individual concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it was not actually executed by him or his agent.

*Pratt* adopted the procurement test,<sup>9</sup> and this has not subsequently been much doubted.

The term used in *Pratt* for someone who procures a transfer is “quasi-transferor”. In general I use the term “transferor” to mean anyone to whom s.720 applies, that is, both those who make a transfer and those who procure it. But sometimes it is helpful to distinguish between:

- (1) the direct transferor (who *makes* a transfer of assets) and
- (2) a quasi-transferor (who *procures* a transfer made by a direct transferor)

Another way to put it would be to say that the transfer made by the direct

8 30 TC 163 at p.197. The House of Lords agreed: see at p.204.

9 See quote in 46.3.1 (Transferor: Reality test?).

transferor is *attributed* to another person (the quasi-transferor). That might actually be a better formulation, as what is required is best regarded as *attribution*. It seems to me to be rather a forced or unnatural understanding of the word transferor to make it include a quasi-transferor. But it comes to the same thing, and the cases so far have not adopted the language of attribution.

The rule that a transferor is a person who transfers or procures a transfer may be compared to the rule that a settlor is a person who provides property directly or indirectly. Indeed I think “indirect transferor” would have been a better term than “quasi-transferor”; but the meaning is the same, and “quasi-transferor”, first coined in *Pratt*, is now established.

While it is, I think, settled law that a person who procures a transfer is a quasi-transferor, and so within s.720, the question is then what is meant by “procure”? This is entirely judge-made law; there is nothing to help in the statute.

#### **46.5 Quasi-transferor when individual is direct transferor**

In *Carvill v IRC*:

- (1) T transferred a majority shareholding to a person abroad, and
- (2) The minority shareholders transferred their shares.

HMRC argued (implausibly) that T was the “transferor” of the minority shareholding, ie that T was a quasi-transferor because he had procured that transfer. But this was rejected:

For an individual to be the transferor in relation to a transfer by another individual would be a considerable extension of this principle. However, there might be cases where, as a matter of fact, one individual’s influence over another was so strong that he was the transferor of the other’s share but this would clearly be an exceptional case. ...

72. [Counsel] contends that the taxpayer was the transferor of the old minority shares. In order to find that this was an exceptional case where the taxpayer did in effect force his will on the other shareholders so as to become the transferor of their shares, one would need strong evidence that this was so. Of course, the taxpayer as majority shareholder and one of the founders of a company bearing his name was in a position of some influence. However, the influence did not go as far as telling other shareholders what to do with their shares. Here the decision by the old

minority to transfer their shares was one which they came to after discussion, having started with different points of view as to the merits of the transfer. There is no evidence that the taxpayer leaned on any of them heavily, for example, by threatening to sack them if they did not. ... there is no evidence that the taxpayer did anything in relation to the old minority shares which would make him the transferor of them, and I find that he was not the transferor of the old minority shares.<sup>10</sup>

In *Rialas v HMRC*<sup>11</sup> the taxpayer (“R”) provided an opportunity to the person abroad. The facts were:

- (1) R contributed £10 to constitute an offshore trust.
- (2) The trust acquired an underlying company (F).
- (3) An unconnected individual (“the vendor”) sold 50% of Argo Capital Management (“Argo”) for \$15m to F (“the share transfer”).
- (4) F borrowed the purchase price.<sup>12</sup>
- (5) Argo paid dividends (used to repay the loan in part).
- (6) 18 months later, F sold its Argo shares for \$25m.

The vendor was the direct transferor of the share transfer. HMRC argued that R was a quasi-transferor, ie, that he procured the transfer of the Argo shares to F, because:

- (1) R established the trust/corporate structure to acquire the Argo shares, by providing funds (£10) for the creation of the Trust and its acquisition of its underlying company.
- (2) R recommended that the trust acquired the Argo shares.
- (3) R approached the lender to lend the necessary funds for the share purchase, agreed the terms of the loan, and introduced the lender to F.
- (4) R guaranteed an income stream to F in the form of dividends, where possible.<sup>13</sup>

---

10 *Carvill v IRC* [2000] STC (SCD) 143 at [71]-[72].

11 [2020] UKUT 367 (TCC). The case is not yet final.

12 It seems incautious, to say the least, for a lender to lend 100% of the purchase price. But in this case the decision turned out to be justified, as the lender was repaid and perhaps the interest rate reflected the risk.

13 If this guarantee had been a legal obligation it would have been a transfer of assets; it must have been an informal.

The FTT rejected the argument:<sup>14</sup>

... Mr Rialas orchestrated the purchase side of the transaction... his was the controlling mind. It is however stretching the meaning of the word “procure” beyond breaking point to suggest that the fact that he organised the purchasing structure means that he dictated to whom [the vendor] should sell his shares.

What about a gratuitous transfer from A to B and from B to the person abroad? The question whether A has procured B’s transfer does not arise, for A is a transferor by virtue of the transfer to B. The true question for A is whether B’s transfer is an associated operation in relation to A’s transfer.<sup>15</sup>

Contrast the position where:

- (1) T transfers assets to A, in consideration for which A transfers assets to a person abroad.
- (2) T transfers assets to a company, in consideration for which the company issues shares to a person abroad.
- (3) T (an employee entitled to a bonus) waives the right to the bonus, in consideration for which the employer transfers assets to a pension scheme abroad.

In case 1, T is not just a quasi-transferor, T is a direct transferor for T has made a transfer of assets. A is also a direct transferor.

In case 2, T is again a direct transferor, and the company is also a direct transferor because the issue of shares is a “transfer” of assets as defined.

In case 3, T has not made a transfer (waiver is not a transfer) but T has procured the transfer, so is a quasi-transferor. The employer is the direct transferor.

In each case, T is within the scope of s.720. So are A (in case 1) and the employer (in case 3) if they are individuals.

#### 46.5.1 *Direct/quasi-transferor individuals*

In a case where there is a quasi-transferor *and* a direct transferor what is the position of the direct transferor under s.720?

---

14 [2019] UKFTT 520 (TC) at [65], upheld on appeal [2020] UKUT 367 (TCC) but further consideration may be needed when the case is final.

15 See 45.13.1 (A to B + B to C: clean-break test).

If the direct transferor is a company the question does not arise, because a company is not within s.720, which only applies to individuals. So the question only arises when the direct transferor:

- (1) is an individual; and
- (2) has power to enjoy (but a transfer to a trust, or a company held by a trust, is likely to meet this requirement as offshore trusts generally have a wide power to add beneficiaries)

In practice there has not yet been a reported case where there has been a direct transferor and a quasi-transferor who are both individuals, so the question has not arisen. It would have arisen if HMRC had succeeded in *Rialas* or in *Carvill*. The solution must be that only the quasi-transferor counts, and the direct transferor is ignored; or else they are both transferors, but double-counting relief<sup>16</sup> protects the direct transferor and imposes the charge on the quasi-transferor. These are two routes to the same destination.

## 46.6 Shareholder-transferors

I coin the term “**shareholder-transferor**” to describe a case where a company is a direct transferor, but shareholders (who procure the transfer) are quasi-transferors.

### 46.6.1 *Sole shareholder-transferor*

The paradigm example of a quasi-transferor is:

- (1) T owns all the shares in a company, and
- (2) T uses the power of control to procure the company to transfer an asset to a person abroad.

T is a quasi-transferor<sup>17</sup> and (in my terminology) a shareholder-transferor.

The position is more complicated where a company owned by more than one person makes a transfer.

### 46.6.2 *Multiple shareholder-transferors*

---

<sup>16</sup> See 48.4 (Double-counting relief).

<sup>17</sup> That is self-evident, but if authority is needed, see *Dunsby v HMRC* [2020] UKFTT 271 (TC) at [166].

In *Pratt*, a UK company sold land to an offshore company.<sup>18</sup> That was a transfer. The taxpayers alleged to be quasi-transferors (i) were three directors out of eight; and (ii) held 30% of the company. They had influence but no control at board (director) level or shareholder (general meeting) level. They could not “procure” the transfer of assets made by the company, and so they were not “quasi-transferors” in relation to that transfer. So they were not transferors.

That was the end of the matter, as far as the appeal was concerned, but the judgment does consider the position where there may be multiple shareholder-transferors:

Something of the sort [the application of s.720] might even be possible in the case of quasi transferors, where two or three of them own the company which makes the transfer...<sup>19</sup>

It seems odd, to say the least, if the legislation did not capture a situation where there was a company with two or three director/ shareholders who had procured the company to make the transfer.

In *Fisher* the Court of Appeal have taken a surprisingly wide view of a shareholder-transferor. A person with a majority but not a 100% holding may be a shareholder-transferor:

... the Court of Appeal did not think that the fact that Mrs Congreve had only a 65% interest in Humphreys & Glasgow (England) prevented that company's transfer of assets to Humglas from being one of "the transfers ... procured by Mrs. Congreve ..."<sup>20</sup>

A number of minority shareholders may jointly be shareholder-transferors:

if two or more individuals, acting for themselves (whether or not also acting as agents or company officers), together cause a company to

---

18 The sale was at market value but the offshore company resold at a profit after planning permission was granted. So one can see why the Revenue wanted to assess. The sale was before the introduction of the transactions in land rules (in 1969) so the (somewhat far-fetched) application of the ToA rules was perhaps their only argument. The time taken in the appeal was remarkable in its day: assessments from 1965/6 were finally determined by the High Court in 1982. But such delays no longer cause surprise.

19 *IRC v Pratt* 57 TC 1 at p.50. Note the comment is tentatively expressed.

20 at [41].

effect a transfer, they will be quasi-transferors and within the scope of section [720]... If ... a group of shareholders decided on a transfer and brought it about, they could all be considered quasi-transferors.<sup>21</sup>

I refer to these multiple quasi-transferors as “**co-transferors**”.

### 46.6.3 *Disengaged shareholder*

In *HMRC v Fisher*, one of the taxpayers (Anne) was a shareholder and director, but acted like a sleeping partner:<sup>22</sup>

she "entrusted her responsibilities to Stephen and Peter and was happy to go along with their decisions". Elsewhere in its decision, however, the FTT explained that Anne "had virtually nothing to do with the business" after 1996, that she "played no active part in the decision making" and that she "did not have a motive". In the circumstances, I agree with the UT that Anne could not be a quasi-transferor. As the UT said ...

"procure" means "doing something positive to bring something about", not "passively allowing someone else to do something".  
... the UT was right to think that the FTT had been mistaken in regarding Anne as a quasi-transferor.

The FTT had found that “Stephen Fisher and Peter Fisher were not simply acting in their own capacities as directors and shareholders but were also acting under the authority of Anne Fisher in relation to her directorship and shareholder functions.”<sup>23</sup> The reader might think that would suffice to make Anne a transferor, or if it was not, CA might have investigated the more deeply the distinction between a shareholder/director “passively” allowing someone else to do something, and impliedly delegating authority to them. But there it is.

### 46.6.4 *Shareholder/director distinction*

I begin with the case where directors and shareholders are different persons.

Some transfers by companies are matters that shareholders can procure, and directors cannot, eg an issue of shares. These are matters where the

---

21 at [71].

22 [2021] EWCA Civ 1438 at [73]-[74].

23 at [199].

shareholders alone can procure a transfer, and so may be transferors.

But many simpler transfers, such as a sale of company assets at market value, are matters for directors.<sup>24</sup> They do not require a direction or consent from shareholders. No-one suggests directors who are not shareholders can be transferors.<sup>25</sup> Why not? They are fiduciaries, and have no right or interest in the company. Since the directors obviously do “procure” such transfers, in the normal sense of the word, this illustrates how the procurement test is being used in a flexible manner.

In this case the shareholders could be transferors if they formally instruct the directors to make the transfer, or if they instigate the transfer without giving formal instructions.

In the case of family companies, it is possible that all the shareholders are directors. In this case no attention will be given to shareholder/director distinctions. This was the case in *Fisher*. The transfer was a sale of assets, which was a matter for directors, not shareholders, but CA assumed, without argument, that the transfer should be attributed to the shareholders so the shareholders could be transferors.

#### 46.6.5 *Co-transferors: Motive defence*

How does the motive defence work for co-transferors? In *IRC v Pratt*<sup>26</sup>

There is a single transfer. That transfer was either made with the purpose or not with the purpose of avoiding liability to taxation. How could one apply that to, say, a two-transferor situation where A had the purpose of avoiding tax and B had only a simple commercial purpose?

The Revenue’s suggested solution was to look at each co-transferor separately:

[Counsel for the Revenue’s] answer was to say that, in such a case, B could show that so far as he was concerned the purpose was a simple commercial purpose, and that will enable him to claim the benefit of that subsection.

---

24 See 7.7.1 (Board /shareholder roles).

25 In *Fisher v HMRC* [2021] EWCA Civ 1438 at [71]: “section [720] will not apply to a director with no shares who promotes a transfer because he believes that to be in the company’s interests: he will have acted exclusively as a company officer.”

26 57 TC 1 at 53.

That is a sensible outcome, but the judge rejected it:

But this is not what the subsection says. It is not the transferor’s purpose in effecting the transfer” but “the purpose for which the transfer was effected”. Of course, if, as is in my judgment the case, there can only be a single transferor to consider at a time, this subsection presents no problems whatsoever.<sup>27</sup>

It is suggested that the correct approach is to seek to identify the purposes of the transfer by looking at the matter in the round, considering the purposes of all the transferors, both direct and quasi-transferors. One should not look at the purposes of the direct transferor alone.

In *Fisher v HMRC*:<sup>28</sup>

it is by no means uncommon for tax legislation to require a single purpose or object to be identified in circumstances where individuals with different motivations may have been involved...<sup>29</sup> It is true that, if a transfer is considered to have had more than one (quasi-)transferor, a particular (quasi-)transferor might find himself unable to rely on section 741 because the overall purpose of the transfer was tax avoidance despite having no such purpose himself. In practice, however, cases of that kind can be expected to be rare: those promoting a transfer are likely to have had a common purpose.

#### 46.6.6 *Apportionment problem*

The next objection is the difficulty of apportionment in more complex cases. How would one apportion on the facts of *Pratt*? in the words of the judge, “a mind-boggling exercise of the first water”.<sup>30</sup>

Would it be easier to apportion in *Pratt* if HMRC had assessed *all* the shareholders and directors on the grounds that between them they

---

27 57 TC 1 at p.53. But the judge has forgotten that he *did* contemplate the possibility of co-transferors in cases companies with two or three shareholders, even though that situation did not arise on the facts of *Pratt*.

28 [2021] EWCA Civ 1438 at [70].

29 The Court referred to the transactions in securities code. The same applies to CGT re-organisation relief, where the issue is the purpose of an arrangement, as it often happens that many individuals are parties to one arrangement: see 53.18.5 (Whose purpose).

30 *IRC v Pratt* 57 TC at p.52.

controlled the company and as a matter of fact did procure the transfer?

#### 46.6.7 *Employment benefit trust*

An example where HMRC say they might raise the shareholder-transferor point relates to employee benefit trusts. HMRC Brief 18/11 provides:

5.1.1 ... If the offshore Employee Benefit Trust is a normal commercial arrangement by a company to reward its employees,  
[a] the transferor is the employer company; and  
[b] in such circumstances the income charge [s.720] is unlikely to be applicable as the transferor and beneficiaries are different people.

...<sup>31</sup>

More analytically:

- [a] It is correct that in the normal case, the transferor will be the employer company; though “normal commercial arrangement” is not the test of who is the transferor.
- [b] It is correct that the s.720 charge is unlikely to be applicable. The reason is not exactly that “the transferor and beneficiaries are different people” but that the transferor is a company (not within s.720) and the beneficiaries are non-transferors. Perhaps that is what the author meant to say.

Brief 18/11 continues:

If the employer company is controlled by its shareholder/directors and the offshore Employee Benefit Trust was formed solely for their benefit...

This is presumably not regarded as a normal commercial arrangement. In these circumstances the Brief says:

... the director/shareholders may have procured the transfer into the

---

31 The omitted text reads:

“However, it may be that the employee has transferred a right to receive a bonus into the offshore Employee Benefit Trust and is therefore the transferor. If this is the case the ToA legislation may apply and the employee will be liable to tax on any income arising in the trust.”

This is approximately correct; though s.624 may also be in point, and the individual's liability is not on "any income arising in the trust" but income arising from the transferred asset. But we are not concerned with that case here.

offshore Employee Benefit Trust and could be considered transferors for the purposes of the income charge. Whether or not the ToA income charge is then applied will depend on the facts of each case.

No-one could criticise this as incorrect. But the first sentence is tentative (“may have procured...could be considered”), and the conclusion (“depends on the facts of each case”), is not exactly guidance.

For the motive defence for EBTs, see 49.34 (Employee benefit trusts).

#### 46.6.8 *Transferor/settlor compared*

In the case of a transfer for full consideration, a person may be a transferor but not a settlor, because settlor/settlement requires bounty (gratuitous intent).

Assuming bounty (eg a transfer for no consideration): A direct transferor must be a settlor, as the transferor must have provided property. A quasi-transferor is also a settlor, as procuring a transfer amounts to providing property indirectly. It makes sense to apply the same test here, as the object of each code is, in essence, the same or at least closely comparable.

#### 46.7 **Quasi-transferor: Association test**

In *Vestey v IRC*, the question of who is a transferor did not arise, because the taxpayers (beneficiaries of a discretionary trust) were clearly not transferors. The House of Lords discussed the question in passing, and the answer was expressed in a variety of different ways. Lord Wilberforce said s.720 applies:

only where the person sought to be charged  
 [1] made [the transfer]  
 [2] or, may be, was associated with, the transfer.<sup>32</sup>

The context shows that the meaning at [2] is that Lord Wilberforce was floating a possible view that a person could be charged if they were associated with the transferor, but did not commit himself to that view: “may be” means “possibly”.<sup>33</sup> Nor did he elaborate on what is meant by

---

32 54 TC 503 at p.587A. Lord Salmon agreed. Lord Keith said he agreed with Lord Wilberforce but in his speech he actually put the matter differently.

33 The STC and All ER versions of the report change this (slightly literary) use of the words “may be” into the more usual form “maybe”.

“associated”.

Lord Wilberforce was not saying:

- (1) that there *would* be a s.720 charge if the taxpayer was associated with the transfer. He expressed a doubt on the point.
- (2) that there would be a s.720 charge if the taxpayer may be associated (= was possibly associated) with the transfer.

HMRC would like an association test, but that cannot be correct. RI 201 provides:

- [1] Section [720 and 727 ITA] can potentially apply not only to an individual who transfers assets but to someone who is “associated with” a transaction (according to the decision of the Courts in *Vestey v IRC*).
- [2] The Revenue regard this as including anyone who procured the transfer of assets.

There is not much to say in favour of proposition [1]. It can hardly be said to be “according to the decision of the courts in *Vestey v IRC*” as it relies on one of the views expressed in *Vestey*<sup>34</sup> where it was qualified by the word “maybe”. In fact, if “associated” here has its normal, rather wide sense, point [1] is clearly wrong in the light of *Pratt, Carvill, and Rialas*.

It is considered that a person is a transferor only if they have made or procured the transfer, and being associated with a transfer (short of procuring it) does not make a person a transferor. In a loose sense of “associated” point [1] cannot possibly be correct, for many individuals may be “associated” with a transfer who cannot possibly all be transferors. I suspect Lord Wilberforce used “associated” as a synonym for “procured”.

In ToA draft guidance HMRC return to an association test:

**INTM600820 Transferors: The transfer**

... This section considers the link between relevant transfers and the individual who is potentially avoiding liability to income tax by means of relevant transfers. It is the individual who is avoiding liability to income tax who is potentially liable for any tax charged under the income charge and to whom the income is treated as arising. However, there is nothing directly within the income charge provisions to say that

---

34 The comment of Lord Wilberforce is set out at 46.4 (A procurement test).

individual must also be the person who has undertaken the transactions that have resulted in income becoming payable to a person abroad.

Notwithstanding this, the general approach is that an income charge will only apply where the individual who is subject to the charge is also the person who has made, or is associated with, the transfer of assets. Where a person other than the individual who made the transfer is treated as having income arising to them then it is the benefits charge that may be in point. This link between the transfer and the individual who is potentially subject to tax under the income charge effectively comes from the interpretation placed upon the income charge by the courts.

The leading case in this respect is *Vestey v IRC* 54 TC 503. [The Manual gives the comment from Lord Wilberforce set out above<sup>35</sup> and continues with the quote:]

[the section which became section [720] should be] interpreted as applying only where the person sought to be charged made, or may be, was associated with, the transfer.’

In most cases determining whether the individual has made a transfer of assets will be relatively straightforward, but what is meant by ‘*or may be associated with*’<sup>36</sup> the transfer? This is likely to depend on the facts and circumstances of the matter.

For example, an individual may wholly own and direct a company. If the company makes a relevant transfer which results in the shareholder having power to enjoy the income of a person abroad, even though the individual has not made the transfer, HMRC would take the view that he, maybe, was associated with it by virtue of his position. The individual can therefore be regarded as having made the transfer such that the connection is made and the income charge applies.

That example is a straightforward case of procurement. The *maybe* seems inapt.

Equally if an individual in some way ‘procured’ a transfer to be made HMRC may regard the relevant connection as made. [The Manual gives the passage from *Congreve* cited above and continues:]

In this context ‘procured’ is considered to include ‘organised, engineered or brought about’ as indicated by the views of Lord

---

35 See 46.2 (Charge on transferor).

36 Authors’s footnote: this paraphrase has a quite different nuance from the Judge’s words actually quoted just before.

Wilberforce in the *Vestey* case at p.583 where he speaks of the individual as having ‘organised or engineered transfers’ and in the same case at p.602, Lord Keith speaks of transfers ‘organised or brought about’ by the individual.

“Organise/engineer/bring about” are only paraphrases or synonyms of “procure” and do not take us any further.

Factors which may need to be considered in determining whether the individual is or may be associated with a transfer of assets or has procured a transfer of assets include:-

- whether the individual had any bargaining power with the person who actually makes the transfer;
- whether there was a contractual connection between the individual and the actual person making the transfer; and
- whether the individual had any proprietary interest, actual or potential, in the assets transferred.

This list is not intended to be exhaustive and it will be relevant to consider all of the facts and circumstances of the matter if there is doubt about whether there is an appropriate connection for an income charge to be applied.<sup>37</sup>

*IRC v Pratt* decided that an individual who did not make the transfer may be within s.720 if and only if they procured the transfer.<sup>38</sup> “Associated” was not enough:

Nor, however widely one construes any wording to be found in [s.720], is the substance of a person being “associated with” or “having a hand in” a transfer necessarily equivalent in any way to that person themselves making the transfer....the elastic will have snapped long before one can say, “I had a hand in the transfer therefore I made it” or “I am associated with the transfer, therefore I made it”.

In *Fisher v HMRC*, CA adopted a wide view of the procurement test, so perhaps we will hear no more of an association test.

---

37 The text is repeated in the draft guidance at INTM600580 (The income charge: The transfer).

38 57 TC 1 at p.51 B –D and p.55 E–F. Venables has questioned whether *Pratt* was right on that point, and suggests the concept of transferor should be limited to direct transferors, not those who merely procure a transfer; see Venables, *Taxation of Trusts* (2010) 22B.4.6. But the law on this point is settled.

## 46.8 Trustees/fiduciaries: Transferors

A trustee may make a transfer of assets (eg transferring trust property to a foreign company). There are two independent reasons why s.720 does not apply:

- (1) A trustee is not an individual so not within the ToA rules.
- (2) A trustee is not a transferor as a transfer of assets requires a transfer of beneficial ownership:

I think that for the purposes of s [720], it must be the beneficial transfer - the transfer of the beneficial interest - which is in question, and not the bare transfer of the legal title. A trustee, for example, who was directed by his beneficiaries to effect a transfer would not, even if he knew full well what was on foot, become himself liable to fall foul of the section merely on that account.<sup>39</sup>

An individual exercising fiduciary powers is not a transferor, eg an individual with power of appointing new trustees does not become a transferor if they exercise the power by appointing foreign trustees, because the power is fiduciary.

What if an individual (perhaps a principal beneficiary but not the settlor) encourages trustees to make a transfer? It is considered that the individual (not being in control of the trust) cannot be said to procure the transfer made by the trustees.

So the concept of “procuring” a transfer in practice applies to individuals controlling companies which make a transfer; other cases, if theoretically possible, will be rare.

## 46.9 Co-owner transferors

There are two main types of co-ownership in English law<sup>40</sup> and it is necessary to consider them separately.

### 46.9.1 *Tenancy in common*

Under a *tenancy in common*, each co-owner has a separate share

---

<sup>39</sup> *IRC v Pratt* 57 TC 1 at p.49.

<sup>40</sup> In Scots law the terminology is different, but I am not aware of any differences relevant for present purposes.

(described, confusingly, as an undivided share). So if they together transfer their interest to a person abroad, each is transferor of their share. The point is made in *IRC v Pratt*:

Suppose, for example, A and B hold land as joint legal tenants upon trust for themselves beneficially in equal shares,<sup>41</sup> and they then make a transfer of that land abroad. I see no difficulty in regarding, for the purposes of [s.720], A as the transferor of his beneficial half share therein, and B as the similar transferor of his beneficial half share.<sup>42</sup>

#### 46.9.2 *Joint tenancy*

Under a *joint tenancy*, each co-owner is (at least in legal theory, and at least for some purposes) regarded as the owner of the whole. *Pratt* goes on to consider this case without deciding it:

The difficulties are increased, however, if in the example given A and B hold the land upon trust for themselves as beneficial joint tenants. In substance, there is no difference between that and the example given, yet here we have two transferors of one subject matter.

---

41 The terminology of co-ownership is technical and opaque. The words “in equal shares” mean that the co-owners hold as tenants in common. It is beneficial ownership rather than legal ownership which matters here.

42 57 TC 1 at p.49. That is straightforward, and HMRC agree. ToA draft guidance provides a similar example where the asset is company shares rather than land:

**INTM600800 Multiple Income charges**

...HMRC's practice (RI 201) where the same assets are transferred by several individuals is to assess the transferors in proportion to their share of the assets transferred. For example, where the shares of a UK company are held by three individuals in the proportions of 40%, 40% and 20% and there is a liability under section 720 ITA 2007 in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three individuals in proportion to their respective holdings.

More analytically: the facts of the example are not quite clear. It may be implied that all the shares are registered in the names of the 3 individuals jointly; but they hold beneficially as tenants in common (they cannot hold beneficially as joint tenants, as a joint tenancy requires co-owners to have equal shares.) If so, this is a case of co-ownership but not a case where “the *same* assets are transferred by several individuals” as each individual transfers their (separate) beneficial interest. Alternatively it may be that each shareholder is registered as sole owner of their own shares. That is not a case of co-ownership at all, strictly speaking. But whatever the analysis, the answer is the same.

The only sensible conclusion is that A and B should be regarded as each transferring half the land, and later in the judgment, the judge was inclined to accept that view:

I can well see that if A and B own an asset jointly, and transfer it abroad, then one might for this purpose be able to separate out their beneficial interests as being equal...<sup>43</sup>

It is true that in legal theory (which to a non-property lawyer seems rather strange) *each* joint owner is regarded as owner of the whole. But that does not prevent this conclusion, as there are other cases where the same theory is not (and indeed could not be) carried to its logical extent.

The reason that co-ownership examples are discussed in *Pratt* is not because anyone has any doubt of the answers; it is hoped that the answers might shed light on the problems which arises where co-shareholders procure a company transfer. However I do not think the answers take us anywhere. There is no analogy. Joint owners are direct transferors, not quasi-transferors.

## 46.10 Must transferor (intend to) avoid IT

### 46.10.1 *The statutory provisions*

Section 720 ITA provides:

- (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.
- (2) Income tax is charged on income treated as arising to *such an individual* under section 721. ...

The Special Commissioners say:

186. In our view ... h an individual” is an individual ordinarily resident in the UK who, *by means of a transfer* of assets in consequence of which income becomes payable to a non-resident, *avoids liability to income tax apart from the operation of these provisions.*<sup>44</sup>

---

<sup>43</sup> 57 TC 1 at p.51.

<sup>44</sup> *IRC v Botnar* 72 TC 205. Although the case was finally decided in 1999, it concerned tax years before the 1996 reforms.

If that is right,<sup>45</sup> the question arises whether the requirement that the transferor is a person who “avoids liability to income tax” means:

- (1) the transferor in fact avoids income tax (in the absence of the ToA provisions); or
- (2) the transferor intends to avoid IT (whether or not they in fact do so); or
- (3) the transferor both intends to avoid and in fact avoids IT.

Section 721(5) ITA provides:

It does not matter for the purposes of this section ...

- (c) whether the avoiding of liability to income tax is a purpose for which the transfer is effected.

There are four permutations: In outline:

Case no	Purpose to avoid IT	IT avoided in fact	Can s.720 apply?
1	Yes	Yes	Yes, clearly
2	No	No	Yes, according to CA in <i>Fisher</i> but ...
3	Yes	No	Yes: <i>McGuckian</i>
4	No	Yes	Yes: s.721(5) ITA

Cases 3 and 4 may seem rare: normally the purpose and the avoidance in fact would both be present or absent. But it does happen.

In *Fisher* the CA held that s.720 can apply in case 3. The reader may think that the argument to the contrary (which was also supported by HMRC guidance) was the better; but the point is now academic. Subject to a further appeal, the law is now settled, and I omit the discussion here as it is not of general interest. Parliament retained the statutory words set out in 46.9.1 (The statutory provisions), which refer to avoiding income tax, but the words do not mean anything.

#### 46.11 Condition A: Power to enjoy

Section 721(1) ITA provides:

---

<sup>45</sup> Sometimes statutory provisions are used to give gravitas to political or moral commitments and it would be a mistake to give them legal effect: see Feldman, “Legislation Which Bears No Law” (2016) 37 (3) SLR 212. However no-one suggests that is the case here.

Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.

I refer to “**s.721 conditions A to C**”.

Section 721(2) sets out condition A:

Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—

- (a) a relevant transfer,
- (b) one or more associated operations, or
- (c) a relevant transfer and one or more associated operations.

The s.720 charge only applies if the transferor has “power to enjoy” the income of the person abroad. The charge may however apply even though the individual does not actually enjoy the income, and might never do so.

If the transferor has power to enjoy during part of the tax year, condition A is satisfied for the whole of the tax year.<sup>46</sup>

The drafter frequently uses a clumsy formula which refers to:

the income mentioned in section 721(2); or  
the income mentioned in section 721(2) or 728(1)(a)

This means the income of the person abroad, or that part over which the individual has power of enjoyment. But power to enjoy over part will be rare, and for clarity, I gloss that formula as [the income of the person abroad].

On a transfer from a UK domiciled person to their foreign domiciled spouse, see 89.13 (Marriage of dom/non-dom or resident/non-resident: IT planning).

## 46.12 “Power to enjoy”

Section 722 ITA provides:

- (1) For the purposes of section 721, an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment

---

<sup>46</sup> The usual case will be if the settlor has power to enjoy and is then excluded and so ceases to have power to enjoy; but it could also happen that the settlor acquires power to enjoy during the tax year.

Contrast 44.6.6 (Settlor-interest ceases); 56.5 (Settlor-interested condition).

conditions are met.

(2) In subsection (1) “the enjoyment conditions” means conditions A to E as specified in section 723.

I adopt the statutory terminology and refer to “**enjoyment conditions A to E**”.

Section 722(1) states that an individual is *treated* as having power to enjoy if any of the enjoyment conditions is satisfied. It is considered that this is a comprehensive definition of “power to enjoy”,<sup>47</sup> but it is impossible to think of any power to enjoy (in the general sense) which does not also fall within one of the enjoyment conditions, so the point is academic.

“Power to enjoy” is elaborately defined and has given rise to a large case law. But in practice it is not often an issue. In outline, the transferor has “power to enjoy” if they may possibly enjoy any of the income of the person abroad. A transferor has no power to enjoy if they (and their spouses) are excluded from benefit and have no power of control. A widow or widower of the transferor may be included as a beneficiary.

The test is slightly wider than that of a “settlor-interested” trust for the purposes of s.624 ITTOIA<sup>48</sup> though for most practical purposes they are the same. It is hard to see the reason for the distinction, but that is the patchwork nature of income tax.

With an economy of drafting, similar “power to enjoy” wording is used in other contexts:

<b>Context</b>	<b>See para</b>
Profit fragmentation	50.8
Mixed membership partnerships	83.9
Disguised investment management fees	69.11.1

The enjoyment conditions frequently use the word “benefit”. For the meaning of “benefit” in the context of s.731 and s.87 see 47.5 (Benefit). Most of that discussion is relevant here, but there is one difference. In those sections one had to ascertain the value of the benefit. In the case of power to enjoy, all that matters is that there is a benefit, regardless of its value: the value of the benefit does not usually matter.

---

47 See [App 7.6](#) (Deemed/treated misused).

48 See 44.6 (Meanings of “settlor-interested”).

Statutory tax indemnities do not confer power to enjoy, see 96.4 (Statutory tax indemnity).

#### 46.12.1 *Substance*

Section 722(3) ITA provides:

In determining whether an individual has power to enjoy income for the purposes of section 721, regard must be had to the substantial result and effect of all the relevant transactions.

Section 722(4) provides:

In making that determination all benefits which may at any time accrue to the individual as a result of the transfer and any associated operations must be taken into account, irrespective of—

- (a) the nature or form of the benefits, or
- (b) whether the individual has legal or equitable rights in respect of the benefits.

The drafter is stressing (which need hardly be stressed) that the provisions should not be narrowly construed. In *Vestey* the House of Lords say:

the direction that regard shall be had “to the substantial result and effect of the transfer and any associated operations” does not in my view authorise any laxity in construing any of the documents by which the transfer or the associated operations are effected. The Court must first determine the meaning and effect of the documents before this provision is applied and it must then consider whether their effect, though in form not beneficial to the settlor, is so in substance. The contrast is between substance and form, so if it can be shown in the present case that the effect of the transfer and the associated operations is to vest a benefit in (for example) a company over which the settlor has complete control, the Court may then say that, though in form the company benefits, in substance the company and the settlor are one and the settlor therefore benefits. But the Court cannot take this last step unless it is shown that the settlor has himself the legal control and no reliance must be placed on his influence over others who are not in law bound to follow his directions.<sup>49</sup>

The example is not a case where s.722(3) is in point, as a benefit to the

---

<sup>49</sup> *Vestey v IRC* 31 TC 1 at p.89. See too App.6.4 (Real nature of transaction).

company held by the beneficiary would constitute power to enjoy under usual principles. An unsympathetic commentator might say that the drafter is simply striving for effect, or expressing exasperation.

Could s.722(4)(b) ever make any difference? An example is a Cayman Island exempted trust, under which it is said that a beneficiary has no rights,<sup>50</sup> or perhaps a Cayman Island STAR trust.<sup>51</sup>

Perhaps there could be cases where the form over substance approach may assist the taxpayer, where the formal legal analysis might be said to confer some benefit on the settlor, but that is not so in substance.

#### 46.12.2 *Time of enjoyment*

Section 721(4) ITA provides:

For the purposes of subsection (2), it does not matter whether the income of the person abroad may be enjoyed immediately or only later.

#### 46.12.3 *Condition A: Income benefits T*

Section 723(1) provides:

Condition A is that the income is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of the individual, whether in the form of income or not.

*“Calculated...”*

The nuance of this un-lawyer-like expression was discussed by the Special Commissioners in *Botnar v IRC*:

222. [Enjoyment condition A] is concerned with how particular income is dealt with when it arises. [Counsel for the taxpayer] however conceded that this is not confined to its immediate handling on receipt or even to what happens in the year of assessment, if for example it is received late in the year, but that we should look at how it is dealt with

---

50 See s.83 [Cayman] Trusts Law (2009 Revision); exempted trusts were introduced in the [Cayman] Trust Law 1967 specifically in the hope of avoiding the ToA rules which then applied if the transferor had “rights”. The UK responded in 1969 removing the requirement of “rights” from the ToA provisions and adding (what is now) s.722(4)(b).

51 It has been suggested that a beneficiary of a Foundation has no rights, but that is doubtful; see 86.8 (Beneficiary rights).

within a reasonable time of receipt. ...

224. It seems to us that, when the word “calculated” is considered in the context that it refers to income which is “in fact so dealt with”, the meaning “likely” is to be preferred to “thought out” in the sense of “intended”; however we are not sure that either “likely” or “intended” gives exactly the same flavour as “calculated”. “Calculated” here combines an element of objectivity with an element of forethought.

225. It may not however make much difference because if any income was intended to enure for the benefit of [the transferor] it is obviously more probable that it was likely to so enure and that it would be seen objectively as likely to so enure.<sup>52</sup>

ToA draft guidance provides:

**INTM600880 power to enjoy - condition A**

... The meaning of the word ‘calculated’ in this test was considered briefly by Mr Justice Walton in *Vestey v CIR* (54 TC 503 at p.555) where he observes “that it was submitted to me that “calculated” ... meant “likely”. This is, of course, one of its possible meanings, although a glance at the Shorter Oxford English Dictionary makes it quite clear that this is not a precise translation of the word “calculated”. On the other hand, its primary meaning is “reckoned, estimated, or thought out”, and I would think that this is the meaning which is intended here.” Walton J went on to say that he thought a stricter interpretation than “likely” is called for. And that is the approach which HMRC have continued to follow in relation to this test.

*“...to enure for the benefit”*

ToA draft guidance provides:

**INTM600880 power to enjoy - condition A**

... The benefit may be present or future. It may be in the form of income or not, and may include a payment of any kind (prior to April 2007 the transfer of assets legislation Chapter included a meaning of ‘benefit’ for the purposes of the Chapter saying - “benefit” includes a payment of any kind). Therefore provided some benefit enures to the individual it need not be a money payment at all. In this context ‘enure’ means to take, or have effect or serve to the use, benefit, or advantage of a person.

---

52 72 TC 205. The wording is also discussed *obiter* in *Vestey v IRC* 54 TC 503 at p.555G.

Some examples taken from Case Law illustrate this point.

In *Latilla v CIR* (25 TC 107), a non-UK company paid over income to the individual by repaying debentures held by her. Such a capital payment, if it results from dealing with the income of the person abroad, may come within this test. A capital payment may also trigger the [s.727] income charge - receipt of/entitlement to capital sums further dealt with at (INTM600990).

That is no doubt correct, though *Latilla* is not authority for these propositions, as it was common ground that the transferor had power to enjoy the income of the person abroad, and the points were not discussed.

In *Lord Chetwode v CIR* (51 TC 647) the whole share capital of a Bahamas company was held by the Bahamas trustee of a settlement for the benefit of Lord Chetwode and his family. Lord Chetwode had a life interest in the trust fund and had very wide powers, including power to remove or appoint trustees, and to re-vest in himself the title to the trust fund. The House of Lords said in their Judgement that, in view of the terms of the settlement, in addition to power to enjoy under other conditions, the income of the underlying company was so dealt with as to be calculated to enure for Lord Chetwode's benefit, and thus he had power to enjoy under this condition.

#### 46.12.4 *Condition B: Asset value increases*

Section 723(2) ITA provides:

Condition B is that the receipt or accrual<sup>53</sup> of the income operates to increase the value to the individual—

- (a) of any assets the individual holds, or
- (b) of any assets held for the individual's benefit.

First one must identify an asset held by T or for T's benefit. Having identified the asset, one asks whether the receipt of the income increases the value of that asset.

The concept of an asset "held by T" is straightforward but what about an asset held "for T's benefit"? In *Howard de Walden v IRC* 25 TC 121 a promissory note held by trustees on trust for T for life was considered to be held for T's benefit. One could reach the same result by a different

---

53 The words "or accrual" appear to be otiose, but it does not matter.

route since T's life interest in the note was itself an "asset" held by T. The same would apply if T's interest was subject to an overriding power of appointment.

If the asset is held on a discretionary trust under which T is merely a beneficiary, it is probably not held "for T's benefit".

The second requirement is that the receipt of the income must increase the value of the asset. This was also considered in *Howard de Walden v IRC*. Here T transferred assets to offshore companies and held (1) a life interest in promissory notes issued by the companies and (2) the benefit of debt due from the companies (T had lent money to the companies).<sup>54</sup> The Court of Appeal held:

The receipt of the income by each company operates to increase the value of the notes and of the deposit debt...<sup>55</sup>

However it is a question of fact in each case. The question is whether there was a risk of default which is reduced by the receipt of further income. If a debt is sufficiently covered by existing assets of a company, the receipt of further income by the company does not increase the value of the debt and enjoyment condition B is not satisfied. It will not usually matter, as s.727 is likely to apply in cases of this kind.<sup>56</sup>

ToA draft guidance provides:

**INTM600900 power to enjoy - condition B**

... This heading covers, for example, situations where:-

- a. the individual holds shares in a foreign company, and the accrued income or profits of the company increase the value of its shares;
- b. the individual receives debentures in exchange for transferred assets (see *Howard de Walden v CIR* 25 TC 121);
- c. the consideration for the transferred assets is left as a debt owing to the individual by the company (see *Ramsden v CIR* 37 TC 627).

In these examples the receipt of income by the foreign company increases the value of the shares, debenture or debt, so income need not be remitted, nor even accumulated, for the benefit of the individual. If

54 In some but not all cases T also held a few shares in the companies. The Court of Appeal did not rely on this because if it had held that T was caught only by virtue of these shares, T would not have been assessable on the income of all the companies.

55 25 TC 121 at p.133. *Brckett v Chater* 60 TC 134 & 639 is another example.

56 See 46.17 (Transferor receives capital sum).

in fact the income is received by, or accrues due to, the person abroad, and operates to increase the value of any assets held by or for the benefit of the individual, then the test may be considered met for the purpose of applying the income charge.

In the *Howard de Walden* (25 TC 121) case mentioned above, assets had been transferred by a series of transactions to companies resident abroad, and in exchange the individual had effectively received a series of promissory notes. The Court of Appeal held that the income of the non-resident companies increased the value of the promissory notes by increasing the general assets of the companies issuing them and therefore that the test was met for the purpose of the income charge.

In the *Ramsden* case (37 TC 619) an individual transferred assets to a foreign company and left the cost of the assets credited to his account. Although it was held that the income charge - receipt of/entitlement to capital sums did not apply as the unpaid purchase money was not a loan nevertheless the power to enjoy condition was met under this heading and so an income charge arose. The individual's right to recover his debt was an asset held by him, and the value of that right was increased by anything tending to increase the value of the company's assets (that is by the company's receipt of income). Under this heading therefore the individual would have "power to enjoy" income of the company while the debt remained unpaid.

In the *Lord Chetwode* case (51 TC 647) a trust for the benefit of *Lord Chetwode* held shares in a non-UK resident company which received dividends. The House of Lords found that in the circumstances of that case the receipt of dividends by the underlying company operated to increase the value to Lord Chetwode of the assets held by the trustees for his benefit, and he therefore had power to enjoy within this heading as well as within other heads of the test.

#### 46.12.5 *Condition C: T receives benefit*

Section 723 ITA provides:

(3) Condition C is that the individual receives or is entitled to receive at any time any benefit provided or to be provided out of the income or related money.

(4) In subsection (3) "related money" means money which is or will be available for the purpose of providing the benefit as a result of the effect or successive effects—

(a) on the income, and

(b) on any assets which directly or indirectly represent the income, of the associated operations referred to in section 721(2).

For completeness, this question also arose in *Howard de Walden*. The Court of Appeal said:

... the payments made and to be made in respect of the notes and deposits are “benefits” within the meaning of (c) since “benefit” as defined ... includes a payment of any kind.

There are two issues here. First, is the payment of a debt to T (or payment of the promissory note) a “benefit” in the general sense? The Court of Appeal rightly thought it was not, since they relied on the former definition clause.<sup>57</sup>

Secondly, did the former statutory definition of benefit extend the meaning of benefit to include a payment that is not a benefit in the normal sense? The Court of Appeal held that it did. On this point the law has changed: the ITA does not contain the definition of benefit on which the court relied, so this argument no longer arises. However the repayment of an interest-free loan is in principle a benefit.<sup>58</sup>

See 46.16.3 (Quantum: Enjoyment cond. C).

ToA draft guidance provides:

**INTM600920 power to enjoy - condition C**

...This test is designed to cover, for example, the individual who holds redeemable debentures; or who is entitled to other capital payments, where these are satisfied out of income or out of assets representing income; and also cases where a chain of companies is involved or a shareholder is entitled to receive dividends.

In one example the Special Commissioners took the view that a capital sum payable to an individual by annual instalments in consideration for the transfer of assets to a foreign company met this condition and gave a power to enjoy income, as the test was not confined to payments which left the company as income. The test includes a sum received as capital as well as any income received. In such a case the income charge - receipt of/entitlement to capital sums provision may also apply.

Another example is the case of *Earl Beatty's Executors v CIR* (23 TC

---

57 For the meaning of “benefit” see 47.5 (Benefit).

58 See 44.6.4 (Beneficial loan or guarantee).

574). Assets were transferred by a series of transactions to a non-resident company in consideration for the issue of debentures repayable in successive years without interest. It was argued that, since these debentures were to be repayable only to the extent of the value of the assets transferred to the company, the individual was getting back nothing but his capital; that is he was receiving no benefit from the income derived from the assets transferred. It was held that since the debentures were charged on both the income and capital of the issuing company, the individual must be deemed to be entitled to a benefit provided out of income within the meaning of this condition. This decision was approved in *Howard de Walden v CIR* (25 TC 121). In that case the individual had a life interest in certain promissory notes issued by a non-resident company, and also had an interest in certain sums of cash on deposit with the company and repayable on demand. It was held that the payments made, and to be made, in respect of the notes and deposits were benefits provided out of the income of the company, the whole of which income could be traced to the assets originally transferred.

And a final example of where this condition applies is that of an individual who is a shareholder of a non-UK resident company. In *Lee v CIR* 24 TC 207, the individual, as a result of a transfer of assets, held shares in a non-resident company which because of the rights attached to them entitled him to receive a dividend out of the income of the company. This was held to be a benefit provided, or to be provided, out of the income of company within this condition.

Similarly in the Lord *Chetwode* case (51 TC 647) the House of Lords found that the terms of the deed of settlement entitled Lord Chetwode to receive a benefit out of the income received by the underlying company, and thus he had power to enjoy within this condition as well as within other heads of the power to enjoy provisions...

#### 46.12.6 *Condition D: Possible benefit*

Section 723(5) ITA provides:

Condition D is that the individual may become entitled to the beneficial enjoyment of the income if one or more powers are exercised or successively exercised.

Section 723(6) ITA extends this:

For the purposes of subsection (5) it does not matter—

- (a) who may exercise the powers, or
- (b) whether they are exercisable with or without the consent of another person.

The paradigm case is a discretionary trust where T is a beneficiary or could be added to the class of beneficiaries.

“Income” here includes any asset representing the income, even if that asset does not constitute the actual income (in the strict sense) of the person abroad. In *Vestey v IRC*:

- (1) The individual could receive accumulated trust income. Walton J held that the individual had no power to enjoy the trust income within enjoyment condition D because what the individual could receive was trust capital and so no longer “income”.<sup>59</sup>
- (2) The trust held a company. Walton J held that the individual had no power to enjoy the company’s income within enjoyment condition D because what they could receive was dividends from the company and that was not the same as the income of the company.<sup>60</sup>

This is bizarre and in the House of Lords Viscount Dilhorne rejected it.<sup>61</sup> It is considered that Dilhorne’s reasoning is to be preferred.

ToA draft guidance provides:

**INTM600940 power to enjoy - condition D**

...Perhaps the most common example of where this test may apply is to the income of a company underlying a settlement whose shares are acquired by the settlement trustees. The individual who made the settlement remains a beneficiary and as such has power to enjoy the income of such a company by becoming entitled to its beneficial enjoyment through the successive exercise of powers, for example, the declaration of a dividend by the company of which the trustees are shareholders, followed by an exercise of discretion as to the application of the dividend, by the trustees.

This power to enjoy and with it the income charge can apply notwithstanding that income arising to the trustees of a settlement may

---

<sup>59</sup> *Vestey v IRC* 54 TC 503 at p.555.

<sup>60</sup> *Vestey v IRC* 54 TC 503 at pp.562-3.

<sup>61</sup> p.595. Strictly, Dilhorne only rejected point (1). He did not address point (2). But the reason is the same in both cases so it logically follows he rejected Walton’s view on both points. No other judge considered this aspect.

be caught under the settlements provisions (Chapter 5, Part 5 ITTOIA 2005) and deemed to be that of the settlor. See INTM602360 where more than one set of charging provisions may appear to apply in relation to the same income.

In another example (*CIR v Botnar* (72 TC 205)) the individual's counsel argued that even if the individual did become entitled to the beneficial enjoyment of income which could be traced to the companies underlying the settlement involved it had not been the income of those companies when it was beneficially enjoyed. The HMRC argument, which was accepted by the Court of Appeal, was that the income which the individual beneficially enjoyed had simply to have been the income of the companies at some earlier stage. It was not necessary that it still possessed the characteristics of being income of the underlying companies when it was beneficially enjoyed. What this condition is concerned with is the beneficial enjoyment in the future of what in the past was the income of the companies.

### **46.13 Enjoyment condition E: Control**

Section 723(7) ITA provides:

Condition E is that the individual is able in any manner to control directly or indirectly the application of the income.

Some of the discussion on corporate control is also relevant here: see 99.2.3 (Control: Strict sense).

#### *46.13.1 Control over trust income*

Control is not defined. It means non-fiduciary control.

Trustees are generally treated as a separate notional person.<sup>62</sup> So an individual who is a trustee, even sole trustee, does not have control of the trust income in their personal capacity. But even ignoring that point, a trustee does not have control as their powers are fiduciary.

A protector does not have control, as the powers of a protector are (in general) fiduciary powers.

The power to appoint trustees does not confer control of trust income, both because the power itself is fiduciary, and because the trustees (once appointed) are subject to fiduciary obligations:

---

<sup>62</sup> See 6.3 (Trustees a distinct person).

But the question in the instant case is not whether the settlor was likely to be able to influence or even to exercise a decisive influence over the exercise by the trustees of their fiduciary powers. The question is whether he was able to control the application of the income, and to answer that question affirmatively it must in my judgment be possible to say at least that he was in a position to ensure that the trustees would act in accordance with his wishes without themselves giving any independent consideration and accordingly to act in disregard of their fiduciary duty.<sup>63</sup>

That state of affairs would now suggest a sham or an illusory trust.<sup>64</sup>  
ToA draft guidance provides:

**INTM600960 power to enjoy - condition E**

... However the Special Commissioners decided in the case of *CIR v Schroder* (57 TC 94) that on the particular facts in that case the test was not met. They found that ‘Mr Schroder was able to appoint trustees who...could be expected to deal with the trust income in accordance with his wishes: but he could not compel them to do so and there is no suggestion that any of them would have acted in breach of their fiduciary duties under the settlements.’ In dismissing HMRC’s appeal against the Commissioners’ decision The High Court appears in effect to have distinguished a position of influence from a position of control.

This topic is discussed by the Special Commissioners in *Botnar v IRC*:

261. In our judgment the ability to control must go beyond an assumption that those controlling the companies will comply with the transferor’s wishes and the fact that they do comply is immaterial. We accept the question posed by [counsel], viz whether [the transferor] was in a position to ensure that the companies would act in accordance with his wishes.

The Special Commissioners then applied this principle to the facts of the

---

<sup>63</sup> *IRC v Schroder* 57 TC 94 at p.125.

<sup>64</sup> See 1.9 (Illusory trust); 1.11 (Sham). *Schroder* did not use these terms, but it was decided before the modern concepts of sham/illusory trust began to receive attention. In the case of a sham or illusory trust, enjoyment condition E would no doubt be satisfied, as would other enjoyment conditions, but the income may not be payable to a person abroad.

case:

262. There was in fact no material before us to indicate that [the transferor] could have done anything if Dr. Lenz had declined to do what he wanted. The position might have been different if Dr. Lenz was for example an employee who might have been dismissed in the event of failing to cooperate. There was however no evidence to suggest this. We are satisfied that the directors of the companies would have carried out his instructions. We have no doubt that [the transferor] was justified in assuming that Dr. Lenz would do what he wanted. However we do not consider that the mere fact that Dr. Lenz was in the saddle of the settlement meant that [the transferor] was able to ensure that the income would be applied for his benefit. On the authority of *Schroder* even decisive influence is not enough.

263. We readily accept [counsel's] submission that [the transferor] wished to ensure that the shares would remain in friendly hands. In a sense it could be said that he did in fact control the settlement and the Companies because in fact Dr. Lenz did comply with his wishes: there was no evidence of any action by Dr. Lenz which was contrary to [the transferor]'s wishes. That is not however the same as [the transferor] having the ability, even indirectly, to ensure that the income would be applied in accordance with his wishes.<sup>65</sup>

#### 46.13.2 *Control over company income*

In *Lee v IRC* 24 TC 207, the transferor held management shares conferring votes (and so power to appoint and dismiss directors) even though the shares conferred no right to dividends or capital. Condition E was satisfied. At first sight it seems illogical that a power to appoint/remove directors of a company should constitute a power to enjoy the company income, when power to appoint/remove trustees does not constitute a power to enjoy trust income. Directors and trustees are both fiduciaries. But the management shares in *Lee* conferred more than just a power to appoint/remove directors: *IRC v Schroder* explains:

Mr. Lee had power to appoint and remove directors. That power was not a fiduciary power. He could have appointed himself. ... directors do not

---

<sup>65</sup> 72 TC 205 (Special Commissioners) at p.250. A similar approach applies to the test of corporate residence (central management & control); see 7.10.7 (Influence v control).

owe any fiduciary duty to the shareholders. They are trustees of their powers for the company. Mr. Lee was for all practical purposes the company. He controlled the majority of votes in general meeting. No dividend could be declared save by resolution of the “A” shareholders, and the “B” shareholders had no other prospect of receiving any income or capital save in a winding-up of the company, which again would require a resolution of the “A” shareholders. Thus the “B” shareholders had no measure of control over the company except their right to bring a minority shareholders’ action to prevent misuse by the directors of their powers or ... oppression by the “A” shareholders. Thus Mr. Lee was in practice securely in the saddle. Not only could the “B” shareholders obtain nothing save at his direction; he could within the broad limits of what a director could honestly believe to be proper in the interests of the company ensure that ... the income of the company was used for his own ends. He could, for instance, have appointed himself and his wife directors and have procured [the company] to enter into a service agreement with him.<sup>66</sup>

#### 46.13.3 *Non-fiduciary power*

A power to appoint the capital or income of a fund among a class (not including the appointor) does not satisfy enjoyment condition E, even if

---

66 *IRC v Schroder* 57 TC 94 at p.123. If further authority is needed, see *Holt v Holt*, [1990] 1 WLR 1250 at p.1253, a valuation case concerning farming company shares with (more or less) all the votes but no right to distributions:

“He can appoint himself sole director ... He can occupy the farmhouse as a family home, he can run the estate as he thinks fit. Unlike a farming manager he cannot be dismissed and is not obliged to consult or take instructions from anyone.... He cannot sell capital assets and put the money in his pocket, he cannot commit waste and he cannot artificially increase the profits of the farm for his own benefit by allowing the condition and state of repair of the estate to deteriorate. But if he would like to farm the estate and enjoy the advantages of being a farmer in the Wairau Valley as long as he likes, drawing reasonable remuneration, he cannot be interfered with.

... the B shareholder can obtain nothing without the co-operation of the A shareholder. If the farming business became so prosperous that the profits exceeded all that was necessary for repairs and for reasonable remuneration for the A shareholder then any surplus would be devoted by the control of the A shareholder towards the improvement of the farm property or could be distributed in the form of a dividend. Such a surplus would have to be unforeseeably large before the B shareholders could successfully urge that a dividend ought to be paid.”

the power is not a fiduciary power.<sup>67</sup>

#### 46.13.4 *Limited role of condition E*

In *Lee*, enjoyment condition B was also satisfied, as company income would tend to increase the value of the management shares (voting shares do have some value). Enjoyment condition D was also satisfied.<sup>68</sup> In practice it is difficult to think of a case where enjoyment condition E is satisfied and none of the other enjoyment conditions would be satisfied.

ToA draft guidance makes the same point:

**INTM600960 power to enjoy - condition E**

... In most cases it is unlikely that satisfaction of the power to enjoy test will rest on the basis of this condition alone.

#### 46.13.5 *Must control confer benefit*

*Schroder* raised a further question on the scope of enjoyment condition E which remains open:

[Counsel for the taxpayer] submitted that ... para (e) was not intended to apply unless the taxpayer is able to secure that income is applied in a way which produces at least an indirect benefit or in the words of Lord Morton in the first *Vestey* case that his control over the application of income is a power which he is entitled to use to serve his own ends ...

The judge found the Revenue's response "less than compelling" but did

---

67 *IRC v Schroder* 57 TC 94 at p.116 cites the first *Vestey* case: *Vestey v IRC* 31 TC 1: "I do not think, however, that this limited power of appointment gave [the transferor] power 'to control the application' of any income, within the meaning of [enjoyment condition E]. He could only make an appointment 'in the shape of a capital payment' in favour of one or more of his issue or their spouses and if such a power were intended to be caught ... I think that it would have been included in [enjoyment condition D], which deals expressly with powers of appointment. That Sub-clause is, however, limited in its operation to powers which enable the individual to obtain the beneficial enjoyment of income."

*Schroder* concludes: "the first *Vestey* case is conclusive authority for the proposition that the donee of a special power to appoint an interest in the capital or income of a fund amongst a defined and ascertainable class is not by virtue of that power able to control the application of that income within the meaning of [enjoyment condition E]."

68 See 46.11.5 (Individual receives benefit).

not decide the issue:

... the question whether para (e) applies to a case where a settlor has a power to direct the application of income for the benefit of others and to the exclusion of any benefit direct or indirect to himself does not arise for decision, and I express no concluded opinion upon it.<sup>69</sup>

ToA draft guidance shows that HMRC continue to take that point:

**INTM600960 power to enjoy - condition E**

... The test does not however require that the individual is able to derive personal benefit from the power of control. If in fact therefore a settlor of a settlement, for example, does continue to have power to direct the application of income for the benefit of others, even though he himself may be specifically excluded from benefit, this power to enjoy condition may well be met.

The fact that this point remains undecided only goes to show the limited importance of enjoyment condition E.

#### 46.13.6 *Minority shareholding*

If T holds a majority shareholding in an offshore company, T has power to enjoy all the income of the company since enjoyment condition E is satisfied. The same applies if T and T's spouse together have a majority shareholding.

What is the position if T has a minority shareholding, say, 10% of the ordinary shares? At first sight one might think that T has power to enjoy all the income of the company, under enjoyment condition B, since the income of the company increases the value of T's minority shareholding. But it is suggested that T has only power to enjoy one tenth of the company's income. This was assumed in *Bambridge v IRC*.<sup>70</sup>

#### 46.14 **Power to enjoy: Causation**

It is not sufficient that the transferor has power to enjoy the income of the person abroad. A causation condition must also be satisfied. Section 721(2) ITA provides:

---

<sup>69</sup> *IRC v Schroder* 57 TC 94 at p.125-126.

<sup>70</sup> 36 TC 313. See Boyd, "Requiem for a Man of Straw" [1980] BTR 442 at p.457.

Condition A is that the individual has power in the tax year to enjoy income of a person abroad *as a result of*—

- (a) a relevant transfer,
- (b) one or more associated operations, or
- (c) a relevant transfer and one or more associated operations.

Suppose:

- (1) In 1970 A transfers an asset to a non-resident company wholly owned by B, who is not UK resident (“A’s transfer”).
- (2) In 2010 B transfers the company to an offshore trust under which A may benefit<sup>71</sup> (“B’s transfer”).

A has made a relevant transfer. However, before 2010, A is not within s.720 since A does not have power to enjoy the income of the company.

From the date of B’s transfer in 2010, A does have “power to enjoy”. A does not have that power as a result of A’s transfer alone. B’s transfer appears at first sight to be an associated operation in relation to A’s transfer.<sup>72</sup> It seems at first sight that s.721 condition A is satisfied and A is in principle taxable under s.720 on the income of B’s trust! This clearly cannot be right, but why not? This raises questions similar to those discussed in para 45.13.1 (A transfers to B + B to C: clean break test). Assuming there is a “clean break” between A’s transfer and B’s transfer (the same test as applies elsewhere), it is suggested that there are two reasons for this (either one would suffice):

- (1) B’s transfer is not an operation associated with A’s transfer; and
- (2) A does not have power to enjoy as a result of A’s transfer, but only as a result of B’s transfer.

Suppose:

- (1) In year 1, T transferred assets to an offshore company (“the original transfer of assets”). T has no interest in the shares of the company, and no power to enjoy its income; and so is outside s.720.
- (2) In year 2, T lent money to the company interest-free (“the loan”).

In year 2, T probably does have power to enjoy the income of the company

---

71 If B’s trust is in standard form there will be a common form power to add beneficiaries, so A will have power of to enjoy.

72 See 45.11 (Associated operation: definition).

by virtue of the interest-free loan.<sup>73</sup> However T is not taxed on the income arising from the original transfer of assets in year 1, since that power to enjoy does not arise *as a result* of the transfer or any associated operation. The loan is not an associated operation.<sup>74</sup>

However, T is in principle subject to tax under s.720 on the income arising to the offshore company as a result of the loan in year 2 (if there is any) as the loan is itself a transfer of assets.<sup>75</sup>

On the same facts, if income is used to repay the loan, then enjoyment condition A is satisfied. (So is enjoyment condition C, but that does not matter.)

#### **46.15 s.721 income chargeable to IT**

Section 721(3) ITA provides:

Condition B is that the income of the person abroad would be chargeable to income tax if it were the individual's and received by the individual in the UK.

It is difficult to think of a case where income of the person abroad would not be chargeable to income tax, if received by a UK resident individual in the UK.<sup>76</sup> I have wondered whether the rule had some historical purpose when enacted in 1936 which has since been lost; but the authors of a 1936 textbook were equally puzzled.<sup>77</sup>

In practice condition B will always be satisfied. So it does not matter

<sup>73</sup> Inter alia, enjoyment condition D is satisfied as income may be used to repay the loan, and (depending on the facts) enjoyment condition B may also be satisfied.

<sup>74</sup> See 45.11.3 ("Effected in relation to" the assets transferred). The example is based on the facts of *Fynn v IRC* 37 TC 629 where the s.720 point was not argued, presumably, because the Revenue accepted this view was correct. For the s.727 issues raised by a loan, see 46.18.3 (Connected with transfer).

<sup>75</sup> This point did not arise on the facts of *Fynn* as the loan was used to repay a debt, so no income arose to the offshore company as a result of the loan.

<sup>76</sup> One possible case (prior to the abolition of ordinary residence in 2013) was a transferor who was ordinarily resident but not resident in the UK. If that was possible (which was doubtful) the individual could have benefited from condition B as (being non-resident) they would not have been chargeable on foreign income.

<sup>77</sup> Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies' sur-tax, children's settlements* (1936) p.13.

that s.727 has no equivalent condition.

What about a case where interest is due but unpaid; which (1) would be recognised as income in the accounts of an offshore company, but (2) would not be recognised as income (until paid/received) for IT purposes<sup>78</sup>? The answer is that what is income of the person abroad is determined by IT principles,<sup>79</sup> so s.720 is not applicable to unpaid interest, and condition B is not in point.

#### **46.16 s.721 Cond. C: Transferor UK resident**

Section 721(3A) ITA provides:

Condition C is that the individual is UK resident for the tax year.

##### *46.16.1 Income arises when transferor non-resident*

Section 720 does not apply to income which arises in a year for which the transferor is not resident in the UK.

A non-resident individual is subject to tax at their personal rates on their UK rental income. That individual may transfer UK land to an offshore company in order to avoid higher rate income tax.<sup>80</sup> (It is not usually necessary for a non-resident individual to transfer other assets to a company in order to avoid higher rate tax as income of a non-resident from most other sources is not subject to tax at the higher rates.)<sup>81</sup>

If the individual later becomes UK resident they do not retrospectively become liable under s.720 for income accruing in non-resident years. This is consistent with the usual IT position.<sup>82</sup>

##### *46.16.2 Income arises in split year*

There is no express split-year rule, so the default rule applies: s.720 income is taxable even if it arises during the overseas part of a split year of the transferor.<sup>83</sup> There is no good reason for that. Section 720 income ought to be taxed in the same way as ordinary foreign income. But DT

---

78 See 14.5 (When is interest recognised).

79 See 45.16 (Income of person: Quantum).

80 Of course, CGT, VAT, IHT and SDLT all need consideration.

81 See 42.1 (Non-residents income tax relief: Introduction).

82 See 16.21 (RFI/gains of non-resident, remitted when resident).

83 See 9.1 (Residence throughout tax year).

relief should be available if the transferor is treaty-resident in a foreign state during part of a tax year.<sup>84</sup>

#### 46.16.3 *Transferor non-resident when transfer made*

The intention of those responsible for the legislation was that s.720 should only apply if the transferor was (ordinarily) resident in the UK at the time of the transfer.<sup>85</sup> After some vacillation, this was upheld in *IRC v Willoughby*.<sup>86</sup> But that is only of historical interest, as the position is now governed by s.721(5)(b) ITA:

It does not matter for the purposes of this section ...

- (b) whether the individual is UK resident for the tax year in which the relevant transfer is made (if different from the tax year mentioned in subsection (1))...

Thus non-residence at the time of the transfer is not a defence: s.720 may apply to a person after they become resident, regardless of residence at the time of the transfer. This applies to income from 1996 regardless of the date of the transfer.<sup>87</sup>

### 46.17 Amount of s.720 charge

#### 46.17.1 *Power to enjoy part of income*

Section 720 ITA provides:

- (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions)...
- (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

Section 721(3B) ITA provides:

The amount of the income treated as arising under subsection (1) [the

---

84 See 46.24.3 (Transferor treaty non-resident).

85 “There has to be a transfer of assets abroad by an individual resident in this country.” (W.S. Morrison, then Financial Secretary) 313 HL Official Reports 5th series col 685, cited *IRC v Willoughby* 70 TC 57 at p.113.

86 70 TC 57 reversing *Herdman v IRC* 45 TC 394.

87 Also see 47.15.5 (Transferor non-resident when transfer made; pre-1996 income).

amount of s.720 income] is (subject to sections 724 and 725<sup>88</sup>) given by the following rules-

*Rule 1*

The amount is equal to the amount of the income of the person abroad if the individual [the transferor]-

- (a) is domiciled in the UK at any time in the tax year, or
- (b) is at any time in the tax year regarded for the purposes of section 718(1)(b)<sup>89</sup> as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly domiciled resident<sup>90</sup>].

Rule 2 is a relief for protected trusts.<sup>91</sup>

Prior to 2013, s.720 did not tell us *what* is the amount of income treated as arising. Construction and common sense had to fill the gap.<sup>92</sup> Now we have s.721(3B) but it does not clearly address the problems which arise.

A person may have “power to enjoy” (as defined) over all the income of an offshore person even though their power to enjoy (in the natural sense of that expression) is limited to an unidentifiable part<sup>93</sup> or even none<sup>94</sup> of the income. In such a case T is taxed on all the income. The s.720 income is not limited to the income that T is actually entitled, or able, to receive. Section 721(3B) ITA confirms the pre-2013 law.<sup>95</sup>

However, if T has power to enjoy (as defined) over only part of the income, T is only taxed on the income which T has power to enjoy:

The only question is: What income of the non-resident does the resident individual have power to enjoy by reason of the transfer either alone or

88 The exceptions referred to in brackets are rarely if ever invoked. For s.724, see 46.16.3 (Quantum: Enjoyment cond. C). Section. 725 concerns interaction with CFC rules.

89 See 45.5 (“Person abroad”).

90 See 4.4.1 (Condition A: formerly dom).

91 See 88.15 (s.720 protected-trust relief).

92 See R.S. Boyd “Requiem for a Man of Straw” [1980] BTR 442. See also 45.15 (What is income of person abroad?) and 45.16 (The amount of income of person abroad).

93 eg if T transfers assets to a company in which T holds debentures. If all the income of the company increases the value of the debentures just a little, T has “power to enjoy” all the income within enjoyment condition B.

94 eg if T has control within enjoyment condition E.

95 *Howard de Walden v IRC* 25 TC 121.

in conjunction with associated operations? It is that income which is deemed to be income of that individual for all purposes of the Income Tax Acts.<sup>96</sup>

It is suggested that s.721(3B) ITA has not altered this.

#### 46.17.2 *Person abroad has other source of income*

Suppose:

- (1) T transfers assets to an offshore company.
- (2) The offshore company has two sources of income:
  - (a) income from the assets transferred by T;
  - (b) income from other sources which have nothing to do with T.
- (3) T has power to enjoy all the income of the offshore company.

What income is treated as arising to the individual. Is it any income of the person abroad? Or is it only the income which arises as a result of the transfer of assets or associated operations?

The relevant provisions are in s.721:

- (1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.
- (2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
  - (a) a relevant transfer,
  - (b) one or more associated operations, or
  - (c) a relevant transfer and one or more associated operations...
- (3B) The amount of the income treated as arising under subsection (1) is equal to the amount of the income of the person abroad (subject to sections 724 and 725).

RI 201 states:

It has not been determined by the Courts whether all the income of the overseas person should be assessed, or only the income of that person to the extent that it arose by virtue or in consequence of the relevant transfer of assets and any associated operation(s). It has been the Revenue's practice (since the decision in *Vestey v IRC* 54 TC 503) to assess on the second of these two possible bases.

---

<sup>96</sup> *Congreve v IRC* 30 TC 163 at p.199.

The Revenue practice is correct, though in fact the issue has been determined by the courts: the view that all the income of the person abroad is taxed was dismissed as “quite ridiculous”.<sup>97</sup>

This view is supported by s.714(2) ITA which provides:

The charges apply only if a relevant transfer occurs, and they operate by reference to income of a person abroad that is connected with the transfer or another relevant transaction.

This clearly rejects the view that all income of the person abroad is caught. It suggests however that the measure of income caught is not that which arises as a *result* of the relevant transfer or associated operation, it is income which arises that is *connected* with the transfer or associated operation. “Connected” is not defined. However, while the wording was perhaps designed to give HMRC scope to take one step back from the position stated in RI 201, I cannot think of a case where it would arise in practice.

It is suggested that s.721(3B) has not altered this. The reference to “the income of the person abroad” must be taken as a reference to the income within s.714(2).

In *Fisher v HMRC*, following a transfer of a business, the income of the person abroad included income from new businesses developed by the person abroad, to the extent that it derived from the transferred business or associated operations. The new business ventures were associated operations as income from the transferred business was used to finance them. The position was no different than if the profits from the transferred business were invested in shares.<sup>98</sup>

### 46.17.3 *Quantum: Enjoyment cond. C*

A special rule applies for a transfer who has power to enjoy under enjoyment condition C.<sup>99</sup> Section 724 ITA provides:

---

97 Walton J in vehement form in *Vestey v IRC* 54 TC 503 at p.562, followed in *Carvill v IRC* [2000] STC (SCD) 143 at [97] - [98]. The point had been left open in *Howard de Walden v IRC* 25 TC 119.

98 [2020] UKUT 62 (TCC) at [97] to [102].

99 See 46.11.5 (Individual receives benefit).

(1) This section applies if an individual has power to enjoy income of a person abroad for the purposes of section 721 because of receiving any such benefit as is referred to in section 723(3) (benefit provided out of income of person abroad).

(2) Despite anything in section 720, the individual is liable to income tax under that section for the tax year in which the benefit is received on an amount equal to the whole of the amount or value of that benefit.

(3) But subsection (2) does not apply so far as it is shown that the benefit derives directly or indirectly from income by reference to which the individual has already been charged to income tax for that tax year or a previous tax year under this Chapter [Chapter 2 Part 13, ToA].

