Where, for example, the view is that the price will increase but only within a certain band, and the most efficient way to express that single view is via a series of derivative transactions, those transactions should be considered as a whole and not each in isolation.

***A derivative and another financial asset (for example shares)***

Where the view is that an asset would not be acquired at current value but would be at a set lower value, a put option is written at that lower value, i.e. as a cost efficient method of acquisition. The writing of the option and the potential acquisition of the asset should be considered as a whole and not each in isolation.

***A sequential series of similar derivative strategies***

A derivative that is close to maturity generally has greater liquidity than a derivative identical in every way, other than having a longer period to maturity. ‘Rolling’ short dated derivative strategies such that there is a sequential series of similar derivatives should be viewed as a whole and not each in isolation.

### 68.14.11 Critique

The trading/non-trading distinction in financial assets raises three difficulties:

(1) *Uncertainty*: The leading cases are old and investment practice has since changed. The cases do not address the many varieties of transaction carried out by hedge funds and other sophisticated investors/traders, and even in the case of straightforward transactions, it is often unclear whether or not there is a trade.

(2) *Complexity*: There are some complex and narrow exemptions which recognise and address this problem and (more or less) treat financial transactions as non-trading:

- (a) The IME discussed in this chapter
- (b) An exemption for authorised investment funds (introduced in an attempt to stop funds relocating to Ireland or Luxembourg)<sup>56</sup>
- (c) Chapter 6 part 3 OFTR<sup>57</sup>

---

56 Authorised Investment Funds (Tax) (Amendment) Regulations, SI 2009/2036 (31 pages of regulations accompanied by 107 pages of draft guidance).

57 See 65.8 (Fund treated as non-trading).

(3) *Irrationality*: The line drawn between trading/non-trading in transactions in financial assets (so far as it is discernible) is arbitrary.

These three difficulties follow from one underlying problem: there is no clear *economic* line to be drawn between trading and non-trading, in the context of financial transactions. The distinction is not drawn for accountancy purposes. Financial reporting standards require the use of fair value for investments in shares which are publicly traded or where the fair value can be measured reliably.<sup>58</sup> Movements in this fair value are recognised in profit or loss, whether the person concerned is trading or not. It is of course possible that tax and accountancy standards may define profit in different ways. But in this case the accountancy standards are right not to draw the distinction. There is an economic distinction between buying for short term and buying for long term holding<sup>59</sup> and to the extent that this intuition underlies the trading/non-trading distinction it is not irrational. However this economic distinction is nowhere close to the tax trading/non-trading distinction; and there is no reason why the two activities should be taxed differently. As far as I am aware, most other jurisdictions sensibly do not attempt to draw a comparable distinction.

It is suggested that all transactions in financial assets, defined along the lines of the IME, should in principle be deemed non-trading for tax purposes.<sup>60</sup> The IME, AIF and offshore fund exemptions can be repealed. That would be a simplification with little if any tax loss.

---

58 <https://www.frc.org.uk/Our-Work/Publications/Accounting-and-Reporting-Policy/FRS-102-The-Financial-Reporting-Standard-applicab.pdf> Para 2.47

59 “We believe that according the name investors to institutions that trade actively is like calling someone who repeatedly engages in one-night stands a romantic.” (Attributed to Warren Buffet - I would be grateful to any reader who could supply the reference).

60 There would be some limited exceptions, eg if a company elects for trading treatment, and the hedging of trading risks.

CHAPTER SIXTY NINE

**INVESTMENT MANAGEMENT FEES &  
CARRIED INTEREST**

69.1

**69.1 Investment management fees & carried interest**

The topics of this chapter are:

- (1) Disguised investment management fees (“**DIMF**”)<sup>1</sup>
- (2) Carried interest

The layout of the chapter is as follows:

- (1) Major definitions
- (2) DIMF code
- (3) Carried interest rules
- (4) Income-based carried interest

A full discussion requires a book to itself. I focus on matters closest to the themes of this book, but it is necessary to consider the provisions generally in order to see the issues in their context.

*69.1.1 Navigation*

The legislation is as follows:

<b>Chap</b>	<b>Part</b>	<b>Sections</b>	<b>Act</b>	<b>Topic</b>
5E	13	809EZA-809EZH	ITA	Disguised investment management fees
5F	13	809FZA-809FZZ	ITA	Definition of “Income-based carried interest”
5	3	103KA-103KH	TCGA	Carried interest: CGT

The definitions are mainly in Chapter 5E and incorporated by reference elsewhere. I add the references in footnotes.

---

1 HMRC use the abbreviation “DMF”.

The system of numbering sections is idiosyncratic. In the ITA, section numbering begins with 809, followed by the Chapter letter, ie one of 809E/809F. The sections are then numbered ZA, ZB, etc. Hence:

- the 1<sup>st</sup> section of Chapter 5E is s.809EZA and the last is s.809EZH
- the 1<sup>st</sup> section of Chapter 5F is s.809FZA and the last is s.809FZZ

Subsequent sections are slotted in, such as s.809EZDA and s.809EZDB.

In the TCGA, the sections begin 103K, and are numbered starting from A, so the first section is 103KA and the last is 103KH.

This is due to a misguided application of OPC drafting guidelines; see App.11.3 (Section numbering system).

## 69.2 DIMF: history and guidance

The legislation was introduced in 2015, amended in 2016 and 2017.

The development of the current rules can be traced through:

- HMRC Guidance “Investment managers: Capital Gains Tax treatment of carried interest (2015)”<sup>2</sup>
- HMRC Technical Note “Investment Managers: Disguised Fee Income” (2015)<sup>3</sup>
- Draft guidance informally circulated (2016) (“**DIMF draft guidance**”)<sup>4</sup>

The IF Manual provides:

### **IFM36120: Overview: Introduction** [Oct 2020]

#### **Introduction**

A high level explanation of the disguised investment management fees (DIMF) rules

The disguised investment management fees (DIMF) rules apply to certain sums paid to investment managers. The rules detail how in some circumstances these sums will be charged to income tax.

Many investment management businesses only charge a management fee for the services they provide. However, those who provide services to

2 <https://www.gov.uk/government/publications/investment-managers-capital-gains-tax-treatment-of-carried-interest-july-2015/investment-managers-capital-gains-tax-treatment-of-carried-interest-july-2015>

3 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/417049/Disguised\\_Investment\\_Management\\_Fees\\_Guidance.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/417049/Disguised_Investment_Management_Fees_Guidance.pdf)

4 Investment Managers: Disguised Fee Income, CGT Treatment of Carried Interest <https://www.bvca.co.uk/LinkClick.aspx?fileticket=n5CPCclpPFo%3d&portalid=0&timestamp=1524063247595>

private equity funds and other funds with alternative strategies typically negotiate:

- a ‘management fee’ based on funds (or assets) under management generally at a rate of 1.5-2%; and
- a share of the funds’ profits once the investments have grown by an agreed percentage (hurdle) which is commonly referred to as ‘carried interest’ (IFM36500).

In a typical model, management fees are due irrespective of how well an investment fund performs. They can be paid monthly, quarterly or annually. Carried interest is only paid when the fund performs to a pre-agreed standard. It is performance-related payment typically paid indirectly, through a special purpose vehicle to the individuals who provided investment management services to a fund. Meeting the ‘hurdle’ (or ‘preferred return’) typically means that those involved in managing the fund share 20% profits above a hurdle rate equivalent to an annualised rate of approximately 8%. These amounts vary depending on the agreement entered into with the investors.

Other funds that are not partnerships may agree to pay a performance fee in addition to a management fee. These sums should also be considered under the DIMF rules.

The tax treatment of an investment management fee is covered by the DIMF rules. The main aim of these rules is to ensure that management fees received for managing an investment scheme (and which are not calculated by reference to the performance of the underlying investments) are charged to income tax where they arise to individuals. This is because the amounts in question are in substance income paid in return for the provision of investment management services.

Broadly, the DIMF rules ensure that where sums arise from a fund to an individual providing investment management services, those sums are charged to income tax where they are not:

- carried interest; or
- a return of capital; or
- a return on sums invested

The tax treatment of the first management fee described above (generally 1.5-2% of funds under management), as detailed throughout this guidance applies to any fund which is an investment scheme (IFM36230) irrespective of its structure.

New rules for the tax treatment of carried interest took effect from 8 July 2015. Carried interest is subject to taxation under specific capital gains tax (CGT) rules which are covered in separate guidance, starting at IFM37100.

Carried interest is defined in ITA07/S809E2C, which is in Chapter 5E, and sums meeting this definition are excluded from DIMF rules unless the amounts are Income Based Carried Interest (IBCI). Income Based Carried Interest is explained in detail in separate guidance, starting at IFM38000. (reference currently not active - manual awaiting completion)

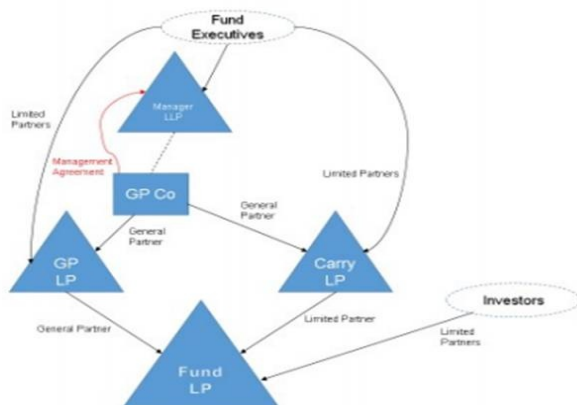

Prior to the introduction of the DIMF rules, carried interest was not defined in the Taxes Acts. However it was explained in a 2003 Memorandum of Understanding agreed between the British Venture Capital Association (BVCA) and the Inland Revenue (a predecessor department to HM Revenue & Customs) (IFM36540).

DIMF draft guidance provides:

### GP LP and GP LLP planning

5. The effects of the measure are not limited to any one avoidance structure or category of asset manager. However the types of planning at which they were initially aimed are sometimes described as GP LP and GP LLP planning.

6. In both cases, the investments of the fund are held in a limited partnership (LP), the fund partnership. In GP LP planning, the general partner of this LP is itself a limited partnership (GP LP) (See Fig 1).

7. The annual fee<sup>5</sup> is paid as a priority profit share by the fund LP to the GP

5 Footnote original: The fee based on assets under management is referred to for convenience in this document as the annual fee, although in practice the fee may be paid at different intervals, for example quarterly or semi-annually. In most private equity funds the fee will strictly be calculated by reference to the sums committed by

LP.

Some of the fee may be paid on to a management company or limited liability partnership, i.e. the traditional structure. However the individual partners in the GP LP may allocate some of the annual fee to themselves without passing it via the management company. GP LLP planning (Fig 2) is broadly similar.

8. The effect of this planning is that annual fees for investment management are not being taxed in full. Since the annual fees are clearly a return for services provided, they should be charged to income tax. Chapter 5E has therefore been introduced to ensure that these fees are charged to income tax.

### 69.3 “Disguised fee”

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if-

A set of three conditions then follows which I call “**disguised-fee conditions (a) to (d)**”. In outline:

**Para Requirement**

- (a) Investment management services
- (c)<sup>6</sup> Management fee from investment scheme

---

investors to the fund, even before those sums have been drawn down.

6 There is no para (b).

(d) Management fee untaxed

### 69.3.1 *Disguised-fee c<sup>n</sup> (a): IM services*

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if-

- (a) the individual at any time performs or is to perform investment management services directly or indirectly in respect of the scheme under any arrangements<sup>7</sup>

I refer to these arrangements as “**investment-services arrangements**”. The IF Manual provides:

**FM36310: Disguised fees: Condition 1 - Performs investment management services** [Oct 2020]

**Condition 1 - Performs investment management services**

**Timing of the services performed**

The investment management services do not necessarily have to be provided in the year in which the fee arose to meet this condition. Where an individual has performed investment management services in the past or will perform such services in the future this also meets the requirements of condition 1.

Example (Amelia)

A is a recently retired fund manager. She received a disguised fee for investment management services provided in the run up to her retirement. This fee was received in the year after which A retired and no longer provides investment management services.

Despite the investment management services relating to the fee being undertaken in a previous year, the fee is still received in relation to the performance of investment management services, and condition 1 would be met.

...

*In respect of an investment scheme – equity participation*

The scope of ITA07/S809EZA(3)(a) is intentionally wide but, if it can be demonstrated that shares or an interest in an asset manager firm have been granted solely to incentivise executives and the award is not in

---

<sup>7</sup> Section 809EZE ITA provides the standard (unnecessary) IT definition of “arrangements”; see App 2.2.3 (Definitions of “arrangement”). The definition is applied to CGT by s.103KH(1) TCGA.

relation to the performance of the fund, then the DIMF rules may not apply. If however, the award has been made as part of a wider remuneration scheme to avoid the application of the DIMF rules, then the amount may still be charged as income. All facts and circumstances must therefore be taken into consideration in order to evaluate whether the DIMF rules apply.

**Example 1 (Frances)**

An individual fund manager, F, works for a US headquartered group, whose shares are listed on the US stock exchange. F is a member of a UK LLP (controlled by a corporate member owned by the group) which acts as the UK sub-advisor in relation to some of the funds managed by the group. The UK LLP has appropriate commercial substance (staff, contracts and other assets) and receives an arm's length fee for the services it provides to other group companies. F receives a profit share from the LLP in line with market expectations and holds rights to receive carried interest in the funds she is involved with. Separately, F receives an award of shares in the listed US parent under a global share plan designed to incentivise and reward staff (including employees and members of LLPs) across the worldwide group in growing the business.

If F and the group are able to demonstrate that the share award in the listed US parent is not part of a wider scheme to deliver a disguised fee (IFM36300) to her, then neither the DIMF rules nor the carried interest rules (IFM37100) will apply to the holding of the shares or any resultant dividends received in respect of those shares.

**Example 2 (Sam)**

An individual fund manager, S, works for a UK based fund management group with full commercial substance in the UK (staff, contracts and other assets). S is one of four founders of the business and holds a 25% stake in the parent company of the group. S receives an arm's length remuneration (salary, bonus and other benefits) for his work, which is taxed as employment income, and has a carried interest in the funds operated by the group in line with industry standards. The shares S owns in the business carry an entitlement to a 25% share in the residual profits of the business. The group receives priority profit shares, management fees and a small amount of carried interest from the funds it operates as per the contractual arrangements with the investors.

The HMRC analysis is as follows:

Dividends paid to S in respect of his shareholding in the parent company do not constitute a disguised fee (IFM36300). Later, when S disposes of his shareholding, the disposal proceeds will not constitute a disguised fee. The DIMF rules may apply however if S's equity participation is part of a wider arrangement designed to deliver a disguised fee.

### 69.3.2 *Disguised-fee c<sup>n</sup> (c): from investment scheme*

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if ...

(c) under the arrangements, a management fee arises<sup>8</sup> to the individual from an investment scheme in the tax year (see section 809EZB)

Chapter 3 DIMF draft guidance (Examples) provides:

*Example 4 - [accountancy company]*

AB is a director and 50% shareholder in ABCD Limited, an accountancy firm.

Diagrammatically:

AB provides corporate finance advice on a potential acquisition by RS LP, an unconnected private equity fund. ABCD receives a fee for doing so and this increases ABCD's profits. ABCD's profits are subject to corporation tax. AB receives a dividend from ABCD. CD has not provided any services to RS LP and also receives a 50% dividend.

The HMRC analysis is as follows:

Corporate finance services fall within the “investment management services” definition.

The fee is included in the calculation of the profits of ABCD and not

---

8 See 69.9 (Who receives DIMF) and 14.5.9 (Disguised investment management fees).

AB and so is “untaxed”.

However the dividend is not regarded as arising from the collective investment scheme, and so does not fall within the scope of [the DIMF] charge.

More analytically, the dividend does not meet disguised-fee condition (c).

### 69.3.3 *Disguised-fee c<sup>n</sup> (d): Untaxed*

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if...

(d) some or all of the management fee is untaxed;  
and the amount of the disguised fee is so much of the management fee as is untaxed.

Section 809EZA(4) ITA provides an artificial definition of “untaxed”:

For the purposes of subsection (3) the management fee is “untaxed” if and to the extent that the fee would not (apart from this section)-

- (a) be charged to tax under ITEPA 2003 as employment income of the individual for any tax year, or
- (b) be brought into account in calculating the profits of a trade<sup>9</sup> of the individual for the purposes of income tax for any tax year.

In short, untaxed means not subject to income tax in the hands of the individual. A fee is “untaxed” even if it is subject to tax in the hands of the actual recipient (but not the individual).

DIMF draft guidance provides:

72. The effect of the definition is that sums arising to employees which are taxed as benefits or under the employment related securities legislation will not be untaxed for the purposes of Chapter 5E.

74. Section 809EZA(4) makes clear that the charge to tax as employment or trading income does not need to occur in the same year as the charge that would otherwise arise under Chapter 5E. This means that the charge under Chapter 5E could occur in a later or earlier tax year than the other tax liability. For example, an individual performing investment management services could be engaged as an employee and

---

<sup>9</sup> s.809EZA(5) ITA provides: “In subsection (4) “trade” includes profession or vocation.”

receive a deferred bonus which does not fall within the definition of carried interest. Under the statutory definition of arise which applies from 22 October 2015, this amount is likely to have arisen to the individual. When the amount is released from the deferral structure however, it will be charged to income tax and National Insurance contributions in full as employment income. It will not, therefore, be treated as “untaxed”. However, where an individual is or expects to be outside the charge to UK tax when the sum would otherwise be liable to income tax in respect of the sum, this treatment will not apply: section 809EZA requires that the sum is charged to tax as employment income under ITEPA 2003 or that it is brought into account when calculating the profits or a trade for the purposes of UK income tax.

The IF Manual provides:

**IFM36325: Disguised fees: Condition 3 - The sum arising must be untaxed** [Oct 2020]

**Condition 3 - The sum arising must be untaxed**

...Example 1 - accountancy partnership (Ali)

A is a partner in CD LLP, a large accountancy firm. A carries out due diligence on a potential acquisition by RS LP, an unconnected private equity fund. CD LLP received a fee from the fund for doing so and this increases CD LLP’s profits. A receives a share of those profits.

The HMRC analysis is as follows:

Due diligence falls within (b) of the “investment management services” definition found at ITA07/S809EZE(1).

The fee is included in the profits of CD LLP, ITA07/S809EZA(4)(b) advises that a sum will not be considered as ‘untaxed’ if it has been brought into account in calculating the profits of an individual and, as A has received a share of those profits, which will be chargeable to income tax, the sum will not be considered as ‘untaxed’ in her hands.

As the fee is not “untaxed” it is not a disguised investment management fee, because disguised-fee condition (d) is not met.

#### **69.4 “Management fee”**

This term is used in the definition of “disguised fee”: disguised-fee condition (d).

Section 809EZB(1) ITA provides:

Subject as follows, for the purposes of section 809EZA “management fee” means any sum (including a sum in the form of a loan or advance or an allocation of profits) except so far as the sum constitutes-

- (a) a repayment (in whole or part) of an investment made directly or indirectly by the individual in the scheme,
- (b) an arm’s length return on an investment made directly or indirectly by the individual in the scheme, or
- (c) carried interest which is not income-based carried interest (see sections 809EYC and 809EYD for carried interest, and Chapter 5F for income-based carried interest).

If a management fee is “any sum”, almost anything is a management fee. The price paid for this book is a management fee, as defined.<sup>10</sup> The concept is brought down to size by disguised-fee condition (d) which requires the “management fee” (sum) arises from an investment scheme, under the investment-management arrangements.

The significance of the definition of management fee is in paras (a)-(c): I refer to this as “**management-fee exclusions (a) to (c)**”:

<b>Exclusion</b>	<b>Topic</b>	<b>See para</b>
(a)	Scheme investment: Repayment	69.6.6
(b)	Scheme investment: Arm’s length return	69.4.1
(c)	Carried interest	69.5

#### 69.4.1 Management-fee exclusion (b): “Arm’s length return”

Section 809EYB(1) ITA provides that “management fee” means any sum

... except so far as the sum constitutes...

- (b) an arm’s length return on an investment made directly or indirectly by the individual in the scheme

Section 809EYB(2) ITA provides an artificial definition:

For the purposes of subsection (1)(b) a return on an investment is “an arm’s length return” if-

- (a) the return is on an investment which is of the same kind as investments in the scheme made by external investors,
- (b) the return on the investment is reasonably comparable to the

---

<sup>10</sup> Though if needed, one might argue that the label “disguised fee” itself imposes some implied restriction on the concept.

- return to external investors on those investments, and
- (c) the terms governing the return on the investment are reasonably comparable to the terms governing the return to external investors on those investments.

DIMF draft guidance provides:

88. For example, arrangements could be made for the managers' capital to receive an excessive return, and to pay the annual fee in that way. Please note this could be a purely commercial arrangement with external investors negotiated at arm's length. The test does not require an "arm's length return" to be paid in a subjective sense as would be tested, for example, under the transfer pricing rules. The term is a term of art for these purposes and subject to the comments below on "reasonably comparable", that return must be the same as the return paid to external investors. An agreement, for example, which gives the management team enhanced upside and enhanced downside exposure would take the return on that co-investment outside the exclusion even if this was agreed between the managers and unconnected investors at arm's length as part of their genuine commercial bargain.

89. If the return does not meet the arm's length test, then sums arising will be treated entirely as disguised fees, and subject to income tax.

90. It is accepted that the return to internal and external investors will not be identical. In particular, where a private equity fund manager invests in a fund on the same terms as external investors but is not liable to the management fee or carried interest in respect of that investment, HMRC accept that it will still meet the reasonably comparable tests above

#### 69.4.2 "*Reasonably comparable*"

This term is used in the definition of an arm's length return. It is not definable, but that does not deter the drafter. Section 809EZH(2A) ITA provides:

For the purposes of subsection (2)(b), the return on the investment is reasonably comparable to the return to external investors on the investments referred to in subsection (2)(a) if (and only if)-

- (a) the rate of return on the investment is reasonably comparable to the rate of return to external investors on those investments, and
- (b) any other factors relevant to determining the size of the return on the investment are reasonably comparable to the factors

determining the size of the return to external investors on those investments.

DIMF draft guidance provides:

91. The wording “reasonably comparable” is intended to allow for this sort of difference, i.e. where there are genuine commercial reasons for the difference and they do not materially affect, in substance, the return received by managers compared to that accruing to external investors. For example, the “fee and carry free” terms referred to above prevent capital provided by the fund management team “going in a circle” and returning to them in the form of management fee chargeable to tax as income.

92. While it is not set out as such in the legislation, HMRC would accept that where an individual invests capital in a scheme which has been lent to the individual on arm’s length terms, it can still meet the above requirements.

93. HMRC also accept that a management team may take out debt to fund their coinvestment commitment indirectly via another vehicle. For example, debt may be advanced by a bank to a company owned by, or partnership comprised of, the management team. This entity would then meet the co-investment commitment required from the management team with the third party debt subsequently being repaid, with an appropriate return, from the sums allocated in respect of that investment at fund level. Such a structure will not preclude the investment made by managers giving rise to a return which is within the exception provided that return is still, having regard to all the circumstances, reasonably comparable to the return received by external investors (i.e. the return is the same as it would have been if the managers had taken out the debt directly on arm’s length terms as described in paragraph 92).

94. However, where the investment has been made through a leveraged coinvestment vehicle which gives the fund manager(s) an effective deduction for the interest costs on any debt, this would not meet the above requirements. For example, this could involve a partnership with third party borrowing where the financing cost reduces profits on which the managers would otherwise be chargeable. The return from such a structure would no longer be comparable with the return to external investors.

95. Where a co-investment is awarded to an employee at a discount and that discount is fully charged to income tax and National Insurance contributions as employment income, then the return on that investment

(for the purposes of applying section 809EZH(2)) should be determined by reference to the amount brought into charge to tax plus any amounts actually paid by the individual. This would be the same where the co-investment is awarded to an employee in return for no monetary consideration.

96. For example, if an individual receives a co-investment interest of £100, but only pays £20, with the remaining £80 being funded from sums taxed as employment income of the individual, the co-investment treated as made by the individual when applying section 809EZH(2) and determining the return on that co-investment is one of £100. In the round this employee is in the same financial position as another employee who funded their co-investment of £100 out of taxed employment income. HMRC do not believe, in the absence of attempts to avoid or reduce an individual's total tax liability, section 809EZH(2) should be interpreted strictly so as to treat these two employees differently.

...

98. In some situations a fund manager will not make a personal contribution to the fund in question as their co-investment. Instead they will acquire their co-investment from another person. This could arise where a fund manager joins a pre-existing team, or where the entire team managing a fund changes (for example, because of poor performance or due a wider business take-over).

99. The repayment of, and return on, such a co-investment is capable of coming within the exclusions from the definition of disguised fee contained in section 809EZH(1)(a) and (b). In HMRC's view, having regard to the purpose of this legislation, the specific reference to an investment made directly or indirectly includes such acquired co-invest. In the context of investment schemes constituted as a limited company section 809EZH(3) makes specific reference to secondary acquisitions. This should not be read as restricting the meaning of section 809EZH(2) which applies more generally in determining what amounts to an investment in investment scheme. Section 809EZH does not include specific reference to the secondary acquisition of such an interest because it is aimed at partnership situations where the investment, in effect and very broadly, takes the form of a proportionate direct interest in the underlying assets for most direct tax purposes in the UK. It is therefore possible to "step into the shoes" of another in respect of a contribution to the property held by the scheme. The wording "whether by way of capital, loan *or otherwise*" (emphasis added) shows that section 809EZH(2) is not to be read in an overly narrow manner. Section

809EZE(3) puts beyond doubt in the situation where the investment scheme is constituted as a limited company (which will be beneficially owner of the underlying assets and where investors acquire shares in that company) the same treatment is available as regards acquired co-invest. It is designed to make sure that the same rules apply regardless of how a scheme is constituted, rather than applying specifically relaxed rules to corporate schemes over other types of investment vehicle.

100. However, while the repayment of and return on an acquired co-investment can fall within section 809EZB(1)(a) and (b), the analysis of whether the conditions for an arm's length return in sections 809EZB(2) and (2A) can be more difficult. In particular the value of drawn co-investment is likely to have moved since the original investment was drawn down from the person now selling their interest in the fund. If the fund has performed poorly, the co-investment may be worth less than the vendor originally contributed to the scheme. If the fund has performed well, however, the value may have increased. In both situations regard must be had to the strict formulation of sections 809EZB(2) and (2A) described in more detail above.

- a. Where the co-investment has declined in value, if the fund manager purchases the investment for an amount equal to its market value, the fund manager will then receive a return which exceeds that paid to external investors (whose return will, in effect, be calculated of the original amount contributed to the fund). In this case it is therefore necessary for the fund manager to pay at least the "par value" of the co-investment, even if this exceeds the market value.
- b. Where the fund has performed well and the co-investment has appreciated in value, if the fund manager acquires the co-investment for the amount originally contributed to the fund, it will receive a return which exceeds that flowing to external investors and which therefore falls outside section 809EZB(2) and (2A). For the entire return to fall within the exclusion, the fund manager will need to pay a price which equals the increase in value of the investment in the fund. Generally where the fund manager pays the unrestricted market value of the co-investment at the point of acquisition as part of a genuine commercial arrangement negotiated at arm's length, HMRC will accept that the return arising on that co-investment is capable of falling within sections 809EZB(2) and (2A) provided the return otherwise meets the conditions set out in those provisions.

*No comparable funds*

101. Where an investment fund is entirely "in house" it may have no

external investors. In these situations, the comparison to be made for the purposes of s809EZB (2) is with a fund of a similar nature which does have external investors, taking all factors into account.

### 69.4.3 “Sum”

Section 809EZB(3) ITA provides:

In this Chapter “sum” includes any money or money’s worth (and other expressions are to be construed accordingly).

### 69.4.4 *Payment for scheme asset*

Section 809EZB(4) ITA provides:

Where-

- (a) a sum in the form of money’s worth arises to the individual from the scheme in the ordinary course of the scheme’s business, and
- (b) the individual gives the scheme money in exchange for the sum, the sum constitutes a “management fee” only to the extent that its market value at the time it arises exceeds the amount of the money given by the individual.

## 69.5 “Carried interest”

### 69.5.1 *Carried interest: Introduction*

Carried interest matters because:

- (1) It is in principle not a management fee, under management-fee exclusion (c),<sup>11</sup> and so not subject to IT as DIMF
- (2) Special CGT rules apply<sup>12</sup>

DIMF draft guidance provides:

103. This legislation contains two different definitions of carried interest. Section 809EZD sets out the definition of carried interest which follows the description of typical carried interest arrangements in

- [1] the Memorandum of Understanding (MOU) agreed between the BVCA and the Inland Revenue in 2003 and

---

<sup>11</sup> See 69.4 (“Management fee”).

<sup>12</sup> See 69.14 (Carried interest: CGT).

[2] the BVCA’s Statement and Guidelines approved by the then Inland Revenue and Department for Trade and Industry in 1987.<sup>13</sup>

104. However, some investment funds use models of carried interest which do not fit within the description in the MOU. For example, venture capital funds may have a lower hurdle rate, and some funds will pay carried interest out of unrealised profits.

105. Since genuine carried interest is intended to be exempted from the [DIMF] charge, an alternative definition of carried interest is also used in the legislation.

106. The legislation is set out in this way so that funds which are using the model set out in the MOU can be satisfied that the carried interest will be exempt without needing to study the broader definition in s809EYC. (This model of carried interest is defined as meeting the requirements of s809EYC).

107. The wider definition of carried interest used in s809EYC should not be taken as an indication that any particular arrangement necessarily falls within the definition of carried interest in the Memorandum of Understanding; that is a separate issue which must be considered on the facts of the case.

### 69.5.2 “Carried interest”

Section 809EYC(1) ITA provides:

For the purposes of section 809EYC “carried interest” means a sum which arises to the individual

- [a] under the [investment-services] arrangements
- [b] by way of profit-related return.<sup>14</sup>

### 69.5.3 “Profit-related return”

This is the key element in the definition of carried interest.

Section 809EYC(2) ITA provides:

---

13 See 69.2 (DIMF: history and guidance).

14 The second sentence signposts exceptions: “This is subject to subsections (3) to (8) (sums where no significant risk of not arising); and see also section 809EYD (sums treated as carried interest).”

Section 103KH TCGA applies this definition for CGT: “In this Chapter ... “carried interest”, in relation to arrangements referred to in section 103KA(1)(a), has the same meaning as in section 809EYC of ITA 2007 (see sections 809EYC and 809EYD of that Act)”.

A sum which arises to the individual under the [investment-services] arrangements does so by way of “profit-related return” if under the arrangements-

- (a) the sum is to, or may, arise only if-
  - (i) there are profits for a period on the investments, or on particular investments, made for the purposes of the scheme, or
  - (ii) there are profits arising from a disposal of the investments, or of particular investments, made for those purposes,
- (b) the amount of the sum which is to, or may, arise is variable, to a substantial extent, by reference to those profits, and
- (c) returns to external investors are also determined by reference to those profits;

but where any part of the sum does not meet these conditions, that part is not to be regarded as arising by way of “profit-related return”.

#### 69.5.4 “Profits”

Section 809EZE(1) ITA provides:

In this Chapter ...”profits”, in relation to an investment made for the purposes of an investment scheme, means profits (including unrealised profits) arising from the acquisition, holding, management or disposal of the investment (taking into account items of a revenue nature and items of a capital nature).

The IF Manual provides:

#### **FM36520: Meaning of carried interest [Oct 2020]**

##### **Meaning of ‘carried interest’**

... The profits to be considered are the profits based on the period set out in the arrangements. For example, if a fund draws up annual accounts, and a decision on whether to pay carry is based on those accounts, (for example by comparing the net asset value with the net asset value at the start of the accounts period), then the period in question would be the year that this condition is tested against.

Condition 1 may still be met in some circumstances where a fund has made a loss.

##### **Example**

A fund is arranged over a 2 year period, it has made a loss in the second year. However, due to substantial profits in the previous year the fund has made a sufficiently high profit over a two-year period.

As the specified period is 2 years, the above situation would meet the first condition despite making a loss in one of the years.

### 69.5.5 *Vary by reference to profits*

The IF Manual provides:

#### **FM36520 Meaning of carried interest [Oct 2020]**

##### **Meaning of ‘carried interest’**

##### **... Example**

A fund manager is entitled to a fixed fee which will equate to 2% of the value of a fund, payment will be deferred until the fund has positive profits or a capital return.

Just because the fee is conditional (on profits) does not mean that the fee would be carried interest. The amount in this case may be conditional but it does not vary in relation to profits, the value is determined only by the value of the fund - condition 2 is therefore not met.

### 69.5.6 *Risk-free return*

In short, a risk-free return is not carried interest.

Section 809EZC(3) ITA provides:

Where-

- (a) one or more sums (“actual sums”) arise to the individual under the [investment-services] arrangements by way of profit-related return in a tax year, and
- (b) there was no significant risk that a sum of at least a certain amount (“the minimum amount”) would not arise to the individual,

so much of the actual sum, or of the aggregate of the actual sums, as is equal to the minimum amount is not “carried interest”.

(See subsections (7) and (8) as to how the minimum amount is to be apportioned between the actual sums where more than one actual sum arises in the tax year.)

The IF Manual provides:

#### **IFM36531 The “no significant risk” test: Overview [Oct 2020]**

... Significant risk’ is not defined in legislation, but the intention is to only capture disguised fees; that is, sums which are highly likely to

arise. Passing the ‘no significant risk’ test means that there must be significant risk that the sum will not arise. The intention is that, any attempt to make a fee appear as if it is linked to profits while actually being fixed in substance, will be ineffective.

*Purpose of the ‘no significant risk’ test*

The intention of the “no significant risk” test is to ensure that sums awarded to individuals, which in reality are highly likely to arise, are not categorised as carried interest. Instead such sums should be caught by the DIMF rules and charged to income tax. Whether the sum is likely to arise will depend on the facts and circumstances of each case.

*Example (Ayo)*

A, an individual providing investment management services is due to be paid £1m, or £1m plus 10% of profits if the fund profits exceed a certain level.

The £1m is not carried interest as it does not vary by reference to profits and there is not a significant risk that it will not arise. The 10% of profits above a certain profit level could be carried interest as the amount appears to vary. We still have to be mindful that the three profit-related return conditions of ITA07/S809EZC(2) (IFM36300) are met and the requirements of the “no-significant risk” test are fulfilled. For instance, the profit level may have been set at an unrealistically low level where there is no significant risk that it would arise, this could mean that the “no significant risk” test would not be met. Whether the amount meets the profit-related return conditions or the “no significant risk” test will depend on the facts and circumstances at the time.

In practice it should be clear to fund managers, through management agreements entered into whether sums arising to them represent their fixed management fee as opposed to carried interest. This test is intended to catch all amounts which, viewed realistically, represent a largely fixed entitlement based on the amount of assets under management. HMRC may challenge any attempt made to circumvent this test or any of the profit related conditions of ITA07/S809EZC(2) (IFM36300).

Where arrangements do not meet the “no significant risk” test, the sum arising to the fund manager is not carried interest even if the three-profit-related conditions are met.

*Application of the “no significant risk” test to the arrangements*

The no significant risk test applies to sums arising to an individual under arrangements by way of a profit related return, not to the investments made by the fund.

*Example*

Fund A invests in risky investments but puts arrangements in place which provide a certain payment every year to the fund managers. Fund B invests in relatively safe investments but set a high hurdle rate that must be exceeded before any carried interest was paid.

Despite the nature of the investments, Fund A may not meet the significant risk test, and therefore the fees would be caught by the DIMF rules. Should it be the case that in Fund B it was by no means guaranteed that a manager would ever receive carried interest this may pass the significant risk test despite the less risky investments held.

A history of good performance (e.g. 5 out of 6 previous funds have delivered high returns) does not in itself mean there is no significant risk attached to the sums arising to the fund manager. If funds have to deliver a high enough performance to repay loans to external investors and meet the hurdle rate before any carried interest is paid, it is likely that at the outset there would be a significant risk that carried interest would not be paid. This is not an automatic qualification however and whether the “no significant” risk test has been met would have to be based on the facts and circumstances at the time.

*69.5.7 Time to assess risk*

Section 809EYC(5) ITA provides:

For the purposes of subsection (3)(b) assess the risk as at the latest of-

- (a) the time when the individual becomes party to the [investment-services] arrangements,
- (b) the time when the individual begins to perform investment management services directly or indirectly in respect of the scheme under the [investment-services] arrangements, and
- (c) the time when a material change is made to the [investment-services] arrangements so far as relating to the sums which are to, or may, arise to the individual.

The IF Manual provides:

**IFM36534 Timing of significant risk tests [Oct 2020]**

**Timing of significant risk tests**

... In practice, where there is more than one sum paid in a year each sum should be considered individually then consider all the sums together. It is expected that where sums are taken together, there would only be a different outcome in circumstances where a fund had invested in a

series of investments which when taken together, deliver a certain return to the managers.

Generally, this means that for a fund with a defined lifespan (closed ended fund) the test is likely to be applied at an early stage in the life of the fund. Later in the life of a fund that has been successful, it may be certain that sums will arise to the managers under the arrangements. This does not mean that a sum does not qualify as carried interest, so long as there was significant risk that the sum would arise when the arrangements were entered into.

Where an individual leaves a management team and that individual's entitlement to a sum is wholly or partly reallocated between the remaining managers, this will generally not be considered a material change, provided that:

- the individuals receiving the allocation were previously entitled to a portion of the carried interest in respect of the scheme; and
- the reallocation does not materially distort the proportions in which those individuals will share the carried interest between themselves.

If an individual receives a re-allocated award of carried interest that is greater than the pro-rata amount, then a material change will generally not be considered to have occurred in relation to the original carried interest amount as long as the new carried interest addition has no bearing on the calculation, right to receive or previous arrangement. If the new carried interest addition does have any bearing on the previous arrangement then a material change will have deemed to have occurred for all of the individual's carried interest balance.

There is no legislative definition for material change. Whether a "material change" has occurred or not will depend on the facts.

### 69.5.8 *Insolvency risk*

Section 809EZC(6) ITA provides:

For the purposes of subsection (3)(b) ignore any risk that a sum is prevented from arising to the individual (by reason of insolvency or otherwise).

The IF Manual provides:

#### **FM36536 Prevention of a sum arising [Oct 2020]**

##### **Prevention of a sum arising**

... The intention of this sub-section is to prevent individuals claiming that the scheme that they provide services to is taking risks and

therefore there is significant risk that sums will not arise to them as individuals.

DIMF draft guidance provides:

147. It does not mean that a risk of insolvency in the underlying investments of the fund must be ignored; rather this is one of the elements which is taken into account in assessing whether a payment is carried interest or not. It is understood that investment funds may invest in risky ventures where insolvency of an investee company is a real risk.

### 69.5.9 *Tests of risk*

Section 809EZC(4) ITA provides:

For the purposes of subsection (3)(b) assess the risk both-

- (a) in relation to each actual sum (and the investments to which it relates) individually, taking into account also any other sums that might have arisen to the individual under the [investment-services] arrangements instead of that sum, and
- (b) in relation to the actual sum or sums and any other sums that might have arisen to the individual under the [investment-services] arrangements by way of profit-related return in the tax year (and the investments to which all those sums relate) taken as a whole;

(so that, in a particular case, some of the minimum amount may arise by assessing the risk in accordance with paragraph (a) and some by assessing it in accordance with paragraph (b)).

### 69.5.10 *Apportionment*

Section 809EZC ITA provides:

(7) Where more than one actual sum arises in the tax year, the minimum amount is to be apportioned between the actual sums as follows for the purposes of subsection (3)-

- (a) so much of the minimum amount as is attributable to a particular actual sum is to be apportioned to that actual sum, and
- (b) so much of the minimum amount as is not attributable to any particular actual sum is to be apportioned between the actual sums on a just and reasonable basis.

(8) For the purpose of subsection (7) any part of the minimum amount

is attributable to a particular actual sum to the extent that there was no significant risk that that part would not arise to the individual in relation to that actual sum, assessing the risk in accordance with subsection (4)(a).

DIMF draft guidance provides:

140. ... the key point is to look at the arrangements as a whole. As explained above, it would be possible for arrangements using safe investments nonetheless not to give a certain return to managers, if the managers had to meet a high hurdle rate before getting any return. The essential is that these clauses are intended to target arrangements to get round the rules by delivering a certain return.

141. HMRC would accept any reasonable qualitative assessment of the risk attached to the carried interest; there is no requirement for a quantitative (e.g. Black Scholes or Monte Carlo method) to be used.

The IF Manual provides:

**IFM36531 The “no significant risk” test: Overview [Oct 2020]**

*Example (Dipti)*

D, an individual providing investment management services is to receive £1m if there are no profits, and 20% of any profits above £50m. There is a 30% chance that profits will exceed £50m.

If profits are £60m, D receives £3m. There is no risk attached to the £1m fee but there was a risk that the extra £2m may not have arisen. £2m is considered carried interest and the £1m fee is a disguised fee charged to income tax.

If the profits were instead £45m, then no additional sum arises. The carried interest is nil and the disguised fee is £1m.

The consideration of the sums together is not intended to catch normal diversification arrangements by funds as it is not unusual for funds to spread investments to give a safer return overall. Sums taken together would only be applicable if avoidance arrangements are in place to give investment managers disguised fees where there was no significant risk.

69.5.11 *Subordinated interest*

DIMF draft guidance provides:

148. The MOU and 1987 Statement is an interpretation of the law which sets out the tax treatment that will follow when venture capital/private equity funds are structured in a certain way. It is assumed that private equity firms in the UK will very often be structured in this way to

ensure that they benefit from the tax treatment set out in the MOU and 1987 Statement.

In short, a subordinated interest is treated as carried interest.

Section 809Ezd ITA provides:

- (1) A sum falling within subsection (2) or (3)-
  - (a) is to be assumed to meet the requirements of section 809Ezc [definition of carried interest], and
  - (b) accordingly, is to be treated as constituting “carried interest” for the purposes of section 809Ezb.
- (2) A sum falls within this subsection if, under the [investment-services] arrangements, it is to, or may, arise to the individual out of profits on the investments made for the purposes of the scheme, but only after-
  - (a) all, or substantially all, of the investments in the scheme made by the participants have been repaid to the participants, and
  - (b) each external investor has received a preferred return on all, or substantially all, of the investor’s investments in the scheme.

The IF Manual provides:

**IFM36540 Sums treated as carried interest [Oct 2020]**

**Sums treated as carried interest**

... The reference to “substantially all” of the investments being repaid acknowledges that capital contributions to the investment scheme (rather than loan commitments to the investment scheme, which will comprise the vast majority of the investment made by managers and third party investors) will rarely be repaid until the investment scheme is wound up. Therefore the carried interest may be paid when the capital investment is still outstanding.

Section 809Ezd(3) ITA provides:

A sum falls within this subsection if, under the [investment-services] arrangements, it is to, or may, arise to the individual out of profits on a particular investment made for the purposes of the scheme, but only after-

- (a) all, or substantially all, of the relevant investments made by participants have been repaid to those participants, and
- (b) each of those participants who is an external investor has received a preferred return on all, or substantially all, of the investor’s relevant investments;

and for this purpose “relevant investments” means those investments in the scheme to which the particular investment made for the purposes of the scheme is attributable.

### 69.5.12 “Preferred return”

This term is used in subordinated interest rules.

Section 809EZA(4) ITA provides:

In this section “preferred return” means a return of not less than the amount that would be payable on the investment by way of interest if-

- (a) compound interest were payable on the investment for the whole of the period during which it was invested in the scheme, and
- (b) the interest were calculated at a rate of 6% per annum, with annual rests.

DIMF draft guidance provides:

154. ... The intention here is to reflect the wording of the MOU (which refers to higher hurdle rates), and to ensure that sums described as carried interest do match the usual commercial arrangements.

## 69.6 “Investment scheme”

This term is used in the definition of “disguised fee”.<sup>15</sup>

Section 809EZA(6) ITA provides:

In this Chapter “investment scheme” means-

- (a) a collective investment scheme, or
- (b) an investment trust.

### 69.6.1 *Collective investment scheme*

Section 809EZE ITA incorporates the FSMA definition:<sup>16</sup>

In this Chapter

... “collective investment scheme” has the meaning given by section 235 of FISMA 2000.

Section 809EZA(7) ITA extends the definition:

---

<sup>15</sup> See 69.3 (“Disguised fee”).

<sup>16</sup> See App [5A.18.2](#) 1.17.2(FSMA OEIC definition).

The reference in subsection (6)(a) to a collective investment scheme includes-

- (a) arrangements which permit an external investor to participate in investments acquired by the collective investment scheme without participating in the scheme itself,

### 69.6.2 “External investor”

Section 809EZE(1) ITA provides:

In this Chapter ...

“external investor”, in relation to an investment scheme and any arrangements, means a participant in the scheme other than-

- (a) an individual who at any time performs or is to perform investment management services directly or indirectly in respect of the scheme, or
- (b) a person through whom sums are to, or may, arise directly or indirectly to such an individual from the scheme under the [investment-services] arrangements.<sup>17</sup>

### 69.6.3 Investment trust

Section 809EZE(1) ITA provides a definition by reference:

In this Chapter ... “investment trust” means a company in relation to which conditions A to C in section 1158 of CTA 2010 are met (or treated as met).<sup>18</sup>

That takes us to s.1158 CTA 2010:

- (2) Condition A is that all, or substantially all, of the business of the company is investing its funds in shares, land or other assets with the aim of spreading investment risk and giving members of the company the benefit of the results of the management of its funds.
- (3) Condition B is that the shares making up the company's ordinary share capital (or, if there are such shares of more than one class, those of each class) are admitted to trading on a regulated market.
- (4) For this purpose “regulated market” means—

---

<sup>17</sup> The definition is applied to CGT by s.103KH(1) TCGA.

<sup>18</sup> Section 809EZE(1) ITA continues: "for this purpose "company" has the meaning given by section 1121 of CTA 2010." That incorporates the standard CT definition of company; see 86.3.1 (Company: Standard tax sense).

- (a) a UK regulated market within the meaning given by Article 2.1(13A) of Regulation (EU) No 600/2014 of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments,
  - (b) an EU regulated market within the meaning given by Article 2.1(13B) of that Regulation, and
  - (c) a Gibraltar regulated market within the meaning given by Article 26(11)(b)(i) of that Regulation.
- (5) Condition C is that the company is not—
- (a) a venture capital trust (within the meaning of Part 6 of ITA 2007),  
or
  - (b) a company UK REIT (within the meaning of Part 12 of this Act).

See The Investment Trust (Approved Company) (Tax) Regulations 2011.  
The IF Manual provides:

**IFM36367: Disguised fees: Managed Accounts and other parallel structures (from 6 April 2016): Managed accounts [Oct 2020]**

**Managed Accounts**

*ITA07/S809EZA(7)(a) - (b)*

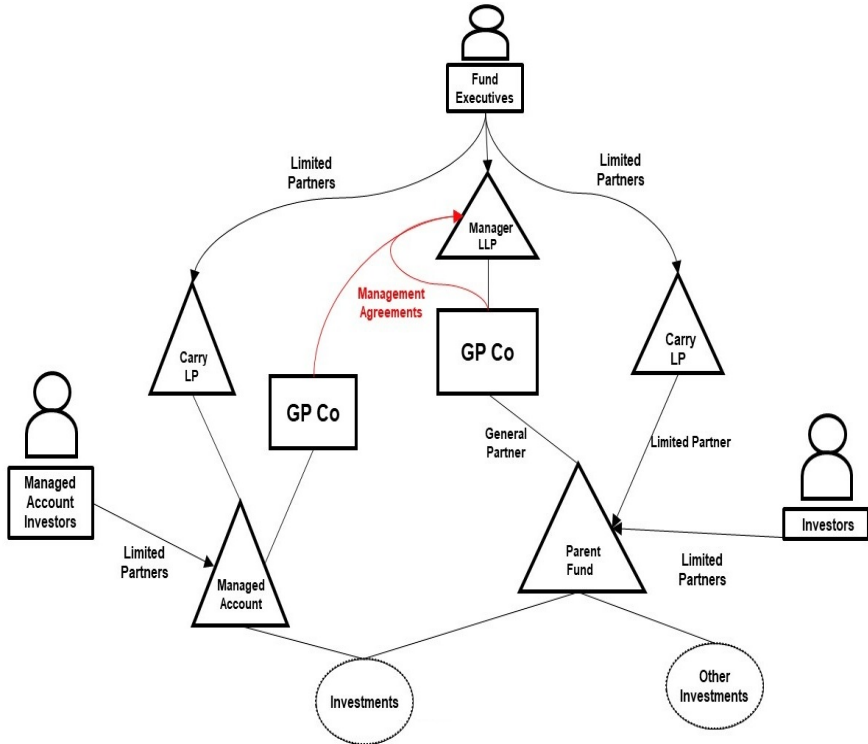

Managed accounts in their simplest form can be thought of as a fund comprising one investor, usually known as the ‘managed account investor’ providing the capital which is managed by the fund management team. These managed accounts may operate and invest alongside a more mainstream fund vehicle, typically referred to as the ‘parent fund’ which is managed by the same team. See the diagram below for a simplified example. A managed account may resemble a smaller version of the parent fund and may have the same carried interest structure. However, a variety of vehicles can be used to implement such an arrangement.

[Managed Accounts

*ITA07/S809EZA(7)(a) - (b)*

Managed accounts in their simplest form can be thought of as a fund comprising one investor, usually known as the ‘managed account investor’ providing the capital which is managed by the fund management team. These managed accounts may operate and invest alongside a more mainstream fund vehicle, typically referred to as the ‘parent fund’ which is managed by the same team. See the diagram below for a simplified example. A managed account may resemble a smaller version of the parent fund and may have the same carried interest structure. However, a variety of vehicles can be used to implement such an arrangement.]

([http://www.hmrc.gov.uk/gds/ifm/images/IFM\\_Managed\\_account.jpg](http://www.hmrc.gov.uk/gds/ifm/images/IFM_Managed_account.jpg))

A common reason for this approach is where an investor has particular requirements which cannot be catered for if it invests in the parent fund vehicle alongside a range of other investors. Such an example would be an institutional investor which may not want to invest in certain industries such as tobacco or alcohol.

Investing through a managed account allows such an investor to decline participation in any investments which fall outside their requirements. This is why on the above diagram most of the fund’s investments are also investments made by the managed account, but there is likely to be disconnected investments where the managed account declines to participate.

There may be other reasons for a managed account. It allows the managed account investor to negotiate a separate deal with the fund management team, potentially around carried interest and management fees, which is kept private from other investors. Some managed account investors may also want more control over the investments made, perhaps retaining the right to refuse certain opportunities even if they do not violate any ethical guidelines or, conversely, to take a

disproportionately bigger stake in an investment it feels particularly positive about.

Section 809EZA(7) ITA provides:

The reference in subsection (6)(a) to a collective investment scheme includes ...

- (b) arrangements under which sums arise to an individual performing investment management services in respect of the collective investment scheme without those sums arising from the scheme itself.<sup>19</sup>

DIMF draft guidance provides:

82. It is possible that the managers of a particular fund will not make their co-investment (i.e. the amounts they are required to put into the scheme of their own money on the same terms as investors to give them “skin in the game”) in the fund vehicle itself, but through a parallel structure. This structure could simply be a nominee that acquires the agreed proportion of any underlying investment made by the fund using the fund managers’ own resources. A simplified example is illustrated below.

83. HMRC is also aware that such a structure could be used for less benign ends. For example, the fund managers’ “carried interest” could be achieved not by a special class of interest in the fund limited partnership as has historically been the case, but through a direct interest in the underlying investments which replicates the same

<sup>19</sup> The definition is applied to CGT by s.103KH(1) TCGA.

economic terms. Again, a simple diagram to illustrate this issue is shown below.

84. To avoid any doubt that the rules apply to these structures as they would to a more conventional fund set-up, a new sub-section 809EZA(7)(b) was inserted by Finance Act 2016 which provides that “Collective Investment Scheme” for the purposes of the DMF Rules, includes arrangements under which sums arise to a fund manager in respect of a collective investment scheme without the sums arising from the collective investment scheme itself. Please note that the wording “in respect of ”is intentionally wide and could catch any arrangement (including one seeking to avoid these rules) where sums are in any sense structured so that they do not arise from a collective investment scheme...

**69.7 Misc definitions**

**69.7.1 Investment management services**

This term is used in the definition of “disguised fee”.<sup>20</sup>  
 Section 809EZE(1) ITA provides:

In this Chapter ... investment management services”, in relation to an investment scheme, includes-

- (a) seeking funds for the purposes of the scheme from participants or potential participants,
- (b) researching potential investments to be made for the purposes of the scheme,
- (c) acquiring, managing or disposing of property for the purposes of the scheme, and
- (d) acting for the purposes of the scheme with a view to assisting a body in which the scheme has made an investment to raise funds.

DIMF draft guidance provides:

<sup>20</sup> See 69.3 (“Disguised fee”).

<sup>21</sup> The definition is applied to CGT by s.103KH(1) TCGA.

54. ... HMRC's starting position will always be that a person in receipt of disguised fees (or carried interest) is performing investment management services. Apart from in extremely unusual situations, HMRC would always seek to argue that if investors/the management team have agreed to share part of the remuneration for managing the fund with an individual the reason for that arrangement must be that the individual is performing investment management services in respect of that fund. Otherwise HMRC struggles to see the commercial rationale for the individual receiving either a disguised management fee or carried interest. If an individual works in a business which involves performing investment management services and receives a disguised fee or carried interest, HMRC would say that fact is compelling evidence in and of itself that the individual him or herself performs investment management services directly or indirectly. HMRC would expect the only persons who are not within this category to be remunerated purely through salary and bonus rather than a direct interest in the performance of the underlying fund vehicles.

### 69.7.2 "Market value"

Section 809EZE(1) ITA incorporates the CGT rules:

In this Chapter ... "market value" has the same meaning as in TCGA 1992 (see sections 272 and 273 of that Act).

### 69.7.3 "Participant"

Section 809EZE(1) ITA provides:

In this Chapter ...  
"participant"-

- (a) in relation to a collective investment scheme, is construed in accordance with section 235 of FISMA 2000;
- (b) in relation to an investment trust, means a member of the investment trust;

### 69.7.4 "Investment in scheme"

Section 809EZE ITA provides:

(2) In this Chapter a reference to an investment made by a person in an investment scheme is a reference to a contribution by the person (whether by way of capital, loan or otherwise) towards the property subject to the scheme (but does not include a sum committed but not yet invested).

(3) For the purposes of subsection (2) a person who holds a share in an investment scheme which is a company limited by shares and who acquired the share from a person other than the scheme is to be taken to have made a contribution towards the property subject to the scheme equal to-

- (a) the consideration given by the person for the acquisition of the share, or
- (b) if less, the market value of the share at the time of the

acquisition.

### 69.7.5 “Repayment or return”

Section 809EZE(4) ITA provides:

In this Chapter, in relation to an investment scheme which is a company limited by shares-

- (a) references to a repayment of, or a return on, an investment in the scheme include a repayment of, or a return on, an investment represented by a share in the scheme resulting from-
  - (i) the purchase of the share by the scheme,
  - (ii) the redemption of the share by the scheme,
  - (iii) the distribution of assets in respect of the share on the winding up of the scheme, or
  - (iv) any similar process;
- (b) references to a return on an investment in the scheme include a dividend or similar distribution in respect of a share in the scheme representing the investment.

## 69.8 DIMF: Deemed trade

Armed with the definition of disguised fees, we turn to the rules which govern them.

Section 809EZA(1) ITA provides:

Where one or more disguised fees arise to an individual in a tax year from one or more investment schemes (whether or not by virtue of the same arrangements), the individual is liable for income tax for the tax year in respect of the disguised fee or fees as if-

- (a) the individual were carrying on a trade for the tax year,
- (b) the disguised fee or fees were the profits of the trade of the tax year, and
- (c) the individual were the person receiving or entitled to those profits.<sup>22</sup>

The IF Manual provides:

### **IFM36210: Deemed trade: Introduction [Oct 2020]** **Deemed trade**

---

22 Para (c) reflects the standard ITTOIA rule that the person liable is the person receiving/entitled to income; see 14.2.1 (Receiving/entitled: Person liable).

**Introduction****Consequence of a disguised fee arising**

... the disguised fees are brought into account for the purposes of both income tax and Class 4 National Insurance Contributions (NICs).

As disguised fees are treated as the profits of the deemed trade and not as receipts, no losses or expenses can be set against the disguised fees. For this reason the deemed trade cannot give rise to a loss, as it only applies to fees arising.

However the DIMF rules only re-characterise the nature of the receipt arising to an individual. They do not alter, for tax purposes, the nature of the underlying activities carried out by the individual which give rise to the disguised fee. Nor do the DIMF rules alter the nature of the activities of any entity or arrangement by virtue of which the disguised fee arises.

For example, where a disguised fee arises from a typical General Partner Limited Partner (GP-LP) structure (IFM36132), although the individual receiving the fee is treated as carrying on a deemed trade, the rules do not re-classify that partnership as carrying on a trade (as may be relevant, for example, to entrepreneurs' relief and interest relief). The GP LP is carrying on an investment business; sums received by the GP LP are not therefore reclassified as trade income.

DIMF draft guidance provides:

28. Please note that as amounts of disguised fee are treated as the profits of a trade (which then come into charge under Part 2 of ITTOIA 2005 without more) they also comprise "relevant UK earnings" for the purposes of determining relief for contributions to registered pension schemes.

**69.9 DIMF: Territorial limitation**

Section 809EZA(2) ITA provides:

For the purposes of subsection (1) the trade is treated as carried on-

- (a) in the UK, to the extent that the individual performs the relevant services in the UK;
- (b) outside the UK, to the extent that the individual performs the relevant services outside the UK;

and for this purpose "the relevant services" means the investment management services by virtue of which the disguised fee or fees arise to the individual in the tax year.

The IF Manual provides:

**FM36220: Deemed Trade: Territorial scope of the deemed trade [Oct 2020]**

**Territorial scope of the deemed trade**

**Location of the deemed trade**

... Where an individual who is resident in the UK for tax purposes performs services both within and outside the UK, the entirety of the profits from the deemed trade are chargeable to UK tax in accordance with ITTOIA05/S6.<sup>23</sup>

For an individual who is non-resident in the UK for tax purposes, the trade is regarded as carried on in the UK when the services are performed in the UK and carried on outside the UK where the services are performed outside the UK.

Even where an individual only performs very limited services in the UK, for example coming to the UK for a small number of business meetings during the course of the year, the legislation provides that a deemed trade exists for that individual.

69.9.1 *DT relief*

The IF Manul provides:

**FM36220: Deemed Trade: Territorial scope of the deemed trade [Oct 2020]**

**Territorial scope of the deemed trade**

**Location of the deemed trade**

... This means that the business profits article of most double taxation treaties could apply, and so a tax charge will only arise if a permanent establishment (PE) exists (INTM264050).<sup>24</sup>

Example (Thomas and Sam)

ABC LLP is a US limited liability partnership. T is one of three partners who live and work in the US and has not been to the UK in the tax year. S is a fourth partner who lives and works in the US but has visited the UK for three days in relation to the acquisition of a UK business by a collective investment scheme (IFM36900) to which ABC LLP provides investment services. Neither T nor S is UK resident for tax purposes. Each of the four partners received £10,000 that would, if

---

23 See 20.4 (IT territorial limit: Trading).

24 See 20.22 (DT relief: Trading income).

the individuals had lived and worked in the UK, be treated as a disguised fee.

The HMRC analysis is as follows:

T has not performed any services in the UK, so is not brought into charge under the DIMF rules. S has performed services in the UK, so is potentially within the charge. It is unlikely that a few days in the UK will have the effect of creating a UK PE but S will have to consider this carefully and make a decision based on the facts. If there is no PE, then a charge will not arise under the DIMF rules.

“Unlikely” seems an understatement - but HMRC did not wish to give any hostage to fortune. The Manual continues:

Many asset manager firms are international businesses with operations in more than one financial centre. Where an individual performs any investment management services in the UK they are potentially within the scope of the DIMF rules. Therefore, this may cause concern to non-resident individuals who come to the UK very rarely and do not perform any significant investment management activity whilst in the UK.

Each case will be a question of fact. However, where individuals have little or no presence in the UK it is not expected that a situation will be created in which they will be subject to the DIMF rules. This is the case even where the wider business or group they work for does have a substantial UK operation. For example:

A fund management business headquartered outside the UK has a UK operation and an individual from the headquarters occasionally visits the UK; or

A fund management business that is UK headquartered has fund management divisions based in other jurisdictions and an individual involved in such offshore operations occasionally comes to the UK.

Where an individual is resident in a country with a double taxation agreement with the UK, even where they perform some investment management services in the UK, it does not follow that they will automatically be charged under the DIMF legislation. The general approach and practices followed in relation to double taxation treaties applying to the taxation of trade profits also apply to the individual's deemed trade.

In the context of DIMF, the deemed trade concerned is a trade of the

individual rather than being the same trade as carried on by the entity which engages the individual. In considering whether the individual has a PE for the purposes of a relevant double taxation treaty you must consider the individual's deemed trade, not that of the entity that engages them.

Whether the engaging entity itself or its wider group already has a UK PE is therefore a separate question entirely. This means it is possible for the entity which engages the individual to have a UK PE while the individual fund manager will not be treated as having a personal PE for the purposes of the relevant treaty. An individual may therefore be able to rely on that treaty to be out of scope of liability under the DIMF rules. Further advice on permanent establishments and double taxation treaties is available in the International Manual (INTM260000).

Where the activities of an individual do amount to a PE such that a double taxation treaty does not preclude liability from UK tax, it will be necessary to determine the amount of profit attributable to that PE. Establishing the extent to which the individual is performing investment management services in the UK will be a fact specific question which needs to be determined, given reference to all the facts and circumstances.

## 69.10 Who receives DIMF

The rules are in the appallingly numbered sections 809EZDA and 809EZDB.

Section	Applies to	Enjoyment conditions
809EZDA	Connected non-co	No
809EZBB	Connected co/unconnected person	Yes

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies** [Oct 2020]

**The enjoyment conditions - special provisions for companies**  
*ITA07/S809EZDB(6)-(10)*

Special provision is made in relation to companies. This is because a fund management business could be set up as a wholly onshore corporate structure, with the fees and any carried interest arising from the underlying funds being charged in full to corporation tax. If, for example, an individual owned more than 50% of that business they would be connected (IFM36330) with the company and charged in full

on amounts arising to that company but for this rule.

This would be the case even if the company was a genuine vehicle of substance carrying on the entire investment management trade, the profits of which are charged fully to corporation tax.

All the facts at the time must be considered, however any attempt to gain a tax advantage could result in the fees being chargeable to income tax under disguised investment management fees (DIMF) rules. For example, the use of structures that are artificially interposed between an individual and the management fees to access corporation tax treatment.

The rules are therefore modified in the context of corporate structures to ensure that the “corporate veil” is not pierced in such situations.

## **69.11 809EZDA: Connected non-company**

Section 809EZDA ITA provides:

- (1) This section applies in relation to an individual (“A”) if-
  - (a) a sum arises to a person (“B”) who is connected with A,
  - (b) B is not a company,
  - (c) income tax is not charged on B in respect of the sum by virtue of this Chapter [Chapter 5E, DIMF],
  - (d) capital gains tax is not charged on B in respect of the sum by virtue of Chapter 5 of Part 3 of TCGA 1992 [carried interest], and
  - (e) the sum does not arise to A apart from this section.
- (2) The sum referred to in subsection (1)(a) arises to A for the purposes of this Chapter.
- (3) Where a sum arises to A by virtue of this section, it arises to A at the time the sum referred to in subsection (1)(a) arises to B.

### *69.11.1 “Connected person”*

Section 809EZDA(4) ITA tweaks the usual definition:

Section 993 (meaning of “connected”) applies for the purposes of this section, but as if-

- (a) subsection (4) of that section were omitted, and
- (b) partners in a partnership in which A is also a partner were not “associates” of A for the purposes of sections 450 and 451 of

CTA 2010 (“control”).<sup>25</sup>

Thus:

(a) Partners are not connected persons.<sup>26</sup>

(b) A partner is not connected with a company held by the partnership.<sup>27</sup>

This only applies for the purpose of s.809EZDA, but it is repeated verbatim elsewhere in the DIMF code: s.809EZDB(10) ITA, s.103KG(15) TCGA.

## **69.12 809EZDB: Company/unconnected person**

Section 809EZDB(1) ITA provides:

This section applies in relation to an individual (“A”) if-

- (a) a sum arises to-
  - (i) a company connected with A, or
  - (ii) a person not connected with A,
- (b) any of the enjoyment conditions is met, and
- (c) the sum does not arise to A apart from this section.

### *69.12.1 “Enjoyment conditions”*

Section 809EZDB(2) ITA provides:

The enjoyment conditions are-

- (a) the sum, or part of the sum, is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of A or a person connected with A;
- (b) the arising of the sum operates to increase the value to A or a person connected with A of any assets which-
  - (i) A or the connected person holds, or
  - (ii) are held for the benefit of A or the connected person;
- (c) A or a person connected with A receives or is entitled to receive at any time any benefit provided or to be provided out of the sum or part of the sum;

---

25 See 99.15.3 (Person controls company).

26 See 99.18 (Connected: Partners).

27 Please note, if any individual partner does have direct or indirect control of a company through a partnership, that company will still be a connected person to that individual for these purposes, it is only the aggregation of interests when judging control which is modified.

- (d) A or a person connected with A may become entitled to the beneficial enjoyment of the sum or part of the sum if one or more powers are exercised or successively exercised (and for these purposes it does not matter who may exercise the powers or whether they are exercisable with or without the consent of another person);
- (e) A or a person connected with A is able in any manner to control directly or indirectly the application of the sum or part of the sum.

The drafting is based on the ToA enjoyment conditions.<sup>28</sup> But the ToA rules apply where the individual transferor has a *personal* power to enjoy; the rules here apply if A *or a person connected with A* has power to enjoy. That is of course much wider.<sup>29</sup>

The last paragraph of s.809EZDB(1) tweaks the definition of connected person in the context of Power to Enjoy:

In this subsection, in a case where the sum referred to in subsection (1)(a) arises to a company connected with A, references to a person connected with A do not include that company.

Assuming the conditions in s.809EZDB(1) are met, we move on. Section 809EZDB ITA provides:

- (3) There arises to A for the purposes of this Chapter-
  - (a) the sum referred to in subsection (1)(a), or
  - (b) if the enjoyment condition in subsection (2)(a), (c), (d) or (e) is met in relation to part of the sum, that part of that sum, or
  - (c) if the enjoyment condition in subsection (2)(b) is met, such part

28 See 46.11 (“Power to enjoy”). Section 809EZDB(5) ITA adds: “In determining whether any of the enjoyment conditions is met in relation to a sum or part of a sum-  
 (a) regard must be had to the substantial result and effect of all the relevant circumstances, and

(b) all benefits which may at any time accrue to a person as a result of the sum arising as specified in subsection (1)(a) must be taken into account, irrespective of-  
 (i) the nature or form of the benefits, or  
 (ii) whether the person has legal or equitable rights in respect of the benefits.”

This is also based on the ToA provision; see 46.11.1 (Substance).

29 In this respect the DIMF code follows the approach of the mixed partnership code: see 83.9.1 (PtoE condition (c): Enjoyment conditions).

of that sum as is equal to the amount by which the value of the assets referred to in that condition is increased.

(4) Where a sum (or part of a sum) arises to A by virtue of this section, it arises to A at the time it arises to the person referred to in subsection (1)(a)(i) or (ii) (whether the enjoyment condition was met at that time or at a later date).

### 69.12.2 *Disregarded enjoyment conditions*

Section 809EZDB(6) ITA provides:

The enjoyment condition in subsection (2)(b), (c) or (d) is to be treated as not met if it would be met only by reason of A holding shares or an interest in shares in a company.

Section 809EZDB(7) ITA provides:

The enjoyment condition in subsection (2)(a) or (e) is to be treated as not met if the sum referred to in subsection (1)(a) arises to a company connected with A and-

- (a) the company is liable to pay corporation tax in respect of its profits and the sum is included in the computation of those profits..

DIMF draft guidance provides:

224. Secondly, enjoyment conditions (a) and (e) are not be regarded as met where a sum arises to a company connected with A where that company is either chargeable to UK corporation tax in respect of that sum. This will prevent the enjoyment condition being met in relation to onshore structures where a sum of management fee (or carried interest) arises to a company which is resident in the UK for tax purposes and brings those profits into account in calculating its profits chargeable to corporation tax.

Section 809EZDB(7) ITA provides:

The enjoyment condition in subsection (2)(a) or (e) is to be treated as not met if the sum referred to in subsection (1)(a) arises to a company connected with A and ...

- (b) paragraph (a) does not apply but-

- (i) the company is a CFC<sup>30</sup> and the exemption in Chapter 14 of Part 9A of TIOPA 2010 [foreign tax at least 75% of corresponding UK tax] applies for the accounting period in which the sum arises, or
- (ii) the company is not a CFC but, if it were, that exemption would apply for that period.

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies [Oct 2020]**

**The enjoyment conditions - special provisions for companies**

... In effect this means that the CFC is liable to pay an amount of tax in its country of residence equal to at least 75% of the amount that would have been due if it had been chargeable to the tax in the UK. The tax exemption contains detailed rules as to how the comparison is to be undertaken. These rules are designed to prevent manipulation of the tax due in the country of residence. Guidance on these rules can be found at INTM226000+.

Furthermore if the company is not a CFC (for example because it is controlled by persons outside the UK), the exclusion can still apply if the conditions for the tax exemption in the CFC rules are otherwise met (for example, if the company were a CFC it would qualify for exemption because the tax it pays is equal to at least 75% of the amount that would have been due if it had been chargeable to UK tax).

Section 809EZDB ITA then restricts the exceptions with a TAAR, which takes somewhat non-standard form:

- (8) But subsections (6) and (7) do not apply if the sum referred to in subsection (1)(a) arises to
  - [i] the company referred to in subsection (1)(a)(i) or
  - [ii] the person referred to in subsection (1)(a)(ii)
 as part of arrangements where-
  - (a) it is reasonable to assume that in the absence of the arrangements the sum or part of the sum would have arisen to A or an individual connected with A, and
  - (b) it is reasonable to assume that the [investment-services] arrangements have as their main purpose, or one of their main

---

30 Section 809EZDB(7) ITA incorporates a definition by reference: "In this subsection "CFC" has the same meaning as in Part 9A of TIOPA 2010."

purposes, the avoidance of a liability to pay income tax, capital gains tax, inheritance tax or corporation tax.

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies [Oct 2020]**

**The enjoyment conditions - special provisions for companies**

... Where a UK based manager has a very small shareholding in the ultimate (often quoted) parent vehicle of a large multi-national corporate asset management group, it will generally be obvious that the sums which represent the management fee would not arise to them in the absence of those arrangements.

On the other hand, an individual manager or small management team interposing a corporate entity with no substance will be caught.

In between the two extremes it is harder to define a clear line where it will become reasonable to assume that in the absence of those arrangements, the sum would have arisen to A or an individual connected with A. The factors below, which are non-exhaustive, may help in considering what is reasonable:

- What structures were used by the fund management house in relation to prior funds (this may not just be their immediately preceding fund);
- Whether the company was put in place in response to advice to minimise a tax burden or achieve tax efficient co-investing funding;
- Whether the fund management business operates (and has always operated) as a wholly corporate group;
- Whether a company in the corporate group carries on a trade of providing investment management or advisory services on a commercial basis with a view to profit and the individual receives an arm's length rate of remuneration from his or her employment by that company. That company has sufficient substance to carry on the management activity and actually does so i.e. with its own employees, contracts and other assets;
- The size of the management team;
- The international spread of the management team;
- What happens when an individual joins or leaves the management team – both in terms of prior agreements and understandings, as well as legal agreements (if the expectation is that the manager will receive a reward which in any sense reflects or is calculated by reference to amounts which have arisen or profits which have accrued to the corporate).

The above list contains suggestions of what could be considered when deciding if it is reasonable to assume that a sum would have arisen to A in the absence of the arrangements. No factor is deemed to be decisive; the analysis depends on the facts and circumstances.

(b) It is reasonable to assume that the arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, inheritance tax, or corporation tax. This test does not require the purpose of the arrangements to involve the avoidance of the DIMF rules. Seeking to avoid any income tax, capital gains tax, inheritance tax or corporation tax advantage will be sufficient. In particular, HMRC understands that some of the structures set up historically by non-domiciled fund managers were designed to manage their liability to inheritance tax rather than secure any income tax advantage and this will be sufficient to fail this test.

This test will be deemed to be met where the management fee is used (whether directly or indirectly) to make an investment in a collective investment scheme (ITA07/S809EZB(9)). This will be the case even if there is, in fact, no tax avoidance motive to the arrangements in any sense.

Section 809EZDB(9) ITA provides:

The condition in subsection (8)(b) is to be regarded as met in a case where the sum is applied directly or indirectly as an investment in a collective investment scheme.

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies** [Oct 2020]

**The enjoyment conditions - special provisions for companies**

... This responds to structures which were common before the DIMF rules were introduced which sought to meet fund manager's co-investment commitments in a tax efficient way. Many of these structures sought to apply management fees which would otherwise arise to a fund manager to pay up his or her co-investment commitment. While this provision (ITA07/S809EZB(9)) is targeted at co-invest funding structures, please note this can include investments in any collective investment scheme, not just those managed by the individual in question. If taxpayers argue that the sums are not arising from a collective investment scheme in a way which undermines the clear policy rationale behind this legislation, HMRC will consider making a challenge, this includes applying the targeted anti-avoidance rules

(ITA07/S809EZF) (IFM36600).

### 69.13 DIMF TAAR

Section 809EZF ITA provides:

In determining whether section 809EZA<sup>31</sup> applies in relation to an individual, no regard is to be had to any arrangements the main purpose, or one of the main purposes, of which is to secure that that section does not apply in relation to-

- (a) the individual, or
- (b) the individual and one or more other individuals.

In my terminology, this is an application-style TAAR.<sup>32</sup>

The IF Manual provides:

**IFM36600: Anti-avoidance clause: Anti-avoidance [Oct 2020]**  
**Anti-Avoidance**

... Where steps are taken to ensure that arrangements fall within the definition of carried interest this will not in itself mean that the anti-avoidance clause will be invoked. For example, if the hurdle rate for a fund was increased from 5% to 6% to adhere with the condition for carried interest detailed at ITA07/S809EZA(4)(b), this would not necessarily be a reason for the anti-avoidance provision to be applied.

Is that law or concession?

### 69.14 DIMF double taxation

Section 809EZG ITA provides:

- (1) This section applies where-
  - (a) income tax is charged on an individual by virtue of section 809EZA in respect of a disguised fee, and
  - (b) at any time, a tax (whether income tax or another tax) is charged on the individual or another person otherwise than by virtue of section 809EZA in relation to the disguised fee.
- (2) This section also applies where-
  - (a) income tax is charged on an individual by virtue of section 809EZA in respect of a disguised fee which arises to the

---

31 See 69.7 (DIMF: Deemed trade).

32 See 2.10 (TAAR/unallowable purpose test).

- individual under the [investment-services] arrangements by way of a loan or advance,
- (b) at any time, a tax (whether income tax or another tax) is charged on the individual in relation to another sum which arises to the individual under the [investment-services] arrangements, and
  - (c) some or all of the loan or advance has to be repaid as a result of the other sum having arisen to the individual.

Where these conditions are satisfied, we move on to the relief:

- (3) In order to avoid a double charge to tax, the individual may make a claim for one or more consequential adjustments to be made in respect of the tax charged as mentioned in subsection (1)(b) or (2)(b).
- (4) On a claim under this section an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.
- (5) The value of any consequential adjustments must not exceed the lesser of the income tax charged on the individual as mentioned in subsection (1)(a) or (2)(a) and-
  - (a) where subsection (1) applies, the tax charged as mentioned in subsection (1)(b);
  - (b) where subsection (2) applies, the tax charged as mentioned in subsection (2)(b) in relation to so much of the other sum as does not exceed the amount of the loan or advance that has to be repaid as mentioned in subsection (2)(c).
- (6) Consequential adjustments may be made-
  - (a) in respect of any period,
  - (b) by way of an assessment, the modification of an assessment, the amendment of a claim, or otherwise, and
  - (c) despite any time limit imposed by or under any enactment.

The IF Manual provides:

**IFM36730: Avoidance of double taxation: Claim under the first provision** [Oct 2020]

**Claim under the first provision**

...

Example: Fund disposal of an investee company

A fund disposes of an investee company. The proceeds from the disposal are, as a matter of fact, allocated to the individual at the level of a General Partner Limited Partner (GP-LP) entity and used to meet

an annual fee. This gives rise to a charge under the DIMF rules. The individual's share of the proceeds are £2m. The individual is also liable to capital gains tax on the share disposal.

The individual has been taxed twice as a result of the DIMF rules and the CG charge on disposal. The individual may therefore be able to make a claim for a consequential adjustment to the CGT charge.

Example: Following the change in the definition of fees 'arising' from 22 October 2015

Following the changes made to the definition of arise with effect from 22 October 2015 (discussed below) a disguised fee arises to a fund manager's husband (the fund manager having procured that part of the interest in the GP-LP to which she was entitled was instead issued to her husband). The gains and income which the husband is allocated at the level of GP-LP are taxable in his hands in accordance with their original characteristic for tax purposes, for example as a capital gain or dividend income. However, the sum is also treated as arising to the fund manager by virtue of the DIMF rules and is charged in her hands as a disguised fee to trading income.

The provision gives relief in respect of the 'other tax' which is the tax paid by the fund manager's husband in this example. In order to facilitate a just and reasonable claim an officer of HMRC may deem the fund manager's DIMF charge to have been paid by her husband as an administrative easement. This easement, however, is only for administrative purposes and in no way should the application of the easement provide a tax advantage for either party. If a tax advantage is achieved then this may lead to penalties.

In both examples, if the claim is allowed, then the adjustment will be limited by ITA07/S809EZG(5) to the lower of:

- the tax charge under the DIMF rules; and
- the other tax involved.

**IFM36740: Avoidance of double taxation: Claim under the second provision** [Oct 2020]

**Claim under the second provision**

**ITA07/S809EZG(2)**

*ITA07/S809EZG(5)*

This provision applies where income tax is charged to an individual in respect of a disguised fee under the disguised investment management fees (DIMF) rules and this fee has been paid by way of a loan or advance. If this loan or advance is then discharged by using some of the profits of the fund then there may be a further DIMF charge.

*Example: Loan advance paid to manager*

An individual investment manager gets a loan from an investment scheme. Three years later, profits arise in a way that means the profits are not included as profits of a trade and this profit is used to discharge the outstanding loan. The DIMF rules determine that an untaxed management fee arises both at the time the loan is made and again when the profits are used to repay the individual's loan.

The individual has been taxed twice despite the latter profits offsetting the amount that would have at some point been repayable under the individual's loan. Relief can be given against the DIMF charge which is due in respect of the latter profit payment.

69.14.1 *Expenses*

The IF Manual provides:

**IFM36720: Avoidance of double taxation: Consequential adjustment** [Oct 2020]**Consequential Adjustment**

...Expenses

In circumstances where the General Partner Limited Partner (GP-LP) or the General Partner Limited Liability Partner (GP-LLP) structures are in place in a limited partnership fund (LP Fund) some of the monies flowing through the GP-LP or GP-LLP may be applied in meeting genuine commercial expenses of the LP Fund. The amount applied to these expenses will not be treated as arising to the individuals managing the fund, provided they would be deductible when calculating the profits of a trade of the GP-LP or GP-LLP under normal UK tax principles.

However, in most cases it is unlikely that such expenses would be deductible from investment income and gains arising to members of the GP-LP or GP-LLP from the LP Fund.

The fund manager may therefore be charged to capital gains tax, for example, on the gross gain treated as arising under Statement of Practice D12. Only the net amount actually arising after genuine expenses have been paid is charged under DIMF rules.

HMRC accept that the CGT charged on the gross gain can be reduced under ITA07/S809EZG (up to the amount of tax charged under the DIMF rules in the unlikely situation that the CGT charge exceeds the former). This is the case even though the charge under the DIMF rules will be on the net sum arising.

This treatment will only be permitted as just and reasonable in relation to genuine commercial expenses where those expenses would have been deductible in calculating the profits of a trade of providing investment management expenses in line with the clear purpose of the DIMF rules. It cannot be used to access relief on expenses which would not have been deductible when calculating trading profits.

### **69.15 Carried interest: CGT**

Armed with the definition of carried interest,<sup>33</sup> we can turn to the rules for carried interest.

Section 103KA(1) TCGA provides:

This section applies where–

- (a) an individual (“A”) performs investment management services directly or indirectly in respect of an investment scheme under arrangements involving at least one partnership, and
- (b) carried interest arises to A under the arrangements.

I refer to this as an “investment-services arrangement”. But the requirement is different from the investment-services arrangement relating to DIMF, as s.103KA only applies if the arrangement involves a partnership. A partnership is not needed for DIMF.

DIMF draft guidance provides:

15. ... section 103KA(1)(a) does not refer to carried interest arising from any particular investment scheme. Section 103KA therefore applies to any carried interest which arises to an investment manager, even if it arises from another investment scheme in relation to which no investment management services are in fact provided. The only condition is that the carried interest arises to the fund management under the arrangements by which he or she provides investment management services to a collective investment scheme ...

16. In virtually all situations, HMRC considers that carried interest (given its commercial rationale) will only arise to individuals where this condition is met. To give an example, a fund manager may manage Fund X at an asset management house. The fund manager may also be given carried interest in another fund managed by a different team (Fund Y). This is part of the remuneration structure at the business

---

33 See 69.5 (“Carried interest”).

where the fund managers are given cross-exposure to the performance of each other's funds. Here, the carried interest is arising to the fund manager from Fund Y because he or she is performing investment management services to Fund X and so the carried interest arising from both funds falls within section 103KA.

17. Section 103KA also applies where a fund manager has retired or has ceased to perform investment management services and is still in receipt of carried interest. Section 103KA(1) does not include any requirement that the individual is still performing investment management services when the carried interest arises provided the fund manager is performing, or has previously performed, investment management services. If the fund manager has at some point performed investment management services in respect of a collective investment scheme and the carried interest arises under those arrangements, it comes within the scope of these rules.

#### 69.15.1 *Carried-interest charges*

Section 103KA(2) TCGA provides:

If the carried interest arises to A in connection with the disposal of one or more assets of the partnership or partnerships–

- (a) a chargeable gain equal to the amount of the carried interest less any permitted deductions (and no other chargeable gain or loss) is to be treated as accruing to A on the disposal, and
- (b) the chargeable gain is to be treated as accruing to A at the time the carried interest arises.

I refer to this as the “**partnership CI charge**”.

This typically arises when a partnership sells assets and a distribution is made to the partners including carried interest holders.

The gain which is treated as arising is the “**carried interest gain**”. This is a notional (fictional) gain. It is computed according to carried interest rules, and not on CGT principles. It is distinct from the gain (if any) on any actual disposal. A carried interest gain arises if the asset actually disposed of:

- (1) is not a chargeable asset (eg it may be a qualifying corporate bond) or
- (2) is a foreign asset (otherwise qualifying for the CGT remittance basis)
- (3) is sold at a loss (applying CGT computation principles)

DIMF draft guidance provides:

*Section 103KA(2) – disposals property of a partnership*

20. ... HMRC expect that section 103KA(2) will apply to most carried interest arising from most “classic” fund structures, where the fund is structured as limited partnership and the carried interest awarded to fund managers is held through another limited partnership (which is a limited partner in the fund limited partnership as shown in the diagram at paragraph 6 of section 1 above.) Section 103KA(2) is therefore also the primary means by which the legislation counters “base cost shift” and “cherry picking” as these both required carried interest to arise through partnership structures.

21. As outlined above, where carried interest arose to an individual from the disposal of assets held in a partnership (such as the disposal of an investment held by a fund limited partnership) the quantum of the gain treated as arising to the individual was previously calculated in accordance with SoP D12. Section 103KA(2) supersedes SoP D12 where it applies and substitutes a new, statutory, method to determine the quantum of the gain treated as arising. Section 103KA(2)(a) provides that a gain equal to the amount of carried interest arising less any permitted deductions will arise. As noted below, “permitted deductions” are narrowly defined and section 103KA(2) will charge a fund manager on their true economic gain from the carried interest rather than the amounts calculated under SoP D12.

22. Please note, that section 103KA(2)(a) provides that the gain treated as arising under this section is the only chargeable gain (or loss) treated as arising in respect of that disposal of partnership property, and section 103KA(2)(b) also potentially alters the timing of when the gain accrues to the point at which the carried interest arises to the fund manager. Section 103KA(2) therefore acts to adjust both the timing and quantum of any gain arising to a fund manager which comprises carried interest.

23. In some circumstances a gain may accrue to an individual under SoP D12 before section 103KA is invoked. This is because section 103KA is triggered by a sum arising to a fund manager, whereas a gain can be treated as accruing under the general scheme of CGT and SoP D12 when a partnership asset is disposed of, even if the proceeds are retained and no sum arises to the relevant individual. This is most likely to occur where a partnership asset is disposed of necessitating the calculation of a gain under SoP D12 but where the carried interest is placed into escrow (as discussed below at paragraphs 37-44) such that no sum “rises” to the fund manager at that time. There is nothing at this stage to prevent the gain calculated in accordance with SoP D12 accruing to the

fund manager and he or she will be taxed on that gain in accordance with his or her own circumstances. However, once the sum is released from escrow and a sum “rises” to the fund manager, the chargeable gain accruing under section 103KA(2) vacates and supersedes the earlier gain at that point—section 103KA(2) putting beyond doubt that the gain calculated under that section is the only gain treated as arising to the fund manager.

24. Please note the exclusivity of section 103KA(2) also applies in respect of any loss that would otherwise accrue to a fund manager under SoP D12 (for example, where the hurdle has been hit and the fund manager is receiving carry which is paid out of the disposal of an asset at a loss). Here a gain accrues to the fund manager equal to the sum received, less any permitted deductions, and no loss is treated as accruing to the individual. Where there is the timing difference referred to above (i.e. an asset is disposed of at a loss some time before the proceeds are distributed in a way which prevents a sum “rising” to the fund manager until that later point) it may be prudent for a taxpayer not to claim that loss under section 16(2A), TCGA 1992. If the loss has been claimed as an allowable loss and section 103KA(2) is later invoked such that the loss is vacated and treated as never having arisen, the fund manager may find that his previous tax return(s) are incorrect and that tax has been underpaid.

DIMF draft guidance provides:

26. Please note, in common with other references in the TCGA, “asset” in section 103KA(2) refers to an asset the disposal of which could give rise to a chargeable gain. Where an asset is effectively exempt from capital gains tax under general principles, the carried interest will be charged under section 103KA(3) rather than section 103KA(2). This is most likely to arise in respect of qualifying corporate bonds (or QCBs) within section 116, TCGA 1992 which do not give rise to chargeable gains. The loan notes issued to funds to represent shareholder debt are often QCBs and so carried interest satisfied out of their repayment will come within section 103KA(3) rather than section 103KA(2).

### 69.15.2 *General CI charge*

Section 103KA(3) TCGA provides:

If the carried interest arises to A in circumstances other than those specified in subsection (2), a chargeable gain of an amount equal to the

amount of the carried interest less any permitted deductions is to be treated as accruing to A at the time the carried interest arises.

I refer to this as the “**general CI charge**”; and the partnership and general CI charges together are the “**carried-interest charges**”. Comparing the two charges:

<b>Partnership CI charge</b>	<b>General CI charge</b>
Disposal of partnership asset	No disposal of partnership asset
CI gain accrues to A	<i>Same</i>
No other gain/loss accrues to A	No equivalent rule

### 69.15.3 *Who receives carried interest*

Section 103KG(1) TCGA provides:

For the purposes of this Chapter [Chapter 5 part 3], carried interest “arises” to an individual (“A”) if, and only if, it arises to him or her for the purposes of Chapter 5E of Part 13 of ITA 2007.

See 69.9 (Who receives DIMF).

The usual terminology is that income *arises* and gains *accrue*. Consistently with that, a carried interest gain is said to accrue, and carried interest is said to arise. The carried interest rules adopt the DIMF code, which concerns income rather than gains, and so used the word “arises”. But “arise” and “accrue” amount to the same thing.

The IF Manual provides:

**IFM37268: Charging Provisions: Definition of "arising": Sums released from escrow** [Oct 2020]

**Sums released from escrow**

... The deferred carried interest rules modify the application of the enjoyment conditions in relation to companies through TCGA92/S103KG(8)-(11). This mirrors the modification as part of the Disguised Investment Management Fees (DIMF) rules seen at ITA07/S809EZDB (6)-(9) (IFM36335).

### 69.15.4 *Carried interest trade receipt*

Section 103KA(4) TCGA provides:

Subsections (2) and (3) [carried-interest charges] do not apply in relation to carried interest to the extent that—

- (a) it is brought into account in calculating the profits of a trade<sup>34</sup> of A for the purposes of income tax for any tax year

DIMF draft guidance provides:

This ensures that fund managers who receive a performance fee which is brought into account when calculating their trading profits do not need to claim relief from the CGT charge under this legislation to avoid double taxation.

### **69.16 “Permitted deductions”**

This term is used in the computation of carried-interest gains.

Section 103KA(5) TCGA provides:

For the purpose of subsections (2) and (3) “permitted deductions” in relation to A means such parts of the amounts specified in subsection (6) as is just and reasonable.

Permitted deductions are more narrowly defined than the usual rule for CGT deductions (in s.38 TCGA). There are three categories of permitted deduction. Section 103KA(6) TCGA provides:

The amounts referred to in subsection (5) are–

- (a) the amount of any consideration in money given to the scheme by or on behalf of A wholly and exclusively for entering into the [investment-services] arrangements referred to in subsection (1)(a) (but not consideration in respect of co-investments),

The other two deductions deal with the overlap with employment income:

- (b) any amount that constituted earnings of A under Chapter 1 of Part 3 of ITEPA 2003 (earnings) in respect of A’s entering into those arrangements (but not any earnings in respect of co-investments or any amount of exempt income within the meaning of section 8 of that Act), and
- (c) any amount which, by reason of events occurring no later than the time the carried interest arises, counts as income of A under the enactments referred to in section 119A(3) [employment-related securities] in respect of A’s participation in the

---

34 Section 103KA(8) TCGA provides: “In this section ... “trade” includes profession or vocation.”

[investment-services] arrangements referred to in subsection (1)(a) (but not an amount counting as income of A in respect of co-investments); (and section 119A(5) applies for the purposes of this paragraph as it applies for the purposes of section 119A(4)).

For the purposes of this Act no other deduction may be made from the amount of the carried interest referred to in subsection (2) or (3).

Section 103KA(7) TCGA allows a deduction where carried interest is acquired for consideration:

Where the carried interest arises to A by virtue of his or her acquisition of a right to it from another person for consideration given in money by or on behalf of A, the amount of the chargeable gain accruing to A under subsection (2) or (3) is, on the making of a claim by A under this subsection, to be regarded as reduced by the amount of the consideration.

The IF Manual provides:

**IFM37236: Charging provisions: Operation of the charge: Permitted deductions** [Oct 2020]

**Permitted deductions**

... Deductions are not permitted for base cost contributed by other members of the partnership, or attributable to revaluations of the partnership assets, as was previously possible under Statement of Practice D12 (the “base cost shift”, explained in IFM37160).

2017 Rebasing does not apply, because although there is a deemed disposal and re-acquisition, it is not deemed to be for money. HMRC agree.<sup>35</sup>

## 69.17 Co-investment

Section 103KA(4) TCGA provides:

Subsections (2) and (3) [carried-interest charges] do not apply in relation to carried interest to the extent that...

- (b) it constitutes a co-investment repayment or return.

Section 103KA(8) TCGA defines co-investment:

---

<sup>35</sup> See 53.14.7 (Effect of 2017 rebasing), and Rebasing Q&As Question 1.

In this section-

“co-investment”, in relation to A, means

- [a] an investment made directly or indirectly by A in the scheme,
- [b] where there is no return on the investment which is not an arm’s length return within the meaning of section 809EZB(2) of ITA 2007;

Section 103KA(8) TCGA defines repayment or return:

“co-investment repayment or return” means a repayment in whole or in part of, or a return on, a co-investment;

## 69.18 Disposal of carried interest

Section 103KB TCGA provides:

(1) For the purposes of section 103KA [carried-interest charges], consideration received or receivable by an individual for the disposal, variation, loss or cancellation of a right to carried interest is to be treated as carried interest arising to that individual at the time of the disposal, variation, loss or cancellation.

(2) But subsection (1) does not apply if and to the extent that the consideration is a disguised fee arising to the individual for the purposes of section 809EZA of ITA 2007.

The IF Manual provides:

**IFM37232: Charging Provisions: Operation of the charge: Disposals** [Oct 2020]

### **Disposals**

#### **Disposal of partnership assets**

... The general rules in TCGA92, which determine whether a disposal has taken place and for what consideration, will also apply to this section. In particular, TCGA92/S17 will apply to treat an individual as having received market value for a right to carried interest when it is disposed of otherwise than at arm’s length. In circumstances where an individual is forced to dispose of their right to receive carried interest, TCGA92/S17(1)(b) will not apply to the individual making the disposal, where the disposal is sufficiently disassociated to services rendered.

DIMF draft guidance provides:

54. When initially published, the draft Finance Bill contained provisions which would have disregarded restrictions which reduced the value of a right to carried interest for the purposes of section 17. The government was persuaded that this approach was not appropriate and with the expanded definition of “arise” no longer necessary. Such restrictions are not, therefore, disregarded on disposals of carried interest which come within section 17 under Finance (No.2) Act as enacted.

55. So if an individual disposed of their right to carried interest in favour of their child or to an unconnected entity but on non-arm’s length terms (for example, as a gift to a trust structure from which only their adult children could benefit in an attempt to mitigate the impact of the new rules), the amount charged as a capital gain under this measure will equal the market value of the right to carried interest at that time taking into account any restrictions.

### **69.19 Carried-interest remittance basis**

Section 103KC TCGA provides:

In a case where section 103KA [carried-interest charges] applies, a chargeable gain accruing or treated as accruing to an individual in respect of carried interest is a chargeable gain accruing on the disposal of an asset situated outside the UK only to the extent that the individual performs the services referred to in section 103KA(1)(a) [investment management services<sup>36</sup>] outside the UK.

This extends the remittance basis to UK situate carried interest. In practice carried interest is usually non-UK situate, so the issue does not arise.

Where possible, it is advantageous for investment activity to be performed abroad.

The approach to apportionment should be the same as for employment income.<sup>37</sup>

Records should be kept to show where the work was done. For periods before the legislation was introduced, taxpayers would not have expected to need this, and records may be difficult to recover; the rules operate with an element of retrospectivity. But there it is.

---

36 See 69.14 (Carried interest: CGT).

37 See 33.31 (Earnings “in respect of” UK duties).

DIMF draft guidance provides:

59. This replaces the normal rule at section 12, TCGA 1992 that defines a foreign chargeable gain by reference to the location of the assets disposed of. Given that carried interest arises in relation to the performance of investment management services, looking to the location where these are performed rather than the location of the assets used to satisfy the carried interest is more appropriate and reflects the “hybrid” nature of the receipt as having some characteristics of an investment return and others of a reward for services.

...

61. For some individuals’ circumstances, a simple apportionment of their gain based on day-count may produce an acceptable result but in other cases, where more significant management duties are consistently performed in one territory than are performed in another, a simple time-apportionment will tend to under- or over-state the foreign chargeable gain which accrues. Please note that generally the focus will be on the services performed by the individual fund manager – a fund manager who performs the vast majority of their investment management services outside the UK would not be prejudiced by the activities of his or her UK focused colleagues.

62. For example, a UK-based German national may work for a UK headquartered fund. Her office is based in London where she and her family are based. However, her role in the fund is very much focused on Germany and Austria and she leads the teams responsible for investment in those jurisdictions. She spends, on average, 2-3 days a week in Germany but this misrepresents her input. In relation to most transactions on which she works, the fund manager spends an extended period of time setting up and negotiating the original acquisition and subsequently stays in Germany for, say, one week a month to support the management team before staying for a further extended period to negotiate the disposal. Here a day-count may not be appropriate and it is likely that a greater proportion than the c.25% produced by looking at one week out of four is the correct proportion treated as a foreign chargeable gain under the new section 103KC.

63. Similarly HMRC are aware that, for some types of closed-ended funds, carried interest will arise in one year which, in truth, reflects services performed by an individual over a longer period. In such a situation, it may be correct to look at where services have been performed over prior years although, again, this will depend on individual facts and circumstances. For example, an individual involved

in fund-raising for a fund may spend the first few years of a fund's life travelling seeking to raise funds from investors outside the UK, only returning to the UK at irregular intervals and generally because it presents their personal home. Once the fund raising process is finished there may be a period where the individual is effectively based in the UK full-time, maintaining relations with investors. Subsequently, before the first fund has even begun to pay carried interest, the fund raiser may recommence travelling seeking to raise commitments for the next fund. Here, those early years largely spent overseas will probably carry more weight when determining what proportion of the carried interest represents a foreign chargeable gain. An additional example of such a situation is provided in Chapter 3.

64. These two examples are intended to be helpful and to show when HMRC will potentially accept a more generous split under section 103KC in favour of a foreign chargeable gain. However, section 103KC is a double-edged sword and will also operate to increase the proportion of carried interest taxable on a remittance basis user on the arising basis. As a general observation HMRC will be prepared to give weight to activities performed in the underlying jurisdictions where a fund invests.

The IF Manual provides:

**IFM37330: Foreign chargeable gains: Low tax jurisdictions** [Oct 2020]

**Low tax jurisdictions**

The successful performance of a fund which generates carried interest does not arise from tax efficient holding structures but the management of genuine underlying business operations. This is especially true where services based in low tax jurisdictions are labelled as marketing services, investor relations or other vague descriptions which seek to disguise the real contribution of value by the management team in the offshore financial centres where they are normally based.

The correct proportion of carried interest applicable to UK taxation will not be affected by the attempt to disguise the legitimate underlying investment management services.

69.19.1 *Record keeping*

The IF Manual provides:

**IFM37340: Foreign chargeable gains: Record keeping**

**requirements** [Oct 2020]

**Record keeping requirements**

HMRC recognises that carried interest may arise in relation to services performed prior to the introduction of the carried interest rules in Finance (No. 2) Act 2015 (IFM37150) and therefore individuals would not have been aware of the need to keep the relevant records.

HMRC will adopt a pragmatic approach to record keeping and the evidence used to identify a just and reasonable split for foreign chargeable gains.

For remittance basis users, HMRC would expect the customer to have already recorded the information required to determine their residency position and accurately return the income and gains eligible for taxation under the remittance basis.

Additional information may be required to evidence specific duties performed, their location or duties performed over certain periods of time.

69.19.2 *Mixed carried interest funds*

The IF Manual provides:

**IFM37350: Foreign chargeable gains: Mixed funds** [Oct 2020]

**Mixed funds**

**TCGA92/S103KA - S103KC**

*ITA07/S809Q*

In general where a remittance of a sum is made to the UK which comprises various items for tax purposes, the mixed funds rules determine the order in which sums are treated as remitted to the UK. Core mixed funds rules can be found at ITA07/S809Q.

Carried interest may comprise foreign chargeable gains and “UK chargeable gains” (taxable on the arising basis when arising to a remittance basis tax payer). If a sum of carried interest was to be considered from a mixed fund, the foreign chargeable gain would be treated as remitted in priority to the UK chargeable gain being taxed under the arising basis. The individual would therefore be required to pay tax on that foreign chargeable gain when making a remittance, in addition to paying tax due on the chargeable gain being taxed under the arising basis. This is in line with ITA07/S809Q.

In circumstances where a non-domiciled individual performs services that give rise to carried interest in the UK and one or more jurisdictions, the carried interest rules produce two separate gains, one relating to UK

services and one relating to non-UK services. As two gains are brought into existence at the same time there is no mixed fund from the perspective of the individual in the account of the payor. It is therefore possible to split a sum of carried interest into two separate payments, with one being the foreign chargeable gain. If these two funds are never comingled, a mixed fund will not come into existence.

This does not alter the application of the mixed funds rules to the extent that each of the two carried interest gains may represent a mixed fund of different items determined on general principles. It only applies to the joint effect of TCGA92/S103KA and TCGA92/S103KC with the result that the gains those sections give rise to will not constitute elements of a single mixed fund unless they are actually paid into a single account, thus making that account a mixed fund.

This analysis derives from the terms of TCGA92/S103KC. HMRC do not consider it justifiable in respect of any other situation or potential mixed fund.

## 69.20 Non-residents

Non-residents are not in general subject to CGT, and this rule applies to carried interest. This is deliberate.<sup>38</sup>

## 69.21 Other anti-avoidance rules

The usual CGT anti-avoidance rules are not needed because of the rules as to who receives carried interest.<sup>39</sup> This was overlooked at the time of the introduction of the carried interest rules, and so the following provisions were inserted with retrospective effect in 2017.

### 69.21.1 *Carried interest outside s.3*

Section 13(1A) TCGA formerly provided:

*But this section does not apply if the gain is ...*

*(c) a chargeable gain treated as accruing under section 103KA(2) or (3) (carried interest gains).*

This took carried-interest gains outside s.13 TCGA, now s.3 TCGA. Where is the equivalent in the 2019 CGT rewrite?

---

<sup>38</sup> 2015 carried-interest guidance para 41.

<sup>39</sup> See 69.14.3 (Who receives carried interest).

### 69.21.2 *Carried interest outside s.86*

Section 86(4B) TCGA provides:

Where (apart from this subsection) the amount mentioned in subsection (1)(e) would include an amount of chargeable gains treated as accruing under section 103KA(2) or (3) (carried interest gains), the amount of the gains is to be disregarded for the purposes of subsection (1)(e).

This takes carried-interest gains outside s.86 TCGA.

### 69.21.3 *Carried interest outside s.87*

Section 87(5B) TCGA provides:

Where (apart from this subsection) the amount mentioned in subsection (4)(a) would include an amount of chargeable gains treated as accruing under section 103KA(2) or (3) (carried interest gains), the amount of the gains is to be disregarded for the purposes of determining the section 1(3) amount.

In short, carried-interest gains are not s.1(3) amounts (trust gains) and so are outside s.87 TCGA.

## 69.22 **Carried-interest TAAR**

Section 103KD TCGA provides:

In determining whether section 103KA [carried-interest charges] applies in relation to an individual, no regard is to be had to any arrangements the main purpose, or one of the main purposes, of which is to secure that that section does not to any extent apply in relation to-

- (a) the individual, or
- (b) the individual and one or more other individuals.

In my terminology, this is an effect-style TAAR.<sup>40</sup>

## 69.23 **Carried interest double taxation**

### 69.23.1 *Conditions for relief*

Section 103KE TCGA provides:

---

<sup>40</sup> See 2.10 (TAAR/unallowable purpose test).

- (1) This section applies where-
  - (a) capital gains tax is charged on an individual by virtue of section 103KA in respect of any carried interest, and
  - (b) Condition A or Condition B is met.
- (2) Condition A is that-
  - (a) at any time, tax (whether income tax or another tax) charged on the individual in relation to the carried interest has been paid by the individual (and has not been repaid), and
  - (b) the amount on which tax is charged as specified in subsection (1)(a) is not a permissible deduction under section 103KA(6)(b) or (c).<sup>41</sup>
- (3) Condition B is that at any time tax (whether income tax or another tax) charged on another person in relation to the carried interest has been paid by that other person (and has not been repaid).

It will almost always be the case that one or other of these conditions is satisfied.

The IF Manual provides:

**IFM37240: Charging provisions: Interaction with other taxes** [Oct 2020]

**Interaction with other UK taxes**

A charge under TCGA92/S103KA does not displace any charge to tax other than CGT that arises by reference to the carried interest. If carried interest represents an amount of income, for example dividends or interest, the fund manager will have two liabilities to tax. Firstly, a liability to income tax on the amount determined in accordance with the appropriate rules (e.g. dividend treatment). Secondly, a chargeable gain calculated in accordance with TCGA92/S103KA(2) or (3) as appropriate. Relief may be claimed for that other tax against the CGT charged under the carried interest rules (IFM37400). This is only applicable to taxes charged under the UK Taxes Acts.

**IFM37420: Prevention of double taxation: Double taxation adjustment** [Oct 2020]

**Double taxation adjustment**

**TCGA92/S103KE(6)-(8)**

The value of adjustments made will not exceed the lesser of:

---

41 Para (2)(b) applies where the carried interest is earnings or employment-related security income: see 69.15 (“Permitted deductions”).

The capital gains tax charge in respect of the carried interest under the new legislation; and

The other tax paid.

Note that, when considering an adjustment, the other tax must have been paid.

Subject to the next paragraph, an adjustment will not be made if the sum may become chargeable to another tax or if the other tax has only been charged and not paid. Where the other tax has been paid, the individual should file their tax return for the year in which the carried interest arises and claim under these rules for an adjustment to be made in that tax return. If another tax is paid after the capital gain tax (CGT) has been paid, the individual will be able to make a claim to avoid double taxation by amending their tax return or by other means in line with normal rules and time limits rather than relying on TCGA/103KE(7).

Where a sum of carried interest is charged to both CGT under these rules and also income tax in the same year (for example, where the sum represents interest or dividend income), resulting in two charges in respect of the carried interest, a claim can be made in the appropriate tax return so that the appropriate liability is paid and double taxation does not arise. HMRC will treat the income tax as paid by the payment made with the tax return for the year in question. Paying both the income tax due and capital gains tax due at the same time will not be required to request repayment.

Each component of the carried interest arising should be considered separately when determining relief due under TCGA92/S103KE. When a sum comprises a series of items, double taxation relief will be given on an item by item basis and not on a sum as whole. It will therefore only be possible to set the other tax due on a particular component of the sum arising against the CGT due on that component, rather than the CGT due on the sum as a whole. This is considered to be a just and reasonable approach, in accordance with TCGA92/S103KE(5).

#### **Example 1**

A sum comprises Item X, Item Y and Item Z. These will be dealt with as three individual items and not as one whole item. This would mean any other tax paid on Item X can only be set against the CGT due on Item X and not on the combined sum of CGT due on Item X, Item Y and Item Z.

#### **Example 2**

A sum of carried interest totals £2,000 and comprises debt principal of

£1,000 and £1,000 of interest on that debt. Relief under TCGA92/S103KE would be given as follows:

The £1,000 of principal is “carried interest” and is charged to CGT at 28% under the carried interest rules amounting to £280.

The £1,000 of interest is also “carried interest” and so charged to CGT at 28% amounting to £280. Income tax charged at 45% will need to be paid and this amounts to £450.

Relief under TCGA92/S103KE allows full relief against the £280 of CGT due on the interest; the income tax payable of £450 effectively discharges the CGT liability due.

The income tax payable cannot also be set off against the CGT due on the principal. Income tax arises only in respect of the interest and not against the CGT of any other item within the £2,000 (£1,000 principal plus £1,000 interest) carried interest sum.

The net tax charge will therefore be £730:

CGT paid on principal:	£ 280
CGT paid on interest:	£ 280
Income tax paid on interest:	£ 450
Total tax paid:	£1,010
Double taxation relief:	£ (280)
Net tax payable:	£ 730

69.23.2 Foreign tax

DIMF draft guidance provides:

72. Please note that in contrast to the DMF Rules, section 103KE adjusts the CGT charge under section 103KA to eliminate double taxation (the DMF Rules preserve the charge under section 809EZA by contrast and adjust the “other tax”). As “tax” is not defined for the purposes of the TCGA, it is therefore possible for HMRC to make an adjustment to the charge under section 103KA in respect of non-UK tax to avoid double taxation. To give a very simple example, a US citizen fund manager will be chargeable to US tax on their worldwide income. That fund manager is resident in the UK for tax purposes however and receives carried interest through a partnership structure which is charged to tax under section 103KA(2). For US tax purposes however, the entities in that structure have made “check the box” elections such that it is treated as transparent for US tax purposes. The fund manager is therefore treated as receiving underlying dividend income for US tax purposes and this is charged to US Federal Income tax at a rate in

excess of 28%. Here HMRC would accept that the US tax is suffered “in relation to” the carried interest and given the drafting of section 103KE, would be able to adjust down the UK charge under section 103KA to avoid tax. Please note that in situations where the UK has a primary taxing right over the carried interest (as would be likely on the above example) it will only be just and reasonable to grant relief where it is not possible to obtain a tax credit in the other relevant jurisdiction. Section 103KE only operates as a credit of the “last resort” in these cases.

73. If tax has been paid on amounts which are then treated as permitted deductions in computing the chargeable gain then no relief is available against CGT in respect of that tax under this provision.

74. The value of the adjustments made will not exceed the lesser of: a. the capitals gains tax charge in respect of the carried interest under the new legislation; and b. the other tax paid.

### 69.23.3 “Paid”

DIMF draft guidance provides:

75. The other tax in respect of which an adjustment is sought must have been paid by the individual. It is not sufficient that the sum is charged or may be chargeable to another tax. Often, this other tax will have been paid by the time the individual files his or her tax return for the year in which the carried interest arises: a claim under these rules for an adjustment should then be made in that tax return. Please note that, where a sum of carried interest is charged to capital gains tax under this measure but is also charged to income tax in the same tax year (for example, where the sums represent interest or dividend income to the underlying partnership), such that there are two charges in respect of that carried interest, a claim can be made in the appropriate tax return without the need to discharge both tax liabilities. HMRC will treat the income tax as having been “paid” by the payment made alongside the tax return for the year in question. It would not be necessary to pay both the income tax due and capital gains tax charged under this measure at the same time before requesting a repayment.

76. Where, however, another tax is paid after the CGT charged under the new rules has been paid, the individual will be able to make a claim to avoid double taxation through an amendment to their tax return (where possible) or by other means in accordance with the normal rules and time limits.

77. As explained above in paragraph 46, this legislation establishes a

minimum level of tax on carried interest rather than a new regime which disregards the underlying receipts to the fund partnership. This means each component of the sum arising is looked at separately when determining what relief should be given under section 103KE. Where a sum comprises a series of items, double taxation relief will be given on an item by item basis (i.e. it will only be possible to set the other tax due on a particularly component of the sum arising against the CGT due on that component, rather than the CGT due on the sum as a whole). This is the only approach which will be considered “just and reasonable” in accordance with section 103KE(3) by HMRC.

78. Using the same figures as the example in paragraph 47, section 103KE would work as follows.

- The £1000 of principal is “carried interest” and so is charged to capital gains tax at 28% under this measure ( £280).
- The £000 of interest is also “carried interest” and so charged to capital gains tax at 28% (£80). Income tax at 45% (£50) must still be paid.

Section 103KE will allow full relief against the £80 of CGT technically due on the interest income under these rules. The income tax payable on the interest would effectively discharge CGT liability on the same sum. However, the income tax due on the interest income cannot also be set off against the capital gains tax due on the principal. The income tax arises in relation to the interest and so can only be relieved against the capital gains tax due on that interest, and not against the CGT due on any other item which is represented in the sum of carried interest.

#### 69.23.4 *Double taxation adjustment*

Assuming these conditions are satisfied, we move on to the relief. Section 103KE TCGA provides:

(4) In order to avoid a double charge to tax, the individual may make a claim for one or more consequential adjustments to be made in respect of the capital gains tax charged as mentioned in subsection (1)(a).

(5) On a claim under this section an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.

(6) The value of any consequential adjustments made must not exceed the lesser of-

- (a) the capital gains tax charged as mentioned in subsection (1)(a),

and

- (b) the tax charged as mentioned in subsection (2)(a) or (3).

This seems an unnecessarily complicated way to express the cap on the relief, but there it is.

- (7) Consequential adjustments may be made-
  - (a) in respect of any period,
  - (b) by way of an assessment, the modification of an assessment, the amendment of a claim, or otherwise, and
  - (c) despite any time limit imposed by or under an enactment.

This is the equivalent of the DIMF rule: see 69.13 (DIMF double taxation).

#### 69.23.5 *Claim to disregard losses*

Section 103KE(8) TCGA provides:

Where-

- (a) an individual makes a claim under this section in respect of a year of assessment, and
- (b) apart from this subsection, an amount falls to be deducted under section 1(3)(b) [carried-forward losses<sup>42</sup>] from the total amount of chargeable gains accruing to the individual in that year, the individual may elect that the amount to be so deducted be reduced by any amount not exceeding the amount on which tax is charged as specified in subsection (2)(a) or (3).

This may be relevant where an individual receives a sum which is both income and carried-interest gain. Setting carried-forward capital losses against the carried-interest gain would be wasteful, because the gain qualifies for double taxation adjustment relief.

#### 69.24 External investors

Section 103KF TCGA provides:

- (1) If-
  - (a) a chargeable gain accrues to an external investor<sup>43</sup> in an

---

<sup>42</sup> See 61.2 (Deduction of losses).

<sup>43</sup> See 69.6.2 (“External investor”).

investment scheme on the disposal of one or more partnership assets, and

(b) the external investor makes a claim for relief under this section, then subsection (2) applies in relation to the disposal.

(2) The amount of the chargeable gain is to be reduced by an amount equal to-

I – C

where-

(a) I is an amount equal to such part of the sum invested in the fund by the external investor which on a just and reasonable basis is referable to the asset or assets disposed of, and

(b) C is the amount deducted under section 38(1)(a) in respect of consideration given wholly and exclusively for the acquisition of the asset or assets.

This sets aside the base cost shift in favour of the external investors.

## **69.25 Deferred carried interest**

Section 103KG(2) TCGA provides:

But section 809EZDB of ITA 2007 (sums arising to connected company or unconnected person) does not apply in relation to a sum of carried interest arising to-

(a) a company connected with A, or

(b) a person not connected with A,

where the sum is deferred carried interest in relation to A.

Section 103KG(3) TCGA provides:

In this section, “deferred carried interest”, in relation to A-

(a) means a sum of carried interest where the provision of the sum to A or a person connected with A is deferred (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise), and

(b) includes A’s share (as determined on a just and reasonable basis) of any carried interest the provision of which to A and one or more other persons, taken together, has been deferred (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise).

In this subsection, in a case where the sum referred to in subsection (2) arises to a company connected with A, the reference to a person

connected with A does not include that company.

## **69.26 Interest ceases to be deferred**

Section 103KG TCGA provides:

(4) Where-

- (a) section 809EZDB of ITA 2007 has been disapplied in relation to a sum of deferred carried interest by virtue of subsection (2),
- (b) the sum ceases to be deferred carried interest in relation to A, and
- (c) the sum does not in any event arise to A apart from this subsection,

the sum is to be regarded as arising to A at the time it ceases to be deferred carried interest.

(5) But subsection (4) does not apply if-

- (a) none of the enjoyment conditions is met in relation to the sum when it ceases to be deferred carried interest, and
- (b) there is no reasonable likelihood that any of those conditions will ever be met in relation to the sum.

### **69.26.1 “Enjoyment conditions”**

Section 103KG TCGA duplicates the definition in the DIMF legislation; see 69.11.1 (“Enjoyment conditions”).

(6) The enjoyment conditions are-

- (a) the sum, or part of the sum, is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of A or a person connected with A;
- (b) the sum’s ceasing to be deferred carried interest in relation to A operates to increase the value to A or a person connected with A of any assets which-
  - (i) A or the connected person holds, or
  - (ii) are held for the benefit of A or the connected person;
- (c) A or a person connected with A receives or is entitled to receive at any time any benefit provided or to be provided out of the sum or part of the sum;
- (d) A or a person connected with A may become entitled to the beneficial enjoyment of the sum or part of the sum if one or more powers are exercised or successively exercised (and for these purposes it does not matter who may exercise the powers

or whether they are exercisable with or without the consent of another person);

- (e) A or a person connected with A is able in any manner to control directly or indirectly the application of the sum or part of the sum.

In this subsection, in a case where the sum referred to in subsection (2) arises to a company connected with A, references to a person connected with A do not include that company.

(7) In determining whether any of the enjoyment conditions is met in relation to a sum or part of a sum-

- (a) regard must be had to the substantial result and effect of all the relevant circumstances, and
- (b) all benefits which may at any time accrue to a person as a result of the sum ceasing to be deferred carried interest in relation to A must be taken into account, irrespective of-
  - (i) the nature or form of the benefits, or
  - (ii) whether the person has legal or equitable rights in respect of the benefits.

DIMF draft guidance provides:

44. ... the deferred carried interest rules also modify the application of the enjoyment conditions in the context of corporate structures. The relevant provisions at section 103KG(8)-(11) mirror subsections 809EZDB(6)-(9), ITA 2007 here.

Section 103KG TCGA provides:

(8) The enjoyment condition in subsection (6)(b), (c) or (d) is to be treated as not met if it would be met only by reason of A holding shares or an interest in shares in a company.

(9) The enjoyment condition in subsection (6)(a) or (e) is to be treated as not met if the sum referred to in subsection (2) arises to a company connected with A and-

- (a) the company is liable to pay corporation tax in respect of its profits and the sum is included in the computation of those profits, or
- (b) paragraph (a) does not apply but-
  - (i) the company is a CFC and the exemption in Chapter 14 of Part 9A of TIOPA 2010 applies for the accounting period in which the sum arises, or
  - (ii) the company is not a CFC but, if it were, that exemption

would apply for that period.

In this subsection “CFC” has the same meaning as in Part 9A of TIOPA 2010.

(10) But subsections (8) and (9) do not apply if the sum referred to in subsection (2) arises to the company referred to in subsection (2)(a) or the person referred to in subsection (2)(b) as part of arrangements where-

- (a) it is reasonable to assume that in the absence of the [investment-services] arrangements the sum or part of the sum would have arisen to A or an individual connected with A, and
- (b) it is reasonable to assume that the [investment-services] arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, inheritance tax or corporation tax.

(11) The condition in subsection (10)(b) is to be regarded as met in a case where the sum is applied directly or indirectly as an investment in a collective investment scheme.

(12) Subsection (2) does not apply in relation to any sum in relation to which the condition in subsection (8)(b) of section 809EZDB is met by virtue of subsection (9) of that section.

(13) Subsection (2) also does not apply if-

- (a) it is reasonable to assume that the deferral referred to in subsection (3)(a) or (b) is not the effect of genuine commercial arrangements, or
- (b) that deferral is the effect of such arrangements but it is reasonable to assume that the [investment-services] arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, corporation tax or inheritance tax.

(14) In subsection (13), “genuine commercial arrangements” means arrangements involving A (alone or jointly with others performing investment management services) and external investors in the investment scheme.

## **69.27 Income-based carried interest**

The term “income-based” carried interest (“ICBI”) is used in:

- (1) Temporary non-resident rules
- (2) The definition of “management fee”

Section 809EZB(1) ITA provides (so far as relevant)

... “management fee” means any sum (including a sum in the form of a loan or advance or an allocation of profits) except so far as the sum constitutes ...

c) carried interest which is not income-based carried interest.

The definition is in Chapter 5F Section 809FZA - 809FZY ITA, ie spread over 25 sections of ITA. So it cannot be covered here. Section 809FZA ITA provides an outline:

(1) This Chapter [Chapter 5F] determines when carried interest arising to an individual from an investment scheme is “income-based carried interest” for the purposes of Chapter 5E (and, in particular, section 809EZB(1)(c)).

(2) Section 809FZB contains the general rule, under which the extent to which carried interest is income-based carried interest depends on the average holding period of the investment scheme.

(3) Sections 809FZC to 809FZP contain further provision relating to average holding periods.

(4) Sections 809FZQ and 809FZR contain a particular rule for direct lending funds.

(5) Sections 809FZS and 809FZT contain an exception to the general rule for carried interest which is conditionally exempt from income tax.

(6) Sections 809FZU to 809FZZ contain supplementary and interpretative provision.

(7) Nothing in this Chapter [Chapter 5F] affects the liability to any tax of-

- (a) the investment scheme, or
- (b) external investors in the investment scheme.

Section 809FZB ITA provides:

(1) “Income-based carried interest” is the relevant proportion of a sum of carried interest arising to an individual from an investment scheme.

(2) The relevant proportion is determined by reference to the investment scheme’s average holding period as follows.

<b>Average holding period</b>	<b>Relevant proportion</b>
Less than 36 months	100%
At least 36 months but less than 37 months	80%
At least 37 months but less than 38 months	60%
At least 38 months but less than 39 months	40%
At least 39 months but less than 40 months	20%

40 months or more

0%

(3) This section is subject to the following provisions of this Chapter.

We leave the reader to journey on, unaccompanied, to the end of the definition.

## **69.28 ICBI: Returning non-resident**

Section 809EZA(2A) ITA provides:

Subsection (2B) applies instead of subsections (1)<sup>44</sup> and (2)<sup>45</sup> where-

- (a) one or more disguised fees arise to an individual in a tax year (“the relevant tax year”) from one or more investment schemes (whether or not by virtue of the same arrangements),
- (b) the disguised fees consist of carried interest which is income-based carried interest,
- (c) the individual is UK resident in the relevant tax year,
- (d) before the relevant tax year, the individual was not UK resident for a period of at least five consecutive tax years (“the period of non-residence”), and
- (e) either-
  - (i) the relevant tax year is the first tax year immediately after the end of the period of non-residence, or
  - (ii) the relevant tax year is the second, third, or fourth tax year after the end of that period and the individual has been UK resident in all the intervening tax years.

If these conditions are met, we move on.

Section 809EZA(2A) ITA provides:

To the extent that the income-based carried interest arises by virtue of pre-arrival services, the individual is liable for income tax for the relevant tax year in respect of it as if-

The rules are in para (a) and (b): it is convenient to read them side by side:

---

44 See 69.7 (DMIF: Deemed trade).

45 See 69.8 (Territorial limitation).

(a) in relation to pre-arrival services <sup>46</sup> performed in the UK-	(b) in relation to pre-arrival services performed outside the UK-
(i) the individual were carrying on a trade for the relevant year consisting of the performance of those services,	[identical]
(ii) the income-based carried interest, so far as arising by virtue of those services, were profits of that trade, and	[identical]
(iii) the individual were the person receiving or entitled to those profits,	[identical]

Thus there are two deemed trades. I think the point is that the profits of the second may qualify for the remittance basis. But this relief does not apply if the individual is away for less than 5 years.

### 69.29 Returns and compliance

IFM provides

**IFM36800: Returning sums chargeable under the disguised investment management fees (DIMF) rules: Returning sums chargeable under the disguised investment management fees (DIMF) rules** [Oct 2020 ]

**Reporting period**

Sums that arise and are subject to the disguised investment management fees (DIMF) rules should be reported in reference to the tax year. Calendar year reporting is not acceptable unless the disguised fee arises from a profit allocation from a partnership. In these circumstances, this can be returned on the same basis period as that partnership see (IFM36160).

If a sum has been reviewed and DIMF is not believed to be applicable

---

46 Section 809EZA(2C) ITA provides: “In subsection (2B) "pre-arrival services" means investment management services performed before the end of the period of non-residence.”

then a note should be included within the white space section that adequately explains why DIMF is not applicable in this case.

For example, if accounts for a partnership are drawn up to the 31 December 2016, and it has been agreed that the profits shown in those accounts are taxed as profits of 2016/17, then the same basis can be applied to the deemed trade.

### **How to return sums chargeable under these provisions**

Sums that arise and are subject to the DIMF rules should be entered on a separate Self-Employment page and returned within the Self-Assessment return.

On the return, the following fields should be completed, with the individual entering:

“Description of business” field: “sums arising under Chapter 5E of Part 13 ITA 2007”.

“Net profit or loss” field: The net profits under the DIMF rules.

“Total taxable profits or net business loss” field: The net profits under the DIMF rules.

“White space”: Details of each sum of the fund in relation to the individual and structure from which the sum arises should be noted in the computations or as a ‘white space’ disclosure.

In most cases HMRC expect that the sum will arise from a fund limited partnership potentially via a General Partner Limited Partner (GP-LP) or similar. The exact wording of the necessary disclosure will depend on the structure and the number of entities through which the sum has passed.

Where disguised fees arise from more than one fund or partnership then an analysis should be provided showing the sums arising from each.

### **Example of a return of DIMF profits**

Greg is a partner in CD LLP, Greg pays income tax and class 4 NICs on his share of CD LLP’s profits. In addition £20,516 is treated as a disguised fee under the DIMF legislation.

Greg will need to report the fees as a separate trade on his tax return. He would enter the following on a separate Self-Employment page within his Self-Assessment:

Description of business field: sums arising under Chapter 5E of Part 13 ITA2007.

Net profit or loss field: £20,516.

Total taxable profits or net business loss field: £20,516.

White space: Disguised investment management fee arising from X Capital Fund LP via X Capital Fund GP LP.

CHAPTER SEVENTY

**IHT TERMS & CONCEPTS**

70.1

**70.1 IHT terminology**

IHT has a technical vocabulary. It is impossible to discuss IHT without using these terms, so it is necessary to consider them first.

This chapter considers:

<b>Term</b>	<b>See para</b>
<i>General IHT terminology</i>	
Estate	70.2
Transfer of value	70.3
Value transferred	70.3
Disposition	70.4
Chargeable/exempt transfer	70.6
Associated operation	70.10
<i>IHT trust terminology</i>	
Qualifying interest in possession (IIP)	70.7
Relevant property	70.8

This chapter considers only the definitions of these terms, except for associated operations, where there is also a discussion of how and where the expression is used.

The following terms are considered elsewhere:

<b>Term</b>	<b>See para</b>
Excluded property	71.1
“Settlement” (for IHT purposes)	?

**70.2 Estate**

The word “estate” matters for the definition of “transfer of value”.

Section 272 IHTA provides:

In this Act, except where the context otherwise requires ... “estate” shall be construed in accordance with sections 5, 55 and 151(4) above.

The basic definition is in s.5 IHTA:

(1) For the purposes of this Act a person’s estate is the aggregate of all the property to which he is beneficially entitled, except that ...

There follows a set of four exceptions, of which the most important is:

(b) the estate of a person immediately before his death does not include excluded property...

“Estate” in IHT is a technical term. But the term is only used in discrete contexts (eg bankrupt’s estate, deceased’s estate) and in each case with a well understood meaning. In practice no confusion arises.

### **70.3 Transfer of value/value transferred**

Section 1 IHTA provides:

Capital transfer tax shall be charged on the value transferred by a chargeable transfer.

The terms transfer of value/value transferred matter because:

- (1) The charge is on the value transferred; and
- (2) A transfer of value is required for a chargeable transfer

Section 3(1) IHTA provides (so far as relevant):

- [a] ... a transfer of value is
  - [i] a disposition<sup>1</sup> made by a person (the transferor)
  - [ii] as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; and
- [b] the amount by which it [the estate] is less is the value transferred by the transfer.

The estate of a person does include excluded property except for the moment immediately before death. So if a person uses chargeable (non-excluded property) to purchase excluded property, for full value, the value of the estate is not reduced, and there is no transfer of value.

---

<sup>1</sup> See 70.4 (Disposition).

70.3.1 *Transfer of value: Extended definitions*

When the drafter wishes to impose a charge to IHT on an event which is not a transfer of value, as defined, two techniques may be used:

- (1) a deemed transfer of value
- (2) a freestanding charge to IHT

Section 3(4) IHTA extends the meaning of “transfer of value” to include case 1, deemed transfers of value:

- [a] Except as otherwise provided, references in this Act to a transfer of value made, or made by any person, include references to events on the happening of which tax is chargeable as if a transfer of value had been made, or, as the case may be, had been made by that person;
- [b] and “transferor” shall be construed accordingly.

Occasionally, the meaning is further extended to include cases 1 and 2 (deemed transfers and other occasions of charge):

**s.221(6) IHTA: Notice of determination**      **s.239 IHTA: Certificate of discharge**

References in this section to transfers of value or to the values transferred by them shall be construed as including references to—

- (a) chargeable events by reference to which tax is chargeable under section 32 or 32A of this Act,
  - (b) occasions on which tax is chargeable under Chapter III of Part III of this Act,
  - (c) disposals on which tax is chargeable under section 126 of this Act,
- or to the amounts on which tax is then chargeable.

References in this section to a transfer of value, or to the value transferred by a transfer of value, shall be construed as including references to

an occasion on which tax is chargeable under Chapter III of Part III of this Act (apart from section 79)

or to the amount on which tax is then chargeable.

That is a little clumsy, perhaps, but it works.

**70.4 Disposition**

“Disposition” matters in particular because a disposition is a requirement of:

**Concept**                      **See para**

Transfer of value 70.3  
Exit charge 72.8.2

In *Newlon Housing Trust v Alsulaimen*:

“Disposition” is a familiar enough word in the law of property and ordinarily means an act by which someone ceases to be the owner of that property in law or in equity... In some contexts it may include the case in which the property ceases to exist... I feel sure that “disposition” was intended to include the surrender of a subsisting proprietary interest, such as a tenancy for years or for life, so as to merge in the reversion or remainder... But, be that all as it may, I think it is essential to the notion of a disposition of property in this context that there is property of which the disponent disposes, whether to someone else or not.<sup>2</sup>

The IHT Manual provides:

**IHTM04023: what is a disposition?** [Sep 2018]

The word disposition has its wide natural meaning and we regard it as

- including all forms of disposals and transfers of cash and other property, and
- including both the creation and the release or other extinguishment of any debt or other right enforceable against a person or his estate...

A disposition is deemed to occur in the following cases:

<b>Topic</b>	<b>See para</b>
Omission to exercise right	70.5
Alteration of close company share/loan capital	77.6
Payment more than 1 year after transfer at undervalue	s.262 IHTA

## 70.5 Omission: Deemed disposition

An omission is not a disposition, in the normal sense of the word, and so would not be a transfer of value. Section 3(3) IHTA provides a limited exception to this rule:

Where

[A] the value of a person’s estate is diminished, and

[B] the value—

- (a) of another person’s estate, or
- (b) of any settled property, other than settled property treated by

---

<sup>2</sup> [1999] 1 AC 313 at p.317. I omit the references cited.

- section 49(1) below as property to which a person is beneficially entitled,<sup>3</sup>
- is increased
- [C] by the first-mentioned person's omission to exercise a right,
- [D] he shall be treated for the purposes of this section as
- [i] having made a disposition
- [ii] at the time (or latest time) when he could have exercised the right,
- [E] unless it is shown<sup>4</sup> that the omission was not deliberate.

This rule only applies for the purposes of s.3, but it is repeated or incorporated in a few other places.<sup>5</sup>

I use the following terminology:

<b>Term</b>	<b>Meaning</b>
Diminution condition	Condition in s.3(3)[A]
Increased estate condition	Condition in s.3(3)[B]
Causation condition	Condition in s.3(3)[C]
Omittor	Person who omits to exercise right
Third party's estate	Other person or trust whose value is increased

An omission may also be an associated operation.<sup>6</sup>

Several s.3(3) issues were discussed in *Fryer v HMRC*,<sup>7</sup> where the deceased omitted to take her pension rights at retirement date, when she was terminally ill. The decision was that all the s.3(3) conditions were met, so the omission was treated as a disposition and was a chargeable transfer.

### 70.5.1 *Diminution condition*

The requirement is:

3 In the discussion below, for the sake of brevity, cases within (a) or (b) might both be referred to as "increases in a person's estate".

4 The onus of proof is on the taxpayer. That is self-evident, though if authority is needed, see *Fryer v HMRC* [2010] UKFTT 87 (TC) at [37]; see too [App 2.21.4](#) ("It is shown that").

5 See 72.8.2 (Reducing value of trust property): exit charge; 70.12 (Arm's length transaction).

6 See 70.10.1 ("Operation").

7 [2010] UKFTT 87 (TC). See 81.12.3 (Omission to exercise rights).

the value of a person's estate [the omittor's estate] is diminished

In *Fryer v HMRC*:<sup>8</sup>

Is it correct to describe a person's estate as being "diminished" by the omission to exercise a right where the result of the omission is that value which might potentially have been added to the estate is not, after all, so added? Mrs Arnold's estate included the right to opt for retirement benefits under the pension plan. It did not include the benefits themselves.

My conclusion is that the "loss" of a potential addition of value to the estate does not, as such, diminish it. However, that is not a complete answer to the "diminution" argument. Mrs Arnold had a valuable right; by not exercising it, she allowed the whole of its value to disappear from her estate. Her estate was therefore diminished by her omission to exercise that right, and therefore that condition for the application of s 3(3) IHTA 1984 is fulfilled.

If the pension scheme has the form of a trust, it is suggested that the right should be disregarded as a settlement power. The point did not arise in *Fryer* where the pension scheme took the form of a contract with a Life Office.

### 70.5.2 *Increased estate condition*

The requirement is:

- [B] the value—
- (a) of another person's estate, or
  - (b) of any settled property, other than settled property treated by section 49(1) below as property to which a person is beneficially entitled,<sup>9</sup>
- is increased

In *Fryer v HMRC*:

The next question is whether the value of settled property in which no interest in possession subsisted was increased by Mrs Arnold's omission to exercise her rights under clause 4.1. The trust which she had declared on 5 August 1995 was a discretionary trust so did amount to settled

---

<sup>8</sup> at [41], [42].

<sup>9</sup> In the discussion below, for the sake of brevity, cases within (a) or (b) might both be referred to as "increases in a person's estate".

property within that description. Clause 4.2 of the Scheme Rules provided that if the policyholder died before the “pension date” [which is what happened], NPI would pay to the trustees the death benefits specified in the Schedule. If instead of taking no action Mrs Arnold had exercised her right to take the pension benefits, the whole of the contract value would have been used to provide pension benefits... and the trust would have received nothing.

It follows that Mrs Arnold’s omission to exercise the rights did increase the value of the settled property, as the omission resulted in the death benefits payable under the policy being paid to the trustees.

That must be right.

The increase condition may be satisfied after the diminution condition. In *HMRC v Parry*:<sup>10</sup>

There is a correlation of substance between the reduction and the increase, in that one results from the other, but they need not occur at precisely the same time.

In *HMRC v Parry*:<sup>11</sup>

section 3(3) requires only that “another person’s estate” is increased. It is not concerned with the identity of the other person. The benefits that were generated by Mrs Staveley’s omission to draw her lifetime pension were undoubtedly going to increase “another person’s estate”, even if the scheme administrator had not exercised its discretion in favour of the sons, but instead chosen others from the list within the scheme rules. To my mind, this adds weight to an interpretation of the subsection which results in the omission in this case being deemed to be a disposition, and it deals also with the practical problem which the appellants suggested arose. The persons liable for tax might not have been identifiable, but it would have been clear from the date of Mrs Staveley’s death that a charge to tax would arise by virtue of the omission.

I find it difficult to see the point of the diminution requirement. A charge should arise if the omission reduces the value of the omittor’s estate, whether or not the estate of another is increased. That would be consistent with the basic rule that a transfer of value is disposition which reduces a

---

10 [2020] UKSC 35 at [92].

11 at [95].

person's estate, whether or not the estate of another is increased. But at present the IHT charge on omissions is slightly narrower than the IHT charge on dispositions. Though normally, if one estate is reduced, another will be increased, so the issue will not often arise.

### 70.5.3 *Causation condition*

The word "by" in s.3(3)[C] brings in a causation requirement: the decrease in the value of the omittor's estate, and the increase in the value of some other person's estate, must both be *by reason of* the omission.

This issue arose in *HMRC v Parry*<sup>12</sup> where:

- (1) T (deliberately) omitted to claim a pension benefit.
- (2) The pension scheme administrators later conferred benefits on T's children.

The children's estates were increased. T argued that this was not by reason of T's omission to claim the pension benefit. It was by reason of the scheme administrators' decision! That was clearly<sup>13</sup> wrong:

... the omission yielded the death benefits that, in fact, increased the sons' estates and I do not see the limited discretion of the scheme administrator as breaking the chain connecting the two events. ... Putting it another way, the omission was the operative cause of the increase. ... it may be that the increase in the sons' estates could also be said to be brought about "by" the exercise of the administrator's discretion, but that does not preclude a finding that they were increased "by" the omission.<sup>14</sup>

Quite so.

### 70.5.4 *Time of deemed disposition*

The time of the deemed disposition is "the time (or latest time) when he could have exercised the right".

In *Fryer v HMRC* the latest time the right could be exercised was the

12 [2020] UKSC 35. For another aspect of this case, see 70.12.1 (Operation confers benefit).

13 I would have said untenable, but the argument actually succeeded in the Upper Tribunal. It might have helped if HMRC had cited the principle that a trust appointment merely fills in blanks left by the settlor; see App.4.7.5 (Trust appointment: Filling blanks). But I think the point is self-evident.

14 [2020] UKSC 35 at [94].

moment before the death of the taxpayer, 30 July 2003

In *Fryer v HMRC*:

The fact that [the increase in the trust's value] occurred after her death does not prevent this condition in s.3(3) IHTA 1984 from being fulfilled, as there is no reference in the sub-section to the time at which the value of the settled property is increased.

But the increase did *not* occur after the death. Immediately from the moment of death, the trust had the valuable right to the pension payment; the fact that it was actually paid later did not matter.

*Fryer* suggests that if the increase condition is met at a later time, the deemed disposition is retrospectively regarded as taking place at the time specified. What if the transferor has died? How long do the executors remain at risk of a back-dated tax charge? Perhaps there could be a charge even before any estate is increased, on the basis that it is bound to happen sooner or later.

## 70.6 Chargeable/exempt transfer

Section 2(1) IHTA defines chargeable transfer. So far as relevant, this provides:

A chargeable transfer is

[a] a transfer of value

[b] which is made by an individual

[c] but is not (by virtue of Part II of this Act or any other enactment) an exempt transfer.

## 70.7 Qualifying interest in possession

The term “interest in possession” (IIP) is not defined (except in Scotland).<sup>15</sup> It has its trust law meaning. A full discussion of the expression requires a chapter to itself. I omit that here as I have considered it elsewhere.<sup>16</sup>

Qualifying IIP is defined in s.59(1) IHTA:

In this Chapter [Chapter 3 Part 3 IHTA] “qualifying interest in possession” means—

---

<sup>15</sup> See 86.6.1 (IIP in Garland trust).

<sup>16</sup> See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), Chapter 16 (Provisions Inconsistent with IP and Privileged Trusts).

- (a) an interest in possession—
  - (i) to which an individual is beneficially entitled, and
  - (ii) which, if the individual became beneficially entitled to the interest in possession on or after 22nd March 2006, is
    - [A] an immediate post-death interest,
    - [B] a disabled person’s interest or
    - [C] a transitional serial interest, or
- (b) an interest in possession to which, where subsection (2) below applies, a company is beneficially entitled.<sup>17</sup>

Qualifying IIP is an opaque term; for clarity I gloss it as “qualifying (estate) IIP, or just estate IIP, as the key feature of a qualifying IIP is that the individual entitled to the IIP is treated as entitled to the trust property, ie the trust property is treated as being in the individual’s estate.

Although the definition is expressed to apply only for Chapter 3 Part 3 IHTA, it is incorporated by reference elsewhere, so it applies throughout the IHT legislation. On other occasions the wording of (i)(ii) is set out in full, rather than using the definition, which is somewhat clumsy drafting, but it works.

## 70.8 Relevant property

“Relevant property” is a key term for the Inheritance Taxation of trusts, because 10 year charges and exit charges are (in short) charges on “relevant property”.

Section 58(1) IHTA provides:

In this Chapter [Chapter 3 Part 3 IHTA] “relevant property” means settled property in which no qualifying interest in possession subsists, other than ...

When the drafter wishes to exempt specified property from these charges, they direct that it is not relevant property. So “relevant property” is a label which brings in a large number of rules. There are 8 exceptions altogether, of which the most important for this book is the last:

- (f) excluded property

“Relevant property” is an opaque term. “Chargeable trust property” might perhaps be better, but it is better to adopt the statutory term. For clarity I

---

<sup>17</sup> The esoteric topic of company IIPs is not considered here.

sometimes expand it to “**relevant (non-excluded) trust property**”.

The term “**relevant property trust**” is often used to describe a trust with no qualifying IIP, and so which falls, or may fall, within the relevant property regime. Thus before 2006, relevant property trusts were, broadly, discretionary trusts; but post-2006, the term also includes non-estate IIP trusts.

## 70.9 Settlement commencement date

Section 48A IHTA provides:

In this Act any reference to the commencement of a settlement is to the time when property first becomes comprised in it.

An English law trust does not exist until property is held in trust. A Scots law trust may exist before a transfer of property to it.<sup>18</sup> But that entity is not an IHT-settlement, which requires that *property* is held in trust for persons in succession (etc). So s.48A IHTA is otiose, but it does no harm. It serves as a reminder that the date a trust deed is executed, as recorded on the trust deed, may be before the date when property is first transferred to the trust; and it is the latter date which matters for IHT.

## 70.10 Associated operation

The definition is very wide, as one might expect.<sup>19</sup> Section 268(1) IHTA provides:

- [1] In this Act “associated operations” means, subject to subsection (2) below, any two or more operations of any kind, being—
- (a) [i] operations which affect the same property, or
  - [ii] one of which affects some property and the other or others of which affect property which represents,<sup>20</sup> whether

18 Scottish Law Commission *Discussion Paper on the Nature and the Constitution of Trusts* (2006) para 3.1ff

[https://www.scotlawcom.gov.uk/files/1312/7892/7069/dp133\\_trusts.pdf](https://www.scotlawcom.gov.uk/files/1312/7892/7069/dp133_trusts.pdf)

Scottish Law Commission *Report on Trust Law* (2014) para 3.6

[https://www.scotlawcom.gov.uk/files/4014/0904/0426/Report\\_on\\_Trust\\_Law\\_SLC\\_239.pdf](https://www.scotlawcom.gov.uk/files/4014/0904/0426/Report_on_Trust_Law_SLC_239.pdf)

19 This is self-evident, but if authority is needed see *IRC v MacPherson* [1989] AC 159 at p.175: “extremely wide and ... capable of covering a multitude of events affecting the same property which might have little or no apparent connection between them”.

20 See App.2.11 (‘Representing’ assets).

- directly or indirectly,  
 [A] that property, or  
 [B] income arising from that property, or  
 [C] any property representing accumulations of any such income, or
- (b) any two operations of which
- [i] one is effected with reference to the other, or
  - [ii] with a view to enabling the other to be effected or
  - [iii] facilitating its being effected,
- and any further operation having a like relation to any of those two, and so on,
- [2] whether those operations are effected by the same person or different persons, and whether or not they are simultaneous; ...

The IHT Manual describes paragraphs (a)/(b) of the definition as objective/subjective:

**IHTM14822 Definition** [June 2016]

...You must specifically consider two alternative tests to determine whether separate events are associated operations. One of these tests must be satisfied if the associated operations provisions are to apply.

- The (first) objective test looks at the relationship between items of property affected by the events - IHTA84/S268(1)(a).
- The (second) subjective test looks at the relationship or connection between the events concerned - IHTA84/S268(1)(b).

*Rysaffe v IRC* concerned an arrangement under which an individual transferred 5 parcels of shares to 5 newly created settlements. So there were 5 operations, but they were not associated as:

- (a) they did not relate to the same property; and
- (b) they were not (in short) effected with reference to each other.<sup>21</sup>

### 70.10.1 “Operation”

Section 268(1) IHTA provides:

... “operation” includes an omission.

The IHT Manual provides:

**IHTM14826 Definition Of Terms** [Sep 2018]

**Operation**

---

21 [2002] EWHC 1114 (Ch) at [36]. For other aspects of this case see 75.3.2 (*Rysaffe*).  
 FD\_70\_Terms\_and\_Concepts.wpd 03/11/21

Under IHTA84/S268(1) the term ‘operation’ expressly includes an omission but is otherwise undefined. It applies to all forms of dispositions (IHTM04023), for example a gift, a sale, a purchase or an exchange.

You can also consider the term to extend to wider activities such as making of a will or the exercise of votes as a controlling shareholder at a company meeting. However it does not cover automatic events like birth, death or the attainment of any specific age.

See too 45.11.1 (“Operation”).

An omission may also constitute a disposition and so a transfer of value.<sup>22</sup>

There is a transitional relief for pre-1974 operations<sup>23</sup> but that is not now likely to arise.

#### 70.10.2 ToA/IHT assoc ops compared

The term “associated operations” is also used in ToA.<sup>24</sup> The definition is similar in parts. Clearly the drafter of the IHT definition in 1940 had in mind the ToA definition from 1936:

##### ToA definition

“associated operation”, in relation to a transfer of assets, means an operation of any kind effected by any person in relation to—

- (a) any of the assets transferred,
- (b) any assets directly or indirectly representing<sup>25</sup> any of the assets transferred,
- (c) the income arising from any assets within para (a) or (b), or
- (d) any assets directly or indirectly representing the accumulations of income arising from any assets within para (a) or (b).

##### IHT definition

“associated operations” means, ... any two or more operations of any kind, being—

- (a)[i] operations which affect the same property, or
- [ii] one of which affects some property and the other or others of which affect property which represents, whether directly or indirectly, that property, or income arising from that property, or
- any property representing accumulations of any such income ...

22 See 70.5 (Omission: Deemed disposition).

23 Section 268(2) IHTA.

24 See 45.11 (Associated operation: Definition)

25 “Representing” is elaborately defined in s.717(b) ITA.

In principle one should not refer to “associated operations” in the abstract without specifying which definition applies but context will normally make that clear.

Cases on one definition will sometimes be helpful for the other; thus the IHT case *Macpherson* refers to the ToA case *Herdman*.

### 70.11 Why associated operations matter

It is not enough to establish that there are associated operations. This is just a first step. One must then go on to ask what (if anything) follows.<sup>26</sup>

Associated operations matter for various IHT purposes. The list includes:

Topic	See para
Definition of transfer of value	70.14
Definition of settlement	75.3
Arm’s length transaction relief	70.12
Restriction on freedom to dispose: s.103 disallowance of debts	<i>Not discussed</i> ; see s.163 IHTA 76.11.10
Pre-owned assets: excluded liability	80.17.1

So it is necessary to address associated operations as a discrete topic.

### 70.12 Arm’s length transaction

Section 10(1) IHTA provides (so far as relevant):

A disposition<sup>27</sup> is not a transfer of value if  
 [A] it is shown that  
     [i] it was not intended, and  
     [ii] was not made in a transaction intended,

---

<sup>26</sup> This is self-evident, but if authority is needed, see *Rysaffe v IRC* [2002] EWHC 1114 (Ch) at [28]:

“s 268 [IHTA] is not an operative provision which of itself imposes inheritance tax liabilities. It is a definition of an expression (associated operations) which is used elsewhere. The definition only comes into effect in so far as the expression ‘associated operations’ is used elsewhere, and then only if the expression in another provision is relevant to the way in which that other provision applies to the facts of the particular case.”

This decision was approved on appeal.

<sup>27</sup> Section 10(3) IHTA provides: “In this section “disposition” includes anything treated as a disposition by virtue of section 3(3) above”; see 70.5 (Omission: Deemed disposition).

- to confer any gratuitous benefit on any person and  
 [B] either—
- (a) that it was made in a transaction at arm's length between persons not connected with each other, or
  - (b) that it was such as might be expected to be made in a transaction at arm's length between persons not connected with each other ...

I refer to this as **“arm's length transaction relief”**.

Section 10(1)[A] is otiose, because if there is an intention to confer a gratuitous benefit, the disposition will not satisfy the condition in [B]; but it does not matter.

### 70.12.1 *Operation confers benefit*

Associated operations come in through the definition of “transaction”. Section 10(3) IHTA provides:

In this section ... “transaction” includes a series of transactions<sup>28</sup> and any associated operations.

If the extended meaning of ‘transaction’ is read into the opening words of s.10, the wording becomes:

- a disposition is not a transfer of value if it is shown that it
- [a] was not intended, and
  - [b] was not made in a transaction including a series of transactions and any associated operations intended,
- to confer any gratuitous benefit ...

In *Macpherson v IRC* the House of Lords restricted the association operation rule in its s.10 context thus:

So read it is clear (!) that the intention to confer gratuitous benefit qualifies both transactions and associated operations. If an associated operation is not intended to confer such a benefit it is not relevant for the purpose of the subsection. That is not to say that it must necessarily per se confer a benefit but it must form a part of and contribute to a scheme which does confer such a benefit.

*Macpherson* concerned a series of two operations:

---

<sup>28</sup> “Series of transactions” does not add anything to “associated operations”.

- (1) Trustees granted an arm's length chattel lease<sup>29</sup> to B1.
- (2) Trustees appointed the chattels to B2, subject to that lease (intending to confer a benefit on B2).

Step (1) reduced the value of the chattels, but was found as a fact not to be intended to confer a benefit on B1.<sup>30</sup> But arm's length transaction relief did not apply at step (1) because of the associated operation at step (2):

the appointment would not have been made if the [chattel lease] had not been [made]. It follows that the [chattel lease] was not only effected with reference to the appointment but was a contributory part of the scheme to confer a benefit on [B2]. So viewed there can be no doubt that the [chattel lease]... was made in a transaction, consisting of the [lease] and the appointment, intended to confer a gratuitous benefit on [B2].

Suppose the two steps had been made in the opposite order, that is:

- (1) Trustees appointed the chattels to B2 (intending to confer a benefit)
- (2) B2 granted the chattel lease to B1 (reducing the value of the chattels but not intending to confer a benefit)

Arm's length transaction relief would have applied at step (2):

The [chattel lease] would undoubtedly have been associated with the appointment within the definition ... but it would not have been a relevant associated operation since it would have contributed nothing to the conferment of the gratuitous benefit which had already been effected by the appointment. It could alternatively be said that the transaction intended to confer gratuitous benefit had already been completed before the [chattel lease] had been entered into, therefore although it was an associated operation it could not be said to have been made in that transaction.

One might today call that a purposive construction. On these facts, IHT is charged on full value at step (1), not on depreciated value. So there is no need for a further charge at step (2).

The issue arose again in *HMRC v Parry*<sup>31</sup> which concerned a set of 2

29 For another aspect of this case, see App.4.5.2 (Market value/full consideration).

30 That seems factually implausible, but it was a question of fact and could not be challenged on appeal.

31 [2020] UKSC 35. For another (rather more important) aspect of this case, see 70.5 (Omission: Deemed disposition).

operations:

- (1) T transferred funds from one pension fund to another, reducing the value of her estate.
- (2) T omitted to take pension benefits, thus increasing the funds distributed in due course to her children.

Step 1 was found not to have the intention to confer a gratuitous benefit.<sup>32</sup> The Supreme Court somehow found that step 2 did not form part of a scheme with step 1.<sup>33</sup> So arm's length transaction relief did apply at step 1. But the facts were unusual.

### 70.13 Relevant operation

The IHT Manual provides:

**IHTM14828 Restrictions On Association** [Sep 2018]

Several operations may be associated under the definition in IHTA84/S268. However, as the decision of the House of Lords in *Macpherson v IRC* [1989] AC 159 made clear, it may not be possible to take all of those operations into account.

The decision in *Macpherson* established that only operations which together are relevant to the tax charge being considered are to be taken into account as associated operations.

As a result, when applying the associated operations rules you may only take account of operations

- which are 'associated' within the statutory definition, and
- which are relevant for the purposes of the tax charge that you are considering.

Whether any given associated operation is also a relevant operation will depend on the statutory context in which it is being considered. However an operation will usually be a relevant operation if

- it forms part of and
- contributes to

a scheme or plan which gives rise to the tax charge under consideration for IHT purposes.

In short, the definition is so wide that the Courts have had to restrict its

---

<sup>32</sup> That seems implausible, but it was a question of fact, and the issue is not likely to arise very often.

<sup>33</sup> A 3:2 decision. The reader may find the minority view more persuasive.

operation. A similar issue arises with association operations for ToA.<sup>34</sup>

## 70.14 Disposition by 2 operations

Section 3(1) IHTA provides:

... a transfer of value is a disposition made by a person ... as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition

Associated operations enter the picture via the definition of “disposition”. Section 272 IHTA provides:

In this Act, except where the context otherwise requires ...  
“disposition” includes a disposition effected by associated operations

If the extended meaning of ‘disposition’ is read into the opening words of s.3(1) the wording becomes:

... a transfer of value is a disposition including a disposition effected by associated operations made by a person ... as a result of which the value of his estate immediately after the disposition including a disposition effected by associated operations is less than it would be but for the disposition

Section 268(3) IHTA addresses issues of timing and quantification of the value transferred by a transfer effected by associated operations:

- [1] Where a transfer of value is made by associated operations carried out at different times it shall be treated as made at the time of the last of them;
- [2] but
  - [a] where any one or more of the earlier operations also constitute a transfer of value made by the same transferor, the value transferred by the earlier operations shall be treated as reducing the value transferred by all the operations taken together,
  - [b] except to the extent that the transfer constituted by the earlier operations but not that made by all the operations taken together is exempt under section 18 above.

The IHT Manual provides:

### **IHTM14828 Restrictions On Association** [Sep 2018]

---

<sup>34</sup> See 45.11.5 (Mere historical association).  
FD\_70\_Terms\_and\_Concepts.wpd

**Relevant operations**

In the case of a transfer of value under IHTA84/S3 (1), every associated operation which contributes to the loss to the transferor's estate is a relevant operation. Any other operation, although it may be 'associated', is not relevant for the purpose of that provision.

**Example** (*Angus and Brodie*)

So if

[1] A grants a lease to B and

[2] then later gives him the freehold reversion, after which

[3] B pays to have an extension built,

all three operations are associated. They all affect the same property. But the only the first two operations are relevant to the transfer of value under IHTA84/S3(1), since the building of the extension by B does not give rise to any further loss to A's estate.

The rule that a disposition (and so a transfer of value) may be made by associated operations can arise in many contexts, see in particular:

<b>Topic</b>	<b>See para</b>
Channelling	70.14.1
Asset splitting	70.14.2
Alteration of share capital	77.6
Joint accounts	90.3.5

70.14.1 *Channelling*

In *Rysaffe*:

... a disposition which is effectively by A to C is channelled through B with a view to picking up a saving of inheritance tax in the process. Instead of A transferring the property to C he transfers it to B, and B, pursuant to the scheme, makes an onward transfer to C. One can readily imagine cases where inheritance tax might, the associated operations provision apart, be avoided by an exercise of that nature. For example, an A to B transfer might have benefited from an exemption, such as that for transfers between a husband and wife, and for some reason there may be a lower liability on a transfer by B to C than there would have been on a direct transfer from A to C.<sup>35</sup>

In practice HMRC do not take that point, at least for straightforward inter-

---

35 *Rysaffe Trustee Co v IRC* [2002] EWHC 1114 (Ch) at [30].  
FD\_70\_Terms\_and\_Concepts.wpd

spouse transfers.<sup>36</sup>

In an IT/CGT context, channelling of this kind is addressed by the onward-gift rules.<sup>37</sup>

### 70.14.2 *Asset splitting*

In *Rysaffe*:

... a case where an asset, instead of being transferred to a transferee by a single transfer of the whole asset, is fragmented and transferred in stages, with a view to achieving an overall reduction in the value transferred. For example, X wants to give a valuable freehold to Y, but a simple transfer of the freehold would give rise to a large transfer of value for inheritance tax purposes. Instead

[1] he first gives a medium length lease of the property to Y, and

[2] later he gives to Y the freehold reversion.

If that was a case of two independent dispositions one can readily imagine arguments that the aggregate of their separate values would be considerably lower than the value of a simple one step transfer of the freehold. ... the possibility of manoeuvres like those two examples would have been obvious to the draftsman ... and that the probability is that it was for that purpose ... that 'disposition' was defined to include a disposition by associated operations.<sup>38</sup>

The IHT Manual offers 3 examples of asset splitting. The first is the lease example:

#### **IHTM14827 Transfer Of Value Made By Associated Operations**

[Aug 2016]

... **Example** (*Angus and Brodie*)

A has a house with vacant possession worth £260,000.

A grants a controlled tenancy of it to B at full rent.

The HMRC analysis of the first operation is as follows:

At this point the value is reduced to £182,000 but no claim for IHT then arises because of IHTA84/S10. A has incurred a loss to his estate from £260,000 to £182,000, but he has not made a transfer of value because of IHTA84/S10.<sup>39</sup> It is nevertheless a relevant operation.

36 See 89.9 (Spouse gift: Associated operations).

37 See 57.30 (Onward gifts: Introduction).

38 See 89.9 (Spouse gift: Associated operations).

39 Author's footnote: This is possible but factually implausible.

Then comes the second operation:

Two years later, the house is worth £300,000 with vacant possession. A gives B the freehold reversion so that B now effectively owns the house with the right to vacant possession.

The HMRC analysis of the second operation is as follows:

The two operations, the granting of a tenancy and then the gift of the freehold reversion, affect the same property. A has transferred the house with vacant possession, but he has done it by splitting the transfer into two separate operations. Through the associated operations rule these two operations are combined together. Consequently, tax can be charged on the full vacant possession value of £300,000 at the time of the last operation, the gift of the freehold reversion.

Section 268(2) IHTA seems to confirm this by providing a narrow exemption:

The granting of a lease for full consideration in money or money's worth shall not be taken to be associated with any operation effected more than three years after the grant

The second example is a release of a loan by instalments. The IHT Manual provides:

**IHTM14834 Sale without immediate payment of the purchase price** [Sep 2018]

In this situation, property (typically a house) is sold with the purchase price being treated as a loan. Subsequently, the loan is released in stages (normally in order to utilise the annual exemptions). Also see IHTM14152. You need to

- consider whether the sale price represents the full open market value of the property at the date of the sale,
- consider whether the purported releases are legally effective (IHTM19100), and
- establish by whom and on what basis the property was occupied between the sale and the death (so that the application of the Gift With Reservation (IHTM14301) provisions can be considered). ...

The third example is the transfer of an asset by instalments. The IHT Manual provides:

**IHTM14835 Transfer In Stages** [June 2016]

A transfer may be effected in a series of stages. Typically successive

portions of a property may be transferred, often annually. The portion may be calculated in a variety of ways: often it is a share equivalent in value to the amount of the annual exemption.<sup>40</sup>

Whether the instalment examples are actually caught by the associated operations rule is doubtful.

### 70.15 Gift followed by sale: APR/BPR

The topics of APR/BPR are outside the scope of this book, and would need long chapters to themselves. However they do provide another example of the associated operations issue. *Reynaud v IRC* concerned an arrangement under which:

- (1) A gift of shares qualifying for BPR
- (2) A sale of the shares by the donee

The Special Commissioners said:

16. There is no doubt that the two operations of the transfer of shares to the discretionary trusts and the purchase of own shares are associated within the meaning of s 268. They affect the same property, the shares. However, the question is not whether they are associated, but whether there is a disposition effected by associated operations. ...

17. An associated operation is relevant only if it is part of the scheme contributing to the reduction of the estate...

Here the value of the estates of the brothers were diminished as a result of the gift into settlement alone. The purchase of own shares contributed nothing to the diminution which had already occurred and was not therefore a relevant associated operation.

19. Accordingly, we decide that the disposition reducing the value of their estates was achieved solely as a result of the transfer of the shares into the settlement. The purchase of own shares is not an operation which is part of the disposition reducing the value of the estate. It is not therefore a case of a disposition being effected by associated operations, but a single disposition. It follows that the disposition cannot be treated as taking place later than it actually did, with the result that business relief is available.<sup>41</sup>

---

40 The Manual adds: This is sometimes referred to colloquially as 'salami slicing'. But I do not think this expression has become established, even in the specialist dialect of IHT-practitioners.

41 [1999] STC (SCD) 185, approved in *Rysaffe v IRC* [2002] STC at 872 at [29]. That HC decision was itself approved on appeal.

The IHT Manual provides:

**IHTM14832 Transfers Involving Relievable Property** [Sep 2018]

A transfer of property that qualifies for agricultural or business relief may be followed by an event which, if it had occurred before the transfer, would have prevented the relief being available.

**Examples**

- Property which is entitled to agricultural relief is transferred and then sold by the transferee.
- A transfer of unquoted shares/securities which are eligible for business relief is followed by the shares becoming quoted on a recognised stock exchange (IHTM18061).

A point to consider in these situations is whether relief, which is otherwise available, should be challenged by reference to the associated operations provisions. ...

So the Manual has been out of date since 1999.<sup>42</sup> Is this a record?

---

<sup>42</sup> The law also altered with s.113A IHTA.

## CHAPTER SEVENTY ONE

# EXCLUDED PROPERTY: DEFINITION

71.1

71.13.4 IIP spouse: Excluded  
property

71.13.9 s.80 retesting: FOTRA/UK  
funds

### *Cross references*

The following topics are considered elsewhere:

75.2 (Addition/transfer to trust)

78.1 (IHT residence-property code)

## 71.1 Excluded property: Introduction

Excluded property is (more or less) outside the scope of inheritance tax.

There are 11 classes of excluded property:

- (1) Non-settled property:<sup>1</sup>
  - (a) Foreign situate property
  - (b) UK funds (unit trusts and OEICs)
  - (c) FOTRA securities
- (2) Settled property:
  - (a) Foreign situate property
  - (b) UK funds (unit trusts and OEICs)
  - (c) FOTRA securities
- (3) Qualifying certificates of IoM/Channel Islands doms
- (4) Property of visiting forces<sup>2</sup>
- (5) Reversionary interests in settled property

---

1 A note on terminology. I use the term “non-settled property” to describe property which is not held in a settlement for IHT purposes. The term used in the IHT Manual is “unsettled property”.

2 See App 9.4.1 (Excluded property).

(6) Decorations and awards<sup>3</sup>

(7) Property subject to clearance under the 2011 Swiss Tax Agreement<sup>4</sup>

Thus, with an economy of language, exemptions for excluded property serve several purposes:

(1) Territorial exemption

(2) Limiting the scope of IHT:

(a) To encourage UK investment by foreigners (FOTRA securities, UK funds)

(b) To fit the scheme of the Act, avoid double taxation (relief for reversionary property)

(c) Other meritorious cases (visiting forces, etc)

This chapter considers the definition of excluded property. The reliefs for excluded property are considered in the next chapter.

## **71.2 Non-settled foreign property**

Section 6(1) IHTA provides:

Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

Excluded property status depends on the domicile of the individual at the time the disposition is made. Likewise, excluded property status depends on the location of assets at that time only. It is irrelevant that the assets may previously have been situate in the UK.

On the situs of assets, see 97.1 (Concepts of situs).

## **71.3 Non-settled UK funds**

Section 6(1A) IHTA provides:

[a] A holding in an authorised unit trust<sup>5</sup> and

3 Section 6(1B) IHTA; this is too specialist a topic to discuss here.

4 See para 22(1) sch 36 FA 2012. I discuss this in para 97.20 of the 2016/17 edition of this work.

5 Defined in s.272 IHTA:

“‘authorised unit trust’ means a scheme which is a unit trust scheme for the purposes of the Income Tax Acts (see section 1007 of the ITA 2007) and in the case of which an order under section 243 of the Financial Services and Markets Act 2000 is in force.”

[b] a share in an open-ended investment company<sup>6</sup>  
is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

AUTs and OEICs will generally be UK situate assets. I refer to them together as “**UK funds**”. These are excluded property for all IHT purposes.