This was introduced in 1969 and upsets the reasoning of *de Walden* where repayment of a loan was held to fall within enjoyment condition C. Since the charge is now on the value of the benefit, and the value of a payment for full consideration (such as the repayment of a loan) is nil, there would be no charge under s.720 by reference to enjoyment condition C.

In *Botnar* the Special Commissioners said:

245. ... Where the power to enjoy arises the tax is charged not on the income which the taxpayer has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the non-resident as long as it originated from it even indirectly. We do not accept that [s.724 ITA] only operates where the benefit received in a year exceeds the relevant income.

It is considered that the charge is on the lower of the value of the benefit and the amount of income of the person abroad. The value of a benefit in excess of the income does not come into charge, and if the transferor has power to enjoy the income apart from enjoyment condition C, then this provision does not apply.<sup>100</sup>

ToA draft guidance provides:

**INTM600980 Special rule where benefit provided out of income of person abroad**

This provision [Section 724 ITA] was considered in the case of *CIR v Botnar* (72 TC 205). Although it did not affect the outcome in that case,

---

100 See Venables, "Section 739 and benefits in kind", OTPR Vol 11 Issue 3 p.1, <http://www.khplc.co.uk/reviews>

there is some helpful comment on it. The views expressed there appear to confirm that in the case of actual receipt of a benefit (as opposed to mere entitlement to receive) the provision is determinative of the charge to tax which could produce a radically different result than what might otherwise be the charge under the income charge. Further that where the power to enjoy arises on this basis the tax is charged not on the income which the individual has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the person abroad as long as it originated from it even indirectly. The Commissioner rejected the view that the provision only operates where the benefit received in a year exceeds the income of the person abroad. From this it seems clear that where the conditions are met the provision could have the effect of either extending the amount of charge for the tax year beyond the actual income of the person abroad of that year or of limiting the amount of the charge to the amount or value of the benefit where that is less than the income of the person abroad of the tax year.

These points only arise where power to enjoy condition C is met and other conditions are not met, which in practice only happens rarely if at all.

#### 46.17.4 *Transferor deductions/reliefs*

Section 746 ITA provides:

- (1) This section applies for the purpose of calculating the liability to income tax of an individual charged under section 720 or 727.
- (2) For the purpose of determining the deductions and reliefs allowed to the individual, the individual is to be treated as if the individual had actually received the amount by reference to which the income treated as arising to the individual under section 721 or 728 is determined.

The legislation does not identify what deductions and reliefs are applicable. An example might be foreign tax credit relief, which might perhaps not have been available in the absence of s.746, at least after the 2013 ToA reforms.<sup>101</sup>

#### **46.18 Transferor receives capital sum**

Section 727 ITA is an independent charging section. It applies, in short,

---

101 See too 44.4 (Settlor deductions/reliefs).

where a transferor receives a capital sum.

*Howard de Walden v IRC* explains its purpose:

The provision was made ... to meet devices by which a transferor took care to give himself no “power to enjoy” any income of a non-resident transferee company within the meaning of [s.723 ITA], but obtained the money he required, for example, by borrowing from the company, all the shares being vested (for example) in his children.<sup>102</sup>

A similar example would be a non-resident trust or underlying company making an (arm’s length) loan to a transferor who was excluded from benefit.

Many of the rules applying to s.720 also apply to s.727. In ITA they are set out twice, but I do not discuss them again here.

It is helpful to set out the provisions side by side. The important differences are underlined:

**Power to enjoy: s.720 ITA**

(1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.

(2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).

(3) Tax is charged under this section on the amount of income treated as arising in the tax year. ...

(5) The person liable for any tax charged under this section is the individual to whom the income is treated as arising.

**Receipt of capital sum: s.727 ITA**

(1) [identical]

(2) Income tax is charged on income treated as arising to such an individual under section 728 (individuals receiving capital sums as a result of relevant transactions).

(3) [identical]

(4) [identical to (5)]

**Power to enjoy: s.721 ITA**

**Receipt of capital sum: s.728 ITA**

---

102 25 TC 121 at p.135.

(1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.

(2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—

- (a) a relevant transfer,
- (b) one or more associated operations, or
- (c) a relevant transfer and one or more associated operations.

(3) Condition B is that the income of the person abroad would be chargeable to income tax if it were the individual's and received by the individual in the UK.

(3A) Condition C is that the individual is UK resident for the tax year.

(3B) The amount of the income treated as arising under subsection (1) is (subject to sections 724 and 725) given by the following rules—

(1) Income is treated as arising to such an individual as is referred to in section 727(1) in a tax year for income tax purposes if—

(a) income has become the income of a person abroad as a result of—

[identical]

(b) the capital receipt conditions are met in respect of the individual in the tax year (see section 729) , and

[No equivalent but condition B is not important as it is always met.]

(c) the individual is UK resident for the tax year.

(1A) The amount of the income treated as arising under subsection (1) is (subject to subsection (2)) given by the following rules—

*Rule 1*

The amount is equal to the amount of the income of the person abroad if the individual—

- (a) is domiciled in the UK at any time in the tax year, or
- (b) is at any time in the tax year regarded for the purposes of section 718(1)(b)<sup>103</sup> as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met formerly-domiciled resident].

*Rule 2*

In any other case, the amount is equal to so much of the income of the person abroad as is not protected foreign-source income (see section 721A).

(3BA) In a case in which rule 2 of subsection (3B) applies, so much of the income of the person abroad as is protected foreign-source income for the purposes of that rule counts as “protected income” for the purposes of section 733A(1)(b)(i).

- (3C) Subsection (1) does not apply if—
- (a) the individual is liable for income tax charged on the income of the person abroad by virtue of a charge not contained in this Chapter [Chapter 2 Part 13, ToA], and
  - (b) all that income tax has been paid.

*Rule 1*

[Identical]

*Rule 2*

In any other case, the amount is equal to so much of the income of the person abroad as is not protected foreign-source income (see section 729A).

(1B) In a case in which rule 2 of subsection (1A) applies, so much of the income of the person abroad as is protected foreign-source income for the purposes of that rule counts as “protected income” for the purposes of section 733A(1)(b)(i).

- (2A) [identical to (3C) opposite]

#### 46.18.1 *Nature of s.727 charge*

EN ITA Change 111 provides:

Section 739(3) ICTA [now s.727] does not deem the capital sum to be income; instead, it takes income which has become payable to persons

---

<sup>103</sup> See 45.5 (“Person abroad”).

abroad as a result of the transfer and deems that income to be the transferor's.

The amount of the capital sum does not matter. In *Vestey v IRC*:

It is "any income" of the foreign transferees which is deemed to be the income of the recipient of a capital sum, [*indeed of each and every recipient of any capital sum,*]<sup>104</sup> small or large, whenever received. From these words there is no escape.<sup>105</sup>

There is considerable overlap between s.727 and the settlor-interested trust code. Where a settlor receives a capital sum, it is necessary to consider the settlor-interested trust code even if the settlor is excluded.<sup>106</sup> A settlor who is entitled to receive a capital sum may have an interest under the settlement by virtue of that entitlement. But the settlor-interested trust code only applies if there is income at trust level, not a company level.

#### 46.18.2 *Overlap of s.720/s.727*

A transferor who receives a capital sum, may also be within s.720 on the basis that the transferor has power to enjoy. A transferor who is entitled to receive a capital sum may have power to enjoy simply by virtue of that entitlement. So there is considerable overlap between s.720 and s.727.

ToA draft guidance provides:

#### **INTM600680 General conditions Which charge applies?**

It is possible that for the same tax year an individual could meet the conditions to be potentially chargeable under either of the income charge provisions. The 'no duplication of charge' provisions described at INTM602360 ensure that the same income cannot be taken into account more than once for the purpose of an income charge. The result would be that if the conditions for both charges were in fact met, only one charge would be made.

This was the case even before double-counting relief was enacted in 1981:

[Sections 720 and 727 ITA] are ... concurrent and not cumulative. A person cannot be taxed in any one year on the same sum under both

---

104 The words in italics are wrong since s.727 is limited to the transferor.

105 54 TC 503 at p.580.

106 See 44.14 (Settlor receives capital sum).

[s.720 and also s.727]. Like Warren Hastings, the Crown, in making this concession, doubtless stood amazed at its own moderation ... but make it it did.<sup>107</sup>

Before 2017 it was rare for s.727 to apply in a case where s.720 does not, that is, the transferor receives a capital sum without having power to enjoy. So it was rare to have to look at s.727. But this has changed as a result of complications of the protected trust rules.<sup>108</sup>

## 46.19 Capital receipt conditions

Section 729(1) ITA provides:

For the purposes of section 728(1), the capital receipt conditions are met in respect of the individual in a tax year (“the relevant year”) if—

- (a) either—
  - (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
  - (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer, and
- (b) the payment of that sum is (or, in the case of an entitlement, would be) in any way connected with any relevant transaction.

### 46.19.1 *Receives or entitled to receive*

Section 729(4) ITA gives a wide meaning to receives/entitled to receive:

For the purposes of subsection (1), a sum is treated as a capital sum which the individual (“A”) receives or is entitled to receive if another person receives or is entitled to receive it—

- (a) at A’s direction, or
- (b) as a result of the assignment by A of A’s right to receive it.

It is considered that a person is not “entitled to receive” a sum until it is due; so if a transferor lends to a person abroad, on terms that the loan is repayable on a fixed date, the capital receipt condition is not met before

---

107 *Vestey v IRC* 54 TC 503 at p.556.

108 See 88.16 (s.727 protected-trust relief).

that date.<sup>109</sup> But if the debt is repayable on demand, the transferor is entitled to receive it even if they have not formally demanded it: a notice of demand is a merely administrative matter.

#### 46.19.2 “Capital sum”

“Capital sum” is artificially defined. Section 729(3) ITA provides:

In subsection (1) “capital sum” means—

- (a) any sum paid or payable by way of loan or repayment of a loan, and
- (b) any other sum paid or payable—
  - (i) otherwise than as income, and
  - (ii) not for full consideration in money or money’s worth.

If the person abroad lends to T, T receives a capital sum.

If T lends to a person abroad, repayment of the loan to T is a capital sum. But loan is not defined and so has its strict meaning.<sup>110</sup> If T sells an asset at market value, payment of the purchase price to T is not a capital sum, as defined, as:

- (a) There is no loan
- (b) There is full consideration

HMRC agree. ToA draft guidance provides:

#### **INTM601060 examples of capital sum**

The following are examples of situations where there may not be a capital sum for the purpose of this charge.

g. If an individual transfers assets to a person abroad for full consideration and leaves the cost of the assets credited to his account with that person, the unpaid purchase money will not normally [?] be regarded as a loan following the decision in *Ramsden v CIR* (37 TC 619).

However although the capital sum test may not be met for the purpose of this income charge, the presence of an account with a person abroad to which sums are credited may be indicative of that individual having

---

109 So in the definition of control, express provision is needed to deal with this; see 99.3.11 (“Entitled to acquire”). But the lender may have power to enjoy, under enjoyment condition B; see 46.11.4 (Income increases value of asset).

110 See App.2.7 (Loan).

the power to enjoy income for example (as in the *Ramsden* case) through [enjoyment] Condition B.

h. Where promissory notes or debentures payable on demand are issued to the individual as part of the consideration for the transfer of assets the amount payable under the notes, not being payable by way of loan, and being payable for full consideration is unlikely [?] to be a capital sum for this purpose, as was found in the case of *Lee v CIR* (24 TC 207). However ... such an issue of promissory notes may give rise to a power to enjoy the income of the person abroad and bring the individual within that income charge.

In *Botnar v IRC* the Special Commissioners say:<sup>111</sup>

In our judgment the entitlement to use the flat is not a capital sum within the definition in [s.729(3)]; in particular we hold that the entitlement to use was not a “sum” within any normal use of English.

ToA draft guidance provides:

**INTM601060 examples of capital sum**

...Other examples might include:-

e. The situation where an asset is transferred to a person abroad at an inflated price. Where an individual transfers an asset and receives full consideration in money or money’s worth even though by general nature that consideration may be a ‘capital’ receipt it would not be a ‘capital sum’ for the purpose of these provisions because of the specific wording in the legislation defining the meaning of the term for this purpose. Hence it is only where an inflated price is received that there could be a capital sum for this purpose.

f. A capital distribution from a foreign company. A foreign company may, under the law of the jurisdiction in which it is established, be able to make a so-called ‘capital distribution’. Where such a distribution received by the individual is found in fact not to be an income receipt, and so satisfies the condition to be any other sum payable otherwise than as income, it can be a capital sum for this purpose...

These are indeed examples of a capital sum, but in each case the transferor would also have power to enjoy, and so s.720 would also apply.

### 46.19.3 *Connected with transfer*

---

<sup>111</sup> 72 TC 205 at p.266.

The capital receipt conditions are only met if (in short) the payment of the capital sum is “in any way connected” with the transfer of assets abroad (or associated operations). I refer to this as the “**connection requirement**”.

“Connected with” is of course a broad expression.<sup>112</sup> The words “in any way” do not strictly add anything, but they show that the words are not to be construed narrowly.

In *Fynn v IRC*:<sup>113</sup>

- (1) In 1948, T transferred assets (“the original assets”) to an Irish company (“the original transfer”).
- (2) The company charged the assets for a debt (“the charge”).
- (3) In 1952/53, T lent the company £12,000 (“T’s loan”).

T was assessed on the income accruing to the company in 1951/52 and 1952/53 under (what is now) s.727.<sup>114</sup>

During those years T was entitled to receive a capital sum (repayment of T’s loan). However, the (hypothetical) payment of that sum would not be “connected” with the original transfer or the charge (an operation associated with the original transfer). So the connection requirement was not satisfied, so the capital receipt conditions were not satisfied, and s.727 did not apply.

Suppose the same facts but the loan were repaid out of the original assets. In that case T actually receives a capital sum, and the actual receipt is connected with the original transfer; so it is considered that the capital receipt condition would be satisfied. (This did not happen in *Fynn*: T wisely released the loan, two years after it was made.)

The definition of capital sum is the only place where the expression “connected with” is used in the ToA provisions (though the definition of associated operations uses the comparable expression “in relation to” and it is suggested that the meaning is the same).

#### 46.19.4 *Loan to transferor*

---

112 See [App App. 2.6.2](#) (In connection with).

113 37 TC 629.

114 These facts raise interesting s.720 issues, which were not discussed in the case; see 46.13 (Power to enjoy: Causation).

Section 729(2) ITA provides:

But subsection (1)(a)(ii) does not apply merely because of the receipt of a sum by way of loan if the loan is wholly repaid before the relevant year begins.

This applies, in short, where:

- (1) A person abroad lends to the transferor (T)
- (2) The transferor repays the loan

ToA draft guidance provides a straightforward example:

**INTM601040 Meaning of ‘capital sum’**

... Example

In years 1 to 4 income arises to a person abroad as a result of a relevant transfer by an individual A.

The individual does not have any power to enjoy the income or entitlement to a capital sum; but in year 2 receives a loan.

In year 3 the loan is repaid in full and there is no ongoing entitlement to further loans or other capital sums.

In these circumstances there would be an income charge in years 2 and 3. There would also be ongoing charge for year 4 because of the terms of (a)(ii) in INTM601020 but for the proviso above relating to repayment of a loan where that is in effect the only feature that triggers the income charge - receipt of/entitlement to capital sums.

46.19.5 *Loan to person abroad*

The capital receipt condition in s.729(1) (so far as relevant) requires that:

either—

- (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
- (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer

The condition in (a) is satisfied in a year if the individual receives *or is entitled to receive* a capital sum in that year. The condition is satisfied in a year if the individual received a capital sum in an earlier year.

The condition is not satisfied if:

- (1) the individual was entitled to receive a capital sum in an earlier year but

- (2) the entitlement has ceased<sup>115</sup> and the individual did not actually receive anything.

This was deliberate. EN ITA Change 111 provides:

But the wording of section 739(3) of ICTA [now s.727] leaves the timing of the charge rather unclear. It reads:

Where, whether before or after any such transfer, such an individual receives or is entitled to receive any capital sum ...

Section 739(6) ICTA [now s.729(2) ITA] provides that income is not deemed to be the individual's under section [727] for any tax year "by reason only of his having received a sum by way of loan if that sum has been wholly repaid before the beginning of that year".<sup>116</sup> Therefore income may be deemed to be the individual's in other cases where there has been an actual receipt of a capital sum in a previous tax year. But [the source legislation] makes no provision about whether section [727] imposes a charge if the individual was merely entitled to receive a capital sum in a previous tax year. In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under section [727]. Section 729 ITA gives effect to this practice by providing that the individual must either receive or be entitled to receive a capital sum in the tax year or have received a capital sum in an earlier tax year.

However it must be rare that a transferor is entitled to receive a capital sum without ever receiving a capital sum. An example would be if a transferor lent money to the person abroad and later waived the right to repayment.

ToA draft guidance considers the position of a loan from the individual to the person abroad:

**INTM601040 Meaning of 'capital sum'**

... Not only is the receipt of a loan by the individual a capital sum, the making of a loan by the individual to a person abroad can also satisfy this meaning, carrying as it does an entitlement to repayment. That entitlement would be entitlement to a capital sum and thus the condition would be met from the time that the loan is made to the person abroad. Any repayment of such a loan would itself be a capital sum, it is not

---

115 An assignment by the transferor does not count: see 46.18.1 (Receives or entitled to receive).

116 See 46.18.4 (Loan to transferor).

however itself a loan and thus will not stop the income charge from running under the proviso described in the first paragraph above. In order to stop this income charge from continuing the individual would need to demonstrate that there was no ongoing entitlement of any description to a capital sum.

## 46.20 Time extent of s.727 charge

### 46.20.1 *Historic income*

It can happen that at one time the capital receipt conditions are not satisfied, and later they become satisfied. A simple example would be if the person abroad makes a loan to the transferor who is otherwise excluded from benefit: until the loan is made the transferor may not have received (or been entitled to receive) a capital sum); but on making the loan, the transferor does receive a capital sum so the capital receipt conditions become satisfied at that time.

A transferor who receives a capital sum in this way is not taxed on income arising to the person abroad in a year before the year that the capital receipt conditions are satisfied (“historic income”). Section 727 is not in that sense retrospective:

While the income of the non-resident trustees would be deemed to be the income of [the taxpayer] on her receipt of the £100,000 [capital sum] on 2 May 1966, *in that and subsequent financial years*, I see nothing in [s.727] which gives it retrospective effect. It does not provide that the income of the non-resident in any year before the person receives or is entitled to receive is to be deemed to be that person’s income.<sup>117</sup>

HMRC agree. ToA draft guidance provides:

#### **INTM600660 receipt of/entitlement to capital sum**

... It should be noted that no liability can arise under this charge for a tax year before receipt or entitlement to a capital sum. But where there is such a receipt or entitlement liability continues for any subsequent year for which there is income (there need be no further receipt of a capital sum). If, however, entitlement to a capital sum completely ends, and there are no other grounds for an income charge, liability under this

---

<sup>117</sup> *Vestey v IRC* 54 TC 503 at p.594.

charge will not normally be extended beyond the tax year in which that entitlement ceases.

Where this charge applies for the first time it is the whole of any income of the tax year that is potentially chargeable not merely income arising from the date of receipt or entitlement to the capital sum. This is also the case for any tax year where the entitlement to the capital sum ends; the whole of any income of the tax year is potentially chargeable.

An alternative view is that s.727 could apply so that the historic income should retrospectively be deemed to be income of the transferor in the year that the income actually arose. That seems unworkable: it would require an unlimited number of past years to be reopened.

Another possible view that s.727 could apply so that the historic income should be deemed to be the income of the transferor in the year of the receipt of the capital sum. That would still require all the past years of the person abroad to be reviewed. There is also the conundrum of how to treat income arising to the person abroad if the transferor was not UK resident during some of those years.

This explains why the capital receipt conditions are satisfied if a transferor is entitled to receive a capital sum, even though they have not actually received it. The application of s.727 makes sense here because on the subsequent receipt of the capital sum the historic income would not otherwise be caught.

#### 46.20.2 *Present and future income*

The s.727 charge applies to income arising in the year in which the capital receipt condition is met. However once that condition is met in one year, it is generally met in all future years, so s.727 in principle applies to the income of the person abroad in the year that the capital receipt condition is first met and all future years.

There are two narrow exceptions to this rule:

- (1) a loan to the transferor which the transferor has repaid.<sup>118</sup>
- (2) a loan to the person abroad which the transferor later waives.<sup>119</sup>

In general, therefore, the capital receipt conditions are met in a year if the transferor has received a capital sum in an earlier year. This raises the

---

118 See 46.18.4 (Loan to transferor).

119 See 46.18.5 (Loan to person abroad).

spectre of a transferor being taxed for all time because they have received a small capital sum. Suppose:

- (1) A company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
- (2) The transferor receives a capital sum. This does not give rise to any (or any additional) charge under s.727 since all the income is taxed as the transferor's anyway.
- (3) The transferor is then excluded from benefit and ceases to have power to enjoy.

It has been suggested in these circumstances that all future income arising in the company will be deemed to be that of the unfortunate transferor. The same point would apply to a non-resident trust if a capital sum was paid to the settlor, even though the settlor was subsequently excluded from benefit and ceased to be liable under the IT settlor-interested trust provisions. That would be absurd. For good measure, the overlap with s.633 ITTOIA would also lead to a double charge. In practice HMRC do not take that point. It is suggested that s.727 does not normally apply in a situation where s.720 applies, so a capital sum received at that time should be disregarded. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the income of future years.

The same problem arises if:

- (1) Trustees hold a company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
- (2) The transferor receives a capital sum.
- (3) The trustees then sell the company to a third party.

It has been suggested that all future income arising in the company will be deemed to be that of the unfortunate transferor (though they may not have a right to know what that income will be). That would be absurd. In practice HMRC do not take that point. It is suggested that s.727 does not normally apply in this situation. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the company's future income.

Walton J proposed a sensible solution to this conundrum in *Vestey*. He said that the charge under s.727 was limited to the amount of the capital sum. Unfortunately his view was rejected by two judges in the House of

Lords who commented on the point.<sup>120</sup> However it remains arguable, as the comments in *Vestey* were obiter, the approach to statutory construction is now looser, and the problems which arise were not explored. The disproportionate nature of the rules on any other view would constitute a breach of EU law, and an EU-law compliant construction should be preferred.

#### **46.21 s.720 remittance basis**

Section 726(1) ITA provides:

This section applies in relation to income treated under section 721 as arising to an individual in a tax year (“the deemed income”) if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.

I call this the “**s.720 remittance basis**”.

For clarity I gloss the expression “deemed income” as “deemed [s.720] income.”

It will be unusual for this to apply from 2017/18, because in most cases where the conditions for the s.720 remittance basis are met, s.720 protected-trust relief will be or at least could be available.<sup>121</sup> The s.720 remittance basis is still needed where:

- (1) income arises to a company abroad in which T has a direct interest (in short, the company is not held in a trust)
- (2) a settlement is “tainted” by an addition to the settlement

In either case, the income of underlying companies is not s.720 protected income.

Section 726(2) ITA defines the term “foreign” deemed income:

For the purposes of this section the deemed [s.720] income is “foreign” if (and to the corresponding extent that) the income mentioned in section 721(2) [the income of the person abroad<sup>122</sup>] would be relevant foreign income if it were the individual’s.<sup>123</sup>

---

120 See the comment of Lord Wilberforce set out in 46.17.1 (Nature of s.727 charge).

121 See 88.15 (s.720: Protected-trust relief).

122 See 46.10 (Condition A: Power to enjoy).

123 For the reason for the wording (“would be RFI if it were the individual’s”), see 15.10.2 (Relevant foreign income).

Section 726(3) ITA provides the relief:

Treat the foreign deemed [s.720] income as relevant foreign income of the individual.

Section 720 income is fictional income distinct from the actual income of the person abroad. Since fictional income cannot be remitted, the remittance basis would not work. So s.726(4) ITA provides:

For the purposes of chapter A1 of part 14 (remittance basis), treat so much of the income within section 721(2) as would be relevant foreign income if it were the individual's as deriving from the foreign deemed [s.720] income.

In short, the remittance basis applies as if the income accruing to the person abroad were the income of the transferor. There is a tax charge if the income of the person abroad is received/brought/used in the UK by the transferor or by a relevant person (in relation to the transferor).

It is desirable for trusts and companies within s.720 to segregate (1) foreign income and (2) capital. They can then remit capital (IT-free) rather than income (chargeable at IT rates). If they fail to do so then the mixed fund rules will apply.

#### 46.21.1 *Remittance in split year*

Section 726(5) ITA provides:

In the application of section 832 of ITTOIA 2005 to the foreign deemed [s.720] income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) s.720 income is taxable if it is remitted during the overseas part of a split year.<sup>124</sup>

There is no good reason for that.<sup>125</sup> The s.720 remittance basis ought to operate in the same way as for ordinary foreign income. But the point will not often arise.

#### 46.21.2 *Payment of s.720 income to transferor when non-resident*

---

<sup>124</sup> See 16.13.1 (Remittance in split-year).

<sup>125</sup> The same (unfair) rules applies for s.731: see 47.39.9 (Remittance in split year).

Suppose:

- (1) Year 1: Income accrues to a company within s.720. The transferor (“T”) receives s.720 income but that income is (un)taxed under the s.720 remittance basis.
- (2) Year 2:
  - (a) T becomes non-resident.
  - (b) The company distributes its income by way of dividend. T receives actual income (a dividend) but because this dividend is received in a non-resident year, it is not taxed either on receipt or when remitted to the UK.
- (3) Year 3:
  - (a) T becomes UK resident.
  - (b) T remits that dividend to the UK.

The question is whether the dividend received in the UK in year 3 constitutes a remittance of the s.720 income of year 1. Is the dividend which the individual received derived from the s.720 income. The answer is that the dividend received is derived from the income of the person abroad, and so is taxable on receipt in the UK in year 3.<sup>126</sup>

The position is no better if T remits the dividend in year 2, as this is in principle caught by the temporary non-residence rules.

In short, one cannot “wash” income taxable on the s.720 remittance basis by a distribution to T in a year of T’s temporary non-residence. That view fits the object of s.720 which is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647.

#### 46.21.3 Pre-2008 s.720 income

In the following discussion I use the term “**pre-2008 s.720 income**” to mean foreign income arising before 6 April 2008, which

- (1) fell within s.720 ITA or its predecessor, s.739 ICTA, but
- (2) qualified for relief under s.726 (in its 2007/08 form), or its predecessor, s.743(3) ICTA, a kind of remittance basis which in earlier editions of this work I called “the foreign domicile defence.”

---

126 See s.726(4). This seems even clearer if one remembers that distribution relief would be available, had the dividend in fact been taxable; see 48.3 (Distribution relief).

There was no tax charge when the income arose if it was not received in the UK.

Before 2008/09 it is considered that there was no charge under these sections if such income was received outside the UK but later brought to the UK. This was so whether the income was brought to the UK by:

- (1) the person abroad who received it; or
- (2) the transferor (if they received the income outside the UK from the person abroad).<sup>127</sup>

Para 170 schedule 7 FA 2008 provides:

The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Pre-2008 s.720 income remitted after 2008/09 is not caught by s.726 in its current form, as the condition in s.726(1)(a) is not met.<sup>128</sup> So there is still no charge on the remittance of pre-2008 s.720 income. This is right and fair, since there was no charge on remittance before 2008. However (given the retrospective operation of some other 2008 reforms) this may have been an oversight. A passage in the TAH suggests its author thought that pre-2008 s.720 income is taxable on remittance after 6 April 2008.<sup>129</sup>

---

127 See *Taxation of Foreign Domiciliaries* 6th edn para 16.14 (s.720 foreign domicile defence). There were good reasons for this: see *Taxation of Foreign Domiciliaries* 6th edn para 14.12 (Critique of s.648 clawback). Needless to say, no reason was given for changing the position.

128 Contrast the usual RFI remittance basis, where para 83 sch 7 FA 2008 fills that gap: see 16.16.1 (Pre-2008 RFI/gains).

129 TAH para 1224 provides:

“The provisions described in TAH 1223 [including the current s.720 remittance basis] have effect for the tax year 2008-09 and subsequent years. There are no specific transitional arrangements for introduction of the new provisions. As the [s.720] income charge only looks at income arising to the person abroad in the tax year it should not be necessary to have regard to income of earlier years in determining whether there is an amount that is to be regarded as foreign deemed income. However if there is foreign deemed income then in considering any possible charge under Part 8 ITTOIA it will be appropriate to consider all sums remitted to the UK in the tax year even if they arise, for example, from income of periods prior to the introduction of these provisions. Those remittances will fall to be tested against the rules in Chapter A1 Part 14 ITA 2007 as to whether they are taxable remittances.”

But it seems to me that this is clearly wrong.

Pre-2008 s.720 income may also qualify for relief as “transitionally protected income”.<sup>130</sup>

#### 46.21.4 *s.720 income 2005-08*

In the following discussion I use the term “**2005-2008 s.720 income**” to mean foreign income arising in the years 2005/06 to 2007/08 (inclusive), which fell within (what was then) s.739 ICTA.

TAH para 1222 records the bizarre view that ITTOIA absent-mindedly abolished the foreign domicile defence, formerly in s.743(3) ICTA, so that in the years 2005-2008, s.720 income was always charged on an arising basis:

Following the Tax Law Rewrite [ITTOIA] new and separate charging provisions were introduced for all types of foreign income replacing the general charge under what was Case IV/V of Schedule D. The new provisions, included in ITTOIA, also provided, on a claim, an alternative basis for calculating certain income categorised as ‘relevant foreign income’ and the amount on which an individual would be taxed.

From the introduction of ITTOIA non-UK domicile status could impact this relevant foreign income and resulted broadly speaking in the income subject to the claim being taxed only when received in the UK.

Apart from minor adjustments consequential upon the introduction of ITTOIA the transfer of assets provisions giving exclusion from charge for certain income of non-UK domiciled individuals remained largely unchanged. However the exclusion [s.743(3) ICTA] was only for income that would not be chargeable to tax on the basis of domicile status alone. It could be argued that following the new charging provisions brought into effect by ITTOIA, which carried no distinction on the basis of domicile, that from 6 April 2005 there was no such income that fell to be excluded on the basis of domicile under the transfer of assets provisions.

I have not come across any reference to this argument before the publication of the TAH in 2009, nor do HMRC say expressly whether they regard it as correct. I find it hard to imagine that anyone could take the argument seriously. But in practice the point is academic as HMRC will

---

130 See 88.15.3 (Pre-2017 s.720 income).

not usually take any notice of it:

However the introduction of ITTOIA was not intended to change the law under transfer of assets in this way and as a result HMRC continues to operate the income charge provisions in this interim period in the same way that they were operated prior to April 2005, subject to cases where there appears to be manipulation of the interaction of the new provisions. Where you identify a case that appears to involve manipulation refer it to the Transfer of Assets Technical Adviser in CAR (Residency) Offshore Personal Tax Team.

The years 2005-2008 are (in short) out of time to assess. But the point is not entirely academic, as there will be UK resident individuals who were remittance basis taxpayers in those years, and whose 2005-2008 s.720 income is still held offshore. If the argument were actually right, so that income was by law taxed on an arising basis, without any foreign domicile defence, then HMRC could not assess the income in a subsequent year when it was remitted. One could envisage circumstances when taxpayers would want to raise the argument. Similar issues would arise in relation to the s.624 remittance basis. However I doubt if these wider ramifications of the argument will ever need to be considered.

#### **46.22 s.720/s.624 interaction**

Section 721(3C) ITA provides:

Subsection (1) does not apply if—

- (a) the individual [the transferor] is liable for income tax charged on the income of the person abroad by virtue of a charge not contained in this Chapter [Chapter 2 Part 13, ToA], and
- (b) all that income tax has been paid.

If a settlor/transferor creates a non-resident settlor-interested trust, the charge on trust income is under s.624 ITTOIA, which has priority over s.720 which might otherwise apply.<sup>131</sup> That matters as s.624 confers a

---

<sup>131</sup> Section 721(3C) is not strictly needed, because under s.624 the income arising under the settlement is the income of the settlor and of the settlor alone. Thus the person abroad (the non-resident trust) does not have any income. So the position was the same even before the enactment of s.721(3C) ITA. The point is now of historical interest only, but if authority is needed for years prior to 2013, the point is confirmed in *Dunsby v HMRC* [2020] UKFTT 271 (TC) at [173].

statutory tax indemnity,<sup>132</sup> which s.720 does not.<sup>133</sup>

*Dunsby v HMRC*<sup>134</sup> considered the position if the settlor and the transferor were different persons:

- (1) G (settlor), a non-resident, created a settlor-interested trust and (UK source) income was treated as arising to her under s.624; and
- (2) T (the transferor) had power to enjoy the income.

In these circumstances s.720 could apply. It seems straightforward: T has power to enjoy income of a person abroad (namely G). T would enjoy the usual transferor's credit for tax paid by G.

#### **46.23 No indemnity for transferor**

The transferor has no express statutory indemnity against the person abroad for tax paid under s.720. It is considered that no indemnity can be implied.

#### **46.24 Tax return: s.720 income**

S.720 income is returned in boxes 10-13 in the Foreign pages (form SA106) 2019/20. The rubric to these boxes is "Dividend income received by a person abroad" and "All other income received by a person abroad and any remitted 'ring fenced' foreign income".

SA106 Notes 2019/20 provides:

##### ***Dividends and all other income received by a person abroad***

##### **Boxes 10 to 13**

You may need to fill in boxes 10 to 13 if you transferred or have taken part in the transfer of assets so that a person abroad received income.

Put all items chargeable as income under the transfer of assets provisions in this section.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts - 2020) provides:

##### **Reporting income**

Unless you're completing box 46 on page F6 of the 'Foreign' pages'

---

132 See 96.2 (Settlor trust-tax indemnities).

133 The 2018/19 edition considered the position previous to s.721(3C) but I omit that here as it is now of historical interest only.

134 For the facts of this case, see App.2.2.7 (Pre-arrangement steps).

report the amount of income as follows enter in:

- box 11 on page F3 of the 'Foreign' pages details of all dividends received on which you are chargeable including any allowable foreign tax credit
- box 13 on page F3 of the 'Foreign' pages all other income including any tax paid on that income

You should enter details of the relevant transactions that have given rise to the income, and the offshore structures involved, in the 'Any other information' box, box 19 on page TR 7 of your tax return.

You should enter all income that's chargeable to tax under the transfer of assets provisions at boxes 11 and 13 of the 'Foreign' pages, not in the corresponding boxes elsewhere in the return for the type of income involved. For example, if interest income arose to a foreign company and that income is treated as yours under the transfer of assets provisions, then you should enter the income at box 13, not in the relevant boxes for interest.

If you are non-UK domiciled and the income arising to the person abroad is not 'protected foreign income' (see the section below on Trust Protections and Protected Foreign Income) you have to report the income arising to the person abroad exactly as described above. There is, however, an exception for this if the remittance basis applies or has applied to you.

This reflects the rule that s.720 income is distinct from the income of the person abroad. Boxes 11 and 13 make sense, but I am not sure what boxes 10 and 12 are for.

## **46.25 DT relief: s.720 income**

### *46.25.1 Foreign tax credit relief*

Where income of the person abroad is subject to foreign tax, foreign tax credit relief in principle applies for the benefit of the transferor.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts, (updated 6 April 2020) provides:

#### **Tax paid on the income**

If the amounts included in boxes 11 and 13 of the 'Foreign' pages include tax credits or other tax paid on the income of the person abroad, then you may be able to claim a deduction against your liability for that tax. You'll only be entitled to relief for the tax paid by the person abroad if it is in effect tax on 'the same' income, and only to the extent that the

tax has actually been paid by, and not refunded to, the person abroad. You should include the amount of tax for which you can claim relief in Column C and you should also include it in box 2 of the 'Foreign' pages. You should note Column E of your claim. In addition, you should send a schedule with the 'Foreign' pages, showing the amount of each item of income, and tax credit/tax paid on that income, which has been included in boxes 11 and/or 13, and Column C.

If the tax for which you're claiming relief is foreign tax, for which you wish to claim Foreign Tax Credit Relief (FTCR) (see page FN 3 of the 'Foreign notes'), the details you enter on the schedule should include:

- Column A - Country or territory code
- Column B - Amount of income arising or received before any tax taken off
- Column C - Foreign tax taken off or paid
- Column E - That you wish to claim FTCR and the rate of tax allowed (see page FN 3 of the 'Foreign notes')
- Column F - Amount included in box 11 and/or box 13 which should be the amount arising before any tax is taken off

In the event that you do not wish to claim Foreign Tax Credit Relief for foreign tax, you should not make an entry in Column E and the amount you include in box 11 and/or box 13 should be the income after foreign tax.

#### 46.25.2 *Person abroad treaty non-resident*

This section considers whether DT exemptions are available where:

- (1) Income accrues to a person abroad who is treaty-resident in a foreign state.
- (2) The transferor is UK-law UK resident and not treaty-resident in a foreign state.
- (3) The transferor is in principle subject to tax under s.720.<sup>135</sup>

Under the pre-ITA wording, I think the generally held view among practitioners was that s.739 ICTA deemed income of the transferor was the same as the income of the person abroad. It followed that the transferor could in principle claim DT exemptions provided that the income qualified for the relief. The same applied to under ITA in its pre-2013 form. However HMRC took the opposite view, which was upheld,

---

<sup>135</sup> Similar points apply to s.727; see 46.17.1 (Nature of s.727 charge).

rightly or wrongly, in the UT, so the pre-2013 law is now settled.<sup>136</sup>

The 2013 changes were intended to disassociate the s.720 income of the transferor from the income of the person abroad. Now that the income of the person abroad is distinct from the (deemed) s.720 income of the individual, treaty relief is clearly not available.<sup>137</sup>

EN FB 2013 provides:

57. ... a change that clarifies how the transfer of assets rules operate in relation to reliefs under double taxation agreements. This will make it clear that neither a treaty provision nor the transfer of assets legislation can allow a relief that would not otherwise be due.

The “clarification”, as often happens, constituted a change of law, at least as most practitioners understood it to be at the time;<sup>138</sup> and the substantial rewriting of the ToA rules required to achieve it has left the statutory wording more complicated, and difficult to follow. Since the object was simply to deny DT relief where the person abroad was treaty non-resident, why did the drafter not just say so? The reasons were, perhaps, to support the HMRC view that that was the position before 2013, and, perhaps, to disguise a treaty breach. But there it is.

The Savings Clause would now lead us to the same conclusion by a more direct and satisfactory route.<sup>139</sup> But no-one was considering that solution in 2013.

#### 46.25.3 *Transferor treaty non-resident*

This section considers whether DT reliefs are available where:

- (1) Income accrues to a person abroad who is not treaty-resident in a foreign state
- (2) The transferor is UK-law UK resident but treaty-resident in a foreign state
- (3) The individual is in principle subject to tax under s.720.

---

136 These points are considered in detail in the 2013/14 edition of this work para 59.5.2 (Person abroad treaty-resident outside UK). See 103.22.5 (OECD Commentary on CFCs). But the point is now of historical interest only. See too 87.7.8 (s.624/720 income; s.3/86 gain).

137 See 103.21 (Third-party DT relief).

138 See App.1.2 (Clarify/modernise/reform).

139 See 104.9 (Savings Clause).

Can the transferor claim DT exemptions? On the basis that s.720 income is distinct from the income of the person abroad, the transferor may do so under the “Other Income” article, regardless of the type of income which accrued to the person abroad; even if, say, the income of the person abroad is of a type which would not normally qualify for DT exemption.<sup>140</sup> If that were not correct, the DT exemption is available if the type of income of the person abroad qualifies for the exemption.

In some cases DT exemption only applies if the income is “beneficially owned” by the transferor. The point is the same as for s.624.<sup>141</sup> S.720 income is not “beneficially owned” by the transferor as a matter of property law. But since for tax purposes it is deemed to be the income of the transferor, this requirement is deemed to be satisfied.

In the US/UK DTA, this is expressly dealt with: see 87.7.8 (s.624/720 income; s.3/86 gain).

---

140 See 47.57.2 (Individual treaty-resident outside UK); 32.16 (DT relief: “Other Income”).

141 See 44.18.3 (Settlor treaty-resident outside UK).

## **TRANSFER OF ASSETS ABROAD: BENEFITS**

47.1

47.5.8

### **47.1 s.731 charge: Introduction**

This chapter considers the IT charge under s.731 ITA.

A note on terminology:

- (1) In the past I described this as the charge on non-transferors, because it applied to individuals, other than the transferor, who receive benefits from non-resident entities. From 2017 the charge may also apply to the transferor.<sup>1</sup>
- (2) ToA draft guidance calls it “the benefits charge”. The s.731 charge is not the only ToA charge on benefits, but it is the principal one. So the accurate label is “**s.731 benefits charge**”. I abbreviate that to “s.731 charge”. This is not a transparent label, but there is no short descriptive label which does justice to its complexities of this charge.

### **47.2 s.731 charge/s.731 income**

Section 731(1) ITA imposes the charge to tax:

Income tax is charged on income treated as arising to an individual under section 732 (individuals receiving a benefit as a result of relevant transactions).

In this book “**s.731 charge**” is the charge under this section.

Statute frequently refers to:

---

<sup>1</sup> Subject to a defence for transferors taxable under s.720, but that will not usually apply; see 47.15 (Taxable-transferor defence).

income treated as arising under s.732<sup>2</sup>

I refer to this as “**s.731 income**”. (It might be called “s.732 income” but the charge is under s.731.) Statute sometimes uses the term “deemed income” which I gloss as “deemed [s.731] income”.

### 47.3 s.731 application conditions

The s.731 charge applies if income is treated as arising under s.732, to which we turn as the second stage of our journey. Section 732(1) ITA begins:

This section applies if—

Five conditions then follow, which I call “**s.731 application conditions**”. The conditions are as follows:

(a) *a relevant transfer occurs*

I call this the “**relevant transfer condition**”.

(b) *an individual receives a benefit in a tax year*

I refer to the individual as the “**individual [beneficiary]**”.

(c) *the benefit is provided out of assets which are available for the purpose as a result of—*

(i) *the transfer, or*

(ii) *one or more associated operations*

I call this the “**benefit causation condition**”.

(d) *where there is a time in the year when the individual [beneficiary] is relevantly domiciled, the individual is not liable to income tax under section 720 or 727 by reference to the transfer*

I call this the “**taxable-transferor defence**”.

(e) *the individual [beneficiary] is not liable to income tax, under any provision that is none of*

[i] *section 731 of this Act and*

[ii] *sections 643A, 643J and 643L of ITTOIA 2005, on the amount or value of the benefit.*

---

<sup>2</sup> Occasionally the wording is: *Income treated under section 732 as arising...*

I call this the “**s.731 capital condition**”.

Where these conditions are met, and the motive defence does not apply, I describe the individual/person abroad as being “**within section 731**”.

In summary:

Para	s.731 application condition	See para
(a)	relevant transfer	47.4
(b)	benefit	47.5
(c)	benefit caused by transfer	47.13
(d)	taxable-transferor defence	47.15
(e)	capital benefit	47.16

#### 47.4 Relevant transfer condition

The first s.731 application condition is the relevant transfer condition. Section 732(1) ITA provides:

This section applies if—

- (a) a relevant transfer<sup>3</sup> occurs

Despite the present tense (“occurs”) this condition is met in a year if a relevant transfer occurred in an earlier year. Grammarians call this “the historic present”.<sup>4</sup>

#### 47.5 Benefit

The second s.731 application condition requires (in short) that the individual receives a benefit. Section 732(1) ITA provides:

This section applies if ...

- (b) an individual *receives a benefit* in that tax year.

The word benefit is common in tax statutes and in other areas of law.<sup>5</sup> So there is plenty of material for discussion. But the meaning, particularly at the boundaries, varies according to the context. In this section I focus on the meaning of “benefit” in the context of s.731 and s.87 TCGA; in these provisions the issues are (more or less) the same.

3 See 45.3 (“Relevant transfer”).

4 [https://en.wikipedia.org/wiki/Historical\\_present](https://en.wikipedia.org/wiki/Historical_present)

5 For discussion of “benefit” in a trust law context see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed., 2019), para 13.11 (What does a settlor exclusion clause cover?).

Similar issues arise in other contexts. It would be impossible to write a full list, but they include:

<b>Topic</b>	<b>See</b>
<i>Tax charges on value of a benefit:</i>	
Benefit from retirement benefit scheme	s.394 ITEPA
Employment-related benefits in kind	79.35
Payment on termination of employment	33.38
<i>Tax charges if possibility of benefit (regardless of value):</i>	
s.624 (settlor-interested trusts)	
s.86 (settlor-interested trusts)	
s.720 (power to enjoy)	46.12.6 <sup>6</sup>

There is (sensibly) no statutory definition of benefit for ToA purposes.<sup>7</sup>

The starting point is that “benefit” is a word of wide import.

For the benefit of funding a beneficiary’s tax appeal, see 49.46 (Appeals).

For the date when a benefit is received, see 38.3.2 (Time income arises).

#### 47.5.1 *Arm’s length transaction*

In its natural sense, the word benefit does not include a transaction for which a person gives full consideration.<sup>8</sup> This is so even if the transaction is between connected persons.

Likewise the term benefit in its natural sense does not include an arm’s length transaction. Of course an arm’s length transaction will normally be made for full consideration; but it is suggested that an arm’s length

---

6 It is self-evident that the meaning of benefit is the same in s.720/731; but for completeness, RI 201 confirms this:

“Benefit” for the purposes of s.731] is treated as including all benefits taken into account in determining whether an individual has power to enjoy income for the purposes of [s.720 ITA].

7 For completeness: The pre-ITA legislation stated that “benefit” included a payment of any kind: s.742(9)(c) ICTA. This had (more or less) no effect, and was sensibly omitted in the ITA rewrite.

8 This is self-evident; but if authority is needed, see *IRC v Lactagol* 35 TC 230 and the employment-related benefit in kind cases discussed at 79.35.3 (Benefit).

For CGT the position is dealt with by statute, but only for the avoidance of doubt: see 57.7.8 (Arm’s length transaction relief). Note the reference to arm’s length transactions in the passage from *Cooper* cited at 47.5.5 (Benefit on termination of trust).

transaction is not a benefit even if, owing to some mistake, the individual gives less than full consideration.<sup>9</sup> It is sufficient that there is no gratuitous intent.

However, context may show that “benefit” may include a transaction for full consideration. The boundaries of the word “benefit” can reach that far. One example is the employment-related loan rules:

In *Williams v Todd*,<sup>10</sup> Peter Gibson J was concerned to construe the word ‘benefit’ in the expression ‘a loan ... of which the benefit is obtained by reason of his employment’ [and] in the expression ‘an amount equal to whatever is the cash equivalent of the benefit of the loan for that year’. It is a perfectly ordinary use of language to speak of a borrower receiving the benefit of a loan, even if it is at a full commercial rate ...<sup>11</sup>

#### 47.5.2 *Conferring equitable interest*

RI 201 provides:

For the purposes of [s.731 ITA] a benefit is treated as not including ... the giving<sup>12</sup> of a life interest to a beneficiary...

Conferring a life interest is not a benefit if the interest is revocable (or else the value of the benefit is nil). If the interest is not revocable, then its receipt is in the widest sense a benefit, but for ToA purposes it should be regarded as a right to a future benefit, rather than an immediate benefit. To tax a “benefit” of this kind is clearly outside the scheme of the ToA code. Otherwise there would be a double charge, eg, when trustees appointed assets to a beneficiary contingently on attaining the age of 21 and again when the beneficiary reached 21 and became absolutely entitled.<sup>13</sup>

---

9 See *Wilson v Clayton* 77 TC 1 discussed at 79.35.3 (Benefit).

10 [1988] STC 676. The case concerned the predecessor to the employment-related loan rules.

11 *HMRC v Apollo Fuels* [2016] EWCA Civ 157 at [67].

12 “Giving” a life interest is informal, lay language. The term must refer to the conferring of a life interest by exercise of a power of appointment. Presumably it also includes the conferring of a life interest by exercise of a power of advancement or re-settlement.

13 The Special Commissioners reached this conclusion in the context of employment-related benefits: *Dextra Accessories v Macdonald* [2002] UKSC SPC00331 at [9]-FD\_47\_Transfer\_of\_Assets\_Abroad\_Benefits.wpd

Although RI 201 refers to a *life* interest, the same reasoning must apply to any type of interest under a settlement.

### 47.5.3 *Sale of equitable interest*

RI 201 states:

For the purposes of [s.731 ITA] a benefit is treated as not including ... the receipt by a beneficiary of the proceeds of selling a life interest.

A sale of a life interest is outside the scope of s.731 because a sale at market value is not a “benefit” to the vendor, or because the value of the “benefit” (if there was one) is zero.<sup>14</sup>

If the purchase price is knowingly more than market value the purchaser provides a benefit to the vendor, but the benefit is not provided out of trust assets so it is not within s.731.

Although RI 201 refers to a *life* interest, the same reasoning must apply to any type of interest under a settlement.<sup>15</sup>

What about an avoidance scheme where:

- (1) The trustees appoint an interest to a beneficiary contingent on the beneficiary surviving a short period.
- (2) The beneficiary sells the interest to a non-resident purchaser.

The object is to reduce tax rates from IT to CGT. This would fail on the GAAR, or *Ramsay*, and indeed technically, on the basis that the general principle that conferring an equitable interest is not a benefit would not

[12]. The point was not appealed. But that is no longer the law: *RFC 2012 Plc (formerly Rangers Football Club) v AG* [2017] UKSC 45 at [57].

In the context of s.731, one could also reach the same conclusion by saying that the “benefit” (if there was one) was not “provided out” of trust assets. In the context of s.87 TCGA, one might reach the same conclusion by saying that the “benefit” (if there was one) is not “from the trustees”. But the better analysis is simply that there is no “benefit” within the meaning of the charging provision on conferring the interest under the settlement.

14 The drafter of FA 1984 sch 14 para 5(4) reached the same conclusion for the purpose of (what is now) s.87 TCGA.

15 On a sale of an equitable interest, watch:

- (1) CGT on the disposal of the interest; and
- (2) schedule 4A TCGA.

apply here.<sup>16</sup>

#### 47.5.4 Sale of company within s.731

The same reasoning applies on the sale of shares or securities in a company within s.731. This leads to an interesting anomaly:

(1) An individual (“B”) holds shares in a company which has accumulated relevant income within s.731. B sells the shares.

No charge arises under s.731 as B does not receive a benefit (either on the sale, or on receipt of the proceeds of sale, or on spending them).

(2) Trustees hold shares in a company which has accumulated relevant income. They sell the company.

The sale proceeds represent the relevant income<sup>17</sup> and so if the trustees appoint the proceeds to B, B receives a benefit taxable under s.731.

#### 47.5.5 Benefit on termination of trust

Suppose:

(1) A beneficiary is entitled to trust property absolutely subject to satisfying some contingency (eg attaining the age of 25).

(2) The contingency is satisfied (the beneficiary reaches 25 and becomes entitled to the trust property).

There is a “capital payment” for the purposes of s.87 TCGA: see s.97(2) TCGA.<sup>18</sup> There is no equivalent provision in the ToA rules. However, it is considered that the beneficiary does receive a “benefit” and the value of the “benefit” is equal to the value of the trust property. The boundaries of the concepts of “value” and “benefit” can reach that far (perhaps only just);<sup>19</sup> and any other view would be inconsistent with the scheme of the ToA provisions.

This view is supported by *Cooper v Billingham* 74 TC 139 CA at [39]:

---

<sup>16</sup> The idea is not a new one, and (in a different context) a variant of it failed in *Chinn v Collins*; see App.4.7.5 (Trust appointment: Filling blanks).

<sup>17</sup> See 47.33 (Income reinvested: Tracing).

<sup>18</sup> See 57.7.3 (Termination of settlement).

<sup>19</sup> Contrast *R v Allen* [2000] 2 All ER 142 where the Court of Appeal understood the word in a comparable way in order to uphold a confiscation order.

<https://www.kessler.co.uk/wp-content/uploads/2015/02/R-v-Allen.pdf>

The whole scheme of the legislation requires the Court to see what benefit a beneficiary actually receives, in cash or in kind, otherwise than as income or under an arm's-length transaction. Any pre-existing beneficial interest belonging to the beneficiary is irrelevant. The Judge dealt with this point shortly<sup>20</sup> but there was no need for him to say more.

Similarly, if L is entitled to a life interest, and a trust asset is transferred to L absolutely, the value of the benefit received is the value of the asset, not the value of the reversionary interest in the asset.<sup>21</sup>

#### 47.5.6 *Benefit: liquidation/redemption*

A similar point arises where:

- (1) A shareholder holds shares in a company within s.731.
- (2) The shareholder receives assets of the company on the liquidation of the company or on the redemption of its shares.

It is arguable that the shareholder does not receive a “benefit” since they merely receive the property to which they are entitled in the liquidation or redemption; or (which comes to the same thing) that the value of the “benefit” is nil. After all, a sale of the shares would not be a benefit, and is commercially similar. And no-one would say that there is a benefit for the purposes of employment income benefit in kind rules. On the other hand, the liquidation is more analogous to becoming entitled under a trust than a sale.<sup>22</sup> The better view, consistent with the scheme of the Act, is that the receipt of funds from the company is a “benefit” for the purposes of s.731. If that were not so, it would be possible to avoid s.731 by an arrangement under which:

- (1) T transfers assets to a company.
- (2) T transfers the shares in the company to another person (say, a child) absolutely.

It would be surprising if the company was a s.731 free vehicle which

---

20 The judge said: “The recipient’s existing interest under the trust has to be left out of the calculation for the purpose of valuing the benefit” *Cooper v Billingham* 74 TC 139 at p.155.

21 This was stated (*obiter*) by the judge in *Cooper v Billingham* 74 TC 139 at p.155. It is the converse of the rule that conferring a life interest is not a benefit: see 47.5.2 (Conferring equitable interest).

22 See 93.24.4 (“Chargeable consideration”).

would allow the child to enjoy its accumulated income by liquidation or redemption of shares.

Similar points apply on the redemption of debt securities.

It may be objected that there could then be a double charge to tax. Suppose:

- (1) A trust within s.731 owns a company. Relevant income has accrued to the trust and to the company.
- (2) The trust transfers the company to a beneficiary, B.
- (3) B liquidates the company and receives its assets.

There should not be a benefit on both the transfer and the liquidation, leading to a double charge. I suggest the solution is to say that one does not have a double benefit. If the value of the company has not changed since the date of the transfer to B, B receives no further benefit on the liquidation and distribution of the assets. The first benefit franks the second. But if the value of the company has increased (assume there is a delay between the transfer and the liquidation and income accrues to the company in the meantime) the benefit, or the value of the benefit, is the difference between the acquisition value and the actual receipt from the company. The concepts of benefit and value are sufficiently flexible to produce the right result.

If the shares are held by the transferor, however, s.720/727 would in principle apply.

#### 47.5.7 *Payment of IHT*

No individual receives a benefit when trustees pay IHT charges on the trust. This is the case for IHT 10-year charges and the IHT charges on the termination of an estate IIP, but it is necessary to consider them separately:

- (1) *IHT 10-year charges* are payable by the trustees of the settlement concerned.<sup>23</sup>

Beneficiaries<sup>24</sup> who receive capital payments are also liable for the IHT, but:

- (a) They have a right to recover from the trust fund: s.212 IHTA.
- (b) They are only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

---

<sup>23</sup> See 119.3.4 (Liability for trust IHT).

<sup>24</sup> For non-resident trusts, settlors are also liable.

Accordingly the payment of IHT 10-year charges by the trustees (or by anyone else) is not a benefit to any individual beneficiary.

This is so even if that beneficiary was (secondarily) liable for the tax under.

- (2) *IHT on termination of an estate IIP (during the life of the life tenant<sup>25</sup> or on the death of a life tenant)<sup>26</sup>* This is likewise payable by the trustees of the settlement concerned: s.201(1)(a) IHTA.<sup>27</sup> But the same points apply:
- (a) The life tenant has a right to recover from the trust fund: s.212 IHTA.
  - (b) The life tenant is only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT by the trustees (or by anyone else) is not a benefit to the life tenant. It cannot be a benefit to be relieved of a secondary liability of this kind, where one has an effective right of indemnity. Further, in the case of a wide common form trust, even if the class of beneficiaries as a whole may be said to receive a benefit, no individual receives a quantifiable benefit.

#### 47.5.8 *Moral/sentimental/hard to value benefit*

The word “benefit” is used with two distinct meanings, a strict or narrow meaning, and a wide meaning:

- (1) *Financial advantage only* In the narrow sense, “benefit” means a benefit which can be valued, that is, it can be quantified in financial terms. The usual case will be the provision to a person of an asset, or services, where the benefit to the person is quantifiable as the value of the asset, or the value of the services.
- (2) *Non-financial benefit also* In the wide sense, “benefit” also includes non-financial advantages, ie something which confers some mental satisfaction, such as meeting a moral obligation, or which may be described as indirect or intangible.

An example is a contribution of (say) £5,000 to charity. The charity receives a financial advantage of £5k, a straightforward benefit in the

---

<sup>25</sup> See 119.3.4 (Liability for trust IHT).

<sup>26</sup> See 119.3 (Liability for IHT).

<sup>27</sup> In this case the life tenant is also liable for the IHT, under s.201(1)(b) IHTA.

narrow sense. Someone who wishes to support that charity, or feels a moral obligation to do so, may receive a benefit in the wide sense. The payment may satisfy their wish or moral obligation; but one cannot value their benefit as £5k. It is a non-financial benefit.

A similar example is the provision of a fund for the benefit of a person's children.

Another example is the payment of (say) £5,000 school fees. The child receives a service (education). This is a straightforward benefit in the narrow sense; it can be valued at £5k.<sup>28</sup> The parent (assuming the parent wants the children to be privately educated) receives a benefit in the wide sense. They have a wish or moral obligation satisfied; but one cannot value their benefit as worth £5k. It is a non-financial benefit.

The context must decide which meaning of "benefit" is applicable.

In the *trust* law context of common form powers of advancement or appointment, such as a power to apply for the advancement or benefit of a beneficiary, the word "benefit" has the wide meaning. Thus a power to apply funds for the benefit of a beneficiary can in principle be exercised by making a payment to a charity which the beneficiary wishes to support.<sup>29</sup>

In a *tax* law context, the narrow meaning is normal and the wide meaning is exceptional. For instance, the word "benefit" in the context of s.624 ITTOIA or s.86 TCGA (settlor-interested trusts), or the IHT gift with reservation provision, refers to financial benefits only. No-one has ever suggested that a payment for a person's minor children could be a "benefit" to the parent, so as to bring those sections into application, though it normally would be a benefit in the wide (non-financial) sense: one would normally expect the parent to be gratified by the payment.<sup>30</sup> (It may alternatively be said that if the parent receives a benefit, its value is nil. I would prefer the view that a "benefit" of nil value should not be called a "benefit" at all. But the end result would be the same, at least in a s.731 or s.87 context, where the charge is on the value of the benefit.)

---

28 But the detail of the basis of valuation of the benefit does not alter the point being made here, that the benefit is one of a financial nature, which can be valued.

29 The leading case is *Re Clore* [1966] 1 WLR 955; see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed., 2019), para 11.10 (Power of advancement used to create new trusts).

30 If it were a benefit to one parent, it would similarly be a benefit to the other parent, and indeed grandparents, godparents and family friends; that can hardly be right.

If a power to apply funds for the benefit of a beneficiary is exercised by making a payment to a charity which the beneficiary wishes to support, the payment is a benefit (in the narrow sense) to the charity so s.87 gains may accrue to the charity (though the charity should qualify for CGT charity relief).

These wide/narrow meanings of benefit are neatly illustrated in *Children's Investment Fund Foundation v AG*. The Foundation was a family charity. Following a divorce W resigned as director. The Foundation proposed to transfer funds to a new charity (controlled by W). The question whether this transfer would constitute a benefit for W arose for two distinct purposes:

(1) *Benefit for charity law/company article*: The Foundation's articles provided:

A Trustee must not receive any payment of money or other material benefit<sup>31</sup> (whether directly or indirectly) from [the Foundation] except ... in exceptional cases, other payments or benefits (but only with the written approval of the Commission in advance).

The question was whether there was a benefit for W, within the meaning of this article. The value of this benefit would not matter.

(2) *Benefit for tax*: The question was whether there was a benefit for the charge on a termination payment, which is on the amount of the benefit.<sup>32</sup>

The judge stressed the importance of context to the meaning of benefit. For the company article issue:

... one has to consider first the purpose of clause 5.2, which is ... to prevent trustees from receiving benefits except ... with the approval of the Commission. ... This is not an absolute bar, but only a procedural pre-condition. In these circumstances, it would be wrong to construe the clause too narrowly. An appropriate benefit will only have to surmount the hurdle of Commission approval, which would allow proper independent scrutiny and transparency to protect the charity's assets. The situation is very different from the cases relied upon by the trustees

---

31 Defined in the articles: "a benefit which may not be financial but has a monetary value". This is a standard form: the current Charity Commission model articles are very similar.

32 See 33.38 (Termination payments).

that concerned incidental benefits to trustees that risked jeopardising charitable status.<sup>33</sup>

W reduced her financial claim against H in consideration of this transfer: it was something she strongly wanted. With that in mind, the judge held that W received a benefit, within the meaning of the relevant company article. I find that analysis a little surprising. I would have said:

- (1) W did *not* receive a benefit within the meaning of the article (ie a benefit with monetary value)
- (2) H *did* receive a benefit (a reduction in W's claim for financial relief)

But that analysis would not affect the outcome of the case.

For the tax issue there was no benefit, or its value was nil. Discussion was curtailed as HMRC had accepted that view, so the only issue was whether they might change their mind:

... [HMRC] would be highly unlikely ultimately to determine that the Grant would be taxable. This is because ... HMRC would not regard any intangible benefits that [W] might achieve by being the member or trustee of a charity with assets augmented by the Grant as being taxable benefits caught by [s.401 ITEPA]. There would be no value in [W's] membership of [the charity], which has exclusively charitable objects.

I can say expressly that I have not determined that [W] will achieve any personal financial benefit from the making of the Grant, notwithstanding that I have accepted that she would have been prepared to forfeit other financial benefits to allow the Grant to be made.<sup>34</sup>

If further authority is needed, see *Burton v HMRC*:

[60] 'Benefit' in s 97(5)(b) [TCGA] must be construed in the context of these taxing provisions rather than for the purpose of deciding the validity of an advancement or appointment under powers contained in a settlement. The legislation forms a detailed self-contained code to impose a tax charge on capital payments received by a beneficiary. This requires the benefit received or treated as received to be identifiable and quantifiable if there is to be sufficient certainty to impose a tax charge for any particular year of assessment....

[62] The wider concept of benefit is difficult to apply in the context of

---

33 [2017] EWHC 1379 (Ch) at [72].

34 [2017] EWHC 1379 (Ch) at [124]. Neither point was considered on appeal.

s 87 in a way that the concept of a benefit which is identifiable and quantifiable is not. For example, a gift to charity by the trustees of a settlement may not give rise to a charge to tax on the trustees so as to create trust gains, but has been held to be for the benefit of a beneficiary as regards validity as it discharges a moral obligation (*Re Clore ...* [1966] 1 WLR 955). The beneficiary is surely not chargeable in those circumstances under s 87... What has been received or treated as received in those circumstances by the beneficiary for tax purposes notwithstanding its validity as being for the benefit of the beneficiary? Nothing in the sense of a capital payment received other than possibly a moral satisfaction has materially benefited the beneficiary such that a tax charge can be imposed in respect of it...<sup>35</sup>

*Burton* concerned a s.86 flip-flop scheme.<sup>36</sup> HMRC argued that the beneficiary received a benefit in a year (“year 1”) of a very subtle nature: the avoidance of a CGT liability under s.86 on a disposal anticipated in the following tax year (“year 2”). So this was not a case of mental satisfaction benefit, though it was a case of a benefit whose value was difficult or impossible to quantify. The two-judge Tribunal disagreed on whether that was a “benefit” at all, but both judges agreed that if it were, the value of the benefit *in year 1* (the year assessed) was nil, so there was no s.87 charge.<sup>37</sup> But these facts are not likely to recur; so it is not necessary to consider this aspect further.

#### 47.5.9 *School/university fees*

Suppose trustees pay school fees for a child in circumstances where the parents have no obligation to pay the fees. The child receives a benefit from the trust. The parents merely receive an intangible, non-financial advantage (if they regard the education with approval). I have already noted that this is not a “benefit” to the parents for tax purposes.

Suppose trustees pay school fees in circumstances where a parent has a family law obligation to meet the fees (such as may arise on a divorce or in other family law proceedings). It might be said that the parent receives a benefit (being relieved of legal obligation). However it is considered that the benefit to the parent is outside the scope of s.731 because it is

---

<sup>35</sup> *Burton v HMRC* [2009] SFTD 682; Judge Wallace took a similar view at [44].

<sup>36</sup> See 58.2 (Flip-flop schemes).

<sup>37</sup> HMRC’s argument that the benefit was an outright payment was rightly rejected.

merely incidental.<sup>38</sup>

Suppose trustees pay school fees in circumstances where a parent (or both parents) are under a contractual obligation to pay the school fees (ie the parent has entered into the contract with the school). The position here depends on the facts:

- (1) It may be that the parent is entitled to reimbursement from the trustees (eg if the parent entered into the contract at the request of the trustees and on terms that the trustees will meet the fees, or as agent for the trustees). In that case the trustees provide the benefit to the children and the parent does not receive a benefit from the reimbursement.<sup>39</sup> It does not matter that the school are not party to the arrangement (eg the parent may be acting as agent for an undisclosed principal).
- (2) It may be that the trustees are voluntarily meeting a liability of the parent; in that case, the parent is providing the benefit to the child, and the trustees are providing a benefit to the parent.

In practice (assuming it is desired to arrange that the benefit is received by the child, not the parent) it is recommended that the contract should be between the trustees and the school, or (if that is not desired) there should be an agency agreement between the trustees and the parent. Then the position should be clear.<sup>40</sup>

If a parent is the settlor, also consider the settlor-interested trust code,<sup>41</sup> and the close-family attribution rules.<sup>42</sup>

See too App.10.2 (Student grants: DT relief).

#### 47.5.10 Asset used by connected person

Suppose a house (or chattels) is provided to a life tenant (or other beneficiary) who then allows their spouse (or partner or children) to live there (and to enjoy the chattels). The same analysis applies. The indirect benefit which the spouse (or partner or children) receive is not a “benefit”

---

38 See 47.7.2 (Payment to meet divorce order: H not a beneficiary).

39 Contrast 96.4 (Statutory tax indemnity).

40 For cases where the Court had to determine whether liability for school fees rested on the parent or on his employer, see *Ableway v IRC* [2002] STC (SCD) 1; *Frost Skip Hire v Wood* [2004] STC (SCD) 387. But if the matter had properly documented, this litigation would not have been necessary.

41 See 44.15 (Payment to settlor’s child).

42 See 57.26 (Settlor-attribution rules: Introduction).

for tax purposes, or, alternatively, the benefit is disregarded as merely incidental.

#### 47.5.11 “Benefit” in breach of trust

Suppose trustees transfer<sup>43</sup> an asset to a person in breach of trust. In principle the recipient holds the asset on constructive trust for the trustees, so the transfer is not a benefit, or (even if it were a benefit) the value of the benefit is nil. Likewise if a company transfers an asset to a person in breach of company law.

It is possible for an act which is a breach of trust to confer a benefit on the recipient, eg if trustees allow their claim against the recipient to become time barred.

Trustees may confer a benefit in breach of trust without transferring an asset, eg allowing an individual who is not a beneficiary to occupy trust property. Whether that confers a benefit on the individual depends on whether the trustees have a claim against the individual to recover the value of the benefit.

Thus whether an act in breach of trust constitutes a benefit requires an examination of the rights of the parties; it cannot be answered yes or no as a general proposition.

The context may show that the word benefit is (mis)used to include a transfer of an asset which the transferee is required to return to the transferor. An example is *Clark v HMRC*<sup>44</sup> which concerned a transfer of money from a pension scheme. Legal title to the money was transferred, but the beneficial interest was held on resulting trust for the transferor, because the recipient scheme was void for uncertainty.<sup>45</sup> This was held to constitute an “unauthorised member payment” giving rise to an unauthorised payment charge. In reaching that conclusion it was important that:

---

43 I use the word “transfer” loosely. Although there may be a transfer of the bare legal title, it would be more accurate to refer to a purported transfer, or to use scare quotation marks.

44 [2020] EWCA Civ 204. *Clark* concerned the word “payment” not benefit; but that is not in itself so significant, particularly as “payment” was defined to include a transfer of assets and any other transfer of money’s worth.

45 The scheme promoters did not understand what they were doing. This was surprisingly common in complex avoidance schemes, notwithstanding vast fees typically charged, and it is an argument in favour of the GAAR.

- (1) An unauthorised transfer will often be made in breach of trust.
- (2) The unauthorised payment charge was intended to have a deterrent effect. It would deprive the charge of effect in egregious cases where it is needed, if the taxpayer could subsequently escape liability by restoring assets to the fund.<sup>46</sup>

These considerations do not apply here, so it is considered that *Clark* has no relevance in the context of ToA and s.87 benefits.

Also see 14.9 (Income recognition: Breach of trust).

#### 47.5.12 *Waiver of liability*

Draft ToA guidance provides:

**INTM601620 Examples of the amount or value of a loan**

If repayment of interest (or capital) is waived then this will be regarded as a benefit received by the individual for the year in which waiver takes place.

That is correct.

The value of the benefit is not the face value of the debt waived, but the market value. If the beneficiary is insolvent and wholly unable to pay the debt, its value is nil.

#### 47.5.13 *Brckett v Chater*

For completeness: In *Brckett v Chater*<sup>47</sup> the benefits provided on the transferor (“T”) were said to be:

- (1) the provision of liquidity, in the form of
  - (a) cash payment for properties which could not be sold on acceptable terms on the open market
  - (b) repair of the property (once purchased), which the T could not otherwise have afforded
- (2) salary
- (3) discharge of T’s moral obligations to provide for his children and their mother

T had power to enjoy under para (c).

T also had power to enjoy under para (b) on the basis the receipt of that

---

46 See [2020] EWCA Civ 204 at [45]; [79]-82].

47 60 TC 134 at p.148.

income increased the value of (1) rights to payment by instalments for a property sold to the person abroad, and some right to a salary.

The para (b) point is straightforward. The para (c) point goes too far if it said that market value payments count as benefits; but the explanation is that the payments were not in fact at market value. The comment on moral benefits is, with respect, clearly wrong, or every family trust is within s.720 even if the settlor/spouse is excluded.

## 47.6 Who receives the benefit?

It is important to identify the recipient of a benefit because the individual who receives the benefit is in principle the one who is taxable. It is especially important where some beneficiaries are and others are not UK resident, or remittance basis taxpayers, because the identity of the recipient may affect not only who pays the tax but whether any tax is payable at all.

There may be scope for tax saving by arranging that the benefit is received by the beneficiary who is non-resident or a remittance basis taxpayer. But settlor-attribution and onward-gift rules would need consideration here.

There are s.87 rules for benefits received by close companies, but these have no s.731 equivalent.

There are many possible permutations of circumstances and the documentation is very important.