The relief only applies to a *holding* in an AUT or a *share* in an OEIC so other interests in AUTs and OEICs (for instance, options) are not excluded property. Perhaps that does not arise in practice.

The definition for UK funds uses the expression “beneficially entitled” and the definition for FOTRA securities uses the expression “beneficial ownership” but it is considered that the meaning is the same.<sup>7</sup>

This exemption is due to tax competition.<sup>8</sup> HMRC explain:

Overseas investors are in theory liable to inheritance tax on their OEIC and AUT holdings, because they are regarded as being situated in the UK for tax purposes on the investors’ death. Competing centres do not charge tax in parallel circumstances. Removing the potential inheritance tax charge will help UK managers compete on an equal footing with overseas fund providers.<sup>9</sup>

## 71.4 Non-settled FOTRA securities

The next category of excluded property consists of FOTRA securities<sup>10</sup>

6 Defined in s.272 IHTA:

“open-ended investment company’ means an open-ended investment company within the meaning given by section 236 of the Financial Services and Markets Act 2000 which is incorporated in the UK.”

7 See 71.6 (English-law beneficial ownership).

8 See 1.2.2 (Other tax competition).

9 Press Release 16 October 2002 (OEICs and AUTs) para 6 [2002] STI 24 October 2002. The text continued (inaccurately):

“This very rarely generates any significant yield, because UK assets still have to exceed the inheritance tax threshold ... before any tax is due. But it is a deterrent in marketing terms”.

I suspect that the true reason that the former IHT charge on UK funds raised little IHT was rather different, namely that no-one (if properly advised and wishing to comply with UK tax rules) would invest more than the IHT threshold in AUTs or OEICs. Undetectable non-compliance must also be reckoned with.

10 “Free of Tax to Residents Abroad”.

(certain UK government securities, sometimes called exempt gilts). FOTRA securities are UK situate assets. Section 6(2) IHTA provides:

Where securities have been issued by the Treasury subject to a condition authorised by section 22 of the F(No.2)A 1931 (or section 47 of the F(No. 2)A 1915) for exemption from taxation so long as the securities are in the beneficial ownership of persons of a description specified in the condition, the securities are excluded property if they are in the beneficial ownership of such a person.

FOTRA securities issued from 1 April 2005 are titled “Treasury Gilts”. Earlier securities have one of the following names:

- Treasury Loan/Stock
- Conversion Loan/Stock
- Exchequer Loan/Stock
- Consolidated Loan/Stock
- War Loan

These names have only historic significance.

Products issued by National Savings and Investments are not FOTRA securities.

#### 71.4.1 *Interest on FOTRA security*

The IHT Manual provides:

##### **27260 Exclusion of interest on exempt securities** [Jul 2016]

The exclusion for exempt securities can also apply to certain payments of interest on the securities. Payments that qualify for the exclusion are:

- [1] warrants or coupons for interest already received but not encashed at the date of the relevant chargeable event
- [2] apportionment of interest due up to, but receivable after, the date of the chargeable event
- [3] in the case of a trust, any interest payments already encashed but held, at the date of the chargeable event, by the trustees, before distribution in the administration of the trust. These payments will be excluded even if no separate money can be identified as relating directly to interest on exempt securities.

The **exclusion for interest does not apply** to any warrants or coupons already encashed, or payments of interest already received by the beneficiary in their lifetime, in connection with a chargeable event that happened after they were encashed or received. This is the case whether

the beneficiary is the absolute owner of the exempt securities or a beneficiary under a trust.

[1] and [2] are correct, but point [3] seems generous.<sup>11</sup>

#### 71.4.2 EU state securities

The EC say:

The underlying [EU law] principles could equally prohibit, inter alia, inheritance tax treatment that ...

- (c) is less favourable in the case of public debt securities issued by other Member States than in the case of similar securities issued by the taxing Member State.<sup>12</sup>

The EC took action over similar rules in Spain:

The European Commission has officially requested Spain to amend the provisions of the Inheritance and Gift Tax legislation of the *Territorios Históricos de Alava y Bizkaia* as these do not respect the free movement of capital.

Under these tax provisions public debt issued by the local administrations (*la Comunidad Autónoma del País Vasco, the*

11 For completeness, the Manual continues:

**“27261 Exclusion of repayment of IT on exempt securities [Jul 2016]**

A repayment of Income Tax relating to interest on exempt securities is also excluded from the charge to Inheritance Tax on exempt securities:

- if an existing warrant for repayment has not been cashed at the date of the relevant chargeable event
- if the proceeds of an encashed warrant are held – at the date of the chargeable event – by the trustees pending distribution in the administration of the trust or
- if the repayment due up to the date of the chargeable event is received after the date.

A repayment that is cashed before a chargeable event, by the person beneficially entitled to the repayment, is not excluded on that event.”

Before 1998 interest was generally paid subject to deduction of tax. But now interest is paid without deduction of tax (unless the owner asks for tax to be deducted) so this point will not arise.

12 Commission Staff Working Paper “Non-discriminatory inheritance tax systems: principles drawn from EU case-law” (December 2011) para 3

[https://ec.europa.eu/taxation\\_customs/sites/taxation/files/resources/documents/taxation/personal\\_tax/inheritance/working\\_paper\\_en.pdf](https://ec.europa.eu/taxation_customs/sites/taxation/files/resources/documents/taxation/personal_tax/inheritance/working_paper_en.pdf)

*Diputaciones Forales or the Entidades Locales Territoriales de los tres Territorios Históricos*) benefits from a preferential tax treatment. This means that titles of public debt from these administrations are less taxed than other similar titles after inheritance. This tax treatment discriminates against investments in public debt issued by other EU Member States or EEA States.<sup>13</sup>

Spain subsequently amended its law.<sup>14</sup>

It is considered that the exemption conferred on UK gilts is in breach of EU law: it is an unjustified restriction on free movement of capital.<sup>15</sup> Similar exemption ought to be allowed for national securities of other MS. This matters for two classes of individuals who are not UK resident:

- (1) Those who are deemed UK domiciled but not actually domiciled. They would qualify for IHT exemption on all FOTRA securities, and under EU law qualify for exemption on equivalent foreign state securities.
- (2) Those who are actually UK domiciled. They qualify for IHT exemption on FOTRA securities.

Of course, foreign securities are non-UK situate property so in the hands of individuals who are foreign domiciled and not deemed UK domiciled, the IHT treatment is the same and no EU-law issues arise. Perhaps that is why the EC has taken on Spain on this point and not the UK.

Of course, the issue will be superceded by Brexit.

## 71.5 FOTRA exemption conditions

FOTRA securities were first issued under s.47 F(No 2)A 1915. This was a temporary measure:

The Treasury may, if they think fit, during the continuance of the present war and a period of twelve months thereafter, issue any securities which they have power to issue for the purpose of raising any money or any loan with a condition that neither the capital nor the interest thereof shall be liable to any taxation, present or future, so long as ... the securities are in the beneficial ownership of persons who are neither domiciled nor

---

13 MEMO/13/122 Event Date: 21/02/2013

[http://europa.eu/rapid/press-release\\_MEMO-13-122\\_en.htm](http://europa.eu/rapid/press-release_MEMO-13-122_en.htm)

14 Case C-127/12

15 See 102.20.1 (Discrimination against foreign property).

ordinarily resident in the UK...

This section was repealed in 1927, but the repeal did not affect tax exemptions for securities previously issued and one such security (War Loan 1952 Or After) is still in existence.

Section 22(1) F(No.2)A 1931 provides:

Any securities issued by the Treasury under any Act may be issued with the condition that -

- (a) so long as the securities are in the beneficial ownership of persons who are not [ordinarily]<sup>16</sup> resident in the UK, the interest thereon shall be exempt from income tax; and
- (b) so long as the securities are in the beneficial ownership of persons who are neither domiciled nor [ordinarily] resident in the UK, neither the capital thereof nor the interest thereon shall be liable to any taxation present or future.

Subsequent statutory provisions do not specify the condition for exemption: they give the Treasury a discretion to specify the condition in the terms of the issue. Section 60 FA 1940 provides:

The power of the Treasury under s.22 F(No.2)A 1931 to issue securities with the condition as to exemption from taxation specified in that section shall extend to the issuing of securities with that condition so modified, whether as to the extent of the exemption or the cases in which the exemption is to operate, as the Treasury may specify in the terms of the issue.

So the details must be found in the prospectus for each gilt concerned.<sup>17</sup> Section 154(1) FA 1996 provides:

The modifications which, under s.60 of the FA 1940, may be made for the purposes of any issue of securities to the conditions about tax exemption specified in s.22 of the F(No.2)A 1931 shall include a modification by virtue of which the tax exemption contained in any condition of the issue applies, as respects capital, irrespective of where the person with the beneficial ownership of the securities is domiciled.

---

16 See 71.5.2 (Abolition of ordinary residence).

17 Prospectuses can be found on  
<https://www.dmo.gov.uk/search/?q=prospectuses>

It is hard to see the need for this, but it does no harm.

Before 6 April 1998 some gilts were issued without FOTRA conditions. These have now been given the benefit of FOTRA conditions by s.161 FA 1998:

(1) Subject to the following provisions of this section, any gilt-edged security<sup>18</sup> issued before 6 April 1998 without FOTRA conditions shall be treated in relation to times on or after that date as if—

- (a) it were a security issued with the post-1996 Act conditions; and
- (b) those conditions had been authorised in relation to the issue of that security by virtue of s.22 of the F(No. 2)A 1931...

(4) In this section “FOTRA conditions” means any such conditions about exemption from taxation as are authorised in relation to the issue of a gilt-edged security by virtue of section 22 of the Finance (No 2) Act 1931...

(5) In this section “the post-1996 Act conditions” means the FOTRA conditions with which 7.25% Treasury Stock 2007 was first issued by virtue of s.22 of the F(No. 2)A 1931.<sup>19</sup>

(7) This section does not apply to any 3½% War Loan 1952 Or After which was issued with a condition authorised by virtue of s.47 of the F(No. 2)A 1915.

So all UK government securities have FOTRA status, irrespective of the original terms of issue but there are two classes of FOTRA securities with different conditions attached. The IHT Manual provides:

**IHTM04291 Government securities in foreign ownership: introduction [Sep 2018]**

...Before 6 April 1998, FOTRA securities or gilts were issued with the additional requirement that the beneficial owner had to be domiciled (IHTM13000) as well as ordinarily resident outside the UK. The domicile requirement still applies to FOTRA securities that were issued before 29 April 1996.

Under FA40/S60 (1), the Treasury has powers to modify the terms of issue of a Government security so as to change the scope of the

18 “Gilt-edged securities” has the CGT definition: see s.161(6) FA 1998.

19 This was one of the first gilts issued in 1996/97. The condition provided: “the Stock will be exempt from all UK taxation, present or future, so long as it is shown that the Stock is in the beneficial ownership of persons who are not [ordinarily] resident in the UK”.

exemption. These powers were exercised so that with effect from 6 April 1998 all gilts were deemed to be FOTRA gilts. So, for deaths and other chargeable events on or after 6 April 1998, all government securities are excluded property (IHTM04251) for Inheritance Tax purposes if the beneficial owner was ordinarily resident outside the UK (or, for securities acquired after 6 April 2013, simply resident outside the UK).

The only exception is 3½% War Loan, where the additional domicile condition still applies to deaths or other chargeable events on or after 6 April 1998.

So, in summary,

- FOTRA securities issued before 29 April 1996 will be exempt if the beneficial owner is both domiciled and ordinarily resident outside the UK;
- 3½% War Loan 1952 or after will be only be exempt if the beneficial owner is both domiciled and ordinarily resident outside the UK, even if the chargeable event is after 6 April 1998;
- all government securities issued without FOTRA conditions before 6 April 1998 will be exempt from that date provided the beneficial owner is ordinarily resident outside the UK. Domicile is relevant only for 3½% War Loan;
- all government securities issued between 29 April 1996 and 5 April 2013 will be exempt provided the beneficial owner is ordinarily resident outside the UK. Domicile is relevant only for 3½% War Loan;
- all government securities acquired on or after 6 April 2013 will be exempt provided the beneficial owner is resident outside the UK. Domicile will be relevant only for any future issue of 3½% War Loan.

The main factors for determining the exclusion (or otherwise) of Government securities are

- the type and ownership (IHTM04294) of the security which is deducted as excluded property,
- the ordinary residence (IHTM04295) of the beneficial owner of the relevant security or, where the security is settled property, that of the beneficiary or beneficiaries concerned, but
- for deaths and chargeable events prior to 6 April 1998, the domicile (IHTM04296) of the person(s) mentioned above must also be outside the UK.

It would be simpler if all gilts could be governed by the same rules.

### 71.5.1 *Deemed domicile disapplied*

Section 267(2) IHTA provides:

Subsection (1) above [deemed domicile for IHT] shall not apply for the purposes of section 6(2) or (3) or 48(4) above ...

Similarly, s.267ZA(5) IHTA provides:

An election under this section does not affect a person's domicile for the purposes of section 6(2) or (3) or 48(4).

That is, the IHT deemed domicile rules do not apply for the purposes of the exemptions conferring excluded property status on:

- (1) FOTRA securities
- (2) Qualifying certificates of IoM/Channel Island doms.<sup>20</sup>

The reason is historical. The concept of deemed domicile was introduced with CTT in 1974. At that time gilts had been issued with a promise that they would be free from taxation (including estate duty, now IHT) if the owner was not (actually) UK domiciled. The deemed domicile rule could not have been applied to those gilts. All that the drafter needed to do was to disapply the deemed domicile rule to FOTRA securities in issue at the time of the introduction of CTT (now IHT). It was not necessary to disapply the deemed domicile rule to gilts issued later. But that is the rule. Presumably the intention was to avoid having two classes of FOTRA securities governed by different rules; or to encourage foreigners to continue to invest in FOTRA securities issued after 1974.

No doubt the same reasoning applied to Qualifying certificates of IoM/Channel Island domiciliaries.

The practical importance of this rule is diminished by the fact that it is only relevant to those FOTRA securities where IHT FOTRA exemption requires the owner to be domiciled outside the UK; in (I think) almost all cases, except 3½% War Loan 1952 Or After, the exemption only requires the owner to be non resident, and domicile (deemed or actual) is irrelevant.

### 71.5.2 *Abolition of ordinary residence*

---

<sup>20</sup> See 71.7 (Channel Islands/IoM domicile).

Para 114 sch 46 FA 2013 provides:

(4) Sub-paragraph (5) applies to a person who becomes the beneficial owner of a pre-commencement security (or an interest in such a security) on or after 6 April 2013.

(5) If obtaining the relevant exemption is conditional on being not ordinarily resident in the United Kingdom, any enactment conferring the exemption is to have effect (in relation to a person to whom this sub-paragraph applies) as if obtaining the exemption were conditional instead on being not resident in the United Kingdom.

(6) In this paragraph—

“pre-commencement security” means a FOTRA security (as defined in section 713 of ITTOIA 2005) issued before the day on which this Act is passed;

“the relevant exemption”, in relation to a pre-commencement security, means the exemption for which provision is made in the exemption condition (as defined in that section).

Para 114(1) sch 46 FA 2013 deletes the word “ordinarily” in s.22 F(No.2)A 1931 and para 114(3) provides a similar rule:

(3) Subject to sub-paragraph (5), the amendment made by sub-paragraph (1) does not affect a pre-commencement security (nor the availability of the relevant exemption).

## **71.6 English-law beneficial ownership**

The gilts must be in the “beneficial ownership” of the individual. Beneficial ownership has various meanings,<sup>21</sup> but the meaning here is (in my terminology) English-law beneficial ownership, ie the English property law/trust law meaning. The antonym of English-law beneficial ownership is bare legal ownership

Beneficial ownership is one of a cluster of terms which are synonymous, or at least which have no discernable differences:

### **Term**

Equitable ownership

Beneficially entitled

---

21 See App.2.3 (Beneficial ownership: Meanings).

## Ownership

In this book, these terms are found in the following contexts:

<b>Context</b>	<b>See para</b>
FOTRA: Interest relief	<i>Discussed here</i>
FOTRA: IHT relief	26.5
Definition of subsidiary	60.27
Definition of estate for IHT	70.2

In *Sainsbury v O'Connor*:<sup>22</sup>

Although I might not, with Lord Diplock, have gone so far as to think that the expression “beneficial ownership” is a term of art, it is certainly one which has for several centuries had a very well-recognised meaning amongst property lawyers. And there can be no doubt that, in enacting a provision such as [what is now s.1154 CTA 2010, definition of subsidiary], Parliament must have intended to adopt that meaning. It means ownership for your own benefit as opposed to ownership as trustee for another. It exists either where there is no division of legal and beneficial ownership or where legal ownership is vested in one person and beneficial ownership or, which is the same thing, the equitable interest in the property in another.

Where the statutory term is beneficial ownership one might abbreviate it to ownership; but terminology is confused enough already without cutting corners.

There have been many cases discussing “beneficial ownership” in the context of company groups, and the reader who wishes to research this area further should refer to the discussion on group relief in corporation tax and SD textbooks. Unfortunately the case law is in disarray and a number of contradictory dicta can be found. But two propositions seem reasonably clear. Gilts remain in the beneficial ownership of a person even if they are subject to a mortgage or charge.<sup>23</sup> Gilts are not in the beneficial ownership of a person if they are subject to a contract of sale, even a conditional contract.<sup>24</sup>

Gilts remain in the beneficial ownership of an individual even if they

---

<sup>22</sup> 64 TC 208 at p.250.

<sup>23</sup> *English Sewing Cotton v IRC* [1947] 1 All ER 679.

<sup>24</sup> *Wood Preservation v Prior* 45 TC 112.

have granted put and call options, according to *Sainsbury v O'Connor* 64 TC 208.

Beneficial ownership is not a precise term in English law and is used with a variety of meanings. Its common meaning is to denote the sum of all the rights which a person can have over an asset; that is, beneficial ownership is a bundle of rights, or if you prefer, beneficial ownership has a number of incidents.<sup>25</sup> In the case of gilts the bundle (or incidents) consists principally of the right to dividends, capital on redemption and rights of disposal.

One can make some dent in the usual array of rights or incidents and still be regarded as the owner. This explains why one remains beneficial owner after granting a charge or licence. Where does one draw the line? The courts answer to this question has been confused because they insist that beneficial ownership must (with limited exceptions) be regarded as vested in one person or another.

This causes artificial results when property is subject to a contract of sale and it is said that beneficial ownership must be vested in either the vendor or purchaser. There is no reason why that should be so, if one remembers that beneficial ownership is no more than a convenient term for a bundle of rights. The better analysis is that beneficial ownership rights are split between vendor and purchaser. Neither need be regarded as “the” beneficial owner.<sup>26</sup> Likewise for property subject to an option. On this analysis, *Wood Preservation* was rightly decided but for the wrong reasons, and *Sainsbury* was wrongly decided. But the law on this point is settled below the Supreme Court.

The IHT Manual provides:

---

25 For discussion, start with Rostill, *Possession, relative title, and ownership in English law*, (2021) chap 7 (Ownership). See too Turner, “Some Reflections on Ownership in English Law” (1941) 19 Can. Bar Review 342; Harris *Property and Justice* (1996) p.125; Jaffey, “Explaining the Trust” [2015] LQR 377 at p.386.

26 Likewise the courts have come to reject the dogma that “where ownership is vested in a trustee, equitable ownership must necessarily be vested in someone else because it is an essential requirement of a trust that it confers upon individuals a complex of beneficial legal relations which may be called ‘ownership’”. See *CPT Custodian Pty v Commissioner of State Revenue* (2005) 221 ALR 196 at [25] <http://www.austlii.edu.au/> Of course, the context in which the expression “beneficial owner” is used should always be considered.

**IHTM27264 Exempt securities as partnership assets** [Sep 2018]

Very occasionally the assets of a partnership may include exempt securities which will normally constitute 'excepted assets' (see IHTA84/S112) so they will not qualify for Business Relief. In this situation a partner's transfer of their interest in the partnership will be excluded property:

- to the extent that it is attributable to the exempt securities (IHTM27241)
- and only if it satisfies the conditions specified for the security

You should calculate the amount to be excluded as follows:

$(\text{Value of exempt securities} \div \text{Total value of partnership}) \times \text{Value of transferor's partnership interest}$

HMRC accept that a partnership share is for this purpose regarded as a share of the partnership assets.<sup>27</sup>

71.6.1 *Beneficial ownership: Scotland*

The IHT Manual discusses the expression “beneficially entitled”, in a passage which sheds a little light on beneficial ownership:

**IHTM04031 what is meant by beneficially entitled?** [Sep 2018]

The use of the words ‘beneficially entitled’ means broadly that the estate includes only property

- to which a person is entitled, or
- in which he has an interest in his own right. ~~It does not include property which a person owns either legally or beneficially (IHTM04441).~~

~~It does not include property which a person owns either legally or beneficially (IHTM04441).~~

So far, the text is unexceptionable. The discussion then turns to Scotland:

In Scotland, the term ‘ownership’ does not necessarily equate to beneficial entitlement, for example where the land that is being transferred is subject to missives of sale [or]<sup>28</sup> there is an unrecorded disposition. This is because of the Scottish system of unitary ownership. Any case where the question is in point should be referred to Technical for advice.

27 In my terminology, this adopts the joint ownership analysis of a partnership share: see 82.3 (Nature of partnership share).

28 The original reads “of”. I think that is a slip for “or”; though it might be that some text is missing here.

No doubt the Scots law background is different: Scotland does not have the concept of equitable interests. Whether those differences have any practical effect on the meaning of “beneficial ownership” in the present context seems unlikely, but only a Scots lawyer can express an informed view on that.<sup>29</sup>

The passage concludes:

A person is not beneficially entitled to property held

- purely in a fiduciary capacity (for example as a trustee)
- in a representative capacity (for example as an executor or a trustee in bankruptcy), or
- by way of security (for example as a mortgagee prior to foreclosure).

...

This is clearly right.

### 71.6.2 *Registration*

The IHT Manual provides:

**IHTM04294 - Government securities in foreign ownership: type of security and ownership** [Sept 2018]

If a government security is a FOTRA gilt (IHTM04291) you will have to consider who is beneficially entitled (IHTM04031) to that security to work out whether it is excluded property for IHT purposes.

If a worthwhile amount of tax is at stake you should investigate the possibility of a last-minute purchase. Except where the available information reasonably rules out that possibility - for instance, if the amount of interest returned suggests long-term ownership - you should seek specific confirmation that the gilts concerned were in fact registered in the transferor's, or the trustee's, name(s) at the date of the relevant transfer.

Technical can give you advice if you discover a last-minute purchase of gilts.

I do not think that the IHT Manual means to say that relief only applies if the securities are registered in the name of the individual or the trustees.

---

<sup>29</sup> I would be grateful to any Scots reader who could direct me to relevant authority. McDonald and Pagan, *Inheritance Tax in Scotland: Tax Annual* (Bloomsbury) may help.

The point is that no relief applies if the securities are purchased but not paid for. The purchaser is not the beneficial owner until payment, or even if they were, securities not paid for have no value because of the vendor's lien. So if the gilts are not registered in the name of the individual, further evidence may be needed to show that the individual actually is the beneficial owner.

In practice, register the gilts in the name of the individual or the trustees to avoid possible dispute. Perhaps the withheld text instructs Inspectors how to identify false claims for relief, or perhaps it identifies what is a "worthwhile amount" to investigate.

## 71.7 Channel Islands/IoM domicile

Section 6(3) IHTA provides:

Where the person beneficially entitled to the rights conferred by any of the following, namely—

- (a) war savings certificates;
- (b) national savings certificates (including Ulster savings certificates);
- (c) premium savings bonds;
- (d) deposits with the National Savings Bank or with a trustee savings bank;
- (e) a certified SAYE savings arrangement within the meaning of section 703(1) ITTOIA;

is domiciled in the Channel Islands or the Isle of Man, the rights are excluded property.

In the following discussion:

- (1) "**Qualifying certificates**" are investments within (a) to (e).
- (2) "**Islanders**" are persons domiciled in the Channel Islands or the Isle of Man.

The IHT 3-year and 15-year deemed domicile rules do not apply for the purposes of this section: see s.267(2) IHTA.

The IHT Manual para 27270 [July 2016] correctly states:

Other points to note are:

- [1] the exclusion applies not only to securities that are owned absolutely but also to any settled securities in which the owner has

a beneficial interest in possession<sup>30</sup>

- [2] the exclusion does not extend to settled securities in which there is no interest in possession, (held on discretionary trusts
- [3] the relevant domicile is that of the transferor (and not the transferee) of the securities, at the time of the transfer
- [4] the deemed domicile provisions of IHTA84/S267 (2) do not apply. So the transferor's domicile has to be determined under general law.

Points [2] to [4] are straightforward, but point [1] is important.

The exemption could be particularly useful for an individual who is:

- (1) domiciled in the Channel Islands or the Isle of Man, and
- (2) deemed UK domiciled (so in principle within the scope of IHT), and
- (3) resident in the UK (so the FOTRA securities exemption is not available).

The exemption is also useful for an estate IIP trust with an Islander life tenant.

The exemption dates back to 1931<sup>31</sup> and was presumably an attempt to market the securities to Islanders, who would otherwise not find them an attractive choice. It seems surprising that the exemption is limited to Islanders; perhaps there were exchange control reasons?

## **71.8 Trusts: Foreign property**

This section sets out the position for chargeable transfers made on or after the day on which the FA 2020 is passed.

Section 48(3) IHTA provides:

Where property comprised in a settlement is situated outside the UK—

- (a) [i] the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time property became comprised in the settlement
- [ii] (but see also subsection (3F))<sup>32</sup>

This is the main category of settled excluded property, roughly

---

30 Author's footnote: From 2006 this will only apply to an estate IIP.

31 Section 41 FA 1931. The exemption for FOTRA securities was revived in the same year.

32 For subsection (3F), see 71.8.1 (Accumulated income).

corresponding to the rule that non-settled foreign situate property is excluded property.

A trust made by a foreign domiciled settlor is sometimes referred to as an “**excluded property trust**”. This label is not wholly accurate, as property in a so-called excluded property trust may or may not be excluded property, depending on its situs and nature; but it is a convenient shorthand.

The residence and domicile of the beneficiaries is irrelevant for this purpose. The residence of the trustees is similarly irrelevant.

Excluded property status depends on the domicile of the settlor at the time the property became comprised in the settlement, which is typically, though not necessarily, the time settlement was made. Domicile at the time of the chargeable event is generally ignored.<sup>33</sup> Contrast the IT/CGT position. The identity of the settlor is obviously crucial.<sup>34</sup>

The post 2020 law adopts a date of addition test, as opposed to the old law where the test was the date that the settlement was made.<sup>35</sup> It may therefore be necessary to determine the domicile of the settlor on repeated occasions, and to trace funds added to a trust which may become mixed with funds added previously.

There are times where it is unclear when property is added, such as interest-free loans;<sup>36</sup> or what property is added, eg on payment of trust expenses or liabilities.

The situs of the trust assets matters only at the moment a charge arises; provided the assets are then situated abroad, it is irrelevant that they may previously have been situated in the UK.

HMRC accept this. IHT Manual provides:

**04274. Identifying settled property** [Sep 2018]

The expression ‘property comprised in a settlement’ in IHTA84/S48 (3) means the items of property (IHTM04030) held in the settlement

---

33 There are two exceptions:

- (1) If the settlor/spouse has an initial IIP in the settled property: see 71.13 (Initial interest settlor/spouse).
- (2) Formerly domiciled residents

34 See 94.2.8 (Settlor: IHT definition).

35 See 71.15 (Adding property: 2020 changes).

36 See 94.26 (Loans).

(IHTM16042) at the time of the chargeable event you are considering. In determining the locality (IHTM27071) of any particular property you should consider the property in its current form and not its previous history.

*Example* [Stella, Xavier and Yolanda]

In 2004 S, when domiciled in Germany, transfers a house in Germany and some UK securities into a settlement for X for his life with remainder to Y.

On X's death - the potentially chargeable event - the settled fund consists of

- Option 1: a villa in Spain.
- Option 2: land in the UK.
- Option 3: a house in Spain and some UK securities.

With Option 1 the villa is excluded property even though it partly represents the proceeds of what was previously UK property (the securities).

The land in Option 2 is not excluded property although it is partly derived from the proceeds of sale of the German house.

In Option 3 the house in Spain is excluded property but the UK securities are not.

### 71.8.1 *Accumulated income*

As a matter of general law, accumulated income becomes comprised in a settlement at the time that it is accumulated.<sup>37</sup> However section 48(3F) IHTA provides:

If—

- (a) an amount is payable in respect of property (“the existing property”) comprised in a settlement, and
- (b) the amount represents an accumulation of income which (once accumulated) becomes comprised in the settlement,

subsections (3)(a), (3A)(a) and (3E) have effect, in the case of the amount, as if any reference to the time it became comprised in the settlement were to the time the existing property became comprised in the settlement.

This only applies for the provisions mentioned, but the provision is repeated verbatim elsewhere where needed: s.64(1BA) and s.65(8A)

---

<sup>37</sup> See 1.6.1 (Undistributed trust income).

IHTA.

### 71.8.2 *Formerly-dom resident settlor*

Section 48(3E) IHTA overrides the usual rule for a settlor who is a formerly-domiciled resident:<sup>38</sup>

In a case where the settlor of property comprised in a settlement is not domiciled in the UK at the time the property became comprised in the settlement (but see also subsection (3F)),<sup>39</sup> the property is not excluded property by virtue of subsection (3) or (3A) above at any time in a tax year if the settlor was a formerly domiciled resident for that tax year.

If the formerly-domiciled resident ceases to be resident, or dies, the trust property becomes excluded property again.

The HMRC consultation paper “Reforms to the taxation of non-domiciles” (2015) provides:

[Formerly domiciled residents] will be treated as having a UK domicile for tax purposes. This means there will be no protection for offshore trusts, either in terms of the tax on income/gains in the trusts or for IHT purposes.

The excluded property trust rules for IHT will be changed so that they do not apply in these circumstances. This will be the case even for trusts that are set up offshore while the individual was not domiciled or resident in the UK (and would therefore be excluded property for IHT purposes under the current rules). So if an individual caught by this test acquires an overseas domicile and then sets up an offshore trust while non-UK domiciled, once that individual becomes UK resident the assets in that trust will cease to qualify as excluded property and would be liable to inheritance tax charges. ...

Since the residence criteria will be based on the statutory residence test where individuals are either resident or non-resident for the whole year, it will create situations in which property will switch from being excluded property to being liable to IHT under the “relevant property” regime for periods of one or more tax years. If someone is frequently coming and going from the UK, the property in the trust will be excluded property one year and relevant property in the next year. The government

---

38 See 4.7 (Formerly-domiciled resident: IHT).

39 For subsection (3F), see 71.8.1 (Accumulated income).

accepts this position as it would allow individuals flexibility to move in and out of the UK as and when necessary.<sup>40</sup> However, trustees will need to consider whether a ten year anniversary charge arises at any point during each period the settlor is UK resident.<sup>41</sup>

The rule operates in an arbitrary way. Eg, if an formerly-domiciled resident who has created a trust comes to the UK for 5 years, a 10 year charge depends on the accident of whether the 10 year anniversary falls within any of those 5 years. Planning is possible:

- (1) Winding up the trust before the settlor becomes deemed domiciled for IHT would avoid the trust charges.
- (2) Excluding the settlor before the settlor becomes deemed domiciled for IHT would avoid a GWR charge which may otherwise arise on the death of the settlor while UK resident.

The rule is particularly harsh for foreign charitable trusts (not charities for UK tax purposes).<sup>42</sup> It may be possible for such charities to convert into a form which qualifies as a charity for UK tax. But the issue will rarely arise.

## **71.9 Income unpaid on life tenant death**

Suppose:

- (1) A trust for A for life remainder to B.
- (2) On the death of A, income has accrued but not yet been paid (“the accrued income”).
- (3) After the death of A, the trustees receive that income.

### *71.9.1 Trust law background*

The default trust law rule is that the trustees apportion the income they receive, and a part equal to the accrued income is paid to the executors of

---

40 A restriction on “individuals flexibility to move in and out of the UK” would not be EU-law compliant.

41 <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles/reforms-to-the-taxation-of-non-domiciles>

42 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), Chapter 3 (Definitions of Charity), online version <https://www.taxationofcharities.co.uk>

A.<sup>43</sup> I refer to this as the “**apportionment rule**”.

For instance, suppose A dies on 30 April 2012. In 2013 the trustees receive interest which accrued in the calendar year 2012:

- (1) One-third of the income will be apportioned to the period before A’s death (and so paid to A’s estate).
- (2) The remaining two-thirds is apportioned to the period after A’s death and so paid to B.

There are however two exceptions so wide that the apportionment rule does not often apply:

- (1) The rule may be reversed by the terms of the trust, and it usually is.<sup>44</sup>
- (2) The Trusts (Capital and Income) Act 2013 abolished this rule for trusts created after 1 October 2013, when the Act took effect, including a trust created under a power conferred by an old trust. Any entitlement to income under a new trust is an entitlement to income as it arises.

The amounts involved are usually small, in which case no-one takes any notice of the apportionment rule even if it does apply; but that is not always the case.

### 71.9.2 *IHT position*

Dymond states:

[1] When a life-tenant dies, any apportionment of dividends or interest payable to his personal representatives may be excluded from the account of the property passing under the settlement and should be included in the Inland Revenue account of his free estate.

[2] If any dividend or apportionment does not come within the charge to Inheritance Tax because, for instance, the life-tenant had a foreign domicile and the apportionment is payable by foreign trustees, it seems that in strictness deduction of the dividend could be refused on the ground that the value for tax is the market price of the security at the date of death, but in practice the deduction is permitted.<sup>45</sup>

Point [1] is looking at the position where:

---

43 Apportionment Act 1870.

44 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 21.58 (Statutory and equitable apportionment rules).

45 Dymond’s Capital Taxes (looseleaf) para 23.673.

- (1) Trust property is held on trust for A for life, remainder to B.
- (2) A dies and there is income (dividends or interest) which accrued during the lifetime of A (“the accrued income”).
- (3) The apportionment rule applies, so the accrued income is payable to the executors of A.

Dymond states that the accrued income is subject to IHT as part of A’s free estate. The accrued income is not subject to IHT as part of the trust fund. In such a case, clearly, one would not expect the accrued income to be subject to IHT twice, once as part of A’s free estate and also as part of the trust fund. It should be one or the other. Of the two, it can be said to make sense to treat it as part of A’s free estate and not as part of the trust fund because that is where it belongs, and then IHT is paid by the executors, and borne by the residuary beneficiaries of A’s free estate who receive it; the burden of IHT should not be paid by the trustees of the trust who do not receive it.

Point [2] is looking at the same position but the accrued income is not subject to IHT in A’s free estate. The example is where the accrued income is excluded property (on the basis that A is not UK domiciled and the accrued interest is not UK situate property). Dymond says that in practice in such cases the trustees are still not subject to IHT on the accrued income. Here it is suggested that the trustees have a deduction for the accrued income.

The practice is long standing, as the same point is made in Dymond’s *Death Duties*<sup>46</sup> in a passage from which the current text of Dymond is derived.

There are two possible bases for this practice. It might be said that the trust holds two assets, the loan and the accrued income; but that seems difficult to sustain (even more so if the trust asset is shares and the accrued income is an unpaid dividend). The correct basis is that the trustees have a liability in respect of the accrued income, which is deductible in computing the value of the trust fund for IHT purposes, just like any other trustee liability.

Sometimes the practice will favour HMRC. For instance, if A is UK domiciled but the settlor of the trust was not UK domiciled when the trust

---

46 (15th ed., 1973), p.819.

was made then the trust property (including the accrued income) would be excluded property but the right to the A's free estate is chargeable property.

Does the same practice apply where the apportionment rule is excluded? If the practice is that the liability to pay accrued income is a deductible trustee liability, it should be deductible in this case also. The liability remains; the exclusion of the apportionment rule only alters the person to whom the liability is due.

For the special case of accrued income on FOTRA securities, see 71.4.1 (Interest on FOTRA security).

### **71.10 Trusts: UK funds**

Section 48(3A) IHTA provides:

Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company—

(a) [i] the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the property became comprised in the settlement

[ii] (but see also subsection (3F)),<sup>47</sup> and

(b) section 6(1A) above applies to a reversionary interest in the property but does not otherwise apply in relation to the property;<sup>48</sup>

but this subsection is subject to subsection (3B) below<sup>49</sup> and to Schedule A1.

This is the settled property equivalent of the relief discussed at 71.3 (Non-settled UK funds).

The relief does not apply if the settlor is a formerly-domiciled resident: see 71.8.2 (Formerly-dom resident settlor).

### **71.11 Trusts: FOTRA securities**

FOTRA securities held by trustees may be excluded property. Under this exemption the domicile of the settlor is irrelevant; one must look at the

---

47 For subsection (3F), see 71.8.1 (Accumulated income).

48 For a discussion of s.48(3A)(b), see 71.12.2 (Foreign prop/UK funds).

49 For the subsection 3B exception, see 71.16.3 (Purchased equitable interest).

residence of the relevant beneficiary or beneficiaries and, if appropriate, their domicile.

For the interaction with s.44(2) IHTA, see 75.5.3 (When fiction applies).

#### 71.11.1 *Estate IIP trust*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if—

- (a) a person of a description specified in the condition in question is entitled to a qualifying interest in possession<sup>50</sup> in them...

#### 71.11.2 *Other trusts*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if ...

- (b) no qualifying interest in possession<sup>51</sup> subsists in them but it is shown that all known persons
  - [i] for whose benefit the settled property or income from it has been or might be applied, or
  - [ii] who are or might become beneficially entitled to an interest in possession in it,are persons of a description specified in the condition in question.

This subsection is subject to Schedule A1.

The IHT Manual provides:

**IHTM04298 Relevant Property Trusts & FOTRA Gilts** [Sep 2018]  
... • ‘all known persons’. Accordingly, when considering the question of ordinary residence (and domicile) you should disregard the possibility that some (currently) unknown person, for example, an unborn child or future spouse or civil partner (IHTM11032) of an existing beneficiary

---

50 See 70.7 (Qualifying interest in possession).

51 See 70.7 (Qualifying interest in possession).

might become a beneficiary in the future.

The expression “known persons” is to be contrasted with “any person whether ascertained or not”.<sup>52</sup>

- ‘the settled property’. So the application of the settled property and its income relate to all the property comprised in the particular settlement and not just to the exempt securities.
- ‘has been or might be applied’. This means that you will need to consider both past and future or potential application of the property and its income.

However, in the case of *Von Ernst and Cie SA v IRC* [1980] 1 WLR 468 the Court ruled that any payment or potential payment from the settled property to an incorporated UK charity - to be used by the charity for its charitable purposes - would not be an application for the ‘benefit’ of the charity. Accordingly you should not deny the exclusion for exempt securities merely because a qualifying charity (whether incorporated or not) has received or might receive any of the settled property or income from it.

The possibility that non-resident beneficiaries may later come to the UK does not preclude the relief - or else it would never apply.

For relief for the exit charge on acquisition of FOTRA securities, see 72.8 (Exit charge).

## 71.12 Estate IIP trust

### 71.12.1 *The question*

As we have seen, there are two sets of definitions of excluded property:

- (1) Section 6 IHTA defines categories of excluded property for non-settled property to which a person is beneficially entitled.
- (2) Section 48 IHTA defines corresponding categories of excluded property for trust property.

Property is either settled or not, so at first sight the definitions appear to be mutually exclusive. However, a settlement under which a beneficiary has an estate interest in possession raises a doubt. Property held in a settlement with an estate IIP is certainly settled property (so *prima facie* the s.48 rules apply). However, s.49(1) IHTA provides (for an estate IIP):

---

<sup>52</sup> Section 1(b) Variation of Trusts Act 1958.

A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as beneficially entitled to the property in which the interest subsists.

Since the person is treated as beneficially entitled, should the s.6 IHTA rules apply to settled property?

### 71.12.2 *Foreign prop/UK funds*

The answer is provided by s.48(3)(b) IHTA:

Where property comprised in a settlement is situated outside the UK ...  
(b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*;

Thus for settled foreign-situate property the s.48 definition applies and the s.6(1) definition is disapplied. The operation of these rules can be illustrated by two examples:

(1) Suppose a foreign domiciled beneficiary has an estate IIP in a settlement made by a UK domiciled settlor. The trust property is situated outside the UK.

The trust property is not excluded property as it does not meet the requirements of s.45(3)(a). It would meet the requirements of s.6(1) but s.48(3)(b) disapplies s.6(1).

(2) Suppose the reverse situation – a UK domiciled beneficiary has an estate IIP in a settlement created by a foreign domiciled settlor. The trust property is again situated outside the UK.

The tax position is now reversed. The trust property would not qualify as excluded property under s.6(1) but it does qualify under s.48(3)(a). Section 48(3)(b) disapplies s.6(1) but that is irrelevant: the trust property is excluded property.

For UK funds, the same answer is provided by s.48(3A)(b) IHTA:

Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company ...  
(b) section 6(1A) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*;

Thus for settled AUTs and OEICs, the s.48 definition applies and the s.6(3A) definition is disapplied.

### 71.12.3 *FOTRA securities in trust*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; ...

Again, the s.48(4) definition of excluded property applies and the s.6(2) definition is disapplied. This is not actually necessary because s.6(2) and s.48(4)(a) lead to the same result, but it does no harm.

#### 71.12.4 *Qualifying certificates in trust*

Qualifying certificates of an individual domiciled in the Channel Islands or the Isle of Man (“**an Islander**”) are excluded property.<sup>53</sup> If an Islander is entitled to an estate IIP in qualifying certificates, the certificates are not excluded property under s.48(3) or s.48(4). But it is considered that the property does qualify as excluded property under s.6(3) since the individual is to be treated as if they were beneficially entitled. In this case there is no express provision that s.48 overrides s.6. Section 48 and s.6 do not contradict each other: they offer two alternative routes to attain excluded property status. Such settled property is therefore excluded property. HMRC agree with this view.

### 71.13 Initial interest settlor/spouse

#### 71.13.1 *Section 80 fictions*

Special rules apply where the settlor or spouse have an estate interest in possession in a trust when it is made (“**an initial IIP**”).

The basic rule is set out in s.80(1) IHTA:

Where a settlor or his spouse or civil partner is beneficially entitled to a qualifying interest in possession<sup>54</sup> in property immediately after it becomes comprised in the settlement,

[a] the property shall for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property] be treated as not having become comprised in the settlement on that occasion;

[b] but when the property or any part of it becomes held on trusts under

---

<sup>53</sup> See 71.7 (Individual domiciled in Channel Islands or Isle of Man).

<sup>54</sup> See 70.7 (Qualifying interest in possession). I use the term “estate IIP”.

which neither of those persons is beneficially entitled to a qualifying interest in possession, the property or part shall for those purposes be treated as

- [i] becoming comprised in a separate settlement
- [ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to a qualifying interest in possession in it.

Thus where the settlor or spouse has an initial estate IIP, s.80 imposes three fictions the (“**s.80 fictions**”):

- (1) Property which is actually held in one settlement (the “**actual settlement**”):
  - (a) is treated as non-settled property (so long as the settlor/spouse have an estate IIP); and subsequently:
  - (b) is treated as being held in a separate settlement (the “**s.80 notional settlement**”).
- (2) The s.80 notional settlement is treated as having the following qualities:
  - (a) The person who is treated as the settlor of the s.80 notional settlement may be the spouse, ie different from the real settlor of the actual settlement.
  - (b) The time at which trust property is treated as becoming held in the s.80 notional settlement is when the settlor/spouse IIP ceases, which is later than the time that property actually became held in the actual settlement.

### 71.13.2 *Anniversary date: s.80*

The date of trust 10-year anniversaries matters because:

- (1) There is a 10-year charge on the 10 year anniversary
- (2) The rate of an exit charge depends on the 10-year anniversary (if any) which preceded it.

The date is normally ascertained in a straightforward manner. Section 61(1) IHTA provides:

In this Chapter “ten-year anniversary” in relation to a settlement means the tenth anniversary of the date on which the settlement commenced<sup>55</sup> and subsequent anniversaries at ten-yearly intervals, but subject to

---

55 See 70.9 (Settlement commencement date ).

subsections (2) to (4) below.

However, s.61(2) provides a special rule for the s.80 notional settlement:

The ten-year anniversaries of a settlement treated as made under section 80 below shall be the dates that are (or would but for that section be) the ten-year anniversaries of the settlement first mentioned in that section.

The section 80 fictions do not apply for the purposes of ascertaining the ten-year anniversary date of the notional trust: that is fixed by reference to the date of the actual settlement. I cannot see the reason for that rule and would be grateful to any reader who could suggest one.

### 71.13.3 *Trust partly within s.80*

It is possible that one trust may hold both property within the scope of s.80 and property which is not. This could happen in various ways, but the common example will be a trust conferring an interest in possession on the settlor where:

- (1) Property (“pre-2006 property”) was settled before 22 March 2006
- (2) Other property (“post-2006 property”) was added after 22 March 2006.

In that case:

- (1) The pre-2006 property is treated as held in a s.80 notional settlement governed by the s.80 fictions.
- (2) The post-2006 property is treated as held in the actual settlement.

The actual commencement date of the actual settlement is the date that property was first comprised in it. However pre-2006 property is “treated as not having become comprised in the settlement” at that date. The first time that property that is held by the actual settlement is when post-2006 property is added. That date is treated as its commencement date, and anniversaries of that date are treated as its 10-year anniversaries.

### 71.13.4 *IIP spouse: Excluded property*

Suppose:

- (1) In Year 1, H creates a trust under which W has an initial IIP.
- (2) In Year 2, W dies (so her IIP comes to an end). H does not become entitled to an estate IIP at the time that W dies.

In this example H is the settlor of the actual trust and Year 1 is the date of

commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 2 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 2. The domicile of H would be irrelevant. This would benefit the taxpayer if (for instance) H was UK domiciled and W was not, and could sometimes be used for tax avoidance.

Therefore where s.80 applies, s.81B IHTA imposes a further condition relating to excluded property.<sup>56</sup> This provides:

- (1) This section applies to property to which section 80 (initial interest of settlor etc) applies.
- (2) If the property would apart from this section be excluded property by virtue of section 48(3)(a) or (3A)(a),<sup>57</sup> the property is at any time in a tax year to be regarded as excluded property for the purposes of this Chapter, [Chapter 3 Part 3 IHTA, relevant property] except sections 78 and 79,<sup>58</sup> only if Conditions A and B are met.
- (3) Section 65(8) has effect in relation to the property only if Condition A is met (in addition to any condition mentioned in that provision).
- (4) Condition A is that the actual settlor was not domiciled in the United Kingdom at the time of the occasion first referred to in section 80(1).
- (5) Condition B is that the actual settlor is not a formerly domiciled resident for the tax year.
- (6) In this section “the actual settlor” means the person who is the settlor of the property in relation to the settlement first mentioned in section 80(1).

I refer to this rule as “**s.80 retesting**”.

In relation to foreign situate trust property, s.81B prevents the s.80 fictions from benefiting the taxpayer. The fictions may however benefit HMRC. Suppose:

- (1) H is the settlor.
- (2) W has an initial IIP.
- (3) Subsequently the settled property is held on trusts where neither H nor

---

<sup>56</sup> Similar rules apply on transfers between trusts; see 75.11 (Trust-transfer retesting).

<sup>57</sup> See 71.10 (Trusts: UK funds).

<sup>58</sup> Sections 78, 79 IHTA concern conditional exemption for historic property, which is not discussed here.

W has an interest in possession.<sup>59</sup>

In order to determine whether foreign situate trust property (in the s.80 notional settlement) is excluded property it is necessary to look at

- (1) the domicile of H at the time when the actual settlement was actually made *and*
- (2) the domicile of W at the time her interest in possession came to an end.

H and W must both be domiciled outside the UK (at the right time) in order for foreign situate property to qualify securely for excluded property status.

#### 71.13.5 *IIP settlor: Excluded property*

In practice, in lifetime trusts it is rare for the settlor's spouse to have an initial IIP but it is common for the settlor to have an initial IIP. Suppose first that:

- (1) Year 1: H has an initial IIP; and
- (2) Year 2: that IIP comes to an end (without W becoming entitled to an estate IIP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 2 though H is still treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if H was foreign domiciled in Year 2. The domicile of H at the time the trust was made would be irrelevant. This could not be used for tax avoidance, but s.81B IHTA nonetheless imposes its further condition relating to excluded property. In order to determine whether foreign situate trust property (in the s.80 notional settlement) is excluded property it is necessary to look at the domicile of H

- (1) at the time when the actual settlement was actually made *and*
- (2) at the time the interest in possession came to an end.

H must be domiciled outside the UK at both times in order for foreign

---

<sup>59</sup> Whether an estate IIP or not. This is anomalous, but the drafter of the 2006 rules did not think through the consequences for s.80.

situate property to qualify securely for excluded property status.

Suppose:

- (1) In Year 1, H creates a trust under which H has an estate IIP.
- (2) In Year 2, H dies and W becomes entitled to an estate IIP.
- (3) In year 3, W's interest comes to an end (H not at that time becoming entitled to an estate IIP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 3 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 3. The domicile of H would be irrelevant. Once again, s.81B IHTA imposes a further condition relating to excluded property. In relation to foreign situate trust property, s.81B prevents the s.80 fictions from benefiting the taxpayer. It may however benefit HMRC. In order to determine whether foreign situate trust property (in the s.80 notional settlement) is excluded property it is necessary to look at

- (1) the domicile of H at the time when the actual settlement was actually made *and*
- (2) the domicile of W at the time her interest in possession came to an end

H and W must both be domiciled outside the UK (at the right time) in order for foreign situate property to qualify for excluded property status.

#### 71.13.6 *Partly excluded property trust*

I use the term “**partly excluded property trust**” to refer to a trust where:

- (1) the trust property in the actual settlement is excluded property on ordinary principles; but
- (2) it is not excluded property in the s.80 notional settlement under s.80/81B rules.

The s.80/81B rules apply only for the purposes of “this chapter”: the relevant property trust regime. They have no wider application. So foreign property of a partly excluded property trust:

- (1) is not excluded property for the purposes of the relevant property trust taxation; but

(2) is excluded property for all other IHT purposes (eg GWR and the estate IIP trust regime).

Before 2006, s.80 did not much matter as a partly excluded property trust could remain IIP in form throughout its life. So in practice it qualified as excluded property. Now it cannot do so. So the tax position of these trusts has been seriously affected as an accidental result of the 2006 reforms.

#### 71.13.7 *s.80 retesting: Post-2006 trust*

No difficulty arises for lifetime trusts from 22 March 2006, unless the trust confers a disabled person's interest (which will be rare).

Section 80 still poses a trap for will trusts, where the testator is not UK domiciled and the spouse is (or later becomes) UK domiciled. One needs to avoid an IPDI.

A simple solution is to arrange that the will trust is discretionary at the outset, ie the widow does not have an initial interest in possession. A two-year discretionary period will in principle be needed to avoid s.144 IHTA. This is easy to arrange if the property given to the trust is not UK situate.

#### 71.13.8 *s.80 retesting: Pre-2006 trust*

In cases where an existing trust conferred an initial IIP on the settlor/spouse, it would be desirable to revoke the IIP before the settlor becomes deemed UK domiciled. It does not matter that the settlor/spouse may have an initial IIP provided that when it comes to an end<sup>60</sup> the life tenant is not UK domiciled or IHT deemed domiciled.

#### 71.13.9 *s.80 retesting: FOTRA/UK funds*

Section 81B(2) provides:

If the property would apart from this section be excluded property by virtue of section 48(3)(a) or (3A)(a), the property is at any time in a tax year to be regarded as excluded property for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property] .. only if Conditions A and B are met.

---

<sup>60</sup> Not being followed by another IIP for the settlor/spouse.

So s.80 retesting rule does not apply to FOTRA securities.

Until 2020, the s.80 retesting rule did not apply to UK funds. Now it does, but s.81B(7) IHTA provides a generous transitional relief:

Where the occasion first referred to in section 80(1) occurred before the day on which the Finance Act 2020 was passed, this section has effect as if, in subsection (2), “or (3A)(a)” were omitted.”

So (in short) in the case of a pre-2020 settlement, the s.80 retesting rule does not apply to UK funds.

#### 71.13.10 *s.80 fictions: Critique*

What is the purpose of the three s.80 fictions? The standard IHT trust regime would not work well where the settlor or their spouse has an initial estate interest in possession under a settlement commencing after 26 March 1974. Dymond explains:

In such a case there will be no chargeable transfer when the settlement was made and so no occasion to value the settled property for CTT or IHT at that time. If an exit charge arose nearly 10 years later, it might be difficult to ascertain the value at the commencement of the settlement, as required by s.68(5)(a) IHTA, because important evidence might have been lost or destroyed. It might also not be easy to ascertain the settlor’s cumulative total at that time as required by s.68(4)(b) IHTA. The same difficulty with the settlor’s cumulative total might occur at the time of the 10 yearly charge, because of s.66(5)(a).<sup>61</sup>

Section 80 solves this administrative problem but the reader may agree with the author that even before 2006 the cure was worse than the disease. This does explain why the s.80 fictions only apply for the purposes of the standard IHT trust regime.

Since 2006 the operation of the rules is bizarre, but (as is generally the case with bizarre law) careful planning can mitigate much of the unfairness.

It is suggested that the rules should be repealed.

#### **71.14 s.80 transitional rules**

---

61 *Dymond’s Capital Taxes* (looseleaf), para 19.700.

71.14.1 *“Occasion first referred to”*

The transitional rules use the cumbersome expression “The occasion first referred to” in s.80(1). This is the date that the property becomes held in the actual settlement, ie the date that the actual settlement is made.

71.14.2 *Pre-1974 trust*

Section 80(3) IHTA provides:

This section shall not apply if the occasion first referred to in subsection (1) above occurred before 27 March 1974.

So s.80 does not apply to property settled before 27 March 1974.

71.14.3 *Post-2006 trust*

The position is complicated by botched implementation of the 2006 IHT trust reforms.

Section 80(4) IHTA provides:

Where the occasion first referred to in subsection (1) above [date actual settlement made] occurs on or after 22 March 2006, this section applies—

- (a) as though for “a qualifying interest in possession” in each place where that appears in subsection (1) above there were substituted “a postponing interest”, and
- (b) as though, for the purposes of that subsection, each of the following were a “postponing interest”—
  - (i) an immediate post-death interest;
  - (ii) a disabled person’s interest.

Amended as s.80(4) IHTA directs, s.80(1) provides for settlements made from 22 March 2006:

Where a settlor or his spouse or civil partner is beneficially entitled to ~~a qualifying interest in possession~~

(i) an immediate post-death interest; [or]

(ii) a disabled person’s interest

in property immediately after it becomes comprised in the settlement,  
 [a] the property shall for the purposes of this Chapter [Chapter 3 Part 3, relevant property] be treated as not having become comprised in the settlement on that occasion;

[b] but when the property or any part of it becomes held on trusts under

which neither of those persons is beneficially entitled to a ~~qualifying interest in possession~~

(i) an immediate post-death interest; [or]

(ii) a disabled person's interest

the property or part shall for those purposes be treated as

[i] becoming comprised in a separate settlement

[ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to a ~~qualifying interest in possession~~

(i) an immediate post-death interest; [or]

(ii) a disabled person's interest

in it.

Section 80 can apply to trusts from 22 March 2006 if the trust confers:

- (1) an IPDI (which applies to will trusts) or
- (2) a disabled person's interest (which will be rare).

Why is a transitional serial interest not included?

#### 71.14.4 *Pre-2006; IIP ceases post-2006*

The word "qualifying" which should have been inserted into s.80 in 2006, was finally added in 2015. Section 13(1) F(no.2)A 2015 provides:

In section 80 of IHTA 1984 (initial interest of settlor or spouse or civil partner), for "an interest in possession", in each place it appears, substitute "a qualifying interest in possession".<sup>62</sup>

(2) The amendments made by this section come into force on the day after the day on which this Act is passed<sup>63</sup> subject to the saving provision in subsections (3) to (7).

I refer to this as the 2015 qualifying IP amendment.

What is the position if:

- (1) A trust is made before 22 March 2006 and confers an initial IIP on the settlor ("H").
- (2) That IIP comes to an end
  - [i] during the lifetime of H
  - [ii] the 2015 qualifying IP amendment was not in effect.
- (3) The spouse ("W") then acquired an IIP which is not a qualifying IIP

---

<sup>62</sup> See 70.7 (Qualifying interest in possession).

<sup>63</sup> The Act was passed on 18 Nov 2015, so the amendment took effect on 19 Nov 2015.

(“W’s non-estate IIP”).

In the 2014/15 edition of this work, I said:

A purposive construction is called for, or the provisions are nonsensical. It is suggested that the reference to an “interest in possession” in s.80 means an interest in possession to which s.49 IHTA applies. The non-estate IIP of W does not count as an interest in possession. So the trust property is treated as becoming comprised in a s.80 notional settlement on the death of H.

It seems that HMRC did not agree with that view and preferred the literal construction. EN F(no.2)B 2015 provides:

This measure [Clause 13 set out below] fixes an unintended effect of the legislation that allowed a (non-qualifying) interest in possession to escape all IHT charges, because the settled property was neither part of the beneficiary’s estate, nor was it comprised in a relevant property trust.

The transitional provisions for the 2015 qualifying IP amendment are therefore important. Section 13 provides:

- (3) Subsections (4) to (7) apply where—
- (a) the occasion first referred to in subsection (1) of section 80 of IHTA 1984 occurred before 22 March 2006,
  - (b) on that occasion the settlor, or the settlor’s spouse or civil partner, became beneficially entitled to an interest in possession in property which, as a result of that subsection, was treated as not becoming comprised in a settlement for the purposes of Chapter 3 of Part 3 of IHTA 1984 on that occasion, and
  - (c) at all times in the relevant period that property, or some particular part of it, has been property in which the settlor, or the settlor’s spouse or civil partner, has been beneficially entitled to an interest in possession,

and in subsections (4) to (7) “the protected property” means that property or, as the case may be, that particular part of it.

(4) The amendments made by subsection (1) do not have effect in relation to any particular part of the protected property for so long as the subsisting interest in possession continues to subsist in that part (but see subsections (5) and (6) for what happens afterwards).

(5) As from immediately before the time when the subsisting interest in possession comes to an end so far as subsisting in any particular part of

the protected property (whether or not it also comes to an end at the same time so far as subsisting in some or all of the rest of the protected property), section 80(1) of IHTA 1984 has effect in relation to that part as if the second appearance of “an interest in possession” were “a qualifying interest in possession”.

(6) If (ignoring this subsection), subsection (5) would have the consequence that a particular part of the protected property is treated as becoming comprised in a separate settlement at a time earlier than the time at which the subsisting interest in possession comes to an end so far as subsisting in that part, that part is to be treated as becoming comprised in a separate settlement at that later time.

(7) In this section—

- (a) “the relevant period” means the period beginning with the occasion first mentioned in section 80(1) of IHTA 1984 and ending with the day on which this Act is passed,
- (b) “qualifying interest in possession” has the same meaning as in section 80(1) of IHTA 1984,
- (c) “subsisting interest in possession”, in relation to a part of the protected property, means the interest in possession which subsisted in that part immediately before the end of the relevant period, and
- (d) the reference in subsection (3)(c) to the spouse or civil partner of a settlor includes a reference to the widow or widower or surviving civil partner of the settlor.

## 71.15 Adding property: 2020 changes

Suppose:

- (1) A settlor creates a trust when not UK domiciled.
- (2) The settlor<sup>64</sup> later adds property to the trust when UK domiciled.

Can the added property be excluded property? The answer for chargeable transfers after the FA 2020 is, no. Before then, there were two views.

- (1) “**The addition-date view**”: the excluded property status of the added property depends on the domicile of the settlor at the date the property is added to the trust.
- (2) “**The settlement-date view**”: the status of added property depends on

---

64 This section considers the position where the original settlor adds to a trust. For the position where others add to a trust, see 75.6 (B adds property to A’s trust).

the domicile of the settlor at the date the settlement was made.

HMRC took the addition-date view, but the settlement-date view was the better. I discussed this in earlier editions of this work, but omit the material now as it is of historical interest only.

Budget 2018 provided:

**2.21. Inheritance tax - trusts settlement definition**

... the government will introduce legislation in Finance Bill 2019-20 to reflect HMRC’s established legal position in relation to the IHT treatment of additions to existing trusts. The legislation will confirm that additions of assets by UK-domiciled (or deemed domiciled) individuals to trusts made when they were non-domiciled are not excluded property. The legislation will apply to IHT charges arising on or after the date on which Finance Bill 2019-20 receives Royal Assent, whether or not the additions were made prior to this date.

The chutzpah of the reference to an “HMRC’s established legal position” which legislation is to “confirm” or “clarify”<sup>65</sup> should not go unremarked. But there is a long history of HMRC misdescribing substantive reform as clarification.<sup>66</sup>

Suppose a settlor created a trust when UK domiciled and added property to it when foreign domiciled. The added property is now clearly excluded property, and in this case the taxpayer benefits from the new rules. Of course, a well-advised settlor should not be in this situation, but it does arise from time to time by accident.

71.15.1 *Gift to underlying trust co*

Suppose:

- (1) A settlor creates a trust while domiciled outside the UK;
- (2) The settlor becomes UK domiciled; and
- (3) The settlor gives property to a company owned by the trust.

The shares in the company (if not UK situate) must be and remain excluded property. But scope for avoidance is limited by the fact that the gift may be a gift with reservation and/or a chargeable transfer for IHT,

---

65 The word “clarify” is used in EN FB 2020 background note on clause 72.

66 See App 1.2 (Clarify/modernise/reform).

and the GAAR may also need consideration.

## **71.16 Interest in trust property**

An interest in trust property (an equitable interest) is itself an item of property which may be subject to IHT. That would lead to double taxation, eg in a trust for A for life, remainder to B, there might be

- (1) tax on the death of A (if A has an estate IIP) or 10-year charges; and
- (2) tax on the death of B (if the reversionary interest is an asset of B's estate).

### *71.16.1 Reversionary interest*

Section 48(1) IHTA deals with this problem by providing that a reversionary interest is generally excluded property:

A reversionary interest is excluded property unless—

- (a) it has at any time been acquired (whether by the person entitled to it or by a person previously entitled to it) for a consideration in money or money's worth, or
- (b) it is one to which either the settlor or his spouse [or civil partner] is or has been beneficially entitled, or
- (c) it is the interest expectant on the determination of a lease treated as a settlement by virtue of section 43(3) above.

What about a reversionary interest within (a) to (c)? Section 48(3) IHTA provides:

Where property comprised in a settlement is situated outside the UK—

- (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
- (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*  
...

The words in italics make it clear that the non-settled property rules apply. An equitable interest which is a reversionary interest may be excluded property if it meets the conditions of s.48(1) or if it is not UK situate and owned by a foreign domiciliary.

### *71.16.2 Interest in possession*

An equitable interest which is an estate IIP is excluded properly only if it is owned by a foreign domiciliary and is not UK situate. However, the disposal of the interest is not a transfer of value; s.51 IHTA. Tax is charged under s.52 only if the settled property is not excluded property.

### 71.16.3 *Purchased equitable interest*

Section 48(3) and (3A) IHTA both provide:

but this subsection is subject to subsection (3B) below ...

Section 48(3B) IHTA is an anti-avoidance provision which applies to two categories of settled excluded property: foreign situate property and UK funds. It provides:

Property is not excluded property by virtue of subsection (3) or (3A) above if—

- (a) a person is, or has been, beneficially entitled to an interest in possession in the property at any time,
- (b) the person is, or was, at that time an individual domiciled in the UK, and
- (c) the entitlement arose directly or indirectly as a result of a disposition made on or after 5th December 2005 for a consideration in money or money's worth.

EN FB 2006 explains:

8. ... By purchasing interests in existing trusts originally settled by a person domiciled outside the UK, UK-domiciled individuals have increasingly exploited this exemption to convert their wealth into IHT-free form.

9. This clause is aimed at blocking such avoidance by providing that property is not excluded property by virtue of section 48(3) or section 48(3A) IHTA if, at any time, a person domiciled in the UK has had an interest in possession in it, and their interest arose from a disposition for a consideration in money or money's worth. This applies whoever paid the money, and if the interest was acquired indirectly (for example, under a will or by intestacy) or has been passed on to someone else.

Section 48(3C) IHTA expands on this:

For the purposes of subsection (3B) above—

- (a) it is immaterial whether the consideration was given by the

- person or by anyone else, and
- (b) the cases in which an entitlement arose indirectly as a result of a disposition include any case where the entitlement arose under a will or the law relating to intestacy.

Section 48(3C)(a) confirms (what would have been clear) that the provision can apply if an interest is purchased by A and then given by A to B. I am unable to see the point of s.48(3C)(b).

#### 71.16.4 *FAs 2010 and 2012*

Consideration is also needed for the anti-avoidance rules introduced in 2010 and 2012: ss.52, 53 F(No.1)A 2010 s.48(3D) and s.74A, 74B IHTA. This topic will require many pages to discuss. It is some way from the themes of this book but I hope to address it in a future edition.

## CHAPTER SEVENTY TWO

# EXCLUDED PROPERTY EXEMPTIONS

### 72.1 Excluded property exemptions

#### 72.1 Excluded property exemptions

This chapter considers:

- (1) IHT exemptions for excluded property
- (2) Reliefs for:
  - (a) works of art
  - (b) foreign currency bank accounts
  - (c) foreign pensionsThese are not excluded property, but qualify for similar exemptions.
- (3) Related planning issues (except will drafting, which is considered in the next chapter)

In order to understand the IHT exemptions one must consider the relevant charging provisions.

#### 72.2 Lifetime IHT charge

We begin with the main charge to IHT. Section 1 IHTA provides:

Capital transfer tax shall be charged on the value transferred by a chargeable transfer.

##### 72.2.1 *Methods of exemption*

Statute uses a variety of ways to confer IHT exemption:

- (1) Sometimes a disposition is not a transfer of value.
- (2) Sometimes a transfer of value is exempt (eg the IHT spouse exemption).
- (3) Sometimes property is not in the individual's estate.

The excluded property exemptions work in a variety of ways. Each exemption needs to be seen in the context of the charging provision concerned.

### 72.3 Lifetime IHT charge: Exemption

The excluded property exemption for the lifetime charge slots into the definition of transfer of value.<sup>1</sup> Section 3(2) IHTA provides:

For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

“Ceases to form part of a person's estate” is not to be construed too literally. Suppose an individual makes a disposition which reduces the value of excluded property but the property itself is retained. That must come within the exemption in s.3(2).

Excluded property status is determined at the time of the disposition. It does not matter if the individual subsequently becomes UK domiciled or deemed domiciled. HMRC agree:

... where an individual transfers a property that is situated abroad while they are non-UK domiciled and then dies after having become deemed-UK domiciled, the transfer should be outside the charge to inheritance tax. This is in line with the current treatment of transfers made by non-domiciled individuals who die after having become UK domiciled. The government does not intend to change this treatment.<sup>2</sup>

#### 72.3.1 *Gift to UK bank account*

What is the position if a foreign domiciled donor makes a gift from their foreign bank account (ie, not a UK situate asset) to a *UK situate* bank account of the donee? The gift is not a transfer of value for IHT purposes. When funds are held in the donor's account, the donor has an asset (a debt). When funds are transferred to the donee's account, the donor's asset comes to an end and the donee acquires a new asset (a debt). The

---

1 See 70.3 (Transfer of value/value transferred).

2 “Reforms to the taxation of non-domiciles: further consultation” (2016) <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles-further-consultation>

donor is at no time entitled to the funds in the UK account.<sup>3</sup>

As a matter of banking law, the donor's cheque or other instruction to the bank to transfer funds from the donor's account to another account is in principle revocable until it is carried out<sup>4</sup> but that does not alter the analysis, because when the donee receives the credit to his account, the instructions have been carried out and the instruction has become irrevocable.

I stress this because the contrary has been suggested, but the position is perfectly clear.

## **72.4 Death: IHT charge & exemption**

The occasion of death would not be a transfer of value as defined in s.3(1) IHTA, as death does not involve a disposition. Section 4(1) IHTA deals with this:

On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death.

The excluded property exemption for the IHT charge on death slots into the definition of estate.<sup>5</sup>

## **72.5 IHT spouse exemption and excluded property**

### *72.5.1 Spouse exemption: Introduction*

I begin with an introduction to the IHT spouse<sup>6</sup> exemption.

Section 18(1) IHTA provides:

A transfer of value is an exempt transfer to the extent that the value transferred is  
[a] attributable to property which becomes comprised in the estate of the

---

3 For the banking law background, see 17.12.7 (Gift to non-relevant person).

4 For completeness: in any particular case it would be relevant to consider the documentation and proper law concerned; but that will not affect the IHT analysis because it makes no difference if the instruction to the bank is revocable or not.

5 See 70.2 ("Estate").

6 References to spouse include a civil partner; see App 3.2 ("Spouse") and App 3.3 ("Civil partner").

- transferor's spouse or civil partner or,  
 [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

I refer to this as the “**IHT spouse exemption**”.

The exemption applies to lifetime transfers and on death.

A full discussion of the IHT spouse exemption needs a book to itself. Section 18(3) IHTA and s.56 IHTA contain anti-avoidance provisions which are not discussed because they are too far from the themes of this work, and I have discussed them elsewhere.<sup>7</sup>

A striking feature of the exemption is that it applies even if the spouses are not living together. It is suggested that the exemption would be better targeted if it was restricted in that way, which would also be consistent with the CGT spouse exemption. But separated spouses will not complain.

This section considers the interrelation of the IHT spouse exemption and excluded property rules. I deal with other spouse exemption issues as they arise in the context of other topics:

<b>Topic</b>	<b>Para</b>
GWR spouse exemption	74.10
GWR on death: Spouse exemption	74.19
Interaction with spouse exemption	76.28.1
Restricted IHT spouse exemption	89.2
Spouse exemption on death of account holder	90.3.4

### 72.5.2 *Spouse exemption/excluded property interaction*

The issues arise most often on the death of a spouse. Suppose:

- (1) H (not UK domiciled) dies leaving an estate which consists of:
  - (a) excluded property and
  - (b) chargeable (ie, non-excluded) property
- (2) Part of H's estate passes<sup>8</sup> to H's spouse (“W”).

This raises the interesting question of the interaction of the excluded

---

<sup>7</sup> There is a full discussion on the (almost) identical charity provisions in Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20) online version <http://www.taxationofcharities.co.uk>

<sup>8</sup> By will, by survivorship or by the relevant succession law; this makes no difference.

property rules and the IHT spouse exemption.

Sections 4 and 5 IHTA provide (so far as relevant):

**4 Transfers on death**

(1) On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death. ...

**5 Meaning of estate**

(1) For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...

(b) the estate of a person immediately before his death does not include excluded property...

The following propositions are clear:

- (1) IHT is charged as if H made a transfer of value (“the deemed transfer of value”).
- (2) The estate of H immediately before H's death does not include H's excluded property.
- (3) The value transferred by the deemed transfer of value is equal to the value of H's estate (which is the value of the chargeable property).

*72.5.3 Gift of excluded property to spouse*

Suppose that on the death of H, only H's excluded property passes to W. Does the spouse exemption apply? Section 18(1) IHTA provides:

A transfer of value is an exempt transfer to the extent that the value transferred is

[a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,

[b] so far as the value transferred is not so attributable, to the extent that the estate is increased.<sup>9</sup>

The deemed transfer of value is not exempt under s.18(1)[a]. There is “property which becomes comprised in the estate of the spouse”. However, the value transferred is not attributable to that property.

That leaves the exemption in s.18(1)[b]. A transfer of value is an exempt

---

<sup>9</sup> In the case considered here the restriction in s.18(2) does not apply since H (the transferor) is not domiciled in the UK.

transfer to the extent that the estate of the spouse is increased. The estate of W is increased on the death of H.<sup>10</sup> It is therefore considered that the spouse exemption does apply, on a plain reading of the words.<sup>11</sup> Is this result so absurd that the courts should not adopt a plain reading? I do not see why it should be regarded as absurd. If W is UK domiciled the application of the spouse exemption on the death of H is reasonable, because W's estate is increased and the property W receives will be subject to tax on the death of W.<sup>12</sup> If the contrary view were adopted, then the practical consequence should not be to raise more funds for HMRC, but only to pose a trap for taxpayers and their advisers.

#### 72.5.4 *Pecuniary legacy to spouse*

Suppose H leaves W a pecuniary legacy. The IHT Manual provides:

**11013 Quantifying the exemption** [Jan 2020]

*... Example ...*

Where the will of a person domiciled (IHTM13000) abroad disposes of their UK estate and some or all of their world estate, exemption for pecuniary legacies (IHTM12082) should be given against the UK estate in the proportion it bears to the worldwide estate, and not against the UK estate alone. Any case where you have difficulty obtaining details of the world estate, or where our official practice meets resistance, should be referred to Technical.

This is correct in relation to charities. The IHT charity exemption is more narrowly worded. But for spouses, it is not consistent with the words of s.18(1)[b]. It is suggested that the spouse exemption applies to the full extent of the pecuniary legacy. It makes no difference whether the

---

10 This is the case even if the property is excluded property in the estate of W (which will be the case if W was not UK domiciled). Excluded property is "property" for IHT and (except immediately before death) a person's estate includes their excluded property.

11 Exemption is given to the extent of the value of the property given to W.

12 It might be said to be anomalous because a simple lifetime gift of excluded property by H to H's spouse would not be a transfer of value, so it would not qualify as an exempt transfer under the IHT spouse exemption. But of course in such a case the spouse exemption is not needed.

The end result is consistent with the exemption for funeral expenses, which are set against UK property alone; see 76.44 (Funeral expenses).

pecuniary legacy is subsequently paid out of UK or foreign situate property.

## **72.6 Allocation of exemption**

The reader might think that answers may be found in Chapter 3 Part 2 IHTA (Allocation of Exemptions). In order to focus on the main issue, I do not consider the provisions dealing with abatement and the burden of IHT.

### *72.6.1 Definitions*

Before turning to the rules, it is helpful to consider the meaning of the term “specific gift”. Section 42(1) IHTA first defines “gift”:

In this Chapter [Chapter 3 Part 2 IHTA]—  
“gift”, in relation to any transfer of value, means the benefit of any disposition or rule of law by which, on the making of the transfer, any property becomes ... the property of any person or applicable for any purpose;  
“given” shall be construed accordingly;

Section 42(1) IHTA then defines “specific gift”:

“specific gift” means any gift other than a gift of residue or of a share in residue.

### *72.6.2 Application of allocation rule*

Section 36 IHTA provides:

Where  
[i] any one or more of sections 18, 23 to 27 and 30 above apply in relation to a transfer of value but  
[ii] the transfer is not wholly exempt—  
    (a) any question as to  
        [A] the extent to which it is exempt or,  
        [B] where it is exempt up to a limit, how an excess over the limit is to be attributed to the gifts concerned  
    shall be determined in accordance with sections 37 to 40 below...

We are considering the estate of a testator (“T”) who by will makes gifts to a spouse (“S”) and a chargeable beneficiary (say, a child) (“X”).

The estate is as follows:

Chargeable assets (“C”), value £C  
 Excluded property (“E”), value £E  
 Transfer of value on death = value of chargeable assets = £C  
 Property given to S has value £S

Condition [i] is satisfied.

Condition [ii] is satisfied if  $£S < £C$ . But if  $£S > £C$  (the value of what is given to S equals or exceeds the value of the chargeable property) then the estate is wholly exempt, condition [ii] is not satisfied, and the allocation of exemption rules do not apply.

72.6.3 *Allocation of exemption rule*

Section 38(1) IHTA provides (so far as relevant):

Such part of the value transferred shall be attributable to specific gifts as corresponds to the value of the gifts ...

Consider just a few of the possible permutations:

Case	Specific Gifts			Residue
	Gift of C	Gift of E	Pecuniary	
1	S	X	-	-
2	X	S	-	-
3	S	-	-	X
4	X	-	-	S
5	-	S	-	X
6	-	X	-	S

Assume £S (value given to the spouse) is less than £C (the value of the chargeable property) so the transfer is not wholly exempt. It is plain that the allocation of exemption rule has absurd results:

In cases 1 and 2, the transfer of value is attributed to both gifts. Quite apart from the fact that the value of the gifts exceeds the value transferred, it makes no difference whether the gift to S is of excluded or chargeable property. In cases 3 to 6, the transfer of value is attributed to the gift of C.

It is suggested that the allocation of exemption rules are intended to solve problems arising on:

- (1) gifts of business property, and
- (2) gifts which bear their own tax.

The allocation of exemption rules have no application to allocation of

exemptions for estates holding excluded property.

## **72.7 10-year charge**

IHT operates a system of 10-year and exit charges on relevant property trusts. A full discussion needs a book to itself. I focus on the reliefs for excluded property, but as usual, it is necessary to review the charging provisions to see the reliefs in context.

The 10-year charge on trusts is in 64(1) IHTA:

Where immediately before a ten-year anniversary all or any part of the property comprised in a settlement is relevant property, tax shall be charged

[a] at the rate applicable under sections 66 and 67 below

[b] on the value of the property or part at that time.

The excluded property exemption for the 10-year charge comes in the definition of relevant property. If trust property is excluded property on the 10-year anniversary, it is not relevant property so there is no charge.

### *72.7.1 Property formerly excluded*

It may happen that:

- (1) Relevant (non-excluded) trust property was formerly excluded property; and
- (2) The property is not excluded at the time of the 10-year anniversary.

In this case, s.66(2) IHTA provides a time-apportioned relief:

[a] Where the whole or part of the value mentioned in section 64 above is attributable to property which

[i] was not relevant property, or

[ii] was not comprised in the settlement,

throughout the period of ten years ending immediately before the ten-year anniversary concerned,

[b] the rate at which tax is charged on that value or part shall be reduced by one-fortieth for each of the successive quarters in that period which expired before the property became, or last became, relevant property comprised in the settlement.

This will apply in particular:

- (1) If a trust disposes of excluded property and acquires non-excluded property which is held at the time of the 10-year anniversary.

- (2) If a trust holds a company which holds a UK residence: the shares ceased to be excluded property in 2017 under the IHT residence-property code.

### 72.7.2 *Undistributed trust income*

Section 64(1A) IHTA provides:

For the purposes of subsection (1) above, property held by the trustees of a settlement immediately before a ten-year anniversary is to be regarded as relevant property comprised in the settlement at that time if—

- (a) it is income of the settlement,
- (b) the income arose before the start of the five years ending immediately before the ten-year anniversary,
- (c) the income arose (directly or indirectly) from property comprised in the settlement that, when the income arose, was relevant property, and
- (d) when the income arose, no person was beneficially entitled to an interest in possession in the property from which the income arose.

I refer to income within s.64(1A) as “**undistributed trust income**”.

This deals with the problem that undistributed trust income is not settled property for IHT purposes, unless and until it is accumulated (at which point it becomes settled property).<sup>13</sup> It will be very rare that trustees retain trust income unaccumulated and undistributed for more than 5 years; but it could happen if there was a tax incentive to do so.

Five years seems a generous period for this rule, but it does not much matter.

In these (somewhat unlikely) circumstances, s.64 IHTA goes on to confer relief for the undistributed trust income, in accordance with the rules for excluded property:

(1B) Where the settlor of property comprised in a settlement was not domiciled in the UK at the time the property became comprised in the settlement (but see also subsection (1BA)) and is not a formerly domiciled resident for the tax year in which the ten-year anniversary

---

<sup>13</sup> See 1.6.1 (Undistributed trust income).

falls, income of the settlement is not to be regarded as relevant property comprised in the settlement as a result of subsection (1A) above so far as the income—

- (a) is situated outside the UK, or
- (b) is represented by a holding in an authorised unit trust or a share in an open-ended investment company.

(1BA) [Section 64(1BA) deals with accumulated income, see 71.8.1 (Accumulated income).]

(1C) Income of the settlement is not to be regarded as relevant property comprised in the settlement as a result of subsection (1A) above so far as the income—

- (a) is represented by securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above, and
- (b) it is shown that all known persons for whose benefit the settled property or income from it has been or might be applied, or who are or might become beneficially entitled to an interest in possession in it, are persons of a description specified in the condition in question.

Note that undistributed trust income does not fall within the definition of “excluded property”. So the IHTA residential-property code, in sch A1 IHTA, which de-excludes property which would otherwise be excluded property by virtue of s.6 or s.48 IHTA,<sup>14</sup> does not apply here.

### 72.8 Exit charge

The on trusts in s.65 IHTA is known as the exit charge. It applies in two circumstances, or sets of circumstances:

<b>Circumstance</b>	<b>s.65</b>	<b>See para</b>
Ceasing to be excluded property	(1)(a)	72.8.1
Reducing value of trust property	(1)(b)	72.8.2

Perhaps one should refer to exit charges, in the plural, but it is usual to use the singular.

I do not discuss the computation of the amount of the exit charge, though I hope to cover this in a future edition.

---

14 See 78.2 (De-exclusion of sch A1 property).

### 72.8.1 *Cease to be relevant property*

Section 65 IHTA provides:

- (1) There shall be a charge to tax under this section—
  - (a) where the property comprised in a settlement or any part of that property ceases to be relevant property (whether because it ceases to be comprised in the settlement or otherwise);

This applies in principal where:

- (1) Relevant (non-excluded) trust property ceases to be trust property (ie, a beneficiary becomes absolutely entitled); or
- (2) Relevant (non-excluded) trust property remains trust property, but ceases to be relevant property, typically because it becomes excluded property. That may happen if:
  - (a) the situs changes (eg a chattel is moved outside the UK)
  - (b) non-excluded property is sold and excluded property is acquired<sup>15</sup>

If a beneficiary becomes absolutely entitled to excluded property, there is no exit charge because excluded property is not relevant property, so it does not “cease to be relevant property” when it ceases to be comprised in a settlement.

There is no exit charge if an excluded property trust makes a distribution in the form of a payment from an offshore bank account of the trustees to a UK bank account of a beneficiary, as no property ceases to be relevant (non-excluded) property.<sup>16</sup>

### 72.8.2 *Reduce value of relevant property*

Section 65 IHTA continues:

- (1) There shall be a charge to tax under this section ...
  - (b) in a case in which paragraph (a) above does not apply, where the trustees of the settlement make a disposition<sup>17</sup> as a result of

<sup>15</sup> Settled property is regarded for IHT as a fund with a continuing identity, not as a set of distinct assets.

<sup>16</sup> Contrast 72.3.1 (Gift to UK bank account).

<sup>17</sup> Section 65(9) IHTA extends the meaning of disposition to include an omission: “For the purposes of this section trustees shall be treated as making a disposition if they omit to exercise a right (unless it is shown that the omission was not deliberate) and the disposition shall be treated as made at the time or latest time when they

which the value of relevant property comprised in the settlement is less than it would be but for the disposition.

The drafting is based on the definition of transfer of value, in s.3(1) IHTA.<sup>18</sup>

See too 77.4.2 (IHT close-company code/Non-IIP trust).

### 72.8.3 10-year/exit charge: Planning

IHT DOTAS guidance considers this topic:<sup>19</sup>

**Example 13:** Immediately before a ten-year anniversary a distribution is made from a relevant property settlement to reduce the charge on the subsequent ten-year anniversary

The guidance considers whether the two IHT DOTAS conditions are met. Condition 1, so far as relevant, is that:

one of the main purposes of the arrangements is to enable a person to obtain one or more of the following advantages in relation to inheritance tax ...

(b) the avoidance or reduction of a charge to inheritance tax under section 64, 65, 72 or 94 of IHTA 1984;

On the facts as posited (“a distribution ... made... to reduce the 10 year charge) this condition is met.<sup>20</sup>

The important point is HMRC’s discussion of DOTAS condition 2. This provides, so far as relevant:

Condition 2 is that the arrangements involve one or more contrived or abnormal steps without which the tax advantage could not be obtained.<sup>21</sup>

HMRC say:

---

could have exercised the right.”

The drafting is based on s.3(3) IHTA; see 70.5 (Omission: Deemed disposition).

18 See 70.3 (Transfer of value/value transferred).

19 HMRC, “Guidance: Disclosure of tax avoidance schemes” (April 2018)

<https://www.gov.uk/government/publications/disclosure-of-tax-avoidance-schemes-guidance>

20 But whether an actual distribution would have that purpose is a question of fact in each case.

21 Reg 4(3) Inheritance Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations 2017.

The inheritance tax legislation applies a tax charge in respect of the distribution and another tax charge at the ten-year anniversary. The choice of making the distribution before the ten-year anniversary may be to achieve a lower overall inheritance tax bill, but the trustees choosing to exercise their powers to make a distribution is, on its own, neither contrived nor abnormal. It would not therefore be reasonable to expect an informed observer to conclude that condition 2 was met.

The author does not explain why the distribution before the ten-year anniversary achieves a lower overall IHT bill, but it often happens that the exit charge (if any) is lower than the 10-year charge. In particular, the exit charge on a distribution within the first 10 years of a trust may be £nil.

An income distribution to a non-resident or remittance basis taxpayer may avoid the exit charge, so that both charges are avoided. But that too is not “contrived or abnormal”.

## **72.9 Exit charge reliefs**

In this section I discuss two reliefs, or sets of reliefs, from the exit charge:

- (1) excluded property reliefs
- (2) income-receipt relief

The residence-property code has two further exemptions to the IHT exit charge.<sup>22</sup>

### *72.9.1 Property becomes excluded*

Under s.65(1)(a) IHTA there would be a charge if relevant (non-excluded) trust property becomes excluded property (as it then ceases to be relevant property). There are four exemptions which usually prevent this charge.

Section 65(7) IHTA provides relief if relevant (non-excluded) trust property becomes non-UK situate excluded property:

Tax shall not be charged under this section by reason only that property comprised in a settlement

[a] ceases to be situated in the UK

[b] and thereby becomes excluded property by virtue of section 48(3)(a) above.<sup>23</sup>

---

<sup>22</sup> See 78.14 (Residence exit-charge reliefs).

<sup>23</sup> For s.43(3)(a), see 71.8 (Trusts: Foreign situate property).

Section 65(7A) IHTA provides relief if relevant (non-excluded) trust property becomes UK-fund excluded property:

Tax shall not be charged under this section by reason only that property comprised in a settlement becomes excluded property by virtue of section 48(3A)(a) (holding in an authorised unit trust or a share in an open-ended investment company is excluded property unless settlor domiciled in UK when property became comprised in settlement).<sup>24</sup>

Section 65(7B) IHTA provides relief if relevant (non-excluded) trust property becomes excluded property because a formerly-domiciled resident settlor ceases to be UK resident or dies:

Tax shall not be charged under this section by reason only that property comprised in a settlement becomes excluded property by virtue of section 48(3E) ceasing to apply in relation to it.<sup>25</sup>

Section 65(8) IHTA provides some relief if relevant (non-excluded) trust property becomes FOTRA-security excluded property:

If the settlor of property comprised in a settlement was not domiciled in the UK when property became comprised in the settlement (but see also subsection (8A)),<sup>26</sup> tax shall not be charged under this section by reason only that

- [a] the property is invested in securities issued by the Treasury subject to a condition of the kind mentioned in section 6(2) above and
- [b] thereby becomes excluded property by virtue of section 48(4)(b) above.

This is not a complete FOTRA exemption: there is still an exit charge if trust property becomes FOTRA-security excluded property under

- (1) s.48(4)(a), non-resident entitled to estate IIP; or
- (2) s.48(4)(b), if the settlor was UK domiciled.<sup>27</sup>

There could be an exit charge if relevant (non excluded) trust property becomes excluded property under other categories of excluded property,

---

24 For s.43(3A)(a), see 71.10 (Trusts: UK funds).

25 See 71.8.2 (Formerly-dom resident settlor).

26 Section 65(8A) deals with accumulated income, see 71.8.1 (Accumulated income).

27 See 71.11 (Trusts: FOTRA securities).

see s.58(a) - (eb); but in practice that would be rare.

### 72.9.2 *Property previously excluded*

There is an exit charge if relevant (non-excluded) trust property ceases to be trust property, ie a beneficiary becomes absolutely entitled.

It may happen that:

- (1) Relevant (non-excluded) trust property was formerly excluded property; and
- (2) The property ceases to be trust property (eg a beneficiary becomes absolutely entitled).

In this case there is a time-apportioned relief. Section 68(3) IHTA provides the relief before the first 10-year anniversary:

- [A] Where the whole or part of the amount on which tax is charged is attributable to property which
  - [i] was not relevant property, or
  - [ii] was not comprised in the settlement,
 throughout the period referred to in subsection (2) above,
- [B] then in determining the appropriate fraction in relation to that amount or part—
  - (a) no quarter which expired before the day on which the property became, or last became, relevant property comprised in the settlement shall be counted, but
  - (b) if that day fell in the same quarter as that in which the period ends, that quarter shall be counted whether complete or not.

This is the exit charge equivalent of s.66(2) IHTA (relief for 10-year charge).<sup>28</sup>

The relief is incorporated by reference for an exit charge after the first 10-year anniversary. Section 69(4) IHTA provides:

- [a] For the purposes of this section the appropriate fraction is so many fortieths as there are complete successive quarters in the period beginning with the most recent ten-year anniversary and ending with the day before the occasion of the charge;
- [b] but subsection (3) of section 68 above shall have effect for the purposes of this subsection as it has effect for the purposes of

---

28 See 72.7.1 (Property formerly excluded).

subsection (2) of that section.

### 72.9.3 *Income-receipt relief*

Section 65(5) IHTA provides:

Tax shall not be charged under this section in respect of<sup>29</sup>—

- (b) a payment<sup>30</sup> which
  - [i] is (or will be) income of any person for any of the purposes of income tax or
  - [ii] would for any of those purposes be income of a person not resident in the UK if he were so resident or in respect of a liability to make such a payment.<sup>31</sup>

I refer to this as exit-charge **“income-receipt relief”**.

There is a similar relief in the IHT close-company code.<sup>32</sup>

Suppose trustees receive income and distribute it. There is no exit charge, because unaccumulated income is not settled property, and so not relevant property, so s.65(1) does not apply. Income-receipt relief is not needed here. But it can happen that trustees distribute trust capital in a manner which constitutes income of the recipient, and then income-receipt relief will apply.

Suppose a discretionary trust holds a company and procures the company to make a dividend. The value of the settled property (the shares) is reduced, because the income received is not settled property. At first sight there is nevertheless no exit charge, because the trustees have not made a disposition (even by omission). However the IHT close-company code needs consideration.<sup>33</sup>

If a UK resident beneficiary receives a benefit which is taxable in the year of receipt under s.731, it is considered that income-receipt relief applies. The benefit is income of the recipient.

---

29 See App 2.6.1 (In respect of).

30 Section 63 IHTA provides a wide definition: “In this Chapter [Chapter 3 Part 3], unless the context otherwise requires ... “payment” includes a transfer of assets other than money”.

31 It is difficult to see how an exit charge could arise in relation to a liability to make a payment; but it does not matter.

32 See 77.3.5 (Income-receipt relief).

33 See 77.5 (Dividend: Close-co code analysis).

Suppose:

- (1) at the time the benefit is received there is no relevant income; but
- (2) the person abroad receives relevant income later in the same tax year.

It is considered that the relief still applies: the benefit is still taxable. This explains why s.65(5) refers to a payment which is *or will be* income.

Similarly, if a UK resident beneficiary receives a capital payment which is subject to income tax under OIG s.87, the capital payment is subject to income tax, and exit-charge income-receipt relief applies.

This is consistent with the object of the relief, which is to prevent a double charge to IT and IHT.

What if the beneficiary is non-resident? The relief applies because the payment “would for IT purposes be income of a person not resident in the UK if he were so resident”.

Suppose a series of payments to a non-resident, thus:

- (1) A discretionary trust with a UK domiciled settlor had funds of £2m and relevant income of £1m.
- (2) Year 1: the trust made a capital payment to a non-resident of £1m.
- (3) Year 2: the trust made another payment to the non-resident of £1m.

There is no exit charge in year 1 as income-receipt relief applies. But there is an exit charge in year 2. The question is whether the payment “would ... be income of a person not resident in the UK if he were so resident.” The hypothesis should be that the person is UK resident in year 1 as well as year 2. The payment in year 1 would match the relevant income, and the payment in year 2 would not be subject to IT. The relevant income is not counted twice.

## **72.10 Termination of qualifying IIP**

Section 52(1) IHTA provides:

Where at any time during the life of a person beneficially entitled to an interest in possession in settled property his interest comes to an end, tax shall be charged, subject to section 53 below, as if at that time

- [1] he had made a transfer of value and
- [2] the value transferred had been equal to the value of the property in which his interest subsisted.

### *72.10.1 Disposal for consideration*

Section 52(2) IHTA provides:

If

[a] the interest comes to an end by being disposed of by the person beneficially entitled to it and

[b] the disposal is for a consideration in money or money's worth, tax shall be chargeable under this section as if the value of the property in which the interest subsisted were reduced by the amount of the consideration; but in determining that amount the value of a reversionary interest in the property or of any interest in other property comprised in the same settlement shall be left out of account.

### 72.10.2 *Reducing value of IIP property*

Section 52(3) IHTA provides:

[A] Where

[I] a transaction is made between the trustees of the settlement and a person who is, or is connected with,—

(a) the person beneficially entitled to an interest in the property, or

(b) a person beneficially entitled to any other interest in that property or to any interest in any other property comprised in the settlement, or

(c) a person for whose benefit any of the settled property may be applied,

[II] and, as a result of the transaction, the value of the first-mentioned property is less than it would be but for the transaction,

[B] a corresponding part of the interest shall be deemed for the purposes of this section to come to an end,

[C] unless the transaction is such that, were the trustees beneficially entitled to the settled property, it would not be a transfer of value.

This broadly corresponds to the exit charge on reduction of value of trust property though the wording is not entirely aligned.<sup>34</sup>

### 72.10.3 *Charges only on qualifying IIP*

Section 52(2A)(3A) IHTA are conveniently read side by side:

---

34 See 72.8.2 (Reducing value of trust property).

<b>52(2A) IHTA</b>	<b>52(3A) IHTA</b>
Where the interest mentioned in subsection (1) or (2) above is one to which the person became beneficially entitled on or after 22nd March 2006, that subsection applies in relation to the coming to an end of the interest only if the interest is—	Where the interest mentioned in paragraph (a) of subsection (3) above is one to which the person mentioned in that paragraph became beneficially entitled on or after 22nd March 2006, that subsection applies in relation to the transaction only if the interest is—
(a) an immediate post-death interest,	[identical]
(b) a disabled person's interest, or	[identical]
(c) a transitional serial interest	[identical]
or falls within section 5(1B) above.	[identical]

72.10.4 *Interests in part*

Section 52(4) IHTA provides:

References in this section or section 53 below to any property or to an interest in any property include references to part of any property or interest; and—

- (a) the tax chargeable under this section on the coming to an end of part of an interest shall be charged as if the value of the property (or part) in which the interest subsisted were a corresponding part of the whole; and
- (b) if the value of the property (or part) to which or to an interest in which a person becomes entitled as mentioned in subsection (2) of section 53 below is less than the value on which tax would be chargeable apart from that subsection, tax shall be chargeable on a value equal to the difference.

**72.11 Termination of IP: Reliefs**

Section 53 IHTA contains a set of reliefs for the charge under s.52, the first of which is relevant here. Section 53(1) IHTA provides:

Tax shall not be chargeable under section 52 above if the settled property is excluded property.

## **72.12 When excluded property matters**

RI 166 states:

... an “excluded” asset is not always completely irrelevant for the purposes of IHT.

The RI gives two examples. The first concerns marriage value between excluded and non-excluded property:

an “excluded” asset in a person’s estate may still affect the valuation of another asset in the estate, for example, an “excluded” holding of shares in an unquoted company may affect the value of a similar holding in the estate which is not “excluded”;

One could just about imagine circumstances where this could happen, but it will so rarely (if ever) happen in practice that it is not worth investigating here.

The second example concerns IHT exit charges on relevant property trusts:

the value of an “excluded” asset at the time the asset becomes comprised in a settlement may be relevant in determining the rate of any tax charge arising in respect of the settlement under the IHT rules concerning trusts without [estate] interests in possession.<sup>35</sup>

This arises where a trust holds (or has held) excluded and non-excluded (chargeable) property. Before 2017 this was unusual, but it might now happen under the IHT residence-property code.

## **72.13 Foreign currency account**

### *72.13.1 Individual account*

Section 157(1)(a) IHTA provides a limited relief for non-residents foreign currency bank accounts:

In determining for the purposes of this Act the value of the estate

---

<sup>35</sup> RI 166 refers to:

(1) Exit charges: s.68(5), and 69(3) IHTA;

(2) 10-year charge: s.66(4) IHTA, but following reforms in 2015, this is not now a case where excluded property affects the IHT charge.

immediately before his death of a person to whom this section applies there shall be left out of account the balance on—

- (a) any qualifying foreign currency account of his ...

Section 157(5) IHTA defines “qualifying foreign currency account”:

In this section “qualifying foreign currency account” means a foreign currency account with a bank<sup>36</sup>; and for this purpose—

- (a) “foreign currency account” means any account other than one denominated in sterling.

Section 157(2) IHTA explains who qualifies for the relief:

This section applies to a person who is not domiciled and not resident<sup>37</sup> in the UK immediately before his death.

### 72.13.2 *Trust account*

Section 157(1)(b) IHTA provides a similar but more restricted relief for a foreign currency trust bank account of an IIP trust:

(1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on ...

- (b) subject to subsection (3) below, any qualifying foreign currency account of the trustees of settled property in which he is beneficially entitled to an interest in possession.

...

(3) Subsection (1)(b) above does not apply in relation to settled property [a] if the settlor was domiciled in the UK when the settled property became comprised in the settlement, or

[b] if the trustees are domiciled or resident in the UK immediately before the beneficiary’s death.

For the definition of trust residence see 6.19 (Trust residence for IHT).

36 Section 157(6) IHTA provides: “In this section ‘bank’ has the meaning given by section 991 of the Income Tax Act 2007.”

37 Section 157(4) IHTA applies the income tax definition of residence:

“For the purposes of this section—

- (a) the question whether a person is resident in the UK shall, subject to para (b) below, be determined as for the purposes of income tax”.

Para (b) deals with trustee residence, discussed below.

Domicile presumably depends on the domicile of the trustees in their personal capacity. The rule that trustee's domicile should be relevant is odd, and inconsistent with the general scheme of trust IHT or the taxation of trusts generally.

This relief has not been amended in line with the 2006 changes in inheritance taxation of trusts. There is no relief for discretionary trusts or income accumulated in the account after a change of domicile of the settlor;<sup>38</sup> but the relief does apply to non estate interests in possession.

The relief is not important, so these oddities do not much matter.

### 72.13.3 *Overdrawn account*

The IHT Manual provides at para 4380:

**IHTM04380 foreign currency bank accounts** [Sep 2018]

... Where the conditions are met, the balance on the account, whether in credit or in debit should be left out of account. You should refer any case of difficulty, especially if you are seeking to disallow a debit balance, to Technical. ...

The last sentence suggests, perhaps, that HMRC are not entirely confident in this interpretation. It seems literally correct on a first reading, and provides an apparent symmetry of treatment with accounts with a positive balance; on the other hand it is a daft rule, a petty trap easily avoided by the well advised, and inconsistent with the general approach of deduction for debts.<sup>39</sup> I do not think it could have been the intention of parliament.

See too 76.25 (Debt attributable to foreign account).

### 72.13.4 *Foreign currency: Critique*

This is a limited relief. The bank account is *not* excluded property for IHT purposes. It is only disregarded on the death of the owner or life tenant, so it is taken into account for lifetime gifts of individuals, and 10-year charges on trusts. The conditions for the relief are also stricter than for excluded property. It would in almost all cases be better to use a foreign bank account (which will be excluded property) rather than to rely on this relief.

---

38 See 71.8.1 (Accumulated income).

39 See 76.4 (Allocation of debt).

The purpose of the relief is, I think, to encourage foreign domiciliaries to deposit funds with UK banks. If that is right, these restrictions make no sense. It is suggested that foreign currency accounts (indeed all accounts) ought simply to qualify as excluded property in the same way as non-UK accounts. That change would

- (1) ensure that the relief serves its purpose
- (2) ensure the deductibility of overdrawn accounts.
- (3) simplify the law<sup>40</sup>

Alternatively, the relief is just clutter in the system and if (as I expect) it is not much used it would be better to repeal it.

## **72.14 Works of art**

The IHTA provides a pragmatic relief for works of art. Section 5(1) IHTA provides relief on death:

For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...

- (b) the estate of a person immediately before his death does not include ... a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose).

Section 64(2) IHTA provides relief from 10-year charges:

For the purposes of subsection (1) above, a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose) is not to be regarded as relevant property.

Section 272 IHTA defines these terms:

“foreign-owned”, in relation to property, means property in the case of which the person beneficially entitled to it is domiciled outside the UK or, if the property is comprised in a settlement, in the case of which the settlor was domiciled outside the UK when the property became comprised in the settlement;

---

40 The current position further complicates anti-avoidance provision withdrawing relief for excluded property, as they need to refer to both excluded property and to foreign currency bank accounts; eg see 76.25 (Debt attributable to foreign account).

“public display” means display to which the public are admitted, on payment or not, but does not include display with a view to sale;

The reason is tax competition. Dawn Primarolo (then Financial Secretary to the Treasury) explained:

the public interest would not be served if foreign owners of works of art were unwilling to send them to the UK for [purposes of public display, cleaning or restoration] for fear of a potential inheritance tax charge.<sup>41</sup>

This relief falls short of a complete exemption but in practice it is sufficient, and the gaps are not sufficiently important to discuss further here. See too 18.31 (Public access rule).

### **72.15 Residence nil-rate band**

A discussion of the residence nil-rate band needs a long chapter to itself.<sup>42</sup> This takes us too far from the themes of this book, but the IHT Manual has one comment which is relevant to note here:

#### **IHTM46032 Residence outside the UK [Nov 2018]**

There is no requirement that the residence (dwelling-house) has to be in the UK but it does have to be within the scope of IHT and it has to be included in a person’s estate. Whether the residence is within the scope of IHT may depend on the domicile status of the deceased and the location of the property.

For UK domiciled individuals, who are subject to IHT on their worldwide assets, it does not matter where the residence (dwelling-house) which is left to direct descendants is located. For non-UK domiciled individuals, who are subject to IHT only on their assets in the UK, the residence which is to be left to direct descendants must be situated in the UK in order to be within their estate for IHT purposes and hence to be able to qualify for the RNRB.

### **72.16 Overseas pensions**

A full discussion of the IHT treatment of pensions needs a book to itself. This section focusses on the issues closest to the themes of this book. See

---

41 Ministerial Statement 25 February 2003 [2003] STI 303.

42 See Kessler & Ashley, “Residence Nil-rate Band”

<https://www.taxchambers.com/wp-content/uploads/2018/01/Residence-nil-rate-band-analysis-002.pdf>

too 97.34 (Situs of pension and death benefits).

Section 153 IHTA provides a narrow relief:

- (1) In determining for the purposes of this Act the value of a person's estate immediately before his death there shall be left out of account any pension payable under the regulations or rules relating to
  - [a] any fund vested in Commissioners under section 273 of the Government of India Act 1935 or
  - [b] to any fund administered under a scheme made under section 2 of the Overseas Pensions Act 1973 which is certified by the Secretary of State for the purpose of this section to correspond to an Order in Council under subsection (1) of the said section 273....
- (3) Subsection (1) above shall be construed as if contained in section 273 of the Government of India Act 1935 ...
- (4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

## **72.17 Excluded property planning**

In the following discussion it is assumed the property concerned is not a UK residence, so it is not necessary to consider the IHT residential-property code.

### *72.17.1 Planning for individual*

A foreign domiciliary should arrange, as far as possible, that their assets are situated outside the UK so that they qualify as excluded property and fall outside inheritance tax. The question is: how is the individual's property to be transferred abroad?

The transfer abroad of funds from a UK bank account poses no problem. The transfer of bearer instruments abroad raises no problem. Chattels could be physically moved abroad but that may not be practical.

It is possible to turn UK situate shares and securities into non-UK situate

assets for IHT.<sup>43</sup>

Any UK asset could be sold and the proceeds remitted abroad. This is simple and satisfactory for inheritance tax; however, a sale raises CGT and commercial considerations.

If the individual is in good health, there is a lot to be said for doing nothing and ignoring IHT planning. The only inheritance tax risk in this approach is that the individual might die so suddenly that no steps to save tax can be taken. This risk is reduced (but not eliminated) if the spouse exemption is available. It might be possible to take out insurance.

### 72.17.2 *Anticipation of UK domicile*

The standard course for the foreign domiciliary is to transfer their assets to a trust. If the settlor has a foreign domicile when at the time the trust is made, settled property can be excluded property and will retain that status indefinitely, even if the settlor later become domiciled here. This has been common practice since at least 1975 and (in the case of deemed domicile) parliament has endorsed it with protected-trust relief.

HMRC accept this. DOTAS guidance provides:

#### **13.4 Examples of arrangements which aren't notifiable**

As set out above, the hallmark does not catch straightforward inheritance tax planning...

**Example 12:** A non-UK domiciled individual transfers non-UK situs property into a trust just before they become deemed domiciled in the UK. The individual can benefit from the trust

*Condition 1:* The transfer reduces the value of the person's estate, but this reduction does not give rise to a chargeable transfer or potentially exempt transfer due to section 3(2) IHTA 1984. It is likely that an informed observer would conclude that obtaining the inheritance tax advantage was the main reason, or one of the main reasons for the arrangements, so condition 1(d) is met.

*Condition 2:*<sup>44</sup> A transfer into a discretionary trust, on its own, is not contrived or abnormal. Although this arrangement is entered into to

---

43 See 97.7 (Bearer and negotiable instruments).

44 Reg 4(3) Inheritance Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations 2017 provides: "Condition 2 is that the arrangements involve one or more contrived or abnormal steps without which the tax advantage could not be obtained."

obtain an inheritance tax advantage, it is making use of the excluded property provisions. The transfer is not within condition 2 and is not a notifiable arrangement under this hallmark.<sup>45</sup>

The opportunity, once missed, cannot be regained so it is desirable to ascertain the exact moment when a UK domicile is acquired. There are three possibilities:

- (1) The individual who has decided to make a permanent home in the UK will acquire a UK domicile as soon as they arrive here. Such an individual must carry out the tax planning before setting foot in this country.
- (2) The individual who arrives here to take up residence without such an intention will acquire a UK domicile if and when they later form the intention to live here permanently. They must carry out the tax planning before their mind is made up, ie while their long-term intentions remain unclear.
- (3) The individual who arrives and remains residing in the UK without deciding to live here permanently will acquire a deemed UK domicile after 15 years' UK residence. This is the effective deadline for the IHT planning, although limited planning opportunities remain available for the deemed domiciliary.<sup>46</sup>

A life interest trust will normally be suitable, ie:

- (1) income is to be paid to the settlor for life;
- (2) subject thereto the trust fund held on discretionary trusts for the benefit of the family of the settlor.

Trust income will belong to the life tenant but (if not UK domiciled) they may mandate the trustees to retain the income and add it to capital. This may be useful to avoid relevant income.<sup>47</sup>

A common form discretionary settlement is a possible alternative.

### 72.17.3 *Excluded property trust*

---

45 HMRC, "Guidance: Disclosure of tax avoidance schemes" (April 2018)  
<https://www.gov.uk/government/publications/disclosure-of-tax-avoidance-schemes-guidance>

46 See 4.12 (Deemed domicile: Planning).

47 See 47.22 (Income of life tenant: Relevant income).

This section considers the position of a trust made by a person who is not UK domiciled (or deemed domiciled) when the trust is made.

The trustees should avoid UK situate property, at least at the time when it matters.

Trust property in an excluded property trust can remain effectively free of IHT so long as the trust continues to exist. The trustees should be reluctant to appoint trust capital to a beneficiary who is or may become UK domiciled; that property may cease to be excluded property. If necessary, steps should be taken to extend its life by exercising powers of appointment or advancement.

If a UK domiciled beneficiary has substantial assets in their own estate then it may be worth adopting a policy of gradually spending their own assets while allowing their trust fund to accumulate or invest for capital growth. It may be attractive for the beneficiary to acquire a purchased life annuity.<sup>48</sup>

#### 72.17.4 Companies: Situs planning

If an individual or trustees do not wish UK assets to be sold to a third party, they might sell or give them to a company (typically, non-resident) owned wholly by them. In principle the shares in the company would not be UK situate.<sup>49</sup>

In the case of an individual, the transfer would not be a transfer of value for IHT because the individual's estate would not be reduced in value. It is considered that it is not a disposal by way of gift, as there is no gratuitous intent.

The transfer would be a disposal for CGT purposes and hold-over relief would not normally be available. A gift from an individual to the company by way of *donatio mortis causa* [gift in anticipation of death] may solve the CGT problem.<sup>50</sup> The donor retains the right of revocation but that would be a settlement power which is ignored for IHT.

Property becomes excluded property the moment that it becomes non-UK situate; there is no qualifying period such as is required for agricultural/ business property reliefs. Trustees could transfer the settled

---

48 See 37.17.3 (“Annuity certain”).

49 See 97.5 (Situs of registered shares) and 97.7 (Bearer and negotiable instruments).

50 See 84.7.3 (Gift in anticipation of death).

property out of the UK the moment before the death of a life tenant, or the occasion of a ten-year charge, and obtain the benefit of excluded property status.

In *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728 the individual transferred his property to a company at 8:45 pm and died on the following day. This last minute planning was successful. The Privy Council were not pleased with the outcome of their decision:

A series of transactions so unusual and so close to the death of the testator almost inevitably suggests that there might have been grounds for attacking the transactions as a sham or as lacking bona fides or as ineffective under the principles enunciated by the House of Lords in *Ramsay*...

As has already been stated, no challenge has been raised to the bona fides of the transaction, so that their Lordships have been compelled ... to treat it in the same way as an arm's length transaction. Lest, however, it should be thought that the door has been opened to making estate duty in Hong Kong a voluntary imposition, their Lordships would add that it would be unwise to assume that the genuineness of similar transactions in the future will necessarily be beyond challenge.

This was a shot from the hip. It is obvious that no serious thought was given to this passage, and it would be a mistake to construe it as if there was; that is not how case law works. So it is not surprising that in *Shiu Wing v Commissioner of Estate Duty*<sup>51</sup> the Hong Kong Court of Final Appeal held that the *Ramsay* principle did not apply to arrangements made by the taxpayer to create property situated abroad (in this case situated outside Hong Kong). The jurisprudence has of course moved on since *Shiu Wing* was decided in 2000. The *Ramsay* principle has “reached a state of well-settled maturity”<sup>52</sup> somewhat different from its 1981 formulation in *Ramsay*. Just how well-settled remains to be seen. However that may be, the outcome should at least be the same in this context. The IHT residential property code assumes that (other than for residential property) the planning still works. Still, it would no doubt be wise to avoid the striking and provocative timescale found in *Kwok*.

52 *Hurstwood Properties v Rossendale BC* [2021] UKSC 16 at [9].

## **72.18 UK dom settlor becomes non-dom**

What is the best form of tax planning where a settlor has made a settlement while UK domiciled and later acquires a foreign domicile? If nothing is done the trust property cannot be excluded property.

A good solution is to transfer the trust property back to the settlor. That may be impractical. eg if the settlor is not a beneficiary and commercial or foreign tax or UK CGT considerations make this course unattractive.

In some circumstances, a solution may be:

- (1) the settlor creates a new trust; and
- (2) the trustees of the old trust transfer the trust property to the new trust.<sup>53</sup>

## **72.19 Planning for non-estate IIP trust**

A discretionary trust (and a non-estate IIP trust) is subject to IHT on its ten- year anniversaries. If the settlor is not UK domiciled when they made the trust, all that matters for IHT is the situs of the trust fund on that date.<sup>54</sup> The trustees may safely invest in the UK for a number of years, provided that, by the deadline, they hold foreign situate assets.

In principle this short-term planning may be extended indefinitely:

- (1) As each 10-year anniversary approaches the trustees could sell the UK trust property and invest in excluded property.
- (2) Immediately after the anniversary they might sell and revert to UK investments.

In practice such a course might be subject to the GAAR but it depends on how it is done. Ideally the trustees should look for a different approach such as holding UK assets in a foreign registered company.

## **72.20 Planning: Trust with UK dom settlor**

If the settlor is UK domiciled when the settlement was made/funded, trust property is not normally excluded property even if the beneficiary is foreign domiciled.

---

<sup>53</sup> See 75.9 (Transfer: A's trust to A's trust).

<sup>54</sup> Note also the possible tax charge on the death of the settlor, under the gift with reservation rules, if the property is UK situate: see 74.15 (GWR on death: Settled excluded property) and following.

### 72.20.1 *Non-resident beneficiaries*

If the life tenant of an estate IIP trust is not resident in the UK, the trustees might invest in FOTRA securities. The trust property would then be excluded property. See 71.11 (Trusts: FOTRA securities).

Likewise if all the known beneficiaries of a discretionary trust are resident abroad. This option is not available if any beneficiaries are domiciled or resident in the UK. A deed of appointment might be needed to satisfy these conditions. This would give rise to an exit charge unless the settlor is foreign domiciled when the settlement was made/funded. However, the amount of the charge may be moderate or small.

### 72.20.2 *Non-dom beneficiary*

The best option – if circumstances allow – may be to bring the present settlement to an end by appointment to the foreign domiciled beneficiary absolutely. CGT needs consideration. The beneficiary may after an appropriate period re-settle.<sup>55</sup> This may also be appropriate where the settlor has become foreign domiciled after making/funding the settlement.

An alternative course may be to confer a general testamentary power on the foreign domiciled beneficiary. The beneficiary may on their death create a new trust with excluded property.

## 72.21 **UK funds v foreign funds**

As far as tax is concerned, which is better for the foreign domiciliary: UK funds or foreign funds?

- (1) A remittance basis taxpayer will prefer a foreign fund to a UK one, so that income and gains from the fund will be taxed on the remittance basis.<sup>56</sup> Likewise a settlor-interested trust whose settlor is a remittance basis taxpayer will prefer a foreign fund to a UK one; similarly if the transfer of asset rules may apply, as UK source income from the fund will be taxed on an arising basis and foreign source income will qualify for the remittance basis.

---

<sup>55</sup> See 94.41 (Planning to create excluded property trust).

<sup>56</sup> If the individual intends to remit income from the fund, it would be better to have a UK fund because higher rates of tax apply to remitted dividends. But that is a special case.

- (2) A non-resident non-domiciled individual will not mind (for IHT, CGT or IT) whether they purchase a UK or a foreign fund. However, taxation at fund level is another matter, and the additional burden on UK funds, particularly SDRT, has encouraged fund managers to set up new funds offshore.<sup>57</sup>

Thus the IHT exemption for UK funds represents a pragmatic decision by the Government, but, like so much in the tax system, falls short of consistency or joined-up thinking.<sup>58</sup>

### **72.22 FOTRA securities: Planning**

The FOTRA exemption is useful for individuals who are:

- (1) UK domiciled or IHT deemed domiciled, (so foreign property is not excluded property)
- (2) not resident in the UK (so they can satisfy the conditions for exemption).

### **72.23 Channel Islands/IoM domicile**

The exemption for Islanders<sup>59</sup> could be useful for an individual who is:

- (1) domiciled in the Channel Islands or the Isle of Man
- (2) deemed UK domiciled (so in principle within the scope of IHT), and
- (3) resident in the UK (so the FOTRA securities exemption is not available)

The exemption is also useful for a trust with such a person as life tenant.

---

57 See “Taxation and the Competitiveness of UK Funds” (2006)

<https://www.theinvestmentassociation.org/assets/files/research/20061009-jointkpmgimataxreport.pdf> The report also notes that the uncertainty and instability of the UK tax regime is regarded as making the UK an unsuitable location.

58 See 1.2.2 (Other tax competition).

59 See 71.7 (Channel Islands/IoM domicile).

## WILLS AND IOVs

73.1

### 73.1 IHT on death: Introduction

The topics of this chapter are:

- (1) Will drafting for foreign domiciled testators or beneficiaries
- (2) Variation of wills
- (3) Forced heirship (légitime, Sharia)

I do not discuss the general or residence nil-rate bands.

There has always been scope for tax saving through an appropriately drafted will.

### 73.2 UK-dom testator: Non-dom beneficiaries

Here the testator should in principle give their estate to beneficiaries absolutely so that the property may qualify as excluded property in their hands. A short-term discretionary will trust within s.144 IHTA is just as good from a tax viewpoint, and allows additional flexibility.

### 73.3 Non-dom testator: UK-dom beneficiaries

From an IHT viewpoint, the will should in principle provide that the estate is held on trust for the beneficiaries so that trust property situated outside the UK will remain excluded property.

Do not add property to an existing trust, if the trust may have a pool of trust gains or relevant income.

In addition to creating a trust, the testator should consider making some gifts directly to UK beneficiaries. The advantage is that benefits received by UK beneficiaries from the will trust will come into charge, when matched to trust gains or (subject to the motive defence) relevant income; but direct gifts under a will are tax free. So some absolute gifts may be appropriate, leaving the trust to provide further (though taxable) benefits

in the more distant future and accumulate its funds in the meantime.

## 73.4 Gifts to spouse by will

### 73.4.1 *Non-dom testator, non-dom spouse*

Suppose:

- (1) A foreign domiciled testator has:
  - (a) excluded property and
  - (b) chargeable (non-excluded) property
- (2) The spouse is foreign domiciled so the IHT spouse exemption is fully available.

The safe course will be:

- (1) Give the chargeable property to:
  - (a) the spouse; or
  - (b) a trust where the spouse has an interest in possession (better where the spouse is UK domiciled).
- (2) Give excluded property to other persons.

A pecuniary legacy to the spouse should be secured on chargeable property. Watch the drafting.

This course should avoid a dispute with HMRC. However, it is not strictly necessary.<sup>1</sup>

### 73.4.2 *UK-dom testator, non-dom spouse*

Suppose:

- (1) A foreign domiciled testator has
  - (a) excluded property and
  - (b) chargeable (non-excluded) property
- (2) The spouse is UK domiciled so the IHT spouse exemption so the full IHT spouse exemption will only apply if the spouse makes the spouse election. That may or may not be desirable, depending on the position of the spouse.<sup>2</sup>

The choice for the will lies between a discretionary will trust or an absolute gift to the foreign domiciled spouse. Which is better? If the

---

<sup>1</sup> See 72.5.2 (Spouse exemption/excluded property interaction).

<sup>2</sup> See 4.13 (Spouse-election domicile).

property is given to the spouse, it is outside the scope of IHT thereafter, so long as it is excluded property. If the property is given to a will trust, it remains within the scope of IHT, it is not excluded property, as the will trust has a UK domiciled settlor. So at first sight, the absolute gift seems better. Having said that, if property goes into the discretionary will trust and out to the spouse again within two years, the IHT position is (more or less) the same as a direct gift: s.144 IHTA 1984. And it may be desired to pass the property to others, perhaps giving it to the next generation (particularly if not UK domiciled). Also when the testator makes the will, one would not usually know the domicile position at the time of the death. If the spouse lives long enough, she may become deemed UK domiciled for IHT purposes. All things considered, the discretionary will trust seems the more flexible and safer course for the will, in a routine case. In most cases, the will trust is likely to be wound up within two years. But the only cost is the deed of appointment.

### 73.5 Charitable gift by will

Suppose a foreign domiciled testator has

- (1) excluded property and
- (2) chargeable (non-excluded) property

The best course in principle will be:

- (1) Give the chargeable property to UK charities or EU charities which qualify for UK tax relief.<sup>3</sup>
- (2) Give excluded property to other persons.

A pecuniary legacy to charity should be secured on chargeable property.

### 73.6 Instrument of variation (IOV)

Books have been written on this topic. I restrict discussion to the statutory provisions and some non-dom issues.

#### 73.6.1 *The statutory reliefs*

The relief for IoVs is in s.142 IHTA/62 TCGA:

**s.142(1) IHTA**

**s.62(6) TCGA**

---

3 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20) online version <https://www.taxationofcharities.co.uk>

	(6) Subject to subsections (7) and (8) below,
(1) Where within the period of two years after a person's death—	where within the period of 2 years after a person's death
(a) any of the dispositions (whether effected by will, under the law relating to intestacy or otherwise) of the property comprised in his estate immediately before his death are varied, or	any of the dispositions (whether effected by will, under the law relating to intestacy or otherwise) of the property of which he was competent to dispose are varied, or
(b) the benefit conferred by any of those dispositions is disclaimed,	the benefit conferred by any of those dispositions is disclaimed,
by an instrument in writing made by the persons or any of the persons who benefit or would benefit under the dispositions,	by an instrument in writing made by the persons or any of the persons who benefit or would benefit under the dispositions—
	(a) the variation or disclaimer shall not constitute a disposal for the purposes of this Act, and
this Act shall apply as if the variation had been effected by the deceased or, as the case may be, the disclaimed benefit had never been conferred.	(b) this section shall apply as if the variation had been effected by the deceased or, as the case may be, the disclaimed benefit had never been conferred.

73.6.2 *Statements required*

**s.142(2) IHTA**

**s.62(7) TCGA**

<p>(2) Subsection (1) above shall not apply to a variation unless the instrument contains a statement, made by all the relevant persons,<sup>4</sup> to the effect that they intend the subsection to apply to the variation.</p>	<p>(7) Subsection (6) above does not apply to a variation unless the instrument contains a statement by the persons making the instrument to the effect that they intend the subsection to apply to the variation.</p>
---	--

73.6.3 *Variation for consideration*

<p><b>s.142(3) IHTA</b></p> <p>(3) Subsection (1) above shall not apply to a variation or disclaimer made for any consideration in money or money's worth other than consideration consisting of the making, in respect of another of the dispositions, of a variation or disclaimer to which that subsection applies.</p>	<p><b>s.62(8) TCGA</b></p> <p>(8) Subsection (6) above does not apply to a variation or disclaimer made for any consideration in money or money's worth other than consideration consisting of the making of a variation or disclaimer in respect of another of the dispositions.</p>
--	---

73.6.4 *Completion of administration*

<p><b>s.142(6) IHTA</b></p> <p>(6) Subsection (1) above applies whether or not the administration of the estate is complete or the property concerned has been distributed in accordance with the original dispositions.</p>	<p><b>s.62(9) TCGA</b></p> <p>(9) Subsection (6) above applies whether or not the administration of the estate is complete or the property has been distributed in accordance with the original dispositions.</p>
--	---

73.6.5 *IoV for charity*

---

4 Defined in s.142(2A) IHTA: “(2A) For the purposes of subsection (2) above the relevant persons are—  
 (a) the person or persons making the instrument, and  
 (b) where the variation results in additional tax being payable, the personal representatives.  
 Personal representatives may decline to make a statement under subsection (2) above only if no, or no sufficient, assets are held by them in that capacity for discharging the additional tax.”

For completeness: s.142(3A) IHTA provides:

(3A) Subsection (1) does not apply to a variation by virtue of which any property comprised in the estate immediately before the person's death becomes property in relation to which section 23(1) applies unless it is shown that the appropriate person<sup>5</sup> has been notified of the existence of the instrument of variation.

### 73.6.6 *IHT 2 year interest rule*

Section 142(4) IHTA provides:

Where a variation to which subsection (1) above applies results in property being held in trust<sup>6</sup> for a person for a period which ends not more than two years after the death, this Act shall apply as if the disposition of the property that takes effect at the end of the period had had effect from the beginning of the period; but this subsection shall not affect the application of this Act in relation to any distribution or application of property occurring before that disposition takes effect.

### 73.6.7 *IoV and excluded property*

Section 142(5) IHTA provides:

For the purposes of subsection (1) above the property comprised in a person's estate includes any excluded property but not any property to which he is treated as entitled by virtue of section 49(1) above or section 102 of the Finance Act 1986.

The IHT Manual provides:

#### **35094 Redirection of excluded property** [Jun 2016]

Another scheme (see also IHTM35093) where the taxpayers seek to take advantage of the provisions of IHTA84/S142 without there being a bona fide variation is where the estate contains excluded property

---

5 Section 142(3B) IHTA provides: "For the purposes of subsection (3A) "the appropriate person" is—

(a) the charity or registered club to which the property is given, or

(b) if the property is to be held on trust for charitable purposes or for the purposes of registered clubs, the trustees in question."

6 Section 142(7) IHTA provides: "In the application of subsection (4) above to Scotland, property which is subject to a proper liferent shall be deemed to be held in trust for the liferenter."

(IHTM04251) such as government securities.

The deceased, domiciled (IHTM13000) outside the UK, may leave property in this country to chargeable beneficiaries and excluded property to the spouse or civil partner (IHTM11032). An IoV may then be used for the spouse's or civil partner's entitlement to be switched from excluded property to the ordinary UK estate without any change in the amount the spouse or civil partner receives.

You should refer cases of this type immediately above to TG without making any preliminary enquiries provided the basic facts are clear.

I do not understand in what sense it could be said that this is not a “bona fide variation”.<sup>7</sup> Section 142(5) IHTA expressly envisages an IOV relating to excluded property.

A variation of this kind cannot sensibly be challenged if properly carried out. If the author's view of the spouse exemption is right, however, an IOV would not be necessary. It may nevertheless be desirable as a useful precaution where a will has not been drafted in the manner recommended above.

## 73.7 Forced heirship/légitime/Sharia

### 73.7.1 Heirship law background

This section considers forced heirship. That includes:

- (1) *Légitime* in civil law jurisdictions (in Scotland, *legitim*) (children's inheritance rights)
- (2) Spouses' inheritance rights (in Scotland the technical term “legal rights” is used to refer to spouse rights and *legitim*<sup>8</sup>)
- (3) Sharia law inheritance rights

The holder of forced heirship rights is here called “the beneficiary”.

The beneficiary may be entitled after the death of the testator:

- (1) to override<sup>9</sup> dispositions in the will of the testator

7 It would be different if there was an arrangement under which the spouse later swapped the UK property for the excluded property.

8 Section 36 Succession (Scotland) Act 1964 (“legal rights” means *jus relictii*, *jus relictiae*, and *legitim*).

9 The position could be different depending on the applicable law

- (1) The effect of a forced heirship right may allow the beneficiary to set aside a provision in a will
- (2) The effect of a forced heirship right may be that the beneficiary acquires the

(2) to set aside gifts made by the testator during his life

### 73.7.2 *Position in testator's lifetime*

It is well established that under English law,<sup>10</sup> a beneficiary under the will of a living person has no interest in the property of the testator. The interest of the beneficiary is described as a “mere expectancy”. An assignment or disclaimer of a mere expectancy is not valid in English law.<sup>11</sup>

It follows that during the lifetime of the testator the beneficiary's expectancy is not an asset capable of giving rise to a gain for CGT, and is not property for the purpose of IHT.

A contract or undertaking to assign or disclaim during the lifetime of the testator may be valid, but the drafting would require some thought.

### 73.7.3 *Légitime and trust proper law*

*AG v Jewish Colonization Association* briefly discussed the proper law of a lifetime trust made by a settlor domiciled in a forced heirship jurisdiction. The settlor, Baron de Hirsch, domiciled in Austria, created a trust for himself for life, with remainder to charity. The issue was whether the trust property was subject to succession duty<sup>12</sup> on the termination of the settlor's life interest on his death. The tax applied if the trust was governed by English law, which was held to be the case.<sup>13</sup> In this context:

[Counsel for the taxpayer] argued that, if there had been children of the

---

asset (ie the will is void ab initio).

But English law concepts such as void/voidable (which are themselves far from precise) would not easily be translatable into foreign legal systems. Forced heirship rules vary greatly between different jurisdictions, but in most if not all cases the beneficiary has to take some action to vindicate the right, so a provision in the will in breach of forced heirship rights is not void in the sense of being wholly ineffective. Certainly that was thought to be the case in *AG v Jewish Colonization Association*, discussed below, though that case concerned a lifetime gift, not a will.

10 Although a question of foreign law, the same must apply to a beneficiary who expects to acquire forced heirship rights on the death of a testator.

11 *Smith v Smith* [2001] 1WLR 1937. Although strictly a question of foreign law, the same would apply *a fortiori* in the forced heirship jurisdiction.

12 This interesting tax was repealed in 1949.

13 The moral is that tax advice should have been taken before the trust was made.

Baron's, inasmuch as by Austrian law an Austrian father cannot divest himself of property so as to impair the rights of his children to "legitim," and any alienation at any time having that effect may on the death of the father be set aside, to the extent to which it has that effect, Austrian and not English law governed the case.

The argument was that a trust made by an Austrian domiciliary must be governed by Austrian law, because of the impact, or theoretical impact,<sup>14</sup> of a *légitime* claim. That seems hopeless now (perhaps it was less clear in 1901):

I do not agree. The trust and the administration of the trust can only be enforced or the trust got rid of by having resort to English law - i.e., to an English Court of justice. Till that has been done the English company [trustee] is entitled to hold the £7,000,000, subject, of course, to the [charitable trusts]. In any proceedings to set aside the trust evidence of what is the Austrian law as regards the father's rights might, I think, be given to shew that the trust was non-effective; but this question would have to be decided by an English Court before the company [the trustee] could be deprived of its money.<sup>15</sup>

I mention this for completeness, as it is the only tax case I know involving forced heirship; but proper law rarely matters for tax, now, except for the four surviving estate duty/IHT DTAs.<sup>16</sup> I do not think the case has much wider application.

#### 73.7.4 *Forced heirship right: CGT*

After the death of the testator, a forced heirship right may be an asset for CGT purposes. So disclaimer or other disposal of the right may give rise to a chargeable gain. A remittance basis taxpayer may not be concerned as the asset, if it is one, is not (or at least is not likely to be) UK situate. If a gain is deemed to accrue on a disclaimer of the forced heirship right, the gain cannot be remitted to the UK.

---

14 It would have been interesting if foreign law evidence had been provided as to the application of Austrian law in the case of a settlor who was domiciled in Austria but (though not stated in the decision) a German national. But it would have made no difference to the outcome.

15 [1901] 1 QB 123 at p.133 approved in *Akers v Samba Financial Group* [2017] UKSC 6 at [23].

16 See 109.11 (Proper law).

Otherwise, a safe course (if practical) may be that the beneficiary disclaims the forced heirship right or enters into an instrument of variation, in writing, within two years of the death. The forced heirship right will then be ignored for CGT.<sup>17</sup> But the better view that the right is not an asset for CGT. This is part of the wider conundrum of the CGT analysis of beneficiary's rights in a deceased's estate. A beneficiary who exercises forced heirship rights acquires as legatee.

### 73.7.5 *Forced heirship right: IHT*

There are express IHT provisions, not discussed here, for legitim in Scotland.<sup>18</sup> This does not in terms apply to foreign forced heirship, though the discrimination might not be EU-law compliant.

If forced heirship relates to settled property (eg the property is settled by the will) the rights may be a settlement power, ignored for IHT; see 94.15.2 (Settlement powers).

Where a will makes a outright (non-settled) gift, subject to forced heirship rights, the beneficiary's forced heirship right (after the death of the testator) might be property for IHT purposes. A foreign domiciled beneficiary may not be concerned as the asset is not (or at least, is not likely to be) UK situate. Otherwise, a safe course (if possible) may be that the beneficiary disclaims the forced heirship right or enters into an instrument of variation, in writing, within two years of the death. The right will then be ignored for IHT.<sup>19</sup> But the better view is that a disclaimer is not a transfer of value,<sup>20</sup> and, perhaps, that the right is not property for IHT.

### 73.7.6 *Forced heirship right: IT*

HMRC appear to accept that disclaimer or non-exercise of the right does not make the beneficiary a settlor.<sup>21</sup> It does not constitute a transfer of assets for ToA purposes. It may be an associated operation, but the

---

17 Section 62 TCGA.

18 Section 147 IHTA, supplemented by s.17(d) IHTA. See Kessler & Grant, *Drafting Trusts and Will Trusts in Scotland* (2<sup>nd</sup> ed., 2017), para 17.9 ("Legal rights" and NRBs).

19 Section 142 IHTA.

20 See 94.18.2 (Disclaimer: Tax consequences).

21 See 94.18.3 (Person disclaiming: a settlor?).

significance of that would need further consideration.

### **73.8 Family Provision Act claim**

This section considers claims under family provision legislation, such as the Inheritance (Provision for Family and Dependents) Act 1975 and its foreign equivalents.

There are express provisions, not discussed here, for UK family provision legislation.<sup>22</sup> This does not in terms apply to foreign family provision legislation, though the discrimination might not be EU-law compliant.

Since the power of the Court under family provision legislation is discretionary, it is considered that the beneficiary's right under the legislation is not an asset for CGT or property for IHT. The IT position is the same as for forced heirship, see above.

---

22 Section 146 IHTA.

## CHAPTER SEVENTY FOUR

# RESERVATION OF BENEFIT

74.1

### *Cross references*

The following topics are considered elsewhere:

76.5 (GWR property subject to debt)

80.19 (GWR exemptions) - Pre-owned assets

### **74.1 GWR: Introduction**

Here is a rendezvous of questions and question marks! A full discussion needs a book to itself. I focus on matters closest to the themes of this book, but it is necessary to consider the provisions generally in order to see the issues in their context.

I do not consider the special rules for:

<b>Topic</b>	<b>Reference</b>
Land	s.102A-102C FA 1986
Insurance policies	Para 7 sch 20 FA 1986
Agricultural/business property relief	Para 8 sch 20 FA 1986
Double charges	IHT (Double Charges Relief) Regs 1987

The IHT Manual contains much fascinating material which cannot be set out here.

### **74.2 Purpose of GWR**

In *Ingram v IRC*:<sup>1</sup>

I should say something about the more general considerations involved in the application of s.102. Its policy has puzzled people for a long

---

<sup>1</sup> *Ingram v IRC* [1999] STC 37 at p.41; for other aspects of this case see 80.2.2 (*Ingram* schemes). On identifying statutory purpose, see [App App. 14.1](#) (Purpose of a statute).

time. For one thing, it is in one sense a penal section. Not only may you not have your cake and eat it, but if you eat more than a few de minimis crumbs of what was given, you are deemed for tax purposes to have eaten the lot. Secondly, a superficial reading of phrases like ‘beneficial enjoyment of the property’ and enjoyment of property ‘to the entire exclusion . . . of the donor’ has led to numerous occasions in the past century in which the Revenue has put forward the proposition that, as a matter of practical common sense, it simply must be contrary to the policy of the statute for a donor to be able to give away property such as a house and go on enjoying the benefit of the property by continuing to live there. This is the premise upon which the Revenue claim the high ground of substance and reality. [Counsel for the Revenue] said that for Lady Ingram to have made a PET and retained the right to stay in the house was simply too good to be true ... But this approach ignores the fact that ‘property’ in s.102 is not something which has physical existence like a house but a specific interest in that property, a legal construct, which can co-exist with other interests in the same physical object. Section 102 does not therefore prevent people from deriving benefit from the object in which they have given away an interest. It applies only when they derive the benefit from that interest.

If Lady Ingram had been dealing with a fund of investments instead of a house, she would have had no difficulty in achieving the same result, in economic terms, as the transaction in this case. She could have used part of the fund to purchase an annuity which would have guaranteed her exactly the same income as she had been receiving from the fund and given away the rest. Unless she needed to resort to capital, her outward circumstances would have continued unchanged. Why should it make a difference that her asset happened to consist of land? ...

What, then, is the policy of s.102? It requires people to define precisely the interests which they are giving away and the interests, if any, which they are retaining. Once they have given away an interest they may not receive back any benefits from that interest. In *Lang v Webb*<sup>2</sup> Isaacs J suggested that the policy was to avoid the ‘delay, expense and uncertainty’ of requiring the Revenue to investigate whether a gift was genuine or pretended. It laid down a rule that if the donor continued to derive any benefit from the property in which an interest had been given, it would be treated as a pretended gift unless the benefit could be shown to be referable to a specific proprietary interest which he had retained. This is probably the most plausible explanation ...

---

2 (1912) 13 CLR 503.

### 74.2.1 GWR and the GAAR

HMRC draft GAAR guidance provided:<sup>3</sup>

#### **4.1.2 The scheme**

*J grants a long lease over his home to S for no consideration, to take effect in 20 years time. ... J is able to continue to occupy the property for the next 20 years as he continues to own the freehold.*

*The result of the scheme is that J has divided his home into two different interests: the lease and the freehold.*

*J has gifted the lease of his home to S. J has also retained the freehold, which diminishes in value over the following 20 years.*

This is a slight variant of the *Ingram* arrangement<sup>4</sup> but the conveyancing details do not matter here.

#### **4.1.4 The taxpayer's tax analysis**

*The interest given away (the lease to take effect in 20 years time) is a potentially exempt transfer under section 3A, IHTA 1984 and will be exempt from IHT provided J survives for 7 years after the gift.*

*The interest retained (the freehold subject to the lease) is reducing in value as the time for the lease to take effect approaches, so reducing the value of J's estate that will be subject to IHT on death.*

*As the time for the lease to take effect approaches, the value of the asset transferred to S increases, but without giving rise to a charge to IHT.*

#### **4.1.5 What is the GAAR analysis under clause 2(2)?**

*4.1.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based and the policy objectives of those provisions?*

*In 1975 Capital Transfer Tax ("CTT") replaced Estate Duty with the aim of reducing avoidance<sup>5</sup> through giving property away before death. Under CTT, all disposals of property, whether to individuals or into trust were immediately subject to tax. By 1986, CTT was seen as an inhibitor to the transfer of wealth, so transfers between individuals and to certain favoured<sup>6</sup> trusts were exempted from charge (provided*

3 HMRC, "GAAR Guidance- Consultation Draft Part B Examples of How the GAAR Applies to Tax Arrangements" (December 2012).

4 See 80.2.2 (*Ingram* schemes).

5 This is tendentious: see 49.16 (Intention: parliament\government).

6 This adjective is tendentious; but that does not affect the policy issues discussed here, and any one-paragraph summary of CTT must oversimplify.

the donor survived 7 years). Provisions were introduced to prevent the avoidance of the charge on death by gifts where the donor continues to benefit from the gift. And the tax was renamed. The purpose of these provisions was published in the Budget Press Release in March 1986. The scheme allows the taxpayer to 'have their cake and eat it' since an interest in J's home is given away and will be free from IHT provided J survives 7 years; yet J is still able to live in and enjoy his home; the value of which is reducing as the commencement of the lease draws ever closer. This is not consistent with the principles or policy objectives of the reservation of benefit provisions.

**4.1.5.2 Does the means of achieving the substantive tax results involve one or more contrived or abnormal steps?**

Absent the arrangements, had J given his home to S and continued to live there rent-free, there would have been a clear reservation of benefit in the property. The property would have formed part of J's estate on death and the full value of the property at that time would have been subject to IHT. Simply making a gift of his home to S whilst continuing to live there might be considered a 'normal' step for J to take, as opposed to the "abnormal steps" which J did take.

The intermediate step taken by J in granting a long lease for no consideration, the commencement of which is deferred for a period of time, is contrived and is inserted purely to gain a tax advantage.

**4.1.5.3 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?**

The gifts with reservation rules in section 102, FA 1986 cover a situation where an individual disposes of property by way of gift, but does not fully give away the ability to enjoy that property. The rules do not cover a situation where an individual creates two different interests in that property, and gives one interest away and retains the other.

In both situations the non-tax result for the individual may be the same. However, in the first situation the reservation with benefit rules apply. In the second situation, the rules do not apply.

The failure of the rules to cover a situation where an individual creates two different interests in a property is a shortcoming that the scheme is intended to exploit.

**4.1.5.4 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?**

HMRC has not indicated that these arrangements give rise to the

*claimed tax result.*<sup>7</sup>

#### **4.1.6 Conclusion**

*On the facts given, the arrangements are abusive arrangements to which HMRC would seek to apply the GAAR.*

In an early test of the GAAR advisory panel, this passage was deleted from the GAAR guidance. The guidance now provides:

D27.5.1 ... In [*Ingram*], the House of Lords held that the policy of the legislation was to identify precisely what property had been given away by the donor and what (if anything) was retained. They noted that there is nothing in principle behind the ‘gifts with reservation’ provisions that stops the donor carefully dividing up his cake, giving away a slice and retaining the remaining cake. Continued enjoyment of the latter does not amount to a reservation in the former. Arrangements of the type adopted are known as ‘shearing’ operations.

Ss102A–102C FA 1986 were introduced to stop ‘shearing’ arrangements in relation to certain ‘carve out’ schemes over land. Therefore the policy on such arrangements has clearly been altered by legislation and the effect of the GAAR in relation to such tax schemes must be considered in this light. However, this does not mean that all ‘carve out’ arrangements have been stopped. The House of Lords has indicated that such arrangements are not necessarily<sup>8</sup> against the principles behind the legislation and no legislative action has been taken in relation to other types of assets to stop such arrangements. The discounted gift scheme can be seen as a classic shearing operation on property other than land.<sup>9</sup>

### **74.3 Basic GWR conditions**

Section 102(1) FA 1986 provides:

Subject to subsections (5)<sup>10</sup> and (6)<sup>11</sup> below, this section applies where, on or after 18 March 1986, an individual disposes of any property by way of gift and either—

---

7 I wonder about that. *Ingram* arrangements (*avant la lettre*) were used in the 1960’s and never challenged. But that does not affect the policy issue discussed here.

8 This is a somewhat tendentious summary of the view expressed in *Ingram*; but perhaps it does not matter.

9 HMRC, “GAAR Guidance” Part D (2017)

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

10 See 74.10 (GWR spouse exemption); 74.11 (GWR exempt transfer reliefs).

11 See 74.23.1 (Pre-1986 insurance policy).

- (a) possession and enjoyment of the property is not bona fide assumed by the donee at or before the beginning of the relevant period;<sup>12</sup> or
- (b) at any time in the relevant period the property is not enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise ...

There are two sets of conditions:

- (1) An individual (in this chapter the “**donor**”) makes a disposal of property by way of gift. There are three separate elements here: a *disposal*, of *property*, which must be *by way of gift*.
- (2) Condition (a) or (b) above must be satisfied (a reservation of benefit).

#### 74.4 GWR terminology

Section 102(2) FA 1986 defines “**property subject to a reservation**”:

If and so long as—

- (a) possession and enjoyment of any property is not bona fide assumed as mentioned in subsection (1)(a) above, or
- (b) any property is not enjoyed as mentioned in subsection (1)(b) above,

the property is referred to (in relation to the gift and the donor) as property subject to a reservation.

I coin the following terminology:

<b>My term</b>	<b>Meaning</b>
GWR property	Property subject to a reservation
Settled GWR property	GWR property (gift to a trust)
Non-settled GWR property	GWR property (gift not to a trust)
GWR death charge	Charge imposed by s.102(3) FA 1986
GWR PET charge	Charge imposed by s.102(4) FA 1986

#### 74.5 Disposal by way of gift

There is no definition of “disposal by way of gift”.

The surrender of a lease or life interest is arguably not a disposal.

It is considered that giving consent to an exercise of a power of

---

12 Section 102(1) provides:

...”in this section ‘the relevant period’ means a period ending on the date of the donor’s death and beginning seven years before that date or, if it is later, on the date of the gift.”

advancement or appointment is not a disposal.

It is considered that a sale at an undervalue is not a disposal “by way of gift”.<sup>13</sup>

It is considered that a transfer to a settlement in which the settlor has an estate interest in possession is a disposal by way of gift, but from 2006 this issue will not usually arise.

A sale at market value, where the purchase price is left outstanding as an interest-free loan, repayable on demand, is not a disposal by way of gift.

An interest free loan is not a disposal by way of gift.<sup>14</sup>

## 74.6 Reservation of benefit

When (re)introduced in 1986, the wording of s.102(1)(a)(b) was regarded as exceptionally, even scandalously, vague. But it does not seem exceptional by the standards of contemporary anti-avoidance legislation.

While in most cases the matter will be clear enough there are significant areas of uncertainty. HMRC guidance helps in some cases.

### 74.6.1 Gift to settlor-interested trust

IHT Manual provides:

#### **IHTM14393 Settlement on discretionary trusts** [Aug 2016]

If a donor makes a settlement and is one of the members of the discretionary class of beneficiaries, this is a GWR.

- The donor’s position as a member of the discretionary class of beneficiaries is not an equitable interest retained by them (and so not included in the gift) and
- as the donor is a member of the class, they have not been excluded (IHTM14333), or virtually excluded, from enjoyment. The fact that they do not receive any tangible benefit during the relevant period is immaterial.

This is correct.<sup>15</sup>

It is considered that the same in principle applies where an individual makes a gift to a discretionary trust under which:

---

13 This view is supported by the drafting of para 2(4) sch 20 FA 1986: see 74.21.1 (Gift by donee).

14 This view is supported by the drafting of para 5(4) sch 20 FA 1986: see 74.22.4 (Loan to trust).

15 *IRC v Eversden (Greenstock’s Executors)* 75 TC 340, HC at [17], CA did not consider this point; *Lyon v HMRC* [2007] STC (SCD) 675.

- (1) the settlor is not included in the class of beneficiaries; but
- (2) the trustees have an unrestricted power to add the settlor to the class of beneficiaries.

After some vacillation, HMRC now agree.<sup>16</sup> The IHT Manual continues:

**Discretionary class**

If a donor settles property on discretionary trusts and is one of the discretionary class of beneficiaries, the gift is a GWR. However, a donor who is not named as a member of the discretionary class may

- become one if the trustees have power to extend the class of beneficiaries, or
- benefit if their spouse or civil partner is a beneficiary.

**Example 1** (Anthony)

A transfers assets into a discretionary settlement under which he is not included in the class of beneficiaries. There is however power to the trustees to add beneficiaries including A to the class at some future date. That A can be considered as a potential beneficiary is sufficient to say that the trust fund is not enjoyed to the entire or virtually to the entire exclusion of benefit to him under the settlement and the gift will be a GWR (*IRC v Eversden* [2003] STC 822). Only if the trust irrevocably excludes A from being a beneficiary under the trust will a GWR not arise.

The position however depends on the terms of the trust. For instance, s.9(9) [Malta] Trusts and Trustees Act 1989 provides:

A person who may be added as a beneficiary in terms of a power granted to the trustee shall not enjoy any rights in relation to the trust property or against the trustee and shall not be considered a beneficiary in any manner until appointed as a beneficiary by the trustee.

It is suggested there is no gift with reservation of benefit in a case where this is an accurate statement of the rights of the potential beneficiary (whether as a matter of the proper law or the drafting of the specific trust).

#### 74.6.2 *Benefit to spouse*

A benefit to a spouse does not count. The Manual passage continues:

**Example 2** (Anthony)

A makes a discretionary settlement. The class of beneficiaries includes

---

<sup>16</sup> The text of the Manual changed materially in 2014.

A's wife, but not himself.

This does not constitute a reservation but if A shares any benefit (IHTM14339) taken by A's wife, this can be a GWR. You should consider whether a GWR claim is appropriate.

#### 74.6.3 *A gives to B + B gives to trust*

The position is different where:

- (1) A makes a gift to B.
- (2) Later, by an independent transaction, B creates a discretionary trust under which A is a beneficiary (or where A can be added as a beneficiary).

In these circumstances A is *not* the settlor. It is considered that there is no reservation merely because A is a discretionary beneficiary. There will be a gift with reservation if A actually receives a benefit.

#### 74.6.4 *"Virtually" excluded*

This concept matters for several purposes:

- (1) GWR
- (2) Remittance conditions C and D<sup>17</sup>
- (3) With an economy of concepts, HMRC apply their guidance to the conceptually distinct issue of whether a person "occupies" land, ie a person "virtually" excluded from land is not an occupier<sup>18</sup>

So the topic often arises.

RI 55 provides:

The word "virtually" in the de minimis rule in FA 1986 s 102(1)(b) is not defined and the statute does not give any express guidance about its meaning. However, the shorter Oxford English Dictionary defines it as, amongst other things, "to all intents" and "as good as". Our interpretation of "virtually to the entire exclusion" is that it covers cases in which the benefit to the donor is insignificant in relation to the gifted property.

It is not possible to reduce this test to a single crisp proposition. Each case turns on its own unique circumstances and the questions are likely to be ones of fact and degree. We do not operate s 102(1)(b) in such a

---

<sup>17</sup> See 17.26.2 (Enjoyment disregards).

<sup>18</sup> "Occupy" is a concept which matters for many tax purposes; see 80.3.1 ("Occupation").

way that donors are unreasonably prevented from having limited access to property they have given away and a measure of flexibility is adopted in applying the test.

These generalities do not take us far. RI 55 goes on to give some more concrete examples:

Some examples of situations in which we consider that FA 1986 s 102(1)(b) permits limited benefit to the donor without bringing the GWR provisions into play are given below to illustrate how we apply the de minimis test—

[1] a house which becomes the donee's residence but where the donor subsequently—

- stays, in the absence of the donee, for not more than two weeks each year, or
- stays with the donee for less than one month each year;

[2] social visits, excluding overnight stays made by a donor as a guest of the donee, to a house which he had given away. The extent of the social visits should be no greater than the visits which the donor might be expected to make to the donee's house in the absence of any gift by the donor;

[3] a temporary stay for some short term purpose in a house the donor had previously given away, for example—

- while the donor convalesces after medical treatment;
- while the donor looks after a donee convalescing after medical treatment;
- while the donor's own home is being redecorated;
- visits to a house for domestic reasons, for example baby-sitting by the donor for the donee's children;

[4] a house together with a library of books which the donor visits less than five times in any year to consult or borrow a book;

[5] a motor car which the donee uses to give occasional (ie less than three times a month) lifts to the donor;

[6] land which the donor uses to walk his dogs or for horse riding provided this does not restrict the donee's use of the land.

There follow some examples of where there is a benefit:

It follows, of course, that if the benefit to the donor is, or becomes, more significant, the GWR provisions are likely to apply. Examples of this include gifts of—

[1] a house in which the donor then stays most weekends, or for a month or more each year;

[2] a second home or holiday home which the donor and the donee both

then use on an occasional basis;

[3] a house with a library in which the donor continues to keep his own books, or which the donor uses on a regular basis, for example because it is necessary for his work;

[4] a motor car which the donee uses every day to take the donor to work.<sup>19</sup>

The RDR Manual gives an example of a car, in the context of remittance condition C:<sup>20</sup>

**RDRM33270 Condition C -enjoyment by a relevant person ignored**

[Jan 2019]

*(James and Julia)*

B, a remittance basis user, gives his sister S £10,000 of his foreign income. This money is qualifying property of a gift recipient. The following year S brings the money to the UK to purchase a car for £10,000.

B visits S two or three times a year and while there he occasionally uses her car to run errands. Otherwise the car is used only by S. Although there is enjoyment by a relevant person (B) of qualifying property (the car acquired with the foreign income), the enjoyment is marginal and may be disregarded.

Although the car is registered in S's name, S gives B the car to use every weekend and also for a long-distance journey every second month. B's enjoyment of the car is not 'marginal'.

## 74.7 Full consideration exemption

Para 6(1) sch 20 FA 1986 provides:

In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—

- (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth;

RI 55 provides:

---

<sup>19</sup> The same passage is found in IHTM14333 (modernised in 2010 to gender inclusive language).

<sup>20</sup> See 17.26.2 (Enjoyment disregards).

... we take the view that full consideration [for the GWR rule] is required throughout the relevant period—and therefore consider that the rent paid should be reviewed at appropriate intervals to reflect market changes.

See App 4.5 (Market value/full consideration ).

## 74.8 IHT on disposal by way of gift

A gift which is a chargeable transfer will give rise to a charge to IHT (assuming it exceeds the nil rate threshold) whether or not it is a gift with reservation.<sup>21</sup> The reservation of benefit does not affect the lifetime charge; it just imposes a further charge on the death of the donor. The Inheritance Tax (Double Charges Relief) Regulations 1987 mitigate a double charge. This chapter does not consider the IHT which might arise on a disposal by way of gift; it considers only the GWR aspects.

## 74.9 Gift of excluded property

Section 102 FA 1986 applies when an individual disposes of any property by way of gift. A foreign domiciliary is “an individual”. A gift of UK situate property by a foreign domiciliary is clearly within the GWR rule.

What is the position where a foreign domiciliary disposes of excluded property by way of gift? That is not a transfer of value.<sup>22</sup> The question is

---

21 The IHT Manual seems to make this somewhat elementary error:

**“IHTM14316 Sales for less than full consideration [Sep 2018]**

*Example 1* (Robert and James)

In 2011 R sold a house, then worth £100,000, to his son, J, for £25,000. This is a disposition partly by way of sale and partly by way of gift. R dies in 2013.

If R has been excluded from enjoyment of the property throughout the period, the gift is a PET chargeable on his death. The loss to his estate is the value of the entirety of the property less the consideration received (£100,000 less £25,000 = £75,000).

[The correct view is that the sale is a PET whether or not the donor is excluded]

If R was not excluded from enjoyment of the property, for instance because he resided at the property following the disposition, the disposal by way of gift is a GWR. The value of the property disposed of by way of gift is 75% of the value of the whole property. Thus, if the property is still subject to a reservation immediately before R’s death, 75% of its death value is treated as property to which R was beneficially entitled.”

[This is very doubtful; no property is disposed of by way of gift]

22 Section 3 IHTA provides:

(1) ... a transfer of value is a disposition made by a person (the transferor) as a result

whether disposal by way of gift here means: by way of a disposition which is a transfer of value.

I mention some preliminary points to clear them out of the way:

- (1) Section 3(2) IHTA does not in its terms support the view that a gift of excluded property is not a gift for the purposes of s.102. The subsection is expressed to apply “for the purposes of s.3(1).” It is not expressed to apply for other purposes. We are looking for a purposive (non-literal) construction.
- (2) The operation of ten year/exit charges and gift with reservation on death of the settlor is harsh. But the effect of the GWR rule is always to double the potential IHT charges, as property subject to a reservation is taxed in the estate of the donee and the donor. Moreover the severity is in part attributable to the 10 year/exit charge regime, which in general taxes settled property more severely than non-settled property.

It is possible for the Courts to imply a territorial limitation beyond that set out in the statute, but it needs a strong case to do that.<sup>23</sup> Is that case made out here? If GWR applies on a gift of excluded property, there would be a charge to IHT in circumstances where:

- (1) a foreign domiciliary with no UK connection makes a gift of excluded (foreign) property to another person with no UK connection, and enjoys some benefit; and
- (2) the donor dies many years later at a time when the gifted property, or property representing it, is not excluded property (eg situate in the UK or, as here, within IHTA sch A1).

It is not easy for the foreign domiciled donor or their executors to comply with an obligation to pay IHT in such circumstances. But if GWR does not apply in these circumstances, there is some scope for what the Courts may regard as avoidance. There is at least some UK connection in the IHT charge, in that the property must be UK situate or non-excluded property.

---

of which the value of his estate immediately after the disposition is less than it would be but for the disposition...

(2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

23 See 15.12 (General territorial principle).

Suppose a foreign domiciled individual makes a gift of excluded property to their spouse. On the literal construction, the gift will fall within the GWR rules. A gift of excluded property is not a transfer of value, so not an exempt transfer, so it is outside the scope of the GWR spouse exemption.<sup>24</sup> That is anomalous. This consideration does support the argument that gifts of excluded property are not “by way of gift”, (and so perhaps all gifts which are not transfers of value, though we need not go that far). But:

- (1) Taxpayer arguments based on anomalies are not the most powerful of arguments.
- (2) Assuming, by a purposive (non-literal) construction, inter-spouse gifts of excluded property must be taken to fall within the relief in s.102(5), a Court may say that it does not follow that all gifts of excluded property are outside the GWR rule.

In s.3A IHTA gift means “transfer of value”. Section 3A was introduced by s.10 FA 1986. It might be argued that it would be strange for gift to have a different meaning in the next section, s.102. I do not find this a strong argument, as the wording is different and because inferences from inconsistency in drafting are based on the doubtful assumption that tax legislation is always drafted with consistent wording.

The use of the label “excluded property” suggests the property is regarded as excluded from IHT. But labels used in definitions are only brief descriptions, so the argument is not very strong. In addition, exempt transfers under s.19 IHTA are clearly within GWR (they are omitted from the list of reliefs in s.102(5) FA 1986) even though described as “exempt”.

Earlier editions of this work took a more optimistic view. But reviewing the arguments above, it is considered that the arguments are not strong enough to expect to win before a Tribunal.

HMRC take the view that GWR applies to a gift of excluded property. They might object with a counter-anomaly: that if it were right, the trust was within the POA charge as the POA GWR exemption would not apply.<sup>25</sup> But it is not necessary to investigate that.

## **74.10 GWR spouse exemption**

This section considers the GWR position on inter-spouse gifts.

---

<sup>24</sup> See 74.10.1 (H gives excluded property to W).

<sup>25</sup> See 80.19 (GWR exemptions).

Section 102(5) FA 1986 provides a set of 10 reliefs. The first is:

This section does not apply if or, as the case may be, to the extent that the disposal of property by way of gift is an exempt transfer by virtue of any of the following provisions of Part II of the [IHTA],—

- (a) section 18 (transfers between spouses or civil partners);

In the following discussion:

**“General IHT spouse exemption”** is the IHT exemption on inter-spouse transfers in s.18 IHTA.<sup>26</sup>

**“GWR spouse exemption”** is the GWR exemption in s.102(5)(a).

In short, the GWR rules do not apply on gifts between spouses if the general IHT spouse exemption applies.

Where a UK domiciled individual makes a gift to a foreign domiciled spouse, the IHT spouse exemption is restricted<sup>27</sup> and a gift over the limit will be within the scope of GWR, unless some other exemption<sup>28</sup> is in point. One solution to this problem is to sell assets at market value, so there is no disposal by way of gift. Watch the SDRT/SDLT implications.

One common situation is where one spouse gives an interest in the family home to the other spouse, but as long as the property is jointly occupied, there is in principle no GWR: see s.102B FA 1986.

#### 74.10.1 *H gives excluded property to W*

What is the position when a foreign domiciled individual makes a gift of excluded property to their spouse? On a literal construction, the gift will fall within the GWR rules. A gift of excluded property is not a transfer of value, so not an exempt transfer, so it is outside the scope of the GWR spouse exemption! But that is absurd and cannot be the correct construction, even if words must be strained to reach this result.<sup>29</sup>

#### 74.10.2 *Spouse exemption restricted*

---

26 For the IHT spouse exemption generally see 72.5.1 (Spouse exemption: Introduction); see too 74.19 (GWR on death: Spouse exemption).

27 See 89.2 (Restriction on IHT spouse exemption for foreign domiciled spouse).

28 Such as the family maintenance exemption: see 89.4 (Disposition for maintenance of spouse and other exemptions).

29 If this view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

Section 102 FA 1986 provides:

(5A) Subsection (5)(a) above does not prevent this section from applying if or, as the case may be, to the extent that—

- (a) the property becomes settled property by virtue of the gift,
- (b) by reason of the donor's spouse or civil partner ("the relevant beneficiary") becoming beneficially entitled to an interest in possession in the settled property, the disposal is or, as the case may be, is to any extent an exempt transfer by virtue of section 18 of the 1984 Act in consequence of the operation of section 49 of that Act (treatment of interests in possession),
- (c) at some time after the disposal, but before the death of the donor, the relevant beneficiary's interest in possession comes to an end, and
- (d) on the occasion on which that interest comes to an end, the relevant beneficiary does not become beneficially entitled to the settled property or to another interest in possession in the settled property.

(5B) If or, as the case may be, to the extent that this section applies by virtue of subsection (5A) above, it has effect as if the disposal by way of gift had been made immediately after the relevant beneficiary's interest in possession came to an end.

(5C) For the purposes of subsections (5A) and (5B) above—

- (a) section 51(1)(b) of the 1984 Act (disposal of interest in possession treated as coming to end of interest) applies as it applies for the purposes of Chapter 2 of Part 3 of that Act; and
- (b) references to any property or to an interest in any property include references to part of any property or interest.

This stopped *Eversden* schemes;<sup>30</sup> it is now unnecessary, because of s.102ZA, the POA rules, and the 2006 IHT trust tax reforms; it should be repealed.

#### 74.11 GWR exempt transfer reliefs

In addition to the GWR spouse exemption, s.102(5) FA 1986 provides 9 further minor reliefs, numbered semi-alphabetically:

(5) This section does not apply if or, as the case may be, to the extent that the disposal of property by way of gift is an exempt transfer by virtue of any of the following provisions of Part II of the 1984 Act,—

---

30 See 80.2.1 (*Eversden* schemes).

...

- (b) section 20 (small gifts);
- (c) section 22 (gifts in consideration of marriage or civil partnership);
- (d) section 23 (gifts to charities);
- (e) section 24 (gifts to political parties);
- (ee) section 24A (gifts to housing associations);
- (f) section 25 (gifts for national purposes, etc);
- (h) section 27 (maintenance funds for historic buildings);
- (i) section 28 (employee trusts); and
- (j) section 28A (employee-ownership trusts).

Thus most types of exempt transfer are outside GWR, though the annual exemption (s.19 IHTA) is omitted from this list, no doubt deliberately.

## 74.12 GWR death charge

Section 102(3) FA 1986 provides:

If, immediately before the death of the donor, there is any property which, in relation to him, is property subject to a reservation then ... that property shall be treated for the purposes of the [IHTA] as property to which he was beneficially entitled immediately before his death.

I refer to this as the “**GWR death charge**”.

CGT rebasing on death does not apply.<sup>31</sup> That might be an accident, caused by an absence of joined-up thinking, or a deliberate decision to penalise or discourage reservations of benefit.

Section 102(3) is a deeming provision; the donor is not in fact beneficially entitled to the property subject to the reservation but the property is treated as if they were so entitled. To understand the significance of this, it is necessary to set out the short series of sections that impose an inheritance tax charge on property to which a person is beneficially entitled at death.

Section 4(1) IHTA imposes the IHT charge on death:

On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death.

---

31 See 84.5.1 (Rebasing on death).

The key word here is “estate”. Section 5(1) IHTA defines estate by reference to beneficial entitlement:

.... a person’s estate is the aggregate of all the property to which he is beneficially entitled, except that ...

- (b) the estate of a person immediately before his death does not include excluded property ...

So if there is a GWR until death and the property is *not* excluded property:

- (1) the property is treated as property to which the donor was beneficially entitled (in all cases);
- (2) the property is part of their estate.

If there is a GWR until death and the property *is* excluded property:

- (1) the property is treated as property to which the donor was beneficially entitled (in all cases);
- (2) the property is not part of their estate.

#### **74.13 GWR over debt owed by deceased**

Suppose:

- (1) S creates a discretionary settlement under which S is a beneficiary.
- (2) The trustees lend to S.
- (3) S dies.

The debt (“the GWR debt”) is treated as being in the estate of S. However a person cannot owe a debt to himself or herself. If the GWR debt is treated as property beneficially owned by the debtor, it must be treated as if it ceased to exist. For this reason there is no IHT charge on the debt under the GWR rules, on the death of S, even if the GWR debt is UK situate.<sup>32</sup>

#### **74.14 Death: Non-settled excluded prop**

Suppose:

- (1) A gives property to B, an individual, outright.
- (2) There is a reservation of benefit: A enjoys benefits at the time of A’s death.
- (3) The property is not UK situate at the time of A’s death.