### 47.6.1 *Who receives use of asset*

Suppose trust property is held by a common form discretionary trust:

- (1) *The property is occupied by H and W (who are living together).*
  - (a) If the trustees grant a H licence to occupy, W occupying jointly, but as licensee of H, then the benefit from the trust is received by H.
  - (b) If the trustees grant a licence to H and W, each receives the benefit of joint occupation. How does one value that? In normal cases, the value of each benefit is half the value of sole occupation.
- (2) *The property is occupied by H (or H and W) together with C (a child of H).* If the trustees grant a H licence to occupy, the benefit is enjoyed by H alone, not by C.
- (3) The property is occupied by C (an adult) alone. If the trustees grant

a licence to H, who permits C to occupy, the correct analysis should be that C has received the benefit indirectly (for s.87 purposes) or as a result of an associated operation (for s.731 purposes),<sup>48</sup> also the onward-gift rules need consideration.

The same applies if the property is held by a company held by the discretionary trust (except the licence would be granted by the company at the direction of the trustees).

Suppose property is held on trusts under which H has an interest in possession. If H occupies, he receives the benefit. If H and W occupy, H alone receives the benefit. What if H chooses not to occupy? In such a case H may not be entitled to occupy in which case there will be no benefit. If H permits C to occupy alone, C has received the benefit indirectly.

Suppose property is held on trusts under which H and W have joint interests in possession. If they both occupy they receive the joint benefit equally. Suppose H and W have interests in possession in unequal shares. It is suggested that they receive the benefit of occupation equally, notwithstanding the inequality in their interests in possession.

In all these cases the position is of course different if the person in occupation is required to pay some form of compensation to the trustees or to the life tenant or joint life tenant.

#### 47.6.2 *Who receives money payment*

Likewise with money. If the trustees pay a capital sum to H, and H uses it for family expenditure, the benefit is received by H; but if paid by H under an arrangement whereby it is transferred on to W, or to a child, the benefit may be received indirectly by the child (for s.87 purposes) or as a result of an associated operation (for s.731 purposes); and onward-gift rules need consideration.

For the purposes of s.87 TCGA charge, the concept of “receipt” is explained by s.97(5) TCGA.<sup>49</sup> There is no statutory equivalent for s.731 but it is suggested that the same rules apply: s.97(5) merely states the natural meaning of “receipt”.

As the discussion of school fees above illustrates, the question of who

---

48 See 47.13 (Benefit causation condition).

49 See 57.8 (Receipt from trustees).

receives a benefit may overlap with the question of whether there is a benefit at all.

## 47.7 Benefit in course of divorce

### 47.7.1 *Payment to meet divorce order: H a beneficiary*

Suppose a trust where H is a beneficiary and W is not.

- (1) A court orders H to make a payment to W.
- (2) A trust makes a payment to H to allow him to meet the obligation.<sup>50</sup>

That is a straightforward benefit to H. W does not receive a benefit; she gives full consideration.<sup>51</sup>

Suppose a slightly different step (2): The trust makes the payment to W directly in satisfaction of H's obligation. The result is the same. A payment made to satisfy H's liability is a benefit to H.

Suppose a slightly different step (1): the court order requires that H shall *pay or cause to be paid* to W a specified sum. That is the standard form of order. But the result is the same.<sup>52</sup>

The same applies if H and W are both beneficiaries.

### 47.7.2 *Payment to meet divorce order: H not a beneficiary*

Suppose:

- (1) W is a beneficiary of the trust and H is not.
- (2) A court orders H to make a payment to W.
- (3) The trust makes the payment to W.

I find it difficult to see how this could arise. The trustees could make a payment to W but not in satisfaction of the court order, as H cannot *cause* the payment to be made.<sup>53</sup> There is also a benefit to H, which would be a breach of trust.

50 As a matter of trust law, this is permitted even though H is not a beneficiary.

51 It is important to understand the family law background, as to which see App.4.2.6 (Transfer on divorce).

52 See the Family Order Project House Rule 16: "An obligation to do an act as provided for in an order shall be taken to include causing the act to take place. Thus the phrase "or cause to be paid", shall not be included in an order."

<http://www.judiciary.gov.uk/wp-content/uploads/JCO/Documents/Reports/annex-c-family-orders-project-house-rules.pdf>

53 If H is a trustee it may be said that he causes the payment to be made, but the conflict of interest would in principle make the payment void.

The trust law case of *Fuller v Evans*<sup>54</sup> seems at first sight to contradict this analysis. In this case the court had ordered:

- [H] do pay or cause to be paid to [W] ... periodical payments
- (a) for [the children's] general maintenance £9,000 per annum
- (b) such amount as is sufficient to defray their school fees...

There was a common form accumulation and maintenance trust for the children. H was the settlor, and so excluded. The judge said:

4. The issue before me is whether the trustees may in their discretion exercise their power to provide moneys out of the trust to pay for the children's maintenance and education, though the effect of such payment may be in whole or in part to relieve the settlor from the burden of his obligations under the consent order to pay for his children's maintenance and education.

The judge concluded:

9 [The settlor exclusion clause under which H was excluded from benefit] does not preclude the trustees from exercising the power conferred upon them by reason of any incidental (and unintended) conferment of relief on the settlor. This conclusion of course does no more than leave it open to the trustees to exercise a discretionary power to make provision for the education and maintenance of the two children out of the settlement funds. The trustees can only exercise that power if they consider that to do so is in the best interests of the beneficiaries despite the existence of the consent order and the obligations of the settlor thereunder. The trustees must have regard to the obligation of the settlor to provide for the beneficiaries' maintenance and education when undertaking the decision-making process but the existence of that obligation is no more than a consideration to which due weight must be given .... If the trustees reach the conclusion that it is in the best interests of the beneficiaries to make such provision out of trust funds, they are free to do so.

No doubt trust income applied for school fees or maintenance of the children would in principle<sup>55</sup> be the income of the children. This decision gives a sensible result. It would be surprising if the effect of the common form court order was to sterilise trust funds which prior to the divorce had

---

54 [2000] 1 All ER 636.

55 In practice s.629 ITTOIA would need consideration.

been intended for the maintenance and education of the children. Moreover if the trust bore the cost then H had to be discharged from the court order: the children did not need two sets of school fees. But that case represents a high water mark: payments from H to W are different from payments for the maintenance of children. If the trust makes the payment to W, it is considered that H would not be discharged. If H were discharged, the benefit to H from the trust if it makes a payment to W is not “incidental”.

#### 47.7.3 *Court order against company*

The 2012/13 edition of this work considered the position where a court orders a company within s.731 to transfer property to the spouse of the shareholder. But it seems that the court does not have jurisdiction to make an order of that kind, except in the case where the company is a nominee,<sup>56</sup> so this issue should not arise.

### 47.8 Valuation of benefits

#### 47.8.1 *Why valuation matters*

The amount of s.731 income depends on the “amount or value” of the benefit.<sup>57</sup> “Amount” refers to cash benefits (outright payment of money) and “value” refers to non-cash benefits.<sup>58</sup>

The amount of s.87 gains depends on the amount of the capital payment and s.97(4) TCGA provides:

For the purposes of sections 86A to 96 and Schedule 4C the amount of  
 [a] a capital payment made by way of loan, and  
 [b] of any other capital payment which is not an outright payment  
 of money,  
 shall be taken to be equal to the value of the benefit conferred by it.

In this section I discuss valuation of benefits for the purposes of both s.731 and s.87 TCGA as the issues are (more or less) the same.<sup>59</sup>

#### 47.8.2 *Principles of valuation*

---

<sup>56</sup> *Prest v Petrodel Resources* [2013] 2 AC 415.

<sup>57</sup> See 47.18.2 (Step 1: Total Benefits).

<sup>58</sup> See App.4.3.1 (“Amount or value”).

<sup>59</sup> See App.4.5 (Market value/full consideration).

In *Heaton v Bell*:

“Value” is an elusive word: it may mean market value, it may mean value in money to the owner, or it may have other meanings like the value of the work necessary to produce it, or even sentimental value.<sup>60</sup>

In *IRC v Botnar*:

28. It seems to us that the whole of the value of a non-convertible benefit should, in the absence of any other objective means of valuation, be measured by reference to what it would have cost the individual receiving it. ... When measuring what benefit an individual receives it is not in our view relevant to ask whether he would have purchased the benefit himself. If that were the test a penurious individual receiving a non-money benefit under [enjoyment condition C] would escape tax however substantial the benefit since he could not have paid for it.

Arguments that the value of the benefit is nil tend to overlap with arguments that there is no benefit at all.

#### 47.8.3 *Receipt of money*

ToA draft guidance provides:

**INTM601600 examples of the amount or value of a benefit**

... where the benefit received is money, generally speaking the amount or value of the benefit is likely to be the amount received. As INTM601560 explains where the payment is received in foreign currency the amount or value will generally be determined by applying the appropriate sterling exchange rate at the date of receipt.

That is self-evident.

#### 47.8.4 *Transfer of asset*

ToA draft guidance provides:

**INTM601600 examples of the amount or value of a benefit**

... where the benefit received is in the form of an asset, other than cash, and the ownership of that asset actually passes to the individual, as opposed to an asset being made available for use which remains in the ownership of the provider, the amount or value of the benefit is likely to

---

<sup>60</sup> *Heaton v Bell* 46 TC 211 at p.246.

be determined by reference to the value of the asset at the point in time when it is received by the individual. In most cases this is likely to be similar to the approach that may be adopted for capital gains purposes where it may be appropriate to determine the open market acquisition value of the asset to the individual.

That is self-evident.

#### 47.8.5 *Satisfying a debt*

ToA draft guidance provides:

**INTM601600 examples of the amount or value of a benefit**

... where the benefit received takes the form of a personal debt or liability of the individual being settled on the individual's behalf, the amount or value of the benefit is likely to be determined as if the individual had received an equivalent amount of money. There are a variety of circumstances that may come under this heading from the provision of credit or debit cards, making direct payments to a third party service provider (such as for children's school fees), or the settling of an outstanding personal liability (such as a utility bill, or personal tax liability for example).

#### 47.8.6 *Payment for benefit*

ToA draft guidance provides:

**INTM601600 examples of the amount or value of a benefit**

... If the individual receiving a benefit makes any contribution towards that benefit the contribution will normally be taken into account in determining the amount or value of the benefit.

The draft guidance provides a straightforward example:

For example, an individual is provided with accommodation that is a benefit for the purpose of the benefits charge. It is agreed that the value of the use of the accommodation based on rental is £10,000 for the tax year. In that year the individual pays a rental of £5,000. It will normally be appropriate to take account of the contribution such that the amount or value of the benefit is regarded as £5,000.

This should apply to a payment in advance or in arrears.

If authority is needed, see *IRC v Botnar*.<sup>61</sup>

The measurement of the benefit by reference to what it would have cost the individual will take account of the terms on which it was provided. In this case ... the use of the property was provided on the footing that Mr and Mrs Botnar bore the recurrent outgoings.

## 47.9 Statutory valuation rules

There are some statutory valuation rules for benefits, introduced in 2017. These rules apply for three purposes: s.731, s.643A and s.87.

The s.643A code incorporates the s.731 provisions by reference. The s.87 code repeats the rules in full:

### s.742B ITA

Sections 742C to 742E apply where it is necessary, for the purpose of calculating a charge to income tax under the preceding provisions of this Chapter [chapter 2 part 13, ToA provisions], to determine the value of a benefit provided to a person by way of—

- (a) a payment by way of loan (see section 742C),
- (b) making available movable property without any transfer of the property in it (see section 742D), or
- (c) making available land for use without transferring the whole interest in it (see section 742E).

### s.97(4) TCGA

For the purposes of sections 86A to 96 and Schedule 4C the amount of a capital payment made by way of loan, and of any other capital payment which is not an outright payment of money, shall be taken to be equal to the value of the benefit conferred by it (see sections 97A to 97C for the value of benefits conferred by a capital payment made by way of loan or by way of making movable property or land available).

It is necessary to distinguish:

- (1) “**Statutory value**” (under statutory valuation rules) and
- (2) “**Market value**”

Market value is still relevant so far as the 2017 statutory valuation rules do not apply, which includes:

- (1) Pre-2017 benefits (even if matched with post-2017 relevant

---

61 72 TC 205 p.256 (Special Commissioners decision, at para [29].

income/trust gains)<sup>62</sup>

- (2) Valuation issues outside s.731/s.87/s.643A, such as what constitutes “full consideration”<sup>63</sup>

#### 47.9.1 *Provision for full consideration*

Section 731 applies to individuals who receive a *benefit* and the statutory valuation rules apply to determine the value of a *benefit* by way of loan or use of property. Where there is no benefit the statutory valuation rules do not apply.

It has been suggested that where a loan is provided for full consideration, there is no benefit:

... sections 742B and 742C [ITA] only apply where the loan in question actually constitutes a “benefit” to the borrower. If the loan does not confer a “benefit” on the borrower then the new provisions should not apply. There must be an actual “benefit” before one is required to value anything. That, on any fair reading, is what sections 742B and 742C say. Accordingly, if the terms of the loan made to X ... were such that there was no “benefit” to him, he should not in my view be caught by the new provisions.

I am fortified in this view by the absence of a provision corresponding to the recently inserted s.173(1A)(a) ITEPA. Section 173(1A)(a) is intended to, and does, tax the so-called “benefit” of employer-related ‘rolled up interest’ loans which do not actually confer any benefit. The draftsman recognised the ‘no benefit’ problem and circumvented it by providing that where you have an employer-related loan “the loan is a benefit for the purposes of this Chapter (and accordingly it is immaterial whether the terms of the loan constitute a fair bargain)...”<sup>64</sup> Job done! But, as I say, there is no corresponding provision in the context of the new sections 742B and 742C.<sup>65</sup>

In one sense of the word a loan on commercial terms is not a benefit. That is self-evident, but if authority is needed, see the first *Vestey* case.<sup>66</sup>

62 See 47.10.8 (Pre-2017 loan).

63 See App.4.5 (Market value/full consideration).

64 See 81.2 (Employment-related loan).

65 Flesch, “No Benefit. No Tax – True Or False?” GITC Review Vol.xiv No.2 March 2018

<http://taxbar.com/wp-content/uploads/2018/04/MF-No-benefit-No-tax.pdf>

66 *Vestey’s Executors v IRC* 31 TC 1 at p.114, 121.

... a loan may well benefit a person even if it is made at a commercial rate of interest, as it may tide him over a difficult period, but I do not think that if money is so lent it is applied “for the benefit” of the debtor within [the forerunner of s.624].

...I find it impossible to hold that a sum of money lent at a commercial rate of interest is “payable to or applicable for the benefit of” the borrower in the sense of this Section.

ToA draft guidance takes the view that a commercial loan *is* a benefit, though the market value of the benefit is nil:

**INTM601620 Examples of the amount or value of a loan**

A loan made to an individual for full commercial consideration, is a ‘benefit’ but such a loan would in practice normally be regarded as a nil benefit, and therefore have no taxable value.

Before the 2017 changes, this was simply a different route to the same destination. But the difference matters for after 2017, because if a loan is a benefit (even of nil value) the statutory valuation rule applies; if a loan is not a benefit, the rule does not apply.

The word benefit can be used to refer to a loan on commercial terms.<sup>67</sup> It is considered the better view is that this is the case in the statutory valuation rules. So a loan on commercial terms is within the statutory valuation rules. The same applies for use of other property.

HMRC suggest that the position is different for s.87, if arm’s length transaction relief applies.<sup>68</sup> That relief does not apply for s.731. This might be described as an anomaly, but it is an anomaly which arises from the fact that the relief which applies for s.87 does not apply for s.731..

*47.9.2 Enactment history*

The casual chutzpah (some readers may use a stronger word) of EN FB 2017 deserves to be recorded:

During the consultation process it became clear that the rules for valuing certain benefits was unclear. Schedule 14 [Finance Bill] sets out the procedures to be followed when valuing these benefits for both capital gains and income tax purposes.

---

67 See 47.5.1 (Arm’s length transaction).

68 See 57.7.8

But perhaps no-one is expected to take that seriously.

#### 47.9.3 *Statutory/market value compared*

Statutory value is in general more than market value, but not in every case; for instance:

- (1) The statutory value of use of a car may be less than market value, because a car (unlike, say, a work of art) is a depreciating asset.
- (2) The statutory value of use of an asset may be less than market value where an asset was purchased and first used a long time ago.

### 47.10 **Benefit of loan**

For general law loan issues, which can of course matter greatly for tax, see App 2.7 (Loan).

In the following discussion “**beneficial loan**” is one which is interest-free or on beneficial terms (in short, less than market-rate interest).

A beneficial loan is a benefit.<sup>69</sup> There is not much point having a charge on benefits if beneficial loans are untaxed.

#### 47.10.1 *Statutory value: Loan*

Section 742C(1) ITA/s.97A(1) TCGA provide:

##### **s.742C(1) ITA**

The value of the benefit provided to a person (P) by a payment by way of loan to P is, for each tax year in which the loan is outstanding, the amount (if any) by which—

##### **s.97A(1) TCGA**

For the purposes of section 97(4), the value of the benefit conferred on a person (P) by a capital payment made by way of loan to P is, for each tax year in which the loan is outstanding, the amount (if any) by which—

---

<sup>69</sup> This is self-evident, but if authority is needed, see *Cooper v Billingham* 74 TC 139.  
FD\_47\_Transfer\_of\_Assets\_Abroad\_Benefits.wpd 03/11/21

(a) the amount of interest that would [identical] have been payable in that year on the loan if interest had been payable on the loan at the official rate,<sup>70</sup> exceeds

(b) the amount of interest (if any) actually paid by P in that year on the loan.

Payment of interest by a person other than P does not reduce the value of the benefit.

Payment of interest before or after the year does not reduce the value of the benefit. That is a harsh rule, but it does prevent planning for those coming to/leaving the UK, who might otherwise arrange to pay the interest in a year of non-residence.

“Loan” is not defined, so in the statutory valuation rules it bears its strict meaning: loan of money.<sup>71</sup>

#### 47.10.2 *Repayment of loan*

Repaying a loan on commercial terms is not a benefit (or the value of the benefit is nil). The statutory valuation rule does not apply here.

#### 47.10.3 *Loan (not to life tenant)*

A loan on commercial terms where interest is paid is a benefit of nil value, unless the statutory valuation rule provides otherwise.

What if interest at a commercial rate is rolled up unpaid? There is no income tax charge on unpaid interest.<sup>72</sup> In principle there is still a benefit of nil value, but if the statutory valuation rule applies, unpaid interest is disregarded.

---

70 Defined by reference in s.742C(2) ITA: In this section and section 742D the “official rate”, in relation to interest, means the rate applicable from time to time under section 178 of the Finance Act 1989 for the purposes of Chapter 7 of Part 3 of ITEPA 2003. See also s.97A(2) TCGA for the equivalent reference: In this section and section 97B the “official rate”, in relation to interest, means the rate applicable from time to time under section 178 of the Finance Act 1989 for the purposes of Chapter 7 of Part 3 of ITEPA 2003.

See 81.5 (Official rate of interest)

71 See App 2.7 (Loan).

72 See 25.25.4 (Waiver of interest).

ToA draft guidance (written before the statutory valuation rule) considers what the market value may be:

**INTM601620 Examples of the amount or value of a loan**

If the interest payable on [a loan for full commercial consideration] is not paid, consideration should be given as to whether the ‘unpaid’ interest in each year should be the amount of benefit in each year. Regard should be had to the circumstances under which the interest is unpaid. For example, has the payment of interest been waived?<sup>73</sup>

47.10.4 *Back-to-back loan*

The expression “back-to-back loan” is imprecise: it covers a variety of arrangements, with different tax consequences. ToA draft guidance is sketchy:

**INTM601620 Examples of the amount or value of a loan**

...There may be instances of so called ‘back to back’ arrangements which should be carefully considered. For example, an individual who is a beneficiary of a trust may borrow money from a bank at commercial rates of interest. The trustees may deposit substantial funds with the bank (lender) as collateral for the loan. The arrangements may mean that repayments of capital and interest on the bank loan are rolled up and on maturity the loans are either renegotiated or replaced by larger loans from other banks.

The end result is that the individual, although legally responsible for the repayments of capital and interest payments, has had, perhaps for many years, the benefit of substantial loans without a cost.<sup>74</sup>

In such circumstances, the value of the benefit may be considered on the basis that the loans were interest free and the benefit arrived at as referred to above.

On these facts, the benefit provided by the trustees is the deposit with the bank. Valuation may not be straightforward, but will be possible.

47.10.5 *Loan to life tenant*

The fact that the borrower is life tenant (and so entitled to interest on the loan) is disregarded in determining the existence or valuation of the

---

73 See 47.5.12 (Waiver of liability).

74 Author’s footnote: That is not necessarily the end result of the arrangements described.

benefit. This is not stated expressly but follows from the scheme of the Act.<sup>75</sup>

It is in general not possible to have an interest-bearing loan to a life tenant, under a transparent *Baker*-type<sup>76</sup> trust, because a person cannot pay interest to themselves. Accordingly one cannot argue that the benefit is of nil value, by purporting to charge interest, whether the “interest” is purportedly paid<sup>77</sup> or purportedly rolled up.<sup>78</sup> It would be different if:

- (1) interest was payable after the death of the life tenant;
- (2) the loan was issued at a discount instead of at interest;
- (3) the trustees had expenses which were met by the interest (so the interest was not paid to the life tenants).

#### 47.10.6 *Beneficial loan: Market value*

ToA draft guidance (written before the statutory valuation rule) provides:

##### **INTM601620 Examples of the amount or value of a loan**

One of the most common examples of a benefit involves loans of one form or another. These loans can take the following forms:

- interest free loans
- loans made charging interest at a rate below commercial rates
- loans made charging interest at a commercial rate
- loans made charging interest which remains unpaid
- back to back arrangements.

Interest free loans are considered to be within the provisions, the charge being calculated by reference to the amount of interest forgone by the lender. This position was challenged in the courts where it was argued that in effect where a loan was payable on demand there was no benefit.

75 *Cooper v Billingham* 74 TC at p.154F. The reasoning was upheld by the Court of Appeal.

76 It would be different if the trust was a non-transparent *Garland*-type trust. See 39.3 (Taxation of life tenant).

77 Even if the parties go through a ceremony under which:

- (1) the life tenant pays, or purports to pay, “interest” to the trustees; and
- (2) the trustees return it to the life tenant.

Even if the parties do this there is no IT charge on the “interest”: *Styles v New York Assurance* 2 TC 460. This point was overlooked in *Rogge v HMRC* [2012] UKFTT 49 (TC) (where the taxpayer was not represented by counsel).

78 However, if interest accrues unpaid and the life tenant dies, the position alters and outstanding interest becomes payable to the trust (unless Apportionment Act 1870 principles apply, which will be rare).

The judges disagreed with this and said that the focus needed to be not on the making of the loan but on the Trustees successive acts in not calling the loan in. (*Cooper v Billingham* 74 TC 139) Similarly where there are loans at interest rates lower than those that would be charged by banks or other commercial lenders a benefit may arise.

ToA draft guidance provides:

**INTM601620 Examples of the amount or value of a loan**

... In the case of an interest free loan made to the individual, the amount of the benefit would normally be considered to be equivalent to the interest payable at a commercial rate on a similar loan from an unconnected third party. For this purpose we treat the ‘official rate’ of interest as being the appropriate rate to use.<sup>79</sup> Where interest is paid but at less than commercial rates, the amount of the benefit will be that interest payable at a commercial rate less the interest paid.

The use of the official rate is a pragmatic solution, but strictly, the benefit is valued by reference to market rate for a loan on the same terms to the borrower, which will depend on:

- the security (if any) for the loan
- the financial strength of the debtor (the strength of the covenant)
- in the case of a foreign currency loan, the foreign currency market rate

It is sometimes in the interest of the taxpayer to argue that the value of the benefit is greater than the official rate. But where the statutory valuation rule applies, this does not arise.

#### 47.10.7 *Impaired loan: Market value*

This section considers the benefit of an impaired loan, ie where the beneficiary is unable to repay the loan.

*Cooper v Billingham* discusses the market value of the benefit of an interest-free loan:

[Counsel] argued that the value of the benefit conferred as required for the purposes of s.97(4) [TCGA] would vary according to the circumstances of the borrower, for example how creditworthy he might be and therefore his ability to borrow at better or worse rates on the market, and that those circumstances might differ from time to time.

---

<sup>79</sup> See 81.5 (Official rate of interest).

That may be true and could in theory cause difficulties of qualification in a particular case.<sup>80</sup>

The beneficiary may be insolvent, ie unable to repay the loan immediately after it is made. This would typically arise if there are a series of loans to the beneficiary which are used to meet current expenditure. At the time of later loans in the series, at least, the beneficiary would be insolvent.

There are two possible analyses:

- (1) The purported loan might take effect as an absolute transfer and not a loan; in other words, the documentation may be a sham so far as it suggests that there is a loan.<sup>81</sup>
- (2) The transaction may take effect as a loan, but the value of the benefit in the year the loan is made would be equal to the sum loaned, because an arm's length lender would not agree to lend (if "lend" is the word) for any less. No benefit arises in subsequent years if the "loan" is left outstanding (as an arm's length lender should not require a greater consideration than that).

I prefer the first analysis<sup>82</sup> but it depends on the facts, and they both lead to the same result.

It is theoretically possible that the trust which makes the loan could put the borrower in funds to make the repayment, but that makes no difference (an arm's length lender could theoretically do the same).

The borrower may be solvent (ie able to repay) when the loan is made but become insolvent. This would typically arise if there are a series of loans to the beneficiary which are used to meet current expenditure. At the time of first loan at least, or at the time of earlier loans in the series, the borrower may still be solvent. A similar analysis applies. Even if the transaction is a loan, the benefit in the year of the loan is what an arm's length lender would require for making the loan (which is likely to be the amount lent); or else the benefit in subsequent years is what an arm's length lender would require for leaving the loan outstanding. But where the statutory valuation rule applies, this does not arise.

#### 47.10.8 *Pre-2017 loan*

---

<sup>80</sup> 74 TC at p.155.

<sup>81</sup> See App 2.7.2 (Loan or outright payment?).

<sup>82</sup> Assuming that the loan is governed by a law with a doctrine of sham similar to English law.

Para 3 sch 9 F(no.2)A 2017 provides:

The amendments made by this Schedule [statutory valuation rules] have effect in relation to capital payments or benefits received in the tax year 2017-18 and subsequent tax years.

Flesch considers a case where in 2016 (before the statutory valuation rule) trustees make a fixed five year term loan for no consideration:

Clearly X would have received a “benefit” when the loan was made, and the benefit would have been taxed under section 731 et seq in 2016-17. I hope that no one – not even HMRC – would seriously suggest that X received further taxable benefits in the five succeeding years, by virtue of sections 742B and 742C.<sup>83</sup>

In practice HMRC may accept that, whether as law or concession. Flesch uses it to support his argument that market value loans are not benefits within the scope of the statutory valuation rule,<sup>84</sup> but no inference can be drawn from the unfairness point. There is unfairness built into the section in that it only allows a deduction for interest paid in the year, not for interest paid before or after the year. And in practice fixed term loans at an undervalue are rare.

#### 47.10.9 *Loan to estate/deceased borrow*

Suppose:

- (1) A trust (within s.731) makes a loan to an individual
- (2) The individual dies. The PRs of the estate become liable for the loan.
- (3) The trust leaves the loan outstanding.

Section 731 income does not arise to the PRs, because the PRs are not

83 Footnote original: See *Billingham v Cooper* [2000] STC 122, at p.129h and p.134a.

84 Flesch, “No Benefit. No Tax – True Or False?” GITC Review Vol.xiv No.2 March 2018: “Now let us suppose that it transpires that the loan actually made to X in June 2016 contained a small element of benefit, because the agreed rate of rolled up interest was marginally too low to constitute a ‘fair bargain’. Again, any such benefit should have been taxed in 2016/17 and should not be taxed again in subsequent years. That being so, it surely cannot be right in X’s actual case – where his loan was a ‘fair bargain’ and did not confer any ‘Day 1 benefit’ – that he should be taxed by virtue of the new provisions. X’s ‘benefit’ – or nonbenefit – must equally have been received before 2017-18.”

<http://taxbar.com/wp-content/uploads/2018/04/MF-No-benefit-No-tax.pdf>

individuals. There would be a capital payment for the purposes of s.87, giving rise to a CGT charge on the PRs if they are UK resident.

**47.11 Use of chattel**

RI 201 provides:

["Benefit"] includes for example ... the use of trust property at less than an open market rental.

That is self-evident.

47.11.1 *Statutory value: chattel*

Section 742D ITA/s.97B TCGA provide:

**s.742D ITA**

**s.97B TCGA**

(1) The value of the benefit provided by making movable property<sup>85</sup> available, without any transfer of the property in it, to a person (P) is, for each tax year in which the benefit is provided to P—

(1) For the purposes of section 97(4), the value of the benefit conferred by a capital payment consisting of making movable property available, without any transfer of the property in it, to a person (P) is, for each tax year in which the benefit is conferred on P—

$$\frac{(CC \times R \times D)}{Y} - T$$

[Identical]

In short:

CC is the **C**apital **C**ost

D is the number of **D**ays the property is available

R is the official **R**ate of interest

T is the **T**otal paid by P

Y is the number of days in the tax **Y**ear

In full detail, s.742D(1) ITA/s.97B(1) TCGA provide:

CC is the capital cost of the movable property on the date when the

85 Defined s.7442D(4) ITA/s.97B(4) TCGA: "In subsections (1) and (2), "movable property" means any tangible movable property other than money."

- property is first made available to P in the tax year,  
 D is the number of days in the tax year on which the property is made available to P (the relevant period),  
 R is the official rate of interest for the relevant period (but see subsection (3)),  
 T is the total of the amounts (if any) paid in the tax year by P—
- (a) to the person providing the benefit, in respect of the availability of the movable property, or
  - (b) so far as not within paragraph (a), in respect of the repair, insurance, maintenance or storage of the movable property, and
- Y is the number of days in the tax year.
- (2) In subsection (1), in the meaning of CC, the “capital cost” of the movable property means an amount equal to the total of—
- (a) the amount which is the greater of—
    - (i) the amount or value of the consideration given for the acquisition of the movable property by, or on behalf of, the person (A) providing the benefit, and
    - (ii) its market value at the time of that acquisition, and
  - (b) the amount of any expenditure wholly and exclusively incurred by, or on behalf of, A for the purpose of enhancing the value of the movable property.
- (3) If the official rate of interest changes during the relevant period, then in subsection (1) R is the average official rate of interest for the period calculated as follows.

*Step 1*

Multiply each official rate of interest in force during the relevant period by the number of days when it is in force.

*Step 2*

Add together the products found in Step 1.

*Step 3*

Divide the total found in Step 2 by the number of days in the relevant period.

#### 47.11.2 *Market value: use of chattel*

ToA draft guidance provides:

**INTM601600 examples of the amount or value of a benefit**

... the principles to be applied where an asset is made available for use by an individual are likely to be similar to those described above for rent

free accommodation.<sup>86</sup> Where the benefit provided is on an ongoing and continuous basis it will generally be appropriate to look at the tax year as a whole and consider the ‘annual value’ of the use of the asset in relation to that tax year (or part thereof) together with any ongoing costs to the person providing the benefit of its provision for use by the individual.

Subject to obtaining any necessary professional valuation advice, as a rule of thumb it might be appropriate to adopt methodology for the benefits charge in this area similar to that which may apply in the employment related benefits field where an asset is made available for use (see for example section 205 ITEPA 2003<sup>87</sup>).

The statutory valuation rules in the employment-related benefits code are not the correct way to ascertain market value; and this was tacitly acknowledged by the enactment of the statutory valuation rule for s.731/s.87.

Manisty explains HMRC views on what constitutes full consideration for the use of chattels<sup>88</sup>

(a) The Revenue accept that currently available evidence relating to the loan of chattels to or by public museums or by businesses established to loan chattels forming part of their stock in trade on a commercial basis to third parties is scarce and hence of little value in assessing the adequacy of the consideration paid by a donor for his continued retention of chattels in a GWR situation where it is desired to take advantage of [para 6 sch 20 FA 1986] dispensation.

(b) However, the suggestion - which has been inferred from *IRC v Macpherson*<sup>89</sup> - that if the donor assumes responsibility for the housing, preservation and insurance of the chattels this of itself is likely to amount to “full” consideration, receives no support from the Capital Taxes Office.

As already mentioned, the Official view is that an “arm’s length” situation must be assumed if the requirements of paragraph 6 are to be fulfilled. In the Capital Taxes Office’s eyes this means that neither side must be seen to be doing the other any favours, and, in particular, that it must not be assumed in establishing the consideration to be paid by the donor that the new owner of the chattels may find possession of them a burden. He must be assumed to be willing and able to preserve and insure them: the “arm’s length” hypothesis also involves

---

86 See 36.12.2 (Market value: use of land).

87 See 79.36 (“Cash equivalent”).

88 See para 6 sch 20 FA 1986, discussed at 74.7 (Full consideration exemption).

89 See footnote above.

assuming that the new owner would not willingly allow any third party to enjoy them unless that party were to shoulder these obligations and on top of this pay a rent for their use and enjoyment.<sup>90</sup> Unless such criteria are observed, the Revenue perceive no benefit so the donee of the ownership of gifted property, which is of undoubted value in the marketplace, and would not be willing to accept that the arrangements whereby the donor retains them can meet the required “arm’s length” test.

(c) However, the Revenue accept that if the donor is shown to have assumed the burdens of housing, preserving and fully insuring the chattels, plus paying an appropriate (reasonable) rent ascertained and maintained by reference to current capital value of the chattels, this will “probably” (a customary Revenue precautionary word used in the giving of hypothetical advice of this kind) satisfy the requirements of [para 6 sch 20 FA 1986].

(d) As to the quantum of the rent, although the Capital Taxes Office reject any inference that might be drawn from *IRC v Macpherson* that this may be purely nominal, they have indicated that the appropriate percentage to be fixed by reference to capital value, and reviewed periodically, is not likely to be very high.

They have confirmed that the relevant percentage is likely to be greater if the chattels in question provide an element of utility and/or may depreciate in as a result of enjoyment of them pursuant to the terms of the relevant lease/licence. Somewhat more controversially the Revenue suggest that circumstances might justify the payment of a “premium rent” for particularly important artefacts to reflect that an “arm’s length” lessee/licensee might be prepared to pay such a premium rent for the privilege of enjoying such a work of art. Although support for this line would seem sparse at the present time, this is a factor that agents instructed to negotiate full consideration for the purposes of leases or licenses of particularly important items designed to fulfil the criteria of [para 6 sch 20 FA 1986], must have in mind.

HMRC have argued that the industry standard guideline for works of art (market rent = 1% of capital value, or less for very valuable assets) is too low.<sup>91</sup> Valuation experts disagree. Presumably the statutory valuation rule reflects a realisation that they will lose that argument.

## **47.12 Use of land**

### *47.12.1 Statutory value: use of land*

---

<sup>90</sup> Author’s footnote; this is not correct.

<sup>91</sup> See App.4.5 (Market value/full consideration).

Section 742E(1) ITA/s.97C(1) TCGA provide:

**s.742E(1) ITA**

The value of the benefit provided by making land available for the use of a person (P) is, for each tax year in which the benefit is provided to P, the amount by which—

- (a) the rental value of the land for the period of the tax year during which the land is made available to P, exceeds
- (b) the total of the amounts (if any) paid in the tax year by P—

(i) to the person providing the benefit, in respect of the availability of the land, or

(ii) so far as not within subparagraph (i), in respect of costs of repair, insurance or maintenance relating to the land.

**s.97C(1) TCGA**

For the purposes of section 97(4), the value of the benefit conferred by a capital payment consisting of making land available for the use of a person (P) is, for each tax year in which the benefit is conferred on P, the amount by which—

[identical]

(i) to the person conferring the benefit, in respect of the availability of the land, or

[identical]

“Making land available” is equivalent to the benefit in kind wording, “providing” living accommodation; for discussion, see 79.15 (Available but not used).

Section 742E(2) ITA/s.97C(2) TCGA provide:

**s.742E(2) ITA**

Subsection (1) does not apply in the case where the person providing the benefit transfers the whole of the person’s interest in the land to P.

**s.97C(2) TCGA**

Subsection (1) does not apply in the case where the person conferring the benefit transfers the whole of the person’s interest in the land to P.

Section 742E ITA/s.97C TCGA define rental value:

(3) In subsection (1) “the rental value” of the land for a period means the

rent which would have been payable for the period if the land had been let to P at an annual rent equal to the annual value.

(4) For the purposes of subsection (3) “the annual value” of land is the rent that might reasonably be expected to be obtained on a letting from year to year if—

- (a) the tenant undertook to pay all taxes, rates and charges usually paid by a tenant, and
- (b) the landlord undertook to bear the costs of the repairs and insurance and the other expenses (if any) necessary for maintaining the property in a state to command that rent.

(5) For the purposes of subsection (4) that rent—

- (a) is to be taken to be the amount that might reasonably be expected to be so obtained in respect of a letting of the land, and
- (b) is to be calculated on the basis that the only amounts that may be deducted in respect of services provided by the landlord are amounts in respect of the costs to the landlord of providing any relevant services.

(6) In subsection (5) “relevant service” means a service other than the repair, insurance or maintenance of the property.

The wording is taken from the employment income benefit in kind rules.<sup>92</sup> This may not differ much if at all from the market value.

If the land is provided for full consideration, it is considered that there is no benefit and the statutory valuation rule does not apply.

#### 47.12.2 *Market value: use of land*

In *IRC v Botnar* the Special Commissioners discuss the valuation of living accommodation:

30. It may be that it will not be easy for a valuer to assess what the cost of a benefit such as this would have been since it is wholly hypothetical there being no market for such benefits. However, it seems to us that one approach may be to take the open market rental and to adjust this by reference to the lack of security of tenure, non-assignability and outgoings born by Mr and Mrs Botnar and any other special factors.<sup>93</sup>

<sup>92</sup> See 79.18.1 (“Rental value”).

<sup>93</sup> 72 TC 205 at p.262 (Supplementary Special Commissioners Decision). The question arose in the context of (what is now) ToA enjoyment condition C, where the charge is on the value of the benefit; see 46.16.3 (Amount of charge under enjoyment condition C). But the same applies for s.731 and s.87.

ToA draft guidance provides:

**INTM601600 examples of the amount or value of a benefit**

... where the benefit received is the provision of accommodation without charge to the individual the amount or value of the benefit is likely to be determined from a consideration of the market rental that the property may have fetched at the time the benefit is received.

However, it must be kept in mind that the language of the provision is of an individual who 'receives' a benefit. Therefore where, as in the case of rent free accommodation, the individual goes on receiving the benefit by continuous occupation of the property there is in effect an ongoing and continuous benefit. As taxation of a benefits charge is for a tax year it will generally be appropriate to consider the amount or value of the benefit for that entire period where there is a continuous provision of a benefit for the whole or part of that period. It will therefore be appropriate in such instances to consider the 'annual value', or appropriate proportion thereof, of the benefit received not merely any value at the point of first receipt. Thus in the case of rent free accommodation it will not only be appropriate to consider the amount or value of the benefit during the particular tax year, but if that benefit continues to be provided to consider its value for each subsequent period during which there is continuing provision and to have regard to any changes that may occur in the value of the benefit (for example because of changes in market place for rental values). These principles of continuous provision are likely to apply to most situations where an asset is made available for use over a period of time.

**47.13 Benefit causation condition**

The third s.731 application condition is the benefit causation condition. Section 732(1) ITA provides:

This section applies if ...

- (c) the benefit is provided out of assets which are available for the purpose as a result of—
  - (i) the transfer, or
  - (ii) one or more associated operations ...

There are two alternative conditions here:

- (i) the benefit is provided out of assets which are available for the purpose as a result of the transfer; or
- (ii) benefit is provided out of assets which are available for the purpose

as a result of associated operations.

I refer to these as benefit causation conditions (i) and (ii). They are comparable to the relevant transfer causation conditions.

Thus, not every benefit that an individual receives falls within s.731: there must be a causal nexus between the benefit and the transfer.

Contrast the s.87 charge which applies where a beneficiary receives a benefit directly or indirectly from the trustees. The wording is different but the concept is similar.<sup>94</sup>

#### 47.13.1 *B1 gives benefit to B2*

Suppose:

- (1) A discretionary trust within s.731 has accumulated relevant income.
- (2) In 1980, a beneficiary (“B1”) receives a trust asset (“B1’s asset”). Although B1 receives a benefit assume B1 does not pay tax under s.731 because he is non-resident, or qualifies for the s.731 remittance basis.<sup>95</sup>
- (3) In 2010 B1 (independently and not as part of a prior arrangement) gives the asset to another beneficiary<sup>96</sup> (“B2”) who is UK resident. This seems on a simple reading to be an operation associated with the transfer of assets to the trust.

B2 has received a benefit. Benefit causation condition (i) is not satisfied. However, it seems at first sight that benefit causation condition (ii) is satisfied, so B2 is at first sight subject to tax under s.731. This clearly cannot be right; but why not? It is necessarily part of the scheme of s.731 that when one beneficiary (“B1”) receives a benefit, and uses the benefit to benefit another (“B2”) only the first benefit counts. Otherwise what should be regarded in economic reality as a single benefit may give rise to a series of tax charges as it passes from one beneficiary to another and to

---

94 See 57.8.1 (Indirect receipt from trust).

95 Although strictly the position of B2 is the same even if B1 is taxed on B1’s benefit, whether as a capital benefit under s.731 or as an income benefit under ITTOIA.

96 If B1 transfers the asset to a person (“C”) who is not a beneficiary of the trust (in the sense that trust income cannot be used to benefit C) then C cannot be subject to tax under s.731 as there is no relevant income in relation to C. But in a standard form discretionary trust there is a wide power to add beneficiaries; so trust income is relevant income in relation to every person in the world (whether or not they are specifically identified as “Beneficiaries” in the trust deed).

another.<sup>97</sup> But why is this the case? The best answer is that the gift from B1 to B2 is not an operation associated with the original transfer. Mere historic association is not enough. These must be something more.<sup>98</sup> It is suggested that the principles to apply are those of a “clean break” test.<sup>99</sup>

In *Denny v HMRC*:

- (1) S (son of the taxpayer T) created a trust in the 1990’s.
- (2) The trust property was appointed to S (then non-resident); the date of this is not recorded.
- (3) In 2000 S used the funds to lend £0.5m to his father, T. (T repaid over the following year but nothing turns on that.)

The Tribunal dealt with the s.731 issue in a single sentence:

We find that section [731] does not have effect because even if the loan to [T] could be considered a “benefit” within [s.732] it was not provided out of “assets which were available for the purpose”, but rather from funds owned by [S] available for his own purposes. No charge arises under its provisions.<sup>100</sup>

The onward-gift rules also need to be considered,<sup>101</sup> but the existence of those rules confirms that gifts outside the scope of the rules are not caught.

#### 47.13.2 *Transfer between trusts*

Section 90 TCGA provides a code dealing with transfers between settlements for the purposes of s.87.<sup>102</sup> This is needed because a s.1(3) amount (trust gain) is computed in relation to settlements. Each settlement has a s.1(3) amount attributed to it.

Section 731 by contrast has no such need. Relevant income is *not* computed in relation to settlements. It is computed in relation to individuals and to transfers.<sup>103</sup> Thus a transfer of relevant income from trust 1 to trust 2 does not reduce the relevant income of beneficiaries of

---

97 Assume there is sufficient relevant income.

98 The argument would be the same as in 45.13 (Income received as indirect consequence of transfer).

99 See 94.7 (A gives to B, B gives to trust).

100 [2013] UKFTT 309 (TC) at [96]. There is no detailed analysis, but this was a case where the taxpayer appeared in person, and HMRC did not instruct counsel.

101 See 47.48 (s.731 onward-gifts).

102 See 57.52 (Rebasing: Transfer between trusts).

103 See 47.20 (“Relevant income”: Definition).

trust 1 who are also beneficiaries of trust 2. Suppose:

- (1) A trust (“trust 1”) within s.731 has accumulated relevant income.
- (2) Trust 1 transfers funds (“the transferred funds”) to a new UK trust on similar terms (“trust 2”).
- (3) A beneficiary (“B”) receives a benefit from trust 2 out of the transferred funds.

The transfer from trust 1 to trust 2 is an operation associated with the earlier transfer to trust A.<sup>104</sup> B has received a benefit and the benefit is provided out of assets which are available as a result of the transfer and the associated operation. So B is taxed under s.731. The benefit causation condition is satisfied.<sup>105</sup>

Suppose trust 2 was an established trust with a trust fund (“fund 2”). If B receives a benefit from fund 2 B is not taxable under s.731 because that fund is not available as a result of the transfer of assets to trust 1.

It follows that a transfer between settlements will not in principle avoid s.731 charge. There is no reason why it should (except a misconceived analogy with the s.87 statutory rules which have no equivalent in the ToA code).

#### **47.14 Benefit causation: 2 transfers**

Suppose:

- (1) A settlor by a single disposition transfers assets to a trust within s.731.
- (2) Part of the trust fund is invested in assets which yield relevant income.
- (3) Another part of the trust fund consists of a house occupied rent-free by B.

B pays tax on the benefit by reference to the relevant income.

By contrast, suppose:

- (1) A settlor by *two* separate transfers creates *two* trusts within s.731:
  - (a) a trust which holds income-producing assets and accumulates relevant income; and

---

104 A transfer between trusts is not a “clean break”. After all, trustees are expected to pay close attention to the wishes of the settlor, and in doing so they are merely filling in the blanks left by the settlor: see App.4.7.5 (Trust appointment: Filling blanks).

105 If authority is needed, which I doubt, see *HMRC v Parry*, discussed at 70.5 (Omission: Deemed disposition).

(b) a trust which holds the family home.

(2) B enjoys the benefit of free occupation in the home.

B is not subject to tax under s.731 as there is no relevant income in relation to this benefit. Thus the use of two trusts may avoid a tax charge under s.731 which would have arisen if there were one.

Indeed, it is not necessary to use two trusts. The same applies if there are two separate transfers of assets to one trust.

## 47.15 Taxable-transferor defence

### 47.15.1 “Relevantly domiciled”

The fourth s.731 application condition is the taxable-transferor defence. Statute uses the term “relevantly domiciled” and it is convenient to consider this first. Section 732(4) ITA provides:

For the purposes of subsection (1)(d), the individual [beneficiary] is “relevantly domiciled” at any time if at that time—

- (a) the individual is [actually] domiciled in the UK, or
- (b) the individual is regarded for the purposes of section 718(1)(b)<sup>106</sup> as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly-domiciled resident<sup>107</sup>].

“Relevantly domiciled” is a opaque term; I refer to it as “**relevantly-taxable domiciled**” as a transferor who is relevantly domiciled does not qualify for s.720 protected-trust relief.

An individual is not relevantly-taxable domiciled if they are:

- (1) not actually UK domiciled; and
- (2) not a formerly-domiciled resident

It may be easier to follow in a table:

Actual dom	Formerly-dom resident <sup>108</sup>	Relevantly-taxable domiciled
yes	n/r	yes
no	yes	yes
no	no	no

<sup>106</sup> See 45.5 (“Person Abroad”).

<sup>107</sup> See 4.4.1 ( Condition A: Formerly dom).

<sup>108</sup> The 15-year rule is irrelevant here.

The reader may think of several ways that the legislation could have been more simply drafted; in particular, the reader may wish that the drafter had not coined this opaque terminology. But there it is.

#### 47.15.2 *Taxable transferor*

Section 732(1) ITA provides:

- (1) This section applies if ...
- (d) [i] where there is a time in the year when the individual [the beneficiary] is relevantly [taxably] domiciled,
- [ii] the individual is not liable to income tax under section 720 or 727 by reference to the transfer<sup>109</sup>

Thus there are two classes of transferor; and in principle:

<i>Relevantly-taxable domiciled</i>	<i>s.720</i>	<i>s.731</i>
Yes	yes	no (taxable-transferor defence applies)
No	no	yes (defence does not apply)

The taxable-transferor defence is sensible. A transferor who is relevantly-taxable domiciled is within s.720. There is no need to apply s.731 to a transferor to whom s.720 applies. The application of s.720 gives HMRC all they should need.

#### 47.15.3 *Transferor not relevantly-taxable domiciled*

For most transferors - those not relevantly-taxable domiciled - the protected-trust regime has:

- (1) restricted s.720 (by introducing s.720 protected-trust relief); and
- (2) widened s.731 (by removing the former transferor defence and replacing it by the narrower taxable-transferor defence).

A transferor who is not relevantly-taxable domiciled may be taxed under

<sup>109</sup> Prior to 2017, s.732(1) ITA provided:

“This section applies if ...

- (d) [i] the individual [the beneficiary] is not liable to income tax under section 720 or 727 by reference to the transfer
- [ii] and would not be so liable if the effect of sections 726 and 730 [remittance basis] were ignored ...”

It is possible to envisage cases where the deletion of para (1)(d)[ii] (underlined) could make a difference, but it will not happen much if at all.

s.731 by reference to relevant income which arose before 2017/18, even though in earlier years the transferor qualified for the taxable-transferor defence. So there is an element of retrospectivity in the 2017 extension of the scope of s.731.

A transferor who is deemed UK domiciled under the 15-year rule is not relevantly-taxable domiciled and so is within s.731. The transferor is *likely* to be outside s.720. But the two sets of rules are not completely aligned. If the trust has been tainted, for instance, the transferor is within s.720 and *also* within s.731. I wonder if that is intended.

#### 47.15.4 *Pre-2017 benefit*

Suppose a transferor receives benefits before 6 April 2017 which were not taxable under s.731 under the former transferor's defence. The benefits are not subsequently matched with relevant income under s.731. That is, the post-2017 s.731 charge on the transferor only applies to post-2017 benefits. Section 733(1) ITA provides:

To find the amount (if any) of the income treated as arising under section 732(2) for any tax year in respect of benefits provided as mentioned in section 732(1)(c) take the following steps.

Step 1 Identify the amount or value of such benefits received by the individual in the tax year and in any earlier tax years in which section 732 has applied.

In the earlier years, section 732 did not apply to the settlors: the condition in s.732(1)(d) was not met.

HMRC agree. HS262 provides:

benefits provided to a transferor before 6 April 2017 won't be included in the calculating the transferors benefits for earlier years.<sup>110</sup>

#### 47.15.5 *Transferor non-resident: pre-1996 transfer*

It has never been a requirement of s.731 that the transferor was (ordinarily) resident, at the time of the transfer, but this was a requirement

---

110 HS262, "Income and benefits from transfers of assets abroad and income from Non-Resident Trusts" (2018), updated 6 April 2019.

The contrary view would lead to retrospective taxation, as a benefit received before 2017 could easily be taxed in 2017/18 wholly by reference to relevant income received before 2017.

of s.720 until 1996.<sup>111</sup>

RI 201 provides:

... a transferor of assets who is outside the charge to tax under Section 739 ICTA [now s.720 ITA] in respect of income arising before 26 November 1996 through being not ordinarily resident in the UK at the time of the transfer, is not assessed under [what is now s.731 ITA].

This is looking at a transferor “T” (wherever domiciled) who:

- (1) makes a transfer of assets before 26 November 1996;
- (2) is not UK (ordinarily) resident when T made the transfer;
- (3) later becomes UK (ordinarily) resident.

T was not taxable under s.720 until 26 November 1996. I refer to income arising before that date as “pre-1996 income”. If T receives a benefit after 26 November 1996<sup>112</sup> T is not taxable under s.731. This is right because the taxable-transferor defence does not apply to *income* liable to tax under s.720. It applies to an *individual* liable to tax under s.720. In the example, T (once resident and after 26 November 1996) becomes an individual who is “liable to tax under s.720”. This is something of a windfall for T, but of course others may be taxed as the pre-1996 income is relevant income.

#### 47.15.6 *Transferor non-resident at other times*

RI 201 does not address the situation where T is outside the scope of s.720 only because T is not resident for a period. Suppose:

- (1) T is resident when T makes the transfer;
- (2) T is non-resident for a period (“the non-resident period”)
- (3) T returns to the UK and is relevantly-taxable domiciled

The reasoning above shows that on these facts T is also outside s.731; T qualifies for the taxable-transferor defence in relation to income of the non-resident period as well as the income arising while resident.

The same applies if T becomes relevantly-taxable domiciled.

#### 47.15.7 *Spouse of taxable-transferor*

The spouse of a relevantly-taxable domiciled transferor qualifies for the

---

111 See 46.15.3 (Transferor non-resident when transfer made).

112 I need not now consider the position if the benefit was received before 26 November 1996 but the result was probably the same.

taxable-transferor defence, because references to the transferor include the spouse.<sup>113</sup> That only applies during the life of the transferor as after the death of the transferor, the widow/er is not a “spouse” (and the survivor of two civil partners is not a “civil partner”).<sup>114</sup>

What is the position where:

- (1) The transferor is non-resident
- (2) The spouse is UK resident

The spouse may be liable under s.731. The taxable-transferor defence does not apply, because “the individual is not liable to income tax under s.720”. Although the word “individual” includes the spouse:

- (1) The spouse is not liable under s.720 (because s.720 liability rests only on the individual who is transferor)
- (2) The transferor is not liable under s.720 being non-resident.

This is a somewhat selective application of the rule that of “individual” includes a spouse; but it gives the result which accords with the purpose of the taxable-transferor defence.

#### **47.16 s.731 capital condition**

The fifth s.731 application condition is (in my terminology) the s.731 capital condition. Section 732(1) ITA provides:

This section applies if ...

- (e) the individual [beneficiary] is not liable to income tax, under any provision that is none of
  - [i] section 731 of this Act and
  - [ii] sections 643A, 643J and 643L of ITTOIA 2005,on the amount or value of the benefit.

The drafting is ungainly, but it does not matter.

If the individual (beneficiary) *is* liable to IT, there is in general no need to apply s.731 to the benefit. The IT liability is all that HMRC should need.

The effect of para [ii] is that s.731 has priority over s.643A/J/L.<sup>115</sup>

##### **47.16.1 *Benefit remittance-basis exempt***

---

113 See 45.20 (Spouse of transferor).

114 See App 3.2 (“Spouse”) and App 3.3 (“Civil partner”).

115 See App.2.4 (Chargeable/liable to tax); 44.21.5 (Step 3: Benefit liable to IT).

What is the position if a trust makes an income distribution<sup>116</sup> to a remittance basis taxpayer, which is not remitted? The s.731 capital condition is not met. The payment is “liable to income tax” even if no tax is paid because of the remittance basis.<sup>117</sup> In short, an income receipt from a trust is taxed (if at all) under general principles<sup>118</sup> and not under s.731.

This question arises because the s.731 remittance basis is more limited than the ordinary ITA remittance basis. For instance, suppose:

- (1) A discretionary trust within s.731 receives UK source income (or both UK and foreign source income).
- (2) A remittance basis taxpayer (“B”) receives income (“unremitted foreign trust income”) from the trust.

B is taxable on the unremitted foreign trust income on the ITA remittance basis but assume the income is not remitted, so no tax is due. Can HMRC argue that B is subject to tax on the unremitted foreign trust income under s.731?<sup>119</sup> The answer is, no, because B is “liable” to IT on the benefit. By contrast, if B had received capital instead of income from the same trust, B would have been subject to tax on the benefit under s.731!

Of course, the word “liable” (like all words) takes its meaning from the context. So perhaps here HMRC may argue that unremitted foreign income is not “liable” to income tax, for the purposes of the s.731 capital condition? There is no good reason to construe the word in that wide way. This result is consistent with the rule that the taxable-transferor defence applies even to income which is remittance-basis exempt.<sup>120</sup> Anti-avoidance provisions, like hypotheses, should not be multiplied unnecessarily.

116 For what is an income distribution, see 38.8 (Trust payment: Income/capital).

117 See 2.4.1 (Unremitted RFI “chargeable”).

118 See 38.3 (Tier 3: Discretionary payment charge).

119 The s.731 remittance basis is not in point if the benefit relates to UK source relevant income: see 47.39 (s.731 remittance basis).

120 See 47.15 (Taxable-transferor defence). A further objection to this HMRC argument is that there may be a double charge to tax:

- (1) Tax under s.731 on receipt of the unremitted foreign trust income.
- (2) Tax under general principles when the foreign trust income is later remitted to the UK.

Arguably, double-counting relief applies: see 48.4 (Double-counting relief). But there is no provision allowing tax paid under s.731 to be reclaimed.

**47.17 s.731/s.87 interaction****s.731 wording: s.731(1)(e)**

This section applies if ...  
 (e) the individual [beneficiary] is not liable to income tax...

**s.87 wording: s.97(1)**

“capital payment” —  
 (a) means any payment which is neither—  
 (i) chargeable to income tax on the recipient ...

The wording of these two provisions is effectively the same: *liable* (s.731) and *chargeable* (s.87) are used interchangeably. Before the tax law rewrite, s.740 ICTA (the predecessor to s.731) used the word “chargeable” and the rewrite change to “liable” has not altered the meaning.

The definition of “capital payment” for s.87 purposes is discussed in 57.7 (Capital payment).

In the following discussion “**a non-capital payment**” is a payment which is not a capital payment.

**47.17.1 Benefit matched on receipt**

The pre-ITA position was straightforward. Section 740 ICTA was, I think, a tax on the benefit.<sup>121</sup> If a person received a benefit which was subject to tax in the year of receipt, under s.740 (ie assume there was relevant income) then the benefit was a non-capital payment for CGT purposes.

It is not immediately obvious that the position is the same from 2007/08. For s.731 is not expressed as a charge on the benefit. It appears at first sight to be a charge on fictional, deemed income: the amount or value of the benefit is merely an element in the computation of the amount of the s.731 income. However it cannot be the case that the same benefit gives rise to CGT on the benefit and deemed income on an amount equal to the benefit. HMRC agree. The CG Manual provides:

**CG38625: Capital payments [Jul 2019]**

---

121 Section 740(2) ICTA provided (in short)

“(2) ... the amount or value of any such benefit as is mentioned in subsection (1) above ... shall -

(a) ... be treated for all the purposes of the Income Tax Acts as the income of the individual for that year...”

The exclusion for amounts chargeable to Income Tax includes both actual income receipts and amounts deemed to be income for tax purposes. For example:...

[3] Capital distributions taxed as income under ITA07/S733 [in my terminology, s.731 income]. If section 733 applies after the year in which the benefit is received that benefit may be treated as a capital payment in the earlier years, TCGA92/S97(3).

A strained construction is needed to reach that result. There are two possible solutions:

- (1) Either (contrary to first appearances) s.731 is in fact a charge on benefits; or
- (2) The reference (in the definition of capital payment) to a payment which is “chargeable to IT” should be read as including a benefit giving rise to deemed income.

Section 97(3) TCGA (see below) adopts the first view and so does s.734(1)(c) ITA.<sup>122</sup> Ultimately it makes no difference for present purposes which solution one adopts, but the better view is that s.731 is a tax on the benefit.

#### 47.17.2 *Benefit matched after receipt*

The pre-ITA position was straightforward. In the absence of express provision, a benefit which is not taxable under s.740 ICTA only for lack of relevant income might arguably have been a non-capital payment. But this argument was ruled out by s.97(3) TCGA. I set out the text of s.97(3) indicating the ITA amendments in track-change format:

The fact that the whole or part of a benefit is by virtue of ~~section 740(2)(b) of the Taxes Act~~ section 733 of ITA 2007 treated as the recipient’s income for a year of assessment after that in which it is received—

- (a) shall not prevent the benefit or that part of it being treated for the purposes of sections 86A to 96 and Schedule 4C as a capital payment in relation to any year of assessment earlier than that in which it is treated as his income; but
- (b) shall preclude its being treated for those purposes as a capital payment in relation to that or any later year of assessment.

---

122 See 47.19 (Deduction for s.87 charge).

Post ITA this wording is not apt because under s.731 (on a first reading) a benefit is not “treated as the recipient’s income”. Section 731 is a charge on deemed income. But it is obviously intended that a benefit outside s.731 (for lack of relevant income) is a capital payment for CGT; and it is considered that s.731 should be regarded as a tax on the benefit.

Thus suppose a benefit is conferred, but is not subject to s.731 in year of receipt for lack of relevant income :

- (1) The benefit can be taxed as a capital payment in year of receipt.
- (2) If the benefit is not subject to s.87 in year of receipt, for lack of s.1(3) amounts (trust gains) the s.731 charge in the following year has priority over the s.87 charge in that year; and so on.

#### 47.17.3 *Benefit remittance-basis exempt*

A benefit which falls within s.731 but qualifies for the s.731 remittance basis is taxed on the remittance basis, but is nevertheless “chargeable” to tax, so it is a non-capital payment.<sup>123</sup> HMRC agree. Residence and Domicile: FAQ provides:

**Q** Could it be clarified that where a payment has been made - such as one under s731 which has attracted relevant income but has been protected from tax by non remittance - such a payment will not be regarded as a capital payment for s87 purposes?

**A** Where a payment (benefit) results in an amount becoming taxable by virtue of s731 ITA 2007, but the charge is deferred by a remittance basis claim because no relevant amount has at that time been remitted to the UK, the benefit will not also be taken into account for the purpose of s87 TCGA.<sup>124</sup>

By contrast, s.731 does not apply to a benefit which does not meet any one of the five s.731 application conditions and such a benefit is a capital payment.

#### 47.17.4 *Benefit: Motive defence applies*

Where the motive defence applies, the individual who receives a benefit

---

123 See 2.4.1 (Unremitted RFI “chargeable”).

124 <https://www.gov.uk/tax-foreign-income/non-domiciled-residents> The rubric to the FAQ provides: “Most of the FAQs have now been incorporated into the new guidance. Those that have not are reproduced below.”

is not *liable* to income tax under the ToA provisions. It might be argued that the benefit is chargeable (even if the individual is not liable). But it is considered that liable and chargeable here have the same meanings. So a benefit where the motive defence applies is a capital payment: it is not chargeable to IT within the meaning of the capital payment definition.<sup>125</sup>

## 47.18 Computation of s.731 income

### 47.18.1 Introduction

Section 733 ITA does two things: it tells us the amount of s.731 income and the year that the s.731 income arises.

Section 733 is only a computation provision. It does not apply unless the five s.731 application conditions are met. I refer to the computation made under s.733 as the “**s.733 computation**”.

In outline, where an individual receives a benefit, s.731 income is the lesser of:

- (1) the value of the benefit; and
- (2) the amount of relevant income in relation to that individual<sup>126</sup>

The rewrite legislation is defectively drafted (it reproduces defects from the source legislation and adds some new ones). It could serve as a case study as to how much obscurity can be found in method-statement drafting, an innovation of the Tax Law Rewrite in their search for clarity.<sup>127</sup> The task here is to find a construction which (if loose) will yield a workable scheme of taxation.

There are six steps in the computation:

<b>Step</b>	<b>Topic</b>
1	Total Benefits
2	Total Untaxed Benefits
3	Relevant income
4	Total Relevant Income
5	Available Relevant Income

---

125 This is consistent with the pre-2006 wording that “Sections 739 and 740 shall not apply” where the motive defence applied, so it was clear that a benefit where the motive defence applied could be a capital payment.

126 Contrast s.720, which in general imposes a charge on the whole of the income accruing to the person abroad.

127 See 57.15.7 (Method statements: Critique).

6 Conclusion: amount of relevant income

I write most of these terms with initial capitals, to reflect the technical nature of the expression.

#### 47.18.2 Step 1: Total Benefits

In order to follow Step 1, we need to read it together with s.732 and the opening words of s.733:

**732(1)** This section applies if—

- (a) a relevant transfer occurs,
- (b) an individual year receives a *benefit* in a tax year.
- (c) the *benefit* is provided out of assets which are available for the purpose as a result of—
  - (i) the transfer, or
  - (ii) one or more associated operations,
- (d) [taxable-transferor defence]
- (e) the individual is not liable to income tax on the amount or value of the *benefit* (apart from section 731).

Assuming the s.731 application conditions are satisfied, we read on to subsection (2):

- (2) Income is treated as arising to the individual [beneficiary] for income tax purposes for any tax year for which section 733 provides that income arises.

With that in mind, we can turn to the s.733 computation:

**733(1)** To find the amount (if any) of the income treated as arising under section 732(2) [s.731 income] for any tax year in respect of *benefits provided as mentioned in section 732(1)(c)* take the following steps.

##### *Step 1*

Identify the amount or value of *such benefits* received by the individual [1] in the tax year and

[2] in any earlier tax years *in which section 732 has applied*.

The sum of those amounts and values is “the total benefits”.

I adopt the following terminology:

**Total Benefits:** benefits within Step 1 (this is the statutory term)

**Present year Total Benefits:** benefits within Step 1[1]

**Earlier year Total Benefits:** benefits within Step 1[2]

There are two obscure references in Step 1:

- (1) Which benefits of current years are counted as Total Benefits? One does not identify *all* benefits received by the individual, but only “such benefits”. The drafter has overlooked the rule that “such” ought only to be used when it refers to a clear antecedent.
  - (a) The narrow view: “such benefits” refers back to the words in the first sentence of s.733(1): “benefits provided as mentioned in s.732(1)(c)”. So “such benefits” means all benefits which meet the benefit causation condition.
  - (b) The wider view: “such benefits” refers back to s.732(1) which uses the word benefit three times. “Such benefits” means benefits in respect of which all five s.731 application conditions are satisfied (not just the benefit causation condition).

On the narrow view an income-taxable benefit can count as “such benefits”; on the wider view an income-taxable benefit does not count (because of the s.731 capital condition)

The wider view is to be preferred as it yields more sensible results.<sup>128</sup>

- (2) Which benefits from earlier years are Total Benefits? One does not count *all such benefits* received by the individual, but only such benefits in tax years “in which s.732 has applied”. It is not of course enough that *section 732 applies*, for the section no doubt applies every year to some taxpayer or other. Section 732 must apply having regard to the circumstances of the transfer or the individual in the earlier year.

HMRC paraphrase Step 1 as:

Add together the benefits received in the tax year and in any earlier year in which benefits charge could or has applied.<sup>129</sup>

If this is right, the definition of “Total Benefits” can be expanded to mean the following:

[1] *Present year Total Benefits* must meet the following conditions (in

---

128 If one adopted the first view one could avoid the problems which arise by a generous application of s.743 ITA (no duplication of charges); but it is better to avoid that solution since the relief depends on HMRC discretion.

129 See 47.18.8 (s.733 computation example).

order to be “such benefits”):

- (a) a relevant transfer has occurred
  - (b) an individual (“B”) receives a benefit in the present tax year
  - (c) the benefit is provided out of assets which are available for the purpose as a result of—
    - (i) the transfer, or
    - (ii) one or more associated operations,
  - (d) B is not a relevantly/taxable domiciled transferor; and
  - (e) B is not liable to income tax on the benefit (apart from section 731).
- [2] *earlier year benefits* must meet the following conditions (in order to be “such benefits” and to meet the requirement that s.732 applies in the year):
- (a) The relevant transfer has occurred
  - (b) B received a benefit in the earlier year (“the earlier year benefit”).
  - (c) the earlier year benefit is provided out of assets which are available for the purpose as a result of -
    - (i) the same transfer as [1] (a) above, or
    - (ii) the same associated operations as [1] (c) above
  - (d) Pre 2017 benefits: B is not the transferor; post 2017 benefits: B is not a relevantly-taxable domiciled transferor
  - (e) B is not liable to income tax on the earlier year benefit (apart from section 731).

### 47.18.3 Step 2: Total Untaxed Benefits

“Total Untaxed Benefits” has a relatively commonsense definition. Step 2 provides:

- [1] Deduct from the total benefits the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations
- [2] except that, where any of that income is matched deemed income for the purposes of section 731(1A), that matched deemed income is to be deducted only so far as it is matched deemed income on which tax has been charged under section 731 for an earlier tax year.

The result is “the total untaxed benefits”.

We need a label to describe the deduction, as it is impossible to follow a discussion which refers more than once to “the total amount of income treated as arising to the individual under section 732(2) for earlier tax

years as a result of the relevant transfer or associated operations”. I refer to the deduction as “**prior year s.731 income**”.

A straightforward example is:

Year 1: B receives benefit	£100
Year 2: B receives benefit	<u>£100</u>
Total Benefits	<u>£200</u>

But assuming in year 1 B was treated as receiving £100 s.731 income, then the prior year s.731 income is deducted, so Total Untaxed Benefits is computed thus:

Total Benefits	£200
Prior year s.731 income	<u>-£100</u>
Total Untaxed Benefits	<u>£100</u>

Section 734 ITA provides for another deduction from Total Untaxed Benefit: since this only arises infrequently I deal with it separately below; see 47.19 (Deduction for s.87 charge).

#### 47.18.4 *Steps 3/4: Total Relevant Income*

Steps 3 and 4 concern relevant income and Total Relevant Income, and are discussed as a separate topic.

#### 47.18.5 *Step 5: Available Relevant Income*

Step 5 provides:

Deduct from total relevant income—

- (a) the amount deducted at Step 2 [ie prior year s.731 income], and
- (b) any other amount which may not be taken into account because of section 743(1) and (2) (no duplication of charges).

The result is “the available relevant income”.

The deduction in Step 5(b) is discussed in 48.4 (Double-counting relief).

What is the reason for the deduction in Step 5(a)? EN ITA explains a double taxation problem in the pre-ITA law:

Section 740 of ICTA [now s.731 ITA] leaves several questions unanswered.

It provides that

- [a] if the relevant income exceeds the benefit, the amount or value of the benefit is chargeable to income tax in the individual’s hands,

- [b] but does not make provision about the treatment of the excess of the relevant income over that amount.
- [c] Taken literally and in isolation, section 740(2)(a) suggests that whenever a benefit is received the amount or value of the benefit must be compared with *all* the relevant income that has arisen on or after 10 March 1981, regardless of whether the receipt of previous benefits has involved charges by reference to that income before.<sup>130</sup>

For instance, if the relevant income is only £100, and T receives benefits of £100 annually, T would appear to be taxed each year on £100, so the relevant income in effect comes into charge again and again. I refer to this as the “**RI multiple-counting problem**”. I confess I had not noticed the problem, but point [c] seems correct if one takes the words “literally and in isolation” (which is of course never the right approach).

The EN then give two independent reasons why no problem arose, that is, it identifies two pre-ITA solutions to the RI multiple-counting problem:

But

- [1] relevant income is defined as income that can directly or indirectly be used to provide a benefit in the tax year [ie in the year that the tax charge arises], and
- [2] section 744(1) and (2)(c)<sup>131</sup> of ICTA [now s.743 ITA] prevent the same relevant income being taken into account more than once.

It is therefore considered that the *surplus* relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits. Section 733 of this Act gives effect to this view by providing [only] for *surplus* relevant income to be carried forward.<sup>132</sup>

Note that it is assumed in solution [1] that in order to identify the amount of relevant income, one asks whether income can be used to provide a benefit at the time the tax charge arises, (“if it continues to be available”)

---

130 Section 740(2) ICTA provided so far as relevant:

“... the amount or value of any such benefit as is mentioned in subsection (1) above, ... shall— (a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year”.

131 The original erroneously reads: (2)(b).

132 Change 1113, p.472; emphasis added.

not at the time that the relevant income accrues.

*Example 1: one beneficiary*

Suppose a trust with Total Relevant Income of £200 and:

- (1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit is not paid out of relevant income.
- (2) Year 2: B receives another benefit (£200).

The computation in year 2 is:

*Step 1:* The Total Benefits of B are £300.

*Step 2:* The Total Untaxed Benefits of B are computed thus:

Total Benefits	£300
Prior year s.731 income	- £100
<i>Total Untaxed Benefits:</i>	<u>£200</u>

*Steps 3 and 4:* The Total Relevant Income is £200.

*Step 5:* The Available Relevant Income is computed thus:

Total Relevant Income	£200
prior year s.731 income	- £100
<i>Available Relevant Income:</i>	<u>£100</u>

*Step 6:* the amount of s.731 income in year 2 is the lower of Total Untaxed Benefits and Available Relevant Income = £100.