---

<sup>32</sup> If the debt is non-UK situate it may also be outside the scope of IHT because of the excluded property rules. On the question of a deduction for the GWR debt, see 76.12.3 (Settlor debt to settlor-interested discretionary trust).

A is treated as if A were beneficially entitled to the property at the time of A's death. It forms part of their estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

Here we are concerned with non-settled property. The relevant rule is that:

Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.<sup>33</sup>

In the example above, B is *in fact* beneficially entitled to the property. A is *treated* as beneficially entitled. Who is "beneficially entitled" for the purpose of applying the excluded property rule; is it A or is it B? This does not matter if A and B are both foreign domiciled, but it does if one is and the other is not. One common case is in a gift from a UK domiciled donor to their foreign domiciled spouse.<sup>34</sup> The answer is to be found by applying the general rule of construction which applies to deeming provisions.<sup>35</sup> Applying this principle it follows that the domicile of the donor A is what matters for excluded property status. Thus if A has a foreign domicile, the property (if not UK situated) is excluded property. The domicile of the donee B is irrelevant. This conclusion is confirmed by the context. It would be absurd if the taxation of A depended on the domicile of B. The taxation of A should depend on A's own domicile position.

For the purposes of the excluded property rule, therefore:

- (1) The domicile of the donor at the time of gift is irrelevant (contrast the position where the gift is made in trust).<sup>36</sup>
- (2) The situs of the property at the time of the gift is irrelevant to the operation of the excluded property rules on the death of the donor.

HMRC agree. The IHT Manual provides:

**IHTM14318 The gift: exempt transfers which cannot be GWRs**  
[Aug 2016]

...

*Excluded property*

Under the charging provisions (IHTM04072), excluded property

---

33 Section 6(1) IHTA.

34 See 74.10 (GWR spouse exemption).

35 See App 7.1 (Deeming provisions: Introduction).

36 See 74.15 (GWR death charge: excluded property rules for settled property) below.

(IHTM04251) cannot be the subject of a GWR...

*Example*<sup>37</sup>

Example 3 (George)

G is originally domiciled in the UK, but moves to New Zealand and acquires a domicile of choice there. He gives some New Zealand shares to his son, R, but continues to enjoy the dividends until his death ten years later. He dies domiciled in New Zealand.

The property is subject to a reservation and is therefore deemed to be part of G's estate on death. However, the property is situated outside the UK and the donor, who is treated as beneficially entitled to it, was domiciled outside the UK at his death. The property is therefore excluded property within IHTA84/S6 (1) and escapes the GWR charge.

This is correct; the Manual continues:

However, if G had returned to the UK and his domicile of origin had revived, there will be a GWR claim on his death, or if the reservation had ceased in his lifetime and within 7 years of his death, the ending of the reservation will be treated as a deemed PET. This is because at the time the GWR charge arises, G is domiciled in the UK so IHTA84/S6(1) does not apply...

While it is correct that s.6(1) does not apply on the facts of this version of the example, it is arguable that there is no GWR.<sup>38</sup>

The same applies to gifts to companies, including companies held by trusts.

### **74.15 Death: Settled excluded property**

Suppose:

- (1) S (not UK domiciled) gives property to a discretionary settlement.
- (2) There is a reservation of benefit, eg S is a beneficiary.
- (3) The property is not UK situate<sup>39</sup> at the time of the death of S.

S is treated as if S were beneficially entitled to the property at the time of S's death. It forms part of S's estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

---

37 This example was reworded and improved in 2010, probably in response to criticisms of the former wording in the 2010/11 edition of this book.

38 See 74.9 (Gift of excluded property).

39 The position is the same if the property consists of UK AUTs or OEICs, but for convenience I refer to non-UK situate property only.

### 74.15.1 *Rival solutions*

There are two sets of excluded property rules, relating to settled and non-settled property. Which does one apply?

*The Settled Property Solution* The property subject to a reservation is in fact settled property, so on this view one applies the settled property rules set out in s.48(3) IHTA:

Where property comprised in a settlement is situated outside the UK—

- (a) The property ... is excluded property unless the settlor was domiciled in the UK at the time the settlement was made. ...

So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:

- (1) the donor is domiciled outside the UK at the time the settlement was made. (The domicile of the donor at the time of death is irrelevant); and
- (2) the property is not situated in the UK at the time of death.

I call this the “**Settled Property Solution**”.

*The Non-settled Property Solution* The settled property GWR is to be treated as property to which the donor is “beneficially entitled”. On this view one applies the deeming provision to its logical conclusion: if a person is beneficially entitled to property, it is not settled property. So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:

- (1) the donor was domiciled outside the UK at the time of their death. (The domicile of the donor at the time the settlement was made is irrelevant for GWR, though it is relevant for other purposes); and
- (2) the property is not situated in the UK at the time of death.

I call this the “**Non-settled Property Solution**”.

### 74.15.2 *Correct solution*

The Non-settled Property Solution has had supporters.<sup>40</sup> Nevertheless it

---

<sup>40</sup> Venables, “Excluded Property Trusts and GROBs” [2003] OITR Vol 11 p.75 <http://www.khpplc.co.uk/reviews> Akin, *GITC Review*, Vol 1 Issue 2, p.1 (no longer online).

is generally regarded as wrong. What about the deeming provision that the property is to be treated as if the donor were beneficially entitled to it? The answer is that the property must still be regarded as “settled property” for the application of the excluded property rules. One does not carry the implications of the deeming provisions as far as the Non-settled Property Solution suggests. One way to reach this conclusion is to note that the deeming provision does not deem the donor to be beneficially and *absolutely* entitled to the settled property. One can be beneficially entitled to property which is settled property. (Bear in mind that “settlement” has a wide definition for IHT. It includes property held subject to a contingency, property charged with the payment of an annuity, and a lease for life. A person entitled to such property may nevertheless be said to be “beneficially” entitled.)

This view is supported by s.49(1) IHTA which provides:

A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as *beneficially entitled* to the property in which the interest subsists.

[Emphasis added]

No-one suggests that property to which s.49(1) applies is to be treated as non-settled property for the purposes of the GWR rules. The wording of the deeming provision in s.102(3) is materially the same.

Under the Non-settled Property Solution, the property is simultaneously excluded property (for general IHT purposes) and non-excluded property (for GWR purposes). While that is not impossible, it would be remarkable, even in as convoluted an area as this, and for this reason too the Settled Property Solution is to be preferred.

It has been said that a purposive construction favours the Non-settled Property Solution: the purpose of the GWR rules is to put the donor in the same position as if they had not made the gift. This is the general purpose in the case of gifts by UK domiciliaries. However, arguments on purposive construction only run when one knows the general purpose and is confident that the general purpose applies in the particular circumstances of the case. This argument *assumes* that that purpose necessarily extends to the foreign domiciliary – which begs the question. Perhaps parliament intended there to be a difference between the two cases. One cannot apply a purposive construction unless the purpose is

clear.<sup>41</sup>

Even adopting the Settled Property Solution, there will arguably<sup>42</sup> be a charge to IHT on the death of a settlor who enjoys a benefit over trust property if at the time of their death the trust property is UK situated (and not UK AUTs or OEICs). Though I doubt if much notice is taken of that in practice.

In short, if the settlor is a beneficiary it is safer not to invest directly in UK situate property during their life.

Note that the Non-settled Property Solution favours the taxpayer if a UK domiciliary makes a GWR settlement, and becomes non-UK domiciled before their death. However that won't often happen.

### 74.15.3 HMRC view

After a decade of dithering<sup>43</sup> HMRC agreed with the Settled Property Solution. The IHT Manual provides:

**IHTM14396 Settled property: Settlement created when the settlor is domiciled outside the UK** [Sep 2018]

Where the settlor was domiciled outside the UK at the time a settlement was made, any foreign property in the settlement is excluded property and is not brought into charge for IHT purposes (IHTM27220). This rule applies where property is subject to a reservation of benefit even though the settlor may have acquired a domicile of choice in the UK, or be deemed to be domiciled in the UK, at the time the GWR charge arises (IHTM04071).

*Reservation ceasing on death*

At the material date FA86/S102(3) deems the donor to be beneficially entitled to property that is, at that time, settled property. As the property in which the reservation subsisted is 'property comprised in a settlement', it is the provisions of IHTA84/S48(3) that are in point. It is the domicile of the settlor at the time the settlement was made that is relevant in deciding whether foreign property in which the reservation

---

41 In the battle of the anomalies HMRC might instance the case where a foreign domiciliary made a settlement shortly before becoming UK domiciled, and say that it is absurd that a settlement made in such circumstances should avoid IHT on the death of the settlor. But (1) this is certainly the case where the foreign domiciliary enjoys no benefit from the settlement; and (2) this was the case under estate duty; and (3) this was the case under HMRC practice in the first 15 years or so of IHT; in the circumstances it is wrong (if not absurd) to describe that result as absurd.

42 See 74.9 (Gift of excluded property).

43 See the 2010/11 edition of this work para 51.12.3.

subsisted is excluded property.

*Example (Henry)*

H, who is domiciled in New Zealand, puts foreign property into a discretionary trust under which he is a potential beneficiary (IHTM14393). He dies five years later having acquired a domicile of choice in the UK and without having released the reservation. The property is subject to a reservation on death but it remains excluded property and is outside the IHT charge.

The Manual continues by noting three exceptions:

*Exceptions to the rule*

There are, however, circumstances where this rule does not apply:

[1] If the trustees had sold the foreign assets so that at the date of death the settled property was invested in UK assets, the exclusion would not apply as the property comprised in the settlement was not situated outside the UK, so IHTA84/S48(3) cannot apply.

[2] If

[a] the donor has acquired a domicile of choice (or is deemed domiciled) in the UK and

[b] adds other property to the settlement (irrespective of the situs (IHTM27071) of the property),

we regard the donor as creating a separate settlement (IHTM04272). All the trust assets will be property subject to a reservation, but the foreign assets settled when the donor was domiciled outside the UK will be excluded property, whereas the assets settled when the donor was domiciled in the UK will be subject to IHT

[3] And in the reverse situation, if a donor who is domiciled (or deemed domiciled) in the UK creates a settlement with foreign assets and the settled property remains subject to a reservation at death, the trust assets will be subject to IHT under FA86/S102(3) even if the settlor dies domiciled outside the UK as IHTA84/S48(3) does not apply - as well as being subject to relevant property trust charges (IHTM42000).

Point [1] is correct that s.48(3) does not apply but it is arguable that there is no GWR for other reasons.<sup>44</sup> Point [2] is very doubtful: see 71.15 (Added property: Change of domicile). Point [3] is correct, assuming the settled property solution is correct. The unfairness of the double charge (which does not seem to trouble HMRC) may be avoidable by winding up the trust.

---

<sup>44</sup> See 74.9 (Gift of excluded property).

### **74.16 Gift to non-dom who creates trust**

Suppose:

- (1) A gives property outright to B.
- (2) B gives that property to a settlement.
- (3) A is a beneficiary of that settlement and enjoys benefits so that there is a reservation of a benefit in relation to A's gift.
- (4) B (and not A) is the settlor of the settlement.<sup>45</sup>

Now which set of excluded property rules is applied? It is suggested that one must apply the rules applicable to settled property for the reasons given in 74.15 (Death: Settled excluded property). FA 1986 sch. 20 para 5 needs to be considered but, properly understood, nothing there deems A to be the settlor of the settlement. If that is right, there is no reservation of benefit problem if:

- (a) B (the settlor) was not domiciled in the UK when the settlement was made/funded; and
- (b) the property is not situated in the UK at the time of the death of A.

Conversely, on this view, there is a GWR problem if B (the settlor) is UK domiciled (regardless of the domicile of A).

### **74.17 GWR lifetime charge**

So far we have considered the position where the benefit continues until the death of the donor. In the absence of any provision, the cessation of a reservation of benefit during the individual's lifetime would not be a transfer of value. Section 102(4) FA 1986 deals with this:

If, at a time before the end of the relevant period, any property ceases to be property subject to a reservation, the donor shall be treated for the purposes of the 1984 Act as having at that time made a disposition of the property by a disposition which is a potentially exempt transfer.

I refer to this as the “**GWR Is**”.

Section 102(4) is a deeming provision; it is a different deeming from s.102(3), the GWR death charge. In s.102(3) the donor is deemed to be beneficially entitled. Here, the donor is deemed to have made a PET. To understand the significance of this, it is necessary to set out the definition of a PET. A PET is a particular kind of transfer of value (s.3A IHTA) and

---

45 See 94.7 (A gives to B, B gives to trust).

s.3 IHTA provides:

- (1) [a] ... a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition;
- [b] and the amount by which it is less is the value transferred by the transfer.
- (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

Note that s.3(1) contains two definitions: s.3(1)[a] defines "transfer of value" and s.3(1)[b] defines "value transferred". For both purposes s.3(2) states that excluded property is (in short) disregarded.

#### 74.17.1 *Non-settled GWR PET charge*

Suppose:

- (1) a non-UK domiciliary makes a non-settled GWR of non-UK situate property; and
- (2) the property ceases to be subject to a reservation (while the donor is still non-UK domiciled).

No-one could sensibly suggest that there is a possible IHT charge. The reason is in s.3(2): the donor is deemed to have made a disposition of excluded property. While one can (just) call that a PET, the value transferred is ignored and no charge to IHT can arise. Nothing in the deeming provision requires one to ignore the application of s.3(2) to s.3(1)[b]. What matters is the domicile of the donor (and the situs of the GWR property) at the time the reservation ceases. There would be a deemed PET if:

- (1) F (a foreign domiciliary) makes a GWR.
- (2) F becomes UK domiciled.
- (3) The GWR is released.<sup>46</sup>

#### 74.17.2 *Settled GWR PET charge*

Suppose settled property ceases to be subject to a reservation; eg a settlor/donor ceases to be a beneficiary of a trust they have created, and becomes excluded from benefit. The issues are similar to the case of the

---

<sup>46</sup> There is a hint of this in IHTM 14318, but the point is not addressed clearly.

GWR death charge: how far do you carry the implications of the deemed PET? Do you deem the GWR property which is actually settled property to be non-settled property? Although the deeming is marginally different, the context is the same as for GWR on death.

The answer must be decided consistently with the answer to the related issue for GWR on death. If (as concluded above) the Settled Property Solution is correct on death then there is also no charge on a lifetime cessation of GWR. HMRC agree, and (having eventually come down in favour of the Settled Property Solution) accept the view that there is no charge. The IHT Manual provides:

**IHTM14396 - Settled property: Settlement created when the settlor is domiciled outside the UK [Sep 2018]**

*... Reservation ceasing during lifetime*

Where the reservation is released during the donor's lifetime, FA86/S102(4) treats the donor as making a disposition of the property by a disposition which is a potentially exempt transfer (PET) (IHTM04072). This is different to the basis of the charge arising on death, but as property in which the reservation ceases is 'property comprised in a settlement' the provisions of IHTA84/S48(3) are again in point to decide whether any foreign property is excluded property.

As FA86/S102(4) treats the donor as making a disposition, it is the treatment of excluded property when a disposition is made that is relevant. IHTA84/S3(2) states that no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

So as the donor is treated as making a disposition, property is treated as ceasing to form part of their estate. Provided that property is excluded property, IHTA84/S3(2) applies to exclude the assets in which the reservation ceased from charge.

This vindicates the view taken in the pre-2011 editions of this work.<sup>47</sup>

The Manual continues with three exceptions:

The same exceptions to the above will apply as regards

[1] foreign property which is replaced by UK situs property (IHTM27071),

[2] property added to the settlement when the donor is domiciled in the

---

<sup>47</sup> "The taxpayer should conduct their affairs on the basis of the Settled Property Solution. ... One should not be deterred by the ghost of an argument rattling its chains in the IHT Manual."

UK, and  
 [3] in the reverse situation outlined above, a charge will arise under FA86/S102(4) if the reservation ceases before the donor's death. Refer any case where you consider that there is such a charge, or any enquiries about the possibilities of a charge, to Technical.

For these exceptions, see 74.15.3 (HMRC view).

### **74.18 GWR on termination of IIP**

Before 2006, GWR did not in principle apply on the termination of an interest in possession, because the termination did not usually involve a disposal by way of gift. Section 102ZA FA 1986 now provides:

- (1) Subsection (2) below applies where—
  - (a) an individual is beneficially entitled to an interest in possession in settled property,
  - (b) either—
    - (i) the individual became beneficially entitled to the interest in possession before 22nd March 2006, or
    - (ii) the individual became beneficially entitled to the interest in possession on or after 22nd March 2006 and the interest is an immediate post-death interest, a disabled person's interest or a transitional serial interest, or falls within section 5(1B) of the 1984 Act and
  - (c) the interest in possession comes to an end during the individual's life.
- (2) For the purposes of—
  - (a) section 102 above, and
  - (b) Schedule 20 to this Act,
 the individual shall be taken (if, or so far as, he would not otherwise be) to dispose, on the coming to an end of the interest in possession, of the no-longer-possessed property<sup>48</sup> by way of gift.

On the termination of an interest in possession, the (former) life tenant is in the same position as the settlor. See 74.15 (GWR death charge: excluded property rules for settled property).

---

48 “The no-longer-possessed property” is defined in s.102ZA(3) IHTA:

“In subsection (2) above ‘the no-longer-possessed property’ means the property in which the interest in possession subsisted immediately before it came to an end, other than any of it to which the individual becomes absolutely and beneficially entitled in possession on the coming to an end of the interest in possession.”

I refer to this as “**GWR property**”.

If the life tenant does not enjoy a benefit, no problem arises.

If the former life tenant does enjoy a benefit the position is as follows:

- (1) The GWR rules do not apply if the GWR property is excluded property.
- (2) The GWR property is excluded property if (in short):
  - (a) the settlor was not UK domiciled when the settlement was made/funded; and
  - (b) the trust property is not UK situate (or is UK funds excluded property) at the time of the GWR charge (the death of the former life tenant or the time of cessation of benefit).

The domicile of the life tenant at the time that the interest came to an end is not relevant.

#### **74.19 GWR on death: Spouse exemption**

This section considers whether the IHT spouse exemption can apply on the death of the donor so as to override the GWR death charge.<sup>49</sup>

Suppose:

- (1) H makes a gift to S which is a GWR so the gifted property is GWR property.
- (2) H dies and leaves H's entire estate to his spouse W (and the IHT spouse exemption applies to H's estate).

On the death of H the position for the GWR property is governed by s.102(3) FA 1986:

...that property shall be treated for the purposes of the [IHTA] as property to which [H] was beneficially entitled immediately before his death.

The GWR property is not excluded property (even if S is foreign domiciled).<sup>50</sup> So H will in principle be subject to inheritance tax on the GWR property on H's death.

The spouse exemption is not available on the death of H to avoid this GWR charge. The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

---

49 For the IHT spouse exemption generally see 72.5.1 (Spouse exemption: Introduction); see too 74.10 (GWR spouse exemption).

50 See 74.14 (Death: Non-settled excluded prop).

- ... is an exempt transfer to the extent that the value transferred is
- [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
  - [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

This exemption does not apply to the GWR property since it does not become comprised in the estate of W.

Suppose:

- (1) H (UK domiciled) makes a gift to W (foreign domiciled at the time of the gift).<sup>51</sup>
- (2) The gift does not qualify for the IHT spouse (or any other) exemption and H continues to enjoy benefits from the property until H's death so the gifted property is GWR property.
- (3) W still owns the GWR property at the time of the death of H.
- (4) W has become UK domiciled (or IHT deemed domiciled) at the time of the death of H.

At first glance it might seem that the IHT spouse exemption does not apply. On the facts of this example the conditions of the relief are not in reality satisfied. The GWR property does not "become" comprised in the estate of the spouse; and on the occasion of the death of H, the estate of the spouse has not "increased". However, one must remember that s.102(3) FA 1986 is a deeming provision. It is the old question of how far one carries the deeming.<sup>52</sup> If one deems, as s.102(3) requires, the GWR property to be property to which H was beneficially entitled, it would follow that one must deem the estate of W to be increased by reason of the death of H. The conclusion is supported by considering the object of the GWR rules. The object is to put the donor in the same position as if they had not made the gift. If H had not made H's gift then (on the facts of the above example) H would qualify for the spouse exemption.

The IHT spouse exemption would also apply to defeat a GWR death charge if H made a gift to a trust under which H's spouse acquired an estate interest in possession on H's death.

The same would apply if A made a GWR gift to B and A was not married to B at the time of the gift but was married at the time of A's

---

51 The gift is a PET (but assume H survives seven years so no tax charge arises on the PET).

52 See App 7.1 (Construction of deeming provisions).

death.

After some vacillation, HMRC now agree. The IHT Manual provides:

**IHTM14303 devolution of GWR property [Mar 2021]**

The gift with reservation provisions provide that the gifted property is deemed to be treated as part of the donor's estate immediately before death.

Although the property does not pass on death under the will or intestacy, exemptions that are available on death such as spouse exemption (IHTM11031) and charity exemption (IHTM11101) may be applicable to the transfer deemed to be made on death if, on death, the property passes to an exempt beneficiary. However, if the reservation ceases during the lifetime of the donor, since the donor is deemed to have made a disposition which is a potentially exempt transfer (IHTM04064), no exemptions can apply.

Annual exemptions (IHTM14141) will not apply to the transfer deemed to be made on death or deemed to be made when the reservation ceases.<sup>53</sup>

#### 74.19.1 Remedial planning after GWR

Where H has made a gift, and a reservation of benefit problem arises, the following solutions may be considered:

- (1) H ceases to enjoy any benefit.
- (2) The donee gives the property back to H.
- (3) Arrange that the IHT spouse exemption applies on the death of H.
- (4) The donee settles the property: see 89.10.2 (Gift to spouse + gift to trust).

#### 74.20 Tracing gifted property

The identity of the property disposed of by way of gift matters for several reasons:

- (1) To determine whether the donor has reserved a benefit over it
- (2) To apply the excluded property rules
- (3) To identify the property subject to the GWR charge

---

<sup>53</sup> This change was anticipated in a STEP Briefing Note "IHT- Gift with reservation and spouse exemption" (Feb 2021)

[https://www.step.org/system/files/media/files/2021-02/step-iht-gift-with-reservation-and-spouse-exemption-briefing-note\\_0.pdf](https://www.step.org/system/files/media/files/2021-02/step-iht-gift-with-reservation-and-spouse-exemption-briefing-note_0.pdf)

Sch 20 FA 1986 contains three sets of tracing rules:

<b>Tracing rules for</b>	<b>Sch 20 para</b>
Non-settled property	2 - 4
Termination of estate IIP	4A
Settled property	5

The drafter in 1986 took the wording from the old estate duty provision in FA 1957. The legislation could have simply used the concepts of “derived from” or “representing”, and the whole of paras 2-5 would not have been necessary. But there it is.

#### 74.20.1 “*The material date*”

All three codes use the term “material date” which is (in short) the date when the GWR charge arises. Para 1 sch 20 FA 1986 provides:

“the material date”, in relation to any property means,

- [a] in the case of property falling within subsection (3) of the principal section [s.102], the date of the donor’s death and,
- [b] in the case of property falling within subsection (4) of that section, the date on which the property ceases to be property subject to a reservation;

#### 74.21 **Tracing non-settled property**

Para 2(1) sch 20 FA 1986 provides the general rule:

Where

- [a] there is a disposal by way of gift and,
- [b] at any time before the material date, the donee ceases to have the possession and enjoyment of any of the property comprised in the gift,

then on and after that time the principal section [s.102] and the following provisions of this Schedule shall apply as if the property, if any, received by the donee in substitution for that property had been comprised in the gift instead of that property (but in addition to any other property comprised in the gift).

Para 2(3) sch 20 FA 1986 provides a commonsense definition of “in substitution”:

In sub-paragraph (1) above the reference to property received by the donee in substitution for property comprised in the gift includes in particular—

- (a) in relation to property sold, exchanged or otherwise disposed of by the donee, any benefit received by him by way of consideration for the sale, exchange or other disposition; and
- (b) in relation to a debt or security, any benefit received by the donee in or towards the satisfaction or redemption thereof; and
- (c) in relation to any right to acquire property, any property acquired in pursuance of that right.

This is a straightforward tracing or derivation rule. Para 2(2) sch 20 FA 1986 provides two exceptions. The first relates to settled property, which has a separate code.<sup>54</sup> The second is a surprise:

This paragraph does not apply if the property disposed of by the gift ...

- (b) is a sum of money in sterling or any other currency.

Suppose:

- (1) A gives money to B.
- (2) B uses the money to buy an asset.
- (3) A enjoys a benefit over the asset.

There is no GWR over the money: which no longer exists, or else belongs to the vendor of the asset. Does it follow that there is no GWR at all? Taken at face value, this suggests that if there is a non-settled gift of money which is then invested, GWR ceases to apply. Could that really be correct? HMRC say that it is.<sup>55</sup>

#### 74.21.1 *Gift by donee*

Para 2(4) sch 20 FA 1986 provides:

Where, at a time before the material date, the donee

- [a] makes a gift of property comprised in the gift to him,
- [b] or otherwise voluntarily divests himself of any such property otherwise than for a consideration in money or money's worth not less than the value of the property at that time,<sup>56</sup>

then, unless he does so in favour of the donor, he shall be treated for the purposes of the principal section [s.102] and sub-paragraph (1) above as continuing to have the possession and enjoyment of that property.

Para 2(5) sch 20 FA 1986 defines "voluntarily":

---

<sup>54</sup> See 74.22 (Tracing settled property).

<sup>55</sup> See 80.19.3 (Tracing rules).

<sup>56</sup> The words at [b] are needed as a sale at an undervalue is not a disposal by way of gift.

For the purposes of sub-paragraph (4) above—

- (a) a disposition made by the donee by agreement shall not be deemed to be made voluntarily if it is made to any authority who, when the agreement is made, is authorised by, or is or can be authorised under, any enactment to acquire the property and
- (b) a donee shall be treated as divesting himself, voluntarily and without consideration, of any interest in property which merges or is extinguished in another interest held or acquired by him in the same property.

#### 74.21.2 *Tracing shares*

Para 2(6) sch 20 FA 1986 provides:

Where

- [a] any shares in or debentures of a body corporate are comprised in a gift and
- [b] the donee is, as the holder of those shares or debentures, issued with shares in or debentures of the same or any other body corporate, or granted any right to acquire any such shares or debentures,

then, unless the issue or grant is made by way of exchange for the first-mentioned shares or debentures, the shares or debentures so issued, or the right granted, shall be treated for the purposes of the principal section [s.102] and this Schedule as having been comprised in the gift in addition to any other property so comprised.

(7) In sub-paragraph (6) above the reference to an issue being made or right being granted to the donee as the holder of shares or debentures shall be taken to include any case in which an issue or grant is made to him as having been the holder of those shares or debentures, or is made to him in pursuance of an offer or invitation made to him as being or having been the holder of those shares or debentures, or of an offer or invitation in connection with which any preference is given to him as being or having been the holder thereof.

This is needed because a bonus issue is not “in substitution” and so not within para 2(1).

#### 74.21.3 *New consideration: Deduction*

Para 3 sch 20 FA 1986 provides:

- (1) Where either sub-paragraph (3)(c) or sub-paragraph (6) of paragraph 2 above applies to determine, for the purposes of the principal section

[s.102], the property comprised in a gift made by a donor—

- (a) the value of any consideration in money or money's worth given by the donee for the acquisition in pursuance of the right referred to in the said sub-paragraph (3)(c) or for the issue or grant referred to in and said sub-paragraph (6), as the case may be, shall be allowed as a deduction in valuing the property comprised in the gift at any time after the consideration is given, but
  - (b) if any part (not being a sum of money) of that consideration consists of property comprised in the same or another gift from the donor and treated for the purposes of the 1984 Act as forming part of the donor's estate immediately before his death or as being attributable to the value transferred by a potentially exempt transfer made by him, no deduction shall be made in respect of it under this sub-paragraph.
- (2) For the purposes of sub-paragraph (1) above, there shall be left out of account so much (if any) of the consideration for any shares in or debentures of a body corporate, or for the grant of any right to be issued with any such shares or debentures, as consists in the capitalisation of reserves of that body corporate, or in the retention by that body corporate, by way of set-off or otherwise, of any property distributable by it, or is otherwise provided directly or indirectly out of the assets or at the expense of that or any associated body corporate.
- (3) For the purposes of sub-paragraph (2) above, two bodies corporate shall be deemed to be associated if one has control of the other or if another person has control of both

#### 74.21.4 *Donee dies before material date*

Para 4 sch 20 FA 1986 provides:

Where there is a disposal by way of gift and the donee dies before the date which is the material date in relation to any property comprised in the gift, paragraphs 2 and 3 above shall apply as if—

- (a) he had not died and the acts of his personal representatives were his acts; and
- (b) property taken by any person under his testamentary dispositions or his intestacy (or partial intestacy) were taken under a gift made by him at the time of his death.

#### 74.22 **Tracing settled property**

Para 5 sch 20 FA 1986 contains the tracing rules for a gift to a trust, and para 4A contains the rules on the termination of an estate IIP. It is

convenient to consider these together, as para 4A adopts the para 5 rules, with a nod to a plain English drafting style (describing the donor as “D”).

#### 74.22.1 *Gift to trust*

##### **Para 5(1) sch 20 FA 1986**

Where there is a disposal by way of gift and the property comprised in the gift becomes settled property by virtue of the gift,

[a] paragraphs 2 to 4 above shall not apply<sup>57</sup>

[b] but, subject to the following provisions of this paragraph, the principal section [s.102] and the following provisions of this Schedule shall apply as if the property comprised in the gift consisted of the property comprised in the settlement on the material date,

[c] except in so far as that property neither is, nor represents, nor is derived from, property originally comprised in the gift.

##### **Para 4A(1)(2) sch 20 FA 1986**

(1) This paragraph applies where—  
 (a) under section 102ZA of this Act, an individual (“D”) is taken to dispose of property by way of gift, and  
 (b) the property continues to be settled property immediately after the disposal.

(2)[a] Identical

Identical

Identical

This is the same in effect as the tracing rule for non-settled property, except that it also applies to money.

Para 5 does not apply to a gift to a company held by a trust.

#### 74.22.2 *Trust comes to end*

---

<sup>57</sup> In addition, para 2(2) sch 20 FA 1986 provides: “This paragraph does not apply if the property disposed of by the gift ... (a) becomes settled property by virtue of the gift”. But that is otiose as para 5(1)[a] has the same effect.

**Para 5(2) sch 20 FA 1986**

If the settlement comes to an end at some time before the material date as respects all or any of the property which, if the donor had died immediately before that time would be treated as comprised in the gift,—

(a) the property in question, other than property to which the donor then becomes absolutely and beneficially entitled in possession, and

(b) any consideration (not consisting of rights under the settlement) given by the donor for any of the property to which he so becomes entitled,

shall be treated as comprised in the gift (in addition to any other property so comprised).

**Para 4A(4) sch 20 FA 1986**

If the settlement comes to an end at some time before the material date as respects all or any of the property which, if D had died immediately before that time, would be treated as comprised in the gift,—

(a) the property in question, other than property to which D then becomes absolutely and beneficially entitled in possession, and

(b) any consideration (not consisting of rights under the settlement) given by D for any of the property to which D so becomes entitled,

Identical

This would apply on a transfer between trusts.

74.22.3 *Donee creates trust*

Para 5(3) sch 20 FA 1986 provides:

Where

[a] property comprised in a gift does not become settled property by virtue of the gift,

[b] but is before the material date settled by the donee, sub-paragraphs (1) and (2) above shall apply in relation to property comprised in the settlement as if the settlement had been made by the gift; and for this purpose property which becomes settled property under any testamentary disposition of the donee or on his intestacy (or partial intestacy) shall be treated as settled by him.

74.22.4 *Loan to trust*

**Para 5(4) sch 20 FA 1986**

**Para 4A(3) sch 20 FA 1986**

Where property comprised in a gift becomes settled property either by virtue of the gift or as mentioned in sub-paragraph (3) above, any property which—

(a) on the material date is comprised in the settlement, and

(b) is derived, directly or indirectly, from a loan made by the donor to the trustees of the settlement,

shall be treated for the purposes of sub-paragraph (1) above as derived from property originally comprised in the gift.

Any property which—

[identical]

(b) is derived, directly or indirectly, from a loan made by D to the trustees of the settlement,

shall be treated for the purposes of sub-paragraph (2) above as derived from property originally comprised in the gift.

The drafter presumably considered that a loan is not a disposal by way of gift.

#### 74.22.5 *Accumulated income*

##### **Para 5(5) sch 20 FA 1986**

Where, under any trust or power relating to settled property, income arising from that property after the material date is accumulated, the accumulations shall not be treated for the purposes of sub-paragraph (1) above as derived from that property.

##### **Para 4A(5) sch 20 FA 1986**

Where, under any trust or power relating to settled property, income arising from that property after the material date is accumulated, the accumulations shall not be treated for the purposes of sub-paragraph (2) above as derived from that property.

This seems generous, but there it is.

#### 74.23 **1986 transitional relief**

The GWR rules only apply to disposals on or after 18 March 1986. The IHT Manual states correctly:

##### **IHTM14311 GWRs: the gift: initial requirements** [Sep 2018]

... Gifts made before 18 March 1986 cannot be the subject of a GWR claim.

*Settled property*

A pre-18 March 1986 settlement which would have been caught by the GWR provisions had it been made after 17 March 1986 will therefore escape the GWR charge unless further gifts into settlement are made after that date. The GWR provisions will apply to the property settled by those further gifts....

The Manual gives a straightforward example:

*Example (Frederick)*

On 1 January 1985 F settled £100,000 on discretionary trusts under which he was a potential beneficiary. On 1 January 1989 he added a further £50,000 to the settlement. Frederick died on 1 April 1992, having remained a potential beneficiary throughout.

The GWR provisions apply to the 1989 addition but not to the property originally settled. The GWR claim extends to the assets in the settled fund at 1 April 1992 representing that £50,000. The Double Charges Regulations (IHTM14711) will be in point.

GWR does apply to pre-1986 settlements on a post-1986 termination of an estate IIP.<sup>58</sup>

#### 74.23.1 *Pre-1986 insurance policy*

For completeness: s.102(6)(7) FA 1986 provide a transitional relief for pre-1986 policies of insurance:

(6) This section does not apply if the disposal of property by way of gift is made under the terms of a policy issued in respect of an insurance made before 18th March 1986 unless the policy is varied on or after that date so as to increase the benefits secured or to extend the term of the insurance; and, for this purpose, any change in the terms of the policy which is made in pursuance of an option or other power conferred by the policy shall be deemed to be a variation of the policy.

(7) If a policy issued as mentioned in subsection (6) above confers an option or other power under which benefits and premiums may be increased to take account of increases in the retail prices index (as defined in section 8(3) of the 1984 Act) or any similar index specified in the policy, then, to the extent that the right to exercise that option or power would have been lost if it had not been exercised on or before 1st August 1986, the exercise of that option or power before that date shall be disregarded for the purposes of subsection (6) above.

A gift might be made under the terms of a policy if a person covenanted to pay the premiums of a policy held by another. That would not have

---

58 See 74.18 (GWR on termination of IIP).

been usual and I doubt if the issue ever arises now.

## CHAPTER SEVENTY FIVE

# INTER-TRUST TRANSFERS: IHT

75.1		Purpose
75.10.1	Same settlement fiction: Purpose	75.12.6 Post 2020-retest: FOTRA security
75.11.6	Trust-transfer retesting:	

*Cross references*

### 75.1 Inter-trust transfers: Navigation

This chapter discusses IHT issues on transfers between trusts. Transfers between trusts raise many other tax issues:

<b>Topic</b>	<b>See para</b>
Trust law background	94.10
IHT Transfer of value	<i>Not discussed; see s.52 IHTA</i>
IHT loss of estate IIP status	<i>Not discussed</i>
CGT disposal by transferor	53.20.5
s.731	47.13.2
s.87 trust gains transferred	57.39
s.87 rebasing time limit	57.47.3
sch 4B (Flip-flop schemes)	58.2
Tainting protected trusts	88.4
Post-2006 addition to pre-2006 trust, settlor/spouse has IIP	71.13.3
Who is settlor	94.11 - 94.14; 95.1

### 75.2 Addition/transfer to trust

This chapter considers the IHT consequences of:

- (1) transfers between trusts
- (2) individuals adding property to trusts

There are four tiers of rules:

- (1) General rules of trust law

- (2) General rules of IHT law:
  - (a) The IHT definition of settlement: this applies for all IHT purposes
  - (b) An IHT provision for trusts with two settlors: this applies for (more or less) all IHT purposes<sup>1</sup>
 I refer to this as “**general IHT law**”
- (3) IHT provisions for transfers between trusts: these apply only for the taxation of relevant property<sup>2</sup> which I call “**relevant property taxation**”
- (4) Further rules apply to the specialist (but still important) topics of employee trusts<sup>3</sup> and pension trusts<sup>4</sup>

The main significance of these rules relates to excluded property status, where there has been a change of domicile of the settlor. The rules can affect other matters, such as the date and computation of a 10-year charge.

### 75.3 One IHT-settlement or more

In order to decide whether there has been a transfer between trusts (or settlements, I use the terms synonymously) it is first necessary to identify what is (or are) the settlement(s) for IHT purposes. A transfer can only take place if there are two (or more) distinct settlements.

There are trust law rules which determine for trust law purposes whether one trust exists, or whether two (or more) distinct or separate trusts exist.<sup>5</sup> Subject to context, and specific tax rules, these rules apply for tax purposes. That is, in the absence of specific context or rules, the word trust has its normal trust law meaning. So the question is: when do these trust law rules apply, and when do specific IHT rules override them.

Section 43 IHTA provides:

- (1) The following provisions of this section apply for determining
  - [a] what is to be taken for the purposes of this Act to be a settlement, and
  - [b] what property is, accordingly, referred to as property comprised in a settlement or as settled property.

---

1 See 75.5 (Separate-settlement fiction).

2 For the definition of this important but opaque term, see 70.8 (“Relevant property”).

3 See s.86(4)(5) IHTA (not discussed here).

4 See ? (Pension trust).

5 See 94.10 (Inter-trust transfer: Trust law background).

- (2) “Settlement” means any disposition or dispositions of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby<sup>6</sup> the property is for the time being held in trust...<sup>7</sup>

There are two distinct concepts here:

- (1) The entity, created by a disposition (or dispositions), which has an ongoing existence. I refer to this entity, if within the IHT definition, as an **“IHT-settlement”**.
- (2) The disposition (or dispositions) which create an IHT-settlement, which take place at a particular moment (or moments).

The following points seem clear:

- (1) 2 (or more) dispositions may create 2 (or more) separate IHT-settlements.
- (2) On the other hand:
  - (a) 2 (or more) dispositions may create one IHT-settlement.
  - (b) 2 (or more) associated operations may create one IHT-settlement (as 1 disposition can be made by 2 (or more) operations).<sup>8</sup>

I refer to a case within (2) as a **“compound IHT-settlement”**.

The IHT definition derives from s.1 SLA 1925,<sup>9</sup> which also has a concept of compound settlements.<sup>10</sup>

When do dispositions or operations create only one (compound) IHT-settlement and when do they create more than one? There are two cases where this question has been discussed.

### 75.3.1 *Hatton*

---

6 “Whereby” means “by virtue of which”. That is self-evident, but if authority is needed, see *Rysaffe v IRC* [2002] EWHC 1114 (Ch) at [34].

7 For the text which follows these words, see 85A.6.3 (Definition of “IHT-settlement”).

8 See 70.11 (Why associated operations matter).

9 The SLA reference to “any... instrument, or any number of instruments” has become “any disposition or dispositions” in s.43 IHTA (in order to include settlements made orally).

10 A note on terminology: the SLA 1925 is the first statute to use the term compound settlement, but the terminology was in use before 1925: see *Re Coull* [1905] 1 Ch 712.

In *Hatton v IRC*<sup>11</sup> there was an arrangement under which:

- (1) A made a settlement (“the first disposition”) conferring a valuable equitable interest on B.
- (2) B transferred her interest to a new settlement (“the second disposition”).

The Judge said:

the first settlement was made with a view to enabling or facilitating the making of the second settlement. Accordingly, the two settlements are associated operations

That is straightforward. What follows? The 2 dispositions (operations) created one IHT-settlement (in my terminology, a compound IHT-settlement):

they are, therefore, to be regarded as effecting together a single disposition for the purposes of [IHT]. On that basis, the two settlements together constitute a single disposition of property, namely the property assigned ... to the trustees of the first settlement... That single disposition is a “settlement” within the [IHT] definition.<sup>12</sup>

### 75.3.2 *Rysaffe*

In *Rysaffe v IRC* the settlor transferred 5 parcels of shares to five settlements. As a matter of trust law, there were 5 separate settlements.

HMRC argued that there was only one IHT-settlement. HMRC’s first argument relied on the words “disposition or dispositions” in the definition of IHT-settlement. Thus it was argued that 5 dispositions<sup>13</sup> created one IHT-settlement.

This was rejected:

[20] [s.43(1) IHTA] begins by saying that the provisions of the section ‘apply for determining what is to be taken for the purposes of this Act to be a settlement’. Notwithstanding those words of the statute, my

---

<sup>11</sup> 67 TC 759.

<sup>12</sup> That was one IHT-settlement with two settlors. For the consequences, see 75.7 (Direct and indirect settlors).

For another aspect of this decision see 94.34 (Purpose: Adviser/agent of settlor).

<sup>13</sup> In fact there were 10 dispositions, as the settlor first transferred £10 to each settlement, but nothing turned on that.

opinion is that s 43 gives little or no guidance to answering the question of whether ... there is one settlement or more than one. In my judgment the draftsman has for the most part left those questions to be answered in accordance with general [trust law] principles...

The judge then explains why:

[21] ...the use of the plural [‘dispositions’] is merely a recognition that in a case where there is a settlement (ie only one settlement) it is possible for there to have been more dispositions to the trustees than one. A typical case is where a settlor creates his settlement with one disposition, and later adds more property to it by one or more other dispositions. ... One of the hypothetical examples which I gave earlier was of a case where a wife made an addition to the trust fund of an existing settlement previously made by her husband. I do not accept that the use of the plural means any more than that it is possible to have more than one disposition to the trustees of a single settlement. In particular, the use of the plural is not a positive enactment that, where there are two or more dispositions to different settlements, they are to constitute one settlement for inheritance tax purposes even if they would constitute two or more settlements under the general law.<sup>14</sup>

This proposition was justified by considering the easy case of two unconnected persons creating separate settlements:

[22] Indeed, if it was all a matter of the wording of s 43, it would be impossible to discriminate between cases of two dispositions to different settlements which count as one settlement for inheritance tax, and cases of two dispositions to different settlements which do not count as one settlement for inheritance tax.

Assume that settlor A has made a disposition of property to trustee X whereby some property is currently held on a discretionary trust, and that settlor B has made a disposition of other property to trustee Y whereby the other property is also currently held on a discretionary trust. Assume also that there is no connection between A and B or between X and Y: they have never even heard of one another. Assume yet further that there is no connection or overlap between the two discretionary classes. The only things which the two settlements have in common is

---

14 This was approved in *Barclays Wealth v HMRC* [2017] EWCA Civ 1512 at [52]. Also see 71.15 (Added property: Change of domicile).

that they are both discretionary and that they are both structures under which some property is ‘for the time being’ held in trust. Could it be argued that the two settlements rank as one settlement for inheritance tax purposes because of the definition in s 43(2)? Of course not. The argument would be ridiculous. But if one looks only at the words of the statute there have been ‘dispositions of property ... whereby the property is for the time being ... held by trustees’ on discretionary trusts. The obvious proposition that each is a separate settlement for inheritance tax purposes as well as for other purposes cannot, in my opinion, be found spelt out in the small print of s 43. The proposition follows because it is the position in the general law, and s 43 assumes that that position will apply for inheritance tax as for other purposes of the law—unless, as sometimes is so but not in this case, there is a detailed provision requiring a departure from the position in the general law.

HMRC’s second argument was based on associated operations. The 5 dispositions to the trusts were operations. These operations were in fact not associated,<sup>15</sup> but the judge considered the position if they had been (that does make the discussion somewhat unrealistic). HMRC relied on the rule that a disposition includes a disposition effected by associated operations; they argued that the 5 associated operations constituted a single disposition effected by associated operations. Hence there was one IHT-settlement. This was also rejected:

The starting point should have been to consider whether the property which the case was about was ‘property comprised in a settlement’ within the meaning of s 64 [IHTA] (the charging section) read with s 43 [IHTA] (the section which explains the concepts of settlement and of property being comprised in a settlement). If it was property comprised in a settlement anyway without the need to rely on the extension of ‘disposition’ to cover also a disposition by associated operations, the associated operations provision was not relevant. Sections 43 [definition of IHT-settlement] and 64 [10-year charge] applied, and there was no need to invoke the definition of associated operations in order to make them apply. Nor was there any need to consider whether, if the definition had been potentially relevant, the facts of this case would have come within it...

---

<sup>15</sup> See 70.10 (“Associated operation”).

[34] Let me begin with the parcel of shares held by [the] first settlement (settlement no 1) ... I find it clearest to begin in para (b) of sub-s (2). Were the shares 'held by trustees on trust' as described in the paragraph? To paraphrase, were they held by trustees on discretionary trusts? The answer is: yes. ... [s.43(2)] requires me to ask whether the shares were held by trustees on discretionary trusts by virtue of 'a disposition or dispositions of property'. My answer is: yes. They were held by the trustee on discretionary trusts by virtue of the transfer of them which [the settlor] made to the trustee ... That transfer was a disposition of property. Having given that obvious answer I go on to say that it is the answer on the ordinary meaning of 'disposition', without recourse to the extended definition under which the term includes a disposition by associated operations. It is wrong to say that the parcel of 6,900 shares held by the trustee of settlement no 1 on discretionary trusts was so held by the trustee by virtue of a disposition effected by associated operations. The parcel of shares was held by the trustee on the discretionary trusts by virtue of a disposition of it effected by a single operation, not by virtue of a disposition of it effected by multiple operations. It is neither necessary nor appropriate to invoke or to apply the extended statutory definition in order to conclude that the parcel of shares was property comprised in a settlement at the time when the ten-yearly charge fell to be applied.

The comments in *Rysaffe* should be seen in the context of the issue in the case, which was whether simple and discrete dispositions to separate trusts could be combined to create one compound IHT-settlement. It is now settled that the answer is, no.<sup>16</sup>

*Rysaffe* is not authority for the proposition that one can *never* combine dispositions (or associated operations) so as to constitute one compound IHT-settlement. That is not consistent with *Hatton* (which was not cited in *Rysaffe*, but should not be regarded as overruled).

### 75.3.3 GAAR guidance: Pilot trusts

GAAR guidance discusses the issue. It is not relevant to the current law,

---

<sup>16</sup> The reader may wonder whether the same answer would have been reached today, when a different attitude to avoidance prevails; but the issue does not arise: the doctrine of precedent (more or less) prevents the issue from being re-litigated, and the legislation has also now changed.

and the more focussed reader should skip to the next section, but I digress to set it out here, as it illustrates the weakness of the GAAR guidance, which is a point of general importance:

### **D26 Pilot trusts**

This example shows a long-established practice approved by the Courts in an area where the law provides deliberately precise boundaries.

The Inheritance Tax legislation described below has been amended since the original publication of this guidance: this example is included to demonstrate the underlying principles.<sup>17</sup>

#### **D26.1 Background**

D26.1.1 [The guidance summarises the relevant property regime and notes:] In determining the rate at which tax is charged on settled property, the value of all the property in settlements established by the same settlor on the same day – ‘related settlements’ – is taken into account.

#### **D26.2 The arrangements**

D26.2.1 C wishes to leave his estate in trust for his 7 grandchildren. He wants to ensure that these settlements are not subject to Inheritance Tax after his death.

C establishes one settlement per day over a period of 7 days, settling £100 on each.<sup>18</sup> He revises his Will so that he leaves a specific legacy of £250,000 free of tax to each settlement.

Following his death, his executors pay the legacies to each of the trustees...

I refer to this as a “**pilot trust scheme**”.

#### **D26.4 The taxpayer’s tax analysis**

D26.4.1 On C’s death, his estate will be subject to Inheritance Tax and the tax will be borne by the residuary estate. But going forward, each settlement will benefit from its own nil-rate band and the funds added

---

17 Author’s footnote: See s.62B IHTA, enacted in 2015. Perhaps it was thought too much trouble to find an example to make the point which operated under the current law. It is not easy to find examples of contrived and artificial transactions which are not caught by the GAAR.

18 Author’s footnote: The position should be the same if the sum have been £10, which was the sum used in *Rysaffe*. Perhaps HMRC wanted to be free to argue that £10 (worth less now than it was worth at the time of *Rysaffe*) could be ignored as *de minimis*? But if so what happened to the “deliberately precise boundaries”? Probably that is reading the text with more care than was intended.

to each of the other settlements will not be taken into account in arriving at the rate of tax as the settlements are not related settlements. Provided that the value of the settled property remains below the Inheritance Tax nil-rate band, the trusts will not pay any [Inheritance] tax.

**D26.5 What is the GAAR analysis under s207(2) of FA 2013**

*D26.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?*

...Settlements that are established on the same day are related settlements and the value of property, immediately after they commenced, in related settlements is taken into account in determining the rate of tax that is charged on each settlement. Because the settlements were created on consecutive days, they are not related settlements and so the rate of tax is calculated without reference to the other settlements, even though the substantial addition of funds came about as a result of a single event - C's death.

This does not answer the question set out at D26.5.1. But it suggests that the answer is yes, the pilot trust scheme is consistent with tax principles, on the grounds that “ the law provides deliberately precise boundaries”.

*D26.5.2 Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

Had C's Will established a single settlement for the benefit of all of his grandchildren that trust would have been subject to Inheritance Tax. And if seven separate settlements had been established by his Will, they would have been related settlements so each would have been taken into account with the other to establish the rate of tax. Establishing the 'pilot' trusts on separate days before death had no purpose other than to put the trusts in a tax-advantaged position.

This does not answer the question set out at D26.5.2, but it suggests that the answer is no: the pilot trust scheme is contrived and abnormal; which seems fairly clear.

This seems to be a rare example of a scheme which is contrived and abnormal but consistent with tax principles.

**D26.5.3 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?**

The practice was litigated in the case of *Rysaffe Trustee v IRC* [2003]

STC 536.<sup>19</sup> HMRC lost the case and having chosen not to change the legislation [from 2003 to 2015] must be taken to have accepted the practice.

There was no HMRC statement to that effect. The inference is from silence. Pilot trust schemes were rarely used in practice, as far as I am aware.<sup>20</sup> If that is right, the inference from silence is a weak one.

The reader may also wonder *when* HMRC should be taken to have accepted the efficacy of pilot trust schemes. Presumably HMRC's acceptance took effect after they had a reasonable opportunity to change the law, perhaps a year or two after the *Rysaffe* decision was final. If the GAAR had been in effect in 2003, it would have applied. What if the law changed in 2004, or a few years later? Discuss.

### **D26.6 Conclusion**

D26.6.1 The arrangements accord with established practice accepted by HMRC and are accordingly not regarded as abusive.

HMRC's customers may regard this guidance as somewhat unimpressive. But there it is.

## **75.4 Inter-trust transfer: IHT effect**

After that digression, and with the definition of IHT-settlement and its case law in mind, I return to ask: What is the position where there is an appointment between trusts, that is:

- (1) S creates a trust ("trust 1")
- (2) The trustees exercise a trustee power to transfer the trust property to what is (for trust law purposes) a separate and distinct trust ("trust 2").

I refer to that as an "**inter-trust transfer**".

The two steps constitute 2 dispositions (and also 2 associated operations).

Before 2018, there was a good argument that:

- (1) The 2 dispositions (or operations) should be regarded as a constituting

<sup>19</sup> Author's footnote: The facts of *Rysaffe* were different and did not involve a gift by will to long-dormant pilot trusts. But it seems HMRC did not consider the differences were significant.

<sup>20</sup> Particularly since even pilot trusts and wills were made, the arrangement only took effect on the death of the testator.

a single compound IHT-settlement.

- (2) That trust is the same as trust 1. That is, for IHT purposes the property is regarded as remaining in trust 1.

In short, the inter-trust transfer has no effect for IHT purposes. The exercise of the power has the same effect as if the trustee of trust 1 appointed the trust fund to be held upon trusts identical with the trusts of trust 2 but set out in full in the appointment, without reference to trust 2. This avoids the problems and anomalies which arise if an inter-trust transfer is regarded as a transfer to a separate IHT-settlement. I refer to that as the “**no-transfer approach**”.

The no-transfer approach is not now open. It is inconsistent with *Barclays Wealth v HMRC*.<sup>21</sup> In this case, trustees held property in an excluded property trust. They transferred the trust fund to another trust. The settlor was (deemed) UK domiciled when the second trust was made. The Court of Appeal said:

There can be no doubt that, when the [trust’s] shares were appointed by the Trustee ... from the 2001 Settlement to the DBJT, they ceased to be comprised in the former settlement and became comprised in the latter. ... Accordingly, section 81(1) applied with the consequence that, for the purposes of Chapter III, the shares had to be treated as remaining comprised in the 2001 Settlement for so long as they (or, after the sale, their proceeds) were in fact comprised in the DBJT...

It is also clear that, while the shares and their proceeds remained in the DBJT, they were not excluded property. ... the settlor ... was UK-domiciled when the DBJT was made, so the [retesting] condition in section 82(3) could not be satisfied.<sup>22</sup>

In *Barclays Wealth* this was in fact common ground. The no-transfer approach was not put to the court. Strictly speaking, a case is not binding authority for a proposition which was not argued. But where the Court of Appeal have expressed themselves in such strong terms, and the parties were represented by leading counsel, there is little prospect that a Court below the Supreme Court would refuse to follow the CA lead on this point. In short, for practical purposes, the law on this point is now settled

---

21 [2017] EWCA Civ 1512.

22 para [41], [44].

at all levels below the Supreme Court.

An inter-trust transfer should not be within the scope of s.81 retesting. That would avoid many anomalies and issues discussed below. As the Supreme Court are not likely to have an opportunity to put this right, statutory law reform is needed to provide that a transfer between trusts is ignored for all IHT purposes.<sup>23</sup>

## 75.5 Separate-settlement fiction

Section 44(2) IHTA provides:

Where more than one person is a settlor in relation to a settlement and the circumstances so require, this Part of this Act (except s.48(4) to (6)) shall have effect in relation to it as if the settled property were comprised in separate settlements.

I refer to this as the “**separate-settlement fiction**”.

### 75.5.1 *Analysis of fiction*

When the separate-settlement fiction applies, the settled property is treated as being in separate settlements (which I call “**notional trusts**”).

Each notional trust must (for IHT purposes) be regarded as possessing three features: (1) notional trust property (2) a notional settlor and (3) a notional date on which it was made. These features are as notional (or fictional) as the notional trust itself. The statute does not expressly tell us what they are: context and common sense must fill that gap.

One might say that the notional trusts do not exist, in the sense that the trust with several settlors exists, and one might describe the latter as “the real trust”. But more analytically, the trust with several settlors exists for the purposes of trust law (and other purposes which adopt trust law principles) and the notional trusts exist for IHT purposes.<sup>24</sup>

As to tracing when some of the trust fund is taken from a settlement with two settlors, see App.2.11.7 (Withdrawal from mixed fund).

### 75.5.2 *Purpose of fiction*

---

<sup>23</sup> There is a loose precedent in the IT/CGT appointment rules; see 94.11 (Inter-trust transfer: appointment).

<sup>24</sup> See App 6.1 (What do we mean by real).

The separate-settlement fiction is needed because inheritance taxation of trusts depends on:

- (1) the domicile of the settlor
- (2) the transfers made by the settlor in the 7 years before commencement of the trust (which affect the trust's nil-rate band for trust taxation).

The rules are drafted on the basis that every trust has one settlor and only properly work on that basis; instead of making provision for a trust with multiple settlors, the scheme is to regard such trusts as multiple trusts.

IHT Manual provides:

**42253. More than one settlor** [Jun 2016]

... This separation has 3 main effects

- [1] Where more than one trust exists each will have its own nil-rate band for rate purposes.
- [2] The value of property may be affected. For example, holdings of unquoted shares in a single trust might amount to a control holding whereas the same parcels of shares would be minority holdings if taken separately.
- [3] The separate trust made by the second person will have its own starting date. (IHTM42221)

This is correct as far as it goes, but it ignores the settlor domicile aspect of the rule, which is in practice the most important.

### 75.5.3 *When fiction applies*

The separate-settlement fiction is expressed to apply for the purposes of Part 3 IHTA (not generally), but all the important provisions which govern trust IHT are in Part 3 (which is headed: Settled Property).<sup>25</sup>

There are two cases where the separate-settlement fiction does not apply.

Firstly, the fiction does not apply unless “the circumstances so require”. Normally the circumstances do so require. Most likely the drafter could not identify any cases where the fiction should not be applied but thought there might be some such cases; another possibility is that the drafter identified some cases but thought they were too difficult or insufficiently important to set out in the statute. So that has been left to the courts to

---

<sup>25</sup> The separate-settlement fiction has to be repeated in s.201(4) IHTA in order to apply it to s.201 (because that is not in Part 3).

sort out.

Secondly, the fiction does not apply for the purposes of s.48(4) to (6), ie for the FOTRA securities exemption. The reason was that FOTRA exemption does not depend on the identity of the settlor, it depends on the identity of the beneficiaries.<sup>26</sup> It was therefore unnecessary to apply the separate-settlement fiction. As far as I can see the fiction would not have done any harm, but it would not have had any effect: presumably the drafter thought it safer or simpler not to have to bother with the separate-settlement fiction.

### 75.6 B adds property to A's trust

Suppose:

- (1) an individual ("A") creates a trust ("the real trust"), and
- (2) another<sup>27</sup> individual ("B") adds property to it.<sup>28</sup>

The real trust has two settlors, A and B. The separate-settlement fiction applies, and one must imagine that the trust fund of the real trust is comprised in two notional trusts, "notional trust A" and "notional trust B".

Common sense suggests:

- (1) Notional trust A is regarded as if:
  - (a) It holds the property given by A.
  - (b) A is its sole settlor.
  - (c) It was made at the time A made the real trust.
- (2) Notional trust B is regarded as if:
  - (a) It holds the property given by B.
  - (b) B is its sole settlor.
  - (c) It was made at the time B added property to the real trust.

This seems clear, but if authority is needed, see *Hatton v IRC*:

Circumstances in which [the separate-settlement fiction] is commonly found to apply include those in which two or more persons have separately provided funds from their own independent resources to be

---

<sup>26</sup> See 71.11 (Trusts: FOTRA securities).

<sup>27</sup> For the position where the settlor adds to their *own* trust, see 71.15 (Added property: Change of domicile).

<sup>28</sup> The same analysis applies if A and B together transfer funds to a new jointly made trust.

held upon the trust of the same settlement. In such a case the effect of [the separate-settlement fiction] is, I suspect, generally thought to be that the settled property is treated as if a proportionate or identifiable part were held in other, separate settlements; each notionally separate settlement having its own single settlor.<sup>29</sup>

#### 75.6.1 *More than 1 addition to trust*

Suppose:

- (1) An individual (“A”) creates a trust (“the real trust”).
- (2) Another individual (“B”) adds property to it (“the first addition”).
- (3) B later adds more property to the trust (“the second addition”).

It is considered that there are still two notional trusts. Notional Trust A is as before. Notional trust B is regarded as if:

- (a) It holds the property given by B.
- (b) B is its sole settlor.
- (c) It was made at the time of the first addition
- (d) B added property to the notional trust at the time of the second addition.

It follows that trust property added by the second addition may be excluded property if B was not UK domiciled at the time of the first addition.<sup>30</sup>

#### 75.6.2 *Adding value indirectly*

It is suggested that the same applies if B adds value indirectly to the real trust (eg by a gift to a company held by the real trust). The real trust has two settlors, A and B.<sup>31</sup> The circumstances require the real trust to be regarded as two separate notional trusts. A division of the trust property of the real trust into two parts representing the value given by A and the value given by B is still possible. It may not be easy but it is no harder than many apportionments required for tax.<sup>32</sup>

### 75.7 Direct and indirect settlors

---

<sup>29</sup> 67 TC 759 at p.789.

<sup>30</sup> But see 71.15 (Added property: Change of domicile).

<sup>31</sup> See 94.24 (Providing property to co in a trust).

<sup>32</sup> For instance, apportionment of gains of non-resident companies to participators.

Suppose there is an arrangement under which:

- (1) A gives property to B, and
- (2) B gives the property to a trust (“the real trust”).

It appears at first sight that there are then two settlors: an indirect settlor (A) and a direct settlor (B).<sup>33</sup> Both have provided the *same* property. A similar issue may arise if A owns a company and procures the company to make a settlement. The company is a direct settlor and A is an indirect settlor.

What is the IHT analysis? On one view the separate-settlement fiction applies so that the settled property in the real trust is treated as being comprised in separate trusts (which I call “notional trust A” and “notional trust B”). On this view the consequence is said to be that:

- (1) Notional trust A:
  - (a) holds *all* the trust property of the real trust;
  - (b) A is its sole settlor;
  - (c) I do not know when proponents of this view would say that notional trust A was made. It would either be at the time A gave the property to B or the time that B settled it, and this poses perhaps another difficulty with this view.
- (2) Notional trust B:
  - (a) also holds *all* the trust property of the real trust;
  - (b) B is its sole settlor;
  - (c) was made at the time B created the real trust.

The difficulty with this view is that it leads to double taxation<sup>34</sup> and the separate-settlement fiction which only applies “if the circumstances so require” should not be used to give that result. So the better view is that the circumstances do not “so require” and the separate-settlement fiction

---

33 See 94.7 (A gives to B, B gives to trust). This issue may arise in the context of failed tax planning of the kind discussed at 94.41 (Planning to create excluded property trust).

34 This view is supported by comments in *Hatton v IRC* 67 TC 759 at pp.789–790. But (1) the comments are obiter (2) the judge did not have the benefit of counsel’s arguments on the issue (3) the judge did not appreciate the double taxation difficulties which arise on his view; in the circumstances it is considered that these comments do not represent the law.

does not apply.

We have therefore one real settlement with two settlors. What is the position for excluded property if A is foreign domiciled and B is not? It will be recalled that settled property is (in short) excluded property “unless *the settlor* was domiciled in the UK at the time the settlement was made”. There are two possible solutions:

- (1) One cannot say that “the settlor” was domiciled in the UK unless both settlors were domiciled here. In that case the trust property may be excluded property if either A or B are foreign domiciled.
- (2) To read the word “the settlor” in this context as meaning “the settlor or one of the settlors”.<sup>35</sup> In that case the trust property is only excluded property if A and B are both foreign domiciled.

Both solutions have anomalous results, though in one case the anomaly favours the taxpayer and in the other it favours HMRC.

The best solution to this conundrum is that one should identify A as the “real” settlor and infer that B should not be regarded as a settlor.<sup>36</sup> Then the anomalies do not arise.

#### 75.7.1 HMRC view

RI 166 provides:

**Several persons contribute to a single settlement** [February 1997]

...

[Section 44(2)] is similar in terms<sup>37</sup> to FA 1975 Sch 5 para 1(8), which was considered by Chadwick J in *Hatton v IRC* [1992] STC 140. In the light of the decision in that case [HMRC] take the view

- [1] that the determination of the extent to which overseas assets in a settlement are excluded property by reason of the settlor’s domicile is a relevant “required circumstance”; and that
- [2] where a clear, or reasonably sensible, attribution of settled property between the contributions made by several settlors is possible, there will be a separate settlement, with its own attributed assets, for each

---

35 Applying (perhaps extending) the rule of construction that the singular includes the plural.

36 See 94.7.2 (Is B also a settlor?).

37 Author’s footnote: Although the RI uses the word “similar”, there are in fact no material differences.

contributor for IHT purposes;

- [3] if such an attribution is not feasible, each separate settlement will comprise all the assets of the single, actual settlement.<sup>38</sup>

### Trust records

It follows from the comments above that the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ... two or more persons have contributed funds for the purposes of the settlement.

Points [1] and [2] are correct.

A discussion of point [3] first requires consideration of when attribution is “feasible”, I suggest it should always be feasible where two or more persons have contributed distinct funds, even if the funds are later merged.<sup>39</sup> I understand point [3] to refer to the *Hatton* situation, gift from A to B and gift from B to a trust, in which case the HMRC view is subject to the objections considered above.<sup>40</sup>

In practice it is perhaps better to avoid joint settlors (or for one person to add property to a settlement made by another). This avoids the complication of the separate-settlement fiction. But in a straightforward case there should not be any difficulty as long as:

- (1) all settlors are foreign domiciled or all are UK domiciled; or
- (2) the settlors include both UK and foreign domiciliaries, but trust record keeping is adequate. (Ordinary trust accounts should suffice.)

It is likewise best to avoid indirect additions to a trust fund (eg a beneficiary using their own funds to improve trust property), where the

38 In similar vein, IHT Manual provides:

“**42253. More than one settlor** [Jun 2016]

... In practice, you can take the phrase ‘and the circumstances so require’ to mean, ‘in a simple and straightforward case’.

- [1] You can accept the separateness of direct additions made by the settlor’s favourite aunt,
- [2] but if for instance the added property is situate in Liechtenstein and transferred by a nominee in Liberia to a trust company in Jersey you would need to satisfy yourself as to what the circumstances were and whether they require treatment as separate trusts.”

Para [2] unhelpfully ducks the issue.

39 This is assumed in s.471 ITA; see 94.11.3 (IT/CGT appointment rule).

40 See 75.7 (Direct and indirect settlors).

original settlor is foreign domiciled and another person adding property is UK domiciled.<sup>41</sup>

## **75.8 Transfer: A's trust to B's trust**

Suppose:

- (1) A gives property ("A's fund") to trust A ("real trust A")
- (2) B gives property ("B's fund") to trust B ("real trust B")
- (3) The trustees of real trust A transfer A's fund to real trust B<sup>42</sup> ("the inter-trust transfer")

In this paragraph I consider the general IHT position, ie the position on the assumption that s.81 does not apply (or at least before the application of s.81). That is the case if we are concerned with the taxation of estate IIP trusts (though this will be rare).

Real trust B has two settlors, A and B. The separate-settlement fiction applies and one imagines that the settled property is comprised in two notional trusts ("notional trust A" and "notional trust B").

Notional trust A is regarded as if:

- (1) it holds the property provided by A; and
- (2) A is its sole settlor.

The important question is: at what time is notional trust A regarded as being made? The choice is:

- (a) at the time that real trust A was made;
- (b) at the time of the transfer to real trust B.

The latter view cannot be right, for various anomalies would then arise.

- (1) Suppose A died before the transfer to real trust B. One cannot then apply the rule that the excluded property status of the trust depends on the domicile of the settlor "at the time the settlement was made".<sup>43</sup>

---

41 If the settlor adds property to a trust of which they are the settlor, see 71.15 (Added property: Change of domicile).

42 The same analysis applies if the trustees of real trusts A and B each transfer their trust funds to a third real trust C.

43 It has been argued that if A is UK domiciled when A made real trust A and dead at the time of the transfer to real trust B, A's fund can be excluded property after the transfer. The argument is:

- (1) Notional trust A is regarded as made at the time of the transfer to real trust B.
- (2) A is regarded as not "domiciled in the UK" at that time (because a dead person

- (2) Suppose a transfer from trust A to trust B and A changes domicile after the date of trust A but before the transfer:
- (a) If A is UK domiciled when A made real trust A and foreign domiciled at the time of the transfer to real trust B, A's fund would become excluded property after the transfer. One would not expect HMRC to agree with that.
  - (b) Conversely, if A is foreign domiciled when A made real trust A and UK domiciled at the time of the transfer to real trust B, the trust fund would cease to be excluded property.

These are not equivalent or self cancelling anomalies, for in case (a) no transfers would usually take place, whereas in case (b) transfers would take place every time.

Under this analysis, there is (subject to s.81, if applicable) no IHT advantage or disadvantage from a transfer to another trust, regardless of changes in the settlor's domicile, or the settlor's death, which is logical and sensible. I see no difficulty in a rule that the notional trust is regarded as made before the transfer, for once one accepts that the notional trust is fictional, it can logically be regarded as being made on any date.<sup>44</sup>

## 75.9 Transfer: A's trust to A's trust

Suppose:

- (1) A creates two separate trusts, trust A1 and A2.
- (2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.

In this paragraph I consider the general IHT position, ie the position on the

---

has no domicile).

The view that notional trust A is regarded as made at the time real trust A was made avoids obvious anomalies and is to be preferred.

If (contrary to my view) notional trust A is regarded as made at the time of the transfer to real trust B, after the death of A, one might regard A as having at that time the domicile A had:

- (1) at the time of A's death; or
- (2) at the time A made real trust A.

Another view is that s.44(2) only applies if the circumstances so require, and they do not so require. However adopting my approach, s.44(2) gives a sensible result.

<sup>44</sup> See App.4.7.5 (Trust appointment: Filling blanks).

assumption that s.81 does not apply (or at least before the application of s.81). That is the case if are concerned with the estate IIP trusts (though this will be rare).

Trust A2 has only one settlor, A, and the separate-settlement fiction does not apply to it.

The possibilities are as follows:

*A is UK domiciled when A made trust A1; but not when A made trust A2.* It is suggested that the transferred property in trust A2 may in principle qualify as excluded property. Trust A2 *does* satisfy the condition that the settlor was foreign domiciled at the time that *this* settlement was made.

*A is foreign domiciled when A made trust A1; and UK domiciled when A made trust A2.* The result is reversed. The transferred property in trust A2 is not excluded property. Trust A2 does not satisfy the condition that the settlor was foreign domiciled when this settlement was made.

Thus there is a distinction between:

- (1) transfer from trust made by A to a trust made by B (change of A's domicile irrelevant); and
- (2) transfer from trust made by A to another trust made by A (change of A's domicile significant).

This is anomalous but the anomaly naturally follows from the fact that the separate-settlement fiction applies in case (1) and not in case (2).

#### 75.9.1 *Transfer to new trust*

It is tentatively suggested that the same applies where trustees of trust A1 transfer the trust fund to new trustees who hold on the terms of a new declaration of trust which is an "empty trust", there being no trust property before the transfer ("trust A2"). In this case too the separate-settlement fiction does not apply.

The view that trust A2 is regarded as made at the time trust A1 was made, the principle that a trust appointment merely fills in blanks left by the settlor,<sup>45</sup> gives a sensible result but is hard to reconcile with s.48A IHTA which provides:

---

45 See App.4.7.5 (Trust appointment: Filling blanks).

In this Act any reference to the commencement of a settlement is to the time when property first becomes comprised in it.<sup>46</sup>

It is considered that the transferred property may in principle be excluded property if A is living and foreign domiciled at the time of the transfer, even though A was UK domiciled when A made trust A1.

What if A is dead at the time of the transfer? On a literal reading, one might argue that (regardless of the domicile of A during A's life) the settlor, A, was not UK domiciled when trust A2 was made, since a deceased person has no domicile. The scope for tax avoidance would make that result unacceptable to a court in a case where A was UK domiciled at the time A made trust A1 and at the time of A's death. A court is likely to regard A as retaining after A's death the domicile A had during A's life. This is not as much of a stretch as first appears. If a company can be regarded as having a domicile (by analogy to the domicile rules of a living individual) why not a deceased person? However, it is suggested that the trust property in trust A2 may be excluded property if A was not UK domiciled at the time of A death.

### 75.10 Same-settlement fiction: s.81

Section 81(1) IHTA provides:

Where property which ceases to be comprised in one settlement becomes comprised in another then, unless in the meantime any person becomes beneficially entitled to the property (and not merely to an interest in possession in the property), it shall for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property] be treated as remaining comprised in the first settlement.

I call this the “**same-settlement fiction**”.

IHT regards trust property as a continuing fund,<sup>47</sup> so s.81 does not apply on a sale between trusts at full value, for no property moves between settlements.

---

46 See 70.9 (Settlement commencement date).

47 Contrast SP E9 “Property is regarded ... as becoming comprised in a settlement when it, *or other property which it represents*, is introduced by the settlor.” See Dymond’s *Death Duties* (15<sup>th</sup> ed, 1973) p.75 (“the term “property” in the Finance Acts embraces, not merely the specific investments at a particular, time, but the corpus which is the subject-matter of the disposition...”). See [App. 2.11](#) (‘Representing’ assets).

Section 81 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration.

Section 81 only applies on a transfer of trust capital: if trustees distribute trust income to another trust, s.81 does not apply, because the income is not “settled property” within the IHT definition.<sup>48</sup>

What if property is transferred from trust A to trust B and the terms of the trusts are different? Although the property transferred from is deemed to be held in trust B, it is considered that it is not deemed to be held on the terms of trust A: it is regarded as held on the terms set out in trust B as if they had been incorporated in trust A. For instance, a transfer from an estate IIP trust to a discretionary trust gives rise to an exit charge: the property is deemed to remain held in the first trust but the trust property ceases to be relevant property.

#### 75.10.1 *Same settlement fiction: Purpose*

What is the purpose of the same-settlement fiction? It must be intended to counter avoidance of the IHT 10-year charge, based on moving property between settlements. Suppose a trust (“the old trust”) is approaching its 10-year anniversary (on which a 10-year charge would arise). A clear example of tax avoidance by transfer to a new trust (in the absence of s.81) is as follows:

- (1) The trustees might appoint a reversionary interest to a beneficiary.
- (2) The beneficiary transfers that interest to a new trust.
- (3) The new trust becomes entitled to the trust property before the ten year anniversary of the old trust.

This scheme would avoid the 10-year charge on the old trust.<sup>49</sup> Section 81 effectively counteracts this schemes by deeming the trust property to remain in the old trust. This explains why the same-settlement fiction applies only for the purpose of relevant property taxation.

### 75.11 Trust-transfer retesting

---

48 See ? (Definition of “IHT-settlement”).

49 For completeness: this scheme might also be advantageous if the settlor had made chargeable transfers in the 7 years before the creation of the old trust, as the second trust might have a better nil-rate band in the computation of its ten-year charges.

Where s.81 applies, s.82/82A IHTA impose additional requirements for trust property to qualify as excluded property.<sup>50</sup> I coin the following terminology:

The s.82/82A rules together are “**trust-transfer retesting**”

The s.82 rule is “**pre-2020 trust-transfer retesting**”

The s.82A rule is “**post-2020 trust-transfer retesting**”

Section 82 IHTA provides:

- (1) [a] In a case where, apart from this section, property to which section 81 applies would be excluded property by virtue of section 48(3)(a) above,
  - [b] that property shall not be taken to be excluded property at any time (“the relevant time”) for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property] (except sections 78 and 79)<sup>51</sup> unless Conditions A and B are satisfied.
- (2) [This is a transitional rule: see 75.13 (s.81 transitional rules)].
- (3) Condition A referred to in subsections (1) and (2) above is<sup>52</sup>
  - (b) in the case of property to which subsection (1) or (2) of section 81 above applies, that the person who is the settlor in relation to the second of the settlements mentioned in the subsection concerned,
 

was not domiciled in the UK when that settlement was made.
- (4) Condition B referred to in subsection (1) above is<sup>53</sup>
  - (b) in the case of property to which subsection (1) or (2) of section 81 above applies, that the person who is the settlor in relation to the first or second of the settlements mentioned in that subsection,
 

was not a formerly domiciled resident<sup>54</sup> for the tax year in which the relevant time falls.
- (5) This section does not apply in relation to a case to which section 82A applies.

---

50 Similar rules apply where the settlor/spouse have an initial IIP: see 71.13 (Initial interest settlor/spouse).

51 Sections 78, 79 IHTA concern conditional exemption for historic property, which is not discussed here.

52 Para (a) has been deleted.

53 Para (a) has been deleted.

54 This has its normal IHT meaning: see 4.7 (Formerly-domiciled resident: IHT).

The following discussion focusses on condition A, as condition B (formerly-domiciled resident) will be uncommon.

Pre-2020 retesting only applies for determining whether property is excluded property “by virtue of s.48(3)(a)”, ie for determining whether foreign situate property is excluded property. So it does not apply for AUTs and OEICs.<sup>55</sup>

Retesting only applies for the purposes of relevant property taxation, so one must distinguish:

- (1) excluded property for the purposes of relevant property taxation (“**RP excluded property**”); and
- (2) excluded property for other IHT purposes (but the scope of this has been greatly reduced since the trust IHT reforms introduced in 2006)

The consequences of retesting depend on the circumstances of the inter-trust transfer.

#### 75.11.1 *A’s trust to A’s other trust*

Suppose:

- (1) A creates two separate trusts, trust A1 and trust A2.
- (2) The trustees of trust A1 transfer property (“the transferred property”) to trust A2.

The possibilities are as follows:

*A is not UK domiciled when A made trust A1 but UK domiciled when A made trust A2.* The transferred property in trust A2 is not excluded property under general IHT principles.<sup>56</sup>

*A is UK domiciled when A made trust A1 but not UK domiciled when A made trust A2.* The transferred property may be excluded property under general IHT principles. However, s.82 retesting prevents foreign situate transferred property in trust A2 from qualifying as RP excluded property. (This is probably an accidental consequence of the wording, because if the drafter had had this point in mind they would have made s.82 IHTA apply for all IHT purposes and not only for the purposes of relevant property

---

<sup>55</sup> See 71.10 (Trusts: UK funds).

<sup>56</sup> See 75.11.4 (Transfer of equitable interest).

taxation.)

In short, for foreign situate transferred property to qualify as RP excluded property, A must be domiciled outside the UK at the time A made trust A1 and trust A2.

### 75.11.2 *Transfer to 3<sup>rd</sup> or to 1<sup>st</sup> trust*

Suppose:

- (1) A creates three separate trusts, A1, A2 and A3.
- (2) The trustees of trust A1 transfer property (“the transferred property”) to trust A2.
- (3) The trustees of trust A2 transfer the transferred property to trust A3.

The transferred property is treated as remaining in trust A1. It is only excluded property if A was not UK domiciled when A made “the second of the settlements mentioned” in s.81(1), but that refers (it is considered) to trust 3. The domicile of A at the time A made trust A2 is not relevant.

Thus if trustees of an excluded property trust transfer property to a non-excluded property trust made by the same settlor, they have fallen into a trap: foreign situate transferred property ceases to be excluded property. They can extricate themselves from the trap if the trustees of trust A2 transfer the property back to trust A1: *Barclays Wealth v HMRC*.<sup>57</sup> But there will be an exit charge if the property ceases to be excluded property on the transfer. That is anomalous, because if the trust property was UK situate at the time of the transfer there would be no exit charge, even if it later became foreign situate. But this is an area full of anomalies, and only law reform, or the Supreme Court, can put that right.

### 75.11.3 *From A’s trust to B’s trust*

Suppose:

- (1) A gives property (“A’s fund”) to a settlement (“real trust A”).
- (2) B gives property (“B’s fund”) to a separate settlement (“trust B”).
- (3) The trustees of real trust A transfer A’s fund to trust B.

For general IHT purposes, A’s fund is regarded as in a notional trust and may be excluded property if A was not UK domiciled when real trust A was made.

---

<sup>57</sup> See 71.15 (Added property: Change of domicile).

At first sight the position for the purposes of RP trust tax seems to be different:

- (1) A's fund is treated as remaining comprised in real trust A (applying the same-settlement fiction); and
- (2) foreign situate property in A's fund can only be excluded property if:
  - (a) A is foreign domiciled at the time real trust A was made; and
  - (b) B is foreign domiciled at the time trust B was made (applying trust-transfer retesting).

There is a better view. On these facts the separate-settlement fiction of s.44(2) applies. A's fund is treated for IHT as if it were transferred to a separate notional trust. The same-settlement fiction applies as if there is a transfer from real trust A to the separate notional trust deemed to be made by A at the time (I think) of real trust A. So, for RP trust tax purposes, A's fund may be excluded property if A is not UK domiciled at the time A made trust A. That is, trust-transfer retesting does not add anything to the general excluded property rule. The domicile of B is irrelevant. That gives a fair result and is consistent with what I take to be the purpose of s.82; see below.

A similar result applies if the trustees of trust A transfer A's fund to a company held by trust B.

#### 75.11.4 *Transfer of equitable interest*

The position is different if:

- (1) A gives property ("A's fund") to a settlement ("trust A").
- (2) B has an equitable interest under trust A (perhaps a reversionary or contingent right to trust capital).
- (3) B assigns B's equitable interest to a separate settlement ("trust B").
- (4) Trust B becomes entitled to A's fund (perhaps because the reversionary interest falls into possession or the contingency is satisfied).

B is in principle the settlor of trust B for general tax purposes. The position for the purposes of RP trust taxation is that:

- (1) A's fund is treated as remaining in trust A (applying the same-settlement fiction); and
- (2) A's fund can only be RP excluded property if:
  - (a) A is foreign domiciled at the time that trust A was made, and

- (b) B is foreign domiciled at the time trust B was made (applying trust-transfer retesting).

It would be possible to avoid these consequences if the trustees of trust B sell the equitable interest before it falls into possession, or if they transfer it to a company.

#### 75.11.5 *Pre-2020 test: FOTRA security*

Section 82(2) IHTA provides:

Section 65(8) above shall not have effect in relation to property to which section 80 or 81 above applies unless Condition A is satisfied (in addition to the condition in section 65(8) that the settlor was not domiciled in the UK when the settlement was made).

This relates to the specialist topic of IHT exemption for FOTRA securities.<sup>58</sup> IHT Manual provides:

**IHTM27251 exempt securities: anti-avoidance rules** [Sep 2018]

... The rules are designed to deter people from avoiding tax by transferring property from one settlement where the beneficiaries are resident or domiciled in the UK, into a sub-settlement where the beneficiaries are all abroad. ...

#### 75.11.6 *Trust-transfer retesting: Purpose*

What is the purpose of trust-transfer retesting? It often happens that an artificial deeming rule which closes one avoidance scheme can be exploited for another. The same-settlement fiction is an example. Suppose:

- (1) A, who is domiciled outside the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.
- (2) B, who is UK domiciled, buys A's reversion and settles it on discretionary trusts.<sup>59</sup>

Under general IHT law, B would in principle be the settlor of trust B, which would be within the scope of IHT in the usual way. However applying the same-settlement fiction, in the absence of retesting, A would

---

<sup>58</sup> See 72.9.1 (Property becomes excluded).

<sup>59</sup> These are the facts considered in 75.11.4 (Transfer of equitable interest).

be the settlor and (because of A's domicile) B's trust would be an excluded property trust!

Section 82 counteracts this scheme. If my analysis is right,<sup>60</sup> then s.82 works, though it does not produce the fair result in every case. Suppose the facts were reversed:

- (1) A, who is domiciled in the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.
- (2) B, who is foreign domiciled, buys A's reversion and settles it on discretionary trusts.

There is no obvious fairness here in the rule that B's trust should be within the scope of IHT. But the example is somewhat contrived and perhaps it does not much matter.

An incidental result is to restrict or prevent tax advantages on a transfer from trust A1 to A2, where A was UK domiciled when A made trust A1 but foreign domiciled at the time A made trust A2.<sup>61</sup>

## **75.12 Post-2020 transfer retesting**

### *75.12.1 Application conditions*

Section 82A(1) IHTA provides:

This section—

- (a) applies where, at any time on or after the day on which the Finance Act 2020 is passed,
  - [i] property ceases to be comprised in a settlement (“the first settlement”) but
  - [ii] is treated as a result of section 81 as remaining comprised in that settlement for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property], and
- (b) applies whether or not at any subsequent time the property is comprised in the first settlement without regard to that section.

### *75.12.2 Retesting rule*

Section 82A(2) IHTA provides:

If the property would apart from this section be excluded property by

---

<sup>60</sup> See 75.11.3 (Transfer: A's trust to B's trust).

<sup>61</sup> See 75.11.1 (Transfer: A's trust to A's trust).

virtue of section 48(3)(a) or (3A)(a), the property is to be regarded as excluded property for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property], except sections 78 and 79, at any time only if the non-domicile condition is met in relation to each qualifying transfer occurring on or before that time.

### 75.12.3 *Qualifying transfer*

This term is used in the definition of “non-domicile condition”.

Section 82A IHTA provides:

(4) For the purposes of this section each of the following is a “qualifying transfer”—

- (a) the occasion on which section 81 applies to the property; and
- (b) any subsequent occasion on which the property would, if the effect of section 81 were ignored, become comprised in a settlement to which this Chapter applies (including the first settlement).

(5) But a qualifying transfer does not occur as a result of—

- (a) an assignment<sup>62</sup> by a beneficiary of an interest in a settlement, or
- (b) an exercise of a general power of appointment,

unless the time of the assignment or exercise of the power falls on or after the day on which the Finance Act 2020 is passed.

### 75.12.4 *Non-domicile condition*

Section 82A IHTA provides:

(6) For the purposes of this section “the non-domicile condition” is—

- (a) in a case where a qualifying transfer occurs as a result of<sup>63</sup> an assignment by a beneficiary of an interest in a settlement or an exercise of a general power of appointment, that the beneficiary or the person exercising the power—
  - (i) was not domiciled in the United Kingdom at the time of the

---

62 Section 82A(9) acknowledges Scots law terminology: “In this section any reference to an assignment includes an assignation.”

63 Section 82A(8) provides: “In this section any reference to a qualifying transfer occurring as a result of—

- (a) an assignment by a beneficiary of an interest in a settlement, or
- (b) an exercise of a general power of appointment,

includes the transfer occurring partly as a result of the assignment or exercise of the power.”

- assignment or exercise of the power, and
- (ii) is not a formerly domiciled resident for the tax year in which the time mentioned in subsection (2) falls;
- (b) in a case in which section 81 applies which is not within paragraph (a), that the person who was the settlor of the property in relation to the first settlement was not domiciled in the UK immediately before the time when the property ceased to be comprised in the first settlement;
  - (c) in any other case, that the person who was the settlor of the property in relation to the first settlement was not domiciled in the UK immediately before the time of the subsequent occasion.

#### 75.12.5 *Transfer after death of settlor*

Section 82A(7) IHTA provides:

If—

- (a) the settlor mentioned in subsection (6)(b) or (c) has died before the time mentioned there, and
  - (b) the death does not give rise to a qualifying transfer,
- the non-domicile condition is treated as met.

#### 75.12.6 *Post 2020-retest: FOTRA security*

Section 82A(3) IHTA provides:

Section 65(8) has effect in relation to the property at any time only if (in addition to the condition mentioned there) the non-domicile condition is met in relation to each qualifying transfer occurring on or before that time; but, for the purposes of this subsection, the non-domicile condition has effect with the omission of subsection (6)(a)(ii).

#### 75.12.7 *2020 trust rules: Critique*

In the 2019/20 edition of this work I said:

What is needed is a review and rethinking the rules as a whole, not tinkering; but there is not much chance of that.

HMRC now say:

HMRC met with stakeholders [in 2020] to discuss questions and requests for clarification around the recent legislative changes concerning trust settlements definition and application of excluded property tests. HMRC agreed that more could be done to provide

certainty and clarity to affected customers, and to work collaboratively with stakeholders to improve customer understanding of how HMRC interprets legislation in what are often complex individual scenarios. To that end it was agreed to take forward work across three areas;

- HMRC to clarify in guidance, working with stakeholders, their interpretation of how the legislation applies in certain more straightforward scenarios. Clarifying any misunderstandings on how they interpret the legislation operating.
- HMRC and stakeholders to work together to update the available customer guidance on the treatment of loans in regards to settlements, and consequential application of the tax code. It was acknowledged there are some longstanding areas of uncertainty for customers in this area, which predate the recent changes. This is especially true given the range of complex scenarios which may arise.
- HMRC and stakeholders to continue discussions to best understand if and how improvements could be made to ensure the interaction of settlements<sup>64</sup> between trusts and the gifts with reservation of benefits rules are operating as intended.<sup>65</sup>

The reader may think that the time for these discussions was before the provisions were enacted - not after. But the philosophy of “ready, fire, aim” prevails.<sup>66</sup> The hope that the problems of ill thought out provisions such as s.74 FA 2020 will be solved by guidance appears to be ineradicable - despite all experience and case law to the contrary.

### 75.13 s.81 transitional rules

The current provisions have evolved over time.

From 1975 to 1981, the position was governed by para 11(4) sch 5 FA 1975:

*Where, by the same disposition, property ceases to be comprised in one settlement and becomes comprised in another settlement, the property shall be treated as remaining comprised in the first settlement.*

This was narrower than the current s.81 rule, which applies to an inter-trust transfer “unless in the meantime any person becomes beneficially

---

64 Presumably the meaning is, transfers between trusts.

65 Informally circulated email, Sep 2020.

66 See 1.12 (State of UK tax reform).

entitled to the property” rather than one made “by the same disposition”.

In particular, the 1975 rule would not apply where an individual was entitled to a reversionary interest, and transferred that interest to a settlement, and subsequently the interest fell into possession.

FA 1982 introduced the current rule but preserved the former rule for earlier transfers. Section 81(2) IHTA preserves that status quo:

- (2) [a] Subsection (1) above shall not apply where the property ceased to be comprised in the first settlement before 10 December 1981;
- [b] but where property ceased to be comprised in one settlement before 10 December 1981 and after 26 March 1974 and, by the same disposition, became comprised in another settlement, it shall for the purposes of this Chapter [Chapter 3 Part 3 IHTA, relevant property] be treated as remaining comprised in the first settlement.

There was an afterthought in 1984, now in s.81(3) IHTA which provides:

Subsection (1) above shall not apply where a reversionary interest in the property expectant on the termination of a qualifying interest in possession subsisting under the first settlement was settled on the trusts of the other settlement before 10 December 1981.

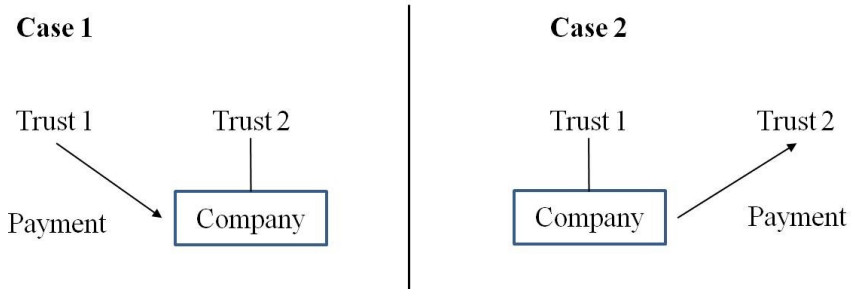

That would apply in a case where the reversionary interest fell into possession (ie where the inter-trust transfer took effect) even after the date of change of 10 December 1981.

A reversionary interest settled before 1981 is likely to have fallen into possession, but the point is still relevant as settlements affected by the transitional rules may still be in existence.

By today’s standards, s.81(3) seems a generous transitional provision: the principle that amendments should not have retrospective effect was more strictly observed a generation ago than it is today.

#### **75.14 Transfers to/from underlying co**

Section 81 only applies on a transfer from one trust to another trust. It does not apply on a transfer from a company held by a trust, or on a transfer to a company held by a trust.

In case 1, there is a transfer from trust 1 to a company held by trust 2. Section 81 does not apply.

In case 2, there is a transfer from a company held by trust 1 to trust 2. Section 81 does not apply.

Section 81 is not needed, because a variety of other IHT provisions fill the gap. A full analysis would be a lengthy exercise, as there are a number of permutations, depending on whether we are considering case 1 or 2, and whether the payment is income or capital. But in outline:

- (1) In case 2, there is in principle a charge under the IHT close-company code.
- (2) (a) If trust 1 is a discretionary trust, there will in principle be an exit charge:
  - (i) in case 1, as property ceases to be relevant property
  - (ii) in case 2, on the diminution of the value of trust property<sup>67</sup>
- (b) If trust 1 is an estate IIP trust, there may be a chargeable transfer:
  - (i) in case 1, as an interest in possession comes to an end
  - (ii) in case 2, perhaps, on diminution of value of trust property<sup>68</sup>
- (3) If the payment is income, then s.731 and other income tax anti-avoidance provisions need consideration.

Transfers across trust/company structures raise other issues; see:

## CHAPTER SEVENTY SIX

# IHT DEDUCTION FOR DEBTS

### 76.1 IHT deduction for debts: Introduction

#### *Cross references*

The following topics relating to IHT deduction of debts are considered elsewhere:

71.9 (Income unpaid on life tenant death)

108.8 (Deductions for IHT DTAs)

80.17 (Pre-owned assets - Excluded liability rule)

78.6 IHT residence property code: Liabilities of residence-company

78.9 IHT residential property code: Deductibility of relevant loan

Debts raise many other tax issues: see 58.1.1 (Loan tax issues: Navigation).

### **76.1 IHT deduction for debts: Introduction**

This chapter is concerned with IHT deductions for debts or liabilities.<sup>1</sup> I also consider the related topic of IHT deduction for funeral expenses and administration of estates.

A full discussion would need a book to itself. I would focus on matters closest to the themes of this work, but it is necessary to consider the basic principles to see the points in their context, and this chapter contains a near comprehensive discussion.

---

1 A note on terminology: “Debt” and “liability” are used (more or less) synonymously. I generally use *debt* as the shorter word.

There is a distinction of usage in that “debt” may be used to describe (1) the burden of the debt (the obligation of the debtor) *or* (2) the benefit of the debt (the asset of the creditor). “Liability” is only used to describe the burden of the debt. The context will normally make it clear which meaning of “debt” is intended. If not, it is necessary to refer to the benefit/burden of the debt as appropriate, and it might be clearer to refer to use the word “liability” for the burden of the debt

But in this chapter the word debt is used widely, or perhaps loosely, as equivalent to liability. See too 53.21.1 (Meaning of “debt”).

## 76.2 Basis of deduction for debts

The legislation distinguishes between:

- (1) A debt which is an incumbrance<sup>2</sup> on an asset. I refer to this as an “**incumbrance-debt**” and I refer to the asset as the “**incumbered property**”.
- (2) Other debts (“**unsecured debts**”).

### 76.2.1 Incumbrance-debt

IHT is charged by reference to the market value of assets. In the case of incumbrance-debts, there are in principle two possible ways to approach the deduction for debts:

- (1) *A net-value approach*: One might identify the asset as the asset subject to the incumbrance; the market value of the asset is the value taking the incumbrance into account.
- (2) *A deduction approach*: One might identify the asset as the asset free of the incumbrance; the market value is the value of the asset ignoring the debt and then a deduction is made as a separate step.

The two approaches generally reach the same result. However occasionally the paths diverge. The question arose in a procedural context in *Alexander v IRC*, because a question about the value of land is (in some cases) referred to the Lands Tribunal but other questions are not.<sup>3</sup> In *Alexander* the asset was a lease acquired at a discount under “right to buy” legislation. Under the lease the tenant covenanted to repay the discount if he sold the property within five years. The Court of Appeal adopted the net-value approach:

The liability to repay the discount, being charged on the leasehold premises, was in my judgment, an incumbrance on the property and should be taken into account in ascertaining the value of that property. I therefore agree that ... the question as to the value of the flat, taking into account the liability to repay discount, was a question as to the value of land for the Lands Tribunal ... the issue as to the value of the property of the deceased in the flat was not correctly described by the

---

2 A note on spelling: the IHTA refers to *incumbrance*. Outside UK statutory drafting, the word is generally spelt *encumbrance* but I adopt the IHTA spelling here.

3 Section 222(4A) IHTA.

Lands Tribunal, as a question of ‘deciding liabilities between the vendor and a third party’. It was, in my judgment, a question of the value of the property in the hands of the deceased.<sup>4</sup>

### 76.2.2 Unsecured debt

In the case of unsecured debts, the net-value approach is not possible, and the only approach is the deduction approach: one must value the assets of the estate, and make a deduction as a separate step. In this case s.5(3) IHTA authorises, or at least confirms,<sup>5</sup> the deduction for the debt:

In determining the value of a person’s estate at any time his liabilities at that time shall be taken into account, except as otherwise provided by this Act.

## 76.3 Amount of deduction for debt

Section 162(2) IHTA provides:

Subject to subsection (3) below,<sup>6</sup> where a liability falls to be discharged

---

4 [1991] STC 112 at p.122. If further authority is needed, see *Henty v The Queen* [1896] AC 567 at p.573: “In any question as to probate duty, [an incumbrance-debt] is a burden which adheres to and tends to diminish, or it may be to extinguish, the value of the asset upon which it is charged.”

5 *Green v IRC* [2005] EWHC 14 (Ch) at [12] regarded s.5(3) IHTA as merely confirming a deduction, not authorising it:

“... the property of the deceased ... is his personal estate net of his liabilities. In other words, it is at that stage that the liabilities are dealt with. It is not necessary for section 5(3) to provide for a second time that the debts are to be deducted in arriving at the value of the deceased’s property (or estate) and in my view it is not really doing that. It is in part confirmatory, but in the main it is intended to provide a qualification or qualifications to the principle that debts are deductible– the meat of the subsection is in the closing words ‘except as otherwise provided by this Act’. One finds provisions in the Act which qualify that right in sections 5(4), 5(5) and 162. Its confirmatory nature is supported by the use of the phrase ‘taken into account’, which is more general than ‘shall be deducted’. I accept that the nature of section 5(3) would be clearer without the comma, but nevertheless it seems to me to be clear enough.”

In relation to incumbrance-debts, that is right; in relation to unsecured debts, it seems an odd construction of the words; but it does not matter.

6 The exception (not discussed here) relates to a liability to pay IHT; this is taken into account without making an allowance for the fact that payment of the tax is not due immediately.

after the time at which it is to be taken into account it shall be valued as at the time at which it is to be taken into account.

This only states what one would have expected in any event. Suppose, say, T dies in year 1, owing a debt for 100 payable in year 2, interest free. The valuation of the debt is less than 100, as there is a discount for the delayed payment. But the point may not often arise.

For s.166 IHTA, see 76.7.3 (Time-barred debt: Creditor).

## **76.4 Allocation of debt**

### *76.4.1 Why allocation matters*

Suppose an individual dies and is subject to certain debts immediately before death. The debt is deducted in computing the value of the estate. If on the death all the estate is subject to IHT at the same rate, it does not matter for IHT whether the debt is regarded as a deduction from any particular item of property. However it often happens that an estate includes chargeable and exempt property. In particular:

- (1) A foreign domiciled individual may own excluded property and non-excluded (chargeable) property.
- (2) A non-resident individual may own FOTRA securities which are excluded property.
- (3) An individual may own property which qualifies for an IHT relief, eg:
  - (a) APR or BPR
  - (b) DT relief
  - (c) Instalment relief
- (4) The property may be given to a spouse or charity and so qualify for the IHT spouse or charity exemption.

In these cases one must ask whether the debt is deducted from the value of the chargeable or the exempt property.

### *76.4.2 Incumbrance-debt*

Section 162(4) IHTA provides:

A liability which is an incumbrance on any property shall,  
 [a] so far as possible and  
 [b] to the extent that it is not taken to reduce value in accordance with section 162B [debt attributable to agricultural/business property],  
 be taken to reduce the value of that property.

That adopts or confirms what I call the net-value approach.<sup>7</sup> The term sometimes used is “economic alliance” principle.

If the amount of the debt exceeds the value of the property, the value of the property is taken as nil and the excess is deductible from the estate like an unsecured debt.

If a debt is an incumbrance on several assets there must be an apportionment. HMRC agree. The IHT Manual provides:

**IHTM28210 Investigating liabilities: mortgages** [Sep 2018]  
... when a debt is charged on several properties it should be apportioned between them.

If the incumbrance on some asset has priority, then the deduction should be against that asset first.

If it is desired to secure a debt on non-UK property (but to keep the IHT deduction against UK property), a back-to-back guarantee may be a solution. That is:

- (1) T borrows from a third party (“the primary debt”).
- (2) T’s primary debt is guaranteed by a bank.
- (3) Under the terms of the guarantee, T is required to reimburse the bank if the guarantee is called upon (“the second debt”). This second debt is secured on foreign assets.

Section 162(4) will not apply to the primary debt, which can in principle be deducted from UK property. But the GAAR may need consideration.

Conversely, if on those facts the second debt is secured on UK property, but the primary debt is not secured on that property and the deduction is not set against that property.

Note the need to comply with the Bills of Sale Acts if securing loans on chattels.

### 76.4.3 *Unsecured debt*

Section 162(5) IHTA provides:

Where a liability taken into account is a liability to a person resident outside the UK which neither—  
(a) falls to be discharged in the UK, nor

---

<sup>7</sup> See 76.2 (Basis of deduction for debts).

- (b) is an incumbrance on property in the UK,  
it shall,
- [i] so far as possible and
  - [ii] to the extent that it is not taken to reduce value in accordance with section 162B [debt attributable to agricultural/business property],
- be taken to reduce the value of property outside the UK.

This identifies three connecting factors. Where a debt is not an incumbrance on any property, there are two connecting factors and four permutations:

Case No.	1	2	3	4
Debt to UK resident	No	No	Yes	Yes
Discharge in the UK	No	Yes	No	Yes

Section 162(5) tells us the answer to Case 1: the debt is set against non-UK property. Which non-UK property, if there is more than one item of property? IHT Manual provides:

**IHTM28394 deducting foreign debts** [Sep 2018]

[1] Debts that are owed to a person resident outside the UK and:

- not charged on UK property, or
- not contracted to be paid in the UK

should be deducted primarily against foreign property, IHTA84/S162 (5).

[2] If there are debts in more than one country the debts in any one country should be set against the assets in that country, and any excess set proportionately against the assets in other foreign countries.

[3] This instruction does not apply to funeral expenses (IHTM10371).

I do not see any good reason for point [2]: an unsecured debt should be set against foreign property pro rata; but it will not often matter.

Suppose an individual holds shares in a foreign company which holds a UK residence. The shares are non-excluded property, but they remain foreign situate property, so that an unsecured debt may be set against the shares under s.162(5).

There is nothing about Cases 2 to 4. However, the implication is that in Cases 2 to 4 the debt reduces the value of the property in the UK.

What is the priority between s.162(4) and (5)? It is considered that (4) is applied first. An incumbrance-debt is taken so far as possible to reduce the value of the property. Only if the debt is not an incumbrance on any

property, or if the amount of the debt exceeds the value of the property, does one apply the rules in s.162(5). HMRC agree. The IHT Manual provides:

**IHTM28395 Deducting liabilities where there is excluded property**  
[Sep 2018]

You will see cases where there is excluded property in the estate and deductions may be properly payable out of both excluded and other property. In this situation, provided the debts are to UK creditors, you may allow a deduction in full against the non-excluded property.

But, in view of IHTA84/S162 (4) this does not apply to debts that are charged on excluded property.

**IHTM28396 Deducting UK debts when there is both UK and foreign property in the estate** [Sep 2018]

If the deceased's estate includes both UK and foreign assets you should first deduct any UK debts against the UK assets and set the deficit, if any, against the foreign assets. Debts are UK debts if one of the following applies:

- they are owed to creditors who are resident solely in the UK
- they are charged on property in the UK, or
- they are contracted to be paid in the UK.

This practice should be applied, despite the decision in *Re Kloebe, Kannreuther v Geiselbrecht* [1884] 28 Ch D 175. This was that in the administration of the English estate of a deceased person domiciled abroad, foreign creditors are entitled to be paid, along with those who are resident in the UK, in shares proportionate to their respective claims.

If our official practice is challenged you should refer the case to Technical.

The practice seems right; though I do not see why the probate case cited should have any relevance to IHT.

#### 76.4.4 Where debt falls to be discharged

In outline, the place where a debt falls to be discharged is that specified in the contract, or (if not specified) the residence of the creditor.<sup>8</sup> HMRC broadly agree. The IHT Manual provides:

---

<sup>8</sup> See *Chitty on Contracts* (33<sup>rd</sup> ed., 2018), para 21-056 (Place of payment). Further consideration is needed for a contract not governed by English law.

**IHTM28396 Deducting UK debts when there is both UK and foreign property in the estate [Sep 2018]**

If the deceased's estate includes both UK and foreign assets you should first deduct any UK debts against the UK assets and set the deficit, if any, against the foreign assets. Debts are UK debts if one of the following applies

- *they are owed to creditors who are resident solely in the UK*
  - *they are charged on property in the UK, or*
  - *they are contracted to be paid in the UK. ...*
- (Emphasis added)

A debt which is set against UK property (but which is not charged on specific property) will be set against UK property rateably. Some of the deduction will be wasted if the individual owns UK property outside the scope of IHT, in particular:

- (1) Property qualifying for APR or BPR
- (2) For a foreign domiciliary: UK AUTs or OEICs
- (3) For a non-resident: FOTRA securities

**76.5 GWR property subject to debt**

A debt secured on an asset is in principle deductible in computing a GWR charge on the asset.<sup>9</sup>

If the GROB property is held in trust, trust debts are similarly deductible. HMRC agree. IHT Manual provides:

**IHTM14401. The property comprised in the gift [Sep 2018]**

*... Example (Vineet)*

In 2000 V settles £1 on discretionary trusts of which he is, and remains until his death in 2005, an object. Shortly after the creation of the settlement he advances £50,000 to the trustees by way of loan, interest free and repayable on demand.

At the time of V's death, the settled property comprises £1 cash (representing the original £1 gift into settlement) and the proceeds of an insurance policy (purchased with the borrowed monies) on V's life amounting to £250,000.

The loan of £50,000 has been repaid at the rate of £2,500 per annum by the trustees and £25,000 is outstanding at the date of death.

---

<sup>9</sup> See 76.2.1 (Incumbrance-debt).

The HMRC analysis is as follows:

The proceeds of £250,000, *less the loan of £25,000*, are derived from the original loan, and you can treat them as part of the death estate. (The balance outstanding under the loan less £25,000 forms part of the free estate).

## 76.6 Unenforceable debt

In principle a deduction is only allowed for an enforceable debt. That is not strictly a category of disallowed debt, as in general an unenforceable debt (such as a debt of honour) is not a debt in the true sense, or the value of the debt is nil.<sup>10</sup> But it comes to the same thing.

The IHT Manual provides:

### **IHTM28383 Debts must be legally enforceable** [Sep 2018]

The general position is that no deductions can be allowed for debts that are not legally enforceable or capable of being legally enforced...

Debts that may be disallowed because they are not legally enforceable include

- debts paid under a moral obligation (these are likely to be debts that have either been incurred for no consideration or for past consideration)
- liabilities that are unenforceable because there is no written evidence (for example, oral agreements for the sale of an interest in land)

## 76.7 Time-barred debt

### 76.7.1 Limitation law background

In outline: s.5 Limitation Act 1980 provides:

An action founded on simple contract shall not be brought after the expiration of six years from the date on which the cause of action accrued.<sup>11</sup>

A debt which under the LA 1980 cannot be enforced is called “time-barred” (or “statute-barred”, but “time-barred” is the better term).

---

<sup>10</sup> See 76.3 (Amount of deduction for debt).

<sup>11</sup> In the case of a specialty (deed) the period is 12 years: s.8 Limitation Act 1980. The same applies in Northern Ireland law: Art 4 Limitation (Northern Ireland) Order 1989

There was formerly held to be a moral obligation to pay a time-barred debt. In *Re Rowson*:

We know that there are some people, both Judges and other persons, who think that to plead the Statute of Limitations is unconscionable.<sup>12</sup>

*Norton v Frecker* (not a tax case) shows how strong the moral obligation was perceived to be in the 18<sup>th</sup> century:

no executor was compellable, either in law or equity, to take advantage of the statute of limitations against a demand otherwise well formed.<sup>13</sup>

I think attitudes to this moral issue have changed.<sup>14</sup> But it depends on the circumstances. A time-barred debt to a friend in need is one thing, and refusal to pay may still be regarded as unconscionable. A debt to a trust of which the debtor is settlor, or principal beneficiary, may be quite different.

Time-barred debts - unenforceable but retaining a spectral existence - occupy a strange space between validity and invalidity.

#### 76.7.2 *Time-barred debt: deduction*

The IHT Manual provides:

**IHTM28384 Statute-barred debts** [Sep 2018]

[The Manual summarises the rules in the Limitation Act 1980 (wrongly called the Limitations Act 1980) and continues:]

Even though the lender may be barred from pursuing recovery, a debtor may decide to pay the debt after the expiry of the time limits. Because of this you should allow a debt which is otherwise statute-barred if the personal representatives pay the debt and you receive evidence that the payment has been made.

This practice is at first sight surprising, though taxpayers who qualify for an IHT deduction will not complain. But on reflection it makes sense. It would not be right that a debt, incurred for full consideration, and paid under an accepted moral obligation, should be disallowed for IHT; and the

12 (1885) 29 Ch D 358 at p.362. Kocourek, “A Comment on Moral Consideration and the Statute of Limitations” (1923) 18 Ill LR 538.

13 (1737) 1 Atk. 524. It seems to me that in an appropriate case this antique comment should be reconsidered. But the question will not often arise.

14 See 115.12.2 (Time limits: Policy).

practice established under estate duty, or earlier, has continued unaltered for IHT.

If contemporary morality has changed, the practice has lost its original *raison d'être*; but sometimes a moral obligation still obtains; see above.

It logically follows that HMRC should in practice accept that paying a time-barred debt is not a transfer of value; though that is not said expressly in the Manual.

### 76.7.3 Time-barred debt: Creditor

The above is looking at the matter from the point of view of the debtor, who is concerned about an IHT deduction for the debt. What is the position of the creditor?

Section 166 IHTA provides:

[1] In determining the value of a right to receive a sum due under any obligation it shall be assumed that the obligation will be duly discharged,

[2] except if or to the extent that recovery of the sum

[a] is impossible or not reasonably practicable and

[b] has not become so by any act or omission of the person to whom the sum is due.

A time-barred debt actually has nil market value. But if a creditor (“C”) allows a debt to become time-barred, the value of the debt in C’s estate is (artificially) regarded as if the obligation will be discharged. So C does not make a transfer of value by allowing a debt to become time-barred: the value of C’s estate is not reduced. Likewise there is no IHT occasion of charge if trustees allow a debt to become time-barred.

If C transfers the time-barred debt to a 3<sup>rd</sup> party, C makes a transfer of value. The value of the debt for IHT purposes in the estate of the assignee is nil. The condition in s.166[2][b] is not met.

All this makes sense, if it is seen in the context of HMRC practice that a time-barred debt is deductible in the estate of the debtor. Nevertheless, I wonder if it is HMRC practice to take the point. There is no mention of it in the HMRC manual.

Section 166 IHTA relates to the valuation of the *benefit* of the debt. It does not expressly not apply to the valuation of a deduction for the *burden* of a debt. But perhaps that is implied. The point will not often arise.

### 76.7.4 Limitation in Scots law

A different rule applies to a debt governed by Scots law. The IHT Manual provides:

**IHTM28384 Statute-barred debts** [Sep 2018]

... These instructions do not apply to debts in Scotland. Under Scottish law, if a lender allows time to pass without receiving any payment an action for recovery may become barred under the Prescription and Limitation (Scotland) Act 1973 (For details of this Act see Gloag and Henderson's *The Law of Scotland* 12<sup>th</sup> edition<sup>15</sup> at Chapter 4.) These debts are completely extinguished and cannot be enforced. Once the prescriptive period expires the debt cannot be allowed as a deduction.

Further consideration would be needed for a debt governed by a foreign law.

#### 76.7.5 *Time-barred debts: Critique*

It is suggested that s.166[2][b] IHTA should be repealed. If recovery of a debt is made impossible or impractical due to an act or omission of the creditor, such as allowing the debt to become time-barred, the act or omission should be a transfer of value on the application of normal principles. One should not treat a valueless debt as if it were valuable.

The rule (or practice) that a time-barred debt should be deductible for IHT should also be abolished.

This would bring the law into line with reality. It would be a simplification. It would also align the law in England/Northern Ireland with Scotland.

#### 76.8 **Disallowed debts: Introduction**

There are 12 cases<sup>16</sup> where IHT deduction for a debt is disallowed:

<b>Circumstance</b>	<b>See para</b>
Right of reimbursement	76.9
Debt incurred for less than full consideration	76.10
Section 103 FA 1986	76.11
Estate IIP: Life tenant's personal debt not set against trust fund	76.14.2
Debt owed to trust in which the debtor has an estate IIP	76.15

<sup>15</sup> Author's footnote: Now 14th ed., 2017.

<sup>16</sup> GAAR is another exception; but GAAR is an exception to every rule of tax law.

Non-residents overdrawn foreign currency bank account	72.13.3
Debt attributable to:	
(a) excluded property (excluded property disallowance)	76.17
(b) business/agricultural/woodland property	76.28/81.29
(c) non-residents foreign currency bank account	76.25
Debt unpaid after death	76.35
Debt which the debtor is treated as entitled to under GWR rules	76.43.5
Debt in connection with a life policy <sup>17</sup>	-

The drafting technique of most of the disallowance provisions is to state that the debt is not “taken into account”. The s.103 disallowance provides that the debt is “subject to abatement”, but that means the same.

### 76.8.1 *Position of creditor*

The disallowances could lead to insolvency, as debts disallowed for IHT purposes nevertheless remain payable. Unsecured creditors may need to ask for security in order to have priority over HMRC IHT claims.

### 76.8.2 *Debt of company*

The debt disallowance rules set out above are aimed at disallowing debts of individuals and trustees, who are liable for IHT. Companies are not subject to IHT. In valuing shares for IHT purposes, it is considered that company debts, like assets, should be taken into account in all circumstances.

In most cases the wording of the disallowances makes this clear (though if it did not, that might easily be inferred). The rules clearly do not apply to companies so far as they are expressed to apply:

- to a liability “incurred by a transferor” (the company is not the transferor)
- “in determining the value of a person's estate immediately before his death”

A company is not (usually) a transferor, so the disallowance cannot apply. The excluded property disallowance does not apply because company property is not excluded property.

## 76.9 Right to reimbursement

---

<sup>17</sup> See s.103(7) FA 1986.

Section 162(1) IHTA provides:

A liability in respect of which there is a right to reimbursement shall be taken into account only to the extent (if any) that reimbursement cannot reasonably be expected to be obtained.

Although this rule is expressed as a disallowance, it does not usually make much difference, as the right to reimbursement would either reduce the value of the debt or constitute an asset of the estate. (There could be a difference if the right to reimbursement was excluded property.)

The IHT Manual provides:

**IHTM28354: reimbursement of guarantee debt** [Sep 2018]

If you have accepted that there was consideration you need to consider the possibility of the deceased being reimbursed. This is because IHTA84/S162 (1) provides that the liability is to be restricted to the extent that reimbursement cannot reasonably be expected.

If the tax at stake is worthwhile, you should look at the borrower's financial position at the date of death. This may involve valuing the deceased's assets such as unlisted shares or land. If the borrower was an unlisted company you should ask for advice from Shares and Assets Valuation (SAV).

If the deceased was not the only person to guarantee the debt you will need to take into account the combined resources of the debtor and other creditor to calculate the deceased's liability on death. To do this you will need to consider the financial position of the other guarantor at the time of the deceased's death, as well as that of the borrower. The deceased's liability will be restricted to that part of the debt that cannot be met by the combined resources of the borrower and the other guarantor.

When the financial position of the other liable people is known you can calculate the allowable deduction (IHTM28355) in the deceased's estate.

**IHTM28355: calculating the allowable deduction for a guarantee debt** [Sep 2018]

As long as the debt was for consideration (IHTM28353) you should allow a deduction in the deceased's estate for the part of the outstanding loan that cannot be met by the borrower. The basic scenarios are as follows

**Borrower has no resources**

If the borrower has no financial resources the whole of the

outstanding liability will be deductible but the guarantee may be a lifetime transfer (IHTM28356).

**Borrower has resources**

If the borrower has enough financial resources to repay the loan in full the debt is not allowable. There is no lifetime transfer.

**Borrower can repay part of the outstanding loan**

If the borrower can only repay part of the loan the deduction is limited to that part of the loan that cannot be met by the borrower and which will have to be met by the deceased. You will need to negotiate the size of the deduction with the taxpayers. The guarantee may be a lifetime transfer (IHTM28356).

The deduction allowed will not necessarily be the same as the amount, if any, ultimately paid out of the estate. This is because the liability is considered as at the date of death for Inheritance Tax purposes.

**76.10 Debt not for full consideration**

Section 5(5) IHTA provides:

Except in the case of a liability imposed by law, a liability incurred by a transferor shall be taken into account only to the extent that it was incurred for a consideration in money or money's worth.

**76.10.1 Consideration**

This disallowance does not often apply, because debts are normally incurred for full consideration.<sup>18</sup> In particular, if an individual borrows money, the liability to repay the lender is in principle outside the scope of s.5(5), because the debt is incurred for full consideration.

What about interest accruing on a disallowed debt? Strictly, interest is incurred for full consideration, namely, not repaying the principal sum due, but it may be said that one should look back to the original consideration (or lack of it) for the debt of the principal; and it would be safer to adopt the more cautious view.

The IHT Manual provides:

**IHTM28353 Consideration For A Guarantee Debt [Sep 2018]**

Before you can allow a deduction you must be sure that consideration was given in money or money's worth, IHTA84/S5 (5).

---

<sup>18</sup> For the meaning of "consideration" see App 4.2 (Consideration).

This will usually be the case. For example, in the normal commercial situation where a bank will not extend credit to A without a guarantee from B the ‘consideration’ for the debt will be the granting of credit on the strength of the guarantee. In cases where a company’s overdraft is guaranteed by one of the principal shareholders, you should assume that the requirements of IHTA84/S5 (5) are satisfied. An example of the sort of situation where there may be no consideration is where a parent agrees to guarantee a child’s bank borrowings without the bank itself having given any undertaking in connection with the debt. The fact that the bank has made no undertaking means there has been no consideration. In this case the main purpose of the guarantee is to benefit the child, perhaps simply as an assurance that the parent will meet any debts incurred by the child from the bank. If a guarantee was given without any consideration you should not allow a deduction and you should also consider the possibility that lifetime transfers (IHTM28356) were made.

#### 76.10.2 *Payment of disallowed debt*

If an individual gratuitously covenants to pay money to a person, the liability to pay under that covenant is disallowed. It follows that

- (1) There is no transfer of value when the covenant is made.
- (2) There is a transfer of value when a payment is made under the covenant.<sup>19</sup>

The payment of a disallowed debt may be a PET. The IHT Manual provides:

**IHTM28356: lifetime transfers on guarantee debt** [Sep 2018]

If no consideration was given in exchange for the guarantee (IHTM28353) any payments made by the deceased before the death should be treated as lifetime transfers to the borrower.

In other cases, where you have allowed a deduction for the deceased’s liability you will need to consider whether the giving of the guarantee was a lifetime transfer. For example, if at the time the deceased gave the guarantee there was little prospect that the borrower would be able to pay the debts then there may be a lifetime transfer approximately equal to the full amount of the liability. If it was likely that at least

---

<sup>19</sup> In this case, s.10 IHTA will not provide relief.

some of the debt would be repaid then there may still be a transfer of value equivalent to the value of the guarantee less what the borrower could have been expected to repay. In both these cases any lifetime payments by the guarantor are not treated as lifetime transfers.

When considering lifetime transfers you will need to look closely at the circumstances when the agreement was entered into. This usually means that you will need to see details of the borrower's financial position at that time.

You should refer any case involving guarantee debts where you think that a lifetime transfer might be involved to Technical.

**IHTM28357 lifetime transfers on guarantee debts called in and fully paid before death** [June 2016]

Lifetime transfers might have arisen if the deceased entered into an agreement to guarantee a debt within the 7 years before they died and payments under the guarantee were required and made before death. You should consider the borrower's financial position at the date that the guarantee was given in the same way as on the previous page (IHTM28356) even though there is no outstanding liability at the date of death.

This information will not be shown on form IHT419. In strictness any lifetime transfer should be shown on form IHT403. But in many cases this will only come to light in the course of other enquiries or if other information is received. Although you should be alert to possible omissions, particularly in where unlisted companies are involved, you should not raise any enquiries unless you have evidence to suggest that a lifetime transfer has not been returned.

There is no guidance on the consequences of part payment of a debt which is partly disallowed by s.5(5). We only have the words "to the extent that". I expect that the issue does not often arise. It is considered that the position should be as follows:

- (1) In the absence of contrary intent, a part repayment of a partly disallowed debt should be regarded as
  - (a) in part in consideration of allowable debt, and so not a transfer of value
  - (b) in part in consideration of disallowable debt, and so a transfer of valuein the same proportions as the original principal of the debt.
- (2) It should be possible for a debtor to specify whether part repayment should be regarded as relating to allowable or disallowable parts of

the debt. This is consistent with the well-established principle that a debtor can in principle specify whether a part repayment of a debt is attributed to outstanding interest or to principal.<sup>20</sup>

### 76.10.3 *Debt imposed by law*

A debt imposed by law is allowable, even though not incurred for consideration. IHTM28381 [May 2020] gives examples: taxes, fines and penalties.

## 76.11 Section 103 FA 1986

### 76.11.1 *Section 103: Introduction*

A debt is in principle deductible even if it is owed to a connected person. But in this case s.103 FA 1986 needs consideration. This applies (in short) where an individual owes a debt to a person to whom they have previously made a gift.

The section was described in *McDougal v IRC* 31 ATC 153 as “intricate and involved in expression”. The reader who studies this section will agree! But if one works patiently through it a few times the meaning becomes clearer; contrast the less convoluted but hopelessly vague wording of s.102 (GWR). Thus there has been little litigation on s.103, and a vast amount on s.102.

GAAR guidance describes s.103 as concerned with “self-generated liabilities” but that label is not very apt, and is best avoided as it may cause confusion.

### 76.11.2 *Section 103 disallowance*

Section 103(1) must be split up into separate parts in order to distil the sense:

Subject to subsection (2) below, if, in determining the value of a person’s estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of

- [i] a debt incurred by him or
  - [ii] an incumbrance created by a disposition made by him,
- that liability shall be subject to abatement to an extent ...

---

20 See 25.6 (Part payment: interest or principal).

Thus, subject to certain defences, s.103(1) disallows the deduction for the debt to a certain extent. The section then goes on to specify the extent of the disallowance:

... to an extent proportionate to the value of any of the consideration given for the debt or incumbrance which consisted of—

- (a) property derived from the deceased; or
- (b) consideration (not being property derived from the deceased) given by any person
  - [A] who was at any time entitled to, or
  - [B] amongst whose resources there was at any time included, any property derived from the deceased.

Thus s.103(1) works like this:

- (1) One needs to identify the consideration given for the debt.
- (2) One asks to what extent the consideration consists of the type of consideration described in s.103(1)(a) and (b).
- (3) To that extent, the debt is in principle disallowed. (There are defences; I come to those later.)

#### 76.11.3 *Property derived from deceased*

This expression “property derived from the deceased” is defined in s.103(3):

In subsections (1) and (2) above “property derived from the deceased” means, subject to subsection (4) below, any property

[a] which was the subject matter of a disposition made by the deceased,

[i] either by himself alone

[ii] or in concert or by arrangement with any other person  
or

[b] which represented any of the subject matter of such a disposition, whether directly or indirectly, and whether by virtue of one or more intermediate dispositions.

What if an individual owns a company and procures it to make a disposition? There is no disposition made by the deceased, and s.103 does not apply.

The words at s.103(3)[a][ii] cover reciprocal arrangements.

The IHT Manual comments on “property derived from the deceased”:

**IHTM28367 Definition of ‘property derived from the deceased’ for s.103 FA 1986 purposes** [Sep 2018]

... In practice, income from property given absolutely by the deceased is treated as falling outside this definition. But where the deceased settled the property, the definition includes income payable under the disposition.

You should treat money raised by the sale or mortgage of property derived from the deceased as though it was property derived from the deceased.

As to mortgages, see App.2.11.4 (Borrowing charged on asset).

76.11.4 *s.103(1)(a) disallowance*

One needs first of all to ascertain whether the consideration for the debt was “property derived from the deceased”. If so, the debt is disallowed under s.103(1)(a). The debt is wholly disallowed if all the consideration is “property derived from the deceased” or partly disallowed if the consideration is partly “property derived from the deceased”.

The IHT Manual gives this simple example:

**IHTM28365 How s.103 FA 1986 applies when the consideration is ‘property derived from the deceased’?** [Aug 2016]

*Example*

On 19 March 1987 A gives his brother B £25,000.

On 25 April 1987 A borrows back £25,000 from B.<sup>21</sup>

On 7 April 1994 A dies.

Without the legislation A’s estate includes the original £25,000. But if the money was still owed when A died the debt might [?] be claimed as a deduction against his estate. And the PET in 1987 is exempt as more than 7 years have elapsed.

The legislation disallows the deduction for IHT purposes ...

76.11.5 *s.103(1)(b) disallowance*

Assuming one passes unscathed past the s.103(1)(a) disallowance, the journey takes us to s.103(1)(b). One must identify the person who gave the consideration for the debt. One then asks whether this is a person:

---

21 Author’s footnote: It is assumed that this £25,000 is, or represents, the £25,000 given to B.

who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

If so, the debt is disallowed under s.103(1)(b). In principle the debt is wholly disallowed.<sup>22</sup> The IHT Manual gives this simple example:

**IHTM28366 How s.103 FA 1986 applies when there is ‘consideration given by any person whose resources at any time included property derived from the deceased’?** [Sep 2018]

... *Example*

On 19 March 1987 A gives his brother B a parcel of land worth £25,000.

On 27 April 1987 A borrows £25,000 from B.

On 7 April 1994 A dies, at which time B retains the land which is non-income producing.<sup>23</sup>

The HMRC analysis is as follows:

The PET was made more than seven years before the death so that no claim arises on the death.

As the consideration for the debt is not derived from the deceased s.103(1)(a) FA 1986 would not apply.<sup>24</sup>

But this arrangement is caught by s.103(1)(b) FA 1986 and the liability is not an allowable deduction for Inheritance Tax purposes.

#### 76.11.6 *s.103(2) exceptions to s.103(1)(b)*

Section 103(2) provides exceptions to the s.103(1)(b) disallowance.<sup>25</sup>

This provides:

If, in a case where the whole or a part of the consideration given for a debt or incumbrance consisted of such consideration as is mentioned in subsection (1)(b) above, it is shown that

- [a] the value of the consideration given, or of that part thereof, as the case may be, exceeded
- [b] that which could have been rendered available by application of

22 Unless the consideration for the debt is given by more than one person (very unusual); but see below on defences to the s.103(1)(b) disallowance.

23 But whether the land is income producing is not directly relevant.

24 Author’s footnote: It is assumed that the £25,000 which B lends to A does not represent the land.

25 Section 103(2) does not override the s.103(1)(a) disallowance.

- all the property derived from the deceased,
- [c] other than such (if any) of that property—
- (a) as is included in the consideration given, or
  - (b) as to which it is shown that the disposition of which it, or the property which it represented, was the subject matter was not made with reference to, or with a view to enabling or facilitating, the giving of the consideration or the recoupment in any manner of the cost thereof,
- no abatement shall be made under subsection (1) above in respect of the excess.

It is helpful to consider this as three distinct exceptions.

#### 76.11.7 *s.103(2)[b] exception*

The “s.103(2)[b] exception” is my term for the exception given by the words of s.103(2) down to the end of s.103(2)[b], ie ignoring s.103(2)[c].

The IHT Manual gives a simple example:

#### **IHTM28369 Allowing part of a debt under s.103(2) FA 1986** [Aug 2016]

Even if an arrangement (IHTM28366) is caught by FA86/S103 (1) (b), a deduction may still be allowed for part of the debt. If the value of the consideration given by the [lender]<sup>26</sup> exceeded the amount that would have been available if the lender had applied all the property derived from the deceased, then the debt is reduced only to the extent of that lower amount.

#### *Example*

A gives his son B shares worth £20,000.

B lends A £25,000, out of his separate resources, at a time when the shares were worth £17,000.

A dies and a deduction of £25,000 is claimed.

The amount of the deduction is the realisable value at the time the debt was created. So the liability is reduced by £17,000 - leaving £8,000 as a valid deduction.

The s.103(2)[b] exception allows a deduction (overriding the s.103(1)(b) disallowance) to the extent that the debt exceeds the value of the property derived from the deceased. That is obviously fair.

---

<sup>26</sup> The IHT Manual erroneously reads: “deceased”.

### 76.11.8 s.103(2)[c](a) exception

The next exception is the extension of s.103(2)[b] by s.103(2)[c](a). This prevents double counting with the s.103(1)(a) disallowance. The IHT Manual gives an example:

**IHTM28369 Allowing part of a debt under s.103(2) FA 1986** [Aug 2016]

... *Example*

A gives shares worth £15,000 to B

18 months later B sells half the shares back to A for £7,500 – which is not paid but left as a debt repayable on demand.

B lends A £12,000 entirely from his own resources.

A dies owing B £19,500 [ie both debts remain outstanding].

The £7,500 debt is disallowed under s.103(1)(a). The reason is that the consideration for the £7,500 debt (the shares) is property derived from the deceased. The Manual correctly makes this point:

The debt of £7,500 is clearly derived from the earlier gift of shares – and falls within s.103(1)(a) FA 1986. This liability is not deductible.

The Manual then turns to the £12,000 debt:

If it was not for the provisions of FA86/S103 (2)(a) it would be possible to take that £7,500 into account in considering the debt of £12,000. The result would be that the entire debt of £12,000 would be non-deductible, so the whole of the claimed £19,500 would be disallowed. But because under FA86/S103 (1)(b) half the value of the shares is included in the consideration given for the debt there remains an excess of £4,500. This figure of £4,500 for the allowable debt is arrived at by calculating the resources available to B against the second loan of £12,000 as £7,500, being the original gift of shares less the £7,500 disallowed. So the balance of £4,500 is deductible without restriction because under IHTA84/S103 (2)(a) this amount is the excess consideration.

### 76.11.9 s.103(2)[c](b) exception

The next exception is the extension of s.103(2)[b] by sub-para [c](b). The Manual does not give an example of a case within s.103(2)[c](b); though this is perhaps the most important of the three. The result in the s.103(1)(b) examples in the IHT Manual would be different if the gift

from A to B was not made (in short) with a view to enabling B to lend to A.

#### 76.11.10 *s.103(4) exception*

Section 103(4) provides an important exception to the s.103(1)(a) and (b) disallowances:

If

- [a] the disposition first-mentioned in subsection (3) above<sup>27</sup> was not a transfer of value and
- [b] it is shown that the disposition was not part of associated operations which included—
  - (a) a disposition
    - [i] by the deceased, either alone or in concert or by arrangement with any other person,
    - [ii] otherwise than for full consideration in money or money's worth paid to the deceased for his own use or benefit; or
  - (b) a disposition by any other person operating to reduce the value of the property of the deceased,
 that first-mentioned disposition shall be left out of account for the purposes of subsections (1) to (3) above.

Associated operation has its IHT meaning<sup>28</sup> as s.103 is to be construed as one with the IHTA.

Suppose:

- (1) S (not UK domiciled) transfers excluded property (ie non-UK situate property) to a trust.
- (2) S borrows from the trustees and invests or spends the sum borrowed.

At first sight, the debt is disallowed as the consideration is property derived from the deceased, S. However, the s.103(4) exception applies. The disposition to the trust is disregarded, because it is the disposition first-mentioned in s.103(3)[a] and:

- [a] the disposition is not a transfer of value;
- [b] the disposition is a simple gift. It is not part of associated operations within s.103(4)[b](a) or (b).

---

<sup>27</sup> That is, the disposition made by the deceased. See 76.11.4 (s.103(1)(a) disallowance).

<sup>28</sup> See 70.10 (“Associated operation”).

Using the sum borrowed is an associated operation and it may be said that the disposition to the trust is “part of associated operations”. But the requirement of s.103(3)[b] is still met:

[b] ... the disposition was not part of associated operations which included—

(a) *a disposition*

[i] by the deceased, either alone or in concert or by arrangement with any other person,

[ii] otherwise than for full consideration in money or money’s worth paid to the deceased for his own use or benefit; or

(b) a disposition by any other person operating to reduce the value of the property of the deceased,

The trust disposition is not for full consideration. But the disposition mentioned in the third line must be a *different* disposition from the trust disposition.

Thus a debt to an excluded property trust is not in principle disallowed under s.103. It may be said that the intention of section 103 FA 1986 is to prevent self-generated debts from being deductible for inheritance tax purposes, so a purposive construction should be applied. But s.103(4) can be explained as a rational policy-based exemption for foreign domiciliaries, so it should be given its natural meaning.

The same applies if the gift is to a trust where the settlor has a estate IIP (eg a gift to a pre-2006 IIP trust) because such a gift is not a transfer of value.

Suppose an arrangement under which:

- (1) Trustees lend to the settlor, S.
- (2) S gives the borrowed money to another person.

The debt is disallowed. The s.103(4) exception does not apply. Condition [a] is satisfied but condition [b] is not, because the gift at stage (2) is an associated operation otherwise than for full consideration.

#### 76.11.11 *Payment of debt: deemed PET*

In the absence of any provision, repayment of a disallowed debt would not

be a transfer of value.<sup>29</sup> Section 103(5) FA 1986 deals with this:

If, before a person's death but on or after 18 March 1986, money or money's worth, is paid or applied by him—

(a) in or towards the satisfaction or discharge of a debt or incumbrance in the case of which subsection (1) above would have effect on his death if the debt or incumbrance had not been satisfied or discharged, or

(b) in reduction of a debt or incumbrance in the case of which that subsection has effect on his death,

the [IHTA] shall have effect as if, at the time of the payment or application, the person concerned had made a transfer of value equal to the money or money's worth and that transfer were a potentially exempt transfer.

I refer to this as a “**s.103(5) deemed PET**”.

There is no express provision for a foreign domiciliary. Taken literally, there would be a deemed PET where, say, an individual domiciled in Australia:

- (1) made a gift to a child
- (2) later borrowed from the child
- (3) later repaid the debt

The debt could fall within s.103(5) as the debt is one “in the case of which s.103(1) would have effect on his death if the debt had not been satisfied.”<sup>30</sup>

However, the principle of territorial limitation requires that some exemption is implied. The best solution is that the deemed PET should be regarded as not only “equal to the money or money's worth” but made out of the money or money's worth. Thus no tax charge arises if:

- (1) The individual is not UK domiciled at the time they discharge the debt, and
- (2) The debt is discharged out of excluded property.

---

<sup>29</sup> Because s.103 only disallows the debt on death; s.10 IHTA may also provide relief, but it is not necessary to rely on that.

<sup>30</sup> From 2013, the debt might be disallowed under the excluded property disallowance, in which case there would be no s.103(5) deemed PET; but that is not necessarily the case.

This would be broadly consistent with the comparable GWR provision.<sup>31</sup>

#### 76.11.12 *Assignment of debt*

Suppose:

- (1) A borrows from a bank (“A’s debt”).
- (2) B purchases the benefit of the debt from the bank for its market value.

It is suggested that the purchase price paid by B to the bank is “consideration given for the debt”. So A’s debt is disallowed if the purchase price which B pays to the bank is property derived from A. Otherwise the section is easy to avoid.

Conversely if A’s debt is disallowed because it is made in consideration of property derived from A, it continues to be disallowed even if the debt is sold to a third party. In other words, “consideration for the debt” means the consideration for the creation of the debt but also includes consideration for the assignment of the debt.

#### 76.11.13 *1986 transitional rules*

For completeness: s.103(6) FA 1986 provides:

Any reference in this section to a debt incurred is a reference to a debt incurred on or after 18 March 1986 and any reference to an incumbrance created by a disposition is a reference to an incumbrance created by a disposition made on or after that date ...

This will rarely if ever now apply. But it illustrates how attitudes to retrospective effect in commencement provisions have changed since 1986.<sup>32</sup>

### **76.12 Debt owed by individual to trust**

#### 76.12.1 *Non-settlor life tenant debt to estate IIP trust*

Suppose the life tenant (not the settlor) owes a debt to trustees of an estate IIP trust (as happens when a pre-2006 IIP trust lends money to the life tenant). At first sight, the position seems to be:

- (1) The life tenant has a deduction for the burden of the debt on their death.

---

31 See 74.17 (GWR lifetime charge).

32 See 2.9 (Retrospective tax legislation).

- (2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. If the benefit of the debt is excluded property (in short, foreign domiciled settlor and debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

- (1) a deduction for the burden of the debt in the estate of the life tenant; and
- (2) no IHT on the benefit of the debt, being excluded property.

Robert Venables QC takes the view that there is no deduction for the debt. He cites Lord Asquith's well-known comment on deeming provisions<sup>33</sup> and continues:

If one applies Lord Asquith's dictum, what is deemed to happen when the settlor<sup>34</sup> in fact borrows money from the trustees? As he is deemed to own the money before it is borrowed [s.49 IHTA], he cannot borrow it from himself. The transfer of the money to himself is a non-event for inheritance tax purposes. His estate is subject to no debt, as a man cannot owe a debt to himself. The question of any such debt being treated as non-deductible in computing the value of his estate for inheritance tax purposes therefore does not arise. Conversely, however, the settled property does not include the right to sue the settlor for the money borrowed, as a man cannot have a right against himself.<sup>35</sup>

I agree. The effect of s.49(1) IHTA is therefore to disallow the deduction for the debt.

A practical solution may be to arrange that the debt is not due to the trustees, but to a company owned by the trustees. Alternatively, perhaps, arrange that the debtor beneficiary ceases to be life tenant.

### 76.12.2 *Settlor life tenant debt to estate IIP trust*

---

33 See App 7.1 (Deeming provisions: Introduction).

34 Venables is considering the position of a settlor life tenant, but the same applies to a non-settlor life tenant.

35 Venables, "An IHT Trap for Settlers of Non-UK Resident Trusts", OTPR, vol 4, issue 3, p.165 <http://www.khpplc.co.uk/reviews>

Suppose a settlor life tenant owes a debt to trustees of an estate IIP trust (as happens when a pre-2006 IIP trust lends money to the settlor life tenant). At first sight, the general position seems to be:

- (1) The settlor can claim a deduction for the burden of the debt on their death.
- (2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral. There are however two special cases.

If the benefit of the debt is excluded property, at first glance the result is a mismatch which favours the settlor (deduction for the burden of the debt, no charge on the benefit of the debt).<sup>36</sup>

If the deduction for the debt is disallowed (eg under s.103<sup>37</sup>) the result is a mismatch which favours HMRC (no deduction for the burden of the debt, but a charge on the benefit of the debt, unless it is excluded property).

However on the view set out in para 76.12.1 (Debt owed by non-settlor life tenant to trust), the burden of the debt and the asset of the trust cancel each other out and both are ignored for IHT purposes. This is a sensible result, which fits the purpose of the legislation. In practice HMRC appear to accept this.

### 76.12.3 *Settlor debt to settlor-interested discretionary trust*

Suppose:

- (1) The settlor (“S”) owes a debt to trustees of a discretionary trust (as happens when a discretionary trust lends money to the settlor).
- (2) The trust is within the scope of the GWR rules.

At first sight, the position seems to be:

- (1) The settlor can claim a deduction for the burden of the debt on their death.

---

36 This might happen if the settlor was not UK domiciled, but needed the deduction for the debt as their property was UK situate.

37 But this would not often apply to excluded property trusts or to trusts where the settlor has an initial estate IIP: see 76.11.10 (Section 103(4) exception).

- (2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the settlor under the GWR rules.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (in short, foreign domiciled settlor and debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

- (1) a deduction for the burden of the debt in the estate of the settlor;<sup>38</sup> and
- (2) no IHT on the benefit of the debt, being excluded property.

It is considered that the debt is disallowed under s.102(3) FA 1986. Under this section the benefit of the debt is treated as property to which the settlor was beneficially entitled on their death. The analysis is therefore the same as where the settlor is a life tenant, see above. This is so whether the GWR debt is UK situate or foreign situate.<sup>39</sup>

### **76.13 Debts to and from trusts**

Do not confuse two situations:

- (1) Where an individual owes money to trustees (eg the trustees have lent money to the individual). Here:
  - (a) The individual may be entitled to an IHT deduction for the burden of the debt in their estate.
  - (b) The trustees have an asset, the benefit of the debt (which may or may not be excluded property).
- (2) The reverse, where trustees owe money to another person (eg an individual has lent to the trustees). Here:
  - (a) The individual owns an asset in their estate, the benefit of the debt (which may or may not be excluded property).
  - (b) The trustees or life tenant may be entitled to an IHT deduction for the burden of the debt on the trust property.

The issue of deduction for debts of trustees raises entirely different questions to which we now turn.

---

38 Since s.103 does not usually apply: see 76.11.10 (Section 103(4) exception).

39 As to whether the GWR debt is subject to IHT under the GWR rules, see 74.13 (GWR over debt owed by the deceased).

## 76.14 Deduction for trust debt

The position for a trust debt<sup>40</sup> which is an incumbrance on a specific trust asset is straightforward: under the net-value approach, the asset is valued for IHT purposes at the net value (less the incumbrance)<sup>41</sup>; that rule applies for the Inheritance Taxation of trusts as for individuals.

It is clear that unsecured trust debts are also in principle deductible for IHT purposes, although there is no provision which states this expressly.<sup>42</sup> This apparent gap has caused some confusion.

Let us consider first the position where the trustees have borrowed funds and an estate interest in possession terminates during the lifetime of the life tenant. There is a transfer of value and the value transferred is:

equal to the value of the property *in which his interest subsisted*.<sup>43</sup>

What is “the property in which the interest subsists”? In my view it is not the settled property; it is the property subject to the trustee lien.<sup>44</sup> For the trustee lien takes priority over the interest of the life tenant. The trustee lien is a lien over both income and capital of the trust fund. The value of property is its market value. Market value of property subject to a lien will be the net value, the value after deducting the value of the lien. In this valuation exercise we are not strictly claiming a “deduction” for the lien. We are simply ascertaining what property will fetch in the open market.

For the same reason, trust debts are deductible when an estate IIP terminates on the death of the life tenant and in computing 10-year and exit charges.<sup>45</sup>

---

40 Strictly one should refer to a trustee debt rather than a trust debt, but in practice the two terms may be used synonymously.

41 See 76.2.1 (Incumbrance-debt).

42 In particular, s.5(3) IHTA does not apply here as trustees do not have an estate. See 76.2.2 (Unsecured debt).

43 Section 52(1) IHTA, emphasis added. See 72.10 (Termination of qualifying IIP).

44 Where a trustee has incurred a liability as trustee, they may in principle reimburse themselves out of the trust fund. For this purpose the trustee has a lien over the trust fund. One exception is where the trustee has committed a breach of trust. In the discussion here, it is assumed that is not the case.

45 Section 65(5) IHTA assumes debts are deductible for the IHT exit charge, though it is not necessary to rely on this.

This is the correct reason why unsecured trust debts are deductible.<sup>46</sup>

Some provisions which disallow debts of individuals do not apply to trust debts. Section 103(1) FA 1986 provides:

... if, in determining the value of a person's estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of a debt *incurred by him* or an incumbrance created by a disposition *made by him*, that liability shall be subject to abatement.

This does not apply to debts of trustees as we are not concerned with a debt or disposition made by the individual.

Section 5(5) IHTA provides:

Except in the case of a liability imposed by law, a liability incurred by a transferor shall be taken into account only to the extent that it was incurred for a consideration in money or money's worth.

This does not apply to trustees because they are not the transferor.

However the disallowance in s.162A IHTA (liability attributable to financing excluded property) can apply to trustees.

#### 76.14.1 *Debt set against what property*

It matters in various cases whether a deduction for a trust debt is set against one item of trust property or another.<sup>47</sup> In particular, it matters where a trust with a foreign domiciled settlor has UK and excluded property.

The principles are as follows:

- (1) If the debt is an incumbrance on specific trust property, the deduction is set against that property. This follows from the net-value approach

---

46 In *Green v IRC* [2005] EWHC 14 (Ch) at [12] the judge took a short cut to reach the same destination:

“... s.49 IHTA [deems] the deceased to be beneficially entitled to ‘the property’ in which his life interest subsists. It does not say ‘net property’ (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section.”

The point is discussed in detail in the 3rd ed of this book para 27.9, but it is not necessary to set this out now that *Green* has confirmed the principle that trust debts are deductible for IHT.

On HMRC practice see for instance IHT Manual 10541 [Jun 2014] (deductions).

47 See 76.4.1 (Why allocation matters).

and is confirmed by s.162(4) IHTA.<sup>48</sup>

- (2) If the debt is not an incumbrance on specific trust property, it is under general trust law principles an incumbrance on the trust fund as a whole and deducted from the trust assets *pro rata*. The place of payment and residence of creditor are not relevant, and s.162(5) IHTA does not apply.

#### 76.14.2 *Debt of life tenant not set against trust fund*

The IHT Manual provides:

**IHTM28397 Liabilities: dealing with deficits** [June 2016]

We take the view that a liability at any title may only be deducted against the assets at that title. This means that if there is an overall deficit on the free estate you cannot set this against the value of settled property. This is derived from the judgements of Lawrence J and the Court of Appeal in *Re Barnes (deceased)* [1938] 2 KB 684 in the first instance and [1939] 1 KB 316 CA. It is considered that these decisions, based on the relevant estate duty provisions in the 1894 Finance Act apply equally to the corresponding provisions in the Inheritance Tax legislation. But a contrary view is possible in view of IHTA84/S5(1) and IHTA84/S49(1). If the official view is contested and the tax involved is substantial you should refer the matter to Technical. **(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**<sup>49</sup>

---

48 If under the terms of the trust a debt is payable out of certain property it is for this purpose a incumbrance on that property.

49 For completeness: The Manual continues:

You should treat a deficit on joint survivorship property in a similar way. The deficit cannot be set against the assets at another title. But a deficit on joint property that passes under the Will can be set against free estate assets.

You may generally allow a deficit in the deceased's estate that does not qualify for the instalment option to be set against the property that qualifies for the instalment option. If the value of the instalment option assets is insufficient to cover the liabilities, then the balance can be carried forward and set against any foreign property that the deceased owns. You may also allow any excess liabilities on the instalment option property against the non-instalment option property with any balance being carried forward against any foreign property, if any.

I am unable what point is being made here. Possibly the text would make sense if read together with the preceding passage which was omitted because of supposed exemptions in the FOIA 2000 (it is also difficult to understand what the FOA point

It is in fact clear that a personal debt of the life tenant cannot be set against property in which the life tenant has an estate interest in possession.<sup>50</sup>

### **76.15 Estate IIP trust debt to life tenant**

Suppose trustees of an estate IIP trust owe a debt to the life tenant (as happens when a life tenant lends to a pre-2006 IIP trust). At first sight, the position seems to be:

- (1) The trust can claim a deduction for the burden of the debt on the death.
- (2) The benefit of the debt is part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled life tenant and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

- (1) a deduction for the burden of the debt in the trust;<sup>51</sup> and
- (2) no IHT on the benefit of the debt, being excluded property.

It is considered that s.49 IHTA does not disallow the debt.

### **76.16 Deduction for foreign taxes**

#### *76.16.1 IHT on death*

Foreign inheritance taxes and similar taxes may be available as a credit to set against IHT: see 114.1 (Credit for Foreign IHT). Such taxes are not deductible for IHT purposes on general principles as they arise on the death and IHT is charged immediately before the death.

#### *76.16.2 Lifetime taxes*

Unpaid foreign taxes, and penalties, which accrue during a person's lifetime are in principle deductible. They are liabilities imposed by law.

The IHT Manual provides:

---

may be, but there it is).

<sup>50</sup> *Green v IRC* [2005] EWHC 14 (Ch).

<sup>51</sup> Of course in most cases the trust property is excluded property so there is no need for the deduction, but that is not necessarily the case: the trust may hold UK property.

**IHTM28100 Overseas taxes** [Sep 2018]

Special rules (IHTM27181) apply to overseas taxes that are similar in nature to Inheritance Tax (IHT). These may in some cases be set against the IHT liability.

For other types of overseas taxes the general rule is that they can normally only be deducted from the value of property in the country that imposes the tax. This is because the taxes are unenforceable in other countries, *Government of India v Taylor* [1955] AC 491.

There are three exceptions to this rule:

- tax debts in the Republic of Ireland (IHTM28101)
- Canadian income tax on a deemed disposal on death (IHTM28102)
- foreign tax on shares situated in the UK (IHTM27201).

The proposition that foreign taxes are unenforceable in other countries now needs to be qualified. Enforceability of foreign taxes is a large topic, and may need investigation in the circumstances of the case; but under international treaties, foreign taxes are generally enforceable in other countries, and there may be other methods of enforcement (eg arrest of the executors if they enter the jurisdiction concerned.)

So far as foreign taxes are unenforceable and unpaid it seems right in principle that there should be no deduction and a court would be expected to reach that conclusion even in the absence of express provision to that effect.<sup>52</sup>

It is difficult to see why the deduction should be against property in the country concerned: it should be against non UK property generally, under s.162(5) IHTA, unless the foreign tax legislation imposes an incumbrance (which does not seem likely).

### 76.16.3 *Irish tax*

The IHT Manual provides:

**IHTM28101 Deduction for tax debts in the Republic of Ireland** [Sep 2018]

If the deceased died owing tax in the Republic of Ireland, you should allow a deduction against the free estate for any tax that has actually been paid to the Irish authorities provided the deceased

- was domiciled in the United Kingdom, and

---

<sup>52</sup> See too 76.35 (Debt unpaid after death).

- had no assets in the Republic of Ireland.

Where, in these circumstances, the deceased also has assets in a third country, you should apportion the tax debts.

If a deduction is claimed for any 'Probate Tax' paid in the Republic of Ireland, you must refer the matter to Technical for advice. This tax, which is paid by the executors or administrators of an estate, is not covered by our Double Taxation Convention with the Republic of Ireland.

#### 76.16.4 *Canadian income tax*

The IHT Manual explains the Canadian tax background:

**IHTM28102. Canadian income tax** [Jul 2016]

Under Canadian law, the estate of an individual is deemed to have been disposed of immediately before their death. Income tax is charged on any resulting gains. If, under the (Income Tax) Double Taxation Agreement the deceased was resident in Canada, the charge applies to all property wherever it is situated. But if the deceased was resident in the UK the charge applies only to immovable property in Canada and to certain business property.

There was a similar charge to CGT in the UK between 1965 and 1971. The UK abolished the CGT charge on death; Canada abolished its estate duty instead, a wiser decision.<sup>53</sup> The Manual continues:

In a press release dated 1 August 1978, the Board announced that, by concession

- IHTA84/S5 (3) will be treated as applying to income tax in Canada imposed on a deemed disposal immediately before death even though the liability may not in strictness have arisen until the person had died
- where Inheritance Tax (IHT) is chargeable on a person's world-wide estate, and income tax in Canada is charged on deemed gains which are attributable to property forming part of that estate, the Canadian tax will be allowed as a deduction in arriving at the value of the estate for IHT purposes, and
- Canadian tax will normally be treated as reducing the value of property situated outside the UK whether that property is liable to IHT or not. But if the Canadian tax is more than the value of that

---

<sup>53</sup> See 84.5.6 (Rebasing on death: Critique).

property the excess will be set off against the value of the UK property.

Any case in which IHT is not chargeable on the deceased's world-wide estate (for example, because the deceased was not domiciled in the UK) but a deduction is claimed for Canadian income tax on a deemed disposal immediately before death should be referred to Technical.

The matter was formerly covered by ESC F18, but HMRC withdrew that as they decided that the practice was correct as a matter of law, not concession.<sup>54</sup>

#### 76.16.5 *Foreign tax on UK shares*

The IHT Manual provides:

**IHTM27201. Procedure for relief by concession on shares** [Jul 2016]

Occasionally shares in a company situated in some part of the UK by UK law, are also treated as liable to tax in a foreign country on the grounds, for example, that the company carries on business there. In this circumstance, by concession, the amount of foreign tax is allowed as a deduction against the value of the shares. This concession operates whether the company is incorporated in the UK or elsewhere.

The concession applies in the same way where the obligation to pay foreign tax on death falls upon the company and the company has the right to be reimbursed by the personal representatives of the deceased shareholder before it registers a transfer of the shares.

The concession does not apply to cases covered by the statutory reliefs provided for by s.158 IHTA 1984 and s.159 IHTA 1984. Nor does it apply to shares that become liable to the foreign tax by reason of the operation of a double taxation convention to which the UK is not a party.

I would have thought in this situation s.158 or 159 relief would normally apply, and in other cases relief would be available by law and not by concession. I would be interested if any reader can identify the foreign taxes to which this paragraph is applicable.

#### 76.17 **Excluded property disallowance**

---

54 HMRC, "Withdrawal of extra statutory concessions: Technical note and call for evidence" (January 2014).

Section 162A(1) IHTA provides:

To the extent that a liability is attributable to financing (directly or indirectly)—

- (a) the acquisition of any excluded property, or
- (b) the maintenance, or an enhancement, of the value of any such property,

it may only be taken into account so far as permitted by subsections (2) to (4).

I refer to this as the “**excluded property disallowance**”.

The disallowance applies to individuals and trustees, on death and on other occasions of charge.

76.17.1 *Commencement: Pre-2013 debt*

Para 5(1) sch 36 FA 2013 provides:

Subject to sub-paragraph (2),<sup>55</sup> the amendments made by this Schedule have effect in relation to transfers of value made, or treated as made, on or after the day on which this Act is passed [17th July 2013].

So the excluded property disallowance applies to pre-2013 debts, if the transfer of value is after enactment. This was an unfair commencement rule as in many cases, including those without tax avoidance, existing liabilities will have been incurred in reliance of the pre-2013 rules. The norm requiring commencement rules to avoid retrospective effect has weakened.<sup>56</sup> But there it is.

**76.18 “Financing” an acquisition**

What is meant by the expression “financing” an acquisition of excluded property? It is considered that it should be widely construed.

Suppose T enters into a contract to purchase excluded property and the purchase price remains outstanding on completion. The debt is attributable to financing the acquisition of the excluded property.

What about borrowing to pay incidental costs of acquiring excluded property, such as foreign stamp duty or agents commission? It is

---

<sup>55</sup> This relates to the business/agricultural property disallowance: see 76.29.2 (BPR/APR disallowance: Commencement).

<sup>56</sup> Contrast 76.11.13; and see 2.8.2 (Retrospective legislation: Extent).

suggested that this is not disallowed.

If a person borrows to pay for services, the debt is not disallowed (unless the services relate to maintenance/improvement of excluded property).

Suppose:

- (1) T borrows to acquire excluded property (“debt 1”).
- (2) T borrows to pay interest on debt 1 (“debt 2”).

It is considered that debt 2 is not incurred in financing the acquisition, and so is not disallowed.

More commonly, the interest will be added to the acquisition debt, ie there will be one single debt; it is arguable that the debt is disallowed to the extent it reflects the acquisition cost, but not to the extent it reflects interest. However the drafter seems to have assumed that an increase in the debt due to interest is in principle caught.<sup>57</sup>

## **76.19 Maintenance/enhancement of value**

The IHT Manual provides:

### **IHTM28012 meaning of ‘maintain’ and ‘enhance’ [Sep 2018]**

The words ‘maintain’ and ‘enhance’ extend the scope of the provisions beyond simply buying either excluded property (IHTM28014) or assets that qualify for relief (IHTM28019).

Both words have their normal meaning. ‘Maintain’ means to keep in good or proper order, and ‘enhance’ means to improve or augment. These words are most likely to apply in connection with borrowing money to maintain or enhance buildings.

Where a person borrows money instead of using their own money to acquire assets, it could be said that they have ‘maintained’ the value of their other assets. So if they were not domiciled in the UK and held most of their assets abroad, borrowing against UK assets could be said to be ‘maintaining’ the value of excluded property. Individuals are free to choose how to use and invest their assets and whether to borrow money. So you should not normally disallow the deduction of a liability in these circumstances.

But, any case where the borrowing against UK assets appears to be part of arrangements that are primarily designed to avoid these provisions and obtain a tax advantage should be referred to Technical.

---

<sup>57</sup> See 76.24.5 (Disallowable reason 2: increase in liability).

## 76.20 “Indirectly” financing

The IHT Manual provides:

### **IHTM28013 meaning of “indirectly” [Sep 2018]**

The word ‘indirectly’ at s.162A(1) IHTA, s.162B(1)(b), (3)(b) & (5)(c) IHTA significantly broadens the scope of the provisions. It reduces the possibility of avoiding the restrictions by inserting a step or steps in the process of acquiring excluded or relievable property with the borrowed funds.

As with the pre-owned assets charge (IHTM44005),<sup>58</sup> it is not necessary to show any intention that the funds should eventually be converted into excluded or relievable property when a loan was taken out. Inserting steps in an attempt to disguise the true nature of a transaction will be a strong indicator of indirect financing. And the acquisition of assets of any nature as part of a sequence of transactions that ends with the acquisition of excluded or relievable property will not necessarily be sufficient to prevent the deduction being disallowed.

“Not necessarily” is not exactly guidance. HMRC go on to cite a case:

In *IRC v Stype Investments (Jersey) Ltd*<sup>59</sup> Vinelott J observed that the word ‘indirectly’ was used to make it clear that the (Inland Revenue) charge extended not only to the proceeds of sale of property subject to the charge and to property purchased with those proceeds (which may be said to represent that property ‘directly’) but also to any property into which the property subject to the charge or the proceeds of sale can be traced. Whilst this view may (?) have been expressed in connection with an administrative process, it shows the potentially broad scope of the word. There is no number of steps or a timescale beyond which borrowing money can be regarded as safe from being attributed to the acquisition of excluded or relievable property. And there is no statutory let-out where the taxpayer can show that at the time the loan was taken

58 This relates to different wording: “the chargeable person has directly or indirectly provided ... any of the consideration given by another person for the acquisition of ... an interest in the relevant land”; see 80.6 (“Provide”). That does not shed much light on the issue discussed here.

59 For the *Stype* case, see App 2.11.5 (Do co shares represent co assets). But I do not think that a comment on the meaning of “directly or indirectly representing” in the context of the Inland Revenue charge sheds much light on the meaning of “indirectly financing” in the present context; “directly or indirectly” is a phrase which is very context dependent.

out; there was no intention to convert the borrowed funds into excluded or relievable property. But although the word ‘indirectly’ has a broad meaning, in the context of this provision, it must be possible to reasonably attribute the acquisition of the excluded or relievable property to the borrowed funds before the deduction of the loan is disallowed. Each case will turn on its own facts. You can find some examples of situations where property is acquired indirectly at IHTM28025.

This is an important question. Suppose:

- (1) T borrows to acquire an asset (“asset 1”).
- (2) T sells asset 1 and uses the proceeds to acquire another asset (“asset 2”).

Is it the case that the debt is “attributable to financing indirectly the acquisition of asset 2? That is the case if the steps formed part of an arrangement, but perhaps not otherwise.<sup>60</sup>

#### 76.20.1 *Borrowed money in mixed account*

HMRC’s first set of examples concern borrowed money mixed in an account with other money:

**IHTM28025 examples where money has been borrowed to ‘indirectly’ acquire excluded or relievable property [Sep 2018]**

*Example 1 (Marianne)*

M, who is domiciled outside the UK, owns a property in the UK.

She borrows some money which she charges against her property and puts the money in her UK bank account.

Some time later, she use some of the money in the account to buy some UK listed shares and some foreign shares.

On her death, the liability is still charged against her property. The extent to which the liability may be disallowed will depend on the facts.

This particular scenario seems far-fetched, as one normally draws down a loan facility when the funds are needed, not before. But mixed fund issues will arise in various circumstances.

HMRC consider three permutations of facts.

---

<sup>60</sup> In the IHT residential property code, there is a provision to deal with this case: see 78.8.6 (Finance indirectly).

[Example 1(a)]

If

- [1] M had borrowed £100,000 and added that to her UK account which already contained £50,000 (that had not been borrowed) and  
 [2] had then used that money to buy £75,000 worth of UK shares and £75,000 worth of foreign shares,  
 it might be reasonable to say that one half of the liability was attributable to acquiring excluded property and disallow £50,000.

The author of the passage seems unsure. “It might be reasonable” is not guidance.

In my view one should apply the rule in *Clayton’s case*: M has power to chose, and in the absence of an express choice, first in first out.<sup>61</sup> If the UK shares were purchased first, then (1) the UK shares were purchased with the UK money and £25k borrowed money; (2) the foreign shares were purchased with £75k borrowed money and £75k borrowing is disallowed. If the foreign shares were purchased first, then vice versa, and £25k is disallowed. If the shares were purchased at the same time, then as HMRC suggest, half the liability is disallowed.

The moral is that M should not mix borrowed money and other money. She should:

- (1) use her existing £50k to purchase foreign shares, and
- (2) borrowed £100k to purchase £75k UK shares and £25k foreign shares.

Then only £25k would be disallowed. But of course before 2013, M could not have known that.

In the next example the bank account holds (more or less) only the borrowed money:

[Example 1(b)]

Had the account contained very little other money and £100,000 of foreign shares had been acquired, the whole liability should be disallowed.

That seems straightforward.

The next example is similar to example 1a, but the HMRC analysis is unknown:

[Example 1(c)]

---

61 See [App. 2.11.7](#) (Withdrawal from mixed fund).

On the other hand, had the account contained, say, £400,000 and £100,000 of foreign shares had been acquired the position will depend on circumstances. You should obtain details of the amount in the account before the borrowed funds were added and details of how the funds in the account were used afterwards.

Where the funds were borrowed specifically to acquire the excluded property, then they should be treated as being used wholly for that purpose and the liability disallowed. But if the facts indicate that the funds in the account were mixed, it might be more appropriate to apportion the amounts used to purchase the excluded property. If the position is unclear, or if the taxpayer or agent disagrees with your apportionment of the liability, refer the case to Technical.

This is not exactly “guidance”.

#### 76.20.2 *Tracing borrowed money through purchases and sales*

It is convenient to coin some terminology. In the following discussion:

“**A debt-financed asset**” is one purchased out of borrowed funds.

“**A partly debt-financed asset**” is one purchased partly out of borrowed funds and partly out of other funds.

“**Chargeable property**” is property which is not excluded property within the IHT definition.

The IHT Manual provides:

**IHTM28025 examples where money has been borrowed to ‘indirectly’ acquire excluded or relievable property** [Sep 2018]

... *Example 3*

The trustees<sup>62</sup> of an excluded property trust borrow £1m which is charged against existing UK property worth £1.5m (property 1).

They use the borrowed funds to purchase a second UK property for £1m (property 2).

At this point, if the liability were to be taken into account in arriving at the value subject to tax, the £1m liability would be allowed as a deduction because the money has been used to acquire UK property. IHTA84/S162A does not apply, so the chargeable value would be £1.5m (£2.5m chargeable UK assets less £1m allowable liability).

---

62 This set of examples concern trustees whereas the first set concerned an individual. Do HMRC intend to suggest that there is a difference between trustees and individuals? Trustees are more likely to keep good accounts and a trust has more of a unity of purpose.

Property 2 is later sold for £1m and all the proceeds are transferred offshore to become excluded property.

This is therefore a case where:

- (1) A debt-financed asset is chargeable property.
- (2) The chargeable property is sold.
- (3) Excluded property is purchased with the proceeds.

The HMRC analysis is as follows:

The liability would now be disallowed by IHTA84/S162A. This is because the liability has been incurred to indirectly acquire excluded property - the funds now held offshore. The chargeable value is still £1.5m (£1.5m of UK assets and no deduction for the liability).

In the next example:

- (1) A debt-financed asset is chargeable property.
- (2) The chargeable property is sold.
- (3) Excluded property is purchased with part of the proceeds.

*Example 4*

The trustees of an excluded property trust borrow £1m which is charged against existing UK property worth £1.5m (property 1).

They use the borrowed funds to purchase a second UK property for £1m (property 2).

Property 2 is later sold for £1m,

So far the facts are the same as example 3, but the proceeds of sale are used in a different manner.

£400,000 of which is used to acquire UK listed shares and the £600,000 to acquire foreign shares.

The HMRC analysis is as follows:

£600,000 of the liability is disallowed by IHTA84/S162A(1) having been used to acquire indirectly the foreign shares which are excluded property, with the result that only £400,000 of the liability is allowed as a deduction.

The value of the UK assets is £1.9m (£1.5m, plus the additional £400,000 in shares) from which can be deducted the allowable part of the liability of £400,000, leaving £1.5m chargeable.

In the next example:

- (1) A *partly* debt-financed asset is chargeable property.
- (2) The chargeable property is sold
- (3) All the proceeds are used to purchase excluded property.

*Example 5*

The trustees of an excluded property trust own £1.5m of UK listed shares.

They borrow £1m and use a further £600,000 from sale of some of the shares to purchase a UK property for £1.6m.

The property is subsequently sold for £2.5m and all the sale proceeds are invested in foreign shares.

The whole of the £1m liability has been used indirectly to acquire excluded property, so it is disallowed by IHTA84/S162A(1).

The chargeable value is £900,000 (the original £1.5m less the £600,000 worth of the shares used to purchase the property).

In the next example:

- (1) A *partly* debt-financed asset is chargeable property.
- (2) The chargeable property is sold.
- (3) Part of the proceeds are used to purchase excluded property.

*Example 6*

The trustees of an excluded property trust own £1.5m of UK quoted shares.

They borrow £1m and use a further £600,000 from sale of some of the shares to purchase a UK property for £1.6m.

The property is subsequently sold for £2.5m.

So far the facts are as in example 5.

This time £750,000 of the sale proceeds are used to reinvest in UK quoted shares and £1.75m is used to acquire foreign shares.

IHTA84/S162A(1) disallows the liability to the extent that it has been used indirectly to acquire excluded property.

Part of the £1.75m of excluded property has been acquired indirectly from the £1m borrowed at the outset; this part is established as follows.

The £1m borrowed made up 62.5% of the purchase price of the £1.6m UK property purchased by the trustees.

When this property was sold, 70% of the sale proceeds (£1.75m out of £2.5m) were used to acquire the foreign shares. Of the original £1m borrowed therefore, £437,500 ( $£1m \times 70\% \times 62.5\%$ ) is attributable indirectly to financing the acquisition of excluded property.

Only the remaining £562,500 of the liability can be taken into account.

The value of the UK assets is £1.65m (the original £1.5m less £600,000 used to buy the property plus the additional £750,000 reinvested in UK shares) from which can be deducted the allowable part of the liability of £562,500, leaving £1,087,500 chargeable.

### 76.20.3 *Borrowing to repay debt*

Suppose:

- (1) T borrows to purchase excluded property (“debt 1”).
- (2) T borrows to repay debt 1 (“debt 2”).

Is debt 2 indirectly attributable to financing the acquisition of excluded property? What if T borrows to purchase non-excluded property but later sells that property and uses the proceeds to repay debt 1? It is suggested that debt 2 is attributable to financing excluded property if the steps form part of an arrangement, but not otherwise.

### 76.20.4 *Acquisition by third party*

The position becomes more complex if a second person is involved.

Suppose:

- (1) A (an individual) borrows.
- (2) A gives the borrowed funds to B.

If A borrows and acquires *excluded* property, and gives it to B the debt is forever disallowed.

A may borrow and acquire *chargeable* property and give it to B; in the hands of B the property may (a) be excluded or (b) later become excluded. A’s gift may be a PET or qualify for the IHT spouse exemption or it may be a chargeable transfer.

In the expression “attributable to financing (directly or indirectly) the acquisition of any excluded property” does “acquisition” mean acquisition by the person who has the liability? or does it mean acquisition by anyone? It is tentatively suggested that A’s debt is attributable to financing the acquisition by B, if the steps form part of an arrangement, but not if they are independent.

Similar issues arise if trustees borrow and appoint the borrowed funds to B.

## 76.21 **Excluded property disallowance reliefs**

Statute provides the following reliefs (exceptions to excluded property

disallowance):

- (1) Disposal of debt-financed excluded property (disposal relief)
- (2) Debt-financed asset ceases to be excluded property
- (3) Debt exceeds debt-financed asset

## 76.22 Disposal of debt-financed asset

Section 162A(2) IHTA provides:

[1] Where the property mentioned in subsection (1) has been disposed of, in whole or in part, for full consideration in money or money's worth, the liability may be taken into account

[2] up to an amount equal to so much of that consideration as—

- (a) is not excluded property, and
- (b) has not been used—
  - (i) to finance (directly or indirectly) the acquisition of excluded property or the maintenance, or an enhancement, of the value of such property, or
  - (ii) to discharge (directly or indirectly) any other liability that, by virtue of this section, would not be taken into account.

I refer to this as “**disposal relief**”.

“Dispose” is not defined so will bear its normal meaning, not the extended CGT meaning.

The liquidation of a company does not give rise to a disposal for consideration, in the strict sense;<sup>63</sup> but it appears that HMRC do not take this point. The IHT Manual provides:

**IHTM28015 disposal of acquired assets where money has been borrowed to acquire excluded property [Sep 2018]**

... Example 2 (Axel)

A, who is not domiciled in the UK, owns shares in an overseas company, which owns a UK property.

A acquired the company by borrowing £1m.

The company is liquidated and the UK property is transferred to A.

IHTA84/S162A(2) refers to the disposal of excluded property for consideration in money or money's worth. You may accept that liquidating the company and transferring the property to A meets that

---

63 See App 4.2.5 (Transfer on liquidation).

requirement so the liability may<sup>64</sup> be allowed as a deduction against the UK property, although the allowable liability cannot exceed the value of the UK property that was transferred to the A.

Suppose:

- (1) T borrows to acquire excluded property (“asset 1”).
- (2) Asset 1 is sold and other excluded property is purchased (“asset 2”).
- (3) Asset 2 is sold and chargeable property is purchased.

Disposal relief can apply, as the debt is attributable to financing the acquisition of asset 2. HMRC agree. The IHT Manual provides:

**IHTM28015 disposal of acquired assets where money has been borrowed to acquire excluded property [Sep 2018]**

Example 3 (Basha)

B, who is not domiciled in the UK, borrows £1m which she uses to invest in an overseas company (Company A).

Company A in turn owns another overseas company (Company B) which owns a UK property.

Company A is liquidated so B receives the shares in Company B. Company B is then liquidated and B becomes the owner of the UK property.

Here the liability is attributable to indirectly financing the acquisition of the shares in Company B that owned the UK property. So excluded property was disposed of for full consideration in money’s worth and as the consideration (the UK property) is not excluded, the liability may be allowed as a deduction against it.

### **76.23 Debt-financed asset becomes non-excluded property**

An item of property may be excluded property at one time and subsequently become chargeable property, for instance, because:

- (1) The owner of property may become UK domiciled.
- (2) Foreign situate property (such as a chattel) may be brought to the UK.
- (3) The law may change (as with the introduction of the 2017 IHT residence-property rules).

---

<sup>64</sup> The example states *may* rather than *will* to allow for the possibility of other disallowable deduction rules, and that the deduction (if allowable) is not set specifically against the UK property (unless it is charged on the property, which the author of the example has perhaps assumed to be the case).

Section 162A(3) IHTA provides:

The liability may be taken into account up to an amount equal to the value of such of the property mentioned in subsection (1) as—

- (a) has not been disposed of, and
- (b) is no longer excluded property.

If T borrows to acquire excluded property but the property becomes chargeable, the debt becomes allowable under 162A(3) up to the value of the property.

The IHT Manual gives this example:

**IHTM28016 property is no longer excluded where money has been borrowed to acquire excluded property [Aug 2016]**

... Example (Chandra)

C, who is not domiciled in the UK borrows £750,000 and buys a property abroad for £1m.

The interest due on the loan is allowed to accumulate instead of being repaid.

C subsequently becomes deemed domiciled in the UK (IHTM13024) so the property is now subject to tax.

More analytically, it is no longer excluded property.

On C's death, the property is worth £1.2m and the sum owed under the liability is £1.3m.

As the property is now subject to tax, the liability may be allowed; but only up to the value of £1.2m. The remaining £100,000 may not be deducted.

Had C bought property in the UK, the remaining £100k would be allowable. This seems a clear restriction on free movement of capital; so as long as EU law continues to apply, the law is not EU-law compliant.

It is open to question whether the interest part of the debt is disallowed.

## 76.24 Debt exceeds excluded property

### 76.24.1 “Remaining liability”

Statute uses the term “remaining liability” which is defined in s.162A(8) IHTA:

“remaining liability” means the liability mentioned in subsection (1) so far as subsections (2) and (3) do not permit it to be taken into account;

The label is not entirely apt: “disallowed liability” might have been clearer.

### 76.24.2 *Debt exceeds original excluded property*

Section 162A(4) IHTA provides:

To the extent that any remaining liability is greater than the value of such of the property mentioned in subsection (1) as—

- (a) has not been disposed of, and
- (b) is still excluded property,

it may be taken into account, but only so far as the remaining liability is not greater than that value for any of the reasons mentioned in subsection (7).

The IHT Manual gives a straightforward example:

#### **IHTM28017 Excess liability over value of excluded property where money has been borrowed to acquire excluded property [Sep 2018]**

##### **Example 1** (Dominique)

D, who is not domiciled in the UK, borrows £800,000 which is charged on UK assets worth £1.5m.

She uses the £800,000 to acquire a villa in Spain, which is excluded property.

The open market value of the Spanish villa falls to £500,000 by the date of her death.

The £800,000 liability has been incurred to directly acquire excluded property, so would normally be disallowed by IHTA84/S162A(1). However, the reason for the liability being greater than the value of the excluded asset is not due to:

- it being part of an arrangement to secure a tax advantage, or
- an increase in the value of the liability, or
- a disposal of the whole or part of the excluded asset.

So £300,000 of the liability (£800,000 liability less the £500,000 value of the excluded asset) is allowed and reduces the chargeable value of the UK assets to £1.2m.

##### **Example 2**

If, in the example above:

- the money had been borrowed from abroad,
- it had not been charged on UK property, and
- the deceased had also owned assets in France,

the £300,000 should first be set against the French assets<sup>65</sup> before any balance is then set against UK assets.

### 76.24.3 *Debt exceeds property which becomes excluded*

Section 162A IHTA provides:

- (5) Subsection (6) applies where—
- (a) a liability or any part of a liability is attributable to financing (directly or indirectly)—
    - (i) the acquisition of property that was not excluded property, or
    - (ii) the maintenance, or an enhancement, of the value of such property, and
  - (b) the property or part of the property—
    - (i) has not been disposed of, and
    - (ii) has become excluded property.
- (6) The liability or (as the case may be) the part may only be taken into account to the extent that it exceeds the value of the property, or the part of the property, that has become excluded property, but only so far as it does not exceed that value for any of the reasons mentioned in subsection (7).

The IHT Manual provides a straightforward example:

**IHTM28018 excess liability over property that has become excluded where money has been borrowed to acquire excluded property** [Sep 2018]

... Example (Roberto)

R who is not domiciled in the UK borrows £500,000 which he uses to buy two paintings which he keeps in his London house.

He subsequently takes one of the paintings, worth £300,000, to keep in his house in Florida. This painting is now excluded property.

The HMRC analysis is as follows:

The £300,000 painting has not been disposed of but has become excluded property. The liability of £500,000 is therefore allowed to the extent that it exceeds the value of that painting. In other words, £200,000 of the liability is an allowable deduction (£500,000 less

---

<sup>65</sup> More accurately, the deduction is against D's *foreign* assets; but the author has perhaps assumed that D's French assets are her only foreign assets.

£300,000).

It was not necessary to have a separate relief for this case. Relief should have been available under s.162A(4).<sup>66</sup> But it does no harm.

#### 76.24.4 *Disallowable reason: Avoidance*

Section 162A(7) IHTA sets out three disallowable reasons. They override the reliefs in:

Section	Topic	See para
s.162A(4)	Liability exceeds value of original excluded property	76.24.2
s.162A(5)(6)	Liability exceeds value of property which becomes excluded	76.24.3

The first disallowable reason is set out in s.162A(7)(a) IHTA:

The reasons are—

- (a) arrangements<sup>67</sup> the main purpose, or one of the main purposes, of which is to secure a tax advantage ...

Section 162A(8) provides the standard IHT definition of “tax advantage”.<sup>68</sup> “Tax” is not defined here, so it means IHT: see s.272 IHTA.

#### 76.24.5 *Disallowable reason 2: Increase in debt*

The second disallowable reason is set out in s.162A(7)(b):

The reasons are...

- (b) an increase in the amount of the liability (whether due to the accrual of interest or otherwise)...

An increase in the debt due to interest or index-linking is disallowed. So inflation will whittle away the value of the allowable debt over time.

The IHT Manual provides a straightforward example:

**IHTM28018 meaning of ‘indirectly’ where money has been borrowed to acquire excluded property** [Sep 2018]

...

*Example 2* (Emilio)

E, who is domiciled outside the UK, borrows £800,000 and invests it in

66 See 76.24.2 (Liability exceeds value of original excluded property).

67 Section 162A(8) IHTA Section 404A(8) ITTOIA provides the standard (unnecessary) IHT definition : see App 2.2.3 (Definitions of “arrangement”).

68 See App 2.12.1 (Tax advantage: Definitions).

diamonds, which he keeps in the UK.

He moves the diamonds abroad just before he dies.

On his death, the diamonds are still worth the same amount but interest has accumulated on the loan so that Emilio now owes £850,000.

The HMRC analysis is as follows:

As the assets acquired with the loan have not been disposed of but have become excluded property, only the excess value of the loan over the asset can be allowed as a deduction against any chargeable estate. However, as the liability has increased due to accrued interest, none of the liability may be allowed as a deduction.

Clearly E should have been advised to keep the diamonds in the UK. What if he took them outside and returned them before his death?

In the case of a foreign currency debt the debt is valued at the time it is taken out and an increase in the value of the debt due to currency fluctuation is disallowed.

#### 76.24.6 *Disallowable reason 3: Disposal*

The third disallowable reason is set out in s.162A(7)(c):

The reasons are...

- (c) a disposal, in whole or in part, of the property.

I do not understand the purpose of (c): how can a liability be attributable to a disposal? Is this a reference to disallow borrowing to cover the incidental costs of disposal?

### 76.25 Debt attributable to foreign account

A foreign currency bank account of a foreign domiciled non-resident qualifies for IHT relief, but it is not classified as excluded property.<sup>69</sup> It follows that a debt attributable to such an account is not disallowed under the excluded property disallowance. This was overlooked in 2013, but a provision was introduced to deal with the matter in 2014. Section 162AA IHTA provides a set of rules based on the excluded property disallowance:

(1) This section applies if—

- (a) in determining the value of a person's estate immediately before

---

<sup>69</sup> See 72.13 (Foreign currency account).

death, a balance on any qualifying foreign currency account (“the relevant balance”) is to be left out of account under section 157 (non-residents’ bank accounts), and

- (b) the person has a liability which is attributable, in whole or in part, to financing (directly or indirectly) the relevant balance.
- (2) To the extent that the liability is attributable as mentioned in subsection (1)(b), it may only be taken into account in determining the value of the person’s estate immediately before death so far as permitted by subsection (3).
- (3) If the amount of the liability that is attributable as mentioned in subsection (1)(b) exceeds the value of the relevant balance, the excess may be taken into account, but only so far as the excess does not arise for either of the reasons mentioned in subsection (4).
- (4) The reasons are—
- (a) arrangements<sup>70</sup> the main purpose, or one of the main purposes, of which is to secure a tax advantage,<sup>71</sup> or
  - (b) an increase in the amount of the liability (whether due to the accrual of interest or otherwise).

The better course would have been to classify foreign currency bank accounts as excluded property; or else to repeal FCBA relief altogether.<sup>72</sup> Does it matter? It is just one more page of legislation, one more straw on the camel’s back.

## **76.26 Excluded property disallowance: planning**

Planning is needed at the time of the acquisition of UK property. Suppose T owns £1m foreign property and wishes to purchase a UK home worth £1m:

- (1) If T borrows to purchase the UK home, the debt is deductible.
- (2) If T sells the foreign property to purchase the home, and subsequently borrows £1m to purchase foreign property, T is (more or less) in the same economic position. But in this case the debt is disallowed.

## **76.27 Business/agricultural property debt**

---

70 Subsection (5) provides the standard (unnecessary) IHT definition: see App 2.2.3 (Definitions of “arrangement”).

71 Subsection (5) provides the standard IHT definition of “tax advantage”; see App 2.12.1 (IHT definition of “tax advantage”).

72 See 72.13.4 (Foreign account: Critique).

Section 162B IHTA effectively disallows three classes of debt, attributable to:

- (1) business property
- (2) agricultural property
- (3) woodland

I do not consider the provisions relating to woodland. The IHT Manual uses the terms “relievable property” or “relievable assets”; but I think it is clearer to refer to business /agricultural property. This takes us some way from the themes of this book, but s.162A-s.162C form part of a single code, and HMRC guidance on s.162B is relevant to 162A.

### **76.28 Business property debt**

Section 162B(1) IHTA provides:

- (1) Subsection (2) applies if—
  - (a) the whole or part of any value transferred by a transfer of value<sup>73</sup> is to be treated as reduced, under section 104, by virtue of it being attributable to the value of relevant business property, and
  - (b) the transferor has a liability which is attributable, in whole or in part, to financing (directly or indirectly)—
    - (i) the acquisition of that property, or
    - (ii) the maintenance, or an enhancement, of its value.

The words in (b) are the same as the excluded property disallowance.<sup>74</sup>

Section 162B(2) IHTA provides:

- [a] The liability is, so far as possible, to be taken to reduce the value attributable to the value of the relevant business property, before it is treated as reduced under section 104 [BPR],
- [b] but only to the extent that the liability—
  - (a) is attributable as mentioned in subsection (1)(b), and
  - (b) does not reduce the value of the relevant business property by virtue of section 110(b).

This is not strictly a disallowance of the debt; but in the (usual) case of

---

<sup>73</sup> Section 162B(9) IHTA provides a standard definition of "transfer of value" (repeating s.103(1) IHTA).

<sup>74</sup> See 76.18 (“Financing” an acquisition).

property qualifying for 100% relief, it comes to the same thing. I refer to this as “**the BPR disallowance**”. The wording is different from the excluded property disallowance as business property may not qualify for 100% relief.

The disallowance can apply to individuals and to trustees, on death and on other occasions of charge.

The IHT Manual gives a straightforward examples of a debt used to purchase shares qualifying for BPR:

**IHTM28020 borrowed money used to acquire assets that qualify for business relief** [Feb 2020]

...

*Example 2 (Habibah)*

H borrows £450,000, which is charged on her house, and uses the funds to acquire AIM shares. At the date of H’s death the AIM shares are worth £575,000 and qualify for business relief. The rest of her estate is worth £1.5m.

At the date of death the liability is taken to reduce the value of the AIM shares that can qualify for business relief under IHTA84/S162B(2) from £575,000 to £125,000. Business relief applies to that value.

The total estate, including the AIM shares is £2,075,000 (£1.5m plus £575,000).

This is reduced by business relief of £125,000 and, subject to it meeting the provisions of IHTA84/S175A, the liability of £450,000.

The value of the chargeable estate is £1.5m.

As the liability has been taken into account to reduce the value of the AIM shares under IHTA84/S162B, the liability cannot be deducted against the value of the house under IHTA84/S162(4).

76.28.1 *Spouse exemption: Interaction*

The Manual then considers a more complex case:

*Example 3 (Ian)*

I borrows £600,000, which is charged on his house and uses the money to buy shares in his son’s company.

At I’s date of death,

- the shares are worth £800,000,
- the house £1m and
- his personal estate is worth £500,000.

Under his Will, I leaves his house to his spouse with the residue to his son.

Assuming the liability meets the conditions of IHTA84/S175A, it is taken to reduce the value of the company shares before business relief is applied. As the liability has been taken into account under IHTA84/S162B, it cannot be taken against the value of the house under IHTA84/S162(4).

The value of shares is reduced to nil through a combination of deducting the liability (£600,000) and business relief (£200,000).

The liability has been taken into account against the shares, so the house passes to the spouse, free of the liability and qualifies for spouse or civil partner exemption.

This leaves a chargeable estate of £500,000 that passes to the son.

The house does *not* pass to the spouse free of the debt as a matter of succession law.<sup>75</sup> The author means that the spouse exemption applies as if the house were free of the debt. The value transferred on the death for IHT purposes is £1.5m, of which £1m is exempt under the IHT spouse exemption.

The IHT Manual does not address the more interesting question of whether the debt is disallowed on the death of I's spouse.

## 76.29 Agricultural property debt

Section 162B IHTA provides:

- (3) Subsection (4) applies if—
- (a) the whole or part of any value transferred by a transfer of value is to be treated as reduced, under section 116, by virtue of it being attributable to the agricultural value of agricultural property, and
  - (b) the transferor has a liability which is attributable, in whole or in part, to financing (directly or indirectly)—
    - (i) the acquisition of that property, or
    - (ii) the maintenance, or an enhancement, of its agricultural value.
- (4) To the extent that the liability is attributable as mentioned in subsection (3)(b), it is, so far as possible, to be taken to reduce the value attributable to the agricultural value of the agricultural property, before it is treated as reduced under section 116.

I refer to this as the “**APR disallowance**”. The wording echoes the BPR

---

<sup>75</sup> Unless I's will so provides; see s.35 AEA 1925.

disallowance.

The IHT Manual gives some examples. The first example is a straightforward loan to improve agricultural property:

**IHTM28021 borrowed money used to acquire assets that qualify for agricultural relief** [Sep 2018]

... *Example 1* (Ken)

K borrows £200,000 which he uses to repair buildings on his farm which qualify for agricultural relief. The value of K's estate on death is £2m, of which £1,200,000 is agricultural property qualifying for relief at the date of death.

The £200,000 liability reduces the agricultural value of the agricultural property to £1,000,000 under IHTA84/S162B(4).

This £1,000,000 of agricultural value qualifies for agricultural relief.

The value of the estate is reduced by agricultural relief of £1,000,000 and, subject to it meeting the provisions of IHTA84/S175A, the liability of £200,000, leaving a chargeable estate on death of £800,000.

76.29.1 *Debt partly attributable to agricultural property*

The next example involves a loan to acquire agricultural and non-agricultural property. It is also relevant to a loan to acquire excluded and non-excluded property:

**IHTM28021 borrowed money used to acquire assets that qualify for agricultural relief** [Sep 2018]

*Example 2* (Jan)

J borrows £1m and invests it in a house and some adjoining farmland.<sup>76</sup> The house is worth £700,000 and the land £300,000.

The farmland is let out to a neighbouring farmer.<sup>77</sup>

At J's date of death, the value of the combined property has increased in value to £2m of which £1.2m is attributable to the house and £800,000 to the land.

In tabular form:

	House	Land	Total
<b>Purchase date</b>	£700k (70%)	£300k (30%)	£1m (100%)
<b>Death date</b>	£1.2m (60%)	£800k (40%)	£2m (100%)

The HMRC analysis is as follows:

76 It is assumed (1) the house does not qualify for APR and (2) the land qualifies for 100% APR.

77 The point of stating this is that the land qualifies for APR but not BPR.

The liability is to be taken against the agricultural property to the extent to which it can be attributed to paying for that property, IHTA84/S162B(4).

When J acquired the property, £300,000 was attributable to the farmland and this is the amount of the liability to be taken against the agricultural value on death. So, subject to the liability meeting the provisions of IHTA84/S175A, the chargeable value of the house will be £500,000 (£1.2m less the £700,000 portion of the liability used to buy the house). The value of the land (£800,000) will be reduced to nil by a combination of the liability (£300,000) and agricultural relief (£500,000). ...

Apportionment is by reference to values at the date of acquisition. The text goes on to consider the alternative of apportionment by reference to values at the date of death:

An alternative approach would be to apportion the liability by reference to the values at the date of death. The effect, in this example, would be that only £600,000 of the liability would have been attributable to the house ( $£1,200,000 \div £2,000,000 \times £1,000,000$ ) giving a chargeable value for the house of £600,000 and increasing the liability to tax.

If the combined value had been split differently between the house and the farmland, or if their values had increased in different proportions, apportioning the liability by reference to, say, date of death values may give a different result. But a consistent approach is necessary, and the liability should be apportioned using the values at the date of acquisition, even if an alternative approach would give rise to more tax.

As well as being consistent, using the values at the date of acquisition avoids difficulties that might arise if either

- [1] part of the property is sold but the liability retained (how should the remaining liability then be apportioned?), or
- [2] if there were a sale and part of the liability was repaid, which would trigger the provisions of IHTA84/S162C, (IHTM28026).<sup>78</sup>

Fixing the liability attributable to the different parts of the assets at the time they were acquired provides a certain basis going forward.

It would be better to take out two separate loans, one for the agricultural property and one for other property.

### 76.29.2 BPR/APR disallowance: Commencement

Para 5 sch 36 FA 2013 provides:

(2) Section 162B of IHTA 1984 (inserted by paragraph 3) only has effect in relation to liabilities incurred on or after 6 April 2013.

---

<sup>78</sup> See 76.33 (Part payment of mixed debt).

- (3) For the purposes of sub-paragraph (2), where a liability is incurred under an agreement—
- (a) if the agreement was varied so that the liability could be incurred under it, the liability is to be treated as having been incurred on the date of the variation, and
  - (b) in any other case, the liability is to be treated as having been incurred on the date the agreement was made.

This is different from the commencement of the other 2013 debt disallowances.

Care must be taken over refinancing pre-2013 loans relating to agricultural/business property, as that will have the effect of disallowing the debt.

Suppose:

- (1) A pre-2013 debt is attributable to the acquisition of BPR/APR property which is not UK situate.
- (2) The property is excluded property as it is owned by a foreign domiciliary or an excluded property trust.

The debt is not disallowed under the BPR/APR disallowance. However it is disallowed under the excluded property disallowance!

One solution if possible is to make the property UK situate.

This seems a clear restriction on free movement of capital, so as long as EU law continues to apply, the disallowance is not EU law compliant.

### 76.29.3 *Effect on wills*

The rules may have an effect on pre-2013 wills using formulae relating to valuation, or relating to agricultural or business property relief.

## **76.30 Debt of unincorporated business**

Section 110 IHTA provides:

For the purposes of this Chapter—

- (a) the value of a business or of an interest in a business shall be taken to be its net value;
- (b) the net value of a business is the value of the assets used in the business (including goodwill) reduced by the aggregate amount of any liabilities incurred for the purposes of the business;
- (c) in ascertaining the net value of an interest in a business, no regard shall be had to assets or liabilities other than those by

reference to which the net value of the entire business would fall to be ascertained.

In the following discussion, “**business debt**” means a debt incurred for the purposes of an unincorporated business.

The IHT Manual gives an example involving an unsecured business debt:

**IHTM28020 borrowed money used to acquire assets that qualify for business relief** [Feb 2020]

...

*Example 1* (Gareth)

G, who runs his own sole trader business, borrows £250,000 to buy property that is to be used in his business. The loan is unsecured and is shown in the accounts as a liability of the business. IHTA84/S162B(1)(b) applies as the liability has been incurred to acquire relevant business assets. Under IHTA84/S162B(2) the liability should be taken to reduce the value of the relevant business assets before that value is reduced by business relief. However in this case the liability has already been reflected in the net value of the business under IHTA84/S110(b), so IHTA84/S162B(2)(b) prevents the liability being deducted twice.

Charging a business debt on non-business assets did not reduce the IHT liability even before 2013. Now the position is reinforced by s.162B.

The IHT Manual provides:

**IHTM25250 Partnership interests** [Feb 2017]

... One example of the operation of [s.110(c)] concerns a partner’s Income Tax liability on their share of the partnership profits. As the partner’s tax is not a liability incurred for the purposes of the business, it should not be taken into account in determining the net value of the partnership for the purposes of business relief.

## 76.31 Property qualifying for BPR/APR

The IHT Manual provides:

**IHTM28022 borrowed money used to acquire assets that qualify for both agricultural and business relief** [Sep 2018]

Where an asset qualifies for both agricultural and business relief, IHTA84/S114 (IHTM24151) directs that agricultural relief applies to the agricultural value first, with business relief applying to any excess value over the agricultural value of the asset. So, where the liability exceeds

the agricultural value of the asset, there will be no agricultural relief to be deducted against the estate. The balance of the liability should then be set against the non-agricultural value of the asset to arrive at the value of the asset which may qualify for business relief.

If the liability is more than the open market value of the asset, any excess can be set against any other chargeable assets. If the other chargeable assets qualify for business relief, the balance of the liability must be set against those assets that qualify for business relief before being set against any other assets that are chargeable to tax, subject to the liability meeting the provisions of IHTA84/S175A (IHTM28027).

*Example (Leon)*

L borrows £800,000 which he uses to buy a farm which he then farms himself. On L's death the estate is worth £2m, of which the farm is worth £1m with an agricultural value of £750,000.

The liability of £800,000 was incurred to finance the acquisition of assets that are both relevant business assets and agricultural assets. IHTA84/S114 provides that where both agricultural relief and business relief can apply to the same asset agricultural relief is given in priority to business relief.

Under IHTA84/S162B(4) the agricultural value of the agricultural property is reduced from £750,000 to nil, leaving no value qualifying for agricultural relief.

The remaining £50,000 liability is deducted from the £250,000 value of the relevant business property, leaving £200,000 which can qualify for business relief.

So the value of the estate of £2m is reduced by business relief of £200,000 and, subject to it meeting the provisions of IHTA84/S175A, the liability of £800,000, leaving a chargeable value on death of £1m.

Why does it matter which relief applies?

## 76.32 Gift of debt-financed business/agricultural property

The IHT Manual provides:

**IHTM28024 transfer of relievable assets where borrowed money is used to acquire assets that qualify for relief [Sep 2018]**

Where assets that qualify for relief have been acquired using borrowed funds and the liability has been secured against other chargeable assets, it would still be possible to obtain full relief and the deduction of the liability by:

- giving away the relievable assets before death, but
- retaining the liability within the estate.

IHTA84/S162B requires that the liability is set against the transfer of relievable assets at the time of the lifetime transfer, and any excess value over the value of the liability would qualify for relief. But at death, the estate would no longer include any relievable assets, so the provisions of IHTA84/S162B would not apply and the liability could still be deducted against estate on death under IHTA84/S162(4).

Section 162B(7) IHTA deals with this problem:

Subject to subsection (8), to the extent that a liability is, in accordance with this section, taken to reduce value in determining the value transferred by a chargeable transfer, that liability is not then to be taken into account in determining the value transferred by any subsequent transfer of value by the same transferor.

The IHT Manual provides:

To prevent this, IHTA/S162B(7) stipulates that where a liability has already been taken into account to reduce the value transferred by a chargeable transfer, the liability cannot then be taken into account to reduce a subsequent transfer of value made by the same transferor.

The wording used is important. The liability must reduce the value transferred by a chargeable transfer (a transfer that is immediately chargeable or a failed PET). If the lifetime transfer was a PET and the transferor survives 7 years, the transfer is an exempt transfer; so the liability may still be deducted from the estate on death as it will not have taken into account by an earlier chargeable transfer.

...

*Example (John)*

J, who has an estate of £3m, borrows £1m and uses this to purchase farmland which he then farms for 3 years.

He then gives the farmland, now worth £1.2m to his daughter who farms the land herself, but he retains the liability.

The individual has made a transfer of value when he gives the farmland to his daughter. The value transferred is the loss to J's estate of £1.2m. IHTA84/S162B(4) has the effect of reducing the £1.2m agricultural value by the amount of the liability to £200,000. This £200,000 value then qualifies for agricultural relief, reducing the value transferred to nil. When J dies 2 years later, the £1m liability cannot be taken into account again due to IHTA84/S162B(7). Instead of the chargeable transfer on death being £2m (£3m less the £1m liability), it is £3m with no deduction for the liability.

Care is needed if a parent wishes to give different property to different children.

### 76.32.1 *Relevant property trusts*

Section 162B(8) IHTA deals with this problem:

Subsection (7) does not prevent a liability from being taken into account by reason only that the liability has previously been taken into account in determining the amount on which tax is chargeable under section 64.

The IHT Manual provides:

**IHTM28024 transfer of relievable assets where borrowed money is used to acquire assets that qualify for relief [Sep 2018]**

...

But this limitation does not apply to ten-year charges in view of IHTA84/S162B(8). So, whilst the assets acquired with the liability remain in the trust, the liability can be taken into account at each ten year charge. But once the assets cease to be relevant property, so that the liability is taken in account at the time of the exit charge, then if the liability remains in the trust, IHTA84/S162B(7) will prevent it from being taken into account against any further charges.

### 76.33 **Part payment of mixed debt**

A single debt may be used to finance the acquisition of:

- (1) excluded property
- (2) UK business/agricultural property
- (3) chargeable property

I refer to this as a “**mixed debt**”.

What if the debt is repaid in part? Is the part repaid:

- (1) the allowable part (attributable to the chargeable property) or
- (2) the disallowable part (attributable to APR/BPR/excluded property)?

Section 162C IHTA provides the answer in the manner most favourable to HMRC:

- (1) This section applies for the purposes of determining the extent to which a liability is attributable as mentioned in
  - [a] section 162A(1) or (5) [excluded property disallowance]
  - [b] 162AA(1) [foreign currency bank account disallowance] or
  - [c] 162B(1)(b), (3)(b) or (5)(c) [BPR/APR disallowances]

(1A) In a case in which the value of a person's estate immediately before death is to be determined, where a liability was discharged in part before that time—

- (a) any part of the liability that, at the time of discharge, was not attributable as mentioned in subsection (1) is, so far as possible, to be taken to have been discharged first,
- (b) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162B(1)(b), (3)(b) or (5)(c) is, so far as possible, only to be taken to have been discharged after any part of the liability within paragraph (a) was discharged,
- (c) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162AA(1) is, so far as possible, only to be taken to have been discharged after any parts of the liability within paragraph (a) or (b) were discharged, and
- (d) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162A(1) or (5) is, so far as possible, only to be taken to have been discharged after any parts of the liability within paragraphs (a) to (c) were discharged.

(2) In any other case, where a liability was discharged in part before the time in relation to which the question as to whether or how to take it into account arises—

- (a) any part of the liability that, at the time of discharge, was not attributable as mentioned in section 162A(1) or (5) or 162B(1)(b), (3)(b) or (5)(c) is, so far as possible, to be taken to have been discharged first,
- (b) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162B(1)(b), (3)(b) or (6)(c) is, so far as possible, only to be taken to have been discharged after any part of the liability within paragraph (a) was discharged, and
- (c) any part of the liability that, at the time of discharge, was attributable as mentioned in section 162A(1) or (5) is, so far as possible, only to be taken to have been discharged after any parts of the liability within paragraph (a) or (b) were discharged.<sup>79</sup>

---

<sup>79</sup> I set out the section as amended by the FA 2014 with effect from royal assent.

The IHT Manual provides:

**IHTM28026 partial repayment of loan before tax charge arises [Sep 2018]**

Where borrowed money has been used to acquire:

- excluded property (IHTM28014), or
- finance the balance of a qualifying foreign currency bank account (IHTM28033), or
- assets that have become excluded property (IHTM28018) or
- relievable assets (IHTM28019)

and the loan has been partially repaid before a charge to tax arises only the balance of the loan will be affected by the provisions of IHTA84/S162A, S162AA or S162B, subject to the liability meeting the conditions of IHTA84/S175A (IHTM28027).

Where borrowed money has been used to acquire a mixture of:

- excluded property (IHTM28014), or
- assets that have become excluded property (IHTM28018) and
- finance the balance of a qualifying foreign currency bank account (IHTM28033),
- relievable assets (IHTM28019)

and the liability has been partially repaid before a charge to tax arises, IHTA84/S162C contains rules that set out the order in which the liability is treated as having been discharged. The provisions cover the situation where a single loan has been used to acquire other assets that would be subject to tax as well.

IHTA84/S162C(1A) only applies when considering the estate on death and only applies where the death is on or after 17 July 2014.

Any part of the liability that is attributable to assets that are neither excluded nor relievable, nor used to finance a foreign currency bank account is treated as having been repaid first, IHTA84/S162C(1A)(a). If the partial repayment was greater than that part of the liability, the part of the liability that is attributable to relievable assets is treated as having been repaid next, IHTA84/S162C(1A)(b).

If the partial repayment was greater than the part of the liability attributable to both of those two categories of asset, the part of the liability that is attributable to financing the foreign currency account is treated as having been repaid next, IHTA84/S162C(1A)(c).

And, if the partial repayment was greater than the part of the liability attributable to all of the above categories, the remainder of the liability must be attributable to excluded property, or assets that have become excluded property, and is treated as being repaid last,

IHTA84/S162C(1A)(d). So if the balance of the liability outstanding on death can only be attributable to excluded property then, subject to the provisions of IHTA84/S162A (IHTM28014), any deduction for the balance of the loan is disallowed.

IHTA84/S162C(2) applies in all other cases (and for events on or after 17 July 2013) in the same order as above, but ignoring the references to foreign currency bank accounts.

*Example 1*

The trustees of an excluded property trust which contains a UK house worth £2m borrow £1.5m which is charged against the property.

£800,000 is used to acquire unlisted UK shares which qualify for business relief and

£700,000 is used to acquire excluded property.

£300,000 of the liability is repaid before the ten year anniversary leaving a liability of £1.2m. At that time the unlisted UK shares are valued at £900,000 and the excluded property is valued at £1m.

Under IHTA84/S162C(2) the liability is treated as having been repaid first on the part of the liability incurred to acquire the unlisted UK shares. As £800,000 of the loan was used for this purpose, the £300,000 that was repaid is treated as having partially discharged this part of the liability - leaving £500,000 as a loan used to acquire the UK shares.

Under IHTA84/S162B(2) the value of the unlisted UK shares that can qualify for business relief is reduced by £500,000 from £900,000 to £400,000. The remaining £700,000 liability that was used to acquire excluded property is disallowed by IHTA84/S162A.

So the value of the UK assets in the trust of £2.9m (the UK house and the unlisted UK shares) is reduced by the part of the debt that was used to acquire the UK shares, £500,000, and business relief of £400,000 to £2m – or the same as the value of the UK assets before any transactions took place. Business relief is allowed against the increase in the value of the UK unlisted shares.

*Example 2*

The trustees of an excluded property trust which contains a UK house worth £2m borrow £1.5m which is charged against the property. This time the trustees use the £1.5m to acquire

- £900,000 of excluded property,
- £350,000 of assets qualifying for agricultural relief and
- £250,000 of UK listed shares.

£700,000 of the liability is repaid before the ten year anniversary leaving a liability of £800,000. At that time the excluded property is worth £1m, the agricultural assets are worth £400,000 and the UK shares, £300,000.

In tabular form:

	<b>Excluded Prop</b>	<b>Ag. Land</b>	<b>Shares</b>	<b>Total</b>
<b>Purchase date</b>	£900k (60%)	£350k (23%)	£250k (17%)	£1.5m (100%)
<b>TYA date</b>	£1m (59%)	£400k (24%)	£300k (18%)	£1.7m (100%)

The HMRC analysis is as follows:

Under IHTA84/S162C(2) the liability is treated as having been repaid first on the part used to acquire the UK shares. As £250,000 of the liability was used for this purpose, the first £250,000 of the amount discharged reduces the liability which can be deducted from the UK shares to nil.

Of the remaining £450,000 that was repaid, £350,000 was used to acquire agricultural assets which are worth £400,000 at the date of the ten year anniversary. So, the next £350,000 of the amount repaid reduces the liability which can be taken against the agricultural assets under IHTA84/S162C(2)(b) to nil. As none of the remaining liability can be attributed to acquiring the agricultural assets, the full value of the agricultural assets may qualify for agricultural relief with no restriction under IHTA84/S162B.

The last £100,000 of the liability which has been discharged (£700,000 - (£250,000 + £350,000) = £100,000) is treated as reducing the liability incurred to acquire the excluded property under IHTA84/S162C(2)(c). This reduces that part of liability from £900,000 to £800,000. So the balance of the liability that was not repaid, £800,000 is attributed to the acquisition of excluded property and is disallowed by virtue of IHTA84/S162A.

The value of the UK assets in trust of £2.7m (the UK house, agricultural assets and quoted shares) is reduced by the agricultural relief to £2.3m and none of the liability is allowable.

In effect, the original £2m in the trust, plus the UK shares are now liable to tax. Although this may seem a harsh result given that the shares were acquired through borrowing, without a priority rule, it would be possible to manipulate assets and values to obtain an advantage.

### **76.34 Payment of disallowed debt**

The payment of a disallowed debt is in principle a transfer of value, because it reduces the value of the estate. However, relief will in principle be available under s.10 IHTA (Dispositions not intended to confer

gratuitous benefit). There is no equivalent of a s.103(5) deemed PET.<sup>80</sup> A simple course if possible is to repay the borrowing at any time before the death. Repayment reduces the value of the estate, but will in principle for relief under s.10. So “deathbed” planning may be possible.

If s.10 does not apply, however, repayment would be a chargeable transfer. It would not fall within the definition of a PET.

### 76.35 Debt unpaid after death

Section 175A IHTA provides:

(1) In determining the value of a person’s estate immediately before death, a liability may be taken into account to the extent that—

- (a) it is discharged on or after death,
  - [i] out of the estate or from excluded property owned by the person immediately before death,
  - [ii] in money or money’s worth, and
- (b) it is not otherwise prevented, under any provision of this Act, from being taken into account.

(2) Where the whole or any part of a liability is not discharged in accordance with paragraph (a) of subsection (1), the liability or (as the case may be) the part may only be taken into account for the purpose mentioned in that subsection to the extent that [the commercial reason defence applies].

Subsection (1) is worded as an *allowance* for debts which are paid: in order to identify the disallowance of undischarged debts, one needs to read subsections (1) and (2) together. The wording is convoluted, but it works.

I refer to this rule as the “**s.175A disallowance**”. That is not a transparent label, but I cannot think of a better one.

This disallowance only applies on death. It does not apply to lifetime transfers (failed PETs or chargeable transfers) or to 10 year and exit charges on trusts.

A deduction is not allowed if the creditor waives (releases) the debt as that is not a discharge out of the estate. But a deduction is allowed if:

- (1) The debt is paid, and
- (2) The creditor makes a gift back to the debtor.

This is commercially equivalent to a waiver by the creditor. That

---

<sup>80</sup> See 76.11.11 (Payment of debt: deemed PET).

arrangement is not avoidance: it makes the practical difference that interest accruing on the debt becomes taxable.

### 76.35.1 *To extent discharged*

If a debt for (say) 100 is discharged as to 50%, by a payment of 50, then 50% of the debt is allowable.

If the debt is wholly discharged by the transfer of money's worth valued 50, then it would be sensible if only 50% of the debt is allowable; though it requires a purposive reading to reach that result.

### 76.35.2 *s.175A disallowance: Commencement*

Para 5 sch 36 FA 2013 provides:

(1) Subject to sub-paragraph (2),<sup>81</sup> the amendments made by this Schedule have effect in relation to transfers of value made, or treated as made, on or after the day on which this Act is passed.

So the s.175A disallowance applies to pre-2013 debts, if the transfer of value (ie the death) is after 17 July 2013. This is an unfair commencement rule as in many cases, including those without any element of tax avoidance, existing debts will have been incurred in reliance of the pre-2013 rules.<sup>82</sup> But there it is.

## 76.36 Discharge “out of the estate”

### 76.36.1 *Payment from “estate”*

Section 175A(1) IHTA provides:

In determining the value of a person's estate immediately before death, a liability may be taken into account to the extent that—

- (a) it is discharged on or after death,<sup>83</sup>
  - [i] out of the estate or
  - [ii] from excluded property owned by the person immediately before death ...

---

81 This relates to the business/agricultural property disallowance: see 76.29.2 (BPR/APR disallowance: Commencement).

82 Note the change in attitude to commencement provisions with retrospective effect, see 76.17.1 (Commencement: Pre-2013 debt).

83 The words “on or after the death” are otiose.

“The estate” in (1)(a)[i] refers back to the “person’s estate immediately before death” in the opening words in (1): the deceased’s estate.

A debt is paid out of the estate if it is paid out of:

- (1) property which was in the estate immediately before death, or
- (2) property representing that property: IHT adopts the concept of a continuing fund.

“Estate” has its usual IHT meaning.<sup>84</sup> It includes in particular:

- (1) Settled property in which the deceased had an estate interest in possession
- (2) GWR property

Such property is treated as part of the deceased’s estate immediately before death, and following the individual’s death the property is no longer be treated as part of his or her estate. It is considered that does not matter: following the death the deceased has no estate at all. So the discharge of a debt on GWR property out of that property (or property representing such property) will satisfy the requirement.

### 76.36.2 *Payment from excluded property*

Section 175A(1)(a) needs to refer to excluded property, because that is not part of the estate immediately before death.<sup>85</sup>

The IHT Manual provides:

**IHTM28028 meaning of ‘out of estate’ [Aug 2016]**

In determining whether the loan has been discharged out of the estate, the word ‘estate’ has its normal meaning for Inheritance Tax (IHTM28027); but IHTA84/S175A(1)(a), extends this meaning for the purpose of this provision only to include any excluded property owned by the deceased.<sup>86</sup> It is important here that the excluded property was ‘owned’ by the deceased, taking the natural meaning of the word ‘owned’. Excluded property that is also settled property in which the deceased had an interest is not property ‘owned’ by the deceased.

Although the meaning of estate is extended in this way, the normal rule

---

<sup>84</sup> See 70.2 (“Estate”).

<sup>85</sup> See 70.2 (“Estate”).

<sup>86</sup> This is not strictly correct. Section 175A does not extend the meaning of “estate”: it provides that debts may be allowed if paid out of the estate or out of excluded property. But it comes to the same thing.

that a liability can only be deducted against assets at the same title applies (IHTM28397). Other than in exceptional circumstances, in reality, assets in the Free Estate are not available to trustees to settle trusts debts.

What if there is a GWR of settled property which is excluded property? The deceased is treated as beneficially entitled to such property, and so should be treated as owning it for s.175A purposes.

### 76.36.3 *Payment out of loan to PRs*

Suppose:

- (1) An estate has a debt (“the pre-death debt”).
- (2) The PRs borrow, so the estate has a second debt (“the post-death debt”).
- (3) The PRs use the borrowed funds to pay the pre-death debt.

This is a matter of refinancing. The deduction is allowed even if the post-death debt is not discharged, or is discharged, but not out of the estate. That arrangement is not avoidance: it makes the practical difference that interest accruing on the pre-death debt becomes taxable.

This is important where:

- (1) The estate had a pre-death debt.
- (2) The deceased took out a life policy to fund repayment, and settled the policy.

If the trustees of the policy repay the pre-death debt (as would have been envisaged when the trust was made) the pre-death debt is not deductible. The solution is that:

- (1) The trustees lend to the PRs.
- (2) The PRs repay the debt out of the estate.
- (3) The trustees may then waive the post-death debt.

HMRC agree. The IHT Manual provides:

**IHTM28028 meaning of ‘out of estate’ [Aug 2016]**

...

There may be circumstances where the estate has very little in the way of liquid assets from which to repay a liability so the personal representatives may need to borrow money to actually repay the debts. Where this happens, with the result that the estate is charged with repaying that new debt, you can accept that the liability owed by the

deceased has been repaid ‘out of’ the estate.

*Example* (Kevin)

K’s estate is valued at £750,000, £700,000 of which is attributable to his home.

A mortgage of £100,000 is secured against the house.

The executors borrow £100,000 to repay the mortgage and secure the new loan on the house, so that the beneficiary receives the property charged with the new debt.

The HMRC analysis is as follows:

You may accept that the liability has been discharged out of the estate. There is no need to raise any enquiries into the source of funds lent to the executors, including whether or not the beneficiary is the creditor for the new loan. Provided the mortgage has actually been repaid from funds charged against the estate, the deduction may be allowed as this has the same effect as the liability being discharged out of the estate had there been sufficient liquid assets.

It is possible that the beneficiary<sup>87</sup> may be able to make a loan to the estate from the proceeds of an insurance policy held in trust outside the estate for the purposes of repaying the mortgage. Again, the source of the funds does not matter.

Although this passage refers to an illiquid estate, where the trustees “need” to borrow, the same would apply to a liquid estate (if it mattered).

### 76.37 Commercial reason defence

Section 175A(2) IHTA provides a TAAR, in slightly non-standard form:

Where the whole or any part of a liability is not discharged in accordance with paragraph (a) of subsection (1), [ie the liability is not paid out of the estate] the liability or (as the case may be) the part may only be taken into account for the purpose mentioned in that subsection to the extent that—

- (a) there is a real commercial reason for the liability or the part not being discharged,
- (b) securing a tax advantage is not the main purpose, or one of the main purposes, of leaving the liability or part undischarged, and
- (c) the liability or the part is not otherwise prevented, under any provision of this Act, from being taken into account.

---

<sup>87</sup> “The beneficiary” is presumably a slip for the trustees of the insurance policy trust.

Paras (a)-(c) contain an exception to the s.175A disallowance. I refer to this as the “**commercial reason defence**”. The label is not entirely apt to cover all the requirements of (a) - (c) but no short label could do that.

There is no relief if the debt is discharged, but not out of the estate (even if that is done for commercial reasons).

### 76.37.1 *Commercial reason*

Section 175A(3) IHTA provides:

For the purposes of subsection (2)(a) there is a real commercial reason for a liability, or part of a liability, not being discharged where it is shown that—

- (a) the liability is to a person dealing at arm’s length, or
- (b) if the liability were to a person dealing at arm’s length, that person would not require the liability to be discharged.

I abbreviate “real commercial reason” to “commercial reason” because “real” does not add anything to the meaning.<sup>88</sup> I refer to the requirements in (a) and (b) as “**commercial reason requirements (a) and (b)**”.

Section 175A(3) is not expressed to be a comprehensive definition of commercial reason. It is suggested that there could be a commercial reason even if commercial reason requirements (a) and (b) are not met; but that would be rare, as those conditions more or less encapsulate the meaning of “commercial” in this context.<sup>89</sup>

At what time does one ask whether commercial requirement (a) is met? A person may be dealing at arm’s length at one time and not at another time. At what time does one ask whether commercial requirement (b) is met? It may be that a person (hypothetically) dealing at arm’s length would require the debt to be discharged at one time but not at another time.

Clearly, one cannot look at the position at the date of the death. It is suggested that one looks at the position at the time that the IHT is due and payable. The due date is normally when probate is applied for. If the commercial reason defence applies at that time, the debt is deductible. Since there is no provision for the possibility that IHT may subsequently

---

88 See 49.15.3 (“Genuine”).

89 See App.5.2 (Commercial).

fall due, it is suggested that it does not matter what happens later. This view increases the scope of the commercial reason requirements (a) and (b) but that does not matter as the commercial reason defence is still effectively policed by the tax motive rule.

HMRC say:

8.8 The ‘commercial reason’ test will apply at the time the decision is made not to repay the loan.<sup>90</sup>

However it may not be possible to identify that time.

### 76.37.2 *Tax motive rule*

The second requirement of the commercial reason defence is that:

(b) securing a tax advantage is not the main purpose, or one of the main purposes, of leaving the liability or part undischarged ...

I refer to this as the “**tax motive rule**”.

Section 175A(5) IHTA provides the standard IT/CGT definition of “tax avoidance”<sup>91</sup> rather than the standard IHT definition (as in the excluded property disallowance).<sup>92</sup> That makes sense because of the wider definition of “tax” applies here. Section 175A IHTA(6) provides:

In subsection (5) “tax” includes income tax and capital gains tax.

What matters is the purpose for leaving the debt undischarged, not the purpose for creating it. Leaving a debt undischarged is not usually going to avoid IHT. It could avoid IT or CGT.

Again, the legislation is silent as to the time when the main purpose(s) are ascertained. Purpose may vary over time. It is suggested that one looks at the time the IHT is due. But since avoidance need only be one of the purposes, this problem may not often arise.

If one meets all the requirements of the commercial reason defence, then it does not matter if the debt is later waived.

90 HMRC, “Treatment of liabilities for inheritance tax: HMRC response to comments on schedule 36 FA 2013” (September 2013)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1)

91 See App 2.12.1 (Standard IT/CGT definition of “tax advantage”).

92 See 76.24.4 (Disallowable reason 1: Avoidance).

The IHT Manual provides 3 examples.

### 76.37.3 HMRC eg 1: NRB debt scheme

Example 1 is a (more or less) standard nil-rate band debt scheme.<sup>93</sup>

**IHTM28029 non-repayment of liabilities deducted against the estate on death** [Sep 2018]

...

*Example 1* (Harvey and Wendy)

H dies leaving a nil-rate band (NRB) discretionary trust under his Will with the residue of the estate passing to his wife, W.

The trustees of the NRB trust exercise their powers and pass the whole of the H's estate to W in return for her agreeing to repay an amount equal to the NRB (£325,000). Interest is charged on the debt at 3% per annum, compounded annually.<sup>94</sup>

On W's death four years later, interest has increased the liability from £325,000 to £365,790. The liability is not disallowed by any other part of the IHTA, so it can be taken into account to the extent that it is actually repaid out of the estate in money or money's worth under IHTA84/S175A(1)(a).

The HMRC analysis is as follows:

Provided the whole £365,790 is repaid out of W's estate, the full sum can be deducted from her estate. The interest received by the NRB trustees will be income of the trust and should be declared for Income Tax purposes.

If, instead, only £325,000 is discharged from W's estate, that sum can still be deducted from her estate under IHTA84/S175A(1)(a). But there is unlikely to be any commercial purpose to the interest not being repaid as, had the creditor been at arm's length, they would have wanted the interest repaid as well. As a result, the £40,790 of the liability that is not repaid from the estate is not allowed as a deduction against the estate – but equally, the trustees will have no Income Tax liability.

HMRC argue that the commercial reason defence does not apply. They

---

93 On these schemes, see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 18.3 (Residence NRB).

94 Under the NRB schemes in practice, the debt is usually index-linked, and index-linking is not interest: see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), Appendix 4 (NRB Interest).

accept if it is possible (if unlikely) that commercial requirements (a) or (b) may be met, if that is the case, the tax motive rule disallows the relief:

Even if it could be shown that the liability incurred by the wife to the NRB trustees was incurred in an arm's length transaction, the provisions of IHTA84/S175A(2)(b) must be considered.

Does the author mean to suggest that the time to assess commercial reason requirement (a) is when the debt is incurred?

The part of the liability not discharged may not be taken into account if the main purpose, or one of the main purposes, for not repaying the liability was to secure a tax advantage. If the trustees have waived the interest, it would result in the trust receiving less income than it otherwise would. This in turn would lead to a reduced Income Tax liability. A reduction of a charge to Income Tax falls within the definition of a tax advantage in IHTA84/S175A(45), so £40,790 of the liability that is not repaid from the estate is not allowed as a deduction against the estate.

I wonder about that. For basic rate taxpayer beneficiaries, the maximum tax advantage may be saving IT on the interest at 20% or less (allowing for the repayment of the trustees tax credit on a distribution to beneficiaries): is the saving of £8k likely to be a main purpose? Not if the estate is illiquid. The purpose of waiving the loan is to avoid the cost of borrowing.

#### 76.37.4 HMRC eg 2: Family trust lends

The next example concerns a loan from a family trust. The IHT Manual provides:

**IHTM28029** [Sep 2018]

*Example 2* (David)

D's estate includes a house valued at £800,000. There is a commercial mortgage of £200,000 from a family trust charged against the property. D leaves his house to his son, Roger. The trustees<sup>95</sup> are content that the house can be transferred to Roger provided that Roger takes over the mortgage and continues to make the repayments.

Although the liability has not been repaid, the arrangements are

---

95 More accurately, PRs or executors; but nothing turns on the terminology.

commercial and there is no tax advantage arising from Roger taking over the mortgage, so the liability may be allowed as a deduction against the estate.

How does D “take over” the mortgage? The passage is not drafted by a lawyer. The usual way would be a tripartite agreement between (1) the PRs, (2) the lender, (3) D, under which:

- (1) The lender discharges/releases the debt due from the PRs in consideration for which
- (2) D promises to pay a like sum to the lender.

That would not strictly qualify for the commercial reason defence as that only applies if the debt is not discharged. HMRC may not take the point. The safe way to deal with the matter is for D to borrow, lend to the PRs who then repay the lender.

#### 76.37.5 *HMRC eg 3: Family loan repayable on 2<sup>nd</sup> death*

The IHT Manual provides:

**IHTM28029** [Sep 2018]

*Example 3 (Adrian)*

A makes of loan of £25,000 to his father to help with living expenses, which is secured on his parent’s house.

A normal rate of interest is charged, but they agree to allow the interest to be added to capital sum owing.

The liability is not to be repaid until after the death of both parents, so when A’s father dies, two years later the loan is not repaid.

Of course s.103 FA 1986 may disallow the debt on the death of the father, but we must assume it does not.

The HMRC analysis is as follows:

Since the loan was not due to be repaid until the death of the survivor, an arm’s length creditor would not have any cause to seek repayment, so the liability may be allowed as a deduction against the estate.

More analytically, the commercial reason defence applies.

On the mother’s subsequent death, the liability must be repaid from the estate before it can be allowed as a deduction against the estate. If the accrued interest was not repaid, no deduction should be allowed for that sum.

It may be different if there is a break clause in the agreement.

The position may be different if the loan agreement contains a 'break' clause that allows for early repayment. If a favourable rate of interest, or no interest, was charged and the repayment could be demanded after the first death, an arm's length creditor might reasonably be expected to call in the loan to gain a better return from the money. In these circumstances, if the loan is not repaid on the first death, the terms of IHTA84/S175A(2)(a) are unlikely to be met and the liability should be disallowed unless it is repaid, although this may be of limited impact if most of the estate passes to the surviving spouse.

The disallowance for debts not paid after death is irrelevant if the spouse exemption applies. The example may be more important for cohabitees.

### **76.38 Part payment of mixed debt after death**

A single debt may be used to finance the acquisition of:

- (1) excluded property
- (2) business/agricultural property
- (3) chargeable property

If the debt is not repaid after death, it will be wholly disallowed. If the debt is wholly repaid after death, it will be (effectively) disallowed to the extent was used to finance excluded or business/agricultural property and allowable to the balance. What if the debt is repaid in part after death? Is the part repaid the allowable or the disallowable part? Section 175A(7) IHTA provides the answer in the way most favourable to HMRC:

Where the liability is discharged as mentioned in subsection (1)(a) only in part—

- (a) any part of the liability that is attributable as mentioned in section 162A(1) or (5) is, so far possible, taken to be discharged first,
- (aa) any part of the liability that is attributable as mentioned in section 162AA(1) is, so far as possible, taken to be discharged only after any part of the liability within paragraph (a) is discharged,
- (b) any part of the liability that is attributable as mentioned in section 162B(1)(b), (3)(b) or (5)(c) is, so far as possible, taken to be discharged only after any parts of the liability within paragraph (a) or (aa) are discharged, and

- (c) the liability so far as it is not attributable as mentioned in paragraph any of paragraphs (a) to (b) is, so far as possible, taken to be discharged only after any parts of the liability within any of those paragraphs are discharged.

This follows the pattern of the rules for excluded property/APR/BPR.<sup>96</sup>  
The IHT Manual provides:

**IHTM28032 partial repayment of liabilities after death** [Nov 2016]

Where a liability is partially repaid after death only the part of the loan that has been repaid will be allowed as a deduction, unless the balance that has not been repaid meets the conditions of IHTA84/S175A(2), (IHTM28029).

Where borrowed money has been used to acquire a mixture of excluded property (IHTM28014), finance a foreign currency bank account (IHTM28033) and/or relievable assets (IHTM28019) and the loan has been partially repaid, IHTA84/S175A(7) sets out the priority in which the partial repayment should be allocated against the assets of the estate. The provisions cover the situation where the single loan has been used to acquire other chargeable assets as well...

Any part of the liability that is attributable to excluded property is treated as being repaid first, IHTA84/S175A(7)(a), with the result that although this part of the liability has been repaid, the deduction is still disallowed under IHTA84/S162A (IHTM28014), unless one of the exceptions is satisfied. If the partial repayment was greater than that part of the liability, the part of the liability that is attributable to a foreign currency bank account is treated as being repaid next, IHTA84/S175A(7)(aa), so the deduction is still disallowed under IHTA84/S162AA (IHTM28033). If the partial repayment was greater than that part of the liability, the part of the liability that is attributable to relievable property is treated as being repaid next IHTA84/S175C(7)(b), so that this part of the loan is a valid deduction against the estate, but it will reduce the value of the property that can qualify for relief; ultimately reducing the relief to nil.

And if the partial repayment was greater than the part of the liability attributable to all the above categories of asset, the remainder of the liability can then be allowed as a deduction against the chargeable estate, IHTA84/S175A(7)(c).

---

<sup>96</sup> See 76.33 (Part payment of mixed debt).

The HMRC example has 3 parts:<sup>97</sup>

*Example [1] (Neville)*

N, who is non-UK domiciled, borrows £1.5m from an excluded property trust. He charges the liability against his existing UK chargeable property worth £2m.

He uses the £1.5m to acquire:

excluded property	£600,000
property qualifying for agricultural relief	£500,000
chargeable UK property	£400,000
	<u>£1,500,000</u>

When he dies the whole £1.5m remains outstanding.

The values of the assets have not changed; none of the exceptions to the general rules apply.

The Manual first considers the position if the debt is wholly repaid after death:

Under IHTA84/S162A the £600,000 used to acquire excluded property is disallowed. Under IHTA84/S162B the agricultural value of the agricultural property which can qualify for relief is reduced from £500,000 to nil.

If the liability is discharged in full from the estate after the date of death, the UK assets of £2.9m (UK property, agricultural land and other chargeable property) is reduced by

- the £500,000 liability set against the agricultural property and
- the £400,000 liability used to acquire chargeable UK assets, leaving £2m in charge.

**Example [2]: partial repayment after death**

Assume however, that only £750,000 of the liability is discharged from the estate after death.

Under IHTA84/S175A(7)(a) the first £600,000 discharged is taken to have discharged the liability incurred to acquire excluded property. This part of the liability remains disallowed by IHTA84/S162A(1)(a).

Under IHTA84/S175A(7)(b) the next £150,000 is taken to have discharged part of the £500,000 liability incurred to acquire agricultural property. As only £150,000 of this liability is treated as having been discharged, only £150,000 is an allowed as a deduction from the value of the estate on death. This reduces the value of the property that can qualify for agricultural relief to £350,000, and

---

<sup>97</sup> I have slightly altered the layout for enhanced clarity.

assuming that relief is available, the chargeable value of the property is reduced to nil.

Under IHTA84/S175A, the agricultural property that makes up part of the UK assets of £2.9m is reduced to nil by a mixture of the liability (£150,000) and agricultural relief (£350,000) leaving a chargeable estate of £2.4m

### Example [3]: partial repayment after death

Assume now that £1.3m of the liability is discharged from the estate after death. Under IHTA84/S175A(7)(a) the first £600,000 repaid is taken to have discharged the liability incurred to acquire excluded property. Under IHTA84/S175A(7)(b) the next £500,000 is taken to have discharged the liability incurred to acquire agricultural property.

As the value of the agricultural property is reduced to nil by deducting the liability, there is no agricultural relief. Under IHTA84/S175A(7)(c) the remaining £200,000 of the liability which has been discharged can be taken into account to reduce the value of the chargeable estate.

The deduction allowable under IHTA84/S175A is therefore £700,000 (£500,000 + £200,000) so the chargeable estate is reduced from £2.9m to £2.2m.

The attribution rule is unfair but it will not bring in any additional revenue to HMRC. In practice, if the issue arose, the PRs would repay the whole debt. If it is anticipated that may not happen, it would be better to take out separate loans, one for each class of property, so the PRs could decide which debt to repay.

## 76.39 Interaction of s.175A disallowance/spouse exemption

Section 175A(4) IHTA provides:

Where, by virtue of this section, a liability is not taken into account in determining the value of a person's estate immediately before death, the liability is also not to be taken into account in determining the extent to which the estate of any spouse or civil partner of the person is increased for the purposes of section 18.

The IHT Manual provides:

### **IHTM28030 interaction with spouse or civil partner exemption where liabilities are deducted against the estate on death [Sep 2018]**

Where a liability is secured on a property that passes to the spouse or civil partner, the value by which the spouse or civil partner's estate is increased (being the net value of the property) could result in a charge arising against property that passes to the spouse or civil partner. This is because if the liability is not repaid, no deduction is allowed against the estate, but the spouse or civil partner's estate is only increased by the net value of the property.

To be clear that spouse or civil partner exemption should continue to apply to the full value of the property that the spouse or civil partner receives, IHTA84/S175A(4) provides that where a liability is not taken into account in determining the value of a person's estate, the liability is also not to be taken into account in determining the extent to which the spouse or civil partner's estate is increased.

That seems misconceived. Section 18(1) IHTA provides:

A transfer of value is an exempt transfer to the extent that the value transferred

- [a] is attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner
- [b] or, so far as the value transferred is not so attributable, to the extent that that estate is increased.

It is correct that the spouse's estate is only increased by the net value of the property, which restricts the exemption under [b]. But the IHT spouse exemption would still apply under [a]. If that is right, s.175A(4) is unnecessary, though it does no harm.

*Example (James)*

J makes of loan of £25,000 to his father to help with living expenses, secured on his parent's £500,000 house. The loan is interest-free and repayable on demand. On the father's death, the loan is not repaid as the son is content for it to remain outstanding until his mother's death. The property passes to his mother under his father's Will.

An arm's length creditor would not leave the loan outstanding so the liability cannot be taken into account by virtue of IHTA84/S175A(2)(a). The liability is disallowed as a deduction against the estate so the chargeable value of the house is £500,000 rather than £475,000. But the liability is also not taken into account when considering spouse exemption. So even though the spouse actually receives the £500,000 subject to the £25,000 liability, spouse exemption applies to the full £500,000 value of the property.

If on the same facts the father had left the estate to charity, the debt would be disallowed; would the charity exemption be restricted to the net value?

J should have purchased a share in the father's house. Then the debt would not be disallowed.

## **76.40 When must debt be discharged?**

### *76.40.1 The strict position*

A debt may be discharged after the time that an IHT account is delivered or after IHT is paid. The strict position is that:

- (1) If at the time of payment of the IHT the debt has not been discharged, it is disallowed in computing the amount of IHT due.
- (2) If the debt is subsequently discharged, IHT is recomputed if a claim is made under s.241 IHTA; note the 4 year time limit.

PRs cannot obtain probate until tax is paid but often cannot pay liabilities until they have probate. I doubt if the commercial reason defence was specifically designed to cover this (it is more likely that HMRC overlooked the problem) but it seems to me entirely apt to cover it. So the debt will be deductible as long as there is no tax avoidance purpose.

#### 76.40.2 *HMRC practice*

The IHT Manual provides:

**IHTM28031 investigation of liabilities deducted against the estate on death** [Sep 2018]

As the majority of liabilities taken as deductions against an estate will be at arm's length, the starting assumption is that all liabilities will be repaid. So, unless the personal representatives are aware beforehand that a liability is not going to be repaid and it is not otherwise allowable as a deduction, the IHT400 Notes allow the personal representatives to include all the deceased's liabilities when filling in the IHT400. There is no need to make any enquiries to establish that liabilities which are clearly commercial and at arm's length have been repaid, as it is more than likely that the creditor will want to recover the money owed to them. Examples here would be:

- utility bills,
- credit card bills,
- council tax,
- payments due to HMRC,
- outstanding care fees,
- professional fees (to the date of death),
- overpaid pension,
- payments for goods and services.

If an arm's length liability for which a deduction is included is not actually repaid, form IHT400 would then be incorrect and the taxpayer is obliged to tell us about the adjustment to be made under IHTA84/S217.

Presumably this should be done when it becomes clear that the debt will not be repaid.

Where, however, liabilities have been deducted which are not due to arm's length creditors, such as family members, family trusts or companies or liabilities deducted in connection with avoidance schemes, you should ask the taxpayer or agent to provide evidence that the money has been repaid. This might be a copy of the letter enclosing a cheque to the creditor or confirmation of receipt of the payment by the creditor. You should also obtain evidence that the liability has been repaid out of the estate; remembering the extended meaning of estate for this purpose (IHTM28027). This might be a copy of the bank statement from the personal representatives' bank account, or a ledger entry from the appropriate solicitor's client account.

Where the personal representatives do not repay a liability during the normal administration of the estate and the exception at IHTM28029 does not apply, you should disallow the deduction and ask for the tax to be paid. If the liability is subsequently repaid, the deduction may then be allowed and the tax repaid, provided the claim for repayment is made within the 4 year period set out in IHTA84/S241. But you do not need to keep the file open to wait to see if the liability is repaid...

#### **76.41 The 2013 disallowances: Critique**

FA 2013 made 3 reforms, the excluded property disallowance; the BRP/APR disallowance; and the s.175A disallowance. They raise distinct issues and need to be considered separately.

##### *76.41.1 s.175A disallowance: purpose*

One purpose (perhaps the only purpose) of the s.175A disallowance is to counter arrangements under which:

- (1) an inheritance tax deduction is increased, by making a debt subject to interest; but
- (2) the interest is not in fact paid, so there is no liability to income tax on it.

The most common cases will be:

- (1) NRB discretionary trusts<sup>98</sup> funded by debt or charge arrangements.
- (2) Home loan schemes.<sup>99</sup>

NRB trusts have not (usually) been created since 2007, and home loan schemes have not been created since 2004, but many made before then are still in existence.

The disallowance could apply in relation to other loans from family or family trusts, but I think that would be rather less common.

Taxpayers now have the choice between:

- (1) IHT (due if the debt is not repaid) or
- (2) income tax on interest, (if the interest is paid).

That this is the purpose (or at least one purpose) of the disallowance is supported by the definition of “tax” which includes:

- (1) IT (the target here is IT avoidance) and
- (2) CGT (the target is CGT avoidance, on the basis that the debts may be a secondhand debt, or a debt on a security, within the charge to CGT).<sup>100</sup>

It is possible that HMRC were concerned that their recent change of view (taking the position that home loan schemes do not work) was not sustainable; and s.175A was partly motivated (or maybe primarily motivated) by the desire to find an effective means of attacking pre-2004 home loan schemes.<sup>101</sup> Such schemes were avoidance, but the POAT regime offered taxpayers the option of keeping the home loan arrangement in exchange for paying POAT: HMRC have withdrawn from their side of the bargain.

There is a case for disallowing a deduction for interest not paid after the death, but it is difficult to see the case for disallowing other debts (“non-interest debts”). HMRC assert that there is scope for avoidance but I cannot see it. It might perhaps be said that if estate debts are not paid the beneficiaries of the estate have a windfall which may fairly be taxed. The

---

98 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 19.11 (Winding up GNRB trust after death of surviving spouse).

99 See 80.2.3 (Home loan schemes).

100 See 76.37.2 (Tax motive rule).

101 The law in this area is now a mess, following *Shelford v HMRC* [2020] UKFTT 53 (TC)

way that the HMRC press release expresses it is that if debts are not repaid there is no “real reduction” in the value of the estate. But if debts are not repaid, there is a gift from the *creditor* to the debtor. That is not a gift which passes on death, so should not be subject to IHT.

Even if there were a case for disallowing non-interest debts (and I cannot see what it could be) there is no case for disallowing debts unless paid *out of the estate*. If I am right that the purpose of the rules is to ensure that IT (or CGT) on pre-death debts is not avoided by non-payment, all that matters is that the interest is paid. It does not matter whether it is paid out of the estate or not.

#### 76.41.2 *Excluded property disallowance: purpose*

HMRC say:

5.1 The principle behind disallowing any deduction for a liability which has been incurred to acquire excluded property is that a deduction should only be allowed if the acquired asset is chargeable to IHT. If the acquired asset is excluded property, there is already in effect a deduction for that asset from the value of the estate subject to IHT so HMRC does not believe that any further deduction should be made for the liability.<sup>102</sup>

#### 76.41.3 *BPR/APR disallowance: purpose*

HMRC say:

2.4 If a liability is incurred to acquire certain business assets or agricultural property and the loan is secured against those assets, the liability is deducted from the value of those assets and only the net value qualifies for relief. However, if the loan is secured on other assets in the estate, the liability is deducted from the value of the estate and relief is also given on the full value of the assets. The resulting tax advantage creates an incentive for loans to be secured against non-business assets, provides a basis for certain types of avoidance schemes, and discriminates against those businesses that borrow and secure the liability against their business assets.

2.5 The new provisions remove that tax advantage and ensure that all

---

102 HMRC, “Treatment of liabilities for inheritance tax: HMRC response to comments on schedule 36 FA 2013” (September 2013)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1)

liabilities incurred to acquire property that qualifies for a relief are treated in the same way regardless of the nature of the property or how the loan has been secured. This consistent treatment eliminates the current discrimination, the basis for avoidance, the incentive to structure borrowing in a certain way, and the resulting distortion to borrowing arrangements.

7.2 The intention of the new proposals is not to prevent or deter individuals from starting a business or investing in one, but to remove the current difference in treatment for different types of qualifying assets and to close avoidance opportunities. HMRC does not believe that the changes will disrupt business activity or that they will prevent a business from securing a loan. The majority of business loans and overdrafts are unsecured or are secured against business assets, and are repaid before death, so most estates that have business liabilities and claim reliefs will be unaffected by the changes. Estates will continue to get a deduction for liabilities provided they are not used to acquire assets which are not chargeable to IHT and they are repaid after death (unless there are commercial reasons for the non-repayment and the non-repayment does not give rise to a tax advantage).

7.3 Reliefs such as APR and BPR are available so that farms and businesses do not have to be sold or broken up, thereby undermining their economic potential, to meet IHT bills. They are not intended to incentivise loans to be structured or secured in a certain way, so that those arrangements obtain a further tax advantage in addition to the relief. The Government understands that investment decisions are made on the basis of a variety of factors, and believes that the inheritance tax system should neither penalise nor favour particular borrowing arrangements. The changes introduced by FA2013 are in line with this key principle and remove the current difference in treatment.<sup>103</sup>

#### 76.41.4 *Non-debt financing: comparison*

HMRC say:

7.4 Stakeholders also commented that the new provisions will give a different result for those who borrow funds to acquire relieviable property compared to those that realise their existing assets, and

---

103 HMRC, "Treatment of liabilities for inheritance tax: HMRC response to comments on schedule 36 FA 2013" (September 2013)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1)

therefore the new rules will discourage borrowing. If two people invest the same amount in business assets but one sells some of their existing assets to fund the investment and the other borrows the necessary funds, the borrower's taxable estate will be greater than the seller's by the amount of the loan even though both of them have the same investment in the business, net wealth and net equity.

7.5 Although their overall position appears to be very similar at first glance, it is unlikely to be case in practice. The seller will have had to sell some of their assets to fund the investment, which would constitute an equity investment. They will no longer have access to those assets as they will no longer be in their estate; they will have incurred costs and possibly paid other tax charges as well, such as capital gains tax and/or stamp duty. On the other hand, the borrower can keep and continue to benefit from and enjoy all their assets whilst also investing in the business through securing loan finance. The two have quite different circumstances. HMRC acknowledges that the IHT position will be different for the seller and the borrower as a result of the new provisions, with the equity investment by the seller now more advantageous than a debt financed investment by the borrower from an IHT perspective. However, there is also an inconsistency in the current rules in how liabilities are treated for IHT purposes, which the new provisions address, as explained in paragraphs 2.4 and 7.3. The Government considers that it is more important to ensure that the tax system neither penalises nor encourages particular borrowing arrangements than continuing the previous position of treating investments by borrowers and sellers the same.<sup>104</sup>

#### 76.41.5 *How it seemed to HMRC*

I quote the press release announcing the 2013 changes at some length as:

- (1) It illustrates the state of UK tax policy formation, at least as at 2013.
- (2) It illustrates the difficulties which may arise if one looks to a press release to identify the policy of tax provisions.

The FA 2013 introduced 3 reforms, but the press release treats all three as a single item of reform.

---

104 HMRC, "Treatment of liabilities for inheritance tax: HMRC response to comments on schedule 36 FA 2013" (September 2013)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/130905%20IHT%20Liabilities%20-%20HMRC%20response%20note.pdf?download=1)

I insert question marks at the more startling half-truths: no further elaboration is needed.

### **Inheritance tax: limiting the deduction for liabilities**

#### **Who is likely to be affected?**

Users and promoters of avoidance schemes and participators in arrangements which take advantage of the current IHT treatment of liabilities to reduce the value of an estate. (?)

#### **General description of the measure**

For most estates, liabilities owed by the deceased in the normal course of events where the debt has been repaid after death will continue to be deducted as they are now. (?)

#### **Policy objective**

The measure will remove the tax advantage that these schemes and arrangements seek to achieve, and ensure that the value of an estate subject to IHT reflects the normal economic consequences of incurring a liability. (?)

#### **Background to the measure**

The measure is a response to avoidance schemes and arrangements which exploit the current rules that allow a deduction for liabilities owed by the deceased against the value of an estate regardless of whether or not the debt is paid after death. Some arrangements involve contrived debts which are subsequently not repaid so there is no real reduction in the value of the estate; others involve loans used to acquire assets which are not chargeable to IHT, or which qualify for a relief, so that the value of the estate is doubly reduced.

The measure has not been previously announced. There has been no consultation on the measure.

#### **Summary of impacts<sup>105</sup>**

2013-14	2014-15	2015-16	2016-17	2017-18
+5	+20	+15	+15	+15

#### **Impact on individuals and households**

This measure will only (?) affect individuals entering into avoidance schemes involving debts to artificially reduce the value of an estate.

The administrative impact of this measure is not on the deceased individual but rather on those acting as executors or administrators of the estate. (?) Personal representatives will need to ensure that any

---

105 Author's footnote: These figures seem to me to be a significant underestimate; but that is a matter of impression rather than knowledge or research.

outstanding loans are repaid in order to claim the deduction against the value of the estate.

This measure will affect only a small number of individuals and households (?) as the base of estates that fall within the charge to IHT is fairly small (it is estimated for 2010-11 that there will have been approximately 17,000 estates left on death paying IHT, representing less than 4 per cent of the total). Of the estates left on death a few hundred are likely to be using one of these schemes. (?)

**Impact on business including civil society organisations**

There is unlikely to be any impact on most businesses because normal commercial debts will be unaffected. (?)<sup>106</sup>

No doubt the press release does not fully represent HMRC's thinking and motivation; every law reform proposal has to be "sold" to its target audience(s). Subject to that, Hanlon's razor suggests it should be taken at face value. If this press release is taken as typical, the court's policy of not having regard to press releases in the construction of statutes, or in the ascertainment of the policy of tax provisions, is a wise one.

76.41.6 *Critique*

HMRC are wrong to classify the arrangements caught by the provisions as avoidance, or principally avoidance, except in the debased sense that anything one dislikes in tax involves avoidance.

The idea of a disallowance of (effectively) a double deduction is an understandable policy; though so far as the provisions go beyond preventing a double deduction they are difficult to justify; and it is open to question whether the problem justifies the complication of the provisions. The cure is worse than the disease.

These issues should have been debated before enactment; but in the UK provisions brought in under a tax avoidance banner are exempt from the Tax Consultation Framework; the tax avoidance siren drowns out the sound of reasoned argument, and we are faced with the more familiar process of legislate first and think later. Had the matter been dealt with in

---

106 HMRC & HM Treasury budget announcement, "Overview of Tax Legislation and Rates" (2013)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/207419/022\\_fb20013\\_ootlar.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/207419/022_fb20013_ootlar.pdf)

accordance with the Tax Consultation Framework, it seems safe to say that different rules would have resulted.

In the 2014/15 edition of this work, I said: “I expect another round of amendments will follow eventually”. But that now seems less likely to happen.

## 76.42 GAAR: Debt reduces 10 year charge

The GAAR guidance is confused; but it is worth studying as the confusion is itself revealing.

### D28 Excluded property trust and debt

#### D28.2 *The arrangements*

D28.2.1 The trustees of an excluded property settlement buy a property in the UK and hold it directly. At the ten year anniversary, the UK property (in the absence of any other arrangements) will be subject to inheritance tax at a maximum of 6%.

The tax problem anticipated by the trustees is the 10-year charge. What do the trustees do?

Shortly before the ten-year anniversary, the trustees borrow funds from a bank and secure the debt on the property.

At this stage - while the borrowed funds are still held by the trustees - there is no IHT saving, though the exact IHT analysis depends on whether the borrowed funds are excluded property or relevant (ie chargeable) property.

If the borrowed funds are UK situate at the time of the 10-year charge, the debt is deductible but the borrowed funds are chargeable property: the IHT ten year charge is unchanged by the borrowing, as the net value of the trust fund is the same.

Before 2013, the trustees could have carried out the following arrangements:

- (1) The trustees borrow charged on the property.
- (2) The trustees hold the borrowed funds offshore on the ten year anniversary (so the funds would be excluded property),
- (3) The trustees repaid the debt later.

This worked as the debt was then deductible but the borrowed funds were not chargeable. I refer to this as “**pre-2013 debt planning**”. But of course this planning no longer works from 2013 because of the excluded

property disallowance.

My guess is that this is the scheme which the author of the example had in mind. But they realised that pre-2013 debt planning no longer worked, so they proposed a further step:

The cash is paid out to the settlor<sup>107</sup> on the understanding<sup>108</sup> that the money will be returned.

The guidance does not specify the timing here, but it is envisaged that the payment to the settlor is made before the 10-year anniversary and the payment back from the settlor is made afterwards.<sup>109</sup> I refer to this as “**post-2013 debt planning**”.

The post-2013 debt planning does not save any IHT:

- (1) If the trustees held the borrowed funds in the UK at the time the borrowed cash is paid to the settlor, there would be an IHT exit charge.
- (2) If the borrowed cash was not UK situate at that time, there would be no exit charge, but the trust debt would be disallowed under the excluded property disallowance; so there is a 10-year charge.

Shortly after the ten-year anniversary, the settlor adds the funds back to the trust and the trustees use it to repay the loan, freeing the UK property from its charge...

The payment from the settlor to the trust has many tax consequences, of which IHT in principle due on the payment is the most obvious.<sup>110</sup>

The guidance next considers the taxpayer’s tax analysis. It does so in a paragraph of 3 sentences; it is convenient to consider the middle sentence

107 Author’s footnote: Although the example specifies that funds are paid to the settlor, it does not matter for present purposes whether it is paid to the settlor or any other beneficiary.

108 Author’s footnote: It is envisaged that this is a non-binding understanding. If the arrangement involved a legally binding promise by the settlor to return the funds, then the promise is trust property

109 This is clear on first principles, but for completeness, it is confirmed later in the guidance (“... it is always intended to use the cash borrowed to repay the debt as soon as the anniversary has passed ...”).

110 One can avoid this IHT problem if one is allowed to hypothesise that the settlor is not UK domiciled at the time of the transfer and the funds are not UK situate at that time, so the property is excluded property. The example does not specify that, but it not inconsistent with the given facts.

first, as it makes a distinct point:

D28.4 *The taxpayer's tax analysis*

D28.4.1 ...

- [2] The cash borrowed by the trustees is excluded property at the time of the ten-year charge and not subject to tax.

Sentence [2] is inconsistent with the given facts, which are that the borrowed cash has been paid out to the settlor before the 10-year anniversary. The borrowed cash is outside the scope of the 10 year charge because once it has been paid out to the settlor it is no longer settled property (in the statutory terminology, it is not relevant property). It is wrong to describe it as excluded property. I guess that what has gone wrong is that the author of the guidance here has in mind the pre-2013 planning (which does not involve any payment to the settlor) and has forgotten that the given example was altogether different.

The rest of the section “taxpayer’s tax analysis” concerns deduction for the trustees debt:

- [1] The value of the UK property that will be subject to tax on the ten-year anniversary is reduced to nil as a result of the debt secured against it, so no tax will be payable in respect of the UK property...
- [3] The taxpayer claims that he has effected the scheme in such a way that the new anti-avoidance legislation in Sch 36 FA 2013 introducing the excluded property disallowance does not apply.

We move on to the HMRC analysis:

D28.5 *What is the GAAR analysis under s207(2) FA 2013?*

D28.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?

The relevant property regime applies to excluded property settlements only if UK property is owned by the trustees directly on the relevant date such as on the ten year anniversary.

By charging the UK property with debt and paying the cash out to the settlor abroad, the trustees have tried to avoid the ten-year charge.

Even if the taxpayer has found a way to circumvent the specific provisions of FA 2013 [the excluded property disallowance] it is clear that the policy intent expressed there is to prevent a deduction against UK property except where the loan was taken out to acquire the UK property. Using contrived borrowing that is not genuinely used to

acquire UK property is clearly against the intent of the legislation.

Sentence [3] of the taxpayer's analysis, and the last paragraph of HMRC's analysis is lazy and inadequate. It is not satisfactory to say "even if the taxpayer has found a way to circumvent" the excluded property disallowance then the GAAR applies:

- (1) If the taxpayer has *not* found a way to circumvent the excluded property disallowance, there is no tax saving and the GAAR does not apply.
- (2) If the taxpayer *has* found a way to circumvent the excluded property disallowance, it is necessary to know how and why. One cannot carry out a GAAR analysis unless one knows what is the technical tax analysis in the absence of the GAAR.

The drafter of the guidance has not taken the trouble to identify and to answer these questions. It seems a safe inference that they reached the answer first, and the analysis (such as it is) came later. That is of course always a risk, particularly in policy-based adjudication such as the GAAR.

*D28.5.2 Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

Borrowing with the intention of removing the cash from charge and then repaying the loan shortly thereafter is not a normal transaction. Borrowing taken out simply to avoid tax may in this context be regarded as a contrived step.

*D28.5.3 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

The ten-year charge is based on a 'snapshot' of the assets and liabilities of the settlement at the time of the charge. Until FA 2013 there was no specific provision dealing with the deduction of liabilities against settled property, nor could regard be had to the reasons behind borrowing the money. FA 2013 makes it clear that the general intention of the legislation is to grant inheritance tax deductions only in respect of borrowing taken out to acquire the particular property, with only limited exceptions, for example, where the value of the property acquired with the borrowings at the relevant time of charge is less than the amount borrowed (and not artificially devalued) in which case the excess may be set against other property.

If the UK property was sold just before the ten year anniversary, HMRC accepts that the sale proceeds (if retained abroad) would not be subject to inheritance tax. Similarly, if the trustees had borrowed and lost the

money on a poor investment the liability could be deducted against the house.

However in this case the UK property continues to be owned before and after the ten year anniversary and one would therefore expect inheritance tax to be due on its value. The real economic value of the UK property has not been reduced; it is always intended to use the cash borrowed to repay the debt as soon as the anniversary has passed and the cash has been paid out of the trust in an attempt to circumvent the provisions but with the parties agreeing in advance that the monies will be resettled shortly thereafter. FA 2013 makes the regime for deduction of liabilities clear and attempts to circumvent this through insertion of more abnormal steps will be caught by the GAAR. In looking at the application of the GAAR it is appropriate to look at the wider context of the transaction before and after the ten year anniversary and in the light of FA 2013 to consider the context in which liabilities have been incurred.

*D28.5.4 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

HMRC has not indicated its acceptance of this practice and in the light of FA 2013 it is clear that liabilities may be deducted only if certain principles are satisfied.

#### **D28.6 Conclusion**

D28.6.1 On the facts given, the arrangements are abusive arrangements to which HMRC would seek to apply the GAAR.

#### **D28.7 Proposed counteraction**

D28.7.1 The liabilities would be ignored in calculating the tax due on the house and the transaction counteracted on this basis.<sup>111</sup>

Assuming for a moment that the post-2013 scheme could have worked, that is, ignoring the actual IHT legislation, a similar result could have been defended on *Ramsay* grounds even without the GAAR. Though one point of the GAAR, I think, is that HMRC should no longer have to rely on the *Ramsay* principle, which is (to say the least) a tool of uncertain application.

Perhaps a moral to draw is that HMRC dislike circular arrangements involving short term borrowing and repayment; the borrower should not return the borrowed money back to the trust to allow the trustees to repay

---

111 HMRC GAAR Guidance Part D (Examples) (2015)

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

the loan very shortly after the ten year anniversary.

It seems safe to predict that GAAR guidance example D28 will be withdrawn in due course.

## 76.43 GAAR: Debt against UK residence

This section considers GAAR guidance para D31 (Lending to fund UK real estate by foreign domiciliary).

GAAR guidance provides:

*This example illustrates how standard tax planning may have increasing levels of abnormality attached to it. A number of the alternatives are, nonetheless, clearly on the non-abusive side of the GAAR boundary. However, the example aims to illustrate at approximately what point that boundary is crossed, although – given the condensed nature of the illustration – this will always be highly fact dependent. The example also aims to demonstrate a situation (option 7) where the arrangements might fail a single reasonableness test, but be saved by the double reasonableness test. ...*

Para D31 is not one example, but a set of nine examples.

### 76.43.1 Nine options

#### D31.2 The arrangements

D31.2.1 R is domiciled abroad and wishes to buy a valuable house in the UK for his occupation. He has a number of options:

<b>Example</b>	<b>GAAR: HMRC view</b>
1. [ <i>Individual purchase</i> ] R buys the house in his own name, using his own cash resources to fund the purchase.	Not caught
2. [ <i>Trust purchase</i> ] R settles cash from his own resources into a trust that purchases the house. R is a beneficiary of the trust...	Not caught
3. [ <i>Individual borrows 70% from bank</i> ] R even if he could have funded the purchase from his existing resources, chooses to borrow from a bank to fund a large part, say 70%, of the purchase price. <sup>112</sup>	Not caught

---

<sup>112</sup> It is assumed that R charges the debt on the property.

4. [*Trust borrows 70% from bank*] R (as in 2. above) partially funds the trust. The trustees (as in 3. above) then borrow the remainder of the purchase price from a bank.<sup>113</sup> Not caught
5. [*Individual borrows 95% from bank*] R deposits foreign investments with a bank thereby enabling the bank to lend a greater amount (say 95%) to fund the purchase of the property. The borrowing is again secured on the property. Not caught
6. [*Trust borrows 95% from bank*] R having funded a trust to the value of, say, 5%, of the purchase price of the house, agrees to guarantee the trustees' borrowing. This enables R's trust to borrow the remainder of the purchase price from a bank. The borrowing is again secured on the property. Not caught
7. [*Existing trust borrows 100% from family offshore company*] R has an existing substantive<sup>114</sup> discretionary trust which he settled many years ago. R is a beneficiary of the trust, but his adult children are also beneficiaries and they have all benefited from the trust over the years. Not caught  
The trustees previously owned a UK house, but sold it a couple of years ago.<sup>115</sup>  
The trustees previously owned a UK house, but sold it a couple of years ago.<sup>116</sup>  
The trustees have been looking around for a new UK property suitable for R and his children to use as each of them visit the UK for a few weeks a year.<sup>117</sup>

---

113 It is assumed that the trustees charge the debt on the property.

114 Author's footnote: The term "substantive" is here used in a non-technical, layman's sense; see below.

115 Author's footnote: The ownership of a previous house should be irrelevant, but it does illustrate the existence of the trust over an earlier period.

116 Author's footnote: The ownership of a previous house should be irrelevant, but it does illustrate the existence of the trust over an earlier period.

117 Author's footnote: I think the facts in this sentence are irrelevant to the example.

The trustees could afford to buy the new house using existing resources but instead they accept an offer from R to lend them the purchase price via an offshore company that is wholly owned by R. The loan is interest free and repayable on demand. The company owned by R secures the loan on the house.

8. [*Gift to trust and loan back to settlor*] R settles cash from his overseas resources into a newly established trust which then lends it back to him via an underlying company for the purchase of the house in his own name. Caught

9. [*Loan trust lends to property trust*] R adds cash from his overseas resources to a trust, known as the Loan Trust, where he is settlor and beneficiary. Caught

His spouse or other relative sets up another trust, known as the Property Trust, which is funded with, say, £1000 cash. R adds no funds to the Property Trust.

The Loan Trust forms an overseas company into which the cash is transferred and the company lends the cash to the Property Trustees who acquire the UK property that R wishes to occupy. The loan is repayable on demand and may be interest-free, interest-bearing or index-linked.

The Property Trustees incur no personal liability as the lender may have recourse to the house only...<sup>118</sup>

Examples 7-9 are now affected by the 2017 IHT residence-property rules. Those rules represent a more satisfactory way of dealing with the IHT issues, and may reflect an HMRC understanding that the guidance is not in all respects correct or beyond challenge. The guidance has not yet been updated<sup>119</sup> and I set it out here for the light it may shed on the GAAR, and the GAAR guidance.

#### 76.43.2 GAAR sub-issues

The GAAR raises two distinct sub-issues. In short:

---

118 It is not clear whether HMRC regard this fact as significant to the outcome; it seems to me irrelevant.

119 Of course the GAAR guidance should be kept up to date. But that is a formidable task, given the pace of change, and some readers may doubt whether that will happen.

- (1) Tax advantage purpose issue: Is obtaining a tax advantage one of the main purposes of the arrangement.
- (2) Abuse issue: can the arrangement reasonably be regarded as a reasonable course of action.

### 76.43.3 Options 1 and 2

Options 1 and 2 are straightforward. GAAR guidance provides:

D31.4.1 In options 1 and 2 [individual purchase and trust purchase] above there is no tax advantage and indeed additional ten year charges arise in relation to option 2. These options are included to illustrate the range of alternatives which R has and by way of contrast with the following options.

More analytically, to identify a tax advantage requires a comparator, and options 1 and 2 are the comparators for the options which follow.

In fact option 2 (trust purchase) may have an IHT advantage of a settlement created by a foreign domiciled settlor. That would be important if the individual was about to become deemed domiciled. If it did not have that advantage, then it is unlikely that a well advised person would create a trust. Elsewhere HMRC do suggest that option 2 may be tax motivated:

The reasons for using a trust may be *partially* non-tax related and may include a desire for confidentiality, to avoid complex probate procedures, or to provide an automatic succession plan on R's death.

### 76.43.4 IHT debt deduction advantage

GAAR guidance provides:

#### **D31.4 The taxpayer's tax analysis**

D31.4.2 In options 3 and 4 [70% bank borrowing] the borrowing provides a clear inheritance tax advantage compared to options 1 and 2. As R is not domiciled in the UK the cash he retains personally abroad is not subject to inheritance tax and the UK property is devalued by commercial borrowing.

D31.4.3 The same tax advantage, albeit to a greater extent, is claimed to apply in options 5 to 9.

### 76.43.5 GWR

GAAR guidance provides:

D31.4.4 The reservation of benefit rules do not apply to options 1, 3, 5 and 8 because R owns the property.

More analytically, GWR does not apply in options 1 [individual purchase], or 3 and 5 [individual purchase with 70% or 95% borrowing], because R does not make a disposal by way of gift. GWR does not apply in option 8 [gift to trust and loan back to settlor] because the property in R's trust is excluded property.

There is a reservation of benefit in options 2, 4, 6 and 7, but the taxpayer argues that [in cases 4, 6, & 7 where the trust borrows] this is only on the net value of the property...

HMRC do not agree:

D31.4.9 HMRC does not accept R's analysis of the legislation and in particular the deductibility of loans against UK property in which he reserves a benefit under options

2 [trust purchase],<sup>120</sup>

4 and 6 [trust borrows 70%/95% from bank], and

7 [trust borrows from family offshore company].

The GAAR analysis below should be read with this point in mind.

The reader may think it unsatisfactory that HMRC do not state what their analysis is, or why the taxpayer's analysis is wrong. The GAAR analysis should only be carried out after one knows the general tax analysis.

Of course the tax analysis raises complex issues, but HMRC are primarily responsible for that complexity.

If HMRC were right about non-deductibility, the point would be of general importance. I cannot myself see a basis of an argument, and suspect HMRC wanted to avoid giving a hostage to fortune by saying anything at all. HMRC say the same later, in relation to examples 7-9:

D31.6.5 With all the options (but particularly options 7, 8 and 9) HMRC would consider whether other legislative means at their disposal should be used to challenge the claimed tax treatment.<sup>121</sup>

---

120 The reference to option 2 is mistaken here, because that option did not involve a loan.

121 A reference to *Lear* seems apposite: ("I will do such things – What they are, yet I know not...").

Turning to option 9:

D31.4.6 In option 9, there is no [GWR] charge on the death of R because he has not gifted any property to the Property Trust (so the reservation of benefit provisions do not apply) and he is a beneficiary only of the Loan Trust that holds excluded property. As he has made no gift to the Property Trust, s102 and para 5(4) Sch 20 FA 1986 are not in point.

If he has made such a gift then it is argued that the UK property is devalued by the loan taken out to acquire it.

#### 76.43.6 *s.103 disallowance*

GAAR guidance provides:

D31.4.5 In option 8, the liability is not, it is claimed, caught by s103 FA 1986 as a self-generated liability due to it being funded with excluded property (see s103(4) FA 1986).<sup>122</sup>

#### 76.43.7 *Pre-owned assets*

GAAR guidance provides:

D31.4.7 Pre-owned assets charge does not apply to options 1, 3, 5 and 8 since R has made no disposal of the property and does not satisfy the contribution condition since the property has been acquired by him and not a third person.

It does not apply to the other options on the basis that even if the contribution condition is satisfied, the loan in which R reserves a benefit (or in the case of option 2 the house itself) derives its value from the house and therefore protection under para 11(3) Sch 15 is available.<sup>123</sup>

#### 76.43.8 *Excluded property disallowance*

GAAR guidance provides:

D31.4.8 The liabilities are incurred to buy the UK property and therefore on the face of it are not disallowed by Sch 36 FA 2013.

That seems straightforward.

---

122 The taxpayers analysis is correct: See 76.11.10 (Section 103(4) exception).

123 HMRC seem to accept here the views set out in 80.16.2 (Derived property: Loan).

### 76.43.9 *Other tax issues*

GAAR guidance section headed “taxpayers analysis” is limited to IHT. But in the cases involving a trust (assuming the trust is non-resident) it is necessary to consider s.87 and (in example 7, where the children occupy, s.731). It is also necessary to consider sch 4B. In short, there is a capital payment which would come into charge in the event of trust gains. All this may impact on whether the GAAR applies.

### 76.43.10 *GAAR analysis: tax advantage purpose*

GAAR guidance provides:

**D31.5 *What is the GAAR analysis under s.207(2) FA 2013?***

**D31.5.1 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?***

**D31.5.2 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?***

It is reasonable to conclude that the obtaining of a tax advantage was the main purpose or one of the main purposes of options 7 to 9.

This is correct for options 8 (Gift to trust and loan back to settlor) and 9 (Loan trust lends to property trust).

It is not correct for option 7 (Existing trust borrows 100% from family offshore company); this is in fact recognised in a passage which follows (“In the above example the loan may not be mainly tax motivated anyway...”).

This may not be so in relation to options 3 to 6. R might prefer to borrow from a bank to allow him more flexibility to make other investments with his cash or to preserve his liquidity.

The intention behind the inheritance tax legislation is to tax UK assets and UK domiciliaries. The foreign assets of foreign domiciliaries are excluded property being outside the territorial scope of inheritance tax in the first place, whereas any UK assets they own are subject to tax.

Options 3 and 4 [70% bank borrowing] are an application of the rules whereby IHT is chargeable on the net value of UK assets. The fact that R or his trustees could have funded the purchase using foreign investments is irrelevant: R is not compelled to turn assets which are outside the territorial scope of the tax into assets which are subject to tax, whatever his motivation for the borrowing. R’s or the trustees’

borrowing is a normal commercial transaction and is not contrived or abnormal. While reservation of benefit may be in point in relation to option 4 the GAAR is not thought to apply to option 3 or option 4. Options 5 and 6, [95% bank borrowing] similarly, represent a commercial decision by R or his trustees. R or his trustees take the commercial risks associated with the additional borrowing and R takes the economic downsides of depositing funds in support of the borrowing/guarantee. Choosing to borrow a higher amount is similarly neither contrived nor abnormal. R takes the economic consequences of borrowing commercially. He may lose the cash he has chosen to place elsewhere. It can reasonably be regarded as a reasonable course of action.

More analytically, the arrangement is not abusive.

#### 76.43.11 Option 7: loan from family co

In option 7 [existing trust borrows 100% from family offshore company] loans to trusts do occur for all sorts of non-tax reasons and therefore cannot be considered in themselves to be necessarily abnormal or contrived. Even though the loan is tax-motivated and (in some senses) self-generated, it involves a single straightforward step.

The passage then goes on to consider variants of example 7:

The position might well be different, however, if

- [1] the trust were not established for some time already or
- [2] [if the trust were not] substantive; for instance if R were the sole or principal beneficiary or able to direct the trustees or revoke the trust.<sup>124</sup>

A loan to such a newly created trust might be considered a contrivance.

This is not clearly expressed, but I think the guidance is that the GAAR might apply if the trust is both newly created *and* settlor-interested.

I do not see why it matters that the trust is settlor-interested.<sup>125</sup> But the

---

124 A note on terminology: We need a term to describe a trust where the settlor is principal beneficiary, or which is revocable. I use the term “settlor-interested”; a trust lawyer would not use the expression “not substantive”. I have wondered whether the author was thinking (perhaps confusedly) of sham or illusory trusts, but those would not be settlements for IHT purposes.

125 I suspect that the author disapproved of settlor-interested trusts generally, and regarded any use of them as an indicative of contrivance. If that is right, there is a

conclusion, that the position “may well” be different because the arrangement “might be” considered a contrivance, is so vague that the passage is not worth much scrutiny: it is scarcely to be called guidance.

In the above example the loan may not be mainly tax motivated anyway e.g. the trustees may wish to preserve cash for liquidity purposes, but even if it were the arrangement is still not necessarily abusive.

Another set of questions arises if the loan is from an individual rather than from a family company. Does it make a difference if the trust owns the family company? The guidance does not consider those possibilities.

The 2017 IHT residence-property rules would now need consideration.

#### *76.43.12 Option 8: Gift to trust & loan back*

The guidance then turns to option 8 (Gift to trust and loan back to settlor):

In option 8, the cash goes in a circle back to the settlor via a trust and loan arrangement. The position might be different under the GAAR if the trust had been in existence for some time so the gift was not made in contemplation of a loan back. The settlor sets up a trust as a vehicle to lend to himself. The setting up of the trust and company is done simply to enable a loan to be made back to the settlor and this is a contrived step. S103 FA 1986 was designed to stop assets being given away that are then lent back by the donee and it may be thought that option 8 is using a possible loophole in s103 to circumvent the intended policy.

“It may be thought” is not much guidance but I suspect it is intended to represent the HMRC/GAAR panel view. It is just as arguable that s.103(4) is a rational policy-based exemption for foreign domiciliaries. The circularity of example 8 is no doubt avoidance; whether it passes the stricter test of abuse is more arguable. HMRC’s example gives a more objectionable version of the facts as the trust is specified as “newly-established.” If it were established some time previously, there would be no abuse and indeed no avoidance.

The 2017 IHT residence-property rules would now need consideration.

#### *76.43.13 Option 9: loan between trusts*

---

wide gap between HMRC’s perception and that of most private client practitioners.

The guidance then turns to option 9 (Loan trust lends to property trust):

In option 9 the combination of a nominal-value settlement specifically set up to own the property coupled with the establishment of a separate loan trust and a corporate vehicle underlying it which is then used to make a loan which is on a non-recourse basis is on these facts set up only to achieve an artificial tax deduction. And, while taken individually, the steps may be considered normal, when taken in combination they may be considered abnormal.

The guidance then considers some variants of option 9:

However, each case would be taken on its own facts and a situation where, for instance,

- [1] both trusts were substantial and existing trusts or
- [2] where the loan was on fully commercial terms or
- [3] where the property trust was established for a different beneficiary apart from the settlor

might be considered differently (see option 7 above).

“Might be” is not much guidance.

*D31.5.3 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

Neither of the last two options accord with established practice and HMRC has not indicated acceptance of the interpretation that foreign domiciliaries are not caught by s103 as a matter of principle.

Section 207(5) FA 2013 provides:

The fact that tax arrangements accord with established practice, and HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice, is an example of something which might indicate that the arrangements are not abusive.

This refers to “the fact” (in the singular) but it goes on to refer to *two* facts, namely (1) the fact that tax arrangements accord with established

practice, and (2) the fact that HMRC indicated its acceptance of that practice.

If *both* facts are present, then that is obviously “something which might indicate that the arrangements are not abusive.” (At first sight, that seems over-tentative. It is difficult to imagine anything that HMRC publically accept, but which is not reasonable tax planning: that could only arise if HMRC’s acceptance of the planning is unreasonable. Perhaps HMRC were concerned at the possibility of a maverick inspector, whose views HMRC later wanted to disavow.)

Contrary to the statement in the GAAR guidance, in option 9, my experience is that *one* of the facts is present, namely, the arrangement has been an established practice for a few years now. However it is not an arrangement about which HMRC has indicated a view. Is that solitary fact “something which might indicate that the arrangements are not abusive”? It is suggested that it should be taken as an indication to that effect (though not of course decisive).

### D31.6 *Conclusion*

...

D31.6.2 Options 3 and 4 are straightforward applications of the legislation and would not be caught by the GAAR. Similarly, options 5 and 6 involve commercial arrangements which are neither contrived nor abnormal and HMRC would not seek to invoke the GAAR against them.

D31.6.3 With option 7, while economically the liability appears to be self-generated, the trust is of substance and the arrangements are not necessarily contrived or abnormal.

Thus, although some observers might consider this to be unreasonable, it is possible to see that other reasonable observers might reach a different view. As such these particular facts may well not be caught by the GAAR. However, it is important to realise that this is a borderline case and one where, for the purposes of illustration, the facts are inevitably condensed. Each case would have to be considered on its own facts and a subtly different set of facts might result in a different conclusion.

D31.6.4 Options 8 and 9, on these particular facts, would be caught by GAAR. The liabilities would be ignored in calculating the tax due on the house and the transaction counteracted on this basis. However, as with option 7, each case would have to be considered on its full facts and it is not impossible that different scenarios might potentially be saved from the GAAR by the double-reasonableness test.

The passage is no doubt correct to say “it is not impossible that different scenarios might potentially be saved from the GAAR by the double-reasonableness test.” But the reader may doubt whether a statement which is so qualified should be called “guidance”.

One might of course set up the option 9 loan trust/property trust structure with a view to replacing the internal loan with bank borrowing at a later date.

If the loan is disallowed for IHT, the property trust will be insolvent after IHT falls due. If the trust loan is secured on the property, there will be no value left in the trust for IHT to be paid.

The IHT residence-property code would now need consideration.

#### **76.44 Funeral expenses**

Funeral expenses are not, in principle, a debt of the deceased, but there is a relief as if they were. Section 172 IHTA provides:

In determining the value of a person’s estate immediately before his death, allowance shall be made for reasonable funeral expenses.

The IHT Manual provides:

##### **10376 Overseas funerals of non-domiciled deceased [Jun 2016]**

You should allow overseas funeral expenses as a deduction against the UK estate, even if the deceased was not domiciled in the UK for IHT purposes.

Although s.162(5) IHTA 1984 might seem to justify the deduction of such expenses from the non-UK estate, that sub-section cannot apply as funeral expenses are not a liability for the purposes of s.5 IHTA 1984 or s.162 IHTA 1984.

#### **76.45 Foreign administration expenses**

There is in general no IHT deduction for the cost of administration of an estate.<sup>126</sup>

Section 173 IHTA provides a limited exception:

---

126 Unless the residuary estate is given to charity. That can be important for estates giving substantial amounts to charity; see Kessler, Wong and Birkbeck, *Taxation of Charities and Nonprofit Organisations*, (12th ed, 2019/20), para 26.13 (Cost of administration).

In determining the value of a person's estate immediately before his death, an allowance against the value of property situated outside the UK shall be made for any expense incurred in administering or realising the property which is shown to be attributable to the situation of the property, but the allowance shall not exceed 5 per cent of the value of the property.

The IHT Manual provides:

**IHTM27050: deduction for administration of non-UK assets [Sep 2018]**

... The allowance is for additional expenses only. So it is only allowed on the excess of the expenditure over and above which it would have cost to deal with the property in the UK. The cost of obtaining a foreign grant is allowed but not the cost of reporting the death of a deceased shareholder with a foreign company.

If worthwhile you must ask for details of the expenses and point out, if necessary, that the allowance is for additional expenses only and restricted to 5 per cent of the value. When the deduction is agreed, calculate the net value of the asset. If the value is shown in non-Sterling currency use one of the many currency conversion websites available on the internet to convert it to Sterling.

The deduction is not the additional expense “over and above which it would have cost to deal with the property in the UK”; it is for the expense “attributable to the situation of the property” but that arguably comes to the same thing.

Non-deductibility of administration expenses may be regarded as unfair, but it is consistent with the principle that IHT is a tax on estates, not donees, and (perhaps more importantly) it is simpler, because only on completion of administration of an estate is it clear what the expenses will be. On the basis of simplicity and consistency it is suggested that s.173 should be repealed.

## CHAPTER SEVENTY SEVEN

# IHT CLOSE-COMPANY CODE

77.1

### 77.1 Transfer of value by close co

A company has an estate, and may make a transfer of value.<sup>1</sup> That transfer of value is not a chargeable transfer, as that expression means a transfer of value made by an individual.<sup>2</sup> However, a transfer of value made by a close company is attributed to participators, who may be taxable.

The provisions are in Part 4 IHTA which I call the “**IHT close-company code**”.

I deal with this topic in full, except for the specialist topic of interests in possession held by companies. I assume for simplicity that IHT business property relief is not in point.

The IHT close-company code does not apply to a company in liquidation, as it is not beneficial owner of its assets<sup>3</sup> and so does not have an estate. But the point is not likely to arise.

### 77.2 Close company terminology

#### 77.2.1 “Close company”

Section 102(1) IHTA provides the expected definition: close company here includes a non-resident close company.<sup>4</sup>

---

1 See 70.2 (“Estate”); 70.3 (Transfer of value/value transferred).

2 See 70.6 (“Chargeable transfer”).

3 See 93.5.2 (Co in liquidation not beneficial owner).

4 Section 102(1) IHTA provides:

“In this Part of this Act [Part 4 Close Companies] “close company” means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts.”

### 77.2.2 “Participant”

Section 102(1) IHTA provides a slightly cut down version of the standard definition of “participant”:

- [a] “participant”, in relation to any company, means any person who is (or would be if the company were resident in the UK) a participant in relation to that company within the meaning given by section 454 of the Corporation Tax Act 2010,<sup>5</sup>
- [b] other than a person who would be such a participant by reason only of being a loan creditor;

The point of para [b] may be to avoid the problem of overlapping participants which arises in the context of apportioning s.3 gains to participants.<sup>6</sup>

### 77.2.3 “Rights/interests” in a co

Section 102(2) IHTA provides:

References in this Part of this Act to a person’s rights and interests in a company include references to rights and interests in the assets of the company available for distribution among the participants in the event of a winding-up or in any other circumstances.

For discussion, see 78.3.3 (Residence-company Interest).

### 77.2.4 Foundations

The analysis adopted in this book is that in principle:

- (1) A Foundation is an IHT-settlement.
- (2) A Foundation is not a company.<sup>7</sup>

On this analysis, the IHT close-company code does not apply to a Foundation. However some commentators take the view that a Foundation is a company. In that case a Foundation is a hybrid settlement/company, in the sense that it is both an IHT settlement and a

---

This is a fairly standard form: see 99.29.1 (Non-resident close company).

<sup>5</sup> See 99.22 (Definitions of participant).

<sup>6</sup> See 60.8 (Overlapping participants: Loan creditors).

<sup>7</sup> See 86.9 (Stiftung/Foundation). A Dutch stichting needs further consideration.

company. For completeness I consider here the IHT issues which would arise if that view were correct.

As a general principle, one cannot apply *both* the IHT charges on settlements *and* the IHT close-company code, because of the presumption against double taxation. Either one or the other must apply. Note incidentally that the choice between the two will sometimes favour HMRC and sometimes not; this is not a case where one analysis benefits HMRC and the other the taxpayer. The close-company issues are briefly discussed in the context of s.3 gains; see 60.34 (Foundations). But even if, which is doubtful, the conditions of the IHT close-company code are satisfied, it is suggested that the context shows that the IHT settlement charges should apply, and the IHT close-company code should not apply.

Different considerations apply to a Foundation with Founder's Rights. That is a company and not an IHT-settlement. The IHT close-company code will apply.<sup>8</sup>

### 77.3 Individual participators

Section 94(1) IHTA provides:

[a] Subject to the following provisions of this Part of this Act [Part 4 Close Companies], where a close company makes a transfer of value, tax shall be charged as if each individual to whom an amount is apportioned under this section had made a transfer of value ...

There are three types of transfer of value which may arise here:

- (1) The close company makes a transfer of value. This is not a chargeable transfer, but it is the trigger for a s.94 transfer.
- (2) Participators are treated as if they had made a transfer of value. I refer to this as a “**s.94 transfer**”.
- (3) Participators may make an actual transfer of value (typically, an omission which reduces the value of their estate).

HMRC rely on the s.94 transfer, and do not pursue the possibility of a double charge.<sup>9</sup>

#### 77.3.1 Amount of s.94 transfer

---

<sup>8</sup> See 86.9.10 (Founder's Rights: a company).

<sup>9</sup> See 77.3.3 (No double charge).

Section 94(1) goes on to specify the amount of the s.94 transfer:

[b] ... of such amount as after deduction of tax (if any) would be equal to

[i] the amount so apportioned, less

[ii] [A] the amount (if any) by which the value of his estate is more than it would be but for<sup>10</sup> the company's transfer;

[B] but for this purpose his estate shall be treated as not including any rights or interests in the company.

If s.94(1) had been written today, it would have been split into two or three subsections; but it works.

### 77.3.2 Apportionment of s.94 transfer

Section 94(2) IHTA explains how the s.94 transfer is apportioned among the participators:

For the purposes of subsection (1) above

[a] the value transferred by the company's transfer of value shall be apportioned among the participators according to their respective rights and interests in the company immediately before the transfer, and

[b] any amount so apportioned to a close company shall be further apportioned among its participators, and so on...

Apportionment is on a just and reasonable basis, like s.3 gains.<sup>11</sup>

The IHT Manual gives an example:

**IHTM16247 Close companies and settled property: example** [Jul 2016]

Calculating the chargeable value of the property (or part):

A close company has assets in excess of £3million.

---

<sup>10</sup> "but for" is a slip for "as a result of". (Or alternatively, *more* is a slip for *less!*). The same slip is found in:

- s.95(1) IHTA where the wording is "but for"
- s.93(3) IHTA where the wording is "apart from" (which means the same)

HMRC agree: see the Manual passage cited at 77.4.3 (Amount of transfer of value).

<sup>11</sup> See 60.6 (Amount attributed to participator).

It transfers cash of £1million to A and B absolutely.<sup>12</sup>

The company has 1000 shares in issue.

The ‘participators’ are identified under IHTA84/S94 (2). They are:

<b>Person</b>	<b>Shares<sup>13</sup></b>
A (individual)	500
B (individual)	250
C (trustee)	<u>250</u>
Total	<u>1000</u>

The HMRC analysis for the individuals A and B, is as follows:

The transferred amount of £1,000,000 is apportioned so that A is deemed to have made a transfer of value of  $(500 \div 1,000) \times £1,000,000 = £500,000$ .

From this figure we must deduct the amount of the transfer remaining in A’s estate (‘the amount by which his estate is more than it would be apart for<sup>14</sup> the company’s transfer’ - S94(1)(a)). In this case he has accepted the money. His estate is ‘more’ by £500,000. So the taxable amount is £500,000 less £500,000 = nil.

As B is also an individual and has taken the money personally, his calculation follows the same lines.

Presumably A and B are beneficiaries; otherwise C is in breach of trust. I return to consider the position of C, the trustee, below.

### 77.3.3 No double charge

The IHT Manual continues:

also, if a company worth £3million gives away £1million as above, the thought might reasonably occur that the value of shares held by the shareholders personally has possibly dropped by about 1/3. You might then wonder about ‘loss to the transferor’. You must put such thoughts out of your mind because such a claim does not exist.

Could there be a double charge? Presumably not, because of a presumption

12 Author’s footnote: It is assumed, perhaps doubtfully, that the transfer is not an income distribution (which would qualify for close co income-receipt relief).

13 I set this out in tabular form for clarity.

14 Author’s footnote: the statutory wording is “but for” but this is a slip for “as a result of”.

against double taxation.

#### 77.3.4 Non-PET trap

Section 3A(6) IHTA provides:

Where, under any provision of this Act, tax is in any circumstances to be charged as if a transfer of value had been made, that transfer shall be taken to be a transfer which is not a potentially exempt transfer.

So a s.94 transfer is immediately chargeable, not a PET. The reason for this rule is unclear, and s.3A(6) ought to be repealed. But IHT is not a rational tax, and fortunately this problem does not often arise.

#### 77.3.5 Income-receipt relief

Section 94(2) IHTA sets out two reliefs. The first provides:

- (a) so much of that value as is attributable to any payment or transfer of assets to any person which
  - [i] falls to be taken into account in computing that person's profits or gains<sup>15</sup> or losses for the purposes of income tax or corporation tax
  - [ii] (or would fall to be so taken into account but for section 1285 of the Corporation Tax Act 2009 (exemption for UK company distributions)) shall not be apportioned...

I refer to this as close-company “**income-receipt relief**”.

This relief might be considered as one of a number of broadly similar income-receipt reliefs:

<b>Relief (my term)</b>	<b>Section</b>	<b>See para</b>
Close co income-receipt relief	s.94(a)	<i>Discussed here</i>
Exit charge income-receipt relief	s.65(5)(b)	72.9.3
Disposition allowable in computing IT	s.12 <sup>16</sup>	<i>Not discussed</i>

15 “Profits or gains” here means income: see 14.11 (Income/gains/profits).

16 The inclusion of s.12 relief in this list might be questioned. This relief requires a payment which is deductible in the hands of the transferor. That is not exactly the same as a requirement that the payment is income of the recipient. But there is a rule of symmetry so that deductibility for the payor, and taxability for the payee, normally go together.

What these reliefs have in common is that they deal with the interaction of IHT and IT. There are however significant differences in the wording. Exit charge income-receipt relief is more widely expressed, and s.12 relief is narrower.

Since a dividend is in principle not caught by the IHT close-company code, close co income-receipt relief will not normally be needed.

### 77.3.6 Foreign domiciliary relief

Foreign property of a company is not excluded property, since excluded property means foreign property of an *individual*.<sup>17</sup> Hence there is express exemption for foreign domiciliaries which covers the point. Section 94(2) IHTA provides:

- (b) if any amount which would otherwise be apportioned to an individual who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

Property within sch A1 IHTA (relevant loan/company holding UK residence) may fall within this, as such property is in general situate outside the UK (even though it is not excluded property).

FOTRA securities of a non-resident company are excluded property since excluded property means FOTRA securities of a non-resident *person*. So if a non-resident company makes a disposition of FOTRA securities, it does not make a transfer of value and there is no s.94 deemed transfer. Section 94(2)(b) is not needed here.

UK situate AUTs or OEICs fall into a gap. They are not excluded property, if held by a company, and do not fall within the exemption in s.94(2)(b) IHTA. An HMRC concession would be sensible, and it might be worth asking HMRC in an appropriate case. The issue will not often arise.

### 77.3.7 De minimis exemptions

Section 94(4) provides a limited exemption:

Where the amount apportioned to a person under this section is 5 per

---

<sup>17</sup> See 71.2 (Non-settled foreign property).

cent or less of the value transferred by the company's transfer of value then, notwithstanding section 3(4) above, tax chargeable under subsection (1) above shall be left out of account in determining, with respect to any time after the company's transfer, what previous transfers of value he has made.

This provides exemption up to the amount of the available nil rate band. Section 96 IHTA provides a de minimis relief for preference shares:

Where

- [a] part of a close company's share capital consists of preference shares (within the meaning of section 1023(5) of the Corporation Tax Act 2010) and
  - [b] a transfer of value made by that or any other close company has only a small effect on the value of those shares, compared with its effect on the value of other parts of the company's share capital,
- the preference shares shall be left out of account in determining the respective rights and interests of the participators for the purposes of sections 94 and 95 above.

Section 97 IHTA provides a de minimis group relief, not discussed here.

### 77.3.8 Charity and other reliefs

HMRC say:

So far as the company's transfer of value relates to property given

[1] to charity or

[2] to the national institutions or bodies mentioned above,

then the exemptions for gifts to those bodies extend to the amounts apportioned to the individual participators.<sup>18</sup>

---

18 "The Arts are your Business" (1980) issued by the Association for Business Sponsorship of the Arts in conjunction with the Inland Revenue, referred to in Hansard HC Deb 09 March 1981 vol 1000 cc260-1W

[http://hansard.millbanksystems.com/written\\_answers/1981/mar/09/arts-sponsorship-tax-benefits](http://hansard.millbanksystems.com/written_answers/1981/mar/09/arts-sponsorship-tax-benefits)

The passage is printed in Butterworths Yellow Tax Handbook 2015/16; it is not in later editions, but there is no reason to think that HMRC practice has changed.

Bramwell, *Taxation of Companies and Company Reconstructions* (looseleaf) formerly took the opposite view, criticised in the 2017/18 ed of this work para 71.13.7, but the passage has been deleted.

The same would apply to the IHT spouse exemption, business property relief, and other exemptions.

### 77.3.9 *Inter-company transfer*

Section 95(1) IHTA provides:

Where—

- (a) the value of the estate of a company (“the transferee company”) is increased as the result of a transfer of value made by a close company (“the transferor company”), and
  - (b) an individual to whom part of the value transferred is apportioned under section 94 above has an interest in the transferee company (or in a company which is a participator of the transferee company or any of its participators, and so on),
- subsection (2) below shall apply to the computation, for the purposes of section 94 above, of the amount to be offset, that is to say, the amount by which the value of his estate is more than it would be but for<sup>19</sup> the transfer.

So we move to s.95(2) for the quantum of the relief:

Where this subsection applies—

- (a) the increase in the value of the transferee company’s estate shall be taken to be such part of the value transferred as accounts for the increase, and
  - (b) the increase so computed shall be apportioned among the transferee company’s participators according to their respective rights and interests in the company immediately before the transfer (and, where necessary, further apportioned among their participators, and so on),
- and the amount so apportioned to the individual shall be taken to be the amount to be offset.

## 77.4 **Trustee participators**

Section 94(1) IHTA only applies to individuals. Section 99(1) IHTA confirms that it does not apply to trusts:

Subsection (1) of section 94 above shall not apply in relation to a person who is a participator in his capacity as trustee of a settlement...

---

<sup>19</sup> “but for” is a slip for “as a result of”; see 77.3.1 (Amount of s.94 transfer).

Section 99(1) then makes express provision for trusts:

but—

- (a) the reference in subsection (2) of that section to subsection (1) shall have effect as including a reference to subsection (2) of this section...

Amended as s.99 directs, s.94(2) provides:

- [a] For the purposes of ~~subsection (1) above~~ s.99(2) IHTA the value transferred by the company's transfer of value shall be apportioned among the participators according to their respective rights and interests in the company immediately before the transfer,
- [b] and any amount so apportioned to a close company shall be further apportioned among its participators, and so on; ...

This takes us to s.99(2) IHTA which slots the close-company charge into the code of rules for (a) estate IIP and (b) non-estate IIP trusts. I refer to this as a “**s.99 trust transfer**”.

#### 77.4.1 *Estate IIP trust*

Section 99(2) IHTA provides:

Where any part of the value transferred by a close company's transfer of value is apportioned to a trustee of a settlement under section 94 above, then—

- (a) if a qualifying [estate] interest in possession<sup>20</sup> subsists in the settled property, a part of that interest corresponding to such part of the property as is of a value equal to
  - [i] the part so apportioned less
  - [ii] the amount specified in subsection (3) below
 shall be treated for the purposes of Chapter II of Part III of this Act as having come to an end on the making of the transfer

This activates the rules which apply on a termination of an IIP.<sup>21</sup>

The IHT Manual provides:

**IHTM16243 Close companies and settled property: the taxable amount** [Sep 2018]

<sup>20</sup> See 70.7 (Qualifying interest in possession).

<sup>21</sup> See 72.10 (Termination of qualifying IIP).

... The provisions of IHTA84/Part IV do not provide any special charging section where settled property is concerned. Instead, the system for settled property provides a 'special' framework and then directs the notional transfers to their own existing taxing and rate sections, with the result that the claims produced by this legislation are the familiar IHTA84/S52 (1) for interests in possession ceasing. This basis of claim is artificial because in reality the interest does not cease. As a result such an event, occurring after 16 March 1987, can be a PET (IHTM04057) if it would have been so under a plain IHTA84/S52 (1) claim [i.e. if it was not then becoming held on non-interest in possession trusts]. This contrasts with the treatment of absolute gifts by close companies which, under IHTA84/S98 (3), are never PETs. In similar vein, annual and other exemptions (IHTM16082) available on a claim under IHTA84/S52 (1) are allowable.

#### *77.4.2 Non-IIP trust*

Section 99(2) IHTA provides:

Where any part of the value transferred by a close company's transfer of value is apportioned to a trustee of a settlement under section 94 above, then...

- (b) if no qualifying interest in possession [estate IIP] subsists in the settled property, Chapter III of Part III of this Act shall have effect as if on the making of the transfer the trustee had made a disposition as a result of which the value of the settled property had been reduced by an amount equal to
  - [i] the part so apportioned less
  - [ii] the amount specified in subsection (3) below;and where a qualifying interest in possession subsists in part only of the settled property paragraphs (a) and (b) above shall apply with the necessary adjustments of the values and amounts referred to there.

This activates the exit charge in s.65 IHTA,<sup>22</sup> which can have some quirky results.

#### *77.4.3 Amount of s.99 trust transfer*

The s.99 trust transfer is computed by reference to the amount apportioned

---

22 See 72.8.2 (Reduce value of trust property).

less “the amount specified in subsection (3)”.

Section 99(3) IHTA provides:

The amount referred to in paragraphs (a) and (b) of subsection (2) above is

- [a] the amount (if any) by which the value of the settled property is more than it would be apart from<sup>23</sup> the company’s transfer,
- [b] leaving out of account the value of any rights or interests in the company.

The IHT Manual gives an example; for the facts of the example see 77.3.2 (Apportionment of s.94 transfer). The HMRC analysis for the trust is as follows:

But C is also a participator, and  $(250/1,000) \times \text{£}1\text{m}$  is apportioned to him under S99 (1)(a) i.e. £250,000.

The amount to be taxed in relation to C under S99 (2) is £250,000 less the amount by which the settlement in question is ‘more’ as a result of the company’s transfer - S99 (3).

Thus, as C and his settlement received nothing, the calculation is £250,000 less nil = £250,000 chargeable under S99 (2) above.

The last part of S99 (3) ‘leaving out of account the value of any rights or interests in the company’ means that the calculation stops here. S99 (3) prohibits the taking into account of the effects of these transactions by the company on the value of the shares (rights or interests).

E.g. the value of rights and interests still held by the shareholders as such could nullify the effect of all these provisions if that value were allowed into the above equation

#### 77.4.4 Excluded property exemptions

Section 94(2)(b) IHTA provides exemption for foreign property of foreign domiciled participator who is an individual, but it does not apply to a trustee, as it provides:

if any amount which would otherwise be apportioned to an *individual* who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

If the trust property is excluded property, there is no charge to IHT so the

---

<sup>23</sup> “Apart from” is a slip for “as a result of”; see 77.3.1 (Amount of s.94 transfer).

exemption in s.94(2)(b) is not needed.

Thus there is an interesting distinction between settled and non-settled companies. Where a company makes a transfer of value:

- (1) Where a foreign domiciled *individual* is the participator, there is no IHT charge if the property to which the company's transfer of value is attributable is not UK situate; the situs of the shares in the company is not relevant.
- (2) Where an excluded property *trust* is the participator, there is no IHT charge if the company's shares are excluded property; (the situs of the company's property is not relevant).

The IHT Manual provides:

**IHTM16244 Close companies and settled property: foreign element**  
[Sep 2018]

Bearing in mind that claims on settled property in the 'close company' (IHTM14851) regime under IHTA84/Part IV cases arise in their normal context and under normal charging sections it would seem that if the trusts identified above (IHTM16243) would in their own right, satisfy IHTA84/S48 (3), and the close company in question, being 'the property', is incorporated (and therefore situate<sup>24</sup>) outside the UK, then an apportionment will not be made.

So the trust property takes the benefit of excluded property treatment. IHTA84/S94 (2)(b) achieves this result for lifetime transfers.

Where a company has the interest in possession as above, the position is more explicit -S48(4). If the trust property is invested in FOTRA securities (IHTM04306), and on looking through the company to the real beneficiaries, it can be seen that those individuals qualify under S48 (4), then exemption will be given.

#### 77.4.5 Other exemptions

Of the two exemptions in s.94(2), para (a) still applies (close company income-receipt relief).<sup>25</sup>

Section 99(1)(b) IHTA incorporates two other minor exemptions by reference:

in relation to tax chargeable by virtue of subsection (2) of this section,

<sup>24</sup> The original erroneously reads: domiciled.

<sup>25</sup> See 77.3.5 (Income-receipt relief).

sections 94(4)<sup>26</sup> and 95<sup>27</sup> above shall apply with the necessary modifications.

## **77.5 Dividend: Close-co code analysis**

Suppose a company pays a dividend. No-one suggests that would normally give rise to an IHT charge under the IHT close company code. But the analysis may be helpful when considering other problems of the close-company code. The analysis is not entirely straightforward.

The starting point is that the company's estate is reduced. So in principle, the company makes a transfer of value.<sup>28</sup>

### *77.5.1 Dividend to individual*

Suppose a close company pays a dividend to a shareholder who is an individual.

The estate of the shareholder remains (broadly) the same. The sum received by the individual shareholder (broadly) matches the reduction in the value of their shares.<sup>29</sup> So applying the computation rules in s.94(1), the amount of the s.94 transfer is nil.

So far so good. There is one further point to consider. The shareholder may pay tax on the dividend. It is suggested that any IT or CGT charge on the dividend is too remote and should not be taken into account in computing the amount of the s.94 transfer.

This analysis allows one to reach the intuitively correct result, without having to rely on close co income-receipt relief.<sup>30</sup>

### *77.5.2 Dividend to trust*

---

26 See 77.3.7 (De minimis exemptions).

27 See 77.3.9 (Inter-company transfer).

28 The dividend might qualify for IHT arm's length transaction relief; see 70.12 (Arm's length transaction). But if the analysis here is correct it is not necessary to rely on that.

29 That is not necessarily the case, but in the absence of special circumstances, it is not likely to be necessary to pursue the valuation issues.

30 See 77.3.5 (Income-receipt relief).

If the analysis is wrong, close co income-receipt relief will often apply, on the basis that the dividend is subject to UK income tax. However that relief would not protect against foreign income tax, or if CGT is payable on the dividend, as might happen for a capital dividend of a non-resident company.

Suppose a close company pays a dividend to a shareholder who is a trustee of a discretionary trust.

One might think that the analysis is the same as for an individual. At first glance, the value of the settled property remains broadly the same. The sum received by the trustee shareholder matches the reduction in the value of the shares. So applying the computation in s.99(2), the amount of the s.99 trust transfer is nil.

The difficulty with that analysis is that trust income is not settled property until it is accumulated. Even assuming that the trustees have power to accumulate the income, and that they exercise that power, their decision to accumulate may be made after the time of payment. At the time of payment the value of the settled property is reduced. This is why undistributed income is not subject to a 10-year anniversary charge.<sup>31</sup>

The answer is that there is a s.99 transfer, but no exit charge arises because in most cases close company income-receipt relief applies, and where it does not, *exit charge* income-receipt relief applies (the latter relief is somewhat wider).<sup>32</sup>

This analysis allows one to reach the intuitively correct result.

For where a company makes a transfer of a UK residence, see 78.15 (Company dividend in specie).

## 77.6 Change in share capital/rights

Section 98(1) IHTA provides:

Where there is at any time—

- (a) an alteration<sup>33</sup> in so much of a close company's share or loan capital as does not consist of quoted shares or quoted securities
- (b) an alteration in any rights attaching to unquoted shares in or unquoted debentures of a close company,

the alteration

[A] shall be treated as having been made by a disposition made at that time by the participators, whether or not it would fall to be so treated apart from this section, and

[B] shall not be taken to have affected the value immediately before

31 See 72.7.2 (Undistributed trust income).

32 See 77.3.5 (Income-receipt relief).

33 Defined s.98(2) IHTA: "In this section "alteration" includes extinguishment."

that time of the unquoted shares or unquoted debentures.

An alteration of share capital does not cause a loss to the company's estate, so does not give rise to a s.94 transfer or a s.99 trust transfer. If the conditions in para (a) and (b) are met, there are two consequences, in short:

- Para [A]: alteration is a (deemed) disposition
- Para [B]: s.98 valuation rule

I consider these separately below.

Where an alteration in share capital/rights affects share values, it is also necessary to consider:

<b>Topic</b>	<b>Comment</b>
CGT value shifting	s.29-31 TCGA
Identity of settlor	See 94.40.2
Transfer of Assets Abroad	See 46.4
Employment-related shares	Part 7 ITEPA

### 77.6.1 *Alteration deemed disposition*

The rule is:

the alteration shall be treated as having been made by a disposition made at that time by the participators, whether or not it would fall to be so treated apart from this section

This is needed because an alteration is not a disposition in the normal sense of the word.<sup>34</sup>

The significance of the (deemed) disposition is that the alteration:

- (1) May constitute a transfer of value, if the participator is an individual
- (2) May give rise to an exit charge, if the participator is a trust.

This would not be the case if there were no disposition.<sup>35</sup>

I say the alteration *may* constitute a transfer of value/exit charge because there are other requirements to be met. An alteration does not constitute a transfer of value/exit charge if it does not change share values, or if it falls within s.10 IHTA.

I refer to a transfer of value within s.98 as a “**s.98 transfer**”.

<sup>34</sup> Though an alteration might involve an omission, which is a deemed disposition; this may be what the drafter had in mind in the last phrase.

<sup>35</sup> See 70.4 (Disposition).

Section 98(3) IHTA provides:

The disposition referred to in subsection (1) above shall be taken to be one which is not a potentially exempt transfer.

This is the “**non-PET trap**”. There is no good reason for the rule, and it ought to be repealed, along with the equivalent s.94 trap.<sup>36</sup>

### 77.6.2 Share issue: HMRC example

Shares & Assets Valuation Manual provides:

#### **SVM108280 Alterations in Share Capital** [Nov 2018]

Section 98 serves to stop avoidance by the alteration of a company’s capital or the rights attaching to it. It achieves this by treating the alterations as if they had been effected by dispositions made by the participators (normally the shareholders). To give rise to a liability one is looking for a situation where, after the company has altered its capital or varied share rights, the value of an individual’s holding after the event is less than it was before. A common case involves the creation of new classes of shares which are not issued pro rata to existing shareholders.

The Manual gives an example:<sup>37</sup>

#### **Example 1 [issue of preference & deferred shares]**

A company has issued shared capital of 100 Ordinary Shares.<sup>38</sup>

<b>Shareholder</b>	<b>Ordinary Shares</b>
A	60
B	20
C	<u>20</u>
Total	<u>100</u>

The company issues two further classes of shares:

- 20 Deferred shares (acquiring rights to votes and to 50% of the income and capital after 5 years) to C.
- 80 20% Preference shares (absorbing much of the current income)

<sup>36</sup> See 77.3.4 (Non-PET trap).

<sup>37</sup> The same example is found in IHTM14855 Transfers By Close Companies: Alterations In Share Capital, Loan Capital Or Rights [Mar 2021], where A, B and C are named Fernando, Filipe & Kimi.

<sup>38</sup> I have altered the layout of the example for clarity.

to C.

So the position becomes:

Shareholder	Ordinary	Deferred	Preference	Total
A	60			60
B	20			20
C	20	20	80	<u>120</u>
				<u>200</u>

The HMRC analysis is as follows:

Although control remains with A the value of his holding is substantially diminished and s.98 is in point.

More analytically, the alteration is a deemed disposition and a chargeable transfer. The shareholders have fallen into the non-PET trap. (They might, perhaps, be able to set aside the alteration for mistake.)

Fortunately, the trap only arises if (as in the example) shares are issued in different proportions to how the exiting shares are held. Suppose:

- (1) The new shares were issued to existing shareholders *pari passu*; and
- (2) A and B gave their newly acquired shares to C.

In that case the analysis is:

- (1) The share issue is not a s.94 transfer.
- (2) The gift is a PET, not a chargeable transfer.

As often happens, careful planning can avoid the trap.

The Manual gives 3 further examples, but these do not add much.<sup>39</sup>

<sup>39</sup> For completeness, these examples are:

**Example 2** [Rights issue taken up in part]

A company has issued share capital of 100 shares owned as to 70% by X and 30% by Y.

The company makes a 2 for 1 rights issue which is not wholly taken up by the controlling shareholder.

[This is not as clear-cut as example 1 because X's new holding may range from 70% if he takes up almost all his rights to 43% if he takes up none. In addition, when a rights issue is involved there may be an absence of gratuitous intent (which it will be for the taxpayer to prove) so that s.10 may be in point.]

**Example 3** [Related property rules]

A company has issued capital of 100 shares, 60 of which are owned by A, 30 by Mrs A and 10 by B.

## 77.7 s.98 transfer: Value transferred

If the participators are individuals, the value transferred by a s.98 transfer is in principle the reduction in the value of the shareholding as a result of the alteration.

### 77.7.1 s.98 valuation rule

There is one valuation rule. Section 98(1) IHTA provides that the alteration:

shall not be taken to have affected the value immediately before that time of the unquoted shares or unquoted debentures.

I refer to this as the “**s.98 valuation rule**”

### 77.7.2 Death value transferred rule

On death, IHT is charged on the value of the estate “immediately before” the death.<sup>40</sup> I refer to that as a “**death transfer**”. (One might call it a “s.4 transfer”.) This also has a valuation rule. Section 171 IHTA provides:

- (1) In determining the value of a person's estate immediately before his death changes in the value of his estate which
- [a] have occurred by reason of the death and
  - [b] fall within subsection (2) below
- shall be taken into account as if they had occurred before the death.
- (2) A change falls within this subsection
- [a] if it is an addition to the property comprised in the estate or
  - [b] [i] an increase or decrease of the value of any property so comprised,
  - [ii] other than a decrease resulting from such an alteration as is

---

100 further shares are issued to B at a nominal price well below market value. It should be noted that for the purpose of looking at close company transfers, the related property provisions are not in point.

**Example 4** [Loss of control]

A company has issued capital of 100 shares, of which W owns 60 and X 40. 30 shares are issued to Y and 30 to Z.

W now has 60 out of 160 issued shares and has lost control.

X now has 40 shares as a 25% holding compared to his former 40 shares as a 40% holding.

40 See 72.4 (Death: IHT charge & exemption).

mentioned in section 98(1) above;

[c] but

- [i] the termination on the death of any interest or
  - [ii] the passing of any interest by survivorship
- does not fall within this subsection.

I refer to a change within s.171(2) as a “**death-value change**”. Section 171 applies on any death transfer, but I consider it here because it mentions s.98.

The IHT Manual gives four examples where s.171 applies. The first relates to an addition of property to an estate, within s.171(2)(a):

**IHTM04046 changes in value by reason of the death** [Sep 2018]

... **Examples**

- [1] Damages payable to the personal representatives under the Law Reform (Miscellaneous Provisions) Act 1934 are included in the death estate.

The next 3 examples relate to a change in valuation, within s.171(2)(b):

- [2] A life assurance policy maturing on the death is valued as a sum immediately payable.
- [3] Property that becomes vacant on the death is valued with vacant possession.
- [4] If the deceased’s death causes a fall in the value of shares, this is taken into account.

Death can obviously affect values. It is less clear that the change occurs at the moment of death and not before. Would it not be known immediately before death that the deceased was about to die, and the market value determined accordingly? For instance, in the case of £100 policy maturing on death, is the value any less than £100 immediately before death? Death should be factored into the pre-death valuation. In other words, what matters for valuation is the immanence of death and not the occasion of death. It would be the same as if a policy matured on a fixed date, and the owner gifted it immediately before that date.

If that is right, what is the role of s.171? The answer may be that market value depends on what would be paid by the hypothetical purchaser on a hypothetical sale; and that price depends on what the purchaser hypothetically knows. The concern is an argument that the hypothetical purchaser will not anticipate the immanent death of the deceased, or would

not circumstances of sudden, unexpected death; so the policy is valued on the basis of hypothetical life expectancy of a person with the age of the deceased but not with other characteristics. The argument seems tenuous, though it has its supporters. But it is not necessary to pursue that here because if there were anything in the point, s.171 overrides it.

The proviso in s.171(2)[c] suggests that the following would or might otherwise count as a death-value change, within s.171(2):

- (1) the termination on the death of any interest or
- (2) the passing of any interest by survivorship

Point (1) makes sense on the drafter's assumption that death may not be fully factored into a valuation. Point (2) makes no sense to me; for prior to a death, the value of a joint interest, which passes by survivorship, does not seem to be affected by a subsequent death.

### *77.7.3 s.171/s.98 valuation rule: Interaction*

Section 171 does not apply to a decrease in value which:

- (1) arises as a result of the death, and
- (2) results from "such an alteration as is mentioned in s.98(1)", ie an alteration in share capital/rights of a close company

Thus a death-value change of this kind is not within the rule that it is computed "as if it had occurred before the death". Instead the s.98 valuation rule applies.

Suppose company articles provide that the deceased's shares carry rights to dividends during his or her life and not subsequently. It is assumed, perhaps doubtfully, that there is an alteration of share rights on the death. So the s.98 valuation rule applies.

## **77.8 Deferred shares**

HMRC comment on the deferred shares in the example discussed above:<sup>41</sup>

A further claim under IHTA84/S98 will arise when the deferred shares actually acquire voting and other rights in 5 years' time.

The HMRC's view is that there is an occasion of charge under s.98 when deferred shares come to rank equally with other shares. This view is long

---

<sup>41</sup> See 77.6.2 (Share issue: HMRC example).

standing:

Following recent legal advice, the Revenue's interpretation of IHTA s.98 has changed.

Until now the Capital Taxes Offices have taken the view that when deferred shares came to rank equally with another class of shares there would be no alteration in the rights of the shares within the meaning of IHTA s.98(1)(b). But there would be an alteration in the company's share capital within the meaning of IHTA s.98(1)(a).

The Board of Inland Revenue has now been advised that an alteration of rights, within the meaning of IHTA s.98(1)(b), occurs when deferred shares come to rank equally<sup>42</sup> with another class of shares.

Accordingly, claims for inheritance tax will be raised where deferred shares, issued after 5 August 1991,<sup>43</sup> subsequently come to rank equally, or become merged, with shares of another class.<sup>44</sup>

The HMRC view rests on the proposition that the occasion where deferred shares come to rank equally is an "alteration" in the company share capital or rights. Is that right? It is not an alteration in the strict sense of the word.<sup>45</sup> Time has altered but the share rights have not. They are what they have always been. Thus at first sight it seems that HMRC's position is not correct. However:

- (1) It is then difficult to see the purpose of the s.98 valuation rule. That rule assumes that there could be an alteration which affects the value of shares immediately before the time of the alteration. That seems to be referring to a prospective alteration such as deferred shares. That supports the HMRC view.<sup>46</sup>
- (2) Alternatively HMRC may say that the occasion when the rights of deferred shares change is an operation, which may be associated with

---

42 HMRC are considering a case where deferred shares come to rank equally with other shares, but the same point would apply when deferred share rights change, whether or not they rank equally with other shares.

43 So there appears to be a concession for pre-1991 share issues. The concession seems illogical, as under HMRC's pre-1991 view, there should still have been an IHT charge under para (a). But the point may not now arise.

44 *Law Society's Gazette*, 11 September 1991.

45 See *Unilever (UK) Holdings v Smith* [2002] EWCA Civ 1787.

46 It is relevant to note that deferred shares were used in pre 1974 Estate Duty planning, so the drafter of the current provisions may be taken to have them in mind.

a prior gift or issue of the deferred shares, so there is a transfer of value, at the time the deferred shares come to rank equally, and the value transferred is computed by reference to the value of the shares at that time.<sup>47</sup>

In practice it would be wise to plan on the basis that the HMRC view is correct, because to do otherwise is to invite litigation.

Unfortunately the HMRC example does not consider the application of the s.98 valuation rule, ie how does one approach the valuations required to compute the value transferred? If one ignores the alteration, there would seem to be a double charge to tax, for there was already one charge on issue of the deferred shares.

The s.98 transfer (assuming HMRC are right to say there is one) might be avoided in various ways, for instance:

- (1) Draft share rights so that there is no occasion where deferred shares come to rank equally.
- (2) Give non-deferred shares to charity before the deferred shares come to rank equally.<sup>48</sup>

## 77.9 Alterations: Trust participator

Section 100(1) IHTA provides:

This section applies where, by virtue of section 98 above, an alteration in a close company's share or loan capital or of any rights attaching to shares in or debentures of a close company is treated as a disposition made by the participators, and—

- (a) a person is a participator in his capacity as trustee of a settlement, and
- (b) the disposition would, if the trustee were beneficially entitled to the settled property, be a transfer of value made by him, and
- (c) at the time of the alteration an individual is beneficially entitled to an interest in possession<sup>49</sup> in the whole or part of so much of

---

47 See 70.14 (Disposition by 2 operations).

48 See Kessler, Wong & Birckbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed, 2019/20), para 24.34 (Deferred shares) online version <https://www.taxationofcharities.co.uk>

49 Section 100(1A) IHTA restricts the rule to an estate IIP:

“Where the interest in possession is one to which the individual became beneficially

the settled property as consists of unquoted shares in or unquoted securities of the close company.

Assuming these conditions are satisfied, we move on to the rule in s.100(2) IHTA:

Where this section applies, such part of the individual's interest shall be treated for the purposes of Chapter II of Part III of this Act as having come to an end at the time of the alteration as corresponds to the relevant decrease of the value of the property in which the interest subsists, that is to say the decrease caused by the alteration.

This echoes the position for a s.94 transfer.<sup>50</sup>

What about a relevant property trust? The deemed disposition may give rise to an exit charge as a depreciatory transaction.

The relief for excluded property will work in the same way as for a s.94 transfer.

## **77.10 Close-co IHT: Liability**

Section 202 IHTA provides:

- (1) The persons liable for tax chargeable by virtue of section 94(1) or section 99(2) above are—
- (a) the company making the transfer of value concerned, and
  - (b) so far as the tax remains unpaid after it ought to have been paid,
    - [i] the persons to whom any amounts have been apportioned under section 94 above and
    - [ii] any individual (whether such a person or not) the value of whose estate is increased by the company's transfer.
- (2) A person to whom not more than 5 per cent of the value transferred by the company's transfer is apportioned shall not as such be liable for any of the tax; and each of the other persons to whom any part of that value has been apportioned shall be so liable only for such part of the

---

entitled on or after 22nd March 2006, this section applies only if the interest in possession is—

- (a) an immediate post-death interest,
  - (b) a disabled person's interest, or
  - (c) a transitional serial interest
- or falls within section 5(1B) above.”

<sup>50</sup> See 77.4.1 (Estate IIP trust).

tax as corresponds to that part of that value.

(3) A person the value of whose estate is increased by the company's transfer shall not as such be liable for a greater amount than the amount of the increase.

(4) No person other than those liable under this section shall be liable for any tax chargeable by virtue of section 94(1) or section 99(2) above.

## CHAPTER SEVENTY EIGHT

# IHT RESIDENTIAL PROPERTY CODE

78.1

### *Cross references*

The following topics are considered elsewhere:

122.7.1 (IHT residence-property code) - trust registration

119.16.1 (IHT residence-property code) - Inland Revenue charge

## 78.1 IHT residence-property code

This chapter considers:

- (1) The IHT rules for residential property, which I call the “**residence-property code**”.
- (2) A general discussion of some planning issues for the family home, in the light of this and previous chapters.

The development of the residence-property code can be traced through consultation papers, but these are now of historical interest only:

- Technical Briefing on Non Dom/IHT Residential property changes (“**the 2015 residence-property paper**”)<sup>1</sup>
- Reforms to the taxation of non-domiciles: further consultation (“**the 2016 consultation paper**”)<sup>2</sup>
- Reforms to the taxation of non-domiciles: response to further consultation<sup>3</sup>
- Finance Bill March 2017

---

1 HMRC, “Technical Briefing on Non-Dom changes announced at Summer Budget 2015” (2015).

2 <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles-further-consultation> (August 2016)

3 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf) (December 2016)

- Draft clauses and EN July 2017

The IHT Manual has a short entry-level discussion of the topic.

HMRC have answered a set of questions from the professional bodies (“Sch A1 Q&As”).<sup>4</sup>

## 78.2 De-exclusion of sch A1 property

Para 1 sch A1 IHTA provides:

Property is not excluded property by virtue of section 6(1) or 48(3)(a) [non-UK situate property]<sup>5</sup> if and to the extent that paragraph 2 or 3 applies to it.

The property (which I call sch A1 property) is chargeable (non-excluded) property, even if not UK situate. Adopting HMRC’s neologism, para 1 sch A1 IHTA *de-excludes* the property.

Paragraphs 2 and 3 apply to four categories of property:

Para	My term	Typical case	See para
2	Residence-company	Interest (shares/loan) in close co holding UK residence	78.3
2	Residence-partnership	Interest in partnership holding UK residence	78.4
3(a)	Relevant loan	Loan to individual/trust to purchase UK residence	78.7
3(b)	Residence-security	Property charged as security for relevant loan	78.9

I refer to these together as “**Sch A1 property**”.

These are not transparent labels, but there are no short labels which neatly encapsulate these four categories of property.

Until 2017, property was either excluded or chargeable (not excluded).

4 <https://www.tax.org.uk/policy-technical/submissions/finance-no-2-act-2017-taxation-non-uk-domiciliaries>

This comes with the following disclaimer:

“The Q&As do not constitute advice and are not a substitute for professional consideration of the issues by the professional adviser in each client’s specific context. Furthermore, these Q&As should be read in conjunction with HMRC’s comments and advisers should consider the position to take for themselves.”

There is also advice for those who disagree with HMRC views:

“Where an adviser adopts a position contrary to that of HMRC the fundamental principles and standards set out in PCRT (with particular reference to paragraph 2.21 et seq) should be considered in terms of communication with the client and any reporting and disclosure required.” See 116.9.2 (Disclosure that HMRC disagree).

5 See 71.2 (Non-settled foreign property); 71.8 (Trusts: Foreign situate property).

sch A1 property may be excluded to an extent. If property is excluded to an extent, can one make a gift of the excluded part separately from the de-excluded part? Presumably not. But one could divide a company into A and B shares, in such a manner that the A shares are excluded property and B shares are chargeable. Likewise for a relevant loan.

### **78.3 Residence-company**

Para 2(1) sch A1 IHTA provides:

This paragraph applies to an interest in a close company or in a partnership, if and to the extent that the interest meets the condition in sub-paragraph (2).

Para 2 deals with companies and partnerships together, but it is convenient to consider them separately.

I refer to a company within para 2(1) as a **“Residence-company”**.

#### *78.3.1 Attribution condition*

Para 2(2) sch A1 IHTA provides:

The condition is that the value of the interest is—

- (a) directly attributable to a UK residential property interest,<sup>6</sup> or
- (b) attributable to a UK residential property interest by virtue only of one or more of the following—
  - (i) an interest in a close company;
  - (ii) an interest in a partnership;
  - (iii) property to which paragraph 3 (loans) applies<sup>7</sup>.

I refer to this as the **“attribution condition”**. There are 4 ways that the attribution condition may be satisfied. I refer to attribution condition **“limb (a) and limb (b)(i), (ii) and (iii)”**.

Attribution condition limb (a) is straightforward. It applies where the company owns the residential property interest.

Attribution condition limb (b) is more complicated. The value of the interest in the company must be:

- (1) Not directly attributable to a UK residential property interest (because

---

<sup>6</sup> See 78.17 (“Residential property interest”).

<sup>7</sup> See 78.7 (Relevant loan: Definition); 78.9 (Residence-security).

the company does not own UK residential property directly)

- (2) Indirectly attributable to a UK residential property interest by virtue of the company owning items (i) to (iii)

It is possible that the value of an interest in a company may be:

- (1) indirectly attributable to a UK residential property interest, but
- (2) not by virtue of items (i) to (iii).

An example is if the company owns the benefit of a loan, secured on UK residential property, which is not a relevant loan. This does not fall within limb (b) and the interest in the company is not sch A1 (de-excluded) property.

### 78.3.2 Chain of companies

Attribution condition limb (b)(i) applies where:

the value of the interest [in a close company] is—

- (b) attributable to a UK residential property interest by virtue ... of ...
  - (i) an interest in a close company

Suppose a chain of companies, thus:

Attribution condition (b)(i) is met, and so the Holdco shares are chargeable (de-excluded) property, because their value is attributable to the residence, by virtue of Holdco’s interest in Subsid (a close company).

The shares in Subsid are also chargeable property, but that does not matter.<sup>8</sup>

Suppose:

**Case 1**

**Case 2**

---

<sup>8</sup> Unless Holdco makes a transfer of value, see 77.1 (Transfer of value by close co), but that is not likely to happen.

In case 1, a close company holds an interest in an open company. Some of the value of the close co is attributable to the residence. But it is not attributable by virtue of an interest in a close company, so the attribution condition is not satisfied.

In case 2, an open (non-close) company holds land through a subsidiary. The *open* company is not within para 2, even if its value is attributable to the residence by virtue of its interest in the close company.

### 78.3.3 Residence-company Interest

Para 9 sch A1 IHTA provides the expected definition of close company; the term includes a non-resident close company.<sup>9</sup>

Para 9 provides a wide definition of “interest in a company”:

(1) In this Schedule ...

references to an interest in a close company are to the rights and interests that a participator<sup>10</sup> in a close company has in that company.

(2) In this paragraph...

references to rights and interests in a close company include references to rights and interests in the assets of the company available for distribution among the participators in the event of a winding-up or in any other circumstances.

9 Para 9(1) sch A1 IHTA provides:

“In this Schedule “close company” means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts”.

See 99.29.1 (Non-resident close company).

10 Para 9(2) sch A1 IHTA incorporates the standard definition, though by slightly non-standard wording:

“In this paragraph “participator”, in relation to a close company, means any person who is (or would be if the company were resident in the UK) a participator in relation to that company within the meaning given by section 454 of the Corporation Tax Act 2010.”

This will include a loan to the company, if the lender is a loan creditor (and so a participator).<sup>11</sup> A creditor does not have an interest in a company, in the normal sense: they have a claim against the company. But in the event of a winding-up, a creditor has an interest in the assets of the company.<sup>12</sup>

I refer to an interest in a residence-company, in this wide sense, as **“Residence-company Interest”** with initial capitals to reflect the technical nature of the expression. (Note this term is different from the statutory term “residence-property interest” which means an interest in UK land.)

#### 78.3.4 Company owns relevant loan

Attribution condition limb (b)(iii) applies where:

the value of the interest [in a close company] is ... attributable to a UK residential property interest by virtue ... of ... (iii) property to which paragraph 3 (loans) applies.

Para 3 applies to (1) relevant loans and (2) residence-security.<sup>13</sup> It is helpful to consider these separately.

One might have expected the legislation to say:

*the value of the interest [in a close company] is ... attributable to property to which paragraph 3 (loans) applies [ie value is attributable to a relevant loan or residence-security]*

But that is not what it says.

Suppose a company has lent to an individual to finance acquisition of a UK residence. The company holds the benefit of the loan (a relevant loan, ie a loan to which para 3 applies):

---

11 See 99.25.2 (“Loan creditor”).

12 I think that is clear on first principles, but if further authority is needed, see 99.28 (Close co winding-up test).

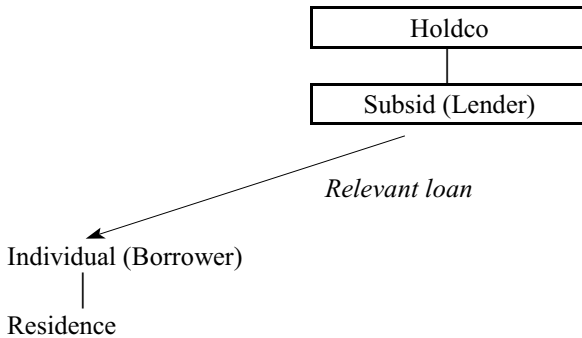

13 See 78.7 (Relevant loan: Definition); 78.9 (Residence-security).

The value of the company is attributable to the relevant loan. But is the value attributable to a *UK residential property interest* (ie the UK residence<sup>14</sup>)? That will depend on the facts.<sup>15</sup>

Similarly, suppose a company subsidiary has lent to an individual to finance acquisition of a UK residence:

The value of Subsid is attributable to the relevant loan. The value of Holdco is also attributable to the relevant loan, by virtue of its interest in Subsid. But the question is whether the value of Holdco is attributable to the *UK residential property interest*. As in the previous example, that will depend on the facts.

### 78.3.5 Company owns residence-security

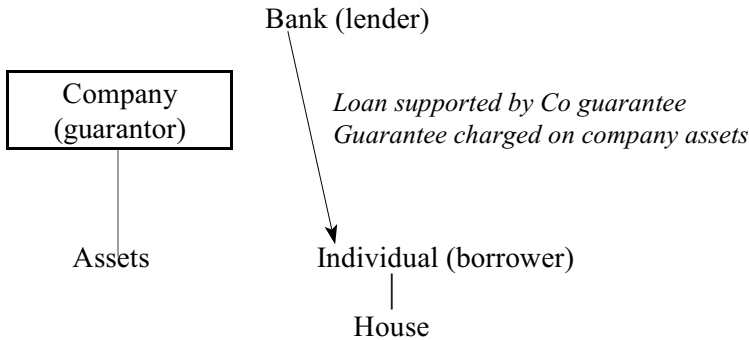

Attribution condition limb (b)(iii) applies where:

the value of the interest [in a close company] is ... attributable to a UK residential property interest by virtue ... of ... (iii) property to which paragraph 3 (loans) applies.

14 See 78.17 (“Residential property interest”).

15 See 80.16.2 (Derived property: Loan).

Suppose a company has guaranteed a relevant loan and secured that guarantee by a charge on its assets. Diagrammatically:

The assets of the company are a residence-security, and not excluded property. The value of the company is attributable to the value of the assets. But the value of the company is not attributable to a UK residential property interest, so the attribution condition is not met, and the company shares are not sch A1 (de-excluded) property.

## 78.4 Residence-partnership

Para 2(1) sch A1 IHTA provides:

This paragraph applies to an interest ... in a partnership, if and to the extent that the interest meets the condition in sub-paragraph (2).

The attribution condition is the same as for a Residence-company.<sup>16</sup>

I refer to this as a “**Residence-partnership**”.

An interest in a partnership set up specifically to hold a UK home is likely to be UK situate property on general principles.<sup>17</sup> Perhaps HMRC took a different view; or perhaps they just wanted to put it beyond doubt. The issue is not now likely to be tested.

I do not consider partnerships in detail, as partnerships do not commonly hold residential property.

### 78.4.1 “Partnership”: Definition

Para 10 sch A1 IHTA provides the definition:

<sup>16</sup> See 78.3.1 (Attribution condition).

<sup>17</sup> See 97.33.2 (Partnership holding land).

In this Schedule “partnership” means—

- (a) a partnership within the Partnership Act 1890,
- (b) a limited partnership registered under the Limited Partnerships Act 1907,
- (c) a limited liability partnership formed under the Limited Liability Partnerships Act 2000 or the Limited Liability Partnerships Act (Northern Ireland) 2002, or
- (d) a firm or entity of a similar character to either of those mentioned in paragraph (a) or (b) formed under the law of a country or territory outside the UK.

This definition is similar to the SDLT/ATED definition,<sup>18</sup> but not identical: a foreign LLP is an SDLT/ATED-partnership, but it is classified as a company, not a partnership for the purposes of the IHT residence-property code. That is sensible, and presumably deliberate. A general or limited partnership would be within the IHT residence-property code, even if the partnership is large and would not be a close company if it were corporate. But in practice large investment partnerships are usually structured as foreign LLPs, which do not count as partnerships for the purpose of the IHT residence-property code, they count as companies. They will be classified as open companies and so fall outside the IHT residence-property code.

## 78.5 5% exemption

Para 2(3) sch A1 IHTA provides:

For the purposes of sub-paragraphs (1) and (2) disregard—

- (a) an interest in a close company, if the value of the interest is less than 5% of the total value of all the interests in the close company...

I refer to this as the “**5% exemption**”.

### 78.5.1 *The 5% test*

The test is whether “the *value* of the interest is less than 5% of the *total value* of all the interests in the close company”; not whether the interest is less than 5% of the shares.

---

18 See 93.2.1 (“Partnership” for SDLT/ATED).

The total value of all the interests in the company includes the value of the interest which may qualify under the 5% test. The section refers to *all* the interests in the company, not all the other interests.

It is not clear whether one values the interests separately, or brings them together and values them as one item. It is suggested that one values them separately.<sup>19</sup>

In case 1:

- (1) X has a 6% shareholding
- (2) Y (not connected) has the rest of the shares.

X's holding is likely to satisfy the 5% test. Even a 10% holding is likely to do so because the discount for a 10% holding is likely to reduce its value to less than 5% of the value of all the interests (the 94% and the 6% interests, valued separately or even if valued together).

In case 2:

- (1) X has a 6% shareholding.
- (2) 15 other shareholders (not connected with X) have an equal share in the rest (approximately 6% each).<sup>20</sup>

What is “total value of all the interests in the company”? Is it the value of the 16 minority holdings, valued separately? Or the value of a 100% shareholding? The application of the 5% test depends on the answer to this question. It is suggested that the former is the case, so the 5% test is not met.

Sch A1 Q&As provide:

<sup>19</sup> That is consistent with the connected person aggregation rule in para 2(4) which directs the value of a person's interest to be increased by the value of connected person interests (ie it requires separate valuations of each interest); see 78.5.3 (Connected persons). A similar issue arose in *Short v Treasury Commissioners* [1948] AC 534 and received the same answer.

<sup>20</sup> It is assumed that some of the 15 shareholders are associates, so the company is close.

**Question 3: Para 2(3): de minimis provisions**

... Curiously this de minimis provision does not value the minority shareholding and then compare it with the value of the company as a whole or look at how much value in the company is derived from residential property. Instead it compares the value of each participator's interest with the value of total participators' interests in the company. Does HMRC agree that this will lead to different results depending on whether the shareholder interests in a company comprise one majority shareholding or many small shareholdings and the extent to which the company is funded by borrowings?