That is fair and reasonable and Tax Law Rewrite's solution to the RI multiple-counting problem has worked.

*Example 2: two beneficiaries*

Now suppose a trust with Total Relevant Income of £200 and:

- (1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731
- (2) Year 2: C (not B) receives a benefit (£200)

The computation for C in year 2 is:

*Step 1:* The Total Benefits of C are £200.

*Step 2:* The Total Untaxed Benefits of C are £200 (nothing is deducted).

*Step 5:* Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Here the Step 5(a) deduction does not prevent double taxation. The Tax Law Rewrite team have only partly solved the RI multiple-counting

problem which (on a literal reading and taken in isolation) they identified. They have solved the problem where the *same* beneficiary receives benefits in different years. They have not solved it where *different* beneficiaries receive benefits in different years. Why is C not taxed on £200?

C must fall back on one of the two pre-ITA solutions identified by the Tax Law Rewrite team:

- (1) that distributed income ceases to be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):
- (2) Step 5(b): double-counting relief.

Solution (2) applies if the distribution to B did not consist of relevant income. It depends on HMRC discretion, but that was the position before the ITA rewrite, so nothing has changed.

*Example 3: one beneficiary receives a distribution of relevant income*

The second difficulty is that the rewrite team solution – a deduction for prior year s.731 income – does not link in with the first of the pre-ITA solutions to the RI multiple-counting problem. Suppose a slight variant to example 1: a trust with Total Relevant Income of £200 and:

- (1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit *is* paid out of relevant income.<sup>133</sup>
- (2) Year 2: B receives another benefit (£200).

The computation in year 2 is:

*Step 1:* The Total Benefits of B are £300.

*Step 2:* The Total Untaxed Benefits of B is computed thus:

Total Benefits	£300
Prior year s.731 income	- <u>£100</u>
<i>Total Untaxed Benefits:</i>	<u>£200</u>

*Steps 3 and 4:* The Total Relevant Income is £100 (because £100 has already been distributed and is not available to provide a benefit.)

*Step 5:* The Available Relevant Income appears to be:

Total Relevant Income	£100
-----------------------	------

---

<sup>133</sup> For instance, trust income is accumulated and then paid to the beneficiary as capital.  
FD\_47\_Transfer\_of\_Assets\_Abroad\_Benefits.wpd 03/11/21

prior year s.731 income	- £100
<i>Available Relevant Income:</i>	<u>£0??</u>

B should have £100 s.731 income in year 2, not £0! I think that the best solution is to say that where relevant income is distributed, no further deduction is allowed at Step 5, so there is no double deduction. Though this is reading a good deal into the provision.

#### 47.18.6 *Computation under s.731 remittance basis*

Where the s.731 remittance basis<sup>134</sup> applies, s.731 income is still treated as accruing to the foreign domiciled individual under s.731, even though not remitted. So the s.731 remittance basis does not prevent a deduction under Step 2 (and Step 5(a)) if applicable.

Suppose the facts of example 1 or 3 above, but the benefit which B received in year 1 was an unremitted foreign benefit which qualified for the s.731 remittance basis. The computations are exactly the same. Thus benefits to B within the s.731 remittance basis reduce Available Relevant Income in relation to B (whether or not made out of relevant income) just as where the arising basis applies.

Suppose the facts are as in example 2 above, but the benefit which B received in year 1 was a foreign benefit which qualified for the s.731 remittance basis. There is as before no deduction under Step 2 or Step 5, but C must fall back on the two pre-ITA solutions to the RI multiple-counting problem:

- (1) that distributed income ceases be relevant income (because it ceases to be available); or (if relevant income is not distributed):
- (2) Step 5(b): double-counting relief.

Solution (2) depends on HMRC discretion, but it is considered that the relief ought to apply to relieve C. Of course, B may not agree. Suppose a variant of example 2:

#### *Example 4: two beneficiaries, one remittance basis user*

Suppose a trust with Total Relevant Income of £200 and:

- (1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731. B is a remittance basis taxpayer and does not remit the benefit so no tax is due.

---

<sup>134</sup> See 47.39 (s.731 remittance basis).

(2) Year 2: C receives a benefit (£200).

(3) Year 3: B receives the benefit in the UK.

The computation for C in year 2 is the same as example 2:

*Step 1:* The Total Benefits of C are £200.

*Step 2:* The Total Untaxed Benefits of C are £200 (nothing is deducted).

*Step 5:* Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Is C taxed on £200? C must fall back on one of the two pre-ITA solutions identified by the Tax Law Rewrite team:

- (1) that distributed income ceases to be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):
- (2) Step 5(b): double-counting relief.

If the distribution to B did not consist of relevant income solution (2) is the only one available. It depends on HMRC discretion but it is considered that it ought to be allowed. It follows that C will be taxed in year 3. C may argue that B ought to be taxed and B's may be subject to tax remittance should be tax free, but that seems less "just and reasonable". That is consistent with the s.87 rules where a s.1(3) amount (trust gain) may be matched with a capital payment to a remittance basis taxpayer.

#### 47.18.7 *Step 6: Computation of charge*

We have at last reached the final step of the s.733 computation. Step 6 is as follows:

Compare the total untaxed benefits and the available relevant income. The amount of the income treated as arising under section 732(2) [s.731 income] for any tax year is the total untaxed benefits unless the available relevant income is lower. If the available relevant income is lower, it is the amount of income treated as so arising.

That is, the s.731 income is the lesser of:

- (1) Total Untaxed Benefits; and
- (2) Available Relevant Income

## 47.18.8 s.733 computation example

ToA guidance provides:

**INTM601760 The benefits charge: Example<sup>135</sup>**

This example assumes all years are after April 2007 but before April 2013 and that all of the conditions necessary for a benefits charge to apply are met.

A transfer of assets is made in Year 1 as a result of which income arises to a person abroad. An individual who is resident in the UK and who did not make the transfer receives cash benefits, as set out below, out of assets which are available for the purpose as a result of the transfer and associated operations. The benefits are not otherwise liable to income tax and the individual is not liable to an income charge [the s.720 charge].

Year	Relevant income	Benefits received	s.731 income <sup>136</sup>
1	£10,000	£5,000	£5,000
2	£20,000	£10,000	£10,000
3	£10,000	£10,000	£10,000
4	£10,000	£5,000	£5,000
5	£50,000	£100,000	

**Step 1 – ‘the total benefits’**

Add together the benefits received in the tax year (Year 5) and in any earlier year in which benefits charge could or has applied. The earlier years to take into account are Years 1 – 4.

Year 5	Benefit	£100,000
Years 1 – 4	Benefits	<u>£30,000</u>
The total benefits		<u>£130,000</u>

**Step 2 – ‘the total untaxed benefits’**

Deduct from the total benefits, the amount of income treated as arising to the individual in any earlier tax years:

The total benefits		£130,000
Income for benefits charge	Years 1 - 4	<u>- £30,000</u>
The total untaxed benefits		<u>£100,000</u>

**Step 3 – ‘the relevant income of the tax year’**

The income of year 5 which can be used for providing a benefit for the individual is £50,000, which is ‘the relevant income of the tax year’.

**Step 4 – ‘total relevant income’**

Add together the relevant income of year 5 and the relevant income of years 1-4.

Relevant income of year 5		£50,000
---------------------------	--	---------

135 I have slightly tweaked the layout for clarity:

136 [From original text] To determine whether there is income treated as arising to the individual in Year 5 and if so what amount apply the Steps formula. Assume for this that the formula was also applied in Years 1 – 4 and resulted in income being treated as arising as set out here.

Relevant income of yr 1-4	<u>£50,000</u>
Total relevant income	<u>£100,000</u>

**Step 5 – ‘the available relevant income’**

Deduct from the total relevant income, the amount deducted at Step 2. In this example there are no other deductions to be taken into account.

Total relevant income	£100,000
Deducted at Step 2	<u>- £30,000</u>
The available relevant income	<u>£70,000</u>

**Step 6 – the amount of income treated as arising for the tax year**

Compare the result of Step 2 with the result of Step 5:

Total untaxed benefits	£100,000
Available relevant income	£70,000
The lower of the two is	£70,000

The amount treated as income arising to the individual in year 5 is therefore £70,000. This is neither the relevant income of that year nor the benefits received in that year.

It may be noted that there are still £30,000 of benefits unmatched in this example therefore if for example there was further relevant income in a subsequent year a further Steps calculation would be made for that year.

**47.18.9 Computation: Motive defence lost**

The second example concerns a case where the motive defence formerly applied but was lost following an associated operation with an avoidance purpose.<sup>137</sup>

ToA guidance provides:

**INTM601780 Example - where modifications apply<sup>138</sup>**

The income and benefits set out in the table below result from a transfer of assets in 2000-01. It is agreed that an exemption applies to the transfer such that there is no income or benefits charge.

Following the death of the transferor a transaction is undertaken in 2007-08 in relation to the assets of the fund, designed for the purpose of tax avoidance. It is agreed no exemption applies to prevent a potential benefits charge for 2007-08.

What is the benefits charge for that year?

Year	Relevant income	Benefits received
2000-01	£50,000	£10,000
2001-02	£50,000	£10,000
2002-03	£50,000	£10,000
2003-04	£50,000	£10,000
2004-05	£50,000	£10,000

137 See 49.43 (Pre-2005 transfer; post-2005 operation).

138 I have slightly tweaked the layout for clarity:

2005-06	£50,000	£10,000
2006-07	£50,000	£10,000
2007-08	£5,000	£10,000

First there is no charge under either the income or benefits charge for 2000-01 to 2006-07 as an exemption [motive defence] applies in relation to the original transfer

For 2007-08 there would be no benefits charge if an exemption applies.

As there are both pre-5 December 2005 and post-4 December 2005 transactions, the relevant exemption is in section 740 ITA 2007. (see INTM602840).

As the transaction after 4 December 2005 does not meet the conditions for exemption section 740(3) requires the modifications described at INTM601740 to apply for the purpose of the benefits charge.

To determine the amount of income (if any) to be treated as arising to the individual for 2007-08 the Steps approach has to be applied and with the specified modifications (INTM601720).

#### **Step 1 – ‘the total benefits’**

Add together the benefits received in the tax year (2007-08) and in any earlier year in which benefits charge could or has applied.

In this example there are two possible approaches to ‘earlier years’. Either that there are no earlier years to be taken into account under this Step as there was an exemption and thus the provisions did not apply (all earlier years were pre-ITA 2007). Or that the benefits of all earlier years have to be taken into account and that the modifications provided by section 740(6)-(7) ITA 2007 apply to this Step. The modification if applied in this way would seem to require 2000-01 – 2004-5 benefits to be left out and that for 2005-06 to be time apportioned. If applied in this way the benefit received in 2006-07 would also be taken into account so that "the total benefits" would then become £10,000 + £10,000 plus £3,333 ( $4/12 \times £10,000$ ). Such an approach would not seem to be consistent with an exemption applying for 2006-07, as it would in effect bring those benefits back into the calculation in 2007-08 and result in an equivalent amount of income being charged. HMRC take the view that the apportionment required by section 740(7) will only be relevant where there are transactions in 2005-06 post-4 December, with a pre-5 December transaction in that or an earlier year. In this example therefore there are no earlier years to take into account in this Step as there are no earlier years to which a benefits charge applied, or to which a benefits charge would have applied but for an insufficiency of relevant income to match against benefits.

2007-08	Benefit	£10,000
2000-01 to 2006-07	Exemption for all yrs	<u>£0</u>
The total benefits		<u>£10,000</u>

#### **Step 2 – ‘the total untaxed benefits’**

Deduct from the total benefits, the amount of income treated as arising to the individual in any earlier tax years:

The total benefits		£10,000
Income for benefits charge	2000-01 – 2006-07	<u>£0</u>

The total untaxed benefits	<u>£10,000</u>
----------------------------	----------------

**Step 3 – ‘the relevant income of the tax year’**

The income of 2007-08 which can be used for providing a benefit for the individual is £5,000, which is ‘the relevant income of the tax year’.

**Step 4 – ‘total relevant income’**

Add together the relevant income of 2007-08 and the relevant income of years 2000-01 – 2006-07. The modification provided by section 740(5) requires the earlier years’ income be taken into account even though there was an exemption.

Relevant income of 2007-08	£5,000
Relevant income of 2000-1 to 2006-07	<u>£350,000</u>
Total relevant income	<u>£355,000</u>

**Step 5 – ‘the available relevant income’**

Deduct from the total relevant income, the amount deducted at Step 2. In this example there are no other deductions to be taken into account.

Total relevant income	£355,000
Deducted at Step 2	<u>£0</u>
The available relevant income	<u>£355,000</u>

**Step 6 – the amount of income treated as arising for the tax year**

Compare the result of Step 2 with the result of Step 5:

Total untaxed benefits	£10,000
Available relevant income	£355,000
The lower of the two is	£10,000

The amount treated as income arising to the individual in 2007-08 is therefore £10,000.

If in this example the ‘tainting’ transaction had taken place after 4 December 2005 and before 5 April 2006, then even though the ITA 2007 Steps approach did not apply for that year (see INTM601800) the effect would have been the same and applying the ‘modifications’ would have resulted in a comparison of time apportioned benefits of 2005-06 with relevant income of that and all earlier years. If the facts above for 2007-08 had been those of 2005-06 the result would have been a benefits charge of £3,333 for 2005-06 regardless of when after 4 December 2005 (and before 5 April 2006) the tainting transaction took place.

47.18.10 *s.733 computation: Critique*

The reader who has laboriously followed the text to this point will agree that s.733 needs to be rethought and rewritten.

**47.19 Deduction for s.87 charge**

Section 734 ITA provides:

- (1) This section applies if—
- (a) benefits provided as mentioned in section 732(1)(c) are received in a tax year,

That is, the benefit is in principle taxable under s.731.

- (b) for that tax year the whole or part of any benefits so provided is a capital payment to which section 87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 applies (chargeable gains: gains attributed to beneficiaries),

That is, the benefit is in principle taxable under s.87.

- (c) it is such a payment because the total untaxed benefits<sup>139</sup> exceed the available relevant income (see Step 6 in section 733(1)) and so it is not treated as income arising to the individual under section 732(2), and

That is, the benefit was not subject to income tax for lack of relevant income.

- (d) because of that capital payment chargeable gains are treated as accruing to the individual in that or a subsequent tax year under any of the provisions referred to in para (b) [s.87, 89(2), para 8 sch 4C].

The CGT charge applies under the rules set out in 47.17 (s.731/s.87 interaction).

- (2) For any tax year after one in which such chargeable gains are so treated, the amount of income treated as arising to the individual under section 732(2) [s.731 income] in respect of benefits provided as mentioned in section 732(1)(c) as a result of the transfer or operations in question is calculated as follows.

- (3) The amount is calculated under section 733(1) as if the total untaxed benefits were reduced by the amount of those gains.

This ensures that a benefit charged under s.87 is not later also charged to IT.

## **47.20 “Relevant income”: Definition**

“Relevant income” is a central but perplexing concept. The absence of litigation on the subject is because HMRC have in practice generally applied the legislation in a way which leads to a sensible result.

Section 733(1) Step 3 provides the definition:

---

139 Section 734(4) provides:

“In this section ‘the total untaxed benefits’ and ‘the available relevant income’ have the same meaning as in section 733(1) (see Steps 2 and 5).”

*Step 3*

Identify the amount of any income which—

- (a) arises in the tax year to a person abroad, and
- (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.

That amount is “the relevant income of the tax year” in relation to the individual and the tax year.

The condition in Step 3(a), that income arises to a person abroad, is the same as in the transfer of asset conditions.<sup>140</sup>

Strictly one should not use the term “relevant income” in the abstract. Relevant income can exist only *in relation to an individual*. There may be relevant income in relation to A which is not relevant income in relation to B (eg income of a discretionary trust under which A can benefit and B cannot). There may be relevant income in relation to anyone in the world (eg income of a discretionary trust with a power to benefit anyone in the world). But where the context is clear, one may refer to “relevant income” in isolation (leaving the words “in relation to the individual” and the identity of that individual to be inferred).

The s.731 concept “relevant income” must not be confused with “relevant foreign income.”

47.20.1 *Pre-1981 income*

Para 133 sch 2 ITA provides:

- (1) Section 732 (non-transferors receiving a benefit as a result of relevant transactions) applies whenever the relevant transfer referred to in that section took place.
- (2) But the relevant income referred to in section 733(1) (by reference to which the amount of income treated as arising under section 732 [s.731 income] is determined) does not include income that arose before 10 March 1981.

**47.21 Deemed income of person abroad**

47.21.1 *Capital treated as income*

Although the statute refers to “income”, capital receipts of the person

---

140 See 45.7 (Income “payable” to person abroad).  
FD\_47\_Transfer\_of\_Assets\_Abroad\_Benefits.wpd

abroad are sometimes treated for tax purposes as income of the person abroad, and such receipts can therefore be relevant income.<sup>141</sup>

#### 47.21.2 *Stock dividend/accrued income*

Suppose non-resident trustees receive a stock dividend from a UK company. In that case “income is *treated* as arising to the trustees”: see s.410(3) ITTOIA. The amount is deemed “income” for ToA purposes, but it is considered that it is not relevant income. The amount is fictional so one cannot say that it “can” be used for the benefit of any beneficiaries. The shares issued in the stock dividend can be used for that purpose, but they are not the same income.<sup>142</sup> The distinction between a gain and an amount equal to the gain is one on which HMRC insist in a DTA context;<sup>143</sup> here the distinction between the actual stock dividend and the fictional income is similar but clearer.

The same point arises if a person abroad is treated as receiving AIP income. The amount is treated as income becoming payable to the person abroad for ToA purposes<sup>144</sup> but it is considered that it is not relevant income. The amount is fictional so one cannot say that it “can” be used for the benefit of any beneficiaries. The proceeds of the AIP securities can be used for that purpose, but that is not the same income.

HMRC may argue that one should carry through the deeming:<sup>145</sup> if the person abroad is treated as receiving income, the (deemed) income must be treated as if it can be used to benefit beneficiaries (even though it does not exist). If that were right, however, two difficulties would arise:

- (1) How would the rule that distributed income is not relevant income<sup>146</sup> operate in this context? In order to distribute the AIP income would it be necessary to distribute the entire proceeds of the transfer (sale) of the security? Perhaps the matter would be analogous to the DDS

---

141 See: 45.15 (Capital receipts deemed income); 62.10.2 (Non-resident co/institution); 64.10 (OIG arising to non-resident trust).

142 See to 45.15 (Capital receipts deemed income).

143 See 103.22 (Characterisation).

144 See 27.14 (ToA rules /AIP income).

145 For the general approach to deeming provisions, see App 7.1 (Construction of deeming provisions).

146 See 47.28 (Income distributed as it arises) to 47.32 (Distributed income: HMRC view).

scheme.<sup>147</sup> Then the only way to avoid relevant income by distribution would be to distribute the entire proceeds of the securities. Perhaps a division would be possible as it is under the mixed fund rules.<sup>148</sup>

- (2) How does one deal with AIP loss relief? This tends to support the view that AIP income is not relevant income.

#### 47.22 Life tenant: Relevant income

Consider an interest in possession trust: one where the trust income is payable to a beneficiary (“L”).

If L is UK domiciled and resident, the trust income is not relevant income because it does not meet the condition in Step 3(a). It does not arise to a person abroad.

If L is not UK domiciled then the condition in Step 3(a) is satisfied. Nevertheless, the trust income is not relevant income because it is distributed.<sup>149</sup>

There is nothing surprising in this conclusion: there is no need for s.731 in these circumstances, and one would not expect it to apply. If it did apply there could be double taxation – L being taxed on the income L receives, and on other benefits (if L receives any) to the value of the relevant income.

#### 47.23 Settlor-interested trust: Relevant income

One must consider UK resident and domiciled settlors separately from those who are non-resident or domiciled.

##### 47.23.1 UK resident and dom settlor

Suppose:

---

147 See 28.15.1 (s.731 ITA).

148 See 27.9.2 (Mixed funds: Sale with accrued interest).

149 See 47.28 (Income distributed as it arises). Even if that were wrong:

- (1) The trust income is not relevant income in relation to L. One would not say in ordinary language that the trust income *can* be used for providing a benefit for L. The income *is* the property of L.
- (2) The trust income is not relevant income in relation to any other person. Since the income belongs to L, one cannot say that the income “can” be used to benefit anyone else. See 47.25 (Income which “can” be used to benefit another).

- (1) a non-resident discretionary trust within s.731;
  - (2) a UK resident and domiciled settlor (“S”) has an interest in the trust.
- All the trust income is within the scope of s.624 ITTOIA. Section 624 ITTOIA provides in such a case:

Income which arises under a settlement is treated for income tax purposes as the income of the settlor *and of the settlor alone ...*  
(Emphasis added)

The trust income is not relevant income as it does not meet the condition in Step 3(a): the income is treated by s.624 as accruing to S, so it cannot be regarded as arising to a person abroad. This is so even if S (wrongly) fails to pay the tax due on the income.

#### 47.23.2 *UK resident non-dom settlor*

Now suppose:

- (1) a non-resident discretionary trust within s.731;
- (2) a UK resident but not UK domiciled settlor (“S”) has an interest in the trust; and
- (3) the trust income is actually subject to tax under s.624 ITTOIA (the s.624 remittance basis does not apply).<sup>150</sup>

In this case the condition in Step 3(a) is satisfied since even applying s.624 the income is treated as accruing to S. However, it is considered that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which “can be used for providing a benefit” for anybody else. So the income is not relevant income.

The position is different if and to the extent that the income is within the s.624 remittance basis. Section 624 does not apply to income which qualifies for the s.624 remittance basis.<sup>151</sup> Accordingly the trust income can, in principle, be relevant income for s.731. What happens then if the income is later remitted, so it becomes taxable on S under s.624? It is tentatively suggested that the income retrospectively ceases to be relevant income, so that tax paid under s.731 can be recovered by a beneficiary. In practice this could arise only in fairly unusual circumstances, eg where:

---

<sup>150</sup> This may be because there is UK source income, or foreign income is received in the UK, or S does not claim the remittance basis. See 44.8 (Section 624 remittance basis).

<sup>151</sup> See 44.8 (s.624 remittance basis).

- (1) Year 1
  - (a) a beneficiary (“B”) receives a benefit;
  - (b) foreign source income arises on which the settlor (“S”) is not subject to tax as the s.624 remittance basis applies. This is relevant income in relation to B, so B pays tax under s.731.
- (2) Year 2: that income is remitted to the UK, so S pays tax under s.624.

Where s.720 applies (as well as s.624) see 47.24 (s.720 income: Relevant income).

#### 47.23.3 *Non-resident settlor*

Suppose now:

- (1) a non-resident discretionary trust within s.731; and
- (2) a non-resident settlor (“S”) has an interest in the trust.

Section 624 does not apply to foreign source trust income.<sup>152</sup> Accordingly foreign source income may in principle be relevant income.

Section 624 does apply to UK source income. Here too it is submitted that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which “can be used for providing a benefit” for anybody else. So UK source income is not relevant income.

#### 47.23.4 *HMRC practice*

RI 201 provides:

... income will not in practice be charged on both the beneficiary under s 740 and the settlor under the settlements legislation, where an assessment could in strictness be made on each of them in a case involving income that is accumulated within a discretionary offshore trust in which the settlor retains an interest, and then paid to a beneficiary as capital.<sup>153</sup>

This does not grapple with the technicalities of the legislation, but one can collect a sensible intention to avoid double taxation.

---

<sup>152</sup> See 44.9 (Non-resident settlor).

<sup>153</sup> RI 201 continues: “However, in both cases this is subject to the proviso that the Revenue may sometimes raise alternative assessments, for example where a taxpayer has not provided full information.” But there can be no objection to that.

#### 47.24 s.720 income: Relevant income

The analysis is different if income falls within s.720 and not s.624 because the wording of the provision is different.

The application of s.720 does not prevent income from being relevant income, as the s.720 income is different income from the income of the person abroad.<sup>154</sup>

Double-counting relief prevents a double charge.<sup>155</sup> This is surprising, because it is not clear who qualifies for the relief: the transferor or a beneficiary who receives a benefit. But it is difficult to construe the legislation any other way.

#### 47.25 Income “can” be used to benefit

An essential feature of the definition of relevant income in relation to an individual is the condition in Step 3(b) that the income “can be used for providing a benefit” for the individual.

“Can”, like most common words, has a variety of meanings, but the meaning here must be:

Expressing a possible contingency; = May possibly.<sup>156</sup>

##### 47.25.1 *Income of individual*

Of course, any income “can” be used for the benefit of any individual in the world if it is received by a beneficial owner who so directs. That contingency must plainly be ignored or the definition does not work.<sup>157</sup>

---

154 See 46.24 (DT relief: s.720 income). For pre-2013 income, the analysis was different but the end result was the same: the income of the person abroad was deemed to accrue to the transferor, but it also accrued to the person abroad. See the 2012/13 edition of this work para 29.18.

155 See 48.7 (s.720/s.731 overlap).

156 *Oxford English Dictionary* (2nd ed., 1989). Another meaning of “can” is “to be able; to have the power, ability or capacity”. This meaning applies where one says that a *person* “can” do something. This meaning is not applicable here where the subject of “can” is the income. *Income* does not have any power, ability or capacity: only a *person* does. There is a fine discussion of *can* in Williams, *Tradition & Change in Legal English* (2005), at 2.8.

157 The issue is not so much the meaning of the word “can”: if income is paid to A it is obvious that it “can” (in the sense of “may possibly”) be paid to B if A so directs. The better way to put the issue is: which hypothetical contingencies should be taken

### 47.25.2 *Income of co held by individual*

Suppose an individual, T, transfers assets to a non-resident company all the shares of which T owns absolutely. Assume the transfer does not qualify for the motive defence. So long as T remains owner of the company, the income of the company is not relevant income in relation to any person (other than T<sup>158</sup>).

For the position if T later gives the company to a trust, see 47.35 (Income of co held by trust).

### 47.25.3 *Income payable on contingency*

Now consider this type of trust,<sup>159</sup> divided into two sub-funds:

- (1) A's sub-fund: income to be applied for the benefit of A or accumulated; capital to be paid to A at the age of 25; if A dies under 25, the share accrues to B's share.
- (2) B's sub-fund is held on similar terms: income to be applied for the benefit of B or accumulated; capital to B at 25 with accrual to A if B dies under 25.

Suppose income is accumulated on A's sub-fund. It is relevant income in relation to A. Is it relevant income in relation to B? It is payable to B

---

into account in order to ask the question whether or not income "can" be used for providing a benefit?

The question is similar to the issue which arises for the purposes of the IT settlement provisions, whether income "may" be used to benefit the settlor "in any circumstances whatsoever". These words do not include the possible circumstance that there may be "a mere voluntary application of income by a beneficiary to the settlor": see *Glyn v IRC* 30 TC 321 at 329. A similar question arose in reverse in *Inglewood v IRC* [1983] STC 133. The question was whether one could say that a beneficiary "will" become entitled to an interest in possession: held that one should ignore the contingency that the beneficiary may not become entitled by virtue of the beneficiary voluntarily assigning the interest to another person.

Another way to reach this conclusion is to say that the income "can" be used to benefit the individual, but not "as a result of the relevant transfer or associated operations" (the application of the income by the beneficial owner not counting as an associated operation).

158 Strictly the income of the company would be relevant income in relation to T, but T is not concerned with s.731 as T will qualify for the transferor's s.731 defence.

159 This was quite a common form before the abolition of relief for Accumulation and Maintenance trusts in 2006.

only on the contingency that A dies under 25. It is suggested that this income is not relevant income in relation to B. One would not, in normal language, say that the income “can” be used to benefit B just because A may die under 25. The contingency is too remote.

If A dies under 25:

- (1) income of A’s sub-fund arising after the death of A is (of course) relevant income in relation to B;
- (2) income of A’s sub-fund arising before the death of A subsequently becomes relevant income in relation to B if the “timing” issue discussed below is correctly answered.

If this is correct, the concept here is not the same as in s.624 ITTOIA, where the issue is whether income “may become payable” to the settlor *in any circumstances whatsoever*.<sup>160</sup> Applying (as one should) a purposive approach, this is the fair and just result and consistent with the general scheme of s.731. A settlor or transferor has the opportunity to exclude themselves completely in a straightforward manner, and is taxed if they fail to do so. A beneficiary (not the settlor/transferor) does not have the same opportunity. To tax B on income of A’s fund (on the facts of the above example) would not be just or fair.<sup>161</sup>

#### 47.25.4 *Income of discretionary trust*

Conversely, consider a common form discretionary trust. In principle, all trust income “can” (in the sense of “may possibly”) be used to benefit any beneficiary, if the trustees exercise their discretion, and that is a contingency which naturally should be taken into account. Trust income is relevant income in relation to all beneficiaries.

Suppose, however, the trustees (perhaps guided by a letter of wishes) regard the fund as divided into (say) two shares for separate families. If there is no practical possibility that more than one half of the income will

---

160 See Williams, *op. cit.* p.139; *may* (compared with *can*) “tends to convey a more hypothetical degree of possibility”. It is reasonable to assume that the drafter of the transfer of assets provisions did not copy the language of the IT settlement provisions because a different result was intended.

161 Some support can be found in the discussion of “can” (albeit in a different context) in *Mandla v Dowell Lee* [1983] 2 AC 548 at p.565. A similar unfairness does arise for CGT under s.87 TCGA. However, it is possible to avoid that by transfers to another settlement.

be used for one particular beneficiary, there is a reasonable argument that only one half of the income is relevant income in relation to that beneficiary.

Trustees of a common form discretionary trust have power to benefit anyone in the world. However, in practice the trustees will wish to identify a more limited class, and it is arguable that trust income is not relevant income in relation to other (theoretically) potential beneficiaries.

#### 47.26 When does one ask: Timing issue

One must ask whether income “can” be applied for the benefit of an individual. *At what moment in time does one ask this question?*

- (1) It often happens that, at the moment it arises, income can be used to provide a benefit for a person, (“B”), but at a later point in time it cannot be so used; for instance if income of a discretionary trust is:
  - (a) distributed to another individual (not B)
  - (b) transferred to another trust (under which B cannot benefit) or
  - (c) retained by the trustees, but on terms under which B cannot benefit or
  - (d) used to pay trust expenses
- (2) The converse also sometimes happens: at the moment it arises income cannot be used to provide a benefit for B, but at a later time it can be so used; for instance, if:
  - (a) B is born after the income arises
  - (b) One share of a trust fund later accrues to another share (eg on the death of a beneficiary)<sup>162</sup>
  - (c) (Arguably) if a company within s.731, wholly owned by A, which has accumulated income during A’s ownership, is later given to B or to a trust under which B can benefit<sup>163</sup>

So it is often important to ask at what moment in time one puts the question. I refer to this as the “**timing issue**”. There are in principle several possible answers:

- (1) The moment that the income arises
- (2) The moment that the benefit is provided, if later than (1)
- (3) After a “reasonable” period (whatever that might be)

---

162 See 47.25.3 (Trust income payable to B on remote contingency).

163 But see 47.35 (Income of co held by trust).

- (4) The end of the tax year in which either (1) or (2) or (3) occurs
- (5) The earlier or later of some combination of the above

An important consequence of all solutions except (1) is that trustees of a discretionary trust or company within s.731 would usually have some period of time after income has accrued, during which they may:

- (1) distribute income; or
- (2) apply the income in the payment of expenses.

Then the income will not be relevant income in relation to the beneficiaries because *at the moment when one asks the question* it is no longer income which “can” be applied for the benefit of the beneficiaries.

To answer the timing question we must return to the legislation. Section 733 ITA Steps (3) and (4) provide:

*Step 3*

Identify the amount of any income which—

- (a) arises in the tax year to a person abroad, and
- (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.

That amount is “the relevant income of the tax year” in relation to the individual and the tax year.

*Step 4*

Add together the relevant income of the tax year and the relevant income of earlier tax years in relation to the individual (identified as mentioned in Step 3).

The sum of those amounts is “total relevant income”.

The key phrase is “identified as mentioned in Step 3”. What is the rule which those words bring in? Step 4 can be read in various ways:

*Step 4*

Add together

[1] the relevant income of the tax year *being the amount of any income which—*

- (a) *arises in the tax year to a person abroad, and*
- (b) *as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.*

and

[2] the relevant income of earlier tax years in relation to the individual

*being the amount of any income which—*

- (a) *arises in the [earlier] tax year to a person abroad, and*  
 (b) *as a result of the relevant transfer or associated operations can*

[i] [at any time in that earlier year] or

[ii] [at the end of the earlier year] or

[iii] [at the time that the benefit is conferred, or the time that the income arises if later]<sup>164</sup>

*be used directly or indirectly for providing a benefit for the individual.*

(In this quote the words in normal font are the words of Step 4; the words in italics are the words of Step 3; the words underlined are added; note that some words must be imported by the words “identified as mentioned in step 3”.

It is considered that one looks to the position at the later of:

- (1) the end of the tax year in which the relevant income has accrued, or
- (2) the end of the tax year in which the benefit is received.

One asks whether *at that time* the income:

can ... be used for providing a benefit for the individual.

Another way to put it is that one asks the question with the benefit of hindsight, taking into account facts known at the time that the question matters.

The main reason for this view is that it is more sensible to ask the question at the time it matters.

The moment the income arises is not a suitable moment to ask the question. In some cases it is impossible to ascertain the moment at which income arises and all that the tax system attempts is to attribute income to an accounting period or year of assessment.<sup>165</sup> In other cases it is only possible to ascertain a moment at which income arises by rules of a somewhat arbitrary kind.<sup>166</sup> Similarly, the moment that the benefit arises is not a suitable moment. Some benefits (such as beneficial loans) arise over a period. Moreover it is not practical to compute relevant income on every separate occasion that a benefit is provided during the year.

The legislation does not provide an express answer, but it does offer a hint in support of this view. Step 3 does not refer to “relevant income” in

164 In clause [2][b] readings [i] [ii] [iii] are alternatives.

165 eg trading or property income.

166 eg the rules in ss.18–19 ITEPA (When general earnings are received).

isolation. It refers to relevant income *of the tax year in relation to ... the tax year*. It is obviously necessary to attribute relevant income to a tax year, eg to deal with the situation where:

- (1) an individual receives a benefit in year 1;
- (2) the benefit is not taxed because there is no relevant income in year 1;
- (3) relevant income arises in year 2.

There is only relevant income *of year 2* and so the s.731 charge arises in year 2 and not in year 1. However, the reference in Step 3 is to income of the tax year *in relation to the tax year*. These extra words suggest that the relevant income of tax year 2 in tax year 2 may be different from the relevant income of tax year 2 in tax year 3. In year 3 one must ask again what is the relevant income of year 2.<sup>167</sup>

The Tax Law Rewrite agree. EN ITA provides:

It is therefore considered that surplus relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits.<sup>168</sup>

#### **47.27 Relevant income spent**

HMRC practice is that using income to pay trust or company administration expenses will reduce relevant income.

ToA draft guidance provides:

##### **INTM601680 relevant income**

*Example 1* [income used to pay expenses]

A foreign company with investment business has interest income of £100,000 for a tax year. It pays costs for management of the company of £25,000 out of its income. Assuming all other conditions for a benefits charge are met, the relevant income of this company for that purpose would be considered to be £75,000, the amount that can be used for providing a benefit.

This applies even to income used for capital (rather than income) expenditure. Income used to meet a statutory indemnity ceases to be relevant income (even a CGT indemnity, ie a capital liability):

##### **CIOT Letter (extract)**

---

167 I have considered whether any guidance is to be found in the principle that income tax is an annual tax. However, that does not shed much light on the problem.

168 The EN passage is discussed in 47.18.5 (Step 5: Available Relevant Income).

It would also be helpful if the Revenue could confirm that if the trustees do in fact make a payment to the settlor in response to a request for reimbursement, either under [s.646 ITTOIA] or under para 6 of Schedule 5 to TCGA, such a payment would not be regarded as: ...

(b) Taken into account for [s.731 ITA] purposes...

**Revenue reply ...**

(b) *it will reduce the relevant income if paid out of income but will not be a payment [ie not a benefit].*<sup>169</sup>

Income used to pay a sum in lieu of interest ceases to be relevant income (even though the payment is of a capital nature). Tax Bulletin 8 provides:

ESC D41 allowed, inter alia, demand loans made to offshore trustees on better than commercial terms before 19 March 1991 to be put on commercial terms after that date. This enabled a trust to remain outside the condition in para 9(3), Schedule 5, TCGA 1992. In order to meet the terms of this concession, it may have been necessary to pay a sum in lieu of interest in respect of periods ended 5 April 1992. Where this was the case, such a payment would ... qualify as a deduction ... *for the purposes of [s.731 ITA] provided it was paid out of trust income.*

Where the amount in lieu of interest was paid to a person who is not a beneficiary under the terms of the trust, it would nevertheless be treated as a capital payment to that individual under TCGA 1992, Section 97. If the amount in lieu of interest was paid by a company underlying the trust, that payment would not qualify for a deduction from the profits of that company [because it is capital and not income].

Thus income used to pay interest ceases to be relevant income. Income used to repay borrowed capital also ceases in principle to be relevant income. However if there were an arrangement under which:

- (1) The person abroad borrowed a sum equal to relevant income
  - (2) The person abroad used the relevant income to repay the loan
- then the sum borrowed might be regarded as representing the relevant income: see 47.33 (Income reinvested: Tracing).

Note that the s.731 position is different from s.720: expenses of the person abroad are not in principle deductible for s.720 purposes.

---

169 *Taxation Practitioner*, April 1996 p.25

<https://www.kessler.co.uk/wp-content/uploads/2012/05/TaxationPractitioner-199604.pdf> emphasis added. For other issues relating to reimbursement see 94.15 (Failure to exercise rights). See too 96.4 (Statutory tax indemnity).

## 47.28 Income distributed as it arises

Suppose income (“the trust income”) accrues to trustees of a discretionary trust within s.731, and is distributed (as income) to a beneficiary, “B1”, in the same tax year.

### 47.28.1 Position of other beneficiaries

The trust income is not relevant income in relation to any other beneficiary, since the income was distributed to B1. One cannot say that the income “can” be applied for the benefit of anyone else – if my answer to the timing issue is correct. This is significant for the other beneficiaries who receive a benefit within s.731 (whether before or after the year in which the income arises and is distributed). They will not pay tax on the benefit by reference to the distributed income, because it is not relevant income. (They may pay tax on the benefit by reference to other relevant income if there is any.)

That must be correct, because otherwise there could be double taxation (B1 taxed on trust income and another beneficiary taxed under s.731).<sup>170</sup>

### 47.28.2 Position of recipient

It is suggested that the income is not relevant income in relation to B1: it is not income which *can* be used for B1’s benefit; it is income which *is* used for B1’s benefit.<sup>171</sup> This is significant for B1 if:

- (1) B1 is a remittance basis taxpayer, and
- (2) B1 received a benefit in the UK, and
- (3) the trust income is paid to B1 and not remitted to the UK.

B1 is taxed on the ITA remittance basis on the income B1 receives from the trust. B1 is not taxed on the benefit by reference to the distributed income, because it is not relevant income. (B1 may pay tax on the benefit by reference to other relevant income if there is any.)

## 47.29 Income distributed after it arises

Suppose income accrues to trustees of a discretionary trust, within s.731,

---

170 Arguably s.743 ITA would provide relief: see 48.4 (Double-counting relief). This seems a less satisfactory solution.

171 The same argument as 47.22 (Income of life tenant: Relevant income) but not so strong.

and is retained (without being accumulated) in that tax year, but is distributed (as income) to beneficiary B1 in a subsequent year. If:

- (1) a UK resident beneficiary (“B2”) had received benefits in a past year, and
- (2) had not paid tax under s.731 in the past year, for lack of relevant income,

B2 will pay tax under s.731 in the year in which the income arises.

Suppose, however, that there have been no earlier benefits so this is not in point. The position is then the same as above, if my answer to the timing issue is correct:

- (1) The income is not relevant income of B1.
- (2) The income is not relevant income of any other beneficiary.

It seems that this is the generally held view. STEP say:

In our experience, most advisers take the view that, where actual income [1] has been segregated<sup>172</sup> and

[2] in a future year is used to pay a disbursement or to make an income distribution to an individual,

it will cease to be relevant income in relation to other individuals because it is no longer available to provide a benefit to them. HMRC have been known to accept this view.

In practice, trustees often do not pay all relevant disbursements or make decisions regarding the use of income during the tax year in which the income arises, preferring to wait until the trusts accounts have been finalised. This may not be until some time after the tax year end and it seems inequitable to treat beneficiaries differently on the basis that the trustees have taken this view.<sup>173</sup>

In ToA draft guidance, HMRC express a different view. The relevant example is example 2, but in order to follow this one needs to read it with example 1:

### **INTM601680 relevant income**

#### *Example 1*

---

172 Author’s footnote: it is doubtful whether segregation of income is necessary; see 47.34 (Relevant income in mixed fund).

173 Response to HMRC Consultation “Reform of an anti-avoidance provision: Transfer of Assets Abroad” (2013)

[http://www.step.org/sites/default/files/response\\_letterhead\\_TransferOfAssetsAbroad.pdf](http://www.step.org/sites/default/files/response_letterhead_TransferOfAssetsAbroad.pdf)

A foreign company with investment business has interest income of £100,000 for a tax year. It pays costs for management of the company of £25,000 out of its income. Assuming all other conditions for a benefits charge are met, the relevant income of this company for that purpose would be considered to be £75,000, the amount that can be used for providing a benefit...

*Example 2* [distribution out of income]

If in the above example the company also paid a distribution out of its income by way of dividend of say £50,000, the amount of income that can be used for providing a benefit, and so would fall to be treated as relevant income, would be £25,000.<sup>174</sup>

*Example 2/3* [distribution 2 years after income arises]

The same company decides at the end of the tax year to add its 'net profit' of £75,000 to its reserves.<sup>175</sup>

Two years later it makes a payment of £50,000 and contends this reduces relevant income.

The HMRC analysis is as follows:

As relevant income has to be considered on a tax year by tax year basis HMRC would take the view that relevant income of the tax year remained £75,000 as in Example 1 above.

## 47.30 Accumulated income

### 47.30.1 *Accumulate on wide discretionary trusts*

If a common form discretionary trust accumulates income, it remains relevant income in relation to all beneficiaries as long as it is retained by the trustees, because the trust capital (which represents the accumulated income) can be used to benefit any beneficiaries.

### 47.30.2 *Accumulate on narrower trusts*

The position would be different if under the terms of the trust:

---

174 This example is in the version of the draft guidance at <http://taxnews.lexisnexis.co.uk/TaxNewsLive/Members/BreakingNewsFullText.aspx?id=4663&css=1&xml=0> but not in the version on the HMRC website. But it is consistent with the rest of the guidance.

175 I wonder if the author is acting under a misconception here. A company does not "decide" to add its profit to its reserves: that happens automatically unless the profit is distributed.

- (1) B was in the class of beneficiaries to whom income could be paid; but
- (2) B could not benefit in any way from income after it had been accumulated.

Accumulated income would cease to be relevant income in relation to B.

This may happen automatically under the terms of the trust; for instance, a formerly common form of accumulation and maintenance trust provided:

- (1) Income as it arises may be used for the benefit of any beneficiary under 25 (“B12”, “B2” or “B3”).
- (2) If not so used, it is accumulated and added to the share of one particular beneficiary (B1) and can only be used for the benefit of B1 (not B2 or B3).

On receipt the income is relevant income in relation to B1, B2 and B3. After accumulation it is relevant income only in relation to B1.

A similar point arises in relation to a common form discretionary trust. Accumulated income is relevant income in relation to all the beneficiaries. Suppose the trustees exercise their overriding power to exclude B from the accumulated income, not from other trust capital. The income ceases to be relevant income in relation to B. It makes no difference whether this is done in the year of receipt or later.

Similar points may arise if the income is transferred to a new trust, or if the income of a company within s.731 is capitalised by the issue of bonus shares.

### 47.30.3 *Accumulate, distribute as income*

It has been suggested that once income is accumulated, it is forever relevant income in relation to all the beneficiaries to whom it could have been paid. Subsequent distribution is irrelevant (unless it gives rise to a s.731 charge). This view gives rise to anomalies:

- (1) Some receipts which are capital for trust law purposes are treated as income for s.731,<sup>176</sup> and these cannot be “accumulated” in the normal trust sense. It would be odd if they were treated differently from ordinary income for s.731 purposes.
- (2) Income of a company within s.731 cannot be “accumulated” in the trust sense. It would be odd if companies were treated differently from trusts.

---

176 See 45.15 (Capital receipts deemed income).

It is considered that the act of accumulation does not by itself make any difference to the s.731 position. If income of a common form discretionary trust is accumulated, and later distributed as income to B1, it ceases to be relevant income in relation to other beneficiaries. This only applies if the sum distributed is (or represents) the accumulated relevant income. This raises tracing issues discussed below.

47.30.4 *Accumulate, distribute as capital*

Suppose income of a common form discretionary trust is accumulated and distributed as capital to a beneficiary, B. It is considered that the income ceases to be relevant income in relation to any beneficiary except B. (It is relevant income in relation to B so that B is in principle subject to tax under s.731 if B is resident in the UK. Any other conclusion would be absurd.)

A capital distribution out of accumulated relevant income to a UK resident individual is taxable under s.731. It is not a capital payment and so does not reduce s.1(3) amounts (trust gains). However the same payment to a charity or a non-resident individual will reduce s.1(3) amounts and relevant income.

**47.31 Company income distributed to trust**

Suppose a company within s.731 is held by a common form discretionary trust within s.731:

- (1) the company receives income (“**corporate income**”);
- (2) the corporate income is distributed by way of dividend and retained by the trustees.

Thus:

The corporate income ceases to be relevant income but the dividend income is relevant income; so it is not counted twice. One cannot say that the corporate income and the dividend income are *both* available to

provide a benefit.<sup>177</sup>

Suppose:

- (1) A company within s.731 is held by a common form discretionary trust.
- (2) The company's income is distributed by way of liquidation and retained by the trustees.

Double-counting relief does not apply. It is suggested that the trustees receipt may be said to represent the relevant income, so the liquidation does not affect the s.731 position. (Any other view would allow tax avoidance and not be attractive to a court.)

#### **47.32 Distributed income: HMRC view**

RI 201 provides:

For the purposes of Section 740(3) ICTA [now s.733 ITA] the measure of "relevant income" is treated as not including such part of the income as has already been genuinely paid away to a beneficiary or to a bona fide charity.

Once relevant income has arisen *and continues to be available to provide a benefit*, it must in the Revenue's view be carried forward year by year until extinguished by such a benefit, even if it is capitalised in the accounts of the overseas person.

(Emphasis added)

This does not address all the permutations, but it seems to be consistent with the above.

ToA draft guidance provides:

##### **INTM601680 relevant income**

... The different language of the benefits charge highlights the fact that what is taken into account as relevant income for the benefits charge may be somewhat different to the measure of income that may fall to be taken into account for the income charge. As it is only income that can be used which is taken into account it will be appropriate to look in most cases at any factors that may prevent income being so used. For example, any part of the income that has been genuinely paid away may

---

177 Even if that were wrong, it is suggested that double-counting relief means that the corporate income and the dividend income do not both count as relevant income; see 48.4 (Double-counting relief).

not be capable of being termed as income that can be used for providing a benefit.

It should however be kept in mind that relevant income has to be considered on a tax year by tax year basis so that once an amount has been determined as being relevant income of a tax year it will fall to be taken into account as relevant income in any subsequent years benefits charge calculation. It cannot be amended by, for example, a subsequent disbursement, neither will it cease to be relevant income if, for example, it ceases to be regarded as income within the structure perhaps because it has been capitalised.

In considering whether any part of the income has been genuinely paid away in a manner such as it could not be regarded as income that can be used for providing a benefit, there are three broad categories of disbursements that will generally be taken into account:-

- income genuinely paid away in meeting legitimate expenses;
- income distributions paid out of income;
- taxes paid by the person abroad out of income.

It is likely to be largely a question of fact whether income can be used for providing a benefit, and regard should be had, where necessary, to relevant constituting documentation of the person abroad as well as any applicable foreign law that may have a bearing on the way the person abroad acts and operates.

The following examples may help to illustrate how relevant income will generally be determined...

*Example 3*

A foreign trust has no income of its own, but owns a foreign company which has rental income of £100,000.

The trustees make a payment out of trust capital to a beneficiary of £30,000.<sup>178</sup>

The HMRC analysis is as follows:

In considering what is relevant income for the purposes of the benefits charge the income of both the company and the trustees is taken into account. The relevant income will thus be £100,000 as it is income that can indirectly be used for providing a benefit. The payment out of the trust does not impact that.

---

178 The example does not explain how the trustees (who we are told had no income) obtained the £30k to pay to the beneficiary. Presumably we are to assume they held the shares and this additional sum of cash.

That seems almost self-evident.

### **47.33 Income reinvested: Tracing**

The requirement is that “income” can be used to provide a benefit. “Income” here includes any asset representing income, even if that asset does not constitute “income” (in any sense) of the person abroad.<sup>179</sup> Thus it makes no difference if the relevant income is invested in another asset.

Suppose:

- (1) A non-resident company held by a trust has received relevant income (the “**corporate relevant income**”).
- (2) The trustees sell the company to a purchaser.

It has been suggested that the corporate relevant income ceases to be relevant income in relation to the beneficiaries, because (after the sale) that income can no longer be used to benefit them. That would be absurd, but there is no difficulty in construing the legislation to avoid that absurdity. The proceeds of sale represent the corporate income, so the sale has not affected the relevant income position at all: as long as those proceeds can still be used for the benefit of the beneficiaries there is still relevant income in relation to the beneficiaries.

### **47.34 Relevant income in mixed fund**

The principle that distributed income ceases to be relevant income applies only if the asset distributed constitutes or includes the relevant income. Whether or not this is the case raises questions of tracing.

The ideal approach is for a trust or company within s.731 to keep relevant income in a separate account. Then funds distributed from that account must be identified as the relevant income.

This section considers what happens if relevant income is mixed with other funds, and there is a distribution from the mixed fund. This is uncharted territory, but it is suggested that the law should follow the case law and practice on pre-2008 remittance basis mixed fund rules.

#### *47.34.1 Distribution from trust within s.731*

---

179 Similar principles apply for the ITA remittance basis; see 16.5 (Income/capital in remittance basis) example 4. A similar principle applies in ascertaining what is income for the definition of power to enjoy; see 46.11.6 (Condition D: Possible benefit).

Suppose:

- (1) Trustees of a discretionary trust within s.731 receive relevant income and pay it to a mixed fund (ie holding income and trust capital together).
- (2) They pay a sum out of that fund in exercise of a power over trust income.

It is considered that the sum distributed would be (or represent) the relevant income. Income comes out first.

Suppose:

- (1) The trustees receive relevant income, accumulate it and pay it into a mixed fund (ie holding accumulated income and trust capital together).
- (2) They pay a sum out of that fund in exercise of a power to apply accumulated income as income.

It is suggested that the sum distributed would be (or represent) the relevant income.

Suppose:

- (1) The trustees receive relevant income, accumulate it and pay it into a mixed fund (ie holding accumulated income and trust capital together).
- (2) They pay a sum out of that fund in exercise of a power to distribute capital.

It is suggested that the trustees could by appropriate documentation identify the sum distributed as the relevant income.<sup>180</sup> Otherwise there must be an apportionment. Segregating income would avoid the tracing issue.

#### 47.34.2 *Distribution from co within s.731*

Suppose:

- (1) A company within s.731 receives relevant income and pays it into a mixed fund (ie holding relevant income and other company funds together).
- (2) The company declares a dividend.

---

<sup>180</sup> See 19.16.1 (Fund: taxed/untaxed income).

In the absence of documentation, it is suggested, on analogy with a trust, that income comes first out of the mixed fund. If the company has only received income (ie has not realised capital gains), the dividend clearly represents the relevant income rather than share capital.

Suppose:

- (1) A company within s.731 receives relevant income and pays it into a mixed fund (ie holding relevant income and other company funds together).
- (2) The company repays a loan or buys in redeemable shares out of that fund.

In principle the repayment of a loan or a share buy back comes out of capital. It is tentatively suggested that the company could by appropriate documentation earmark the sum repaid as the relevant income. In that case relevant income could be distributed by repayment of a loan and so cease to be relevant income.

#### 47.34.3 *Distribution of company shares*

Suppose a non-resident company held by a trust has received relevant income (the “**corporate income**”). If the trust transfers the company to an individual, the corporate income ceases to be relevant to beneficiaries (except the individual). If the trust transfers the company to a new trust, the corporate income is relevant income in relation to the beneficiaries of the new trust but not in relation to beneficiaries of the old trust who cannot benefit under the new trust. This is a sensible rule as it allows different branches of a family to separate their interests fairly.

### 47.35 **Income of co held by trust**

#### 47.35.1 *Income after trust holds co*

Suppose a trust with a common form power of appointment holds an underlying company to which s.731 applies.<sup>181</sup> Income of the company is in principle relevant income in relation to all beneficiaries. It remains so as long as the company retains the income.

#### 47.35.2 *Income before trust holds co*

---

181 For the possible application of the motive defence on a transfer to the company, see 49.29 (Transfer: Trust to underlying co).

Suppose:

- (1) An individual (“T”) owns all the shares of a company within s.731.
- (2) T gives the shares to a trust with a common form power of appointment.

Income of the company arising after T’s gift is in principle relevant income in relation to the beneficiaries of the trust.

What is the status of income arising before the gift (“old income”)? HMRC say that old income is also relevant income in relation to all the beneficiaries. HMRC’s argument is simple: at the relevant time (when benefits are received) the old income “can” be used for the benefit of beneficiaries. The tax consequences of this are so severe that one feels it cannot be right, but what is the flaw in the argument?

At the time when the old income accrued to the company, that income “can” only be used to benefit T, the sole shareholder, so it is not relevant income in relation to anyone else. After the company has been given to the trust the same income “can” be used to benefit others. That is sufficient to meet the “can” condition, if my answer on the timing issue is correct.

However, it is not enough that income “can” be used to benefit a person. The definition of “relevant income” requires that the income can be used to benefit an individual:

as a result of

- (i) the relevant transfer or
- (ii) associated operations.<sup>182</sup>

I refer to this as “**relevant income causation conditions (i) and (ii)**”.

Now, in this case there are two transfers:

- (1) The transfer of assets to the company (“transfer 1”).
- (2) The transfer of the shares in the company to the trust (an associated operation) (“transfer 2”).

It is suggested that where the two transfers are not part of a single arrangement, but independent, transfer 2 is not an associated operation in relation to transfer 1. So relevant income causation condition (ii) is not satisfied. Relevant income causation condition (i) is not satisfied since

---

182 The reference here is to the reference to associated operations in s.732(1)(c).

transfer 1 is not the cause of the fact that the income can be used to benefit the beneficiaries. The reasoning is the same as 45.13.1 (A transfers to B + B to C: clean-break test).

### **47.36 Non-beneficiary when income arises**

#### *47.36.1 Unborn beneficiary*

Suppose:

- (1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income.
- (2) In Year 2 a beneficiary is born.

Is the income accumulated in year 1 before the birth relevant income in relation to that beneficiary? The answer depends on the timing issue. If my view is right, undistributed income accumulated before birth can be relevant income in relation to the newborn beneficiary, and that view does make more sense, having regard to the general scheme of the legislation.

#### *47.36.2 Non-beneficiary when income arises*

Suppose:

- (1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income. The class of beneficiaries consists of the issue of the settlor and their spouses.
- (2) In Year 2 an individual (“W”) marries a beneficiary and so joins the class of beneficiaries.<sup>183</sup>

Is the income accumulated in year 1 before the marriage relevant income in relation to W? The answer depends again on the timing issue. If my view is right, undistributed income accumulated before the marriage can be relevant income in relation to W. Those who take the view that pre-birth income is not relevant income might consistently take the view that this pre-marriage income is not relevant income. This is not quite a *reductio ad absurdum*, but it is a bold view. If necessary, a court would hold that W “can” benefit in year 1 because of the possibility that W might marry a beneficiary in year 2. See *IRC v Tennant* 24 TC 215. But this contingency may be very remote, so my preferred analysis is less artificial.

---

183 It is assumed there is no power to add beneficiaries so the income could not be applied for the benefit of the individual before the marriage.

### 47.36.3 *Deceased beneficiary*

Now suppose the opposite situation:

- (1) Year 1: a beneficiary receives a benefit from a trust (which is not taxable for lack of relevant income).
- (2) Year 2: the beneficiary dies.
- (3) Year 3: relevant income accrues.

Here it is plain that there is no tax charge on the beneficiary. Income cannot be deemed to have accrued to them once they are dead.

The same applies in relation to income which accrues in the tax year of death, but after the death. Income accruing after the death of a person cannot be applied for their benefit.

### 47.36.4 *Person excluded from benefit*

Income arising after a former beneficiary is excluded from benefit cannot (on any view) be relevant income in relation to that (former) beneficiary. It is not necessary that the beneficiary should be excluded from benefit altogether: just that they are excluded from benefit from the income.

## 47.37 **Avoid relevant income: Planning**

One possible approach is:

- (1) distribute all income (from a discretionary trust or underlying company within s.731) to a foreign domiciled settlor immediately it arises;
- (2) the settlor may re-settle the income on the same trusts.

This avoids relevant income in the trust or company.<sup>184</sup> It would be better to have an interest in possession trust so income at the trust level will be distributed automatically. Watch the GAAR, and avoid provocative circularity.

A variant of this idea is to distribute income to a beneficiary who is not the settlor/transferor, but who is non-resident (or domiciled) and so outside s.731. Watch the GAAR here, and the onward-gift rules.

## 47.38 **Tax of person abroad**

---

<sup>184</sup> Also this ensures that the settlor receives the benefit of distribution relief (if applicable); see 48.3 (Distribution relief).

This topic is not difficult to understand – at least it does not seem difficult once one has understood it. But it is impossible to summarise briefly.

In order to understand the law one must carefully distinguish three concepts:

- (1) The actual income of the person abroad
- (2) Relevant income for s.731
- (3) The income which is deemed under s.731 to accrue to the UK resident individual who receives a benefit (“s.731 income”)

These must not be confused!

The *actual income* of the person abroad is taxed (if at all) under general principles.

*Relevant income* is not taxed as such: it is merely something computed as a part of the process of ascertaining the amount of s.731 income.

*Section 731 deemed income* (for short, s.731 income) is taxed at the beneficiaries marginal rate.

This section considers the complications which arise if the actual income of the person abroad is subject to UK tax or foreign tax. How does this affect the s.731 income? What (if anything) is there to prevent double taxation: (1) tax on the person abroad and (2) tax on the beneficiary.

It is necessary to consider separately the position where the person abroad is:

- (1) A discretionary trust.
- (2) Any trust, on the purchase of own shares.
- (3) A company owned by an individual.
- (4) A company owned by a non-resident trust.

#### 47.38.1 *Tax of trust within s.731*

A non-resident discretionary trust will normally pay tax on its actual UK source income at the rate applicable to trusts. The amount of tax paid reduces the relevant income so that if the gross income is £100 and tax is 45%, the relevant income is reduced to £45. However, s.731 makes no further allowance for a beneficiary. So if a beneficiary receives a benefit of £55, taxable under s.731, they pay tax at their marginal rate on the £55. The effective rate of tax on the actual income of the person abroad can therefore reach 69.75%. Section 743 ITA probably does not help. It would be much better if the beneficiary received an income receipt from

the trust.<sup>185</sup> Then s.731 would not apply<sup>186</sup> and instead the beneficiary will effectively obtain some credit for the UK tax paid by the offshore trust under the regime of Chapter 7 Part 9 ITA.<sup>187</sup>

The same point applies where the income accruing to the offshore trustees is subject to foreign tax which can qualify for double taxation relief in the UK under ESC B18. It is best to arrange that the income is received by a UK resident beneficiary in the form of income, avoiding s.731 income where the possibility of any double taxation relief is lost.

An IIP trust is better still for dividend income.

#### 47.38.2 *Purchase of own shares*

The receipt on a purchase of own shares by a UK company is income.

Any trust, discretionary or IIP, is subject to additional rate tax on a purchase of own shares. This raises the same tax problems as income of a discretionary trust under ss.481, 482 ITA. One solution is to alter the terms of the trust before the purchase, so the proceeds of sale belong to the life tenant. Another solution may be to make the trust UK resident for income tax purposes.

#### 47.38.3 *Tax of company within s.731*

A non-resident company will normally pay tax on its actual UK source income at the basic rate. The amount of tax paid reduces the relevant income so that if the gross UK source income is £100 and tax is 20%, the relevant income is reduced to £80. Once again, s.731 makes no further allowance. So if an individual receives a benefit of £80, on which they are taxed under s.731, they pay tax at the appropriate rate on the £80. The effective rate of tax on the actual income of the person abroad is therefore nearly 52% for a higher rate taxpayer and 60% for an additional rate taxpayer.

A similar point arises in relation to dividend income, which is not taxable in the hands of the company.

It would be slightly more efficient if the beneficiary received a dividend from the company. Then s.731 would not apply. The individual may still

---

185 As to how to achieve this, see 38.8 (Trust payment: Income/capital).

186 See 47.16 (s.731 capital condition).

187 Unfortunately the credit is less than full credit in the case of dividend income. The regime is too complex to set out here.

not receive any credit for the tax paid by the offshore company but their dividend income would at least be taxed at the slightly lower dividend rates.

#### 47.38.4 *Planning by UK resident co*

Further tax planning is to make the company UK resident (or to acquire a UK resident company). Then the actual income of the company is paid out by way of dividend (assuming this is possible as a matter of company law) and taxed at the dividend upper rate with the benefit of the UK tax credit. Watch s.1071 CTA 2010. The benefit of this kind of planning varies with the applicable rates of tax which depend on the circumstances of the beneficiaries and whether it is s.731 or s.87 which would apply on a capital payment.

#### 47.38.5 *s.731 foreign tax credit: Critique*

In the 6th edition of this book I said:

These are harsh rules, but the unfairness of s.731 is generally avoidable in practice and any other rule would certainly be extremely complicated to draft and to administer.

The complexity arises in matching s.731 income with the taxable income of the person abroad. But now the FA 2008 has introduced matching rules. (Complexity was not a serious concern to the architects of the 2008 reforms.) What is sauce for the goose is sauce for the gander. If the matching rules must be retained, fairness requires that there should also be a system of credit for tax on the relevant income.

The better solution would be the rough and ready but simpler rules which took effect from 1981 to 2008, but at present we have the worst of both worlds: complexity and unfairness.

### **47.39 Section 731 remittance basis**

Section 735 ITA provides what I call the “**s.731 remittance basis**”.

Section 735(1) ITA provides:

This section applies in relation to income treated under section 732 as arising to an individual in a tax year (“the deemed income”) if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers.

In order to understand the law, one must carefully distinguish:

- (1) Relevant income (in short, income arising to the person abroad).
- (2) Income treated under section 732 as arising to an individual. Statute calls this “deemed income” but I use the term “**s.731 income**” which seems clearer.

The legislation distinguishes between two types of relevant income and two types of s.731 income.

- (1) Relevant income may be:
  - (a) foreign relevant income or
  - (b) not foreign (which I call “**UK relevant income**”)
- (2) s.731 income may similarly be:
  - (a) foreign: the statutory term is “foreign deemed income” but I use the term “**foreign s.731 income**”
  - (b) not foreign

The key term is “foreign s.731 income”. Section 735(2) ITA provides:

For the purposes of this section the deemed [s.731] income is “foreign” if (and to the extent that) the relevant income to which it relates would be relevant foreign income if it were the individual’s.<sup>188</sup>

The word “relates” brings in matching rules; see 47.40 (s.731 matching rules).

#### 47.39.1 *s.731 remittances: Operation*

Assuming we have identified foreign s.731 income, we can turn to s.735(3) ITA which provides the relief:

Treat the foreign deemed [s.731] income as relevant foreign income of the individual.

This incorporates the ITA remittance basis. It would not work by itself as s.731 income (being fictional) does not exist and cannot be remitted. So s.735(4) ITA provides:

For the purposes of chapter A1 of Part 14 (remittance basis) treat relevant income, or a benefit, that relates to any part of the foreign

---

188 For the reason for the wording (“would be RFI if it were the individual’s”), see 15.10.2 (Relevant foreign income).

deemed income as deriving from that part of the foreign deemed income.

This means (in short):

- (1) Treat relevant income that relates to foreign s.731 income as deriving from that s.731 income; and
- (2) Treat benefits that relate to foreign s.731 income as deriving from that s.731 income.<sup>189</sup>

I refer to this as the “**derivation fiction**”.

Thus we have three fictions:

- (1) We pretend the individual receives s.731 income: this is the basic s.731 fiction.
- (2) We pretend the s.731 income is RFI: s.735(3).
- (3) We pretend certain benefits, and certain relevant income,<sup>190</sup> derive from that s.731 income (the derivation fiction).

#### 47.39.2 *Where benefit received not the test*

One might think that the s.731 remittance basis imposes a tax charge if a s.731 benefit is received in the UK; that is, remittance depends on the place of receipt of the benefit. But that is not the way that the remittance basis works. There is a taxable remittance if (in short):

- (1) *Property*<sup>191</sup> is brought/received/used in the UK (remittance condition A); and
- (2) That property is derived (indirectly) from foreign income (remittance condition B).

The derivation fiction in s.735(4) does not affect remittance condition A. It relates to condition B. It is necessary to identify:

- (1) The s.731 benefit (which may or may not be “property”)

---

189 That is, in s.735(4), the phrase “that relates to any part of the foreign deemed income” qualifies “relevant income” as well as “benefit”; and the word “or” means “and”.

190 Contrast the solution adopted for the s.87 remittance basis, where the capital payment (corresponding to the remittable benefit) is deemed to derive from the s.87 gains, but the trust gains (corresponding to relevant income) is not. So there is no charge on the remittance of trust gains, only on remittance of property derived from the capital payment.

191 Or services, but for clarity I refer only to property. I also assume that the property is brought/received/used by a relevant person.

## (2) Property derived from the s.731 benefit

If property received in the UK is:

- (1) the s.731 benefit or
- (2) derived from the s.731 benefit

then the property is deemed to be derived (indirectly) from the s.731 income, so remittance condition B can be satisfied. That is just a matter of following through the logic of the deeming.<sup>192</sup>

On this analysis, it is not necessary to identify the place of receipt of a benefit.<sup>193</sup>

See too 17.36 (Remittance before income/gains arise).

47.39.3 *Beneficial loan*

Suppose the s.731 benefit is an interest-free loan or a loan on beneficial terms. It is considered that there is a taxable remittance of the s.731 income if the money lent is received in the UK, on the grounds that:

- (1) the money lent (although not the benefit itself) is derived from the benefit;<sup>194</sup> or
- (2) the benefit is used in respect of a relevant debt.

What would happen if the money was expended, but the loan remained outstanding in subsequent years? The s.731 benefit remains taxable, if property received from it was received in the UK in the earlier year.<sup>195</sup>

47.39.4 *Use of property*

Suppose the s.731 benefit is rent-free (or low-rent) use of a chattel or UK land. The chattel or land does not derive from the s.731 benefit: the s.731 benefit may be said to derive from the chattel or land, but that is another matter. But the right to use the chattel or land is a licence or lease which is itself property. So there is a taxable remittance of s.731 income if the land is in the UK, or if the chattel is used in the UK.<sup>196</sup>

---

192 See App 7.1 (Construction of deeming provisions).

193 That raised questions discussed in the 14<sup>th</sup> edition of this work, but which have no clear answer: where (if anywhere) is the benefit of a loan, guarantee, or waiver of a debt received?

194 Contrast 17.16.7 (T lends income/gains to R).

195 See 17.36 (Remittance before income/gains arise).

196 See too 57.19.2 (Example: Use of property).

#### 47.39.5 *Waiver of debt*

Suppose:

- (1) money is lent to a beneficiary;<sup>197</sup>
- (2) the trustees waive the debt (a benefit).

What is derived from the waiver?

If the debt is charged on an asset, it is suggested that the asset (or an interest in it) is derived from the waiver.

If there is an arrangement under which:

- (1) trustees make a loan
- (2) they waive the loan,

then the two steps (the loan and the waiver) may be considered as one item, in which case the money lent under the loan is derived from the waiver.

But in other circumstances, it is arguable that no property is derived from the waiver.<sup>198</sup>

#### 47.39.6 *Payment of debt*

Suppose:

- (1) A beneficiary owes money to a third party.
- (2) The debt is paid by the person abroad (a s.731 benefit).

If the debt is a relevant debt, then there is a taxable remittance of the s.731 income under the debt remittance rules.

#### 47.39.7 *Benefit later remitted*

Suppose:

- (1) a remittance basis taxpayer receives a benefit in the form of the transfer of money (or a chattel) outside the UK, and
- (2) later brings that money (or chattel) to the UK.

There is a taxable remittance of s.731 income.

For this reason, the tax consequence of a benefit received by one beneficiary may depend on whether *other* beneficiaries have remitted their

---

197 It makes no difference whether the loan is at a commercial rate (not a benefit), or an interest-free loan (which confers the separate benefit of interest foregone while the loan is outstanding).

198 See too 15.6 (Income/gains used to pay debt).

benefits (and so used up relevant income). One might expect one beneficiary (with access to trust documents) to be able to find out what benefits other beneficiaries have received and where. But a beneficiary is not entitled to find out, and often will be unable to find out, whether benefits received by other beneficiaries have been remitted. The legislation is in many cases unworkable. But in 2008 workability was not regarded as a requirement of anti-avoidance legislation.

If the beneficiary is not resident when they receive the benefit but resident when it is received in the UK, there is in principle no tax charge.

#### 47.39.8 *Distribution of UK source income*

Suppose an offshore company (“OC”) within s.731 is owned by a trust within s.731:

If OC receives and retains UK source income, that is not foreign relevant income. However, if OC distributes the income to the trust, OC’s income ceases to be relevant income. Instead the income of the trust is relevant income (unless distributed), but this income is foreign source income and so in principle excluded relevant income. So where UK source income is received by an underlying company, the s.731 remittance basis can be made available by distribution of that income from the company. This seems anomalous. However, s.731 provides a rough justice in other areas where that favours HMRC, so it is not altogether surprising if on occasion an anomaly may favour the taxpayer.

#### 47.39.9 *Remittance in split year*

Section 735(5) ITA provides:

In the application of section 832 of ITTOIA 2005 to the foreign deemed income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) s.731 income is taxable

if it is remitted during the overseas part of a split year.<sup>199</sup>

There is no good reason for that.<sup>200</sup> But the point will not often arise.

#### 47.39.10 *2008 transitional rules*

Para 170 sch 7 FA 2008 provides:

The amendments made by paras 161 to 169 have effect for the tax year 2008-09 and subsequent tax years.

Section 735 does not apply to benefits received by a person abroad before 2008/09 because the condition in s.735(1)(b) is not met.

### 47.40 s.731 matching rules

In order to decide whether the remittance basis applies, we need to identify the foreign s.731 income; so we need to identify the relevant income to which the s.731 income “relates”, to see if it is foreign relevant income.

In order to operate the remittance basis if it applies, we need to identify the benefits that relate to s.731 income, in order to see if they have been remitted.

Although statute uses the word “relate” the rules are best described as matching rules.

If relevant income relates to s.731 income then the s.731 income relates to the relevant income: that is, “relates” is a transitive concept.