*Example 1*

Newco is owned by two unconnected people, one of whom holds 80 per cent and the other 20 per cent. That 20 per cent interest might well be worth less than 5 per cent of the aggregate value of the 20% interest and the 80% interest.

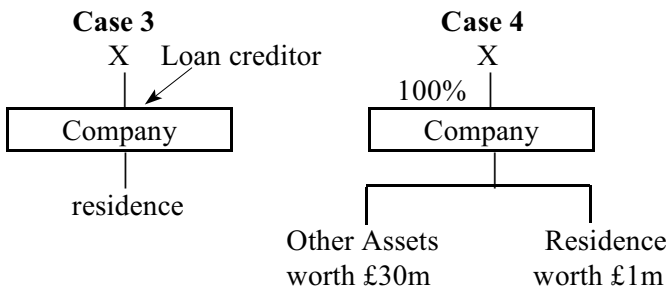

If on the other hand five unconnected people own 20 per cent each then it is unlikely the de minimis exemption will apply.

If Newco is funded with a loan from an unconnected third party of, say, 70% of the value of the property, the de minimis exemption is likely to apply to a 20% shareholding in both of the above patterns of shareholdings.

*Suggested answer*

We broadly agree with the above analysis. The alternative option that the draftsman could have adopted is to compare the value of the relevant person's interest with the value of 100% of the share capital but that is not the approach here.

HMRC agree.

The “interests in the company” include the interest of a loan creditor.<sup>21</sup> So in case 3, even a 100% shareholding may meet the 5% test, if the loan to the loan creditor is sufficiently large. But the loan is a Residence-company Interest, and so not excluded property.

In case 4, the value of the residence is less than 5% of the value of the company assets. But the test depends on the value of the *interests* in the company, not the value of the *assets* of the company; so the 5% test is not met.<sup>22</sup>

### 78.5.2 *One person holds 2 interests*

One person may have 2 interests in a company, eg shares and a loan. If the loan is small, the value of the loan may be less than 5% of the combined value of shares and loan. If the loan is large, the value of the shares may be less than 5% of the combined value of the shares and loan. Contexts suggests that one values the two assets together, so they do not qualify for the 5% exemption. But that is not a literal reading.

### 78.5.3 *Connected persons*

Connected persons interests are aggregated. Para 2(4) sch A1 IHTA provides:

In determining under sub-paragraph (3) whether to disregard a person’s interest in a close company or partnership, treat the value of the person’s interest as increased by the value of any connected person’s<sup>23</sup> interest in the close company or partnership.

Sch A1 Q&As provide:

**Question 4: Connected party interests and de minimis provisions**

... Para 2(4) says that one is to treat the value of the person’s interest as increased by the value of any connected person’s interest in the close company or partnership. This seems to differ from valuing the aggregate of the interests of the relevant person and all those connected with him.

*Example 2*

---

21 See 78.3.3 (Residence-company Interest).

22 Sch A1 Q&As agrees: “Note that there is no de minimis exemption just because the company only owns a very small amount of residential property.”

23 See 99.12.2 (Connected: IHT definition).

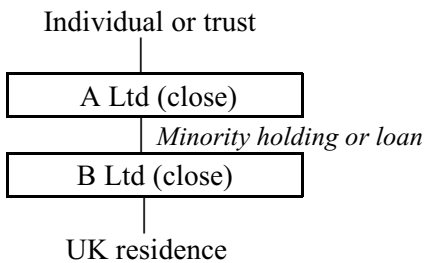

Adam and his son and daughter each has a 3% shareholding in a close company where each 3% is only worth 1.5% of the total value of all the interests in the company. As worded do HMRC agree that the value of Adam's interest is increased by the value of his children's interests - to 4.5% of the total value of all the interests in the company. If instead one valued the aggregate of the interests of Adam and his children, Adam's enlarged interest might then be worth 5% or more of the total value of all the interests in the company.

*Suggested answer:* The first approach should be taken so that Adam's interest is increased to 4.5% of the total value of all interests in the company.

HMRC agree. No other answer is possible.

#### 78.5.4 Chain of companies

Suppose:

In the absence of para 2(2), the attribution condition would be met. But if the minority holding or loan is valued at less than 5%, it is in principle disregarded for the purposes of para 2.

Sch A1 Q&As provides:

It should also be borne in mind that if a shareholder owns a company X Ltd which in turn owns a small interest of Y Ltd which holds the residential property, the de minimis provisions must be applied through all levels upwards. The value of the interest of X Ltd may be less than 5% of the total value of all the interests in Y Ltd.

#### 78.5.5 Partnership 5% exemption

Para 2(3) sch A1 IHTA provides:

For the purposes of sub-paragraphs (1) and (2) disregard—

- (b) an interest in a partnership, if the value of the interest is less than 5% of the total value of all the interests in the partnership.

Since partners are in general connected persons,<sup>24</sup> members of a partnership holding a Residence-company will not qualify for the 5% exemption, even if the partner holds less than 5% of the partnership. But the issue will not often arise.

## 78.6 Liabilities of Residence-company

Para 2(5) sch A1 IHTA provides:

- [a] In determining whether or to what extent the value of an interest in a close company or in a partnership is attributable to a UK residential property interest for the purposes of sub-paragraph (1),
- [b] liabilities of a close company or partnership are to be attributed rateably to all of its property, whether or not they would otherwise be attributed to any particular property.

This is relevant if (in short) the company

- (1) holds UK residential property and other property and
- (2) has a liability

So it will not arise very often. It could be avoided by using separate companies for the two classes of asset.

It is not entirely clear how para 2(5) applies to liabilities which are also an interest (loan-participation) in a residence-company. For instance suppose:

- (1) A company owns £2m residential property and £8m non-residential property.
- (2) The company was funded with £7m of shares (owned by X) and £3m of loan-notes (owned by Y). Diagrammatically:

<sup>24</sup> See 99.18 (Connected: Partners).

If Y dies, how much of the value of Y's loan is attributable to residential property? The obvious answer is 20% of £3m = £600k. But para 2(5) suggests that one first attributes the £3m liability rateably against the residential and commercial property - reducing the value of the residential property from £2m to £1.4m.

Is the answer then that value of Y's loan-notes are only 30% of £1.4m = £420k? Value has been lost in this process (and in a company highly-g geared with shareholder loan it would then seem, on this logic, to be possible to eliminate a large proportion of value for IHT purposes).

The fallacy in the above argument seems to be in confusing the value, post attribution of liabilities, of the company's assets, with the value of the participations in that company. The rateable attribution of liabilities under para 2(5) is there merely to establish the proportions (where they would otherwise actually fall differently). But para 2(5) does not reduce the value of the participations - unlike a third-party loan which would. On the above example the 20/80 proportions are preserved both before and after the para 2(5) exercise and Y must therefore apply  $20\% \times £3m = £600k$ .<sup>25</sup>

### 78.6.1 Liability: Residence-partnership

A liability of a Residence-partnership raises the question of the interaction of this debt allocation rule and relevant loan rules. Sch A1 Q&As discusses this:

#### **Question 6: Corporate liabilities**

The position is reasonably clear for companies as loans to companies cannot be relevant loans and the purpose for which the loan is taken out is irrelevant. However, a loan to a partnership can be a relevant loan within para 4 if used to finance the acquisition of UK residential property.

#### **Example 3**

A partnership holds a UK residential property worth £2 million and borrows £10 million from X (a foreign dom) to invest in equities.

Diagrammatically:

---

<sup>25</sup> I am grateful to John Barnett for this observation.

The Q&A analysis is as follows:

This is not a relevant loan.

However, the loan reduces the value of the UK residential property pro rata.

The same is true if a company borrows to buy equities. The loan is still in part deductible against the value of the residential property.

More analytically:

- (1) The loan reduces the value of the partnership interest.
- (2) The partnership interest is chargeable (de-excluded) property to the extent that the value of the partnership interest is attributable to the residence.
- (3) In making that attribution, the partnership liability is attributed across the partnership property as a whole.

But it comes to the same thing.

In the above example, the loan was made for the purchase of the equities. Consider the same structure but suppose the loan was made for the purchase of the property:

If the partnership borrows £2m to purchase residential property but also owns other assets of £10m,

- [1] only one sixth of the borrowing reduces the value of the residential property for the purposes of calculating tax on the partnership interest but
- [2] the entire loan is a relevant loan and therefore a non-excluded asset and fully chargeable to IHT...

There is potentially double taxation here.

By contrast if the loan is to a company

- [1] that [the loan] is a para 2 participator interest [in my terminology, a Residence-company Interest] not a relevant loan and
- [2] only a proportion of it will be [chargeable property under para 2] as only a proportion will be attributable to residential property.

HMRC agree.

In practice, partnerships do not usually hold a UK residence, so this issue will not often arise.

## **78.7 Relevant loans**

Para 3 sch A1 IHTA provides:

This paragraph applies to—

- (a) the rights of a creditor in respect of a loan which is a relevant loan (see paragraph 4) and
- (b) money or money's worth held or otherwise made available as security, collateral or guarantee for a loan which is a relevant loan, to the extent that it does not exceed the value of the relevant loan.

So (in short) the significance of a relevant loan is that:

- (a) the benefit of the loan and
  - (b) security for the loan
- are chargeable (de-excluded) property even if not UK situate.<sup>26</sup>

## **78.8 Relevant loan: Definition**

### **78.8.1 “Loan”**

Para 6(6) provides a wide definition:

- [a] In this Schedule, references to a loan include
  - [i] an acknowledgment of debt by a person or
  - [ii] any other arrangement under which a debt arises;
- [b] and in such a case references to money or money's worth made available under the loan are to the amount of the debt.

This includes a sale at market value where the purchase price is left outstanding.

Why did the drafter not just say that “loan” includes any debt?

---

<sup>26</sup> See 78.2 (De-exclusion of sch A1 property).

### 78.8.2 *Relevant loan*

Para 4(1) sch A1 IHTA provides:

For the purposes of this Schedule a loan is a relevant loan if and to the extent that money or money's worth made available under the loan is used to finance, directly or indirectly—

- (a) the acquisition by an individual, a partnership or the trustees of a settlement of—
  - (i) a UK residential property interest, or
  - (ii) property to which paragraph 2 to any extent applies [Residence-company/partnership]

I have considered referring to a relevant loan as a “**residence-loan**”, which would be a more transparent term, but it is better to adopt the statutory terminology. It might be helpful sometimes to gloss the term and say “relevant (de-excluded) loan”.

It does not matter who makes the loan: a relevant loan may be made by an individual, partnership, trust or company.

The concept of “relevant loan” here must not be confused with “relevant debt” as defined for the purposes of remittances.

### 78.8.3 *Loan to company*

If a person lends to a *company* for the company to acquire a UK residence, the loan not a relevant loan: the requirement of para (a) is not met. But the benefit of the loan is in principle a Residence-company Interest and chargeable (de-excluded) property under para 2 sch A1 IHTA.<sup>27</sup>

If a close company (A Ltd) lends to another close company (B Ltd), the benefit of the loan may be a Residence-company Interest (being an interest in B Ltd). So the shares of A Ltd may not be excluded property so far as their value was attributable to a UK residential property interest, by virtue of the loan.

If T (an individual or trust) borrows from an outside lender, and lends on to a company, there are two loans:

- (1) The loan from the outside lender to T: This is a relevant loan as it is used to finance the acquisition of the Residence-company Interest.

---

<sup>27</sup> See 78.3.3 (Residence-company Interest).

- (2) The loan from T to the company: This is not a relevant loan, but it is a Residence-company Interest.

#### 78.8.4 *Bank/commercial loan*

A loan from a bank to a company is not a relevant loan; and the benefit of the loan is not a Residence-company Interest (because the bank is not a loan creditor<sup>28</sup>).

A loan from a bank to an individual/partnership/trust for the purpose of acquiring a UK residence is a relevant loan. That does not matter if the lender is an open company. But it could affect a bank which is a close company as (subject to the 5% exemption) its shares could be chargeable (de-excluded) property.<sup>29</sup> Fortunately BPR would normally be available.<sup>30</sup>

A non-bank loan, (ie the lender is not a bank), to a company, is in principle not a relevant loan; but the benefit of the loan is a Residence-company Interest. This is so whether or not the loan is on commercial terms or made at arm's length.

A non-bank loan to an individual/partnership/trust for the purpose of acquiring a UK residence is a relevant loan. Again, this is so whether or not the loan is on commercial terms or made at arm's length.

#### 78.8.5 *Acquisition by intermediary*

Para 4(1) sch A1 IHTA continues:

For the purposes of this Schedule a loan is a relevant loan if and to the extent that money or money's worth made available under the loan is used to finance, directly or indirectly ...

- (b) [i] the acquisition by an individual, a partnership or the trustees of a settlement of an interest in a close company or a partnership ("the intermediary") and
- [ii] the acquisition by the intermediary of property within paragraph (a)(i) or (ii) [UK residential property interest/ Residence-company/partnership]

---

28 See 99.25.10 (Bank creditor).

29 To the extent that the value of the shares is attributable to a UK residence; but this may not be the case, it depends on the facts; see 78.3.4 (Company owns relevant loan).

30 See 78.16.1 (APR/BPR).

I refer to this as the “**intermediary rule**”.

The IHT Manual provides this example:

**IHTM04313 Relevant Loans** [Jan 2020]

Example 7 (John and Seamus)

J is domiciled in the Republic of Ireland. He owns all of the shares in a Jersey Company (J Co) that owns foreign assets worth £10m.

J's brother S, who is also domiciled in the Republic of Ireland lends J £2m in order to fund J Co (by way of loan) and then J Co purchases UK residential properties worth £12m.

Diagrammatically:

The HMRC analysis is as follows:

J's interest in J Co is no longer excluded property because the value of J's stake in that company is now attributable to UKRPI [a UK residential property interest].

S has made a relevant loan, which is not excluded property. While his loan did not fund the acquisition of a UKRPI by an individual, partnership or trustee it was used by J to acquire an interest (as a loan creditor) in J Co and J Co as an intermediary has acquired a UKRPI.

But one does not need the intermediary rule (para 4(1)(b) IHTA) to reach the conclusion that S's loan is a relevant loan. The loan falls within para 4(1)(a)(ii). So it is not clear what the intermediary rule is for. It seems to be otiose.

Note that if the loan to J Co was made by another close company K Co then that loan would not be a relevant loan. Instead the participators in K Co would have an interest in J Co. and therefore an indirect interest in the UKRPI, subject to the de minimis rule (IHTM04312).

### 78.8.6 *Finance indirectly*

The wording is based on s.162A/162B IHTA, on which there is extensive HMRC guidance.<sup>31</sup>

Para 4(2) sch A1 IHTA provides an inclusive definition:

- [A] In this paragraph references to
  - [i] money or money’s worth made available under a loan or
  - [ii] sale proceeds<sup>32</sup>being used “indirectly” to finance the acquisition of something include
- [B] the money or money’s worth or sale proceeds being used to finance—
  - (a) the acquisition of any property the proceeds of sale of which are used directly or indirectly to finance the acquisition of that thing, or
  - (b) the making, or repayment, of a loan to finance the acquisition of that thing.

Para (a) would cover the case where:

- (1) T borrows to acquire an asset.
- (2) T sells the asset.
- (3) T uses the sale proceeds to acquire a residence.

Para (b) would cover the case where:

- (1) T borrows to purchase an residence (“debt 1”).
- (2) T borrows to repay debt 1 (“debt 2”).

That might not be caught otherwise.<sup>33</sup>

Suppose:

- (1) Year 1: A loan is made to an individual/trust.
- (2) The individual/trust uses the proceeds to subscribe for shares in a

---

31 See 76.17 (Excluded property disallowance).

32 The expression sale proceeds (or rather, proceeds of sale) is in fact used only in para 4(2)[B](a).

33 See 76.20 (“Indirectly” financing).

close company.

(3) Year 3: The company acquires a residence.

The loan becomes a relevant loan in year 3.

Sch A1 Q&As provides:

**Question 18: Meaning of “indirectly finances”**

... Clearly ... there must be some limits to the meaning of “indirect”.

If A lends to B who buys a car, which he sells 4 years later; and then gives the proceeds of sale to his children; and those children 3 years after that unexpectedly buy a UK residential property, then it would be difficult to argue that A has indirectly financed the acquisition of a UK residential property interest.

However, it is unclear whether what breaks the chain is (a) the purpose of the loan (b) the intention of the borrower (c) the proximate use of the proceeds (d) the unexpectedness of the residential property purchase (e) the passage of time (f) a new actor in the chain (g) some other factor or (h) some combination of the above.

*Suggested answer*

The use of the verb “to finance” is important here. In relation to similar language in s162A IHTA 1984, HMRC has confirmed (for instance) that a person borrowing to buy a UK house (and thereby not using non-UK monies which they would otherwise have used to effect that purchase) cannot be said to be “financing” the maintenance of the non-UK monies; rather they are “financing” the purchase of the UK house.<sup>34</sup>

It is not possible to give hard and fast guidance covering every case. However, in interpreting whether a loan “indirectly finances”, one needs to examine - using a realistic assessment of the facts and a credible view of the parties’ intentions - what the purpose of the loan was and what it was contemplated would be done with the proceeds. Para 4(2) makes it plain that one cannot get out of the relevant loan provisions simply by inserting an intervening asset or an intervening person in the chain. But if the loan is intended for one purpose which is fulfilled then an unexpected subsequent use of the monies, such as in the example above, would not constitute the indirect financing of a UK residential property interest.

I suggest the matter should depend on what is the arrangement. HMRC

---

<sup>34</sup> But is this a good analogy?

say:

We agree that there could be cases where a factual link between a loan and an acquisition is too remote for it to be a relevant loan.

This is no doubt correct, but it is not exactly guidance.

### 78.8.7 *Lender unaware of use of loan*

The lender may not know what money lent is indirectly used for.

Sch A1 Q&As provides:

#### **Question 19: Lender unsure what a borrower has done with the proceeds of a loan**

Lenders may not always know what a borrower has done with the proceeds of a loan. How, in such a case, are lenders to assess whether some or all of their loan is a relevant loan?

#### **Example 11**

Mr J is a wealthy individual with many different investments and interests worth hundreds of millions. Many of these investments are illiquid and, from time to time Mr J has cash-flow difficulties. At such times he borrows from a family trust set up, many years ago, by his (non-domiciled and non-resident) mother. Mr J is clearly good for the money and the trustees do not impose any particular restrictions on the use to which he puts the borrowed-monies: they are simply for his general lifestyle needs.

Mr J spends the money on a variety of things including school fees, holidays, living expenses and (potentially) in maintaining one or more of his homes around the world (including the UK). Mr J also uses the monies to make payments to his ex-wife under their divorce settlement. His ex-wife spends those payments on a similar range of things which may include enhancing or maintaining her UK property.

The family trust, which until now has been an excluded property trust, has a 10 year anniversary approaching and needs to know what proportion of the loans to Mr J may be “relevant loans”. However, the loans all predate the 2017 provisions (in some cases by up to 20 years), and it is impossible for either the trustees or Mr J to reconstruct what Mr J did with the loans. The position is even more difficult in relation to a closely controlled foreign bank which may have made many 100s of loans without inquiring in all cases how such borrowings are used. On the death of a shareholder or partner how can the executors proceed?

*Suggested answer*

As in the previous question the use of the verb “to finance” is important here. The trustees and Mr J should make as detailed enquiries as they can and if it is clear that a particular residential property interest - for instance a new purchase or a major refurbishment or extension of an existing property - was clearly what the loan was spent on, then they should report accordingly. However, where it is clear that the purpose of the loan was to “finance” general living expenses, then the fact that some of those living expenses might have included everyday repairs and other low-level property expenses would not be what the loan “financed”.

Similarly, on these particular facts, a loan used to finance a divorce settlement which the ex-wife unexpectedly spends on UK property may be thought to be sufficiently distant not to be caught (the position might be different if the divorce settlement specifically contemplated the purchase of a UK house, for instance).

HMRC will take a pragmatic view.

Lenders should make appropriate enquiries and report obvious use of loan-funding, but low-level use which cannot be quantified and more distant use by third parties will not be caught by these provisions.

The position for the bank may be more difficult but BPR may often assist on the death of a shareholder.

An “arrangement” analysis makes the position clearer for the lender.

HMRC say:

We agree that there is a practical issue here and that HMRC will take a pragmatic view.

This is not exactly guidance, but the reader may infer tacit agreement with the Q&A view.

### 78.8.8 *Acquisition*

Para 4(3) sch A1 IHTA provides an artificial definition:

[A] In this paragraph references to the acquisition of a UK residential property interest by an individual, a partnership, the trustees of a settlement or a close company<sup>35</sup> include

[B] the maintenance, or an enhancement, of the value of a UK residential property interest which is (as the case may be) the

---

35 The words “or close company” relate to the reference to the acquisition by an intermediary, in para 4(1).

property of the individual, property comprised in the settlement or property of the partnership or close company.

### 78.8.9 *Loan to pay rent*

Sch A1 Q&As provide:

**Question 10: scope of relevant loans (3)**

Where funds are borrowed, so an individual can pay his or her rent in relation to a UK residential property does this create a “relevant loan”?

*Suggested answer*

Such a loan would be a relevant loan as a tenancy agreement is sufficient to create an interest in residential property.

The exception to this would be where the specific legislation (paragraph 8) defining “UK residential property interest” excludes the interest from the definition...

For example, purpose built student accommodation meeting the conditions set down at [what is now para 5(4) sch 1B TCGA]<sup>36</sup> does not come within the definition of “UK residential property interest” and so a loan to allow an individual to pay their rent on qualifying purpose built student accommodation would not be a “relevant loan”.

HMRC agree.

### 78.8.10 *Incidental acquisition costs*

Sch A1 Q&As provides:

**Question 8: scope of relevant loans (1)**

Where funds are borrowed to pay the SDLT or other related legal and other expenses (not being expenses relating to the enhancement or maintenance of the value of the UK residential property interest) on the acquisition of UK residential property interest, would this be a “relevant loan”?

*Suggested answer:* [The definition of relevant loan] is not intended to include borrowed funds which are used to pay

[1] SDLT, and

[2] other incidental costs of acquisition within the meaning of s38(2) TCGA 1992<sup>37</sup>

---

36 See App.2.19.3 (Student accommodation).

37 Section 38(2) TCGA refers to:

“[1] fees, commission or remuneration paid for the professional services of any

provided such expenses do not relate to the enhancement or maintenance of the value of the UK residential property interest.

That seems right, and HMRC agree. It is an important point, given current rates of SDLT.

#### 78.8.11 *Interest on loan*

Sch A1 Q&As provides:

**Question 9: scope of relevant loans (2)**

Where funds are borrowed to service the interest on a “relevant loan” is this additional borrowing also a “relevant loan”?

*Suggested answer*

Servicing the interest on a relevant loan does not result in the acquisition of a UK residential property interest and neither does the expense relate to the enhancement or maintenance of the value of the UK residential property interest. As such, there is no “relevant loan”.

HMRC say:

We do not agree. If the interest is part and parcel of financing the purchase price of the UK residential property then the making of an additional loan to service that interest will be a relevant loan, whether directly or indirectly.

That can't be right, unless there is something unusual in the loan documentation.

#### 78.8.12 *Disposal of residence*

Para 4(4) sch A1 IHTA provides:

Where the UK residential property interest by virtue of which a loan is a relevant loan is disposed of, the loan ceases to be a relevant loan.

Sch A1 Q&As provides:

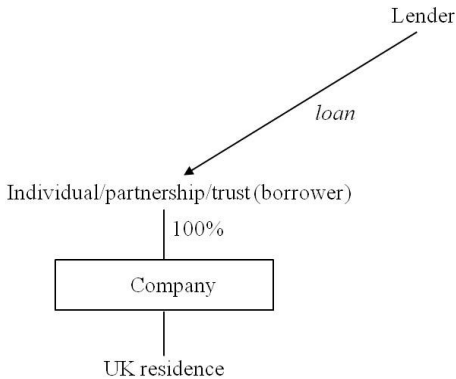

**Question 20: Relevant loan not repaid but company sold**

---

surveyor or valuer, or auctioneer, or accountant, or agent or legal adviser and  
 [2] costs of transfer or conveyance (including stamp duty or stamp duty land tax)  
 [3] together... in the case of the acquisition of an asset, with costs of advertising to find a seller”.

Consider an individual, partnership or trust borrowing to fund<sup>38</sup> a close company which uses the funds to acquire UK residential property.

Diagrammatically:

The relevant loan remains outstanding but the individual, partnership or trust borrower disposes of the company holding the UK residential property rather than selling the house itself and the loan is not repaid? Does the loan remain a relevant loan indefinitely even though no house is in the structure? There seems no provision in the legislation to remove the relevant loan from schedule A1. Para 5 only has a two year rule if the loan is repaid.

*Suggested answer:* We would take the view that the loan remains a relevant loan and only when repaid does the two year rule apply.

HMRC agree.

**Question 21: Loan to company (non-relevant loan) remains outstanding or is repaid where property or subsidiary holding property is sold**

If there is a loan by an individual or trust to a company X Limited which has acquired another company Y Limited which holds residential property and that Y Limited subsidiary is sold, even if the loan to X Limited remains outstanding, as X Limited is no longer schedule A1 property the loan ceases to be chargeable property immediately and repayment is irrelevant. Do HMRC agree?

---

38 “Funding” a company may mean subscribing for shares or making a loan to the company. In the diagram I assume a share subscription. Similar points arise if there is a loan to the company instead, but the position is slightly more complex to follow.

HMRC agree. This is right, but surprising. Maybe it will not happen much.

Para 4(5) sch A1 IHTA deals with part-disposals:

Where a proportion of the UK residential property interest by virtue of which a loan is a relevant loan is disposed of, the loan ceases to be a relevant loan by the same proportion.

## 78.9 Deductibility of relevant loan

In simple cases, borrowing is neutral for IHT. If A lends £100 to B:

- (1) The value of the estate of A is unaffected, as before the transaction A held the £100, and after the loan is made, A holds the benefit of the debt worth £100
- (2) The value of the estate of B is unaffected, as after the loan is made, B has the £100 and a liability of £100 deductible from the estate of B.

This section considers problems which arise where:

- (1) The benefit of a debt is within the charge to IHT, ie
  - (a) it is chargeable (non excluded) property; or
  - (b) it is held by a company whose shares are chargeable (non excluded property) and
- (2) The burden of the debt (the liability) is not deductible in the estate of the borrower, ie
  - (a) it is disallowed under one of the many rules which disallow deduction for liabilities; or
  - (b) it is notionally deductible but set against excluded property, not chargeable property, so the deduction is wasted.

In these circumstances there is (effectively) a double charge to IHT. This has always been a possible consequence of disallowed debts. However the scope of the problem has increased as a result of the IHT residential property code, since relevant loans, which were in general excluded property under the pre-2017 rules, have now become chargeable. In other words, there is an element of unfairness or overkill in the legislation, as is common in anti-avoidance rules.

Sch A1 Q&As provides a simple example:

### **Example 4**

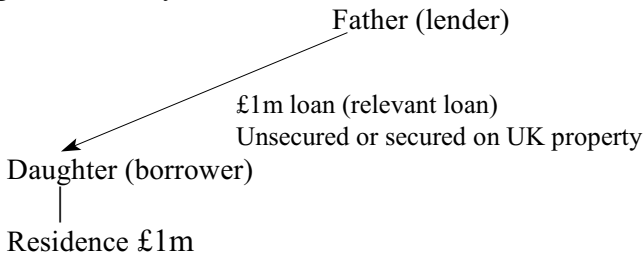

Father and daughter are both domiciled in France.

Daughter lives in the UK and father lends her £1m to buy a London

flat.

He takes as security her Paris property or maybe makes the loan unsecured.

Diagrammatically:

The Q&A analysis is as follows:

- a. Father has made a “relevant loan” which is not excluded property. It will therefore be subject to IHT on his death. Indeed as daughter is UK resident the loan is likely to be a UK situated asset anyway unless made a specialty debt or secured on non-UK property;
  - b. Daughter owns a UK situs asset (worth £1m) and the debt that she owes her father is owed to a non resident and will be discharged in France “so far as possible” thus reducing the value of daughter’s property outside the UK (see IHTA 1984 s162(5)).
  - c. The result is that both the loan (which will be set against daughter’s non-UK assets) and the full value of the London property are brought within the IHT net.
- If father releases the loan he will make a PET.

The suggested answer recommends tax planning to ensure the debt is deductible:

We agree with the above analysis although double tax treaty relief in both cases should be considered.<sup>39</sup>

Otherwise the loan should expressly be charged on the UK property so that it comes within the terms of s162(4).

---

39 Author’s footnote: On the facts of the example, the France IHT DTA should provide relief for IHT on the father’s asset (the debt) on the death of the father (even if the debt is UK situate): see 109.8.2 (Treaty-situs: France/ Italy).

DTA relief would not apply to IHT on the daughter’s assets (the residence) on the death of the daughter.

HMRC agree:

We agree with your analysis of SchA1 and we also agree that the liability will have to be deducted from foreign assets to the extent that IHTA/s162(5) applies.

However, the eventual outcome may be mitigated by the effect of a double taxation convention or IHTA/s159 [foreign IHT credit relief].

Sch A1 Q&As provides another example, where the lender is a family trust rather than the father:

**Question 14: ROB and s103 - borrowing issues**

*Example 8 (M)*

M is resident but not domiciled (or deemed domiciled) in the UK. She has established a non-UK settlement which holds its assets through a non-UK company owned by the trustees. M is a beneficiary of the trust.

In order to purchase a property in the UK for £1 million, M borrows £1 million from the company paying an arm's length rate of interest.<sup>40</sup>

On M's death, the property is worth £1.3 million.

Diagrammatically:

The debt may be deductible from the value of the property assuming the loan is repaid leaving a net value subject to inheritance tax of £300,000. It is however possible as a result of sections 162(5)/175A IHTA or (in some circumstances), section 103 Finance Act 1986 that the debt will not be deductible in which case the full £1.3 million value of the

<sup>40</sup> Author's footnote: But interest is not relevant for the IHT analysis.

property will be within the scope of UK inheritance tax.<sup>41</sup>

In addition, as the property held by the trust is subject to a reservation of benefit (as M is a beneficiary), the value of the shares in the company owned by the trust will, to the extent that their value is attributable to the loan<sup>42</sup> to M (£1 million) be subject to inheritance tax on M's death as non-excluded property.

The total amount on which inheritance tax is payable will therefore either be £1.3 million or £2.3 million. This takes no account of ten yearly charges to which the trustees will be subject by virtue of holding a company within para 2.

*Suggested answer* We agree that, depending on the circumstances, the total amount subject to inheritance tax on M's death could be £2.3 million.

HMRC agree.

Perhaps the point of the example is to shame HMRC into seeing how unfair the law can be. But double taxation frequently arises when a debt is disallowed for IHT purposes, and double taxation is always an issue if a trust is within GWR and 10 year charges.

### 78.9.1 Debt set against collateral

Sch A1 Q&As provides:

#### **Example 5**

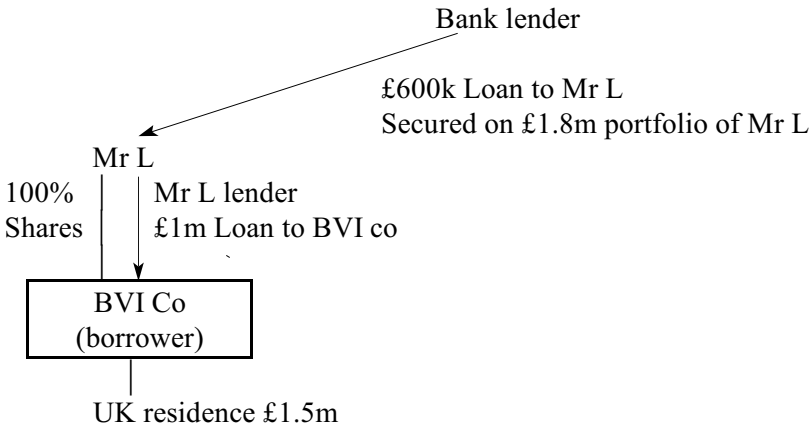

Mr L, who is resident and domiciled in Malaysia, purchases a buy to let flat in Battersea for £1 million through a wholly owned BVI company. The BVI company owns no other assets. He borrows £600,000 of the purchase price from his bank in Malaysia which he then lends to the company together with £400,000 from his own money. The bank loan is formally secured on a portfolio of investments belonging to Mr L and held by the Malaysian bank worth £1.8 million.

Diagrammatically:

---

41 But section 162(5)/175A will not apply if the advisers are paying attention.

42 This is not correct. It should read: to the extent that their value is attributable to the house. See 78.3.4 (Company owns relevant loan).

On Mr L's death, the UK property is worth £1.5 million.

Mr L's interests in the BVI company include the loans of £1 million and the equity in the company which is now worth £500,000. These interests will be subject to inheritance tax on his death. (£1.5m). This is comprised of his interest as a participator by reason of being a loan creditor, and the equity in the property [ie in the company].

In addition, the loan from the bank is a relevant loan as it is a loan to an individual which has been used to acquire an interest (in this case the onward loan to the company) in a close company which in turn uses the money to acquire a UK residential property interest. Inheritance tax will therefore potentially also be payable on the value of the collateral up to the amount of the loan (£600,000). The total potential value subject to inheritance tax on Mr L's death is therefore £2.1 million (£1.5 million plus £600,000).

The loan from the bank of £600,000 is in principle deductible from the collateral. However, is it deductible in its entirety only from the value of the collateral which is within the scope of inheritance tax or might the deduction be taken pro rata against the whole of the £1.8 million of collateral? If the latter, only

£200,000 ( $£600,000 \times £600,000 / 1,800,000$ )

of the loan would be deducted from the £600,000 of collateral which is taxable. S162(5) IHTA offers no express answer to this point.

The position would be different if the bank lent direct to the BVI company and Mr L offered personal investments as collateral for this loan. In that case as the collateral is not to secure a relevant loan the personal investments are not chargeable. See example 9 later for further details.

*Suggested answer*

In practice we will accept that the loan is deductible only from the collateral that is within the scope to IHT. Therefore, all the £600,000 is deducted from £600,000 of the £1.8m collateral which is chargeable. The total amount subject to inheritance tax on Mr L's death will be £1.5m and for this purpose the collateral is effectively ignored. This is because the collateral is only chargeable up to the value of the amount lent and therefore the loan should be deductible against that part of the collateral. The policy intention is not to impose a double charge but simply ensure that the full value of the house is chargeable to IHT when the loan has been secured by means of other collateral.

HMRC original answer was in sch A1 Q&As version 2:

*We disagree. There is no relevant loan in this scenario. The (de-excluded) property within the scope of IHT on Mr L's death is the interest in the BVI Company consisting of his interest as a loan creditor and the balance of the equity. Here, that is broadly equivalent to the value of the UK RPI.*

The professional bodies noted tactfully that they were unclear as to the basis of the HMRC analysis that there is no relevant loan. Version 3 now provides:

**HMRC:** We agree that the value of the property in Mr L's estate would be £2.1M and the question is how to take account of an allowable liability (of £600,000) which is an incumbrance on property (£1,800,000) that it partly chargeable (£600,000) and partly excluded (£1,200,000). Like you, we take the view that for the purposes of SchA1 the liability should be set off against the value in the UK estate so that the value chargeable to IHT is £1,500,000. This view is confined to SchA1 and should not be taken as applying to other similar situations that may be covered elsewhere in the IHTA 1984.

## 78.10 Residence-security

Para 3 sch A1 IHTA provides:

This paragraph applies to ...

- (b) [i] money or money's worth
- [ii] held or otherwise made available as security, collateral or guarantee
- [iii] for a loan which is a relevant loan,
- [iv] to the extent that it does not exceed the value of the relevant loan.

I refer to property within para (b) as a “**Residence-security**”. That is not an ideal label, but there is no short term which summarises this paragraph.

The significance is that the money or money’s worth is chargeable (de-excluded) property.

The wording is novel.

“Money or money’s worth” is usually used in the phrase “consideration in money or money’s worth” where it has a technical meaning.<sup>43</sup> Here it is just a long-winded way to say “property”.

### 78.10.1 *Security/collateral*

“Collateral” is just a synonym of security,<sup>44</sup> so I refer below to security rather than “security or collateral”.

Snell explains the legal meaning of “security”:

In a technical sense, a security interest gives the interest holder a right in respect of the property of another person which can be used to satisfy ... the payment of a debt or other obligation owed to the holder of the security interest. In this technical sense there are only four kinds of consensual security known to English law: (i) pledge (ii) contractual lien; (iii) equitable charge and (iv) mortgage.<sup>45</sup>

It is considered that the word is used with this meaning here.

The meaning of security is debated in a STEP<sup>46</sup> submission to HMRC.<sup>47</sup> Its comments are based on this straightforward example:

Anna, who is not resident<sup>48</sup> or domiciled (and not deemed domiciled) in the UK, purchases a house in London for £5 million. She takes a £3 million loan from her bank in Jersey to help purchase the property. The loan is secured over the property ...

Diagrammatically:

43 See App 4.2.8 (“Money or money’s worth”).

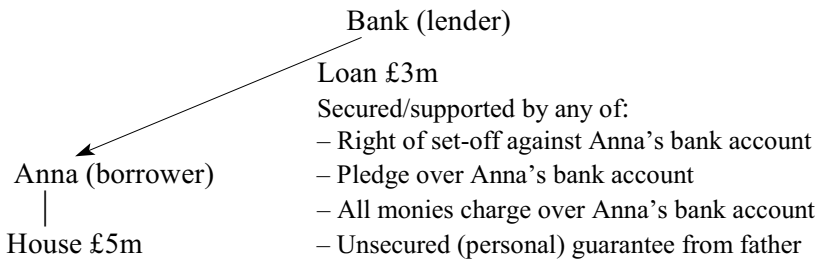

44 See 17.22.3 (HMRC pre-2014 view).

45 Snell’s Equity (34th edn., 2020) para. 36-001.

46 together with TACT and BBA, but for brevity I refer only to STEP.

47 <http://www.tact.uk.net/wp-content/uploads/2017/07/2017.06.28-Letter-to-HMT-re-IHT-on-UK-Residential-Property-Lending.pdf>

48 A’s residence is not relevant for IHT purposes, but perhaps it is stated in order that the separate topic of remittances does not arise.

The starting point is that the debt is deductible for IHT, so that A’s UK situate property is valued at £2m.

### 78.10.2 *Is set-off right “security”*

STEP say:

Under English law, a bank in certain circumstances has the right to apply credit balances held by a customer in satisfying liabilities due to the bank. There are similar rules in many other countries.

In most cases, any common law or statutory rights of set off are supplemented by specific contractual rights of set off contained in the bank’s standard terms and conditions.

In our example, assume A held £1 million of cash in an account with the same bank. As a result of the bank’s right of set off, the bank could use this cash to satisfy A’s liability under the loan.

If the £1 million of cash is treated as “money or money’s worth held or otherwise made available as security, collateral or guarantee” for the loan, the £1 million will be subject to inheritance tax as well as the net £2 million value of the UK residential property. ...

We do not however think that this is the correct interpretation of the draft legislation.

That is correct, because a right of set-off is not security or collateral (and, obviously, it is not a guarantee).<sup>49</sup>

HMRC did not reply to STEP, and sch A1 Q&As repeats the question:

---

49 See Law Commission Consultation Paper, “Registration of Security Interests: Company Charges and Property Other Than Land” (2002) para 6.48: “A contractual set-off is not a security interest as it gives no right over the debtor’s property, merely an entitlement to set-off one personal obligation against another”.  
[http://www.lawcom.gov.uk/app/uploads/2015/03/cp164\\_Company\\_Security\\_Interests\\_Consultation.pdf](http://www.lawcom.gov.uk/app/uploads/2015/03/cp164_Company_Security_Interests_Consultation.pdf)

**Question 7: Paragraph 3 - collateral and relevant loans**

The wording of paragraph 3(b) of Schedule A1 is not entirely clear but presumably includes only

- [1] assets pledged or charged in support of a relevant loan or
- [2] money made available as support for a guarantee for a relevant loan.

It is not entirely clear whether the asset in question has to be formally pledged or charged or needs simply to be available by way of set-off for the lender. We assume the former is required. i.e. that the assets must be put in a position that they cannot be withdrawn by the guarantor without the consent of the lender and are in that sense formally held by the bank or made available as security.

Do HMRC agree?

*Suggested answer*

[1] We agree that

- [a] general rights of set off in a bank's standard terms and conditions or arising under general law or
- [b] a general pledge (for example arising under the bank's standard terms and conditions)

will not be caught by the collateral rules. The assets are not "held or otherwise made available" as security for the relevant loan.

HMRC appear to disagree:

If the lender has the power to set off credits from another financial account to secure the loan then the lender can properly be said to have hold such funds and that it has been made available by the collateral provider in accordance with the contractual arrangements.

More analytically, the question is whether a right of set-off constitutes security or collateral, and I think it is plain that it does not.

STEP reaches the same conclusion, but by a different and, I think, less convincing, argument:

In order to be caught by paragraph 3(b), the property has to be "held or otherwise made available" as security for the loan. This implies that there must be some connection between the asset in question (in this case the £1 million deposit) and the loan taken out to purchase the property.

This might, for example, be the case if specific security is given over the asset or if the terms of the loan make some reference to the asset such as an ability to demand repayment of the loan if the asset is no

longer held by the bank.

On the other hand, it is difficult to see that the mere existence of a right of set off (whether arising under general law or under the bank's terms and conditions) can be said to result in the property being held or otherwise made available as security or collateral for the loan.

HMRC returned to the question in version 3 of the sch A1 Q&As, where the question has been rephrased. I think it is necessary to consider a right of set-off and a pledge separately, as they are different types of right. But the Q&As address them together:

**Question 7 – Sch A1 para 3 – Collateral and Relevant Loans**

1. There are a number of different approaches to determining whether assets are “held or otherwise made available as security, collateral or guarantee” for a relevant loan within the meaning of paragraph 3(b) of schedule A1.

2. The policy was to secure that property given as security for a loan is, in appropriate circumstances, brought within the scope of inheritance tax.

3. Bearing this in mind, it would normally be expected that property given as security will fall within paragraph 3(b) of schedule A1, unless (what would otherwise be) the security, collateral or (property standing behind a) guarantee is too remote from the relevant loan.

4. What would otherwise be the security may well be too remote where the lender has some sort of generic security over assets held by a lender on behalf of the borrower. This would include, for example,  
[a] a right of set-off or a general pledge contained in a bank's standard terms and conditions or  
[b] a right of set-off which arises under common law or the law of the jurisdiction in which the lender is based.

A right of set-off or general pledge does not “incumber” the assets over which it subsists provided that the customer is free (in the absence of a default) to withdraw those assets at any time. In that sense the lender can only “be secure” (in the sense of having confidence) that those assets are available to it once a default has happened. Until such a default the position is inchoate: the security can be thought of as not yet formed.

5. Such an interpretation also provides symmetry with the phrase “incumbrance on any property” in s162(4) IHTA .

6. There may be other situations where it can be shown that assets which are held as security by the lender have no connection with the relevant loan (for example they may be security for a different liability)

but this would need to be considered on a case by case basis taking into account all of the relevant facts.

**HMRC:** HMRC agrees that the legislation was not intended to interfere with normal banking arrangements. Therefore, HMRC agrees with the analysis set out above subject to the following comments.

One point to bear in mind however is that there is a cap on the security which can be taken into account for the purpose of paragraph 3(b) so HMRC would expect that the distinctions above would only be of relevance if the value of the non – UK property held as security – that was specifically given in relation to the loan and that was therefore clearly within the definition – was less than the value of the loan.

Para 4: In some instances, the examples given may fall within paragraph 3(b) depending on the facts of a particular case.

That is not exactly guidance.

### 78.10.3 *Is a pledge “security”*

STEP say:

The standard terms and conditions of some banks contain not only rights of set off but also a specific pledge over any of the customer’s assets held by the bank so that those assets can be used by the bank to meet any liability the customer may have to the bank at any time during the relationship. In the case of some international banks, the pledge is wide enough to enable assets held by one group company to be used to satisfy a customer’s liability to another group company. ...

In our example, there could therefore be a problem if A had a £10 million portfolio with the bank’s sister company in Switzerland. If the portfolio is treated as being “held or otherwise made available” as security for the loan from the Jersey bank as a result of the general pledge in the standard terms and conditions, £3 million of the portfolio would be within the scope of inheritance tax ...

For the same reasons as described above in relation to rights of set off, we do not think that assets are “held or otherwise made available” as security for a loan as a result of a general pledge which has nothing to do with the loan in question.

This is an implausible construction even if one can assume that the security “has nothing to do with the loan” (which is factually implausible). If an asset is pledged for a debt, it is made available as security, whether a general pledge or not.

It appears that HMRC would agree: see 78.10.2 (Is set-off right security).

#### 78.10.4 *Is all-monies charge “security”*

STEP say:

An all monies charge may arise where the customer has entered into a completely unconnected transaction with the bank under which the bank has been given security over specific assets but where the security documentation provides that the assets can be used to meet not only the obligation in question but also any other liability which the customer may have to the bank.

In this case, the position is very similar to general rights of set off or general pledges in that, although the bank has security over the assets, there is no connection between the granting of the security and the making of the loan which is used to purchase the property. On this basis, the analysis should be the same - i.e. that the assets in question are not held or otherwise made available as security for the loan to purchase the property as there has been no positive act to link the security with the loan.

I would agree that the analysis should be the same: there is no difference between a pledge and an all-monies charge. Property subject to a charge is made available as security, whether an all-monies charge or some more specific wording is sued.

#### 78.10.5 *Guarantees*

Para 3 sch A1 IHTA provides (so far as relevant):

This paragraph applies to ...

- (b) money or money’s worth held or otherwise made available as ...  
guarantee for a loan which is a relevant loan,

A guarantee is a promise by one person to meet the debt of another person, if the other person is in default. In principle no property is “held” or “made available” as a guarantee, which is simply a promise to make a payment; but the promise may be secured on property, and the reference is perhaps to security of that kind.

STEP say:

Where a loan is made by a bank to an entity (for example a trust or a company), it is standard practice for a bank to require a related

individual to give a personal guarantee in respect of the liability in question. Typically, such a guarantee would be unsecured ...

It might be argued that, as a result of the guarantee, all of the assets of the guarantor are available as “guarantee” for the loan which the bank has made to enable the related entity to purchase the property. However, we do not think that this is how paragraph 3(b) should be interpreted.

That is correct, because (unless the guarantee is secured) no money or money’s worth is held or otherwise made available as guarantee.

STEP reaches the same conclusion, but by its different argument:

What is caught is property which is “made available as security, collateral or guarantee” for the loan. This suggests to us that property held by a guarantor would only fall within the relevant paragraph if it has been given [the legal term is charged] specifically as security for the guarantee in question.

HMRC did not reply to STEP, but provide an answer in sch A1 Q&As version 3. HMRC (effectively) agree:

**Question 7 – Sch A1 para 3 – Collateral and Relevant Loans**

7. As far as guarantees are concerned, it must be borne in mind that the way in which schedule A1 operates is to “de-exclude” property which is in some way supporting the relevant loan. A guarantee is not itself property of the guarantor. This means that where a guarantee is completely unsecured (in the sense above) and so is not connected with any particular property of the guarantor, the guarantor’s assets remains excluded property. On the other hand, if the guarantor has provided some form of security or collateral for their obligations under the guarantee, the assets in question will fall within paragraph 3(b) of schedule A1.

**HMRC reply**

Para 7: Again, as to what extent the funds of the guarantor are made available, would be viewed by HMRC as a question of degree and fact. If the creditor’s only recourse to the guarantor for the failure of the primary debtor to repay is the guarantee and there is not an additional connection to any particular property of the guarantor then we would be inclined to agree.

“Be inclined to agree” is not exactly guidance, but at least HMRC appear to accept that an unsecured guarantee is not caught.

78.10.6 *Multiple security*

One debt may be secured on more than one asset. Suppose a relevant loan (say £10m) is secured on:

- (a) a house in Spain (worth £11m) and
- (b) a floating charge over a portfolio (worth say £20m).

CIOT say:

it is unclear whether the additional wording at the end of paragraph 3(b)

[1] restricts the overall collateral to £10m (but if so how does one apportion this?) or

[2] whether it simply restricts each item of collateral to £10m.

I would have thought the answer was [1], with an apportionment by value (in the absence of express priority in the charge or charges).

Sch A1 Q&As provides:

**Question 12: Collateral or security exceeding amount of borrowing: s162**

*Example 6 (Mrs M)*

M, a French resident, borrows £1m from a French bank to buy a house in the UK worth £1.5m. Her personal investment is £0.5m. She offers a portfolio of non-UK shares worth £800,000 and a property in France worth £1.2m. i.e. total non-UK security charged is £2m for a property worth £1.5m and a loan of £1m.

Diagrammatically:

Could HMRC confirm the following:

1. That the reference to the “extent to which it does not exceed the relevant loan” in para 3 refers to the totality of the collateral. i.e. that only £1.0m of the combined collateral will fail to be excluded property rather than the whole of the value of the shares (being less than the £1 million loan) and £1 million of the value of the French house (i.e. £1.8

million in total) being within the charge to IHT?

*Suggested answer:* This is confirmed

That is clearly correct, and HMRC agree.

2. What would the position be if the bank could only enforce against the foreign assets once the UK house was found to be insufficient to meet the borrowing and there was a formal charge against the UK house? In that event under s162(4) the borrowing reduces the value of the house for IHT purposes. Does this mean £500K of the equity in the house is chargeable and £1m of the overseas collateral? i.e total of £1.5m.

*Suggested Answer:* We agree a total of £1.5m is charged to IHT on death even though the loan is deductible under s162 against the value of the house (the net £500K value of the UK house and £1 million of the non-UK collateral).

HMRC agree.

3. The position will be particularly important to resolve as M might leave the UK property and the shares and French property subject to IHT but to different people under her Will. Matters get more complicated where perhaps some collateral is provided by the borrower and other collateral is provided by another person such as the parent of the borrower.

#### 78.10.7 *Security for non-relevant loan*

Sch A1 Q&As provides:

##### **Question 16: Collateral and loans to companies**

Do HMRC agree that collateral provided for a loan to a close company is not caught as it is only collateral made to support relevant loans that is within the scope of the charge.

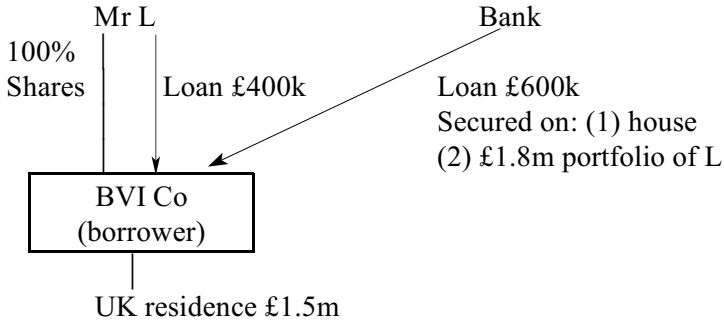

So, for example, if a company borrows from a bank to purchase residential property and that is backed by collateral from the shareholder, such collateral is not subject to IHT. The bank loan is not a relevant loan as it is not taken out to purchase UK residential property by an individual, trust or partnership and the bank is a loan participator but outside the scope of inheritance tax (if not close).

This is self-evident, and HMRC agree. The Q&As provide an example to hammer the point home:

##### **Example 9**

The facts are the same as in Example 5 above<sup>50</sup> except that the bank has made the loan direct to the BVI company (but still secured on Mr L's portfolio).

Diagrammatically:

The Q&A analysis is as follows:

The loan to the BVI company is not a relevant loan as it is not made to an individual, a partnership or the trustees of the settlement. Mr L's collateral is not therefore subject to inheritance tax on his death. In addition, the loan is deductible from the value of the property in calculating the value of Mr L's interest in the BVI company. The value of his interest in the BVI company is therefore £900,000 (£1.5 million minus £600,000). The total amount on which inheritance tax is payable on Mr L's death is £900,000.

*Suggested answer:* We agree that, in this situation, the only liability to inheritance tax on Mr L's death is on the net value of Mr L's interest in the BVI company which will be £900,000. This assumes the BVI company holds no other assets.

HMRC agree.

### 78.11 Residence-security: Double IHT issues

I discussed above the problem of double inheritance taxation where the benefit of a debt was a chargeable asset in the hands of the creditor and the burden of the debt (the liability) was not deductible in the hands of the debtor.<sup>51</sup> The same issue arises where residence-security is made a chargeable asset under the residence-security rules.

<sup>50</sup> See 78.9.1 (Debt set against collateral).

<sup>51</sup> See 78.9 (Deductibility of relevant loan),

Suppose:

- (1) T (an individual or trust) borrows from a 3<sup>rd</sup> party (non-close) bank to buy a residence. The loan (owned by the bank) is a relevant loan, and so not excluded property, but that raises no IHT problem. The bank shares are not sch A1 property because that is an open company.
- (2) T charges property as security for the loan. This property is chargeable (de-excluded) property up to the value of the loan.

The purpose of the residence-security rule is presumably to fill this gap, or perceived gap. That leads to the same double taxation as for relevant loans. But if the loan is from an individual, trust or close company, then there is potentially triple taxation: on the property, the debt and the security.

Depending on the facts, the liability for the loan may be disallowed, or it may be deducted from the residence or from the security (but since both are chargeable (de-excluded) property, that may not make any difference as far as the total IHT liability is concerned).

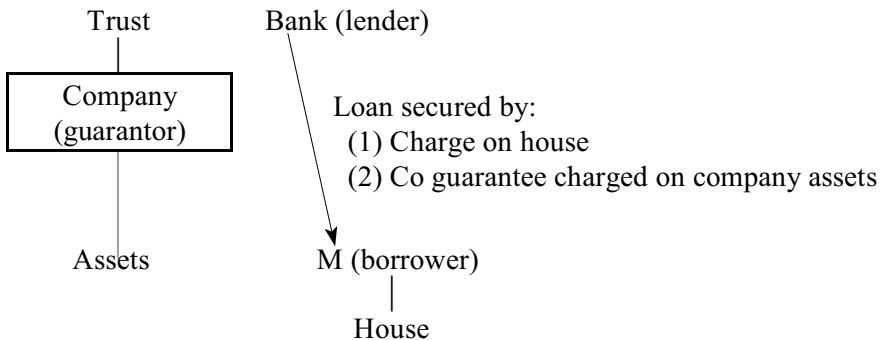

Careful tax planning is needed here to avoid unfairness.

Sch A1 Q&As provides:

**Question 15: ROB - further queries**

Instead of M borrowing from the company, she borrows from a UK bank which takes security over the house but also is given a guarantee by the company secured over its assets.

Diagrammatically:

[1] In these circumstances, the debt to the bank is deductible (subject

to section 175A IHTA).<sup>52</sup>

[2] However, the value of the shares in the company owned by the trust will be within the scope of inheritance tax but capped at the amount of the loan.

Point [2] is very doubtful.<sup>53</sup>

The likelihood therefore is that the total amount subject to inheritance tax on M's death will be the £300,000 net value of the house and the value of the shares in the company owned by the trust up to £1 million - i.e. £1.3 million in total.

*Suggested answer:* We agree that the tax charge in this situation will be on £1.3 million as long as a deduction for the debt is not denied by section 175A.

HMRC agree.

## 78.12 Residence-tail

### 78.12.1 Residence-tail rule

Para 5(2) sch A1 IHTA provides the rule:

If and to the extent that this paragraph applies to any property—

- (a) for the two-year period it is not excluded property by virtue of
  - [i] section 6(1), (1A) or (2) or
  - [ii] 48(3)(a), (3A) or (4),<sup>54</sup> and
- (b) if it is held in a qualifying foreign currency account within the meaning of section 157 (non-residents' bank accounts),<sup>55</sup> that section does not apply to it for the two-year period.

The property (which I call residence-tail property) is chargeable (non-excluded) property, even if not UK situate. In the same manner as para 1, para 5(2) sch A1 IHTA *de-excludes* the property.

### 78.12.2 The two-year period

---

<sup>52</sup> But s.175A will not apply in practice, assuming the advisers of M's PRs are reasonably alert.

<sup>53</sup> See 78.3.5 (Company owns residence-security).

<sup>54</sup> For s.43(3)(a), see 71.8 (Trusts: Foreign situate property); for s.43(3A)(a), see 71.10 (Trusts: UK funds).

<sup>55</sup> See 72.13 (Foreign currency account).

Para 5(3) sch A1 IHTA defines the two-year period:

The two-year period is the period of two years beginning with the date of—

- (a) the disposal referred to in sub-paragraph (1)(a), or
- (b) the payment referred to in sub-paragraph (1)(b).

In short, residence-tail property has a two year “tail” during which it remains chargeable (de-excluded) property. This is intended to prevent planning shortly before death or other occasion of charge.

Sch A1 Q&As provides:

**Question 26: Two year rule and contract/completion**

It is assumed that the two years runs from the date of the completed disposal or loan repayment not from contract. The CGT rule that the date of contract is the date of disposal is not in point. This raises similar issues to questions 1 and 2.<sup>56</sup>

*Suggested answer* The two years runs from actual receipt of sale proceeds - whether this is from exchange or completion does not matter.

That must be right. HMRC agree.

### 78.13 Residence-tail Property

Para 5(1) sch A1 IHTA provides:

This paragraph applies to—

There follows 3 or 4 categories of property. I refer to property within para 5(1) as “**Residence-tail Property**”. That is not a transparent label, but there is no short term which can summarise this paragraph.

#### 78.13.1 *Residence-tail: Share proceeds*

The first category of Residence-tail Property is:

- (a) property which constitutes consideration in money or money’s worth for the disposal of property to which paragraph 2 [Residence-company/partnership] ... applies;

---

<sup>56</sup> See 78.19.2 (Contract of sale).

The paradigm case is the proceeds of sale of a residence-company.

### 78.13.2 *Residence-tail: Loan proceeds*

The next category of Residence-tail Property is:

- (a) property which constitutes consideration in money or money's worth for the disposal of property to which ... paragraph 3(a) [relevant loan] applies;
- (b) any money or money's worth paid in respect of a creditor's rights falling within paragraph 3(a) [relevant loan] ...

The paradigm case is the proceeds of repayment or sale of a relevant loan.

### 78.13.3 *Residence-tail: Derived property*

The next category of Residence-tail Property is:

- (c) any property directly or indirectly representing<sup>57</sup> property within paragraph (a) or (b).

I refer to that as “**derived Residence-tail Property**”.

### 78.13.4 *Proceeds of sale of land*

The definition of Residence-tail Property does not include proceeds of sale of UK land. Where a UK residence held directly, there is no two-year tail, so IHT can be avoided by a sale shortly before death or other occasion of charge. That is deliberate:

Disposal of shares is caught under the two-year rule quite deliberately because it avoids other taxes such as SDLT and nonresidents CGT.<sup>58</sup> A sale of shares cannot therefore be done as a deathbed measure. Disposal of property itself does not avoid other taxes and therefore the two-year run off does not apply.<sup>59</sup>

The definition of Residence-tail Property does not include proceeds of a liquidation of a company holding UK land.<sup>60</sup>

---

57 See App 2.11 (“Representing” assets).

58 The CGT position changed after the date of this statement.

59 [http://www.step.org/sites/default/files/Policy/Guidance\\_note\\_non\\_doms\\_and\\_offshore\\_trusts.pdf](http://www.step.org/sites/default/files/Policy/Guidance_note_non_doms_and_offshore_trusts.pdf)

60 See App 4.2.5 (Transfer on liquidation).

78.13.5 *Examples*

Suppose a company owns a UK residence:

The company is within para 2. The proceeds of sale of the company are Residence-tail Property under para (a).

Suppose the company sells the residence. The proceeds of sale are not Residence-tail Property, and the company is not Residence-tail Property.

Suppose a chain of companies, thus:

Holdco and Subsid are both within para 2.

Suppose the individual or trust sells Holdco. The proceeds of sale are residence-tail property under para (a).

Suppose Holdco sells Subsid. The proceeds of sale are Residence-tail Property in the hands of Holdco, but that does not matter.<sup>61</sup> Are the shares in Holdco Residence-tail Property? The strict answer is no.<sup>62</sup> But a purposive construction suggests the opposite conclusion. A Court may well feel that there ought to be a charge on these facts. The residence-tail rule would apply on a sale of Holdco, so why should it be different on a sale of the subsidiary? And what would the position be if Holdco was wound up, so that the trustees received the transaction proceeds?

Suppose a company has lent to an individual to finance acquisition of a UK residence. The company holds the benefit of the loan:

---

61 Unless Holdco makes a transfer of value, see 77.1 (Transfer of value by close co), but that is not likely to happen.

62 See App.2.11.5 (Do shares represent co assets).

The loan is within para 3 (a relevant loan). The shares in the company may be within para 2, though that depends on the facts.<sup>63</sup>

Suppose the loan is repaid. The proceeds of the loan are Residence-tail Property, but that does not matter. Are the shares in Holdco Residence-tail Property? This raises the same question as when Holdco sells Subsid, discussed above.

#### 78.13.6 Residence-tail Property in mixed fund

Sch A1 Q&As provides:

**Question 24: Para 5 - disposals and repayments: sales of shares**  
 ... paragraph 5 does not deal very comprehensively with what happens in the event that the sale proceeds are mixed with other funds.

That is something of an understatement.

##### *Example 12*

A father sells his company shares (the company's only asset being a UK residential property) to his son<sup>64</sup> and puts the proceeds of £1m on deposit in a separate bank account. He then spends the money buying a house in Hong Kong.

The Hong Kong house is not excluded property for two years. If the house increases in value only the original sale price is taxed. If the HK property falls in value the lower value is taken.

That is straightforward. The Hong Kong house is derived Residence-tail Property. HMRC agree. The point is to introduce the question which follows:

<sup>63</sup> See 78.3.4 (Company owns relevant loan).

<sup>64</sup> The identity of the purchaser is not relevant to the residence-tail rule.

**Question 25: Mixing of funds from sale caught by para 5**

What would be the position if the funds are mixed with other funds and then some funds are withdrawn and spent. For example, £1m represents the sale proceeds in example 12 above and the balance of the bank account represents £500K which is from an art sale. A withdrawal of £500K occurs. Do HMRC consider that the withdrawal removes the funds pro rata one third from the account so that the £1m is reduced by £333,333 or would HMRC accept that the rule in *Devaynes v Noble* 1816 35 ER 781 better known as the rule in *Clayton's Case* applies such that the withdrawal is on a first in first out basis?

*Suggested answer:* Our preference is that a FIFO basis is used. However, pro rata is acceptable if a FIFO basis is not possible due (for example) to lack of records.

HMRC say:

If there is no evidence to the contrary<sup>65</sup> then the FIFO basis is acceptable (so that the withdrawal, here, is not property representing the proceeds).

It would be better not to mix residence-tail property and other funds.

### 78.13.7 *Proceeds of UK situate relevant loan*

Para 2/3 sch A1 apply to property whether UK situate or not. So the proceeds of a UK situate relevant loan are Residence-tail Property.<sup>66</sup>

A UK situate relevant loan is not excluded property, and so not affected by the de-exclusion rule in para 1. But the residence-tail rule may still apply to it, which could matter if (say) a UK situate relevant loan was repaid and the proceeds held abroad.

### 78.13.8 *Loan repaid then property sold*

Sch A1 Q&As provides:

**Question 13: What is the position where loans are refinanced and**

<sup>65</sup> Author's footnote: It is clear from *Clayton's Case* that the customer and banker may agree some other basis: FIFO is the presumed position subject to any agreement to the contrary. See App.2.11.7 (Withdrawing from mixed funds).

<sup>66</sup> The proceeds of a UK situate Residence-company are also residence-tail property (though that is less likely to happen in practice).

**then the property is sold?***Example 7*

A lends to B who purchases a UK property. A has a relevant loan but then B repays A and borrows from a bank. The repayment of the loan received by A is within the IHT net for two years under para 5.

Shortly after refinancing and within the two years B sells the property. HMRC seem to assume at IHTM 04314 Example 3 that the repayment proceeds received by A will then be excluded property.<sup>67</sup> However, para 5 does not treat the repayment proceeds as a relevant loan and so para 4(4) is inapplicable. The two years continues to run even though if B had sold the property and only then repaid A no two year rule would operate.

We assume also it is right that if B had sold the property and not repaid A but left the loan outstanding it would cease to be a relevant loan and the two year rule in para 5 does not apply.

*Suggested answer:* We agree with the above analysis.

HMRC agree. That must be right.

78.13.9 *Residence-securities*

Para 5(1) does not apply to residence-securities: in my terminology, residence-securities are not Residence-tail Property.

Sch A1 Q&As provides:

**Question 17: Collateral and the two year rule**

Please confirm that the two year rule does not apply to collateral, whether or not such collateral is provided in respect of relevant loans or loans to companies

*Example 10*

Father provides collateral for bank borrowings taken out by his son to purchase residential property; if that collateral is released the father is immediately outside the scope of IHT.

HMRC agree. That is the only possible answer.

78.13.10 *Cap on residence-tail*

Para 5 sch A1 IHTA provides:

(4) The value of any property within sub-paragraph (1)(c) [derived

---

<sup>67</sup> I cannot see that in the HMRC example.

property] is to be treated as not exceeding the relevant amount.

(5) The relevant amount is—

- (a) where the property within sub-paragraph (1)(c) directly or indirectly represents property within sub-paragraph (1)(a) (“the consideration”), the value of the consideration at the time of the disposal referred to in that sub-paragraph, and
- (b) where the property within sub-paragraph (1)(c) directly or indirectly represents property within sub-paragraph (1)(b), the amount of the money or money’s worth paid as mentioned in that sub-paragraph.

#### 78.13.11 *Residence-tail: Commencement*

Para 9 sch 10 F(no.2)A 2017 provides a transitional relief which ceased to be relevant for transfers of value from 6 April 2019.<sup>68</sup>

### 78.14 **Residence exit-charge reliefs**

The residence-property code provides two exemptions to the IHT exit charge.<sup>69</sup>

Section 65(7C) IHTA provides:

Tax shall not be charged under this section by reason only that property comprised in a settlement

- [a] ceases to any extent to be property to which paragraph 2 or 3 of Schedule A1 applies [Sch A1 property]
- [b] and thereby becomes excluded property by virtue of section 48(3)(a) above.

This would apply if:

- (1) A trust owns a company which holds a UK residence (the shares are non- excluded property).
- (2) The company sells the property and acquires other property (not a UK residence) so the shares become excluded property and cease to be relevant property.

There is no exit charge at step (2). SDLT on the sale is considered to be sufficient tax.

Section 65(7D) IHTA provides:

---

<sup>68</sup> See the 2019/20 edition of this work para 88.10.8.

<sup>69</sup> See 72.8 (Exit charge).

Tax shall not be charged under this section where property comprised in a settlement or any part of that property—

- (a) is, by virtue of paragraph 5(2)(a) of Schedule A1 [residence-tail], not excluded property for the two year period referred to in that paragraph, but
- (b) becomes excluded property at the end of that period.

This would apply if:

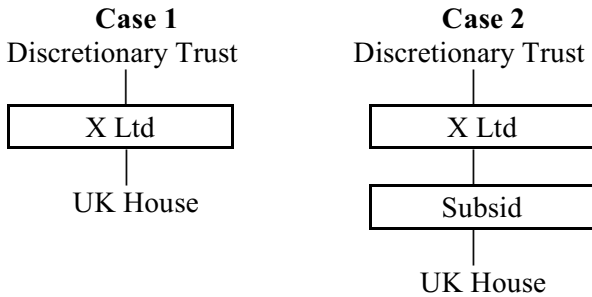

- (1) A trust owns a company which holds a UK residence (the shares are non- excluded property).
- (2) The trust sells the shares and acquires other property (not UK situate); for two years the property remains chargeable (de-excluded) property.
- (3) After two years the property becomes excluded property and ceases to be relevant property.

There is no exit charge at stage (3).

Planning is needed more than 2 years before the date of a 10-year anniversary or exit charge.

### 78.15 Company dividend in specie

Suppose:

Suppose:

- (1) X Ltd declares a dividend in specie (in case 1, a dividend of the house; in case 2, a dividend of the shares in Subsid).
- (2) s.624/720 do not apply (this may be because settlor is non-resident, deceased, excluded, or because the trust is a protected trust).

The dividend is income of the trustees but no IT charge arises.

X Ltd makes a transfer of value and this transfer is apportioned to the

trustees.<sup>70</sup>

As the dividend is trust income, it is not settled property.<sup>71</sup> So the amount apportioned to the trustees is equal to the amount of the dividend.

The trustees are deemed to have made a disposition as a result of which the value of the settled property is reduced.<sup>72</sup>

The trust fund, ie the shares in X Ltd, is not excluded property.

*Close-company* income-receipt relief does not apply, unless the trust is UK resident.<sup>73</sup> At first sight, there is therefore an exit charge on the distribution by the company. But it is considered that *exit-charge* income-receipt relief applies: the IHT charge would be “in respect of” a payment which would be income of the person if he were UK resident.<sup>74</sup>

Suppose instead of a dividend, X Ltd makes a gift to a third party which is a capital receipt of the recipient. Exit-charge income receipt relief would not apply. Would the residence exit charge relief in s.65(7C) IHTA apply? It is suggested that this relief would not apply. It is the case that:

- (a) the shares in X Ltd ceases to Sch A1 property; and
- (b) the shares become excluded property by virtue of s.48(3)(a).

However it is not the case that the exit charge arises *by reason only* of those facts. It arises because the shares reduce in value. That view better fits the scheme of the Act.

## 78.16 Spouse and other exemptions

Apart from the excluded property rules, all the usual IHT exemptions still apply for sch A1 property and residence-tail property. The 2015 residence-property paper provides:

16. It is intended that the same reliefs and charges will apply as if the property was held directly by the owner of the company. Hence a deceased individual who owned the company shares directly will have the benefit of spouse exemption if the company shares are left to a spouse.

---

70 See 77.1 (Transfer of value by close co); 77.4 (Trustee participators).

71 Unless immediately accumulated by the trustees and so turned into settled property. See 1.6.1 (Undistributed trust income).

72 See 77.4.2 (IHT close-company code/Non-IIP trust).

73 See 77.3.5 (Income-receipt relief).

74 See 77.5 (Dividend: Close-co code analysis); 72.9.3 (Income-receipt relief).

Pre-2017 wills need to be reviewed in the light of the residence–property code. But everything needs to be reviewed in the light of the rules.

### 78.16.1 *BPR/APR*

Sch A1 property may qualify for business or agricultural property relief, if the relevant conditions are satisfied. Pre-2017 arrangements may require review, and in some cases reorganisation, because where property was formerly excluded property, no attention will have been given to the requirements of these reliefs.

Sch A1 Q&As provides:

#### **Question 22: Banks and BPR (1)**

It has been pointed out that private closely controlled banks (whether companies or partnerships) that lend to investors in UK residential property can inadvertently be caught by schedule A1. Such loans will often be relevant loans or the bank will be loan participators in the borrowing company. In these circumstances the [foreign] shareholders of / partners in the bank may only be able to rely on business property relief (BPR) to prevent an IHT charge.

We assume that if the bank is carrying on a trade of money lending HMRC will accept that in the normal course of events BPR will be available on any value attributable to relevant loans and that HMRC will apply the relief by looking at the bank’s operations as a whole first in determining whether the shareholder is eligible for relief on the transfer of value attributable to non-excluded property.

#### *Suggested answer*

We confirm that banks with a banking licence (or sufficient authorisation to act under its governing law) taking deposits and lending will generally qualify for BPR although of course each case must be looked at on its facts.

There will be no special provisions here so new shareholders and partners will have a UK inheritance tax exposure until the two year holding requirement has been met.

HMRC agree. That is the only possible answer. The usual BPR rules will apply.

### 78.16.2 *Excepted assets*

Suppose a company qualifies for BPR and its assets are:

<b>Asset</b>	<b>Value</b>
UK residential property (a business asset)	30
Non-residential property (business assets)	65
Non-residential property not used for business (excepted asset)	5

The relevant provisions are:

Section 104(1) IHTA:

Where the whole or part of the value transferred by a transfer of value is attributable to the value of any relevant business property, the whole or that part of the value transferred shall be treated as reduced ... by 100%; but subject to the following provisions of this Chapter.

Section 112 IHTA:

In determining for the purposes of this Chapter what part of the value transferred by a transfer of value is attributable to the value of any relevant business property so much of the last-mentioned value as is attributable to any excepted assets within the meaning of subsection (2) below shall be left out of account.

Sch A1 para 1 & 2:

Property is not excluded property ... if and to the extent that ... the value of the interest is... attributable to a UK residential property interest

Let us assume a tax charge on death of the shareholder, in which case s.5IHTA provides that the estate of the individual does not include excluded property.

The deceased's estate is therefore 30 as is the transfer of value he makes on death under s4 as is the value transferred by that transfer of value.

The value transferred (30) is reduced by s104 to the extent that it is attributable to the value of business property. The value of the business property, having by s.112 left out of account 5, is therefore 95.

Does one in this case say that the 30 is attributable solely to the 95 and therefore entirely exempted by BPR? Or does one say that 95% of the 30 is attributable to the value of relevant business property? It is suggested that the former view is the better one, viewing the legislation purposively. Obviously the opposite would apply if the excepted asset were itself

residential property.<sup>75</sup>

### 78.16.3 *Excepted subsidiary*

Similar questions arise if there is an excepted subsidiary in the group under s111 IHTA 1984.

#### **Question 23: Banks and BPR (2)**

A foreign bank may be closely controlled and hold (usually through subsidiaries) relevant loans to third parties to facilitate the latter's purchase of UK residential properties. If the bank would otherwise qualify for BPR on such lending activities, is full relief given even though the bank may separately own an investment subsidiary holding foreign investment property on which BPR would normally not be available by virtue of s111 IHTA. In other words does BPR have to be tested only by reference to the holding company and the value attributable to the relevant loans or more generally throughout the whole group?

*Suggested answer:* We would first ascertain whether the holding company qualifies for relief looked at in the round taking into account s105(3) and then only look at the offending subsidiary in applying BPR rather than examine each separate subsidiary or group activity.

HMRC agree.

### 78.17 **Sch A1 TAAR**

Para 6(1) sch A1 IHTA provides:

In determining whether or to what extent property situated outside the UK is excluded property, no regard is to be had to any arrangements<sup>76</sup> the purpose or one of the main purposes of which is to secure a tax advantage<sup>77</sup> by avoiding or minimising the effect of paragraph 1 or 5.

I refer to that as the “**Sch A1 TAAR**”. In my terminology, this is a

---

<sup>75</sup> I am grateful to John Barnett for this observation.

<sup>76</sup> Para 6(2) provides the standard (unnecessary) IHT definition: see App 2.2.3 (Definitions of “arrangement”). I use the singular as there is no difference between arrangement and arrangements.

<sup>77</sup> Para 6(2) incorporates the GAAR definition of tax advantage by reference: “In this paragraph ... “tax advantage” has the meaning given in section 208 of the Finance Act 2013”. See 2.12.1 (Tax advantage: Definitions).

disregard-style TAAR; see 2.10.5 (Consequence of TAAR).

This must be approached in 3 stages:

- (1) Identify the arrangement.
- (2) Ascertain whether a main purpose of the arrangement is to secure a tax advantage by avoiding/minimising the effect of para 1 or 5 (“avoiding para 1 or 5”).
- (3) If caught, ascertain the effect of disregarding the arrangement (“the TAAR disregard”).

I refer to that as the “**TAAR analysis**”.

### 78.17.1 *Setup arrangements*

Suppose:

- (1) A close company was minded to acquire UK residential property.
- (2) The company was told of the IHT consequences (the effect of para 1 is that the shares become chargeable property).
- (3) In order to avoid that, the company decided to buy non-residential property or foreign residential property.

One would not expect this to be caught. Applying the TAAR analysis:

*Identify the arrangement:* That is the purchase of non-residential property.

*Is a main purpose to avoid para 1?* I would say not. In the old (but valid) cliché, the tax tail would be wagging the commercial dog. A diluted concept of tax avoidance infiltrates into this kind of TAAR, in order to reach the intuitively right result.

*If caught, what is the effect of the disregard?* One disregards the purchase of the non-UK property. But fiction does not require one to go so far as to deem a purchase of UK residential property (which property? what values would it reach?).

So the TAAR will not apply.

A similar analysis should apply if:

- (1) An individual or trust was minded to borrow from a close company or family trust to acquire UK residential property
- (2) The person was told of the IHT consequences (the effect of para 1 is that a trust loan is chargeable trust property or in the case of a company loan, the shares may become chargeable property)
- (3) In order to avoid that, the person decided to borrow from a 3<sup>rd</sup> party

open company.

Applying the TAAR analysis:

*Identify the arrangement:* That is the loan from the 3<sup>rd</sup> party.

*Is a main purpose to avoid para 1?* I would say not. That is less evident if the terms of the 3<sup>rd</sup> party loan would be the same as the terms of the trust or close company loan. But a diluted concept of tax avoidance infiltrates into this kind of TAAR, in order to reach the intuitively right result.

*If caught, what is the effect of the disregard?* One disregards the 3<sup>rd</sup> party loan. But the disregard does not require one to go so far as to deem a UK loan (which does not exist, and could not be taxed).

I have considered whether the effect of the TAAR could be that the shares in the open company may be chargeable (de-excluded) property. That would surprise the third party lender.<sup>78</sup> But that is not done by disregarding the arrangement, but by disregarding one of the effects of the arrangement.

#### 78.17.2 Unwinding arrangements

Suppose:

(1) An existing trust holds a company which holds a residence, thus:

- (2) The trust was told of the IHT consequences (the effect of para 1 is that the company is chargeable trust property within the scope of 10-year charges<sup>79</sup>).
- (3) The trust appoints the company to a beneficiary and pays a small exit charge.

---

78 The 5% exemption does not help, as that applies to close companies; see 78.5 (5% exemption).

79 And, on the HMRC view, within GWR on death of the settlor (in the case of a settlor-interested trust).

Applying the TAAR analysis:

*Identify the arrangement:* That is the appointment.

*Is a main purpose to avoid para 1?* One would expect not. That is less than self-evident. But a diluted concept of tax avoidance infiltrates into this kind of TAAR, in order to reach the intuitively right result.

*If caught, what is the effect of the disregard?* One disregards the appointment. But that only applies “In determining whether or to what extent property situated outside the UK is excluded property”. The trust has no property. So nothing is taxable. It would be remarkable to seek to tax on trustees who had made an absolute appointment and had no assets.

Suppose steps (1)(2) were the same, but a different step (3):

(3) The trust sells the company to a beneficiary. The trust keeps the proceeds as excluded property (once the 2 year tail expires).

Applying the TAAR analysis:

*Identify the arrangement:* That is the sale.

*Is a main purpose to avoid para 1?* One would expect not. That is less than self-evident. But a diluted concept of tax avoidance infiltrates into this kind of TAAR, in order to reach the intuitively right result.

*If caught, what is the effect of the disregard?* One disregards the sale. But that only applies “In determining whether or to what extent property situated outside the UK is excluded property”. Does one say the trust property (the proceeds of sale) is then treated as chargeable property? That is not consistent with disregarding the sale, as if one disregards the sale the trust does not hold the proceeds of sale. Does one say that the trust is treated as holding shares which it does not hold? But as it does not hold shares, it is not necessary to “determine whether or to what extent the shares (property situated outside the UK) are excluded property”.

Suppose:

- (1) A person has borrowed from a family company or trust to acquire UK residential property
- (2) Having regard to the IHT consequences, the person repaid the loan and replaced it by a loan from a 3<sup>rd</sup> party open company.

The same approach should apply.

What about a gift to a spouse or to charity, made with the purpose of qualifying for IHT spouse or charity relief? That is not affected, as the TAAR only applies “in determining whether or to what extent property

situated outside the UK is excluded property”.

Sch A1 Q&As provides:

**Question 27: Tax avoidance arrangements (TAAR)**

... It is assumed this would not catch “ordinary” arrangements such as an individual choosing to borrow from a bank to purchase UK property rather than using their own cash resources.

*Suggested answer:* Confirmed

It is correct that this arrangement is not within the scope of the TAAR. But the reason is not that it is an “ordinary” arrangement (whatever that may mean); but because there is no excluded property to which the disregard might apply.

HMRC say:

...without more we would say that in your example the liability is deductible depending upon IHTA s162(5) and the lender has made a relevant loan

**78.18 DTA override**

Sch A1 property is chargeable (de-excluded) property. However the property is normally movable rather than immovable property, and it can in principle qualify for IHT DTA relief.

Para 7(1) sch A1 IHTA provides a treaty override:

[A] Nothing in any double taxation relief arrangements<sup>80</sup> made with the government of a territory outside the UK is to be read as preventing a person from being liable for any amount of inheritance tax by virtue of paragraph 1 [Sch A1 property] or 5 [residence-tail] in relation to any chargeable transfer

[B] if under the law of that territory—

- (a) no tax of a character similar to inheritance tax is charged on that chargeable transfer, or
- (b) a tax of a character similar to inheritance tax is charged in relation to that chargeable transfer at an effective rate<sup>81</sup> of 0%

---

80 Para (2) provides the standard IHT definition: “In this paragraph “double taxation relief arrangements” means arrangements having effect under section 158(1)”.

81 Para 7 (2) sch A1 IHTA provides a commonsense definition: “In this paragraph “effective rate” means the rate found by expressing the tax chargeable as a percentage of the amount by reference to which it is charged.”

(otherwise than by virtue of a relief or exemption).

I refer to this as “**treaty-override**”. It is a breach of the IHT treaties. But parliament is supreme and can breach treaties. But the section should be narrowly construed, to minimise the breach.

The provision distinguishes between cases where:

- (a) No tax is charged
- (b) Tax is charged but at a rate of 0%.

I would have thought that if tax is charged at 0% then no tax is charged. But it does not matter.

#### 78.18.1 >0% rate or relief

Sch A1 Q&As provides:

##### **Question 30: Zero rate and DTT**

Where a DTT is applicable but the rate of tax is nil because of say spouse exemption (as with the USA on transfers between US citizens) we assume that para 7 is not intended to disapply relief. IHT is not as such charged at all in these circumstances rather than at an effective rate of zero. The words in para 7(1)(b) could be taken to mean that unless IHT is actually charged but at zero percent DTT does not apply where a chargeable transfer is (say) spouse exempt. In many cases there will just be an exemption and no IHT.

*Suggested answer:* We agree that para 7 does not disapply relief in these circumstances.

HMRC agree. No other answer is possible.

If property falls within a foreign equivalent of the nil-rate band, the effective rate will be nil, but that does not matter if the band is a relief or exemption. IHT Manual provides:

##### **IHTM04315 Double Taxation Arrangements [Sep 2018]**

###### **...Example 2 (Nadine)**

N is a farmer and is domiciled in Iowa. She is not a UK national. Her £1m house in the Scottish highlands is held via an offshore company. She dies in the USA.

The USA has taxing rights but the value of her estate is below the threshold and there is no tax paid in the USA. The UK charges IHT on the full £1m value attributable to the UK property.

However, if her estate were charged to US Federal Estate Tax then the

UK's charge to IHT is denied by the UK/US Convention. This would also be the case where there was no US tax payable because of a specific relief, such as the special land use valuation for farm assets

HMRC assume that the nil-rate threshold is not a relief or exemption, but is that right?

Sometimes planning may be possible to arrange that a foreign inheritance tax is paid at a rate which is above nil, but less than the IHT rate.

### 78.18.2 *Scope of treaty override*

Suppose there is UK situate sch A1 property. Some DTAs provide relief for these assets even though UK situate. In such a case DT relief continues to apply. The treaty override does not apply, because there is no liability "by virtue of paragraph 1 or 5".

Suppose a deemed domiciled individual holds sch A1 property. The treaty override does not apply as the shares are not excluded property and so there is no liability "by virtue of paragraph 1 or 5". Bizarrely, the treaty override does apply before the individual became deemed domiciled, since the non-UK situs shares would be excluded property at that time, but the treaty override ceases to apply on the deemed domicile start date.

Sch A1 Q&As agrees:

#### **Question 29: Double tax treaty override and deemed domiciliary**

The double tax treaty override in para 7 only applies to the extent a person is liable to IHT by virtue of para 1 or para 5. We assume ... that in relation to a person who is already deemed domiciled here and whose interests in foreign companies are not excluded property irrespective of schedule A1, that para 7 has no relevance. The excluded property rules are not disapplied by virtue of paras 1 or 5 but simply do not apply in the first place.

#### *Example 14*

Two brothers Jeremy and John are both foreign domiciled. John is deemed domiciled for UK tax purposes. Both are domiciled in India under common law. Both hold UK residential properties through offshore companies. They are killed in an accident and their non-UK estates are dealt with under Indian Wills. In these circumstances:

- on the death of John (who is deemed domiciled) treaty relief is available to exempt the company shares from IHT because the treaty override in para 7 is not effective for a deemed domiciliary as his

interests in foreign companies are not excluded property so Sch A1 is not applicable;

- in the case of Jeremy (who is not deemed domiciled) nothing in the treaty prevents Sch A1 from applying to his interests in the offshore companies since for UK inheritance tax purposes the shares are otherwise excluded property.

Please confirm that HMRC agrees with the above analysis.

*Suggested answer:* Confirmed.

That is the only possible answer. HMRC agree.

### 78.19 “Residential property interest”

The IHT residence-property code is aimed at residential property. We therefore need a definition of the residential property to which it applies.

Para 8 sch A1 IHTA provides:

(1) In this Schedule “UK residential property interest” means an interest in UK land<sup>82</sup>—

- where the land consists of a dwelling,<sup>83</sup>
- where and to the extent that the land includes a dwelling, or
- where the interest subsists under a contract for an off-plan purchase.<sup>84</sup>

(2) For the purposes of sub-paragraph (1)(b), the extent to which land includes a dwelling is to be determined on a just and reasonable basis.

IHT adopts CGT definitions of “interest in UK land” and “dwelling”.

What matters is the state of the land and other facts as at the time of the IHT charge.

82 Para 8(3) sch A1 IHTA provides:

“In this paragraph “interest in UK land” has the same meaning as it has for the purposes of section 1A(3)(b) of the 1992 Act (see section 1C of that Act)”.

See App 2.18 (Interest in land/chargeable interest).

83 Para 8(3) sch A1 IHTA provides:

“In this paragraph ... “dwelling” has the same meaning as it has for the purposes of Schedule 1B to the 1992 Act”.

See App 2.19 (Dwelling/residential property).

84 Para 8(3) sch A1 IHTA provides:

“In this paragraph ... “contract for an off-plan purchase” means a contract for the acquisition of land consisting of, or including, a building, or part of a building, that is to be constructed or adapted for use as a dwelling.”

### 78.19.1 *Easement/restrictive covenant*

Para 8(3) sch A1 IHTA provides:

In this paragraph... “the land”, in relation to an interest in UK land which is an interest subsisting for the benefit of land, is a reference to the land for the benefit of which the interest subsists”.

This refers to easements (such as a right of way) or covenants (eg a promise not to build on land): these are interests in land which subsist for the benefit of other land.

Expanded as para 8(3) requires, para 8(1) sch A1 IHTA provides, in relation to easements etc, “UK residential property interest” includes an interest in UK land:

- (a) where the land for the benefit of which the interest subsists consists of a dwelling,
- (b) where and to the extent that the land for the benefit of which the interest subsists includes a dwelling, or
- (c) where the interest subsists under a contract for an off-plan purchase.

### 78.19.2 *Contract to buy/sell asset*

In English law, buyer and seller both hold interests in land, between contract and completion.<sup>85</sup> Both interests are therefore within the scope of the IHT residential-property code. The same applies to a sale of shares or of a relevant loan.

Assuming a sale at market value, and assuming values do not change during the life of the contract, the value of the buyer’s interest is equal to the deposit paid; and the value of the seller’s interest is equal to the market value less the value of the deposit received.

HMRC agree. The answer to sch A1 Q&As Question 1 provides:

HMRC: We agree that the value of the purchaser’s right would be subject to the obligation to pay the consideration.

A loan to an individual/trust buyer, which funds the payment of the

---

<sup>85</sup> Further thought would be required for land in Scotland/Northern Ireland. See too 97.29 (Land subject to contract of sale).

deposit, is a relevant loan.

A loan to an individual/trust seller, which was used to fund the purchase of the property, remains a relevant loan between contract and completion; though if a deposit is received, it is considered that part disposal relief applies, so the loan ceases to be a relevant loan to that extent.<sup>86</sup>

It appears that HMRC agree. The answer to sch A1 Q&As Question 2 provides:

There must be a loan and that would occur when it is drawn down and that loan becomes a relevant loan when the interest in UK land is acquired.

If that is right, the analysis in sch A1 Q&As Questions 1 and 2 (not set out here) may be slightly imprecise, but its conclusions are broadly correct.

## **78.20 Residence co: Share value**

What is taxed, and valued, is the sch A1 property, not the land.

The 2016 consultation paper provides an example:

... a non-dom is the sole shareholder of an overseas company whose sole assets consist of a UK residential property. The company has no liabilities.

At the individual's death, their estate will consist of the overseas shares which have an open market value of £950,000.

At the same time, the UK property has an open market value of £1 million.

The HMRC analysis is as follows:

In such a situation, the value of the estate is £950,000, and this is derived wholly from the UK residential property. This would mean that IHT would be charged on the entire estate which has an open market value of £950,000. This is broadly the treatment which would apply in the case of an individual who is domiciled in the UK.

Valuation of a company holding a residence is not straightforward. From a purchaser's viewpoint:

- (1) There should be a discount on net asset value to reflect liabilities for:
  - (a) CT on the gain (contingent on a disposal)

---

<sup>86</sup> See 78.8.12 (Disposal of residence).

- (b) ATED
  - (c) Administration costs
  - (d) The risk of undisclosed corporate liabilities/due diligence cost
  - (e) The risk of future tax changes
- (2) There should be a premium to reflect SDLT advantages achievable by a sale of the shares rather than the company

A purchaser who will be within ATED (in short, intending to use the property as a home) would prefer to purchase the property, not the company; and may want a discount to reflect the disadvantages of holding through a company. But the purchaser may still save SDLT by purchasing the company and then promptly winding it up.

On the other hand, a purchaser for long term investment, who can qualify for ATED rental relief,<sup>87</sup> and who is prepared to undertake corporate due diligence, is likely to prefer to purchase the company. But that purchaser will bear in mind the difficulties and costs when selling the shares in the future.

Perhaps HMRC will adopt a pragmatic practice of allowing a 5% discount from net asset value, which accords with the approach of the example.<sup>88</sup> But if supported by valuation evidence, taxpayers may argue for a greater discount. Valuation is a question of fact, on which a share valuer would be needed to advise (though the valuer would need to be aware of the tax background, ie the current advantages and disadvantages of holding a property through a company, and would probably need to be briefed on that). While comparables of earlier company sales may be relevant, the tax background has constantly changed,<sup>89</sup> and earlier data would need to be reviewed in the light of that.

## 78.21 Home of non-dom: Planning

The starting point is that an individual may own the property directly.

---

<sup>87</sup> See 93.18 (ATED rental relief).

<sup>88</sup> Though the example was looking at the position in 2016, before the introduction of CGT on shares in land-rich companies; that change should increase the discount.

<sup>89</sup> In particular, company sales at an earlier time would have had additional advantages over property sales, relating to CGT and IHT. So whatever discounts may have existed in the past ought to increase. For this purpose what matters is less the date of implementation of the changes, but the date of the announcement.

This is the benchmark against which other proposals may be assessed.

The property is in the individual's estate and in principle within the scope of IHT on his death. An individual who is married may provide by will that the property should pass to the individual's surviving spouse, or to a trust under which the spouse has an interest in possession. That in principle postpones IHT until the occasion of the death of the survivor of the individual and spouse.<sup>90</sup>

The risk of IHT may quite cheaply be covered by insurance. Watch that the insurance policy is not subject to IHT on the death of the individual:

- (1) Arrange that the policy is not UK situate<sup>91</sup> (so the policy is excluded property); or
- (2) transfer the policy to a trust (under which the individual is excluded) but possible IHT charges on the trust make this unattractive for a UK situate policy.

The amount to be insured will need to be reviewed from time to time in line with house inflation and possible changes in the rate of IHT.

It would be possible to take steps to avoid IHT even at short notice, if the death of a non-domiciled owner became imminent, by a sale.<sup>92</sup>

So in practice tax exposure should be limited to:

- (1) SDLT, not insubstantial, of course, and CGT (if any); and
- (2) the risk of IHT in the event of the sudden death of the individual (or sudden joint deaths of individual and spouse).

There will be no CGT on the sale of property if main private residence relief applies. If the individual has another residence inside or outside the UK, it may be appropriate to make a MPR election.

There is in principle a taxable remittance, if the purchase price is paid out of foreign income or chargeable gains within the scope of the remittance basis.

Loans from open companies may be used to reduce the IHT exposure.<sup>93</sup> That needs to be considered when the property is purchased, not later.

Similar points apply to chattels in the home except there is no CGT

---

90 See 74.19 (GWR on death: Spouse exemption).

91 See 97.23 (Insurance policy).

92 The sale must be completed: an uncompleted contract of sale is not sufficient.

93 See 76.43 (GAAR: Debt against UK residence).

exemption (apart from the exemption for chattels under £6,000),<sup>94</sup> no SDLT, and the IHT residence-property code does not apply.

#### 78.21.1 *Ownership: Non-tax aspects*

The property may be held by a nominee for the individual. This may give an element of confidentiality, if it is desired to avoid the name of the beneficial owner being published on the land registry, but forthcoming changes will end that.<sup>95</sup> In addition an English grant of probate would still be needed in the event of the death of the individual.

Trust or company ownership avoids the need for an English grant of probate after the death of the individual.

Personal ownership may be necessary, or at least desirable, in order to secure that the owner of a long lease acquires the right to enfranchisement.

Further consideration will be needed for property in Scotland and Northern Ireland.

#### 78.21.2 *Home in estate IIP trust*

This option only arises if there is a suitable estate IIP trust in existence, which will not now be so common.

The IHT position is broadly the same as absolute ownership by the life tenant.

This course is more attractive for estate IIP trusts where:

- (1) the life tenant is the settlor;
- (2) the settlor is dead;
- (3) the settlor is, or can be, excluded from the trust (or from a sub-fund which will hold the UK home); or
- (4) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.<sup>96</sup>

In the case of a non-resident trust, the occupation of the property is a capital payment received in the UK, giving a possible s.87 charge if chargeable gains accrue to the trust. Chargeable gains may arise on a

---

94 See 61.10 (Chattels)..

95 See 120.2, 121.1 (CRS & other information sources).

96 See 74.9 (Gift of excluded property).

disposal of the house, if the private residence exemption is not fully available, for instance if:

- (1) the grounds exceed the “permitted area”
- (2) there is another private residence which qualifies for the relief
- (3) in relation to chattels which do not qualify for exemption

### 78.21.3 *Home in discretionary trust*

In principle a discretionary trust or non-estate IIP trust could hold the UK home between ten year anniversaries. This might be a convenient short or medium term way to hold a family home. This course is more attractive where:

- (1) the settlor is dead;
- (2) the settlor is, or can be, excluded from the trust (or from a sub-fund which will hold the UK home); or
- (3) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.<sup>97</sup>

### 78.21.4 *Home in non-resident company*

Holding the UK home of a foreign domiciliary in a non-resident company, formerly the standard course, is not usually attractive.

For inheritance tax, the shares in the company are now chargeable (de-excluded) property, and the proceeds of sale of the shares are also caught for two years under the residence-tail rule.

The company will be subject to CGT if it sells the property. A non-resident shareholder will also in principle be subject to CGT.

Purchase by a company has the advantages of SDLT saving on a sale of the company. However, the general rule will be not to purchase by a company because of ATED and ATED-SDLT. A corporate purchase may however still be attractive where ATED rental relief will apply (property let to an unconnected person), for SDLT and for IT reasons.

A corporate purchase of a property worth under £500k is outside ATED, but one needs to consider:

- (1) The possibility that the property will sooner or later become worth

---

<sup>97</sup> See 74.9 (Gift of excluded property).

more than £500k and fall within ATED; or that the ATED bands may be lowered again

- (2) Administrative costs

## **78.22 IHT residence code: Critique**

### *78.22.1 Restriction to residential property & stability*

Why is the IHT residence-property code limited to residential property? This is speculation as the policy reasons have never been discussed publically, and may never have been considered, even privately; but various possible justifications come to mind:

- (1) Perhaps the rules reflect an unexamined assumption that tax planning involving residential property is more objectionable than other tax planning.
- (2) Perhaps the aim is an economic one: not to affect the commercial property market, while accepting, or perhaps welcoming, a dampening effect on residential property. It seems to me questionable whether IHT has a significant effect on the residential property market, though I am not aware of any serious studies on the topic. To disentangle IHT from other tax factors, such as SDLT and broader economic considerations of supply and demand, would be difficult and perhaps impossible. But that does not mean that IHT has no effect. There may be an effect at the top end of the market if not elsewhere.
- (3) Perhaps the aim is a social or political one, to discourage foreign investment in residential property, or to tax it more heavily, or at least to ensure that it is not taxed any less heavily.

There may of course be more than one of these reasons in play.

This may be seen in the context of other rules which tax non-residents more heavily on UK residential property.<sup>98</sup>

Is the law stable? The 2015 residence-property paper provides:

9. The government does not intend to change the IHT position for non

---

<sup>98</sup> See 60.3 (Non-residents PRR disallowance), and the SDLT non-UK resident surcharge to be introduced in the FA 2021. This is an international trend in taxation: see Ti, “Politics and Policy: Chinese money and its impact on the Regulation of Residential Property in the West” [2019] *The Conveyancer* 371.

doms or excluded property trusts in relation to UK assets other than residential property, or for non-UK assets.<sup>99</sup>

Experience shows that statements like this cannot be relied on. So (even without a change of government) it is possible that the rules may be extended to non-residential property; this happened with the former NRCGT, a CGT charge on residential property introduced in 2015 and extended to non-residential property in 2019.<sup>100</sup>

The drafting of the provisions is in some respects inadequate. Resources permitting, amendment on points of detail seems likely if and when that is appreciated.

But these changes may not happen soon, or at all.

### 78.22.2 *Replace residence-code with ATED*

Will the IHT residence-property code produce a significant yield, proportionate to its complexity, which is enormous? That seems unlikely. But simple repeal would face the objection to rules under which UK property was chargeable but the charge could quite simply be avoided by use of a company (The fact that this was the law from the inception of CTT/IHT in 1975 until 2017 is not a full answer).

There is a relatively simple solution. This is to abolish the IHT residential property code, and replace it with an ATED charge, ie ATED rates should reflect the IHT lost by holding UK residential property in companies. Adopting the approach of the IHT relevant property regime, that would equate to roughly 0.6% p/a for more valuable property (say above £1m).

This could be criticised as:

- (1) It is a rough and ready solution, in that the same rate is payable regardless of the IHT exposure of a direct owner; and
- (2) It is harsh by some comparison to the IHT cost of direct ownership.

But the same is true of the IHT relevant property trust regime generally; and individuals may chose not to hold UK residential property via

---

<sup>99</sup> The paper continues: “Nor will these reforms affect people who are domiciled in the UK.” That is incorrect, as the reforms affect settlements made by foreign domiciled settlors who have later become UK domiciled.

<sup>100</sup> See 1.2 (Non-residents CGT: History).

companies if they wish.

The reader may think it a pity that the manner in which UK tax reform is conducted precluded serious policy discussion of this kind when the rules were introduced.

CHAPTER SEVENTY NINE

**FAMILY HOME AND CHATTELS:  
BENEFIT IN KIND CHARGES**

79.1 Home/chattels owned by company

**79.1 Home/chattels owned by company**

Until 2013 it was common for the family home to be acquired by a company and occupied by individuals with some interest in the company. That may have been done for reasons relating to IHT (excluded property), VAT, confidentiality, and limited liability.

Following the introduction of ATED in 2013, acquisition by companies became less attractive. The 2017 IHT residence-property code removed the IHT advantage, and confidentiality is also proposed to be removed. Corporate acquisition will now be rare. There remain a significant, if decreasing, number of companies holding properties acquired before 2013.

It is still common for valuable chattels to be held by companies.

Corporate ownership raises many tax issues. The main topics are covered in 3 chapters:

<b>Topic</b>	<b>Chapter</b>
Employment income benefits in kind	<i>This chapter</i>
IHT residence-property code and tax planning	78.1
ATED and ATED-SDLT	93.1

**79.2 The benefits code**

The “benefits code” is the statutory term for the provisions which charge benefits in kind (“**BiK**”) in Part 3 ITEPA.

Section 63(1) ITEPA lists them, non-numerically:

In the employment income Parts “the benefits code” means:<sup>1</sup>

<b>Chapter</b>	<b>Topic</b>
2	General
3	Expenses payments
4	Vouchers and credit-tokens
5	Living accommodation (abbreviated to “accommodation”)
6	Cars, vans and related benefits
7	Loans
10	Residual benefit in kind charge

Thus there are six categories of benefits in kind. Part 3 is best regarded as six distinct sub-codes: each Chapter provides a (more or less) self-contained code. They share a few definitions and other rules, but they do not have much in common. Perhaps “benefit codes” (in the plural) would be a more apt label; but use of the singular at least shows an aspiration to coherence.

This chapter deals with two of these codes:<sup>2</sup>

- (1) Chapter 5: (“**accommodation BiK charge**”)
- (2) Chapter 10: I call this the “**benefit BiK charge**” and leave “residual” to be understood. This catches the benefit of use of chattels (except cars, which come under Chapter 6). Common examples are works of art, yachts and aircraft.

This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the BiK charges as a whole. I deal with the topic in the following order:

- (1) Property law background
- (2) Definitions applying to the benefits code generally
- (3) BiK codes:
  - (a) Accommodation BiK code
  - (b) The benefit BiK code
- (4) Remittance basis, non-residence, and other issues which apply to the benefits code generally

### 79.3 Property law background

---

1 I recast the text which follows into a table easier to follow.

2 For loans, see 81.2 (Employment-related loan). I do not consider the other three benefit codes.

A company may hold property:

- (1) Beneficially
- (2) As nominee/bare trustee, for an individual, or other person, as a result of:
  - (a) A declaration of nomineehip
  - (b) A resulting trust
  - (c) Sham (an ineffective trust)I refer to that as “**corporate nomineehip**”.

### 79.3.1 *Company ownership: Home*

In *Prest v Petrodel Resources*:<sup>3</sup>

Whether assets legally vested in a company are beneficially owned by its controller is a highly fact-specific issue. It is not possible to give general guidance going beyond the ordinary principles and presumptions of equity, especially those relating to gifts and resulting trusts.

Having issued the disclaimer, the court went on to give its guidance:

But I venture to suggest, however tentatively, that in the case of the matrimonial home, the facts are quite likely to justify the inference that the property was held on trust for a spouse who owned and controlled the company.

The court gives two or three reasons for this view:

[1] In many, perhaps most cases, the occupation of the company’s property as the matrimonial home of its controller will not be easily justified in the company’s interest, especially if it is gratuitous.

[2] The intention will normally be that the spouse in control of the company intends to retain a degree of control over the matrimonial home which is not consistent with the company’s beneficial ownership.

[3] Of course, structures can be devised which give a different impression, and some of them will be entirely genuine. But where, say, the terms of acquisition and occupation of the matrimonial home are arranged between the husband in his personal capacity and the husband in his capacity as the sole effective agent of the company (or someone

---

<sup>3</sup> [2013] 2 AC 415 at [52].

else acting at his direction), judges exercising family jurisdiction are entitled to be sceptical about whether the terms of occupation are really what they are said to be, or are simply a sham to conceal the reality of the husband's beneficial ownership.<sup>4</sup>

In *Prest*, the refusal to co-operate by the companies concerned was said to evidence in favour of corporate nomineehip. It seems to me an exaggeration to say corporate nomineehip will *normally* be the intention where a company owns legal title to the family home. I have wondered whether there is a divide between the family and chancery divisions of the High Court, despite protestations to the contrary;<sup>5</sup> but perhaps corporate nomineehip is more common in those family law cases which come before the courts, while not typical of the whole. It would need some empirical research to answer that.

However that may be, there should be no difficulty in arranging beneficial ownership in the company, if that is what is desired, given proper advice to the client, proper documentation, and competent company directors who can attest that they know and fulfil their duties as directors. Proper conveyancing, company accounts and a lease or licence agreement between the company and the occupier are important indicators of corporate beneficial ownership.

In some cases the taxpayer may wish to argue that the company *does* hold property as nominee, to avoid benefit in kind, ATED and other charges associated with corporate ownership. In particular, if a person is a shadow director, that supports the view that the company is not beneficial owner,<sup>6</sup> which may be helpful from a tax viewpoint.

### 79.3.2 *Company ownership: Chattels*

Similar issues may arise as for the family home, but there may be a further conveyancing issue. The Bills of Sale Act 1878 (in short) applies where

---

<sup>4</sup> The third reason is just an example or facet of the second.

A sham argument was rejected in *Skyparks v Marks* [2001] WTLR 607. But sham depends on the facts in each case.

<sup>5</sup> *Prest* at [37]: "Courts exercising family jurisdiction do not occupy a desert island in which general legal concepts are suspended or mean something different. If a right of property exists, it exists in every division of the High Court and in every jurisdiction of the county courts. If it does not exist, it does not exist anywhere."

<sup>6</sup> *M v M* 16 ITELR 391 at [214].

a person makes a transfer of goods (a “bill of sale” is widely defined) and retains possession of the goods. This could apply on a transfer from an individual to a trust or to a company. The transfer is void as against the trustees in bankruptcy of the transferor unless the bill of sale is registered in a public register. This is to prevent fraud on creditors. However, it really does not matter if a transfer of chattels is void as against a trustee in bankruptcy, in the event that the individual became bankrupt. After all, every gift and transaction at an undervalue can in principle be set aside within two years,<sup>7</sup> but no-one suggests that has significant tax implications for solvent taxpayers. Thus registration of a transfer of chattels (the bill of sale) is not necessary, and in practice it is never done.

## **79.4 “Family” and “household”**

### 79.4.1 “Family”

Section 721(4) ITEPA defines “family”:

For the purposes of this Act the following are members of a person’s family—

- (a) the person’s spouse or civil partner,
- (b) the person’s children and their spouses or civil partners,
- (c) the person’s parents, and
- (d) the person’s dependants.

Stepchildren are excluded, as are parents-in-law. They will however still qualify as family if they are dependants.

Illegitimate children do not count as “children”; see s.721(6) ITEPA.<sup>8</sup> This is unacceptable by contemporary standards, but it will not often matter, and the parent is not likely to complain. Section 721(6) should obviously be repealed.

### 79.4.2 “Household”

Section 721(5) ITEPA provides:

For the purposes of this Act the following are members of a person’s family or household—

---

<sup>7</sup> Section 339 Insolvency Act 1986.

<sup>8</sup> In Scots law there are no illegitimate children, so this does not apply to Scots domiciled individuals; see 3.18.5 (Abolition of illegitimacy).

- (a) members of the person's family,
- (b) the person's domestic staff, and
- (c) the person's guests.

### 79.4.3 *Which family*

In *Baylis v HMRC*<sup>9</sup> a benefit (care home fees) was provided to a non-employee who was:

- (1) spouse of one employee (“the husband”)
- (2) mother of another employee (“the daughter”)

It seemed that:

- (1) The husband was taxable as there was a benefit to his family (to his spouse) under s.721(4)(a).
- (2) The daughter was taxable as there was a benefit to her family (to her mother) under s.721(4)(c).

But they could not both be taxable, so which was it to be? HMRC argued that the employer had the right to choose! but that could not be right. The tribunal inventively found the solution in the order in which the relationships were listed in s.721(4), so the husband was taxable in priority to the daughter.

The decision ought to be confirmed by statute, and it leaves a few loose ends, but it seems as good a solution as any other.

## 79.5 “Director”

Section 67(1) ITEPA provides:

In the benefits code “director” means--

- (a) in relation to a company whose affairs are managed by a board of directors or similar body, a member of that body,
- (b) in relation to a company whose affairs are managed by a single director or similar person, that director or person, and
- (c) in relation to a company whose affairs are managed by the members themselves, a member of the company,<sup>10</sup>

<sup>9</sup> [2017] SFTD 217.

<sup>10</sup> When are the affairs of a company managed by the members themselves? An example is an unincorporated association which is a company for UK tax purposes but which may have members but no directors. Likewise some foreign law entities, for instance, perhaps, a foreign law LLP.

and includes [a shadow director, discussed in the next section below].

## 79.6 Shadow directors

### 79.6.1 “Shadow director”

Section 67(1) ITEPA provides:

In the benefits code “director” ... includes any person in accordance with whose directions or instructions the directors of the company (as defined above) are accustomed to act.

Such a person is referred to as a “**shadow director**”.<sup>11</sup>

In *Secretary of State for Trade and Industry v Deverell* Morritt LJ comments in numbered paragraphs:<sup>12</sup>

(1) The definition of a shadow director is to be construed in the normal way to give effect to the parliamentary intention ascertainable from the mischief to be dealt with and the words used. In particular, as the purpose of the Act is the protection of the public and as the definition is used in other legislative contexts, it should not be strictly construed because it also has quasi-penal consequences in the context of the Company Directors Disqualification Act 1986.

This suggests that the comments in *Deverell* will apply in all contexts where the standard definition of shadow director is used, including tax contexts. It is difficult to argue that the shadow director concept should have a different meaning in a tax context than in the director disqualification context of *Deverell*. But *Deverell* is considering “shadow directorship” in the context of a commercial trading company. The position of a relatively quiescent property holding company is different.

... (2) The purpose of the legislation is to identify those, other than professional advisers, with real influence in the corporate affairs of the company.

---

11 A note on terminology. This useful and familiar label was first used in the Companies Act 1980. The wording of the concept behind the label goes back to the Companies (Particulars as to Directors) Act 1917.

12 [2001] Ch 340 at p.354. In his readable memoir, Kerr LJ deprecates “quotable pontific paragraphs, preferably numbered”: *As Far as I Remember* (2006), p.285. Passages of that kind can be useful, but the point is not to elevate them to a higher status than other types of case law.

This paraphrase does not take us very far because it only raises the question as to what is meant by “real<sup>13</sup> influence”.

But it is not necessary that such influence should be exercised over the whole field of its corporate activities. ...

This is uncontentious. The BiK charge could apply where a trust held a company holding both a home and investments, even though the shadow director did not give instructions relating to the investments but only to the home.

(3) Whether any particular communication from the alleged shadow director, whether by words or conduct, is to be classified as a direction or instruction must be objectively ascertained by the court in the light of all the evidence.

Obviously.

In that connection I do not accept that it is necessary to prove the understanding or expectation of either giver or receiver. In many, if not most, cases it will suffice to prove the communication and its consequence. Evidence of such understanding or expectation may be relevant but it cannot be conclusive.

This is extraordinary. “Directions or instructions” are a subset of “communications” and the feature that distinguishes them is that a person giving instructions expects them to be followed and the person receiving them understands this.

Certainly the label attached by either or both parties then or thereafter cannot be more than a factor in considering whether the communication came within the statutory description of direction or instruction.

This at least is correct.

(4) Non-professional advice may come within that statutory description. The proviso excepting advice given in a professional capacity<sup>14</sup> appears

---

13 The dangerous and beguiling word “real” is normally an indicator of vague if not sloppy legal thinking. See App 6.1 (What Do We Mean by “Real?”).

14 See s.67(2) ITEPA:

“... a person is not to be regarded as a person in accordance with whose directions or instructions the directors of the company are accustomed to act merely because

to assume that advice generally is or may be included.

This is extraordinary, for the concept of “directions or instructions” is the antithesis of “advice”. The distinguishing feature is that the former is mandatory and the other is not. This is confirmed (if confirmation was necessary) by Hansard. When (what is now) the proviso was proposed, the Lord Chancellor (Viscount Cave) said:

it is unnecessary, because in my view the expression “any person in accordance with whose directions or instructions the directors are accustomed to act” does not include a person who merely gives them advice. Directors do not act by the directions or on the instructions of their solicitor or their auditor. Those persons advise them, but do not direct or instruct them.<sup>15</sup>

The clause was added for clarity. Lord Banbury said:

This seems to me to be an extremely complicated Bill and therefore any Amendment which makes it clearer should, I venture to say, be accepted. The Amendment of the noble Earl makes it quite clear that any person who ... gives advice professionally shall not be included as a director. The Lord Chancellor says that is not necessary because it is already the meaning and interpretation of the Bill, but speaking only as an ordinary layman, I am not at all sure if I were asked to give my opinion on that, that I should think that really was so. Consequently there might be a certain number of people who would take advantage of this to go to law, spend money in bringing an action and then find they had no grounds for their case. ... I do think it would be an advantage if some words were put in to make the section quite clear.<sup>16</sup>

Of course, advice may slide imperceptibly into directions. For instance, if a solicitor advises a company that a particular act is required by law, and there is no option but to adopt it. Such advice may arguably be characterised as a direction or an instruction, and here the proviso may be useful.

---

the directors act on advice given by that person in a professional capacity.”

15 [http://hansard.millbanksystems.com/lords/1927/may/26/companies-bill-hl#S5LV0067P0\\_19270526\\_HOL\\_248](http://hansard.millbanksystems.com/lords/1927/may/26/companies-bill-hl#S5LV0067P0_19270526_HOL_248)

16 [http://hansard.millbanksystems.com/lords/1927/may/26/companies-bill-hl#S5LV0067P0\\_19270526\\_HOL\\_248](http://hansard.millbanksystems.com/lords/1927/may/26/companies-bill-hl#S5LV0067P0_19270526_HOL_248)

The proviso excepting advice given in a professional capacity, properly understood, does not shed any light on the general meaning of shadow director.

The court in *Deverell* continued:

Moreover the concepts of “direction” and “instruction” do not exclude the concept of “advice” for all three share the common feature of “guidance”.

The less said about this line of reasoning the better.

(5) It will, no doubt, be sufficient to show that in the face of “directions or instructions” from the alleged shadow director the properly appointed directors or some of them cast themselves in a subservient role or surrendered their respective discretions. But I do not consider that it is necessary to do so in all cases. Such a requirement would be to put a gloss on the statutory requirement that the board are “accustomed to act” “in accordance with” such directions or instructions. It appears to me that Judge Cooke, in looking for the additional ingredient of a subservient role or the surrender of discretion by the board, imposed a qualification beyond that justified by the statutory language.

If the statutory language were: “in accordance with whose *wishes* the directors were accustomed to act” this would be a fair comment. But the expression “directions or instructions” shows that the position must be one where the shadow director commands and the properly appointed directors obey.

The points made in the passage are wholly negative. That is, in determining the issue of “shadow directorship”:

- (1) The understanding or expectation of the parties is *not* conclusive.
- (2) The label attached by the parties is *not* conclusive.
- (3) The fact that the communication is “advice” is *not* conclusive (except in the case of professional advice).
- (4) The fact that the properly appointed directors surrender their discretions or act in a “subservient” role is *not* essential.

This does not answer the question: how *does* one identify a shadow director? The mere fact that there is a stream of communications from the individual to the company, which is acted on by the company, is not conclusive. The author regularly sends “communications” to Amazon, and Amazon act on those communications without fail. Yet the author is

not a shadow director of Amazon. The author regularly sends directions (a cheque is a direction) to his bank and the bank act on those directions without fail. Yet the author is not a shadow director of the bank. In the 4th edition of this work I concluded:

one can expect some back-tracking, refinement or qualification from the Courts in cases they regard as more meritorious than that of Mr. Deverell.

This has now been confirmed by *Ultraframe v Fielding*:<sup>17</sup>

1267 ... where the alleged shadow director is also a creditor of the company, he is entitled to protect his own interests as creditor without necessarily becoming a shadow director.

1268 [Counsel] submitted that it is critical to distinguish the position of a lender (whether or not also a shareholder) from that of a director. A lender is entitled to keep a close eye on what is done with his money, and to impose conditions on his support for the company. This does not mean he is running the company or is emasculating the powers of the directors, even if (given their situation) the directors feel that they have little practical choice but to accede to his requests. Similarly with customers who may, because of their buying power, be able effectively to dictate conditions to their suppliers (or the other way around). In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position. To find otherwise would place a wholly unfair and unnatural burden on men of business. In broad terms, I accept this submission.

The approach which applies to a creditor of the company also applies to a beneficiary of a trust which holds the company: they are entitled to protect their own interests ... without necessarily becoming a shadow director ... In other words a position of influence (even a position of strong influence) is not necessarily a shadow directorship.

HMRC have in the past argued that where someone resides in a property held by a company which is held by a trust of which that person is a beneficiary, it is (at least) highly likely that that person must be a shadow

---

17 [2005] EWHC 1638, [2007] WTLR 835.

director.<sup>18</sup> This is unjustified for the reason set out in *Ultraframe*.

Suppose a person treats the property owned by the company as their own and has no dealings with the directors: they just ignore them. They do nothing (except perhaps charge their fees). In such a case the company may be a sham (or nominee). Whether or not that is so, the individual is not a shadow director. They give no instructions.

A non-resident person may be a shadow director, but may fall outside the BiK charge for other reasons.<sup>19</sup>

The definition of shadow director is restricted to those who control all or the majority of the directors on a company's board. Control of a minority of directors does not suffice.

### 79.6.2 *Agent as shadow director*

It is suggested that an agency agreement under which the occupier of a property is responsible for routine maintenance matters on behalf of the company would not make the individual a shadow director as long as the decision to enter into contract was properly made by the directors and the directors properly supervise the work of the individual.<sup>20</sup> This should not be difficult if the directors understand their duties are to all beneficiaries of the trust (not just to the settlor) and if the individual occupier of the property also understands this. It would be different if the agency agreement covered matters not usually delegated by an investment company to an agent.

### 79.6.3 *Occupier as shadow director*

Suppose an existing company purchases a home or chattels for use by a UK resident foreign domiciliary. The choice of a home and its chattels is a personal one and the individual would normally have to give at least

---

18 Note that there is no support for this view in the HMRC Manuals. Employment Income Manual 11413 [Aug 2016] states correctly that *where* an individual residing in property is a shadow director, there is a BiK charge. It does *not* state that the mere fact of occupation makes a shadow directorship "highly likely".

19 See 79.40 (Benefits in kind: Non-resident).

20 This is consistent with the rule that the activities of an agent appointed by trustees to manage the day to day affairs of a trust were not relevant in determining the place of general administration (which was formerly important for determining CGT trust residence). See the 5th edition of this book, para 5.6.2.

a "communication" to the company which raises at least potential shadow directorship issues.

The position is different if:

- (1) trustees purchase property directly, and
- (2) the trustees transfer the property to a foreign company on their own initiative and without reference to the occupier.<sup>21</sup>

In this scenario the decision involving the company's acquisition is that of the trustees, not the individual.

It would be best if the directors and trustees were separate persons. All communications should be through the trustees and not the directors of the company.

If the foreign domiciliary desires to sell and, perhaps, purchase another home, they should communicate their wishes to the trustees. Then:

- (1) The trustees may put the company into liquidation. The liquidator would sell the property.
- (2) Alternatively, the trustees may sell the company.

In these circumstances it would be difficult to argue that the occupier was a shadow director.

#### 79.6.4 *Charge on shadow director*

The House of Lords decided in *R v Dimsey & Allen*<sup>22</sup> that the benefits code applies to shadow directors. In the context of a company holding a residence, the charge is unfair to a shadow director who (typically) does no work for the company. Income tax is, or should be, a tax on income, or at least a tax on something. This is a tax on nothing. But there it is.<sup>23</sup>

EI Manual states:

**11413 Avoidance area: shadow directors** [Nov 2019]

A person in accordance with whose directions or instructions the directors of a company are accustomed to act is deemed to be a director of that company by s.67(1) ITEPA 2003. Where such a person (known

---

21 In the case of land, this may be done between contract and completion.

22 74 TC 263. The reasoning continues to apply under ITEPA.

23 The problem did not unduly concern the House of Lords because of the countering unfairness to HMRC of the case where the services of a shadow director were as valuable as an actual director (74 TC 263 HL at [19]; two wrongs made a right to tax.

as a shadow director) is provided with living accommodation by the company the individual will be within Part 3 Chapter 5 ITEPA 2003 in the same way as if the individual had held a formal appointment as a director. Section 67(1) defines director in relation to the benefits code and s.63 ITEPA 2003 includes Part 3 Chapter 5 within the benefits code. This interpretation was supported by the House of Lords in October 2001 in the case of *R v Allen*. Lord Hutton held that

“it was the intention of Parliament in enacting the concluding part of [what is now s.67(1) ITEPA] s.168(8) that accommodation and benefits in kind received by a shadow director should be taxed in the same way as those received by a director.”

...Many shadow directors are individuals who, although not domiciled in the UK, have come to work and reside here. In order to avoid a possible charge to inheritance tax, which could be imposed if such an individual died whilst working in the UK, an arrangement is made to set up an offshore company that owns the UK property in which the individual lives. Where the individual is a shadow director of that offshore company s.97(2) ITEPA 2003 deems the UK property to be provided to the shadow director by reason of the deemed employment.

In practice taxpayers (if they have considered the matter at all) generally seem to have taken the view on their facts that they are not shadow directors. HMRC have to take the initiative to identify the cases suitable for investigation. In the author's experience even accommodation cases that HMRC have tentatively identified are not pursued with much gusto if at all. One wonders why. Perhaps the unfairness of the charge holds HMRC back.<sup>24</sup> Perhaps it is the consideration that if cases are identified, the taxpayer can still avoid a charge by belated reimbursement.

*R v Allen*<sup>25</sup> was an accommodation case. In law, the same points apply to the benefits code generally. In practice HMRC may well not pursue the point, and it is noteworthy that the only references to shadow directors in the EI Manual are in the context of accommodation.

HMRC practice may change without notice, and taxpayers cannot rely on it. Taxpayers cannot plan on the assumption that HMRC's benign neglect

---

24 Conceivably (this is surmise) HMRC “officially” took the accommodation BiK point to deter IHT planning, but at the same time did not pursue it in practice because of the unfairness. If so, the tactic (while contrary to the Rule of Law) worked up to a point.

25 74 TC 263.

of the provisions will apply to them.

## **79.7 “Employment” & related terms**

Section 66 ITEPA provides:

- (1) In the benefits code—
  - (a) “employment” means a taxable employment under Part 2, and
  - (b) “employed”, “employee” and “employer” have corresponding meanings...
- (3) For the purposes of the benefits code an employment is a “taxable employment under Part 2” in a tax year if the earnings from the employment for that year are (or would be if there were any) general earnings to which the charging provisions of Chapter 4 or 5 of Part 2 apply.
- (4) In subsection (3)—
  - (a) the reference to an employment includes employment as a director of a company, and
  - (b) “earnings” means earnings as defined in Chapter 1 of this Part.<sup>26</sup>

Why does the benefits code not use the standard ITEPA definitions?<sup>27</sup> The definitions are the same. The reason lies in the long and convoluted history of the provisions.

Section 66(2) dots *I*'s and crosses *T*'s:

Where a Chapter of the benefits code applies in relation to an employee—

- (a) references in that Chapter to “the employment” are to the employment of that employee, and
- (b) references in that Chapter to “the employer” are to the employer in respect of that employment.

Was it really necessary to say that?

## **79.8 Accommodation/benefit charge**

There is similar wording used in the following:<sup>28</sup>

---

26 See 33.4.1 (“Ordinary” earnings).

27 For this definition, see 33.3 (Employment/employer/employee).

28 This is not a full list.

<b>Topic</b>	<b>ITEPA gateway provision</b>
Accommodation	s.97
Benefit BiK charge	s.201
Employment-related securities	s.421B
Securities options	s.471

Employment-related securities/options need a book to themselves, and this work does not cover them. But I discuss all four provisions here because guidance on one may be relevant to the others.

The gateway provision offers two possible tests which I call:

<b>Test (my term)</b>	<b>Accommodation/benefits</b>	<b>Securities/security option</b>
Employment-causation test	s.97(1)/s.201(2)	s.421B(1)/471(1)
Employer-provision test	s.97(2)/s.201(3)	s.421B(3)/s.471(3)

### 79.9 Employment-causation test

**Accommodation: s.97(1) Benefits: s.201(1) Securities: s.421B(1) Security option: s.471(1)**

This Chapter [Chapter 5 Part 3] applies to living accommodation provided	In this Chapter [Chapter 10 Part 3] ... “employment-related benefit” means a benefit, other than an excluded benefit, which is provided in a tax year—	Subject as follows (and to any provision contained in Chapters 2 to 4A) those Chapters apply to securities, or an interest in securities, acquired by a person	This Chapter applies to a securities option acquired by a person
for— (a) an employee, or (b) a member of an employee’s family or household,	(a) for an employee, or (b) for a member of an employee’s family or household,	[No express equivalent!]	[No express equivalent!]

by reason of the employment.	by reason of the employment.	where the right or opportunity to acquire the securities or interest is available by reason of an employment of that person or any other person.	where the right or opportunity to acquire the securities option is available by reason of an employment of that person or any other person.
------------------------------	------------------------------	--	---

The main requirements here are in short:

- (1) (a) Accommodation/benefit is provided for an employee or
  - (b) Securities/option acquired by a person under right available
- (2) (in each case) by reason of employment.

#### 79.9.1 *The two causation tests*

“By reason of employment” brings in a causation test (the “**benefit in kind causation test**”). This is different from (what I call) the “**ordinary earnings causation test**” (“therefrom” - ie from the employment).<sup>29</sup> In *Wicks v Firth*.<sup>30</sup>

It seems to me that the words “by reason of” are far wider than the word “therefrom” in [s.19 ICTA 1988]. They are deliberately designed to close the gap in taxability which was left by the House of Lords in *Hochstrasser v Mayes*<sup>31</sup>.

And in *Mairs v Haughey*:<sup>32</sup>

I respectfully agree ... that the words “by reason of” in s 154 are wider than the word "therefrom" in s 19(1) [ICTA].

There is no perceptible difference between *by reason of* an employment and *from* an employment. The Courts have stepped back from the wrong turn which the law took in *Hochstrasser v Mayes* and seized on the difference in wording to justify it. But since the law has moved on from *Hochstrasser v Mayes* I am still not sure that there is much difference.

29 See 33.4.1 (“Ordinary” earnings).

30 p363; Watkins LJ agreed : p.372 . This point was not considered on the appeal.

31 38 TC 673.

32 66 TC 273 at p.312.

Certainly, a satisfactory tax system would have only one employment-causation test, the same applying for ordinary earnings and for benefits in kind. That cannot be achieved by statute without a change of wording which would lead to a review of all the existing case law, which is a high price for neatness and simplification. But the Supreme Court could bring coherence to the topic, and merge the two tests, if the opportunity arises.

### 79.9.2 *What is the test?*

Since we have a different test, we need to define it. In *Wicks v Firth*, Lord Denning said:<sup>33</sup>

The words cover cases where the fact of employment is the *causa sine qua non* of the fringe benefits, that is, where the employee would not have received fringe benefits unless he had been an employee.

The fact of employment must be one of the causes of the benefit being provided, but it need not be the sole cause, or even the dominant cause. It is sufficient if the employment was an *operative cause* - in the sense that it was a condition of the benefit being granted. In this case the fact of the father being employed by ICI was a condition of the student being eligible for an award.

Oliver LJ said:

Speaking only for myself I do not, in the case of this legislation, find the philosophical<sup>34</sup> distinction between a “causa causans” and a “causa sine qua non” helpful.

Distinctions between different concepts or tests of causation are certainly necessary. Latin terminology is not (or at least, not nowadays) a helpful way to express them.<sup>35</sup> But if one dismisses the Latin terminology, what *is* the test?

One is directed to see whether the benefit is provided by reason of the employment and in the context of these provisions that, in my judgment, involves no more than asking the question “what is it that enables the person concerned to enjoy the benefit?” without the necessity for too sophisticated

---

33 p363; Watkins LJ agreed : p.372 . This point was not considered on the appeal.

34 “Philosophical” here is used rhetorically and pejoratively. But the reader may think the law needs more rather than less philosophy when grappling with causation: see Hart, *Causation in the Law* 2<sup>nd</sup> ed, (1985).

35 See 33.5.1 (Latin causation test rejected).

an analysis of the operative reasons why that person may have been prompted to apply for the benefit or to avail himself of it.

I am not sure that there is any difference at all between the two judges, but *Mairs v Haughey* preferred the latter.<sup>36</sup>

I prefer, with respect, the test suggested by Oliver L.J. which involves asking the question "what is it that enables the person concerned to enjoy the benefit?" than the *causa sine qua non* test suggested by Lord Denning.

... if one does not apply to [benefits in kind] the *causa causans* test approved by the House of Lords in relation to s 19(1) [ICTA],<sup>37</sup> a *causa sine qua non* may constitute a "reason" for the provision of a benefit. But I consider, with respect, that the *causa sine qua non* test suggested by Lord Denning is too wide and could let in a factor in the past which, in ordinary language, would not constitute a "reason" for the provision of the benefit.

*Vermilion v HMRC* offers generalities:<sup>38</sup>

What we take from *Wicks v Firth* is that the phrase "by reason of employment" is to be given its ordinary meaning (!) and must be considered in the circumstances of the particular case. We note also that the employment need not be the sole reason: it is enough that the employment was a condition of a benefit being granted.

In *Wicks v Firth*, if there was disagreement on the test (which I doubt), there was at least agreement on the outcome. The benefit in kind was a scholarship to employees' children and this was provided by reason of employment.<sup>39</sup>

In this case the fact of the father being employed by ICI was a condition of the student being eligible for an award. There were other conditions also, such as that the student had sufficient educational attainments and had a place at a university. But still, if the father's employment was one of the conditions, that is sufficient.

But once we have agreed the words which express the causation test, which

---

36 66 TC 273 at p.312.

37 The reference is to *Hochstrasser v Mayes* 38 TC 673 at p 705 but see 33.5.1 (Latin causation test rejected).

38 [2020] UKUT 162 (TCC) at [71]. The point will need to be reviewed when the case is final.

39 p363.

whatever they are, must be general words, we then have to apply them to the facts of individual cases; that is where the real difficulty lies, and that is where such guidance as exists can be found.<sup>40</sup>

**79.10 Employer-provision test**

**Accommodation: s.97(2) Benefits: s.201(3) Securities: s.421B(3) Security option: s.471(3)**

Living accommodation provided for any of those persons	A benefit provided	A right or opportunity to acquire securities or an interest in securities made available	A right or opportunity to acquire a securities option made available
by the employer	by an employer	by a person's employer, or by a person connected with a person's employer,	by a person's employer, or a person connected with a person's employer,
is to be regarded as provided by reason of the employment...	is to be regarded as provided by reason of the employment...	is to be regarded for the purposes of subsection (1) as available by reason of an employment of that person ...	is to be regarded for the purposes of subsection (1) as available by reason of an employment of that person...
[Personal relationship exemption: see 79.9 (Personal relationship exemption)]			

The main requirements here are in short:

- (1) Accommodation/benefit is provided by the employer or
- (2) Securities/option acquired under a right made available by the employer

There is no requirement that the provision is actually by reason of employment.

In this case, causation is not relevant. However accommodation/benefits do have to be “provided by” the employer and securities/options have to be “made available by” the employer/connected person.

The test was discussed in *Vermilion v HMRC*<sup>41</sup> where, on somewhat unusual

40 *Charman v HMRC* [2020] UKUT 253 (TCC) ; *Vermilion v HMRC* (not yet final).

41 [2021] CSIH 45.

facts, by a majority decision, the Court of Session gave an narrow reading to the scope of the employer-provision test. The Court raised the example of a bank making a securities option available to customers, some of whom would be employees and others not. Even HMRC did not argue the bank's employees were taxable, though if one takes the words literally, they must be. As an exercise in advocacy this concession was no doubt a tactically wise one. So everyone agreed that this was not within s.471(3); but what then is the test of taxability?

Lord Malcolm floated a capacity test:

In the bank example mentioned above the benefit was made available by the employer, but not in that capacity; not as the recipient's employer.

That is probably the best solution. Though if this test is met, the securities option would be available “by reason of” employment, and the provision test would not add anything.

HMRC proposed a “real link” test.<sup>42</sup> As references to reality do not much assist us,<sup>43</sup> that amounts to a sufficient-link test by a more attractive name; but it would not possible to know what amounts to a real or sufficient link until we have many more decided cases. So that is certainly no more satisfactory, and the reader looking for certainty may think, much less.

Or perhaps the test is whether the tax charge is “anomalous, absurd and unjust”. Two of the 3 judges thought that this was the case, and one disagreed; which only shows that this is not a clear test either.

Let us hope the final decision leaves the law in a clearer state.

#### 79.10.1 *Causation/provision tests compared*

In short:

- (1) Where accommodation/benefit is provided by the employer, it does not matter if it is actually provided by reason of employment: it is deemed to be so provided.
- (2) Where accommodation/benefit is not provided by the employer, the charge only applies if the accommodation is actually provided by reason of the employment.

---

42 at [66].

43 See [App 6.1](#) (What do we mean by real).

Suppose a company A Ltd owns:

- (1) accommodation which it provides to T,
- (2) another company, B Ltd:

If T is an employee of A Ltd, the accommodation is deemed to be provided by reason of the employment.

If T is an employee of B Ltd, T is only taxed if the accommodation is actually provided by reason of T's employment.

B Ltd is (by definition) a person "involved" in providing the accommodation<sup>44</sup> but B Ltd is not deemed to provide the accommodation.

#### 79.10.2 *Made available - to whom?*

The accommodation/benefit rules apply when the accommodation/benefit is made available to employees or their families.

In the security/security option rules, there is a remarkable gap: the legislation does not say to whom the securities/options right must be made available. Where the right is provided by reason of employment, this does not matter. The causation test does the work and is sufficient. But what is the position under the provision test (deemed causation)? The legislation cannot apply where an employer/connected person makes the right available to anyone at all. The courts will need to read in some appropriate restrictions here, or else read the deeming provision restrictively. This is one of those (fortunately, rare) situations referred to in *Drummond v Collins*:<sup>45</sup>

The Income Tax Acts are framed in very general terms. ... But Courts of Law have cut down or even contradicted the language of the Legislature when on a full view of the Act, considering its scheme and its machinery and the manifest purpose of it, they have thought that a particular case or class of

---

<sup>44</sup> See 79.17.1 (Involved in providing).

<sup>45</sup> 6 TC 525 at p.538.

cases was not intended to fall within the taxing clause relied upon by the Crown.<sup>46</sup>

Perhaps the provision (deemed causation) test only applies where the person to whom the right is made available is the employee.

### 79.10.3 *Who provides benefit*

If a benefit is provided, it is necessary to ask who provides it. For the benefit BiK charge, this is addressed by statute. Section 209 ITEPA provides:

For the purposes of this Chapter [Chapter 10 Part 3] the persons providing a benefit are the person or persons at whose cost the benefit is provided.

The EI Manual provides:

#### **EIM21220 who is the person providing a benefit?** [Nov 2019]

[The Manual refers to s.209 and continues:]

That person need not necessarily be the one who physically “hands over” the benefit to the director or employee so long as they are, ultimately, the source of the funds used to pay for the benefit, see *Wicks v Firth* (56 TC 318).

In most cases it will be the employer who is paying for, and therefore providing, the benefit. If the benefit is provided by the employer, in other words he is incurring the cost of providing it, it is automatically deemed to have been provided by reason of the employment under Section 201(3) ITEPA 2003 (EIM20502).

If the employer is a company and the employee gets the benefit from a subsidiary company it is the employer who is providing the benefit if the subsidiary charges the expense to the parent company.

Occasionally the benefit will be provided by a third party. For example, a motor manufacturer may incur expense in providing benefits for the employees of dealers who sell the manufacturer's cars. ...

## **79.11 Personal relationship exemption**

There is one exception to the employer-provision test:

**Accommodation/benefits: s.97(2)/s.201(3) Securities/options: s.421B(3) /s.471(3)**

---

46 The passage gives the example of *Colquhoun v Brooks* 2 TC 490, now of historic interest only; a currently relevant example is the addition of a bounty requirement to the definition of settlement-arrangement; see 1.5 (Settlement-arrangement definition).

<p>unless—</p> <p>(a) the employer is an individual, and</p> <p>(b) the provision is made in the normal course of the employer's domestic, family or personal relationships.</p>	<p>unless—</p> <p>(a) the person by whom the right or opportunity is made available is an individual, and</p> <p>(b) the right or opportunity is made available in the normal course of the domestic, family or personal relationships of that person.</p>
--	--

### 79.12 Former employee

Former employees are not within the accommodation charge. HMRC agree. The EI Manual provides:

**EIM11408 meaning of by reason of the employment: provided by someone other than the employer** [Nov 2019]

...Part 3 Chapter 5 ITEPA 2003 does not apply to a pensioner or a former employee. But if the continued use of living accommodation is provided after termination of employment see EIM12805 onwards [Termination payments and benefits]...

The rules for disguised remuneration, and EFURBS, would also need consideration.

### 79.13 Market rent

If a market price is paid for something, there is no benefit in the normal sense. The payment of a market price for something in the residual category takes the (non)benefit out of charge. The courts held that this principle applies to Chapter 6 of the benefits code (cars), and the reasoning would apply to the accommodation BiK charge.<sup>47</sup> The decision was a surprising win for the taxpayer, but it is now of historical interest only. From 2016/17, the charge applies in the case of arm's length rent. Section 97(1A) ITEPA provides:

In determining for the purposes of this Chapter whether this Chapter applies to living accommodation provided for an individual it is immaterial whether or not the terms on which it is provided constitute a fair bargain.

### 79.14 Accommodation: The charge

---

<sup>47</sup> *HMRC v Apollo Fuels*; see 87.32.4 (Fair bargain).

Section 102(1) ITEPA provides:

If living accommodation to which this Chapter applies is provided in any period—

- (a) which consists of the whole or part of a tax year, and
- (b) throughout which the employee holds the employment, the cash equivalent of the benefit of the accommodation is to be treated as earnings from the employment for that year.

This is not, strictly, a charging section, but it feeds into the general charge to tax on employment income.<sup>48</sup>

### 79.15 Available but not used

EIM provides:

**11405 Living accommodation: meaning of provided:** [Nov 2019]

... Provided is not defined in the legislation and its meaning has not been considered by the Courts in relation to a charge under [what is now] Part 3 Chapter 5 ITEPA 2003. The word provided must be given its ordinary dictionary meaning of supplied or furnished with a thing.

In some cases provided will mean available for use whereas in others it will mean actually used .... The meaning of provided is often an issue in the case of provided holiday living accommodation.

**11406 Meaning of provided: practical considerations** [Nov 2018]

... In deciding in a particular case whether provided means available for use, or means actually used, the following questions should be asked.

- Who can use the living accommodation? We accept that if living accommodation is genuinely available for use by more people than could actually use it at any one time then provided only means the periods actually used. For example if five unrelated employees were allowed to use an employer owned two bedroom holiday villa we would only seek a provided living accommodation charge on each employee for the period in which that employee actually used the villa.
- Why was the living accommodation bought or rented and how has it been used since acquisition? If the living accommodation was bought as holiday accommodation for a director and family, provided is likely to mean available for use. By contrast if it was bought as a genuine letting business by the employer and has been let out commercially then provided

---

48 See 33.4.2 (“General earnings”); 33.6 (Charge on employment income).

will only mean the periods of actual use by the employee. ...

EIM11421 to 11423 provides three examples. In the first example accommodation is provided as a holiday home solely for husband and wife directors:

**11421 Meaning of provided: Example 1** [Nov 2019]

... A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company.

*The employer advises that the sole reason the property was bought was as a holiday home for the husband and wife. It has only been used by them as a holiday home.*<sup>49</sup>

The HMRC analysis is as follows:

We would argue in this case that provided is equivalent to available for use. Assuming that the flat was habitable for the whole of the year we would seek a benefit under Part 3 Chapter 5 measured on availability for the whole of the year.

The employer may argue that the husband and wife work full time and that this prevents them using the flat for more than the 4 weeks in the year of actual use and so they are effectively only provided with it for 4 weeks. We do not accept that argument.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91 the cash equivalent of the benefit is restricted to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £15,600 (£500 × 26 + £100 × 26). Under s.108 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

In the second example, the property was purchased for holiday letting, and used for that purpose for 12 weeks, though the directors also had it for 4 weeks:

---

49 Author's footnote: Emphasis added to show how example 1 differs from the others.

**11422. Meaning of provided: example 2** [Nov 2019]

... A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company.

*The company bought the property to let as a commercial letting business. They have employed professional agents to let the property and have managed to let the property for 12 weeks of the year in addition to the period it was used by the husband and wife directors.*<sup>50</sup>

The HMRC analysis is as follows:

In this case we would accept that provided is equivalent to actual use.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91 the cash equivalent of the benefit is restricted to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £1,200 ( $£15,600 \times 4/52$ ). Under s.108 ITEPA 2003 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

You may ask why the s.105 ITEPA 2003 charge is not £1,600 (being 3 weeks at £500 in the skiing season and 1 week at £100 outside the season). The answer is that the wording of s.105(3) requires us to look at a proportion of the annual rent rather than the rent for the actual weeks it was used.

In the third example, the employer claimed that the property was purchased for holiday letting, but it was not actually used for that purpose, so the employer's narrative might reasonably be open to question:

**11423. Meaning of provided: example 3** [Nov 2019]

... A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week

---

<sup>50</sup> Author's footnote: Emphasis added to show how the example differs from the others.

in the rest of the year. Their children are neither employees nor directors of the company.

*The employer says that the property was bought to let commercially and for the use of other employees of the company. In fact there have been no commercial lettings during the year and it has only been used for one week of the year by an employee of the company who was the director's secretary.*<sup>51</sup>

The HMRC analysis is as follows:

This is a case where in practice we would seek to test whether what the employer was telling us was correct. For example, what if any evidence is there of attempts to let the property commercially or to advise other employees of the company of its availability for use by them? Based on that evidence it is then a matter of judgement whether in reality the sole reason the property was bought was as a holiday home for the husband and wife directors, in which case the tax consequences would be as in example EIM11421. Or it may be that genuine attempts have been made to let the property commercially and make it available for use by other employees of the company, in which case the tax consequences in example EIM11422 will follow.

## 79.16 Cash equivalent: Computations

The charge is on the “cash equivalent”. Section 103 ITEPA provides:

- (1) The cash equivalent is calculated—
- (a) under s.105 if the cost of providing the living accommodation does not exceed £75,000; and
  - (b) under s.106 if the cost of providing the living accommodation exceeds £75,000.

Thus there are two methods of calculating the cash equivalent, here called “**s.105 and s.106 computations**”. This is for historical reasons, the s.106 computation having been introduced in 1983 to supplement the ancestor of s.105. This structure makes the law twice as complicated as it need be. OTS noted the problem, but their conclusion was banal<sup>52</sup> and nothing has changed.

---

<sup>51</sup> Author's footnote: Emphasis added to show how the example differs from the others.

<sup>52</sup> OTS, “Review of employee benefits and expenses: Interim report” (2013): **Conclusions...** 6.32 The calculation of the benefit, for those who are charged is outdated and anomalous. Logic would suggest it should be based on the current

### 79.17 Cost of providing accommodation

One needs to know the “cost of providing living accommodation”:

- (1) in order to decide between the s.105 and s.106 computation;
- (2) in order to make the s.106 computation (if applicable, as it usually is).

This expression is defined in s.104 ITEPA:

**General<sup>53</sup> rule for calculating cost of providing accommodation**

For any tax year the cost of providing living accommodation is given by the formula  $A + I - P$

In short, *A* is Acquisition cost, *I* is Improvement cost, and *P* is Payment of reimbursement. In full detail:

*A* is any expenditure incurred in acquiring the estate or interest in the property held by a person involved in providing the accommodation,

*I* is any expenditure incurred on improvements to the property which has been incurred before the tax year in question by a person involved in providing the accommodation, and

*P* is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—

- (a) reimbursement of *A* or *I*, or
- (b) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

I consider reimbursement further in 79.25 (Settlor finance).

#### 79.17.1 Involved in providing accommodation

This phrase is only used in the definition of “cost of providing living accommodation”.<sup>54</sup> Section 112 ITEPA provides a wide definition:

For the purposes of this Chapter [Chapter 5 Part 3] “person involved in providing the accommodation” means any of the following—

---

market value of the property but that has obvious practical issues as well as significant transitional impacts that need to be evaluated.”

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/227088/ots\\_employee\\_benefits\\_interim\\_report.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/227088/ots_employee_benefits_interim_report.pdf)

<sup>53</sup> For the exception see 79.21 (Revaluation: delayed occupation).

<sup>54</sup> See 79.17 (Cost of providing accommodation) and 79.21 (Revaluation: delayed occupation).

- (a) the person providing the accommodation;
- (b) the employee's employer (if not within para (a));
- (c) any person, other than the employee, who is connected with a person within para (a) or (b).

EN ITEPA explains:

412. This definition makes it clear that it is necessary to look beyond the employer and the apparent owner of an interest in the accommodation. This is anti-avoidance legislation to counter schemes which depress the cost to the employer by using intermediate owners of interests.

### **79.18 Home sub-£75k: Computation**

Section 105 applies where the cost of providing accommodation does not exceed £75,000. This was a meaningful figure when the legislation was introduced in 1983 but inflation, the Chancellor's friend, has whittled away the real value of this limit so it must be exceptional now to find a purchase of less than £75,000. One might think the s.105 computation was a dead letter and one can turn directly to s.106. But s.106 refers back to s.105 so one needs to make the s.105 computation even in a s.106 case.

Section 105 ITEPA provides:

- (1) The cash equivalent is to be calculated under this section if the cost of providing the living accommodation does not exceed £75,000.
- (2) The cash equivalent is the difference between—
  - (a) the rental value of the accommodation for the taxable period, and
  - (b) any sum made good, on or before 6 July following the tax year which contains the taxable period, by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The key concepts are “rental value of the accommodation” and “making good”.

#### *79.18.1 “Rental value”*

Section 105 ITEPA provides:

- (3) The “rental value of the accommodation” for the taxable period is (subject to subsections (4) and (4A) the rent which would have been payable for that period if the property had been let to the employee at an annual rent equal to the annual value. ...

- (4) Subsection (4A) applies where—
  - (a) a rental amount is payable by the person (“P”) at whose cost the accommodation is provided in respect of the whole or part of the taxable period (“the relevant period”), and
  - (b) the amount so payable is payable at an annual rate greater than the annual value.
- (4A) Where this subsection applies—
  - (a) subsection (3) does not apply to the relevant period, and
  - (b) instead the “rental value of the accommodation” for the relevant period is the rental amount payable by P in respect of the relevant period.
- (4B) A reference in subsection (4) or (4A) to a rental amount payable by P in respect of the relevant period is to the sum of—
  - (a) any rent for the period payable by P, and
  - (b) any amount attributed to the period in respect of a lease premium (see sections 105A and 105B)
- (5) If the rental value of the accommodation for the taxable period does not exceed any sum made good by the employee as mentioned in subsection (2)(b), the cash equivalent is nil.

The key expression is “annual value”. This is defined in s.110 ITEPA but it is not usually necessary to refer to that for UK property. ITEPA Explanatory Note states:

404. [Section 110] does not affect the Inland Revenue practice of using the gross rateable value as a proxy for “annual value”. That practice will continue. The main use of this section is to provide guidance on how to arrive at the annual value of properties for which rent is not paid and in practice is only needed in cases where no gross rateable value can be found.<sup>55</sup>

The EI Manual provides:

**11434 Meaning of annual value for UK properties** [Nov 2019]

... The amount of annual value for UK properties is set out in the table below.

---

55 Likewise the EN at Change 23:

“These provisions [ss.110 and 207 ITEPA] will clarify how to find annual values in respect of those properties for which the practice of using gross rateable values or a proxy for them is inapplicable – for example overseas properties. In the case of both these and other properties, all the current practices used in quantifying the cash equivalent of the benefit of living accommodation will continue.”

Country	When first valued	Annual value to take
England & Wales	All cases	The 1973 gross rating value
Northern Ireland	All cases	The 1976 gross rating value
Scotland		$100/270 \times 1985$ gross rating value
Anywhere in UK	No gross rating value set	Ask the appropriate District Valuer to confirm any estimated figure provided by the employer that you want to check. <sup>56</sup>

For the formula to convert a net rating value figure to a gross rating value figure see EI Manual 11438.

Thus for most purposes the s.105 computation is rateable value less sums “made good” to the employer. That is usually a trivial amount which has no relation to the value of the benefit of the accommodation. It is a substantial amount in two cases:

- (1) where the company employer pays a market rent for the property;
  - (2) where the property is not UK situate (and so there is no rateable value).
- This practice (which is concession not law) exists for historical reasons. It is not surprising the Tax Law Rewrite did not think it appropriate to express all this in ITEPA. The rules are incoherent.

## 79.19 “Making good”

The concept of making good is relevant to the accommodation and the residual benefit BiK charges so I consider both together in this section.

### 79.19.1 *Making good: Meaning*

The EI Manual provides:

#### **21120 What is meant by “making good”** [Nov 2019]

“Making good” simply means giving something in return for the benefit. What is being made good is the expense incurred by the employer or other person providing the benefit. It follows that in order to make good that expense the employee will give money, or something that can be measured in money. Usually the employee will “make good”:

- by a direct payment or

---

<sup>56</sup> The Manual continues:

“If no such estimate is provided or the estimate is not acceptable the District Valuer will provide a (not negotiated) figure. If the taxpayer does not accept that figure the District Valuer will try to agree a figure with the taxpayer. For the procedure for referring to the District Valuer see EI Manual 11437.”

- by deduction from salary or
- by a suitable debit to the employee's current account in the employer's books and records.

Any of these methods is acceptable.

The giving of services by the employee, or anything that is not measured in money terms is not "making good", see *Stones v Hall* (60 TC 737).

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)<sup>57</sup>

As regards "making good" by waiver of remuneration see EIM21122.

It is clearly "making good" if:

- (1) the company pays the costs of maintenance and insurance; and
- (2) the individual reimburses the company by a cash payment.

Does the employee make good the cost if they pay the cost of maintenance and insurance directly? Section 110 ITEPA envisages that this expenditure will be paid by the employer. In addition, the maintenance of the building is probably not a "sum" made good. EIM Manual is equivocal:

**11439. Annual value of UK property: Employee responsible for repairs or insurance.** [Nov 2019]

... An employee may be responsible for the cost of repairs or insurance under the terms of his or her lease or employment. *(This content has been withheld because of exemptions in the Freedom of Information Act 2000.)*<sup>58</sup> As regards the discharge of the employee's pecuniary liability in respect of such items see EIM00580.

Note that the payment of a sum "making good" may constitute taxable property income of the company which receives it. The IHT and CGT implications may also need to be considered, but the sums involved may not be significant.

---

57 Author's footnote: The "text withheld" announcement was added in June 2006. Previously the Manual stated "In any case where the taxpayer argues that an interest-free loan has been made to this employer specifically to make good the cost or value of a benefit, make a submission to Personal Tax (Technical), Solihull." That instruction probably survives in the withheld text.

58 The text formerly read:

"If an employee claims an adjustment to the annual value (derived from the table in EI Manual 11434) because the facts of an employee's case are not those envisaged by s.110 ITEPA, make a full report to Personal Tax (Technical), Solihull."  
It seems a safe bet that that passage survives in the withheld text.

### 79.19.2 Making good: Timing

The time limit is 6 July following the tax year which contains the taxable period.<sup>59</sup>

### 79.20 Home over £75k: Computation

Section 106 ITEPA provides:

**Cash equivalent: cost of accommodation over £75,000**

(1) The cash equivalent is calculated under this section if the cost of providing the living accommodation exceeds £75,000.

(2) To calculate the cash equivalent—

*Step 1* Calculate the amount that would be the cash equivalent if s.105 applied (cash equivalent: cost of accommodation not over £75,000).

See 79.18 (Home sub-£75k: computation).

*Step 2* Calculate the following amount (“the additional yearly rent”)—  $ORI \times (c) - £75,000$

In short, *ORI* is **O**fficial **R**ate of **I**nterest; *C* is **C**ost. In full detail:

ORI is the official rate of interest in force for the purposes of Chapter 7 of this Part (taxable benefits: loans) on 6 April in the tax year, and

C is the cost of providing the accommodation calculated—

- (a) in accordance with s.104 (general rule for calculating cost of accommodation),<sup>60</sup> or
- (b) in a case where s.107 applies (special rule for calculating cost of providing accommodation), in accordance with that section instead.<sup>61</sup>

The label “additional yearly rent” is misleading: the “additional yearly rent” calculated in this way will not bear a close relationship with the actual market rent.

*Step 3* Calculate the rent which would have been payable for the taxable

<sup>59</sup> This rule was introduced in 2017. For the background, now of historical interest only, see HMRC, “Alignment of dates for ‘making good’ on benefits-in-kind” (2016) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/544638/Alignment\\_dates\\_making\\_good\\_benefits-in-kind\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/544638/Alignment_dates_making_good_benefits-in-kind_consultation.pdf)

<sup>60</sup> See 79.17 (Cost of providing accommodation).

<sup>61</sup> See 79.21 (Revaluation: delayed occupation).

period if the property had been let to the employee at the additional yearly rent calculated under step 2.

This step reduces the “additional *yearly* rent” to that for the “taxable period” (defined in s.102(2)).

*Step 4* Calculate the cash equivalent by—

- (a) adding together the amounts calculated under steps 1 and 3, and
- (b) (if allowed by subsection (3)) subtracting from that total the excess rent paid by the employee.

Section 106(3) ITEPA provides:

In step 4—

- (a) para (b) only applies if, in respect of the taxable period, the rent paid—
  - (i) by the employee,
  - (ii) in respect of the accommodation,
  - (iii) to the person providing it, and
  - (iv) on or before 6 July following the tax year which contains the taxable period,exceeds the rental value of the accommodation for that period as set out in s.105(3) or (4)(b), as applicable, and
- (b) “the excess rent” means the total amount of that excess.

In short, the charge is (1) the s.105 computation (rateable value) and (2) (official rate of interest on purchase price less £75,000) less rent.

This works (more or less) where the s.105 computation is based on the nominal amount of rateable value. It gives double taxation where the s.105 computation is based on actual market rental value. ESC A91 gives relief here:

*Living accommodation provided by reason of employment*

This concession applies to living accommodation treated as earnings under ITEPA 2003 Part 3, Chapter 5. Where ITEPA 2003 s.106 applies and the cash equivalent of the benefit of the accommodation is calculated by reference to the annual rent the property might fetch on the open market, the Inland Revenue will disregard “the additional yearly rent”. If “the additional yearly rent” is disregarded then the amount of “the excess rent” is deemed

to be nil.<sup>62</sup>

### 79.21 Revaluation: Delayed occupation

Normally the s.106 computation is based on the employer's acquisition cost (ie historic cost). Market value of the property later is not relevant. This rule could favour HMRC, but as time passes it is likely to favour the taxpayer. In one case only there is an adjustment to market value. Section 107(1) ITEPA provides:

This section contains a special rule for calculating the cost of providing living accommodation which—

- (a) operates for the purposes of step 2 of s.106(2) (calculating the additional yearly rent), and
- (b) accordingly only operates where the cost of provision for the purposes of s.106(1) (as calculated under s.104) exceeds £75,000.

In practice condition (b) will almost always be satisfied (except perhaps for property purchased many years ago).

Section 107(2) ITEPA provides:

This section applies if, throughout the period of 6 years ending with the date when the employee first occupied the accommodation (“the initial date”), an estate or interest in the property was held by a person involved in providing the accommodation.

It does not matter whether it was the same estate, interest or person throughout.

In short, this condition is that the property has been owned by the company for six years before the employee moves in.

Section 107(3) ITEPA provides:

For any tax year the cost of providing the living accommodation for the purposes mentioned in subsection (1)(a) is given by the formula—

$$MV + I - P$$

In short, *MV* is **Market Value**; *I* is **Improvement cost**; *P* is **Payments in return**.  
In full detail:

*MV* is the price which the property might reasonably be expected to have

---

<sup>62</sup> I do not understand the point of the last sentence, for if the additional yearly rent is disregarded, the “excess rent” is irrelevant.

fetched on a sale in the open market with vacant possession as at the initial date,

I is any expenditure incurred on improvements to the property which has been incurred during the period—

- (a) beginning with the initial date, and
- (b) ending with the day before the beginning of the tax year, by a person involved in providing the accommodation, and

P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—

- (a) reimbursement (up to an amount not exceeding MV) of any expenditure incurred in acquiring the estate or interest in the property held on the initial date,
- (b) reimbursement of I, or
- (c) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

This may arise where:

- (1) a foreign domiciliary (or trust) purchases a company holding a property acquired more than six years previously;
  - (2) an individual then occupies the property and becomes a shadow director.
- Next is an anti-avoidance provision to block an obvious scheme to devalue MV. Section 107(4) ITEPA provides:

In estimating MV no reduction is to be made for an option in respect of the property held by—

- (a) the employee,
- (b) a person connected with the employee, or
- (c) a person involved in providing the accommodation.

Lastly, for completeness, there is transitional relief where the employee first occupied the property before 31 March 1983: para 21 sch 7 ITEPA.

## **79.22 Home for more than 1 employee**

Section 108 ITEPA provides:

### **Cash equivalent: accommodation provided for more than one employee**

- (1) If, for the whole or part of a tax year, the same living accommodation is provided for more than one employee at the same time, the total of the cash equivalents for all of the employees is to be limited to the amount that would be the cash equivalent if the accommodation was provided for one employee.

(2) The cash equivalent for each of the employees is to be such part of that amount as is just and reasonable.

EIM provides at 11411:

**11411 Provided to more than one employee in the same period: practical points** [Nov 2019]

The following is an example of how s.108 ITEPA 2003 works.

An employer provides a 10-room house for the shared use of 3 unrelated employees. Each employee has sole use of a bedroom and shared use of the other 7 rooms. Without s.108 the cash equivalent of the benefit of the living accommodation provided to each employee would be 80% of the whole house. However s.108 limits the sum of the charges on the 3 of them to one full charge on the whole house. If there are no special factors each employee will be chargeable on the cash equivalent of a benefit of 33.3% of the cash equivalent for the whole house.

Section 108 is not relevant in some family situations. For example, a husband and wife both work for the same employer and live together in a house provided by their employer. The husband's job is the one that has accommodation provided with it and the wife's does not. The true construction here is that the living accommodation is only provided by the employer to the husband and the wife lives in it with her husband as part of normal domestic arrangements. So the full living accommodation charge would be on the husband with no charge on the wife.

By contrast, for an example of s.108 being relevant in a family situation, see example EIM11421.

### **79.23 Accommodation charge: Planning**

Ways to avoid the entire accommodation BiK charge are (in short):

- (1) to ensure that the occupier is
  - (a) not an officer (ie not a director or company secretary), which is straightforward;
  - (b) not an employee (which should be straightforward); and
  - (c) not a shadow director; or
- (2) not to use a company; or
- (3) to reimburse the company for its expenditure.

### **79.24 Reimbursement solution**

Reimbursement of "A" and "I" will solve the s.106 charge if it reduces the "cost of providing the accommodation" to nil (or at least to below £75,000).

Reimbursement does not avoid the s.105 charge (but that may be trivial, or avoided by “making good”, or by arranging that the individual is not a shadow director).

#### 79.24.1 *Who reimburses?*

Reimbursement is only deductible if it is made by the employee. For example, if

- (1) a company purchases property;
- (2) an individual (F) reimburses the cost;
- (3) another individual (G) comes to occupy the property (and is a shadow director);

then F’s reimbursement will not reduce the s.106 computation for G. Again, if a member of the family or household of the shadow director occupies the property, and that member of the family or household reimburses the company, that reimbursement will not reduce the s.106 computation for the shadow director. In practice this is not likely to happen often.

The IHT and CGT implications of making the reimbursement need to be considered.

### **79.25 Settlor finance**

Sometimes a company structure is set up specifically for the purpose of purchasing the home. That is, there is an arrangement under which:

- (1) The individual agrees in principle to purchase a property.
- (2) The individual:
  - (a) lends the purchase price to a company, or
  - (b) transfers the purchase price to a trust which lends the purchase price to a wholly-owned company.
- (3) The company makes the purchase.

This section considers whether an arrangement of this kind offers a defence to the accommodation BiK charge.

#### 79.25.1 *Settlor finance: Making good*

The s.105 computation allows a deduction for:

any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The taxpayer would have to show that the interest forgone on the interest-free

loan from the individual (directly or indirectly to the company):

- (1) is a “sum”, and
- (2) “makes good” the provision of the accommodation.<sup>63</sup>

Whether the interest forgone “makes good” the provision of accommodation is a question of fact. Assuming the reason the interest is forgone is to enable the company to provide the accommodation, this condition should be satisfied.

Whether the interest forgone is a “sum” is a question of law; it is suggested that the word should not be construed strictly or technically, and an amount of interest forgone may be a “sum”. See 79.19 (“Making good”).

Sums “made good” are not deductible as such in the s.106 computation. Rent is deductible in a s.106 computation but the interest forgone on an interest-free loan is not rent. No-one suggests that the company would be taxable on the interest forgone as property income!

#### 79.25.2 *Settlor finance: Reimbursement*

In computing the “cost” of providing the accommodation one may deduct payments representing reimbursement. This deduction would reduce the s.106 computation.<sup>64</sup> However, interest forgone on a loan is not “reimbursement”. In addition, it is also not a “payment”.

A possible solution would be for the individual to release the debt due from the company.

Statute requires a “payment” representing a reimbursement. It is a moot point whether release of a debt constitutes a “payment”. One should take the cautious view that it may not be. The matter should be dealt with as follows:

- (1) The individual transfers the funds to the company. They should be received in the company’s bank account. This should be accompanied by a letter to the company saying: “I have today procured the payment of £X to your account. This is reimbursement for the expenditure you have incurred in acquiring [the property]. However, I require repayment of the debt due to me of £X.”
- (2) The company may then use its funds to repay its debt due to the

---

<sup>63</sup> It is assumed that the interest forgone exceeds the annual or rateable value of the accommodation, which will normally be the case.

<sup>64</sup> See 79.24 (Reimbursement as solution).

individual.

Although this is a circular transaction (the payment being matched by immediate repayment) that does not nullify it for tax purposes: compare *MacNiven v Westmoreland* [2001] STC 237.

If the company incurs additional improvement expenditure in the future, this should be matched by further reimbursements so the total cost of providing the accommodation (A+I-P) remains less than £75,000.

The reimbursement of the company is not a transfer of value for IHT purposes if the individual is (or is treated as) the beneficial owner of the company. For the same reason the reimbursement is not a disposal by way of gift and so is outside the scope of s.102 FA 1986 (gifts with reservation). In other cases IHT needs consideration.

The effect of the gift (the reimbursement) is to increase the value of the shares of the company without any corresponding rise in the CGT base cost. So the gift increases the chargeable gain on the disposal.

### 79.25.3 *Reimbursement: Timing*

When must reimbursement be made? It is considered that reimbursement must be done within a reasonable time of the taxpayer becoming aware that the accommodation BiK charge can be reduced by reimbursement. HMRC accepted this in practice, before the introduction in 2017 of a time limit for making good.<sup>65</sup> Since there is no provision imposing a time limit for reimbursement, that should continue to be the case.

## 79.26 **Co-ownership of home**

This section considers the position where an individual owns a share in the property jointly with the company.

Co-ownership raises similar but not identical issues for all provisions which charge tax on benefits, such as s.87 TCGA, s.731 ITA, s.203 ITEPA, and IHT gift with reservation rules as well as the accommodation charge. The discussion here is limited to the case where an individual and a company are co-owners. Similar but not identical issues arise with these provisions where an individual and a trust are co-owners.

### 79.26.1 *Land law background*

---

<sup>65</sup> See 79.19.2 (Making good: Timing).

The starting point is to ascertain the rights of the co-owners as a matter of land law. Co-owned land in England and Wales is always held on trust. The person(s) holding legal title to the land are here called “the trust-of-land trustees”.<sup>66</sup> The position is governed by the Trusts of Land and Appointment of Trustees Act 1996.<sup>67</sup> Section 12(1) TOLATA provides:

A beneficiary who is beneficially entitled to an interest in possession in land subject to a trust of land is entitled by reason of his interest to occupy the land at any time if at that time—

- (a) the purposes of the trust include making the land available for his occupation (or for the occupation of beneficiaries of a class of which he is a member or of beneficiaries in general), or
- (b) the land is held by the trustees so as to be so available.

Prior to 1997, a co-owner of land had a right to occupy that land, in the absence of any contrary indication or agreement with the other co-owners:

It has been well established law ... that a tenant-in-common under a trust for sale has the right to occupy the whole property without payment of rent ...<sup>68</sup>

This co-ownership right has been superseded and replaced by s.12 TOLATA. In *IRC v Eversden*, Lightman J explained:

On and after 1 January 1997 when the TOLATA came into force, a tenant in common in equity ... was no longer automatically entitled ... to occupation of the property purchased. Section 12 of the TOLATA provided that he should only become so entitled if one of two alternative conditions were

---

66 (The term used in the legislation is “the trustees of land”.) The company may be the (or one of the) trust-of-land trustees; it makes little practical difference and no difference at all for tax. (If the company is not a trustee it can apply to court to require the trustees to exercise their powers.) The shares in the company may also be held on trust but that trust is not relevant here.

67 Further consideration is needed for:

- (1) Land outside England and Wales.
- (2) Jointly owned chattels.

TOLATA does not apply in Northern Ireland. I would be grateful to any reader who could inform me of the position in Scotland.

68 *IRC v Lloyds Private Banking* [1998] STC 559 at p.561; likewise *City of London Building Society v Flegg* [1988] AC 54 at p.81.

satisfied...<sup>69</sup>

While arguments might be advanced to the contrary this analysis should be followed, because it is a clear and workable rule. Otherwise it would be necessary to consider the pre-1997 law and try to work out the combined effect of that when read with s.12.<sup>70</sup>

In the following discussion, the entitlement to occupy land conferred by s.12(1) is called the “statutory occupation right”.

The individual will obviously have a statutory occupation right to occupy the property under s.12 because:

- (1) They are a beneficiary under the trust-of-land.
- (2) They are beneficially entitled to an interest in possession in the land.
- (3) Both conditions (a) and (b) of s.12(1) are satisfied.<sup>71</sup>
  - (a) the purposes of the trust-of-land include making the land available for their occupation; and
  - (b) the land is held by the trust for land trustees so as to be available for the purpose.

---

69 [2002] STC 1109 at [24] reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

70 Barnsley “Co-owner rights to occupy land” [1998] CLJ 123 is a minority view; contrast Smith, *Plural Ownership* (2005) p.136.

This conclusion is not affected by *Re Byford* [2003] EWHC 1267; [2004] 1 P&CR 159. In this case the co-owners were a wife and her former husband’s trustee in bankruptcy. The issue was the relative size of their shares. The wife claimed a larger share because she had paid the mortgage since her husband’s bankruptcy. The issue is not covered by any provision in TOLATA. So the common law principles (known as “equitable accounting”) applied. The general principle of equitable accounting is that one co-owner cannot take the benefit of an increase in the value of the property without making an allowance for what has been expended by the other in order to obtain it. Thus the wife had credit for her payments of mortgage capital and improvement expenditure. She wanted credit for interest payments, but it was held that she must set against that credit the benefit of occupation (the wife had occupied the property and the trustee in bankruptcy of course had not occupied). There is nothing in this which affects rights of occupation or other rights under ss.12, 13 TOLATA; though note Helen Conway’s criticism in [2003] *The Conveyancer* 533.

71 Though it would suffice if only one of the conditions of s.12(1) were satisfied.

Section 12(2) provides: “Subsection (1) does not confer on a beneficiary a right to occupy land if it is either unavailable or unsuitable for occupation by him.” This will not apply here.

The company does not have a statutory occupation right. It does not meet the conditions of s.12(1). No third person would have a statutory occupation right even if the company sold or sub-let their interest under the trust-of-land to that person. The third person would not satisfy conditions (a) or (b) of s.12(1).<sup>72</sup>

The trust-of-land trustees have various powers, but they do not have power to override the individual's occupation right or to require them to pay an occupation rent. This is fundamental so I set out the provisions in detail.

Section 13(1) TOLATA provides:

Where two or more beneficiaries are (or apart from this subsection would be) entitled under s.12 to occupy land, the trustees of land [ie the trust-of-land trustees] may exclude or restrict the entitlement of any one or more (but not all) of them.

The trust-of-land trustees cannot under s.13(1) override the individual's statutory occupation right because it is not the case that "two or more beneficiaries are ... entitled under s.12 to occupy land".

Section 13(6) TOLATA provides:

Where the entitlement of any beneficiary to occupy land under s.12 has been excluded or restricted, the conditions which may be imposed on any other beneficiary under subsection (3) include, in particular, conditions requiring him to—

- (a) make payments by way of compensation to the beneficiary whose entitlement has been excluded or restricted, or
- (b) forgo any payment or other benefit to which he would otherwise be entitled under the trust so as to benefit that beneficiary.

The trust-of-land trustees cannot require the individual to pay compensation (an occupation rent) to the company under s.13(6) because the company has no statutory occupation right: s.13(6) assumes that compensation can only be required in a case where:

- (1) a co-owner had such a right; and
- (2) the right was excluded or restricted (which can only be done under s.13(1)).

Section 13(3) TOLATA provides another power:

---

<sup>72</sup> Also s.12(2) TOLATA would probably apply, though it is not necessary to rely on that.

(3) The trustees of land [ie the trust-of-land trustees] may from time to time impose reasonable conditions on any beneficiary in relation to his occupation of land by reason of his entitlement under s.12.

...

(5) The conditions which may be imposed on a beneficiary under subsection (3) include, in particular, conditions requiring him—

- (a) to pay any outgoings or expenses in respect of the land, or
- (b) to assume any other obligation in relation to the land or to any activity which is or is proposed to be conducted there.

The trust-of-land trustees can do little under s.13(3) except to require the individual to pay outgoings.<sup>73</sup>

It is reasonably clear that ss.12–14 TOLATA are a comprehensive code and there is no common law right to an occupation rent except in a case of ouster.

The trust-of-land trustees also have power to sell the property but the court has discretion either to prevent or to require a sale.<sup>74</sup> The question here is whether the court would require a sale of the property if the individual did not want a sale but the company did. In my opinion a court would not do so, unless either the individual no longer wished/ceased to occupy the property, or the company had a good reason for a sale, eg it was insolvent. Section 15(1) TOLATA provides:

The matters to which the court is to have regard in determining an application for an order under s.14 include—

- (a) the intentions of the person or persons (if any) who created the trust,
- (b) the purposes for which the property subject to the trust is held,
- (c) the welfare of any minor who occupies or might reasonably be expected to occupy any land subject to the trust as his home, and
- (d) the interests of any secured creditor of any beneficiary.

None of these factors would support a sale.<sup>75</sup>

---

73 In particular, the trust-of-land trustees cannot use this power to require the individual to pay an occupation rent, as that must be done under s.13(6) or not at all. Otherwise s.13(6) would be entirely otiose. There is a further restriction in s.13(7) but that is not so important here.

74 Sections 6, 14 TOLATA.

75 An individual's position is even stronger if they have more than a 50% share, as s.11(1) TOLATA normally gives them further support. This provides:

“The trustees of land shall in the exercise of any function relating to land subject to the trust—

In short, the company, although co-owner, can do almost nothing while the individual remains in occupation, except require them to pay the outgoings.

Since this is the case, then the fact that the company does nothing, and the individual remains in occupation, does not mean that the company has provided accommodation, or conferred a benefit, in the years in which the individual occupies. This is because the individual has the right of occupation independently of anything the company does or can do.

In *IRC v Eversden*<sup>76</sup> the settlor gave a trustee co-owner a 95% share in a house, the settlor retaining 5%. The settlor continued to occupy. It was held that the trustee had not provided a benefit as the settlor was entitled to occupy. This took place before the TOLATA 1996 but the position would be the same under the TOLATA.

The matter is made more complicated by *Christensen v Vasili* 76 TC 116. This concerned a co-owned car. The question was whether there was a tax charge under (what is now) s.144 ITEPA which applies where a car is “made available” to an employee. The Special Commissioner held that the car was not made available:

As co-owners the employer and employee each have the right to use the car, but they each have that right because they are each owners, not because one has “made available” the car to the other.<sup>77</sup>

This conclusion was plainly right. Unfortunately it was flatly if unconvincingly rejected in the High Court:

In their ordinary sense, the question “who made the car available to Mr. Vasili?” must be answered in the sense that his employer did so ...<sup>78</sup>

It is suggested that *Vasili* must be distinguished from the normal co-ownership

- 
- (a) so far as practicable, consult the beneficiaries of full age and beneficially entitled to an interest in possession in the land, and
  - (b) so far as consistent with the general interest of the trust, give effect to the wishes of those beneficiaries, or (in case of dispute) of the majority (according to the value of their combined interests).”

See too s.15(3) TOLATA which requires a court to have regard to the beneficiary with a majority share. But it is not necessary to rely on this.

<sup>76</sup> [2002] STC 1109 reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

<sup>77</sup> 76 TC 116 at p.124, para 22.

<sup>78</sup> 76 TC 116 at p.131, para 13.

situation because:

- (1) in *Vasili* both employer and employee were entitled to possession of the car: in the co-ownership situation considered here the company is not entitled to occupation;
- (2) in *Vasili* the car belonged to the employer before he sold a 5% share to the employee. In that sense the employer made the car available. The position would have been different if the car had been purchased in those shares from the outset.

It is unfortunate that *Eversden* was not cited in *Vasili* since the two cases are difficult to reconcile.

### 79.26.2 *Employment-related benefit*

It might be argued that the company co-owner provides a benefit other than accommodation:

- (1) If the company is the trustee, by not exercising its powers of sale (or to require the individual co-owner to pay an occupation rent); or
- (2) If the company is not sole trustee, by consenting to the trustees not exercising those powers.

There is normally no benefit here because the trustees have no such powers. If there were a benefit, the value of the benefit is “the expense incurred in or in connection with the provision of the benefit”. The company incurs no expense, so the value of the benefit for tax purposes is nil.<sup>79</sup>

If the company incurs costs of maintenance, that is an employment related benefit.

### 79.26.3 *Starting co-ownership charge*

It follows that the company provides a significant benefit to the individual when and if it uses its funds to acquire a share as co-owner (unless it pays a discounted price for the share). Could this benefit be taxable?<sup>80</sup>

In *IRC v Eversden (Greenstock’s Executors)* trustees purchased a 95% share in a house (“Meadows”), and the settlor purchased 5%. The judge said:

---

<sup>79</sup> It is considered that this particular benefit does not “consist of an asset being placed at the disposal of the employee” so the valuation is not in accordance with s.205 ITEPA.

<sup>80</sup> This issue does not arise where the company receives its share of the land gratuitously.

Under the agreement with the trustees (providing as it did for the settlor to pay 5% of the purchase price of Meadows and acquire in consequence a right of occupation) *the trustees conferred on the settlor the right to occupy Meadows for an indefinite period rent free.*<sup>81</sup>

(Emphasis added)

This took place before the TOLATA 1996, but the position would be the same now.

In a case where the company provides its funds towards a joint purchase of a new property, and the individual holds as co-owner, the company has provided a benefit of indefinite rent-free occupation; more accurately the benefit is giving the individual the opportunity to acquire a right to indefinite rent-free occupation at a “knockdown price”. The benefit is provided at the time the company completes the contract to purchase the land as co-owner.

The benefit would in principle be chargeable in co-ownership cases under s.87 TCGA or s.731 ITA. Since there are no express valuation rules the charge would be on the market value, which would have to be ascertained as best as one can in the light of the circumstances.

For employment income purposes the position is different. It is arguable that:

- (1) The benefit is not the provision of accommodation.
- (2) The value of the benefit for IT purposes is nil because:
  - (a) The company incurs no expense in connection with its provision. (The purchase price is not such an expense, because the money going out is matched by a property share coming in.)
  - (b) The special valuation rules of ss.205, 206 ITEPA do not apply.

#### 79.26.4 *HMRC view*

The EI Manual provides:

**EIM11414 Avoidance area: co-ownership cases** [Nov 2019]  
*Part 3 Chapter 5 ITEPA 2003*

---

<sup>81</sup> 75 TC 340, [2002] STC at p.1129. The point was rightly not appealed. Prior to purchasing Meadows another house in joint ownership had been sold. The position for Meadows would be different if the sale of the first house had been conditional on the purchase of Meadows (the new one), that is, if the settlor only agreed to join in the sale of the first if the trustee agreed to join in the purchase of Meadows.

In these cases the employer and employee co-own the living accommodation. The usual arrangement is that the employer and employee own the property as tenants in common through a trust.

A tenant in common has a legal right to use 100% of the property 100% of the time even though a tenant in common may only own a much smaller interest in the property (say 30%). It is argued against us in such a case that the employee's rights to use the living accommodation come from the employee's legal rights as a tenant in common. So it is argued that no living accommodation has been provided by reason of the employment.

There are arguments to support a benefit charge within Part 3 Chapter 5 ITEPA 2003 in these cases and the strength of those arguments will depend on the facts of the case. (This content has been withheld because of exemptions in the Freedom of Information Act 2000).

It is interesting to note that HMRC accept that there is not always a charge in co-ownership cases: "it depends on the facts of the case". That is consistent with the view taken here.

In the context of s.87 TCGA, the current HMRC view is that there is an annual benefit which is the difference between:

- (1) the rental value of the property in question; and
- (2) the hypothetical rental value of a hypothetical property of a value equal to the proportionate value of the taxpayer's share in the property, ie if the taxpayer holds a 50% share, one looks to the rental value of a property worth 50% of the actual property.<sup>82</sup>

But this view is very difficult to defend.

## **79.27 Defences to home BiK charge**

### *79.27.1 Caretaker*

Section 99 ITEPA provides:

- (1) This Chapter [Chapter 5 Part 3] does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the employee's duties that the employee should reside in it.
- (2) This Chapter does not apply to living accommodation provided for an employee if—
  - (a) it is provided for the better performance of the duties of the employment, and

---

82 Private correspondence.

- (b) the employment is one of the kinds of employment in the case of which it is customary for employers to provide living accommodation for employees.

It has been suggested that one can use this to avoid the charge. The idea is to enter into a contract whereby the individual who is to occupy the property does so as caretaker for the company. This does not work. While it may normally be necessary or customary for a caretaker to reside in accommodation, a person does not become a “caretaker” just by being labelled as such. If the individual is occupying an extremely valuable property with only nominal caretaking duties, this is not the same “type of employment” as a normal caretaker. The EI Manual rightly provides:

**11342 Living accommodation exemption: necessary for proper performance of the duties: types of employee** [Jan 2018]

*Section 99(1) ITEPA 2003*

Part 3 Chapter 5 ITEPA does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the duties that the employee live in the accommodation provided (see EIM11341).

The following types of employee may be accepted as being within the exemption: ... Caretakers living on the premises. This only covers those with a genuine full time caretaking job ...

### 79.27.2 *Payment of rent*

The payment of rent will count as “making good” for the s.105 computation and reduce the s.106 computation. However, this proposal raises the problems of IT on the rent. Also, to reduce the s.106 computation to zero, the rent may have to exceed the market rent, especially for very valuable properties.

### 79.27.3 *Lease premium*

This is the subject of the long and complex provisions of s.105A, 105B ITEPA, which I hope to consider in a future edition.

The EIM suggests an argument that premiums should sometimes be treated as rent. This was discussed in detail in the 2008/09 edition of this work, but I expect that HMRC will not pursue that point now (if indeed they ever took it seriously).

## 79.28 **Foreign homes relief**

Section 100A(1) ITEPA provides a relief which I call “**foreign homes relief**”:

This Chapter [Chapter 5 Part 3] does not apply to living accommodation outside the UK provided by a company for a director or other officer of the company (“D”) or a member of D’s family or household if—

- (a) the company is wholly-owned by D or D and other individuals (and no interest in the company is partnership property), and
- (b) the company has been the holding company of the property at all times after the relevant time.

I refer to the company providing the property as the “**provider company**”. I refer to the condition in (1)(a) as the “**wholly-owned condition**” and the condition in (1)(b) as the “**holding company condition**”. Thus the relief applies where:

- (1) The provider company provides accommodation for a director<sup>83</sup> of the provider company (“D”) or a member of D’s family or household. If the accommodation is provided for an employee who is not a director (or a member of a director’s family or household) of the provider company the relief will not apply. In practice that is not likely to matter.
- (2) The provider company meets the wholly-owned condition.
- (3) The provider company meets the holding company condition.

#### 79.28.1 *Wholly-owned condition*

The relief does not apply if any shares in the provider company are held by a trust or partnership, or if some of the shares are held by a company. The position for 100% subsidiaries is considered below.

#### 79.28.2 *Holding company condition*

Section 100A(4) ITEPA defines “relevant interest in the property”:

“Relevant interest in the property” means an interest under the law of any territory that confers (or would but for any inferior interest confer) a right to exclusive possession of the property at all times or at certain times.

Armed with this definition, we can turn to the definition of “holding company” of the property. Section 100A(2) ITEPA provides:

The company is “the holding company of the property” when—

---

83 Or other officer; for brevity references to “directors” in this section include other officers.

- (a) it owns a relevant interest in the property,
- (b) its main or only asset is that interest, and
- (c) the only activities undertaken by it are ones that are incidental to its ownership of that interest.

### 79.28.3 *Subsidiary holding property*

Suppose the property is held via a subsidiary company thus:

S is in principle the holding company of the property but it does not meet the wholly-owned condition. P is not the holding company of the property within s.100A(2). However s.100A(3) ITEPA provides:

The company is also “the holding company of the property” when—

- (a) a company (“the subsidiary”) which is wholly owned by the company [*ie the parent company*] meets the conditions in paras (a) to (c) of subsection (2),
- (b) the company’s [*ie the parent company’s*] main or only asset is its interest in the subsidiary, and
- (c) the only activities undertaken by the company [*ie the parent company*] are ones that are incidental to its ownership of that interest.

Thus P also qualifies as “the holding company of the property.” Strictly this does not help as P is not the company providing the accommodation but in practice the relief is clearly intended to apply here.

### 79.28.4 “*The relevant time*”

Section 100A(5)(6) ITEPA defines “relevant time”:

- (5) “The relevant time” is the time the company first owned a relevant interest in the property; but this is subject to subsection (6).
- (6) If—
  - (a) none of D’s interest in the company was acquired directly or indirectly from a person connected with D, and

- (b) the company owned a relevant interest in the property at the time D first acquired an interest in the company,  
“the relevant time” is the time D first acquired such an interest.

### 79.28.5 *Exceptions*

Section 100B ITEPA sets out three wide exceptions to this narrow relief:

- (1) Section 100A(1) does not apply if subsection (2), (3) or (4) applies.

The first two exceptions concern connected<sup>84</sup> companies:

- (2) This subsection applies if—
  - (a) the company’s interest in the property was acquired<sup>85</sup> (directly or indirectly) from a connected company at an undervalue, or
  - (b) the company’s interest in the property derives from an interest<sup>86</sup> that was so acquired.
- (3) This subsection applies if, at any time after the relevant time—
  - (a) expenditure in respect of the property has been incurred (directly or indirectly) by a connected company, or
  - (b) any borrowing of the company (directly or indirectly) from a connected company has been outstanding (but see subsection (7)). ...
- (7) For the purposes of subsection (3)(b), no account is to be taken of—
  - (a) any borrowing at a commercial rate, or
  - (b) any borrowing which results in D being treated under Chapter 7 (taxable benefits: loans) as receiving earnings.

Lastly there is an all-purpose tax motive restriction:

---

84 “Connected” is very widely defined in s.100B(9) ITEPA:

“In this section ‘connected company’ means—

- (a) a company connected with D, with a member of D’s family or with an employer of D, or
- (b) a company connected with such a company.”

85 Section 100B(5) ITEPA provides a commonsense definition:

“In subsection (2), references to the acquisition of an interest include the grant of an interest.”

86 Section 100B(6) ITEPA provides a commonsense definition:

“For the purposes of that subsection [subsection (2)], an interest is acquired at an undervalue if the total consideration for it is less than that which might reasonably have been expected to be obtained on a disposal of the interest on the open market; and ‘consideration’ here means consideration provided at any time (and, for example, includes payments by way of rent).”

- (4) This subsection applies if the living accommodation is provided in pursuance of an arrangement<sup>87</sup> the main purpose, or one of the main purposes, of which is the avoidance of tax or national insurance contributions.

### 79.28.6 *Critique*

Foreign homes relief would serve as a case study for what has gone wrong with tax reform in recent years. Almost every restriction on this relief is anomalous. Why should there be a relief for a company owning land and not for chattels? Yachts and aeroplanes are generally held through companies. Why should the relief apply to companies held by individuals and not by trusts? We need rationalisation and simplification, not yet another narrowly targeted relief. But there it is.

### 79.29 **Other planning**

More complex possibilities involve:

- (1) acquiring a property,
- (2) granting (say) a ten-year lease to trustees or to the individual, and
- (3) transferring the freehold reversion to a company. Watch SDLT.

The accommodation charge would not apply, because the company would not be providing accommodation. Similar arrangements can be carried out with options. In practice, arrangements of this complexity would not often be needed.

### 79.30 **BiK/general earnings: Interaction**

Section 109 ITEPA provides:

- (1) This section applies if—
  - (a) under this Chapter [Chapter 5 Part 3] the cash equivalent of the benefit of living accommodation is to be treated as earnings from an employee's employment for a tax year, and
  - (b) under Chapter 1 of this Part an amount would, apart from this

---

87 Section 100B(8) ITEPA provides the definition:

“In subsection (4) ‘arrangement’ includes any scheme, agreement or understanding, whether or not enforceable.”

The wording is slightly different from the standard (unnecessary) definition, see App 2.2.3 (Definitions of “arrangement”); but there is no practical difference.

section, constitute earnings from the employment for the year in respect of the provision of the accommodation.

(2) The full amount of the cash equivalent is to be treated as earnings from the employment for that year under this Chapter.

(3) The amount mentioned in subsection (1)(b) is to constitute earnings from the employment for the year under Chapter 1 of this Part only to the extent that it exceeds the amount mentioned in subsection (2).

This is the opposite of the rule which applies to other classes of benefits in kind.

### **79.31 Planning for home charge**

Many company structures have been set up in the past. The risk of an accommodation charge depends on the facts of each case, but in practice it is often a concern. What can be done?

#### *79.31.1 Winding-up company*

If practical, the safest course is to extract the property from the company so as to put an end to the charge (or risk of a charge) under the benefit in kind rules. One way to do this is to liquidate the company.

The liquidation may give rise to a capital gain which may rule out this course. But SDLT and CGT may rule out this course.

Another possibility may be to reimburse the company for the cost of providing the accommodation. Watch the CGT implications.

#### *79.31.2 Planning without winding-up*

CGT may make it impractical to wind up the company. In that case the solution may be to take steps to ensure that the individual is not a shadow director.

### **79.32 Home BiK: HMRC enquiries**

In practice, as *Al Fayed v Advocate General* frankly reports,<sup>88</sup> shadow directorship arguments before the decision in *R v Dimsey & Allen* were “settled by horse trading as opposed to on any strict statutory basis”. It is likely that this will continue to be the case. Except for companies which were

---

88 [2002] STC 910 para 44.

carefully set up and run, HMRC will at least be able to exact a sum equal to the cost of litigating the issue before the first-tier tribunal or beyond.

### 79.33 Home BiK: Critique

Anyone who has followed the text to this point will agree that the law in this area is defective. It is unnecessarily complicated, rests to a large part on formal and informal concessions, and is sometimes so very unfair that HMRC do not exert themselves to apply the law correctly set out in the Manuals. The following reforms should solve these problems:

- (1) Abolish the s.105 charge and extend s.106 to cover the first £75,000 of acquisition cost. All the concessions would then drop away.
- (2) The application of the charge to shadow directors who do no real work for the company is a nonsense. Given the widespread use of holding companies to hold wealth, *Dimsey & Allen* is arguably one of the worst tax decisions made by the House of Lords. Simply to abolish the charge (reversing *R v Dimsey & Allen*) would go too far the other way, since it is fair that a shadow director who receives what is in reality remuneration from a company should be charged. The solution is to restrict the rule that any benefit from an employer is deemed to be “by reason of employment”. The deeming should not apply to a shadow director (whose connection with the company may be tenuous). That would strike the right balance.

My impression is that the BiK rules have been used by HMRC as a threat or weapon in two ways:

- (1) in tax investigations, and
- (2) to discourage IHT planning (placing homes in companies for IHT reasons). That is not the purpose for which the BiK rules were designed, and it is not surprising that they did not succeed in preventing that planning. But the IHT residence-property rules now prevent planning of this kind.

### 79.34 SDLT on accommodation charge

Para 12 sch 4 FA 2003 provides:

- (1) Where a land transaction is entered into by reason of the purchaser’s employment, or that of a person connected with him, then—
  - (a) if the transaction gives rise to a charge to tax under Chapter 5 of Part 3 of the ITEPA (taxable benefits: living accommodation) and—

- (i) no rent is payable by the purchaser, or
- (ii) the rent payable by the purchaser is less than the cash equivalent of the benefit calculated under s.105 or 106 of that Act,  
there shall be taken to be payable by the purchaser as rent an amount equal to the cash equivalent chargeable under those sections;
- (b) if the transaction would give rise to a charge under that Chapter but for s.99 of that Act (accommodation provided for performance of duties), the consideration for the transaction is the actual consideration (if any); ...

This will not usually affect a foreign domiciliary who occupies a UK home through a company, even if the foreign domiciliary is a shadow director and within the BiK provisions. The reasons are:

- (1) The acquisition of a licence (as opposed to a lease) is not a land transaction. The distinction between lease and licence is fraught but usually the individual will occupy under licence and not a lease.
- (2) Even if the shadow director acquires a lease, they will not usually do so by reason of their employment. The extended definition in the benefits code<sup>89</sup> does not apply here.

## **79.35 Benefit BiK charge**

### *79.35.1 Benefit BiK: The charge*

Section 201(1) ITEPA provides:

This Chapter [Chapter 10 Part 3] applies to employment-related benefits.

The effective charge<sup>90</sup> is in s.203(1) ITEPA:

The cash equivalent of an employment-related benefit is to be treated as earnings from the employment for the tax year in which it is provided.

The key expressions are “employment-related benefit” and “cash equivalent”.

### *79.35.2 “Employment-related benefit”*

---

<sup>89</sup> See 79.10 (“By reason of employment”).

<sup>90</sup> This is not, strictly, a charging section, but it feeds into the general charge to tax on employment income: see 33.4.2 (“General earnings”); 33.6 (Charge on employment income).

See 79.8 (Accommodation/benefit charge).

The relief for excluded benefits is not considered here.

### 79.35.3 “Benefit”

Section 201(2) ITEPA provides:

In this Chapter [Chapter 10 Part 3]—  
“benefit” means a benefit<sup>91</sup> or facility of any kind;

EI Manual provides:

**21002 What is meant by a “benefit”** [Nov 2019]

... The definition of what is a benefit is thus very wide and includes everything that confers a special bounty of any description on the recipient.

HMRC do not argue that the word “facility” applies to a facility which is not a benefit in the ordinary sense. Thus s.201(2) is a non-definition of benefit: it only says that “benefit” means benefit. But non-definitions are common in tax legislation.

### 79.35.4 *Fair bargain*

There is no benefit – and so no charge – if full consideration is paid for anything which would be a benefit if provided at an undervalue. This is so even if the full consideration is less than the “cash equivalent”, which is often, perhaps usually, the case.<sup>92</sup> The EI Manual provides:

**EIM21004 benefits and fair bargain** [Nov 2019]

Although the definition (?) of “benefit” in Section 201(2) is extremely wide, it does not cover everything that may be provided by an employer to someone who happens to be an employee or director of that employer. As a general principle, a benefit must provide an element of “special bounty” to the recipient. In other words the employee must get something over and above what the employer gives as a **fair bargain**, or would be prepared to give as a fair bargain, to a member of the public, or other independent third party, dealing on arms length terms with the employer...<sup>93</sup>

---

91 For the meaning of “benefit” see 47.5 (Benefit).

92 FA 2016 reversed this rule in relation to accommodation, cars and loans, but the fair bargain rule continues to apply for the benefit BiK charge.

93 These words are copied into the decision in *Excel Computer Systems v HMRC* [2018] UKFTT 346 (TC).

The principle of “fair bargain” in relation to a benefit arose in the case of *Mairs v Haughey*,<sup>94</sup> which concerned a payment to an employee in return for giving up rights under an enhanced redundancy scheme. The Special Commissioners held that the payment was not a benefit because it did not overvalue the employee’s contingent right to receive a payment from the scheme:

“Section 154 [ICTA1998] brings benefits into charge. All kinds of benefits are covered; but whatever they are, they must be capable of being described as “benefits”. The legislation is aimed at profits ..... which escape mainstream ..... provisions for one reason or another. It is not aimed at receipts resulting from fair bargains.”<sup>95</sup>

In the Court of Appeal (Northern Ireland) Lord Chief Justice Hutton supported the Commissioners’ view:

“The respondent received the payment .... in return for surrendering his contingent right to receive payment under the enhanced redundancy scheme and the Special Commissioners held that the payment did not overvalue that right. Therefore I consider that the Respondent did not receive a “benefit” .... where the money received was paid to him by way of **fair bargain**, in consideration of his surrender of a right to receive a larger sum on the event of the contingency of redundancy occurring.”<sup>96</sup>

By the time *HMRC v Apollo Fuels* reached the Court of Appeal, it was common ground “that fair bargains are excluded from the meaning of ‘employment-related benefit’ in s 203 for the purposes of Ch 10 of Pt 3”.<sup>97</sup> An issue that remains is whether, as a matter of fact, the arrangement in point actually is a “fair bargain”.

#### 79.35.5 Unintendedly bad bargain

The EIM provides:

**EIM21004 benefits and fair bargain** [Nov 2019]

... **Wilson v Clayton**<sup>98</sup>

This case concerned an employee who was dismissed by his employer for

---

94 66 TC 273.

95 *Mairs v. Haughey* [1992] BTC 373 at 385.

96 *Id.* at 406.

97 [2016] STC 1594 at [41].

98 77 TC 1.

failing to agree to withdrawal of his entitlement to an Essential Car User Allowance (ECUA). He was immediately re-employed on the same terms except that he was no longer entitled to receive ECUA. An Employment Tribunal found that he had been unfairly dismissed and ordered the employer to reinstate the ECUA, and to pay him the arrears of ECUA due since it had been withdrawn. The Tribunal also ordered the employer to pay him a “Basic Award” of compensation.

Under the Employment Rights Act 1996 the Tribunal had no authority to order the compensation payment but the employer paid it. Arguably the payment to the employee was a pure windfall to him as it had no statutory basis and the employee was not entitled to receive it. Nevertheless the employer paid it in order to avoid further litigation and consequently it was paid as part of a genuine compromise agreement made at arm’s length.

The Court of Appeal held that in these particular circumstances the payment of compensation was not a benefit, as it represented a “**true bargain**” between employer and employee. Gibson, LJ held that –

“Where parties at arm’s length arrive at a genuine compromise in settlement of hostile litigation, it would be an extremely difficult task for any tribunal or court to unpick the constituent parts of the bargain and to put a value on those parts.”<sup>99</sup>

Consequently the value of the “bargain” agreed by an employer and an employee **in a genuine compromise agreement at arm’s length** is not generally relevant to determining whether the bargain represents a “fair bargain”. But this principle does not apply where, as Gibson LJ set out, “the reason for the payment was to confer a gratuitous benefit within a compromise agreement.. .”

Following *Wilson v Clayton*, where it is claimed that the payment represents a fair bargain, you must investigate carefully the reason for a payment made as a result of a compromise agreement at arm’s length. If it was a genuine compromise agreement it will probably be a fair bargain. On the other hand, if it was intended purely to provide a benefit, it will be chargeable as such. The decision does not have any read across to payments made under a compromise agreement not made at arm’s length.

These decisions were approved in *HMRC v Apollo Fuels*:

*Mairs v Haughey* and *Wilson v Clayton* are authorities establishing that fair bargains are excluded from the regime for taxing benefits conferred on

---

<sup>99</sup> *Id. at para 50.*

employees because there is no benefit which is properly subject to tax.<sup>100</sup>

It is considered that the principle in *Wilson v Clayton* is not limited to compromise agreements in litigation; it applies to any unintendedly bad bargain, that is, where both sides intended to reach a fair bargain, ie to give full consideration, but owing to some mistake, the price reached was not an informed market value. A unintendedly bad bargain is not a benefit for the purposes of the benefit BiK charge. It is not a benefit in the general sense, so it is also not a benefit for the purposes of s.87 or s.731.<sup>101</sup>

#### 79.35.6 *Benefit available to all*

The EI Manual provides:

**EIM21004 benefits and fair bargain** [Nov 2019]

... something provided by an employer, on identical terms both for employees and for the general public (for example, “free” refuse collection or state education), does not become a benefit within the legislation simply because it is provided for people who happen to be employees of that employer. The employees receive on the same terms exactly what they would have received if they had not been employees. That indicates that what they get is a fair bargain and there is therefore no “benefit”.

It is not necessary that the employer actually does deal with members of the public for this principle to apply. If an employer provides something to an employee, and they would be prepared to provide it to any member of the public on exactly the same terms, then that is a fair bargain and not a benefit.

The conclusion must be correct. The reason given is not persuasive: in what sense is the provision of refuse collection or state education a “bargain”? But the context shows that this sort of benefit does not count. This is the reason that the HMRC Manual refers to benefit as a *special* bounty, ie a benefit not available to all.

#### 79.35.7 *Cash payment*

The EI Manual provides:

**EIM21006 cash payments can be benefits: Wicks v Firth** [Nov 2019]

The statutory definition of a benefit is wide enough to include a cash

---

100 *HMRC v Apollo Fuels* [2014] UKUT 95 (TCC) at [71].

101 See App.4.6.3 (Bad bargain).

payment which a director or an employee ... receives by reason of the employment and which is not chargeable to income tax under some other provision. ...

For example, in *Wicks v Firth*<sup>102</sup> payments made as scholarships to the children of an employee within the benefits code were held to be benefits within Section 201 ITEPA 2003.

In that case the payments were exempt from charge by Section 331 ICTA 1988 (this exemption was subsequently removed in most cases by Section 212 ITEPA 2003) but that does not alter the general principle that cash payments can be a chargeable benefit.

The decision in *Mairs v Haughey* (EIM21004) is further support for the view that a cash payment can be a chargeable as a benefit.

That seems self-evident.

### 79.35.8 *Employer self-interest*

The EI Manual provides:

**EIM21003 Motive of employer is irrelevant** [Nov 2019]

[The Manual refers to the definition of “benefit” and continues:] It does not matter whether in providing a benefit an employer is intending to benefit himself rather than, or as well as, the employee. So long as the employee or a member of his family or household (Section 721(5) ITEPA 2003) is provided with a benefit by reason of his employment, a tax charge will arise. In *Rendell v Went* (41 TC 641) the company took over and paid for the defence of a director against a dangerous driving charge. It did so because it feared the loss of the director's services if he was sent to prison. The full amount paid by the company was held to be a chargeable benefit. The fact that the company spent the money primarily for its own benefit and only as a by-product benefited the director, did not prevent the payment giving rise to a chargeable benefit.

The legal costs (including leading counsel) amounted to £641 (in 1958 prices).<sup>103</sup> It seems the money was well spent, as the director was acquitted.

The decision in the House of Lords was unanimously in the Crown's favour. [The Manual cites a comment of Lord Reid, and continues:] Viscount Radcliffe made the same point in more succinct terms (page 656):

---

<sup>102</sup> 56 TC 318.

<sup>103</sup> The equivalent value in 2016 is about £14,000: see <http://www.measuringworth.com>

“But an expenditure is not the less advantageous to a director because it suits or advantages his company to make it.”

### 79.35.9 “Excluded benefit”

Section 202(1) ITEPA provides:

A benefit is an “excluded benefit” for the purposes of this Chapter [Chapter 10 Part 3] if–

- (a) any of Chapters 3 to 9 of the benefits code applies to the benefit,
- (b) any of those Chapters would apply to the benefit but for an exception,<sup>104</sup> or
- (c) the benefit consists in the right to receive, or the prospect of receiving, sums treated as earnings under section 221 (payments where employee absent because of sickness or disability).

Other Chapters of the benefits code (such as accommodation) have priority, and only benefits not caught elsewhere fall into the residuary benefits charge. For this reason the label “employment-related benefit” is not particularly apt, but it is hard to think of a better one.

### 79.35.10 *Former/prospective employee*

Section 201 ITEPA provides:

- (4) For the purposes of this Chapter [Chapter 10 Part 3] it does not matter whether the employment is held at the time when the benefit is provided so long as it is held at some point in the tax year in which the benefit is provided.
- (5) References in this Chapter to an employee accordingly include a prospective or former employee.

### 79.35.11 *When is benefit provided*

The time that the benefit matters as it may affect the year of the charge or whether there is a charge at all.

In *Templeton v Jacobs*:

---

104 Section 202(2) ITEPA provides a commonsense definition: “In this section “exception”, in relation to the application of a Chapter of the benefits code to a benefit, means any enactment in the Chapter which provides that the Chapter does not apply to the benefit...”

In January 1991 Jacobs agreed to become an employee of a company in May 1991 and it was agreed between the parties that Jacobs would work from home and that the prospective employer would pay for the costs of converting the loft in Jacobs' home into an office. Before 6 April 1991 the employer entered into a contract with, and paid, a builder for the conversion work. The work was started in July 1991 and the loft conversion was available for use as an office in September 1991.

The question was when the benefit was provided: when the work was paid for or when the work was completed. The judge accepted the argument of HMRC:

Suppose ... that the taxpayer had been employed continuously throughout the years 1990-91 and 1991-92. If the [benefit was in 1990/91] a charge to tax would arise during the earlier of those two years when the employer company entered into the building contract or alternatively paid the consideration under it. Yet the work might never be carried out, with the result that no benefit ever became available to the taxpayer for his use and enjoyment. This could have happened for a number of reasons: the liquidation of the building contractor or even simply an agreement between the builder and employer not to proceed with the contract.<sup>105</sup>

So:

No benefit is provided for the purposes of Section 154(1) until the benefit in question becomes available to be enjoyed by the taxpayer. Prior to that point in time there can be no relevant benefit to the taxpayer in respect of which a charge to tax can arise under Section 154(1). The arrangements made by the employer, or the steps taken by him, or the cost which he has incurred are not the relevant touchstones for determining whether or not a benefit has been provided. There can be no benefit until the relevant benefit is available to the taxpayer.<sup>106</sup>

### **79.36 “Cash equivalent”**

This is defined in s.203(2) ITEPA:

The cash equivalent of an employment-related benefit is

---

105 68 TC 735 at p.743. The possibility that the builder and employer may have agreed not to proceed would not have arisen if the employee had been party to the contract. But that would have made no difference, as the possibility of liquidation of the builder would still remain.

106 68 TC 735 at p.744.

- [a] the cost of the benefit less
- [b] any part of that cost made good<sup>107</sup> by the employee, to the persons providing the benefit, on or before 6 July following the tax year in which it is provided.

This takes us to the elaborate definition of “cost of the benefit”.

Section 203(3) ITEPA sets out the three rules and their priority:

The cost of an employment-related benefit is determined in accordance with section 204 unless—

- (a) section 205 provides that the cost is to be determined in accordance with that section, or
- (b) section 206 provides that the cost is to be determined in accordance with that section.

Thus s.204 ITEPA contains the default rule which applies unless trumped by s.205 or 206. I refer to that as the “**s.204 default cost rule**”. There are two cases where the s.204 default cost rule does not apply:

- (1) Asset made available without transfer: the “**s.205 cost rule**”.
- (2) Transfer of used or depreciated asset: the “**s.206 cost rule**”. This is not discussed here.

### 79.36.1 *s.204 default cost rule*

Section 204 ITEPA provides:

The cost of an employment-related benefit is the expense incurred in or in connection with provision of the benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters).

### 79.37 **s.205 cost rule**

Section 205(1) ITEPA provides:

The cost of an employment-related benefit (“the taxable benefit”) is determined in accordance with this section if—

- (a) the benefit consists in—
  - (i) an asset being placed at the disposal of the employee, or at the disposal of a member of the employee’s family or household, for the employee’s or member’s use, or

---

107 See 79.19 (“Making good”).

- (ii) an asset being used wholly or partly for the purposes of the employee or a member of the employee's family or household, and
- (b) there is no transfer of the property in the asset.

In particular, the s.205 cost rule applies on the use of chattels, which is the main focus in this chapter. Where that is the case, the cost rule is in s.205(2) ITEPA:

The cost of the taxable benefit is the higher of—

- (a) the annual value of the use of the asset, and
- (b) the annual amount of the sums, if any, paid by those providing the benefit by way of rent or hire charge for the asset, together with the amount of any additional expense.

Section 205(3) ITEPA defines “annual value of the use of the asset”:

For the purposes of subsection (2), the annual value of the use of an asset is—

- (a) in the case of land, its annual rental value;<sup>108</sup>
- (b) in any other case, 20% of the market value<sup>109</sup> of the asset at the time when those providing the taxable benefit first applied the asset in the provision of an employment-related benefit (whether or not the person provided with that benefit is also the person provided with the taxable benefit). ...<sup>110</sup>

Section 205(4) ITEPA defines “additional expense”:

In this section “additional expense” means the expense incurred in or in connection with provision of the taxable benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters), other than—

- (a) the expense of acquiring or producing the asset incurred by the person to whom the asset belongs, and
- (b) any rent or hire charge payable for the asset by those providing the

---

108 “Annual rental value” is defined in s.207 ITEPA. This only applies to land other than accommodation, so in practice it is not important.

109 “Market value” is has a commonsense definition in s.208 ITEPA.

110 There is transitional relief where those providing the taxable benefit first applied the asset in the provision of an employment-related benefit before 6 April 1980.

asset.<sup>111</sup>

Note that there is a reference to “a proper proportion” in the computation of the additional expense, but not in the computation of the annual value.

### 79.37.1 *Available for part of year*

Where the asset is available for part of a year, there clearly has to be a time apportionment. Section 205A ITEPA provides:

- (1) A deduction is to be made under section 205(1C)(b) if the asset mentioned in section 205(1) has been unavailable for private use on any day during the tax year concerned.
- (2) For the purposes of this section an asset is “unavailable” for private use on any day if—
  - (a) that day falls before the day on which the asset is first available to the employee,
  - (b) that day falls after the day on which the asset is last available to the employee,
  - (c) for more than 12 hours during that day the asset—
    - (i) is not in a condition fit for use,
    - (ii) is undergoing repair or maintenance,
    - (iii) could not lawfully be used,
    - (iv) is in the possession of a person who has a lien over it and who is not the employer, not a person connected with the employer, not the employee, not a member of the employee's family and not a member of the employee's household, or
    - (v) is used in a way that is neither use by, nor use at the direction of, the employee or a member of the employee's family or household, or
  - (d) on that day the employee—
    - (i) uses the asset in the performance of the duties of the employment, and
    - (ii) does not use the asset otherwise than in the performance of the duties of the employment.

---

111 EIM states at 21631 {May 2010}:

This will include expenditure on running costs and could include expenditure on alterations or improvements, repairs, maintenance, etc depending on whether it was incurred for the purpose of providing the benefit. It would not include interest paid on a loan to acquire the asset.

(3) The amount of the deduction is given by—

$$(U/Y) \times A$$

where—

U is the number of days, in the tax year concerned, on which the asset is unavailable for private use,

Y is the number of days in that year, and

A is the annual cost of the benefit of the asset determined under section 205(2).

(4) The reference in subsection (2)(a) to the time when the asset is first available to the employee is to the earliest time when the asset is made available, by reason of the employment and without any transfer of the property in it, for private use.

(5) The reference in subsection (2)(b) to the time when the asset is last available to the employee is to the last time when the asset is made available, by reason of the employment and without any transfer of the property in it, for private use.

The EIM gives an example:

**EIM21890 Example Of Calculating The Unavailable For Private Use Deduction** [Nov 2019]

... A director is provided with the use of a helicopter I a tax year. The market value of the helicopter when it was first made available for the director' private use is £800,000.

The asset was used for a mixture of business and private purposes and was first provided on 6 July in that tax year (91 days after the start of the tax year). During the rest of the year there were 10 days when the helicopter is only used for the duties of the employment (and so is treated as unavailable for private use under section 205A(2)(d)) and 10 days when another employee had sole use of the asset (and so is treated as unavailable for private use on the day under section 205A(2)(c)(v)).

The employee pays £6,000 towards the use of the asset before 6 July following the end of the relevant tax year.

There are 365 days in the relevant tax year (Y).

20% market value when first available	£160,000
---------------------------------------	----------

Additional expenses associated with its provision	<u>£20,000</u>
---	----------------

Annual cost of the asset (A)	<u>£180,000</u>
------------------------------	-----------------

Number of days in the tax year before the benefit was provided	91 days
--	---------

Number of days the asset was only used for employment	10 days
---	---------

Number of days when the asset was used only by another employee	0 days
---	--------

Total number of days the asset was unavailable for private use during the tax	
---	--

year (U) 111 days

Deduction from annual cost:  $U/Y \times A = 111 / 365 \times 180,000 = \text{£}54,740$

Chargeable cost of the asset is  $\text{£}180,000 - \text{£}54,740$  which is  $\text{£}125,260$ .

As the employee has made good part of the cost by paying  $\text{£}6,000$  and it was paid before 6 July following the end of the relevant tax year the cash equivalent of the benefit for both tax and Class 1A NICs is  $\text{£}119,260$ .

### 79.37.2 Shared use

Section 205B ITEPA provides:

(1) This section applies where the cost of an employment-related benefit (“the taxable benefit”) is to be determined under section 205.

(2) If, for the whole or part of the tax year concerned, the same asset is available for more than one employee's private use at the same time, the total of the amounts which are the cost of the taxable benefit for each of those employees is to be limited to the annual cost of the benefit of the asset determined in accordance with section 205(2).

(3) The cost of the taxable benefit for each employee is determined by taking the amount given by section 205(1C) and then reducing that amount on a just and reasonable basis.

(4) For the purposes of this section, an asset is available for an employee's private use if it is available for private use by the employee or a member of the employee's family or household.

### 79.38 Ordinary earnings/BiK border

The expression “general earnings” includes:

- (1) Ordinary earnings, and
- (2) BiK earnings<sup>112</sup>

So it may not often matter whether earnings are classified one way or the other. But clearly there should not be a double charge, and sometimes the distinction does matter.

Section 64 ITEPA defines the border:

(1) This section applies if, apart from this section, the same benefit would give rise to two amounts (“A” and “B”)—

- (a) A being an amount of [ordinary] earnings as defined in Chapter 1 of

---

112 See 33.4.2 (“General earnings”) and 33.6 (Charge on employment income).

this Part,<sup>113</sup> and

- (b) B being an amount to be treated as earnings under the benefits code.
- (2) In such a case—
  - (a) A constitutes earnings as defined in Chapter 1 of this Part, and
  - (b) the amount (if any) by which B exceeds A is to be treated as earnings under the benefits code.

A different rule applies for accommodation:

- (3) This section does not apply in connection with living accommodation to which Chapter 5 of this Part applies.
- (4) In that case section 109 applies to determine the relationship between that Chapter and Chapter 1 of this Part.<sup>114</sup>

The EI Manual provides:

**EIM20503 third party benefits [Nov 2019]**

**... Interaction of “by reason of the employment” with s.62 ITEPA**

It is important to understand the distinction between

[1] Section 62 [ordinary earnings] on the one hand, and

[2] Sections 70(1) [expenses payments BiK earnings] and 201(2) [benefit BiK earnings] on the other hand.

Section 62(1) applies to earnings “in relation to an employment”, including anything that is an “emolument of the employment” (Section 62(2)(c)). Section 70(1) and Section 201(3) apply to expense payments and benefits provided “by reason of the employment”. Section 62 is based on what was previously Section 19 ICTA 1988, which charged to tax emoluments “from an employment”. Case law shows that the phrase “by reason of the employment” has a wider meaning than “from the employment” (EIM00600). The words “from the employment” are not reproduced in Section 62 but earnings chargeable under that section include emoluments “of the employment” and in this context “of the employment” has the same meaning as “from the employment”.

**79.39 BiK: Remittance basis**

This section deals with the position of a remittance basis taxpayer who is an employee, director or shadow director, and receives benefits in kind. The same points arise for the accommodation and the benefit BiK charges. In each

---

113 See 33.4.1 (“Ordinary” earnings).

114 See 79.30 (BiK/general earnings: Interaction).

case, a specified amount (the cash equivalent) is “treated as earnings from the employment”.<sup>115</sup> I refer to this as “**BiK earnings**”. BiK earnings can qualify for the remittance basis in one of two ways:

- (1) Under the COE remittance basis<sup>116</sup>
- (2) Under the OWR (recent arrivers) remittance basis<sup>117</sup>

It is best to consider these separately.

#### 79.39.1 *OWR (recent arrivers)*

This remittance basis applies if the general earnings are not “in respect of duties performed in the UK”.

Thus one has to ascertain:

- (1) What are the duties?
- (2) Where are they performed?
- (3) Are the BiK earnings “in respect of” those duties?

*What are the duties?*

To ascertain the duties of an employee is a matter of employment law, and the contract of employment, and the question is relatively straightforward. To ascertain the duties of a formally appointed director is a matter of company law, and employment law (if the director has a contract of employment), and is also generally straightforward.

To ascertain the duties of a shadow director is more complicated. Assuming UK law principles apply,<sup>118</sup> the starting point is Part 10 Companies Act 2006, which is headed “A director’s duties”. The law was amended on 26 May 2015.<sup>119</sup> Before that date s.170(5) Companies Act 2006 provided:

*The general duties apply to shadow directors where, and to the extent that, the corresponding common law rules or equitable principles so apply.*

Section 170(5) Companies Act 2006 now provides:

The general duties apply to a shadow director of a company where and to the

---

115 See 79.14 (Accommodation: the charge); 79.35.1 (Benefit BiK: The charge).

116 See 33.14 (Chargeable overseas earnings).

117 See 33.22 (Overseas workday relief).

118 Further consideration would be needed if the relevant company law was significantly different.

119 See s.89 Small Business, Enterprise and Employment Act 2015.

extent that they are capable of so applying.

The Explanatory Notes comment on this change:

At present the general duties of directors can only apply to shadow directors in the same way as the corresponding common law rules and equitable principles can. In future, the starting point for shadow directors will be that the general duties apply to them unless they are not capable of applying (removing the current restriction). This is achieved by replacing section 170(5) of the CA 2006. This change in default position is neither intended to preclude the courts from looking at the application of the duties on a case by case basis, nor from drawing on existing case law in any given case.

The position therefore continues to be that there is no clear statement of the general duties of a shadow director.

There are seven general duties:

- (1) Duty to act within powers
- (2) Duty to promote the success of the company
- (3) Duty to exercise independent judgment
- (4) Duty to exercise reasonable care, skill and diligence
- (5) Duty to avoid conflicts of interest
- (6) Duty not to accept benefits from third parties
- (7) Duty to declare interest in proposed transaction or arrangement<sup>120</sup>

Duties (1) - (4) are expressed in general terms which do not identify specific duties. Duties (5) - (6) are negative duties (duties not to do something) which are not performed in any particular place. Duty (7) will rarely if ever arise.

It can be argued that a shadow director has no “duties”. The director may choose to give instructions and directions, but is not under any duty to do so. I think the better view is that if a shadow director is deemed to have an employment, it follows that they should be deemed to have some duties. The question is: what are the duties of a shadow director? The duties may be regarded as the instructions or directions which the shadow directors give to the company. Another possible view is that everything that the shadow director does for the company (or its assets) is regarded as part of their “duties”; or alternatively everything they do if their actions concern matters which would (apart from them) be the responsibility of the actual directors.

---

120 Sections 171-177 Companies Act 2006.

*Where are the duties performed?* Where these duties are performed is a question of fact, but in most cases it is likely that at least some of the duties will be performed outside the UK. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad) - but only if the duties are in fact performed abroad.

*Are the BiK earnings in respect of the duties?* Are BiK earnings “in respect of” the duties of a shadow director? In the case of a standard property owning company, it is considered that the answer is “no”. Certainly if there were no duties there would be no shadow directorship and so no BiK earnings, but that is not enough. The benefit of accommodation (which the earnings represent) would arise independently of the duties. The fiction that the benefit is deemed to be received by reason of the employment does not entail that the earnings are in respect of the employment.

There is no income tax avoidance possibility here, because in the case where actual, substantial services were provided by a shadow director (comparable to the services of a properly appointed director) then the earnings could and probably would be in respect of the duties.<sup>121</sup>

If I am wrong on “in respect of”, and some of the duties are performed in the UK, there is an apportionment. The difficulty of apportionment is immense, which suggests that my interpretation of “in respect of” is the correct one.

Similar points apply to an a properly appointed director (not a shadow director) who is owner, or ultimate beneficial owner, of a company. While such a person clearly has duties, the benefit in kind may be attributable to the share ownership, not to the duties, and so not “in respect of” the duties.

For these reasons it is considered that BiK earnings can in principle qualify for the OWR (recent arrivers) remittance basis.

### 79.39.2 *COE remittance basis*

This remittance basis applies if the duties of the employment are performed wholly outside the UK.

Thus one has to ascertain:

- (1) What are the duties?
- (2) Where are they performed?

---

121 See *R v Dimsey & Allen* [2002] 1 AC 509 at [19].

In an accommodation case, where a company holds a UK dwelling house, it would be difficult in practice for a UK resident remittance basis taxpayer to ensure that his duties are performed *wholly* outside the UK. However, it should be possible in other cases, eg where the BiK consists of non-UK situate accommodation or chattels, or for the BiK of employment-related loans. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad).

For these reasons it is considered that BiK earnings may qualify for the COE remittance basis.

### 79.39.3 *BiK earnings remitted to UK*

If BiK earnings qualify for the COE or OWR remittance basis, they are taxable only if remitted to the UK.

BiK earnings are not on any view remitted to the UK if:

- (1) The accommodation is not in the UK; or
  - (2) The benefit is not received/used/brought to the UK by a relevant person.
- If the accommodation or benefit is in the UK, common sense suggests that there ought to be a taxable remittance. But there is a sound technical argument that the deemed earnings cannot be remitted, because they do not exist. The tax charge arises only if the earnings are remitted. The property (or benefit) is not the same as the earnings.

HMRC do not agree. The EI Manual provides:

**EIM20507 expenses and benefits from non-resident employers** [Nov 2019]

The residence of the employer has no effect on whether benefits and expenses within the rules in the benefits code are chargeable.

The residence of any other person providing benefits or expenses payments within those rules similarly has no effect.

**EIM20508 Expense payments to and benefits provided for a director or employee whose earnings are taxable on remittance** [Nov 2019]  
**Sections 22 and 26 ITEPA 2003**

The earnings of a director or employee, (except for 2015/16 and earlier in an excluded employment (EIM20007)), who is chargeable on remittances to the UK under either s.22 or s.26 ITEPA include

- expenses payments remitted to the UK
- expenses paid in the UK
- *benefits provided or enjoyed in the UK (for example, a motorbike*

*available for use in the UK)...*

**EIM40303 Meaning of “remitted to the UK”: benefits in kind ...** [Nov 2019]

**Sections 809L ITA 2007 (inserted by Finance Act 2008)**

**Benefits in kind**

The definition of “remitted to the UK” in Section 809L ITA 2007 (see EIM40302) includes general earnings brought to, received in or used in and enjoyed in the UK in a form other than money. The benefits code as defined by Section 63(1) ITEPA 2003 provides a number of examples of earnings that are capable of satisfying the definition including taxable benefits arising from the provision of:

- living accommodation
- loans
- cars available for private use.

This view was doubtful before 2008, but it is even harder to defend under the ITA remittance basis because where there is deemed income or gains, the statute specifically deals with the issue by identifying specific assets which are deemed to be derived from those income or gains.

#### **79.40 Benefits in kind: Non-resident**

This section deals with the position of a non-resident individual who is an employee, director or shadow director and receives benefits in kind. The same points arise for the accommodation and the benefit BiK charges. Earnings are taxable only if they are in respect of duties performed in the UK.<sup>122</sup>

Thus one has to ascertain:

- (1) what are the duties
- (2) where are they performed
- (3) are the BiK earnings “in respect of” those duties

These questions are discussed above.<sup>123</sup> I conclude even if a shadow director has duties, and even if the duties are performed in the UK, the BiK earnings are not *in respect of* those duties, and so a non-resident shadow director is not taxable.

---

<sup>122</sup> See 33.29 (Non-resident employee).

<sup>123</sup> See 79.39.1 (OWR (recent arrivers)).

This conclusion is consistent with the POA exemption for non-residents<sup>124</sup> (though consistency between different tax codes does not count for much).

In practice, so far as the author is aware, HMRC do not assess non-resident individuals on benefits in kind. Of course, in many cases, collection of tax would be problematic. But it is significant that EI Manual in this context refers specifically to directors who “reside here” (ie, in the UK).<sup>125</sup>

#### **79.41 Section 731 charge**

One should arrange, if possible, that any trust or company holding the family home and chattels has no relevant income within s.731. Otherwise the use of the property would be a benefit, which in principle would rise to an income tax charge on a UK resident user.<sup>126</sup> This only applies if the benefit is not otherwise chargeable to income tax. If there is a BiK charge, there is no charge under s.731. One possibility may be to arrange that the amount of the BiK charge is a small one (eg by a reimbursement of the company’s expenditure). Whatever the charge is, it should avoid a taxable benefit under s.731.

#### **79.42 Transfer pricing & BiK**

The transfer pricing code (in short) deems transactions between persons under common control to be at arm’s length prices.<sup>127</sup>

HMRC formerly accepted that transfer pricing rules apply only to transactions between two “enterprises”.<sup>128</sup> The INT Manual provided two reasons for this view.

The first is based on s.147(1) TIOPA, which sets out the “basic pre-condition” for transfer pricing. This provides (so far as relevant):

... “the basic pre-condition” is that—

- (a) provision (“the actual provision”) has been made or imposed as between any two persons ... by means of a transaction or series of transactions...

---

124 See 79.10 (Non-resident individual).

125 See 79.6.4 (Charge on shadow director).

126 See 47.10 (Benefit of loan).

127 See 24.6 (Transfer pricing/thin capitalisation).

128 Accepting the argument in Venables, “The Transfer Pricing Provisions and Benefits from Offshore Structures” 8 OTR 165 <http://www.khplc.co.uk/reviews>

- (d) the actual provision differs from the provision ... which would have been made *as between independent enterprises*.

From 2006 to 2012, the INT Manual provided:

**412030. The affected persons: Enterprises** [Jun 2018]

Section 147 TIOPA 2010 refers to provision made or imposed between any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals. The reference in S147(1)(d) requires the actual provision to be compared with the arm's length provision that would have been made between independent enterprises.

The second argument is based on s.164 TIOPA which provides:

- (1) This Part is to be read in such manner as best secures consistency between—
  - (a) the effect given to sections 147(1)(a), (b) and (d) and (2) to (6), 148 and 151(2), and
  - (b) the effect which, in accordance with the transfer pricing guidelines, is to be given, in cases where double taxation arrangements incorporate the whole or any part of the OECD model,<sup>129</sup> to so much of the arrangements as does so...

OECD Model applies to enterprises. Article 9(1) OECD Model provides:

Where

- a) an *enterprise* of a Contracting State participates directly or indirectly in the management, control or capital of an *enterprise* of the other Contracting State, or
- b) the same persons participate directly or indirectly in the management, control or capital of an *enterprise* of a Contracting State and an *enterprise* of the other Contracting State,

and in either case conditions are made or imposed between the two *enterprises* in their commercial or financial relations which differ from those which would be made between independent *enterprises*, then any profits

---

129 Defined s.164(3): "In this section "OECD model" means—

- (a) the rules which, at the passing of ICTA (which occurred on 9 February 1988), were contained in Article 9 of the Model Tax Convention on Income and on Capital published by OECD, or
- (b) any rules in the same or equivalent terms."

which would, but for those conditions, have accrued to one of the enterprises, but, by reason of those conditions, have not so accrued, may be included in the profits of that enterprise and taxed accordingly.

From 2006 to 2012, the INT Manual said:

**412030. The affected persons: Enterprises** [Jun 2018]

Section 164 TIOPA 2010 requires Part 4 to be construed in accordance with the OECD model convention, as interpreted by the OECD transfer pricing guidelines. Article 9 of the convention sets out the arm's length principle by reference to conditions made or imposed between enterprises.

The INT Manual concluded:

This suggests that Part 4 TIOPA 2010 should be applied only where both parties are enterprises

As to what is an enterprise, see 20.22.2 (“Enterprise”); but it is clear that an individual not carrying on a business is not an enterprise.

It is also worth noting that the pre-1998 transfer pricing rules did not apply in this situation: they referred to buyers and sellers (not persons).

HMRC held this view (more or less) from the inception of the current provisions. Tax Bulletin 46 (April 2000) provided:

**Will a charge be imputed on a non-resident landlord providing rent-free residential accommodation within the UK to a UK individual who is a participant?**

It will not be Inland Revenue practice to impute a charge under Sch 28AA [ICTA] [now Part 4 TIOPA] in these circumstances.

However the INT Manual was rewritten in 2012 and now takes the opposite view:

**INTM412030 Transfer pricing: ... meaning of ‘person’** [June 2016]

Section 147 TIOPA refers to provision made or imposed between any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals.

The reference in S147(1)(d) requires the actual provision to be compared with the arm's length provision that would have been made between independent enterprises. This merely requires that the comparison is with the transaction that would be entered into by independent enterprises; it does not require that the persons themselves must be enterprises.

Consequently, for example, charities will meet the basic pre-condition of

s.147(1)(a) TIOPA - see INTM412020 - as they are ‘persons’ within the meaning of 147 TIOPA regardless of the fact that they will not usually be enterprises.

The basic transfer pricing rule of s.147(3) or (5) TIOPA will not apply to charities in respect of any of their profits which are exempted from tax (under, for example s.478 CTA) as they will then fail to meet the ‘potential advantage’ requirement of s.147(2)(b) or 4(b) TIOPA.

A person includes both individuals and legal persons such as companies. Person also includes a body of persons.

Section 164 TIOPA requires Part 4 to be construed in accordance with the OECD Model Tax Convention, as interpreted by the OECD Transfer Pricing Guidelines. Article 9 of the convention sets out the arm’s length principle by reference to conditions made or imposed between enterprises. Article 3 defines enterprise as “the carrying on of any business”.

It is considered that the former HMRC view was correct. Many difficulties arise if it is not.

In practice, HMRC do not take the transfer pricing point in relation to individuals. If they want to seek to change their practice, that should be announced in a public statement, such as an HMRC brief; not quietly slipped into the text of a Manual rewrite.

Transfer pricing rules could apply in the (unusual, perhaps only theoretical) case where:

- (1) a company provides accommodation or chattels in the course of its enterprise, and
- (2) the individual uses the accommodation or chattels in the course of an enterprise carried on by the individual.

## CHAPTER EIGHTY

# PRE-OWNED ASSETS

80.1

conditions

80.5.5 Purpose of contribution

### 80.1 Pre-owned assets: Introduction

This chapter considers the provisions in schedule 15 FA 2004 (“**POA provisions**”). A full discussion of this topic needs a book to itself. This chapter focuses on the matters closest to the themes of this book, but it is necessary to review the general rules to understand these matters in their context.

The supplementary regulations (whose title is so long it cannot sensibly be used)<sup>1</sup> are referred to as the “**POA Regulations 2005**”.

“**CIOT Statement**” gives HMRC answers to a number of questions raised by tax practitioner bodies.<sup>2</sup>

The label “pre-owned assets” is inaccurate since the charge may apply to property not previously owned by the taxpayer; but no short label could do justice to the complexities.

The provisions impose three charges to income tax which I call:

- (1) “**POA land charge**”
- (2) “**POA chattel charge**”
- (3) “**POA intangible property charge**”

Land, chattel and intangible property are given commonsense definitions.<sup>3</sup>

---

1 The Charge to Income Tax by Reference to Enjoyment of Property Previously Owned Regulations 2005.

2 [http://www.step.org/resources/policy\\_and\\_technical/uk\\_policy/2006/pre-owned\\_assets\\_-\\_responses.aspx?link=contentMiddle](http://www.step.org/resources/policy_and_technical/uk_policy/2006/pre-owned_assets_-_responses.aspx?link=contentMiddle) The current version of the statement is dated 31 August 2006; earlier versions were dated October 2005 and March 2006.

3 Para 1 sch 15 FA 2004.

## 80.2 Purpose of POA rules

The POA rules were designed to counter three distinct IHT avoidance schemes:

- (1) Eversden schemes
- (2) Ingram schemes
- (3) Home loan schemes

In order to understand the provisions it is necessary to understand the schemes at which they were addressed.

### 80.2.1 *Eversden schemes*

There was only one scheme, but the analysis now depends on whether the asset involved was land or not.

In relation to land, the IHT Manual explains:

**IHTM44101 land - settlement on IIP trusts** [Jun 2016]

This scheme, known as an ‘Eversden’ scheme, involved a spouse putting their marital home into a trust under which the other spouse had a life interest. ... The transaction is exempt from Inheritance Tax and excluded from the reservation of benefit provisions.

The life interest(s) are then terminated in most of the fund so that each spouse is treated as making a transfer at that later time. The termination of the life interest meant that the spouse(s) make a PET; but it was not a gift so that it was not caught by the reservation of benefit provisions. The spouses continued to occupy the property through their life interests in the parts of the property retained by the trustees.

HMRC challenged the scheme and lost in the case of *Eversden v IRC*.<sup>4</sup> Consequently, legislation was introduced with effect from 20 June 2003 to reverse the decision (IHTM14318). ...

The HMRC analysis is as follows:

- where the scheme was effected on or after 20 June 2003: the property will be subject to a reservation of benefit for Inheritance Tax purposes by reason of FA86/S102(5A).<sup>5</sup> As a result the [POA GWR] exemption under FA04/Sch15/Para11(3)

---

4 *IRC v Eversden (Greenstock's Executors)* 75 TC 340 [2003] STC 822.

5 See 74.10.2 (Spouse exemption restricted).

will apply to the settlor.<sup>6</sup>

There may be a separate reservation of benefit when the spouse's interest in possession terminates and which is treated as a gift under FA86/S102ZA.<sup>7</sup>

This is all somewhat theoretical since the scheme would not be done after 20 June 2003.

- where the scheme was effected before 20 June 2003, the arrangement succeeds in avoiding the reservation of benefit provisions. However, provided the spouse's life interest continues until their death, there will be no POA charge because the transaction is an excluded transaction under FA04/Sch15/Para(10)(1)<sup>8</sup>
- if, however, the spouse's life interest comes to an end during their lifetime, the transaction will not longer be an excluded transaction by virtue of FA04/Sch15/Para10(3) so the POA charge will arise from that point on the settlor, assuming the settlor occupies of the property. If the spouse's qualifying interest in possession ends after 18 March 2006, she may also be subject to a separate inheritance tax charge on her death under FA86/S102ZA if she still benefits from the property. But as she did not, herself, dispose of this interest in the property, she is not subject to the POA charge.

The scheme could also be used for property other than a dwelling house:

**IHTM44110 intangibles - settlement on interest in possession trusts**  
[Jun 2016]

Intangible property may also be settled using an Eversden scheme, where the chargeable person settles cash on interest in possession trusts for their spouse or civil partner, which the trustees then invest in, say, a bond. If the terms of the settlement fall within the definition in FA04/Sch15/Para8 similar results to the scheme involving land apply. For example, if the spouse or civil partner's interest in possession ends during their lifetime and the property is now held on discretionary trusts of which the settlor is one of the potential beneficiaries, the POA charge will apply where the settlement was effected before 20 June 2003.

However, the excluded transaction provisions have no application with regard to intangible property so FA04/Sch15/Para10(1)(c), which may

---

6 See 80.19 (GWR exemptions).

7 See 74.18 (GWR on termination of IIP).

8 See 80.10.4 (Trust where spouse has IIP).

have a bearing in respect of schemes involving land, has no relevance. If the settlement was effected on or after 20 June 2003 the property is subject to a reservation of benefit by virtue of FA86/S102(5A) and the POA charge will not apply.

### 80.2.2 *Ingram schemes*

There were two varieties of these schemes; I describe both as “**Ingram schemes**”. The IHT Manual explains:

**IHTM44100 land - lease carve-out scheme** [Jun 2016]

This scheme, known as an ‘Ingram’ scheme, involved a nominee structure where an individual gives their home to nominees who then grant the individual a lease to occupy the house. The lease is usually for 21 years or less at a peppercorn rent. The nominee then gives the property, subject to the lease, away to (usually) the individual’s children. The individual continues to occupy the property under the lease.

The HMRC analysis is as follows:

There is no loss to the transferor’s estate when the property is given to the nominees and the individual does not reserve a benefit in the property that was given away - the freehold reversion - although they continue to occupy the property.

HMRC challenged the scheme and lost in the case of *Ingram v IRC* [1999] STC 37. Consequently, legislation was introduced with effect from 8 March 1999 to reverse the decision (IHTM14360). The impact of this legislation on the POA charge is as follows

- where the scheme was effected on or after 9 March 1999, the property will be subject to a reservation of benefit for Inheritance Tax purposes by reason of FA86/S102A. As a result the exemption under FA04/Sch15/Para11(3) will apply,
- where the scheme was effected before 9 March 1999, the arrangement succeeds in avoiding the reservation of benefit provisions and will be subject to the POA charge under FA04/Sch15/Para3(2).

...

**IHTM44102 land - reversionary leases** [Jan 2020]

This scheme is an arrangement where a donor grants a long lease of their property for say 999 years to the proposed donee, and the lease does not take effect until some future date.

*Example (Victor)*

V, who has owned his house since 1990, grants a 999-year lease to his daughter ... in 1998 but it is not to take effect until 2018. V continues to occupy the property.

The HMRC analysis is as follows:

The effect of this transaction is that

- Victor has made a PET (IHTM04057) of the lease. The loss to his estate (IHTM04054) will be the difference between the unencumbered freehold and the freehold subject to the lease,
- Victor continues to occupy the property as the freeholder, and
- the value of the freehold interest remaining in Victor's estate will decline as the time for the lease to commence approaches.

Where the scheme is subject to the POA charge, the value subject to the charge will be calculated in accordance with FA04/Sch15/Para4(2) (IHTM44010). You will need to obtain three values to correctly assess the POA charge

- the rental value (R), say, £25,000,
- the value at the valuation date (IHTM44011) of the interest that was disposed of (DV); in this case, the value of the lease (that is to take effect in 20 years), say, £100,000, and
- the value of the property at the valuation date (V), say, £800,000.

Following the formula at IHTM44010, the amount subject to the POA charge is

$25,000 \times 100,000 \div 800,000 = \pounds 3,125$  - which would be covered by the de minimis rule (IHTM44056).

But note that as the date for the lease to start gets nearer, so the value of the interest that was disposed of (DV) will increase. The initial value will apply for the first five years of the POA charge, but on revaluation (IHTM44011) the portion of the rental value that is subject to the POA charge is likely to be higher.

Reservation of Benefit Provisions

The gift of the reversionary lease will be property subject to a reservation of benefit under FA86/S102 where there are covenants within the terms of the lease that are beneficial to the donor, such as covenants by the lessee to, say, maintain the property and keep it in repair. This was confirmed at the Court of Appeal in *Viscount Hood (executor of Lady Hood v HMRC* [2018] EWCA Civ 2405.

If there are no covenants within the terms of the lease then the reservation of benefit provisions are still capable of applying where the scheme was established on or after 9 March 1999. FA86/S102A(5) is

capable of applying where the freehold interest was acquired less than 7 years before the gift (this is the significance of the date Victor acquired his house in the example above). If the freehold was acquired within 7 years the continued occupation of the property by the donor would be a significant right in relation to the land in view of FA86/S102A(5) dependent upon how the remaining provisions of the section apply – for example, if the donor pays full consideration for the right to occupy or enjoy the land, that would not a significant right in view of FA86/S102(3).

An exemption from the POA charge will be available under FA04/Sch15/Para 11 where the gifted lease is subject to a reservation of benefit. Where the gifted reversionary lease is not property subject to a reservation of benefit, the POA charge would then arise instead.

#### **IHTM44108 chattels - lease carve-out scheme** [Jun 2016]

Although the use of a lease to carve out an interest in property is more commonly used with land (IHTM44100) it can also apply to chattels. In effect, the owner of the chattels carves out a lease for themselves and then makes a gift of the chattels. Although FA86/S102A is aimed at ensuring such a transaction with land is now subject to the reservation of benefit provisions, that section only applies to interests in land and so does not apply to similar transactions involving chattels.

The transaction is a disposal by the chargeable person and they will be liable to the POA charge under FA04/Sch15/Para6(2)....

### 80.2.3 *Home loan schemes*

The IHT Manual explains:

#### **IHTM44103 land - home loan or double trust scheme** [Sep 2018]

This is a scheme whereby the individual seeks to put the value of their home outside their estate and avoid the reservation of benefit provisions, whilst still continuing to occupy the property. The steps in a typical scheme were:

- the individual creates an interest in possession trust under which they are the life tenant; the trustees have the power to allow the life tenant to use the trust property,
- the individual then sells their house to the trust, usually at the open market value; but because the trustees have no funds, they agree to leave the purchase price outstanding by way of loan,
- the individual creates a second interest in possession trust under which (usually) their children are the life tenants and excludes the

- taxpayer from any benefit,
- the individual transfers the benefit of the loan to the trustees of the second trust.

The HMRC analysis is as follows:

The Inheritance Tax consequences are intended to be as follows

- there is no loss to the estate on the sale of the property to the first trust as the individual enjoys a life interest in the trust property. On their death, the trust fund forms part of their estate, but the value of the property is largely or wholly covered by the debt now owed to the trustees,
- the transfer of the debt to the second trust is a PET (since the taxpayer is wholly excluded from benefiting under this trust), so that on survival for 7 years, the value of their home is not charged to Inheritance Tax.

[The Manual comments on SDLT aspects and continues] The requirements of FA04/Sch15/Para3 are met in that the individual is occupying land which they owned and has now disposed of, so the POA charge applies. However, the property still forms part of their estate as the life tenant of an interest in possession trust, and so the exemption in FA04/Sch15/Para11(1) applies. To bring this scheme within the POA charge, the concept of excluded liabilities is contained in FA04/Sch15/Para11(6) which states that only the value of the property in excess of an excluded liability is treated as forming part of the individual's estate and therefore qualifies for the exemption under FA04/Sch15/Para11(1).

...

But, this assumes that the scheme succeeds in avoiding the reservation of benefit provisions. HMRC does not accept that the scheme succeeds and is litigating the point. A brief analysis of HMRC's view and the consequences for the POA charge are at IHTM44104 onwards.

The GWR aspect of home loan schemes is an interesting story, but is not discussed here. The position here will need to be reviewed *Shelford v HMRC* [2020] UKFTT 53 (TC) is final.

#### 80.2.4 *Width of POA provisions*

The POA provisions are widely drafted. This may be because they are aimed at three distinct schemes with nothing in common. Alternatively, with hindsight, one might see the provisions as adopting a style of anti-

avoidance provisions under which:

- (1) The gateway conditions for the operation of the rules are extremely wide and it is only a slight exaggeration to say that they potentially catch (more or less) everything.
- (2) There are a large number of exemptions to the provisions some of which are also very wide.<sup>9</sup>

So the POA provisions apply in situations which have nothing to do with the three schemes at which they were targeted. They need consideration whenever one person provides funds to another to purchase a home, which includes any case where a home is held by a trust or a company. This will often be the case for the home of foreign domiciliaries; my guess is that any effect on foreign domiciliaries is entirely accidental; no-one had worked it out as the provisions were frantically amended and re-amended in the short time available as the FA 2004 passed through parliament.

### 80.3 POA land charge

Para 3(1) sch 15 FA 2004 provides:

This paragraph applies where—

- (a) an individual (“the chargeable person”) occupies any land (“the relevant land”), whether alone or together with other persons, and
- (b) the disposal condition or the contribution condition is met as respects the land.

In the discussion below the “chargeable person” is called “T” and the land T occupies is called “land occupied by T” (rather than “the relevant land”).

#### 80.3.1 “Occupation”

“Occupation” is a technical legal concept extensively discussed in rating cases. The IHT Manual provides:

**IHTM44003 property in charge: land** [Aug 2016]

...

The meaning of the word ‘occupies’ should be taken quite widely. It goes wider than the chargeable person being physically present at the

---

<sup>9</sup> A good example of this style of drafting is the disguised remuneration rules (not discussed in this book, but I hope to do so in a future edition).

property concerned. Case law suggests that the word 'occupy' requires some element of control. So a visitor may not be in occupation (even someone who stays for an extended period of time due to illness) but someone who has a key and can freely enter and leave premises as they please is more likely to be in occupation; even if they are absent for significant periods. It does not necessarily mean the place you reside which implies a greater level of permanence so a lower threshold is required to satisfy the occupation condition.

A person may be in occupation if they are storing possessions in a property - but only if they also had the right of access to the property to use it as they wished - or if they were the only person with the means of access and used the property from time to time. Storing possessions on its own is not occupation, but may be evidence of occupation. The chargeable person would not be regarded as occupying a property from which they were receiving rental payments from the person(s) actually in occupation.

If the chargeable person's use of the property is only very limited in its nature or duration, they may not be in 'occupation' for the purposes of the POA charge. Each case should be decided on the facts and circumstances relating to it. The guidance at IHTM14333 contains some examples where limited use or occupation of land does not give rise to a reservation of benefit and are unlikely, on their own, to be 'occupation' for the POA charge.

Where the chargeable person was occupying part of their former property and was entitled to, and did, use the rest of the property from time to time, you should regard them as being in occupation of the whole of the property for the POA charge. On the other hand, if the chargeable person occupies a self-contained part of their former property and has no access to the remainder which is occupied by others, you should regard the relevant land as limited to the self-contained part. You should consider occasional visits to the remainder of the property in the same manner as social visits mentioned in example 2 at IHTM14333.<sup>10</sup>

## 80.4 Disposal conditions

Para 3(2) sch 15 FA 2004 provides:

The disposal condition is that—

- (a) at any time after 17 March 1986 the chargeable person owned an

---

<sup>10</sup> See 74.6.4 ("Virtually" to the entire exclusion).

- interest—
- (i) in the relevant land, or
  - (ii) in other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land, and
- (b) the chargeable person has disposed<sup>11</sup> of all, or part of, his interest in the relevant land or the other property, otherwise than by an excluded transaction.

This is best regarded as two conditions depending on whether (a) (i) or (ii) applies. I call them “**disposal conditions (i) and (ii)**”. Only one of them needs to be satisfied for the “disposal condition” to be met.

#### 80.4.1 *Disposal condition (i)*

The essence of disposal condition (i) is that:

- (a) T owned an interest in the land occupied by him.... and
- (b) T has disposed of all, or part of, his interest in the land ...

What if T enters into a contract to purchase land and then assigns that contract to a trust or company? The contract is an interest in land. However, on completion the contract ceases to exist. That will normally be before the valuation date. Since the asset cannot be valued on the valuation date, it is tentatively suggested that disposal condition (i) does not apply in this situation.

The disposal condition is satisfied by a disposal of land for full consideration. However, in such a case the exclusion for arm’s length transactions may apply.

#### 80.4.2 *Disposal condition (ii)*

The essence of disposal condition (ii) is that:

- (a) T owned ... other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the land occupied by T, and
  - (b) T has disposed of all, or part of, his interest in the ... other property
- ...

Disposal condition (ii) is probably intended to deal with the situation

---

<sup>11</sup> “Disposal” is defined in para 3(4) sch 15 FA 2004.

where:

- (1) T disposes of land to A.
- (2) A sells the land and uses the proceeds to purchase other land occupied by T.

However, it may apply where:

- (1) T disposes of any property (not land or cash) to A; and
- (2) A disposes of that property and uses the proceeds to purchase land occupied by T.

This overlaps with the contribution conditions. The overlap matters because the excluded transaction defences to the contribution and disposal conditions are not the same.

The IHT Manual provides:

**IHTM44004 the disposal condition - land** [Aug 2016]

...

**Example** (Trevor and Paul)

T gives The Paddocks to P. P then sells The Paddocks and buys Whiteacre with the proceeds. T then occupies Whiteacre. The disposal condition is met.

So the disposal condition will apply to the chargeable person's occupation or use of the property even if that property was never actually owned by them. If they give away other property (it does not have to be land, but see the contribution condition IHTM44005) if the gift is of cash) to another person who then sells such property and uses the proceeds to buy the relevant land, the disposal condition is satisfied, unless it qualifies as an excluded transaction.

A disposition that creates a new interest in land out of an existing interest is taken to be a disposal of part of the existing interest, FA04/Sch15/Para 3(4).

The disposal condition will be met whether the sale or gift is of the whole or part of land and whether or not the sale is at less than the full market value. See IHTM44031 where the disposal is of the whole of the land for full consideration.

FA04/Sch15/Para 3(2)(a)(ii) applies where the proceeds of sale are used to acquire land that is subsequently occupied by the chargeable person. So, in the example above, if P exchanged The Paddocks for Whiteacre, on the face of it the disposal condition is not met; but see IHTM44005

## 80.5 Contribution conditions

Para 3(3) sch 15 FA 2004 provides:

The contribution condition is that at any time after 17 March 1986 the chargeable person has directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—

- (a) an interest in the relevant land, or
- (b) an interest in any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land.

This is best regarded as two conditions, depending on whether (a) or (b) applies. I call them “**contribution conditions (a) and (b)**”. Only one of them need be satisfied for the “contribution condition” to be met.

#### 80.5.1 *Contribution condition (a)*

The essence of contribution condition (a) is that:

T has directly or indirectly provided...any of the consideration given by another person for the acquisition of ... the land occupied by T ...

This envisages that:

- (1) “another person” (which may be a company or trust) acquires for consideration land occupied by T; and
- (2) T has provided that consideration directly or indirectly.

#### 80.5.2 *Contribution condition (b)*

The essence of contribution condition (b) is that:

T has directly or indirectly provided ... any of the consideration given by another person for the acquisition of ... any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of ... the land occupied by T.

This applies where:

- (1) “another person” (“A”) acquires “other property” for consideration.
- (2) T has provided that consideration directly or indirectly.
- (3) A disposes of the other property.
- (4) The proceeds are (directly or indirectly) applied by “another person” (presumably either A or another person, “B”) towards the acquisition of the land occupied by T.

The drafter may be considering a situation where:

- (a) T transfers funds to A, who purchases a property; and
- (b) A sells that property and uses the proceeds to buy another property occupied by T.

**or**

- (a) T transfers funds to A (eg a trust);
- (b) A transfers the funds to B (eg a company held by A);
- (c) B uses the funds to purchase a property occupied by T.

In both those cases I would have said that T had indirectly provided consideration given for the land and contribution condition (a) was already satisfied. I cannot think of a situation which falls within condition (b) and which does not fall within condition (a). But it does not much matter.

### 80.5.3 *Provision of funds for acquisition*

What is the position if T provides funds, but not for the purpose of the acquisition of the land? Suppose:

- (1) In 1987 T created a trust. At the time T had no plans to move to the UK.
- (2) In 2005 the trustees make an interest-free loan to a company which purchases a property which T occupies.

The foreign domiciled individual has directly provided the property for the purposes of the trust. They are probably to be regarded as having indirectly provided the consideration given for the acquisition of the land under the principle that a trust appointment merely fills in blanks left by the settlor.<sup>12</sup> So contribution condition (a) is satisfied.

But if T gives funds to A, an individual, and A later uses those funds to buy a property, it is suggested that T has not provided the consideration, unless the two steps form a single arrangement.

The IHT Manual provides:

**IHTM44005 the contribution condition - land** [Aug 2016]

...

**Example** (Trevor and Paul)

T gives P the funds to buy Blackacre.

---

12 See App/4.7.5 (Trust appointment: Filling blanks).

P then sells Blackacre and buys The Paddocks with the proceeds.  
T then occupies The Paddocks.

The HMRC analysis is as follows:

The contribution condition is met.

You do not need to show that when the contribution was made, the individual intended to occupy the land purchased by another; if the chargeable person occupies land that they have, as a matter of fact, indirectly contributed to the purchase of, the contribution condition is met.

The contribution condition does not only apply to cash contributions. So in the example at IHTM44004, where P exchanges The Paddocks for Whiteacre, the gift of The Paddocks from T to P is a contribution to the acquisition of the property that T subsequently occupied and so the contribution condition is met.

#### 80.5.4 *Width of contribution conditions*

The contributions conditions apply whenever one person gives funds to another for the purchase of a home. For instance, if H gives funds to W so H and W can purchase a home jointly; but if H and W are spouses, the POA spouse exemption may apply;<sup>13</sup> if H and W jointly occupy the property, the GWR exemption may apply.<sup>14</sup>

#### 80.5.5 *Purpose of contribution conditions*

It is hard to see the purpose of the contribution conditions. *Ingram, Eversden* and home loan schemes would be caught by the disposal conditions. Perhaps it was meant to catch schemes set up on the occasion of purchase of a new property where the settlor would provide cash to a trust. But this was never done in the past; it would have been better to frame more targeted anti-avoidance provisions than this blunderbuss approach.

### 80.6 “Provide”

“Providing” is the fundamental concept in the contribution conditions and it is not an easy one. Some guidance can be found in cases on the

---

13 See 80.10.3 (Inter-spouse transfer).

14 See 80.19 (GWR exemptions).

meaning of “settlor” where the statutory language is similar.<sup>15</sup>

It is considered that “provide” implies an element of bounty. So if T lends money on arm’s length terms to A, who uses the money lent to buy the property, T has not “provided” the consideration and the contribution condition is not satisfied.

What if T lends interest-free to A, who uses the money lent to buy the property? At first sight T has provided the consideration. But it might be argued that A provides the consideration (by A’s promise to repay T) and that T provides nothing.<sup>16</sup> In practice HMRC now<sup>17</sup> accept this. The IHT

15 Some guidance ought to be found from comparable wording in Stamp Duty and SDLT group relief: s.27 FA 1967; para 2(2) sch 7 FA 2003. Unfortunately the SD/SDLT position is even more obscure than the POA: SP 3/98; Tax Bulletin 70.

16 One might say that T has provided the interest foregone on the loan, but (1) interest foregone does not exist, and it is difficult to see how one could provide something which does not exist; see 94.26 (Loans); (2) the interest foregone is not the consideration given for the acquisition of the land.

17 This reverses the view taken in CIOT Statement:

“6.2 The meaning of the ‘provision’ of ‘consideration’ in the context of the contribution condition needs to be clarified. On the basis of the case law the word provided suggests some element of bounty.

On this basis our view is that if there is a transfer of Whiteacre by A (or another asset) to his son at full market value which is then sold by son and the sale proceeds used to purchase Blackacre for A to occupy this is a breach of the disposal but not the contribution condition because it lacks the necessary element of bounty.

Similarly the provision of a loan on commercial terms by A to his son to enable son to purchase a house which A then occupies in our view does not fall within the contribution condition.

### **Question 32**

Do HMRC agree with this analysis?

### **HMRC answer to question 32**

In our view, it is arguable that the contribution condition does not depend on a degree of bounty for its application. If, on the contrary, a degree of bounty was necessary, might not the operation of the contribution condition provisions in paras 3(3) and 6(3) of Schedule 15 be circumvented by the relatively simple expedient of A, in your example, providing the wherewithal for the purchase of a house by his son by way of a loan, ostensibly on commercial terms, which is then left outstanding indefinitely?

Having said that, we have considered further the sort of case where a loan is made **and operated** on commercial terms eg a commercial rate of interest is specified and paid and there are provisions for repayment of the loan over the sort of period one would expect to find in a truly commercial loan. Having regard to paras 4(2)(c) or

Manual provides:

**IHTM44005 the contribution condition - land** [Aug 2016]

... However, the contribution condition is not met where the chargeable person resides in property purchased by another with money loaned by the chargeable person. This is because the outstanding debt will form part of the lender's estate for Inheritance Tax purposes, and the lender cannot be said to have provided a contribution to the purchase of that property when that money has to be repaid to them, even if the loan was interest free. It follows that the 'lender', in such an arrangement, is not subject to a POA charge.

What if:

- (1) T lends interest-free to A,
- (2) A purchases the property, and
- (3) T later releases the loan (or makes a gift to A which A uses to repay the loan, which comes to the same thing)?

Alternatively, more simply, what if:

- (1) A purchases the property
- (2) T makes a gift to A, or reimburses A for the expense (without being obliged to do so).

If T has not provided the consideration at the time that A purchases the property, T cannot provide it later. However if the steps form part of a single arrangement, it can probably be said that A has provided the consideration indirectly, even if belatedly.

---

7(2)(c) of Schedule 15, the chargeable amount would depend on the value of DV in  $R \text{ (or } N) \times DV/V$ : that's to say on 'such part of the value of the land/chattel as can reasonably be attributed to the consideration provided by the chargeable person'. In the case where the loan is on truly commercial terms and conducted in a truly commercial way, we would accept that the attributable amount is nil or de minimis. In determining 'reasonable attribution' for the purposes of para 4(2)(c), it is the terms on which the loan is made and operated that are relevant, as indicated above. In that context, the period over which the loan is repaid as well as whether a commercial rate of interest is charged is relevant.

Thus, where an interest-free loan is repaid over a typical 'commercial' period, it would be reasonable to regard the interest foregone as attributable to the consideration provided by the chargeable person. In cases where the principal of the loan was left outstanding indefinitely, such principal could reasonably be regarded as attributable to the consideration provided."

What if T subscribes for shares on arm's length terms? Probably T has provided funds to the company

### 80.6.1 *Arrangement with 3<sup>rd</sup> parties*

The position becomes more complex where more than two persons are involved.

Suppose:

- (1) T provides funds to A, an individual
- (2) A gives them to B, an individual
- (3) B purchases the property.

It is suggested that T has not provided the consideration if the "clean break" test is satisfied.<sup>18</sup>

Suppose:

- (1) T provides funds to a trust
- (2) The trust lends them to a company owned by the trust
- (3) The company purchases the property.

It is suggested that T has provided the consideration because the "clean break" test is not satisfied.

What if T gives funds to A, and A borrows from a third party on the security of those funds, and uses the borrowed funds to buy the property? It is considered that T has not provided the consideration.

If T provides fund X to a company or trust, which borrows fund Y from a third party, and the company or trust uses both funds to acquire the property, then T has provided fund X but not fund Y.

Commonplace arrangements for a foreign domiciliary's residence will often satisfy the contribution condition, for instance where:

- (1) an individual gives to a trust which purchases the home (without a company); or
- (2) a foreign domiciliary gifts funds to a trust which lends interest-free to the company which acquires the home.

In most cases one exemption or another will apply but it is possible to fall between the gaps.

### 80.6.2 *Guarantees*

---

<sup>18</sup> See 94.7.1 (Is A an indirect settlor?).

Para 17 sch 15 FA 2004 provides:

Where a person (“A”) acts as guarantor in respect of a loan made to another person (“B”) by a third party in connection with B’s acquisition of any property, the mere giving of the guarantee is not to be regarded as the provision by A of consideration for B’s acquisition of the property.

It is suggested that this applies even if A provides security for A’s guarantee or deposits funds with a bank as a back-to-back loan.

What if:

- (1) B borrows to purchase property (perhaps with a guarantee by T); and
- (2) T later gives funds to B who repays?

If the steps are independent, it is considered that T has not provided the consideration. If, however, the steps form part of a single arrangement, it is suggested that T can be said to have provided the consideration indirectly.

### 80.6.3 *Secondhand company*

The contribution condition will not be satisfied where:

- (1) A has provided funds to a company to purchase a house.
- (2) A sells the company to B who occupies the house.

B has not provided the funds for the purchase (unless the two steps form a single arrangement).<sup>19</sup>

## 80.7 POA chattel charge

Para 6 sch 15 FA 2004 provides:

- (1) This paragraph applies where—
  - (a) an individual (“the chargeable person”) is in possession of, or has the use of, a chattel, whether alone or together with other persons, and
  - (b) the disposal condition or the contribution condition is met as respects the chattel.
- (2) The disposal condition is that—
  - (a) at any time after 17 March 1986 the chargeable person had

---

<sup>19</sup> See 45.10.1 (Individual purchases secondhand co).

- (whether alone or jointly with others) owned—
- (i) the chattel, or
  - (ii) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel, and
- (b) the chargeable person disposed<sup>20</sup> of all or part of his interest in the chattel or other property otherwise than by an excluded transaction.
- (3) The contribution condition is that at any time after 17 March 1986 the chargeable person had directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—
- (a) the chattel, or
  - (b) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel.

This follows the form of the POA land charge.

The IHT Manual provides:

**IHTM44007 the disposal condition- chattels** [Aug 2016]

...

**Example** (Trevor and Paul)

T gives a painting to P. P then sells the painting and buys a violin with the proceeds, which T then plays. The disposal condition is met.

So the disposal condition will apply to the chargeable person's enjoyment or use of a chattel even if it was never actually owned by them. If they give away another asset (it does not have to be another chattel, but see the contribution condition (IHTM44008) if the gift is of cash) to another person who sells the asset and uses the proceeds to purchase the chattel concerned, the disposal condition is satisfied, unless it qualifies as an excluded transaction.

A disposition that creates a new interest in a chattel out of an existing interest is taken to be a disposal of part of the existing interest, FA04/Sch15/Para 6(4).

The disposal condition will be met whether the sale or gift is of the whole or part of the chattel and whether or not the sale is at less than the market price. See IHTM44031 where the disposal is of the whole of the chattel for full consideration.

---

<sup>20</sup> "Disposal" is further defined in para 6(4) sch 15 FA 2004.

FA04/Sch15/Para 6(2)(a)(ii) applies where the proceeds of sale are used to acquire a chattel that is subsequently used or enjoyed by the chargeable person. So, in the example above, if P exchanged the painting for the violin, on the face of it, the disposal condition is not met; but see IHTM44008.

**IHTM44008 the contribution condition - chattels** [/Aug 2016]

...

The contribution condition applies not only where the contribution provided by the chargeable person is directly used to purchase the chattel but also where the contribution is indirect. If the chargeable person provided all or part of the consideration for the purchase of an asset by another person, who then sold that asset and used the proceeds to purchase the chattel used or enjoyed by the chargeable person, the contribution condition is satisfied.

**Example** (Trevor and Paul)

T gives P the funds to buy a painting. P then sells the painting and buys a violin with the sale proceeds which T then plays. The contribution condition is met.

You do not need to show that when the contribution was made, the individual intended to use or enjoy the chattel purchased by another; if the chargeable person uses or enjoys a chattel that they have, as a matter of fact, indirectly contributed to the purchase of, the contribution condition is met.

The contribution condition does not only apply to cash contributions. So in the example at IHTM44007, where P exchanges a painting for a violin, the gift of the painting from T to P is a contribution to the acquisition of the chattel that T subsequently used or enjoyed and so the contribution condition is met.

However, the contribution condition is not met where the chargeable person uses or enjoys a chattel purchased by another with money loaned by the chargeable person. This is because the outstanding debt will form part of the lender's estate for Inheritance Tax purposes, and the lender cannot be said to have provided a contribution to the purchase of the chattel when that money has to be repaid to them, even if the loan was interest free. It follows that the 'lender', in such an arrangement, is not subject to a POA charge.

## 80.8 POA intangible property charge

Para 8 sch 15 FA 2004 provides:

(1) This paragraph applies where—

- (a) the terms of a settlement, as they affect any property comprised in the settlement, are such that any income arising from the property would be treated by virtue of section 624 of ITTOIA (income arising under settlement where settlor retains an interest) as income of a person (“the chargeable person”) who is for the purposes of Chapter 5 of Part 5 of that Act the settlor,
  - (b) any such income would be so treated even if section 625(1) of ITTOIA (settlor’s retained interest) did not include any reference to the spouse or civil partner of the settlor, and
  - (c) that property includes any property as respects which the condition in sub-para (2) is met (“the relevant property”).
- (2) The condition mentioned in sub-para (1)(c) is that the property is intangible property which is or represents property which the chargeable person settled, or added to the settlement, after 17 March 1986.

In common form settlor-interested discretionary trusts the GWR exemption will apply.

If S lends on favourable terms to a trust from which S is excluded, s.624 applies<sup>21</sup> but para 8 does not apply.<sup>22</sup>

In common form trusts where the settlor has an IIP, the GWR exemption (or for an estate IIP, the estate exemption) will apply.

Accordingly, the POA intangible property charge will not usually affect foreign domiciliaries.

The charge does not apply to intangible property held by a company held by a trust, since that is not property comprised in a settlement, and not caught by s.624, but the shares in the company will be intangible property.

The charge is intended to catch *Eversden* schemes (which will not normally have been carried out by foreign domiciliaries). But it is much wider than that. It applies (in short) to (almost) any settlor-interested trust unless GWR also applies. If A creates a trust to A for life remainder to B absolutely, or to B for life remainder to A absolutely, the charge applies. However, if there is a power of appointment in favour of A, the charge does not apply as in this case there is a GWR. There is no sense in this and in practice HMRC do not take the point. Since s.102ZA FA 1986 stops the *Eversden* schemes, the intangible property charge is an anti-

---

21 See 44.6.2 (“Settlor-interested” for s.624).

22 Because s.624 only applies because of the loan, and not because of the terms of the settlement (in the IHT sense).

avoidance provision that has lost its purpose<sup>23</sup> and only remains as clutter in the tax system which will occasionally trap the unwary (if anyone notices or cares). It should be repealed (except for pre-2003 disposals).

The IHT Manual provides:

**IHTM44009 intangible property** [Aug 2016]

...

Note that under FA04/Sch15/Para 8(1)(a), income arising from the assets concerned (and not the settlement generally) must be treated as income of the chargeable person. So, if the settled property is partitioned so that the settlor cannot benefit from one part of the fund, the POA charge will only apply to the part of the fund that the settlor can benefit from. If the part the settlor can benefit from contains land - but the settlor does not occupy it - the POA charge on land (IHTM44004) cannot apply, and will not apply to the part the settlor cannot benefit from, even if that part contains intangibles.

You should also note the fact that the settled property may not actually produce any income does not matter, as long as any income that might arise would be treated as income of the settlor, a charge under FA04/Sch15/Para 8 will arise.

...

Note that the intangibles charge does not apply to intangible property which is owned by a company which is in turn owned by a trust since the property owned by the company is not settled property. On the other hand, the shares of the company itself will be settled property and potentially caught by the POA charge subject to any exclusions (IHTM44030).

**Example** (Andrew and Joan)

A sets up a trust for his wife J on their marriage in 2005 and as he is excluded from all benefit there is no possibility of a charge under FA04/Sch15/Para 8 arising.

If, however, he sets up a trust where J receives the income but he can benefit under, say, an overriding power of appointment or perhaps a remainder interest (although see IHTM44112 in this regard), then a charge under FA04/Sch15/Para 8 arises subject to any relevant exemptions (IHTM44040), even though the property forms part of J's estate (being a pre-March 2006 interest in possession).

---

23 Except for *Eversden* schemes carried out before 2003.

### 80.8.1 “Settlement”

“Settlement” here has the IHT meaning, not the settlement-arrangement meaning: para 1 sch 15 FA 2004. See 1.2 (Definitions of “settlement”).

The IHT Manual provides:

**IHTM44009 property in charge: intangible property** [Aug 2016]

...

In this context ‘settlement’ has the same meaning as it does for Inheritance Tax purposes. The definition of ‘settlement’ is in IHTA84/S43(2) (IHTM16042). Unlike the requirement for Income Tax, the fact that there is no element of bounty does not prevent a trust being a ‘settlement’ for Inheritance Tax - although the legislation does still require the chargeable person to have ‘settled’ or ‘added’ property to the settlement. So an arms length sale at full market value to the trust would not be a settlement or addition by the vendor.

...

**IHTM44112 insurance based products: discounted gift trust** [Jun 2016]

A discounted gift trust or plan is where the settlor makes a gift into settlement with certain ‘rights’ being retained by them. The retained rights may, for example, be a series of single premium policies maturing (usually) on successive anniversaries of the initial investment or on survival, reverting to the settlor, if they are alive on the maturity date; or the settlor carves out the right to receive future capital payments if they are alive at each prospective payment date. The gift with reservation provisions do not apply.

In the straightforward case where the settlor has retained a right to an annual income or to a reversion under arrangements, that right is not property within FA04/Sch15/Para8 as the trustees hold it on bare trust for the settlor. A bare trust is not a settlement for inheritance tax purposes (IHTM16030). The settlor is excluded from other benefits under the policy and so the POA charge does not apply.

There may be more complex cases where the settlor’s retained rights or interests are themselves held on trust. But that would normally be construed as being a separate trust of those benefits in which the settlor had an interest in possession. No POA charge will arise where the interest in possession arose before 22 March 2006 by virtue of FA04/Sch15/Para11(1) (IHTM44041).

Where, however, the POA charge does arise, it will be by reference to the value of the rights held on trust for the settlor, not by reference to the

value of the underlying life policy. An open market value of those rights will need to be obtained in order to calculate the charge (IHTM44025).

### 80.8.2 *POA/protected trusts interaction*

Para 8(4) sch 15 FA 2004 provides:

For the purpose of deciding whether the condition in subparagraph (1)(a) is met, ignore section 628A of ITTOIA 2005 (which provides for section 624 of that Act not to apply to certain foreign income arising under a settlement).

In short, the 2017 protected trust regime<sup>24</sup> does not affect the operation of POAT.

## 80.9 Excluded transactions

A disposal of property by an excluded transaction is ignored for the disposal conditions; and the provision of property by an excluded transaction is ignored for the contribution conditions. Para 10(1) sch 15 FA 2004 defines “excluded transaction” for the disposal conditions and para 10(2) sch 15 FA 2004 defines it for the contribution conditions. Each sub-paragraph contains five categories of excluded transaction, making 10 in all. Simplicity was evidently not an important consideration to the drafter of the POA rules.

Excluded transactions are not a defence to the POA intangible property charge.

## 80.10 Excluded transactions: Disposals

The concept of excluded transaction matters because the disposal conditions do not apply if the disposal is “by an excluded transaction”.<sup>25</sup>

### 80.10.1 *Arm’s length disposal of whole*

Para 10(1) sch 15 FA 2004 provides:

For the purposes of ... [the disposal condition], the disposal of any property is an “excluded transaction” in relation to any person (“the chargeable person”) if—

---

24 See 88.10 (Protected trust: s.624 relief).

25 See 80.4 (Disposal conditions).

- (a) it was a disposal of his whole interest in the property, except for any right expressly reserved by him over the property, either—
  - (i) by a transaction made at arm's length with a person not connected with him, or
  - (ii) by a transaction such as might be expected to be made at arm's length between persons not connected with each other.

There are two requirements here:

- (1) A disposal of the whole interest (except for any rights expressly reserved).
- (2) The disposal<sup>26</sup> falls within para (i) or (ii), ie it is (in short) on arm's length terms.

There is no equivalent of this category of excluded transaction for the purposes of the contribution conditions. The reason is that a disposal at arm's length is not likely to amount to "providing" consideration.

The IHT Manual provides two examples. The first concerns a sale:

**IHTM44031 excluded transactions: the disposal condition - sale of entire interest** [Aug 2016]

**Example** (George and Robert)

G sells his house to his son R for full consideration, but continues to live in the property.

The HMRC analysis is as follows:

As he has not made a gift, there is no reservation of benefit (IHTM14301)

That is correct.

and provided the sale falls within FA04/Sch15/Para 10(1)(a)(ii), [ie provided it is on arm's length terms] there will be no POA charge either.

That is correct.

The position would be different if G had given R money in the past (IHTM44005).

This is not correct. HMRC should say, the position would be different if G had provided the consideration for the purchase, directly or indirectly,

---

<sup>26</sup> Not the reservation of rights.

but perhaps that is what is meant.

The second example concerns an *Ingram* scheme:

**IHTM44031 excluded transactions: the disposal condition - sale of entire interest** [Aug 2016]

**Example** (Robert and James)

R executes an 'Ingram' (IHTM44100) scheme and sells the freehold reversion to J.

That is:

- (1) R grants a lease to a nominee
- (2) R sells the property to J subject to the lease

The HMRC analysis is as follows:

This would be an excluded transaction, provided that the sale was at arm's length or such as might be expected to be made at arm's length between persons not connected with each other. The reversion is a distinct item of property and R has sold his entire interest in it; he continues to occupy the property by virtue of his leasehold interest which is a separate item of property.

HMRC go on to comment on what may constitute arm's length terms in this case:

There will be a 'marriage' value for the two interests and a truly arm's length transaction must reflect this. In practice, this is likely to be difficult for the taxpayer to show since an independent purchaser would not normally want to pay for marriage value unless he was certain of getting the leasehold interest.

That is not right. If an independent purchaser would not want to pay anything, or anything much, for marriage value, then arm's length terms would simply reflect that. But what constitutes arm's length terms is a question of fact.

### 80.10.2 *Arm's length part-disposal*

Reg. 5(1) POA Regulations 2005 provide a further relief for part-disposals:

Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if—

- (a) the disposal was by a transaction made at arm's length with a

- person not connected with him;
- (b) the disposal was by a transaction such as might be expected to be made at arm's length between persons not connected with each other, and
  - (i) the disposal was for a consideration not in money or in the form of readily convertible assets<sup>27</sup>, or
  - (ii) the disposal was made before 7 March 2005.

This is wider than Para 10(1) sch 15 FA 2004 in that it provides relief from the POA land and chattel charges, not just relief where the disposal conditions apply. But it is narrower in that its requirements are more restrictive.

In particular, one might think the word “not” is included accidentally in reg.5(1)(b)(i) but it was deliberate. A written ministerial statement of Hansard 7 March 2005 provides:

We do not in general think it is appropriate to provide exemption for sales of a part interest which are made otherwise than at arm's length. If one member of a family needs to raise cash, and another member of the family is willing and able to provide it, there are other and more straightforward ways of structuring this than adopting the form of an equity release transaction.

Very few readers will find that satisfactory. But there it is. The statement continues:

The point was however made in consultation that some intra-family part disposals can arise from patterns of behaviour adopted for good family or business reasons, for example where a child moves in to care for an aged parent and acquires an equitable interest in their shared home as a corollary of that, or where younger members of a family take over the active role in a family partnership, and in doing so acquire an interest from the partners who preceded them.

What is notable is that the drafter seems to have assumed that these are “transactions such as might be expected to be made at arm's length between persons not connected with each other”.

The IHT Manual provides:

---

27 Defined in reg.5(2).

**IHTM44059. Sale of part share** [Jun 2016]

Regulation 5(1)(b)(i)... may also apply where someone acquires their interest in a property by way of an equitable arrangement, rather than for cash, for example where the person has given up work to care for the owner of the property on the understanding that they will acquire a share of the property in return.

The guidance formerly published on the HMRC website was more helpful:

If Miss B acquired her interest in the property by way of an equitable arrangement rather than for cash – for example, she had given up work to care for Mr A on the understanding that she would receive a share of the property in return – the income tax charge will not apply: Regulation 5

In considering whether the conditions were satisfied, we would need information about how the essential elements of the transaction had been arrived at. We do recognise that there is a substantial body of case law dealing with the circumstances in which an interest in a house is acquired in consequence of a person acting to his detriment. The Ministerial Statement had these sorts of situations in mind and we would interpret Regulation 5 accordingly. In particular, we accept that the requirement that “the disposal was by a transaction such as might be expected to be made at arm’s length between persons not connected with each other” would be interpreted with such cases in mind. Where the parties had sought separate advice and acted upon it or had obtained a court order confirming the property entitlement, that would reinforce the claim that the conditions were satisfied. But we would not expect parties to such an arrangement to have done this. We recognise that detriment that the acquirer can demonstrate he has suffered can provide consideration for the acquisition of the interest and prevent the transaction from being gratuitous.

It is straining credulity to describe this as a transaction that may have been expected to have been made at arm’s length. But the legislation was not intended to catch this, and HMRC avoid the problem by informal concession dressed up as a statement of practice.

### 80.10.3 *Inter-spouse transfer*

The second category of excluded transaction is in para 10(1)(b) sch 15 FA 2004:

Para 3 (land) and para 6 (chattels) do not apply to a person in relation to

a disposal of part of an interest in any property if ...

- (b) the property was transferred to his spouse or civil partner (or where the transfer has been ordered by a court, to his former spouse or civil partner),

This applies whether or not the IHT spouse exemption applies on the transfer. The transfer to the spouse need not be by way of gift.

#### 80.10.4 *Trust where spouse has IIP*

The third category of excluded transaction is in para 10(1)(c) sch 15 FA 2004:

Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...

- (c) it was a disposal by way of gift (or, where the transfer is for the benefit of his former spouse or civil partner, in accordance with a court order), by virtue of which the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.<sup>28</sup>

This applies whether or not the IHT spouse exemption applies on the transfer. The disposal to a trust under which a spouse has an interest in possession must be by way of gift if the disposal is to be an excluded transaction. Perhaps the reason is to stop some variants of the home loan scheme, which involves a sale of a house to an interest in possession trust for consideration.

This seems to apply even after 2006, when the interest in possession may not be an estate interest.

The IHT Manual provides:

---

28 This is restricted by para 10(3) sch 15 FA 2004:

“A disposal is not an excluded transaction by virtue of sub-para (1)(c) or (2)(b), if the interest in possession of the spouse or civil partner or former spouse or civil partner has come to an end otherwise than on the death of the spouse or civil partner or former spouse or civil partner.”

The former HMRC Website Guidance provided at 1.3.1:

“In cases where the spouse or civil partner or former spouse or civil partner has become absolutely entitled to the property, we would accept that the benefit of the exclusion is not lost.”

**IHTM44032 excluded transactions: the disposal condition - transfer to spouse or civil partner [Aug 2016]**

...

The spouse or civil partner must take an interest in possession from the outset, but note that this does not have to be a qualifying interest in possession under IHTA84/S49(1A). The transaction will remain an excluded transaction provided the interest in possession remains in place until the death of the spouse or civil partner. If the interest in possession ends during their lifetime, the transaction ceases to be an excluded transaction, FA04/Sch15/Para 10(3), so the POA charge will arise in the normal way from that point onwards. However, if the spouse or civil partner (or former spouse or civil partner) has become absolutely entitled to the property, you can accept that the benefit of the exclusion is not lost.

**Example** (Paul and Susan)

In 2005, P settles his house on qualifying interest in possession trusts for himself for life, then to his wife S with remainders to their children. Both occupy the property. In 2009, the trustees terminate P's life interest; so that S now has a non-qualifying interest in possession, but P continues to occupy the property.

Initially there would have been no POA charge as the transaction would have been exempt from the charge (IHTM44041). On the termination of the P's life interest, S's interest in possession is **not** an excluded transaction because there is no disposal by way of gift by virtue of which the property becomes settled property in which S has a life interest. So the exclusion under FA04/Sch15/Para 10(1)(c) does not apply and as the exemption no longer applies either, a POA charge arises.

However, as P continues to occupy the property and the termination of his qualifying life interest is deemed to be a gift by the life tenant, FA86/S102ZA IHTM14391), the exclusion under FA04/Sch15/Para 11(3) applies and no POA charge arises.

### 80.10.5 *Family maintenance*

The fourth category of excluded transaction is in para 10(1)(d) sch 15 FA 2004:

Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...

- (d) the disposal was a disposition falling within section 11 of IHTA (dispositions for maintenance of family).

### 80.10.6 *Annual exemption/small gifts*

The fifth category of excluded transaction is in para 10(1)(e) sch 15 FA 2004:

Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if ...

- (e) the disposal is an outright gift<sup>29</sup> to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

This will include substantial gifts which qualify for 100% BPR or APR.

### 80.11 Excluded transaction: Contributions

The concept of excluded transaction matters because the contribution conditions do not apply if the consideration for the acquisition is provided “by an excluded transaction”.<sup>30</sup>

#### 80.11.1 *Four exclusions*

Para 10(2) sch 15 FA 2004 provides:

For the purposes of ... (the contribution condition) the provision by a person (“the chargeable person”) of consideration for another’s acquisition of any property is an “excluded transaction” in relation to the chargeable person if—

- (a) the other person was his spouse or civil partner (or, where the transfer has been ordered by the court, his former spouse or civil partner),
- (b) on its acquisition the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.

These are the equivalent of the exclusions discussed above, see 80.10.3 (Inter-spouse transfer). The spouse trust exclusion here is wider than the spouse trust exclusion for the disposal condition, as the words “by way of gift” do not appear.

---

<sup>29</sup> See 80.12 (“Outright gift”).

<sup>30</sup> See 80.5 (Contribution conditions).

The last two exclusions in para 10(2) sch 15 FA 2004 are:

- (d) the provision of the consideration is a disposition falling within section 11 of IHTA (dispositions for maintenance of family), or
- (e) the provision of the consideration is an outright gift to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

These are the equivalent of 80.10.5 (Family maintenance) and 80.10.6 (Annual exemption/small gifts).

The IHT Manual provides:

**IHTM44035 excluded transactions: the contribution condition - transfer to spouse or civil partner** [Aug 2016]

...

The spouse or civil partner must take an interest in possession from the outset, but note that this does not have to be a qualifying interest in possession under IHTA84/S49(1A). The transaction will remain an excluded transaction provided the interest in possession remains in place until the death of the spouse or civil partner. If the interest in possession ends during their lifetime, the transaction ceases to be an excluded transaction, FA04/Sch15/Para 10(3), so the POA charge will arise in the normal way from that point onwards. However, if the spouse or civil partner (or former spouse or civil partner) has become absolutely entitled to the property, you can accept that the benefit of the exclusion is not lost.

**Example** (Jane and Edward)

J has an interest in possession in a trust with remainders to her children. In 2003 her husband E adds £300,000 to the trust. The transfer is exempt from IHT, although it will initially be subject to the POA intangibles charge if E is a beneficiary (IHTM44009). The trustees purchase a house that J and E occupy. Since, on its acquisition, the property becomes settled property and would otherwise meet the conditions of FA04/Sch15/Para 3(3), the POA charge is excluded by FA04/Sch15/Para 10(2)(b).

If J's interest is terminated during her lifetime, then FA04/Sch15/Para 10(3) prevents the exclusion under FA04/Sch15/Para 10(2)(b) from applying, so the POA charge will arise in the normal way, unless J becomes absolutely entitled to the property, when you can accept that the benefit of the exclusion is not lost. In the event that J's interest comes to an end with her death and E continues to occupy the property,

the exclusion will continue to apply.

The timing of such transactions can give rise to very complicated outcomes due to the interaction of FA86/S.102(5A)-(5C) (IHTM14318); FA86/S102ZA (IHTM14391) and changes to the treatment of interest in possession trusts from 18 March 2006 (IHTM16061). Any cases where this mix of circumstances arises should be referred to Technical for advice.

### 80.11.2 *Outright gift of money*

The remaining exclusion is in para 10(2)(c) sch 15 FA 2004 where:

- (c) the provision of the consideration constituted an outright gift<sup>31</sup> of money (in sterling or any other currency) by the chargeable person to the other person and was made at least seven years before the earliest date on which the chargeable person met the condition in para 3(1)(a)<sup>32</sup> or, as the case may be, 6(1)(a).<sup>33</sup>

Para (c) applies only to the contribution conditions.

The exemption only applies to gifts of money. I am unable to see the reason for that.

The IHT Manual provides:

**IHTM44049 cash gifts and exclusion of reservation of benefit provisions** [Aug 2016]

**Example** (Andrew)

A gives his daughter £150,000 in 2006.

In 2008, they decide to buy a property together worth £300,000.

For the HMRC analysis, see 80.19.3 (Tracing rules). HMRC add:

If the daughter had purchased the property in her own name and A had given his daughter the money before 6 April 1998, or if he had not moved into the property within 7 years of the gift being made, the exclusion for outright gifts of money (IHTM44036) will apply.

## 80.12 “Outright gift”

The expression “outright gift” is used in three of the ten categories of

---

31 See 80.12 (“Outright gift”).

32 ie, T occupies the relevant land.

33 ie, T has possession of the chattels.

excluded transaction:

- (1) Outright gifts to individuals within s.19 (annual exemption) or s.20 (small gifts) are excluded transactions for the disposal and contribution conditions.<sup>34</sup>
- (2) Outright gifts of money (whether or not to an individual) are excluded for the disposal condition.<sup>35</sup>

“Outright gift” is not defined.<sup>36</sup> Clearly a loan and a subscription for shares is not an outright gift. It is suggested that a gift to a trust from which the settlor is excluded is in principle an outright gift.

It is tentatively suggested that a gift to an irrevocable discretionary trust of which the donor is merely a discretionary beneficiary is an outright gift. It must be envisaged that the donor occupies the land given or the exclusion will not apply.

### 80.13 POA exemptions

Para 11 sch 15 FA 2004 provides a set of exemptions from the POA charges which (in my terminology) are as follows:

- (1) Estate exemptions
- (2) GWR exemptions
- (3) Para 11(5)(b) sch 15 FA 2004 exemptions (charities and other specialist areas) not discussed here
- (4) Para 11(5)(c) sch 15 FA 2004 exemption (jointly occupied property) not discussed here
- (5) Full consideration exemption

### 80.14 “Relevant property”

A key concept in the POA exemptions is “relevant property” defined in para 11(9) sch 15 FA 2004. The expression has three possible meanings.

In relation to the POA land and chattel charges, “relevant property” means:

- (i) where the disposal condition ... is met, the property disposed of,

---

34 See 80.10.6 (Annual exemption/small gifts); 80.11.1 (Four exclusions).

35 See 80.11.2 (Outright gift of money).

36 The term “outright gift” is partially defined in s.626 ITTOIA; see 89.13 (Marriage of dom/non-dom or resident/non-resident: IT planning), but that definition does not apply here.

- (ii) where the contribution condition ... is met, the property representing the consideration directly or indirectly provided.

In a contribution condition case, the relevant property is the property representing the consideration directly or indirectly provided. Since “provided” is a difficult concept,<sup>37</sup> this is also difficult.

If T gives money to A, who uses it to buy a house, the house represents the consideration provided.

What if T subscribes for shares in A Ltd which purchases the house. Is it the shares or the house which represent the property provided? It is suggested that the relevant property is the house, but the shares may be derived property.<sup>38</sup>

What if T lends money to A interest-free, who purchases a house? Is it the house or the benefit of the loan which represents the consideration provided? In this case HMRC accept that T does not provide the consideration so the contribution condition is not satisfied; but if it mattered, it is suggested that the relevant property is the house and the loan may be derived property.

In relation to the POA intangible property charge, “relevant property” has the meaning given in para 8 sch 15 FA 2004 (in short, the settled property).<sup>39</sup>

## 80.15 Estate exemptions

### 80.15.1 *Full estate exemption*

Para 11(1) sch 15 FA 2004 provides that the POA charges:

do not apply to a person at a time when his estate for the purposes of IHTA includes—

- (a) the relevant property, or
- (b) other property—
  - (i) which derives its value from the relevant property, and
  - (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.

---

<sup>37</sup> See 80.6 (“Provide”).

<sup>38</sup> See 80.16.1 (Derived property: Shares).

<sup>39</sup> See 80.8 (POA intangible property charge).

I refer to this as the “**estate exemption**” (or “**full estate exemption**” if necessary to distinguish it from the partial exemption discussed below).

If T transfers funds to a trust under which T has an estate interest in possession, the estate exemption will apply. Transfers after 2006 will not normally give rise to an estate IIP, so the exemption is of less importance to post-2006 trusts.

The IHT Manual provides:

**IHTM44042 examples where relevant property remains part of the Inheritance Tax estate** [Aug 2016]

**Example** (Brian and Julie)

In 2005, B transfers his house to an interest in possession trust with a life interest for himself and then for his wife, J, with remainders to his children. B continues to occupy the house.

The disposal condition (IHTM44004) is met and none of the exclusions (IHTM44030) apply.

The property continues to form part of B’s estate under IHTA84/S5(1) and so is exempt from the POA charge under FA04/Sch15/Para11(1) whilst his interest in possession exists.

Note that exemption still applies even though on B’s death, the property is exempt from Inheritance Tax as the life interest passes to J. However, should the trustees bring B’s life interest to an end during his lifetime, the charge under FA04/Sch15/Para3(2) will apply unless B ceases to occupy the property, another exemption applies or he becomes absolutely entitled to the property.

If the trustees brought B’s life interest to an end after 22 March 2006, he will be treated as making a PET under IHTA84/S52(1); but - assuming he continues to occupy the property - he will also be treated as reserving a benefit (IHTM14391) in the property in which his life interest ceased by virtue of FA86/S102ZA(2). Because B is treated as reserving a benefit in the property, he continues to be exempt from the POA charge, but under a different exemption (IHTM44044).

**Example**

If, in the example above, B had made the transfer in 2009, the position would have been quite different, as outlined below.

The transfer into the trust is an immediately chargeable transfer (IHTM04067) and tax would be payable at 20% if the value transferred exceeded the nil-rate band. The trust will also be subject to the normal relevant property trust charges (IHTM42070). B’s interest in possession is not part of his estate, so the exemption under FA04/Sch15/Para11(1)

(IHTM44041) does not apply. The POA charge will therefore apply, unless B reserves a benefit in the property when a different exemption will apply.

B has made a gift of land to the trust, so the provisions of FA86/S102A (IHTM14360) must be considered. If B has retained a significant right or interest that entitles him to occupy the land, he will be treated as reserving a benefit in the property, FA86/S102A(2). Although the property does not form part of B's estate for Inheritance Tax purposes, his interest under the trust does entitle him to occupy the property and so he will be exempt from the POA charge under FA04/Sch15/Para11(5) (IHTM44044).

### 80.15.2 *Partial estate exemption*

Para 11(2) sch 15 FA 2004 provides:

Where the estate for the purposes of IHTA of a person to whom para 3, 6 or 8 applies includes property—

- (a) which derives its value from the relevant property, and
- (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,

the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of the inclusion of the property in his estate.

I refer to this as the “**partial estate exemption**”.

The concluding words “such proportion as is reasonable to take into account of the inclusion of the property in his estate” are somewhat incoherent. One can speak of “a proportion of a property”, but not “a proportion of an inclusion”. Presumably it means: “such proportion as is reasonable to take into account of the property which is included in his estate”.

### 80.16 **Derived property**

In the following discussion:

- (1) “**Fully-derived property**” is property falling within para 11(1)(b) sch 15 FA 2004.<sup>40</sup> That is property:

---

<sup>40</sup> In para 11 sch 15 FA 2004 this is simply called “derived property”.

- (i) which derives its value from the relevant property, and
  - (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.
- (2) “**Partly-derived property**” is property falling within para 11(2) sch 15 FA 2004. That is property:
- (a) which derives its value from the relevant property, and
  - (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property.

Thus there are three steps to decide whether property is “derived property”:

- (1) Is its value derived from the relevant property (the house)? If so:
- (2) Ascertain how far its value is attributable to the house.
- (3) Is that value (the value attributable to the house) “substantially<sup>41</sup> less” than the value of the house?

#### 80.16.1 *Derived property: Shares*

Suppose T subscribes for shares in a company which buys a house and has no other assets. The shares are fully-derived property since:

- (1) the shares derive their value from the house (the relevant property); and
- (2) the value of the shares is attributable to the house; and
- (3) that value is not substantially less than the value of the house.

Suppose the company owns a house and other assets. The context shows that the shares are still to be regarded as fully-derived property since:

- (1) they derive their value from the house;
- (2) their value is to some extent attributable to the house;
- (3) their value to that extent is not substantially less than the value of the

---

41 “Substantially” is, obviously, not a precise word. The IHT Manual provides:

**“44043. Property in a person’s estate that derives its value from the relevant property [Aug 2016]**

... You should normally regard the value of the derivative property as being ‘substantially less’ than that of the relevant property where the difference in value is more than 20%. Any case where you consider the exemption should apply (or not apply) in full and there is a reduction of more (or less) than 20% should be referred to Technical.”

house.

One might question whether it is the case that the shares derive their value from the house. They derive their value in part from the house and in part from other assets. However, the context shows that that satisfies the condition of para 11(1)(b)(i) sch 15 FA 2004. Otherwise the condition in para 11(1)(b)(ii) sch 15 FA 2004 is never satisfied.

Suppose the company owns only the house and is subject to a substantial liability. The shares are not fully-derived property as their value is substantially less than the house. The shares are partly-derived property.

Suppose the company owns the house and other assets, and is subject to a debt. It is suggested that the shares are fully-derived property so long as the amount of the debt is less than the value of the other assets.

The estate exemption applies so long as T retains the shares in T's estate. If T gifts half the shares to T's spouse the estate exemption ceases to apply and POA land charge is due (but with some relief under the partial estate exemption). HMRC agree. The IHT Manual provides:

**44043 - Property in a person's estate that derives its value from the relevant property** [Aug 2016]

*Example (Bruce)*

B transfers his house to a company wholly owned by him. The value of the shares in the company which are included in B's estate is fully derived from the value of the house and so the exemption in FA04/Sch15/Para 11(1) applies.

But if B gave the house to a company which was owned 25% by his civil partner then the value of the 75% shares he holds would be 'substantially less' than the value of the house, so although the POA charge would apply, the appropriate rental value should be reduced by a reasonable proportion, perhaps 75%, to reflect the value of the shares in B's estate.

### 80.16.2 *Derived property: Loan*

Suppose T lends interest-free to a company which purchases the house and has no other assets.

Initially the loan is fully-derived property as the shares have no value. The loan derives its value from the house because, if the loan is called in, it could only be paid by the company:

- (1) selling the house and using the proceeds of sale, or
- (2) borrowing on the strength of the house (in the sense that no lender would lend if the company did not hold the house) and repaying out of that loan.

Can HMRC argue that:

- (1) the loan derives its value from the contractual undertaking that obliges the company to repay; and so
- (2) the loan does not derive its value from the underlying property (the house).

Point (1) is correct but point (2) does not follow and is not correct. It is the existence of the house which gives value to the contractual obligation to repay.

If the value of the house increases substantially, the shares and loan (taken together) are fully-derived property and taken separately they are partly-derived property.

Unfortunately HMRC may disagree. CIOT Statement provides:

6.3 Clarification is requested on the position where a house is owned by a company but the company is funded by way of loan. The concern is over paras 11(1)(b) and 11(3)(b).

**Example 9**

[1] B owns 100 £1 shares in X Limited and otherwise funds it by

shareholder loan.

[2] (Or the house is owned by a company held within an interest in possession trust for B and again the funding for the purchase comes by way of loan from trustees to company.)

X Limited buys the house in which B lives. B *prima facie* falls within the para 3 charge.

In fact HMRC accept that case [1] does not fall within the POA land charge because the interest-free loan is not providing consideration.<sup>42</sup>

CIOT Statement continues:

It would appear that para 11(1) protects him. The shares are not themselves property which derive much value from the house because they are worth substantially less than the house (see para 11(1)(b)(ii)) but the shares and the loan together are comprised in B's estate and between them indirectly derive their value from the house. On that basis para 11(1) does offer full protection.

**Question 33**

Do HMRC agree with this analysis or do they consider that the loan derives its value from the contractual undertakings that oblige the borrowing company to repay?

It would be odd if there is a POA problem when the company is funded by way of loan but not if it is funded by way of share capital.

*HMRC*

In our view, the loan, albeit an asset of B's estate, is not property that derives its value from the relevant property. However, our response to Q32 above<sup>43</sup> would no doubt be applicable here in appropriate circumstances.

This is plainly wrong and I would be surprised if HMRC try to defend it if challenged.<sup>44</sup> It is also inconsistent with GAAR guidance.<sup>45</sup> But in the context of the IHT residence-property code it may suit the taxpayer to argue that this view is correct.<sup>46</sup>

The position is more complicated if T lends to a company which

42 See 80.6 ("Provide").

43 See 80.6 ("Provide").

44 But one could avoid the issue by avoiding loans, eg subscribe for redeemable shares, which are commercially equivalent to loans.

45 See 76.43 (GAAR: Debt against UK residence).

46 See 78.3.4 (Company owns relevant loan).

purchases the house and has other assets. Suppose, for example, the company's assets and liabilities consist of a house worth £1m, investments of £1m, and a debt of £1m. It is still plainly the case that the benefit of the debt and the shares taken together are fully-derived property. It is suggested that if the debt is charged on the house it derives its value from the house, and if it is not charged then it does not do so (but the shares do derive their value from the house).

What if T lends to a trust which purchases a house? If the loan is on limited recourse terms<sup>47</sup> the loan is fully-derived property. It is suggested that the same applies even if the trustees are personally liable for the loan.

### 80.16.3 *Equitable interest*

If T transfers property to a trust for A for life, remainder to T, T has a reversionary interest which is derived property. The interest is part of T's estate so the full (or partial) estate exemptions apply (depending on whether the value of the reversionary interest is equal to 80% or more of the value of the trust fund).

If T transfers property to a trust for T for life, remainder to A, T's life interest is derived property but it does not form part of T's estate (after 2006) so the estate exemption does not apply.

## 80.17 Excluded liability rule

Para 11(6) sch 15 FA 2004 provides a restriction on the estate exemptions:

Where at any time the value of a person's estate for the purposes of IHTA is reduced by an excluded liability affecting any property...

I call this the "**excluded liability rule**". The effect of the rule if it applies is:

... that property is not to be treated for the purposes of sub-para (1) or (2) as comprised in his estate except to the extent that the value of the property exceeds the amount of the excluded liability.

The excluded liability rule disallows the estate and partial estate exemptions. It does not disallow the GWR exemption even if the debt reduces the GWR charge.<sup>48</sup>

---

<sup>47</sup> ie the trustees' liability to repay is restricted to the trust assets or their value.

<sup>48</sup> See 76.5 (GWR property subject to debt).

### 80.17.1 “Excluded liability”

The term “excluded liability” is defined in para 11(7) sch 15 FA 2004:

For the purposes of sub-para (6) a liability is an excluded liability if—

- (a) the creation of the liability, and
- (b) any transaction
  - [i] by virtue of which the person’s estate came to include
    - [A] the relevant property or
    - [B] property which derives its value from the relevant property or
  - [ii] by virtue of which the value of property in his estate came to be derived from the relevant property,

were associated operations, as defined by section 268 of IHTA.<sup>49</sup>

This is odd. The liability within (a) must relate to the acquisition of the property within (b). It appears at first sight that every liability is an excluded liability. It is suggested that a liability is an excluded liability only if the creation of the liability and the acquisition of the property form part of a single scheme or arrangement.<sup>50</sup>

### 80.17.2 “Affecting” property

The rule only applies to a liability which “affects” property. It is suggested that a liability of an individual or company does not affect property of the individual or company unless secured on that property. A liability of a company does not affect the shares of the company (even if it may reduce their value). A liability of a trust does affect the trust property since the trustees have a lien over the trust fund to meet the liability.

## 80.18 Estate “reduced” by liability

The excluded liability rule only applies if the value of a person’s estate is “reduced” by the liability. In what circumstances does a liability reduce the value of an estate? Plainly it does not do so if it is disallowed for IHT.<sup>51</sup>

### 80.18.1 *Trustees borrow from trust co*

---

49 See App 70.11 (“Associated operation”).

50 See *Reynaud v IRC* [1999] STC (SCD) 185.

51 See 76.8 (Disallowed debts: Introduction).

Suppose:

- (1) T is the life tenant of an estate IIP trust.
- (2) The trustees borrow from a company held by the trust and purchase land occupied by T.

It is considered that the debt does not reduce the life tenant's estate since the benefit of the debt increases the value of the company's shares: the two cancel each other out. So the debt is not an excluded liability. (In addition, if T is the settlor, the GWR exemption will usually apply.)

### 80.18.2 *Bank borrowing*

Suppose:

- (1) T is the life tenant of an estate IIP trust.
- (2) The trustees borrow from a bank or third party, and purchase land occupied by T.

It is considered that T's estate is not "reduced" by the liability, since T's estate is not reduced by the transaction: the liability is matched by the receipt of the borrowed money.<sup>52</sup>

Otherwise the excluded liability rule would apply whenever anyone borrows on the security of T's house, which would be absurd.

CIOT Statement provides:

2.5 A common scenario (both for foreign and UK domiciliaries) is where cash is settled into an interest in possession trust for the donor life tenant. The trustees then buy a house for the donor to live in using the gifted cash plus third party borrowings. Although not a home loan scheme, the legislation appears to affect such arrangements.

#### **Example 4**

E settles cash of £200,000 into an interest in possession trust for himself in 2003. The trustees purchase a property worth £500,000, borrowing £300,000 from a bank. There are other assets in the trust which can fund the interest but the borrowing is secured on the house which E then occupies.

In these circumstances, one would not expect a POA charge. There is no inheritance tax scheme since the property is part of E's estate and the

---

52 Admittedly s.162(5) IHTA applies and uses the word "reduced" in connection with the same liability. But the question is not whether the value of an *asset* is reduced, but whether the value of the *estate* is reduced.

borrowing is not internal. One would argue that E's estate still includes the house and therefore protection is available under para 11(1). The difficulty is that on one view the loan is an excluded liability within para 11(7) reducing E's estate, albeit it is a loan on commercial terms with a bank.

We would argue that the relevant property for the purposes of para 11 is simply the value of the property net of the commercial borrowing. As this is part of E's estate there is no POA charge.

**Question 13**

Is the above analysis correct?

**HMRC**

We agree with your analysis in para 2.5.

It is correct that one would not expect a POA charge, as there is no IHT saving. However, what is the correct analysis of the provisions in this situation? It is wrong to say that the *property* for the purposes of para 11 sch 15 FA 2004 is its *value* net of the liability, because that confuses two different things: property and the value of property. It is also wrong to say that the asset for the purposes of para 11 sch 15 FA 2004 is the asset net of the liability; if one said that, the legislation would not work at all. The solution is to say that the liability does not reduce the estate of the individual, E, because E's estate is increased by the proceeds of the loan (as well as being reduced by the liability; the two cancel each other out). So the loan is not an excluded liability.

### 80.18.3 *Co borrows from individual*

Suppose:

- (1) T lends to a company (owned by T).
- (2) The company purchases a property occupied by T.

The liability is an excluded liability as defined, but so long as T retains the benefit of the debt the excluded liability rule does not apply because the debt does not reduce T's estate. What if T gives away the debt? The excluded liability rule does not apply unless the debt is secured because the debt does not affect the property.

### 80.18.4 *Home loan schemes*

The excluded liability rule was intended to catch home loan schemes.

Suppose:

- (1) T sells T's home to a trust under which T has an interest in possession in return for a debt.

At this point the excluded liability rule does not apply. The liability is an excluded liability as defined.<sup>53</sup> However, the benefit of the debt is in T's estate. It is considered that the value of T's estate is not "reduced" by the liability.

- (2) T gives the benefit of the debt to T's children or to a trust for their benefit.

Is the value of T's estate is now reduced by the liability? One can argue that it is reduced by the gift of the debt, not by the liability. But a purposive construction suggests that this cannot be right.

The provision works as intended.

The IHT Manual provides:

**IHTM44051 relevant property remains part of the Inheritance Tax estate: excluded liabilities** [Aug 2016]

...

**Example** (Duncan)

D sets up a home loan scheme in 2004 where the property is sold to the trust for £500,000. In April 2005, the property is worth £650,000 and the amount of the loan, together with interest accrued at the same date is £550,000. Exemption under FA04/Sch15/Para11(5)(a) applies to the excess of £100,000 and the proportion of the annual rental value that is referable to £550,000 is subject to the POA charge. If the annual rental value was £20,000, the POA charge is  $20,000 \times (550,000 \div 650,000) = £16,923$

At the next revaluation date (IHTM44011), the loan should be quantified at that time, taking into account the interest/indexation that has accrued to that date and adding it to the amount of the loan. In the event that part of the loan has been repaid (this is unlikely with a home loan scheme), the reduced amount of the loan - plus accrued interest/indexation - may be taken into account when it occurs and the POA liability recalculated for the tax year in question and subsequently. It is possible that the property concerned may be sold, some of the proceeds reinvested in a smaller replacement property and the balance

---

53 The transaction by which the person's estate included the house was its purchase not the sale to the trust. The creation of the liability is an associated operation because it affects the same property even if the purchase was many years earlier.

retained in the trust as intangibles. This then raises the question of how the loan, which is a general debt of the trust, should be treated. For the sake of simplicity, you should apportion the amount of the loan, at the date the trust assets change, between the two categories of asset and then work out the POA charges in the normal way - although it may now be the case, with a smaller property and smaller annual rental that the amount of the POA charge is below the de minimis limit (IHTM44056).

## 80.19 GWR exemptions

### 80.19.1 Full GWR exemption

Para 11(3) sch 15 FA 2004 provides:

Paras 3, 6 and 8 do not apply to a person at a time when—

- (a) the relevant property, or
- (b) any other property—
  - (i) which derives its value from the relevant property, and
  - (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property,

falls within sub-para (5) in relation to him.

...

There are four circumstances, or sets of circumstances, where property falls within sub-para (5). The first, and most important, is GWR property. Para 11(5) sch 15 FA 2004 provides:

Property falls within this sub-paragraph in relation to a person at a time when it—

- (a) would fall to be treated by virtue of any provision of Part 5 of the 1986 Act (inheritance tax) as property which in relation to him is property subject to a reservation

In short, the POA charges do not apply to property subject to a reservation. (“**GWR property**”). I refer to this as the “**full GWR exemption**”.

Thus in this context it is in the taxpayer’s interest to argue that property *is* GWR property, and HMRC’s interest is to argue that it is not! The question of whether property is GWR property (subject to a reservation) is considered at 74.4 (GWR terminology).

Note that property may be GWR property even though it is excluded property. Suppose:

(1) T transfers funds to a discretionary trust under which T is a

beneficiary (a GWR).<sup>54</sup>

- (2) The trustees lend the funds to a company which purchases a house occupied by T.

The shares and the benefit of the loan are derived property, and are subject to a reservation. This is so even if they are excluded property. So the GWR exemption applies.

A complication arises if T becomes UK domiciled: see 80.25 (Former non-dom).

The other sub-para (5) cases arise where property would be GWR property but for one of nine sets of exemptions. Para 11(5) sch 15 FA 2004 provides:

Property falls within this sub-paragraph in relation to a person at a time when it ...

- (b) would fall to be so treated but for any of paras (d) to (i) of subsection (5) of section 102 of the 1986 Act (certain cases where disposal by way of gift is an exempt transfer for purposes of inheritance tax),
- (c) would fall to be so treated but for subsection (4) of section 102B of the 1986 Act (gifts with reservation: share of interest in land), or would have fallen to be so treated but for that subsection if the disposal by way of gift of an undivided share of an interest in land had been made on or after 9 March 1999, or
- (d) would fall to be so treated but for section 102C(3) of, and para 6 of Schedule 20 to, the 1986 Act (exclusion of benefit).

### 80.19.2 *Partial GWR exemption*

Para 11(4) sch 15 FA 2004 provides:

Where any property which falls within sub-para (5) in relation to a person includes property—

- (a) which derives its value from the relevant property, and
  - (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
- the appropriate rental value in para 4, the appropriate amount in para 7

---

<sup>54</sup> The position is the same for a non-estate IIP trust, if T is the object of a power of appointment (so there is a GWR).

or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of that fact.

I refer to this as the “**partial GWR exemption**”. It is the equivalent of the partial estate exemption discussed above (except that the words at the end of the subsection are grammatical).

### 80.19.3 *Tracing rules*

For this purpose para 11(8) sch 15 FA 2004 tinkers with the GWR tracing rules:

In determining whether any property falls within sub-para (5)(b), (c) or (d) in a case where the contribution condition in para 3(3) or 6(3) is met, para 2(2)(b) of Schedule 20 [FA 1986] (exclusion of gifts of money) is to be disregarded.

This extends the GWR tracing rules<sup>55</sup> and so extends the scope of the POA GWR exemption.

The IHT Manual provides:

**IHTM44049 cash gifts and exclusion of reservation of benefit provisions** [Aug 2016]

**Example** (Andrew)

A gives his daughter £150,000 in 2006.

In 2008, they decide to buy a property together worth £300,000.

The HMRC analysis is as follows:

The contribution condition (IHTM44005) will be met<sup>56</sup> and A has not made a gift with reservation as the gift was of cash.

A has not made a gift of an undivided share of land, so the exemption at IHTM44047 does not apply.

So on the face of it, A is subject to the POA charge.

However, the effect of FA04/Sch15/Para 11(8) is to allow the normal tracing rules that apply to substitutions for the reservation of benefit provisions to apply. Therefore the property the donee acquired with cash is treated as being comprised in the original gift. So, as the original gift is treated as a gift of an undivided share of land, the exemption from the POA charge for such gifts (IHTM44047) does apply.

---

55 See 74.21 (Substitution of gifted property).

56 It is assumed that the daughter used the £150k to purchase the property.

One consequence of this will be that if the donee ceases to occupy the property, the exemption from the POA charge will cease.

If the daughter had purchased the property in her own name and A had given his daughter the money before 6 April 1998, or if he had not moved into the property within 7 years of the gift being made, the exclusion for outright gifts of money (IHTM44036) will apply.

## 80.20 Reverter to settlor restriction

### 80.20.1 Purpose of rule

Para 11(11)(12) sch 15 FA 2004 set out a restriction to the estate and GWR exemptions which I call the “**reverter to settlor restriction**”. It is helpful first to explain the problem which the reverter to settlor restriction is intended to address.

EN FB 2006 explains:

17. [The POA] income tax charge was designed to discourage disposals done in a contrived way to avoid IHT. The income tax charge does not therefore apply

[a] when the original owner has the property back in their estate for IHT purposes (para 11(1) Schedule 15 – for example, because it has been given back to them), or

[b] when it is treated as back in their estate (para 11(5) – for example, because the original transaction is caught by the IHT “gift with reservation” rules).

This explanation of the estate exemption is correct.

The explanation of the GWR exemption is in essence correct, though strictly speaking, GWR property is not in the individual’s estate; it is however taxed as though it is. I stress this point as it will be relevant in the discussion below. The EN continues:

18. There is a mismatch between this relief and an existing IHT exemption for the settled property in “reverter-to-settlor” trusts. The property in such a trust is treated as part of the trust beneficiary’s [ie life tenant’s] estate for IHT purposes, but it is not actually charged when their interest ends.

19. In particular, section 54(1) IHTA provides that, when a person who is beneficially entitled to an interest in possession in settled property dies while the settlor is still living, and the property reverts to the settlor, its value is left out of account in determining the value of the person’s

estate. [The EN summarises ss.53 and 54 IHTA and continues:]

20. This can be used to side-step both IHT and the pre-owned asset income tax charge. For example:

- B owns an asset, say a house, which he wants to carry on using. B gives it to S, who would otherwise inherit on B's death;
- S then settles an interest in possession in the house back on B for life, with the condition that it reverts to S on B's death [ie S settles the property on B for life with remainder to S];<sup>57</sup>
- for IHT purposes, B is therefore treated as owning the house by virtue of section 49 IHTA and so para 11(1) Schedule 15 disapples the "pre-owned asset" charge;
- however, although the house is part of B's estate for IHT purposes, there is no IHT charge on B's death by virtue of the exemption in section 54(1) IHTA.

Avoidance of this kind was in fact quite common between 2004 and 2006, and clearly something had to be done.

21. This clause is aimed at blocking such avoidance by ensuring that the income tax exemption [POA estate and GWR exemptions] does not apply where the property in question (or any derived property) is back in the chargeable person's estate for IHT purposes by virtue of their being beneficially entitled to an interest in possession in it.

22. However, the clause also provides that, if the chargeable person does not wish to be subject to the income tax charge, they can elect (like other former owners otherwise liable to the "pre-owned asset" charge) that the property should fall back into their estate for IHT purposes. Thus the clause ensures an effective IHT charge in these circumstances by providing that the [reverter to settlor] exemptions in sections 53(3), 53(4) and 54 IHTA will not apply.

### 80.20.2 *Reverter to settlor restriction*

Para 11(11) sch 15 FA 2004 sets out the circumstances in which the reverter to settlor restriction applies:

Sub-para (12) applies where at any time—

- [i] (a) the relevant property has ceased to be comprised in a person's estate ... , or
- (b) he has directly or indirectly provided any consideration for the

---

<sup>57</sup> Author's footnote: This is not generally possible after 2006.

- acquisition of the relevant property,  
and  
[ii] at any subsequent time the relevant property or any derived<sup>58</sup> property is comprised in his estate ... as a result of section 49(1) IHTA.

In these circumstances, para 11(12) sch 15 FA 2004 disapplies the estate exemptions and the GWR exemptions:

Where this sub-paragraph applies, the relevant property and any derived property—

- (a) are not to be treated for the purposes of sub-paras (1) and (2) as comprised in his estate at that subsequent time, and
- (b) are not to be treated as falling within sub-para (5) in relation to him at that subsequent time.

### 80.20.3 IIP trust for settlor from outset

The condition in para 11[i](b) is a paraphrase of the contribution condition. At first sight, wherever the contribution condition applies, the estate exemption is disappplied. For instance, suppose:

- (1) T transfers cash to an estate IIP trust; and
- (2) the trustees acquire a UK residence.

The condition in para 11(12)[i](b) is met. At first sight the condition in para 11(12)[ii] is also met: one might think that at *any subsequent time ... derived property is comprised in his estate ... as a result of section 49(1) IHTA*. So the reverter to settlor restriction applies (even though the reverter to settlor exemption does not apply). So it appears that the POA charge applies. But HMRC do not agree. They say that the condition in para 11(12)[ii] is not met. Published correspondence between STEP and HMRC provides:

#### **STEP letter**

Are the following cases caught by POAT ...

1. In 1987, A sets up an interest in possession trust for himself into which he gifts his house. If the house is still held by the trustees now there is no POAT charge because nothing has left his estate.

---

<sup>58</sup> Para 11(13) sch 15 FA 2004 defines “derived property” in terms which repeat the wording of para 11(1)(b) sch 15 FA 2004 verbatim.

More accurately, there is no POAT charge as the conditions of para 11(11) are not satisfied.

However assume that the house has since been sold but he retains an interest in possession. The trust holds a mixture of investments and another house that A occupies. Is para 11(11)(b) satisfied on the basis that A has provided consideration for the acquisition of the land which land has subsequently become comprised in his estate. ...

3. In June 2006, C, a disabled person, sets up a trust for himself that qualifies as a disabled person's interest within s89B IHTA. C puts in cash and the trustees invest in equities or a house that C occupies. C will pay POAT. ...

These two examples raise the same point: they are both estate IIP trusts (though after 2006 a trust of that kind can only be made for a disabled beneficiary). But HMRC say that the reverter to settlor restriction does not apply, as the condition in para 11(11)[ii] is not met. That provides:

[ii] at any subsequent time the relevant property or any derived property is comprised in his estate ... as a result of section 49(1) IHTA.

The HMRC response is as follows:

As I understand your concern, it is that the new para 11(11)(b) in Schedule 15 FA 2004 will catch someone who has settled, say, cash on interest in possession trusts for themselves (either before 22 March 2006, or afterwards if it is a "disabled person's interest") and subsequently occupies property bought by the trustees; or where the property they settled initially has been sold and replaced by other property, while the settlor has retained their interest in possession.

... In our view, the words "at any subsequent time" should be read as meaning that a POA charge will arise where

[1] the consideration leaves the donor's estate, as a result of which that estate is reduced, and

[2] later property acquired with such consideration becomes comprised in it again because of their interest in possession. This is consistent with the reasons for Schedule 15.

We do not, therefore, consider that there will be a charge in the scenarios numbered 1 and 3 in your letters, because the assets transferred into trust and any derived assets have always been in the settlor's estate for IHT

purposes. We believe that also applies if, in your second scenario,<sup>59</sup> B set up an interest in possession trust from the outset before Budget Day [2006]. The taxpayer should self-assess on the basis that no POAT is due and there is therefore no need to put anything about POAT on the tax return or for him to make the election where the settlor has retained an interest in possession throughout and settled the cash or property directly into trust himself (rather than through any other funding vehicle such as another trust). This is because no POAT charge arises under s80 FA 2006 [which inserted para 11(11) - (13) Sch 15 FA 2004].

In summary we do not consider that s.80 FA 2006 has any implications for:

- a settlement of cash on interest in possession trusts for oneself made before 22 March 2006, or made by a disabled person on or after that date, after which the trustees purchase a property in which the settlor resides; or
- the settlement of a house in the same way, which is subsequently sold by the trustees and replaced by other investments or another property. That remains our view, on the basis that the words “at any subsequent time” mean that new para 11(11)(b) Schedule 15 FA 2004 will only be relevant where:
  - the consideration in question leaves the donor’s estate, as a result of which that estate is reduced; and
  - later, property acquired with such consideration becomes comprised in the estate once more by virtue of an interest in possession.

We do not agree that this interpretation makes para 11(11)(a) redundant,<sup>60</sup> since that relates to cases where the disposal condition is

<sup>59</sup> See 80.20.4 (Trust becomes settlor - IIP).

<sup>60</sup> This paragraph addresses a point made in the STEP letter in these words: “The potential difficulty with paras 11(11) and 11(12) is that they do not distinguish between reverter to settlor trusts and any trust set up between March 1986 and 22 March 2006 where the settlor has a qualifying interest in possession and would in that event be subject to inheritance tax on his death.

These difficulties arise because paras 11(11) and 11(12) catch not only those transactions where land has been given away and ceased to be comprised in the settlor’s estate and then comes back into his estate (condition a above). They also catch transactions where a settlor contributed funds or property to a trust and the trust (or an underlying company) has then used those funds or property representing them to buy the relevant property i.e. the land now occupied (condition b above). There is nothing in the words about “any subsequent time” which suggests that under (b) the property had first to cease to be comprised in his estate before being caught by this provision. Indeed if that was the case the words in (a) would be redundant.”

met and para 11(11)(b) to cases where the contribution condition is met.

This is a purposive construction, but taxpayers will not object.

#### 80.20.4 *Trust becomes settlor - IIP*

The STEP letter sets out one other example:

Are the following cases caught by POAT ...

2. B is a foreign domiciliary who before 22 March 2006 set up a discretionary trust into which he transferred cash. He remains a beneficiary of the trust. The trust then funds a company which buys a house or possibly holds UK investments (and B will pay income tax under [s720 ITA] in respect of any UK income). The trust was before 22 March 2006 converted into an interest in possession trust. If there are any UK intangibles or UK property occupied by A which are held by the trustees within the interest in possession structure he is now subject to POAT. Even if one reads “subsequent time” to mean some time must elapse between the date when the gift is made and the date the property comes back into B’s estate this would still not protect B in this example because the trust was originally discretionary.

HMRC comment on this:

We accept that a POA charge may arise where someone set up a discretionary trust that has subsequently been converted into an interest in possession trust for the benefit of the settlor. (Scenario 2 in your example). However, it remains possible in those circumstances to elect out of the charge. So, take the following example:<sup>61</sup>

- H settles a property on discretionary trusts before 22 March 2006;
- also before that date, the trust is converted into an interest in possession trust for H’s benefit, with remainder to his wife, W;
- A POA charge therefore arises because of s.80 FA 2006 but H elects. As we see it, the effects of the election are:
  - the chargeable proportion of the property will be treated as subject to a reservation, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(i), Schedule 15 FA 2004*) – i.e. not at all;
  - section 102(3) and (4) FA 1986 will apply, but only so far as H is not beneficially entitled to an interest in possession in the property (*para*

---

61 Author’s footnote: The HMRC reply simplifies the facts of STEP example 2 by omitting the company: that allows HMRC to ignore various additional complications.

- 21(2)(b)(ii)* – i.e. not at all; and
- the reverter-to-settlor exemptions in s.53(3) and (4) and s.54 IHTA will not apply to the actual interest in possession (*para 21(2)(b)(iii)*).
- We do not, therefore, consider that the election affects the availability of spouse exemption on H's interest in possession on his death – or on its termination during his lifetime. That is because, as we have just noted, the election will not cause s.102(3) and (4) FA 86 to apply because of H's interest in possession, so there will be no deemed PET.

It is absurd to expect taxpayers to make an election in this case. It is considered that the condition in para 11(12)[ii] is not satisfied, just as it is not satisfied in STEP examples 1 and 3. The property is in the estate of the settlor as soon as the settlement was made. (The settlor did not have an interest in possession, but it is property subject to a reservation, and one may (loosely) regard such property as being in the estate of an individual. That was the view of the drafter of the provisions.<sup>62</sup>) The statutory words *at any subsequent time the relevant property or any derived property is comprised in his estate* require that the property becomes comprised in the individual's estate by means of a disposition other than the original transfer to the trust by the individual.

In short, the reverter to settlor restriction can and should be construed purposively, so it only applies in cases where the reverter to settlor restriction is actually in point, because that, unquestionably, was the intention when it was enacted.

The IHT Manual provides:

**IHTM44050 relevant property remains part of the Inheritance Tax estate: restriction for subsequent ownership** [Aug 2016]

...

**Example** (Abel and Eve)

In 1990 A gave his widowed mother E the money so that she could buy her council house. E died in 2005 leaving her house in trust to A for life with remainder to her grandson. A lives in the house as life tenant, so does not pay any rent. Despite the house being treated as part of A's estate, A is not exempt under FA04/Sch15/Para11(1) - unless the de minimis (IHTM44056) applies.

**Example** (Adam)

A settled a holiday cottage in trust in 2000 giving his wife an interest in

---

62 See 80.20.1 (Purpose of rule).

possession only while they are married, with a defeasible life interest for himself thereafter and remainders on discretionary trust for his children. He shares the occupation of the cottage with his wife. The initial transfer is an excluded transaction (IHTM44032) and also exempt from reservation of benefit (IHTM14318).

In May 2008 they divorce and A's former wife's interest ends. The initial exclusion comes to an end, but A's subsequent qualifying life interest (a TSI under IHTA/S49C (IHTM16061)) is not exempt under FA04/Sch15/Para11(1).

### 80.21 Full consideration exemption

Para 11(5)(d) sch 15 FA 2004 provides a POA exemption where (in my paraphrase) the relevant property or derived property:

would fall to be treated as property subject to a reservation but for s.102C(3) and Schedule 20 para 6 FA 1986.

There is a set of exemptions here:<sup>63</sup>

- (1) Where the GWR rule would apply but for s.102C(3) FA 1986 (this section is not discussed here).
- (2) Where the GWR rule would apply but for para 6 sch 20 FA 1986.

Para 6(1) sch 20 FA 1986 provides two exemptions to the GWR rule. The first is:

In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—

- (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth ...

I call this the “**full consideration exemption**”. This is particularly

---

<sup>63</sup> Another possible reading is that the exemption only applies if s.102C(3) and sch 20 para 6 both apply, ie it is not enough that sch 20 para 6 applies if s.102C(3) does not. But a close reading of s.102C shows that s.102C(3) and para 6 sch 15 FA 2004 are alternatives. They cannot both apply. *Hansard* confirms this (if it were necessary): HC 7 July 2004 col.881, 900 and the IHT Manual set out below takes the same view.

important in relation to chattels because full consideration would be much less than the deemed income charge.

For the concept of “full consideration”, see App 4.5 (Market value/full consideration ).

The full consideration exemption only applies if there would otherwise be a GWR. If an individual has carried out an *Eversden* scheme, they will not qualify for the full consideration exemption even if they pay full consideration for use of the land (though the rent paid will reduce the quantum of the POA charge).

The second exemption in para 6(1)(b) sch 20 is less likely to be important in practice.

The IHT Manual provides:

**IHTM44048 exclusion of reservation of benefit under FA86/Sch20/Para6** [Aug 2016]

Where the chargeable person makes a gift that is not subject to a reservation of benefit because the benefit is excluded under FA86/Sch20/Para6(a) & (b), it is also exempt from the POA charge under FA04/Sch15/Para11(5)(d). This covers two situations.

**Full consideration**

Where the donor gives away land and continues to occupy it, or gives away a chattel and continues to use and enjoy it, but pays full consideration in money or money’s worth, there is no reservation of benefit (IHTM14341) nor is there a POA charge. What is full consideration and the way the parties should go about the transaction to avoid being subject to a charge as a reservation of benefit applies equally to the exemption from the POA charge.

If the consideration paid is less than full consideration, or if they initially pay full consideration but, over time, this falls below market rates, a reservation of benefit will arise at the time they ceased to pay full consideration. There will be no POA charge in view of FA04/Sch15/Para11(5)(a).

**Change in donor’s circumstances**

Where the donor makes a gift of property that is not subject to a reservation of benefit, but they subsequently have to return to the property due to an unforeseen change in their circumstances and are unable to look after themselves because of age or infirmity, there is no reservation of benefit (IHTM14342) nor is there a POA charge.

## 80.22 Partnerships

The guidance formerly published on the HMRC website provided:

The treatment of a share of a partnership interest for Schedule 15 purposes follows that applied for IHT purposes. In other words, we do not regard the partnership interest as transparent, and the disposal of a share is unlikely to give rise to a Schedule 15 charge in any circumstances.

This is not a view which bears much examination. If a partnership holds land, a partnership interest is an interest in land, and a disposal of that interest meets the disposal condition.<sup>64</sup> But the legislation was not intended to catch partnerships and HMRC avoid the problem by informal concession dressed up as a statement of practice. The passage is not in the IHT Manual but there is no reason to think that HMRC practice has changed.

### **80.23 Non-resident individual**

Para 12(1) sch 15 FA 2004 provides:

This Schedule does not apply in relation to any person for any year of assessment during which he is not resident in the UK.

This is straightforward.

### **80.24 UK resident non-dom**

Para 12(2) sch 15 FA 2004 provides:

Where in any year of assessment a person is resident in the UK but is domiciled<sup>65</sup> outside the UK, this Schedule does not apply to him unless the property falling within para 3(1)(a), 6(1)(a) or 8(1)(c) is situated in the UK.

This provides exemptions to:

---

64 Contrast the original HMRC guidance (called “Technical Guidance”, 2004) which took the correct (if worrying) line that the POA rules in principle apply “if C, an existing partner, brings his son D into partnership”; see the 6th edition of this work, para 43.10.1.

65 “Domiciled” is defined in para 12(4) sch 15 FA 2004:

“For the purposes of this paragraph, a person is to be treated as domiciled in the UK at any time only if he would be so treated for the purposes of IHTA.”

- (1) POA land charge, where T occupies non-UK situate land
- (2) POA chattel charge, where T uses non-UK situate chattels
- (3) POA intangible property charge, where intangible property is not UK situate.<sup>66</sup>

Para 12(2) does not provide exemption where T transfers assets to a non-UK company which holds UK land occupied by T. But the GWR or estate exemption will usually apply.

### 80.25 Former non-dom

Para 12(3) sch 15 FA 2004 provides:

In the application of this Schedule to a person who was at any time domiciled<sup>67</sup> outside the UK, no regard is to be had to any property which is for the purposes of IHTA excluded property in relation to him<sup>68</sup> by virtue of section 48(3)(a) of that Act.<sup>69</sup>

The words “was at any time domiciled outside the UK” refer to a person who was formerly foreign domiciled but who has become UK domiciled. The words do not refer to a person who was and remains foreign domiciled. (The words in isolation could, taken literally, apply in such a case, but the word *was* in para 12(3) is to be contrasted with *is* in para 12(2).)

Suppose:

- (1) T (not UK domiciled) creates a discretionary trust of which T is a beneficiary;
- (2) The trust holds:
  - (a) Non-UK investments.
  - (b) A company holding UK property occupied by T.

At this point, the conditions for the POA intangible property charge and

66 This exemption (anomalously) does not apply to FOTRA securities, AUTs or OEICs which may be excluded property but which are UK situate. But the intangible property charge is not likely to affect non-dom settlors, so it may not matter.

67 This includes deemed domicile: see above footnote.

68 The words “in relation to him” are misconceived. Property is excluded property or not excluded; but it cannot be excluded property “in relation to” any particular beneficiary. It is considered that these words should simply be disregarded.

69 The exemption (anomalously) does not apply to FOTRA securities, AUTs or OEICs which may be excluded property, but not under s.48(3)(a) IHTA.

the POA land charge are satisfied but the GWR exemption provides relief in both cases.

(3) Suppose T becomes IHT deemed domiciled (or actually UK domiciled).

At first sight T ceases to enjoy the benefit of the GWR and estate exemptions as the trust property is excluded property, so “no regard” is to be had to it.

- (1) In relation to the investments, there is still no POA intangible property charge, since the investments are excluded property, so no regard is to be had to them either.
- (2) However, the land is not excluded property, so the POA land charge seems to apply.<sup>70</sup> This was certainly not foreseen at the time the legislation was passed. It is suggested that para 12(3) sch 15 FA 2004 is, like a deeming provision, to be construed to have effect so far as intended but it was not intended to disapply the GWR and estate exemptions. The purposive approach to construction of tax statutes may on this occasion assist the taxpayer. The 17 March 1986 POA start date supports this view. That date shows that the object of the rules is to prevent GWR avoidance, not other kinds of IHT mitigation.

HMRC agree. CIOT Statement provides at para 7:

Para 12(3) states that no regard is to be had to excluded property. In a case where a trust settled by a foreign domiciliary owns a UK house through a foreign registered company the shares in the company (and any loan to the company) are excluded property. Concern has been expressed that since para 12(3) says that no regard is to be had to these assets, this in turn means that the shares and loan have to be ignored in applying para 11 and in particular cannot be taken into account in determining whether there is derived property which is in the taxpayer’s estate or GWR property in relation to him (which the shares and loans otherwise are). We think that this argument is misconceived but it has been advanced.

#### **Question 42**

Can HMRC confirm that they agree para 12(3) does not operate in this

---

<sup>70</sup> A further tax charge would arise if (as some have argued) T is also caught by the GWR rules on his death; see 74.15 (Death: settled excluded property).

way and that para 11 can still work to protect the UK house or underlying assets owned by the offshore company in these circumstances?

*HMRC*

We agree with what you say in para 7.1 about the interaction between paras 12(3) and 11.