These rules are set out in s.735A ITA. This begins:

For the purposes of section 735—

But s.735A is applied by reference in all circumstances where matching is required. This is achieved by a clumsy formula, referring to s.731 income which:

would, if section 735A applied also for this purpose, be matched under that section with the benefit

#### 47.40.1 *Place benefits in date order*

Section 735A works in four stages. Section 735A(1) ITA provides:

For the purposes of section 735—

---

199 See 16.13.1 (Remittance in split-year).

200 The same (unfair) rule applies for s.720: see 46.20.1 (Remittance in split year).

- (a) place the benefits mentioned in Step 1<sup>201</sup> [benefits within s.731] in the order in which they were received by the individual (starting with the earliest benefit received)

Some benefits are not received at any particular point in time, eg the benefit of rent-free accommodation, and it is not possible to place them in the order in which they are received. Perhaps there should be a time apportionment.

One then makes certain deductions from the benefits:

- (b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains.

See 47.19 (Deduction for s.87 charge).

#### 47.40.2 *Place relevant income in order*

Section 735A(1) ITA continues:

- (c) place the income mentioned in Step 3 for the tax years mentioned in Step 4 (“the relevant income”) in the order determined under subsection (3)

Note that Steps 3 and 4 here refer to the steps in s.733; confusingly the reference is not to the steps in s.735A(3) which immediately follow.

This takes us to s.735A(3) ITA:

The order referred to in subsection (1)(c) is arrived at by taking the following steps.

##### *Step 1*

Find the relevant income for the earliest tax year (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]

##### *Step 2*

Place so much of that income [relevant income] as is not foreign<sup>202</sup> in the order in which it arose (starting with the earliest income to arise).

##### *Step 3*

---

201 Section 735A(2) ITA provides:

“In subsection (1) references to a step are to a step in section 733(1).”

202 Section 735A(4) ITA gives a commonsense definition to “foreign” relevant income:

“For the purposes of subsection (3) relevant income is ‘foreign’ where it would be relevant foreign income if it were the individual’s.”

After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

In order to carry out Steps 2 and 3 it is necessary to distinguish between:

- (1) foreign relevant income; and
- (2) other relevant income (“**UK relevant income**”).

It is then necessary to ascertain the date that the relevant income arises. Some income is not received at any particular moment in time, eg trading and property income, where the income is computed as a net figure after allowing deductions. Section 735A(5) ITA deals with this:

For those purposes [for purpose of putting relevant income into date order] treat income for a period as arising immediately before the end of the period.

This is in fact the general rule.<sup>203</sup>

TAH para 1234 provides:

... For example, business profits accrue over an accounting period to say 31 December so for the purpose of this provision the income would be treated as arising on 31 December. Therefore if in a tax year there was say interest income arising on 30 September and business profits accruing over an accounting period to 31 December, for the purpose of this provision they would be placed in the order interest first and profits second.

The author probably assumed that interest is not “income for a period” and so the interest is not affected by s.735A(5). In fact, interest is income for a period to which it relates, even though tax is only charged when interest arises. But interest is normally paid in arrears, ie interest arising on (say) 30 September is for a period ending 30 September, so the end result is the same.

Then one carries out Steps 1–3 for subsequent years, year by year:

*Step 4*

Repeat Steps 1 to 3.

For this purpose, read references to the relevant income for the earliest tax year as references to the relevant income for the first tax year after the last tax year in relation to which those Steps have been undertaken.

---

203 See 17.15.1 (What is trading income).

Amended as step 4 requires, steps 1-3 provide:

*Step 1*

~~Find the relevant income for the earliest tax year~~ the relevant income for the first tax year after the last tax year in relation to which those Steps [Steps 1-3] have been undertaken (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]

*Step 2*

Place so much of that income [relevant income] as is not foreign in the order in which it arose (starting with the earliest income to arise).

*Step 3*

After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

#### 47.40.3 *Deduction from rel. income*

Section 735A(1)(d) ITA provides:

(d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),

Section 735A(6) ITA provides:

Subsection (1)(d) does not apply if the income may not be taken into account because the individual has been charged to income tax under section 731 by reason of the income.

#### 47.40.4 *s.731 income in date order*

Section 735A(1)(e) provides:

place the income [s.731 income] treated under section 732(2) as arising to the individual in respect of the benefits in the order in which it is treated as arising (starting with the earliest income treated as having arisen),

#### 47.40.5 *The matching rule*

Having identified all these matters, and placed them in date order, we can at last turn to the matching rule itself. Section 735A(1)(f) ITA provides:

treat the income mentioned in para (e) [s.731 income] as related to—  
 (i) the benefits, and  
 (ii) the relevant income,

by matching that income with the benefits and the relevant income (in the orders mentioned in paras (a), (c) and (e)).

#### 47.40.6 Summary

In short, the matching rules are:

- (1) Match with relevant income of earlier years before later years.
- (2) Within the years, match with UK relevant income before foreign relevant income.

Why does the legislation not simply say that? For a discussion of the drafting issues see 57.15.7 (Method statements: Critique).

The rule is arbitrary (but any matching rule is arbitrary).

#### 47.40.7 Remittance basis examples

TAH gives a number of examples, most of which are self-evident, but two are worth setting out here. Para 1234 Example 10 involves UK and foreign relevant income (7 items of income altogether) and non-UK benefits (2 benefits altogether):

Item	Date	Relevant income		Benefits (non-UK)
		UK	Foreign	
1	Year 1	30 Sept	500	
2		31 Dec		
3	Year 2	31 Dec	1,000	750
4	Year 3	30 Sept	500	
5		31 Dec	500	
6	Year 4	30 Sept	500	
7		31 Dec	500	750 [or 1,500]

The HMRC analysis is:

There are potential transfer of assets benefits charges in Yr 2 of 750 and Yr 4 of 750.

More analytically, the individual receives s.731 income of £750 in years 2 and 4.

In Yr 2, 250 will be foreign deemed income and ring fenced to be charged under Part 8 ITTOIA as and when there is an amount remitted to the UK. 500 is charged under transfer of assets.

More analytically, the £750 s.731 income of year 2 is matched as follows:

£500 is matched with income item 1: that £500 is not deemed RFI and so is charged on an arising basis.

£250 is matched with income item 2: that £250 is deemed RFI and taxed on the s.731 remittance basis, ie on a future remittance of the benefit or the foreign relevant income. I would not use the term “ring-fenced” to describe this, but it might serve as a loose metaphor.

In Yr 4 the whole 750 will be deemed foreign income [*recte* foreign deemed income].

More analytically, the £750 s.731 income of year 4 is matched with the remaining unmatched £250 of item 2 and to the first £500 of item 3. The £750 is deemed RFI and taxed on the s.731 remittance basis.

If however the benefit in Yr 4 was 1500, then only 1250 would be ring fenced as foreign deemed income and 250 would be charged under transfer of assets.

More analytically, if the benefit in Yr 4 was 1500, the individual receives s.731 income of £1,500 in year 4. That is matched as follows:

£250 is matched with the remaining unmatched part of income item 2.

£1,000 is matched with income item 3.

The total of £1,250 is deemed RFI and taxed on the s.731 remittance basis.

£250 is matched with income item 5 and is taxed on the arising basis.

TAH para 1236 Example 11 is a slightly more complex example with:

(1) UK and foreign relevant income - 12 items altogether.

(2) UK and foreign benefits - 4 benefits altogether.

An individual who is ordinarily resident, but not domiciled, in the UK has received cash benefits from an offshore structure in circumstances where the conditions for the transfer of assets provisions to apply are met. The ‘remittance basis’ of taxation applies for each year.

Item	Date		Relevant income		Benefits	
			UK	Foreign	UK	Foreign
1	Year 1	30 Sept	500			
2		31 Mar		800		1,000
3	Year 2	31 Mar	100			1,400
4		31 Mar		1,000		
5	Year 3	31 Mar		500		
6		31 Mar	500			

7		31 Mar	500		
8	<i>Year 4</i>	30 Sept	200		1,000
9		31 Mar		500	
10	<i>Year 5</i>	30 Sept	500		600
11		30 Sept		100	
12		31 Mar		400	

The HMRC analysis is (to say the least) informal in its use of terminology and it should be recast along the lines of example 10. This is done here by adding only brief comments in italics as the text is long and the reader will have the idea.

### Year 1

The potential benefits charge [*s.731 income*] is 1000 (being the lesser of 1300 relevant income and 1000 benefits received).

As all of the conditions for Section 735 to apply are met, consider whether any of the potential charge [*s.731 income*] is foreign deemed income. The principles in Section 735A are used for this purpose.

- First match the 1000 with the UK [*relevant*] income of 500. As this income cannot be relevant foreign income then 500 cannot be foreign deemed income and thus is charged under the transfer of assets benefits charge [*on an arising basis*].

- The remaining benefit [*£500 s.731 relevant income*] is then matched with the foreign [*relevant*] income of 800. This [*relevant*] income would be relevant foreign income if it was the individual's and thus 500 of the deemed amount [*s.731 income*] is foreign deemed income. This is treated as relevant foreign income and becomes potentially chargeable under Part 8 ITTOIA 2005 [*ie is taxed on the s.731 remittance basis*].

- There is a balance of 300 relevant income that remains unmatched.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

The total taxable amount for the year under transfer of assets benefits charge is therefore 500.

### Year 2

The potential benefits charge [*s.731 income*] is 1400 (being the lesser of the total relevant income 2400 and the total benefits 2400 less 1000 already charged).

Calculate how much of the total potential charge [*s.731 income*] can be regarded as foreign deemed income applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with-

- (a) 300 of foreign [*relevant*] income from year 1. This gives foreign deemed income of 300 chargeable [*on the s.731 remittance basis*] under Part 8.
- (b) 100 UK income of year 2. As this income cannot be relevant foreign income this amount of 100 remains chargeable [*on an arising basis*] under the transfer of assets benefits charge.
- (c) The foreign [*relevant*] income of year 2 of 1000. As this would be relevant foreign income if it were the individual's this amount can [*must*] be regarded as foreign deemed income and so chargeable [*on the s.731 remittance basis*] under Part 8.

The result is that of the potential charge [*s.731 income*] of 1400, 100 is charged under transfer of assets benefits charge [*on the arising basis*] and 1300 is ring fenced and treated as relevant foreign income chargeable [*on the s.731 remittance basis*] under Part 8 ITTOIA.

The total charge under the transfer of assets benefits charge is therefore 100. Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

### **Year 3**

Although there is further relevant income in this year there are no unmatched benefits so there can be no potential charge [*s.731 income*] under transfer of assets benefits charge so a consideration of S735 is not applicable.

### **Year 4**

The potential charge [*s.731 income*] is 1000 (being the lesser of the total relevant income 4100 and the total benefits 3400 less 2400 already charged). Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with

- (a) The UK relevant income 500 from year 3.
- (b) The foreign [*relevant*] income of 500 from year 3.

The total amount charged under the transfer of assets benefits charge is therefore 500.

500 is ring fenced as foreign deemed income and treated as relevant foreign income *charged on the s.731 remittance basis*].

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as

appropriate to the rules on remittances from mixed funds.  
There is 700 of unmatched relevant income to take forward.

### **Year 5**

The potential charge [*s.731 income*] is 600 (being the lesser of the total relevant income 5100 and the total benefits 4000 less 3400 already charged).

Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with

- (a) The UK relevant income 200 from year 4.
- (b) 400 of the foreign relevant income from year 4.

The total amount charged under the transfer of assets benefits charge is therefore 200.

400 is ring fenced as foreign deemed income and treated as relevant foreign income.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

As the benefit was received in the UK a minimum of the ring fenced amount of this year will be charged under Part 8 ITTOIA and consideration would need to be given to whether there are further untaxed amounts of ring fenced income that would be charged for this year applying the relevant remittance basis rules.

There is 1100 of unmatched relevant income to take forward.

ToA draft guidance provides further examples at IHTM602420.

#### **47.40.8 Planning implications**

Where the *s.731* remittance basis applies the best planning is to arrange that the person abroad (the foreign trust or company):

- (1) does not have any UK source income and
- (2) does not remit its foreign income.

Then there is no need to worry about the complex *s.735A* matching rules. The relatively simple position is that there is a remittance if the benefit is received in the UK.

This also avoids the double charge to UK tax which arises if benefits are matched with UK source relevant income which is itself taxable.

The next best planning is to arrange that:

- (1) UK source income arises in years where no *s.731* benefit is provided;

and

- (2) In a year where a s.731 benefit is provided, the person abroad has no UK source relevant income *and* has foreign source relevant income of an amount sufficient to match the value of the benefit (ie the foreign source relevant income will frank the benefit). If the trust property is held through an underlying company, a dividend from the company may conveniently achieve that.

#### 47.40.9 *s.731 remittance basis: Critique*

The reader who has followed the text to this point will agree that the s.731 remittance basis is unworkably complicated. The rule should simply be that there is a tax charge if the benefit is remitted, and the matching rules abandoned. That would be fairer, consistent with the principle of the remittance basis, consistent with the s.87 remittance basis, and a simplification. It would also facilitate UK investment by the person abroad.

The 2013 ToA consultation raised a proposal to amend the matching rules, but this was not adopted.<sup>204</sup>

#### 47.41 **s.720/731 remittance basis compared**

Sections 720 and 731 both offer a form of remittance basis. The s.731 remittance basis is stricter, as well as more difficult to operate. So before 2017, a transferor (chargeable under s.720 but not s.731) would often be in a better position than other beneficiaries (chargeable under s.731). But the 2017 changes restricted s.720, and extended s.731 to transferors, so removing this advantage.

#### 47.42 **“Protected Income”**

Note that the term “protected income” does not have the same meaning as the term “protected foreign-source income” (which itself has 3 distinct

---

204 HMRC, “Reform of an anti-avoidance provision: Transfer of Assets Abroad Outcome of Consultation” (2013): “Having carefully considered the views put forward in the consultation and through the working group, the Government has decided not to pursue legislative change to the matching rules at present.”  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/267976/Transfer\\_of\\_assets\\_outcome\\_of\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/267976/Transfer_of_assets_outcome_of_consultation.pdf)

definitions).<sup>205</sup>

“Protected income” matters in the following contexts:

- (1) Charge on s.731 income of non-resident: the charge applies only so far as the s.731 income is matched to Protected Income<sup>206</sup>
- (2) s.731 settlor-attribution rule: the charge applies only so far as s.731 income of a non-resident is matched to relevant income which is Protected Income<sup>207</sup>
- (3) s.731 onward-gifts rule: this only applies so far as s.731 income is matched to relevant income which is Protected Income

Section 721(3BA) ITA defines “Protected Income”:

In a case in which rule 2 of subsection (3B) applies [non-dom transferor<sup>208</sup>], so much of the income of the person abroad as is protected foreign-source income for the purposes of that rule counts as “protected income” for the purposes of section 733A(1)(b)(i).

This definition is expressed to apply “for the purposes of section 733A(1)(b)(i)”, ie, for the purposes of the s.731 settlor-attribution rule.<sup>209</sup>

But the same definition is incorporated by reference in the other places where the term “Protected Income” is used:

- (1) the s.731 charge on non-residents<sup>210</sup>
- (2) s.731 onward-gifts rule<sup>211</sup>

The definition is incorporated by referring to:

income that is protected income for the purposes of section 733A(1)(b)(i) (see sections 721(3BA) and 728(1B))

This is clumsy wording, but it works.

John Barnett explains:

I have pondered for a while why the statute needs separate definitions of protected-foreign source income (721A and 729A) and “Protected

---

205 See 88.8 (“Protected income: Terminology”).

206 See 47.43.2 (Match with Protected Income).

207 See 47.49.2 (Cond (b): match Protected Income).

208 See 88.15.2 (Transferor not UK domiciled).

209 See 47.46 (s.731 settlor-attribution: Outline).

210 See 47.43.2 (Match with Protected Income).

211 See 47.49.2 (Cond (b): match Protected Income).

Income” (s733A(1)(b)(i) and s733B(1)(b)(i)) - as the latter definition seems simply to incorporate the definition of protected-foreign source income.

However, I think that the difference is that “Protected Income” is any income which has benefitted from rule 2 (of either 721(3B) or 728(1A)). Or, putting it another way, income which has benefitted from the switching off of the settlor-charge by the FA 2017 changes for protected trusts.

I think that the distinction can be seen if you have a UK resident, non-domiciled settlor, where the settlor and spouse are completely excluded (and therefore don’t have power to enjoy). I think in that case that any income arising to the trust would, technically, be protected foreign-source income. But it would not be benefitting from rule 2 as rule 2 only applies to determine the amount of income arising under s721(1)/s728(1) and those sub-sections only apply if inter alia condition A (power to enjoy) is met. So you would not have “Protected Income” even though you have protected foreign-source income.

The policy rationale for this (which certainly chimes with many consultation meetings which I attended) seems to be that HMRC, in switching-off s721 for protected trusts, didn’t want to open a back door to avoidance. So any income which has benefitted from this switching-off, might be caught by one of the package of anti-avoidance measures (closely-related family member s733A; onward gift s733C). But if s721 didn’t need switching-off (because, due to no power to enjoy, it was never switched on in the first place) then the anti-avoidance rules aren’t needed.

On this analysis, the s.731 rules are consistent with the s.643A charge, which is (slightly) better worded. The s.643A equivalent of protected income is PFSI, which is defined as income:

that would be treated under section 624 as income of the settlor but for section 628A [s.624 protected-trust relief]<sup>212</sup>

On this analysis, the statutory terminology is highly confusing:

- (1) The label “protected foreign-source income” seems apt for a settlor-interested trust where the settlor is UK resident and in principle within s.624/720. In this case, s.624/720 protected-trust reliefs disapply the

---

212 See 44.22.1 (PFSI).

s.624/720 charge. But it also applies where those charges are not in point.

- (2) The label “Protected Income” means income which has been protected once, by s.720 protected trust relief specifically, but by that reason falls within the scope of other anti-avoidance provisions. “Untaxed income” would have been clearer.

It is probably best to adopt the statutory terminology, as anything else is even more confusing, but these points must be kept in mind in order to understand the provisions.

Although not the statutory usage, I write the term Protected Income with initial capitals, to reflect the highly technical nature of the term.

Income is not Protected Income if:

- it arises before 6 April 2017
- it arises when the transferor/settlor is non-resident.<sup>213</sup>

#### 47.43 Non-resident beneficiary

Before 2017 we had the simple rule: s.731 income did not arise to a non-resident.<sup>214</sup>

From 2017 this requirement was removed, so that s.731 income does arise to a non-resident (if the s.731 application conditions are satisfied). The question then is whether the s.731 income is chargeable, and if so who is charged.

The position here is governed by s.731(1A) ITA. This is hard to follow, even by the refined standards of contemporary anti-avoidance legislation. We begin our journey with s.731(1):

Income tax is charged on income treated as arising to an individual under section 732 (individuals receiving a benefit as a result of relevant transactions) [s.731 income].

Section 731(1A) then begins:

But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is a charge to tax under this

213 See 88.13.1 (Condition (a): RFI).

214 Section 732(1) formerly provided: “This section applies if ...(e) an individual *who is UK resident for the tax year* receives a benefit in that tax year.” The italicised words were deleted in 2017.

section on—

The text which follows is easier to understand if one regards it as containing 3 conditions, or sets of conditions (“**s.731(1A) conditions**”) which apply where the beneficiary is non-resident. In short, the conditions are:

- (1) s.731 income (which the section calls “matched deemed income”)
- (2) matched with Protected Income
- (3) benefit received by settlor/close-family

Section 731 income of a non-resident which meets these conditions is subject to tax under s.731; and s.731 income which does not meet the conditions is not.

Thus from 2017 there are three types of s.731 income. I coin the following terminology:

- (1) **UK resident’s s.731 income**: s.731 income accruing to a UK resident. This is **chargeable s.731 income**; the recipient is chargeable under s.731(1).
- (2) **Non resident’s s.731 income**: s.731 income accruing to a non-UK resident. This may be:
  - (a) **Chargeable s.731 income**, if the s.731(1A) conditions are satisfied.
  - (b) **Non-chargeable s.731 income**, if the s.731(1A) conditions are not satisfied.

Diagrammatically:

#### 47.43.1 *Match s.731 income with benefit*

Section 731(1A) ITA provides:

But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is [only] a charge to tax under this section on any matched deemed income ...

Section 731(1B) ITA provides the definition of “matched deemed

income”:

For the purposes of subsection (1A)—

(a) “matched deemed income” means income which—

- (i) is treated by section 732 as arising to the individual [beneficiary]
- (ii) would, if section 735A [matching rules] applied also for this purpose,<sup>215</sup> be matched under that section with the benefit [ie the benefit received by the individual beneficiary]

I refer to this as “**s.731 income**”.

I do not think it is possible to have s.731 income which is not matched with a benefit.

The purpose of the definition is to identify the s.731 income which must be matched with Protected Income, in the next s.731(1A) condition considered below.

#### 47.43.2 *Match with Protected Income*

Section 731(1A) ITA provides:

But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is a charge to tax under this section on any matched deemed income [s.731 income]

(a) only so far as

- [i] that matched deemed income [s.731 income] would under section 735A [matching rules] (if it applied also for this purpose)<sup>216</sup> be matched with
- [ii] an amount of relevant income that is protected income for the purposes of section 733A(1)(b)(i) (see sections 721(3BA) and 728(1B))<sup>217</sup>

Para 24 Protected-Trust Note 2020 provides:<sup>218</sup>

The charge under section 731(1A) is only made if the relevant income matched to the benefit is PFSI (see section 721(3BA)). It is considered that in determining which relevant income is matched to the benefit FIFO must be used by virtue of ITA 2007 section 735A and that

---

215 See 47.40 (s.731 matching rules).

216 For s.735A see 47.40 (s.731 matching rules).

217 See 47.42 (“Protected Income”).

218 For this document, see 88.1.1 (Protected-trust guidance).

relevant income cannot be PFSI unless it arose after 5 April 2017 as the changes only apply for the tax year 2017/18 onwards. Income before that date cannot be PFSI. The amendments made to section 726 introducing sub-sections (6) and (7) refer specifically to PFSI and earlier years thereby providing further confirmation.

#### 47.43.3 *Benefit to settlor/close family*

Section 731(1A) ITA provides:

But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is a charge to tax under this section on any matched deemed income...

(b) only if—

- (i) the individual [beneficiary] is the settlor of the settlement concerned, or
- (ii) the benefit is received by the individual [beneficiary] at a time when the individual is a close member<sup>219</sup> of the family of the settlor of that settlement.

#### 47.43.4 *Non-resident: analysis*

Where a non-resident receives a benefit which is matched with Protected Income, there are three possibilities:

*Benefit received by non-resident 3<sup>rd</sup> party (not settlor/close family):* In this case the s.731 income is non-chargeable.

*Benefit received by non-resident close family:* In this case the settlor (if UK resident) will be chargeable under the settlor-attribution rule.

*Benefit received by non-resident settlor:* In this case is the settlor chargeable? If the settlor has never been UK resident, there is no Protected Income,<sup>220</sup> and the question does not arise. But the question arises if:

- (1) The settlor is UK resident for a period of time and Protected Income arises
- (2) The settlor ceases to be UK resident
- (3) The settlor then receives a benefit

---

219 Section 731(1B) ITA provides the standard definition (in short, spouse/cohabitee and minor children); see 57.27.2 (“Close-family”).

220 See 88.13 (Protected s.720 trust income).

Is this chargeable? It would be surprising. Para 24 Protected-trust Note 2020 provides:

Section 731(1A) prevents a charge where the recipient is non-resident when he receives the benefit. On a literal reading this does not apply where the person abroad is a settlement or underlying company and the recipient of the benefit is the settlor. It is considered that section 731(1A) is intended to be read with section 733A and ensure the settlor can be charged on a benefit received by the settlor's non-resident spouse or minor child but not if the non-resident is the settlor. It follows that section 731(1A) should only be applied to tax the settlor if payments are made to the settlor's non-resident close family member and the settlor is UK resident, not where the settlor himself is non-resident and payments are made to him (or a close family member). An alternative reading would put the settlor in a worse position than a UK domiciliary becoming non-UK resident particularly as the remittance basis could not apply. This appears to be the approach adopted by HMRC (see paragraph 3.25 of their guidance).<sup>221</sup>

It is considered that the territorial principle should be applied, that there should be no charge on foreign source income of non-residents, at least in the absence of much clearer wording than this.<sup>222</sup>

If (contrary to the view taken here) there were a charge on a non-resident, DT relief can apply on the basis that s.731 income falls within the Other Income article.<sup>223</sup>

#### 47.43.5 *Interaction with onward-gift rule*

Section 731(1C) ITA provides:

Subsection (1A) does not restrict the charge to tax under this section on income treated as arising to the individual by section 733C or 733E (onward gifts: recipient or settlor treated as individual to whom income is treated as arising).

#### 47.43.6 *s.731 income in split year*

---

221 The same point is made in Protected-trust Q&As Q29. For these documents, see 88.1.1 (Protected-trust guidance).

222 See 15.12 (General territorial principle).

223 See 47.57.2 (Individual treaty-resident outside UK).

There is no express split-year rule. So the default rule applies: s.731 income is taxable even if it arises during the overseas part of a split year of the beneficiary (even if the individual is not the settlor/close family, and so falls outside the scope of the non-resident beneficiary charge<sup>224</sup>).

The rule ought to be that benefits conferred on a beneficiary during the overseas part of their split year are treated like benefits of a year of non-residence, ie (in short) disregarded.<sup>225</sup>

However DT relief should be available if the individual is treaty-resident in a foreign state during part of a year.<sup>226</sup>

#### **47.44 s.731 settlor-attribution: Outline**

Section 733A introduces what I call the “**s.731 settlor-attribution rule**”.

This is one of a set of three rules which I call s.731/s.643A/s.87 settlor-attribution rules; see 47.5.11 (Settlor-attribution rules: Introduction).

In outline, this rule applies where:

- (1) A beneficiary receives a benefit
- (2) The beneficiary is:
  - (a) close-family
  - (b) outside the s.731 charge (non-resident or remittance-basis exempt)
- (3) The settlor is UK resident (and so potentially chargeable).

The charge is on the lower of the value of the benefit and the amount of Protected Income.

It will be quite rare for the s.731 settlor-attribution rule to apply, as it requires:

- (1) Benefit to close-family who are non-resident or remittance-basis exempt (and so not themselves charged)
- (2) A settlor of a protected trust who is UK resident and not remittance-basis exempt

A benefit to the settlor/transferor is not caught by the s.731 settlor-attribution rule, but it should fall within s.731 under general principles.<sup>227</sup>

---

224 See 9.1 (Residence throughout tax year).

225 The same point arises for s.87, for discussion see 57.18.1 (s.87 split year: Critique).

226 See 47.57.2 (Individual treaty-resident outside UK).

227 See 47.15 (Taxable-transferor defence).

#### **47.45 s.731 attribution conditions**

Section 733A(1) ITA provides:

Subsections (2) and (3) apply if-

A set of six conditions then follow, which I call “**s.731 settlor-attribution conditions**”.

##### *47.45.1 Cond (a): s.731 income*

Section 733A(1) ITA provides:

Subsections (2) and (3) apply if-

- (a) an amount of income [s.731 income] is treated as arising to an individual under section 732 for a tax year.<sup>228</sup>

All the usual s.731 conditions must be met.

I refer to this individual as the [close-family] individual as the conditions require that the individual is close-family of the settlor, or as the “**beneficiary**”, as this individual must receive a benefit (in order to receive s.731 income).

##### *47.45.2 Cond (b): Match Protected Income*

Section 733A(1) ITA provides:

Subsections (2) and (3) apply if...

- (b) under section 735A<sup>229</sup> (if it applied also for this purpose) that amount [of s.731 income] would be matched—
  - (i) with an amount of relevant income that is protected income for the purposes of this sub-paragraph (see sections 721(3BA) and 728(1B)),<sup>230</sup> and

If relevant income accrues to a company not held in a trust, the income is not Protected Income, and the s.731 settlor-attribution rule does not apply.

##### *47.45.3 Cond (b): Match with benefit*

---

228 Section 733A(4) provides: “The amount mentioned in subsection (1)(a) may be the whole, or part only, of the amount treated as arising to the individual under section 732 for the year in the case of the relevant transfer and its associated operations.”

229 Section 735A is the s.731 matching rule: see 47.40 (s.731 matching rules).

230 See 47.42 (“Protected Income”).

Section 733A(1) ITA provides:

Subsections (2) and (3) apply if...

- (b) under section 735A<sup>231</sup> (if it applied also for this purpose) that amount [of s.731 income] would be matched ...
- (ii) with a benefit received by the individual [the beneficiary] at a time when the individual [the beneficiary] was a close member (see subsection (7))<sup>232</sup> of the family of the settlor of the settlement concerned.

#### 47.45.4 *Cond (c): Non-resident trust*

Section 733A ITA(1) provides:

Subsections (2) and (3) apply if...

- (c) there is no time in the year when the trustees of the settlement are resident in the UK.

#### 47.45.5 *Cond (d): Settlor UK resident*

Section 733A(1) ITA provides:

Subsections (2) and (3) apply if...

- (d) there is a time in the year when the settlor is resident in<sup>233</sup> the UK.

#### 47.45.6 *Cond (e)(f): Settlor non-dom*

Section 733A(1) ITA provides:

Subsections (2) and (3) apply if...

- (e) there is no time in the year when the settlor is [actually] domiciled in the UK, and
- (f) there is no time in the year when the settlor is regarded for the purposes of section 718(1)(b)<sup>234</sup> as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly domiciled resident<sup>235</sup>].

---

231 Section 735A is the s.731 matching rule: see 47.40 (s.731 matching rules).

232 See 57.27 (“Close-family”).

233 The correct expression for residence of individuals is resident *for the year*; but it does not matter.

234 See 45.5 (“Person Abroad”).

235 See 4.4.1 (Condition A: Formerly dom).

47.45.7 *Settlor-attribution: Commencement*

Para 39 sch 8 F(no.2)A 2017 provides:

The amendments made by paragraphs 19 to 38 [which include the s.731 settlor-attribution rule] have effect for the tax year 2017-18 and subsequent tax years.

By contrast, the s.643A and s.87 settlor-attribution rules commenced 2018/19. It is hard to see a good reason for the earlier commencement of the s.731 settlor-attribution rule, though the decision seems to have been a deliberate one.<sup>236</sup>

**47.46 s.731 settlor-attribution rule**

Assuming the s.731 settlor-attribution conditions are met, we move on to the attribution rule.

Section 733A(2)(3) ITA deal with 2 situations:

- (1) The beneficiary may be wholly exempt, because they are non-resident, or because they are a remittance basis taxpayer and none of the income is remitted.
- (2) The beneficiary may be partly exempt, because they are a remittance basis taxpayer and only part of the income is remitted.

It is easier to follow if the provisions are read side by side:

**Beneficiary wholly exempt: s.733A(2) Beneficiary partly exempt: 733A(3)**

<p>If—</p> <p>(a) the [close-family] individual is not resident in the UK at any time in the year, or</p> <p>(b) [i] section 809B, 809D or 809E (remittance basis) applies to the [close-family] individual for the year and</p>	<p>If—</p> <p>(a) [identical to (b)[i] opposite]</p>
--	--

236 HMRC, “Guidance - Non-domicile taxation: technical briefing on overseas trusts” (March 2017)

<https://www.gov.uk/government/publications/non-domicile-taxation-technical-briefing-on-overseas-trusts/non-domicile-taxation-technical-briefing-on-overseas-trusts>

[ii] none of the amount mentioned in subsection (1)(a) of this section [s.731 income] is remitted to the UK in the year,

[A] the settlor is liable for the tax charged under section 731 on that amount as if that amount were income arising to the settlor in the year

[B] (and the [close-family] individual) is not liable in any later year for income tax on that amount).

(b) part only of the amount mentioned in subsection (1)(a) of this section [s.731 income] is remitted to the UK in the year,

[A] the settlor is liable for the tax charged under section 731 on the remainder of that amount as if that remainder were income arising to the settlor in the year

[B] (and the [close-family] individual) is not liable in any later year for income tax on that remainder).

Para [B] is not relevant if the (close-family) individual is non-resident, but it is relevant if the individual is remittance-basis exempt: its effect is that the close-family individual is not taxed if they later bring the benefit to the UK. That may be advantageous where:

- (1) a benefit is provided to a minor child of the settlor
- (2) the remittance basis applies to the child and to the settlor
- (3) Once the child reaches the age of 18, they bring the property to the UK

The child is not taxed; and neither is the settlor, since on the child becoming 18, it ceases to be a relevant person in relation to the settlor.

Statute frequently refers to a case:

where an individual is liable as a result of section 733A(2) or (3) for the tax charged under section 731 on the amount mentioned in s.733B(1)(a) [s.731 income]

For clarity, I gloss that as [attribution to settlor].

#### **47.47 s.731 settlor-attribution remittance-basis**

Section 735B(1) ITA provides:

This section applies in relation to income if—

- (a) the [s.731] income is treated by section 732 as arising to an individual (“the beneficiary”) for a tax year,

- (b) another individual (“the settlor”) is under section 733A(2) or (3) [attribution to settlor<sup>237</sup>] liable for tax on the income, and
- (c) section 809B, 809D or 809E (remittance basis) applies to the settlor for that year.

Assuming these conditions are met, we move on to s.735B(2) ITA:

The income (“the transferred-liability deemed income”) is treated as relevant foreign income of the settlor.

This applies the remittance basis to the s.731 income attributed to the settlor.

Section 735B(3) ITA provides:

If, for the purposes of section 735 as it applies in relation to the beneficiary, any benefit or relevant income relates to any part of the transferred-liability deemed income then, for the purposes of Chapter A1 of Part 14 as it applies in relation to the settlor, that benefit or relevant income is to be treated as deriving from that part of the transferred-liability deemed income.

This adopts the usual rule for the s.731 remittance basis.<sup>238</sup>

Section 735B(4) ITA provides:

In the application of section 832 of ITTOIA 2005 in relation to the income, subsection (2) of that section has effect with the omission of its paragraph (b).

The significance is that (contrary to the usual rule) the s.731 income attributed to the settlor is taxable if it is remitted during the overseas part of a split year.<sup>239</sup> This is consistent with the rule which applies generally for ToA<sup>240</sup> though there is no good reason for the rule.

#### **47.48 s.731 onward-gifts**

Section 733B - 733D introduce what I call the “**s.731 onward-gift rule**”.

This is one of a set of three rules which I call s.731/s.643A/s.87 onward-gift rules; see 57.30 (Onward-gifts: Introduction).

---

237 See 47.46 (s.731 settlor-attribution rule).

238 See 47.39 {s.731 remittance basis}.

239 See 16.13.1 (Remittance in split-year).

240 See 47.43.6 (Split year: s.731 income).

It is helpful first to review some definitions.

#### 47.48.1 *Charging, matching, gift years*

The first two definitions are the same as in the s.643A onward-gift rules, so it is not necessary to repeat them here:

<b>Term</b>	<b>Definition</b>	<b>s.643A equivalent, see:</b>
Gift year	s.733B(7)	44.30.1 (s.643A “gift year”)
Charging year	s.733B(7)	44.30.3 (s.643A “charging year”)

The definition of matching year is differently worded but effectively the same. Section 733B(7) ITA provides:

In this section ...

“the matching year” means the first tax year in which the matching mentioned in subsection (1)(b)<sup>241</sup> would occur,

#### 47.48.2 *Settlor*

Section 733B(7) ITA provides:

In this section ...

“the settlor” means the settlor of the settlement, mentioned in

[a] section 721A(3) or (4)<sup>242</sup> or

[b] [section] 729A(3) or (4),

which because of subsection (1)(b)(i) is the settlement concerned.

This definition applies for s.733B, so it is repeated in s.733E(7) ITA.

### 47.49 **s.731 onward-gift conditions**

Section 733B(1) ITA provides:

Sections 733C to 733E apply if-

A set of 7 conditions then follow, which I call “**s.731 onward-gift conditions**”.

#### 47.49.1 *Cond (a): s.731 income*

Section 733B(1) ITA provides:

241 See 47.49.2 (Cond (b): match Protected Income).

242 See 88.12 (Protected s.720 income).

Sections 733C to 733E apply if-

- (a) [i] an amount of income is treated as arising under section 732 [s.731 income] to an individual (“the original beneficiary” [donor]) in a tax year (“the arising year”)
- [ii] but neither by section 733C<sup>243</sup> nor by section 733E<sup>244</sup>

The s.731 onward-gift rules frequently refer to “the amount mentioned in s.733B(1)(a)”. For clarity, I gloss that as [s.731 income].

Is a simple income distribution to a nonresident within the scope of the s.731 onward-gift rule? The CGT onward-gift rule only applies if there is a “capital payment”. An income distribution is not a capital payment, so the CGT onward-gift rule does not apply. For s.731, the question is whether the beneficiary is “liable to income tax” on the distribution. Where the recipient of the distribution is UK resident, the s.731 onward-gift rule does not apply, even if the beneficiary is a remittance basis taxpayer. However, if the recipient of the income distribution is non-UK resident, it may be said that they are not liable to income tax on the distribution and if so the s.731 onward-gift rule could apply. But a purposive construction supports the contrary view.

#### 47.49.2 *Cond (b): Match Protected Income*

Section 733B(1) ITA provides:

Sections 733C to 733E apply if...

- (b) under section 735A [matching rules] (if it applied also for this purpose)<sup>245</sup> that amount [the s.731 income] would be matched-
  - (i) with an amount of relevant income that is protected income for the purposes of section 733A(1)(b)(i) (see sections 721(3BA) and 728(1B))<sup>246</sup>

The transfer of assets onward-gift rule can only apply if the original benefit is matched against Protected Income.

Benefits are matched against the oldest income. For trusts which were in existence before 2017, the onward gift rules may not apply for the

243 See 47.51 (s.731 onward-gift donee charge).

244 See 47.53 (s.731 onward-gift settlor-attribution).

245 See 47.40 (s.731 matching rules).

246 See 47.42 (“Protected Income”).

foreseeable future, as benefits will be matched against pre 2017 income which is not Protected Income.

#### 47.49.3 *Cond (b): Match benefit*

Section 733B(1) ITA provides:

Sections 733C to 733E apply if...

- (b) under section 735A [matching rules] (if it applied also for this purpose)<sup>247</sup> that amount [the s.731 income] would be matched ...
  - (ii) with the whole or part of a benefit received by the original beneficiary [donor]

#### 47.49.4 *Cond (c): Intention to give*

Section 733B(1) ITA provides:

(1) Sections 733C to 733E apply if...

- (c) at the time that benefit is received by the original beneficiary [donor] (“the distribution time”)-
  - (i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of that benefit to another person, and
  - (ii) it is reasonable to expect that, in the event of the whole or part of that benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them

This is effectively equivalent to s.87 onward-gift condition (c).<sup>248</sup>

#### 47.49.5 *Cond (d): Gift & time limit*

Section 733B(1) ITA provides:

Sections 733C to 733E apply if...

- (d) the original beneficiary [donor] makes, directly or indirectly, a gift (“the onward payment”) to a person (“the subsequent recipient” [donee])-

---

<sup>247</sup> See 47.40 (s.731 matching rules).

<sup>248</sup> See 47.49.4 (Cond (c): Intention to give).

- (i) [A] at the distribution time,  
[B] or at any later time in the 3 years beginning with the start time, or
- (ii) at any time before the distribution time and, it is reasonable to assume, in anticipation of receipt of the benefit mentioned in paragraph (b)(i)

Statute frequently refers to an onward payment (gift) “made as mentioned in subsection (1)(d)(ii)”. I refer to that as a **“pre-distribution gift”**.

Onward-gift condition (d) is effectively equivalent to s.87 onward-gift condition (c).<sup>249</sup>

#### 47.49.6 *Cond (d) “start time”*

Start time matters as the 3 year gift time limit runs from the start time.

In outline, there are 2 possible start times:

<i>Para</i>	<i>Circumstances</i>	<i>Start time</i>
733B(4)(a)	Normal	When benefit provided to donor
733B(4)(b)	Donee not taxable	Previous occasion

Section 733B(4) ITA provides:

For the purposes of subsection (1)(d)(i)—

- (a) if the amount mentioned in subsection (1)(a) [s.731 income] is not one that is treated as arising by section 733D,<sup>250</sup> “the start time” is the time the benefit mentioned in subsection (1)(b) is provided to the original beneficiary [donor], and
- (b) if the amount mentioned in subsection (1)(a) [s.731 income] is one that is treated as arising by section 733D<sup>251</sup> in connection with the operation of this section on a previous occasion, “the start time” is the time given by this subsection as the start time on that occasion.

#### 47.49.7 *Cond (e): Gift from benefit*

Section 733B(1) ITA provides:

---

249 See 57.31.3 (Condition (c): Gift & time limit). Section 733B(7) provides the standard wide definition of making a gift, the same as s.87G(15) TCGA

250 See 47.52 (Donee not taxed).

251 See 47.52 (Donee not taxed).

Sections 733C to 733E apply if...

- (e) the gift is of or includes-
  - (i) the whole or part of the benefit mentioned in paragraph (b)(ii),
  - (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of that benefit, or
  - (iii) any other property, but only if the benefit mentioned in paragraph (b)(ii) is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee]

This is substantially equivalent to s.87 onward-gift condition (e).<sup>252</sup>

The s.731 onward-gift rule frequently refers to this provision with the formula:

so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e)

For clarity, I gloss that as [gifted benefit].

#### 47.49.8 “*Relevantly remitted*”

Onward-gift conditions (f)(g) use the term “relevantly remitted”. Section 733B(7) ITA provides:

“relevantly remitted”

[a] means remitted to the UK in a tax year for which the original beneficiary [donor] is UK resident

[b] but, where

[i] an individual is liable as a result of section 733A(2) or (3)<sup>253</sup> [settlor-attribution rule]

[ii] for the tax charged under section 731

[iii] on the amount mentioned in subsection (1)(a) [s.731 income], means remitted to the UK in a tax year for which that individual [the settlor] is UK resident

I refer to this as “**relevantly/taxably remitted**”. The definition is

---

<sup>252</sup> See 57.31.6 (Condition (d): Gift from capital payment).

<sup>253</sup> See 47.46 (s.731 settlor-attribution rule).

equivalent to the s.643A definition.<sup>254</sup>

47.49.9 *Cond (f)(g): Donor outside s.731*

Section 733B(1) ITA provides:

Sections 733C to 733E apply if...

It is easier to follow if conditions (f) and (g) are read side by side:

**(f): Directly received s.731 income**

**(g) Settlor-attributed s.731 income**

except where an individual is liable as a result of section 733A(2) or (3) [settlor-attribution rule] for the tax charged under section 731 on the amount mentioned in paragraph (a) [s.731 income],

where an individual [the settlor] is liable as a result of section 733A(2) or (3) [settlor-attribution rule] for the tax charged under section 731 on the amount mentioned in paragraph (a) [s.731 income],

either-

(i) the original beneficiary [donor] is non-UK resident for the arising year, or

[A] section 809B or 809D or 809E [remittance basis] applies to that individual for the arising year and

(ii)[A] section 809B, 809D or 809E (remittance basis) applies to the original beneficiary [donor] for the arising year and

[B] none of the amount mentioned in paragraph (a) is relevantly [taxably] remitted before the end of the charging year.

[B] [identical]

This is approximately equivalent to s.643A onward-gift condition (f)(g).<sup>255</sup>

47.49.10 *Gift from pre-2018 benefit*

Para 21(4) sch 10 FA 2018 provides:

... new sections 733B to 733E and 735C of ITA 2007, have effect only in relation to onward payments [gifts] made on or after 6 April 2018, but have effect in relation to an onward payment made on or after that

254 See 44.31.7 (s.643A “relevantly remitted”).

255 See 44.31.8 (Cond. (f)/(g): No s.643A charge).

date even where the onward payment is referable to a benefit received before that date.

This rule will effectively cease to matter in April 2021.

## 47.50 s.731 misc rules

### 47.50.1 *Donee on remittance basis, remits part of income*

Section 733B(2) ITA provides:

If—

- (a) the amount mentioned in subsection (1)(a) [s.731 income] is not treated as arising by section 733D<sup>256</sup> (and neither by section 733C nor by section 733E),
- (b) except where an individual is liable as a result of section 733A(2) or (3)<sup>257</sup> [settlor-attribution rule] for the tax charged under section 731 on that amount, section 809B or 809D or 809E [remittance basis] applies to the original beneficiary [donor] for the arising year,
- (c) where an individual is liable as a result of section 733A(2) or (3)<sup>258</sup> [settlor-attribution rule] for the tax charged under section 731 on that amount, section 809B or 809D or 809E [remittance basis] applies to that individual for the arising year, and
- (d) part only of that amount is relevantly remitted before the end of the charging year,

subsection (1)(a) is to be treated as referring instead only to the remainder of that amount.

### 47.50.2 *Pre-distribution gift: date of onward payment*

Section 733B(5) ITA provides:

Where the onward payment [gift] is made as mentioned in subsection (1)(d)(ii), [pre-distribution gift] the onward payment [gift] is to be treated—

- (a) for the purposes of the provisions of this section following subsection (1)(d), and
- (b) for the purposes of sections 733C to 733E,

---

256 See 47.52 (Donee not taxed).

257 See 47.46 (s.731 settlor-attribution rule).

258 See 47.46 (s.731 settlor-attribution rule).

as made immediately after, and in the tax year containing, the distribution time.

### 47.50.3 *Relief for donor/settlor*

Section 733B(3) ITA provides:

- [A] The original beneficiary [donor] is not liable to tax for any year after the charging year on so much of the amount mentioned in subsection (1)(a) [s.731 income] as is—
  - (a) treated as arising to the subsequent recipient [donee] by section 733C, or
  - (b) treated as arising to the settlor by section 733E;
- [B] and the settlor is not is liable under section 733A(2) or (3)<sup>259</sup> [settlor-attribution rule] to tax for any year after the charging year on so much of the amount mentioned in subsection (1)(a) [s.731 income] as is treated as arising to the subsequent recipient [donee] by section 733C.

### 47.50.4 *Start time adjustment*

Section 733B(4) ITA provides:

- For the purposes of subsection (1)(d)(i)—
- (a) if the amount mentioned in subsection (1)(a) [s.731 income] is not one that is treated as arising by section 733D,<sup>260</sup> “the start time” is the time the benefit mentioned in subsection (1)(b) is provided to the original beneficiary [donor], and
  - (b) if the amount mentioned in subsection (1)(a) [s.731 income] is one that is treated as arising by section 733D<sup>261</sup> in connection with the operation of this section on a previous occasion, “the start time” is the time given by this subsection as the start time on that occasion.

s.733B(8)(9) are identical to the s.643A rules, and need not be set out again here: see 44.32.3 (Valuation of benefits) and 44.32.4 (Meaning of remittance).

## 47.51 **s.731 onward-gift donee charge**

---

259 See 47.46 (s.731 settlor-attribution rule).

260 See 47.52 (Donee not taxed).

261 See 47.52 (Donee not taxed).

Assuming the s.731 onward-gift conditions are satisfied, we move on to the onward-gift rules in s.733C.

The layout is: s.733C(1)(2) set out application conditions; s.733C(3) sets out the rule where those conditions are satisfied. The s.733C application conditions are substantially identical to the s.643A onward-gift rule, but I set them out again here for convenience. It is easier to follow if the two conditions are read side by side:

**Donee on arising basis: 733C(1)**

Subsection (3) applies if—

(a) this section applies (see section 733B(1)), [s.731 onward-gift conditions are met] and

(b) the subsequent recipient [donee] is UK resident for the gift year, and

(c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and

(d) none of sections 809B, 809D and 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year.

**Donee on remittance basis + some income remitted: s.733C(2)**

Subsection (3) also applies if—

(a) [identical]

(b) [identical]

(c) [identical]

(d) section 809B, 809D or 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year, and

(e) the whole, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the s.733C application conditions are satisfied, we move on to the rule. Section 733C(3) ITA provides the s.731 onward-gift charge:

Section 731 has effect—

- (a) as if the subsequent recipient [donee] were an individual to whom [s.731] income is treated as arising under section 732 for the charging year, and
- (b) as if, subject to subsection (4), the amount of that income—
  - (i) were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs

- (i) to (iii) of section 733B(1)(e) [gifted benefit], or
- (ii) were, where
  - [A] this subsection applies because of subsection (2) [donee on remittance basis] and
  - [B] part only of that much of the onward payment [gift] is remitted to the UK in the charging year, equal to the amount or value of that part.

47.51.1 Donee otherwise taxable

Section 733C(4) ITA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows—

- (a) deduct any part of the amount on which the subsequent recipient is liable to income tax otherwise than under this section

47.51.2 Gift exceeds donor’s benefit

Section 733C(4) ITA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows ...

- (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 733B(1)(a), deduct the excess.

47.52 Donee not taxed

The layout is: s.733D(1)(2) set out application conditions; s.733D(3) sets out the rules where one of those conditions is satisfied. The s.733D application conditions are substantially identical to the s.643A rule, but I set them out again here for convenience. It is easier to follow if the s.733D application conditions are read side by side:

**Donee non-resident**

**Donee on remittance basis**

(1) Subsection (3) applies if

[x] this section applies (see section 733B(1)) [s.731 onward-gift conditions are met] and—

(2) Subsection (3) also applies if—

(a) [identical to [x] opposite]

- (a) the subsequent recipient [donee] is non-UK resident for the gift year, or
- (b) the matching year is later than the gift year and the subsequent recipient [donee] is UK resident for the gift year but non-UK resident for the matching year.
- (b) the subsequent recipient [donee] is UK resident for the gift year, and
- (c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and
- (d) section 809B, 809D or 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year, and
- (e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the s.733D application conditions are satisfied, we move on to the rule. Section 733D(3) ITTOIA provides:

Section 733B(1)(a) has effect—

- (a) as if the subsequent recipient [donee] were an individual to whom income is treated as arising under section 732 for the charging year, and
- (b) as if, subject to subsection (4), the amount of that income—
  - (i) were equal to the amount or value of so much of the onward payment [gift] as
    - [A] is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit] and
    - [B] is not treated as arising to someone other than the subsequent recipient [donee] as a result of the operation of section 733E, or
  - (ii) were, where
    - [A] this subsection applies because of subsection (2) and
    - [B] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,
 equal to the amount or value of the remainder of that

much of the onward payment [gift].

The difference between 733C(3) and 733D(3) is:

733C: chargeable s.731 income arises to donee/settlor

733D: non-chargeable s.731 income arises to donee/settlor, which is taken into account for a future onward-gift charge

It may be helpful to look at the s.733C/D rules side by side, with the key differences underlined:

**Section 733C(3)**

**Section 733D(3)**

Section 731 has effect—

Section 733B(1)(a) has effect—

(a) as if the subsequent recipient [donee] were an individual to whom income is treated as arising under section 732 for the charging year, and

(a) [identical]

(b) as if, subject to subsection (4), the amount of that income—  
(i) were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit], or

(b) as if, subject to subsection (4), the amount of that income—  
(i) were equal to the amount or value of so much of the onward payment [gift] as [a] is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit] and [B] is not treated as arising to someone other than the subsequent recipient [donee] as a result of the operation of section 733E, or

(ii) were, where [A] this subsection applies because of subsection (2) [donee on remittance basis] and

(ii) were, where [A] [identical]

[B] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,

[B] [identical],

equal to the amount or value of that part.

equal to the amount or value of the remainder of that much of the onward payment [gift].

#### 47.52.1 *Gift value exceeds s.731 income*

Section 733D(4) ITA provides:

The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows: if that amount exceeds the amount mentioned in section 733B(1)(a) [s.731 income] in the case of the original beneficiary [donor], deduct the excess.

#### 47.52.2 *Prior year s.731 charge*

Section 733D(5) ITA provides:

Where the amount mentioned in section 733B(1)(a) is one treated as arising by this section in connection with the operation of section 733B and this section on a previous occasion, section 733B(1) has effect—

- (a) with the omission of its paragraphs (b) and (c),
- (b) as if the reference in its paragraph (d) to the benefit mentioned in its paragraph (b)(ii) were, instead, to what was the onward payment [gift] on that previous occasion,
- (c) as if the references in its paragraph (d) to the distribution time were, instead, to the time when that onward payment [gift] was made, and
- (d) as if the references in its paragraph (e) to the benefit mentioned in its paragraph (b)(ii) were, instead, to so much of that onward payment [gift] as was on that previous occasion within any of sub-paragraphs (i) to (iii) of its paragraph (e) [gifted benefit].

### 47.53 **s.731 onward-gift settlor-attribution rule**

The s.731 onward-gift settlor-attribution rule is one of a set of three rules which I call settlor-attribution rules. For a general introduction see 47.5.11 (Settlor-attribution rules: Introduction).

Suppose an onward gift is made to a donee (not close-family). A direct benefit to close-family may be treated as made to the settlor, under the s.731 settlor-attribution rule.<sup>262</sup> Section 733E ITA ensures that the same

---

262 See 57.26 (Settlor-attribution: Introduction).

applies in the case of an onward gift to close-family. I refer to this as the “s.731 OG settlor-attribution rule”.

The layout is: s.733E(1)(2) set out application conditions; s.733E(3) sets out the rules where one of those conditions is satisfied. It is easier to follow if the 733E application conditions are read side by side:

**Donee on remittance basis: s.733E(1) Donee non-resident: s.733E(2)**

Subsection (3) applies if—  
(a) this section applies (see section 733B(1)) [s.731 onward-gift conditions are met],

Subsection (3) also applies if—  
(a) [identical]

(b) the subsequent recipient [donee] is a close member of the settlor’s family when the onward payment [gift] is made,

(b) [identical]

(c) the subsequent recipient [donee] is UK resident for the charging year,

(c) the subsequent recipient [donee] is non-UK resident for the charging year,

(d) section 809B, 809D or 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year,

(e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year,

(f) there is a time in the charging year when the settlor is UK resident,

(d) [identical to (f)]

(g) there is no time in the charging year when the settlor is domiciled in the UK, and

(e) [identical to (g)]

(h) there is no time in the charging year when the settlor is regarded for the purposes of section 718(1)(b) [definition of person abroad] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met. (f) [identical to (h)]

Assuming the 733E application conditions are satisfied, we move on to the rule. Section 733E(3) ITA provides:

Section 731 applies—

- (a) as if the settlor were an individual to whom income is treated as arising under section 732 for the charging year, and
- (b) as if, subject to subsection (4), the amount of that income—
  - (i) were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit], or
  - (ii) were, where this subsection applies because of subsection (1) in a case where part only of that much of the onward payment [gift] is remitted to the UK in the charging year, equal to the amount or value of the remainder of that much of the onward payment [gift].

#### 47.53.1 *Settlor otherwise taxable*

Section 733E(4) ITA provides:

The amount given by subsection (3)(b) (before adjustment under this subsection) is to be adjusted as follows—

- (a) deduct any part of the amount on which the settlor is liable to income tax otherwise than under this section, and
- (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 733B(1)(a), deduct the excess.

Section 733E(5)(6) ITA provides the standard settlor-attribution indemnity.<sup>263</sup>

(7) In this section—

---

263 See 57.28 (Settlor-attribution indemnity).

- (b) “close member”, in relation to the family of the settlor, is to be read in accordance with section 733A(7) and (8).

This is the s.731 equivalent of s.87L: see 57.34 (Onward-gift to close-family: s.87 settlor-attribution rule).

#### **47.54 Responses to s.731: Summary**

- (1) Avoid relevant income by
  - (a) distributing income:
    - (i) as it arises; or
    - (ii) in a year before a beneficiary receives a benefit; or
  - (b) using interest in possession settlements in preference to discretionary; or
  - (c) not using trusts and companies where inappropriate
- (2) Motive defence
- (3) Remittance basis
- (4) Arrange that foreign domiciled beneficiaries receive benefits of an income nature (outside s.731)

#### **47.55 Record keeping**

In cases where it is anticipated that s.731 charges are likely to arise, the person abroad (most likely using UK agents) should make an annual computation of relevant income. It should be less work to do this annually than to wait until it matters and review back years after the event.

It is possible to disclose this to HMRC using form 50(FS), but this is voluntary and may not be worthwhile.<sup>264</sup>

#### **47.56 Tax return: s.731 income**

Section 731 income is returned in Box 42 in the Foreign pages (form SA106) 2019/20. The note by this box reads:

If you've received a benefit from a person abroad, or you're chargeable on a benefit received by you, a close family member, or you're the recipient of an onward gift that is matched to protected foreign source income, enter the value of the payment. If you're omitting income from this section because you're claiming an exemption, see box 46. If

---

264 See 57.58.1 (Form 50(FS)).

you're the settlor or close family member of the settlor and you've received, or are treated as having received, a benefit from a trustee of the settlement, or you're the recipient of an onward gift, and the benefit or onward gift does not exceed the settlement's available protected income, enter the amount treated as your income. Include full details in the 'Any other information' box on your tax return- read the notes.

The reference to a benefit is a reference to an income taxable benefit, so if a foreign domiciled individual received a benefit which is not subject to IT (because of the remittance basis or for lack of relevant income) then the figure here should be nil. HMRC agree.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts - 2019) provides:

**Reporting benefits as a result of a relevant transaction made by another individual**

Unless you're completing box 46 of the 'Foreign' pages [motive defence<sup>265</sup>] you should enter the amount from Step 6, in box 42 of the 'Foreign' pages.

Please enter in the 'Any other information' box, box 19 on page TR 7 of your tax return:

- the full name and address of the person abroad receiving the available relevant income
- the details of the relevant transactions that have given rise to the income
- how you've calculated the benefits included on the return

Where the benefit has come from a UK resident trust in the circumstances described in the previous section, also give details of those circumstances including the full name of any other trust involved.

## **47.57 DT relief: s.731 income**

### *47.57.1 Person abroad treaty-resident outside UK*

This section considers whether DT reliefs are available where:

- (1) income accrues to a person abroad who is treaty-resident in a foreign state
- (2) an individual is UK-law UK resident and not treaty-resident in a foreign state

---

265 See 49.44 (Tax return: Motive/EU defence).

(3) the individual is in principle subject to tax under s.731.

DT exemption is not applicable for s.731 ITA. EN ITA provides:

2170. The method statement [s.733 ITA 2007] makes it clear that “relevant income” in relation to an individual is not actually taxable income of the individual, but is an element in the calculation of taxable income. “Relevant income” is actual income arising to a person abroad; the income charged under section 731 is income treated as arising to the individual in question. This deemed income may be more or less than “the relevant income of the tax year” in relation to the individual and the tax year identified at Step 3.

ToA draft guidance makes the same point:

**INTM601700 The measure of the benefits charge**

The benefits charge is a charge on ‘income treated as arising’ to the individual and it is a charge by reference to the amount treated as arising. Whether income is treated as arising and if so the amount of it is determined by application of a formulaic approach which, in effect, compares benefits received by the individual with the income of a person abroad that can be used for providing a benefit (the relevant income of the tax year). This is not a charge on the actual income of the person abroad nor on the benefits received rather an amount determined by comparison of both elements over time.

Section 731 may be regarded as a charge on a benefit, or a charge on fictional income, but it is not a charge on the income arising to the person abroad.<sup>266</sup>

There is no foreign tax credit relief. However, income used to pay foreign tax is not relevant income as it cannot be used to benefit a beneficiary.

*47.57.2 Individual treaty-resident outside UK*

This section considers whether DT reliefs are available where:

- (1) an individual is UK-law UK resident and treaty-resident in a foreign state
- (2) the individual is in principle subject to tax under s.731.

---

266 See 103.21 (Third-party DT relief).

Can the individual claim treaty relief directly?<sup>267</sup>

Most UK treaties restrict this relief by adding: *other than income paid out of trusts or the estates of deceased persons in the course of administration*. That exclusion does not prevent relief for s.731 income. It has an entirely different purpose.<sup>268</sup> Section 731 income is fictional income and not “paid out of trusts” even if relevant income accrues to a trust and the benefit is received from a trust.

Some DTAs restrict this relief to income *beneficially owned* by a resident of a Contracting State.<sup>269</sup> That restriction does not prevent relief for s.731 income for one of two reasons:

- (1) As a matter of property law, s.731 income is not “beneficially owned” by the individual or anyone else: it is fictional income which does not exist. But since for tax purposes it is deemed to be the income of the individual, this requirement is deemed to be satisfied.<sup>270</sup>
- (2) Section 731 income is “beneficially owned” by the individual because s.731 is a tax by reference to a benefit which is beneficially owned by the individual.<sup>271</sup>

Suppose s.731 income arises where a beneficiary enjoys the benefit of occupying land in the UK. Article 6 OECD Model provides (so far as relevant):

1. Income derived by a resident of a Contracting State from immovable property ... situated in the other Contracting State may be taxed in that other State...
3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property

It is considered that s.731 income is not “income derived from immovable property” even if the charge is by reference to the occupation of UK land.

267 See Wattel & Marres, “Characterization of Fictitious Income under OECD-Patterned Tax Treaties”, 43 *European Taxation* 3 (2003), p.66: see 32.16 (DT relief: “Other Income”).

268 See 38.12.2 (Other Income article restricted).

269 Eg art.22 USA/UK DTA.

270 This point is the same as for s.624. See 44.18.3 (Settlor treaty-resident outside UK).

271 See 47.17.1 (Benefit matched on receipt).

CHAPTER FORTY EIGHT

**TRANSFER OF ASSETS ABROAD:  
RELIEF FROM OVERLAPPING CHARGES**

48.1

*Cross references*

This chapter considers rules which prevent double UK taxation; for the separate issue of DTAs and foreign tax credit relief, see:

46.24 (DT relief: s.720 income)

47.57 (DT relief: s.731 income)

**48.1 Overlapping ToA charges: Relief**

The transfer of asset rules could often give rise to double UK taxation, and there are four reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

<b>Name of relief</b>	<b>ITA section</b>	<b>Outline of relief</b>
Transferor's credit	745(1)	Credit for tax paid by transferee
Transferee's credit	unclear	Credit for tax paid by transferor
Distribution relief	743(2A)(2B)	Relief on distribution to transferor
Double-counting relief	743(1)	General relief against double charges

Protected-trust relief has reduced the scope of the s.720 charge, and so reduced the overlapping charges and the need for these reliefs; but there are of course circumstances where s.720 still applies (eg, UK source income is not protected income; and a transferor actually domiciled in the UK does not qualify for protected trust relief).

**48.2 UK income retained in co**

Suppose an offshore company ("OC") receives and retains UK taxable

income.<sup>1</sup> If s.720 ITA did not apply, there would be one charge to tax: income tax borne by OC. However, if s.720 applies, there are two possible charges to tax:

- (1) OC may pay income tax at the basic rate under ordinary principles.
- (2) The transferor (“T”) may pay IT on the same income under s.720.

What is there to prevent double taxation?

#### 48.2.1 *Transferor’s credit*

Section 745(1) ITA provides relief for T:

- [a] Income tax at
  - [i] the basic rate, or
  - [ii] the starting rate for savings when that rate is more than 0%,
- [b] is not charged under section 720 or 727 in respect of any income
- [c] if (and to the corresponding extent that) the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad<sup>2</sup>] has borne tax<sup>3</sup> at that rate by deduction or otherwise.<sup>4</sup>

Section 745(1A)(1B) ITA make equivalent provision for transferors who are Scots/Welsh taxpayers. The provisions are almost identical so are conveniently read side by side:

#### **s.745(1A): Scottish rate**

Income tax at a Scottish rate<sup>5</sup>

- [i] above 0% and
- [ii] below, or equal to, the basic rate

#### **s.745(1A): Welsh rate**

Income tax at the Welsh basic rate<sup>6</sup> when that rate is

- [i] above 0% and
- [ii] below, or equal to, the basic rate

- 
- 1 OC’s income would be UK taxable if the income has a UK source and so is subject to income tax, eg UK source interest.
  - 2 See 46.10 (Condition A: Power to enjoy).
  - 3 The statute assumes that OC would pay income tax. The better view is that the ToA rules do not apply to income within the charge to CT: see 45.5.1 (Non-resident company within CT).
  - 4 See App. 2.4.1 (Bear tax by deduction or otherwise).
  - 5 See 40.5.2 (Scottish rates).
  - 6 See 40.5.4 (Welsh rates).

is not charged under section 720 or [identical] 727 in respect of any income if (and to the corresponding extent that) the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad] has borne tax at the basic rate.

I refer to this as “**transferor’s credit**”.

Section 745(2) ITA provides:

Subsections (1) and (1A) do not affect the tax charged if section 724(2) applies (benefit provided out of income of person abroad charged in year of receipt).<sup>7</sup>

HMRC Helpsheet HS262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts)<sup>8</sup> provides:

**Tax paid on the income**

... If the amounts included in boxes 11 and 13 of the ‘Foreign’ pages include tax credits or other tax paid on the income of the person abroad, then you may be able to claim a deduction against your liability for that tax. You’ll only be entitled to relief for the tax paid by the person abroad if it is in effect tax on ‘the same’ income, and only to the extent that the tax has actually been paid by, and not refunded to, the person abroad.

You should include the amount of tax for which you can claim relief in Column C and you should also include it in box 2 of the ‘Foreign’ pages. You should note Column E of your claim. In addition, you should send a schedule with the ‘Foreign’ pages, showing the amount of each item of income, and tax credit/tax paid on that income, which has been included in boxes 11 and/or 13, and Column C.

---

<sup>7</sup> This is rare; see 46.16.3 (Amount of charge: enjoyment condition C).

<sup>8</sup> (2020) updated 6 April 2020

<https://www.gov.uk/government/publications/income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-hs262-self-assessment-helppsheet/hs262-income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-2020>

...<sup>9</sup>

#### 48.2.2 *Transferee's credit*

*R v Dimsey & Allen* identified the limitation of transferor's credit:

Section [745(1)] ... is looking at the double taxation problem from the point of view of the transferor on whom the liability to pay tax on deemed income is being imposed. There is no comparable provision protecting the transferee in a case where, under s [720], the transferor has paid tax on his deemed [s.720] income.<sup>10</sup>

In the course of argument in *R v Dimsey & Allen*, HMRC announced a practice to address this problem:

##### **The Inland Revenue's Practice on section [720]**

[1] If in any case tax is paid by the transferee, the Inland Revenue will give credit for that tax against any charge to tax on the transferor under section [720 ITA] on the same income;

[2] and conversely, if in any case tax is paid on any income by the transferor under section [720], the Inland Revenue will not tax the transferee on that income.

So that in every case, the Treasury received in all the full amount of tax chargeable on the transferor as if he were the only person liable.

Point [1] is the transferor's credit. I refer to point [2] as the "**transferee's credit**". The consequence is that either:

- (1) T pays all the tax on the income (and OC pays none); or
- (2) (a) OC pays tax (usually basic or dividend ordinary rate); and
  - (b) T has the credit for OC's tax (so T usually pays higher/additional rate tax only).

This statement does not say whether (1) or (2) is to be the case. As far as HMRC are concerned it does not matter because the amount of tax collected will generally be the same. If T is the beneficial owner of OC, it may likewise not make much economic difference to T whether T or OC pay the tax. But T may have "power to enjoy" the income of OC while only having a remote and not particularly valuable interest in it.<sup>11</sup>

<sup>9</sup> The section omitted here concerns FTCD; see 46.24.1 (Foreign tax credit relief).

<sup>10</sup> 74 TC 263 at [56].

<sup>11</sup> For instance, if OC owes T a small debt.

One can imagine a situation where T and OC each ask HMRC to assess the other! There is no mechanism for tax paid by T to be recovered from OC or vice versa. HMRC have a broad discretion, subject to judicial review if they act unreasonably. How in practice should HMRC collect tax? It is suggested that HMRC's starting point should be that tax is to be borne by OC, where tax is reasonably collectible from OC, ie if:

- (1) tax is collectible under the non-resident landlord regulations, ie if OC complies with those regulations; or
- (2) OC is prepared to complete UK tax returns and pay the tax on its income.

It is fair that OC, which receives the income, should pay the tax on it. Then only higher/additional rate tax is normally collected from T. Only in cases where OC refuses to pay should all the tax be collected from T. This seems consistent with the extract from "Notes on Foreign" set out above.

It is arguable that double-counting relief<sup>12</sup> is the statutory basis for the transferee's credit. If that is correct, the transferee's credit is law and not a concession.

### 48.2.3 *Taxpayer confidentiality*

Use of transferor/transferee credit require that the transferor/person abroad knows details of tax paid by the other person. Section 18 CRCA 2005 authorises HMRC to disclose this information:

- (1) Revenue and Customs officials may not disclose information which is held by the Revenue and Customs in connection with a function of the Revenue and Customs.
- (2) But subsection (1) does not apply to a disclosure—
  - (a) which—
    - (i) is made for the purposes of a function of HMRC, and
    - (ii) does not contravene any restriction imposed by the Commissioners...

## 48.3 **Distribution relief**

Section 743 ITA provides:

---

<sup>12</sup> See 48.4 (Double-counting relief).

(2A) Subsection (2B) applies if—

- (a) in the case of an individual, an amount of income is taken into account in charging income tax under section 720 or 727, and
- (b) the individual subsequently receives that income.

(2B) The income received is treated as not being the individual’s income for income tax purposes.<sup>13</sup>

I refer to this as “**distribution relief**”.

There are three conditions for this relief to apply, (“**distribution relief conditions**”):

- (1) *s.720 charge*: Income (the income of the person abroad) is taken into account in charging income tax under s.720.
- (2) *Transferor receives income*: The transferor receives income.
- (3) *Identity of income*: The income which the individual receives is “that income”, ie the same as the income taken into account in charging IT under s.720, ie the same as the income of the person abroad.

### 48.3.1 *Transferor/company structure*

Suppose:

- (1) An offshore company (“OC”) within s.720 receives income (“OC’s income”)
- (2) T owns all the shares in OC<sup>14</sup>
- (3) The income of OC is distributed by way of dividend to T (“T’s dividend income”)

Diagrammatically:

13 A historical note. FA 2013 rewrote distribution relief, which was formerly in s.743(4) ITA. This was part of the project to ensure that s.720 income was distinct from the income of the person abroad, in order to override DT relief, see 46.24.2 (Person abroad treaty non-resident). As far as concerns the double UK tax issues discussed in this chapter, it is considered that the changes did not make any difference.

14 The position is not materially different if the shares in OC are held in a trust under which T has an interest in possession.

There are 2 possible charges to tax here:

- (1) IT on OC's income (paid by T) under s.720<sup>15</sup>
- (2) IT on the dividend (paid by T) on normal principles

Does distribution relief apply? Of the 3 distribution relief conditions:

Condition (1) (income taken into account for s.720) would in principle be satisfied.<sup>16</sup>

Condition (2) (receipt of income) is satisfied as the individual receives s.720 income.

That leaves condition (3): identity of income.

### 48.3.2 *Identity of income condition*

At first sight distribution relief condition (3) is more doubtful. The income which the individual actually receives is the s.720 income. The income which is taken into account in charging IT under s.720 is the income of the person abroad, OC's income. Are the two the same income?

In order to answer the question, it is necessary to understand that there are two possible analyses of the nature of dividend income:

- (1) *Formalistic view*: On this analysis:
  - (a) income accruing to a company, and
  - (b) the shareholders (dividend) incomeare regarded as distinct, not the same income.

This is the usual analysis for tax purposes: "The income of the company and the income derived from the company by the shareholders are two quite different incomes."<sup>17</sup>

- (2) *Broad economic view*: On this analysis, a shareholder's (dividend) income is the same as the company income out of which it is paid.

---

15 Or IT on OC's income paid by OC and T, but with transferor's or transferee's credit to avoid double taxation: see above. That makes no difference for the purpose of this example. It is assumed here that T is not a remittance basis taxpayer.

16 See 48.2 (UK income retained in co); 48.3.4 (s.720 charge condition).

17 *Vestey v IRC* 54 TC 503 at p.562. Likewise *Canadian Eagle Oil v The King* 27 TC 205 at p.257: "for the purposes of Income Tax, the income of a foreign company and the income received from it in dividends by its British shareholders are not to any extent or effect one and the same income, but are two distinct incomes". Likewise *Anson v HMRC*[2015] STC 1777 at [92].