The guidance formerly published on the HMRC website provided at 4.1:

Para 12(3) of the schedule provides that if any property situated outside the UK became comprised in a settlement when the person settling the property was domiciled outside the UK it will not be subject to the charge. Even if that person becomes domiciled in the UK at a later date this property will remain excluded from the charge.

Para 12(3) provides that a charge under this Schedule shall not arise in relation to property regarded as excluded by virtue of section 48(3) IHTA'84. We do not regard this provision as having an impact on para 11 in determining whether there is derived property in the taxpayer's estate, or GWR property in relation to him (see foreign domiciliary example in appendix).

The passage is not in the present IHT Manual, but HMRC practice may not have changed.

The IHT Manual provides:

**IHTM44054 exemptions: foreign element - foreign domiciliaries**  
[Aug 2016]

Example (Gregor)

G, who is non-UK domiciled but resident in the UK, gives his French house to an offshore company which is 100% owned by him and continues to live there. This is a disposal of land, but there is no POA charge because of the exemption under FA04/Sch15/Para12(2). However G owns the company shares that derive their value from the house, so he is also exempt under FA04/Sch15/Para11(1). If, after a period of time, G becomes deemed domiciled in the UK, this exemption under FA04/Sch15 /Para12(2) will be lost. However, exemption under FA04/Sch15/Para11(1) (IHTM44041) is still available as G's estate includes property (the company shares) which derives its value from the relevant property.

If G had given his UK house to the offshore company and continued to live there, a POA charge potentially arises. The exemption under FA04/Sch15/Para12(2) does not apply because the property is situated

in the UK. However, exemption under FA04/Sch15/Para11(1) is still available as G's estate includes property (the company shares) which derives its value from the relevant property.

Note that in the second scenario above, the exemption still applies even though should G die non-UK domiciled the property will not be liable to Inheritance Tax because the shares in the offshore company will be excluded property (IHTM04260).

**IHTM44055 exemptions: foreign element - foreign domiciliaries: settled property exemption** [June 2016]

Where a person who is domiciled outside the UK creates a settlement that contains overseas property, that settlement is an excluded property settlement for Inheritance Tax purposes (IHTM27220). No regard is to be had to any such property for the purposes of the POA charge, FA04/Sch15/Para12(3). This provision provides an exemption for individuals who subsequently become domiciled in the UK and continue to benefit from the settled property and who would therefore no longer be able to rely on the foreign domiciliary exemption (IHTM44054).

If, having become domiciled in the UK the person adds property, wherever it may be situated, to the settlement, the added property may be subject to the POA charge in the normal way. If available, the exemptions and exclusions would apply as they would for any person domiciled in the UK.

The definition for excluded property for inheritance purposes includes interests in UK unit trusts, OEICs and gilts, but this is not extended to the POA charge.

## 80.26 Loan to trust

The IHT Manual provides

**IHTM44113 insurance based products: gift and loan trust** [Jun 2016]

A gift and loan trust is where the settlor makes a small gift into trust, possibly by way of an insurance policy and settles it on trusts for the benefit of others and from which the settlor is entirely excluded. They then make a substantial interest free loan to the trustees, repayable on demand. The trustees use the loan to purchase more policies, and make partial surrenders each year to pay off part of the loan.

This arrangement is not a gift with reservation for inheritance tax. The settlor is not a beneficiary of the trust itself and the making of the loan does not constitute a settlement for the purposes of Inheritance Tax. No

POA charge arises as the benefit to the settlor arises as a creditor and not under the trust.

### 80.27 Quantum of charge: Land

We find the usual cascade of definitions. Para 3(5) sch 15 FA 2004 provides:

Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 4 is to be treated as income of his chargeable to income tax.

#### 80.27.1 Chargeable amount/deductions

One therefore turns to para 4 sch 15 FA 2004 to find the quantum of the charge. Para 4(1) sch 15 FA 2004 provides:

For any taxable period<sup>71</sup> the chargeable amount in relation to the relevant land is

- [a] the appropriate rental value ... less
- [b] the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the relevant land in respect of the occupation of the land by the chargeable person.

To obtain a deduction requires good paperwork:

- (1) a legal obligation; and
- (2) payment to the owner of the relevant land.

This is straightforward in an *Eversden* scheme, but who is the “owner” of the land in an *Ingram* scheme (where there is a lease owned by T and a reversion owned by others)? Who is owner of the land in a home loan scheme (where the land is held by trustees)?

#### 80.27.2 “Appropriate rental value”

This is defined in para 4(2) sch 15 FA 2004. This provides:

---

<sup>71</sup> “Taxable period” has common sense definition in para 4(6) sch 15 FA 2004:

“In this paragraph—

‘the taxable period’ means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person.”

The appropriate rental value is  $R \times (DV \div V)$

In short, R is the **Rental value**; V is the capital **Value**.  $DV \div V$  is (in a sense) the chargeable part of that value. **DV** stands, perhaps, for **Disposal Value**.

### 80.27.3 “Rental value”

R is the rental value of the relevant land for the taxable period. “Rental value” is defined in the same manner as the income tax benefit in kind rule: it means the “annual value”.

“Annual value” is in turn defined in para 5 sch 15 FA 2004. That is copied from s.110 ITEPA, except that s.110(3), (4) are omitted. It is here called “**POA Annual Value**”. POA Annual Value is defined as the rent which will be payable *on the assumption that the landlord (rather than the tenant) pays for all repairs and insurance*. The normal market rent will be lower than the POA Annual Value, because market practice is that the *tenant* pays the cost of repairs and insurance. The difference between POA annual value and normal market rent will vary from one property to another. The difference would be greater with large properties which are expensive to maintain and insure. In relation to other benefits in kind provisions, such as s.87 and s.731, beneficiaries have sometimes been given the benefit of living accommodation on terms that they are responsible for maintenance and insurance. If the maintenance and insurance cost is substantial, they argue that the value of the benefit is small or sometimes even nil. It was perhaps to avoid these arguments that the legislation was framed in this way. It seems extraordinary if one thinks that the legislation is intended to charge income tax on a benefit in kind. However, the object of the legislation is really to penalise taxpayers who have carried out some IHT planning schemes and so it does make sense.

The wording is derived from rating legislation. There is a substantial amount of case law, and to research this the reader should refer to rating law textbooks.

Annual value for benefit in kind purposes is by concession taken to be the rateable value.<sup>72</sup> There is no reason to think that this concession will be applied for POA Annual Value.

---

72 See 79.18.1 (“Rental value”).

POA Annual Value is therefore slightly above market rental value.

#### 80.27.4 *The proportion ( $DV \div V$ )*

The key expression is DV. Para 4(2) sch 15 FA 2004 provides:

DV is—

- (a) in a case falling within para 3(2)(a)(i),<sup>73</sup>
  - [i] the value as at the valuation date of the interest in the relevant land that was disposed of as mentioned in para 3(2)(b) by the chargeable person or,
  - [ii] where the disposal was a non-exempt sale, the appropriate proportion of that value,
- (b) in a case falling within para 3(2)(a)(ii),<sup>74</sup>
  - [i] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
  - [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
- (c) in a case falling within para 3(3),<sup>75</sup> such part of the value of the relevant land at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and

V is the value of the relevant land at the valuation date.

The drafter does not deal with a case falling within the disposal and the contribution condition, eg if the individual disposes of an interest in a contract to purchase land to another person and also provides the purchase price.

#### 80.27.5 *( $DV \div V$ ) and valuation date*

The valuation date is determined by the POA Regulations 2005. The Consultation Document “Taxation of Pre-Owned Assets: Further Consultation” 16 August 2004 explains:

5. In the case of land, the “cash equivalent” of enjoyment in a particular tax year is derived from market rental that would be paid for use of the land over the “taxable period” (that is, the tax year or any shorter period for which the asset is “caught” by Schedule 15). This

---

73 ie disposal condition (i), see 80.4.1 (Disposal condition (i)).

74 ie disposal condition (ii), see 80.4.2 (Disposal condition (ii)).

75 ie the contribution condition, see 80.5 (Contribution conditions).

figure is then scaled down, in cases where the taxpayer's "stake" in the caught asset is less than 100 per cent, in the proportion  $DV/V$ , where  $V$  is the value of the whole asset on the "valuation date" for the year, and  $DV$  is the value reasonably attributable to the taxpayer on that date. In many cases, however, we would expect that taxpayers and their advisors will be able to establish the ratio  $DV/V$  from the surrounding circumstances without necessarily establishing the absolute amount of  $V$  or  $DV$ .

#### 80.27.6 *Non-exempt sale*

Para 4(4) sch 15 FA 2004 provides a relief for a "non-exempt" sale. Para 4(4) sch 15 FA 2004 begins with the definition of this term:

The disposal by the chargeable person of an interest in land is a "non-exempt sale" if (although not an excluded transaction) it was a sale of his whole interest in the property for a consideration paid in money in sterling or any other currency;

The label ("non-exempt sale") is chosen, presumably, because the sale is not an excluded transaction. (Perhaps "non-excluded sale" would have been clearer.)

The relief is given by the method of re-defining "the appropriate proportion" to a smaller amount. Para 4(4) sch 15 FA 2004 continues:

and, in relation to a non-exempt sale, "the appropriate proportion" is  $(MV-P) \div MV$

where—

$MV$  is the value of the interest in land at the time of the sale;

$P$  is the amount paid.

This will not often apply as a sale for full value will usually be an excluded transaction and a sale at an undervalue will probably qualify for the GWR exemption.

### 80.28 **Quantum of charge: Chattels**

Para 6(5) sch 15 FA 2004 provides:

Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 7 is to be treated as income of his chargeable to income tax.

### 80.28.1 Chargeable amount

Para 7(1) sch 15 FA 2004 provides:

For any taxable period the chargeable amount in relation to any chattel is

- [a] the appropriate amount (as determined under sub-para (2)),
- [b] less the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the chattel in respect of the possession or use of the chattel by the chargeable person.

This follows the format of the POA land charge.

### 80.28.2 Appropriate amount

Para 7(2) sch 15 FA 2004 provides:

The appropriate amount is  $N \times (DV \div V)$

In short, N is Notional interest. DV and V are similar to the POA land charge. In detail:

N is the amount of the interest that would be payable for the taxable period<sup>76</sup> if interest were payable at the prescribed rate on an amount equal to the value of the chattel [at]<sup>77</sup> the valuation date,

DV is—

- (a) in a case falling within para 6(2)(a)(i),
  - [i] the value as at the valuation date of the interest in the chattel that was disposed of as mentioned in para 6(2)(b) by the chargeable person or,
  - [ii] where the disposal was a non-exempt sale,<sup>78</sup> the appropriate proportion of that value,
- (b) in a case falling within para 6(2)(a)(ii),
  - [i] such part of the value of the chattel at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,

---

76 Para 7(5) sch 15 FA 2004 provides that “the taxable period” means the year of assessment, or part of a year of assessment, during which para 6 sch 15 FA 2004 applies to the chargeable person.

77 The statute erroneously reads “as”.

78 Non-exempt sale is defined in para 7(3) sch 15 FA 2004 following the form of the POA land charge: see 80.27.6 (Non-exempt sale).

- [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
- (c) in a case falling within para 6(3), such part of the value of the chattel at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
- V is the value of the chattel at the valuation date.

## 80.29 Quantum: Intangible property

Para 8(3) sch 15 FA 2004 provides:

Where this paragraph applies in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 9 is to be treated as income of the chargeable person chargeable to income tax.

### 80.29.1 Chargeable amount

Para 9(1) sch 15 FA 2004 provides:

For any taxable period the chargeable amount in relation to the relevant property is N minus T

In short, **N** is Notional income; **T** is Tax payable. In more detail:

N is the amount of the interest that would be payable for the taxable period<sup>79</sup> if interest were payable at the prescribed rate on an amount equal to the value of the relevant property at the valuation date, and

T is the amount of any income tax or capital gains tax payable by the chargeable person in respect of the taxable period by virtue of any of the following provisions—

- (a) section 461 [ITTOIA],
- (b) section 624 [ITTOIA],
- (c) sections 720 to 730 [ITA],
- (d) section 77 [TCGA], and
- (e) section 86 [TCGA],

so far as the tax is attributable to the relevant property.

Setting notional income against tax is penal and bizarre, but then, the

---

<sup>79</sup> Para 9(3) sch 15 FA 2004 provides:

“‘the taxable period’ means the year of assessment, or part of a year of assessment, during which para 8 applies to the chargeable person”.

POA regime is bizarre and intended to be penal.

There is no provision for carry forward or back if T exceeds N (but that will be rare).

If foreign income is unremitted and no tax is paid because of the s.624 remittance basis, it is considered that the amount of T is nil.

### 80.29.2 Valuation date

Para 9 sch 15 FA 2004 continues:

(2) Regulations may, in relation to any valuation date, provide for a valuation of the relevant property by reference to an earlier valuation date to apply subject to any prescribed adjustments.

(3) In this paragraph—

...

“the valuation date”, in relation to a year of assessment, means such date as may be prescribed.

The date is prescribed in the POA Regulations 2005.

## 80.30 Land/intangibles charge overlap

Para 18 sch 15 FA 2004 provides:

*Persons chargeable under different provisions by reference to same property*

(1) Where, in any year of assessment, a person (“the chargeable person”) is (apart from this paragraph) chargeable to income tax both—

(a) under para 3 (land) or para 6 (chattels) by reason of his occupation of any land or his possession or use of any chattel, and

(b) under para 8 (intangible property) by reference to any intangible property which derives its value (whether in whole or part) from the land or the chattel,

he is to be charged to income tax under whichever provision produces the higher chargeable amount in relation to him.

(2) Where sub-para (1) applies, only the amount under the paragraph under which he is chargeable is to be taken into account in relation to the chargeable person for the purposes of para 13(2).

## 80.31 Interaction with benefits in kind

Para 19 sch 15 FA 2004 provides:

Where, in any year of assessment, a person is (apart from this paragraph) chargeable, in respect of his occupation of any land or his possession or use of any chattel, to income tax both—

- (a) under this Schedule, and
- (b) under Part 3 of ITEPA,

the provisions of that Part shall have priority and he shall not be chargeable to income tax under this Schedule, except to the extent that the amount chargeable under this Schedule exceeds the amount to be treated as earnings under that Part.

### 80.32 *De minimis* exemption

The Press Release announcing the POA regime promised “a substantial *de minimis* exemption” (*sic*). This turned out to be £5,000 per annum. As this book predicted, the “substantial” £5,000 figure has not been raised in line with inflation.

Para 13 sch 15 FA 2004 provides:

- (1) This paragraph applies where, in relation to any person who would (apart from this para) be chargeable under this Schedule for any year of assessment, the aggregate of the amounts specified in sub-para (2) in respect of that year does not exceed £5,000.
- (2) Those amounts are—
  - (a) in relation to any land to which para 3 applies in respect of him, the appropriate rental value as determined under para 4(2),
  - (b) in relation to any chattel to which para 6 applies in respect of him, the appropriate amount as determined under para 7(2), and
  - (c) in relation to any intangible property to which para 8 applies in respect of him, the chargeable amount determined under para 9.
- (3) Where this para applies, the person is not chargeable for that year of assessment under any of the following provisions—
  - (a) para 3(5) (land),
  - (b) para 6(5) (chattels), or
  - (c) para 8(3) (intangible property).

This is significant if annual value is (contrary to my expectation) construed by concession to mean rateable value. It could also be significant where husband and wife entered into IHT planning arrangements jointly, since each have their own separate allowance. The exception applies to the “appropriate rental value”, so deductible expenses

are not relevant. Another problem here is that the £5,000 limit must be satisfied every year.

The *de minimis* limit is not time apportioned so the full £5,000 can be set against a much shorter period of deemed income.

It is therefore necessary to ascertain “the appropriate rental value”. That takes us to para 4(2) sch 15 FA 2004:

The appropriate rental value is  $R \times (DV/V)$  where

R is the rental value of the relevant land *for the taxable period*

The “taxable period” is defined in para 4(6) sch 15 FA 2004:

“the taxable period” means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person.

Thus it seems clear that if para 3 sch 15 FA 2004 only applies for part of the year, the taxable period is reduced, so R is reduced, so the “appropriate rental value” is reduced and so (carrying the chain to the end) the *de minimis* exemption may apply. Note that the estate exemption in para 11(1) sch 15 FA 2004 disapplies para 3 sch 15 FA 2004: see para 11(1) sch 15 FA 2004.

### 80.33 POA election

One can elect out of the POA regime at an IHT cost. Para 21 sch 15 FA 2004 deals with the POA land and chattels charges. Para 22 sch 15 FA 2004 deals with intangible property. They are not quite the same but for reasons of space I only cover the former.

#### 80.33.1 *Conditions for election*

Para 21(1) sch 15 FA 2004 provides

This paragraph applies where—

- (a) a person (“the chargeable person”) would (apart from this paragraph) be chargeable under para 3 (land) or para 6 (chattels) for any year of assessment (“the initial year”) by reference to his enjoyment<sup>80</sup> of any property (“the relevant

---

<sup>80</sup> “Enjoyment” is defined in para 21(4) sch 15 FA 2004:

“For the purposes of this paragraph a person ‘enjoys’ property if—

- (a) in the case of an interest in land, he occupies the land, and
- (b) in the case of an interest in a chattel, he is in possession of, or has the use of,

- property”), and
- (b) he has not been chargeable under the paragraph in question in respect of any previous year of assessment by reference to his enjoyment
    - [i] of the relevant property, or
    - [ii] of any other property for which the relevant property has been substituted.

If an election is made by mistake (because the POA regime does not in fact apply) it has no effect.

### 80.33.2 *Effect of election*

Para 21(2) sch 15 FA 2004 provides:

The chargeable person may elect in accordance with para 23 that—

- (a) the preceding provisions of this Schedule shall not apply to him during the initial year and subsequent years of assessment by reference to his enjoyment of the relevant property or of any property which may be substituted for the relevant property ...

This disapplies schedule 15. The price is in sub-para (b):

..., but

- (b) so long as the chargeable person continues to enjoy the relevant property or any property which is substituted for the relevant property—
  - (i) the chargeable proportion of the property is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property,
  - (ii) section 102(3) and (4) of that Act shall apply, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property, and
  - (iii) if the chargeable person is beneficially entitled to an interest in possession in the property, sections 53(3) and (4) and 54 of IHTA 1984 (which deal with cases of property reverting to the settlor etc) shall not apply in relation to the chargeable proportion of the property.

---

the chattel.”

Suppose a former foreign domiciliary makes an election in relation to a discretionary trust of which they are a beneficiary and the property is excluded property. How does s.102(3) apply? See 74.15 (Death: settled excluded property).

### 80.33.3 *Chargeable proportion*

This takes us to the definition of “chargeable proportion” in para 21(3) sch 15 FA 2004:

In this paragraph, “the chargeable proportion”, in relation to any property, means  $DV \div V$

where DV and V are to be read in accordance with para 4(2) or 7(2), as the case requires, but as if—

- (a) any reference in para 4(2) or 7(2) to the valuation date were a reference—
  - (i) in the case of property falling within subsection (3) of section 102 of the FA 1986, to the date of the death of the chargeable person, and
  - (ii) in the case of property falling within subsection (4) of that section, to the date on which the property ceases to be treated as property subject to a reservation, and
  - (iii) in the case of property in which the chargeable person is beneficially entitled to an interest in possession, to the date of his death or if his interest comes to an end on an earlier date) that earlier date, and
- (b) the transactions to be taken into account in calculating DV included transactions after the time when the election takes effect as well as transactions before that time.

I do not see the purpose or effect of para 21(3)(b) sch 15 FA 2004.

How does this work in the case of an *Ingram* scheme?

### 80.33.4 *Time limit for election*

Para 23(3) sch 15 FA 2004 provides:

The election must be made on or before—

- (a) the relevant filing date, or
- (b) such later date as an officer of Revenue and Customs may, in a particular case, allow..

The key expression is “relevant filing date” which is defined in para 23(1)

sch 15 FA 2004:

“the relevant filing date” means 31 January in the year of assessment that immediately follows the initial year within the meaning of para 21 or (as the case requires) para 22.

Time runs from when the schedule begins to apply. Normally that will be 6 April 2005,<sup>81</sup> because in the future no-one will deliberately enter into arrangements caught by the schedule. But where a person is non-resident or domiciled, the schedule may not begin to apply until a later time when they become UK resident or domiciled, and in such a case time for the election starts at that later time; a sensible rule.

#### 80.33.5 *Revocation of election*

Para 23(5) sch 15 FA 2004 provides:

The election may be withdrawn or amended, during the life of the chargeable person, at any time on or before the relevant filing date.

This will only be useful in very exceptional circumstances.

#### 80.33.6 *Retrospective effect of election*

Para 23(6) sch 15 FA 2004 provides:

Subject to sub-para (5), the election takes effect for the purposes of inheritance tax from the beginning of the initial year within the meaning of para 21 or (as the case requires) para 22 or, if later, the date on which the chargeable person would (but for the election) have first become chargeable under this Schedule by reference to the property to which the election relates.

### **80.34 Election: *Eversden* scheme**

If a client has lost their appetite for IHT planning, it would be better to unwind an *Eversden* scheme than to elect. Unwinding an *Eversden* scheme is straightforward.

By contrast, unwinding home loan schemes needs considerable care. Watch out for Fraud on a Power.

---

81 Or 6 April 2007 for those caught by the reverter to settlor restriction in the FA 2006; see 80.20 (Reverter to settlor restriction).

### 80.35 Election: Home loan scheme

Suppose:

- (1) The client (“H”) has entered into a home loan plan: H has sold H’s home to a trust (before 22 March 2006) (“the property settlement”) in return for a debt, and given away the debt.
- (2) Under the terms of the property settlement, income is paid to H for life, and then for H’s widow (“W”) after H’s death.
- (3) Suppose first of all that the home has not increased in value, so that the net value of the trust fund of the property settlement is nil.
- (4) A POA election has been made.
- (5) H is survived by W.

#### 80.35.1 *Effect of election*

The chargeable proportion (here = the whole) of the property:

is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation.

So it is treated as property to which H is beneficially entitled.

However, H is already entitled to the property as H has an interest in possession in it. The property is subject to the debt. Is this taken into account in valuing the estate of H on H’s death? If so the debt scheme still works! In *IRC v Ayrshire Employers Mutual Insurance Association* 27 TC 331 the House of Lords notoriously said that the legislation had “misfired”. But the modern approach of the courts is to make sure that legislation does not “misfire” if they can. Indeed this approach is not so modern, and in 1965 Lord Diplock criticised the *Ayrshire* decision:

If the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed.

#### 80.35.2 *Spouse exemption*

The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

... is an exempt transfer to the extent that the value transferred is  
 [a] attributable to property which becomes comprised in the estate of the transferor’s spouse or civil partner; or

[b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

See s.18(1) IHTA 1984.

H does not qualify for exemption within [b]. We have to argue that the value transferred is “attributable to property” (the home) “which becomes comprised in the estate of the spouse or civil partner”.

Does it? Only subject to the debt. The Revenue may reply that “property” in s.49(1) IHTA means net property and this is supported by *St Barbe Green v IRC*:

Section 49(1) IHTA 1984 [deems] the deceased to be beneficially entitled to “the property” in which his life interest subsists. It does not say “net property” (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section.<sup>82</sup>

On the facts of the above example, no net property becomes comprised in the estate of the spouse. A purposive construction supports that view. It does not make sense for the spouse exemption to apply there.

The spouse exemption would apply to the extent that the value of the property exceeds the debt.

If the debt were released, the problem disappears and it is clear that the spouse exemption would apply.

### 80.36 Unwinding existing structures

What is to be done when an existing structure falls within the POA land charge?

Do nothing and pay the POA tax? A suitable option where the client has a short life expectancy. Mitigate the charge by arranging that maintenance costs are deductible: see 80.27.1 (Chargeable amount and deductible expenses).

Elect out of the POA regime? Generally unattractive: you have the IHT charge on death usually without CGT uplift or spouse exemption on death.<sup>83</sup> Consider it if IHT is a long term problem (middle-aged clients). Perhaps a future government will scrap these rules in a decade or so's

---

82 [2005] STC 288.

83 See 74.19 (GWR on death charge: Spouse exemption).

time.

It may be sensible to elect and retain the structure where:

- (1) IHT is not a problem (eg insurance is inexpensive);
- (2) Shadow directorship is not a problem (expect an investigation to follow the election); and
- (3) A sale of the company is envisaged in the short or medium term. See 80.6.3 (Secondhand company).

In most cases shadow directorship may be a problem; it will usually be better to liquidate the company if IHT, CGT and SDLT issues permit.

The best solution is usually unwinding, or reorganising so as to fall within the estate exemption.

### 80.37 Is existing scheme validly created

In *Wolff v Wolff* [2004] STC 1633, a husband and wife entered into a reversionary lease of the property in favour of their daughters for 125 years starting from 2017. Subsequently, they became aware that from 2017 they had no right to stay in the property and were at the mercy of the owners of the lease! The lease was set aside for mistake.

### 80.38 Human rights

The Parliamentary Joint Committee on Human Rights considered the POA provisions to be HR compliant<sup>84</sup> – except (intriguingly) in relation to the spouse exemptions (which deny relief to cohabitants) but no-one took any notice of that. The prospect of a successful human rights challenge now seems slender.

### 80.39 Critique

#### 80.39.1 Nature of POA charge

What is the nature of the POA charge? Although the charge is imposed under the Income Tax Acts, it is not an income tax (in the sense that it is not a tax on income or in any way relating to income). To put it another way, the provisions impose an income tax charge on income which does not exist. Once it is accepted that income tax is not in general charged on

---

<sup>84</sup> <http://www.publications.parliament.uk/pa/jt200304/jtselect/jtrights/93/9305.htm>

an individual who occupies their own property<sup>85</sup> then it is anomalous to charge income tax on the benefit of occupation through a trust or company. And since the POA intangible property charge applies even if the property also produces income subject to income tax, it is obviously not income which Schedule 15 is seeking to tax.

The POA charge might be seen as an *ersatz* annual IHT charge on property which has slipped through the IHT net.<sup>86</sup> However, the quantum of the charge is penal (compared to IHT rates).

The true nature of the POA charge is therefore that it is a penalty for carrying out (and not unwinding) certain IHT planning. Hardly anyone is seriously expected to pay it. The object is to force taxpayers (by electing or unwinding) to bring themselves back into the IHT net.<sup>87</sup> The POA charge takes the clothes or label of income tax, but – looking beyond the label to the content – it is not income tax; indeed, it is not a “tax” at all, as that word is properly understood. It is well established that a fee, levy or toll may in fact be a tax despite its name.<sup>88</sup> Likewise provisions carrying the label of a tax do not necessarily constitute a tax.

This point may be relevant to construction, because the principle of construction that penalty provisions are to be strictly construed may have more force than the principle that clear words are required to impose a tax.

### 80.39.2 *Retrospectivity*

One controversial aspect of the POA regime is that it is retrospective in effect. (One should avoid semantic – indeed Orwellian – debate about the meaning of “retrospective” and look at the effect.) Retrospective legislation is pernicious when it entails liability for conduct which would have been different if the agent had known of the terms of the retrospective law. The POA rules are unashamedly targeted at taxpayers who carried out *Eversden*, *Ingram* and home loan schemes before these were stopped by anti-avoidance legislation.

Those that carried out *Ingram* schemes were particularly unfairly treated.

---

85 See Kay and King, *The British Tax System* (5<sup>th</sup> ed., 1990), p.80.

86 It is significant that the pre-owned asset charge is dealt with in IHT textbooks and in the HMRC IHT Manual.

87 And to stop similar arrangements being made in the future.

88 *Re a By-law of the Auckland City Council* [1924] NZLR 907 at p.911.

They entered into a package with an IHT advantage (generally) at a significant CGT cost. Parliament removed the benefit and left them with the cost. In 2004 I said:

This is unprecedented in the UK tax system, which has traditionally allowed taxpayers to plan their affairs more securely on the basis of the law of the day. One may approve of this as an attack on tax avoidance, or disapprove as contrary to the rule of law. Views may divide on party political lines.

Since 2004, however, retrospective tax legislation has become a matter of routine.<sup>89</sup>

### 80.39.3 Assessment

No doubt the POA rules bring some revenue for the Government, though how much is a matter of speculation. Set against the tax raised (whatever it is) and the blow against tax avoidance (however one values or regards that) there are some entries to make on the debit side: the POA rules impose significant costs of compliance and tax planning (for they require taxpayers to incur professional fees in order to rearrange their affairs). They impose the unquantifiable burden of complexity and uncertainty which (combined with unfairness) will lead to an equally unquantifiable loss of taxpayer goodwill. One cannot put a value on that goodwill, but it is essential to successful tax administration.

Back in 2004, I think everyone who understood and cared about the UK tax system was aghast at the conception, enactment process and administration of the POA provisions.<sup>90</sup> Looking back with hindsight it can be seen that the provisions were not an aberration. They are the natural result of a fiscal policy with one and only one priority, the attack on tax avoidance, set against which any other *desiderata* of a tax system count for very little and views of practitioners count for nothing at all.

The House of Commons Treasury Committee cite Pre-owned Assets as a paradigm of bad anti-avoidance legislation:

---

<sup>89</sup> See 2.9 (Retrospective tax legislation).

<sup>90</sup> “The anti-avoidance Pre-Owned Assets regime ... is: retrospective in its effect, disproportionate to the mischief at which it is purportedly aimed, contrary to taxpayers’ legitimate expectations, and arbitrary ... .”  
CIOT and ICAEW Tax Faculty (October 2004).

53. The charge on non-domiciled individuals is only one example of a tax whose imposition may have had unforeseen consequences. For example, the Finance Act 2004 introduced rules intended to clamp down on the avoidance of inheritance tax. Someone who gave away an asset but who later benefits from that asset may now be subject to an income tax charge. The intention was to close a loophole relating to inheritance tax; imposing a potential charge which can affect a wider population leads to unwelcome complexity. The likelihood is that many people do not realise they are caught, still less that they should be paying income tax in consequence. **Tax policy must be clearly targeted, so that taxpayers can have certainty about which rules apply to them.**<sup>91</sup>

OTS discuss the topic in two sentences, and call for a review,<sup>92</sup> but it seems unlikely that anyone will take any notice of that.

The HMRC change of view that home loan schemes are caught by the GWR rules is icing on the cake of poor administration.

It is suggested that:

- (1) The POA intangible property charge should be repealed except for transactions carried out before the anti-Eversden legislation enacted in 2003. That would be more or less a repeal.
- (2) The POA land and intangible property should be repealed and replaced by an IHT charge on the death of the person who carried out *Ingram* or Home Loan arrangements (with credit for POA charges if paid). If this was restricted to death after the new rules comes in, it should not be regarded as offensively retrospective.

That would be a valuable simplification.

CHAPTER EIGHTY ONE

**LOANS FROM NON-RESIDENT COMPANIES**

81.1 Loans from non-resident company

*Cross references*

The following topics are considered elsewhere:

52.1 (Transactions in Securities)

**81.1 Loans from non-resident company**

A dividend (or other income distribution) from a non-resident company will often cause an income tax charge. If the dividend is received by a UK resident, directly or through an IIP trust, it will be taxable on the arising or remittance basis. If it is received by a non-resident discretionary trust or company, it will be income within the scope of s.624 and the ToA provisions. By contrast a loan, even if interest-free, does not constitute an income receipt and so will avoid these problems. Loans therefore seem an attractive method of extracting funds from companies. However, they raise tax issues of their own. This chapter considers:

- (1) Employment-related loans
- (2) Loans and benefits to participators in close companies

Loans from companies raise further issues which are discussed elsewhere:

<b>Topic</b>	<b>See para</b>
Benefits for s.731/s.87	47.10
UK receipt a taxable remittance ,if sum lent derives from:	
-s.624/s.720/s.731 income of settlor/transferor	44.8; 46.20; 47.39
- foreign income/gains of individual	17.16.7 <sup>1</sup>
Loan to transferor/settlor may trigger 727 ITA/s.641 ITTOIA	46.17; 44.14

---

1 Remittance condition D might also apply.

Loan to trustees may trigger a sch 4B CGT charge	58.6
Loan may trigger transactions in securities rules	52.11.5, 52.11.6
Liability to repay may be non-deductible for IHT	76.1

Loans may be relevant for disguised remuneration; I do not discuss that topic in this book though I hope to do so in a future edition.

Loans *to* non-resident companies raise different issues, not discussed here.

For general law issues relating to loans, which can of course matter greatly for tax purposes, see App 2.7 (Loan).

## 81.2 Employment-related loan

The benefit of an employment-related loan is charged under the benefits code.<sup>2</sup>

Section 175(1) ITEPA provides:

The cash equivalent of the benefit of an employment-related loan is to be treated as earnings from the employee's employment for a tax year if the loan is a taxable cheap loan in relation to that year.

This will in principle apply on a loan from a company to an employee, director, or shadow director.<sup>3</sup>

Section 173(1A) ITEPA provides:

Where this Chapter applies to a loan—

(a) the loan is a benefit for the purposes of this Chapter (and accordingly it is immaterial whether the terms of the loan constitute a fair bargain)

Although a “fair bargain” is outside the residual benefits in kind charge,<sup>4</sup> it is within the scope of employment-related loans. But that was the position even before s.173(1A) was enacted.<sup>5</sup>

A discussion of the meaning of “taxable cheap loan” and the computation of the cash equivalent is not discussed here. For DT relief see 36.8.3 (DT relief: Benefits in kind).

The BiK earnings of an employment-related loan may be chargeable

<sup>2</sup> See 79.2 (The benefits code).

<sup>3</sup> See 79.6 (Shadow directors).

<sup>4</sup> See 79.35.4 (Fair bargain).

<sup>5</sup> See 47.5.1 (Arm's length transaction).

overseas earnings or may qualify for overseas workday relief. In the case of a shadow director who is a remittance basis taxpayer, it is suggested that the earnings cannot be remitted so no tax charge can arise.<sup>6</sup>

### 81.2.1 *Shadow director: HMRC practice*

Where living accommodation is provided by a company, HMRC say that they take the somewhat unmeritorious point that the occupier of the property may be a shadow director of the company, so that a benefit in kind charge arises.<sup>7</sup> In relation to interest-free loans from offshore companies, the same point arises. However in this case HMRC do not seem to take the point. There are various possible explanations for this:

- (1) The motivation for taking, or purporting to take, the living accommodation point may have been to discourage IHT planning on the family home (prior to the introduction of the IHT residential property code). That consideration does not apply to interest-free loans.
- (2) Borrowers are less likely to be shadow directors than occupiers. It is of course a question of fact in each case. But as a general rule, perhaps, a person occupying a home purchased by the company is more at risk of becoming a shadow director, because the company's acts to acquire the home and allow the individual to occupy are inherently more likely to be at the direction of the individual. By contrast, to put a beneficiary in funds, by way of loan (just as by way of distribution) is in the normal course of events a matter for the directors and (while no doubt made in conjunction with the trustees and beneficiary) there is less general reason to suspect the directors are acting at the direction of the beneficiary.

## 81.3 “Employment-related loan”

### 81.3.1 “Loan”

Section 173(2)(a) ITEPA provides:

---

6 See 79.39 (BiK: Remittance basis). If that is wrong, imponderable questions arise as to what happens if the money lent is remitted here and spent. Contrast 47.39.3 (Beneficial loan).

7 See 79.6.4 (Charge on shadow director).

“loan” includes any form of credit

EIM para 26108 provides:

**26108. Meaning of loan** [Nov 2019]

Loan means more than just lending money. It includes any form of credit. It follows that any kind of advance by reason of the employment is covered. For example, any amount shown in the employer’s books or records as owed by an employee will count as a loan.

*Grant v Watton*

The case of *Grant v Watton* (71 TC 333) concerned credit extended by a company of which Grant was a director, to his sole trade and later to a partnership in which Grant was the general partner. In the High Court Pumfrey J. considered the meaning of credit –

“... credit is granted where payment is not demanded until a time later than the supply of goods to which the payment relates. Credit is the deferral of payment of a sum which, absent agreement, would be immediately payable.”

Regarding the application of Section 175 ITEPA 2003 to an overdrawn director’s loan account see EIM26505.

81.3.2 “*Making*” a loan

Section 173(2)(b) ITEPA provides:

references to making a loan (and related expressions) include arranging, guaranteeing or in any way facilitating a loan.

EIM 26110 summarises this and continues:

**Loan made by a third party – employee benefit trust** [Nov 2019]

It is not uncommon for a third party, such as an employee benefit trust (EBT), to make a loan to a beneficiary who is also an employee of the employer which is associated with the EBT. It is sometimes suggested that the loan is not an “employment-related loan” (EIM26113) because the definition of that term does not include a loan provided by a third party.

Whilst it is true that the definition includes no reference to a third party loan provider, HMRC does not accept that the loan is not an employment-related loan. The definition of “employment-related loan” includes a loan made by an employee’s employer. As “making” a loan includes “in any way facilitating” a loan, if the employer provides the money to fund the EBT, the employer is regarded as making the loan.

Consequently for the purposes of the loan benefit rules, the EBT is ignored and the loan is treated as made directly by the employer to the employee. It follows that the loan is an employment-related loan.

Suppose:

- (1) A company is held by a trust, and lends funds to the trustees (“loan 1”).
- (2) The trustees lend funds to a beneficiary who is a shadow director (“loan 2”).

At first sight this would not be an employment-related loan because it is not made by the “employer”. But if loan 1 is made in order to allow the trustees to lend to the beneficiary, it may be said that the company has facilitated loan 2. The same applies to a back-to-back loan, ie if the company deposits funds with a bank, the trustees borrow from the same bank on the security of that deposit, and the trustees then lend to the beneficiary.

Section 174(4) ITEPA provides:

References in this section to a loan being made by a person extend to a person who—

- (a) assumes the rights and liabilities of the person who originally made the loan, or
- (b) arranges, guarantees or in any way facilitates the continuation of a loan already in existence.

EIM para 26111 provides:

**Loans taken over from another person [Nov 2019]**

If the rights over an existing loan are taken over by another person the loan will remain within the charge if it was within the charge when it was first made.

A loan within the scope of the charge cannot be removed from it by the original lender handing his or her rights over to another person.

But a loan that was not within the charge when it was first made can be brought within it if it is taken over by a person mentioned in EIM26113.

## **81.4 “Employment-related”**

Section 174(1) ITEPA defines “employment-related”.

For the purposes of this Chapter an employment-related loan is a loan—

- (a) made to an employee or a relative of an employee, and
- (b) of a class described in subsection (2).

There are two conditions, or sets of conditions.

Para (a) (the “**borrower condition**”) specifies the borrower must be the employee or relative.

Para (b) (the “**specified lender condition**”) specifies the lender must be the employer (or certain connected persons).

Section 174(3) ITEPA extends the definition of employer and employee:

In this section—

- “employee” includes a prospective employee,<sup>8</sup> and
- “employer” includes a prospective employer...

#### 81.4.1 *Borrower condition*

Section 174(1) ITEPA provides:

For the purposes of this Chapter an employment-related loan is a loan—

- (a) made to an employee or a relative of an employee...

Section 174(6) ITEPA defines “relative” quite widely:

For the purposes of this section a person (‘X’) is a relative of another (‘Y’) if X is—

- (a) Y’s spouse or civil partner,
- (b) a parent, child or remoter relation in the direct line either of Y or of Y’s spouse or civil partner,
- (c) a brother or sister of Y or of Y’s spouse or civil partner, or
- (d) the spouse or civil partner of a person falling within para (b) or (c).

#### 81.4.2 *Specified lender condition*

Section 174(1) ITEPA provides:

For the purposes of this Chapter an employment-related loan is a loan...

- (b) of a class described in subsection (2).

So we turn to s.174(2) ITEPA which provides:

For the purposes of this Chapter the classes of employment-related loan

---

<sup>8</sup> For the definition of “employee” see 33.3 (Employment/employer/employee).

are—

- A A loan made by the employee’s employer.
- B A loan made by a company or partnership over which the employee’s employer had control.
- C A loan made by a company or partnership by which the employer (being a company or partnership) was controlled.
- D A loan made by a company or partnership which was controlled by a person by whom the employer (being a company or partnership) was controlled.
- E A loan made by a person having a material interest<sup>9</sup> in—
  - (a) a close company which was the employer, had control over the employer or was controlled by the employer, or
  - (b) a company or partnership controlling that close company.

“Control” means control in the strict sense.<sup>10</sup>

#### 81.4.3 *By reason of employment*

There is no requirement that the loan has to be made by reason of the employment. In this respect the employee-related loan code is unlike the other benefit in kind codes. But two other rules may lead to the same outcome as the “by reason of employment” causation test: personal loan exemptions, and the rule that a person who facilitates a loan is regarded as having made it.<sup>11</sup>

#### 81.4.4 *Personal loan exemptions*

Section 174(5) ITEPA provides:

- A loan is not an employment-related loan if—
- (a) it is made by an individual in the normal course of the individual’s domestic, family or personal relationships, or
  - (b) it is made to a relative of the employee and the employee derives no benefit from it.

I refer to these rules as the “**personal loan exemptions**”. These are quite wide exemptions. In particular, straightforward loans to relatives of employees are not caught.

---

9 “Material interest” is defined in s.68 ITEPA.

10 See 99.2.2 (Definitions of “control”).

11 See 81.3.2 (“Making” a loan).

### 81.4.5 *Change in employee status*

What if a loan is made to someone who is not an employee (as defined) or prospective employee, but later becomes a shadow director? At first sight, leaving an existing loan outstanding would not give rise to a tax charge even after the borrower becomes a shadow director. However, if the loan is repayable on demand, not calling in the loan amounts to a “form of credit”. Thus there will be an income tax charge on the benefit in kind of loan repayable on demand if a borrower becomes a shadow director (and so becomes an “employee”).

What is the position if a loan is made to a shadow director who ceases to be a shadow director? There is no charge on a loan to a former employee. This was deliberate. EN ITEPA provides:

76. Where the Schedule E legislation provides that an amount shall be treated as an emolument of an employment only if provided in a year when the employment is held, this Act reproduces that limitation. The sections in the benefits code make it clear that such amounts or benefits will only be treated as earnings if they are paid/provided in a year in which the employment is held. If they are paid/provided at any other time they will not be treated as earnings and will be outside the “general earnings” to which section 17 [ITEPA] applies.

The rules for disguised remuneration, and EFURBS, would also need consideration.

### 81.4.6 *Employee coming to UK*

The EI Manual provides:

**26105. Loans in foreign currencies: Taxation of overseas loans** [Nov 2019]

*... Taxation of overseas loans in foreign currencies*

An employment-related loan (see EIM26102) made to an employee who comes to work in the UK is within the scope of the beneficial loans rules if:

- the loan is made at a time when the employee’s earnings are already chargeable to UK income tax as employment income (for example, if a loan is made after the employee has taken up employment in the UK and is resident and ordinarily resident in the UK for the year in which the loan is made); or
- the loan is made in contemplation of the employee working or living

in the UK (for example, if the loan is made as part of a package with a view to the employee working in the UK); or

- the employee, at a time when the employee's earnings are chargeable to UK income tax as employment income, in any way facilitates the continuation of a loan which was already in existence before the employee came to work in the UK.

As far as the final bullet is concerned, this is relevant where, for example, the loan is made not by the employer but by a third party such as a bank which is not connected with the employer and where the capital repayments and interest are deducted from the employee's salary. In these circumstances, the question is whether the loan continues when the employee is in the UK without any further involvement by the employer, or whether the employer does something which makes it easier for the employee to continue to have the loan.

An employer would not be facilitating the continuation of a loan merely because

- the loan is conditional on the employee continuing in the employment, or
- the employer deducts the interest and repayments of capital from the employee's salary.

If the employer pays a subsidy to the lender – for example, by paying annual interest on behalf of the employee – that would not necessarily mean that the employer was facilitating the continuation of the loan. The subsidy itself might however be taxable as an employment-related benefit under Section 201 ITEPA.

On the other hand the employer would be facilitating the continuation of the loan if

- the loan was conditional on the employer continuing to make regular payments to subsidise the interest which the employer might cease to make at any time, or
- the employer chose month by month or year by year whether to subsidise the loan.

## **81.5 Official rate of interest**

Section 181(1) ITEPA provides:

“The official rate of interest” for the purposes of this Chapter means the rate applicable under section 178 of FA 1989 (general power of Treasury to specify rates of interest).

Section 178 authorises regulations, and the law is in reg 5(1) Taxes

**(Interest Rate) Regulations 1989:**

Subject to paragraph (2), the rate applicable under section 178 for the purposes of Chapter 7 of Part 3 of the Income Tax (Earnings and Pensions) Act 2003 (“Chapter 7”) shall, on and after 6th April 2020, be 2.25% per annum.

**81.5.1 Foreign currency loan**

There is (somewhat miserly) provision for foreign currency loans. Reg 5(2) Taxes (Interest Rate) Regulations 1989 provides:

(2) In relation to a loan outstanding for the whole or part of a year of assessment where—

- (a) the loan was made in the currency of a country or territory specified in the Table below,
- (b) the benefit of the loan is obtained by reason of the employment of a person who normally lives in that country or territory, and
- (c) that person has lived in that country or territory at some time in the period of six years ending with that year,

the rate applicable under section 178 for the purposes of [Chapter 7] and the date on and after which that rate has effect shall be ascertained from the entries in the Table below relating to the country or territory concerned.

<b>Country or territory</b>	<b>Date on and after which applicable rate has effect</b>	<b>Applicable Rate</b>
Japan	6th June 1994	3.9% per annum.
Switzerland	6th July 1994	5.5% per annum.

The EIM provides:

**26106. Official rates for certain foreign currencies** [Nov 2019]

... There has been no change in either rate since 1994.

[The Manual summarises s.181 and continues:] The intention of these rules is to give relief for employees working temporarily in the UK, where interest rates in the overseas country are lower than interest rates in the UK (!). The relief does not apply to employees who come to the UK and live here permanently.

The expressions “normally lives” and “lived” have their natural commonsense meaning. An employee who came to work in the UK for four years and who returned home after the four years can be said to “normally live” in the home country. It is not necessary to maintain a residence in the overseas country during the period of employment in the

UK. The terms “lives” and “has lived” connote a degree of continuance if not permanence. A holiday in the home country for an employee working in the UK would not in itself be sufficient to establish that the employee had “lived” in the overseas country within the meaning of these rules. “Living” implies more than returning for a short holiday.

### **81.6 Loan to participators**

Section 455 CTA 2010 imposes a charge where a close company lends money to a participator. There is no charge under this section provided the company is not UK resident (and so not close) at the time the loan is made. It does not matter if the company later becomes UK resident.

### **81.7 Benefit to participators**

Section 1064 CTA 2010 imposes a charge where a “close company incurs an expense in, or in connection with, the provision for any participator of ... benefits or facilities of any kind”. However a close company does not “incur expense” in making a loan or in leaving the loan outstanding, and so there will be no charge under this section. Also a non-resident company is not close.

The same applies to the charge under s.464A CTA 2010 (arrangements conferring benefit on participator).

### **81.8 Company loans: GAAR**

A loan (instead of a dividend) is not an artificial transaction.<sup>12</sup> So one can be confident that a straightforward loan is not caught by the GAAR. But a loan may form part of a set of transactions which is caught.<sup>13</sup>

---

12 See 49.15.2 (“Artificial”/“devices”).

13 <https://www.gov.uk/government/publications/gaar-advisory-panel-opinion-of-17-november-2017-extraction-of-cash-or-equivalent-through-trust-interests> It seems surprising that the taxpayer thought this worth arguing before the panel.

## CHAPTER 81A

# PENSION SCHEMES AND IHT

????

### *Cross references*

The following topics are considered elsewhere:

### **A81.1 Scope of chapter**

This chapter considers IHT aspects of pension schemes. I consider the matter in the round but do not attempt to be comprehensive.

### **A81.2 Pension scheme history**

Hosking comments on the early history of pensions:<sup>1</sup>

Although pension schemes for employees existed in this country in the latter part of the 19<sup>th</sup> century, it was the raising of the level of taxation during World War 1 which brought home to many employers the desirability of taking out of their business assets money representing the accruing liability, moral or legal, for pensions for their employees and setting it aside as a separate entity in the form of a trust or under a contract with a Life Office. ... The FA 1956 has opened up a new era in pension provision. Until it was passed it was only those in pensionable employment for whom pension provision could be made economically. Now controlling directors, those who are self-employed and also employees in non-pensionable employment can save for their old age.

And he continues with a comment with contemporary resonance:

---

1 Hosking, *Pension Schemes and Retirement Benefits* (1956) which is a second edition of Hosking & Lane, *Superannuation Schemes* (1948).

While in essence the principles involved are simple, the provisions of the Act are complicated and several chapters are devoted to their elucidation...

There was another major change in 2006, when a single set of rules was introduced to replace the previous eight different regimes.

### A81.3 Types of pension scheme

There are countless types of pension scheme. The following is not a full list:

Type of scheme: current law	Abbreviation	Definition	See para
<i>IHT-exempt schemes</i>			
Registered pension scheme	RPS	Pt 4 FA 2004	1.4
Overseas pension scheme		s.150(7) FA 2004	
Qualifying non-UK pension scheme	QNUP	s.171A IHTA	1.5
Section 615(3) scheme	-	s.615(3) ICTA	1.6
Employer-financed retirement benefits scheme	EFURBS	s.393A ITEPA	1.7
Type of scheme: pre-2006 law	Abbreviation	Definition	See para
Sponsored superannuation scheme	SSS	s.624 ICTA	1.8
Retirement benefits scheme		s.611 ICTA	
Non-approved retirement benefits scheme		s.387 ITEPA	
Approved scheme		s.612(1) ICTA	
Relevant statutory scheme		s.611A ICTA	

FURBS (funded unapproved retirement benefit scheme) is not a statutory term (unlike EFURBS with the initial *E*). FURBS is used to describe an unapproved pension scheme funded with employer contributions, typically, I think, a SSS funded pre-2006.

Statute frequently refers to 3 types of scheme:

- (1) a registered pension scheme
- (2) a qualifying non-UK pension scheme
- (3) a s.615(3) scheme

I refer to these together as “**IHT-exempt schemes**”. (This term, as I use it, does not include other types of scheme which can qualify for some IHT relief, such as an SSS).

Funded schemes may be “**trust-based**”, ie the funds are held in trust; or “**contract-based**” ie the scheme takes the form of a contract with a Life Office.

## **A81.4 Registered pension scheme**

### *A81.4.1 Pension scheme*

Section 150 FA 2004 provides:

(1) In this Part [Part 4 FA 2004] “pension scheme” means a scheme or other arrangements, comprised in one or more instruments or agreements, having or capable of having effect so as to provide benefits to or in respect of persons—

- (a) on retirement,
- (b) on death,
- (c) on having reached a particular age,
- (d) on the onset of serious ill-health or incapacity, or
- (e) in similar circumstances.

### *A81.4.2 Registered pension scheme*

Section 272 IHTA provides the definition by reference:

registered pension scheme” has the same meaning as in Part 4 of the Finance Act 2004;

Section 150(2) FA 2004 provides:

A pension scheme is a registered pension scheme for the purposes of this Part at any time if it is at that time registered under Chapter 2.

Schemes that were approved before then were automatically registered on that date.

## **A81.5 Qualifying non-UK pension scheme**

Section 271A IHTA provides the definition for QNUP:

(1) For the purposes of this Act “qualifying non-UK pension scheme” means a pension scheme (other than a registered pension scheme) which—

- (a) is established in a country or territory outside the UK, and
- (b) satisfies any requirements prescribed for the purposes of this section by regulations made by the Commissioners for Her Majesty's Revenue and Customs.

(2) “Pension scheme” has the same meaning as in Part 4 of the Finance Act 2004 (see section 150 of that Act).

The regulations are Inheritance Tax (Qualifying Non-UK Pension Schemes) Regulations 2010 (“QNUPR”). Reg 3 QNUPR provides:

These Regulations apply to pension schemes which are established in a country or territory outside the UK.

## **A81.6 QNUP: Schemes recognised abroad**

Regulation 4 QNUPR provides:

- (1) For the purposes of section 271A of the Inheritance Tax Act 1984 (qualifying non-UK pension scheme) a pension scheme must-
- (a) be recognised for tax purposes under the tax legislation of the country or territory in which it is established (see regulation 5) and satisfy regulation 6 ...

Reg 5 QNUPR provides:

- (1) A scheme is recognised for tax purposes under the tax legislation of a country or territory in which it is established if it meets both Primary Condition 1 and Primary Condition 2 and either Condition A or Condition B.

### *A81.6.1 Primary Conditions*

Reg 5 QNUPR provides:

#### Primary Condition 1

The scheme is open to persons resident in the country or territory in which it is established.

#### Primary Condition 2

The scheme is established in a country or territory where there is a system of taxation of personal income under which tax relief is available in respect of pensions and-

- (a) tax relief is not available to the member on contributions made to the scheme by the member or, if the member is an employee, by their employer, in respect of earnings to which benefits under the scheme relate;
- (b) the scheme is liable to taxation on its income and gains and is of a kind specified in the Schedule to these Regulations; or
- (c) all or most of the benefits paid by the scheme to members who are not in serious ill-health are subject to taxation.

For the purposes of this condition "tax relief" includes the grant of an

exemption from tax.

### A81.6.2 *Conditions A & B*

Reg 5 QNUPR provides:

Condition A

(2) The scheme is approved or recognised by, or registered with, the relevant tax authorities as a pension scheme in the country or territory in which it is established.

Condition B

(3) If no system applies for the approval or recognition by, or registration with, relevant tax authorities of pension schemes in the country or territory in which it is established-

- (a) the scheme must be resident there;
- (b) the scheme rules must provide that at least 70% of a member's relevant scheme funds<sup>2</sup> will be designated by the scheme manager for the purpose of providing the member with an income for life, or, in the case of a member who has died, so provided immediately before the member's death; and
- (c) the pension benefits payable to the member under the scheme (and any lump sum associated with those benefits) must be payable no earlier than they would be if pension rule 1 applied.<sup>3</sup>

### A81.6.3 *Recognition*

Reg 6 QNUPR provides:

(1) This regulation is satisfied if paragraph (2), (3) or (4) applies.

(2) This paragraph applies if the scheme is an occupational pension scheme and there is a body in the country or territory in which it is established-

- (a) which regulates occupational pension schemes; and
- (b) which regulates the scheme in question.

- 
- 2 Defined in reg 2: "relevant scheme funds" means any sums and assets held under a pension scheme-
    - (a) to which these Regulations apply, and
    - (b) which would be subject to inheritance tax if the scheme did not meet the requirements for a qualifying non-UK pension scheme.
  - 3 Defined reg 2: "pension rule 1" means pension rule 1 in section 165 of the Finance Act 2004.

- (3) This paragraph applies if the scheme is not an occupational scheme and there is a body in the country or territory in which it is established-
- (a) which regulates pension schemes other than occupational pension schemes; and
  - (b) which regulates the scheme in question.
- (4) This paragraph applies if neither paragraph (2) nor (3) applies by reason only that no such regulatory body exists in the country or territory and-
- (a) the scheme is established in a member State, Norway, Iceland or Liechtenstein; or
  - (b) the scheme is one where-
    - (i) the scheme rules provide that at least 70% of a member's relevant scheme funds will be designated by the scheme manager for the purpose of providing the member with an income for life, or, in the case of a member who has died, so provided immediately before the member's death, and
    - (ii) the pension benefits payable to the member under the scheme (and any lump sum associated with those benefits) are payable no earlier than they would be if pension rule 1 applied.
- (5) In this regulation "occupational pension scheme" has the meaning given by section 150(5) of the Finance Act 2004.

### *A81.7 QNUP: International organisations*

Regulation 4 QNUPR provides:

- (1) For the purposes of section 271A of the Inheritance Tax Act 1984 (qualifying non-UK pension scheme) a pension scheme must ...
- (b) be established by an international organisation for the purpose of providing benefits for, or in respect of, past service as an employee of the organisation and satisfy regulation 7.
- (2) In this regulation "international organisation" means an organisation to which section 1 of the International Organisations Act 1968 applies by virtue of an Order in Council under subsection (1) of that section.

Reg 7 QNUPR provides:

This regulation is satisfied if-

- (a) the scheme rules provide that at least 70% of a member's relevant scheme funds will be designated by the scheme manager for the purpose of providing the member with an

- income for life, or, in the case of a member who has died, so provided immediately before the member's death, and
- (b) the pension benefits payable to the member under the scheme (and any lump sum associated with those benefits) are payable no earlier than they would be if pension rule 1 applied.

### **A81.8 Section 615(3) scheme**

Section 272 IHTA provides the definition by reference:

section 615(3) scheme” means a superannuation fund to which section 615(3) of the Taxes Act 1988 applies;

So we turn to s.615 ICTA, which still survives in the 1988 Act. Section 615(3) is an exemption from withholding tax on pension payments.

Section 615(6) ICTA provides:

- (6) Subsection (3) above applies to any superannuation fund which—
  - (a) is bona fide established under irrevocable trusts in connection with some trade or undertaking carried on wholly or partly outside the UK;
  - (b) has for its sole purpose (subject to any enactment or Northern Ireland legislation requiring or allowing provision for the value of any rights to be transferred between schemes or between members of the same scheme) the provision of superannuation benefits in respect of persons' employment in the trade or undertaking wholly outside the UK;
  - (c) is recognised by the employer and employed persons in the trade or undertaking; and
  - (d) meets the benefit accrual condition (see subsection (6A)).

In short, s.613(3) schemes are pension schemes for undertakings outside the UK. This overlaps with QNUPs. I leave the reader to follow the trail from there unaccompanied.

### **A81.9 EFURBS**

Section 393A ITEPA provides:

- (1) In this Chapter “employer-financed retirement benefits scheme”

means a scheme<sup>4</sup> for the provision of benefits consisting of or including relevant benefits to or in respect of employees or former employees of an employer.

(2) But neither—

(a) a registered pension scheme, nor

(b) a section 615(3) scheme,

is an employer-financed retirement benefits scheme.

### A81.10 Sponsored superannuation scheme

This type of scheme (“SSS”) was introduced in 1956. The definition was most recently found in s.624 ICTA 1988. This was repealed by FA 2004 with effect from 6 April 2006, but the term is relevant for 2006-SSS reliefs.<sup>5</sup>

Section 624 ICTA provided:

(1) ... “a sponsored superannuation scheme” means a scheme or arrangement—

(a) relating to service in particular offices or employments, and

(b) having for its objects or one of its objects to make provision in respect of persons serving in those offices or employments

[i] against future retirement or partial retirement,

[ii] against future termination of service through death or disability, or

[iii] against similar matters,

[c] being a scheme or arrangement under which any part of the cost of the provision so made is or has been borne<sup>6</sup> otherwise than by those persons by reason of their service

---

4 Section 393A(4) ITEPA provides an (unnecessary) definition:

“Scheme” includes a deed, agreement, series of agreements, or other arrangements.

See App 2.2.2 (Scheme or arrangement).

5 See 1.17 (2006-SSS reliefs).

6 Bearing the cost was defined in s.624(2) ICTA:

*For the purposes of subsection (1) above a person shall be treated as bearing by reason of his service the cost of any payment made or agreed to be made in respect of his service, if*

[a] *that payment or the agreement to make it is treated under the Income Tax Acts as increasing his income, or*

[b] *would be so treated if he were chargeable to tax under section 15 of ITEPA 2003 in respect of his general earnings from that service.*

- [d] (whether it is the cost or part of the cost  
 [i] of the benefits provided, or  
 [ii] of paying premiums or other sums in order to provide those benefits, or  
 [iii] of administering or instituting the scheme or arrangement).

The IHT Manual provides:

### **IHTM17039 Sponsored Superannuation Schemes**

The provision of the benefits does not need to be the main object of the scheme.

Some employee benefit trusts (IHTM42900) set up before 6 April 2006 will also be sponsored superannuation schemes, even though the only superannuation benefit they provide is a death or disability in service payment.

## **A81.11 IHT-exempt pension schemes: reliefs**

As there are many charges to IHT, there are a number of distinct reliefs, which are scattered across the IHT legislation.

### *A81.11.1 Contribution to exempt scheme*

A contribution to a scheme is not a transfer of value for various reasons:

- (1) A contribution by a member would not normally reduce their estate
- (2) A contribution by an employer would qualify for relief under s.12(1) IHTA.

But if there are any gaps, s.12(2) IHTA fills them:

Without prejudice to subsection (1) above, a disposition made by any person is not a transfer of value if it is a contribution under

- [a] a registered pension scheme,
- [b] a qualifying non-UK pension scheme or
- [c] a s.615(3) scheme in respect of an employee of the person making the disposition.

### *A81.11.2 Relief for 10-year/exit charges*

Section 58 IHTA provides:

- (1) In this Chapter [Chapter 3 Part 3 IHTA] “relevant property” means settled property in which no qualifying interest in possession subsists,

other than ...

- (d) property which is held for the purposes of
  - [i] a registered pension scheme,
  - [ii] a qualifying non-UK pension scheme or
  - [iii] a (3) scheme;<sup>7</sup>

The effect is that IHT-exempt schemes are outside the scope of IHT 10-year and exit charges.<sup>8</sup>

### A81.11.3 *Limited relief for pension rights*

Section 151(2) IHTA provides a relief for pension or annuity rights:

- [A] An interest in or under
  - [i] a registered pension scheme,
  - [ii] a qualifying non-UK pension scheme or
  - [iii] a section 615(3) scheme which comes to an end on the death of the person entitled to it ...

That is, in my terminology, an interest in/under an IHT-exempt scheme...

... shall be left out of account in determining for the purposes of this Act the value of his estate immediately before his death,

- [B] if the interest—
  - (a) is, or is a right to, a pension or annuity, and
  - (b) is not an interest resulting (whether by virtue of the instrument establishing the scheme or otherwise) from the application of any benefit provided under the scheme otherwise than by way of a pension or annuity.

That is a limited exception, so if a member has other rights under a scheme, these are in principle assets of their estate and subject to IHT on a lifetime gift or on death.

The ABI guidance note provides:

5.8 A claim might arise under section 3(1) of the Act where the death benefit is assigned whilst the member is in ill health. Although the death benefit and the pension rights are mutually exclusive, at the date of assignment both remain potentially available. The section 3(1) claim is

---

7 Defined in s.272 IHTA: “section 615(3) scheme” means a superannuation fund to which section 615(3) of the Taxes Act 1988 applies”.

8 See 70.7 (Relevant property).

on the loss to the estate, i.e:

- the open market value of the whole plan, i.e. the death benefits, less
  - the value of the pension rights retained at that date,
- i.e. the maximum commutable lump sum plus the value of the 10 year guaranteed annuity payable monthly in advance which the remainder of the fund would purchase.

5.9 Where any existing bolt-on term assurance exists (e.g. under IHTA84/S226A) and is assigned in similar circumstances a claim may also arise. The claim would be based on the open market value of the term assurance, which would be dependant inter alia on the individuals state of health.

#### A81.11.4 *Relief for omission to exercise right*

Section 12A IHTA provides a relief for IHT-exempt schemes:

(1) Where a person has a drawdown fund, section 3(3) above<sup>9</sup> does not apply in relation to any omission that results in the fund not being used up in the person's lifetime.

(2) For the purposes of subsection (1) above, a person has a drawdown fund if the person has—

- (a) a member's drawdown pension fund,
- (b) a member's flexi-access drawdown fund,
- (c) a dependant's drawdown pension fund,
- (d) a dependant's flexi-access drawdown fund,
- (e) a nominee's flexi-access drawdown fund, or
- (f) a successor's flexi-access drawdown fund, and

in respect of a money purchase arrangement under a registered pension scheme.

These terms are defined by reference in s.12A(4) IHTA:

(4) In this section ...

“money purchase arrangement” has the same meaning as in Part 4 of the Finance Act 2004 (see section 152 of that Act);

“member's drawdown pension fund”, “member's flexi-access drawdown fund”, “dependant's drawdown pension fund”, “dependant's flexi-access drawdown fund”, “nominee's flexi-access drawdown fund” and “successor's flexi-access drawdown fund” have the meaning given,

---

<sup>9</sup> See 70.5 (Omission: Deemed disposition).

respectively, by paragraphs 8, 8A, 22, 22A, 27E and 27K of Schedule 28 to that Act.

Section 12A(3) IHTA extends this relief to corresponding foreign schemes:

(3) For the purposes of subsection (1) above, a person also has a drawdown fund if sums or assets held for the purposes of a money purchase arrangement under a corresponding scheme<sup>10</sup> would, if that scheme were a registered pension scheme, be the person's—

- (a) member's drawdown pension fund,
- (b) member's flexi-access drawdown fund,
- (c) dependant's drawdown pension fund,
- (d) dependant's flexi-access drawdown fund,
- (e) nominee's flexi-access drawdown fund, or
- (f) successor's flexi-access drawdown fund,

in respect of the arrangement.

Section 12 (2ZA) IHTA provides:

Where a person who is a member of

[1] a registered pension scheme,

[2] a qualifying non-UK pension scheme or

[3] a section 615(3) scheme ...

That is, in my terminology, a member of an IHT-exempt scheme...

... omits to exercise pension rights under the pension scheme, section 3(3) above does not apply in relation to the omission.

Section 12 IHTA provides:

(2F) For the purposes of this section—

- (a) a person omits to exercise pension rights under a pension scheme if he does not become entitled to the whole or any part of a pension or lump sum (or both) under the pension scheme at a time when he was eligible to become so entitled (whether or not he does become entitled to any other benefits under the pension scheme)

---

10 Defined s.12A(4): In this section ... "corresponding scheme" means—

- (a) a qualifying non-UK pension scheme (see section 271A below), or
- (b) a section 615(3) scheme that is not a registered pension scheme".

(2G) In this section—

“entitled”, in relation to a pension or lump sum, shall be construed in accordance with section 165(3) or 167(1A), or section 166(2), of the Finance Act 2004;

“pension” has the same meaning as in Part 4 of that Act (see section 165(2) of that Act);

#### A81.11.5 *Relief for IIP trust charges*

Section 151(3) IHTA provides:

(3) Sections 49 to 53 above shall not apply in relation to an interest satisfying the conditions of paragraphs (a) and (b) of subsection (2) above.

### A81.12 **Non-exempt schemes**

I turn to consider schemes which are not IHT-exempt schemes.

#### A81.12.1 *Contribution to scheme*

A contribution to a scheme is not normally a transfer of value for various reasons:

- (1) A contribution by a member would not normally reduce their estate
- (2) A contribution by an employer would qualify for relief under s.12(1) IHTA.

There might be cases where a contribution is chargeable. The IHT Manual provides:

#### **IHTM17043 IHT charges: contributions made whilst in ill-health**

Contributions made into a person's own pension scheme may be transfers of value if they are made at a time when the person is unlikely to survive to take some or all of the retirement benefits and the death benefits will be paid outside the estate. Any transfer of value depends on the health of the scheme member at the time the contributions were made. In general, where contributions are made more than 2 years before a death you can assume that the member was in normal health, unless there is evidence that suggests they were not. If the member is in normal health there is no transfer of value.

Where contributions have been made to a pension scheme within 2 years of death the relevant section of form IHT409 should have been completed. If the contributions are substantial and unusual (where they

are not made under regular arrangements that have been in existence for more than 2 years) you should establish the full facts and refer to Technical for advice on any transfer of value.

This only applies to non-exempt schemes, as IHT-exempt schemes have a statutory relief.

#### A81.12.2 *10-year and exit charges*

Non-exempt trust-based schemes are within the scope of 10-year and exit charges, unless within

(1) 2006-SSS relief; see 81.18;

or

(2) s.86 IHTA (not discussed here)

#### A81.12.3 *Omission to exercise right*

Tax Bulletin 2 (Feb 1992) provides:

##### **Retirement Benefits Under Private Pension Contracts - s.3(3) IHTA** BACKGROUND

Many pension scheme benefits are written under trust on terms which provide that

[1] the retirement benefit (that is, the pension) continues to be for the policyholder and

[2] the death benefit is assigned, normally to members of the family.

The two benefits are mutually exclusive: once the retirement benefit is taken, the death benefit lapses.

A common feature of these schemes is that from a specified age – from fifty upwards depending on the type of scheme – the policyholder can elect to take the retirement benefit. There are cases where policyholders do not elect to take the benefit at the specified age and have still not done so when they die (so that the death benefit becomes payable). In such cases the Capital Taxes Offices (CTO) take the view that, in certain circumstances, the failure to exercise the right to take the retirement benefit before death can give rise to a lifetime charge to inheritance tax under Section 3(3).

The Association of British Insurers asked the CTO to clarify the circumstances in which a Section 3(3) claim might arise with these pension arrangements. The CTO set out their view in correspondence with the Association. It is summarised here.

##### **The Scope for a s.3(3) Claim**

In practice, the overwhelming majority of pension arrangements are not affected. The CTO expect to see very few cases where a claim would even be considered. This is because

[1] the vast majority of policyholders exercise their right to take retirement benefits during their lifetime or survive to the age beyond which they cannot defer taking the retirement benefit. All these cases fall outside the scope of a potential claim

[2] the chargeable estate of many policyholders will be below the inheritance tax threshold. If no tax is actually payable CTO would naturally not pursue a claim

[3] any claims that do arise are likely to be limited to retirement annuity contracts or personal pension schemes. Only exceptionally would claims involve occupational pension schemes

[4] there is no question of a claim being raised in cases of genuine pension arrangements, that is, where it is clear that the policyholder's primary intention is to provide for his or her own retirement benefit.

CTO would consider raising a claim in such cases as remain only where there was evidence that the policyholder's intention in failing to take up retirement benefits was to increase the estate of someone else (the beneficiaries of the death benefit) rather than to benefit himself or herself.

To this end, CTO will look closely at certain pension arrangements where the policyholder became aware that he or she was suffering from a terminal illness, or was in such poor health that his or her life was uninsurable, and at or after that time the policyholder

[1] took out a new policy and assigned the death benefit on trust, or

[2] assigned on trust the death benefit of an existing policy, or

[3] paid further contributions to a single premium policy or enhanced contributions to a regular premium policy where the death benefit had been previously assigned on trust, or

[4] deferred the date for taking retirement benefits.

In these circumstances it would be difficult to argue that the actions of the policyholder were intended to make provision for his or her own retirement given the prospect of an early death. Even then CTO would not pursue the claim where the death benefit was paid to the policyholder's spouse and/or dependents (that is, any individuals financially dependent on the policyholder). In addition, a claim would not normally be pursued where the policyholder survived for two years or more after making any of these arrangements but the CTO reserve the right to examine each case individually.

For the avoidance of doubt, CTO would adopt a similar approach in cases involving

- personal pension schemes set up under deed poll under the Superannuation Funds Office or
- Integrated Model rules, or buy-out policies under trust, approved under ICTA 1988, Section 591(2)(g) (commonly known as 'Section 32 policies' after the original legislation).

The s.3(3) charge on omissions has ceased to apply to IHT-exempt schemes<sup>11</sup> but the statement remains relevant for other schemes.

The IHTM provides:

### **IHTM17102 income drawdown**

Income drawdown is the situation where the deceased has reached pension age but has chosen not to buy an annuity that will provide their pension. Instead they decide to draw a certain level of income from their pension fund with a view to buying an annuity at a later date.

The option to defer purchase of an annuity was introduced by FA95 at a time when annuity rates were relatively poor. This allowed the member to defer taking their whole retirement benefits. They would take a part lump sum and a certain level of income drawdown (between 35% - 100% of what the fund produced) and then at some later date (but no later than age 75) when annuity rates had hopefully improved the member could go back and purchase an annuity with the balance of the fund.

For Inheritance Tax (IHT) purposes the member is effectively taking less than their full entitlement when they retire so there is a possibility of an IHT lifetime transfer (IHTM14000) for a failure to exercise a right under IHTA84/S3 (3)...

### **IHTM17103 ABI guidance note**

In June 1999 the Association of British insurers (ABI) (after discussion with HMRC Inheritance Tax) issued a guidance note setting out the basis on which a claim to Inheritance Tax might arise. The text of the guidance note is as follows:

#### **1. Introduction**

1.1 This paper sets out the conclusions reached in discussions and correspondence between ABI and the Capital Taxes Office on the Inheritance Tax position regarding the deferral of annuity

---

<sup>11</sup> See 1.11.4 (Omission to exercise right).

purchase/income withdrawal facility under personal pensions.

1.2 While there will be cases where there is an Inheritance Tax liability, these are likely to be relatively few...

## **2. Background**

[The statement summarises the s.5(2) and 3(3) IHTA charges and continues:]

2.4 During the recent discussions ABI argued that income withdrawal was a direct alternative to annuity purchase and so electing the income withdrawal option should not carry any Inheritance Tax implications which do not apply where an annuity has been bought. We do not accept this argument. They point out that after the death of a member who had elected for income withdrawal, the lump sum is paid subject to a 35% tax charge. That is therefore an indication that at that time the money has ceased to be what was previously a tax approved pension scheme. The protection under IHTA84/S151 of the Act would not apply and there is therefore nothing to prevent an Inheritance Tax liability arising where this is appropriate. (Section 151 provides, broadly, that an interest in a pension or annuity under an exempt approved occupational scheme, an approved personal pension or an approved retirement annuity contract will not be taken into account in determining the value of an individuals estate immediately before his death.) ...

### **The application of Section 3(3) to income withdrawal**

3.1 The circumstances in which an Inheritance Tax charge might be considered under section 3(3) are where decisions have been made prima facie with the aim of benefiting others on death rather than to make provision for the members retirement. If having elected to take income withdrawal it can be shown that the member (or survivor, where applicable) was in normal health and that the option was elected for commercial and retirement planning reasons, a section 3(3) claim would not arise. As a rule of thumb, if the member makes a decision, unless it was known the member is in ill health, and lives for two years, that is evidence that he was not suffering from ill-health when he made the decision (ill-health in this context means terminal ill-health or such ill health that the members life is uninsurable). We acknowledge that income withdrawal will usually be elected for commercial and retirement planning rather than donative reasons.

### **Valuation of a Section 3(3) Claim**

3.2 When a section 3(3) claim does arise the claim is on the failure to take up the retirement benefits available to the member at the instant before death, i.e. on the loss to the estate at that date. At that point the

member had the right to use the whole remaining fund for the purchase of an annuity.

3.3 The section 3(3) claim is therefore based on the value of an annuity guaranteed for 10 years payable monthly in advance calculated by HMRC, which the balance of the whole fund would have purchased. The annuity value for this purpose will be based upon the drawdown providers single life rates, without increases or provision for dependants except to the extent that this is specified in the scheme rules. (Any lump sum payment would have to have been taken at the outset of drawdown and so would not feature in the calculation.)

*Fryer v HMRC* has a discussion, not considered here, on valuation of the value transferred in these circumstances.<sup>12</sup>

3.4 We stress that no claim under section 3(3) will normally arise where there is no change in the established pattern of income withdrawal i.e. where what was clearly initially a commercial transaction or plan continues without change despite intervening ill health. In addition the concessions given in the Tax Bulletin of February 1992 will continue to apply and the result should be that very few claims will arise.

**The importance of planning within the advice process: the implications for Inheritance Tax**

3.5 It is essential that, as part of the advice process, an adviser discusses death during income withdrawal and the Inheritance Tax position. General advice about death and Inheritance Tax on the plan will not prejudice the position as regards a claim. However, this would not be the case if the advice dealt with, say, a scenario whereby the holder became ill and the drawdown was altered because of the ill-health of the

---

12 See too **IHTM17306 omission to exercise a right: calculation of the charge**

When there is an omission to exercise a right to take pension benefits, the amount of the deemed disposition derives from the loss to the estate resulting from the failure to take up the available benefits at the latest time these benefits could be taken, which is immediately before the members death.

The calculation is based on the value of an annuity guaranteed for 10 years, payable monthly in advance, which the balance of the whole fund would have purchased. The annuity value for this purpose will be based on the drawdown providers single life rates, without increases or provision for dependants except to the extent that this is specified in the scheme rules.

Technical and the Boards Actuarial Officer can advise on any potential liability to IHT under ITA84/S3 (3).

holder.

3.6 If a clear commercial plan of action is agreed and documented while the individual is in good health, and is then acted upon, much greater certainty then exists regarding Inheritance Tax. The plan would set out the level of income to be taken for each year and might include other parameters, such as when an annuity is to be bought. If this member later becomes terminally ill, or so ill as to be uninsurable, this does not of itself give rise to an Inheritance Tax charge. If he then decides to reduce any payments received under drawdown this will give rise to a potential Inheritance Tax charge as this is a decision driven by being ill. The charge will arise on the annuity capable of being produced by the whole of the remaining residual fund...

In the case of a trust-based scheme, a right under the scheme is a settlement-power and should be disregarded; see s.47A IHTA and the definition of property in s.272 IHTA. This would not apply to a contract-based scheme. That may seem anomalous, but it is not, as a trust-based scheme is potentially within 10-year and exit charges, which a contract-based scheme is not. The point did not arise in *Parry* or *Fryer*, which were contract-based schemes.

### A81.13 General powers

#### A81.13.1 *General power: IHT-exempt scheme*

Section 151(4) IHTA provides:

In relation to an interest in or under

- [a] a registered pension scheme,
- [b] a qualifying non-UK pension scheme or
- [c] a section 615(3) scheme,

That is, in my terminology, an interest in/under an IHT-exempt scheme...

section 5(2) above shall apply as if the words “other than settled property” were omitted (in both places).

Amended as directed, s.5(2) IHTA provides:

- [A] A person who has a general power which enables him, or would if he were sui juris enable him,
  - [a] to dispose of any property ~~other than settled property~~, or
  - [b] to charge money on any property ~~other than settled property~~,

- shall be treated as beneficially entitled to the property or money;
- [B] and for this purpose “general power” means a power or authority enabling the person by whom it is exercisable to appoint or dispose of property as he thinks fit.

In practice, general powers under exempt pension schemes are not common. This provision effectively discourages them: perhaps that was the point of it. Death benefits are payable at the discretion of the scheme trustees, or held on the terms of a trust, so they are not within the estate.

This provision applies to IHT-exempt schemes, but not to other types of scheme. That makes sense where schemes are within the scope of IHT. It might seem rather favourable to an SSS which qualifies for 2006-SSS relief, but it fits the wider pattern of continuing transitional exemptions for these schemes.

#### A81.13.2 *What is a general power*

The ABI guidance note<sup>13</sup> provides:

#### **4. The application of Section 5(2) to income withdrawal**

4.1 ... An example of a general power is the option of the survivor to take a lump sum within two years of the members death during income withdrawal. If the survivor dies within those two years the value of the lump sum would form part of the survivors estate for Inheritance Tax purposes unless the survivor gives up the right to take the lump sum, at a time when he/she could reasonably have expected to live to enjoy the benefits, by effecting an irrevocable disclaimer of that right.

4.2 ... a potential Inheritance Tax liability is unlikely where the member had a power of nomination in relation to a lump sum death benefit, revocable in life but binding on death, to select from a limited class of survivors. There would be a claim, of course, if the effect of a revocation is that the lump sum is paid to the legal personal representatives as of right.

The IHT Manual provides:

#### **IHTM17052 general power over death benefits**

The issue of a general power over property arose in the case of *Kempe v IRC* [2004] STC (SCD) 467. This case involved a term life policy

---

13 See 1.15.4 (Omission to exercise SSS rights).

where the policyholder could designate the beneficiaries who would receive the sum assured when he died. After the policyholder's death the sum assured was paid to his sisters as the designated beneficiaries. It was held that the deceased did have a general power to dispose of the property, so it fell into his estate.

### A81.13.3 *Relief for spouse/dependent*

Section 152 IHTA provides:

Where on a person's death an annuity becomes payable under

- [a] a registered pension scheme,
- [b] a qualifying non-UK pension scheme or
- [c] a section 615(3) scheme

to a widow, widower, surviving civil partner, dependant or nominee of that person and under the terms of the scheme a sum of money might at his option have become payable instead to his personal representatives, he shall not, by virtue of section 5(2) above, be treated as having been beneficially entitled to that sum.

### A81.14 **Transfer of death benefit**

The IHT Manual provides:

#### **IHTM17070 lifetime transfers of death benefits**

Lifetime transfers of death benefits can occur when a pension scheme member changes or transfers pension rights at a time when they are in ill-health, whatever their reason is for doing so. This can happen when:

- a member assigns their death benefits to a trust (IHTM17071)
- a member transfers their pension fund from one scheme to another (IHTM17072)

Where the transferor is in good health and is likely to take their pension benefits at some later date, then the death benefits have only a nominal value. In general, where transfers are made more than 2 years before a death you can assume that the member was in normal health, unless there is evidence to the contrary. In that case there is no transfer of value.

There may be lifetime transfers to consider even where an estate is spouse or civil partner exempt...

#### **IHTM17071 assignment of death benefits**

The right to a death benefit from a pension scheme is often transferred irrevocably to a discretionary trust. Many pension providers have

standard documents to put this into effect. This type of transfer or assignment is a lifetime transfer at the date of transfer and can result in a lifetime transfer of value if the scheme member is in ill-health at the time.

Not all cases though involve irrevocable transfers. Where a trust is:

- only one of the potential beneficiaries, even if nominated in a letter of wishes, and
- the pension provider retains the right to make a payment at its discretion

there is no lifetime transfer.

It is also possible that an irrevocable nomination could be made in favour of other beneficiaries. However, this is unlikely because a beneficiary who is an individual may unexpectedly pre-decease the pension scheme member.

Details of any assignment of death benefits within the 2 years before a death should be included on form IHT409 (IHTM17015).

### **A81.15 Transfer between schemes**

A transfer between schemes may reduce the member's estate, if their rights under the new scheme are less valuable. So to procure a transfer, or omit to prevent one, may be a transfer of value.

Alternatively a transfer between schemes may increase the member's estate, if their rights under the new scheme are more valuable. In that case an omission to procure a transfer may be a transfer of value.

#### **IHTM17072: transfers between pension schemes [Mar 2021]**

A pension scheme member has a statutory right to transfer their pension fund from one scheme to another. When this type of transfer is made, the member surrenders their rights under the first scheme in return for rights under the second. A person can do this regardless of their rights to benefits under the first scheme. This includes the situation where there is an existing irrevocable nomination in relation to death benefits, for example where the death benefits have been assigned on discretionary trusts. The second scheme is not subject to directions given in relation to the first scheme.

The funds do not rejoin the member's estate during transit. What is in the estate at this point is the right to determine the terms of payment of death benefits in the second scheme. This right has value because the member could direct the payment to their own estate. If payment is not directed to the estate then there may be a loss to the estate depending on

the member's health at the time.

If a person is in normal health at the date of the transfer then the loss to the estate is nominal. If they are in ill-health at the date of the transfer then the loss may be significant.

Details of any transfers made within the 2 years before the death should be reported on the IHT409 (IHTM17014)

This issue arose in *HMRC v Parry*<sup>14</sup> where the taxpayer (somehow) qualified for IHT arm's length transaction relief. But the facts were unusual.

### **A81.16 Lump sum benefit: position before payment**

The IHT Manual provides:

#### **IHTM17083 Status of funds after death but before payment**

When a person dies and the rules of a trust-based pension scheme mean that a lump sum death benefit becomes payable, this sum is held by the pension scheme trustees on trust before the payment to beneficiaries.

But, it is no longer being held for the purposes of the pension scheme.

This seems odd, as there is not normally an identifiably distinct sum held by trustees, and if there was, it is still held for the purposes of the scheme, as it the payment to a trust is one of the purposes of the scheme. The benefit is typically a death benefit (payable on the death of the member) but the same applies to other benefits.

A statutory rule governs the position before payment from an IHT-exempt scheme. Section 58(2A) IHTA provides a relief for IHT-exempt schemes:

For the purposes of subsection (1)(d) above [relief for 10-year/exit charges<sup>15</sup>]

- (a) property applied to pay lump sum death benefits within section 168(1) of the Finance Act 2004 in respect of a member of a registered pension scheme is to be taken to be held for the purposes of the scheme from the time of the member's death until the payment is made, and
- (b) property applied to pay lump sum death benefits in respect of a

---

<sup>14</sup> [2020] UKSC 35. See 70.11.1 (Operation confers benefit).

<sup>15</sup> See 1.11.2 (Relief for 10-year/exit charges).

member of

- [i] a qualifying non-UK pension scheme or
- [ii] a section 615(3) scheme

is to be taken to be so held if the benefits are paid within the period of two years beginning with the earlier of the day on which the member's death was first known to the trustees or other persons having the control of the fund and the day on which they could first reasonably be expected to have known of it.

### A81.17 Scheme-benefit trust

A pension scheme benefit may be paid to a trust (“**a scheme-benefit trust**”). The starting point is that a scheme-benefit trust is not a pension scheme, it does not qualify for pension scheme reliefs, and it is taxed like any other trust.

The IHTM provides:

#### **IHTM17084 settlement of death benefits**

When a payment is made by a pension scheme into a trust set up to receive death benefits, the property is no longer held for the purposes of a pension scheme. It is treated in the same way as any other relevant property and is liable to the ten-year anniversary charge and exit charges (IHTM04096).

It is necessary to consider separately:

- (1) a trust of a benefit from an IHT-exempt scheme
- (2) a trust of a benefit from a non-exempt scheme

#### A81.17.1 *Trust of benefit from IHT-exempt scheme*

Section 151(5) IHTA provides:

Where

- [a] Where a benefit has become payable under
  - [i] a registered pension scheme,
  - [ii] a qualifying non-UK pension scheme or
  - [iii] a section 615(3) scheme ...

That is, in my terminology, under an IHT-exempt scheme ...

- [b] and the benefit becomes comprised in a settlement made by a person other than the person entitled to the benefit, the settlement shall for the purposes of this Act be treated as made by

the person so entitled.

The IHT Manual provides:

**IHMT17085. The identity of the settlor** [Mar 2021]

The settlor of a discretionary trust created to receive death benefits paid from a pension scheme is the pension scheme member.

This is correct, for IHT purposes, and assuming that the pension scheme is an IHT-exempt scheme, because of s.151(5), and that is presumably what HMRC have in mind. For the position for other taxes, or where the pension scheme is not an IHT-exempt scheme, see below.

The IHTM provides:

**IHTM17084 settlement of death benefits**

Where the pension scheme is itself not trust based (for example it is a retirement annuity contract, and the death benefits are paid into a relevant property trust) the ten-year anniversary is based on the date the trust was set up by the member, either during their lifetime or by their Will.

Where the pension scheme paying the death benefits is a trust based scheme, the funds are moving from one settlement to another and IHTA1984/S81 will apply to determine the date of the 10-year anniversary. In this case, the date for the ten-year anniversary in the receiving trust is based on the date the member first joined the original pension scheme.

The Manual provides a straightforward example.<sup>16</sup>

---

<sup>16</sup> For completeness, the example (Hilary) is as follows:

- H became a member of a trust based pension scheme on 15 May 1974
- She set up a new discretionary trust on 2 September 2007 with 100 and completed a letter of wishes nominating the trust to receive any death benefits from the pension scheme
- H died on 3 January 2012
- The death benefit is paid at the discretion of the pension scheme trustees to the new trust on 4 August 2012.

The lump sum death benefit is relevant property from the date of payment on 4 August 2012. However, the ten year anniversary is based on the date H joined the pension scheme on 15 May 1974, so will first apply to these funds on 15 May 2014. The ten-year anniversary charge relating to the initial 100 used to set up the trust is based on the date the trust was set up, so it will first apply on 2 September 2017

A81.17.2 *Trust of benefit from EFRBS*

IHMT17085 continues:

Property settled on the trusts of an employer-financed retirement benefit scheme (EFRBS) (IHTM17027) on or after 6 April 2006 is treated in the same way as settled property in any other discretionary trust. So it is liable to the ten-year anniversary charge and exit charges (IHTM04096).

This is correct. The Manual then becomes more contentious:

In this case the scheme member is a settlor for Inheritance Tax (IHT) purposes. This applies to:

- contributions made by the member as an individual, and
- contributions made by their employer (even where this is non-contributory for the employee (member) and is wholly financed by the employer). This is because pension rights and benefits are derived from payments by the employer as deferred or delayed remuneration for the employee's current work. This principle was established in *Parry v Cleaver* and *The Halcyon Skies*.<sup>17</sup>

In this way, the scheme member has provided funds directly or indirectly and is the settlor for IHT purposes.

I think the context suggests that this is not discussing the question of who is the settlor of an EFURBS<sup>18</sup>: it is discussing the question of who is the settlor of a trust to which an EFURBS makes a payment (“**EFURBS-benefit trust**”).

A member is clearly the settlor of an EFRBS-benefit trust if:

- (1) They are actually entitled to the benefit and assign it to the trust; or
- (2) They have a general power of appointment over the benefit and creates the trust by exercise of that power.

In other cases the position is different. The two cases cited in the Manual are authority for the well-settled rule that:

... pensionable employment is more valuable to a man than the mere

---

*Author's comment:* The last sentence is of theoretical interest, as no-one will bother about the IHT on the initial nominal £100.

<sup>17</sup> *Parry v Cleaver* [1970] AC 1; *The Halcyon Skies* [1977] QB 14.

<sup>18</sup> As to who is the settlor of an EFIRBS, see 94.39 (Pension/employee benefit trust).

amount of his weekly wage. It is more valuable because by reason of the terms of his employment money is being regularly set aside to swell his ultimate pension rights whether on retirement or disablement. His earnings are greater than his weekly wage. [Where the wage is £20 with total contributions to the pension fund of £4 per week] his employer is willing to pay £24 per week to obtain his services, and it seems to me that he ought to be regarded as having earned that sum per week. The products of the sums paid into the pension fund are in fact delayed remuneration for his current work. That is why pensions are regarded as earned income.<sup>19</sup>

The non-tax cases cited in the IHT Manual do not address the issue of who is the settlor for tax purposes. The fact that a pension is delayed remuneration does not answer the tax issue. The member is not generally the settlor of the EFRBS before the transfer of a benefit to the EFURBS-benefit trust.<sup>20</sup> How can they become the settlor? The transfer from one trust (EFURBS) to another (the EFURBS-benefit trust) should not alter the identity of the settlor.<sup>21</sup> It may be said that the EFURBS represents earning of many members but the EFURBS-benefit trust isolates or represents earnings of one particular member. But even so, the required element of bounty is missing. That is why s.155(5) IHTA is needed.

## A81.18 2006-SSS reliefs

---

19 *Parry v Cleaver* [1970] AC 1 at p.16. Similarly, *Imperial Group Pension Trust v Imperial Tobacco* [1991] 1 WLR 589 at p.579:

“Pension scheme trusts are of quite a different nature to traditional trusts. The traditional trust is one under which the settlor, by way of bounty, transfers property to trustees to be administered for the beneficiaries as objects of his bounty. Normally, there is no legal relationship between the parties apart from the trust. The beneficiaries have given no consideration for what they receive. The settlor, as donor, can impose such limits on his bounty as he chooses ... a pension scheme is quite different. Pension benefits are part of the consideration which an employee receives in return for the rendering of his services. In many cases, ... membership of the pension scheme is a requirement of employment. In contributory schemes ... the employee is himself bound to pay for his or her contributions. Beneficiaries of the scheme, the members, far from being volunteers have been given valuable consideration. The company employer is not conferring a bounty.”

20 See 94.39 (Pension/employee benefit trust).

21 See 94.12.1 (Transfer: A's trust to B's trust).

Para 56 sch 36 FA 2004 provides a set of reliefs which I call “**2006-SSS reliefs**”.

#### A81.18.1 *2006-SSS reliefs: Requirements*

- (1) This paragraph applies in relation to a fund or scheme—
- (a) which is not
    - [i] a registered pension scheme,
    - [ii] a qualifying non-UK pension scheme<sup>22</sup> or
    - [iii] a superannuation fund to which section 615(3) of ICTA applies, but
  - (b) to which section 151 of the Inheritance Tax Act 1984 (treatment of pension rights) applied immediately before 6th April 2006.

Schemes within (a) are IHT-exempt schemes, they are excluded from s.151 transitional relief because they do not need it. We need to identify the other schemes to which s.151 formerly applied.

Our journey takes us to the pre-2006 s.151 IHTA. This provided as follows:

#### **151 Treatment of pension rights, etc**

*(1) This section applies*

- [a] to any fund to which section 615(3) of the Taxes Act 1988 applies,*
- [b] to any scheme approved under section 620 or 621 of that Act,*
- [c] to any exempt approved scheme or statutory scheme as defined in Chapter I of Part XIV of that Act and*
- [d] to any other sponsored superannuation scheme as defined in section 624 of that Act.*

*(1A) This section also applies to approved personal pension arrangements within the meaning of Chapter IV of Part XIV of the Taxes Act 1988;*

Thus pre-2006 s.151 applied to 5 categories of scheme. Four of these are still IHT-exempt schemes, and so do not need 2006-SSS relief.

---

22 Defined by reference: Para 56(4) sch 36 FA 2004 provides:

In this paragraph “qualifying non-UK pension scheme” has the same meaning as in the Inheritance Tax Act 1984 (see section 271A of that Act).

Para [d] is not on the post-2006 IHT-exempt scheme list, and this is where 2006-SSS reliefs are needed. In short, 2004-transitional relief applies to a sponsored superannuation scheme (“SSS”).

Why could the section not say this more directly? Perhaps the object is to include other schemes which were approved pre-2006, but later lost approval?

#### A81.18.2 *SSS: no post-2006 contribution*

Para 56 sch 36 FA 2004 provides 2 reliefs:

- (2) If no contributions are made under the fund or scheme on or after that date—
- (a) section 151 of the Inheritance Tax Act 1984 continues to apply to the fund or scheme on and after that date for all purposes of that Act, and
  - (b) property which is part of or held for the purposes of the fund or scheme does not constitute relevant property for the purposes of Chapter 3 of Part 3 of that Act (settlements without interest in possession).

This confers the reliefs which apply to IHT exempt pension schemes: see 1.9 (IHT-exempt pension schemes).

There is no transitional relief comparable to s.12A/12(2ZA) IHTA. so an omission to exercise a right under a SSS may be chargeable on basic principles.<sup>23</sup> I wonder if that is deliberate.

#### A81.18.3 *SSS: post-2006 contribution*

If there are post-2006 contributions, there is a proportionate relief. In practice this may not be so common.

Para 56 sch 36 FA 2004 provides:

- (3) In any other case, paragraphs 57 and 58 apply to the fund or scheme on and after that date.

Para 57 sch 36 FA 2004 provides:

- (1) The percentage of the assets of the fund or scheme which at any time is the protected percentage of those assets does not at that time

---

<sup>23</sup> See 70.4.1 (Disposition: Omission).

constitute relevant property for the purposes of Chapter 3 of Part 3 of the Inheritance Tax Act 1984 (settlements without interest in possession).

(2) “The protected percentage” of the assets of the fund or scheme at a time is—

$$(ACV / V) \times 100$$

where—

V is the market value of the assets of the fund or scheme at that time, and

ACV is the adjusted commencement value, that is an amount equal to the market value of the assets of the fund or scheme on 5th April 2006, but subject to the adjustments provided by sub-paragraph (3).

(3) The adjustments are—

- (a) an increase by the percentage by which the retail prices index for the month of September immediately preceding the time in question is greater than that for April 2006, and
- (b) a reduction by the amount of any relevant payments made under the fund or scheme on or after 6th April 2006 and before that time.

(4) “Relevant payments” are payments other than—

- (a) payments of costs or expenses, or
- (b) payments which are (or will be) income of any person for any of the purposes of income tax.

Para 58 sch 36 FA 2004 provides:

(1) Section 151 of the Inheritance Tax Act 1984 (treatment of pension rights) continues to apply to so much of the assets of the fund or scheme at any time as does not exceed the amount that is the protected amount at that time.

(2) But sub-paragraph (1) does not affect the operation of subsection (1)(d) of section 58 of that Act (because paragraph 57 makes provision about the extent to which the assets of the fund or scheme constitute relevant property within the meaning given by that section).

(3) If inheritance tax has not previously been chargeable (otherwise than only because of this paragraph) by reference to the value of the assets of the fund or scheme on or after 6th April 2006, the protected amount is an amount equal to the amount of the market value of the assets of the fund or scheme on 5th April 2006, but subject to the adjustments provided by sub-paragraph (4).

(4) The adjustments are—

- (a) an increase by the percentage by which the retail prices index for the month of September immediately preceding the time in question is greater than that for April 2006, and
  - (b) a reduction by the amount of any relevant payments made under the fund or scheme on or after 6th April 2006 and before that time.
- (5) If inheritance tax would (apart from this paragraph) have previously been chargeable by reference to the value of the assets of the fund or scheme on one or more occasions on or after 6th April 2006, the protected amount is what it was immediately before the occasion, or (where there has been more than one) the last occasion, on which inheritance tax would have been so chargeable (“the relevant tax occasion”), but—
- (a) reduced by the value of the property on which inheritance tax would have been chargeable on the relevant tax occasion, and
  - (b) subject to the adjustments provided by sub-paragraph (6).
- (6) The adjustments are—
- (a) an increase by the percentage by which the retail prices index for the month of September immediately preceding the time in question is greater than that for the month in which the relevant tax occasion fell, and
  - (b) a reduction by the amount of any relevant payments made under the fund or scheme since the relevant tax occasion.
- (7) “Relevant payments” are payments other than—
- (a) payments of costs or expenses, or
  - (b) payments which are (or will be) income of any person for any of the purposes of income tax.

IHTM17039 provides that “A transfer from one pension scheme to another is not treated as a new contribution, so the funds in one protected scheme may be transferred to another protected scheme without the exclusion being lost.”

### **A81.19 Reservation of benefit**

GWR does not apply on a corporate employer making a contribution, as this only applies where an individual makes a disposal by way of gift.

GWR would not normally apply on an individual making a contribution, as that would not normally be “by way of gift”.

GWR might apply on a disposal of a pension benefit (typically, a disposal of a death benefit by a member).

### A81.19.1 *GWR: IHT-exempt pension scheme*

SP 10/86 provides an GWR exemption for IHT-exempt schemes:

The Board confirm that their previous practice of not charging capital transfer tax on death benefits that are payable from tax approved occupational and retirement annuity schemes under discretionary trusts also applies to Inheritance Tax

The practice extends to tax under the gift with reservation rules as well as to tax under the ordinary inheritance rules.

### A81.19.2 *GWR: Non-exempt pension scheme*

There may be a GWR if a member disposes of a benefit (typically a death benefit) under a non-exempt scheme and reserves a benefit. The IHT Manual provides :

#### **IHTM17074 unregistered schemes and gifts with reservation**

Where a member of an employer-financed retirement benefits scheme (EFRBS) (IHTM17027) makes (or is deemed to make) a disposition in connection with the EFRBS, the disposition may constitute a gift with reservation, where the class of discretionary beneficiaries includes the members personal representatives. In these circumstances:

- the scheme member will be the settlor (IHTM17073) because they have provided funds, either directly or indirectly, and
- the inclusion of their legal personal representatives amongst the class of beneficiaries is not consistent with their exclusion or virtual exclusion from the potential conferment of substantial benefit on them.

The rationale for this is as follows:

- the EFRBS is a settlement for Inheritance Tax purposes
- an unregistered scheme is not within the protection afforded by Statement of Practice 10/86, so the gift with reservation provisions may in principle apply to an EFRBS
- the death benefits provision under an EFRBS is an item of property for IHT purposes IHTA84/S272. As such it can be the subject of a disposition by the scheme member either on joining the scheme or at any time during their lifetime before they retire. Accordingly it is capable of being the subject matter of a gift. While it is usually of no more than nominal value, its value at any given time will depend on the age and state of health of the scheme member.

- the member or their estate is not excluded from enjoyment and benefit of the death benefits FA86/S102(1)(b) where the objects of the discretionary trust include the members legal personal representatives...

## CHAPTER EIGHTY TWO

# PARTNERSHIPS

82.1		ownership compared
82.3.3	English/Scots partnership tax aligned	82.18 Partnership income: Remittance basis
82.12	Investment partnership/co-	

### *Cross references*

This chapter considers aspects of partnerships which are more conveniently addressed in isolation. I have generally preferred to deal with partnership issues as they arise in the context of other topics:

<b>Topic</b>	<b>See para</b>		
Remittances	17.37	Pre-owned assets	80.22
Partnership income stream/asset	51.12	ATED	93.15
Offshore funds	63.3.3	Situs of partnership debt	97.12.4
OIG of partnership	64.6	Situs of partnership share	97.33
UK representative	118.4	Jersey partnerships	86.27
Carried interest	69.14	Foreign LLP	86.28
NIC	54.18		

## 82.1 Partnerships: Introduction

A full discussion of partnership taxation would require at least two volumes. In this chapter I focus on aspects relevant to the themes of this book but it is necessary to review some more general aspects to understand these matters in their context.

I do not consider losses.

## 82.2 “Partnership” and “Firm”

### 82.2.1 *Definitions of “Partnership”*

Section 1(1) PA 1890 provides:

#### **Definition of partnership**

Partnership is the relation which subsists between persons carrying on

a business in common with a view of profit.

I refer to this as the general (partnership law) meaning.

Both general partnerships and limited partnerships are partnerships within this definition and I refer to them together as “**ordinary partnerships**”.

For IT/CGT/CT purposes the word partnership is (generally) extended to include LLPs<sup>1</sup> but apart from that it is not usually defined.

There are different definitions for:

- (1) SDLT/ATED<sup>2</sup>
- (2) IHT residence-property code<sup>3</sup>

I discuss those in the context of the taxes concerned.

### 82.2.2 “Firm”

Section 4 PA 1890 provides:

Persons who have entered into partnership with one another are for the purposes of this Act called collectively a firm ...

Section 847(1) ITTOIA/s.1257 CTA 2009 provide:

In this Act [ITTOIA/CTA 2009] persons carrying on a trade [including business] in partnership are referred to collectively as a “firm”.

The ITTOIA definition is only for the purposes of ITTOIA. It is incorporated by reference in some parts of ITA,<sup>4</sup> but it does not apply in ITA as a whole.

Similarly, the CTA definition is only for the CTA 2009; there is no equivalent in CTA 2010.

However the ITTOIA/CTA definitions set out the normal meaning of the word, so (subject to context) the same meaning would apply even where the definition is not formally applied. It would be simpler if there were one single taxes-act wide definition, but it does not much matter.

In the terminology of the PA 1890, “firm” means the *persons* carrying on the business and “partnership” means the *relationship* between them; but

---

1 See 82.20 (Limited liability partnership).

2 See 93.2.1 (“Partnership” for SDLT/ATED).

3 See 88.4.1 (“Partnership”: Definition).

4 For the details see the table in sch 4 ITA (Index of Defined Expressions).

in practice the terms are used interchangeably.<sup>5</sup>

In the Companies Act definition,<sup>6</sup> the word “firm” includes both a partnership and a company. I am not sure that lawyers would use the word firm to mean a company, unless speaking colloquially or informally.

I generally prefer not to use the word “firm”, and to refer to partnership (or company, if that is intended). But of course the word can be used where the context is clear, and when dealing with particular statutory provisions, it is usually best to follow the statutory terminology.

### 82.3 Nature of partnership share

In order to understand partnership tax, one sometimes needs to understand the nature of a partner’s interest in a partnership (also known as a partnership share).

I consider English law, then Scots law, and consider LLP’s separately below.<sup>7</sup>

#### 82.3.1 *English partnership: 2 analyses*

This section considers the position of partnerships governed by English law, or by a foreign law which adopts common law principles. That includes in particular a Northern Ireland partnership.

Everyone agrees that a partner has an interest in partnership property; but what is the nature of that interest? Gower doubts whether this question has an answer:

... the exact nature of this equitable interest is not crystal clear ... no very satisfactory solution to this problem has been found, and the most one can say is that the partners have an equitable interest... which floats over the partnership assets throughout the duration of the firm, although it crystallises only on dissolution. Still, there is admittedly some sort of proprietary nexus (however vague and ill-defined) between the

---

5 The PA 1890 itself is not consistent and sometimes uses “partnership” where, according to its own scheme, “firm” would be more appropriate.

The Law Commission report on Partnership Law proposed to modernise the definition, but nothing came of that.

6 Section 1193 Companies Act 2006 provides: “firm” means any entity, whether or not a legal person, that is not an individual and includes a body corporate, a corporation sole and a partnership or other unincorporated association.

7 See 82.20 (Limited liability partnership).

partnership assets and the partners.<sup>8</sup>

The answer (which explains apparently inconsistent case law) is that a partnership share has a twofold nature:<sup>9</sup>

[1] As between themselves, partners are not entitled individually to exercise proprietary rights over any of the partnership assets. This is because they have subjected their proprietary interests to the terms of the partnership deed which provides that the assets shall be employed in the partnership business, and on dissolution realised for the purposes of paying debts and distributing any surplus.

[2] As regards the outside world, however, the partnership deed is irrelevant. The partners are collectively entitled to each and every asset of the partnership, in which each of them therefore has an undivided share.<sup>10</sup>

---

8 Gower, *Principles of Modern Company Law*, 10<sup>th</sup> ed., para 23.1 (Legal nature of shares).

9 *IRC v Gray* [1994] STC 360 at p.377.

10 Of the two rival analyses, the chose in action analysis may be described as the default analysis. Some sources oversimplify, by setting out the chose in action analysis and failing to mention the alternative co-ownership analysis. For instance the Stamp Taxes on Shares Manual:

**“STSM091040 nature of a partnership interest** [Sep 2017]

A partnership interest or share is, in law, a separate item of ‘property’ in its own right. A partner cannot claim to be the owner of any particular partnership asset, nor of any specific share of a partnership asset. Rather, a partnership interest represents a right to control the partnership assets and affairs for as long as the partnership lasts and, upon dissolution, a right to have the assets liquidated, the liabilities discharged and a division of any surplus.”

Likewise the BI Manual:

**“BIM82058 Partnerships - general notes: property** [Jun 2016]

... In commercial law in England and Wales the partner’s interest in partnership property is not a proportionate interest in each asset but rather an undivided interest in the totality of the partnership property... The quantum of that interest cannot be finally determined until the partnership is finally wound up (or perhaps earlier should all the assets be sold and the net proceeds after paying liabilities distributed).”

These passages were probably composed before *Gray* was decided. A more recent example is *Bayonet Ventures LLP v HMRC* [2018] UKFTT 262 (TC) at [51].

These sources are correct so far they go, and it may be that in some contexts no more need be said; but a statement of the chose in action analysis alone gives an incomplete description of a partnership share, if it omits to mention the alternative possible co-

*Lindley & Banks on Partnership* refers to the two parts of this dual nature as internal and external perspectives;<sup>11</sup> but for present purposes it is clearer to describe them as a *chose in action* analysis and a *co-ownership* analysis of a partnership share.

Which analysis is adopted can make a difference for tax purposes. There is no general answer: the decision is made according to the context of the provisions concerned.<sup>12</sup>

<b>Topic</b>	<b>See para</b>
<i>Co-ownership analysis generally agreed:</i>	
Partnership income arises to partners, not partnership	82.15
Valuation	82.4
Group reliefs (partnership does not block a group)	82.23
IHT relief on FOTRA securities	71.6
DT relief for direct investor (partnership does not block relief)	29.9.6
<i>Chose in action analysis generally agreed:</i>	
Situs of a partnership share	97.33
Remittances	17.37
Pension fund charge: loan to partnership not a loan to partners	- <sup>13</sup>

In my view a co-ownership analysis applies in the context of BPR, so that ownership of a company through a partnership does not block BPR; but that is controversial.<sup>14</sup>

Sometimes statute addresses the issue and directs that a partnership should be treated as transparent for some purpose (assuming that in the

---

ownership analysis.

11 *Lindley & Banks on Partnership* (20<sup>th</sup> ed., 2017), para 19-03; Law Com, *Partnership Law*, Report no 283 (2003), para 9.66 (Nature of a partner's interest)

[http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283\\_Partnership\\_Law.pdf](http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf)

12 The Law Commission refers to "the courts' flip-flopping from one theory to another when they attempt to justify results with reference to the nature of partnership:" Law Com 283, *Partnership Law* (2003) para 3.51.

[http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283\\_Partnership\\_Law.pdf](http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf)

13 *Bayonet Ventures LLP v HMRC* [2018] UKFTT 262 (TC) at [51] (where the Tribunal oversimplified by stating the chose in action analysis without referring to *Gray*; but HMRC were not represented by Counsel).

14 See Kessler & Marre, "A Merry Dance" *Taxation Magazine*, 20 March 2014. The BPR controversy is too far from the themes of this book to pursue here, but it illustrates how in tax everything is connected.

absence of the provision it would or might not be).<sup>15</sup>

### 82.3.2 Scots partnership

Section 4(2) PA 1890 provides:

In Scotland a firm is a legal person distinct from the partners of whom it is composed...

In *Anson v HMRC*:<sup>16</sup>

Although taxed in the same way as an English partnership,<sup>17</sup> and having many points of similarity to an English partnership, a Scottish partnership differs in possessing separate legal personality. The partners do not, therefore, have any direct proprietary interest in any of the partnership assets (unless they happen to hold assets as trustees for the partnership). They have no title to sue for damage to partnership property, and they have no insurable interest in partnership property. What the partners do own is a share of the partnership. That share is an incorporeal moveable right or *ius crediti*: the right is a debt or demand against the partnership. As long as the partnership continues, a partner is entitled under statute to require that the partnership's assets be applied for partnership purposes, and to his share of the profits of the partnership business. On a winding up, a partner is entitled to claim his portion of the net proceeds of sale of partnership assets.

The BI Manual provides:

**BIM82058 Partnerships - general notes: property** [Jun 2016]

...In Scotland, however, the partners have no direct interest in partnership property... In Scotland, a partner merely has an interest in the partnership rather than an interest in the partnership property.

The IHT Manual provides:

**IHTM25102 Partnership Share Scotland** [May 2020]

In the absence of express provision in the partnership agreement, all the partners have an interest in the entirety of the partnership property but no partner has the right to any particular asset or assets comprised

---

<sup>15</sup> For an example, see 25.23.3 (Partnership of exempt persons).

<sup>16</sup> [2015] UKSC 44 at [39]. The judgment is given by a Scottish judge, Lord Reed. References cited in the passage are omitted.

<sup>17</sup> See 82.15 (Partnership transparency: IT/CT).

within the partnership property to the exclusion of the other partners. "What is meant by the share of a partner is his proportion of the partnership assets after they have all been realised and converted into money, and all the partnership debts and liabilities have been paid and discharged."<sup>18</sup> One consequence of this is, that notwithstanding that the partnership assets may include heritable property, nevertheless the partner's share in the partnership is moveable for the purposes of succession. It is a mere right to a debt rather than an undivided right. (See Miller on Partnership, 2nd Edition at p 199.)

### 82.3.3 English/Scots partnership tax aligned

This feature of Scots partnership law is not in practice as important for tax as might appear at first sight.

I think it right to lay aside any preconceptions derived either from the law of England or from the law of Scotland as to the technical legal nature of a partnership. In Scotland a firm is "a legal person distinct from the partners of whom it is composed", but this is not so under English law. For the present purpose<sup>19</sup> this distinction should, in my opinion, be disregarded. The Income Tax Acts are ... equally applicable on both sides of the border and the language which they employ ought to be construed so as to have, as far as possible, uniform effect in England and in Scotland alike.<sup>20</sup>

There is a strong assumption of parity and the courts have consistently preferred an analysis under which both types of partnership are treated alike. HMRC agree. The Partnership Manual provides:

**PM131700** [Jul 2019]

#### **Scottish partnerships**

[The Manual cites s.4(2) Partnership Act 1890 and continues:]

Unlike its English, Welsh or Northern Irish counterpart, a Scottish partnership is a legal person. This has very few consequences for tax purposes.

Where the differing legal systems would produce different results as

---

18 See *Lindley & Banks on Partnership* (20th ed., 2017), para 19-05.

19 The question was whether a partnership constituted "a person charged" within the meaning of Rule 9 of schedule D cases I and II, ITA 1918. There is no equivalent in current legislation, but that does not affect the point being made.

20 *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.247.

between Scotland and the rest of the United Kingdom, specific legislation has been enacted to preserve equality of treatment; for example assessment of partnership profits (see PM141000) and capital gains (see CG27000).<sup>21</sup>

Where the tax legislation itself would produce different results, the courts have directed that:

‘...it is desirable to adopt a construction of statutory words which avoids differences of interpretation of a technical character such as are calculated to produce inequalities in taxation as between citizens of the two countries.’<sup>22</sup>

## 82.4 Valuation of partnership share

A full discussion of valuation of partnership shares would need a chapter, and only some points of principle are addressed here.

After the introduction of 100% BPR, in 1992, valuation of partnership shares only arises occasionally, so it is a somewhat unexplored topic. But the question does arise on the death of a partner if BPR does not apply, most commonly, for an investment partnership.

Much depends on the terms of the partnership agreement. The position is easy if under the agreement the partnership is required to be wound up on the death of a partner, and the partner receives, or is at least entitled to receive, a lump sum.

What if the partnership agreement provides, as it normally will, that the partnership should continue despite the death of a partner? In *IRC v Gray*:<sup>23</sup>

It is this outside view [the co-ownership analysis] which identifies the

---

21 Author’s footnote: It may be doubted whether these are good examples, but it is not necessary to pursue that here.

22 *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.244. *BPP Holdings v HMRC* [2017] UKSC 55 at [23] expressed same sentiment in procedural matters: “it is highly desirable, particularly in a field where the law is the same throughout the United Kingdom (as in tax), that tribunals, or at any rate tribunals in the same field, apply the same, or (at least in some cases) even similar, rules in the same way throughout the UK. In these circumstances, all tribunals and appellate courts above the level of the UT should be wary of applying or relying on the procedural jurisprudence of the English and Welsh courts without also taking into account that of the Scottish and Northern Irish courts.

23 *IRC v Gray* [1994] STC 360 at p.377.

nature of the property falling to be valued for the purpose of capital transfer tax [now IHT], although in accordance with the *Crossman* principle the restrictions imposed by the partnership deed must be taken into account in assessing its value (see *Burdett-Coutts v IRC* [1960] 1 WLR 1027). In my judgment, therefore, Lady Fox had for the purposes of [what is now s.160 IHTA] a 92·5% interest in the tenancy which the Lands Tribunal had jurisdiction to value as an interest in land.

The IHT Manual provides:

**IHTM25102 Valuing The Partnership Interest: Partnership Share**  
[May 2020]

Following the judgement of Hoffman LJ in the case of *Gray v IRC* [1994] STC 360, at p.377c, the valuation of an interest in a business carried on as a partnership should be by reference to the value of the appropriate share of each asset. The previous practice of allowing a discount for the costs of sale is effectively overturned by this decision. That earlier treatment had been based on the general law definition of a partnership share as a proportionate interest in the partnership assets after they have been converted into money, and all the partnership debts and liabilities have been paid and discharged.

In the valuation of an interest in an agricultural tenancy held for the benefit of a farming partnership, the Lands Tribunal made no allowance or discount in calculating the value of a deceased partner's interest - *Walton v IRC* [1996] STC 68.

While there is no reduction in the valuation for notional costs of sale, what is valued is the partnership share. A one half share of a partnership is not worth one half of the partnership assets: where A and B own, say, land in equal shares, as co-owners but not as partners, everyone agrees that the valuation of the share is in principle less than half the value of the whole.

#### 82.4.1 Valuation in Scotland

The IHT Manual provides:

**IHTM25102 Valuing The Partnership Interest: Partnership Share**  
**Scotland** [May 2020]

... If the partnership was an agricultural tenant, please see the decision in *Baird's Executors v CIR* 1991 SLT (Lands Tribunal) 9. The court accepted that the value of an agricultural tenancy in Scotland is the market value, IHTA84/S160.

Any case where the decision in *Baird* appears to be material should be referred to Technical.

## 82.5 Partnership law primer

The Partnership Manual contains a general introduction to partnership law. This is broadly sound, though it has the defect that the cases cited are mostly tax cases. Insofar as the aim is to set out a primer of partnership law, this is a myopic approach, like trying to write a book without using the letter *e*; though the fact that it is possible at all does illustrate how often tax turns on issues of general (non-tax) law, in this case, partnership law.

Of course it is only a basic outline of a large topic. In this book I do not include a primer of trust law or company law, but it may be useful to survey partnership law, as the questions often arise in a tax context, and the topic is not on the undergraduate law syllabus.

### 82.5.1 “Business”

The definition of partnership uses the word business.

Section 45 PA 1890 provides:

In this Act, unless the contrary intention appears ...

The expression “business” includes every trade, occupation, or profession.

This does not add much, if anything; everyone agrees that business is a wide word. Perhaps that was less clear in 1890.

The Partnership Manual cites the definition and continues:

**PM120100 What is a partnership?** [Jul 2019]

... So ‘business’ is a very wide term, embracing almost every commercial activity, and is much wider than trade or profession alone.

Making and managing investments may constitute a business.<sup>24</sup> It follows that “business” for partnership law purposes has a different meaning from “business” (or “economic activity”) for VAT purposes. It is not inconsistent to say that a partnership is carrying on a partnership business, and so is a valid partnership, but is not carrying on a VAT business, and

---

<sup>24</sup> See 82.11 (Investment partnership).

so is not subject to VAT.

### 82.5.2 “View of profit”

I discuss this phrase in detail elsewhere.<sup>25</sup>

### 82.5.3 Formation of partnership

The Partnership Manual provides:

**PM120100 What is a partnership?** [Jul 2019]

... Partnership is a relationship resulting from a contract or agreement, oral or written. The implementation of that agreement creates the partnership relationship. If it is not implemented, it is not effective (*Dickenson v Gross* [1927] 11 TC 614)...

The Partnership Manual provides:

**PM134100 Partnerships - formation** [Jul 2019]

A partnership may exist without a written agreement, on the basis that a later written agreement gives formal expression to an oral agreement already existing. The date of the formation of the partnership remains the date on which the terms of the oral agreement were implemented. Where, however, a written agreement creates a partnership where none exists already, it is effective only from the date of execution and implementation of the written agreement. It has no retrospective effect. Partnership agreements were held not to have retrospective effect in *Ayrshire Pullman Motor Services & Ritchie v CIR* (1929) 14 TC 754, *Waddington v O’Callaghan* (1931) 16 TC 187, and *Saywell (trading as Eaton Tractor Co) v Pope* (1979) 53 TC 40.

The Partnership Manual provides:

**PM133000 Does a Partnership exist?** [Jul 2019]

S2(3) Partnership Act 1890

...It is important that you establish all of the facts to determine the true relationship between the parties. This will include finding out what the intentions of the parties were. No single factor is likely to be conclusive on its own. You will need to form an overall view, based on all the facts and evidence.

A declaration that a deed is to create a partnership relation, or is not to

---

25 See App.5.3 (A view to profit).

do so, is not conclusive on its own, though it may cast some light on the parties' intentions - see *Morden Rigg & Co v Monks* (1923) 8 TC 450. In that case, two companies purchased and sold cotton and shared profits. The agreement disclaimed that their relationship was one of partnership but it was nevertheless held to be one. In *Fenston v Johnstone* [1940] 23 TC 29 an agreement for joint purchase and development of land stated that it did not constitute a partnership but it was nevertheless held to be one.

A mere assertion that a partnership exists is not conclusive if there is no supporting evidence. In *CIR v Williamson* (1928) 14 TC 335 a father and sons worked a farm. There was no partnership deed, no evidence that profits were shared and the father conducted all financial arrangements. The court decided that there was not a partnership.

The fact that the parties did not intend to create the relationship of partnership is a factor to be taken into account in deciding whether a partnership exists but again is not conclusive - see *Horner v Hasted* (1995) 67 TC 439. A senior manager in an accountancy practice was given the status of partner within the firm and argued that he was a partner. The manager was paid as an employee though the salary was a share of profits. The intention of the firm was that he should not be a partner as this would be contrary to professional and statutory rules. The court decided that he was not a partner.

The receipt of a share of net profits is *prima facie* but not conclusive evidence of partnership. An agreement to share net losses in the sense of being obliged to make good those losses is an even stronger indication.

A partnership whose income is above the VAT registration limits is required to register on Form VAT 2 with HMRC. If a partnership fails to register that of itself does not mean that there is no partnership but it is a factor to be taken into account in deciding whether a partnership exists.

For a review of other factors which might be evidence of partnership, and earlier cases, see *Saywell (trading as Eaton Tractor Co) v Pope* (1979) 53 TC 40 (in which a partnership deed was held not to have retrospective effect) and *Alexander Bulloch & Co v CIR* (1976) 51 TC 563 (where it was held that persons claimed to be partners who were minors were not partners - see BIM82065).

#### 82.5.4 *Partnership v joint venture*

The BI Manual provides:

**BIM82010 Joint Venture** [Jun 2016]

The contention is sometimes advanced that an association between persons for a business purpose falls short of partnership in some way. Such an association is often called a 'joint venture'. On close examination many of these associations prove to be partnerships, despite the name applied to them. A joint venture which is not a partnership is most likely to be found where parties already carrying on businesses of their own agree to co-operate in a single project but they do not agree to share net profits or losses. Where they do agree to share net profits or losses, it is likely that a partnership will result even where the parties are already engaged in their own businesses - see *Morden Rigg & Co v Monks* (1923) 8 TC 450 in which two companies purchased and sold cotton and shared profits. The agreement between them disclaimed that their relationship was one of partnership but the court decided that there was one. In *John Gardner & Bowring, Hardy & Co Ltd v CIR* (1930) 15 TC 602 coal merchants entered into temporary and informal arrangements during a strike for the purchase and sale of coal. Profits were divided equally and the court decided that the arrangements were partnerships. In *George Hall & Son v Platt* (1954) 35 TC 440 a farmer and an agricultural merchant entered into an agreement to grow carrots. Expenses were met out of gross proceeds and the balance of profit was divided equally. The arrangements were held to be a partnership.

But for a partnership to exist there must be a business. And that business must be a business that is separate and distinct from any other business that the joint venturers may conduct on their own account. Such a situation occurs in a genuine share farming agreement where a landowner and farmer combine, sharing their resources, with each party meeting their own expenses and taking a share of the produce. In these circumstances the relationship will fall short of partnership.

### 82.5.5 Dissolution

The Partnership Manual provides:

**PM134200 Dissolution** [Jul 2019]

A partnership is the relationship between a particular combination of persons. Any change in those persons terminates that partnership and may result in the creation of another partnership, but in some circumstances could also terminate the partnership and not create a new one. Whether a new partnership is created depends on the facts and is

different in every instance.

**PM134300 Death Or Retirement Of Partner** [Jul 2019]

Partners may assign their interest in a partnership, or they may confer it on death or retirement to another person, but that does not automatically make the assignee a partner. A deliberate decision by the assignee and the surviving partners for the assignee to be made a partner is required. On the death of a partner, the estate of the deceased person is entitled, in the absence of any other agreement, at the option of their personal representatives, to the share of the profits made since death attributable to the use of their share of the partnership assets, or to interest at 5% per annum on their share, until their share of the partnership is paid out.

Depending on the precise terms of the agreement between the surviving partners and the personal representatives, the sums payable in these circumstances may be interest or annual payments deductible in arriving at the trade profits of the partnership and chargeable as savings income on the recipients.

## 82.6 Partners

“Partners” in formal legal English means members of a partnership, not the colloquial meaning (cohabittees).

The Partnership Manual provides:

**PM120100 Partnerships General Notes: Definition** [Jul 2019]

The word ‘persons’ in this definition includes artificial as well as natural persons, so an individual, a body corporate or the trustee of a settlement may all be partners. This includes companies and Limited Liability Partnerships (LLPs), which will be discussed further at PM256100 onwards...

There is no limit on the number of partners a partnership may have.

The BI Manual provides:

**BIM82005 Existence Of Partnership** [Jun 2016]

... *Who is a Partner?*

[The Manual refers to s.1(1) PA 1890 and continues:]

In the case of *Tiffin v Lester Aldridge LLP* [2012] EWCA Civ 35 the Court of Appeal said that in looking at whether someone was a partner, it was important to look at the intention of the parties.

Although some factors are seen as being indications that someone is, or is not a partner, their importance will vary depending on the facts of the

case. In the case of *Williamson & Soden v JJ Briars* [2011] UKEAT 0611/10/DM, Briars received a share of the profits: although this is often an indication of being a partner, in this case it was outweighed by other facts and he was held to be an employee.

In applying the test of whether someone is carrying on a business in common:

- You have to look at all the facts of that case.
- No single factor will be determinative.
- The weighting of any factors depend on the facts of that case.
- The intention of the parties is important.
- Is the person really a principal; that is, someone who is part of the business or someone who is its servant?

### 82.6.1 Capacity of partner

The BI Manual provides:

#### **BIM82020 Capacity Of Partners** [Jun 2016]

It is not a requirement of partnership that each member is capable of performing the full range of the activities of the partnership business, but each must be capable of performing a part of the activities. The differing abilities of the parties may have made partnership desirable in the first place; see, for example, *Fenston v Johnstone* (1940) 23 TC 29. In that case arrangements for the joint purchase and development of land, with one party providing expertise and the other finance, were held to be a partnership. See also *Newstead v Frost* (1980) 53 TC 525 in which an entertainer entered into an agreement with a company to exploit his artistic talents and the court decided that there was a valid partnership.

Some professions may only be carried on by qualified persons (for example solicitors, dentists, and patent agents) so a non-qualified person may not become a partner. Some professional bodies permit partnership between qualified and non-qualified persons but will not allow such partnerships to describe themselves as ‘chartered’ for example accountants and surveyors. Others permit such partnerships provided the non-qualified members do not lay claim to qualifications they do not have or perform services they are not qualified to do, for example insurance brokers and general practitioners.

The Partnership Manual provides:

#### **PM132100 Types Of Partner** [Jul 2019]

*General partner*

An ordinary member of a general partnership within the meaning of the Partnership Act 1890 or a limited partnership regulated by the Limited Partnerships<sup>26</sup> Act 1907, who bears joint liability without limit for debts of the partnership.

*Limited partner*

A limited member of a limited partnership whose rights and liabilities to creditors are restricted - see PM131310.

*Salaried partner*

Either

- an employee, not a partner at all, who is given the title for prestige and who may be remunerated in part by reference to the firm's profits. The employee's name may even appear on the firm's notepaper. But, if it does, the employee bears liability only to those who have advanced credit to the firm in the belief that they were a partner (S12 Partnership Act 1890), or
- a partner who is entitled to a first share of profits, and who is in all other respects an ordinary partner

You should determine the true status of the person concerned by a detailed examination of the facts. In deciding which side of the line a person falls, it is important to consider whether or not they are entitled to participate as principal in the general management and conduct of the business. That is not to say that the day to day management of the business might not be delegated to others. This is often the case, particularly in relation to partnerships with large numbers of partners. But it is inherent in the contract of partnership that a true partner (as opposed to an employee) is permitted, indeed has the right, to participate in the general management and administration of the firm. If you require further guidance on this issue please contact CTISA (Technical).

*Sleeping partner*

Usually a partner who plays no active part in the business; sometimes a partner who is not disclosed as such to the outside world...

**82.6.2 Spouse as partner**

The BI Manual provides:

**BIM82065 Husbands, Wives, Civil Partners And Minor Children**

---

<sup>26</sup> The original erroneously reads "Limited Partnership Act 1907".

[Jun 2016]

A spouse or civil partner is sometimes taken into partnership wholly or mainly to maximise the benefit of the tax reliefs that are available.

You cannot challenge the apportionment of profits, as you can a wage, by reference to the value of the partners' contribution to the firm's activity. It may be possible in these cases to challenge the spouse or civil partner's status as a partner, but such a challenge is often very difficult to sustain. It is sometimes overlooked that there is no need for the spouse or civil partner to contribute capital; or to participate in management; or, in a trading context at least, to be capable of performing the main activity of the business. Indeed to be a partner one need not take an active part in the business at all. Where the spouse or civil partner has signed a deed declaring an intention to carry on the business and the deed gives a right to share in the profits, and subsequently accounts of the business show that that person has been allocated a share of the profits, there will not usually be much chance of mounting a successful challenge.

It is worth emphasising that a partnership is not a sham merely because it is set up to save tax, as indeed the spouse or civil partner who is deserted by a partner leaving them to meet the firm's liabilities may find to their cost. There will always of course be some cases which will be worth investigating and challenging, but these are more likely to be found among those where there is no current partnership deed, and particularly where there is a clear attempt to antedate the setting up of a partnership by more than a few months. CTISA (Technical) will be happy to advise on worthwhile cases.

Difficult problems are posed where a taxpayer who is carrying on a profession or vocation (as opposed to a trade), which is dependent on their personal skills or qualifications, purports to take a spouse or civil partner (who does not possess a like skill or qualification) into partnership. Some professions have internal rules that preclude this; but this is not always the case. You could argue that in such a case a partnership between the spouses or civil partners to carry on the profession or vocation in question would not be possible, but in the light of the judgments in the case of *Newstead v Frost* (1980) 53 TC 525 (in which an entertainer entered into an agreement with a company to exploit his artistic talents and the court held that there was a valid partnership) that still leaves open the possibility that there might be a partnership between them to exploit the spouse or civil partner's talents for the benefit of both. The Frost case involved a partnership with a

company, but the principle is the same.

*Settlements legislation*

However, even if it is considered that challenging the existence of a partnership would not be successful, it does not necessarily mean that this is the end of the matter. In certain circumstances the settlements legislation may apply - see TSEM4215.

### 82.6.3 *Minor child as partner*

The BI Manual provides:

**BIM82065 Husbands, Wives, Civil Partners And Minor Children**  
[Jun 2016]

*... Minor children*

Partnerships involving minor children appear to be comparatively rare and where found, for example, in farming cases, may not have been set up primarily for Income Tax purposes. Minors are not, by reason of minority alone, incapable of entering into partnership, although in general while under age they are not personally responsible for the debts of the firm. On the other hand it is much more likely in these cases that a partnership deed is not in practice being acted upon. See, for example, *Dickenson v Gross* (1927) 11 TC 614 in which a farmer entered into partnership agreement with sons but the court held that it was not acted upon and therefore there was no partnership. A common-sense approach is suggested. Given the nature of the business and the age of the child is it reasonable to assume that the child is capable of carrying on the business in common with the other partners? Is it likely that the relationship of agency exists between the child and the others, or that third parties look on the child as a principal? Indeed in the case of a young child is it likely that the child was capable of sufficient understanding to have entered into the relationship at all?

In the case of *Alexander Bulloch & Co v CIR* (1976) 51 TC 563 two schoolgirls aged 15 and 16 were claimed to be partners in the family off-licence business. The Court of Session held that the Commissioners were entitled to hold that for the relevant year (during which in any case there was no partnership deed) the essential proof of the existence of a partnership was lacking. It is clear from the stated case that the Commissioners based their decision in part on the immaturity of the children and it is probable that they were also influenced by the nature of the business. On the other hand in the case, for example, of a farming partnership, Commissioners might well be prepared to accept that a 15 or 16 years old person was capable of acting as a partner. CTISA

(Technical) will be happy to advise on worthwhile cases. Again if it is considered that a partnership involving a minor (that is aged under 18 and unmarried) is artificial and its existence cannot be challenged you must refer it to HMRC Trusts and Estates to determine whether the Settlements legislation can be applied.

#### *Settlements legislation*

Where the child's share of the partnership was transferred from a parent, the settlements legislation applies to treat the income as that of the donor parent until the child reaches the age of 18, marries or enters into a civil partnership - see TSEM4300 onwards.

## 82.7 Nominee partner

Section 848A ITTOIA/s.1258A CTA 2009 provides:

- (1) This section applies if—
  - (a) a partner in a firm is partner as trustee for a beneficiary who is absolutely entitled to the partner's share of the profits of the firm, and
  - (b) the beneficiary is chargeable to tax on those profits.
- (2) References in this Part [Part 9 ITTOIA/Part 17 CTA 2009] to a partner or member of the firm include references to the beneficiary.<sup>27</sup>

The background can be traced through shallow consultation and response papers;<sup>28</sup> but the questions this raises will not now arise, at least for IT/CT purposes, so this is of limited current interest.

## 82.8 Partnership is partner

*Lindley & Banks on Partnership* states:

---

<sup>27</sup> See too 1.7 (Bare trust/nomineeship).

<sup>28</sup> HMRC, "Partnership taxation: proposals to clarify tax treatment"

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/544520/Partnership\\_taxation-proposals\\_to\\_clarify\\_tax\\_treatment.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/544520/Partnership_taxation-proposals_to_clarify_tax_treatment.pdf) (2016)

HMRC, "Partnership taxation: proposals to clarify tax treatment Summary of Responses (2017)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/601175/Partnership\\_taxation-proposals\\_to\\_clarify\\_tax\\_treatment\\_-\\_summary\\_of\\_responses.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/601175/Partnership_taxation-proposals_to_clarify_tax_treatment_-_summary_of_responses.pdf)

The papers are discussed in the 2017/18 edition of this work para 47.6 (Nominee partner).

Since under English law a firm does not have separate legal personality, it cannot, as such, be a member of another firm. Thus where a firm purports to become a partner, this will, as a matter of law, constitute each of the members of that firm as a partner in his own right<sup>29</sup> ...

The partnership law position is different for LLPs and Scottish partnerships. Lindley & Banks continue:

The position is otherwise in Scotland, where the firm is a separate legal person and its ability to enter into the partnership relation is well recognised.

Section 847(4) ITTOIA uses the term indirect partner:

For the purposes of this Part [Part 9, partnerships], a person is an indirect partner in a partnership (“the underlying partnership”) if the person is a partner in—

- (a) a partnership which is a partner in the underlying partnership, or
- (b) any partnership which is an indirect partner in the underlying partnership by virtue of the preceding application of this subsection.

Section 852A and 855A ITTOIA deal with basis periods for trading partnerships: this is not considered here, though I hope to consider it in a future edition. Also see 83.14 (Associated partnership).

## 82.9 Service companies

### 82.9.1 *Service co not a partner*

The BI Manual provides:

#### **BIM82070 Service Companies** [Jan 2019]

Partnerships may use a company, owned by the partners, to provide services to the partnership. In such cases, the main issue is likely to be whether fees paid by the partnership to the company are allowable deductions in calculating profits of the partnership trade.

Relevant factors to consider are:

- what services the company provides to the partnership
- the basis on which the company is remunerated for the services it

---

<sup>29</sup> Lindley & Banks on Partnership (20th ed., 2017), para 4-27; footnotes omitted.

- provides
- whether the company and partnership are connected persons.

### 82.9.2 *Service co not a partner*

The BI Manual provides:

#### **BIM82070 Service Companies** [Jan 2019]

... In some cases the company providing services is also a partner in the partnership and receives a profit share. In this case the question is whether the company has a trade separate to the trade carried on in partnership. The company cannot claim expenses against the net profit allocated by the partnership. For further information on partners' expenses see BIM82075.

See 83.3 (Mixed partnerships code).

## **82.10 Limited partnership**

The BI Manual provides an overview of limited partnership law:

#### **BIM82101 Partnerships: Limited Partnership: Overview** [Jun 2016]

A limited partnership is one in which at least one of the partners restricts their liability for the debts and obligations of the firm to a pre-determined sum, instead of bearing unlimited liability as a partner normally does.

A limited partnership is governed by the Limited Partnerships Act 1907. In addition a limited partnership is subject to the Partnership Act 1890 and general partnership law except where these are overruled by the Limited Partnerships Act 1907.<sup>30</sup>

The limited partnership must consist of at least one general partner who manages the business and bears unlimited liability to creditors, and at least one limited partner. The limited partner must contribute a specified amount of capital on joining the firm, which they cannot withdraw as long as they remain a limited partner. They cannot be made to bear any liability to creditors or their fellow partners in excess of that amount plus any undrawn profits. A limited partnership must register with the Registrar of Limited Partnerships in Cardiff, Edinburgh or Belfast as appropriate. Failure to register deprives it of its limited liability.

---

30 The original erroneously reads "Limited Partnership Act 1907".

The limited partner may not bind the firm and may not take part in the management of the firm's business. If they do, they lose their limited liability.

Because they are bound by the partnership deed and because their general partners act as their agent, a limited partner does carry on the business of the firm despite the restrictions on their rights and powers. Limited partners, in the same way as other partners in the partnership are taxed on their share of the profit from a trade or profession carried on by the partnership as if it were derived from a 'notional' trade or profession that they carry on alone...

## 82.11 Investment partnership

The BI Manual provides:

### **BIM82001 Partnerships General Notes: Definition** [Jun 2016]

...[Business] includes a business of making investments. Simply making an investment is not enough, there has to be sufficient organisation, continuity to make the activity a business.

### 82.11.1 *Partnership holding securities*

The CT Manual provides:

### **CTM36560 investment partnerships** [Feb 2018]

There cannot be a partnership without a 'business'. Most partnerships carry on a trade or profession. But it is possible for an activity not to amount to a trade or profession and still be within the definition of 'business' in the Partnership Act 1890. Property and investment management, carried on as a commercial venture, may fall into this narrow category. Such partnerships are sometimes known as 'investment partnerships'...

Limited partnerships have become more common since 1987, when the British Venture Capital Association (BVCA) published guidelines on how they might be used as investment funds. They are almost always company partnerships. ...

The CT Manual provides:

### **CTM36580 BVCA statement and guidelines** [Feb 2018]

...The Board of Inland Revenue has agreed with the Taxation Committee of the BVCA the tax treatment of partnerships established under the Limited Partnerships Act 1907 and used as vehicles for raising funds wholly or partly for equity investment in unquoted

companies...

### **1) Taxation treatment of the partnership**

1.1) A limited partnership established for the purpose of raising funds for investment into companies will be regarded as carrying on a business and will represent a partnership within the definition in section 1 of the Partnership Act 1890 for the purposes of UK taxation.

## 82.11.2 *Partnership investing in land*

The PI Manual provides:

### **PIM1030 jointly owned property & partnerships [Apr 2018]**

#### **Jointly owned property**

Where property is owned jointly with one or more other persons the way the rental income is taxed depends on whether the letting is carried on in partnership. Joint letting does not, of itself, make the activity a partnership.

Usually, there won't be a partnership and the customer's share from the jointly owned property will be included as part of their personal rental business profits.

Less commonly, the joint letting may amount to a partnership. If this is the case the share of the profit or loss must be kept separate from any other letting income. A partnership loss can't be deducted from a personal rental profit and vice versa.

The property income rules will not alter a customer's status. A partner will not cease to be a partner just because of the current rules. Equally, if a customer was not a partner before, they will not become a partner just because of the current rules. See below for more about the cases where a partnership exists.

customers who have jointly owned property should know who is keeping the records and have access to them. They are personally responsible for including their share of the income in their own tax return even if they agree that someone else will keep the records.

#### **Jointly owned property: no partnership**

...

If a customer's only income from land and property in the UK comes from a jointly owned property, that share alone will form the rental business. If a customer has other income from land and property in the UK, whether in their name alone or owned jointly with other people, their share from the jointly owned property will form a part of their rental business along with the other income and expenses on any other properties which they own alone. Once again, however, shares held in

a different capacity (partner, trustee, executor) must be kept separate.

**Jointly owned property: partnership**

A customer may jointly own properties which are let out as part of a partnership business. This might occur where:

- they are in a trading or professional partnership which also lets some of its land or buildings (but see BIM41015 about the inclusion of rents from the temporary letting of surplus business accommodation in the trading or professional profit), or
- more rarely, they are in a partnership which runs an investment business which does not amount to a trade and which includes, or consists of, the letting of property.

A partnership rental business of either type is treated as a separate business from any other rental business carried on by the individual partners on their own account. Each partner's share of the profits or losses arising from the partnership rental business can't be added to or subtracted from any individual rental business profits or losses. If customers are in more than one partnership, each is dealt with as a separate rental business and the profits of one can't be set against the losses of another....

**When does a partnership exist?**

Whether or not a customer is a member of a partnership depends on the facts. A partnership is unlikely to exist where the customer is one of a group of joint owners who merely let a property that they jointly own. On the other hand, there could be a partnership where the customer is one of a group of joint owners who:

- let the jointly owned property, and
- provide significant additional services in return for payment.

Much depends on the amount of business activity involved. The existence of a partnership depends on a degree of organisation similar to that required in an ordinary commercial business.

Bear in mind that the existence of a partnership can have important legal consequences quite apart from tax; the customer may be liable for partnership debts for example. ...

**Legislation**

You need to distinguish between:

- income derived from property held by a partnership (ITTOIA05/S859 (2)). In this case the income does not belong to the individual partner in his personal capacity and is not part of his own rental business, and
- income derived from property which is jointly owned in

circumstances which do not amount to partnership. In this case the individual joint owner does receive his share of the income in his personal capacity, and it does form part of his own rental business. Merely holding property jointly does not constitute a partnership. An Officer of [HMRC] should see any case in which there is doubt as to whether a partnership exists and should consider it in the light of the guidance below.

### **When does a partnership exist? - more detail**

[The Manual refers to s.1 Partnership Act 1890 and continues:] It is not enough to constitute a partnership that property is jointly owned or that the joint owners receive a share in the rents derived from it (Section 2 Partnership Act 1890). For there to be a partnership there must be a business. This is defined in Section 45 Partnership Act 1890 as including ‘every trade, occupation or profession’ and is a wider concept than ‘trade’. *Griffiths v Jackson* [1982] 56 TC 583 suggests that letting property may sometimes be a business.

Most cases of jointly owned property will fall short of the degree of business organisation needed to constitute a partnership. To accept that a partnership exists you would have to be satisfied that there is a similar degree of business organisation as in an ordinary commercial business. This means more than treating rental income as derived from a business of letting property - it must be business apart from that. See also the general guidance on the nature of partnerships at BIM72000 onwards. On the other hand, where it has been accepted that a partnership already exists and has income from property belonging to the partnership, the presumption would normally be that the letting is part of the partnership business and there is more than mere joint ownership.

Whether a case is partnership or only joint ownership could become material where there are losses involved in that or other lettings. If there is a partnership, the letting will be part of a separate rental business and it will not be pooled with profits or losses from properties held by the partners individually.

There is advice on the basis of assessment to be used in the case of partnership property income at PIM1040 ...<sup>31</sup>

## **82.12 Investment partnership/co-ownership compared**

This section considers the differences between an investment partnership

---

31 The Manual also supplies pre-rewrite references from ICTA 1988, but I omit these here.

and co-ownership. The issue may arise consciously, where a choice is made between the two arrangements. It may arise accidentally, where a purported investment partnership agreement does not constitute a valid partnership because, say, the “partners” are not carrying on a business.

General (non-tax) law differences include different rules for payment of partnership liabilities and for succession. However:

- (1) A purported partnership agreement (which would more accurately be called a co-ownership agreement) would in principle still constitute a valid contract and govern the rights of the parties. The failure to constitute a valid partnership would not invalidate the agreement (just as a joint venture agreement which unintendedly creates a partnership is still a valid contract).
- (2) In particular, the co-ownership agreement would determine who was entitled to income and gains from the property (and so who is taxable on that).

HMRC agree. The PI Manual provides:

**PIM1030 jointly owned property & partnerships** [Apr 2018]

... Where there is no partnership, the share of any profit or loss arising from jointly owned property will normally be the same as the share owned in the property being let. But joint owners can agree a different division of profits and losses and so occasionally the share of the profits or losses will be different from the share in the property. The share for tax purposes must be the same as the share actually agreed...

Tax provisions which refer to partnerships will not apply to a co-ownership arrangement which is not a partnership. For instance:

- (1) Different IHT situs rules apply.
- (2) Different remittance rules apply.
- (3) Different rules may apply to income losses.
- (4) For completeness (the point is not likely to arise): Spouse partnership falls outside s.836 ITA (which applies to income arising from spouse co-ownership).<sup>32</sup>

But IT and CGT transparency will apply to a co-ownership arrangement, as the statutory rules relating to partnership transparency (in short) reflect

---

<sup>32</sup> See 90.7 (Property held jointly by spouses).

what the position would be without statutory rules.

In general, accidental invalidity of a partnership is not likely to cause IT/CGT problems, though IHT situs and other specialist issues could arise.

### 82.13 Partnership: person/body corporate

The next sections discuss whether a partnership is:

- a person
- a body corporate
- a body
- a body of persons
- an office

#### 82.13.1 *Partnership: a person?*

The use of the word “person” requires some care.<sup>33</sup>

An English partnership is not a legal person in English law, that is to say, it is not a legal entity distinct from the partners, or a unit capable of rights or duties:

As a strict proposition of English law, there is no doubt at all that a partnership is not, as such, a single juristic person. ... In English law a firm as such has no existence; partners carry on business both as principals and as agents for each other within the scope of the partnership business; the firm name is a mere expression, not a legal entity ... It is not correct to say that a firm carries on business; the members of a firm carry on business in partnership under the name or style of the firm.<sup>34</sup>

Context may show that the word “person” is used loosely, so as to include a partnership;<sup>35</sup> but in practice that is rare.

---

33 See App 2.9 (Person/legal personality).

34 *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.244.

35 Eg *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.419: “Having regard to the special vocabulary of the Income Tax legislation, I find no difficulty in interpreting the words “a person charged” in Rule 9 to include the case of several persons associated together in partnership for the purpose of carrying on a trade in common ...”

This should not be surprising, because in ordinary language, ‘partnership’ is a person word, just like ‘company’. ‘The land is owned by a partnership.’ ‘The partnership is liable for the debt.’ Ordinary language is right.

The rule that an English partnership is not a legal person could have been (more or less) undone by the Interpretation Act 1978 definition:

“Person” includes a body of persons corporate or unincorporate.<sup>36</sup>

A partnership has been said to be a “body of persons” in the ordinary sense of that expression,<sup>37</sup> and it is “unincorporate”. If that is right, an English partnership would seem to be a person in the Interpretation Act sense. But even if the position were that references to person in Acts of Parliament *prima facie* include an English partnership, the rule that English partnerships are not legal persons is deeply ingrained and in practice no-one usually takes notice of the Interpretation Act 1978 definition.<sup>38</sup> There are two ways to reach this conclusion:

---

36 Sch 1 Interpretation Act 1978.

Of course, Scotland needs its own equivalent, for the interpretation of Acts of the Scottish Parliament and Scottish instruments (discussed below in relation to Scots partnerships). Northern Ireland also has a definition for the interpretation of Acts of the Parliament of Northern Ireland: s.34 Interpretation Act (Northern Ireland) 1954. But those definitions do not apply for general UK tax legislation, and (on the view taken here) they are substantially the same as the Interpretation Act 1978 definition (though more appropriately drafted).

37 “A partnership is, as a matter of the ordinary use of English, plainly a body of persons”; *Padmore v IRC* 62 TC 352 at p.377. But this is in fact far from plain. We are looking at a legal term which is not ordinary English (and rarely used in modern legal English). The group of shareholders in company X is not a body of persons. The group of owners of this book is not a body of persons. So what is it which turns a group of persons with something in common into a “body of persons”? Even if the term has an ordinary fixed meaning, of course context may otherwise provide. For instance, it appears that a partnership is not a body of persons within the definition in s.989 ITA: see *Padmore* at p.377.

38 Maitland agrees, “Trust and Corporation” (1904): “It would be easy ... to attach too much importance to the fact that since 1889 we have had upon our statute-book the following words: [Maitland sets out what is now the Interpretation Act 1978 definition of person and continues:] I can imagine a country in which a proposal to enact such a clause would give rise to vigorous controversy; but I feel safe in saying that there was nothing of the sort in England. For some years past a similar statutory interpretation had been set upon the word “person” in various Acts of Parliament relating to local government. Some of our organs of local government, for example, the “boards of health” had not been definitely incorporated, and it was, I suppose, to meet their case that the word “person” was thus explained. It is not inconceivable that the above cited section of the Act of 1889 may do some work hereafter; but I have not heard of its having done any work as yet”.

- (1) To say that “the context otherwise requires” .
- (2) Or it may be that a partnership is not, in fact, a body of persons, at least within the meaning of the phrase used in the Interpretation Act.

These are two routes to the same destination. This definition is directed to unincorporated associations rather than partnerships and not intended to apply to partnerships.

The same applies to a partnership governed by the law of Northern Ireland.

### 82.13.2 *Is partnership a body corporate?*

An English partnership is clearly not a “body corporate”.

A Scottish partnership is a legal person though in practice that usually makes no difference for tax purposes.<sup>39</sup>

Section 1173 Companies Act 2006 provides (so far as relevant):

(1) In the Companies Acts—  
 “body corporate” and “corporation” include a body incorporated outside the UK, but do not include...

(b) a partnership that, whether or not a legal person, is not regarded as a body corporate under the law by which it is governed

This raises the question whether a Scottish partnership is a body corporate. EN Companies Act 2006 states that the answer is no:

1488. The definitions of “body corporate” and “corporation”, and of “firm”, are new in part. They clarify the position ... of partnerships that are legal persons but are not regarded as bodies corporate (as under Scots law).

---

[https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland\\_0242-03\\_EBk\\_v6.0.pdf](https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland_0242-03_EBk_v6.0.pdf)

The statutory definition misled the author of the Partnership Manual, who said, wrongly: “PM120100 **What is a partnership** [Jul 2019]

...You should note that a partnership, although it may not be a legal person, is still a ‘person’ (!) for the purposes of the Taxes Acts, unless the contrary intention appears. A ‘person’ includes ‘a body of persons corporate or unincorporate’ and a partnership is a body of persons unincorporate.”

39 See 82.3.2 (Scots partnership).

The Law Commission express the same view.<sup>40</sup> Likewise sch 1 Interpretation and Legislative Reform (Scotland) Act 2010 provides:

‘person’ includes a body of persons corporate or unincorporated and a partnership constituted under the law of Scotland.

I think it is settled law that a Scots partnership is not a body corporate in the normal Scots law sense of that expression.<sup>41</sup> The expression “body corporate” has the same meaning in England and in Scotland.

The drafter of s.995 ITA also assumed that a partnership is not a body corporate:

(2) In relation to a body corporate ... “control” means ...

(3) In relation to a partnership, “control” means ...<sup>42</sup>

### 82.13.3 *LLP: Person/body corporate*

An LLP is a legal person, and a body corporate,<sup>43</sup> but for tax purposes it is generally treated in the same way as an ordinary partnership.<sup>44</sup>

### 82.14 Partnership: Body/office

The word “body” is occasionally used in isolation. For instance, s.547 ITA refers to:

A payment made, or to be made, to a body situated outside the UK...<sup>45</sup>

HMRC Guidance Note Annex ii takes a broad view of the meaning of body:

40 Law Com 283, *Partnership Law* (2003) para 5.38: “Adopting an entity approach to partnership does not mean that a partnership becomes a body corporate”.

[http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283\\_Partnership\\_Law.pdf](http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf)

41 Some older Scots cases take the contrary view, though the result there could be justified on the basis that context showed the expression “body corporate” was used in a non-standard sense to include Scots partnerships.

42 Likewise s.14(1) Bribery Act 2010 referring to an offence “committed by a body corporate or a Scottish partnership”.

43 See 82.20 (Limited liability partnership).

44 See 82.21.1 (Income tax treatment of LLP).

45 For this provision, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed, 2019), para 6.6 (Foreign body rule) online version <https://www.taxationofcharities.co.uk>

9.3 ... payment(s) to a body outside the UK ... include monetary payments sent outside the UK to charities, companies, agents, partners and individual persons outside the UK.<sup>46</sup>

Trustees have been described as a body.<sup>47</sup>

Section 86(1) IHTA (Employee benefit trusts) provides relief:

Where settled property is held on trusts which... do not permit any of the settled property to be applied otherwise than for the benefit of—

- (a) persons of a class defined by reference to
  - [i] employment in a particular trade or profession, or
  - [ii] employment by, or office with, a body carrying on a trade, profession or undertaking ...

This raises the question whether a partnership is a body, and whether partners hold an office. Here HMRC seem to take a narrower view:

The IHT Manual provides:

**IHTM42925: Employee benefit trusts: conditions for relief: partnerships** [Oct 2020]

England, Wales and Northern Ireland

A trust does not qualify under IHTA84/S86 if it is for the benefit only of a particular sole trader or partnership. This is because an individual sole trader or partner is not:

- a ‘body’ within IHTA84/S86(1)(a), or
- a class of people defined by a trade, profession or undertaking of the employer.

The ‘employees’ of a partnership are the individual partners who carry on their trade, profession or undertaking in an association governed by their Articles so they are not employed by a ‘body’.

It is suggested that a English partnership is a body : body is wider than “body corporate”. A trust for partners does not qualify as an EBT because partners are not employees and do not hold an office.<sup>48</sup> But a trust for employees of a partnership may qualify as an EBT.

The Manual continues:

---

46 <https://www.gov.uk/government/publications/charities-detailed-guidance-notes/an-nex-ii-non-charitable-expenditure>

47 See 59.1.1 (Separate sub-fund trustees).

48 See 33.3.1 (Offices).

**Scotland**

In Scotland a partnership is a separate legal persona, so it could create an employee benefit trust within the terms of IHTA84/S86.

A trust for partners of a Scots partnership only qualifies as an EBT if the partners hold an office. That is a question of Scots law, but it seems doubtful. A trust for employees of a Scots partnership may qualify as an EBT.

This analysis avoids an anomaly between Scottish and other UK partnerships.

Likewise, members of a LLP do not hold an office but a trust for employees of an LLP could qualify as an EBT.

I note that the word “office” is not used to describe the status of a partner in either the Partnership Act 1890 or the LLPA 2000.

It would be better if statute did not use the word body, but clarified its intention with more precise terminology; but there it is.

**82.15 Partnership transparency: IT/CT**

Partnerships are transparent for IT/CT, in the sense that partnership income/losses are regarded as income/losses of the partners and not of the partnership as such. In my terminology, in this context, IT adopts the co-ownership analysis of a partnership share.<sup>49</sup> That must be the better analysis, as an English partnership does not have legal personality, ie it is not itself a person. Unless partnership income arises to the partners, it would not arise to anyone, and partnership income must arise to some person or persons if it is to be taxed as it arises.

Scots partnerships are likewise transparent in that sense. In *Memec v IRC*:<sup>50</sup>

It is not difficult to see why an English partnership (including a limited partnership) is treated as transparent, the partners carrying on business (whether by themselves or by the other partners as their agents) in common and owning the business and having a beneficial interest in the partnership assets and profits.

The justification for treating a Scottish partnership as transparent,

---

49 See 82.3 (Nature of partnership share).

50 71 TC 77 at p.113.

though it may be less obvious because of the interposition of the partnership as a legal entity between the partners and the profits of the partnership, can be perceived in that in substance the position of the partners in relation to the profits is the same as in an English partnership:

- [1] those profits are earned by the partners carrying on business in common together and are shared in the same way and
- [2] the partners, whilst not directly owning the business and assets, indirectly do so and have an indirect interest in them...<sup>51</sup>

The Law Commission say:<sup>52</sup>

The Inland Revenue justify their approach to UK partnerships<sup>53</sup> by reference to the following three characteristics:

- (1) the partners carry on the business of the partnership with a view to profit;
- (2) every partner is liable jointly or jointly and severally with the other partners for all the debts and obligations of the partnership; and
- (3) the partners own the business, each having at least an indirect share in the net assets of the partnership.

So the fact that a Scots partnership does have legal personality does not entail the conclusion that partnership income accrues to the partnership rather than the partners. Underlying that point is some vagueness or ambiguity in what the concept of legal personality means or entails.<sup>54</sup> The courts' inclination to minimise tax differences between English and Scots partnerships must also have been an influence in reaching this legal analysis.<sup>55</sup>

## 82.16 Entity disregard rule

s. 848 ITTOIA

s. 1258 CTA 2009

51 This passage continues: "...which is capable of being arrested [ie seized] by the creditor of a partner". But what is seized is the debtor's partnership share, not the partnership property.

52 Law Com 283, *Partnership Law* (2003) para 4.28.

53 Footnote original: This covers both the English partnership and the Scots partnership notwithstanding that the former has no separate legal personality and the latter has separate legal personality.

54 See App 2.9 (Person/legal personality).

55 See 82.3.3 (English/Scots partnership tax aligned).

Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for income tax purposes as an entity separate and distinct from the partners.

Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for corporation tax purposes as an entity separate and distinct from the partners.

I refer to this as the “**entity disregard rule**”.

### 82.16.1 *Purpose of entity disregard*

Prior to the current statutory provision, there used to be a single assessment of partnership income in the partnership name.<sup>56</sup> The entity disregard rule abolished that rule: that is why it says that a partnership is not an “entity” (rather than saying it is not a “person”). That explains why the heading to s.848 is: “Assessment of partnerships” and the heading to s.1258 is, similarly, “Assessment of firms”. The rule is concerned with the process of assessment.

EN ITTOIA provides:

1712. In the case of firms established under English law this provision [the entity disregard rule] merely confirms their position under that law. But Scottish firms, for example, are legal entities [more correctly, legal persons]. This provision ensures that all firms are treated in the same way.

This suggests that the entity disregard rule is the reason or basis for partnership transparency. That analysis is not correct: transparency follows from basic principles, not from the entity disregard rule. That is clear for two reasons:

(1) The entity disregard rule dates from 1994. However, IT transparency of partnerships has been settled law since the beginning of Income Tax.<sup>57</sup>

---

<sup>56</sup> The entity disregard derives from s.215 FA 1994. The predecessor provision, s.111 ICTA 1988 in its original form provided:

“Where a trade or profession is carried on by two or more persons jointly, income tax in respect thereof shall be computed and stated jointly, and in one sum, and shall be separate and distinct from any other tax chargeable on those persons or any of them, and a joint assessment shall be made in the partnership name.”

<sup>57</sup> It was accepted without question as the background to the issue in *Dreyfus v IRC* 14 TC 560.

(2) The purpose of the rule relates to assessment procedures, not transparency.

The practical reader might ask impatiently whether it matters that IT transparency follows from basic nature of a partnership, rather than from the entity disregard rule. It does not matter so far as the settled rule is that partnership income accrue to the partners. But I think the issue does matter, because a reader who studies the topic will identify the false reasoning and be left confused; and when other questions arise, identifying the nature of a partner's right to income may be a central issue, and misunderstanding the role of the entity disregard rule may lead to the wrong result.<sup>58</sup>

### 82.17 “Trade”

The income taxation of partnerships is mostly in Part 9 ITTOIA. This uses an idiosyncratic definition of “trade”.

#### s. 847 ITTOIA

(2) The provisions of this Part [Part 9 ITTOIA] which are expressed to apply to trades also apply, unless otherwise indicated (whether expressly or by implication)—

(a) to professions, and  
(b) in the case of this section and sections 849, 850, 857 and 858 to businesses that are not trades or professions.

(3) In those sections as applied by subsection (2)(b)—

(a) references to a trade are references to a business, and  
(b) references to the profits of a trade are references to the income arising from a business.

#### s.1257 CTA 2009

(2) This section and sections 1259 to 1266 are expressed to apply to trades, but unless otherwise indicated (whether expressly or by implication) also apply

to businesses that are not trades.

(3) In those sections as applied by subsection (2)—

[identical]

---

58 See 17.37 (Partnerships).

Thus the word “trade” in Part 9 ITTOIA always includes profession (it would be appropriate to simplify the law by a general rule that trade includes profession for all tax purposes).<sup>59</sup> That does not apply for CT on the basis that a company cannot carry on a profession.

The word “trade” sometimes includes “business”. Since it is not convenient to use the same word in two different senses, when trade is used in the wider sense, I refer to it as “**trade (including business)**”.

## 82.18 Partnership income: Remittance basis

Section 857 ITTOIA provides:

- (1) This section applies if—
  - (a) a firm carries on a trade [including business] wholly or partly outside the UK,<sup>60</sup>
  - (b) the control and management of the trade [including business] is outside the UK, and
  - (c) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to a partner for a tax year.
- (2) The partner’s share of the profits of the trade [including business] arising in the UK is determined in accordance with sections 849 to 856.
- (3) The partner’s share of the profits of the trade [including business] arising outside the UK is treated as relevant foreign income.

The main significance of s.857(3) – treating partnership income as RFI – is that the income can qualify for the remittance basis.

### 82.18.1 *Segregating partnership profit*

Suppose:

- (1) profits of a partnership trade arise partly in and partly outside the UK; and
- (2) a partner receives a share of those profits.

There is an apportionment to determine the profits arising in/outside the

<sup>59</sup> The taxation of trades and professions should be aligned. If (which I doubt) there are any points where different rules are needed, that should be dealt with by express provisions.

<sup>60</sup> Section 857(1)(a) appears to be otiose because if the condition in s.857(1)(b) is met the condition in s.857(1)(a) must be met. But it does not matter.

UK.<sup>61</sup> The profits that the partner receives constitute a mixed fund, partly RFI (mixed fund category (d)) and partly other income (mixed fund category (i)). A remittance from such a fund follows the mixed fund rule; later years before earlier, and RFI of a year before the other income of the year.

On the other hand, suppose:

- (1) profits of a partnership trade arise partly in and partly outside the UK; and
- (2) a partner receives a share of profits arising outside the UK only.

In that case all the income that the partner receives is RFI. If a partnership includes partners who are remittance basis taxpayers, it may therefore be important for a partnership, if it can, to segregate the two parts of its trade so it can identify which parts of its profits arise in and which parts arise outside the UK.

### 82.18.2 *Control and management*

The test is control and management of the trade, not control and management of the partnership, but that will usually make any difference.

Normally a remittance basis taxpayer will want to argue that a partnership trade is controlled abroad, to qualify for the remittance basis, and HMRC will want to argue that control is here. However, if the partnership makes losses the boot may be on the other foot: UK partners may argue for control in the UK, to obtain more generous loss relief.

The former International Tax Handbook provided at para 1613:

[Section 857 ITTOIA] refers simply to control and management being abroad and the view which we have, in general, adopted in determining whether the Section applies is that this means control etc must be wholly abroad. The strength of this view has never been tested in the Courts and the word 'wholly' does not appear in the Act. It is sometimes put to us that where control and management is partly abroad then [section 857] applies. On the other hand, we have argued that because the Section says 'is situated abroad' it means just that and if control is partly here then it is not abroad.

---

61 See 20.20 (Trade partly in UK: Apportionment).

### 82.18.3 *Where is control/management*

The place of control and management of a partnership matters for various purposes:

- (1) The test for RFI in s.857
- (2) Situs of partnership share<sup>62</sup>
- (3) Partnership residence<sup>63</sup>

It is considered that the test is the same in each case.

The expression “control and management” is of course from the company residence test, and it is considered that it should be given the same meaning here. Thus company residence case law offers guidance.<sup>64</sup> The former International Tax Handbook provided at para 1612:

Generally speaking we follow the thinking on companies and look at the place of the highest level of management rather than day-to-day management. Outside textbooks follow the same line.

In deciding the location of the control and management of a firm with both UK and overseas partners, we would usually regard as significant such factors as the comparative seniority of the partners in age and experience (a simple head count will not do of course), the extent of their interests in the firm, the source and control of the finance, the places of decision on policy and major transactions, the places and locations of partners’ meetings and what was done at those meetings. The place of meetings incidentally is not a conclusive factor any more than it is – or ought to be – for companies. So the nature of the business done at the meeting is important. Is it really about control and management or just part of a facade to mislead us about the place of actual control and management?

The Commissioners would normally adopt a broad approach, looking at the whole picture in order to identify one overall place of control where possible, and situations where control was located in the UK and abroad would be rare. If it did arise, the HMRC view seems sound.

---

<sup>62</sup> See 97.33 (Situs of partnership share).