They are the same in substance or economic reality.

Thus there is *economic* double taxation but not *juridical* double taxation where:<sup>18</sup>

- (1) a company pays tax (typically corporation tax) on its profits, and
- (2) a shareholder pays tax (typically, income tax) on the dividend.<sup>19</sup>

For the purpose of distribution relief, one applies the broad economic view, not the formalistic view. This would be reasonably clear even in the absence of authority, because (on the formalistic view) it is impossible for T to receive the “same” income as OC.<sup>20</sup> But if authority is needed, see *Aykroyd*, discussed below.

HMRC agree. ToA draft guidance provides:

**INTM602440 Subsequent receipt of income**

... Issues can arise when

- [1] an individual who has been taxed under section 720 or section 727 ITA 2007 in relation to the income of a non-resident trust or company and
- [2] the entity concerned makes a subsequent distribution of income to the individual.

HMRC accept that generally the reference to income in ... sections 743 (2A) and (2B) can be construed to cover such situations...<sup>21</sup>

18 See 103.3 (Types of double taxation).

19 Of course there have over the years been a variety of arrangements to avoid or mitigate the economic double taxation.

20 The broad economic (as opposed to formalistic) view of income identity is also applied in other contexts in the transfer of assets code. In *Vestey v IRC* Walton J held that a shareholder had no “power to enjoy” the income of the company in which he held shares because (applying the formalistic view of income identity) the shareholders had power to enjoy *different* income! However, this view was rejected in the House of Lords. See 46.11.6 (Condition D: Possible benefit).

Similarly, the court looked at the economic substance in order to determine whether two assets were “the same” for the purposes of stamp duty subsale relief; see *Fitch Lovell v IRC* [1962] 1 WLR 1325.

21 The draft guidance continues:

**“INTM602520 Deductions and reliefs**

... Where the income of a foreign company has been subject to the income charge and subsequent dividend left out of account, it may be that the dividend is charged to tax by a UK paying agent such as a bank before being paid to the individual concerned. If this is the case relief should be given for that tax or repayment made,

Thus, even though OC’s income is distributed to T:

- (1) There is only one charge to income tax, the charge under s.720.
- (2) T has the benefit of tax credits or DT Relief relating to OC’s income.

At first sight this seems anomalous. If s.720 did not apply (eg because the individual owning OC was not the transferor or because the motive defence applied) then the position is quite different:

- (1) There will be two charges to tax if OC’s income is UK source:
  - (a) income tax on OC’s income paid by OC under ordinary principles; and
  - (b) income tax on the dividend paid to T.
- (2) T does not have the benefit of tax credits or DT Relief relating to OC’s income.

On reflection, this is not an anomaly. The object of s.720 is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647. This view is rightly accepted by HMRC (despite the irritation of the judge in *Anson v HMRC*<sup>22</sup> but the issue may not have been fully explained to him).

### 48.3.3 Company/subsidiary structure

In *Aykroyd v IRC*,<sup>23</sup> T (UK domiciled) held an offshore holding company (within s.720) which held an offshore subsidiary (within s.720). Diagrammatically:<sup>24</sup>

whichever is appropriate.”

But the former paying agent rules no longer apply, so that is of historic interest only.

22 [2012] UKUT 59 (TCC). For motive defence aspects of this case, see 49.47 (Motive/EU defence: Disclaimer).

23 24 TC 515.

24 More accurately, there were several holding and subsidiary companies, but nothing turns on that.

- (1) In 1936/7 the offshore subsidiary received income within s.720 (“the offshore subsidiary income”).
- (2) In 1937/8 the offshore subsidiary paid that income by way of dividend to the offshore holding company (“the offshore holding co income”). This income was also within s.720.
- (3) The transferor (“T”) was assessed on the offshore holding co income in 1937/8. T was not assessed on the offshore subsidiary income in 1936/7.

This was not an individual/company structure but a company/subsidiary structure, but in the context of distribution relief the identity issue is (more or less) the same.

T argued that T could be assessed at stage (1) and so could not be assessed at stage (2). T relied on distribution relief. *Aykroyd* accepted that distribution relief could apply to the sequence of two dividends:

If the Appellant had in fact been charged in the year 1936–37, he could not have been charged again in the year 1937–38.

More analytically, the 3 distribution relief conditions are satisfied:

- (1) Income is taken into account in charging income tax under s.720. This is the offshore subsidiary income.
- (2) The individual receives income. In this case (unlike the transferor/company structure) the individual does not in fact receive anything. However the individual is deemed to receive s.720 income.
- (3) The income which the individual receives is “that income”, ie
  - (a) the offshore subsidiary income; and
  - (b) the s.720 income which the individual is deemed to receiveare the same income. They are not the same income on the formalistic view, but they are the same income on the broad economic view, and that is the approach which is applied here.

HMRC agree. ToA draft guidance provides:

**INTM602380 Income to be taken into account once**

... Income that arises to a person abroad may be distributed to another person who is also a person abroad – for example a group company may make a distribution to its parent company. HMRC generally accept that in such situations the legislation should not be construed so as to effectively duplicate the amount of income that may be taken into

account for the transfer of assets provisions. In such situations it will be appropriate to consider to what extent the distribution and the underlying income from which is paid are the same income.

Specific cases of difficulty concerning the amount of income to be taken into account should be referred to SPT Trusts and Estates Technical ...

*Akroyd* concerned distribution relief, because at that time double-counting relief did not exist. But double-counting relief would now be another route to the same destination.

#### 48.3.4 *s.720 charge condition*

Distribution relief condition (1) requires that the income of the person abroad must be “taken into account in charging IT under section 720”. In *Aykroyd*<sup>25</sup> T failed because T had not been “charged”:

It was suggested that, if the [offshore subsidiary’s income] were liable to assessment for the year 1936–37, that provision [s.743(2B)] prevented them being chargeable in the following year. But that argument depended on the substitution of the word “chargeable” for the word “charged”. There is no ground that I can see for making any such substitution. ... as he had not been charged in the previous year, there was nothing to prevent him being charged in the year in question.

This does not mean that HMRC have an unfettered discretion:

- (1) to assess T on the subsidiary company’s income; or
- (2) to assess T on the holding company’s income.

Under self-assessment, T will normally self-assess T’s income and should in principle return the income of the offshore subsidiary as T’s income and distribution relief applies. However, where T does not pay tax due on the offshore subsidiary’s income HMRC can collect tax on the offshore holding company’s income and distribution relief does not apply.

Often it may not matter whether tax is charged on the offshore subsidiary’s income or the offshore holding company’s income. However, it may matter:

- (1) For identifying the source of the income to which s.720 applies. Is

---

25 See 48.3.2 (Identity of income condition).

the transferor taxed under s.720 in respect of the subsidiary's income or the holding company's income? This may affect:

- (a) Rates of tax, eg if the underlying company receives interest or rental income it may make a difference of 7.5% (the difference between the higher or additional rates and the dividend upper or dividend additional rates)
  - (b) Availability of transferor's credit for UK tax paid by the company and double tax relief
  - (c) Source of income
- (2) It may also affect the year in which the income is subject to tax.

Distribution relief does not apply where a dividend is paid out of pre-2008 income which qualified for the s.720 remittance basis, as that income was not taken into account in charging income tax.

#### 48.3.5 *Identifying relievable income*

Distribution relief applies only so far as the income of the company has been taken into account in charging income tax under s.720.

It may happen that:

- (1) the income of OC for company law purposes is greater than:
- (2) the income of OC for tax purposes  
(eg because of capital allowances).

For example, OC may have taxable income of 10, but accounting profits of 100. If OC declares a dividend of 100, then the charges to tax are:

- (1) IT on OC's income of 10 on T under s.720.
- (2) IT on the dividend on the amount of 90 (ie 100-10).

In these circumstances, the use of an offshore company does give rise to tax on the distribution which would not have arisen if there were no company.

#### 48.3.6 *Mixed fund of person abroad*

OC may have a mixed fund of

- (1) income charged under s.720 and
- (2) funds not charged under s.720.

It is considered that the company can by an appropriate resolution determine whether a distribution is from one source or the other.

If an offshore company pays a dividend out of a mixed fund which qualifies for distribution relief, it counts as an offshore transfer for the purposes of the remittance basis mixed fund rules.

Suppose OC receives £100 and spends £20 on expenses, but, the company having other assets available for distribution, £100 is nevertheless distributed. It is suggested that the dividend of £100 should be identified with OC's income of £100 and so qualifies for distribution relief in its entirety. The £20 spent on expenses is attributed to other assets, even though as a matter of tracing it was paid for out of the s.720 income.

The position is analogous to the rule that (prior to the statutory mixed fund rules) where an overseas mixed fund contained some UK source income, which had suffered UK tax, a taxpayer was entitled to remit that income in priority to foreign income which was assessable if remitted.<sup>26</sup>

#### 48.3.7 *Planning distribute if tax free*

Where distribution relief is available, it is generally worthwhile distributing income to the transferor ("T").<sup>27</sup> This may (in particular) apply where:

- (1) The person abroad has UK income (which is not protected income);  
or
- (2) The person abroad has foreign income within s720, eg if T is actually UK domiciled, so neither s.720 protected-trust relief nor the remittance basis apply.

Following the distribution, T (if not UK domiciled) may in principle re-settle the income, if desired.

If the income of the person abroad is not distributed to T during T's life, the benefit of distribution relief is lost, as distribution relief will not apply later.

### 48.4 **Double-counting relief**

---

<sup>26</sup> See 19.16.1 (Fund: taxed/untaxed income). It is also comparable to the rule that a debtor paying part of a debt may determine whether the payment is interest or capital; see 21.5 (Part payment: Interest or principal).

<sup>27</sup> This may also be done to avoid relevant income accumulating in a company held by a trust; see 47.35 (Income of co held by trust).

Section 743(1) ITA provides:

No amount of income may be taken into account more than once in charging income tax under this Chapter.

I refer to this as “**double-counting relief**”. This provision is broadly worded, and it is considered that it should be construed to prevent double UK taxation however it occurs:

- (1) Where two individuals are chargeable under s.731; ie where two different individuals receive benefits. The s.733 computation usually prevents a double charge<sup>28</sup> but if it fails to do so, then double-counting relief fills the gap.
- (2) Where T1 is charged under s.720 and T2 is charged under s.731.<sup>29</sup>
- (3) Where T1 is charged under general principles and T2 is charged under s.720 or s.731.
- (4) Where two individuals are charged under s.720; ie there are two transferors in relation to the same income of the person abroad. This could happen if:
  - (a) There are two transferors in relation to the same transfer, eg co-shareholder transferors
  - (b) Income arises to an individual as a result of two transfers by two individuals, eg if T1 transfers money to a person abroad, and T2 sells an asset to the person abroad.
- (5) Where one individual may be charged twice under s.720; or once under s.720 and once under general principles. In this area, double-counting relief overlaps with distribution relief, but it does not matter which relief applies.

In cases (1) to (4) the double tax charge concerns two different individuals. Section 743(2) ITA provides:

---

28 See 47.18.5 (Step 5: Available Relevant Income).

29 Before 2017, it was unusual that income could be taken into account under s.720 and s.731. Examples might be:

- (1) If income accrues which is not within s.720 because it is not remitted to the UK, then there is a charge under s.731, and then there is a remittance.
  - (2) If s.720 does not apply (because the transferor has no “power to enjoy”) but subsequently there is a capital payment within s.727.
  - (3) Another possible case is in 47.24 (s.720 income: Relevant income).
- After 2017 there are more circumstances where this could happen.

If there is a choice about the persons in relation to whom any amount of income may be taken into account in charging income tax under this Chapter, it is to be taken into account—

- (a) in relation to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and
- (b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

HMRC accept that this will allow an apportionment of less than 100% of the income of the person abroad. For instance, on the facts of *HMRC v Fisher*, the charge was based on the profits of the person abroad, allocated between 3 shareholders in proportion to their individual shareholdings in the person abroad, so in total, 76% of the profits of the person abroad was allocated to them.<sup>30</sup>

What would the position be if a majority shareholder (holding say, 65%) procured a transfer abroad, but there were no co-transferors? It would be fair and logical to apportion only 65%

#### 48.4.1 *Take “into account” for IT*

It is a requirement of distribution relief that income is taken into account in charging IT, and a similar rule applies for double counting relief.

Section 744 ITA provides:

- (1) References in section 743 (no duplication of charges) to an amount of income taken into account in charging income tax are to be read as follows.
- (2) In the case of tax charged on income under section 720 (charge where income enjoyed as a result of relevant transactions)—
  - (a) if section 724(1) (benefit provided out of income of person abroad) applies, they are references to an amount of the income out of which the benefit is provided equal to the amount charged, and
  - (b) otherwise they are references to the amount of the income mentioned in section 721(2) [the income of the person abroad<sup>31</sup>].
- (3) In the case of tax charged on income under section 727 (charge

---

<sup>30</sup> [2021] EWCA Civ 1438 at [25].

<sup>31</sup> See 46.10 (Condition A: Power to enjoy).

where capital sums received as a result of relevant transactions), they are references to the amount of the income mentioned in section 728(1)(a) [the income of the person abroad].

(4) In the case of tax charged under section 731 (charge to tax on income treated as arising to non-transferors where benefit received as a result of relevant transfers<sup>32</sup>), they are references to the amount of relevant income taken into account under section 733 (income charged under section 731) in calculating the amount to be charged in respect of the benefit for the tax year in question.

This lays down the rule for s.720/s.731 cases, but it does not rule out relief where an amount of income is be taken into account in charging IT on basic principles rather than under those sections.

48.4.2 *s.731 company structure*

Suppose:

- (1) An offshore company (“OC”) within s.720 receives income (“OC’s income”)
- (2) The transferor (“T”) is not a shareholder in OC but has power to enjoy the income<sup>33</sup>
- (3) P (a UK resident third party) owns all the shares<sup>34</sup>
- (4) The income of OC is distributed by way of dividend to P

Diagrammatically:

Possible charges to tax here are:

- (1) OC’s income is subject to tax in the hands of T (or T and OC) under s.720.
- (2) P is subject to tax on the dividend.

---

32 The words in brackets are not an accurate description of the s.731 benefits charge, following the extension of s.731 to transferors in 2017; but it does not matter.  
 33 T may have power to enjoy by holding a debenture or through being a beneficiary of the trust which holds OC. Similar points arise if T receives a capital sum.  
 34 The position is not materially different if the shares in OC are held in a trust under which P is life tenant, and to which s.624 ITTOIA does not apply.

Distribution relief does not apply because that relief only applies where OC's income is subsequently received by the transferor, T. The transferor credit and the transferee credit do not cover this situation. However, double-counting relief applies.

Before the enactment of double-counting relief in 1981, there was economic double taxation in these circumstances. In *Howard de Walden v IRC*:

[Counsel] pointed out that in so far as the right to enjoy income of the four companies is vested in the Appellant's son, who holds the majority of the shares,

[1] income received by the son will be taxed in his hands in the ordinary way and

[2] at the same time the Appellant will be liable to tax on the whole income of the companies which is deemed to be his.

This, said [counsel], involves double taxation since no relief is afforded by [distribution relief, now s.743(2B) ITA]. There is a short answer to this argument. There is no double taxation since the subject-matter of tax is different, the income of the son being one thing and the income of the companies being another.<sup>35</sup>

Counsel and judge were both right, but the answer depended on what was meant by double taxation. The situation is one of economic but not juridical double taxation. However, since the purpose of distribution relief is to avoid economic double taxation, fairness and the scheme of the Act suggest that double-counting relief should do the same work in this situation. It is considered that Lord Greene's comment does not support the contrary view.<sup>36</sup>

In practice this situation is rare, as T either has no "power to enjoy" and so is outside s.720, or else T is life tenant/shareholder, and receives the dividends personally, so distribution relief applies.

#### **48.5 s.720 trust/co structure**

So far we have been considering the (relatively) simple situation of an offshore company (or group) held directly by an individual (or an IIP

---

<sup>35</sup> 25 TC at p.131.

<sup>36</sup> *Howard de Walden* is of limited authority; see 45.2 (Construction of ToA provisions).

trust). We now turn to consider the common position, where an offshore company is held by a non-resident settlor-interested discretionary trust. That is, trustees of a discretionary trust within s.624 ITTOIA hold a non-resident company within s.720.

Diagrammatically:

Suppose:

- (1) Income is received by the OC (“OC’s income”).
- (2) OC’s income is distributed to the trustees as dividend income (“the trustees’ dividend income”).
- (3) The trustees distribute the income to the settlor.

Possible charges to tax here are:

- (1) OC’s income charged under s.720
- (2) The trustees’ dividend income charged under s.624 (but in practice protected trust relief is likely to apply)
- (3) The settlor’s trust distribution, charged under basic principles

Distribution relief prevents double taxation at stage (2) (if necessary, but that would be rare). It will be recalled that distribution relief applies if:<sup>37</sup>

- (1) OC’s income is within s.720
- (2) The trustees’ dividend income is received by T
- (3) The trustees’ dividend income is “that income” (ie the same income as OC’s income)

Condition (1) is satisfied. Condition (2) is satisfied because income is treated as received by T. Condition (3) is also satisfied: see 48.3.2 (“The same” income).

Distribution relief also prevents double taxation at stage (3). The trust income is received by T, and it is, for the purposes of distribution relief,

---

<sup>37</sup> See 48.3 (Distribution relief).

the same income as OC's income.

Double-counting relief<sup>38</sup> may also apply in a s.720 trust/company or company/subsidiary structure but where distribution relief covers the same ground, double-counting relief should not be needed.

#### 48.5.1 *Trust/co structure: HMRC practice*

RI 201 provides:

where income arises in an offshore company underlying a settlement and the income is not paid up immediately to that settlement the provisions of section [720 ITA] will be invoked where necessary to assess the income of the underlying company.

Under this practice, the position seems to depend on whether income is paid up "immediately".

- (1) *If the income is **not** paid up immediately.* The provisions of s.720 will be invoked. This is relatively straightforward.
- (2) *If the income **is** paid up immediately.* RI 201 implies that:
  - (a) s.720 will not be applied so the settlor/transferor will not be taxed on OC's income; and
  - (b) the settlor will be taxed on the trust income (as life tenant or under s.624, if applicable) instead.

Point (2) may be concessionary, and I do wonder if that consequence is actually intended. If so, an number of questions arise. What exactly the moment when one moves from (1) to (2): what is the meaning of "immediately"? Does it mean within a day? Or a week? Or the same tax year? Or at any time before the relevant returns are due, or submitted? Do HMRC have a discretion? Does the answer depend on the type of income? One must bear in mind that some forms of income cannot be quantified until the end of an accounting period (eg trading and rental income).

If income is distributed immediately, is the settlor taxed on OC's income or on the dividend? It makes a difference because OC's income may have a tax credit and the rates of tax may be different. By implication if s.720 is not "invoked" then the tax should be charged on the dividend.

This is a muddle. Perhaps HMRC are not concerned what the answers

---

38 See 48.4 (Double-counting relief).

are, as long as they can see that the income comes into tax, promptly, in one form or another.

#### 48.5.2 *Trust/co structure: Example*

Suppose in the trust/company structure illustrated at 48.5 (Section 720 trust/company and company/subsidiary structure) the company:

- (1) receives £100 income;
- (2) spends £20 of the £100 it received on expenses (not deductible for the purposes of s.720); and
- (3) distributes £80.

It is suggested that £100 is taxable at stage (1) and the £80 is tax free at stages (2) and (3). Close examination of RI 201 (see above) suggests HMRC might assess £20 at stage (1) and £80 at stage (2). I am doubtful whether the statement is meant to bear close examination, but it makes little difference in practice.

#### 48.6 **s.731 charge & income distribution**

I turn to consider double UK taxation issues relating to s.731. The transferor's credit, the transferee's credit and distribution relief only apply to s.720, so they have no relevance here.

Suppose:

- (1) trustees of a trust receive income and do not distribute it;
- (2) a beneficiary receives a benefit taxable under s.731;
- (3) the income is later distributed to the beneficiary as income.

It is understood that the distributed income is not taxed. This might be regarded as informal concession but the better view is that double-counting relief applies here.

#### 48.7 **s.720/s.731 overlap**

Suppose:

- (1) A transferor ("T") is taxed on income of a person abroad under s.720
- (2) A beneficiary ("B") within s.731 receives a benefit.

The starting point is that the income of the person abroad (although within s.720) is also relevant income;<sup>39</sup> but double-counting relief applies; see

---

39 See 47.24 (s.720 income: Relevant income).

#### 48.4 (Double-counting relief).

There are four permutations:

- (1) T and B are both arising basis taxpayers
- (2) T is a remittance basis taxpayer and B is an arising basis taxpayer
- (3) T is an arising basis taxpayer and B is a remittance basis taxpayer
- (4) T and B are both remittance basis taxpayers

#### 48.7.1 *T and B arising basis taxpayers*

EN ITA provides:

Where a non-UK domiciled individual transfers assets but is not chargeable to tax under section 739 ICTA [now s.720 ITA] owing to section 743(3) ICTA [the s.720 remittance basis, now replaced by the somewhat different s.735 ITA], there is no bar in HMRC's view on the application of section 740 ICTA [now s.731] to others who did not themselves make the transfer but were beneficiaries of it. HMRC interpret section 732 ITA in the same way.<sup>40</sup>

It appears from this that where the s.720 remittance basis does not apply (so the transferor is taxed under s.720 on an arising basis) there is a bar on taxing the beneficiaries under s.731. The reason is not given, but could have been:

- (1) The income was not relevant income; (but this was doubtful and is not the case from 2013)
- (2) Double-counting relief

Now HMRC practice has changed, and the rule to charge the transferor in priority to the beneficiary is said to be the normal rule but not an absolute one. ToA draft guidance provides:

**INTM602480 Just and reasonable basis**

Where there is a choice of individuals in relation to whom any amount of income of a person abroad may be taken into account in arriving at the amount of an income charge or benefits charge, it can sometimes be difficult to determine the amount of income taxable on each individual. To alleviate such difficulties, the legislation provides for the income to be apportioned on a 'just and reasonable' basis.

This is a sloppy summary of the issue, but what matters is the text which

---

40 See Change 105 in EN ITA Vol III, annex 1. The same point was made in RI 201.

follows:

How this is done will depend on the circumstances. For example,

[1] individual A may be chargeable on the whole of the income of an overseas company under the income charge.

[2] Individual B may receive a benefit from the same company that falls to be charged under the benefits charge.

In this situation the income of the company should only be taken into account once (INTM602380) and it will normally be just and reasonable to include the whole of the income arising as an income charge, as the individual who has sought to avoid tax in setting up the structure in the first place will be charged to income tax and will therefore suffer no inequity in bearing the full brunt of the legislation. In this example, individual B may not have a benefit charge for the particular tax year, although the benefit may be subject to a charge in a subsequent year (INTM601700).

However, there may be exceptional circumstances where the benefit charge is seen as being just and reasonable, for example where the income charge arises due to an individual receiving a loan from the person abroad which is repaid after a very short period so that there is no continuing liability on that individual.<sup>41</sup>

... Each case must be dealt with on its merits and the 'just and reasonable' basis is that which appears to be so to an officer of Revenue and Customs. Appeals against such decisions are the jurisdiction of the Tribunal ...

In practice there will be few if any cases where the beneficiary is taxed instead of the transferor.

#### 48.7.2 *T remittance basis, B arising basis taxpayer*

The EN ITA passage cited above shows that HMRC have historically regarded B as taxable. Before the 2008 reforms T was wholly exempt on income not received in the UK, so that was sensible and probably correct. Since 2008 the position has changed, as T is now taxable on the income on a remittance basis. It is probably just and reasonable to tax B on an arising basis, in accordance with standard practice.

From 2017 this will not usually arise, as s.720 protected-trust relief will usually prevent a s.720 charge.

#### 48.7.3 *T/B remittance basis users*

There is no guidance on the position where T is taxed on the s.720 remittance basis and B is taxed on the s.731 remittance basis. It is

---

41 Author's footnote: This does seem factually unlikely.

suggested that it is just and reasonable to tax whoever is first taxable, ie to tax T if the income is remitted but to tax B if the benefit is remitted without a remittance of the income. The contrary is arguable.

From 2017 this will not usually arise, as s.720 protected-trust relief will usually prevent a s.720 charge.

## 48.8 Benefits exceed relevant income

ToA draft guidance provides:

### **INTM602480 Transfer of assets: General provisions: Just and reasonable basis**

...

Where more than one individual is subject to the benefits charge in respect of benefits which they receive in the same year, it will be necessary to apportion the relevant income (INTM601680) among the individuals. Only by considering the facts of the particular case will it be possible to decide fairly the amount of income to be treated as arising to each individual and subject to the benefits charge. In cases where the total benefits are fully covered by the relevant income, each individual will be potentially subject to charge on the amount or value of the benefits received. Where the relevant income is less than the total amount or value of the benefits, the most appropriate apportionment of the relevant income is by reference to the ratio of the benefits received by each individual in the year to the total of the benefits provided in the year.

However, in a case where it was clearly intended that A's benefit be provided out of the relevant income of the year, and B's benefit out of that of a subsequent year (if, for example, A's benefit was paid three quarters through the year and represented the whole income of the year, while B's benefit was paid nearly at the end of the year to deal with some unexpected contingency) then A might justifiably be taxed on the whole of the benefit in the year of receipt, and B taxed in subsequent year.

## 48.9 Co-transferors within s.720

ToA draft guidance provides:

### **INTM602480 General provisions: Just and reasonable basis**

...

When looking at the just and reasonable basis for apportionment, where there is more than one individual with power to enjoy the income of the

person abroad, account should be taken as to who actually made, procured or was associated with the transfer as these parameters may affect the quantum and the nature of the charge. In addition, it is necessary to have regard to the intended outcome of the arrangements which have resulted in income becoming payable to a person abroad.

For example, if

[1] individual X subscribes for shares in a Jersey company for £1000 and

[2] individual Y enters into a service agreement with that company, then each individual may be subject to the income charge.<sup>42</sup> However, it may well be that the asset of real value is the service agreement and that should be reflected in any apportionment of the income between the individuals.

I would have said that:

- (1) The £1k was nominal and no income arose as a result of that transfer.
- (2) The service agreement is (one can assume) substantial and all the income of the person abroad arose from that transfer and is assessable on Y.<sup>43</sup>

There is no double charge, and double-counting relief is not needed.

The Manual continues:

Where the same assets are transferred by several individuals the transferors would normally be assessed in proportion to their share of the assets transferred.

For example, where shares of a UK company are held by three individuals in the proportions 40%, 40% and 20% and there is liability under Section 720 ITA 2007 in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three shareholders in proportion to their respective holdings.

This example demonstrates both the requirement to avoid duplication of charge (INTM602380) and the 'just and reasonable' basis.

The example is not a case where "the same assets are transferred by several individuals". Again, double-counting relief is not needed as there no overlap here: each transferor is only charged on income arising as a result their own transfer. The end result is the same.

---

42 Author's footnote: It is assumed X and Y have power to enjoy.

43 See 45.10 (Income of person abroad: Causation).

## 48.10 Life policies

In *IRC v Willoughby* 70 TC 57 Professor Willoughby (“T”) transferred assets to a non-resident life insurance company as a premium for a life policy. T was not taxed on the income accruing to the insurance company as the motive defence applied. Had the defence failed, there would in principle have been double taxation:

- (1) T would pay income tax on income arising to the life insurance company (to the extent that it arose as a result of T’s premium); and
- (2) T would pay income tax on the gain arising from the policy under the chargeable event provisions.

HMRC argued that relief was available under two provisions: s.547(2) ICTA and distribution relief.

The Special Commissioner rightly rejected the argument that distribution relief applied:

... [s.743(2B) ITA] only relieves from tax income which is subsequently received by an individual whose income it has been deemed to be in earlier years under [s.720 ITA].<sup>44</sup>

The s.720 income is not the same as the chargeable event income.

Section 547(2) ICTA then provided:

Nothing in subsection (1) above [deeming chargeable-event gains to be taxable income] shall apply to any amount which is chargeable to tax apart from that subsection.

The Commissioner rightly dismissed the argument that this conferred relief:

So far as double taxation is concerned, in my view s.547(2) [ICTA does] not provide relief. [It] gives relief if the amount of the gain arising in connection with a policy on the happening of a chargeable event, which is deemed to form part of the individual’s total income for the year in which the event happens, is chargeable to tax apart from subs (1) of s 547. This does not provide relief for the taxation of income under s.739 [ICTA] in the years before the chargeable event occurs.

That is not the end of the story, as the Tax Law Rewrite expanded the

---

<sup>44</sup> *IRC v Willoughby* 70 TC 57 at p.84.

scope of the relief. Section 527 ITTOIA provides:

- (1) This section applies if the whole or part of any receipt or other credit item is taken into account in calculating both—
  - (a) the amount of a gain treated as arising under this Chapter, and
  - (b) an amount on which income tax is charged otherwise than under this Chapter or on which corporation tax is charged.
- (2) The amount of the gain on which tax is charged under this Chapter is reduced by so much of the amount of that receipt or other credit item as is taken into account in both those calculations.

It appears from EN ITTOIA change 95 that this change was intended to benefit traders in policies<sup>45</sup> but it could arguably apply here. There is also a hint in *Willoughby* at p.84 that relief may be available by concession, but that would obviously not bind HMRC. In practice, fortunately, it will be rare for the ToA rules apply to income arising as a result of policy premiums or other payments to life companies.<sup>46</sup>

---

**45 “Change 95: Gains from contracts for life insurance etc: reductions for sums chargeable to tax apart from section 547(1) of ICTA: section 527**

This clarifies the meaning of the exception from the charge to tax under section 547(1) of ICTA given by section 547(2) of ICTA for any amount chargeable to tax apart from section 547(1) of ICTA.

Section 547 of ICTA deals with the method of charging chargeable event gains to tax. This differs according to the person who is interested in the policy. For example, under section 547(1) of ICTA where the rights in a policy or contract are held by an individual as beneficial owner the gain forms part of the individual’s total income. However, section 547(2) of ICTA states “Nothing in subsection (1) shall apply to any amount which is chargeable to tax apart from that subsection.”

In practice, the words “amount which is chargeable to tax” in section 547(2) of ICTA are taken to mean the amount of the receipts and credits taken into account for the purposes of ascertaining the overall taxable profit under another provision, rather than the actual amount that is charged to tax under another provision, which in the case of a trader, for instance, will be the net profits of the trade.

Section 527 which rewrites section 547(2) of ICTA makes it clear that the amount chargeable to tax under Chapter 9 of Part 4 of this Act is reduced by the amount of the receipt or other credit item that is taken into account in calculating the amount on which income tax is charged otherwise than under Chapter 9 of Part 4 or the amount on which corporation tax is charged.”

46 See 62.10.5 (Income of life company).

52.13.2 (TiS/ToA motive defence compared)

### **49.1 Motive defence: Introduction**

Sections 736 - 742 ITA provide a defence to the ToA provisions which I call the “**motive defence**” (or where comparing it to other unallowable purpose tests, “the ToA motive defence”).<sup>1</sup> ToA draft guidance calls it “the avoidance purpose exemption”. It is an early example of what would now be called a TAAR.<sup>2</sup>

In 2009 HMRC issued a discussion document, “Simplifying Unallowable Purpose Tests”<sup>3</sup> which included draft guidance (“**Unallowable Purpose Tests Draft Guidance**”). Nothing further came of the proposal, but the

---

1 A note on terminology. The word “motive” is not used in the legislation, and is perhaps not ideal because a distinction is sometimes drawn between purpose and motive. However the label is convenient, reasonably accurate, and is standard in modern case law, eg *HMRC v Fisher* [2021] EWCA Civ 1438. It originates from the Inland Revenue’s Notes on clause 18 Finance Bill 1936

[https://www.kessler.co.uk/wp-content/uploads/2014/07/1365\\_001.pdf](https://www.kessler.co.uk/wp-content/uploads/2014/07/1365_001.pdf)

2 See 2.10.3 (Types of TAAR).

guidance is discussed here where relevant.

#### 49.1.1 *Motive defence terminology*

Section 736(3) ITA provides two self-explanatory terms:

In this section and sections 737 to 742—

“**post-4 December 2005 transaction**” means a relevant transaction effected on or after 5 December 2005, and

“**pre-5 December 2005 transaction**” means a relevant transaction effected before 5 December 2005.

In this chapter:

- (1) “**Old Conditions A and B**” are conditions A and B in s.739 ITA (applying to pre-5 December 2005 transactions).
- (2) “**New Conditions A and B**” are conditions A and B in s.737 ITA (applying to post-4 December 2005 transactions).

References to Condition A or B (without more) means either the old or the new version of the Conditions.

There have been two explanations of the 2006 clauses:

**EN Draft Clauses (2005):** Explanatory Notes on Draft Clauses, 5/12/05

**EN FB 2006:** Explanatory Notes on the Finance Bill 2006

I distinguish between:

- (1) An “**innocent**” transaction, which satisfies the motive defence (in short, no tax avoidance purpose).
- (2) A “**tainted**” transaction, which does not satisfy the motive defence.

For the definition of “**relevant transactions**” see 45.12 (Why associated operations matter).

#### 49.2 **Motive defence condition A**

Section 737/739 ITA provide:

##### **s.737: New conditions**

- (1) This section applies if all the relevant transactions are post-4 December 2005 transactions.

##### **s.739: Old conditions**

- (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.

(2) An individual is not liable to income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs—

(2) [Identical]

- (a) that Condition A is met, or
- (b) in a case where Condition A is not met, that Condition B is met.<sup>4</sup>

that condition A or B is met.

Section 737/739 ITA set out Condition A:

**s.737: New condition A**

**s.739: Old condition A**

(3) Condition A is that it would not be reasonable to draw the conclusion, from all the circumstances of the case,<sup>5</sup> that

(3) Condition A is that

the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

**49.3 Motive defence condition B**

Section 737(4)/739(4) ITA set out Condition B:

**s.737(4): New Condition B**

**s.739(4): Old Condition B**

Condition B is that—

Condition B is that the transfer and any associated operations—

4 The reader may think this is rather a clumsy way to say “A or B”. No doubt “or” can have an inclusive and an exclusive sense: so “A or B” can mean “A or B or both” or “A or B but not both”. But the context will normally clarify the meaning, as it does in Old Condition A. But there it is.

5 See App.2.21 (Reasonable-to-assume).

(a) all the relevant transactions were genuine commercial transactions (see section 738), and

(a) were genuine commercial transactions, and

(b) it would not be reasonable to draw the conclusion, from all the circumstances of the case,<sup>6</sup> that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

(b) were not designed for the purpose of avoiding liability to taxation.

#### 49.4 Enactment history

The original wording was much simpler. It provided exemption if:

the transfer and any associated operations were effected mainly for some purpose other than the purpose of avoiding liability to taxation.<sup>7</sup>

Sir Terence O'Connor (then Solicitor-General) explained why the text was changed in 1938 to (what is now) Old Conditions A & B:

A taxpayer<sup>8</sup> transferred a large amount – he was not one of the small people for whom my hon. and learned Friend was pleading – of foreign securities to a trust company abroad on certain trusts under which the income was to be accumulated until the death of the taxpayer. There

6 See App.2.21 (Reasonable-to-assume).

7 Section 18 FA 1936. Section 28 FA 1938 substituted the text which is now Old Conditions A and B.

8 The Inland Revenue accepted at that time that (what is now) s.720 only applied if the transferor was UK resident at the time of the transfer. If the transferor was UK resident, one can see why the Revenue found the successful motive defence claim troubling.

The remittance basis position in the case is unclear. Quite possibly, the taxpayer (had he not made the transfer of assets) would have qualified for the remittance basis, but accepted that the remittance basis did not apply under the then transfer of asset rules; the current s.720 remittance basis was only introduced in 1981. That may have made the taxpayer's claim for the motive defence more persuasive.

Conceivably, the taxpayer (had he not made the transfer of assets) would have been taxed on the arising basis (eg if the income in point was UK source income) in which case the successful motive defence claim would have been even more troubling.

was a discretion to the trustees to pay certain portions of the income to the taxpayer or to his son. The deed gives to the taxpayer and his son power, with the consent of the trustees, to revoke the trust, or, alternatively, they can withdraw all or any part of the trust property for their own benefit. The trust income has been accumulated, and none of it has been distributed.

The vigilant Revenue authorities pursued this taxpayer, and he contended, successfully, as it transpired, on appeal, that the foreign trust was born because of his fears as to the financial position of this country and the dangers of the situation on the Continent ... in 1936. He stated that he wanted to find a stable country where he could make safe provision for his family. The Special Commissioners decided that the main purpose of the transaction was occasioned by A's pessimistic view of the European situation at the time; that, arising out of that, his main intention was to make provision for his family in a safer country; and that, if there was any intention of avoidance of taxation, it was incidental to the main purpose. They therefore decided that there was no liability under Section 18 FA 1936. That instance has only to be cited to the Committee for the Committee to realise that on this particular matter the hon. Member for Chesterfield (Mr. Benson) was a true prophet in 1936, when he said that the word "mainly" would be too wide.<sup>9</sup>

A case on similar facts might still succeed today, but the test is stiffer. The taxpayer would need (in short) to show that tax avoidance was not even one of the purposes of the transfer.

It would be sensible to align the wording of Condition A "(the purpose or one of the purposes") with standard modern TAAR wording, which is "main purpose or one of the main purposes".<sup>10</sup> But the change does not seem likely to happen.

#### **49.5 "Commercial": Undefined sense**

Commercial is a requirement for Condition B but not Condition A.

In Old Condition B the term is not defined. For a general discussion see

---

<sup>9</sup> Hansard 27 June 1938, col 1610. It is noteworthy that an income tax dispute on the FA 1936 provision was resolved by a Special Commissioners' decision by early 1938 (even allowing for the fact that the 1936 Act operated retrospectively to 1935/36).

But the same arrangement today would be caught by s.624.

<sup>10</sup> See 2.11 ("Main" purpose),

App.5.2 (Commercial). In New Condition B there is a complex definition which is considered in the next section.

#### 49.5.1 *Making/managing investments*

RI 201 provides:

The expression “bona fide commercial” in [Old Condition B] is taken to apply

[1] only to the furtherance of trade or business, and

[2] not to the making or managing of investments.<sup>11</sup>

ToA draft guidance provides:

##### **INTM603020 Commercial transactions**

... In this context, HMRC have treated ‘commercial’ as applying only to the furtherance of trade or business, and not to the passive holding of investments (RI 201 refers).

Proposition [2] (that “commercial” does *not* apply to making or managing investments) is untenable:

- (1) The statement does not say what the position is if the making or management of investments constitutes a business. A transfer may be both in the furtherance of a business *and* in the course of making or managing investments.<sup>12</sup> The intended meaning seems to be that investment transactions in the course of a business are commercial, but investment transactions which are not in the course of a business are not commercial. The (elusive) concept of business is distinct from the concept of what is commercial.
- (2) More fundamentally, making or managing investments *is* generally

---

11 RI 201. This was perhaps the view of the drafter of s.724 CTA 2010 which refers to transactions:

“(a) for genuine commercial reasons *or* (b) in the ordinary course of making or managing investments.”

But para (b) might have been added for the avoidance of doubt, or for some exceptional case, and it is not clear that the drafter really thought that making or managing investments would not usually be commercial.

12 The proposition that making or managing investments may constitute a business is self-evident; but if authority is needed, see s.105(3) IHTA which refers to the business of making or holding investments; and s.1218 CTA 2009 which refers to “a company whose business consists wholly or partly of making investments”.

regarded as “commercial” even if it does not constitute a business. What can be more “commercial” than the management to maximise investment return? This point is recognised in *Lewis v IRC*:

It is trite law that in exercising their duties trustees must use as much diligence as a prudent man of business ... Faced with the self-investment problem their duty was to act in a business-like manner: this they did. Put another way, they acted commercially as was their duty. In our view it would be construing the statute too narrowly to hold that they did not carry out the transactions for bona fide commercial reasons, unless an investment decision cannot be for commercial reasons.<sup>13</sup>

- (3) Section 738(4) ITA assumes that making/managing investments may be “commercial” (in the ordinary sense of the word).<sup>14</sup>

Proposition [1] (that the expression “commercial” applies *only* to the furtherance of trade or business) was put to the Commissioners in *Carvill*, where it obtained some support.<sup>15</sup> Nevertheless, it is too narrow. In practice, commercial transactions will normally further trades or businesses so the issue will not often arise. But there are counter examples, as discussed above: making or managing investments is in principle a commercial transaction even if it is not in the course of a business.

The most that can be said is that a transaction which is not in furtherance of a trade/business is less likely to be commercial than one which is in furtherance of a trade/business, but this factor is not decisive.

#### 49.5.2 *Commercial: Whose viewpoint?*

From whose viewpoint does one assess commerciality? The answer is that it should be looked at from the viewpoint of the transferor, but it would be an unusual transaction under which one party is and another party is not acting commercially. In *IRC v Willoughby* HMRC accepted that bonds were commercial transactions for Royal Life who issued them, but argued that they were not for Professor Willoughby who acquired them. The

---

13 [1999] STC (SCD) 349 at p.362.

14 See 49.6.3 (Investments restriction).

15 See [App 5.2.3](#) (Business transaction).

Special Commissioner did not agree:

If a contract is entered into by two people and it is a bona fide commercial transaction for one of them, it cannot be not a bona fide commercial transaction for the other party to the contract in the absence of any reason for impeaching the latter's good faith.<sup>16</sup>

The point was not discussed on appeal. But the reference to "good faith" gives sufficient wriggle-room, if a Court wishes to avoid the reasoning.

#### **49.6 "Commercial" in New Condition B**

Section 738 ITA contains a definition of "commercial" for the purposes of New Condition B. The definition is artificial in that it excludes some transactions that are "commercial" in the normal sense of the word. So New Condition B is narrower than Old Condition B.

Section 738(1) ITA provides:

For the purposes of section 737, a relevant transaction is a commercial transaction only if it meets the conditions in subsections (2) and (3).

Is s.738 an *exhaustive* definition of "commercial" or is it merely a partial, exclusory definition? That is, if a transaction meets the requirements set out in the section, is it necessarily "commercial" or must the transaction also be "commercial" in the ordinary sense of the word? The wording in s.738(1) ("a ... transaction is a commercial transaction only if ...") could be read as an exhaustive or a partial exclusory definition. It is suggested that s.738 is an exhaustive definition. The legislation is intended to make the law clearer, and a partial definition does not do that. In practice it is difficult to think of a transaction which meets the definition which is not commercial in the ordinary sense of the word, so the issue may not arise.

##### *49.6.1 Course of business*

Section 738(2) ITA sets out the first requirement of "commercial":

It [the relevant transaction] must be effected—

- (a) in the course of a trade or business and for its purposes, or
- (b) with a view to setting up and commencing a trade or business and for its purposes.

---

16 70 TC 57 at p.86H.

In the following discussion I use the word “business” to mean “trade or business”.<sup>17</sup>

At first sight this more or less encapsulates the natural meaning of “commercial”. But in fact it is restrictive. An individual may make an investment which is not in the course of a business, eg a purchase of a company. This is commercial in the general sense of the word, but it is not “commercial” within the new definition. Section 738(2) thus gives effect to HMRC’s proposition [1] of the meaning of “commercial” in Old Condition B.<sup>18</sup>

If a transaction is made between X and Y, it may be in the course of a business of X but not in the course of a business of Y. For example, if Y (an individual) subscribes for shares in X Ltd, an investment company, the issue of shares may be in the course of the business of X Ltd. That is sufficient to meet the requirement of s.738(2).

#### 49.6.2 *Arm’s length requirement*

Section 738(3) ITA sets out the second requirement of “commercial”:

It [the relevant transaction] must not—

- (a) be on terms other than those that would have been made between persons not connected with each other dealing at arm’s length, or
- (b) be a transaction that would not have been entered into between such persons so dealing.

The drafting is based on IHT arm’s length transaction relief<sup>19</sup> but that does not shed much light on the issues here.

Taken literally, this would seem to exclude an interest free loan to a wholly-owned company (even if it is a trading company). Such loans are commercial in the normal sense of the word. One wonders whether that was foreseen by the drafter. EN Draft Clauses (2005) claims that the change merely “clarifies and confirms” the correct interpretation of the existing statute. But I don’t think anyone should take any notice of that.<sup>20</sup>

---

17 For HMRC views on what constitutes a business, see CG Manual para 65715 [April 2011] and Shares and Assets Valuation Manual para 111110 [July 2013].

18 See 49.5.1 (Making/managing investments).

19 See 70.12 (Arm’s length transaction).

20 See App.1.2 (Clarify/modernise/reform).

It is suggested that the provisions should be construed purposively, so that an interest free loan to a wholly-owned company *is* a commercial transaction.

A dividend is a commercial transaction, as such transactions are often entered into between companies and minority shareholders (who are in principle not connected to the company).

In *Hoey v HMRC* an interest-free loan from an offshore EBT to a beneficiary was held to meet this requirement; but on appeal the decision (described in this book as “surprising”) was held to be flawed.<sup>21</sup>

ToA draft guidance provides:

**INTM603020 Commercial transactions**

... The above provisions [s.738(2)(3)] ensure that transactions taking place other than at arm’s length will not satisfy the terms of Condition B. This will prevent individuals claiming exemption on contrived grounds of ‘commerciality’.

[1] An example of this might be where an offshore company is established as a conduit or ‘money box’ for personal fee income.

The metaphors of conduit and moneybox are imprecise, but I take this example as a reference to the arrangement in *Brackett v Chater*,<sup>22</sup> where the transfer of assets was that T entered into a service contract, at an undervalue, with a non-resident company which was held by a settlor-interested discretionary trust made by T. This is an example of a transfer which fails the commerciality test of s.738(3)(a). On the other hand, that contract was not a commercial transaction in the ordinary sense, and the commissioners rejected the taxpayer’s argument that the motive defence applied, so this is not a case where the new definition was needed, or would have made any difference.

[2] It will also prevent claims that the establishment of a non-resident family trust was for ‘commercial’ reasons.

The statutory definition is not needed here: no-one suggests that the

---

21 [2019] UKFTT 489 (TC) at [159]; [2021] UKUT 82 (TCC) at [243]-[246]. For other aspects of this case, see 49.34 (Employee benefit trusts).

22 60 TC 134 & 639.

establishment of a family trust is “commercial” in any sense.<sup>23</sup>

[3] HMRC accept that the creation of some trusts will satisfy the ‘commerciality’ tests, for example an employee benefit trust established for the benefit of a group of employees and funded on arm’s length terms.<sup>24</sup>

### 49.6.3 *Investment managers*

Section 738(4) ITA restricts the definition of commercial by restricting the definition of “trade or business”:

For the purposes of subsection (2),

[1] making investments,

[2] managing them or

[3] making and managing them

is a trade or business only so far as—

(a) the person by whom it is done, and

(b) the person for whom it is done,

are persons not connected with each other and are dealing at arm’s length.

ToA draft guidance provides:

#### **INTM603020 Commercial transactions**

...The aim of this is to distinguish between asset management activity (which is a business chargeable for reward) and merely holding assets for possible increase in value.

Section 738(4) uses layman’s language, but I think the references to making/managing investments by one person for another are references to the activities of an investment manager<sup>25</sup>, because an investment manager makes/manages investments for another person. So:

- (1) If the person abroad is a company carrying on the business of making investments through an investment manager:
  - (a) the person by whom it (the investment business) is done is the investment manager

---

23 See App.5.2.2 (Bounty (gratuitous intent)).

24 See 49.34 (Employee benefit trusts).

25 or broker; in this paragraph I use the term “investment manager” to include a broker.

- (b) the person(s) for whom it (the business) is done is the company,
- (2) If (less likely) the person abroad is a company carrying on the business of an investment manager:
  - (a) the person by whom it (the investment management business) is done is the company
  - (b) the person(s) for whom it (the business) is done is the customers (principals) of the company

In each case, a transfer to the company is only commercial if the two are unconnected and at arm's length.

In the person abroad carries on business without an investment manager/broker, this paragraph does not apply and can be ignored.<sup>26</sup>

If s.738(4) applies, the making/managing of investments is only business "so far as" it is done for unconnected persons. Normally an activity is or is not a business: it cannot be a business to a limited extent. Perhaps the activity is to be split and regarded as part business and part non-business.

What if a business is initially carried on through connected persons and later becomes carried on through unconnected persons, (or vice versa)? It is suggested that the question whether a transfer is commercial is decided by the circumstances at the time of the transfer, though one might look at the position in the round including considering how later matters were then intended and actually took place.

The subsection does not apply to a company *trading* in financial assets since these are not "investments".<sup>27</sup> But a company carrying on an financial trade with a UK investment manager needs to consider the IME, which imposes requirements comparable to being unconnected.

Suppose T subscribes for shares or debentures in (or makes a loan to) an investment company. The transaction satisfies s.738(2) since the company is carrying on a trade or business. The transaction satisfies s.738(3) if it is on arm's length terms. The business satisfies s.738(4) unless the company's business is conducted through connected agents. It does not

---

26 Except in the case of a business carried on by an agent, a business is not in normal English "done for" anyone. For example, a property business it is not done for the tenants; the business of buying and selling shares is not done for counterparty vendors and purchasers.

27 See 68.14.1 ("Investment": Terminology).

matter that T and the company are connected.

#### 49.6.4 “Commercial”: Critique

When one contemplates the difficulties raised by the statutory definition, one appreciates the wisdom of the 1938 drafter in leaving “commercial” undefined. The word “commercial” is often used motive defence tests<sup>28</sup> and nowhere else is it defined. It is suggested that the statutory definition of commercial in s.738 ITA serves no useful purpose, and unless some purpose can be identified, it should be repealed.

### 49.7 Meaning of “avoidance”

#### 49.7.1 Avoidance/mitigation distinction

The clear<sup>29</sup> articulation of the *concept* of an avoidance/mitigation distinction goes back only to the 1970s<sup>30</sup> and the concept originated from economists, not lawyers. In 1973 Sandford wrote:

A government may have one of three attitudes to a particular ‘avoidance’ measure – using the wide definition of avoidance. It may welcome it; the government may have deliberately offered a tax concession to promote some objective, e.g. tax concessions on mortgage interest ... in order to encourage owner-occupation; or investment and initial allowances to stimulate new investment in development areas. Second, without having sought positively to encourage a particular ‘avoiding’ action the government may find it entirely acceptable as when an income tax payer reduces his tax liability by taking a wife or having children; or when a person on retirement transfers savings from

---

28 See 2.10 (TAAR/unallowable purpose test).

29 One can find some earlier examples: *Mangin v IRC* [1971] AC 739 is a moderately clear example; the concept is embryonically present in *Newton v CT* [1958] AC 450. But these cases do not draw the line as clearly or quite on the same basis as Sandford and modern cases following him.

30 In 1946, Wrottesley J was unaware of it. Discussing the motive defence, he said: “There cannot, I think, be two opinions as to what ‘avoiding’ means. Where what is to be avoided is a liability, it must mean to evade, or to keep out of the way of, whether it be as in Richard III, ‘The censures of the carping world’, or anything else unpleasant that might befall a man, such as a tax”: *Congreve v IRC* 30 TC 163. This is describing avoidance in the loose or etymological sense (including mitigation).

a building society to some other form of investment in order to reclaim income tax.<sup>31</sup>

Third, the government may deplore certain actions as contrary to its intentions; the action is in accord with the letter of the law but not its spirit. *Only actions in this third category should rank as 'avoidance'*.<sup>32</sup>

The use of the *terminology* avoidance/mitigation to express this distinction is an innovation of Lord Templeman in 1986.<sup>33</sup> The expression “tax avoidance” has very often been used in the loose sense, meaning or including mitigation.<sup>34</sup> The reason may be either that the author does not

31 Child allowance was abolished in 1979, and one can now reclaim tax deducted from building society interest; but that does not spoil the validity of the examples.

32 *Hidden Costs of Taxation*, IFS, 1973, p.113 (emphasis added). Sandford proposed a second requirement of “avoidance” which he related to the taxpayer rather than to the legislature:

“It is reasonable to confine ‘avoidance’ to action which results in the would-be avoiders substantially achieving the objective to which the tax had become an obstacle. Let us give some examples. If a man ceases to buy cigarettes because of tobacco tax he has not achieved his pre-tax objective, i.e. to smoke. Buying sweets instead of cigarettes therefore, is not avoidance. Again, if a taxpayer decides to use most of his wealth for a consumption spree because estate duty makes it not worth while saving for heirs, he is not ‘avoiding’ for he has abandoned his objective of passing property to heirs. On the other hand, if he reacts to estate duty by making *inter vivos* gifts (assuming he survives for seven years), this is avoidance; it has achieved, though by a more circuitous route, the objective of passing to heirs an intact property.”

This is problematic, because there is no obvious way to identify the “objective to which the tax has become an obstacle”, and it has not been adopted into the law.

33 *IRC v Challenge* [1986] STC 548. Lord Templeman was describing a concept relatively new to tax jurisprudence and framing terminology altogether new to describe it. But in accordance with the (according to Austin, “childish”) declaratory theory of law, he did not say so.

34 C.T. Sandford:

“Amongst tax practitioners the generally accepted definition of avoidance ... is any legal method by which a person can reduce his tax bill... this definition can cover almost anything... I can legally reduce my income tax bill by buying a more expensive house (on which I get additional mortgage interest relief), getting married, having more children, taking out more insurance or simply stopping work.”

(*Hidden Costs of Taxation*, IFS, 1973).

have any avoidance/mitigation distinction in their mind or (if they do) that they are not using the modern terminology to express it. Even now, the term “tax avoidance” is sometimes still used in a loose or etymological sense to include mitigation but nowadays this usage is sometimes jocular, which suggests that the technical meaning has seeped into public consciousness.<sup>35</sup>

Likewise “mitigation” was and sometimes still is used in the sense of “avoidance”.<sup>36</sup>

In this book I use the words “avoidance” and “mitigation” in the strict sense. It would be convenient to have a neutral term to describe both avoidance and mitigation (what is described above as the loose etymological sense of “tax avoidance”). There is no agreed term, but “tax reduction”,<sup>37</sup> “tax saving”, “tax planning” and “tax advantage” might all be used in this sense. It may be less confusing if less elegant to refer to “avoidance/mitigation” where one wishes to refer to the two.

#### 49.7.2 “Avoidance” in motive defence

The House of Lords decided in *IRC v Willoughby* that “avoidance” in the motive defence means tax avoidance in the strict sense and not mitigation:

... it was essential to understand what was meant by “tax avoidance” for the purposes of [the ToA motive defence]. Tax avoidance was to be

---

35 The author once saw an advertisement for PEPs: “Be a tax avoider!” (PEPs were a tax free investment now replaced by ISAs.) For another example, see *Board of Inland Revenue v Hoe*, A.P. Herbert’s *More Uncommon Law*: “Evidently those who do not smoke or drink are ... avoiding taxation.”

36 eg C.T. Sandford wrote in 1973 that tax avoidance (in the strict sense) “is often referred to by expressions such as tax planning or tax mitigation”: *Hidden Costs of Taxation*, IFS, 1973, p.104. *Craven v White* 62 TC 1 at p.203 (a requirement of *Furniss v Dawson* is that a transaction “had no other purpose than tax mitigation”).

37 INT Manual provides:

**208010 Introduction to the motive test** [May 2012]

... Despite numerous valiant attempts there has never been a consensus about what is meant by ‘tax avoidance’ ...

The [CFC] motive test attempts to solve the first problem by avoiding any mention of the term ‘tax avoidance’, settling instead for the rather more neutral concept of a ‘reduction in tax’ ...

distinguished from tax mitigation.<sup>38</sup>

This would have surprised those who framed the legislation in 1936/8; they were unaware of any avoidance/mitigation distinction. But the enormously increased complexity of the tax system since 1936 makes the distinction sensible, perhaps necessary:

One of the traditional functions of the tax system is to promote socially desirable objectives by providing a favourable tax regime for those who pursue them. Individuals who make provision for their retirement or for greater financial security are a familiar example of those who have received such fiscal encouragement in various forms over the years. This, no doubt, is why the holders of qualifying policies, even those issued by non-resident companies, were granted exemption from tax on the benefits received. In a broad colloquial sense tax avoidance might be said to have been one of the main purposes of those who took out such policies, because plainly freedom from tax was one of the main attractions. But it would be absurd in the context of [the motive defence] to describe as tax avoidance the acceptance of an offer of freedom from tax which Parliament has deliberately made.<sup>39</sup>

HMRC accepted that the purchase of an ordinary offshore bond should be taxed under the chargeable event provisions and not under the ToA provisions. The most obvious way<sup>40</sup> to reach that result is to give a narrow meaning to tax avoidance and so to widen the motive defence

### 49.7.3 *Purpose of tax evasion*

Suppose an individual transfers assets abroad with the dishonest purpose of *evading* UK taxation. Can one apply the avoidance/evasion distinction and say that the individual did not intend to *avoid* taxation, so that – while they may be liable to criminal sanctions – the motive defence applies and excludes the transfer of assets rules? The answer is plainly no. The

---

38 [1997] STC 995 at p.1003.

39 70 TC 57 at p.116.

40 An alternative, less satisfactory, would be to refuse to recognise the tax purpose of the acquisition, by saying that it is merely incidental, or by applying a *Brebner* or choice principle: see 49.12.1 (A choice principle?).

Another solution is to say there is no relevant transfer.

argument is anachronistic, since in 1936 and for 40 years afterwards, the word “evasion” was used in English jurisprudence to describe avoidance. More fundamentally, the context shows that the expression “tax avoidance” includes (criminal) tax evasion. This was assumed without argument in *R v Dimsey & Allen* 74 TC 263.

## 49.8 Meaning of “taxation”

### 49.8.1 *Taxation in Old Conditions A/B*

“Taxation” in Old Conditions A and B means any form of UK taxation, and not only income tax.

In *Sassoon v IRC*:

Death duties, National Defence Contribution, perhaps other taxes or duties would all be within the Revenue’s mind in deliberately choosing the wide word ‘taxation’, in order to make sure that their concession of transfers for other purposes should not be used to deprive the Revenue of other taxes than Income Tax or Sur-tax.<sup>41</sup>

The International Manual provides:

**INTM600040 Transfer of assets abroad** [Feb 2020]

**Overview of ITA 2007/S736 - 742 - exemption from liability**

..In the context of this test “taxation” includes any UK tax liability, for example, Inheritance Tax, Capital Gains Tax, Corporation Tax as well as Income Tax.

*Sassoon*, though criticised,<sup>42</sup> is a decision of the Court of Appeal. While

---

41 25 TC 154 at p.159 cited in ToA draft guidance para INTM603000. *Sassoon* was a 2<sup>nd</sup> world war decision (1943), which may possibly explain why the court referred to the *Revenue’s* mind, when nowadays one would refer to the mind, or intention, of parliament.

For completeness: *Sassoon* was followed in *Fisher v HMRC*, holding that betting duty constituted “taxation” and “the fact that betting duty would at the time have been under the care and management of the Commissioners for Customs and Excise and not the Commissioners for Inland Revenue does not affect this view”: [2020] UKUT 62 (TCC) at [136]. This was common ground in the subsequent appeal: [2021] EWCA Civ 1438 at [84].

42 For the following reasons:

(1) The rule that an intention to avoid (say) stamp duty should have *income* tax

it could be reversed by the Supreme Court, that should not be expected, because:

- (1) The Court should be slow to reverse a long standing decision.
- (2) *Sassoon* has had statutory endorsement in the context of new conditions A and B.

Foreign tax is not “taxation” for this purpose. The House of Lords assumed that this was so without argument in *Herdman v IRC* 45 TC 394. This must be right since (1) it is illogical that the purpose of avoiding foreign taxes should have UK tax consequences and (2) it would be impractical to apply an avoidance/mitigation distinction to foreign taxes (where the distinction would depend on the foreign tax culture and attitudes).

HMRC agree. ToA draft guidance provides:

#### **INTM603000 Avoidance purpose exemption: Taxation**

- 
- consequences gives rise to obvious anomalies. The usual principle is that each tax must be considered separately. This is the approach usually adopted by anti-avoidance provisions: eg s.682 ITA (transactions in securities), or s.137 TCGA. But see s.75(5)(a) FA 1986 for an exception.
- (2) Since *Sassoon* was decided, the word “tax” has been given a limited definition. Section 989 ITA provides:
 

“‘tax’, if neither income tax nor corporation tax is specified, means either of those taxes”.

There are two reasons why this statutory change does not affect the position:

    - (a) A definition of *tax* does not in principle determine the meaning of the cognate word *taxation*. (Would a definition of “engine” determine the meaning of the cognate word “engineer”?)
    - (b) The decision in *Sassoon* was given the implied approval of parliament in the 1952 consolidation and it is not likely that the 1970 consolidation was intended to alter that.
  - (3) Section 720(1) ITA refers only to the avoidance of income tax; but see s.721(5)(c) ITA.
  - (4) Dicta in *Vestey v IRC* 54 TC 503 are said to be inconsistent with *Sassoon*; but this point was not an issue in *Vestey*.
  - (5) A reversal of *Sassoon* would cut down considerably the multitude of issues that the motive defence currently raises: see 49.19 (Practical examples: introduction).

While of course “context is king”, the word “taxation” is used elsewhere to mean any UK tax; see for instance s.22 F(No 2)A 1931.

The case [Sassoon] also established the taxation meant UK taxation. If it is intended to avoid foreign tax and only foreign tax is avoided the transfer of assets provisions will not apply.

For the purposes of New Conditions A and B these rules are set out in s. 737(7) ITA:

In this section—  
 “revenue” includes taxes, duties and national insurance contributions,  
 “taxation” include any revenue for whose collection and management the Commissioners for HMRC are responsible.

This is an inclusive, not an exhaustive definition. This is relevant if there is a change in the responsibilities of HMRC. For instance, LBTT is managed by Revenue Scotland,<sup>43</sup> and LTT by the Welsh Revenue Authority,<sup>44</sup> but these still constitutes “taxation”.

It continues to be the case that the word “taxation” does not include foreign taxes.

#### 49.9 Purpose words: Terminology

The motive defence condition A, and TAARs generally, use the word “purpose”.

“Purpose” is one of a cluster of words describing volition:

Term	Examples where used	See para
Purpose	TAAR/ToA motive defence condition A Definition of settlor: provide property for purpose of settlement Deductible expenses: wholly/exclusively for purpose of trade	<i>Discussed here</i>
Object	CT TiS motive defence	
Intention		
With a view to	Carry on business with a view to profit	
Deliberate	Penalties	
Designed to	ToA motive defence condition B	
Seek to		

In ordinary English usage, and in general legal usage, these words are often used synonymously and interchangeably.

43 Section 54 Land and Buildings Transaction Tax (Scotland) Act 2013.

44 Section 2 Land Transaction Tax and Anti-avoidance of Devolved Taxes (Wales) Act 2017.

HMRC agree. Unallowable Purpose Tests Draft Guidance provides:

Romer LJ in the *Bentleys Stokes* case<sup>45</sup> uses the words ‘object’, ‘motive’ and ‘purpose’ quite indiscriminately... there is no difference between purpose and object.<sup>46</sup>

Obviously, cases on other statutory provisions using the word purpose may be relevant to elucidate the meaning of purpose in the ToA motive defence. For example, regard should be had to the case law on the meaning of “wholly and exclusively for the purpose of a trade”, even though the context might seem rather different. Cases on (what is now) the CT TiS motive defence may also be relevant, even though the word used there is “object” not “purpose”,<sup>47</sup> because object/purpose here have the same meaning<sup>48</sup> and the context is closely comparable.

Lord Simon deplored what he described as “chaotic terminology”:

Will, volition, motive, purpose, object, view, intention, intent, specific intent or intention, wish, desire; necessity, coercion, compulsion, duress – such terms, which do indeed overlap in certain contexts, seem frequently to be used interchangeably, without definition ...<sup>49</sup>

It seems to me that this terminological richness should not cause too much difficulty - indeed in practice we have no choice but to cope with it - provided one remembers that:

- (1) Purpose/ intention/object are generally used with the same meaning.
- (2) They are occasionally used with specific and distinct meanings<sup>50</sup> but those senses should not be regarded as generally applicable.

The word “motive” may be used with the same meaning as purpose, as it

45 *Bentleys, Stokes and Lowless v Beeson* 33 TC 491.

46 Para 10040. In DTAs and other international treaties, the doublet “object and purpose” is so standard that one rarely sees one word without the other. This reflects the influence of the usage in the Vienna Convention and the OECD Model; see 103.9 (DTA interpretation principles); 104.8.1 (OECD Model/BEPS PPT).

47 See s.734 CTA 2010. “Object” is unusual, and it survives mainly for historical reasons: had the provision been drafted today the word used would have been purpose. When the IT TiS code was rewritten, the word “purpose” replaced “object”: see 52.13 (TiS motive defence).

48 Note how the HMRC draft guidance set pit below draws on both types of case.

49 *DPP v Lynch* [1975] AC 653 at p.688.

50 See 49.13.2 (Terminology of distinction).

is in the label “motive test”. It may alternatively have a different nuance, but there is no need to pursue that here because “motive” is not used in statutory drafting.

It is considered that the identification of a tax avoidance purpose requires a two-stage approach: identifying and classifying purpose.

## **49.10 Identify purpose: Stage 1**

### *49.10.1 Whose purpose?*

The ToA Motive defence refers to “the purpose for which the transaction *was effected*”. The passive voice (“was effected”) conceals the identity of the actor. Whose purpose are we looking for?

Where there is only one transferor, the purpose for which the transfer was effected is the same as the transferor’s purpose in effecting the transfer.

In one sense, a transfer itself cannot have a purpose: only a human being (or at least, a sentient mind) can have a purpose. “Purpose”, if it means anything, is an attribute of a mind.<sup>51</sup> When one says that an inanimate but man-made object such as a tool has a purpose, one is *attributing* to the tool the purpose in the mind(s) of the maker or user of the tool. When one says that a transfer has a purpose, one is attributing to the transfer the purpose(s) of the person(s) who made it.

HMRC agree. Unallowable Purpose Tests Draft Guidance provides:

#### **10200 Whose purpose?**

A purpose test will define the person whose purpose is being considered. Some purpose tests refer to the purpose of a scheme or transaction: in this case, the purpose of the parties to the transaction needs to be considered.<sup>52</sup>

I begin with the simpler situation where there is a single individual transferor. Further consideration is needed where one transfer has

---

51 This is self-evident, but if authority is needed, see *Chandler v DPP* [1964] AC 763 at p.804: “A purpose must exist in the mind. It cannot exist anywhere else.”

52 Similarly at p.14: “One particular difficulty with testing the purpose of arrangements rather than the purpose of a person is that arrangements are self-evidently inanimate. Any purpose inherent in such arrangements must usually be derived from the purposes of a person or persons who are party to the arrangements.” Similarly at para 10110.

multiple transferors.<sup>53</sup>

#### 49.10.2 *Effect/purpose distinction: Subjective test*

It is (almost) self-evident that there is a distinction between:

- (1) The effect of a transaction
- (2) The purpose of a transaction

Purpose is subjective in the sense that it depends on what is in the mind of the transferor. A transaction which has the effect of avoiding tax may not have that purpose. A transaction which does not have the effect of avoiding tax may nevertheless have that purpose.<sup>54</sup>

This view was formerly controversial and HMRC argued for an “objective purpose” test. But that view is no longer tenable and HMRC have abandoned it.<sup>55</sup>

HMRC Unallowable Purpose Tests Draft Guidance para 10030 provides:

Thus, where there is a purpose test, the consequences of a transaction will be dependent on the subjective purpose of the taxpayer. It is entirely possible that two taxpayers entering into similar transactions, but with different purposes, will be taxed differently....

The draft ToA guidance provides:

**10050 What is purpose?: effects do not determine purpose**

There is a clear difference between the purpose of a transaction and its effects. The effects are the advantages or benefits actually obtained

<sup>53</sup> See 46.5 (Shareholder-transferors).

<sup>54</sup> That was the case in *McGuckian*, where transaction had the purpose of avoiding tax, but did not have the effect of avoiding tax, because an anti-avoidance provision had been overlooked.

<sup>55</sup> I considered the argument in detail in the 2020/21 edition of this work para 49.9.4 (Objective purpose?) and 49.9.5 (Objective test abandoned), but omit that now as this is of historical interest only. In brief, an objective test was put forward in RI 201 and said to be supported by a sentence in *IRC v Willoughby* [1997] STC 995 at p.1003: “Where the taxpayer’s chosen course is seen upon examination to involve tax avoidance (as opposed to tax mitigation), it follows that tax avoidance must be at least one of the taxpayer’s purposes in adopting that course, whether or not the taxpayer has formed the subjective motive of avoiding tax.” But that view was rejected in *Beneficiary v IRC* [1999] STC (SCD) 134 at p.143; *Carvill v IRC* [2000] STC (SCD) 143 at [9]–[13]; and the subjective test was described as settled law in *Burns v HMRC*: [2009] STC (SCD) 165 at [36]. In *Fisher v HMRC* [2021] EWCA Civ 1438 at [82] it was common ground that the test was subjective.

(whether intended or not); these benefits can often be computed mathematically and can usually be measured objectively.

In *IRC v Brebner*, Lord Clyde states:<sup>56</sup>

The material question is not what was the effect of each or all of the interrelated transactions; the question is what was the main object or objects for which any of them was adopted. [The CT TiS motive defence, now s.734 CTA 2010], draws a clear distinction between effect and object.

In the Special Commissioners' decision of *Snell v HMRC*,<sup>57</sup> it was observed that the implications of the case were that:

“That case is also authority for the proposition that there is a clear distinction between the effect and the object of a transaction. I take that to mean that however directly a transaction leads to a tax advantage the question whether that was one of its objects is not answered by that clarity of effect”

In *Mallalieu v Drummond*<sup>58</sup> Lord Brightman said:

“The object of the taxpayer in making the expenditure must be distinguished from the effect of the expenditure.”

Thus, merely reviewing the effects of a transaction will not usually enable a conclusion to be drawn as to the taxpayer's purpose.

But the ghost of an objective test still raises its head:

However, in the *Vodafone* case Millett LJ said that:

“Some consequences are so inevitably and inextricably involved in the payment that unless merely incidental they must be taken to be a purpose for which the payment was made.”<sup>59</sup>

So, in some circumstances, the “inevitable consequences” of a payment do allow the inference to be drawn that a particular purpose existed, even if that was only an unconscious motive of the taxpayer.

The CT Manual makes similar comments on comparable wording in the winding-up TAAR.<sup>60</sup>

### 49.10.3 *How to identify purpose*

How does one ascertain the transferor's (subjective) purpose?

---

56 Author's footnote: 43 TC 705 at p.713; see too *Addy v IRC* 51 TC 71 at p.81E.

57 [2008] UKSPC SPC00699 at [23].

58 57 TC 330.

59 *Vodafone Cellular v Shaw* 69 TC 376.

60 See App.2.21 (Reasonable-to-assume).

The starting point is that all facts which may shed light on their purpose must be taken into account. Obviously, an assertion by an individual that tax avoidance was not their (subjective) intention is not definitive, because that assertion may be self-serving, and not credible in the light of other facts.

It is relevant to consider two objective questions:

- (1) did the transfer reduce tax significantly?
- (2) was a tax reduction reasonably foreseeable at the time?

If the tax reduction was not reasonably foreseeable, it is not likely to have been the purpose to achieve it.

Conversely the fact that a tax advantage is reasonably foreseeable as a consequence of the transfer may be cogent evidence of subjective purpose. We normally have the purpose of achieving the foreseeable consequences of our acts. However, this is not necessarily so. First the transferor may not have foreseen the advantage even though a reasonable person might have done so: no-one at all times acts with the foresight of the reasonable man.<sup>61</sup>

#### 49.10.4 *A question of fact*

Stage (1) – identifying the purpose in the mind of the transferor – is classified as a question of fact, decided by the first-tier tribunal. This conveniently allows appellate courts to say very little about it:

The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners to decide on a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence...

... the Special Commissioners came to a reasonable conclusion on the evidence before them. They could have reached a contrary conclusion,

---

61 Contrast s.8 Criminal Justice Act 1967:

“A court or jury, in determining whether a person has committed an offence,—  
 (a) shall not be bound in law to infer that he intended or foresaw a result of his actions by reason only of its being a natural and probable consequence of those actions; but  
 (b) shall decide whether he did intend or foresee that result by reference to all the evidence, drawing such inferences from the evidence as appear proper in the circumstances.”

This is also a common law approach: *Frankland v The Queen* [1987] AC 576.

which would have been equally unassailable, had they taken a different view of the evidence;. ..<sup>62</sup>

#### 49.10.5 Purpose of company transferor

Where a company is the transferor, and there is no quasi-transferor, there is no liability under s.720, but the motive defence is still relevant for s.731.

The purpose of the transfer is still the purpose of the transferor, and company law/agency principles<sup>63</sup> should be applied to attribute to the company (and so to the transfer) the purpose of the individual(s) who manage and control the relevant actions of the company, in other words, its directing mind(s) in respect of the relevant actions.<sup>64</sup>

#### 49.11 Purpose: Adviser/agent

Although purpose normally depends only on the mind on the transferor, there are other minds which may be relevant.

In a case where a transferor is acting by an agent or attorney, the purpose of the agent/attorney should, on normal agency principles, be attributed to the transferor.

If a person relies on advisers (typically professionals but also others, such as parents) and executes documents with no more than a vague idea of approving proposals put to them, they have adopted the purpose of their advisers or (which comes to the same thing) the purpose of their advisers should be attributed to them.

This is so even if they have not read, or not understood, the advice. This is (almost) self-evident, but authority can be cited if needed. In *IRC v Pratt*, an individual (who transferred £80k to an offshore company) “did not understand the scheme: it was masterminded by his own professional advisers”. Nevertheless, “he, *through his advisers*, was fully acquainted with the fact that what was to follow was a tax avoidance scheme, he must

---

<sup>62</sup> *IRC v Brebner* 43 TC 705.

<sup>63</sup> See *El Ajou v Dollar Land Holdings* [1994] BCC 143 at 150-151. The principles are not entirely clear, and it may be that different attribution principles apply in different circumstances; see Watts, “Attribution and limitation” [2018] LQR 350.

<sup>64</sup> This is not quite how the FTT put the point in *Fisher* at [290] - [297] but it comes close. See too 94.34 (Purpose: Adviser/agent of settlor).

fall fairly within the section”.<sup>65</sup>

ToA draft guidance provides:

**INTM602960 Avoidance purpose exemption: Purposes**

... If any professional advice obtained in a particular case is treated as a relevant factor and the individual states that they had no intention to avoid tax, it is reasonable<sup>66</sup> to see whether the advice they acted on is consistent with that contention. If the individual proceeds in accordance with advice obtained (or simply instructs the agent to proceed), the purpose of the adviser would on normal principles be attributed to the individual, whether they understood the implications of the advice or not. For example, if evidence emerged that an individual’s adviser or agent had devised a particular structure or recommended or arranged the

---

65 57 TC 1 at pp.47, 49. The same point is made in *Burns v HMRC* [2009] UKSPC SPC00728 at [20] and [39]: “The purpose for which the two girls effected the transactions was simply to do what their parents suggested, and it seems appropriate to me to proceed on the basis that the two girls effectively sought to achieve those purposes that influenced their parents.”

*Hoey v HMRC* [2019] UKFTT 489 (TC) at [145] - [161] offers another example, if one is needed. This concerned an offshore EBT: see 49.34 (Employee benefit trusts). The naive Mr Hoey “had no idea that the arrangements involved tax avoidance”. But motive defence did not apply. The point was upheld on the appeal; [2021] UKUT 82 (TCC) at [241] - [242].

The same principle applies wherever a person’s purpose has to be determined; eg in the transactions in securities code; see *Addy v IRC* 51 TC 71 at p.81 g. Likewise for the definition of “settlor”: see 94.34 (Purpose: Adviser/agent of settlor). In *FCT v Consolidated Press Holdings* (2001) 207 CLR 235 the High Court of Australia said it was “both possible and appropriate to attribute the purpose of a professional adviser to the taxpayer”.

I stress this because the opposite view was taken in the old case of *Philippi v IRC* 47 TC 75 where the Court of Appeal said at p.114:

“Young Mr. Philippi ... said that he never had any idea of tax in his mind when he made that transfer. It was true that it was saving him a great deal in UK tax ... but that had not occurred to him; the only reason why he had made the transfer was because his father and other members of the family had told him that he ought to do so. He appears to have had no idea why they gave him that advice. The Commissioners accepted ... his evidence that what he had done he did on his father’s advice.”

Assuming that this implausible story is true (though “young Mr Philippi” was aged 23 at the time of the transfer) the court should have held that he had adopted the (tax avoidance) purpose of his father. The point was not argued, and no-one has suggested that *Philippi* should be followed on this point.

66 But see 49.45.3 (Legal professional privilege).

creation or use of a particular non-resident entity for the purpose of saving UK tax, that purpose should be taken into account in determining, from all the circumstances of the case, the purposes for which the transactions were effected. That is the case whether or not the adviser had expressly informed the client of the purposes behind the transactions. It would be sufficient for example if evidence emerged from third parties or from the agent's working papers.

For the purposes of New Conditions A and B, s.737 ITA provides:

(5) In determining the purposes for which the relevant transactions or any of them were effected, the intentions and purposes of any person within subsection (6) are to be taken into account.

(6) A person is within this subsection if, whether or not for consideration, the person—

(a) designs or effects, or

(b) provides advice in relation to,

the relevant transactions or any of them.

This (more or less) restates the general law and so makes no difference to the position. So it does not much matter that this provision is not applicable to TAARs and other provisions referring to purpose.

Of course the adviser's purpose is only attributable to the individual if or so far as the individual adopts or accepts the advice.

#### 49.11.1 *Significance of tax advice*

If a person enters into a transaction without any tax advice, or without tax planning advice, that may suggest that tax saving was not a purpose of the transaction; though of course it does not prove it: possibly the person thought they understood the tax position without needing advice (or thought they did).

If a person does take tax advice before entering into a transaction, that does not suggest that tax saving was a purpose of a transaction, because it is sensible to consider the tax position before doing anything:

Apparently this part of the country<sup>67</sup> is inhabited by persons so unsophisticated that they enter into transactions without thinking of the Income Tax Acts, whereas everybody who does anything ought to think, how are the Income Tax Acts going to affect, or will they affect at all,

---

67 The reference is to Seaham, a small town in County Durham.

this transaction which I am entering into?<sup>68</sup>

The significance of taking tax advice is discussed in *Ebsworth v HMRC*:<sup>69</sup>

Much was made ... of certain of the notes made by Mr. Ebsworth's tax advisers. ... I did not find them particularly illuminating in reaching my decision as they were what one would expect from a tax adviser engaged to advise on tax rather than as a commercial or other adviser. Taking tax advice does not of itself make tax avoidance one of the main objects of the transactions concerned....

62. The fact that Mr. Ebsworth sought tax advice ... does not of itself mean that tax avoidance was a main object of the transactions. [The decision then cites Lord Upjohn in *Brebner*].

GAAR guidance makes the same point:

It is important to note that the fact that tax advice has been obtained is not, on its own, an indication that the obtaining of a tax advantage is a main purpose of the arrangement. Where large sums are involved many taxpayers will routinely seek professional advice, including tax advice.<sup>70</sup>

## 49.12 Mixed tax/non-tax purposes

A transfer may have more than one purpose.

### 49.12.1 Condition A

Condition A depends on whether the purpose of avoiding liability to taxation was the purpose *or one of the purposes* for which the transfer or associated operations were effected.

If *one* of these purposes is tax avoidance, the transfer fails condition A.

---

68 *Seaham Harbour Dock Co v Crook* 16 TC 333 at p.340. Likewise *Khan v HMRC* [2021] EWCA Civ 624 at [1]: “a cautionary tale, which illustrates all too graphically the importance of seeking specialist tax advice before entering into commercial arrangements that might have adverse tax consequences, however remote that risk might appear.”

69 [2009] UKFTT 199 (TC) at [13]. In *Fisher v HMRC* [2020] UKUT 62 (TCC) at [107] it was common ground that “The mere fact of taking tax advice does not mean there is a tax avoidance motive”.

70 HMRC, “GAAR Guidance” (2017) para C3.7.

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>  
FD\_49\_Transfer\_of\_Assets\_Abroad\_Motive\_Defence.wpd 03/11/21

It does not matter what the other purposes are.<sup>71</sup>

#### 49.12.2 *Old Condition B*

Old Condition B contains two requirements; both must be satisfied. The first is that the transfer (and associated operations) are commercial transactions. Secondly that the transfer (and associated operations) are not designed for the purpose of avoiding liability to taxation.

What happens if a commercial transaction has two or more purposes? HMRC say in RI 201:

The Revenue's view is that one of the essential conditions of s [old condition B] would not be satisfied where there was a significant element of tax avoidance purpose in the design of the transfer and any associated operations.

This paraphrase is rather<sup>72</sup> too generous to HMRC. In *Carvill v IRC*:<sup>73</sup>

One must ask in para (b) whether the transfer was designed for the purpose of avoiding tax or not. This seems to me to require that the main purpose was not tax avoidance because if one has to categorise a transaction as being either designed for the purpose of tax avoidance or not, when it is clearly accepted that a transaction may be designed for more than one purpose, the only way to categorise the design into one purpose is to look at the main purpose of the design. I think, therefore, that the taxpayer's contention of sole purpose is too loose a test and the Revenue's contention of significant purpose is too stringent a test although it will in practice be difficult to determine the difference between a significant and a main purpose.

The point of Condition B is that (if one passes the "commercial" requirement) the "no tax avoidance" requirement is easier to satisfy. Otherwise there is no reason to have two Conditions.

#### 49.12.3 *New Condition B*

The wording has changed in New Condition B. The test is now whether:

---

71 This is plain from the terms of the statute but if authority is needed, see *Philippi v IRC* 47 TC 75 at p.110.

72 Depending to an extent what nuance one gives to the malleable word "significant".

73 [2000] STC (SCD) 143 at [89]. The passage was approved in *HMRC v Fisher* [2021] EWCA Civ 1438 at [83].

any one or more of those transactions was *more than incidentally* designed for the purpose of avoiding liability to taxation.

This brings the law into line with RI 201.<sup>74</sup> At first I thought (like the Special Commissioner) the difference is relatively slight. But (depending what nuance is given to the malleable word “incidentally”) the change does make a difference. Since a merely incidental motive is not likely to amount to a “purpose” at all, a claim which fails Condition A will rarely (if ever) qualify under Condition B. For this reason (and because the “commercial” requirement in New Condition B is so narrow) New Condition B is dead letter law.

#### 49.12.4 *Condition B: Critique*

Why did parliament not simply repeal Condition B, rather than amend it out of existence in a way which needs pages to analyse and discuss? Perhaps the full extent of what was done was not realised. Perhaps it was, but it was thought that repeal would raise objections. However that may be, the rational course would either be to repeal Condition B completely and gain the benefit of simplicity or to return to old Condition B, which had a role to play in aiding commercial life and the economy.

### 49.13 **Foresight/purpose distinction**

#### 49.13.1 *Making the distinction*

It is self-evident that there is a distinction between:

- (1) Foresight - anticipating that a result will follow from an act
- (2) Purpose - having the purpose of achieving that result

Foresight is a necessary but not sufficient condition of purpose. Purpose requires foresight, but foresight does not entail purpose.

This is easiest to see where the foreseen result is not a desirable one. A purchaser of a company can foresee that the purchase incurs stamp duty, but will not enter into the transaction with the purpose of incurring stamp duty.

The same applies where the foreseen result is a matter of indifference.

The same may apply where the foreseen result is desired, but it is not in

---

<sup>74</sup> I take “more than incidental” in New Condition B to have the same meaning as “significant” in RI 201.

fact the purpose. It may just be “the icing on the cake”.

For example, suppose purchaser wants asset A, but in order to acquire it has to buy a company which holds two assets, A and B.

- (1) It may be that his purpose is to acquire asset A but not to acquire B, because:
  - (a) he would rather not acquire B, but has to do so to get A
  - (b) it is a matter of indifference whether he acquires B or not (eg suppose asset B is cash which the company needs)
  - (c) he is pleased to acquire B as well as A, but it is not sufficiently important
- (2) It may be that the purpose is to acquire both assets.

The distinction applies in ascertaining purpose in the motive defence. In RI 201, HMRC say:

“Purpose” is taken to be the end it is sought to achieve by the transaction.<sup>75</sup>

Purpose in the motive defence is what a person actually wants, or hopes, to achieve (not merely foresight). In practice, the issue arises in Condition A cases.<sup>76</sup>

#### 49.13.2 *Terminology of distinction*

Sometimes an attempt is made to desynonymise the words intention/purpose/object, in order to provide labels for a foresight/purpose distinction. However none of these attempts have found general acceptance.

For instance, clause 14(1) of the draft Offences Against the Person Bill<sup>77</sup> defines intention in a way which illustrates one possible meaning of the word “purpose”:

---

<sup>75</sup> This is based on *Newton v CT* [1958] AC 450 at p.465. Note by the way how use of the passive voice (“it is sought to achieve”) ducks the issue of whose purpose one is looking for. Contrast 5.21.3 (Para 26(2) employment-income test) where a similar point arises in connection with the phrase “if value were received”.

<sup>76</sup> The issue should not arise in a Condition B case (commercial transactions). In a situation where one wanted the commercial transaction, and merely had foresight that a tax saving would follow, even if the tax saving was regarded as a purpose it would not be the main (or significant) purpose.

<sup>77</sup> A Home Office consultation paper, 1998, never implemented.

A person acts *intentionally* with respect to a result if—

- (a) it is his *purpose* to cause it, or
- (b) although it is not his purpose to cause it, he knows that it would occur in the ordinary course of events if he were to succeed in his purpose of causing some other result.

Paras (a)/(b) express a foresight/purpose distinction. The terminology used to express it here is “intention” and “purpose”.<sup>78</sup> In para (a) purpose is used in a narrower sense. If a person has the purpose of causing another result, but knows the tax saving would occur if they succeed in their purpose of causing the other result, they have the *intention* to obtain the tax saving but not the *purpose*.

However the word “purpose” is not always understood that way:

The word [purpose] can be used to designate either

- [1] the main object which a man wants or hopes to achieve by the contemplated act, or ...
- [2] those objects which he knows will probably be achieved by the act, whether he wants them or not.

I am satisfied that in the criminal law ... its ordinary sense is the *latter* one.<sup>79</sup>

Here the same distinction is drawn, but the words “purpose” and “object” are used to express it.

The terminology does not matter as long as one bears the distinction in mind.

#### 49.14 Consequence/purpose distinction

A consequence of a transaction is not necessarily its purpose. This was stated in a “celebrated”<sup>80</sup> passage in *IRC v Brebner*:

- [1] ... when the question of carrying out a genuine commercial

<sup>78</sup> But there are no good terms to express this distinction. Bentham’s terminology was direct and oblique intention: *The Principles of Morals & Legislation*, Chapter VIII (Of Intentionality). See Kaveny, “Inferring Intention from Foresight” 120 LQR 81 and Bratman, “Intention, Plans & Practical Reason” (1987), chapter 10 (Intention and expected side effects). See Avery Jones “The mental element in anti-avoidance legislation” [1983] BTR 22.

<sup>79</sup> *Chandler v DPP* [1964] AC 763 at p.804, emphasis added.

<sup>80</sup> *IRC v Willoughby* [1995] STC 143 at p.167.

transaction, as this was, is reviewed, the fact that there are two ways of carrying it out - one by paying the maximum amount of tax, the other by paying no, or much less, tax - it would be quite wrong, as a *necessary* consequence, to draw the inference that, in adopting the latter course, one of the main objects is, for the purposes of the section, avoidance of tax.

[2] No commercial man in his senses is going to carry out a commercial transaction except upon the footing of paying the smallest amount of tax that he can.

[3] The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners [now the first-tier tribunal] to decide upon a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence.<sup>81</sup>

The point being made here is not (or not just) the foresight/purpose distinction, that mere foresight of a tax advantage does not entail a tax avoidance purpose.<sup>82</sup> Lord Upjohn goes further in point [3]: he states that where there is a “commercial transaction”, a *conscious choice* of the tax advantageous course over an alternative does not “necessarily” entail that tax is the main purpose or even one of the purposes of the transaction.

In *Fisher v HMRC* the FTT said:

We note that the *Brebner* dicta does not go as far as suggesting that if you take the lower tax route this cannot mean you have a tax avoidance purpose. While taking a lower tax route does not mean that by that fact alone it must be inferred that one of the main objects is tax avoidance, tax avoidance is not precluded. This is reflected in the way the dictum in *Brebner* was relied on by Morritt LJ in *Willoughby* in the context of [the ToA motive defence]:

‘The genuine application of the taxpayer’s money in the acquisition of a species of property for which Parliament has determined a

---

81 *IRC v Brebner*; emphasis original but paragraph numbers added. There are minor stylistic differences between the law reports [1967] 2 AC 18 at p.30, and 43 TC 705 at p.718. I here set out the AC version which is more authoritative and more correct (in particular, using the word *speech* rather than *judgment* in the first line).

Another way to read this passage in *Brebner* is to see it as an early recognition of an avoidance/mitigation distinction but that would be anachronistic because the distinction was not then made. It would also be wrong because that distinction is irrelevant in the transactions in securities motive defence.

82 The point made at 49.11 (Foresight/purpose distinction) and 49.12 (Consequence/purpose distinction).

special tax regime does not amount to tax avoidance **merely on the ground that the taxpayer might have chosen** a different application which would have subjected him to a less favourable treatment.<sup>83</sup>

In the same case in the Upper Tribunal:

Awareness of tax aspects does not equate to having a tax avoidance motive..

Picking a lower tax route over a higher tax route does not equate to tax avoidance (but equally does not preclude tax avoidance)<sup>84</sup>

At what point does a conscious choice of a tax advantageous course become a tax avoidance purpose in its own right in addition to the commercial purpose? Lord Upjohn does not give an answer to this: to say at [3] that it is a question of fact for the Commissioners, if true, is not exactly helpful.

A useful approach may be to ask: does the tax advantage form an incidental or subsidiary consequence of achieving the commercial transaction (as opposed to being an end in its own right)? If so, there is no tax avoidance purpose. This is an evaluative test which is perhaps easier to state than to apply, but it may sometimes be helpful. It overlaps with an avoidance/mitigation distinction, since an advantage which is judged to be incidental or ancillary to a commercial or family transaction is less likely to be contrary to the intention of parliament: it is more likely to constitute mitigation than avoidance.

Another way to put it may be to ask: is there an overwhelming commercial objective which overrides any tax advantage.

*HMRC v Fisher* is an unusual case, where a transfer to a foreign company, which avoided Betting Duty, was essential in order to save the business. CA rejected an argument that that the main purpose was saving the business and betting duty avoidance was "simply the means of achieving" that purpose.<sup>85</sup>

The avoidance of betting duty and saving of the business were inseparable. The main purpose of the transfer of the business was to avoid betting duty and thereby to save the business: the two were

---

83 [2014] SFTD 1341 at [283] citing 70 TC 57 at p.108.

84 [2020] UKUT 62 (TCC) at [107] where this proposition was common ground.

85 [2021] EWCA Civ 1438 at [91].

perceived as going together. Put slightly differently, there can be no question of section 741 of ICTA applying because a transferor hopes that an intended avoidance of liability to taxation will achieve some further end. It will rarely, if ever, be the case that a transferor wishes to avoid liability to tax for the sake of it; in normal circumstances, a transferor will be intending to use the avoidance of tax to attain another object. That being so, were someone able to escape section 739 by looking beyond the tax avoidance to its consequences, the motive defence would, as the FTT pointed out, be generally available. That will not have been Parliament's intention.

The situation in *Fisher* was that the tax charge would destroy the business: no business was possible unless the could be avoided/mitigated. But that is not in the least unusual. Everyone knows, or should know, that investors are interested in the post-tax return; and much business activity which would be profitable in the absence of taxation is not profitable as a result of taxation. That is unavoidably the case.

I suggest the point made in *Brebner* is really this: where one purpose (or the principal purpose) for a transaction is a commercial (non-tax) purpose, one should be slower to conclude that another purpose is tax avoidance than in the case of a purely tax motivated transaction. This reflects the reasonable assumption that a purely tax motivated transaction is more likely to be contrary to the intention of parliament and a commercial transaction is less likely to be. I refer to this as the *Brebner* principle.

The *Brebner* principle applies not only to commercial transactions, but also to any transaction carried out for primarily non-tax reasons including “ordinary family dealing”, which would include most trust transfers, at least those where the settlor is excluded.<sup>86</sup> In practice, this issue arises in motive defence Condition A cases.<sup>87</sup>

It is considered that the *Brebner* principle continues to apply to New Conditions A and B. It is true that the terms of New Condition B (that incidental purposes are to be disregarded) suggest that incidental purposes in New Condition A are *not* to be disregarded. But the *Brebner* principle is identifying matters that are not “purposes” at all.

---

86 *Mangin v IRC* [1971] AC 739 at p.751 and p.756, restating the *Brebner* principle in the context of an extremely free reading of a New Zealand statute.

87 Because in a commercial transaction, incidental tax avoidance purposes are in any event disregarded.

In *Allam v HMRC*<sup>88</sup> the taxpayer sold one company to another company. This was a transaction in securities giving rise to an Income Tax Advantage, and in principle within the TiS rules. The question was whether one of the main purposes was to obtain the Income Tax Advantage.

The taxpayer's purposes were (1) to facilitate borrowing by the group (a commercial purpose) and (2) to obtain funds for retirement (described as a personal purpose). The TiS motive defence applied:

210. Our reasons are as follows.

(1) [the taxpayer gave clear reasons for the transfer: the need to unite ADL and AML under common corporate ownership to support the bank financing ... and the desire to create a cash fund for his retirement. ... Those reasons are either "commercial" or "personal" reasons, to adopt the terminology used by HMRC, but the crucial point is that they are not the purpose of obtaining an income tax advantage.

(2) The main reasons put forward by HMRC that we should infer that the obtaining of an income tax advantage was one of the main purposes of the transactions are twofold.

(a) The first reason was that Dr Allam applied for a clearance in 2009 under a previous form of the transactions in securities legislation for a transaction which was in very similar form to the transfer of the shares which took place in 2011. Dr Allam did not proceed with that transaction when the clearance was refused.

(b) The second reason that HMRC gave was that the transaction could have been undertaken in an alternative manner which would have incurred an income tax cost.

As regards the first of these arguments, Dr Allam's explanation was that his understanding was that, following the refusal, he was not able to proceed with the transaction, but that position altered when changes were made to the transactions in securities legislation in 2010. Although Dr Allam's understanding of the effect of the transactions in securities legislation and the changes to it may not be accurate, we accept that this was his understanding at the time.

As regards the second argument, ... the mere fact that there exists an alternative means of undertaking a transaction which has a different tax result is not conclusive of the question as to whether an inference can be drawn that the obtaining of an income tax advantage was a main

---

88 [2020] UKFTT 216 (TC).

purpose of the transaction.

We accept that, in a particular case, the fact that an alternative transaction existed and was perhaps considered but rejected, may be a factor in deciding whether or not an inference can be drawn that the obtaining of an income tax advantage was a main purpose of a transaction. However, we do not draw that inference on the facts of the present case. Dr Allam did not consider an alternative transaction. Dr Allam had a clear purpose for the transfer (to unite the companies under common ownership) and a clear purpose for his desire to receive the proceeds in cash (to fund his retirement). The latter was not a commercial reason. It was a personal reason, but it was not a tax reason.

(3) The effect of the transaction was to realize the value of ADL and to use that value to support Dr Allam's desire for a fund for his retirement. The sale of the shares to AML was the simplest transaction to undertake to achieve that purpose and the purpose of uniting the companies under common ownership.

(4) The other surrounding circumstances do not support the inference that Dr Allam was seeking to obtain an income tax advantage: he received significant dividends from the companies in the tax year in question including the dividend of £550,000 from ADL representing almost 50% of the retained profits in that company.

211. For these reasons, in our view, ... the obtaining of an income tax advantage was not a main purpose of Dr Allam in being party to the transaction. The income tax advantage was merely an incidental benefit that was obtained as a result of the transaction.

The reader may think that HMRC had the better of the argument. If the taxpayers argument is right, it could apply generally. The purpose of a transaction extracting value from a company is rarely if ever to obtain a tax advantage for its own sake: a tax advantage is always likely to be a means to an end, not an end in itself. Tax free money is obtained in order to be spent in some particular way. In *Allam* the purpose was to obtain a pension; would it be any different if the purpose was to pay for a house? or a chattel? or to gamble? The decision should be reversed in the appeal.

#### 49.14.1 *A choice principle?*

The *Brebner* dictum is sometimes regarded as supporting a “choice principle”:

Choosing between two alternatives – if one is carrying out a commercial or a family or an investment transaction, choosing the most tax-efficient

– is not avoidance.<sup>89</sup>

But this formulation goes too far: if a UK settlor creates a trust for their family – a family transaction – they have to choose between UK and foreign trustees; but the choice of foreign trustees by the UK settlor is avoidance.<sup>90</sup>

One can accept a choice principle if it is combined with the concept of the intention of parliament, ie if the settlor makes choices within the intention of parliament, there is no tax avoidance; this is equivalent or very similar to the concept of “special tax regime”.<sup>91</sup>

In an earlier edition I suggested a distinction between:

- (1) a tax saving which arises because the transfer *is made* (ie it would not arise if the transfer had not been made)<sup>92</sup>; and
- (2) a tax saving which arises because the transfer is made *in one particular way* (ie it would not arise if the transfer were made in some other way).<sup>93</sup>

This does not work, because classifying a transfer in category (1) or (2) is an arbitrary or evaluative exercise.

#### 49.15 Classifying purpose: Stage 2

Stage 1 is to look into the mind of the transferor to ascertain whether their purpose was (to use the neutral term) to reduce tax. If they had no purpose to reduce tax then the motive defence applies.

Before *Willoughby*, identifying a purpose of reducing tax was the beginning and end of the matter because an avoidance/mitigation distinction had not been recognised. Any tax reduction purpose would fail the motive defence.

---

89 Baker “Tax avoidance, tax mitigation and tax evasion”

<https://vdocuments.mx/tax-avoidance-tax-mitigationphilip-baker.html>

90 It seems that the choice principle has been abandoned in Australia, as a “false dichotomy”: see Myers “Tax avoidance and the High Court since Sir Garfield Barwick”

[http://law.unimelb.edu.au/\\_data/assets/pdf\\_file/0005/1585994/2005-Myers1.pdf](http://law.unimelb.edu.au/_data/assets/pdf_file/0005/1585994/2005-Myers1.pdf)

91 See 49.14.4 (Special tax regime).

92 Such as the saving of the settlor’s own tax liabilities arising from the transfer; see 49.20.1 (No avoidance of settlor’s tax).

93 Such as the saving of the beneficiaries’ tax liabilities on a transfer to foreign trustees (which would not arise on a transfer to UK trustees).

Now there is a second stage. If the transferor did have the purpose of reducing tax, one must move on, applying *Willoughby*, to categorise that purpose as “avoidance” or “mitigation”.

This is a question of law. It is determined objectively (in the sense that the issue is independent of the mind of the transferor). It would be wrong at stage (2) to ask whether the transferor subjectively thought their purpose was “tax avoidance” (as opposed to mitigation) because

- (1) Avoidance/ mitigation is a question of law, a matter for the court.
- (2) It would generally be pointless to ask the transferor, since (unless the transferor is a tax lawyer) they will not know the correct meaning of the terms.<sup>94</sup>

The motive defence therefore involves a mixture of objective and subjective elements, as often happens.

Anything said on the subject of tax avoidance in motive defence cases before *Willoughby* needs to be reviewed because it will not have considered stage (2).

#### 49.16 Avoidance/mitigation distinction

This section sets out the most important judicial and other statements on the avoidance/mitigation distinction, which is at the core of the concept of “tax avoidance”.

I would first of all note a widespread misconception. It is the misconception that the term “tax avoidance” has a single, relatively clear-cut referent; that subject perhaps to some borderline cases, to classify a

---

<sup>94</sup> This is self-evident but if authority is needed, see *Beneficiary v IRC* [1999] STC (SCD) 134 at p.143: “The question of whether there was tax avoidance must be looked at objectively”.

For completeness: In *Davies v HMRC* [2020] UKUT 67 (TCC) at [29], one ground of appeal was that the witnesses said that their motive was tax mitigation, and it should have been put to the witnesses that the motive was tax avoidance. The point was dismissed on the broad ground that the witnesses had fair notice of the issue and an opportunity to respond to it. But more narrowly and analytically, it should also have been said that the avoidance/mitigation issue was a point of law, not evidence, on which evidence not needed or admissible. (There is a suggestion to this effect at [33]).

The point was overlooked in *Fisher v HMRC* [2014] UKFTT 804 (TC) where the FTT asked, I think wrongly, whether the transferor appreciated that the transfer was avoidance rather than mitigation: see paras [422] - [430]. The point was not considered in the later appeals.

transaction as tax avoidance is as straightforward and unproblematic as to identify the colour of a dye. This may relate to a wider misconception about the nature of language, namely the mistake that the meaning of words is given by the existence of things in the world to which they correspond, so that, with any contested term, one can always find a core referent and establish what the word really means.

#### 49.16.1 *Intention of parliament*

*IRC v Willoughby* is the leading case on the subject:

Tax avoidance within the meaning of [the motive defence] is a course of action designed to conflict with or defeat the evident intention of Parliament.<sup>95</sup>

The Tax Law Review Committee used a similar definition of “avoidance”:

We have regarded tax avoidance as action taken to reduce or defer tax liabilities in ways that Parliament plainly did not intend or could not possibly have intended had the matter been put to it.<sup>96</sup>

#### 49.16.2 *How evident is “evident”*

Looking back on this definition after a generation has passed: it still represents the law on the meaning of avoidance, but the Courts have applied the test of what is avoidance with less stringency than “evident” intention might suggest. The boot is on the other foot: there is mitigation if the tax planning is consistent with the evident intention of parliament, and less clear cases are avoidance. On this reading, even *Willoughby* would be a borderline case.<sup>97</sup> For example, avoidance includes:

- (1) a Jersey resident non-domiciled individual transferring UK farmland to a Jersey company, to avoid IHT<sup>98</sup>
- (2) a share for loan note exchange in anticipation of a tax free disposal a year or two later because:

---

95 [1997] UKHL 29.

96 Tax avoidance: A Report by the Tax Law Review Committee (1997) para 1.13, citing *Willoughby*.

97 The result would have been different if it was planned that the taxpayer intended to be non-resident when disposing of the offshore policy.

98 See 49.29.2 ( Transfer for avoidance).

- (a) The individual would become non-resident<sup>99</sup> or
- (b) The loan notes would qualify for the substantial shareholder exemption<sup>100</sup>

### 49.16.3 *Watered down definitions*

HMRC adopt this watered-down approach:

Tax avoidance is any action taken to obtain a tax advantage in a way that Parliament did not intend or would not have intended had the matter been put before it. This definition is based upon the report on tax avoidance produced by the Tax Law Review Committee in 1997.<sup>101</sup>

Note that HMRC had already altered the nuance by deleting the words “plainly” and “possibly” from the TLRC formulation set out above: Lord Nolan’s emphasis (expressed by use of the word *evident*) is absent in HMRC’s definition.

House of Commons Briefing Paper “Tax avoidance and tax evasion” has offers more examples of watering down the definition:<sup>102</sup>

In the House of Lords:

Lord McKenzie: The term “tax avoidance” is usually used to refer to an inappropriate reduction in tax liability.

In the Commons:

Mr Gauke: avoidance ... is widely understood to entail taking a view of the tax treatment of a transaction that is tenable but has tax consequences that were not intended by the legislature.

And HMRC:

Judith Knott (then HMRC Director, Corporation Tax International Anti-Avoidance): What we mean by legitimate tax planning is tax

---

99 See 53.18.4 (CGT avoidance by non-residence).

100 *Euromoney v HMRC* [2021] UKFTT 61 (TC). The reader may think the contrary view is more convincing. Going non-resident savours of avoidance in a way that the SSE does not. But there it is.

101 IR152 Trusts: An Introduction (withdrawn on 30/09/04)

[webarchive.nationalarchives.gov.uk/20070402085841/hmrc.gov.uk/pdfs/ir152.htm](http://webarchive.nationalarchives.gov.uk/20070402085841/hmrc.gov.uk/pdfs/ir152.htm)

102 Briefing paper no 7948, 13 April 2021

<http://researchbriefings.files.parliament.uk/documents/CBP-7948/CBP-7948.pdf>

planning that is very much in line with Parliament's intentions when it passed the rules. A good example would be putting cash into an ISA account. That is legitimate and what Parliament intended to happen. Avoidance, on the other hand, is behaviour that seeks to bend the tax rules in a way that Parliament did not intend.

With hindsight, one can see that HMRC have been successful in promoting these looser readings of the definition in the Courts. This reflects changes in public and judicial opinion since *Willoughby* was decided in 1997.<sup>103</sup>

There have been some attempts to be more specific.

#### 49.16.4 *Special tax regime*

In *IRC v Willoughby*:

The genuine application of the taxpayer's money in the acquisition of a species of property for which Parliament has *determined a special tax regime* does not amount to tax avoidance merely on the ground that the taxpayer might have chosen a different application which would have subjected him to less favourable tax treatment.<sup>104</sup>

This repeats the test of the intention of parliament (what parliament has "determined" is, I think, the same as what parliament has intended). It brings the added refinement of identifying "special tax regimes" which parliament intended to apply. Professor Willoughby's offshore bonds seem a reasonably clear<sup>105</sup> example of a "species of property for which parliament had determined a special tax regime".

This approach can be generalised into all occasions where parliament has determined a "special tax regime" (regardless of whether there is any particular "species of property" involved):

The adoption of a course of action which avoids<sup>106</sup> tax should not fall within section 99 if the legislation, upon its true construction, was

103 See 2.5 (Attitudes to tax avoidance).

104 [1995] STC 143 at p.183, emphasis added. This is from the CA judgment, but HL did not disagree.

105 It might be argued that parliament had intended the chargeable events regime for normal bonds but not for personal portfolio bonds.

106 Lord Hoffmann has here used "avoid" in the loose etymological sense (to include mitigation). Section 99 provided that an arrangement was void as against the Commissioner for Income Tax if its purpose or effect was "tax avoidance".

intended to give the taxpayer the choice of avoiding it in that way.<sup>107</sup>

The existence of a special tax regime is neither a necessary nor a sufficient condition of tax mitigation. It is only a factor to consider. There is no relieving provision for bed-and-breakfast transactions, which are accepted as mitigation.<sup>108</sup> Conversely, as the Special Commissioner rightly said in *Carvill v IRC*:

It is not enough to say that if you find a relieving provision then it is the evident intention of Parliament that the taxpayer should be entitled to use it whatever the circumstances. As *Furniss v Dawson* shows it is quite possible to mis-use a relieving provision. To give an example in the same area as this case, suppose the Appellant had formed [the non-resident company] solely to give him a non-resident employer in order to obtain the foreign emoluments deduction. If that company had been funded entirely by the UK companies and had done nothing other than employ the Appellant, it might be the case that the Appellant would have been avoiding tax because he was misusing a relieving provision. ... the taxpayer must do more than point to the existence of a relieving provision; he must be using, rather than misusing, the relieving provision in a way consistent with Parliament's evident intention.<sup>109</sup>

*Willoughby* was perhaps close to the line. In *Davies v HMRC* the taxpayer owned a non-resident property development company through an offshore life insurance wrapper. This was (unsurprisingly) held to be avoidance:

The taking out of life policies per se does not constitute tax avoidance. However, unlike in *Willoughby*, that is not the only transaction in this case. The creation of a special purpose vehicle was primarily for the purpose of creating an entity to complete the purchase in SAP's place. The selection of Mauritius as the jurisdiction for this vehicle, however, was specifically for tax reasons: to avoid paying tax in the UK under the terms of the Treaty. In addition, the purpose of creating a vehicle to replace SAP was to avoid SAP becoming liable to UK tax on income from the property development ...<sup>110</sup>

110 [2018] UKFTT 559 (TC) at [88]. The UT agreed: [2020] UKUT 67 (TCC) at [43]. HMRC conceded that the company did not have a UK PE, but nowadays the special purpose vehicle would be subject to CT on its profits, PE or no PE: see 21.3

49.16.5 *Economic consequences*

Lord Nolan said in *Willoughby*:

The hallmark of tax avoidance is that the taxpayer reduces his liability to tax without incurring the *economic consequences* that Parliament *intended* to be suffered by any taxpayer qualifying for such reduction in his tax liability. The hallmark of tax mitigation, on the other hand, is that the taxpayer takes advantage of a fiscally attractive option afforded to him by the tax legislation, and genuinely suffers the *economic consequences* that Parliament *intended* to be suffered by those taking advantage of the option.<sup>111</sup>

This repeats the test of the intention of parliament with the added refinement of identifying “economic consequences”.<sup>112</sup> This is based on two Templeman judgments:

The material distinction in the present case is between tax mitigation and tax avoidance ... Income tax is mitigated by a taxpayer who reduces his income or incurs expenditure in circumstances which reduce his assessable income ... Income tax is avoided ... when the taxpayer reduces his liability to tax without involving him in the loss or expenditure which entitles him to that reduction. The taxpayer engaged in tax avoidance does not reduce his income or suffer a loss or incur expenditure but nevertheless obtains a reduction in his liability to tax as if he had.<sup>113</sup>

The non-recourse loan in *Ensign Tankers* is an example of a transaction without economic consequences and in *Challenge* Lord Templeman gave another example which will be particularly relevant to the practical examples considered below:

When a taxpayer makes a settlement, he deprives himself of the capital which is a source of income and thereby reduces his income. If the

(Dealing/developing UK land).

111 [1997] UKHL 29 (emphasis added).

112 See App.6.5.2 (Economic reality/consequences).

113 *IRC v Challenge* [1986] STC 548 cited in *Ensign Tankers v Stokes* [1992] STC at p.240. Lord Millett (whose decision in the High Court was reversed in *Ensign Tankers*) took the opportunity in *Collector of Stamp Revenue v Arrowtown Assets* [2003] HKCFA 46 [http://www.ird.gov.hk/eng/pdf/facv4\\_2003.pdf](http://www.ird.gov.hk/eng/pdf/facv4_2003.pdf) to cast doubt on the correctness of *Ensign Tankers*, but that does not affect the point here.

settlement is irrevocable and satisfies certain other conditions the reduction in income reduces the assessable income of the taxpayer. The tax advantage results from the reduction of income.<sup>114</sup>

These are transactions with obvious economic consequences.

Professor Willoughby's investment in his bond had some "economic consequences" as compared to a direct investment in the underlying assets though one might have thought they were not very substantial.<sup>115</sup>

The GAAR also uses an "economic" criteria. Section 207(4) FA 2013 provides:

Each of the following is an example of something which might indicate that tax arrangements are abusive—

- (a) the arrangements result in an amount of income, profits or gains for tax purposes that is significantly less than the amount for economic purposes,
- (b) the arrangements result in deductions or losses of an amount for tax purposes that is significantly greater than the amount for economic purposes...

Here I think economic purposes is likely to amount to accountancy purposes.

#### 49.16.6 *Other indicia of avoidance*

It is suggested that "economic consequences" and "special tax regime" are categories of tax saving steps which do accord with the intention of parliament but are not an exhaustive categorisation of mitigation. They should be regarded as indicia or "badges" of mitigation (like the badges

---

114 *IRC v Challenge* [1986] STC at p.554–555.

115 Lord Nolan identified the following economic consequence [1997] UKHL 29:

"The reality in truth is that the bond holder has a contractual right to the benefits promised by the policy, no more and no less. It is therefore quite wrong to describe the bond holder as having, in the words of the Appellants' printed case 'in substance all the advantages of direct personal ownership without the tax disadvantages'. The significance of this misdescription would become all too apparent if—perish the thought—Royal Life were to become insolvent and unable to meet its obligations to the bond holders."

Before 2008 I described this as unconvincing, as the insolvency of Royal Life seemed so remote a possibility as to be discounted. The 2008 recession proved the risk was not quite as low as one might have thought.

See [App 6.5](#) (Economic reality etc).

of trade). One can think of others. The Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations are interesting series of attempts to identify indicia of tax avoidance for the purposes of disclosure obligations. The fact that the regulations (originally made 2004) were amended in 2006, 2009, 2010, 2013 and 2016 shows that the exercise was not a straightforward one. The indicia in the Regulations include:

- (1) confidentiality from other promoters; and
- (2) premium fees (typically linked to tax savings).

OECD also identified secrecy<sup>116</sup> as a common characteristic of avoidance:

Secrecy may also be a feature of modern avoidance. In some cases tax advisers sell ready-made avoidance devices, one term of the contract of sale being that the taxpayer keeps the facts secret for as long as possible. It is in the interest of the avoiders to keep the administration from learning about new schemes because official and public knowledge may be followed by legislation to counter that kind of avoidance.<sup>117</sup>

Neither secrecy nor premium fees are normally associated with the commonplace transactions discussed below. But if, exceptionally, that was the case then it would be a factor suggesting that the transaction should be characterised as tax avoidance.

#### 49.16.7 *Established practice*

---

116 There are different types of secrecy:

- (1) Secrecy (better described as confidentiality) against other tax advisers (the scheme vendor wishing to keep the profits of a scheme to themselves).
- (2) Secrecy against HMRC (as OECD envisage) in order to postpone the time when HMRC are informed for as long as lawfully possible.
- (3) Secrecy against HMRC in order to avoid or frustrate any investigation. Of course dishonest breach of a duty of disclosure marks a point where avoidance becomes evasion.

Concealment in category (3) is not primarily characteristic of tax avoidance schemes. It is a problem which may affect all aspects of tax collection (whether or not involving avoidance). The Keith Committee recognised this: Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.5. By contrast, lawful concealment in category (1) and (especially) category (2) is an indicia of tax avoidance.

117 OECD Report by Committee of Fiscal Affairs (1980) cited in OECD International Tax Avoidance and Evasion (1987), p.17.

An important indicia is familiarity and use. Once a tax avoidance arrangement becomes common, it is almost always stopped by new legislation within a few years. If something commonly done is contrary to the intention of parliament, it is only to be expected that parliament will stop it. So that which is commonly done and not stopped is not likely to be contrary to the intention of parliament. It follows that tax reduction arrangements which have been carried on for a long time are unlikely to constitute tax avoidance.

There are arguments against this view.

- (1) It may seem strange that an act might be stigmatised as tax avoidance if challenged by HMRC or parliament promptly after it is first done; but if such acts become the general practice over a period of time then the intention of parliament is decided differently.
- (2) Common practice may not be easily identified, It may be quickly forgotten (especially given a swift turnaround of HMRC staff and lack of institutional memory).<sup>118</sup> Whether it is recorded may be a matter of chance.

Nevertheless, the better view is to have close regard to this factor. Judges have a strong intuitive sense that that which everyone does, and has long done, should not be stigmatised with the pejorative term of “avoidance”. This, I suggest, is the true reason why the courts classify bed-and-breakfast transactions and back-to-back loans as mitigation and not tax avoidance.<sup>119</sup>

This is consistent with the approach of the GAAR. Section 207(5) FA 2013 provides:

The fact that tax arrangements accord with established practice, and HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice, is an example of something which might indicate that the arrangements are not abusive.

---

118 For an example, see 33.18.8 (Dual-contract rule: Critique).

119 *Ensign Tankers (Leasing) v Stokes* 64 TC 617 at p.741: “A taxpayer who carries out a “bed and breakfast” transaction by selling and repurchasing shares establishes a loss for capital gains tax because he has actually suffered that loss at the date of the transaction. In “back to back” transactions the taxpayer is entitled to any reduction in tax which Parliament has attached to each transaction.”

Back-to-back loans have been accepted by HMRC for decades: International Tax Handbook, para 1201.

Professor Sandford drew another categorisation of tax savings which offers a related indicia of avoidance. He refers to:

- (1) Tax savings offered by government to induce a certain kind of behaviour or to fulfill what it feels to be an obligation.
- (2) Methods of saving that a government dislikes, but allows to remain for administrative reasons.
- (3) Tax savings deriving from technical loopholes unforeseen at the time of drafting.<sup>120</sup>

Category (1) is obviously mitigation and category (3) is obviously avoidance. It is suggested that category (2) should be classified as mitigation rather than avoidance. An example is a transfer of a land-owning company (instead of its land) to reduce the rate of stamp duty from SDLT rates on land to SD rates (if any) on shares. The Government considered imposing stamp duty at land rates on shares in land-owning companies to prevent this, but decided not to proceed with the idea.<sup>121</sup> ATED is said to be aimed at these transactions, but is restricted to residential property. Transfers involving other property should be considered mitigation rather than avoidance. This category is particularly important to the practical examples considered below. An example is the use of offshore companies to hold UK assets (other than UK residential property) to save IHT.

## 49.17 Failed indicia of avoidance

### 49.17.1 *Spirit of statute*

Other approaches in distinguishing tax avoidance and tax mitigation are to seek to identify “the spirit of the statute” or “misusing” a provision. I take this to mean exactly the same as the “evident intention of parliament” properly understood. If that is right, the expression adds nothing but rhetoric and confusion. If it means anything vaguer or more intuitive than that, then the concept deserves the ridicule expressed in *Norglen v Reeds*

---

<sup>120</sup> *Tax Avoidance* (1979, IEA) p.81.

<sup>121</sup> Modernising Stamp Duty (HMRC, Consultative Document 2002) para 2.34. Contrast Australia where the transfer of shares in “land-rich” companies is subject to stamp duty at the rates applicable to land.

*Rains Prudential*.<sup>122</sup> Either way, the expression is best avoided in this context (and indeed in any context, other than the theological<sup>123</sup> from which it draws its rhetorical power.)

#### 49.17.2 “Artificial”/“devices”

Another approach is to seek to identify “artificial” transactions. This raises a number of difficulties.

First, while tax avoidance frequently involves transactions that can be described as “artificial”, this is not always the case. You can have tax avoidance without much (if any) artificiality<sup>124</sup> and, of course, artificiality without tax avoidance. That in itself would not be a fatal objection if we are merely seeking badges of avoidance and not a test which will work every time.

However, the unlaywerlike term “artificial” is too vague to be useful even as a badge of tax avoidance. The 1955 Royal Commission commented on s.44 F(No. 2)A 1915 (“A person shall not, for the purpose of avoiding payment of excess profits duty, enter into any fictitious or artificial transaction ...”):<sup>125</sup>

A transaction is not well described as “artificial” if it has valid legal consequences, unless some standard can be set up to establish what is “natural” for the same purpose. Such standards are not readily discernible.

The Supreme Court makes the same point:

Artificiality, if it is to be deployed as a workable legal concept, has to be tested against some standard of transactional normality, and the search for such a standard is far from straightforward.<sup>126</sup>

---

122 “It is not that the statute has a penumbral spirit which strikes down devices or strategies designed to avoid its terms or exploit its loopholes. There is no need for such spooky jurisprudence.” [1999] 2 AC 1 at p.14.

123 2 Corinthians 3:6-8: “... a new covenant, not of the letter but of the Spirit. For the letter kills, but the Spirit gives life”.

124 For instance: (1) appointment of a non-resident trustee; (2) transfer to a non-resident company; (3) sale of an income stream for a capital sum (now caught by Income Stream code).

125 Royal Commission on the Taxation of Profits and Income Cmd. 9474 para 1024.

126 *Pendragon v HMRC* [2015] UKSC 37 at [5]. Similarly, *Hurstwood Properties v Rossendale BC* [2021] UKSC 16 at [51]: “Nor does it illuminate the legal issues to

The problem is not that the word “artificial” is meaningless. But it only has a meaning to the extent that there are standards of what is non-artificial (or “natural” or “normal”).<sup>127</sup>

For a striking illustration, see the comment of a MP opposing the proposal in the Married Women’s Property Bill 1868, that a married woman should own property, as creating:

an *artificial* and an unnatural equality between men and women.<sup>128</sup>

The 1915 Act was used as a model for anti-avoidance provisions, thus forcing the courts to decide what is artificial as best they can:

‘Artificial’ is an adjective which is in general use in the English language. It is not a term of legal art; it is capable of bearing a variety of meanings according to the context in which it is used. ... their Lordships reject the trustees’ first contention that its use by the draftsmen of the subsection is pleonastic, that is, a mere synonym for ‘fictitious’. A fictitious transaction is one which those who are ostensibly the parties to it never intended should be carried out. ‘Artificial’ as descriptive of a transaction is, in their Lordships’ view a word of wider import.

No further definition was attempted:

Where in a provision of a statute an ordinary English word is used, it is neither necessary nor wise for a court of construction to attempt to lay down in substitution for it, some paraphrase which would be of general application to all cases arising under the provision to be construed. Judicial exegesis should be confined to what is necessary for the decision of the particular case. Their Lordships will accordingly limit themselves to an examination of the shares agreement and the

---

use words such as “artificial” or “contrived” ...”

127 In this respect “artificial” is like “real”; see [App 6.5.1](#) (Economic terms with antonym).

A further problem is that if standards of artificiality can be identified, a transaction is may be regarded as more or less artificial, that is, artificiality is a matter of degree which does not easily lend itself to resolution into the stark dichotomy of artificial/non-artificial. But resolving shades of gray into black or white is a problem which frequently arises in law.

128 Married Women’s Property Bill Deb 18 May 1870, vol 201 cc878-92 <https://api.parliament.uk/historic-hansard/commons/1870/may/18/bill-16-second-reading> see Holford, “Victorian Wives and Property” in Vicinus, *A Widening Sphere* (1980).

circumstances in which it was made and carried out, in order to see whether that particular transaction is properly described as ‘artificial’ within the ordinary meaning of that word.<sup>129</sup>

In *CT Audit v Cigarette Company of Jamaica* the Privy Council cite this and continue:

22. ... a transaction is an abstract construct. Every transaction is in a sense artificial in that it is put together by two or more parties in order to create or alter legal rights and obligations as between them. While mindful of Lord Diplock’s warning against too much judicial exegesis the Board consider that in this context a transaction is “artificial” if it has, as compared with normal transactions of an ostensibly similar type, features that are abnormal and appear to be part of a plan. They are the sort of features of which a well-informed bystander might say, “This simply would not happen in the real world.” Recognising a transaction as artificial in this sense is an evaluative exercise calling for legal experience and judgment. It is certainly not an ordinary question of primary fact....

23. A transaction is not artificial merely because it is not commercial, or not fully commercial. Income tax affects transactions by way of bounty as well as commercial transactions. But if a transaction effected in a commercial context is attacked as uncommercial that may be a reason for looking at it closely... it is necessary to examine the particular transaction and the circumstances in which it was made and carried out.<sup>130</sup>

A long term interest-free company loan to a shareholder (rather than dividend) was held not to be artificial. It was relevant that the borrower was able to repay.

It would be easy to compose a judgment in favour of the opposite view (as did the court at first instance.) The word “artificial” is unclear because there are rarely clear standards. It is of little if any use in determining whether any of the practical examples considered below are tax avoidance.

In practice the word “artificial” is often used to describe a transaction carried out for tax avoidance purposes. A transaction is not categorised as tax avoidance because it is artificial: it is described as artificial because it is tax avoidance. For instance:

---

129 *Seramco Superannuation Fund Trustees v IT Commissioner* [1977] AC 287.

130 [2012] UKPC 9 at [22] - [23].

such elaborate arrangements would not have been entered into other than for the purpose of tax avoidance. The arrangements had no genuine commercial purpose. ... The arrangements can, *therefore*, correctly be described as artificial.<sup>131</sup>

Similar points apply to that particular obstacle to clear thinking, the pejorative term “device”,<sup>132</sup> and to the term “contrived”.

In UK statutory drafting the word or concept “artificial” is not used. The word abnormal is used, and whatever its problems, it is at least clearer than artificial, as it raises the fundamental issue directly and not indirectly: what is normal and what is not?

#### 49.17.3 “Genuine”

The word “genuine” is used in three distinct senses:

- (1) It is used as the antithesis of sham (in the legal sense of the term, aka fictitious). In *Ramsay v IRC*:<sup>133</sup>

to say that a document or transaction is a "sham" means that while professing to be one thing, it is in fact something different. To say that a document or transaction is genuine, means that, in law, it is what it professes to be, and it does not mean anything more than that.

- (2) It is used as the antithesis of tax avoidance. For instance:

Genuine commercial transactions (i.e. those where gaining or obtaining a tax advantage was not a main purpose, or one of the main purposes)

...<sup>134</sup>

A transaction is not tax avoidance because it is non-genuine: it is non-genuine because it is tax avoidance.

- (3) “Genuine” in expressions such as “genuine commercial transaction”.

131 *Huitson (R, oao) v HMRC* [2010] EWHC 97 at [11] (emphasis added).

132 *Norglen v Reeds Rains Prudential* [1999] 2 AC 1 at p.13: “I do not think that it promotes clarity of thought to use terms like stratagem or device.”

133 54 TC 101 at p.18. Likewise *McGuckian v IRC* 69 TC 1 at p.78: “It was thought that if the steps were genuine, ie. not sham or simulated documents or arrangements, the court was not entitled to go behind the form of the individual transactions.”

134 HMRC Consultation Document, *Simplifying Transactions in Securities Legislation* (July 2009) para 3.3. For another example see 49.23 (UK settlor and UK beneficiaries).

The word here reflects the drafter's sense of a risk that (because of the vagueness of the word *commercial*) a transaction which is not actually commercial may wrongly be presented as if it was. The word might be regarded an intensifier<sup>135</sup> but it seems to me that is no difference between "commercial transaction" and "genuine commercial transaction" even as a matter of nuance. The word is (more or less) otiose. In this context the older expression "*bona fide commercial*", and the plain English paraphrase "*real commercial (reason)*" have the same connotation.

In none of these senses is the word or concept "genuine" of any assistance in drawing the line between what is and is not tax avoidance. In this respect it is like the word "real" which requires serious unpacking: see App.6.1 (What do we mean by "real"?).

#### 49.18 Intention: parliament\government

I suggest two broad approaches to "tax avoidance" can usefully be distinguished:

- (1) "Tax avoidance" as politicians, civil servants (and perhaps most non-tax lawyers) use the term. This means a tax reduction arrangement which is contrary to the intention or wish of the *Government of the day* (ministers or civil servants, primarily HMRC). For a revealing example of this usage see the National Audit Office Report (Countering VAT Avoidance, 1992):

Avoidance involves complex issues and the position is constantly changing. A policy change in the UK, or a ruling from the European Commission or European Court of Justice, can easily result in today's unacceptable avoidance becoming tomorrow's acceptable tax mitigation, and vice versa.

This is "tax avoidance" for the purposes of politics and administration.<sup>136</sup> For example, accumulation & maintenance trusts<sup>137</sup> which between 1974

---

135 See App App. 6.12 (Real used as intensifier).

136 A purist may say this usage is incorrect or debased; that takes us to the debate as to whether or not there is such a thing as "correct" English usage (where different groups use English differently) and how one determines it if there is. But the purist cannot stop the word being used in this political sense.

137 These trusts qualified for IHT relief under s.71 IHTA 1984.

and 2006 were a paradigm example of mitigation, suddenly became tax avoidance in the political vocabulary of the Blair administration when it imposed new IHT charges in 2006.

Similarly when lobbyists (particularly those in favour of higher taxation) use the term tax avoidance to mean any tax behaviour of which they disapprove, often including behaviour which neither government nor HMRC regard as objectionable.<sup>138</sup>

(2) “Tax avoidance” in the sense used by tax lawyers. This means a tax reduction arrangement which is contrary to the intention of *parliament*. The view of the Government or HMRC should not come into it.

This lawyer’s concept of “tax avoidance” is better in law because it is consistent with the Rule of Law: the rule of law requires that tax liabilities are to be determined by settled rules derived from statute and other sources of law, and not by the opinion or decision of a civil servant or politician.<sup>139</sup> This concept is also less volatile. It is right, indeed necessary, for it to be so. If the meaning of “tax avoidance” were “constantly changing” as a result of a mere “policy change in the UK or ruling from the European Commission” then the concept is unworkable for tax.

My distinction was openly accepted in the former ITH:

### **103. Avoidance in international context**

*Within the Revenue we do not categorise avoidance in quite the narrow way that the Courts have done. Of course we make a distinction between mitigation and avoidance. However, if a taxpayer takes advantage of the law to get a tax advantage which is not, in our understanding, within the spirit of the legislation, we tend to look on that as avoidance.*<sup>140</sup>

The avoidance/mitigation distinction is not self-explanatory, it is not a

---

138 The 2016 version of Professional Conduct in Relation to Taxation used a similar concept: “The definition of ‘avoidance’ is an evolving area that can depend on the tax legislation, the intention of Parliament, interpretations in case law, the view of HMRC and the varying perceptions of different stakeholders...”. But this is not in the current version; see 116.1 (Codes of conduct).

139 See 2.8 (The Rule of Law).

140 Emphasis added.

given. It is a construct defined and determined by reference to values and attitudes of the tax culture in which we live. The difference between the approaches (1) and (2) is partly: *whose* values and tax culture does one apply, and: *to what materials* does one refer to ascertain these values?

The taxation of PETs offers an example. In 1973, CT Sandford wrote:

At present gifts made more than seven years prior to death pay no tax (with the possible exception of capital gains tax). ... Is there evidence that such gifts are contrary to the intention of Parliament? Both circumstantial evidence and logic point to this conclusion. Thus if Parliament were indifferent to the making of gifts prior to death, would there have been successive increases in the gifts *inter vivos* period, which, since 1894, has risen in four successive stages from one to the present seven years?

Sandford considered and dismissed some policy arguments in favour of an estate duty and concluded:

A reasonable interpretation would be that the gifts *inter vivos* provision was intended to prevent as many gifts as possible from circumventing estate duty.<sup>141</sup>

The repeal of CTT and return to an estate duty under the name of Inheritance Tax shows that lifetime giving since 1986 cannot now be regarded as “tax avoidance”.<sup>142</sup> I suggest that even in 1973 lifetime giving was not “avoidance” of estate duty (in the strict sense). If parliament intended to tax all lifetime gifts it would *not* have increased the lifetime gift period to seven years. It is obvious that such an increase would not stop tax-free lifetime giving. parliament would certainly not have enacted IHT taper relief under which gifts made more than four years before death pay a reduced rate! How then did Professor Sandford reach the opposite conclusion? Perhaps because he wished to advocate the imposition of a capital transfer tax. When one wishes to support a tax reform, the temptation to describe the old law as permitting “avoidance” is irresistible (as a tool of advocacy) and also has a certain underlying logic. There is tax avoidance in a political if not a lawyer’s sense. If a future Government

---

141 *Hidden Costs of Taxation*, 1973, p.113.

142 This is self-evident, but if authority is needed, HMRC’s GAAR guidance para 2.2.1 provides at D2.2.1 that “giving assets to children to reduce future IHT liabilities” is not abusive.

abolishes PETs, and returns to some form of CTT, it seems safe to predict that those supporting the reform will castigate lifetime giving as tax avoidance.

One point to note is that a comment from the Government (or any proponent of a tax reform) that existing law permits “avoidance” needs special scrutiny because it is easy to conflate the intention of parliament (tax avoidance in the strict sense) with the intention of Government (or of the proponent), which I would call tax avoidance in a political sense.

Understood in this sense, the term “tax avoidance” is still vague but not, I think, hopelessly so, as, for instance, the currently popular phrase “the right amount of tax”.

#### 49.19 Finding intention of parliament

This is the problem at the heart of the concept of “tax avoidance”. If this term means an action contrary to the intention of parliament, one must identify that intention. C.T. Sandford addressed the problem:

But here we meet the major difficulty. ... As individuals we may feel certain that a particular action is contrary to the intention of the law; but the *objective* interpretation of that intention can only be found in the words the law uses.<sup>143</sup>

Sandford was right. The issue is statutory interpretation and the principles of statutory interpretation should be applied. The intention of parliament should be decided primarily from the words of the statutes. Other material may be relevant on the usual principles of statutory interpretation: White and Green Papers, Royal Commission Reports, Hansard on *Pepper v Hart* principles, textbooks and learned articles.

The City of London Law Society comment:

Government and HMRC must also improve their institutional memory in relation to policy decisions. Members of our Committee have had experiences of talking to HMRC officials who have no idea why particular provisions are included within given legislation, even where that legislation was introduced relatively recently. In the world of the GAAR, where it is necessary to identify the consistency or otherwise of a transaction with policy, it will in turn be necessary for that policy to

---

143 IFS, *Hidden Costs of Taxation*, 1973, p.114 (emphasis in original).

be identifiable if excessive uncertainty is not to result.<sup>144</sup>

This is true not just for the GAAR, but whenever policy is an explicit or implicit factor in tax law.

Textbooks can help support fading institutional memories with fuller discussion of policy issues.

#### 49.19.1 *Two levels of intention*

It has been said that a concept of “tax avoidance” based on what is contrary to “the intention of parliament” is not coherent. The object of statutory construction is always said to be to find “the intention of parliament”.<sup>145</sup> A successful tax avoidance scheme, even as blatant a scheme as *Fitzwilliam v IRC*<sup>146</sup> or *Mayes v HMRC*<sup>147</sup> is a scheme where a court has concluded that the intention of parliament was not to impose a tax charge in the circumstances which the tax avoiders had placed themselves. Shenfield made this point:

What is meant by the intentions of the law and in what sense does avoidance circumvent them? Courts of law in our system seek to find the intention of a law in the words it uses. In this sense the avoider does not circumvent its intentions but abides by them.<sup>148</sup>

The answer is that the expression “intention of parliament” is being used in two senses. It is perfectly consistent to say that the *Fitzwilliam* scheme: (1) escapes IHT (there being no provision to impose an IHT charge); and

146 67 TC 614.

147 [2011] STC 1269.

148 A.A. Shenfield, *The Political Economy of Tax Avoidance*, Institute of Economic Affairs, Occasional Paper 24, 1968, pp.20–21. Lord Hoffmann made the same point in “Tax Avoidance” [2005] BTR 197 at p.206: “tax avoidance in the sense of transactions successfully structured to avoid a tax which Parliament intended to impose should be a contradiction in terms. The only way in which Parliament can express an intention to impose a tax is by a statute which means that such a tax is to be imposed.”

yet

(2) constitutes the avoidance of IHT.

One is seeking the intention of parliament at a higher, more generalised level. A statute may fail to impose a tax charge, leaving a gap that even a court cannot fill even by purposive construction, but nevertheless one can conclude that there would have been a tax charge had the point been considered. An example is the notorious case of *Ayrshire Employers Mutual Insurance Association v IRC* 27 TC 331 where the House of Lords held that parliament had “missed fire”.<sup>149</sup> A.A. Shenfield recognised this (perhaps grudgingly):

What the complainant against avoidance means by the intentions of a law is not what may be deduced from what it says, but what parliament intended it to say, or what parliament ought in the complainant’s opinion to have intended it to say, or what in his opinion it would have been equitable for it to say. Now I do not say that this can never have substance. We all know that, quite apart from outright errors of draftsmanship, there is a distinction between the letter and the spirit of a law. But the spirit of a law is elusive. It is tempting to believe that one has grasped the spirit of a law when in truth one is moved by prejudice or preconception. We ought to be extremely careful ...<sup>150</sup>

## 49.20 Reduction/deferral/failed avoidance

### 49.20.1 *Reduction*

The motive defence refers to “avoidance” alone but standard definitions of “tax advantage” refer to “avoidance *or reduction*” of tax.<sup>151</sup> In this expression it could be that avoidance is used in the strict sense and

---

149 It might be objected that this case is wrongly decided, by modern standards of statutory interpretation: “I venture respectfully to suggest that if, as in this case, the courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed”; Diplock, “The Courts as Legislators”, Address to the Holdsworth Club (1965).

<https://www.kessler.co.uk/wp-content/uploads/2012/05/CourtsAsLegislators.pdf>  
However, in *Cooper v Billingham* 74 TC 139 para 35 the Court of Appeal was prepared to say that the same result could happen today (albeit rarely).

150 *Ibid*, note 94.

151 See 2.12 (“Tax advantage”). The earliest use of this formula was s.35 FA 1941 (Excess Profits Tax), 3 years after the ToA motive defence was recast; but I do not think anything turns on that chronology.

reduction is referring to mitigation, but that is anachronistic (since the distinction was not known at the time). The word “reduction” was probably added to forestall an argument that the mere reduction of tax was not avoidance as long as some tax remained payable.<sup>152</sup> But nowadays a court would not be so literal and there is no doubt that (for the purposes of the motive defence) a reduction of tax from £10 to £6 amounts to the avoidance of £4.

#### 49.20.2 *Deferral*

Arrangements to defer tax may constitute “avoidance”.<sup>153</sup> Indeed the classic avoidance case *Furniss v Dawson* might be characterised as involving mere “deferral” of tax. However, the fact that tax is merely deferred, and will or may later be paid, is a factor which may support the conclusion that the arrangement is to be characterised as mitigation and not avoidance.<sup>154</sup>

#### 49.20.3 *Unsuccessful avoidance*

A purpose may exist independently of its success. HMRC correctly say:

... even if the transaction does not achieve its expected result, there may still be a tax avoidance purpose.<sup>155</sup>

OECD agree:

Successful tax reduction is neither a sufficient nor a necessary test of tax avoidance. It is not sufficient because this would cover acceptable tax planning [ie mitigation] and it is not necessary because an avoidance

---

152 Contrast the statutory expression “mitigate or remit” a penalty.

153 This is self-evident, but if authority is needed, see *Davies v HMRC* [2020] UKUT 67 (TCC) [at 44]: “there could be tax “avoidance” where tax was deferred or reduced; it was not necessary for the 30 arrangements to produce the result that no tax was payable in any circumstance.”

154 This is also self-evident, but for an example, see *IRC v Willoughby* in the Court of Appeal [1995] STC at p.183: “I do not see why the choice of an offshore bond or policy, for the taxation of which Parliament has made express and recent provision, should be regarded as tax avoidance at all. The tax is not avoided it is deferred. Moreover it is deferred to an event which Parliament has prescribed not to a time of the taxpayer’s choice.” This aspect was not considered on appeal.

155 Unallowable Purpose Tests Draft Guidance para 10050.

scheme designed to reduce tax may not succeed.<sup>156</sup>

## 49.21 Practical examples: Introduction

We can test these general principles by trying to apply them in some practical cases. There is no test like the test of practice. I first consider transfers to six types of non-resident trust (here called “trust transfers”):

(1) Trusts where settlor is excluded:<sup>157</sup>

- (a) Foreign settlor: UK and foreign beneficiaries;
- (b) Foreign settlor: only UK beneficiaries;
- (c) UK settlor: UK beneficiaries;
- (d) UK settlor: foreign beneficiaries.

(“Foreign” here refers to someone not resident or domiciled in the UK and not expecting to become resident or domiciled.)

(2) Trusts where the settlor is a beneficiary:

- (a) Settlor foreign domiciled but UK resident;
- (b) Settlor foreign domiciled and non-UK resident.

This by no means covers all the possible circumstances of trust transfers, but one can extrapolate from these to others which may arise.

It may be helpful to summarise the questions that arise on a trust transfer. One must ask: Is the purpose to avoid (1) income tax? (2) CGT? (3) inheritance tax? It is obviously necessary to consider each tax separately; I will consider CGT and IT first, and then IHT. Thus what seemed like a single issue (is there tax avoidance?) raises 3 sub-issues; that is an inevitable consequence of the rule that taxation includes any tax.<sup>158</sup>

However, a tax charge does not arise in isolation, but is charged in different ways on the settlor, trustees<sup>159</sup> or beneficiaries. It is best to consider these three classes of taxpayer separately, though the issues partly overlap. So in the case of a trust transfer one must ask whether the purpose is avoidance of IT/CGT/IHT liabilities of (1) the settlor; (2) the trustees; (3) the beneficiaries. Thus what seemed like three issues raises nine sub-

156 OECD Report by Committee of Fiscal Affairs (1980) cited in OECD’s International Tax Avoidance and Evasion (1987), p.17.

157 It is assumed that the spouse of the settlor is also excluded.

158 See 49.8 (Meaning of “taxation”).

159 Although trustees are in economic reality paying tax on behalf of beneficiaries, the rules for taxation of trustees are distinct from the rules for taxation of beneficiaries so it is best to consider trustees separately.

issues. Further, post-*Willoughby* one must consider whether there is a factual subjective purpose to reduce any of these tax liabilities and then whether the purpose (if present) is to be classified as avoidance or mitigation. So what seemed like a single issue (is the purpose of a trust transfer to avoid taxation?) actually turns out to raise 18 sub-issues (is the purpose to save IT/CGT/IHT by settlor/trustees/beneficiaries and, if so, is it mitigation or avoidance?).

## **49.22 Trust transfer: Settlor excluded**

Transfers to a trust from which the settlor is excluded have two common features which are relevant for the motive defence:

### *49.22.1 No avoidance of settlor's tax*

The trust transfer will usually bring a tax advantage to the settlor (compared to the position if there is no transfer). As far as the settlor's tax liabilities are concerned, since she is excluded from the trust, any tax advantage she might obtain in this way is mitigation not avoidance. It is not in principle the intention of parliament that she should pay tax in respect of income/gains/capital from which she is excluded.<sup>160</sup> However, HMRC rightly say that the purpose of a trust transfer may be to avoid tax liabilities of the trustees and beneficiaries and here closer investigation is needed.

### *49.22.2 Non-tax reason for trust*

There will usually be non-tax reasons for the settlor to make a trust, rather than making absolute gifts. The advantages are asset protection in the broadest sense: protecting the trust fund from profligate beneficiaries, divorcing spouses, and sometimes forced heirship or foreign exchange control. These are good reasons but not commercial ones. So a trust transfer must pass Condition A, not Condition B, but it does so in the context of a transaction which is not usually wholly tax driven. In the absence of tax considerations the usual form would normally be (and in practice generally is) a discretionary trust.

## **49.23 Foreign settlor; UK/non-UK beneficiaries**

---

<sup>160</sup> See Lord Templeman's dictum in 49.14.5 (Economic consequences). The exceptional case of s.86 TCGA is discussed below.

This section considers a transfer to a trust whose beneficiaries include (but are not primarily) UK resident and domiciled beneficiaries, and exclude the settlor.

#### 49.23.1 *Avoidance of trustees' tax*

In deciding whether the trust transfer yields a tax advantage for the trustees, one obviously cannot compare the actual position (appointment of foreign trustees) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done (which in this context must be the appointment of UK trustees). That seems a reasonable comparable; the settlor has a choice: to transfer to trustees in the UK or elsewhere and they must do one or the other. In the absence of UK tax, there will often be no reason to prefer the one to the other.

The choice of UK trustees (rather than foreign trustees) would not in principle yield any greater CGT before 2007/08.<sup>161</sup> There is no question of CGT avoidance for dispositions before the FA 2006.

The position is slightly more complicated for dispositions after 2006. The choice of exclusively UK trustees of a discretionary trust will yield CGT (and income tax on foreign source income) not due from non-resident or mixed resident trustees.<sup>162</sup> However, if one trustee (even a minority trustee) is not UK resident, the trustees are not (in short) subject to CGT or income tax on foreign income. Does that mean that the choice of non-resident trustees is income tax avoidance? It is submitted that the answer is plainly no. Section 475 ITA assists in the appointment of non-resident trustees, suggesting that this cannot be contrary to the intention of parliament. To hold otherwise would be to suggest that the settlor has a duty to maximise UK income tax and CGT liability. Any tax saving here must be mitigation. It is relevant to note that the reason for the abolition of the rule that professional trustees should be regarded as non-resident was not to prevent avoidance: it was to avoid a breach of EU

---

161 As long as the UK trustees were professionals: see the 4th edition of this book at 5.8 (Professional trustees treated as non-resident).

162 See 6.4 (Trust residence for IT/CGT). The IT position for trustees before 1989 was thought by HMRC to be the same, and was held in *Dawson v IRC* 62 TC 301 to be only slightly (and for present purposes not materially) different.

State Aid law.<sup>163</sup>

#### 49.23.2 *Avoidance of beneficiary IT*

In deciding whether the trust transfer yields an income tax advantage for the beneficiaries, one obviously cannot compare the actual position (transfer to trust) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done.

The actual position of UK resident and domiciled beneficiaries is that they will pay tax on income distributions from the trust, but no tax on accumulated income and (in the absence of s.731 ITA) no income tax on capital payments. This is a clear income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of the tax advantage may not constitute purpose, but it depends on the facts.<sup>164</sup>

The actual position of UK resident foreign domiciled beneficiaries is that they will pay tax on remitted income distributions from the trust, and (in the absence of s.731 ITA) no income tax on capital payments even if remitted. This could be an income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust, but the advantage may be small or nil.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of this somewhat attenuated tax advantage will not constitute purpose.

#### 49.23.3 *Avoidance or mitigation*

Returning to the practical example of a transfer to a trust by a foreign settlor, with both UK and foreign beneficiaries. Is the purpose (if it exists) of saving income tax by the beneficiaries to be classified as avoidance? The difference between being a beneficiary of a discretionary trust and owning capital outright is normally<sup>165</sup> a difference with “economic

---

163 HMRC announcement 23 March 2006.

164 See 49.11 (Foresight/purpose distinction).

165 It would be different if the trustees (perhaps guided by a strongly worded letter of wishes) closely follow the wishes of a beneficiary.

consequences”. On an economic consequences test this should be mitigation.

There is another indication that the intention of parliament is not infringed. If s.731 ITA applies, in this class of case, the result is unfair and sometimes extremely unfair. The UK beneficiaries will pay income tax on capital payments on an amount by reference to relevant income which may greatly exceed their “share” of the income of the trust computed on any just and reasonable basis.

If there is avoidance of UK tax there is likely to be avoidance of tax in every other jurisdiction where beneficiaries are resident;<sup>166</sup> it is impossible for the settlor to make a discretionary trust anywhere without tax avoidance elsewhere – which, if not absurd, is somewhat startling.

#### 49.23.4 *Avoidance of beneficiary CGT*

The CGT position is complicated by tax reforms. Before 1998, capital payments from the trust would be free of tax to the beneficiaries (because the usual charge did not apply to a trust with a foreign domiciled settlor). This was expressly set out in s.87 TCGA.<sup>167</sup> One must take that as a special tax regime intended by parliament. Pre-1998 transfers cannot be regarded as involving CGT avoidance by the beneficiaries.

After 1998, capital payments to UK domiciled beneficiaries give rise to CGT by reference to trust gains regardless of the domicile of the settlor and in 2008 the charge was extended further. This could be taken to suggest that post-1998 transfers constitute CGT avoidance by the beneficiaries. But the points made in relation to IT avoidance/mitigation apply here too. For dispositions before 2006, s.69(2) TCGA is even stronger than it is now. So the better view is that any CGT saving is mitigation.

#### 49.24 **Foreign settlor; UK beneficiaries**

The next case to consider is a transfer to a trust whose beneficiaries are all UK resident and domiciled. A trust transfer primarily motivated by non-tax advantages (asset protection) should not normally be regarded as having the purpose of tax reduction.

In an unusual case, however, that might be one of the settlor’s purposes.

---

166 Assuming they are in a jurisdiction with a tax system comparable to the UK.

167 And in the predecessor legislation: s.17 Capital Gains Tax Act 1979.

Indeed, it could be their primary purpose. It can happen that the settlor creates a trust primarily for a UK beneficiary, and the only reason they do this is tax considerations. Asset protection does not concern every settlor. They would make an absolute gift to a UK beneficiary but for UK tax reasons only they make a transfer to a trust for their benefit. The transfer is solely UK tax driven.<sup>168</sup>

In these (factually unusual) circumstances the question arises whether the tax saving purpose is avoidance or mitigation. Section 69(2) TCGA and s.475 ITA show the intention of parliament to be that the choice of foreign trustees by a non-resident and non-domiciled settlor should not be regarded as avoidance of trustees' IT or CGT. These sections apply regardless of the residence and domicile of the beneficiaries. The inference should probably be carried across that there is likewise mitigation not avoidance of beneficiaries' IT and CGT liabilities; but the point is arguable.

#### **49.25 UK settlor and UK beneficiaries**

Contrast now a settlor who is UK resident and domiciled, making provision for UK beneficiaries. Assume the settlor is not to be a beneficiary. Again, they will often prefer a trust to outright gifts, for non-tax reasons, and the choice is UK or non-resident trustees. If they choose the latter, their purpose (or one of their purposes) is likely to be to reduce CGT or Income Tax and this purpose will be tax avoidance rather than mitigation. This is not an invitation to partake in a statutory regime; we all know that this income tax saving is what s.731 is intended to stop.

The distinction is therefore between:

- (1) foreign settlors (whose offshore trusts are not in principle regarded as tax avoidance), and
- (2) UK settlors (whose offshore trusts are in principle regarded as tax avoidance).

This distinction is clearly drawn in the 1974 Green Paper on Wealth Tax:

##### **Overseas trusts**

22. Trusts where the trustees are not resident in the UK and the

---

168 This might be made evidentially clear by contemporary correspondence, or if, perhaps, the settlor's gift to a UK child is settled and their gift to other children outside the UK is absolute; but such details only go to identify the settlor's purpose, and are not otherwise significant for tax.

administration of the trust is ordinarily carried on outside this country fall into two broad categories.

**“Genuine” overseas trusts**

23. The first category includes all those trusts set up with non-resident trustees by settlors who have little or no connection with this country. *In such a case even if there are one or more beneficiaries or discretionary objects resident in this country there are no grounds on which it would be right to bring the trustees or the whole of the trust assets within the charge to the tax.* But a UK resident individual with an interest in such a trust, whether in possession or reversion, has a realisable asset which should be included in his personal wealth at its actuarial value. If such a trust is discretionary however its objects generally have no interests in the trust assets on which they should be assessed.

**“Artificial” overseas trusts**

24. The second category includes those trusts where a *UK settlor* arranges for the trustees to be non-resident or where the administration of an existing resident trust passes overseas. The legal ownership of the settled property is thus vested in persons outside UK jurisdiction and *the arrangement is very frequently prompted by tax avoidance considerations.* Accordingly, where settled funds are provided directly or indirectly by a person who at the time the funds were provided was domiciled or ordinarily resident in the UK, the trustees will be liable to the same extent as if the trust had been resident.<sup>169</sup>

While the Paper was addressing the issue of what the Wealth Tax should cover, this passage illustrates very well the general understanding of the concept of tax avoidance in the context of offshore trusts.

Note the terminology of genuine *v.* artificial to describe tax avoidance. The author of the Green Paper had sufficient intellectual rigour to recognise the difficulties in these words and put them in quotation marks accordingly.<sup>170</sup> If only this were done more often!

#### **49.26 UK settlor; foreign beneficiaries**

Now consider a UK settlor making a trust (from which they are excluded) for foreign beneficiaries.

---

169 Wealth Tax, Cmnd 5704, 1974 paras 22–4 (emphasis added). The fact that the Wealth Tax proposal was abandoned does not affect the relevance of the passage.

170 See 49.15.2 (“Artificial”/“devices”); 49.15.3 (“Genuine”).

What about liabilities of the beneficiaries? Since they are not UK resident, they are largely outside the scope of IT and CGT, so there is no avoidance.

In deciding whether the trust transfer yields a tax advantage for the trustees, one can again compare the actual position (appointment of foreign trustees) with the appointment of UK trustees. UK trustees would pay IT if the trust were discretionary but not (for all practical purposes) if it were an interest in possession. Any IT saving must be mitigation. CGT is different: UK trustees will pay the tax, and foreign trustees will not. However, trustees are in economic reality paying tax on behalf of the beneficiaries. Where the beneficiaries are not within the scope of the tax then any tax saving by the trustees must be mitigation. This is consistent with the rule that the anti-avoidance provisions of s.87 TCGA and s.731 ITA will not in principle apply on payments to beneficiaries outside the scope of CGT and IT.

#### **49.27 UK settlor; UK/foreign beneficiaries**

Where there is a mixture of UK and non-UK beneficiaries I suggest the starting point is that one would expect the settlor to make their trust here, so a transfer to foreign trustees would be regarded as avoidance. (In such a case there is something to be said in income tax terms for the creation of two separate trusts for two separate classes of beneficiaries, the residents and the non-residents, so one at least qualifies for the motive defence. But CGT considerations point the other way.)

#### **49.28 Trust transfer; settlor beneficiary**

##### *49.28.1 Remittance basis settlor-beneficiary*

The next case concerns a remittance basis taxpayer settlor who transfers assets to a non-resident trust under which they are the principal beneficiary.

Income tax is not avoided since trust income continues to be taxed on a remittance basis under s.624 ITTOIA. There may be an IT reduction after the death or exclusion of the settlor but it will not (normally) be the purpose (or even one of the purposes) of the settlor to obtain that (normally very long term) advantage, quite apart from the question of whether the advantage is avoidance or mitigation.

There is in principle a CGT advantage in that the settlor moves from the

remittance basis to the s.87 capital payment remittance basis. To obtain that advantage may well be one of the purposes of the trust. If so, is it CGT “avoidance”? It must have been a decision of parliament *not* to apply s.86 TCGA to a foreign domiciled settlor and the decision was confirmed in 2008 (where a proposal to extend s.86 to foreign domiciled settlors was contained in FD Draft Clauses (January 2008) and dropped in the Finance Bill). It is suggested that there is no CGT “avoidance”. This is a “statutory invitation” in plain terms.

#### 49.28.2 *Non-resident non-dom settlor-beneficiary*

Where the settlor is the principal beneficiary and neither domiciled nor resident then UK tax saving is not likely to be a purpose during the life of the settlor, because no saving in fact arises. After the death of the settlor there may be a saving if there are UK beneficiaries. The position then becomes like that of a trust where the settlor is excluded, and the discussion above is relevant.

### 49.29 **Appointing non-UK trustees**

Similar principles apply. One case is where the settlor and beneficiaries are wholly UK based, the settlor has created a UK trust, and foreign trustees are later appointed. The inference that the appointment has the purpose of saving UK income tax or CGT is very strong and this purpose is avoidance, not mitigation.

At the other end of the scale is the case where the settlor and the principal beneficiaries have gone to live abroad permanently and local trustees are appointed. One reason for the export of the trust is that the settlor may (or may continue to be) a trustee. If so, the appointment may have no tax saving purpose at all. But if (as is likely) it has a tax saving purpose, that is mitigation and not avoidance.

What if all the beneficiaries are abroad but the settlor remains in the UK? The same tax savings could in principle be had by winding up the trust with outright appointment to beneficiaries, and that transfer is not likely to constitute avoidance. So the appointment of foreign trustees should not be avoidance.

What if the settlor goes abroad and the beneficiaries remain in the UK? It is tentatively suggested that a tax saving purpose (if it exists) is likely to be avoidance.

A more borderline case is where the settlor and beneficiaries go to live

abroad for a medium term period (say five years<sup>171</sup>). Non-UK resident trustees are appointed with the intention that the trust will continue to be non-resident even after the settlor returns to the UK. This is probably to be classified as tax avoidance, albeit long-term tax avoidance, but views may differ, especially if the time spent abroad is longer than five years.

### **49.30 Trust transfer: IHT avoidance**

#### 49.30.1 *Situs change*

The transfer of money by a foreign domiciled person from a UK bank to a foreign bank in order to make the money excluded property, is an act of tax mitigation, not avoidance. See *Beneficiary v IRC* [1999] STC (SCD) 134 at p.145. The same would apply if the transfer is made by trustees of a trust with a non-domiciled settlor. The same would apply to a sale of UK situate property and re-investment in non-UK situate property.

#### 49.30.2 *Transfer to trustees*

The residence of trustees is almost wholly irrelevant for IHT.

A gift by a settlor to a trust from which they are excluded is mitigation of their own IHT<sup>172</sup> but it is also necessary to consider the IHT savings of trustees and beneficiaries.

If a foreign domiciled settlor gives, and the trustees retain, non-UK property, any IHT saving purpose which may exist is mitigation. This is so even if the beneficiaries are UK domiciled (so an absolute gift to them would have brought the trust property into the scope of IHT). Section 48 IHTA provides that foreign property in a trust made by a foreign domiciliary is excluded property. Any IHT advantage conferred by the trust, so far from being contrary to the evident intention of parliament, would appear to be in accordance with parliament's evident intention. The argument to the contrary amounts to an argument that the settlor has a duty to maximise IHT liabilities.<sup>173</sup>

---

171 There is no particular significance in selecting five years as illustrative of a medium term period, but it is consistent with the CGT temporary non-residence rules; see 10.1 (Temporary non-residence).

172 See 49.20.1 (No avoidance of settlor's tax).

173 The avoidance/mitigation issue did not arise in connection with the gift to a trust in *Beneficiary v IRC*, because reducing tax was not a purpose in the mind of the transferor/settlor, even though it was a consideration for his advisers, and even

A gift by a settlor to a trust from which they are not excluded, in circumstances where the settlor is anticipating becoming UK domiciled, is borderline. Section 48 IHTA makes it plain that such a gift carries substantial IHT advantages. But is it “contrary to the evident intention of parliament” to enjoy these advantages? The author tentatively suggests that such a gift should be regarded as IHT mitigation not avoidance. This is consistent with the rule that the GWR provision does not apply here.<sup>174</sup>

For transfers before 27 March 1974 it would be necessary to consider estate duty.

### 49.31 Transfer: Trust to underlying co

I use the term “**underlying company**” to mean a company wholly-owned by trustees, which holds beneficially what might in substance be regarded as trust assets. The company would not be UK resident.

#### 49.31.1 *Transfer: Commercial reasons*

Transfers to underlying companies arise in a wide variety of circumstances and may be made for the purpose of obtaining non-tax advantages:

- (1) Advantages of trust administration:
  - (a) Segregation of trust funds of trustee (or occasionally combining trust funds) for ease of management.
  - (b) Avoiding conflict of law and other problems of trustees holding assets (especially land) in foreign jurisdictions. (The problem is most serious in civil law jurisdictions which may not understand or even recognise trusts, but problems could also arise in common law jurisdictions.)
- (2) In the case of land (or other onerous property), avoiding personal liabilities of trustees arising from direct ownership.
- (3) In the case of interest in possession trusts, to allow retention of income (to avoid distributing income to life tenant).

It is a question of fact in each case whether the purpose of a transfer to a company is to obtain these non-tax advantages and a question of law whether they should be regarded as commercial.

---

though the principal beneficiary was UK resident at the time; see [1999] STC (SCD) 134 at [145h] - [146].

174 See 74.15 (Death: settled excluded property).

Purpose (1) is commercial: it arises in the ordinary course of managing investments. A transfer from trustees to a company is more often than not a commercial transaction, and for the motive defence one applies Condition B and not Condition A. Purpose (2) is rarer but certainly commercial when it occurs. Purpose (3) is not commercial. Where it is the policy of trustees that all its trust funds should be held in separate underlying companies,<sup>175</sup> the conclusion that the transfer has a commercial purpose seems factually likely. But if one is looking at New Condition B, the additional statutory requirements must be met, in particular, the trustees must carry on a business.

#### 49.31.2 *Transfer for avoidance*

Transfer of UK assets<sup>176</sup> from trustees to an underlying company may offer significant tax advantages. It is a question of fact whether any of these advantages are purposes of the transfer and a question of law whether the purpose is avoidance or mitigation.

I begin with cases where s.624 ITTOIA does not apply. There are three possible tax advantages.

##### *(1) Obtaining IHT excluded property status (non-dom settlor)*

*Burns v HMRC* held that this type of planning was avoidance. The judge started with some simple examples of non-avoidance:<sup>177</sup>

I would certainly accept that if a non-domiciled person arranged to hold foreign situs, rather than UK situs, assets, and then died, no tax advantage would have been sought. Thus if a UK house was sold, and a French house purchased, that would simply be a case of genuinely changing the assets held, and were some [ToA] point to hinge on whether the change was effected for the purpose of avoiding UK tax, the answer would be that it was not.

---

175 The Edwards report suggests that 80–90% of Jersey trusts hold their assets through underlying companies: *Review of Financial Regulation in the Crown Dependencies* Cm 4109 (1998) para 12.5.2

<http://www.archive.official-documents.co.uk/document/cm41/4109/4109-i.htm>

Trusts managed in Switzerland generally use underlying companies for Swiss law reasons.

176 Similar considerations apply to a transfer of foreign assets with a view to realisation and re-investment in UK assets.

177 [2009] UKSPC SPC00728 at [59].

And if UK bank deposits were withdrawn and deposits placed elsewhere, then again, that would be a pure investment switch, and not a step the purpose of which would involve the purpose of achieving a UK tax advantage.<sup>178</sup>

However, the judge considered that use of a company is different:

Indirectly retaining a UK real property, and simply achieving the technical change in status by putting the property into a non-UK resident company in a case where one of the purposes is to achieve the potential Inheritance Tax advantage, implicit by effecting those steps, does seem to me to cross the border between mitigation and tax avoidance. This is because it has involved no real change of investment, as in the two previous examples, but the retention of the UK property, accompanied by a step to change the normal tax consequences of that. Thus where it is shown that the CTT or IHT considerations were one of the purposes of the transfer, or other where the appellants have not displaced the reasonable presumption that UK advantages were one of the purposes, I conclude that those purposes involve tax avoidance and not merely mitigation.<sup>179</sup>

*Rialas v HMRC* [2019] UKFTT 520 (TC) took the same view. In this case a non-UK domiciled settlor created a trust/underlying company structure, in 2005, for IHT reasons:

85. [Counsel for the taxpayer] argued that even though Mr Rialas had sought to protect his estate from Inheritance Tax what Mr Rialas had done was not tax avoidance because he had merely taken advantage of an opportunity which had been intended by Parliament by inserting a non-resident trust<sup>180</sup> between himself and his UK assets. [Counsel] attempted to reinforce this argument by referring us to [the

---

178 [Author's footnote] The purpose may well be to achieve a UK tax *advantage*; the correct point, and what the judge presumably meant to say, is that the purpose is mitigation not avoidance. The Commissioner has confused tax avoidance and tax advantage.

179 [2009] UKSPC SPC00728 at [59]. See too *Estera Trust (Jersey) v Singh* [2019] EWHC 2039 (Ch), discussed at 2.5.4 (Practitioner/judicial views today), where a transfer to a Jersey holding company “could be regarded as aggressive tax avoidance, even though relatively unsophisticated in comparison with other notified avoidance schemes”.

180 Author's footnote: More accurately, the underlying trust company gave the IHT advantage; but nothing turns on that.

IHT residence-property code, inserted in 2017]. The effect of Schedule A1 was to deny excluded property relief where the non-UK property in question was directly owned by a trustee of a settlement created when the settlor was domiciled outside the UK, but the value of that property could be traced to residential property situated in the UK.

86. By this provision, he argued, Parliament had, by implication, intended that excluded property relief was available as long as the UK property in question was not UK residential property. In this way, what Mr Rialas had done was within an exemption intended by Parliament and was not therefore tax avoidance.

87. This was an interesting argument, but it does of course refer to a legislative change made in 2017, when the position regarding non-domiciled individuals had been changed dramatically as well as a number of other related changes.<sup>181</sup> We cannot therefore regard it as showing anything other than the fact that, in 2017, in the context of a very different tax environment for non-domiciled individuals, Parliament decided not to deny excluded property relief for UK property held via a non-resident trust other than where the property was UK residential property.

88. We therefore agree with [Counsel for HMRC] that the interposition of a non-resident trust<sup>182</sup> between Mr Rialas and UK property, did have a tax avoidance motive.

It is correct that the enactment of the IHT residential property code in 2017 does not shed much light on the intention of parliament in 2005.<sup>183</sup>

But what if the same transactions were carried out post-2017? Has the intention of parliament now changed?<sup>184</sup> The taxpayer has some good points to make:

- (1) The principle that companies are not transparent for tax purposes is very deep in the tax system. Planning of this kind has been possible since the repeal of the Mortmain Acts (one of whose purposes was to prevent tax avoidance by vesting land in companies). The planning is standard practice: An adviser who failed to recommend it would certainly be held to be negligent.

---

181 The “other related changes” are presumably the protected-trust regime.

182 Again, the reference should be to the underlying trust company, not the trust.

183 See 31.37 (Time to ascertain intention of parliament: Change in law).

184 See 78.22 (IHT residence code: Critique).

- (2) The transfer to a company also has a likely CGT disadvantage,<sup>185</sup> and a possible income tax disadvantage,<sup>186</sup> so any tax reduction may be regarded as part of a “package deal”, with advantages and disadvantages. This does not savour of tax “avoidance”.
- (3) As noted in *Rialas* the enactment of the IHT residential property code, restricted to residential property, suggests that parliament chose to acquiesce in such arrangements for non-residential property.<sup>187</sup>

The difficulty with the third argument, it seems to me, is that it assumes a level of coherence in UK tax law which does not exist (and never has, and never will). At some time the point may come to be judicially considered at a higher level, and in more depth, but *Burns* has now been unchallenged for so long that the outcome is likely to be the same.

(2) *Avoid additional rate IT on UK source income of discretionary trust*

In editions of this work up to 2019/20 I said:

The striking thing about this tax is that there is generally<sup>188</sup> no effective method for HMRC to collect it and in practice no one expects it to be paid in cases where all the beneficiaries are outside the UK.<sup>189</sup> Perhaps this supports a conclusion of mitigation.

But the wide extent of mutual enforcement treaties now brings that into question.

(3) *Avoid higher rate income tax on income of interest in possession trust*

I suggest that a distinction should be drawn between UK resident life tenants (tax advantage is avoidance) and non-residents (tax advantage is

185 See 57.55 (Trust holding company).

186 Loss of tax credits and double taxation relief; sometimes, possible charge under income tax benefit in kind rules.

187 In *Mehjoo v Harben Barker* CGT planning involved converting UK registered shares to bearer shares and removing them from the UK, in order to make them non-UK situate. That was described (in an obiter comment) as tax mitigation, not avoidance: see [2013] EWHC 1669 (QB) at [447] (the point was not considered on appeal). The subsequent decision to legislate on bearer shares for CGT but not for IHT also supports that view. But a stray comment in a case where the issue was not argued, or relevant, does not count for much.

188 Except in the case of UK land.

189 It is considered that non-payment is not in principle dishonest, and so not a fraud on HMRC, though this conclusion depends to some extent on the facts of the case.

mitigation). In many circumstances, however, non-residents do not pay income tax at the higher rate.

In *Burns v HMRC* [2009] UKSPC SPC00728 at [58]:

I deal first with the feature of trying to cap the level of charge to income tax at the basic rate. This advantage seems to me to be in the category of tax avoidance. ... it seems to me to be difficult to argue that a transaction designed to reduce income tax by the mechanism of the transfer of UK property to a non-resident person (virtually a paraphrase of the opening wording of section 739) is mere mitigation.

#### 49.31.3 *Transfer by settlor-interested trust*

If the purpose of the transfer to an underlying company is to avoid a charge under s.624 ITTOIA, this is considered to be avoidance and not mitigation.

#### 49.31.4 *Transfer of non-UK assets to underlying co*

When non-UK assets are transferred to an underlying company, the UK tax advantage may be less or nil or there may only be tax disadvantages in the loss of double taxation reliefs. In the absence of an intention to re-invest in the UK the purpose cannot as a matter of fact be a tax reduction purpose.

### **49.32 Non-resident non-dom transfers UK property to offshore co**

A foreign domiciled non-UK resident individual who transfers UK assets to a non-resident foreign incorporated company may also enjoy comparable tax advantages:

- (1) Obtaining IHT excluded property status.
- (2) Avoiding higher rate income tax.

Such transfers also give significant advantages which have nothing to do with tax. In particular, in the case of UK land, avoiding personal liabilities arising from direct ownership. In such cases, the motive defence may well apply. But if a purpose of the transfer is to reduce IHT or IT, it is considered that this is mitigation not avoidance; the arguments are the same as above.

### **49.33 UK resident non-dom transfers to offshore co**

Suppose a foreign domiciled UK resident individual transfers UK assets

to a non-resident foreign incorporated company.

If a purpose was to reduce IHT, the transfer is considered to be IHT mitigation. A transfer to reduce income tax (because the company pays only basic rate income tax) is considered to be IT avoidance.

#### **49.34 Transfer to UK resident foreign incorporated co**

There are many reasons why assets may be transferred to UK resident foreign incorporated companies.

A foreign domiciliary starting a new UK resident company for trade or investment would prefer a non-UK incorporated company so as to own non-UK situate property. This is a commercial transaction and clearly satisfies Old Condition B. New Condition B is (almost) a dead letter,<sup>190</sup> but in an appropriate case there is a reasonable case that New Condition A (or A and B) is satisfied.

A foreign domiciliary (F) wishing to sell a UK unincorporated business may enter into an arrangement under which:

- (1) F gives the business to a UK resident foreign incorporated company.
- (2) F sells the company (not UK situate property).

If the purpose is to avoid CGT (by utilising s.162 TCGA relief) then the claim for the motive defence is weak.

#### **49.35 Transfer between trusts**

There are many reasons why funds may be transferred between trusts. It is impossible to generalise as to whether such transfers are made for tax avoidance: one must look at the reason for the transfer.

One reason such transfers are made is where a single trust holds several sub-funds for different branches of a family. The transfer avoids the unfairness which arises under a single trust, that gains accruing to one share are taxable on a beneficiary of another share who receives a capital payment. It is considered that a transfer for this reason does not have the motive of CGT “avoidance”.

#### **49.36 Employee benefit trusts**

*Hoey v HMRC* concerned a common-form contractor loan scheme:

---

<sup>190</sup> See 49.10.3 (New Condition B).

I ... regard the basic structure, of Contractors being employed by an umbrella company which then provides their services to the End Users, as being a perfectly reasonable commercial transaction. However, I regard the insertion of additional transactions, being the setting up of an umbrella company offshore, which makes payments to a trust, which then makes interest free loans to the Contractors, with the expectation that those loans are never repaid, as constituting tax avoidance.<sup>191</sup>

That seems self-evident.

An offshore EBT set up by a UK resident employer is in principle a commercial transaction.<sup>192</sup> However it is more than incidentally designed for the purpose of avoiding taxation, and would not satisfy new condition B. A case of the kind which HMRC call “a normal commercial arrangement”<sup>193</sup> should satisfy old condition B, on the grounds that it was not, *overall*, designed for the purpose of avoiding tax.

HMRC may not agree. Business Brief 18/11 floats the possibility of a s.731 charge on EBTs, without telling us much:

### 5.1.2 Benefit charge

Where the company, not the employee is the transferor the benefit charge may apply. The benefit charge matches any income arising within the Employee Benefit Trust with any benefits received by the employee. ... The benefit charge could, therefore, catch any income arising in the offshore Employee Benefit Trust if it is not caught by the income charge and there are actual distributions by the trustees which are not otherwise chargeable to Income Tax.

## 49.37 Time to ascertain purpose

What matters is the purpose of the transferor at the time of the transfer.<sup>194</sup> It is quite common that a transfer is made by a foreign settlor for foreign beneficiaries, for unimpeachably non-UK tax reasons, and later some of the beneficiaries move to the UK. Then they will find the trust qualifies for the motive defence and is a useful vehicle for income tax purposes.

---

191 [2019] UKFTT 489 (TC) at [153]. HMRC might have cited *HMRC v Hyrax Resourcing Ltd* [2019] UKFTT 175 (TC) at [162] - [174] where (more or less) the same scheme was held to constitute avoidance.

192 See 49.6.2 (Arm’s length requirement).

193 See 46.5.7 (Employment benefit trust).

194 The point was made in *Herdman v IRC* 45 TC 394; but it is plain from the terms of the statute.

There are three possibilities:

- (1) The change of purpose may be accompanied by a new transfer of assets carried out for a tax avoidance purpose. In that case the transfer of asset provisions may apply in relation to the new transfer.
- (2) There may be no further transfer of assets but there may be associated operations carried out for a tax avoidance purpose. The question whether this brings the transfer of asset rules into operation is discussed in para 49.37 (Associated operations: introduction).
- (3) There may be a change of purpose without any new transfer or associated operation. In that case the motive defence remains available and the transfer of assets provisions do not bite at all.

### **49.38 Time to ascertain intention of parliament: Change in law**

The concept of tax avoidance as an act contrary to the intention of parliament raises the question of *at what time* parliament's intention is to be ascertained. The intention of parliament may change and the same act could be tax avoidance at one time but not at another. Of course, it needs an Act of Parliament to make this change.

For the purpose of the motive defence, tax avoidance must mean an act contrary to the intention of parliament at the time the transfer took place. This is consistent with the rule that one examines the purpose of the transferor at the time of the transfer.<sup>195</sup> Otherwise changes in the intention of parliament would often have considerable retrospective effect: a transfer which was not tax avoidance when it was made would retrospectively be treated as made for a tax avoidance motive (or vice versa). This view was adopted in *Rialas v HMRC*.<sup>196</sup>

This rule may of course favour HMRC. A transfer to avoid (say) Selective Employment Tax would fail the motive defence and that would continue to be the case even after the abolition of that tax.

#### *49.38.1 Transfer in anticipation of reform*

A distribution or disposal made in 2007/08 to avoid the new rules in the FA 2008 from 2008/09 is not tax avoidance because (1) it is not contrary to the intention of parliament to avoid *future* tax laws: the intention of

---

<sup>195</sup> See 49.35 (Time to ascertain purpose).

<sup>196</sup> See 49.29.2 (Transfer for avoidance).

parliament is to be determined at the date of the transfer;<sup>197</sup> (2) parliament clearly anticipated and accepted that such disposals and appointments would be made and took no steps to counteract them.

#### 49.38.2 *Transfer by non-resident pre-1996*

Parliament decided in 1936 not to apply s.720 ITA to transfers made by non-resident transferors, and that was (after some vacillation) held to be the law.<sup>198</sup> In principle, a transfer of assets by a non-resident between 1936 and 1996 could not be said to be contrary to the intention of parliament, and so it could not constitute income tax avoidance.<sup>199</sup> However, the legislation which reversed *Willoughby* and brought transfers by non-residents into the scope of the transfer of asset provisions applies to pre-1996 transfers.<sup>200</sup> The explanation is that a transfer by a non-resident before 1996 does not normally involve income tax avoidance. However, there are special circumstances where a transfer by a non-resident may be for income tax avoidance<sup>201</sup> and, of course, a pre-1996 transfer made for CGT or IHT avoidance would also be caught.

#### 49.38.3 *Transfer pre-1981; no power to enjoy*

Similar considerations apply to a transfer before 1981 to which s.720 ITA did not apply (because the transferor had no power to enjoy the income of the asset transferred). Parliament decided in 1936 not to apply the transfer of asset provisions to transfers unless the transferor had power to enjoy,

---

197 See 49.36 (Time to ascertain intention of parliament: change in law).

198 See 46.15.3 (Transferor non-resident when transfer made).

199 Contrast pre-1936 transfers by UK resident individuals; these were caught by the new 1936 legislation, but parliament had never made a decision that such transfers should not be taxed so it would be correct to regard such transfers as made for tax avoidance purposes.

200 s.81 FA 1997. There is an exemption only for income arising before 1996.

201 Examples of special cases are:

- (1) a transfer in anticipation of becoming UK resident or
- (2) a transfer made just before the enactment of the new legislation (when the change of the law was predictable).

Another view could be that such transfers constitute tax avoidance from after the 1952 and 1970 consolidations, which parliament enacted on the basis of the *Congreve* and *Herdman* decisions (later reversed) that transfers by non-residents were caught. But that offends common sense and the principle that a consolidation does not alter the law.

and that was (again after some vacillation) held to be the law.<sup>202</sup> So such a transfer should not constitute income tax avoidance. In 1981 parliament brought in s.731 ITA which applied to pre-1981 transfers.<sup>203</sup> The better view is that a transfer outside s.720 made before the 1981 reforms is not to be regarded as income tax avoidance in the absence of special circumstances. A pre-1981 transfer may be within s.731 where it was made for IT avoidance (one example would be where the settlor did have power to enjoy but later died) or where it was made for CGT or IHT avoidance purposes.

### 49.39 Associated operations: Introduction

The motive defence is relatively straightforward when there is a single transfer. It becomes more complicated if there are also associated operations to consider. It is necessary to consider the following cases:

<b>Facts</b>	<b>See para</b>
Transfer and associated operations all pre-2005	38.38
Transfer and associated operations all post-2005	49.39
Transfer is pre-2005 and the operation is post-2005	49.43

### 49.40 Pre-2005 associated operations

Section 739 ITA provides:

- (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
- (2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.
- (3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.
- (4) Condition B is that the transfer and any associated operations—
  - (a) were genuine commercial transactions, and
  - (b) were not designed for the purpose of avoiding liability to taxation.

---

202 See 44.6 (Meanings of “settlor-interested”).

203 s.45 FA 1981; there is an exception for income arising before 1981.

Old Condition A refers to any “relevant transactions” and Old Condition B refers to “the transfer and any associated operations” (which comes to the same thing).<sup>204</sup> The transfer and associated operations in issue must each separately satisfy the motive test if the motive defence is to apply. One does not group the transfer and the associated operations together, and look for a single main purpose of the group.

#### 49.40.1 *Operations subject to motive test: Critical operations*

The first task is to identify the associated operations to which the motive test must be applied. For pre-2005 transactions (which are not affected by the 2006 reforms) the statute refers to “*any* associated operations” but this is a reference only to associated operations as a result of which a charge arises under s.720 or s.731 ITA. That is, in other words, the associated operations which must be relied on in order to satisfy the conditions set out in those sections. That is, the transfer and operations as a result of which:

- (1) (in any case) income accrues to the person abroad; and
- (2) (a) (in a s.720 case) the transferor has power to enjoy; or  
(b) (in a s.731 case) the individual receives a benefit, or income can be used to benefit them.

ToA draft guidance provides:

**INTM602800 all relevant transactions post-4 December 2005 transactions**

...*Herdman* ... found that associated operations are in broad terms only taken into account in applying the purpose test if they involve avoidance and create either a new source of income or a new power to enjoy income.

I refer to an associated operation which meets these criteria as a “**critical operation**”.

There may and generally will be other operations associated with the transfer, but unless they are critical operations they are irrelevant and should be ignored.

---

204 Because the term “relevant transactions” is defined to mean the transfer and associated operations; see 45.12 (Why associated operations matter). The difference in the wording of old condition A and B is just a drafting quirk without difference in meaning.

In *Herdman v IRC* 45 TC 394:

- (1) T transferred shares to an Irish company (the person abroad) in consideration of an issue of new shares and a loan. This was an innocent transfer (the purpose was to avoid Irish tax).
- (2) The company accumulated income. This was (arguably) an operation associated with the transfer, and the purpose was (then) regarded as UK tax avoidance.<sup>205</sup>

The motive defence was upheld. Lord Reid said:

[1] It was admitted by Counsel that [what is now s.720] can only apply if [T] has “by means of” these operations “acquired any rights by virtue of which” he had “power to enjoy” this income during the relevant period. I think that Counsel was clearly right in making this admission.<sup>206</sup>

[2] I cannot see how it can be said that [T] acquired any rights at all by means of these associated operations. By means of the transfer of the shares to the new company he acquired two rights. He acquired shares in the new company in the Republic and he became an unsecured creditor of that company for over £76,000. Neither right gave him any right in or to particular assets of the new company. The way in which that company dealt with its assets did not alter either of these rights. It may have made them more valuable and it may have made it easier for the company to pay its debts, but it did not change [T’s] rights.<sup>207</sup>

Point [1] states the law (only critical operations need pass the motive test) and point [2] applies it to the facts of the case (the operations in that case were not critical).

---

205 After *Willoughby* the purpose should be regarded as mitigation and not avoidance.

206 Section 412 ITA 1952 then provided (so far as relevant):

“For the purpose of preventing the avoiding by individuals ordinarily resident in the UK of liability to income tax by means of transfers of assets by virtue or in consequence whereof, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled out of the UK, it is hereby enacted as follows:- (1) Where *such an individual has by means of any such transfer, either alone or in conjunction with associated operations, acquired any rights by virtue of which he has ... power to enjoy ...* any income of a person resident or domiciled out of the UK ... that income shall, ... be deemed to be income of that individual ....”

207 45 TC 394 at p.413.

The statement of law at [1] needs to be translated to reflect the revised statutory wording, which was recast in 1969, and rewritten in 2007, but the principle (that only critical operations need pass the motive test) survived the 1969 reforms.<sup>208</sup> Indeed, perhaps the principle was (slightly) more clearly stated under ITA than it was under ICTA, because of the words in s.739(2): An individual is not liable for income tax under this Chapter ... *by reference to the relevant transactions* if condition A or B is met. It is only the transactions *by reference to which the ToA provisions apply* which need to meet old condition A and B.

In *Carvill v IRC*:<sup>209</sup>

- (1) T transferred assets to a Bermudian company (B Ltd) in exchange for its shares, so T was a majority shareholder in B Ltd (“the original transfer”).
- (2) T became a 100% shareholder in B Ltd by (a) purchasing shares from other shareholders and (b) B Ltd purchasing its own shares.
- (3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were held not to be associated operations, but if they had been associated operations it would not have mattered as they were not critical operations. No income arose to B Ltd because of those operations and T did not acquire a power to enjoy because of them.<sup>210</sup>

HMRC accept this. RI 201 provides:

The law was amended in 1969 following a decision of the Courts (in *IRC v Herdman* 45 TC 394) that only the transfer and any associated operations giving a power to enjoy at the outset were relevant for determining whether the terms of [the motive defence] were satisfied. The amendment to the legislation sought to bring all associated operations into consideration when [the motive defence] was invoked. Because of doubts<sup>211</sup> expressed as to the effectiveness of this amendment, it has been the Revenue’s practice in considering whether a defence under [the motive defence] is available to *consider only the*

---

208 See 49.39.1 (The 1969 reform).

209 [2000] STC (SCD) 143 at [80]–[85], 75 TC 477 (Special Commissioners).

210 See [81]–[83].

211 “Doubts” seems a tendentious way to refer to a view based on a decision of the Special Commissioners from which the Revenue did not appeal; see 49.39.1 (The 1969 reform). But there it is.

*transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in [s 723 ITA].*

The last sentence goes too far and is not to be taken literally. Suppose:

- (1) T transfers assets to a UK trust by an innocent transfer, and
- (2) Foreign trustees are appointed (an associated operation)<sup>212</sup> for tax avoidance purposes.

It may be said that the associated operation does not establish a power to enjoy the income of the trust. But the associated operation is a critical one (since it causes income to accrue to the person abroad) so the motive defence does not apply.

Suppose:

- (1) T transfers assets to a non-resident company in return for shares in that company (“the first transfer”). Suppose the first transfer is innocent (no tax avoidance purpose). Income accruing to the company is not caught by the ToA provisions as the motive defence applies.
- (2) T transfers the shares in that non-resident company to a non-resident trust (“the second transfer”). The second transfer has a tax avoidance purpose.

The second transfer is an operation associated with the first. But that associated operation is not a critical operation. Income accrues to the non-resident company as a result of the first transfer. It does not accrue as a result of the first transfer in conjunction with associated operations.<sup>213</sup>

Take the same transactions, but assume that the first transfer (to the company) had a tax avoidance motive, and the second transfer (to the trust) was innocent. Income of the company is within the ToA provisions. The motive defence does not apply. It is not enough to find an innocent associated operation. Dividends from the company to its shareholders are

---

212 See 45.13.2 (Transfer to trust + trust migration pre-2006) and 45.13.4 (Transfer to co + co migration).

213 Of course income arising to the trustees as a result of the second transfer is caught by the ToA provisions. The fact that the first transfer was innocent does not help. This is self-evident but if authority is needed see the decision of the Special Commissioners in *IRC v McGuckian* [1994] STC 900. There was (wisely) no appeal on that point.

caught since the income arises by virtue of the tainted transfer to the company and an associated operation (the dividends).

ToA draft guidance provides:

**INTM602720 By reference to transactions**

...Taking each of the potential charges this can perhaps be summarised as:-

Income charge – power to enjoy; the transactions to be taken into account are

[1] those that result in income becoming payable to a person abroad together with

[2] those other associated operations, if different, which result in the individual having the power to enjoy the income.

Income charge – receipt of/entitlement to capital sums; the transactions to be taken into account are

[1] those that result in income becoming payable to a person abroad together with

[2] those other associated operations, if different, which result in the individual receiving or being entitled to receive a capital sum.

Benefits charge - the transactions to be taken into account are

[1] those that result in income becoming payable to a person abroad together with

[2] those other associated operations, if different, which result in the individual receiving a benefit provided out of assets available for the purpose by reason of such transactions.

From this it can be seen that in some instances the same transactions may result in income becoming payable and also give the power to enjoy the income, the entitlement to a capital sum or result in receipt of a benefit. In other instances there may be two sets of transactions one leading to the income that becomes payable, the other to the power to enjoy, entitlement to capital sum or receipt of benefit. Whichever circumstance applies the individual will need to have regard to all of the transactions in showing how the particular test is met.

In examining the actual conditions for exemption at INTM602760 and forward it will be seen that there may also be further associated operations apart from those described above that fall to be taken into account in considering whether particular conditions are met. Where that is the case, then the individual will need to satisfy HMRC in relation to all those transactions.

Although constructed differently the former legislation also took a transactional approach to the avoidance purpose exemption test

requiring the individual to show that the conditions were met in relation to the transfer of assets or associated operations or any of them or in relation to the transfer of assets and any associated operations. There is more about this at INTM602760 onwards, which consider the conditions for exemption.

Not every transaction will however necessarily fall to be taken into account. Normally it will only be those that contribute to an outcome that falls within the conditions for a charge, such as those transactions which result in income becoming payable or those which give the power to enjoy income, entitlement to capital sum or receipt of a benefit. For those that are within the provisions the individual will be required to show that the conditions for exemption are met.

The principle that it is only transactions that lead to the particular outcomes which fall to be considered is demonstrated by the 1969 decision of the House of Lords in *Herdman v CIR* (45 TC 394). Although that case was on legislation (ITA 1952) constructed somewhat differently from that in ITA 2007 or ICTA 1988 the broad thrust of the principles demonstrated is the same as the approach set out in the bullets above. In that case the Special Commissioner had found that a transaction which brought about income becoming payable to a person abroad and which gave power to enjoy it satisfied on the evidence available the conditions for exemption. There were however further transactions whose purpose would not have satisfied the test for exemption, but those transactions neither resulted in income becoming payable to a person abroad nor gave the individual any new or additional power to enjoy income. The House of Lords accepted the reasoning of the Court of Appeal in concluding that these additional transactions did not fall to be taken into account. Lord Chief Justice MacDermott in giving his decision, which was endorsed by the House of Lords, said (at pages 406/407) in commenting on and accepting the exposition given by counsel for the appellant:

“My reasons for this view may be enumerated as follows

(I) The conditions which bring subsection (1) [section 412(1) ITA 1952] into force and make the income of the non-resident person chargeable as that of the individual concerned depend upon a true alternative, upon the effect of either (i) the transfer of assets alone or (ii) that transfer in conjunction with associated operations. If (i) applies (ii) does not.

(II) If subsection (1) is brought into force by the transfer of assets alone, subsection (3) [the motive defence] must be applied accordingly and so that the taxpayer will escape from liability under

subsection (1) on proving that the purpose of the transfer was not tax avoidance. In such a case any operation which is an “associated operation”, in the sense of being within the definition in subsection (4), will fall outside subsection (1) and outside subsection (3) as well.”

He went on to expand his reasoning into the facts of the particular case which indicated the extent of the transactions that resulted in income becoming payable and the individual having the power to enjoy that income. No other transactions fell to be considered.

HMRC confirmed the use of this principle in a Tax Bulletin article in 1999 in relation to the ‘power to enjoy’, saying that, "it has been the Revenue’s practice in considering whether a defence under section 741 [ICTA 1988] is available to consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in section 742(2) [ICTA 1988]".

But there are some instances within the specific conditions where a wider approach is required and individuals will need to take this into account in providing the information required about transactions in their tax returns. Specifically, FA 2006 introduced a new provision (section 737(8) ITA 2007), which will be considered further in the detailed conditions, which means that the individual may now have to disclose to HMRC additional associated operations which may not result in outcomes that meet the requirements for a charge. It is important therefore that the individual who is seeking to show that the conditions for exemption are met properly identifies all of the transactions that must be taken into account, and provides the appropriate facts about each.

## **49.41 Post-2005 transfer + associated operations**

### *49.41.1 The 1969 reform*

To understand the post-2005 regime, it is helpful start in 1969, when the first attempt at reform was made. Harold Lever (then Financial Secretary to the Treasury) argued:

If we are to have a section [720 ITA], it has to bite on all settlements abroad which at any time are used for avoidance of tax even though originally started for innocent purpose. Supposing a man has transferred money to set-up a Bible society in Bulwayo and his heir being more sophisticated and perhaps more materialistic, finds himself with a

settlement set up for unimpeachable purposes and decides that it would make a useful vehicle for the avoidance of all income tax and surtax. The *Herdman* decision meant that section [720] would not prevent this. Clause 27 [FB 1969] therefore knocks out the *Herdman* decision and I think that the hon. and learned Gentleman would be fair enough to say that that is reasonable.<sup>214</sup>

The example is facetious (Lever was known for his wit). The common (if less exotic) example is that:

- (1) a settlement is set up by a foreign settlor for foreign beneficiaries; and
- (2) subsequently beneficiaries or settlor come to the UK.

If this was not envisaged at the time of the settlement, HMRC must concede that the original transfer satisfies the motive defence. Nothing that happened later would alter that defence. So, as Morritt LJ commented (obiter) in *IRC v Willoughby* 70 TC at p.97:

In the FA 1969, legislation was enacted, s.33, to nullify the [*Herdman*] decision ... on the point.

However, the Special Commissioners rejected this in an unreported decision.<sup>215</sup> Thus the 1969 Act failed to achieve its intention.

#### 49.41.2 *The 2006 reform*

HMRC tried again in what I call “**the 2006 reform**” (it was introduced by FA 2006, though with effect from December 2005). Section 737(8) ITA provides:

If—

- (a) apart from this subsection, an associated operation would not be taken into account for the purposes of this section, and
- (b) the conditions in subsections (2) to (4) [New Conditions A and B] are not met if it is taken into account, because of—
  - (i) the associated operation, or
  - (ii) the associated operation taken together with any other relevant transactions,

it must be taken into account for those purposes.

---

<sup>214</sup> Hansard, 17 July 1969, cols 955–6.

<sup>215</sup> If any reader could supply a copy, it would be interesting to see it; though unreported Special Commissioner decisions cannot be cited as precedents: *Ardmore v HMRC* [2014] UKFTT 453 at [9] - [23].

ToA draft guidance provides:

**INTM602800 all relevant transactions post-4 December 2005 transactions**

...The new provisions reverse the effect of *Herdman* (INTM602640) which found that associated operations are in broad terms only taken into account in applying the purpose test if they involve avoidance and create either a new source of income or a new power to enjoy income. The new provision requires all associated operations with an avoidance purpose to be taken into account when applying the exemption test. In the past structures such as family trusts were sometimes transformed into avoidance vehicles, with the associated operations carefully designed so that they could not be said to create new income flows or new power to enjoy income. The tax planners contended that HMRC could not apply the legislation against these structures, even though they were as clearly abusive.

The language is reminiscent of Harold Lever's comments in 1969.

EN Draft Clauses (2005) explained:

certain associated operations that might potentially be disregarded when applying the [pre-2005 motive defence] have to be taken into account for the purposes of the new test. These are associated operations that have an avoidance purpose, but might not directly affect the application of the charging provisions.<sup>216</sup>

A post-4 December 2005 transfer which qualifies for the motive defence loses that defence if:

- (1) there is an associated operation;
- (2) that operation does not satisfy New Condition A or B.

Trusts and companies which qualify for the motive defence must ensure that from 5 December 2005 any acts by them meet Condition A (or Condition B if relevant). In short, they should not make associated operations which might be regarded as having a tax avoidance purpose. It is important that new associated operations do meet the New

---

216 Para 62. The explanation in EN FB 2006 is more curtailed. The provision alters the former law. EN Draft Clauses (2005) claimed (outrageously) that this change was "clarifying and confirming the correct interpretation of the existing statute" but that was inconsistent with RI 201, and EN FB 2006 more or less abandoned that position; see App.1.2 (Clarify/modernise/reform).

Conditions. The effect of the rules may be harsh.

These conditions are extremely difficult to apply; this may be why almost 40 years passed before the second attempt to alter law established in 1969. The Blair/Brown administrations, it seems fair to say, were unaware or unconcerned about uncertainty and complexity in tax legislation, particularly anti-avoidance legislation.

#### 49.41.3 *Clean break test*

The first task is to identify the associated operations to which the motive test must be applied. For post-2005 transactions the statute refers to “an associated operation” and it is clear that some operations which are not critical operations (under the old law) are now made subject to the motive test.

The task is to identify what counts as “an associated operation” for the purposes of s.737(8) ITA. The statutory definition of associated operation does not answer this as if it is read literally it is far too wide to be workable. Suppose in 1096 a Crusader transferred land to trustees to avoid feudal duties, and in 2000 the land is again transferred to trustees. The 1096 transfer is an operation historically associated with the 2000 transfer.<sup>217</sup> It cannot be that the Crusader’s (arguable)<sup>218</sup> tax avoidance purpose would prevent the transfer in 2000 from qualifying for relief!

There must obviously be some connection between the associated operation and the transfer: mere historical association cannot be enough.

It is suggested that the courts ought to impose a clean break test.<sup>219</sup> One might refer to associated operations where there is no clean break as “**truly associated**”. In this terminology, truly associated operations must satisfy new conditions A and B, in order to qualify for the motive defence, and the effect of the 2006 reform is to extend the motive test from critical operations to truly associated operations. But the expression “associated operations” is sufficient because where there is a clean break the operations should not be regarded as associated for the purposes of the

---

217 See 45.11 (Associated operation: definition).

218 Feudal duties would be “taxation”; see 49.8 (Meaning of “taxation”). I forbear to consider the question whether it would be reasonable to assume that the 1096 transfer was avoidance, or mitigation, of feudal duties (and would that depend on attitudes to taxation in the Middle Ages or contemporary attitudes?).

219 See 45.13.1 (A transfers to B + B to C: clean break test).

ToA rules.

#### **49.42 Associated operations: Avoidance purpose**

Note the extreme consequences of an associated operation motivated by tax avoidance. Even if the associated operation concerns only a small amount, the *entire* trust<sup>220</sup> may lose the benefit of the motive defence. This unfairness ought to colour the approach of the courts to construing the section.

##### *49.42.1 Investment transactions*

Buying and selling investments in the ordinary course of managing investments is not tax avoidance.

Suppose trustees wish to invest in UK equities, but do so via a UK unit trust or OEIC in order to hold property which is excluded property for IHT. The acquisition of a unit trust or OEIC is not tax avoidance. It is considered that the position is the same if the trustees acquire a non-UK unit trust or OEIC to avoid UK source income.

Suppose a trust, all of whose beneficiaries are abroad, wishes to invest in UK (non-residential) land. The trustees invest via an underlying company in order to avoid inheritance tax and reduce tax on the property income from the trust rate to the basic rate (pre 2020) or the CT rate (post 2020). It is suggested that this is mitigation rather than avoidance. If this is not the case, then the effect on the UK economy could be quite remarkable. Well-advised trustees would avoid investing in UK land in order to retain the motive defence. On the other hand, if land was purchased using an artificial SDLT avoidance scheme, that would be caught. The transfer of existing land to a company would be caught.

##### *49.42.2 Methods of distribution*

It is considered that retention of income within a company is not an “operation” but even if it is, it would not constitute tax avoidance.

It is considered that accumulation of income in a common form discretionary trust<sup>221</sup> is not an “operation” but even if it is, it would not be

---

220 More accurately, the entire transfer of assets abroad; but it will normally come to the same thing.

221 A trust to accumulate income with power to distribute. Under a trust to distribute with power to accumulate, accumulation would constitute an “operation”. But that

FD\_49\_Transfer\_of\_Assets\_Abroad\_Motive\_Defence.wpd 03/11/21

tax avoidance.

Suppose a discretionary settlor-interested trust is within the motive defence, and the settlor is UK resident. The trustees retain trust income abroad (if it was remitted to the UK there could in some cases be a tax charge under the s.624 remittance basis). This is not tax avoidance.<sup>222</sup>

Suppose a discretionary trust is within the motive defence. A foreign domiciled beneficiary is UK resident. Trustees may in principle transfer funds to a beneficiary in the following ways:

- (1) Outright distribution:
  - (a) Distribution of trust capital
  - (b) Distribution of trust income (which may be generated by a distribution from an underlying company)
- (2) Loan (interest-free or on favourable or arm's length terms)

These options have different tax consequences but each of them are straightforward everyday methods of transferring funds from the trust to a beneficiary. None are tax avoidance which could cause the motive defence to be lost. There is no reason to say that any of them are "contrary to the intention of parliament".<sup>223</sup> This is so even if, for instance:

- (1) A capital distribution is chosen in order to avoid an IT charge on an income distribution
- (2) A loan on arm's length terms is chosen to avoid an IT/CGT charge on a capital payment
- (3) A dividend is paid and accumulated by trustees, and the shares in the company (devalued by the dividend) are distributed to a beneficiary without a gain accruing on the disposal of the shares.

This is not to say that a loan or trust/company distributions cannot constitute avoidance. But they would have to be part of some wider arrangement. Examples are:

- (1) Loans:
  - (a) Trustees lend unsecured to a beneficiary in circumstances where

---

is not the usual form.

222 See 17.43 (Remittance basis planning). The point is less likely to arise under the protected trust regime, but it still matters for the past.

223 Contrast the GAAR guidance that "trustees are entitled to organise distributions in a way that minimises tax for the beneficiaries within the range of normal tax planning"; see 57.57 (GAAR guidance).

the beneficiary is insolvent or so lacking in assets that the beneficiary is not likely to repay the sum lent.<sup>224</sup>

- (b) The borrower is told that a loan repayment is not going to happen in practice.<sup>225</sup>
- (2) Trustees exercise a power to accumulate income, and then immediately exercise a power to distribute it as capital, in circumstances where the straightforward course would be to distribute as income.<sup>226</sup>
- (3) A shareholder sells the right to a dividend to a non-resident for a capital sum.<sup>227</sup>

Suppose a non-resident company owned by a non-resident individual pays a large dividend the year before the individual becomes UK resident.<sup>228</sup> That is not tax avoidance. But if the individual lends the proceeds back to the company, interest free, that is a circular and artificial transaction, and the arrangement may be regarded as avoidance.<sup>229</sup>

---

224 See 49.15.2 (“Artificial”/“devices”). Alternatively the loan in such a case may be categorised as an outright distribution.

225 Contractor loan schemes offer an example. In *HMRC v Hyrax Resourcing* [2019] UKFTT 175 (TC) scheme documentation was frank:

“Do I have to repay the loan? In practice, extremely unlikely. Nearly 25,000 businessmen and contractors have used this mechanism and on-one has yet had to repay it. However, there needs to be the POSSIBILITY of repayment, otherwise it would not be a loan”. See [162] - [178].

But many other facts in *Hyrax* also supported the conclusion of avoidance. See too 49.34 (Employee benefit trusts).

226 Alternatively the distribution may in fact be categorised as income.

227 *McGuckian v IRC* 69 TC 1 at p.81: “It is now necessary to consider how the composite transaction should be categorized. The declaration of the dividend was an ordinary commercial decision. But the other steps—the assignment [of the right to a dividend to the purchaser], the payment [of the dividend to the purchaser] and the payment [of the purchase price by the purchaser to the shareholder]—were not taken for any business or commercial reason. Those steps were taken in order to avoid tax. I would respectfully differ from the conclusion of Sir Brian Hutton LCJ and Carswell LJ. that the assignment was “the whole substance and raison d’etre of the transaction”. Like Kelly LJ I am satisfied that the assignment was merely a means to an end, a step taken in an attempt to achieve the payment [to the shareholder] as capital. Tax avoidance was the only conceivable explanation for the assignment.”

228 It is assumed that the temporary non-resident rules do not apply.

229 Transactions in securities would also need consideration; see 52.1 (Transactions in securities).

### 49.42.3 *Inter-group transactions*

It is helpful to refer to the whitelist of transactions which HMRC accept as outside the SDLT group relief TAAR.<sup>230</sup> SDLT Manual provides:

**SDLTM23040 Para 2(4A) Sch 7 FA 2003** [Nov 2019]

... This guidance gives some examples of transactions where it is accepted that group relief is not denied by Para 2(4A) Schedule 7 FA 2003.

It should be noted that the examples are intended only to give general guidance and do not use technical or statutory language, nor should they be interpreted as if they were a statute.

They also assume that the transactions described do not form part of any larger scheme or arrangement which might have tax consequences....

**Examples of transactions where group relief is not denied by Para 2(4A) Schedule 7 FA 2003**<sup>231</sup>

- (1)-(3): The transfer of a property to a group company having in mind:
- (1) the possibility that shares in that company might be sold more than three years after the date of transfer
  - (2) the possibility that shares in that company might be sold within three years of the date of transfer, with a consequent claw-back of group relief, in order that any increase in value of the property after the intra-group transfer might be sheltered from SDLT
  - (3) the possibility that either of the above might occur
- (4) The transfer of a property to a group company prior to the sale of shares in the transferor company, in order that the property should not pass to the purchaser of the shares
- (5)(6)(10) The transfer of property to a group company in order that:
- (5) commercially generated<sup>232</sup> rental income may be matched with

---

230 Para 2(4A) Sch 7 FA 2003 provides:

“Group relief is not available if the transaction—

- (a) is not effected for bona fide commercial reasons, or
- (b) forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of liability to tax.

“Tax” here means stamp duty, income tax, corporation tax, capital gains tax or [SDLT].”

231 I have reformatted and amended slightly for greater clarity.

232 Footnote original: Including income, gains and losses which are generated intra-group on transactions which would have been commercial had they been entered into by unconnected third parties.

- commercially generated losses from a property income business
- (6) commercially generated<sup>233</sup> chargeable gains may be matched with commercially generated allowable losses
  - (10) The transfer of property to a group company in order that interest payable on borrowings from a commercial lender on ordinary commercial terms may be set against commercially generated\* rental income
  - (7) The historic transfer of property to a non-resident group company in the anticipation that future appreciation or depreciation<sup>234</sup> in value would be outside the scope of UK tax on chargeable gains
  - (8) Transactions undertaken as part of a normal commercial securitisation
  - (9) The transfer of the freehold reversion in a property to a group lessee in order to merge the freehold and the lease, and thus prevent the lease being subject to the wasting assets rules as respects corporation tax on chargeable gains
  - (11) Borrowings on ordinary commercial terms
    - (a) from a commercial lender, or
    - (b) intra-group in circumstances which would have been commercial had they arisen between unconnected third parties

“Transfer” means the transfer of a freehold, in Scotland ownership of land, or the assignment, in Scotland assignation, of a lease.

Cases involving the grant of a lease will need to be considered on their facts.

The list provides examples of where, although a tax advantage might be obtained by the purchaser’s group, SDLT group relief will not be denied subject to the warning that ‘the transactions do not form part of any larger scheme or arrangement which might have tax consequences’

In determining whether the transaction forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of tax, it is necessary to consider relevant case law.

Whether or not a sequence of steps constitutes avoidance is also informed by FA 2003 sections 75A to 75C. HMRC Stamp Taxes acknowledge that deciding to sell shares rather than land so as to pay less tax or SDLT (see paragraph D2.2.1 of HMRC’s General

---

233 See above footnote.

234 Author’s footnote: At first sight the reference to depreciation seems strange. Perhaps the point is that the transfer is part of a package, with tax advantages (in the appreciation in value not taxed) and disadvantages (no relief for depreciation).

Anti-Abuse Rule Guidance as approved by the Advisory Panel with effect from 15 April 2013) represents a straightforward legislative choice and is not, of itself, objectionable.

### **HMRC approach**

The HMRC aim is to give a consistent message to all taxpayers. Where it is possible to identify fact patterns that do not fall within the scope of the TAAR and therefore do not present a risk, HMRC are happy to make this clear. The current guidance including the list of transactions where group relief would not be denied continues to reflect HMRC position. However, there are, as always, a number of events involving a transaction for which group relief may be claimed and which HMRC may wish to raise an enquiry. In any case where an avoidance scheme is disclosed or there is evidence suggesting the implementation of an avoidance scheme, HMRC will raise an enquiry.

To promote greater certainty in HMRC Stamp Taxes approach in the application of FA 2003 Schedule 7 paragraph 2(4A)(b), HMRC Stamp Taxes confirmed the following, with the warning that the presence of steps in addition to those described below may indicate, when taken together, that there are arrangements of which the main purpose or one of the main purposes is avoidance of tax:

A business may choose to acquire a property-owning company as opposed to acquiring the property from that company.

The purchaser may, after acquiring the company, transfer the property out of the company acquired and into a different company in the purchasing group. HMRC do not regard that of itself, and subject to the list of transactions above, as resulting in the avoidance of tax such that FA 2003 paragraph 2(4A)(b) would be in point, even if the acquisition of the property-owning company and the subsequent intra-group transfer of the property formed part of the same arrangements.

The purchaser may, after acquiring the company and transferring the property intra-group, liquidate, wind-up or strike-off the company acquired. HMRC do not regard that of itself as resulting in, or being evidence of, the avoidance of tax such that FA 2003 paragraph 2(4A)(b) would be in point, even if the liquidation, winding-up or striking-off formed part of the same arrangements that also included the acquisition and the intra-group transfer.

In the events described above, the FA 2003 paragraph 2(4A)(b) analysis would be the same even if the purchaser only became a member of a group for SDLT purposes as a result of the acquisition of the property-owning company.

It is difficult to take item (7) seriously, but even apart from that, it appears that HMRC do not strain to classify a group's ordinary tax planning as avoidance.

#### **49.43 Income after tainted operation**

Where there is a tainted operation associated with a transfer, all the income arising as a result of the transfer in principle comes within the scope of ss.720 and 731. If there is an innocent transfer of £10m, and a tainted operation of £10,000, all the income of the £10m comes into charge.

HMRC may not in fact take that view. Draft ToA guidance provides:

**INTM602800 all relevant transactions post-4 December 2005 transactions**

Where a structure meets the requirements for exemption and an associated operation involves only a minor element of avoidance, if the associated operation producing 'tainted' income is only a small proportion of the income of the total structure it may be appropriate to charge only the income from the 'tainted' source, thus applying the legislation in a proportionate way.

##### *49.43.1 Partial exemption relief*

Section 741 ITA provides a very limited relief:

(1) Section 742 (partial exemption where later associated operations fail conditions) applies if—

- (a) an individual is liable to tax<sup>235</sup> because of section 720 or 727 for a tax year (the "taxable year") because condition B in section 737(4) (genuine commercial transaction: post-4 December 2005 transactions) is not met, and
- (b) subsections (2) and (3) apply.

The relief only applies for s.720 (and 727) and not for s.731 ITA.

Section 741 continues:

---

235 "Liable to tax" is defined in s.741(5) ITA:

"References in this section to a person being liable to tax for a tax year because of section 720 or 727 include references to the individual being so liable had any income been treated as arising to the individual for that year under section 721 or 728."

- (2) This subsection applies if—
- (a) since the relevant transfer there has been at least one tax year for which the individual was not so liable by reference to the relevant transactions effected before the end of the year, and
  - (b) the individual was not so liable for that year because—
    - (i) condition B in section 737(4) was met, or
    - (ii) condition B in section 739(4) (genuine commercial transaction: pre-5 December 2005 transactions) was met.

The relief only applies if Condition B is satisfied; not if Condition A is satisfied. In practice New Condition B is hardly ever satisfied.

Section 741 continues:

- (3) This subsection applies if the income by reference to which the individual is liable to tax for the taxable year is attributable—
- (a) partly to relevant transactions by reference to which one of those conditions was met for the last exempt tax year,<sup>236</sup> and
  - (b) partly to associated operations not falling within para (a).

Assuming the conditions of s.741 are satisfied one moves on to the relief in s.742:

- (1) If this section applies, the individual is liable to tax under this Chapter only in respect of part of the income for which the individual would otherwise be liable.
- (2) That part is so much of the income as appears to an officer of Revenue and Customs to be justly and reasonably attributable to the operations mentioned in section 741(3)(b) in all the circumstances of the case.
- (3) Those circumstances include how far those operations or any of them directly or indirectly affect—
  - (a) the nature or amount of any person's income, or
  - (b) any person's power to enjoy any income.

The drafter has given up here. Draft ToA guidance INTM602880 has an example, not set out here, as it raises more questions than answers.

---

236 Defined in s.741(4) ITA:

- For the purposes of this section a tax year is exempt if—
- (a) it is one of the tax years mentioned in subsection (2), and
  - (b) there is no earlier tax year for which the individual was liable to tax because of section 720 or 727 by reference to the relevant transactions or any of them.

...

#### 49.44 Income before tainted operation

This section considers how the ToA provisions apply where an innocent post 4-December 2005 transfer is followed by a tainted operation subsequently.

The position where a pre-5 December 2005 transfer is followed by a tainted operation on or after 5 December 2005 raises additional issues discussed at 49.43 (Pre-2005 transfer; post-2005 operation).

##### 49.44.1 *Income pre-tainted op: s.720*

Suppose:

- (1) an innocent transfer is made on or after 5 December 2005, and
- (2) an associated operation made today fails the New Conditions (“the tainted operation”).

At first sight *all* income back to the date of the transfer comes into charge under s.720 ITA.<sup>237</sup> HMRC say that only income of the year in the year of the tainted operation and subsequent years is charged:

**Transitional arrangements, whether income charged retrospectively**

Representation: It is suggested that the transitional arrangements of [s.740 ITA] have the effect that income could be brought into charge retrospectively. [Section740(4) ITA] could be interpreted as meaning that if an associated operation after 5 December 2005 fails the exemption test in [s.737 ITA], all of the income arising from 5 December 2005 could be charged (even where the subsequent associated operation takes place many years later).

Response: The legislation does not apply retrospectively in the manner suggested. [Section741C ICTA]<sup>238</sup> provides the general rule that [s.720] applies in this type of case as it would apply apart from [s.736 to 742 ITA]. In those circumstances [s.720] would take the income arising in the relevant year of assessment.<sup>239</sup>

This is far from clear in the legislation, but it is a sensible result.

##### 49.44.2 *Income pre-tainted op: s.731*

---

237 In practice HMRC would be limited to a four year period.

238 Now s.740(3) ITA. The wording is not quite the same, but that has not altered the position.

239 HMRC, Letter to representative bodies (7 April 2006).

Suppose:

- (1) An innocent transfer was made on or after 5 December 2005.
- (2) A tainted associated operation is made subsequently.
- (3) An individual receives a benefit in the same year as the associated operation or subsequently.

The individual is taxable under s.731 ITA by reference to all the income which has arisen backdated to the date of the transfer.

Suppose the order of transactions were reversed:

- (1) An innocent transfer was made on or after 5 December 2005.
- (2) An individual receives a benefit on or after 5 December 2005.
- (3) A tainted associated operation is made in a tax year after the benefit is received.

That is, the benefit was received in the year before the tax motivated associated operation. Is the benefit retrospectively subject to tax? It is suggested that the answer is, no. This is consistent with how HMRC understand s.720 to work.

#### **49.45 Pre-2005 transfer; post-2005 operation**

Section 740 ITA provides:

- (1) This section applies if the relevant transactions include both pre-5 December transactions and post-4 December transactions.
- (2) An individual is not liable to tax under this Chapter for the tax year by reference to the relevant transactions if—
  - (a) the condition in section 737(2) (exemption where all relevant transactions are post-4 December 2005 transactions) is met by reference to the post-4 December 2005 transactions, and
  - (b) the condition in section 739(2) (exemption where all relevant transactions are pre-5 December 2005 transactions) is met by reference to the pre-5 December transactions.

Thus in principle the New Conditions apply to post-4 December 2005 transactions and the Old Conditions to apply pre-5 December 2005 transactions.

An important question is whether the motive defence test must be met:

- (1) by all truly associated operations; or
- (2) only by critical operations (my terminology).

At first s.737(8) ITA appears to answer the question,<sup>240</sup> but it does not, because s.737(1) provides:

This section applies if *all* the relevant transactions are post-4 December transactions.

It is suggested that the *Herdman* principle still applies to pre-5 December 2005 transfers even if the operation takes place subsequently. That is, even after 2005, only critical associated operations have to pass the motive test and other associated operations are ignored.

This view does not deprive s.740 ITA of meaning, for it governs the position where there are post-4 December 2005 critical operations. For instance, suppose:

- (1) there was a transfer to a UK trust (an innocent transfer) before 5 December 2005;
- (2) non-resident trustees are appointed (a critical association operation) post-4 December 2005.

In deciding whether the motive defence applies one asks whether the associated operation satisfies New Conditions A and B.

The position is not clear cut and HMRC could make the following points:

- (1) Section 740(2)(b) incorporates s.737(2) the New Conditions A and B, but by doing so it necessarily incorporates s.737(3) to (7) which supplement s.737(2). So it is possible to say that s.740(2)(b) also incorporates s.737(8).
- (2) The transitional rules in s.740, see below, arguably make better sense if s.727(8) is applied.

But the rules are so harsh that it is suggested that the taxpayer-favourable construction is to be preferred. ICAEW agree:

82. ... We appreciate that HMRC would like to interpret the FA 2006 legislation as reversing the decision in *IRC v Herdman* 45 TC 39 for both pre 5 December 2005 transactions and transactions on or after that date. This appears to be the line taken in the draft guidance.

83. We do not believe that it is correct technically as the FA 2006 modification to the legislation was only contained in the legislation for

the new motive defence which should only be applied if the associated transfer is a relevant transfer and it is submitted that case law provides that where the original transfer occurred prior to 5 December 2005 it will be the *Herdman* principle that determines whether an associated transfer is a relevant transfer (that is whether the transfer has contributed to the charging provision conditions being met). In addition we view the HMRC interpretation as disproportionate and so there are EU law issues.<sup>241</sup>

#### 49.45.1 *Transitional rule: s.731*

Section 740(3) ITA provides:

If subsection (2)(b) applies but subsection (2)(a) does not, this Chapter applies with the modifications in subsections (4) to (6).

This brings in three transitional rules where:

- (1) the pre-5 December 2005 transactions met the Old Conditions; but
- (2) post-4 December 2005 transactions do not meet the New Conditions.

Section 740 ITA provides:

(5) In determining the relevant income of an earlier tax year for the purposes of section 733(1) (see Step 4), it does not matter whether that year was a year for which the individual was not liable under section 731 because of section 739 or this section.

(6) For the purposes of Step 1 in section 733(1), a benefit received by the individual in or before the tax year 2005–06 is to be left out of account.