<sup>63</sup> See 82.22 (Residence of partnership).

<sup>64</sup> There was a discussion in the former International Tax Handbook at para 1614 as to whether “control and management” are two distinct tests with distinct meanings, or a composite phrase. If my approach is right, the words are a single composite phrase.

The place of control and management is distinct from:

- (1) The place where the partners reside<sup>65</sup>
- (2) The law of the partnership, which is not relevant

In *Mark Higgins Rallying v HMRC*:<sup>66</sup>

We consider the appropriate test for the location of control and management of the business of a partnership is that adopted by the courts in relation to residence of companies.<sup>67</sup> We note the same conclusion was reached by HMRC and stated in their Manual; also that it was the one argued for before us by the Partnership.

#### 82.18.4 *HMRC practice*

The former International Tax Handbook provided:

**1622. Normal professional partnership: foreign partnership treatment**

In the *Frost* case<sup>68</sup> we tried to argue before the Commissioners that control and management was not abroad. That is our approach to any case where partnerships appear to have been set up for the purpose of avoidance and Case V [RFI] is of advantage, which, as ITH1630 indicates, it may yet be though to a much lesser extent than in earlier years.

**1623. Foreign partnership treatment: artificial arrangements**

But a common situation in professions such as engineers and accountants is one where there is a UK partnership and a separate partnership formed abroad with one or more non-UK resident partners in which some or all of the UK partnership partners are members. Generally speaking where the non-resident partners are professionally qualified and the overseas partnership takes on work which is reasonably local to the place where the partnership is based, it is possible to take a fairly relaxed view and accept a claim to Section [857] treatment. That was so even when Case V was on the remittance basis. If, however, the prima facie evidence against this view were very strong, we would look much more closely.

It seems obvious that in these cases there will be some control in the UK – although proving that that is so is a different matter – but usually the UK resident partners will make visits to the overseas office and there is a case for saying that the management of the partnership is abroad. (This harks back to the Solicitor’s Opinion considered in ITH1614.) It may be that some of the overseas

---

65 There is no concept here of carrying on business by tacit oversight; contrast 20.4 (UK resident trader: IT).

66 [2011] UKFTT 340 (TC) at [51].

67 See 7.6 (Central management/control test).

68 *Newstead v Frost* 53 TC 525.

partnership work is done in the UK by the UK partnership but this normally happens – or is said to happen – through the UK partnership acting as subcontractor for the overseas partnership.

**1624. Foreign partnership treatment: income that of partnership?**

If, however, one reaches the position that the ultimate control is in the UK and the bulk of the work is actually done here – albeit under subcontract – then that would be a case for a possible challenge. Cases have been seen where the arrangements were plainly offensive and amounted to no more than attempts to park UK-earned profits in a Section [857] partnership with the admitted intention of avoiding UK tax.

We would certainly want to attack these devices and argue, for example, that the work done in the UK by partners who were also members of the overseas firm was done in their capacity as members of that overseas firm. We could then establish that the profits from those activities could be assessed under Case II. Our Solicitor, on particular cases, has not been discouraging about the chances that we may succeed and in the days of the remittance basis there was some success in settling cases on Case II lines rather than Case V. However, these cases turn crucially on questions of fact and degree and there is the usual difficulty of obtaining information.

**1625. Foreign partnership treatment: income that of partnership?**

Sometimes we have had to consider whether there is in fact an overseas partnership and/or whether amounts claimed to be receipts of an overseas partnership are in fact receipts of the UK partnership which is seeking to avoid tax. We have had some success with the latter line under circumstances which gave grounds for quiet satisfaction. A firm of UK solicitors which had profited from its fees for advice about the setting up of a well-known tax avoidance scheme, sought to avoid tax on those fees by arranging to park them in a Channel Islands finance and brokerage partnership to which Section [857] was said to apply. This was insult added to injury with vengeance.

Our Solicitor's advice was that we could not challenge the view that control and management was abroad. However, there was considerable artificiality in the arrangements which led ultimately to the fees landing in the accounts of the Jersey partnership. We argued that the amounts were in fact receipts of the UK solicitor's practice and we were aided in this by the fact that it was probably improper for a UK solicitor to enter into a partnership with a non-solicitor to do what they claimed to do in Jersey. This line was eventually conceded and we got tax on the Channel Island profits accruing to the UK partners.

## 82.19 Partnership transparency: CGT

Readers who find this topic difficult may take comfort from the OTS:

No-one understands CGT in relation to partnerships.<sup>69</sup>

Section 59(1) TCGA provides:

Where 2 or more persons carry on a trade or business in partnership—

- (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
- (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This is somewhat scanty foundation for the CGT treatment of partnerships.<sup>70</sup> It is supplemented by SP D12:

**Disposals of assets by a partnership**

2.1. Where an asset is disposed of by a partnership to an outside party, each of the partners will be treated as disposing of his fractional share of the asset.

So partnerships are transparent for CGT, in the sense that gains/losses on disposals of partnership assets accrue to the partners (not to the partnership). For reasons similar to those discussed above for IT,<sup>71</sup> this result follows from first principles, and the statutory provision merely confirms that.

In determining whether gains are foreign chargeable gains (which may qualify for the remittance basis) one has regard to the situs of the partnership assets; the situs of the partnership share is irrelevant.

The question then is to identify the fractional share of each partner, and that can be tricky as partners do not always have easily quantifiable fractional shares. SP D12 continues:

In computing gains or losses the proceeds of disposal will be allocated between the partners in the ratio of their share in asset surpluses at the

69 “Review of partnerships: interim report” (2014) para 6.1

<https://www.gov.uk/government/publications/partnerships-review>

70 The Law Commission put the point more tactfully: “The working out of this concept [s.59 TCGA] in practice has not been easy, and has had to be regulated by extra-statutory guidance;” Law Com 283, *Partnership Law* (2003) para 3.51.

[http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283\\_Partnership\\_Law.pdf](http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf)

71 See 82.15 (Partnership transparency: IT/CT).

time of disposal. Where this is not specifically laid down, the allocation will follow the actual destination of the surplus as shown in the partnership accounts; regard will of course have to be paid to any agreement outside the accounts.

2.2. If the surplus is not allocated among the partners but, for example, put to a common reserve, regard will be had to the ordinary profit sharing ratio, which is likely to be indicative in the absence of a specified asset-surplus-sharing ratio.

2.3. Expenditure on the acquisition of assets by a partnership will be allocated between the partners according to the same principles at the time of the acquisition. This allocation may require adjustment if there is a subsequent change in the partnership sharing ratios see (section 4).

2.4. Guidance and an example concerning section 2 are available in HMRC's Capital Gains Manual at CG27350.

Assignments of partnership interests, and changes in partnership sharing ratios, are interesting topics, but they are not discussed here.

## 82.20 Limited liability partnership

### 82.20.1 *Definition and nature of LLP*

Section 1(2) Limited Liability Partnerships Act 2000 provides:

- [A] A limited liability partnership is a body corporate (with legal personality separate from that of its members) which is formed by being incorporated under this Act; and—
- [B] (a) in the following provisions of this Act (except in the phrase “oversea limited liability partnership”), and
- (b) in any other enactment (except where provision is made to the contrary or the context otherwise requires),
- references to a limited liability partnership are to such a body corporate.

So in UK legislation (including tax) the expression “LLP” means a UK LLP (one incorporated under the LLPA 2000). Occasionally the drafter forgets the general statutory definition and states that LLP has the meaning given in s.1(2) LLPA.<sup>72</sup> But this is otiose.

Unless the context otherwise requires, “LLP” does not include a foreign

---

<sup>72</sup> MLR 2017 is an example, see 122.15 (Beneficial owner: Partnership).

LLP.<sup>73</sup>

An LLP (despite its name) is not a partnership in the strict sense of the word (which I call ordinary partnerships).<sup>74</sup> Of course the context may show that the word “partnership” is used loosely (strictly, incorrectly) to include LLPs as well as ordinary partnerships,<sup>75</sup> or indeed to include foreign LLPs. However except where the context is clear, one should not use the word partnership to refer to an LLP without saying so expressly.

It would have been simpler if a LLP had been a type of partnership. Avery Jones explains:

Presumably the reason for creation of this new type of corporate body is that its limited liability is more likely to be accepted in other countries, although this carries with it the corresponding disadvantage that if other states base their tax treatment on its non-tax law characteristics they are likely to classify it as a corporation.<sup>76</sup>

### 82.20.2 *LLP: View to profit*

Section 2(1) LLPA 2000 provides:

For a limited liability partnership to be incorporated—

- (a) two or more persons associated for carrying on a lawful business with a view to profit must have subscribed their names to an incorporation document ...

Thus at the time of incorporation the members must have a view to profit. This is similar to an ordinary partnership. But a LLP continues to exist if it subsequently ceases to carry on business, or ceases to have a view to profit. In this respect an LLP is different from an ordinary partnership.

### 82.20.3 *LLP law background*

The BI Manual provides a basic summary:

---

<sup>73</sup> See 86.28 (Foreign LLP).

<sup>74</sup> This is clear from the definition in s.1(2) LLPA; this view is also supported by s.1(5) LLPA: “... except as far as otherwise provided by this Act or any other enactment, the law relating to partnerships does not apply to a limited liability partnership.” The drafter assumed this in s.863(2) ITTOIA.

<sup>75</sup> This is self-evident, but if authority is needed, see *Sword Services v HMRC* [2016] EWHC 1473 (Admin) at [55] - [64].

<sup>76</sup> “Characterisation of other states’ partnerships for income tax” [2002] BTR 375.

**BIM82110 Limited Liability Partnership: Overview** [Jun 2016]

... Except where specifically provided for in the LLP legislation, partnership law does not apply to LLPs. The way that LLPs are regulated is similar to that for companies and a number of provisions of the Companies Act 2006 also apply to LLPs.

An LLP can be formed by two or more persons who are carrying on a partnership type business. The LLP has to be registered at Companies House.

LLPs are seen as a flexible business model. As with partnerships, LLPs are governed by the agreement between the members. There are default positions set out in the LLP regulations however in most cases these will be overridden by the agreement between the members...

*Members*

A LLP must have at least two registered members.

The first members are those who signed the document incorporating the LLP. Other people can be admitted by agreement with the existing members.

Where a person becomes a member of a LLP or ceases to be a member of a LLP the LLP must give notice of this to the Registrar of Companies within 14 days.

If a new member has, as a matter of fact, been admitted to the partnership by entering into an agreement with the other members, but the LLP failed to update their register of members, then the new member is still a member of the LLP and liable for tax on their share of the profits.

Individuals, corporates (including other LLPs), and Scottish partnerships are eligible to be members of a UK LLP.

No entity without a discrete, separate legal identity can be a member of an LLP. In particular, a firm such as an English partnership (or an English Limited Partnership) cannot, itself, be a member of a UK LLP

*Designated members*

The term designated member is used in the LLP legislation. It simply means a member with additional duties under the LLP legislation. The term has no significance for tax purposes...

**BIM82112 LLP Agreement** [Jan 2019]

The UK LLP is a body corporate that is governed by an agreement, the 'LLP Agreement'.

There are default provisions on how an LLP will operate which are set out in the LLP Regulations, but these will rarely apply as in most cases they are overridden by what is set out in the LLP Agreement.

It is important to recognise that the LLP Agreement is not simply the document labelled ‘LLP Agreement’.

The LLP Agreement is much wider than that document and includes not only written agreements but it also includes verbal or implied agreements.

The LLP Agreement includes any agreement that governs:

- The relationship between members of the LLP
- The relationship between the LLP and its members

It does not include agreements between the LLP and non members or between members and non members.

The document labelled ‘LLP Agreement’ may contain a clause saying that it is the entire agreement between the members. This may not be correct in all cases however, as that agreement can be amended by any subsequent agreement entered into.

For example, when a new member joins the LLP, there may be a specific agreement between the individual and the LLP, this is sometimes called the ‘deed of adherence’, and is part of the LLP Agreement.

When asking for a copy of the LLP Agreement it is worth making it clear that it is the agreement as defined in regulation 2 of the LLP Regulations 2001 and therefore that any side agreements and amendments ought to be disclosed as well. This might include minutes of meeting of the LLP or of boards and committees that regulate the conduct of the LLP or decide upon issues that govern the relationship of the LLP and its members, e.g. remuneration/ management committees, etc.

When looking at a particular member it is important to ask for a copy of any deed of adherence under which they became a member as well as any other written or oral agreements that they have entered into with the LLP.

## **82.21 Tax treatment of LLP**

### *82.21.1 LLP treated as partnership*

An LLP is a body corporate. So an LLP is in principle classified as a company for tax purposes.<sup>77</sup> However this default position is subject to such wide exceptions that it hardly ever applies.

---

<sup>77</sup> See 86.3 (Definition of “company”).

**s.863(1) ITTOIA**

For income tax purposes, if a limited liability partnership carries on a trade, profession or business with a view to profit<sup>78</sup>—

(a) all the activities<sup>79</sup> of the limited liability partnership are treated as carried on in partnership by its members (and not by the limited liability partnership as such),

(b) anything done by, to or in relation to the limited liability partnership for the purposes of, or in connection with, any of its activities is treated as done by, to or in relation to the members as partners, and

(c) the property of the limited liability partnership is treated as held by the members as partnership property.

**s. 1273(1) CTA 2009**

For corporation tax purposes, if a limited liability partnership carries on a trade or business with a view to profit—

[identical]

[identical]

[identical]

For CGT, s.59A(1) TCGA provides effectively the same rule. Section 59A may be easier to follow if set alongside s.59(1) from which it derives.<sup>80</sup>

**s.59A TCGA (LLP)****s.59 TCGA (ordinary partnership)**

78 See App.5.3 (A view to profit).

79 The last paragraph of s.863(1) provides:

“References in this subsection to the activities of the limited liability partnership are to anything that it does, whether or not in the course of carrying on a trade, profession or business with a view to profit.”

The last para of s.1273(1) is identical except for the omission of the word “profession”.

80 See 82.19 (Partnership transparency: CGT).

Where a limited liability partnership carries on a trade or business with a view to profit—

(a) assets held by the limited liability partnership are treated for the purposes of tax in respect of chargeable gains as held by its members as partners, and

(b) any dealings by the limited liability partnership are treated for those purposes as dealings by its members in partnership (and not by the limited liability partnership as such);

[c] and tax in respect of chargeable gains accruing to the members of the limited liability partnership on the disposal of any of its assets shall be assessed and charged on them separately.

Where 2 or more persons carry on a trade or business in partnership—

[No equivalent; none needed]

(b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.<sup>81</sup>

(a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately,

The default (corporate, non-transparent) treatment applies to:

- (1) LLPs which do not carry on business with a view to profit<sup>82</sup>
- (2) Hybrid LLPs<sup>83</sup>

### 82.21.2 *LLP: Partnership terms applied*

**s.863(2) ITTOIA**

**s.1273(2) CTA 2009**

**s.59A(2) TCCGA**

---

81 I have had to put para (a)(b) in reverse order to set them opposite the equivalents in s.59. Why was the order reversed?

82 See 82.21.3 (Cessation of LLP business).

83 Section 259GE TIOPA.

For all purposes, except as otherwise provided, in the Income Tax Acts—

For all purposes, except as otherwise provided, in the Corporation Tax Acts—

For all purposes, except as otherwise provided, in the enactments relating to tax in respect of chargeable gains—

(a) references to a firm or partnership include a limited liability partnership in relation to which subsection (1) applies,

[identical]

[identical]

(b) references to members or partners of a firm or partnership include members of such a limited liability partnership,

[identical]

[identical]

And conversely s.863(2) ITTOIA/s.1273(2) CTA 2009/s.59A(2) TCGA provide:

- (c) references to a company do not include such a limited liability partnership,<sup>84</sup> and
- (d) references to members of a company do not include members of such a limited liability partnership.

In short, an LLP is (generally, ie provided it is carrying on a business with a view to profit) regarded as a partnership and not a company.<sup>85</sup>

An LLP is nevertheless a person, and a body corporate, and so the starting point is that references in tax legislation to person/body corporate do include an LLP unless the context otherwise requires. The rule that

---

84 Para (c) may be otiose, since standard tax definitions of “company” exclude partnerships; but perhaps it is for the avoidance of doubt; or perhaps it might apply to some non-standard definition of company.

85 If authority is needed, see *HMRC v Vaines* [2018] EWCA Civ 45 at [15]: “For income tax purposes, however, limited liability partnerships are treated in the same way as an ordinary English partnership. This is achieved by s.863 ITTOIA ...”

references to a *company* do not include an LLP does not expressly extend to references to a person/body corporate. But given that a general partnership is not a person/body corporate, and references to a partnership do include an LLP, it is suggested that the inference can easily be made that references in IT/CGT/CT legislation to person/body corporate do not include an LLP; though this is (needless to say) subject to context.

In *Margott v HMRC*<sup>86</sup> the FTT noticed (which I confess I had not) that s.863(1) applies for *income tax purposes*, but s.863(2) applies for the *Income Tax Acts*; and the latter term, surprisingly, was said not include the TMA. The result was that penalty provisions dealing with partnerships did not apply to LLPs. This seems to have been corrected by the UT in *HMRC v Inverclyde*<sup>87</sup> but the matter will need review when that decision is final.

### 82.21.3 Cessation of LLP business

Section 863(1) ITTOIA only applies if a limited liability partnership carries on business<sup>88</sup> with a view to profit.

Section 863(3)(4) ITTOIA/s.1273(3)(4) CTA 2009/s.59A TCGA deal with the position where the LLP ceases to carry on business:

(3) Subsection (1) continues to apply in relation to a limited liability partnership which no longer carries on any trade, profession or business with a view to profit—

- (a) if the cessation is only temporary, or
- (b) during a period of winding up following a permanent cessation, provided—
  - (i) the winding up is not for reasons connected in whole or in part with the avoidance of tax, and
  - (ii) the period of winding up is not unreasonably prolonged.

This is subject to subsection (4).

(4) Subsection (1) ceases to apply in relation to a limited liability partnership—

- (a) on the appointment of a liquidator or (if earlier) the making of a winding-up order by the court, or
- (b) on the occurrence of any event under the law of a territory

---

86 [2017] UKFTT 894 (TC).

87 [2020] UKUT 0161 (TCC).

88 I use the word business to include a trade/profession.

outside the UK corresponding to an event specified in paragraph (a).<sup>89</sup>

It follows that (almost) any comment about the treatment of LLPs needs to be qualified by the word *generally*, as the position will be different for an LLP not carrying on a business.

What is the reason for this rule?

*Bayonet Ventures v HMRC* concerned a dormant LLP (it had not begun to carry on a business). Accordingly, s.863(1) did not apply to it.<sup>90</sup> But that situation will not often arise.

For CGT, s.59A TCGA concludes with two provisions which have no IT/CT equivalent:

(5) Where subsection (1) above ceases to apply in relation to a limited liability partnership with the effect that tax is assessed and charged—

(a) on the limited liability partnership (as a company) in respect of chargeable gains accruing on the disposal of any of its assets, and

(b) on the members in respect of chargeable gains accruing on the disposal of any of their capital interests in the limited liability partnership,

it shall be assessed and charged on the limited liability partnership as if subsection (1) above had never applied in relation to it.

(6) Neither the commencement of the application of subsection (1) above nor the cessation of its application in relation to a limited liability partnership shall be taken as giving rise to the disposal of any assets by it or any of its members.

Section 156A TCGA (not discussed here) provides for a clawback of roll-over relief on cessation of a LLP business.

#### 82.21.4 *HMRC practice*

SP D12 provides:

---

<sup>89</sup> I have ignored trivial differences in the wording of the CGT provision.

<sup>90</sup> [2018] UKFTT 262 (TC) at [33]–[46]. Fortunately for the taxpayer, HMRC (not represented by Counsel) did not think through the implications of this; the consequence would have been that the LLP was taxed as a company, and the loan from the LLP to a member would have given rise to a charge under the close company rules.

TCGA92/S59A(1) complements TCGA92/S59 in treating any dealings in chargeable assets by a limited liability partnership as dealings by the individual members, as partners, for CGT purposes. Each member of a limited liability partnership to which TCGA92/S59A(1) applies has therefore to be regarded, like a partner in any other (non-corporate) partnership, as owning a fractional share of each of the partnership assets and not an interest in the partnership itself.

This statement of practice was therefore extended to limited liability partnerships which meet the requirements of TCGA92/S59A(1), so that capital gains of a limited liability partnership fall to be charged on its members as partners. Accordingly, in the text of the statement of practice, all references to a ‘partnership’ or ‘firm’ include reference to limited liability partnerships to which TCGA92/S59A(1) applies, and all references to ‘partner’ include reference to a member of a limited liability partnership to which TCGA92/S59A(1) applies.

For the avoidance of doubt, this statement of practice does not apply to the members of a limited liability partnership which ceases to be ‘fiscally transparent’ by reason of its not being, or it no longer being, within TCGA92/S59A(1).

## 82.22 Residence of partnership

The residence of a partnership is not often important for tax, but it matters occasionally:

- (1) The rule disallowing partnership DT relief refers to a firm which resides outside the UK.<sup>91</sup>
- (2) In order to be a “foreign employer” (and so have chargeable overseas earnings) a partnership must (in short) be resident outside the UK.<sup>92</sup>
- (3) One may need to identify UK-law residence of a partnership in order to determine its treaty-residence.<sup>93</sup>

Until 1995 the position was governed by s.112(1) ICTA 1988:

*Where a trade or business is carried on by two or more persons in partnership, and the control and management of the trade or business*

---

91 See 82.24 (DT relief: Partnership).

92 See 33.15 (Foreign employer).

93 See 8.22 (Treaty residence: Partnerships). This is no longer relevant for UK tax because of the treaty override, but may be relevant for foreign tax.

*is situated abroad, ... the partnership shall be deemed to reside outside the UK ...*

This was absent-mindedly repealed, and now there is no statutory definition of partnership residence; but it is considered that the test of partnership residence is still control and management. This is consistent with the general scheme of UK taxation of partnerships.<sup>94</sup> EN ITTOIA agrees, in the passage set out above (“For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm’s business is controlled and managed. ...”).<sup>95</sup>

HMRC agree. The former International Tax Handbook provided:

### **1609. Residence**

In English law a partnership is not a person and it has long been assumed that it cannot in fact have a residence. Although Scottish partnerships are persons we have not made any distinction. ... But there has been some nibbling away of the principle that a partnership does not have a residence. The concept of residence and partnerships appears in other Sections of the Taxes Acts. For example in [the definition of chargeable overseas earnings] there is the concept of a partnership, ‘resident outside and not resident in the UK’. The transfer pricing provisions ... apply to partnerships but their effect may depend on whether or not the buyer or seller is resident in the UK.<sup>96</sup> It is probable that if residence of a partnership in these contexts ever had to be put to the test the criterion of control and management would be used.

More important is the case of *Padmore v IRC* 62 TC 352. This concerned the effect of the Double Taxation Agreement with Jersey on the liability of UK resident partners of a partnership controlled and managed in Jersey. Jersey law has a provision very similar to Section 112 [ICTA 1988]. Both the High Court and the Court of Appeal considered that it must be deduced from the respective Sections that both Jersey and UK law attach tax consequences to the residence of partnerships and that residence is determined by control and management.

---

94 See 82.18.3 (Where is control/management).

95 See 82.24 (DT relief: Partnership).

96 Author’s footnote: This ceased to be the case when the transfer pricing rules were re-written in 1998.

## 82.23 Partnerships: Group reliefs

### 82.23.1 *The issues*

This section considers how partnerships are treated in the context of group reliefs.

There are many group reliefs:

Relief	Provision	See para
<i>CG group reliefs</i>		
UK-group	s.170-181 TCGA	60.28
Non-resident group	s.3F TCGA	60.29
Group loss relief	Pt 5, ss97-188 CTA 2010	<i>See below</i>
Stamp Duty group relief	s.42 FA 1930	<i>See below</i>
SDLT group relief	sch 7 FA 2003	<i>See below</i>

A feature of group reliefs is where they are expressed to apply to a company, they use that word with a non-standard definition:

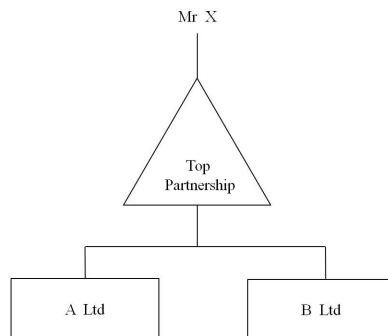

Relief	Definition of company
CG group reliefs	Company means specified corporate bodies excluding LLPs <sup>97</sup>
Loss relief	Company means body corporate: s.188(1) CTA 2010
SDLT	Company means body corporate: para 1 sch 7 FA 2003

Stamp Duty group relief is expressed to apply to a body corporate, not to a company, which is another route to the same destination.

Case 1

Case 2

<sup>97</sup> See 67.28.8 (“Company”).

The main questions which arise are:

- (1) Does the intermediate partnership, in the middle of the structure, block a group: in case 1, are A & B a group?
- (2) Does the top partnership create a group: in case 2, are A & B a group?

The partnership may be English, Scots or an LLP; and each relief must be considered separately. So there are many permutations.

One might paraphrase the question by saying, is a partnership transparent for group relief, but that does not make the question any easier, and it may add to the confusion, for transparency has many aspects.<sup>98</sup>

A third question is whether the partnership might itself claim a group relief, eg on a transfer from a company in the structure to the partnership, or vice versa; but the answer to that, unsurprisingly, turns out to be, no.

### 82.23.2 *Group loss relief*

CTM provides:

**CTM80152 Groups: Group Relief And Partnerships** [Dec 2019]

The group and consortium conditions (respectively CTA10/S131, and S132 with S133) establish that the group relief provisions can only apply to companies. CTA10/S188 defines a company for group relief purposes as any body corporate.

General partnerships governed by the Partnership Act 1890 and Limited Partnerships registered under the Limited Partnerships<sup>99</sup> Act 1907 cannot claim or surrender group relief. They are not bodies corporate...

A trading partnership in England, Wales or Northern Ireland has no legal personality and cannot own assets, so the assets of the partnership are treated as beneficially owned by the partners. This will generally be in proportion to the members' partnership shares, determined by the partnership agreement, but see BIM82058 for more details on the property of partnerships....

Similar principles apply to groups for the purposes of chargeable gains.<sup>100</sup>

A UK Limited Liability Partnership (LLP) is by statute a body

98 See 86.2.4 (Transparent/opaque: Caution).

99 The original erroneously reads "Limited Partnership Act 1907".

100 See 60.27 ("51/75/90% subsidiary").

corporate, but is specifically excluded from the definition of company by CTA09/1273 (2)(c), so an LLP cannot claim or surrender group relief.

That is clear: partnerships do not qualify for group loss reliefs. Since partnerships are transparent for IT/CT, in the sense that partnership income and losses accrue to the partners, that must obviously be the case.

Turning to the question of a structure with an intermediate partnership:

CTA09/S1273 (1)(c)<sup>101</sup> treats the property of an LLP carrying on a trade or business with a view to profit as held by the members as partnership property. It follows that for group relief purposes any ordinary share capital held by an LLP is treated as beneficially owned by the LLP members in the proportion of each member's share in the LLP, and thus an LLP can be "looked through" to establish a group relationship...

Thus in case 1, A and B do form a group for group loss relief and CG relief: the intermediate partnership does not block the group. The CTM provides an example of a group with an intermediate partnership, which is essentially the same as my case 1:

The English general partnership owns 100% of the share capital in E Limited. A, B, C, and D Limited are members of the partnership and each own a proportion of the partnership assets as shown in the diagram.

The beneficial ownership of the partnership assets is considered to

---

101 See 82.21.1 (LLP treated as partnership).

belong to the members in proportion to their partnership shares. Hence A Limited will own  $(80\% \times 100\%) = 80\%$  of the ordinary share capital in E Limited.

B and D Limited will each own 5%, and C will own 10%. This means that A and E will be in a group relationship because E is a 75% subsidiary of A (CTM80151).

While one might refer to the statutory entity disregard, I think this follows from adopting a co-ownership analysis to the partnership.

### 82.23.3 *SD/SDLT: English partnership*

Stamp duty and SDLT are outside the scope of this book, but an HMRC statement (“**the SD Partnership statement**”)<sup>102</sup> is of wider interest, as it illustrates the nature of a partnership share.

To follow this one needs to have in mind the basic requirements of the relief. I do not consider the (avoidance related) exceptions.

Section 42 FA 1930 provides SD group relief. In outline:

- (1) Stamp duty under Part I of Schedule 13 to the Finance Act 1999 (transfer on sale), shall not be chargeable on an instrument to which this section applies ...
- (2) This section applies to any instrument as respects which it is shown to the satisfaction of the Commissioners that—
  - (a) the effect of the instrument is to convey or transfer a beneficial interest in property from one body corporate (“the transferor”) to another (“the transferee”), and
  - (b) the bodies in question are associated at the time the instrument is executed ...

The key term is associated:

- (2A) For the purposes of this section bodies corporate are associated at a particular time if at that time
  - [a] one is the parent of the other or
  - [b] another body corporate is the parent of each.

Para 1 sch 7 FA 2003 provides SDLT group relief:

---

<sup>102</sup> <https://www.gov.uk/government/publications/group-relief-for-stamp-duty-land-tax-and-stamp-duty-partnerships> (2014).

(1) A transaction is exempt from charge if the vendor and purchaser are companies that at the effective date of the transaction are members of the same group.

(2) For the purposes of group relief--

(a) "company" means a body corporate, and

This is a non-standard definition of company.

(b) companies are members of the same group if one is the 75% subsidiary of the other or both are 75% subsidiaries of a third company.

The SD/SDLT definitions of parent/75% subsidiary are essentially the same:

**SD: s.42(2B) FA 1930**

(2B) For the purposes of this section one body corporate is the parent of another at a particular time if at that time the first body—

(a) is beneficial owner of not less than 75 per cent of the ordinary share capital of the second body;

(b) is beneficially entitled to not less than 75 per cent of any profits available for distribution to equity holders of the second body; and

**SDLT: para 1 sch 7 FA 2003**

(3) For the purposes of group relief a company ("company A") is the 75% subsidiary of another company ("company B") if company B—

(a) is beneficial owner of not less than 75% of the ordinary share capital of company A,

(b) is beneficially entitled to not less than 75% of any profits available for distribution to equity holders of company A, and

(c) would be beneficially entitled to not less than 75 per cent of any assets of the second body available for distribution to its equity holders on a winding-up.<sup>103</sup>

(c) would be beneficially entitled to not less than 75% of any assets of company A available for distribution to its equity holders on a winding-up.<sup>104</sup>

#### 82.23.4 *English partnerships*

The SD partnership statement applies the co-ownership analysis for group relief:

##### **English partnerships**

As English limited and general partnerships do not have legal personalities separate from the persons who are the partners they must be ‘looked through’ when establishing bodies corporate that form a group for Stamp Duty Land Tax and Stamp Duty purposes. As such the

---

103 Section 42 continues with provisions not discussed here:

“(3) The ownership referred to in paragraph (a) of subsection (2B) is ownership either directly or through another body corporate or other bodies corporate, or partly directly and partly through another body corporate or other bodies corporate, and Part I of schedule 4 to the Finance Act 1938 (determination of amount of capital held through other bodies corporate) shall apply for the purposes of that paragraph. (5) Chapter 6 of Part 5 of the Corporation Tax Act 2010 shall apply for the purposes of paragraphs (b) and (c) of subsection (2B) as it applies for the purposes of section 151(4)(a) and (b) of that Act; but this is subject to subsection (6). (6) In determining for the purposes of this section whether a body corporate is the parent of the transferor, sections 171(1)(b) and (3), 173, 174 and 176 to 178 of the Corporation Tax Act 2010 shall not apply for the purposes of paragraph (b) or (c) of subsection (2B).”

104 Para 1 continues with provisions not discussed here:

(4) The ownership referred to in sub-paragraph (3)(a) is ownership either directly or through another company or companies.

For the purposes of that provision the amount of ordinary share capital of company A owned by company B through another company or companies shall be determined in accordance with sections 1155 to 1157 of the Corporation Tax Act 2010....

(6) Chapter 6 of Part 5 of the Corporation Tax Act 2010 (group relief: equity holders and profits or assets available for distribution) applies for the purposes of sub-paragraphs (3)(b) and (c) above as it applies for the purposes of section 151(4)(a) and (b) of that Act.

6A In that Chapter as it applies for the purposes of subparagraphs (3)(b) and (c) above, sections 171(1)(b) and (3), 173, 174 and 176 to 178 of that Act are to be treated as omitted.

companies that are the partners of an English general or limited partnership can, depending upon the facts, be grouped with those companies that are below the partnership in the group structure.

Again, in case 1, A and B do form a group for SD/SDLT relief: the intermediate partnership does not block the group.

This is so even though there are no statutory deeming provisions such as might be said to support the conclusion for CG and CT group reliefs.

### 82.23.5 *SD/SDLT: Scots partnership*

According to HMRC, the position is different in Scotland:

#### **Scottish partnerships**

Both Scottish limited and general partnerships have legal personalities separate from the persons who are the partners. They cannot therefore be ‘looked through’ when establishing bodies corporate that form a group. But they are not bodies corporate and so cannot be the parent of a group of companies.

On the HMRC view, in case 1, if the intermediate partnership is a *Scots* partnership, A and B do not form a group for SD/SDLT relief: the partnership in the middle of the structure does block the group.

But the legal personality of a Scots partnership does not carry that implication;<sup>105</sup> and it is considered that the position for a Scots partnership is the same as an English one.

### 82.23.6 *SD/SDLT group relief: LLPs*

The SD Partnership statement provides:

#### **Group relief for SDLT and Stamp Duty: partnerships Stamp Duty Land Tax - a change in HMRC’s view of the law**

[The statement summarises the group relief and continues]:

A ‘company’ for group relief purposes is defined in Schedule 7 FA 2003 as a ‘body corporate’. HMRC did not consider that a ‘body corporate’ for the purposes of Part 1 Schedule 7 FA 2003 included a Limited Liability Partnership incorporated under the Limited Liability Partnerships Act 2000 (LLP), so that LLPs were disregarded (‘looked through’) when considering whether a group relationship existed, the

---

105 See 82.3.3 (English/Scots partnership tax aligned).

members of the LLP being treated as the beneficial owners of the LLP assets.

This view has recently been challenged. Following legal advice, HMRC now accepts that, for the purposes of SDLT group relief, a 'body corporate' does include an LLP. An LLP can therefore be the parent in a group structure.

This has the remarkable result that in my case 2, the effect of the top LLP is that the two companies A & B are grouped for SDLT (and SD) purposes; though that would not be the case for group loss relief or CG group relief. The reader may wonder if that can be right.

However, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of other companies. This also means that any subsidiaries of the LLP cannot be grouped with the companies that are the corporate members of the LLP.

... An LLP cannot claim group relief itself because its chargeable interests in land are treated as held by or on behalf of the individual members (Paragraph 2 Schedule 15 FA 2003), and this position is unchanged. As such, in broad terms, an LLP continues to be disregarded if it is the vendor or purchaser in a transaction. In such a transaction group relief may be, in part at least, available if some or all of its members (which are incorporated companies) are themselves grouped.

It also follows that if an LLP transfers land to a company that it owns, and that is within the LLP headed group, no group relief will be available as the land is deemed to be owned by the members of the LLP, and those members are not within the same group as the company owned by the LLP...

On the HMRC view, in case 1, if the intermediate partnership is a LLP, A and B do not form a group for SD/SDLT relief: the LLP in the middle of the structure does block the group.

The SD/SDLT provisions are essentially the same, so whatever is the analysis for one will govern the other. HMRC's SD analysis is therefore the same as their analysis for SDLT:

### **Stamp Duty**

[The text summarises SD group relief and continues:] In general, HMRC has taken the view that an LLP, as a body corporate, can be the ultimate parent of a group for the purposes of Section 42 FA 1930.

Furthermore, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of another company.

Transfers of stock and marketable securities may be made to the parent LLP from a subsidiary body corporate in the same group and qualify for group relief and vice versa. Group relief cannot be claimed on the transfer of stock and marketable securities from a body corporate parent of an LLP to the LLP or to a body corporate subsidiary of the LLP.

### 82.23.7 *Partnership block in group*

So does an intermediate partnership block a group? In summary, the answers are:

	<b>English P'ship</b>	<b>Scots P'ship</b>	<b>LLP</b>
CG reliefs	No	No	No
Loss reliefs	No	No	No
SDLT/SD	No	No: JK/Yes: HMRC	Yes

## 82.24 **DT relief: Partnership**

### 82.24.1 *Cross references*

For the question whether a partnership can be a treaty-resident for DTA purposes, see 8.22 (Treaty-residence: Partnerships).

See Avery Jones, “Partnerships and Double Taxation Agreement: *Padmore v IRC*” [1987] BTR 88.

OTS make some interesting comments on overlap relief and double taxation<sup>106</sup> which I hope to consider in a future edition.

### 82.24.2 *DT relief before 1987*

In order to understand the law it is helpful to know its history.

A partnership is commonly not a treaty-resident of a foreign state, because it is not liable to tax. However a partnership may be a treaty-resident if:

- (1) The treaty has a non-standard definition of residence; or
- (2) The partnership is foreign-law opaque (a hybrid entity)<sup>107</sup>

---

106 OTS, “Review of partnerships: final report” (2015) para 4.32

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/396668/ots\\_partnerships\\_report\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/396668/ots_partnerships_report_final.pdf)

107 See 87.1 (Hybrid entities: Introduction).

OECD Commentary provides:

6.1 ... Where a partnership is treated as a resident of a Contracting State, the provisions of the Convention that restrict the other Contracting State's right to tax the partnership on its income do not apply to restrict that other State's right to tax the partners who are its own residents on their share of the income of the partnership.

But this does not represent the position, at least in UK law, for in *Padmore v IRC* UK-residents did qualify for treaty relief on partnership income of a partnership which was treaty-resident in Jersey.

### 82.24.3 DT relief: Partnership income

Section 858 ITTOIA disapplies DT relief on partnership income of UK residents. Section 858(1) ITTOIA/s.1266 CTA 2009 provides:

This section applies if—

- (a) a UK resident (“the partner”) is a member of a firm which—
  - (i) resides outside the UK, or
  - (ii) carries on a trade [including business] the control and management of which is outside the UK, and
- (b) by virtue of any arrangements having effect under section 2(1) of TIOPA 2010 (“the arrangements”) any of the income of the firm is relieved from income tax in the UK.

EN ITTOIA explains the need for s.858(1)(a)(ii):

1777. For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed. But it is possible that, under foreign law, a firm may be considered to be resident elsewhere, for example, by reference to where the firm was established. So the section uses both the “control and management” test and the “resides” test.

#### **s. 858(2) ITTOIA**

The partner is liable to income tax on the partner's share of the income of the firm despite the arrangements.

#### **s.1266 CTA 2009**

The partner is liable to corporation tax on the partner's share of the income of the firm despite the arrangements.

This disapplies treaty relief.

EN ITTOIA provides:

1774. This section ensures that a UK resident partner's share of the income of a foreign firm remains liable to UK tax even though the income of the firm as a whole is exempt from UK tax in accordance with a double taxation agreement...

1775. The business profits article of the UK/Jersey double taxation arrangement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352, the Court of Appeal decided that the exemption extended to the share of the profits arising to a UK resident individual. The rules [now in s.858 ITTOIA] were enacted in 1987 to remove the exemption.

1776. Subsection (1) sets out the type of individual and firm with which the section is concerned. It goes on to identify the sort of exemption from tax that was considered in the *Padmore* case. ...

1778. Subsection (2) makes it clear that the section does no more than remove any exemption under a double taxation arrangement. It does not deny other reliefs, such as tax credit relief. See Change 145 in Annex 1.<sup>108</sup>

This provision dates back to 1987. Interestingly, in those days retrospective legislation and breach of treaty obligations were thought to

---

108 Change 145 is as follows:

“This change enacts the Inland Revenue practice of giving a narrow interpretation to the word ‘affect’ in section 112(4) of ICTA.

The business profits article of the UK/Jersey double taxation agreement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352 the Court of Appeal decided that the exemption covered the share of the profits arising to a UK resident partner. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.

It was intended, in the case of income tax, that the 1987 legislation should do no more than remove the exemption claimed in the *Padmore* case. The words used in section 112(4) of ICTA are ‘shall not affect any liability to tax’. On the face of it, these words could deny the partner any relief, including tax credit relief, under a double taxation treaty. Section 858(2) of this Act makes it clear that it is only the partner's chargeability to tax that is preserved, overriding any provision to the contrary in a double taxation treaty. No other effect of the treaty is overridden.

This change is in principle in taxpayers' favour but is expected to have no practical effect as it is in line with current practice.”

require special justification.<sup>109</sup>

The provision survived an attack in *Padmore v IRC (No 2)* [2001] STC 280 and survived an EU-law challenge.<sup>110</sup> The same result would now be achieved under the OECD Savings Clause, if applicable.<sup>111</sup>

#### 82.24.4 “Members of a firm”

Section 858 only applies to a “member of a firm” and assumed that partnership income could only accrue to the members. This gave rise to a simple avoidance scheme under which:

- (1) Two IIP trusts were created.
- (2) The trusts carried on business in partnership.

The trustees were members of the partnership, but partnership income accrued to the life tenants who were not members of the partnership and so outside s.858.<sup>112</sup>

---

109 The former International Tax Handbook para 1660 provided:

“The retrospective nature of the legislation [in 1987] provoked comment in the professional press and in Parliament. The Government, and later the House, were persuaded as to the propriety of this action because the Section does no more than restore the general understanding of the law and retrospection prevents third parties suddenly deriving a substantial windfall benefit for six years. Although the Section protects from retrospection only those taxpayers who gained a Commissioners’ or Court decision before 17 March 1987, similar treatment was allowed to a small number of other taxpayers who were told by the Revenue that their cases would follow the *Padmore* decision.

Criticism was also made because the legislation is intended to override the effect of the Jersey Arrangement and any other treaty which the Courts might have found to have similar effect. This ‘treaty override’ was defended on similar grounds – that it merely puts into effect what was generally understood to be the position. It has not met with any objection from treaty partners.”

110 *Shiner (R, oao) v HMRC* [2011] STC 1878 raising free movement of capital issues.

111 See 104.9.2 (OECD Model Savings Clause).

112 The EN to the draft clause published 12 March 2008 provides a somewhat untechnical explanation:

“8. An avoidance scheme purports to exempt from UK tax income received by UK resident individuals by using certain provisions in the UK’s bilateral Double Taxation Treaties.

9. This scheme involves the establishment of offshore trusts, (of which the UK individuals are both settlors and beneficiaries) and partnerships (of which the foreign trustees of those trusts are partners).

Section 858(4) blocked this by giving a wider definition to “members of a firm”:

For the purposes of this section, the members of a firm include any person entitled to a share of income of the firm.

Section 58(4) FA 2008 provides:

The amendments made by subsections (1) to (3) are treated as always having had effect.

Retrospective legislation without limit of time! The EN to the draft clause provided:

11. The users of the scheme claim that, under the terms of the relevant Double Taxation Treaty, the UK is not entitled to tax the partnership income of the foreign trustees. As that income is precisely the same income as that received by the UK individuals as beneficiaries of the trust, they argue that the UK is not entitled to tax the UK individuals on it.

12. Legislation was introduced in Finance (No 2) Act 1987, which provided that (as had almost universally been assumed to be the case until a High Court decision to the contrary,) a Double Taxation Treaty did not affect UK residents’ liability to UK tax on their share of income or gains from a foreign partnership.

This new avoidance scheme purports to get round that legislation by claiming that the foreign trustees are the partners rather than the UK individuals.

13. The Government believes that a partner for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of the partnership. As such, the UK individuals remain liable to UK tax despite the elaborate, artificial structure designed to exempt them. This clause will put it beyond doubt that the legislation has always had that effect.

As a matter of tax law, was it the case (before the retrospective legislation) that “member of a firm” for the purposes of that legislation has always

---

10. The partnerships acquire the rights to receive the UK individuals’ income but the terms of the trusts are such that, as beneficiaries of the trust, the UK individuals retain beneficial entitlement to the income – with the trustees obliged to remit the income to the UK individuals as it arises.”

included all those persons entitled to a share of income or capital gains of the partnership? The answer is, no.<sup>113</sup>

As a matter of fact, did the Government believe that to be the case? I think it is a safe bet that if HMRC received expert and impartial advice on the point, it would have been hedged with caveats such that the terms of EN para 13 would not represent a fair and accurate summary of the position.<sup>114</sup>

A pressure group lobbied on the issue<sup>115</sup> but that did not produce more than a House of Commons paper on the topic.<sup>116</sup> In the 2013/14 edition of this work, I said:

Even if the campaign is not successful in repealing s.58 FA 2008, it may have the effect of reducing government enthusiasm for future retrospective legislation.<sup>117</sup>

I doubt if this has proved to be the case.

#### 82.24.5 *DT relief: Partnership gains*

Section 59 TCGA sets out the same rules for CGT:

(2) Subsection (3) applies if—

- (a) a person resident in the UK (“the resident partner”) is a member of a partnership which resides outside the UK or which carries on any trade, profession or business the control and management

113 Partner is a term of partnership law, and in the partnership law sense a person who is entitled to income or gains of a partnership is not as such a partner. HMRC would have to argue that “partner” in s.858 was not used in its partnership law sense, which is a difficult line to take (even in these times of purposive interpretation, though in a tax avoidance case nothing is impossible)+. This is confirmed in *Huitson (R, oao) v HMRC* [2010] STC 715 at [71]; the point was not considered by the Court of Appeal.

114 In Parliament the statement was described as “disingenuous”: Public Bill Cttee debate on Finance Bill, 22 May 2008 Hansard col 371. In *Huitson* HMRC wisely claimed legal professional privilege: [2010] STC 715 at [71].

115 <http://notoretrotax.org.uk>

116 House of Commons Library, “Retrospective taxation: section 58 of the FA 2008” SN06361 (2013).

<http://researchbriefings.parliament.uk/ResearchBriefing/Summary/SN06361>

117 See the 12<sup>th</sup> ed. of this work, (2013), Vol. 2 pp. 1728, para 41.9.1 (“Members of a firm”); and see 2.9 (Retrospective tax legislation).

of which is situated outside the UK, and

(b) by virtue of any arrangements that have effect under section 2(1) of TIOPA 2010 (“the arrangements”) any of the capital gains of the partnership are relieved from capital gains tax or corporation tax in the UK.

(3) The arrangements (so far as providing for that relief) do not affect any liability to capital gains tax or corporation tax in respect of the resident partner’s share of any chargeable gains of the partnership.

(4) For the purposes of subsections (2) and (3) the members of a partnership include any person entitled to a share of chargeable gains of the partnership.

## CHAPTER EIGHTY THREE

# PARTNERSHIP INCOME: ATTRIBUTION

83.1

*Cross references*

### 83.1 Partnership income: Computation

#### s.849 ITTOIA

- (1) If—  
(a) a firm carries on a trade<sup>1</sup>, and  
(b) any partner in the firm is chargeable to income tax,

the profits or losses of the trade are calculated on the basis set out in subsection (2) or (3), as the case may require.

#### s.1259 CTA 2009

- (1) This section applies if a firm carries on a trade and any partner in the firm (“the partner”) is a company within the charge to corporation tax.

(2) For any accounting period of the firm, the amount of the profits of the trade (“the amount of the firm's profits”) is taken to be the amount determined, in relation to the partner, in accordance with subsection (3) or (4).

---

1 “Trade” includes business; and Section 851 ITTOIA extends the general rule to non-trading income:

(1) This section applies if—

- (a) sections 849 and 850 apply in relation to the profits or losses of a trade carried on by a firm, and  
(b) the firm has other income or losses.

(2) Those sections also apply as if references to the profits or losses of the trade were references to the other income or losses.

(2) For any period of account in which the partner is a UK resident individual, the profits or losses of the trade are calculated as if the firm were a UK resident individual.

(3) For any period of account in which the partner is non-UK resident, the profits or losses of the trade are calculated as if the firm were a non-UK resident individual...<sup>2</sup>

(3) If the partner is UK resident—  
 (a) determine what would be the amount of the profits of the trade chargeable to corporation tax for that period if a UK resident company carried on the trade, and  
 (b) take that to be the amount of the firm's profits.

(4) If the partner is non-UK resident—  
 (a) determine what would be the amount of the profits of the trade chargeable to corporation tax for that period if a non-UK resident company carried on the trade, and  
 (b) take that to be the amount of the firm's profits.

EN ITTOIA explains:

1714. If some of a firm's partners are resident in the UK and some are not, the profits of the firm's trade must be calculated on different bases. For the resident partners, the calculation includes profits arising outside the UK; for the non-resident partners, the calculation is restricted to profits arising in the UK...

1716. ... It is possible for a partner to be both resident (for one tax year) and non-resident (for another) within a single period of account. In such a case, the firm's profit has to be calculated twice to arrive at the partner's share of the profits.

1717. Subsection (2) sets out the normal basis for calculating the profits, for an individual resident in the UK. The profits are calculated as if the firm were an individual resident in the UK.

1718. Subsection (3) sets out an additional basis for calculating the profits. If the partner (who may be a non-resident company liable to income tax) is not resident in the UK the profits of the firm are calculated as if the firm were an individual not resident in the UK.

The BI Manual provides:

---

<sup>2</sup> s.849(4) which concerns losses, is not considered here.

**BIM72235 computation and assessment: individual, company and non-resident members** [Dec 2013]

... where one or more of the partners is a non-resident individual then the share of profits allocated to any such partner must be computed as if the partnership were a non-UK resident individual. In such case the partnership may need to submit an additional set of computations.

**Example** (Mr Armstrong and Mrs Beeton)

Mr A, a UK resident, and Mrs B, a non-resident, are in partnership. The partnership's world-wide trade profit amount to £10,000 and included in that sum is its UK profit of £7,500. Partnership profits are shared equally. Two tax computations are required on the following lines

*Computation for resident partner*

Step 1	Trade profits		£10,000
Step 2	Allocation	Mr A	£5,000
		Mrs B	£5,000
Step 3	Profit taxable on Mr A		£5,000

*Computation for non-resident partner*

Step 1	Trade profits		£7,500
Step 2	Allocation	Mr A	£3,750
		Mrs B	£3,750
Step 3	Profit taxable on Mrs B		£3,750

The BI Manual provides:

**BIM82015 Separate Business For Tax Purposes** [May 2020]

Where persons join in partnership, the business carried on by the partnership is a separate business and a separate source for Income Tax and Corporation Tax purposes.

The business carried on by a partnership of X & Y is separate from any business carried on separately by either X or Y.

**83.1.1 Split years**

Section 849(3A) ITTOIA provides a split-year relief:

For any tax year that is a split year as respects the partner, this section has effect as if the partner were non-UK resident in the overseas part of the year.

This is the same as the split year relief which applies to trading income; see 20.4.5 (Trading income of split year).

## 83.2 Partnership income: Attribution

The general rule is that the partners may share income as they wish, and the tax follows accordingly. Section 850 ITTOIA/s.1262 CTA 2009 provide:

### s. 850 ITTOIA

(1) For any period of account a partner's share of a profit or loss of a trade carried on by a firm is determined for income tax purposes in accordance with the firm's profit-sharing arrangements during that period.

This is subject to sections 850A to 850D [Allocation of losses; mixed partnership code].

(2) In this section and sections 850A and 850B

“profit-sharing arrangements” means the rights of the partners to share in the profits of the trade and the liabilities of the partners to share in the losses of the trade.

### s.1262 CTA 2009

(1) For any accounting period of a firm a partner's share of a profit or loss of a trade carried on by the firm is determined for corporation tax purposes in accordance with the firm's profit-sharing arrangements during that period.

This is subject to sections 1263 to 1264A [allocation of losses; mixed partnership code adjustment for CT]<sup>3</sup> and section 12ABZB of TMA 1970 (partnership return is conclusive).

(4) In this section and sections 1263 and 1264

[identical]

The BI Manual provides:

### **BIM82055 Sharing Profits/Losses** [May 2020]

Profits, losses or other income may be shared as the partners may mutually agree from time to time. The sharing ratio need not be in proportion to contributions of effort or capital. It is not necessary for the partners to share profits and losses in the same proportions, nor income from other sources in the same proportions as trading or professional income. A partner's share of the income on which they are chargeable

---

<sup>3</sup> See 83.15.3 (Adjustment for corporation tax).

to tax is computed according to their entitlement in the partnership's period of account.

The allocation of profits or losses for a period of account cannot be varied retrospectively after the end of that accounting period - see *Bucks v Bowers* [1969] 46 TC 267...

This work does not discuss:

Topic	ITTOIA	CTA 2009
Computation of losses		
Attribution of losses	s.850A, 850B	s.1263, 1264
Disguised employment	s.863A-863L	

These topics would require chapters to themselves.

### 83.2.1 *Guaranteed profit share*

The CT Manual provides:

#### **CTM36560 investment partnerships** [May 2020]

...The business of these partnerships is the making and managing of investments. Although they are partnerships and the taxation rules apply on that basis, the limited partners probably regard the scheme as a form of unit trust or other investment fund. They put up capital for investment in a number of unquoted companies on their behalf. They expect to pay to have the fund managed, so they let the general partner take a share of the income and gains in excess of their or its contribution of capital.

If this were an ordinary investment fund, and not a partnership, the general partner would be the fund manager and its share of the partnership profits would be the annual percentage management fee. A feature of these partnerships is that in years when the profits are too low to meet the general partner's guaranteed profit share, the general partner will probably take an interest free loan from the capital accounts of the other partners. Such a loan is not regarded as taxable income in the hands of the general partner. The loan will be repaid out of its share of future partnership profits and the general partner will be taxed on it at that stage.

For fund managers, this is now caught by the disguised investment management fee code;<sup>4</sup> but the point would still apply to other

---

<sup>4</sup> See 69.3 ("Disguised fee").

partnerships.

### 83.3 Mixed partnership code

Sections 850C-E ITTOIA and s.1264A CTA 2009 provide a set of rules which I call “**the mixed partnership code**”. The PM uses the term “mixed membership partnerships”.

In general:

- (1) The use of a UK company to save the difference between IT and CT rates is not regarded as objectionable, even if that involves providing services to the company at an undervalue.<sup>5</sup>
- (2) Partners may attribute partnership income between the partners as they wish.<sup>6</sup>

The mixed partnership code provides limited exceptions to these general rules.

The background can be found in consultation and response papers:<sup>7</sup>

- Partnerships: A review of two aspects of the tax rules (May 2013)
- Partnerships: A review of two aspects of the tax rules: Summary of Responses (Dec 2013)

These are now of historical interest only.

### 83.4 s.850C application conditions

Section 850C(1) ITTOIA provides:

Subsections (4) and (5) apply if—

- (a) for a period of account (“the relevant period of account”)—
  - (i) the calculation under section 849<sup>8</sup> in relation to an individual partner (“A”) (see subsection (6)) produces a profit for the firm, and
  - (ii) A’s share of that profit determined under section 850<sup>9</sup> or 850A (“A’s profit share”) is a profit or is neither a profit nor a loss,

---

5 See 44.3.2 (Underlying company income).

6 See 83.2 (Partnership income: Attribution).

7 <https://www.gov.uk/government/consultations/a-review-of-two-aspects-of-the-tax-rules-on-partnerships>

8 See 83.1 (Partnership income: Computation).

9 See 83.2 (Partnership income: Attribution).

- (b) a non-individual partner (“B”) (see subsection (6)) has a share of the profit for the firm mentioned in paragraph (a)(i) (“B’s profit share”) which is a profit (see subsection (7)), and
- (c) condition X or Y is met.

I refer to these conditions as “**s.850C application conditions**”.

In *Walewski v HMRC*.<sup>10</sup>

Section 850C applies “for a period of account” (see subsection (1)(a)). Absent any words of limitation, it applies if the various conditions are met at any point in the period of account. As a matter of construction, there is no requirement that A be a partner for more than a moment of time within the relevant period of account for the purposes of section 850C, so long as A receives a share of some profit (see subsection (1)(a)(ii)).

Our dramatis personae are A and B.<sup>11</sup> One might refer to them as

A: transferor/individual member

B: transferee/corporate member

(using the terms transferor/transferee loosely but not inappropriately).

#### 83.4.1 *Individual/non individual*

Under s.850C application conditions (a) and (b):

- (1) A (the transferor) must be an individual partner
- (2) B (the transferee) must be a non-individual partner

Section 850C(6) ITTOIA provides:

- [a] A partner in a firm is an “individual partner” if the partner is an individual and “non-individual partner” is to be read accordingly;
- [b] but “non-individual partner” does not include the firm itself where it is treated as a partner under section 863I (allocation of profit to AIFM firm).

This definition only applies for s.850C, so it has to be incorporated by reference into s.850D.<sup>12</sup>

---

10 [2021] UKUT 133 (TCC) at [32].

11 The drafter may have in mind the characters A and B in *Mikado* Act 2 (“See how the Fates their gifts allot”).

12 See s.850D(6) ITTOIA.

## 83.5 Condition X: Deferred profit rule

Section 850C(2) ITTOIA provides:

Condition X is that it is reasonable to suppose<sup>13</sup> that—

- (a) amounts representing A’s deferred profit (see subsection (8)) are included in B’s profit share, and
- (b) in consequence, both
  - [i] A’s profit share and
  - [ii] the relevant tax amount (see subsection (9)) are lower than they would otherwise have been.

Condition X is a set of three conditions, which I call Condition X(a) and X(b)[i][ii].

If condition X(a) is met, conditions X(b)[i] is bound to be satisfied, and condition X(b)[ii] is highly likely to be satisfied.

HMRC refer to condition X cases as “deferred profit arrangements”.

### 83.5.1 *Deferred profit*

This is the key term for condition X. Section 850C(8) ITTOIA provides a wide definition:

“A’s deferred profit”—

- (a) is any remuneration or other benefits or returns the provision of which to A has been deferred (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise), and
- (b) includes A’s share (as determined on a just and reasonable basis) of any remuneration or other benefits or returns the provision of which to A and one or more other persons, taken together, has been deferred (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise).

This only applies for s.850C, so it has to be incorporated by reference into s.850D.<sup>14</sup>

The Partnerships consultation paper provides:

---

<sup>13</sup> See App.2.21 (Reasonable-to-assume).

<sup>14</sup> See s.850D(11) ITTOIA.

3.17 Such provisions are most commonly seen in employment contracts where a company wishes to incentivise long term performance of its employees. However, the same effects can be produced by partnership agreements. For example, a partnership that manages investments will make profits through fees paid to it by the funds. The partnership remuneration agreement may allot those profits to particular members but, in order to incentivise long-term performance, may require a proportion of those profits to be retained within the partnership until a deferral period expires. To reduce the upfront tax charge, such “retained” profits can, instead, be initially allocated to a company member in which the members of the partnership hold an equity stake. When the profits finally vest with the member, the company is dissolved and the proceeds are distributed to the member.

..

3.19 In working capital arrangements, the partnership business model envisages that profits will be retained in the business, to be used as additional "working capital" to finance the growth of the business. The post-tax working capital can be maximised by allocating profits to a company member that pays tax at a rate lower than that of the individual members.

PM provides 2 straightforward examples:

**PM218000 — Condition X [July 2019]**

...

*Example 1 (Kate)*

This example looks at a deferred remuneration scheme, where a bonus is initially allocated to a corporate member.

K is a member of XYZ LLP. She is awarded a bonus that is conditional upon the successful outcome of a project she has been involved in. The bonus is initially allocated to XYZ Corporate Member Ltd.

This is a deferred profit arrangement; the fact that it is conditional upon a future event does not alter this.

The profit deferral arrangements may operate in relation to a class of members rather than a particular individual, as set out in the example below:

*Example 2*

Y LLP has 50 individual members and a corporate member N Ltd. The 50 individual members are the shareholders in N Ltd. Profits allocated to N Ltd are injected as capital contribution into Y LLP; they are not paid out, by dividend or otherwise to the shareholders. However Y LLP

keeps a memorandum note which tracks the longer-term entitlement of each of the individual members to a respective portion of each year's N Ltd profit allocation based on the partnership's profit sharing arrangements in that year. When an individual member retires from the LLP, he is paid out that cumulative entitlement and he ceases to participate as a shareholder in N Ltd.

The profit share of N Ltd is attributable to each of the individual members in proportion to the entitlements tracked within the memorandum note and which will be paid out to them on retirement. The amounts represent the deferred profits of each individual which will be reallocated under the excess profits allocation rules.

If there were no separate memorandum, but the ultimate entitlement in relation to the profits allocated to N Ltd were to depend upon discussion at the time of the individual member's retirement, then each year's reallocation would be based on an assessment of how much of the total deferred profit allocated to N Ltd in that year is, on a just and reasonable basis, properly attributable to the individual. This would in practice mean that the total of N Ltd's profit for each year would have to be re-allocated amongst the individuals to whom the deferred profit arrangements were relevant. No profit would remain chargeable to corporation tax on N Ltd.

### 83.5.2 "The relevant tax amount"

This term matters for conditions X(b)[ii] and Y: the relevant tax amount must be lower than it would otherwise have been. Section 850C(9) ITTOIA provides the definition:

"The relevant tax amount" is the total amount of tax which, apart from this section, would be chargeable in respect of A and B's income as partners in the firm.

## 83.6 Condition Y: Excess profit allocation rule

Section 850C(3) ITTOIA provides:

Condition Y is that—

- (a) B's profit share exceeds the appropriate notional profit (see subsections (10) to (17)),
- (b) A has the power to enjoy B's profit share ("A's power to enjoy") (see subsections (18) to (21)), and
- (c) it is reasonable to suppose that—
  - (i) the whole or any part of B's profit share is attributable to

- A's power to enjoy, and
- (ii) both A's profit share and the relevant tax amount (see subsection (9)) are lower than they would have been in the absence of A's power to enjoy.

Condition Y contains a set of 3 conditions, which I call Conditions Y(a), Y(b) and Y(c).

The PM refers to condition Y as "excess profit allocation rules".

### 83.7 Condition Y(a): Profit share excessive

Section 850C(3) ITTOIA provides:

Condition Y is that—

- (a) B's profit share exceeds the appropriate notional profit

Under condition Y(a) we need to ascertain:

- (1) The profit share of B (transferee) and
- (2) B's appropriate notional profit

PM provides:

**PM219000 - Condition Y** [July 2019]

... The fact that the Condition was not met in a particular period does not mean that it will not be met later even if the members of the partnership and ownership of the non-individual member remain the same.

It is therefore important to check every period.

#### 83.7.1 B's profit share

This term is defined twice in the excess profits code, but in effectively the same terms. It is convenient to set the definitions side by side:

**Section 850C(7) ITTOIA**

**Section 850D(7) ITTOIA**

B's profit share is to be determined by applying section 850 and, if relevant, section 850A in relation to B for the relevant period of account (whether or not B is chargeable to income tax) on the assumption that the calculation under section 849 in relation to B produces the profit for the firm mentioned in subsection (1)(a)(i).

B's profit share is to be determined by applying section 850 and, if relevant, section 850A in relation to B for the relevant period of account (whether or not B is chargeable to income tax) on the assumption that the calculation under section 849 in relation to B produces the profit for the firm mentioned in subsection (1)(b).

This only applies for s.850C/D, so it has to be incorporated by reference into s.850E.<sup>15</sup>

### 83.8 Appropriate notional profit

This is a key term for condition Y(a): B's profit share must exceed the appropriate notional profit. Section 850C(10) ITTOIA provides the definition:

- “The appropriate notional profit” is the sum of
- [a] the appropriate notional return on capital and
  - [b] the appropriate notional consideration for services.

#### 83.8.1 *Notional return on capital*

This is the first element of appropriate notional profit. Section 850C(11) ITTOIA provides:

- “The appropriate notional return on capital” is—
- (a) the return which B would receive for the relevant period of account in respect of B's contribution to the firm were the return to be calculated on the basis mentioned in subsection (12), less
  - (b) any return actually received for the relevant period of account in respect of B's contribution to the firm which is not included in B's profit share.

#### 83.8.2 *B's contribution to firm*

Section 850C ITTOIA provides:

---

<sup>15</sup> See s.850E(3) ITTOIA.

(13) For the purposes of subsections (11) and (12) B's contribution to the firm is amount A determined under section 108 of ITA 2007 (meaning of "contribution to the LLP").

(14) That section is to be applied—

- (a) reading references to the individual as references to B and references to the LLP as references to the firm, and
- (b) with the omission of—
  - (i) subsections (5)(b) and (9), and
  - (ii) in subsection (6) the words from "but" to the end.

Amended as s.850C(14) directs, s.108 ITA provides:

(2) Amount A is the amount which ~~the individual B~~ has contributed to the ~~LLP firm~~ as capital less so much of that amount (if any) as is within subsection (5).

(3) In particular, ~~the individual B's~~ share of any profits of the ~~LLP firm~~ is to be included in the amount which ~~the individual B~~ has contributed to the ~~LLP firm~~ as capital so far as that share has been added to the ~~LLP firm's~~ capital.

(4) In subsection (3) the reference to profits is to profits calculated in accordance with generally accepted accounting practice (before any adjustment required or authorised by law in calculating profits for income tax purposes).

(5) An amount of capital is within this subsection if it is an amount which—

- (a) ~~the individual B~~ has previously drawn out or received back,
- (b) ~~the individual draws out or receives back during the period of 5 years beginning with the relevant time;~~
- (c) ~~the individual B~~ is or may be entitled to draw out or receive back at any time when ~~the individual B~~ is a member of the ~~LLP firm~~, or
- (d) ~~the individual B~~ is or may be entitled to require another person to reimburse to ~~the individual B~~.

(6) In subsection (5) any reference to drawing out or receiving back an amount is to doing so directly or indirectly but does not include drawing out or receiving back an amount which, because of its being drawn out or received back, is chargeable to income tax as profits of a trade.

(7) Amount B is the amount of ~~the individual B's~~ liability on a winding up of the ~~LLP firm~~ so far as that amount is not included in amount A.

(8) For the purposes of subsection (7) the amount of ~~the individual B's~~ liability on a winding up of the ~~LLP firm~~ is the amount which—

- (a) ~~the individual B~~ is liable to contribute to the assets of the ~~LLP firm~~ in the event of its being wound up, and
- (b) ~~the individual B~~ remains liable to contribute for the period of at least 5 years beginning with the relevant time (or until the ~~LLP firm~~ is wound up, if that happens before the end of that period).

~~(9) This section needs to be read with [section 113A and any regulations made under section 114 (exclusion of amounts)]<sup>1</sup> in calculating the individual's contribution to the LLP for the purposes of section 107).~~

PM provides:

**PM221000 - The appropriate notional return on capital** [July 2019]

... The capital is the amount of money or other property that all the members have contributed, to the permanent endowment of the firm. If the member has contributed an asset, rather than money, then the capital contribution is the market value at the time of transfer.

*Example 1*

C Ltd transferred a property to the LLP. It had originally cost £100,000, but the market value at the time of transfer was £250,000. The capital account of C Ltd was credited with £100,000, the historic cost rather than the market value. The property is currently worth £500,000. The capital contributed was the market value at the date that it was contributed, £250,000.

**Capital is at risk**

The capital contributed does not include sums that the member is entitled to withdraw, or sums that they do not really have at risk, because there are arrangements under which they will be reimbursed.

**Current Account is not capital**

In addition to their capital, a member is likely to have what is sometimes called a current account. This account reflects the member's day-to-day balance with the firm reflecting things such as their entitlement to a profit share, tax account and drawings. The current account balance is not capital contributed.

**Undrawn Profits are not capital**

An undrawn profit share is not capital, but the members can agree to convert it into capital just as they can agree to pay a further sum in as capital.

In *Walewski v HMRC*:<sup>16</sup>

177. the £10 million of unallocated, undrawn capital retained in AAM ... cannot be treated as “capital” for these purposes.

178. We say this for three reasons:

(1) In order to constitute a “contribution” of capital, it must first belong to the entity (W Ltd) which is making the contribution. ... this £10 million had not been allocated to W Ltd and therefore did not belong to W Ltd. In accordance with AAM partnership agreement, profits had

---

16 [2020] UKFTT 58 (TC).

to be allocated by the management committee and unallocated profits were held in a retention account for the benefit of AAM. We do not see how the fact that W Ltd had paid tax on this amount under the specific tax code applying to LLPs alters this conclusion.

(2) Even if we are wrong on this, we did not see any evidence that this £10 million had been properly characterised as “capital” by AAM, certainly not in the technical sense required by s 850C(3) and not in any other meaningful sense, such as in accordance with the relevant SORP.

(3) Finally, Mr Walewski’s interpretation, that the provision of any “capital like” funds which generated value for AAM should be taken account of as part of the notional consideration provided by W Ltd, however defined, is not tenable in the context of this legislation which has a specific provision dealing with returns on capital as defined.

### 83.8.3 Rate of interest

Section 850C(12) ITTOIA explains basis of the notional profit computation:

The return mentioned in subsection (11)(a) is to be calculated on the basis that it is a return which is—

- (a) by reference to the time value of an amount of money equal to B’s contribution to the firm, and
- (b) at a rate which (in all the circumstances) is a commercial rate of interest.

PM provides:

#### **PM221000 - The appropriate notional return on capital** [July 2019] *Rate of Interest*

The legislation does not set a specific rate. The rate will vary as the appropriate commercial rate will vary from case to case and from time to time:

- The commercial rate will reflect the level of risk involved.
- Where the level of capital varies during the relevant period of account, the notional return must be calculated on these varying amounts.

The rate however must be limited to a reasonable rate of interest. It is not relevant that an equity return on the same investment might have been much greater.

The rates charged by so-called “payday” lenders or on credit card debts are not appropriate commercial comparators.

If the member receives some other form of return on capital, other than a share of the profit (for example, a fee), then this is deducted in arriving at the limit on the notional return.

*Example 2*

This example shows that the notional return is based upon a commercial rate of interest.

B Ltd has invested £10,000 in ABC LLP. It receives no return on this other than its profit share.

ABC LLP is paying 2% on loans on the commercial market, reflecting its good credit rating. This represents a commercial rate, so B Ltd has an appropriate notional return on capital of £200.

#### 83.8.4 *Notional consideration for services*

This is the second element of appropriate notional profit. Section 850C ITTOIA provides:

- (15) “The appropriate notional consideration for services” is—
- (a) the amount which B would receive in consideration for any services provided to the firm by B during the relevant period of account were the consideration to be calculated on the basis mentioned in subsection (16), less
  - (b) any amount actually received in consideration for any such services which is not included in B’s profit share.
- (16) The consideration mentioned in subsection (15)(a) is to be calculated on the basis that B is not a partner in the firm and is acting at arm’s length from the firm.

PM provides:

**PM222000 - The appropriate notional consideration for services**  
[July 2019]

The appropriate notional consideration for services is the arm’s length value of any services provided by that member for the period, less any other amount received for those services (for example, a service fee) that is not part of the profit share.

In most cases, this notional consideration should be no more than the cost to the company in providing the services plus a modest mark-up. If any services provided involve other members of the partnership (including in particular all the individual members), then the value of these services is not included in arriving at the notional return, for further guidance on this see PM223000.

*Example 1*

This example shows that it is important to look at what service is actually being provided.

The members of Farm LLP are two individuals, A and B, and their company C Ltd. In addition to being a member of Farm LLP, C Ltd provides contractor services to farms in the area. C Ltd also leases equipment to farms, including Farm LLP.

Farm LLP is a mixed membership partnership. C Ltd is providing services to Farm LLP, so the question is what is the appropriate notional consideration for services?

C Ltd is being paid for contractor services on an arm's length basis directly by its customers. This is separate from any services that C Ltd provides to Farm LLP so is not taken into account under the mixed membership rules.

In addition, C Ltd is providing the use of its equipment to Farm LLP. The arm's length value of this, using the amounts it charges to other farms as a comparable, is £10,000.

C Ltd has an appropriate notional consideration for those services of £10,000. This is because it is providing equipment to Farm LLP.

*Example 2*

This example looks at where a corporate member provides the partnership with the use of an asset, such as land.

The members of Agri LLP are two individuals, H and J, and their company HJ Ltd. HJ Ltd owns some of the land farmed by Agri LLP, no rent is being charged by HJ Ltd.

Agri LLP is a mixed membership partnership. HJ Ltd is providing services to Agri LLP, so the question is what is the appropriate notional consideration for services?

The appropriate notional consideration for services is the arm's length rent for the land.

*Example 3*

This example looks at where the partnership is paying rent but the terms have not been reviewed.

The facts are the same as in example 6, except that a rent is being paid. This was set a number of years ago, and has not been reviewed.

The appropriate notional consideration for services is the arm's length rent for the land less the rent paid.

*83.8.5 Disregard of partner services*

Section 850C(17) ITTOA provides:

Any services, the provision of which involves any partner in the firm in addition to B, are to be ignored for the purposes of subsection (15).

PM provides:

**PM223000 - The appropriate notional consideration for services: restriction** [July 2019]

... A purpose of the excess profit allocation rules is to ensure that the profits generated by an individual's work for the partnership are taxed on that individual rather than on a corporate partner at CT rates.

- This includes where the individual carries out work for the partnership either as an employee or contractor to the corporate member.
- It applies where there is a chain of intermediaries between the partnership and the individual, no matter how long the chain, nor how complex.

This prevents arguments about whether the individual carries out some services as a partner other as employee of the corporate member. The legislation operates on the premise that the company is not to be entitled to any profit share for these services and as if any profit actually allocated to the company were treated for tax as reallocated to the individual member.

PM provides three straightforward examples:

*Example 1*

This example shows how there is no notional consideration for services when the services involve other partners.

Continuing with example 3 at PM222000, B Ltd is a member of ABC LLP and provides advertising services for ABC LLP. The work is carried out for B Ltd by A, who is also a member of ABC LLP. B Ltd provides no other services to ABC LLP.

B Ltd is treated as providing no services as the only service provided involves another member of the LLP. Therefore, the appropriate notional consideration for services is nil.

As such, B Ltd has an appropriate notional profit of £200, consisting purely of its notional return on capital.

*Example 2*

This example looks at where the partners themselves are also working for the corporate member.

HED LLP has as members D, E, F, G and H together with a corporate member, HED Ltd. HED Ltd provides management services to the LLP which is carried out by H, E and D as directors of HED Ltd.

Whilst the work was carried out by the directors of the company, these directors are also members in their own right. As the work was done by members the appropriate notional consideration for services is NIL. That the work was done in their capacity as directors of the corporate member makes no difference.

Sometimes work may be done partly by other members and partly by non-members.

*Example 3*

This example looks at where people other than the partners themselves are working for the corporate member.

DHE LLP has as members D, E, F, and H together with a corporate member, DE Ltd. DE Ltd provides management services to the LLP which is carried out by three unconnected individuals and D and E as directors of DE Ltd.

The appropriate notional consideration for the work done by D and E, who are members of DHE LLP, services is NIL. That the work was done in their capacity as directors of the corporate member makes no difference.

If the work done by the three non-members can be distinguished from the work done by the members then the appropriate notional consideration for services is arm's length value of these services. If the work cannot be distinguished then the appropriate notional consideration is NIL.

*Example 4*

This example looks at where the services are provided by members via a chain of intermediaries.

The members of FM LLP are the individuals M, N & O and a corporate member X Ltd.

M, N and O are also employees of Y Ltd an offshore employer.

Y Ltd contracts with X Ltd to supply it with the services of M, N and O.

X Ltd is the managing member of FM LLP, with the work being done by M, N and O on secondment to X Ltd. X Ltd receives a profit share for acting as managing member.

The question is what is the appropriate notional consideration for services?

The legislation looks at whether the work involves any member other than that corporate member. It does not look at the link between that member and the corporate member.

In this case, the work is actually done by individuals who are members of FM LLP. As a result the appropriate notional consideration for services is NIL.

*Example 5*

This example looks at how the test is whether the individual provides the services, not the nature of the services.

EHD LLP has as members D, E, F, G and H together with a corporate member EHD Ltd. Under the LLP agreement the management of the LLP is delegated to EHD Ltd, the individual members are specifically excluded from taking part. As members, the individuals D, E and H manage portfolios of investments. As directors of EHD Ltd, they manage the LLP.

The LLP is managed by the directors of the company, these directors are also members in their own right. As the work was done by members the appropriate notional consideration for services is NIL.

The fact that under the LLP agreement the individuals are not allowed to take part in the management of the LLP does not affect the position under the excess profits allocation rules. The services provided by the corporate member involved individual members, so no credit is given for the services provided.

### **83.9 Condition Y(b): Power to enjoy**

Section 850C(3) ITTOIA provides:

Condition Y is that ...

- (b) A has the power to enjoy B's profit share ("A's power to enjoy")...

Section 850C(18) ITTOIA provides:

A has the power to enjoy B's profit share if—

There follow 3 sets of conditions, which I call "**PtoE conditions (a)(b)(c)**".

I write Power to Enjoy with initial capitals, to indicate the technical nature of the term, but it is so wide as to justify using scare quotation marks.

The definition only applies for s.850C, so it has to be incorporated by

reference into s.850D.<sup>17</sup>

### 83.9.1 PtoE condition (c): Enjoyment conditions

It is convenient first to consider PtoE condition (c).

Section 850C(18) ITTOIA provides:

A has the power to enjoy B's profit share if ...

- (c) any of the enjoyment conditions (see subsection (20)) is met in relation to B's profit share or any part of B's profit share.

Section 850C(20) ITTOIA provides:

The enjoyment conditions are—

- (a) B's profit share, or the part, is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of A, whether in the form of income or not;
- (b) the receipt or accrual of B's profit share, or the part, by or to B operates to increase the value to A of any assets held by, or for the benefit of, A;
- (c) A receives or is entitled to receive at any time any benefit provided or to be provided (directly or indirectly) out of B's profit share or the part;
- (d) A may become entitled to the beneficial enjoyment of B's profit share, or the part, if one or more powers are exercised or successively exercised by any person;
- (e) A is able in any manner to control (directly or indirectly) the application of B's profit share or the part.

This part of the definition of Power to Enjoy is based on power to enjoy in s.731.<sup>18</sup> But the scope is greatly increased by s.850C(21) ITTOIA:

In subsection (20) references to A include any person connected with A apart from B.

PM provides:

#### **PM227000 Enjoyment Conditions** [July 2019]

... *Example 1*

This is an example of a farming partnership where the landlord is represented by a corporate member.

---

17 See s.850D(13) ITTOIA.

18 See 46.11 ("Power to enjoy").

A farm in Scotland is run as a partnership between the tenant farmer and a limited company owned by the landlord, who is not connected to the tenant.

This is a mixed membership partnership, but none of the enjoyment conditions are met.

The tenant farmer has no connection with the corporate member other than that they are partners in running the farm. The excess profit allocation rules do not apply.

The excess profit allocation rules are about the “power to enjoy”. The fact that the individual is not currently withdrawing any form of value from the non-individual does not alter the position.

### Example 2

This example looks at where the enjoyment conditions are met but the profits are not currently being paid out.

A and his personal company A Ltd are both members of MBX LLP. Profits that can be withdrawn are allocated to A. The profits that A does not need to withdraw, for example as the LLP needs the money to finance expansion, are allocated to his personal company. In practice, A does not withdraw any money from A Ltd.

The excess profit allocation rules apply.

The key is that A Ltd is only getting the profit share because of A’s power to enjoy and the relevant tax amount is lower as a result of the arrangements. That A chooses not to extract the profits allocated to A Ltd at that time does not alter the fact that he has the power to enjoy them.

It is also possible that Condition X (deferred profit arrangements) applies to this arrangement, see PM218000.<sup>19</sup>

19 See 83.5 (Condition X: Deferred profit rule).

### 83.9.2 Condition (a): A connected with B

Section 850C(18) ITTOIA provides:

A has the power to enjoy B’s profit share if—

- (a) A is connected with B by virtue of a provision of section 993 of ITA 2007 (meaning of “connected” persons) other than subsection (4) of that section ...

This applies where A is connected with B but for this purpose the connection of being a partner (s.993(4)) does not count.<sup>20</sup> That rule is needed because otherwise A is always connected with B.

By contrast, in applying the connected person test for condition (c) (enjoyment conditions) A’s partners (other than B) and their relatives do count as connected persons.

### 83.9.3 PtoE condition (b): CT arrangements

Section 850C(18) ITTOIA provides:

A has the power to enjoy B’s profit share if ...

- (b) A is a party to arrangements<sup>21</sup> the main purpose, or one of the main purposes, of which is to secure that an amount included in B’s profit share—
  - (i) is charged to corporation tax rather than income tax, or
  - (ii) is otherwise subject to the provisions of the Corporation Tax Acts rather than the provisions of the Income Tax Acts...

PM provides:

**PM226000 - Arrangements to secure corporation tax rather than income tax treatment** [July 2019]

[PM summarises s.850C(18)(b) and continues:] This may, for example, be the case because the corporate member is able to obtain relief under Corporation Tax rules for amounts that would not be deductible under Income Tax provisions.

This rule applies even if there is no economic connection between the

---

20 See 99.18 (Connected: Partners).

21 Section 850C(19) provides the standard (unnecessary) IT definition of “arrangements”; see App.2.2.3 (Definitions of “arrangement”).

individual and the corporate member.

The legislation applies both where the intention is to ensure that the sum is taxed at Corporation Tax rates, rather than Income Tax rates, and also where the aim is to access a relief that is only available for corporation tax payers.

### 83.10 PtoE condition Y(c): PtoE is cause

Section 850C(3) ITTOIA provides:

Condition Y is that ...

- (c) it is reasonable to suppose<sup>22</sup> that—
  - (i) the whole or any part of B's profit share is attributable to A's power to enjoy, and
  - (ii) both
    - [A] A's profit share and
    - [B] the relevant tax amount (see subsection (9))
 are lower than they would have been in the absence of A's power to enjoy.

Condition Y(c) is itself a set of 2 conditions, which I call Y(c)(i) and Y(c)(ii), and Y(c)(ii) can itself be regarded as two conditions [A] and [B].

In short, the Power to Enjoy must be the driver of the arrangement.

HMRC guidance paraphrases the test in the following ways:

- *Influence*: Is the profit share influenced by the power to enjoy?
- *But-for test*: would B (the corporate member) not have received this profit but for A's power to enjoy? Would A allow profits to be allocated to B Ltd if A did not have the power to enjoy those profits?
- *Economic connection*: does the economic connection between A and B result in profit being shifted from A to B, the non-individual

These may be helpful paraphrases, though one must finally return to the words of the statute. The first two of these paraphrases are in this PM passage:<sup>23</sup>

**PM228000 Is The Profit Share Influenced By The Power To Enjoy?**  
[July 2019]

...If one or more individual members own the corporate member, and the

---

22 See App.2.21 (Reasonable-to-assume).

23 For the economic consequences, see 83.17 (Business transferred to partnership).

corporate member is allocated any residual profit, after the individuals have been allocated a share, then it is reasonable to suppose that the corporate member would not have received this profit but for the power to enjoy.

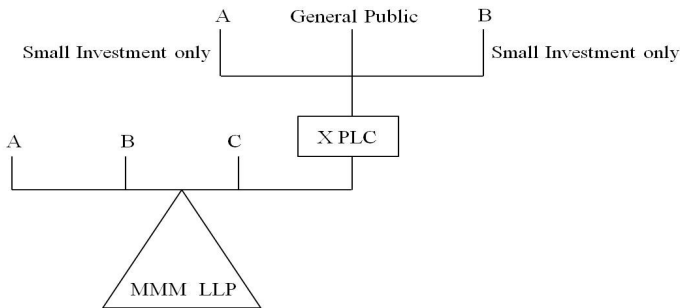

The individual may have an interest in the non-individual partner but this may be so small that it is clear that on a realistic view of the facts the profit share has not been affected.

*Example 1*

This example looks at where an individual member has a small investment in a corporate member such as a quoted company.

MMM LLP has members, A, B and C, together with X Plc, which is a listed on a major exchange.

A has a small investment in X Plc as part of a share portfolio. B has a small investment as she used to work for X Plc and received the shares under an incentive scheme. There are no other arrangements by which they can benefit from the profit share of X Plc

The HMRC analysis is as follows:

It would not be reasonable to suppose that the profit share of X Plc has been increased because A and B have shares. Their holdings are such that they could not have influenced the allocation of profits to X Plc. The crucial factor for the mixed membership partnership legislation to apply is that there has been a diversion of profits from an individual to a non-individual member. Profits of a non-individual member can only be reallocated to an individual member to the extent that it is reasonable to suppose that those profits are attributable to the individual member’s power to enjoy them. This is to be determined on a just and reasonable basis.

*Example 2*

This example looks at where an individual assigns part of their interest in the LLP to their company.

O is a member of ON LLP. He sells part of his interest in the LLP to his company ONO Ltd, which becomes a member of ON LLP.

Following the sale, O's share of the profit is reduced, and what he terms an "equity profit" is allocated to ONO Ltd.

ON LLP is a mixed membership partnership. ON Ltd provides no services or capital to ON LLP so the appropriate notional profit is NIL. It is reasonable to assume that ONO Ltd is receiving this profit because of O's power to enjoy and profits should be reallocated accordingly. If O withdrew from the partnership to prevent the mixed membership rules from applying then he would continue to be taxed as a partner as a result of S850D ITTOIA 2005, with the excess allocation to the company then being treated as his profit share.

### Example 3

This example looks at a situation where there are a number of corporate members.

X LLP has individual members D, E and F together with three companies D Ltd, E Ltd and F Ltd. D is the 100% shareholder of D Ltd. E is the 100% shareholder of E Ltd. The shareholders of F Ltd are F and his spouse.

Prior to the admission of the three corporate members D, E and F shared profits 60:20:20 and following the admission of the corporate members their individual profit share entitlements are each reduced by the amount allocated to their respective companies. D Ltd, E Ltd and F Ltd are not entitled to any profit share if D, E and F respectively cease to be LLP members.

The profit shares of D Ltd, E Ltd and F Ltd are attributable to D, E and F respectively. It is reasonable to ascribe direct causal connection between the profit share allocated to D Ltd (for example) and D's status as a member of X LLP and shareholder in D Ltd. It is also clear that D's profit share (for example) is lower than it would have been had he not been shareholder in D Ltd with ability to access the profit share allocated to D Ltd.

#### *Example 4*

This is a general example looking at what happens under the new legislation when individuals use a corporate member to defer paying tax. The membership of ABC LLP consists of three individuals, A, B and C, who decide that they want to retain funds in the LLP for working capital. In order to avoid the retained profits being taxed at higher income tax rates, they introduce a corporate member, ABC Ltd, which is fully owned by A, B and C. ABC Ltd does not provide any services and only a nominal amount of capital.

A, B and C work out what they wish to draw personally and allocate the balance of the profit to ABC Ltd. The profit share allocated is invested or retained in the partnership by the company member as additional partnership capital or advances.

The individual members meet the enjoyment conditions in relation to the sums allocated to their company.

The three individual members are taxed on an additional profit, split on a just and reasonable basis, equal to the profit share allocated to ABC Ltd, less a sum that represents an appropriate notional return on the nominal amount of capital introduced by ABC Ltd.

It is also likely that this is an arrangement that has a main purpose of securing Corporation Tax treatment of the profit. It is also possible that Condition X (profit deferral) applies see PM219000.<sup>24</sup>

The reader may wonder whether a policy which discourages re-investment of partnership profit is a wise one. But there it is.

*Example 5*

This is a further general example where an individual diverts profits through a company owned by a close relative.

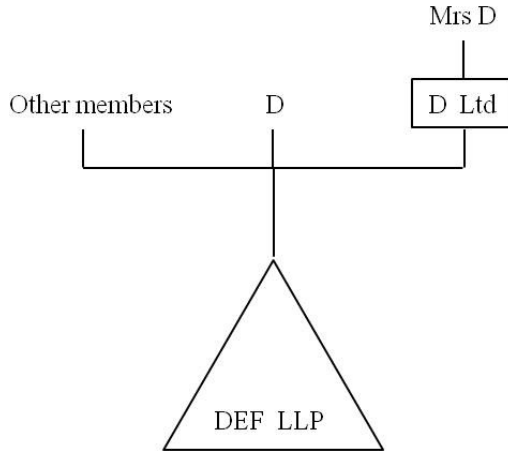

D is a member of DEF LLP. All the members of the LLP agree to introduce D Ltd as a member. D Ltd is a company that is owned by his wife. D continues to be a member of the LLP, only now he does some work for the LLP through D Ltd. D Ltd provides only a nominal amount of capital.

---

24 See 83.5 (Condition X: Deferred profit rule).

The only change is that the profit share, previously allocated to D, is now allocated partly to D himself, but mainly to D Ltd.

D Ltd is owned by the wife of D, so a connected person is in a position to enjoy the profits of D.

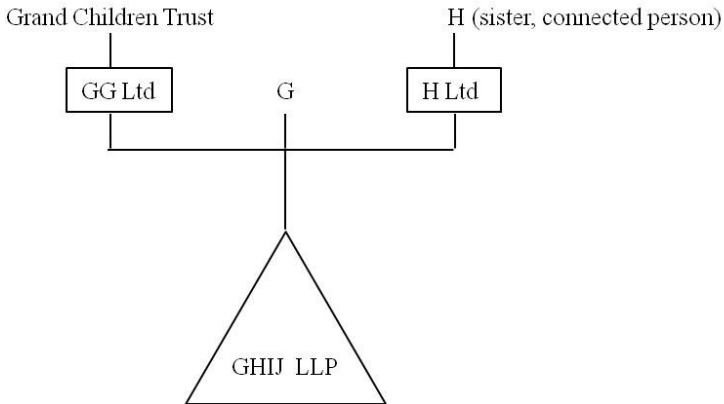

D is taxed on an additional profit equal to the profit share allocated to D Ltd. Whilst D Ltd is providing services to DEF LLP, the reality is that the work is such services as are being provided by D, another member. These services are ignored in determining the appropriate notional consideration for services. D Ltd provides no other services, so the appropriate notional consideration for services is nil.

### *Example 6*

This example looks at the question of whether the profit share is influenced by the power to enjoy.

G is a member of GHIJ LLP. Since it was formed in 2007 there have been two corporate members. H Ltd is owned by, and provides the services of, H, the sister of G. H has never been a member. GG Ltd is owned by trustees on behalf of the grandchildren of G.

G has the power to enjoy for both H Ltd and GG Ltd. The question is whether the profit shares are influenced by the power to enjoy.

In the case of H Ltd, the facts show that H is working for the LLP and all profits allocated to H Ltd properly reflect that work. The profit share is not affected by the power to enjoy and the legislation does not apply to H Ltd's share of the profit.

In the case of GG Ltd, the profit share is influenced by the fact that G wants the money to pass to his grandchildren. The excess profit allocation rules apply to the profit share, and G will be taxed on the profit share, subject to any notional profit.

### 83.11 s.850C counteraction: Income reallocation

Assuming the s.850C application conditions are satisfied, we move on. Section 850C ITTOIA(4) provides:

A's profit share is increased by so much of the amount of B's profit share as, it is reasonable to suppose<sup>25</sup>, is attributable to—

- (a) A's deferred profit, or
- (b) A's power to enjoy,

as determined on a just and reasonable basis. But any increase by virtue of paragraph (b) is not to exceed the amount of the excess mentioned in subsection (3)(a) after deducting from that amount any increase by virtue of paragraph (a).

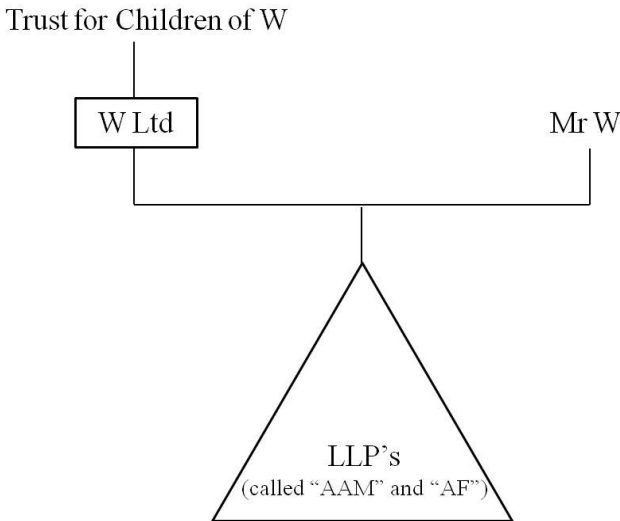

<sup>25</sup> See App.2.21 (Reasonable-to-assume).

A does not have an indemnity against B for the tax, so if A has “Power to Enjoy” without any actual interest in the profits, the consequence may be very harsh.

### 83.11.1 Attribution

In *Walewski v HMRC*<sup>26</sup> the business structure, simplified, amounted to this:

Mr W had power to enjoy. He argued that he provided services to W Ltd, which W Ltd provided to the partnership, so W Ltd earned its profit share and none of it should be attributed to the power to enjoy.

If that is right then the mixed partnership code would be easy to avoid.

On the facts, the arrangement was not scrupulously carried out. Mr W kept no records or timesheets to show when he was acting on behalf of the W Ltd. He entered into contracts of employment with W Ltd and with another entity, both of which required full time work! Clients were unaware of the arrangement. But even if these facts had been better (which would not have been easy to arrange) the tribunal would not have accepted that he provided services via the company:

---

<sup>26</sup> [2020] UKFTT 58 (TC). In the appeal this was regarded as a matter of fact and unchallengeable: [2021] UKUT 133 (TCC) at [43]. The reader may be surprised that permission was given to appeal.

170 Mr Walewski's work for W Ltd, AAM and AF was fungible; it is not possible on the basis of any evidence which we saw, to separate his role into discrete components; his work for one was his work for each and all of those entities. [A witness] described Mr Walewski's roles for the three entities as "very interlinked", we think they were more than interlinked, we think Mr Walewski was essentially playing only a single role, but for the benefit of all three entities.

171. Mr Walewski was described as "wearing a number of hats", again, in our view this does not do justice to the truly fungible nature of his activities for these entities, all of whose decisions and strategies began and ended with Mr Walewski, as the only director and employee of W Ltd, as a member of AAM and only member of its management committee and as an employee and member of AF.

172. There was no commercial, physical or temporal separation of Mr Walewski's activities. ...

173. ... if W Ltd's profit allocation cannot be explained by Mr Walewski's earning power as its employee, what other alternative reasonable explanation can there be for the profits being allocated to W Ltd other than Mr Walewski's power to enjoy them ?

175. ... In our view the test which we must apply to determine whether W Ltd has earned its share of attributed profits is a test of substance and not just form.

This is a test which could never be met no matter how well the arrangement had been carried out. Once one disregards the employment with W Ltd, the result is inevitable:

191. On the contrary, our view is that the only reasonable explanation for the allocation of profit to W Ltd from AAM and AF is by reason of Mr Walewski's ability to enjoy those profits.

192. This conclusion is supported by the fact that:

(1) The 2006 amended partnership agreement of AAM gave W Ltd a right to 99.9% of AAM's profits, independent of any services provided by Mr Walewski or the terms of any employment contract.

(2) Mr Walewski's salary from W Ltd, while significant, was modest in terms of the industry in which he worked and the level of profit which was being generated in AAM and AF...

(3) Mr Walewski did not take a bonus from W Ltd under his employment contract.

(4) We find it hard to understand why someone in Mr Walewski's

position would have been willing to give away such a large percentage of the profits which he had generated if there was not some benefit to himself. In our view, the only reason he would do that is if he knows that he has the power to enjoy the profits of the company in some other way.

(5) Mr Walewski would be an unusual, if not unique, member of the finance industry if he not only failed to take the full amount of his contracted salary, but also did not claim any amount of bonus and allowed a company to take all of the fruits of his labour...

(6) At the relevant time there was a significant difference between the 45% income tax which Mr Walewski suffered on payments made directly to him and the 21% corporation tax suffered by W Ltd.

(7) It seems reasonable to conclude that changes made in the Alken group structure were made not for commercial reasons, but in response to the PWC advice given about ways to mitigate the impact of the mixed partnership rules and ensure that the tax differential between W Ltd and Mr Walewski could be retained.

**83.12 A (transferor) not partner: s.850D**

Section 850C ITTOIA only applies if A is a partner, so it could be avoided by arranging for A not to be a partner.

Section 850D(1) ITTOIA deals with this. It may be helpful to read this side by side with s.850C, to identify the differences:

**s.850D(1) application conditions**

Subsections (4) and (5) apply if—

(a) at a time during a period of account (“the relevant period of account”) in respect of a firm, an individual (“A”) personally performs services for the firm,

**s.850C(1) application conditions**

Subsections (4) and (5) apply if—

[No equivalent]

(b) if A had been a partner in the firm throughout the relevant period of account, the calculation under section 849 in relation to A for the relevant period of account would have produced a profit for the firm,

(c) a non-individual partner (“B”) in the firm (see subsection (6)) has a share of that profit (“B’s profit share”) which is a profit (see subsection (7)),

(d) it is reasonable to suppose that A would have been a partner in the firm at a time during the relevant period of account or any earlier period of account but for the provision contained in section 850C (see also subsections (8) to (10)), and

(e) condition X or Y is met.

(a) for a period of account (“the relevant period of account”)—  
 (i) the calculation under section 849 in relation to an individual partner (“A”) (see subsection (6)) produces a profit for the firm, and  
 (ii) A’s share of that profit determined under section 850 or 850A (“A’s profit share”) is a profit or is neither a profit nor a loss,

(b) a non-individual partner (“B”) (see subsection (6)) has a share of the profit for the firm mentioned in paragraph (a)(i) (“B’s profit share”) which is a profit (see subsection (7)), and

[no equivalent]

(c) condition X or Y is met.

I coin some terminology, and in the discussion below:

The conditions in para (e) are “**s.850D condition X/s.850D condition Y**”

The conditions in s.850C are the “**s.850C conditions X and Y**”.

### 83.12.1 *s.850D condition X*

Section 850D(2) ITTOIA provides:

Condition X is that it is reasonable to suppose<sup>27</sup> that amounts representing A’s deferred profit (see subsection (11)) are included

---

<sup>27</sup> See App.2.21 (Reasonable-to-assume).

in B's profit share.<sup>28</sup>

Section 850D condition X is the same as s.850C condition X(a): see 83.5 (Condition X: Deferred profit rule).

### 83.12.2 s.850D condition Y

Section 850D(3) ITTOIA provides:

Condition Y is that—

- (a) B's profit share exceeds the appropriate notional profit (see subsection (12)),
- (b) A has the power to enjoy B's profit share ("A's power to enjoy") (see subsection (13)),<sup>29</sup> and
- (c) it is reasonable to suppose<sup>30</sup> that the whole or any part of B's profit share is attributable to A's power to enjoy.

Section 850D condition Y contains 3 conditions, or sets of conditions, which I call Condition Y(a), (b) and (c).

Section 850D conditions Y(a)(b) and (c) are equivalent to s.850C conditions Y (a)(b) and (c)(i): see 83.6 (Condition Y: Excess profit allocation rule).

### 83.13 s.850D counteraction: deemed partner

Assuming s.850D conditions X or Y are satisfied, we move on. Section 850D(4) ITTOIA provides:

A is to be treated on the following basis—

- (a) A is a partner in the firm throughout the relevant period of account (but not for the purposes of section 863I (allocation of profit to AIFM firm)),
- (b) A's share of the firm's profit for the relevant period of account is so much of the amount of B's profit share as, it is reasonable

---

28 See 83.7.1 (B's profit share).

29 Section 850D(13) provides:

"Section 850C(10) to (17) applies for the purpose of determining "the appropriate notional profit"; and A is to be treated as a partner in the firm for the purposes of section 850C(17)."

See 83.8 (appropriate notional profit).

30 See App.2.21 (Reasonable-to-assume).

- to suppose<sup>31</sup>, is attributable to—
- (i) A's deferred profit, or
  - (ii) A's power to enjoy,
- as determined on a just and reasonable basis, and
- (c) A's share of the firm's profit is chargeable to income tax under the applicable provisions of the Income Tax Acts for the tax year in which the relevant period of account ends.

But A's share of the firm's profit by virtue of paragraph (b)(ii) is not to exceed the amount of the excess mentioned in subsection (3)(a) after deducting from that amount A's share of the firm's profit (if any) by virtue of paragraph (b)(i).

### 83.14 Associated partnership

Section 850D(1) provides:

- (1) Subsections (4) and (5) apply if...
  - (d) it is reasonable to suppose that A would have been a partner in the firm at a time during the relevant period of account or any earlier period of account but for the provision contained in section 850C

Section 850D(8) ITTOIA provides:

The requirement of subsection (1)(d) is to be assumed to be met if, at a time during the relevant period of account, A is a member of a partnership<sup>32</sup> which is associated with the firm.

#### 83.14.1 "Associated"

Section 850D(9) ITTOIA provides:

- A partnership is "associated" with the firm if—
- (a) it is a member of the firm, or
  - (b) it is a member of a partnership which is associated with the firm (whether by virtue of paragraph (a) or this paragraph).

---

31 See App.2.21 (Reasonable-to-assume).

32 Section 850D(10) ITTOIA provides:

"In subsections (8) and (9) "partnership" includes a limited liability partnership whether or not section 863(1) applies in relation to it."

But it will be rare to have an LLP to which s.863 does not apply. See 82.21.1 (LLP treated as partnership).

## 83.14.2 HMRC examples

PM provides:

*Example 1*

This example demonstrates the effect of the anti-avoidance rules where individual members resign and are replaced by personal service companies.

X, Y, Z and XYZ Ltd are the members of XYZ LLP. In response to the new legislation, they decide that all the individual members should cease to be members of the LLP with effect from 6 December 2013 being replaced by their personal service companies.

X, Y and Z continue to work for XYZ LLP, it is reasonable to suppose that they would have continued to be members but for the introduction of the legislation.

X, Y and Z are treated as members and the mixed membership partnership legislation applied accordingly.

Their share of the firm's profit, determined under the mixed membership rules, is chargeable to income tax for the tax year in which the relevant period of account ends...

*Example 2*

Example of the impact of the anti-avoidance rules.

M, N, O and MNO Ltd are the members of MNO LLP. In response to the new legislation, they decide that from 1 April 2014 all the individual members should become members of MNO New LLP. From 1 April 2014, the members of MNO LLP will be MNO Ltd and MNO New LLP. Whilst M, N and O are the members of MNO New LLP.

As MNO New LLP is an associated partnership it is assumed that M, N and O would have been members of MNO LLP. The mixed membership partnership legislation applies on the basis that they are deemed to have been members of MNO LLP.

*Example 3*

Example of where the anti-avoidance rules do not apply to events before 5 December 2013.

Firm A has only individual members. Before 5 December 2013, the individual partners decide to retire and transfer their interests in the partnership to limited companies which would become partners in their place. The actual transfer was carried out on 12 December 2013.

Although the change was not made until 12 December, there is clear evidence to show that the decision was made before 5 December so the partners could not be aware of the mixed membership partnership legislation as at that time the new rules had not been published. As a result, the anti-avoidance provisions do not apply.

The excess profit allocation legislation came into force when it was announced on 5 December 2013. It cannot be inferred that an individual would have been a member but for the new rules if the individual withdrew from a partnership before that date.

**83.15 Reliefs for B (transferee)**

83.15.1 *Adjustment for B*

**s.850C(5) ITTOIA**

**s.850D(5) ITTOIA**

If B is chargeable to income tax, in applying sections 850<sup>33</sup> to 850B in relation to B for the relevant period of account, such adjustments are to be made as are just and reasonable to take account of the increase in A's profit share under subsection (4).

(This subsection does not apply for the purposes of subsection (7) or section 850D(7).)

If B is chargeable to income tax, in applying sections 850 to 850B in relation to B for the relevant period of account, such adjustments are to be made as are just and reasonable to take account of A's share of the firm's profit under subsection (4).

(This subsection does not apply for the purposes of subsection (7) or section 850C(7).)

This will not often apply, as B will normally be a company.

### 83.15.2 *Distribution relief*

Section 850E ITTOIA provides:

(1) Subsection (2) applies in a case in which section 850C(4) or section 850D(4) applies if—

- (a) there is an agreement in place in relation to the excess part of B's profit share,
- (b) as a result of the agreement, B makes a payment to another person out of the excess part of B's profit share, and
- (c) the payment is not made under any arrangements<sup>34</sup> the main purpose, or one of the main purposes, of which is the obtaining of a tax advantage for any person.

(2) For income tax purposes, the payment—

- (a) is not to be income of the recipient,
- (b) is not to be taken into account in calculating any profits or losses of B or otherwise deducted from any income of B, and
- (c) is not to be regarded as a distribution.

(3) In this section—

“the excess part of B's profit share” means so much of the amount of B's profit share as is represented by the amount of, as the case may be—

- (a) the increase under section 850C(4), or

---

33 See 83.2 (Allocation of profit to partners).

34 Section 850E(3) provides the standard (unnecessary) IT definition of “arrangements”; see App.2.2.3 (Definitions of “arrangement”).

(b) A's share of the firm's profit under section 850D(4), and "tax advantage" has the meaning given by section 1139 of CTA 2010.

PM manual provides:

**PM232000 Payments By The Non-Individual Out Of Its Reallocated Profit Share** [July 2019]

... *Example 2*

This example addresses two concepts, the first where a payment made to a person connected to the individual member does not attract additional taxation, and the second where the payments are made after passing through a holding company partly owned by an unconnected party.

AA Ltd receives £150,000 as its share of the profit of AA LLP. Under the excess profit allocation rules A is taxed on £130,000 of this by virtue of their power to enjoy the sum allocated to A Ltd.

The excess part of AA Ltd's profits share is £130,000.

AA Ltd agrees to pay A £100,000. It pays £40,000 as a dividend to its parent company AABC Ltd.

AABC Ltd pays a dividend to its shareholders, A, B and C, who each receive £10,000.

The payment of £100,000 is made as part of an agreement in connection with AA Ltd's excess profit share. A is not taxable on this sum and it is not taken into account in arriving at the profits of AA Ltd.

The dividends received by A, B and C were not paid to them by AA Ltd and so fall outside the scope of the legislation.

### 83.15.3 *Adjustment for corporation tax*

Section 1264A CTA 2009 provides:

- (1) Subsection (2) applies in a case in which—
  - (a) section 850C(4) or 850D(4) of ITTOIA 2005 applies for a period of account ("the relevant period of account"), and
  - (b) the partner who is "B" for the purposes of section 850C or 850D of that Act (as the case may be) is a company.
- (2) In applying sections 1262 to 1264 in relation to the company—
  - (a) for the accounting period of the firm which coincides with the relevant period of account, or
  - (b) if no accounting period of the firm coincides with the relevant period of account, for accounting periods of the firm in which the relevant period of account falls,

such adjustments are to be made as are just and reasonable to take account of the increase under section 850C(4) of ITTOIA 2005 or A's share of the firm's profit under section 850D(4) of that Act.

(3) Sections 850C(23) and 850E(2) of ITTOIA 2005 apply for corporation tax purposes as they apply for income tax purposes.

### 83.16 Alternative investment fund manager

An AIFM firm is a partnership the business of which is managing one or more AIFs. AIFM firms are required to subject part of the "remuneration" of key individuals to performance conditions and to defer when those individuals can access that remuneration.<sup>35</sup>

A member of an AIFM firm (including an LLP), is chargeable on the profits of the partnership as they arise rather than when they are received.

The AIFM tax provisions allow the AIFM partnership to elect to be treated as a partner in itself in order to pay tax on a member's remuneration on behalf of the member.

If it does so, the AIFM firm is treated as an individual member of the partnership, not as a non-individual member for the purposes of the mixed membership rules.

As part of EU-wide strategy for investor protection, members of partnerships that are Alternative Investment Fund Managers (AIFM) may have their access to their profit shares deferred for a period of time. The partnership may choose to allocate these deferred profits to a non-individual partner.

Section 850C ITTOIA provides:

- (22) Subsection (23) applies if—
  - (a) the increase under subsection (4), or any part of it, is allocated by A to the firm itself under section 863I (allocation of profit to AIFM firm), and
  - (b) B makes a payment to the firm representing any income tax for which the firm is liable by virtue of section 863I in respect of the amount of the increase allocated to it.
- (23) For income tax purposes, the payment—
  - (a) is not to be income of any partner in the firm, and
  - (b) is not to be taken into account in calculating any profits or losses

---

35 Alternative Investment Fund Managers Directive (2011/61/EU).

of B or otherwise deducted from any income of B.

### 83.17 Business transferred to partnership

PM provides:

#### **PM236000 Businesses Transferred To The Partnership** [July 2019]

This section looks at the tax treatment of the transfer of a business to a partnership by a company, where:

- the company and a shareholder of the company both become (or are) partners in the firm,
- the consideration given for the transfer is in the form of an equity stake in the partnership.

The question is whether the excess profit allocation rules apply because of the shareholders power to enjoy?

#### *Appropriate notional return on capital*

The position is that the transferor company has transferred the business to the LLP and in return has been credited with having contributed capital to the firm.

For the purposes of the excess profit allocation rules the amount of capital contributed is the open market value of the assets transferred at the time of transfer, not the historic or book value.

The fact that the transferor company has contributed assets rather than cash as capital makes no difference.

If the transferor company can draw on the sum then it is not capital contributed for the purposes of the excess profit allocation rules, see PM221000.

The appropriate notional profit for the transferor company includes an appropriate notional return on capital based on the open market value of the assets transferred as capital at the time of transfer.

The appropriate notional return on capital is calculated in line with a commercial rate of interest.

There is no higher “equity return” based on the fact that the transferor company transferred a business. The value of that business transferred has already been recognised in the value of the capital account.

#### *Appropriate notional return for services;*

If the transferor company retains assets which it makes available to the LLP then the appropriate notional profit includes an appropriate notional consideration for services (less any amount actually paid by the partnership for the use of the asset), see PM222000.

*Profit share exceeds appropriate notional profit:*

The legislation recognises the value of the business transferred.

If the profit share allocated to the transferor company exceeds the “appropriate notional profit” then the question is whether the transferor company has received that excess by reason of the ability of an individual member to enjoy the profit.

Where a shareholder continues to be involved in the business after the transfer, it will nearly always be reasonable to conclude that the excess allocation of profits to a company which they substantially own (whether or not with connected individuals) is attributable to their continuing involvement with the firm, with the result that any such profit allocated to the corporate member will be reallocated to the individual.

Cases where this is not the case will be exceptional. The most likely scenario is where the company is widely owned and there are a majority of shareholders unconnected with the partner, and who are not involved with the business but who get the benefit of the profits allocated to the company. In those circumstances it is very unlikely that the individual members are using the company member to alienate their income since the effect of allocating excess profits to the company would also be to give them away to third parties.

Examples of how the excess profit allocation rules apply to transfers of businesses can be found at PM237000

**PM237000 Businesses Transferred To The Partnership: Examples**  
[July 2019]

This section sets out how the excess profit allocation rules, as set out at PM236000, apply to examples where a company transfers its business to an LLP.

*Example 1* (John and Jane<sup>36</sup>)

This example looks at the basic situation where a business is transferred from a company to an LLP.

J1 and J2 are shareholders in a company, S Ltd, which runs a securities trading business. J1 has 90% and J2 has 10%. Both are highly qualified and work in the business. The company transfers its business to a partnership, S LLP, and it, J1 and J2 become partners in the business. The partnership agreement provides that 50% of the profits of the firm are paid to the company indefinitely, and the individual partners share

---

36 The Manual sometimes refers to Jane and sometimes to Janet

the rest of the profit equally (i.e. 25% each).

S Ltd will be entitled to be taxed on an appropriate notional return on capital (in this case, the value of the assets contributed by the firm<sup>37</sup>). The question is then whether any profits in excess of this allocated to S Ltd are attributable to J1 and J2's power to enjoy those profits. Given the nature of the business, and the fact that J2 and J1 are still as actively involved in it as they always were, HMRC would consider that all of the excess profit should be reallocated from S Ltd to J1 and J2. This is a 'people' business and the profits rely on J1 and J2's continuing involvement in the business. J2 and J1 control the profit allocation and it is not reasonable to suppose that they would allow profits to be allocated to S Ltd if they did not have the power to enjoy those profits.

### Example 2

This is another example of a transfer of a business from a company to an LLP.

PeopleCo Ltd is a professional firm that had been trading for many years. A few years ago P, the 100% owner of PeopleCo Ltd decided that he wanted to reorganise the business to motivate his key staff and give them an ownership interest. He was also considering succession of the business, when in due course he retires. Recognising that PeopleCo Ltd was a people business, he set up an LLP, whose members are P,

---

37 Author's footnote: This should read: the value of the assets contributed to the LLP by the company S Ltd.

PeopleCo Ltd and the key staff who he hopes will take over the business. PeopleCo Ltd transfers the business to the LLP.

PeopleCo Ltd receives the profit share agreed when the business was transferred to the LLP.

P remains a member of PeopleCo LLP and receives a personal profit share.

PeopleCo Ltd will be entitled to be taxed on an appropriate notional return on capital (again, the value of the assets contributed to the firm). The question is then whether any further profits allocated to PeopleCo Ltd in fact reflect the work done by P. As he is continuing to work in the business in the same way as he has done previously, it would be expected that the profits for periods after the transfer should be allocated to him and not to the company.

A helpful way to look at this is to ask whether the profit sharing arrangement between PeopleCo Ltd and the LLP is the same as it would have been had P actually retired, and whether P's own profit share is commensurate with the work done.

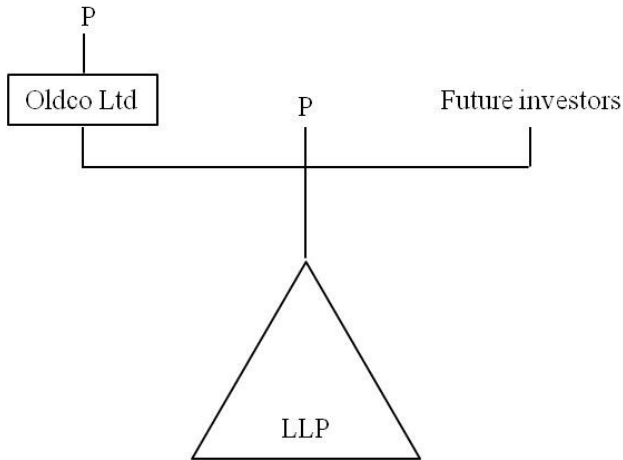

### *Example 3*

This looks at an example of a transfer of a business from a company to an LLP where the founder is retiring.

Oldco Ltd had been trading for many years. A few years ago P, the owner of Oldco Ltd decided that he wanted to retire. He set up an LLP, whose members are P, Oldco Ltd and a number of individuals who he hoped would take over the business. The business is then transferred to

the LLP and Oldco Ltd is credited with the value of the business as capital introduced. Oldco Ltd receives a profit share.

P is working a reduced number of hours in the business and receives a small personal profit share that is commensurate with the work he does.

The first question is whether the profit share received by Oldco Ltd exceeds the appropriate notional profit. If the profit share is less than the appropriate notional profit then there is no reallocation.

Assuming that there is such an excess allocation the next question is whether this is by reason of the economic connection. It is likely that it is, but if the particular facts show that any economic connection between the individual and non-individual members does not result in profit being shifted from the individual partners to the non-individual, the mixed membership partnership legislation will not apply.

#### *Example 4*

This example looks at where a company transfers its business to an LLP some of whose members are minority shareholders in the company.

Oldco Ltd is a manufacturing firm that had been trading for many years. A few years ago P, the majority owner of Oldco Ltd decided that he wanted to retire. He set up QRS LLP, whose members are Oldco Ltd and a number of unconnected individuals whom he hoped would take over the business, three of whom, Q R and S, were minority shareholders in Oldco, holding 35% of the ordinary shares between them, P holding the remaining 65%.

Oldco Ltd receives the profit share agreed when the business was transferred to the LLP.

P retires at the time of the transfer of the business and subsequently provides no services to the LLP.

Q, R and S will potentially receive part of Oldco's profit shares in the form of dividends. The question is whether the share allocated to Oldco exceeds the notional profit because they are shareholders. The shares in Oldco all carry equal voting rights and rights to a dividend, and P, a non-member of the LLP, controls Oldco, holding 65% of the shares. In this case there is nothing to suggest that the connection Q, R and S have with Oldco has influenced the profit-sharing arrangements - in particular, most of the profits flow to an unconnected individual who is no longer a member. The position could be different if P, Q, R and S held different classes of shares with different rights.

### 83.18 Takeover of LLP

PM provides:

#### **PM238000 Takeover Of The LLP** [July 2019]

Although usually treated for UK tax purposes as a partnership, an UK LLP is a body corporate.

This section looks at where the LLP is subject to a takeover by another

body corporate.

The way that the excess profit allocation rules apply to takeovers will vary from case to case, depending on the facts of that case.

It is worth remembering that the principle behind the excess profit allocation rules is that they apply where an individual, or individuals, divert all or part of their profit share to a non-individual member or members, usually a company or companies, in order to reduce tax on their profit share or as part of profit deferral arrangements.

At the same time, the excess profit allocation rules do not apply to mixed membership partnerships in which the individual and non-individual partners are genuinely acting at arm's length and not intending to defer a profit share or secure a tax advantage.

#### *Example 1*

This example looks at whether a sum is deferred profit?

XYZ PLC acquires an interest in ABC LLP from the existing members who continue to be involved in the LLP as members following the transfer. Prior to becoming a member of the LLP, XYZ PLC was unconnected to ABC LLP or its members.

The sale price agreed is the open market value of that interest in ABC LLP as at that date. To protect the value of the business being bought, the terms of sale are that part of the consideration is deferred for two years. If the individuals leave in that time they will forfeit all or part of the consideration.

The HMRC analysis is as follows:

XYZ PLC, an unconnected party, acquired an interest for the OMV [open market value] at the time. On a realistic view of the facts the sum deferred is a not a remuneration or benefit from the LLP. It is not linked to the profits made in the period in which XYZ PLC is a member of the LLP.

This can be contrasted with:

[Example 1B]

XYZ PLC agrees that, if they remain members for three years, the individual members will receive an additional sum based upon the profits of ABC LLP over that period.

The HMRC analysis is as follows:

This is a share of the profits that has been deferred and it is no different to any other case where a share of the profit is deferred. Condition X is

satisfied.

*Example 2*

This example looks at a takeover where the previous members retain an equity stake after the takeover.

The new owners may want to ensure that the existing members remain with the business. This will particularly be true where it is a “people business”.

RSTU LLP is a consultancy business. The ABC Corporation sees RSTU as a way of entering the UK market, however it sees it as important to retain the services of R, S, T and U, the existing members, and wants them to retain an interest in the LLP.

ABC buys a majority stake (80%) in RSTU LLP with each of the existing members retaining a 5% share.

It is recognised that R is looking to partially retire. It is agreed that in three years’ time ABC will buy 20% of R’s stake at the then OMV. It will buy a further 20% a year later and the balance when R decides to retire. The LLP Agreement provides that the individual partners must sell all their interests on retirement.

It is assumed that Condition Y is not satisfied as R does not have the power to enjoy the profit share allocated to the ABC Corporation.

The HMRC analysis is as follows:

The question is whether Condition X is satisfied? Is it reasonable to suppose that the purchase by the corporate member of R’s interest in the LLP represents “remuneration or other benefits or returns” that have been deferred?

Reasonable to suppose means that you take a realistic view of the facts and use a balanced common sense approach.

Possible pointers include:

- The ABC Corporation is a large independent concern; it is not a money box retaining profits for the purpose of buying out interests.
- What are the profit sharing arrangements? Is there anything that looks as if it is money being held back from the individual members?
- Would the ABC Corporation have sufficient funds to buy the interest held by R regardless of the profitability of the LLP?
- How did R acquire the interest - was it acquired by purchase at arm’s length or as an initial investor?

The question then is does it look as if the sum paid includes any profit held back, or does it look like the terms on which an independent party

would buy that interest?

### 83.19 Private equity investment

PM provides:

#### **PM239000 Private Equity Investment** [July 2019]

In some cases an outside investor, such as a private equity fund will become a partner, directly or indirectly and inject capital into the firm. If they chose to do so through a corporate vehicle then it may make the firm a mixed membership partnership.

In some cases the excess profit allocation rules will not apply as the individual members do not meet the power to enjoy requirement (see PM224000).

#### *Example 1*

Example looking at where capital is injected by external investors using a corporate vehicle.

LMN LLP has received an injection of capital from a group of external investors, none of whom are members of LMN LLP. The investors have chosen to invest through a limited company.

This is a mixed membership partnership but the legislation does not apply as the individual members do not benefit from the sums allocated to the company.

If one of the individual partners in the firm had a small stake in the private equity fund then the question is whether it is reasonable to suppose that part of the profit is allocated to the corporate partner as a result of that stake.

The way to approach the issue is to ask whether the power to enjoy condition is met, in which case the mixed membership partnership legislation will apply, unless it is not reasonable to suppose that any part of the corporate member's profit share can be attributed to the power to

enjoy.

*Example 2*

This example looks at where the corporate member is jointly owned by the private equity fund and the individual members.

The question is whether it is reasonable to suppose that the corporate member's profits have been increased as a result (Condition Y at S850C (3) see PM219000 for further guidance).

MNO LLP has received an injection of capital from a private equity fund via a corporate member, MNO Ltd, which is jointly owned by the fund and the individual members of MNO LLP.

This is a mixed membership partnership and the individual members are in a position to enjoy profits paid via the corporate member. However, that does not necessarily mean that the excess profit allocation rules apply. Is there any evidence that the profit share allocated has not been influenced by the power to enjoy?

[Example 2B]

Additional facts:

MNO Ltd has ordinary share capital and preference shares. All the preference shares are held by the private equity fund. The profit share allocated to MNO Ltd is calculated so that it is enough to pay the dividend on the preference shares only.

Condition Y is not satisfied as it is not reasonable to suppose that the profit share allocated to MNO Ltd is attributable to the fact that the individual members could benefit.

[Example 2C]

Alternatively:

MNO Ltd is jointly owned by the fund and the individual members of MNO LLP. MNO Ltd only has one class of shares, of which the fund holds 60%.

Why would the members choose to put money into their firm in this format? Is there, for example a tax advantage for them in so doing?

*Example 3*

This is a more complex example:

A LLP has 50 individual members and a corporate member B Ltd with 100 issued ordinary shares. 30 of the shares of B Ltd are listed on AIM and owned by investors otherwise unconnected to the LLP or its individual members. The remainder of the shares are owned by 40 of the individual members together with 20 former LLP members (who no

longer provide services of any form to the LLP).

So as to attract the initial investment on IPO and to retain the external investor appetite, B Ltd has 100% control of A LLP including control of any changes to the contractual profit share entitlements of the individual members which are determined entirely at its discretion and in accordance with market rate levels of remuneration.

Most of the Directors of B Ltd are also members of A LLP; they are subject to Directors fiduciary duties to ensure that every decision taken is in the best interests of the shareholders; that is as shareholders and not in their role as members.

The HMRC analysis is as follows:

The answer to this example will turn upon the facts. It is, however, helpful to remember that the purpose of the excess profits allocation legislation is to prevent partners from obtaining tax advantages by using the mixed membership structure to alienate their personal income.

A useful question to ask is would B Ltd would receive the same profit share if/when the member-shareholders were no longer members of the LLP and/or if/when they remain members but are no longer shareholders?

**83.20 Share issue**

PM provides:

**PM240000 Share Issues** [July 2019]

This section looks at the position where a partnership or LLP wishes to raise external finance and chooses to do so by setting up a company which issues shares that external investors can buy and sell on a stock exchange.

In some cases the individual partners will have no interest in the corporate member, in which case the mixed membership partnership legislation will not apply.

*Example 1*

Example looking at where external investors invest through a corporate vehicle floated on a stock market.

LMN LLP has set up a corporate member, LMN Ltd, which is floated on the AIM market. None of the individual members of LMN LLP are shareholders in LMN Ltd.

This is a mixed membership partnership but the legislation does not apply as the individual members do not benefit from the sums allocated to the company.

If the individual partners hold shares in the corporate partner then it is a question whether on the facts of that case the mixed membership partnership legislation applies.

In cases where the shares are traded on a stock exchange, the question is likely to be whether on the facts of that case Condition Y applies. For further guidance on this, see PM219000.

If an individual partner purchased shares as part of the Initial Public Offering or on the stock market and had no priority in buying those shares then Condition Y is unlikely to be satisfied as it is not reasonable to suppose that a part of the corporate partner's profits come from that member's power to enjoy.

If an individual partner has invested in a collective investment scheme and that scheme buys shares in the corporate partner as part of its ordinary investment portfolio then Condition Y is unlikely to be satisfied as it is not reasonable to suppose that a part of the corporate partner's profits come from that member's power to enjoy.

“Unlikely” seems something of an understatement. But HMRC do not wish to give hostages to fortune.

**83.21 International aspects**

PM provides:

**PM241000 Pseudo Share Schemes/Membership Benefit Schemes**  
[Jan 2020]

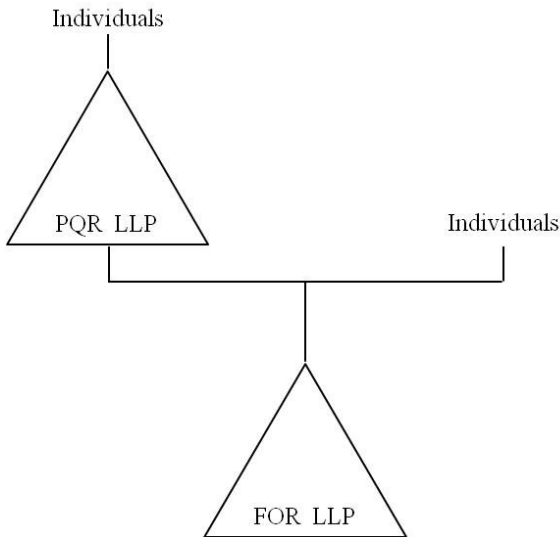

This section looks at how the mixed membership partnership legislation applies to cases where partnerships, and in particular LLPs, form part of structures that cross international boundaries.

*Example 1*

This looks at a case where one member is a tax transparent entity.

PQR LLP only has individuals as members, so it is not a mixed membership partnership.

Rather than have a branch, the members decide to ring-fence a new business venture overseas. They set up FOR LLP, which is a UK LLP whose members are PQR LLP and those individual members of PQR LLP involved in the project, a mixture of individuals resident in the UK and in the country where the firm operates.

Profits allocated by FOR LLP to PQR LLP are in turn allocated to the members of that firm all of whom are individuals resident in the UK. FOR LLP is a mixed membership partnership as one of the members is an LLP, which is not an individual. As noted above, the fact that some individual members are non-UK resident does not make it a mixed membership partnership.

However the Mixed Membership Partnership legislation is unlikely to apply. All the profits are allocated to, and taxed upon individual

members. In this case the relevant tax amount is not lower as a result of the structure.

*Example 2*

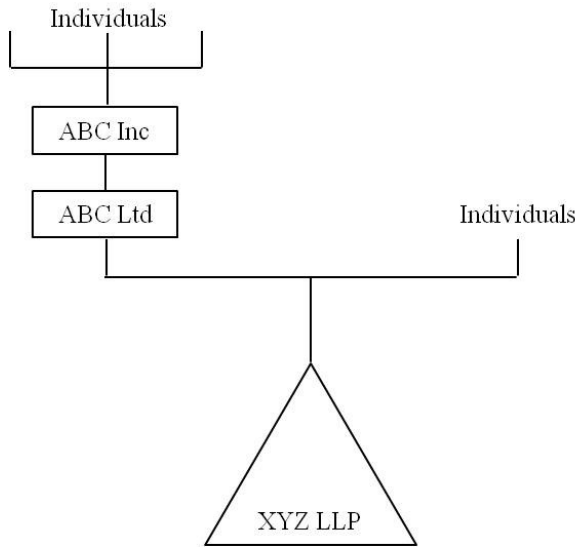

This example looks at where the UK firm is a subsidiary part of a wider global network.

XYZ LLP is the UK operation of ABC, a global business with substantial operations in a number of jurisdictions.

XYZ LLP has a number of individual members and ABC Ltd.

ABC Ltd is owned, via one or more intermediate entities, by ABC Inc, the ultimate parent of the global business.

ABC Inc is owned by an unconnected external corporate investor and a number of individuals several of whom are also individual members of XYZ LLP.

As the membership of XYZ LLP consists of individuals and ABC Ltd, XYZ LLP is a mixed membership partnership so that the excess profit allocation rules apply.

The question that needs to be considered is what part (if any) of the profit allocated to ABC Ltd can be said to be attributable to the fact that individual members of XYZ LLP are also amongst the ultimate owners of ABC Ltd?

If the members of XYZ LLP have a minority interest in ABC Inc (and assuming they receive only a corresponding minority benefit from ABC

Inc’s share of XYZ LLPs’ profit) then this is a strong indicator that the profit allocation is not linked to the fact that the members of XYZ LLP are also members of ABC Inc.

If a member of XYZ LLP receives their profit share from ABC rather than XYZ UK LLP then that is an indicator that the excess profit allocation rules will apply.

If the members of XYZ LLP receive a priority distribution out of ABC then that is an indicator that the excess profit allocation rules will apply.

*Example 3*

This example looks at where a member of the UK firm is rewarded from of an international network.

DEF LLP is the UK operation of DEF US.

The members of DEF LLP are individuals and a company owned by DEF US (DEF Ltd).

DEF Ltd receives a profit share from DEF LLP. This is paid by dividend to DEF US.

A is a member of both DEF LLP and DEF US. He works in the UK for DEF LLP, but receives no profit share from DEF LLP, only from DEF US.

Under the agreement A receives a profit share from DEF US that is 75% of the profit share received from DEF LLP via DEF Ltd.

DEF LLP is a “mixed partnership” as it has both individual and a corporate member.

A is a member of DEF LLP, working in the UK for DEF LLP but he receives no profit share from that firm, only one from DEF US.

A works for DEF LLP and receives his profit share via the profit allocated to DEF Ltd. The legislation applies, with the result that A will be subject to increased profits under S850C(4).

**83.22 International structures**

PM provides:

**PM242000 International Structures** [Jul 2019]

This section looks at how the mixed membership partnership legislation applies to cases where partnerships, and in particular LLPs, form part of structures that cross international boundaries.

*Example 1*

This looks at a case where one member is a tax transparent entity.

PQR LLP only has individuals as members, so it is not a mixed membership partnership. Rather than have a branch, the members decide to ring-fence a new business venture overseas. They set up FOR LLP, which is a UK LLP whose members are PQR LLP and those individual members of PQR LLP involved in the project, a mixture of individuals resident in the UK and in the country where the firm operates.

Profits allocated by FOR LLP to PQR LLP are in turn allocated to the members of that firm all of whom are individuals resident in the UK. FOR LLP is a mixed membership partnership as one of the members is an LLP, which is not an individual. As noted above, the fact that some individual members are non-UK resident does not make it a mixed membership partnership.

However the Mixed Membership Partnership legislation is unlikely to apply. All the profits are allocated to, and taxed upon individual members. In this case the relevant tax amount is not lower as a result of the structure.

*Example 2*

This example looks at where the UK firm is a subsidiary part of a wider global network.

XYZ LLP is the UK operation of ABC, a global business with substantial operations in a number of jurisdictions.

XYZ LLP has a number of individual members and ABC Ltd.

ABC Ltd is owned, via one or more intermediate entities, by ABC Inc, the ultimate parent of the global business.

ABC Inc is owned by an unconnected external corporate investor and a number of individuals several of whom are also individual members of XYZ LLP.

As the membership of XYZ LLP consists of individuals and ABC Ltd, XYZ LLP is a mixed membership partnership so that the excess profit allocation rules apply.

The question that needs to be considered is what part (if any) of the profit allocated to ABC Ltd can be said to be attributable to the fact that

individual members of XYZ LLP are also amongst the ultimate owners of ABC Ltd?

- If the members of XYZ LLP have a minority interest in ABC Inc (and assuming they receive only a corresponding minority benefit from ABC Inc's share of XYZ LLPs' profit) then this is a strong indicator that the profit allocation is not linked to the fact that the members of XYZ LLP are also members of ABC Inc.
- If a member of XYZ LLP receives their profit share from ABC rather than XYZ UK LLP then that is an indicator that the excess profit allocation rules will apply.
- If the members of XYZ LLP receive a priority distribution out of ABC then that is an indicator that the excess profit allocation rules will apply

### *Example 3*

This example looks at where a member of the UK firm is rewarded from of an international network.

DEF LLP is the UK operation of DEF US.

The members of DEF LLP are individuals and a company owned by DEF US (DEF Ltd).

DEF Ltd receives a profit share from DEF LLP. This is paid by dividend to DEF US.

A is a member of both DEF LLP and DEF US. He works in the UK for DEF LLP, but receives no profit share from DEF LLP, only from DEF US.

Under the agreement A receives a profit share from DEF US that is 75% of the profit share received from DEF LLP via DEF Ltd.

DEF LLP is a "mixed partnership" as it has both individual and a corporate member.

A is a member of DEF LLP, working in the UK for DEF LLP but he receives no profit share from that firm, only one from DEF US.

A works for DEF LLP and receives his profit share via the profit allocated to DEF Ltd. The legislation applies, with the result that A will be subject to increased profits under S850C(4).

## CHAPTER EIGHTY FOUR

# ESTATES OF DECEASED PERSONS: CGT

### 84.1 Succession law background

#### *Cross references*

The following topics are considered elsewhere:

85.21 (Tax returns & registration)

### **84.1 Succession law background**

On the death of a person domiciled in England (the “**deceased**”):

- (1) Their property passes to their personal representatives (“**PRs**”).<sup>1</sup> The property is known as the “**deceased’s estate**” or more formally, the estate of a deceased person in the course of administration. Where the context is clear this may be abbreviated to “**estate**”.
- (2) The PRs pay debts of the deceased and taxes. Provided that there are sufficient assets available, they pay pecuniary legacies and transfer property which the deceased has specifically gifted.
- (3) Finally, they transfer the residue of the estate to the residuary legatees. Thus on completion of the administration, the residuary legatees become entitled to the assets of the estate, and any income which the PRs have not spent.
- (4) It is possible for PRs to transfer specific assets to beneficiaries before completion of administration.<sup>2</sup>

When PRs transfer an asset to a beneficiary, the formal legal terminology

---

1 Scots law is in this respect the same: *Cochrane’s Executors v IRC* 49 TC 299. Further consideration is needed if a foreign law applies: see 84.14 (Succession under foreign law).

2 CG30920 raises the possibility that this is not the case in Scotland.

is that they “assent to the vesting of the asset in the beneficiary”,<sup>3</sup> which may be abbreviated to “**assent**”. But outside formal legal contexts, I prefer the word “transfer”. That seems clearer to readers unfamiliar with succession law terminology; there are differences between an assent and other types of transfer, but they are not relevant here.

During the period of administration, the PRs alone are said to be entitled to the assets which are comprised in the estate. The beneficiaries of the estate have a chose in action, the right to compel due administration of the estate. But it is well settled that:

- (1) Beneficiaries have no legal or equitable interest in the assets of the estate.<sup>4</sup>
- (2) Property in the estate is not settled property, and an estate is not a settlement, in the normal sense of those words or within the IT/CGT or IHT definitions.<sup>5</sup>

Special tax rules apply during this period of administration. The rules produce some curious results where the deceased, or a beneficiary, is a remittance basis taxpayer or non-resident. There can sometimes be scope for tax planning.

This chapter considers CGT, and the following chapter income tax.

The starting point is that PRs are “persons” (though not “individuals”) so they are in principle subject to IT and CGT. An estate, like a trust, is not itself a legal person.<sup>6</sup>

Similar issues arise where charities are beneficiaries of estates, as to which see Kessler, Wong & Birkbeck, *Taxation of Charities and*

3 See s.36 Administration of Estates Act 1925, set out at 85.5 (Income from specific legacy).

4 *Sudeley v Attorney-General* [1897] AC 11; this principle was re-affirmed in *CSD v Livingston* [1965] AC 694. For a survey of the cases, see *Re Hemming* [2009] Ch 313. At first sight the principle seems rather odd, at least to an English lawyer; for an explanation and legal analysis of the nature of an estate, see Smith, “Scottish Trusts in the Common Law” (2013) 17(3) Edin LR 283 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 7 at p.133.

5 This rule is sometimes reversed by express statutory provisions.

6 This is self-evident, but if authority is needed, see *Piggott v Aulton* [2003] EWCA 24. Although Arden LJ at [21] referred to an estate as “a person without legal personality” it would be more accurate to refer to it as an *entity* without legal personality.

*Nonprofit Organisations.*<sup>7</sup>

## 84.2 Period of administration

How long does the administration period last? This is a question of succession law, not tax law, but it often arises in tax contexts, including income tax, CGT, and IHT, and has given rise to a substantial case law.

In *Sudeley v Attorney-General*.<sup>8</sup>

The thing that the legatee was entitled to was one-fourth share of a residuary estate, consisting, it may be, of many things; and I think it was fallacious on the part of [counsel] to say that the residue was very nearly ascertained, because the question is not only of amount – although I think that of itself would not be sufficient if it were only of amount – but it is a question of substance as well as a question of amount. It is uncertain until the residuary estate has been ascertained of what it will consist ...

Until the thing has been ascertained, until the trust fund has been constituted, the thing of which the trustees are the trustees has not been ascertained. Whether you treat them, therefore, as trustees or executors, the same consideration arises. Now, if the only thing that the legatee is entitled to is the fourth share of an ascertained residuary estate, I say that to my mind it is impossible to maintain that the character of any part of that estate can be ascertained so as to make it possess a specific locality until that has happened; it is a condition precedent to know what the residuary estate is, and until that has been ascertained you cannot tell of what it will “consist.”

In *IRC v Aubrey Smith* the Court of Appeal cited this and said:

.... until the fact is ascertained, or can or ought to be inferred, that the residue has become defined so that the aliquot portion passing to the beneficiary can also be defined, the beneficiary has not, until that time, a definite interest in the sum which will ultimately fall to him. ... it appears to me ... that it is largely a question of fact. ...

What has to be determined here ... is: Is it clear that the portion of each of the sons is ascertained, or has been ascertained, or is capable of ascertainment, and that ascertainment has been assented to by the

---

8 [1897] AC 11.

executor-trustees?<sup>9</sup>

The important points which emerge from the case law are that PRs continue to hold an asset as PRs until:

- (1) they transfer an asset to a beneficiary; or
- (2) the administration of the estate is complete (at which point there is an implied assent). For this purpose:
  - (a) The estate must be completely ascertained. It remains in the course of administration even though this work is nearly done.
  - (b) The fact that debts of the deceased remain unascertained or unpaid is a relevant factor but not decisive.
  - (c) The fact that the PRs regard themselves as administering the estate (producing “estate accounts” and not trust accounts) is a relevant factor but not decisive.
  - (d) In a marginal case the issue is classified as one of fact and there is a broad “grey area” in which the courts will not interfere with a decision of the first-tier tribunal.

The TSE Manual provides:

**TSEM7360 Definition Of Period Of Administration** [Oct 2019]

The period during which the personal representatives are settling the estate is called the period of administration. It starts on the day following<sup>10</sup> the date of death of the deceased person and ends when the personal representatives have taken all the steps necessary to complete the administration of the estate.

The question of when an administration period ends is essentially one of fact and will depend on individual circumstances. It may in some cases coincide with the date when the residue of the estate can be identified. Sometimes the date of issue of the Inheritance Tax clearance certificate is taken as the date the administration was completed.

You should normally accept that the administration ended on the date the personal representatives tell you it did. ...

The CG Manual provides:

---

<sup>9</sup> 15 TC 661 at p.672.

<sup>10</sup> Author’s footnote: Whether period starts on the death, or on the day following the death, depends on rules relating to whether the law takes regard of parts of a day; but the issue is not likely to arise in practice.

**CG30700 Period of administration** [Jul 2019]

The period during which the personal representatives are settling the estate is called a period of administration. The period starts with the death of the deceased person. The date on which it ends is a question of fact which is often difficult to resolve. During this period the liability for CGT on sales of assets from the estate falls on the personal representatives unless they have taken specific steps to vest the ownership of the assets involved in legatees in advance of the sale, see CG30900.

When considering when administration is complete the Courts look for a construction of the law that leads to an early conclusion of administration. The leading case in this respect is *IRC v Aubrey Smith* 15 TC 661.

In his judgement Lord Hanworth MR set out a principle of general application when he said, at the bottom of page 675, top of page 676

“The question is, in all cases: has the administration of the Estate reached a point of ripeness at which you can infer an assent, at which you can infer that the residuary estate has been ascertained and that it is outstanding and not handed over merely for some other reason.”

On this basis we would normally argue that the period of administration ends when residue has been ascertained, see CG30780+.

**CG30710 Extended period of administration** [Jul 2019]

There are some exceptional cases where all the figures are apparently available to enable residue to be ascertained but it has to be accepted that the period of administration is continuing.

One example is where distributing shares in accordance with legatees' fractional entitlements to residue would result in one legatee receiving a majority shareholding whilst the other legatees would only receive minority holdings. Because of the disparity in values between majority and minority holdings it may be necessary for the personal representatives to apply the rule from *Lloyd's Bank v Duker and others* [1987] 3 All ER Ch D 193. This would require them to sell these shares rather than distributing them in specie.

The period of administration would continue in such a case until the shares were sold and the CGT liability arising to the personal representatives was quantified. The rule referred to above is of fairly limited application. The fact that a majority shareholding would be broken into minority holdings on distribution should not be accepted as preventing distribution of shares and thus the ending of the period of administration. Nor should minor valuation differences between minority shareholdings passing to the legatees be accepted as covered by the rule in the *Duker* case.

The period of administration may also be extended where the distribution of the estate is being challenged. The personal representatives may be unable to distribute the estate pending the outcome of litigation.

**CG30720 Confusion over terminology** [Jul 2019]

Even where ascertainment of residue marks the end of the administration period for CGT purposes, assets may remain in the hands of the personal

representatives after that date. They may have to carry out administrative acts regarding transfer of assets to legatees. In some cases they may sell assets. If so they will be doing this as bare trustees for the legatees. Personal representatives and their agents sometimes regard these acts as forming part of the period of administration. This may lead to confusion when references are made to the period of administration.

Because of the possible confusion it is important to establish precisely what is meant when a reference is made to a period of administration. From HMRC's side we can try to avoid this confusion for the majority of cases by referring to events as falling before or after residue has been ascertained rather than simply referring to the period of administration.

**CG30780 Necessary to establish if residue ascertained** [Jul 2019]

There are a number of circumstances where it is important to establish whether residue has been ascertained, see CG30700, because it significantly affects the amount of CGT payable. Depending on the circumstances, the personal representatives and legatees may be arguing for residue having been ascertained at an early date or, less commonly, at a late date.

**CG30781 Early date** [Jul 2019]

If there is a will the personal representatives and legatees may claim that administration has ceased and residue has been ascertained at an early date if:

- the legatees would be liable at a lower rate of CGT than the personal representatives on the disposal of assets in the estate
- have any unused annual exemption that could be used to cover the gains
- the legatee is a charity and any gain on the disposal would be exempt.

You will only see claims under the first two bullet points in cases of intestacy as a charity will not qualify as a legatee under the rules of intestacy.

Applying the rule that assets remain vested in the personal representatives until residue has been ascertained unless specific steps have been taken to vest the assets in advance of ascertainment of residue usually defeats unwarranted claims in this area.

**CG30790 Late date** [Jul 2019]

There may be cases where it will be to the taxpayers' advantage to argue that there has been an extended period of administration. For example, there may be a small advantage if the personal representatives have any unused annual exempt amount and the legatee doesn't or the personal representatives may have unused losses that will be lost.

Unless it is an exceptional case where there are good reasons for accepting that the period of administration must be extended beyond the date residue is ascertained, see CG30710, you should seek the full facts to enable you to determine when residue became ascertainable. You should then argue that the beneficial ownership of the assets vested in the legatees at that date. As stated in CG30700 the attitude of the Courts is to look for an interpretation that allows administration to be completed at an early date.

*Unquantified debts*

One claim that is sometimes met is that there is an unquantified debt preventing

residue being ascertained. This may not be sufficient to prevent the administration period being treated as at an end. Such a situation was considered in *IRC v Aubrey Smith* 15 TC 661. Lord Hanworth commented at page 674

‘For my own part I think the question of a mortgage debt or any other debt must take its proper place in perspective. It may be in some cases that that is a factor from which a strong inference may be drawn. It may be on the other hand that the device of leaving a debt unpaid is resorted to in order to pretend that the residue of the estate has not been ascertained and is not ascertainable.

If such a device were resorted to in any case it ought to be held ineffective’. When a Solicitor or other professional person is employed by the personal representatives to deal with the administration of the estate, his or her fees will be one of the estate’s debts. Sometimes when personal representatives wish to extend the period of administration they arrange that the Solicitor, etc, does not submit a bill in respect of at least some part of his or her fees. They then argue that this has prevented ascertainment of residue and has caused the period of administration to be extended. Any such claim should be resisted on the basis of the above quotation. It should be contended that the information to quantify the bill must be in the Solicitor’s records and that administration should therefore be considered to have ended.

#### **CG30800 How residue is ascertained** [Jul 2019]

In order to ascertain residue the personal representatives must identify all the assets and liabilities of the estate. They then need to quantify these.

In the case of taxation liabilities this process will start with settling any Income Tax and CGT liabilities to the date of death. If any income arises to the personal representatives or if they realise any chargeable gains during the period of administration they will also need to agree their own liabilities for this period. As far as Inheritance Tax is concerned the personal representatives will need to inform HMRC - Trusts and Estates IHT whether any liability arises and if so in what amount. As part of the process of seeking a grant of probate or letters of administration (or, in Scotland, a confirmation) the personal representatives have to supply HMRC - Trusts and Estates IHT with a provisional computation of the Inheritance Tax due. HMRC - Trusts and Estates IHT will review this and, where necessary, check valuations. When the amount, if any, of Inheritance Tax payable has been quantified HMRC - Trusts and Estates IHT will issue clearance. We would not normally accept that residue had been ascertained at a date before the date of issue of a clearance. See IHTM05001+ for detailed guidance on the Inheritance Tax procedures.

#### **CG30810 Providing funds** [Jul 2019]

When the assets and liabilities have been quantified the personal representatives have to consider how they can pay

- the estate’s liabilities and
- any pecuniary legacies provided for in the will.

If they do not have sufficient liquid funds they will have to sell assets in order to raise funds. Occasionally they may agree with legatees entitled to pecuniary legacies that the legatee should accept an asset in satisfaction or part satisfaction

of the pecuniary legacy.

Disposing of assets may give rise to further CGT liabilities which have to be agreed before residue can be ascertained.

Residue is only ascertained when the personal representatives have both established the net worth of the estate and provided the liquid funds to pay liabilities and pecuniary legacies. Once that point is reached residue is ascertained and it is irrelevant that the assets have not been distributed.

Administration is normally completed on approval of final estate accounts, unless the executors postpone making final accounts for some non-estate reason (eg to obtain a tax advantage); or if they decide not to produce final accounts (eg if they decide not to bother).

An application for an IHT certificate of discharge may have the effect of extending the administration period, which may be advantageous.<sup>11</sup>

### 84.2.1 *Executor's year*

Section 44 AEA 1925 provides:

...a personal representative is not bound to distribute the estate of the deceased before the expiration of one year from the death.

The CG Manual provides:

#### **CG30820 Executor's year** [Jul 2019]

[The Manual refers to s.44 AEA 1925 and continues:] This is commonly referred to as the executor's year.

When dealing with a dispute about whether a disposal was by personal representatives in that capacity or in their capacity as bare trustees for legatees we would not normally contend that the disposal was on behalf of the legatees if it took place during the executor's year.

Although personal representatives cannot be compelled to distribute assets during the executor's year there is no bar to them doing so. In a simple estate they may have ascertained residue well before the year ends. If there is evidence that they have done and have then distributed assets to the legatees we can accept that the liability relating to disposals during that year but after the date assets were distributed does lie with legatees.

#### *Scotland*

In Scotland the rule is that the personal representatives are entitled to

---

<sup>11</sup> See 119.15.10 (Informal IHT clearance).

distribute the estate after six months from the deceased's death if they have provided funds for payment of all the estate debts and made reasonable enquiries for claims.

### 84.2.2 *Importance of assent*

PRs transfer assets to beneficiaries by means of an “assent”. The assent is fundamental:

- (1) A sale after an assent to a non-resident or a remittance basis taxpayer may in broad terms be free of CGT and a sale before assent may not.
- (2) Conversely a sale by non-resident PRs or PRs with losses may be CGT free and a sale after an asset may be taxable.

An assent of land in England and Wales must be in writing. An assent of other property may be oral or implied by conduct. No formal written assent is required if (say) shares are simply transferred to the name of a beneficiary by stock transfer form. If shares are registered in the names of PRs (or their nominees), and the legatee wants them to be sold, it may be administratively convenient if an assent is made under which the PRs (or their nominees) become nominees for the legatee. Then the shares can be sold without CGT (assuming a non-resident legatee or if the remittance basis applies) without the formality of a transfer of legal title to the legatee.

### **84.3 PRs: Meaning for CGT/IT/CT**

Section 1119 CTA 2010/s.989 ITA provide the same definition. For the purposes of the Corporation Tax/Income Tax Acts:

“personal representatives”, in relation to a person who has died, means—

- (a) in the UK, persons responsible for administering the estate of the deceased, and
- (b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.

Section 288 TCGA incorporates this definition for CGT:

“personal representatives” has the same meaning as in the Corporation Tax Acts (see section 1119 of CTA 2010);

So the same definition applies for CGT/IT/CT.<sup>12</sup> This might be regarded as a commonsense definition.

## 84.4 Residence of PRs for CGT

PRs are a distinct taxable unit for CGT.<sup>13</sup>

Section 62(3) TCGA provides:

- In relation to property forming part of the estate of a deceased person
- [a] the PRs shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the PRs), and
  - [b] that body shall be treated as having the deceased's residence and domicile at the date of death.

Section 62(3)[a] is similar to the distinct-person fiction which applies to trustees.<sup>14</sup> The minor differences in wording<sup>15</sup> do not seem significant.

The definition of PRs' residence for CGT is different from the definition for IT.<sup>16</sup>

The residence and domicile of the PRs in their private capacity is irrelevant.

The reference to domicile is otiose, as there are no provisions where the domicile of PRs matters for CGT purposes; though there have been such provisions in the past.

## 84.5 Acquisition by PRs

### 84.5.1 *Rebasing on death*

Section 62(1) TCGA provides:

- For the purposes of this Act the assets of which a deceased person was competent to dispose—
- (a) shall be deemed to be acquired on his death by
    - [i] the personal representatives or

---

12 But there is a different definition for IHT: see 119.2 (Meaning of "PRs" for IHT).

13 See 6.3 (Trustees a distinct person).

14 See 6.3 (Trustees a distinct person).

15 Trustees are treated as a single person; PRs are treated as a single and continuing body of persons.

16 See 85.3 (Residence of PRs for IT).

- [ii] other person on whom they devolve<sup>17</sup>  
for a consideration equal to their market value at the date of the death...

I refer to this as “**CGT rebasing on death**”; the terms “uplift/forgiveness on death” are also used.

Rebasing will also nullify a capital loss, although losses are less common, given that gains/losses are calculated without regard to inflation; and there may be scope for tax planning to avoid this.<sup>18</sup>

#### 84.5.2 *No disposal by deceased*

Section 62(1) TCGA provides:

For the purposes of this Act the assets of which a deceased person was competent to dispose ...

- (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

#### 84.5.3 *Competent to dispose*

Section .62(10) TCGA defines the expression “assets of which a deceased person was competent to dispose”:

In this section references to assets of which a deceased person was competent to dispose

- [a] are references to assets of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will, assuming that

- [i] all the assets were situated in England and,
- [ii] if he was not domiciled in the UK, that he was domiciled in England,

- [b] and include references to his severable share in any assets to which, immediately before his death, he was beneficially entitled as a joint tenant.

#### 84.5.4 *Legatee given share of assets*

The CG manual provides:

---

17 See 84.14 (Succession under foreign law).

18 See 61.12.2 (Unrealised loss at death).

**CG31140: acquisitions by legatees** [Jul 2019]

... Where a single asset passes to a legatee this is straightforward. Where divisible assets such as a holding of shares have to be shared out amongst legatees or where legatees become joint owners of an indivisible asset such as land, the acquisition cost of each legatee's share is an appropriate fraction of the market value of the holding or asset acquired by the personal representatives, see CG74244.

**Example**

On 31 December 2013 personal representatives acquire the deceased's shareholding of 600 shares in a company. This represents a 60% holding in that company and is valued at £60,000 or £100 per share. On the date of death a holding of 200 shares or 20% of the company would have been valued at £2,000 or £10 per share.

When residue is ascertained each of the three legatees receives 200 shares from the personal representatives. They are each treated as having an acquisition cost of one-third of £60,000 (the personal representatives acquisition value). Their acquisition cost is thus £20,000 not the value of £2,000 that would have been placed on a 20% shareholding.

In addition the personal representatives acquire the sole ownership of a parcel of land. This is valued at £100,000 at the date of death. On this date a 50% interest in the land would have been valued at £45,000.

When residue is ascertained two legatees become equal joint owners of the land. They are each treated as having an acquisition cost of one-half  $\times$  £100,000 (the personal representatives acquisition cost). Their acquisition cost is thus £50,000 for their 50% interest not the value of £45,000 that would otherwise have been placed on such a holding at the date of death.

**84.5.5 *Rebasing on death: Planning***

CGT rebasing on death allows CGT avoidance which HMRC regard as acceptable, or at least, effective. The GAAR guidance provides two examples. This does not directly concern the themes of this book, but I discuss it as it sheds light on tax planning involving inter-spouse transfers, discussed elsewhere.

The first example concerns an inter-spouse gift made four months before death:

**D19 Gifts between spouses: Mr and Mrs Jones**

*This example is intended to illustrate standard tax planning on gifts between spouses.*

**D19.1 Background**

D19.1.1 This example considers the CGT position on an arrangement involving a gift of shares between spouses, followed by death of the transferee.

**D19.2 The facts**

D19.2.1 In January 2012 Mr and Mrs J are told that Mrs J is terminally ill.

In February Mr J gives his shares in an investment company,<sup>19</sup> which are standing at a significant gain, to his wife.

Under the terms of her Will as drafted at the date of the gift he will inherit those shares when she dies. Mrs J has full capacity at the time of the gift.

D19.2.2 Mrs J dies in June and the shares pass to Mr J under the terms of her Will.

Mrs J has not executed a new Will since the gift.<sup>20</sup> ...

**D19.4 The taxpayer's tax analysis**

D19.4.1 The gift of the shares is a transfer between a husband and wife who are living together. This transaction is treated by s58 TCGA 1992 as taking place for such consideration as will give rise to neither a gain nor a loss.

D19.5 All the assets of the deceased which pass to his or her personal representatives are deemed to have been acquired by them at market value at the date of death under s62(1)(b) TCGA 1992. When beneficial ownership of any asset of the estate passes from the personal representatives to a legatee, s62(4)(a) TCGA 1992 provides that no chargeable gain shall accrue to the personal representatives.

D19.5.1 In summary, there is no chargeable gain on the gift of shares by Mr J to Mrs J and Mr J re-acquires the shares at market value at the date of his wife's death. In effect, the gain that has accrued during the earlier ownership of shares by Mr J has disappeared.

**D19.6 What is the GAAR analysis under s.207(2) FA 2013?**

D19.6.1 The main purpose of the arrangement is to obtain a tax

---

19 The nature of the company is not significant. Perhaps the point is that the company does not qualify for BPR, but nothing much follows from that.

20 It can hardly make a difference if Mrs J changes her existing will (under which, we are told, the shares return to Mr J).

advantage. The gift of shares was made by Mr J in the hope of washing<sup>21</sup> out the gains on the understanding that his wife would leave them back to him.

*D19.6.2 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?*

Yes. The principle of s58 TCGA 1992 is to allow assets to be transferred between spouses and between civil partners on the basis of no gain/no loss.

Assets passing on death to personal representatives are treated as taking place at market value and no gain is charged when the assets are passed to the legatees.

*D19.6.3 Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The means of achieving the tax results depend upon the gift, the death of Mrs J and her choosing to leave the shares to Mr J in her Will. There are no abnormal or contrived steps here; the transactions are normal arrangements between spouses or civil partners.

*D19.6.4 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

No.

*D19.6.5 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

Yes. HMRC sets out in its instruction manuals how these transactions are to be treated for CGT purposes.<sup>22</sup>

### **D19.7 Conclusion**

D19.7.1 These arrangements can reasonably be regarded as a reasonable course of action in relation to the tax provisions having regard to all the circumstances. The GAAR would not apply.

In the second example the gift is made on the day of death:

***D19.8 An alternative arrangement - What if the facts were the same as those above but the gift of shares was made on the day of Mrs J's death?***

D19.8.1 HMRC's view is that so long as Mrs J was in full capacity at

21 I would hesitate to use the term "wash", but the GAAR guidance uses it in an apparently neutral non-pejorative sense.

22 Is this correct? The guidance does not give a Manual reference. As far as I am aware, the avoidance scheme is not considered anywhere in the CG Manual.

the time of the gift the analysis would be the same and that the GAAR would not apply. This assumes of course that the gift was validly completed prior to death.

The GAAR analysis is shallow. Guidance to the opposite effect in example 1 would read no less convincingly, and the acceptance of the scheme in the second example is surprising, at least at first glance. But if the first example is right, and the second is GAARable, it would be impossible to see where to draw the line between them. An advantage of the GAAR guidance view is that there is no need to draw that line.

Border demarcation issues still arise. For instance:

- (1) If one accepts that the GAAR does apply in the case a gift to a spouse with no legal capacity made the day before the death, what about a gift made (say) four months before the death? Or 12 months? Or if the will made provision to a child, but either the property qualified for BPR or else there was an IoV back to Mr J?
- (2) The example assumes that Mrs J has an extant will in favour of Mr J. What if she did not, but made a new Will?
- (3) What if there was a sale to Mrs J with the purchase price left outstanding (in which case the terms of the will would not matter much)?

Some commentators say that experienced advisers approaching the question ‘Is this arrangement abusive?’ with an open mind “are likely to be able to reach a reasonably accurate assessment of the answer”.<sup>23</sup> Readers who grapple with these issues may find it hard to agree. But perhaps it depends on the nuance one gives to the word “likely”.

In practice perhaps this planning does not happen much, but I wonder about that. Some empirical research would be needed to find the answer.

#### 84.5.6 *Rebasing on death: Critique*

Some commentators call for the abolition of CGT rebasing on death. Thus the IFS:

This is highly distortionary: it encourages people to hold on to assets

---

<sup>23</sup> For instance, Jolyon Maugham QC in his blog:

<http://waitingfortax.com/2014/11/14/a-gaar-specific-penalties-regime-some-policy-choices-taxnerdery/> (2014).

that have risen in value, even if in the absence of tax considerations they would prefer to sell them and use the proceeds in some other way. It also encourages people to buy assets that yield returns in the form of capital gains rather than income and to convert income into capital gains where possible, in order to escape income tax. There is a strong case for getting rid of this relief.<sup>24</sup>

The usual answer to the abolitionists is that this would give rise to double taxation: CGT and IHT on death.<sup>25</sup> That response is emotively and politically effective; though it is not true economic double taxation.

OTS suggest replacing rebasing on death with a no gain/no loss transfer in situations where an IHT exemption applies. There is logic in that; though the proposal is the opposite of simplification.<sup>26</sup>

The law which allows the planning discussed above is hardly satisfactory. Assuming CGT rebasing on death remains, the solution, it seems to me, is to abolish the CGT spouse exemption. It might usefully be replaced by hold-over relief on divorce, where CGT hold-over relief *is* needed.<sup>27</sup>

## 84.6 Rebasing on death of life tenant

---

24 IFS Green Budget: October 2018 <https://www.ifs.org.uk/publications/13508>

25 More radically, abolition of IHT and imposition of CGT on death would be a simplification. See Kessler, “The Quest for Fair Inheritance Taxation of Trusts” (2015)

<https://www.kessler.co.uk/wp-content/uploads/2014/08/Kessler-The-Quest-for-Fair-Inheritance-Taxation-of-Trusts.pdf>

OTS briefly float the idea, without conclusions: OTS, “Inheritance Tax Review – second report: Simplifying the design of Inheritance Tax” (July 2019) para 4.5ff. estimating a £1.6 billion loss to HMRC. It is a pity that the opportunity was lost to consider the point in depth.

26 OTS, “Inheritance Tax Review – second report: Simplifying the design of Inheritance Tax” (July 2019) para 4.27 ff. OTS ducks the technical challenges (“The government would need to consider how this could be done in a way which minimised valuation complexities where assets are only partially exempt from Inheritance Tax.”)

<https://www.gov.uk/government/publications/ots-inheritance-tax-review-simplifying-the-design-of-the-tax>

27 The professional bodies have lobbied unsuccessfully for this over the decades. The CGT spouse exemption is not usually applicable on a divorce (because that exemption applies only in a year where spouses are living together; and by the time of the transfer, cohabitation is likely to have ceased).

Although not strictly relating to the *estate* of a deceased person, this is a convenient place to consider the similar rebasing which applies on the death of a life tenant with an estate IIP. The drafting is clumsy, no doubt in part for historical reasons. The rules are set out in s.72/73 depending on whether the trust terminates/continues. It is convenient to consider these side by side:

**s.72(1) TCGA (trust terminates)**

**s.73(1) TCGA (trust continues)**

<p>On the termination, on the death of the person entitled to it, of an interest in possession in all or any part of settled property</p>	<p>Where, by virtue of section 71(1),<sup>28</sup> the assets forming part of any settled property are deemed to be disposed of and reacquired by the trustee on the occasion when a person becomes (or would but for a disability become) absolutely entitled thereto as against the trustee, then, if that occasion is the death of a person entitled to an interest in possession in the settled property</p>
<p>(a) the whole or a corresponding part of each of the assets forming part of the settled property and not ceasing at that time to be settled property shall be deemed for the purposes of this Act at that time to be disposed of and immediately reacquired by the trustee for a consideration equal to the whole or a corresponding part of the market value of the asset; but</p>	
<p>(b) no chargeable gain shall accrue on that disposal...</p>	<p>(a) no chargeable gain shall accrue on the disposal ...</p>

Section 72(1A)/73(2A) restrict rebasing to estate interests in possession:

---

28 See 53.20.5 (Disposal on trust termination).

<p>(1A) Where the interest in possession mentioned in subsection (1) above is one to which the person becomes entitled on or after 22nd March 2006, the first sentence of that subsection applies in relation to that interest only if</p> <p>(a) immediately before the person's death, the interest falls within subsection (1B) below, or</p> <p>(b) the person dies under the age of 18 years and, immediately before the person's death, section 71D of the Inheritance Tax Act 1984 (age 18-to-25 trusts) applies to the property in which the interest subsists.</p>	<p>(2A) Where the interest in possession referred to in subsection (1) above is one to which the person becomes entitled on or after 22nd March 2006, subsections (1) and (2) above apply in relation to that interest only if</p> <p>(a) immediately before the person's death, the interest falls within section 72(1B), or</p> <p>(b) [identical]</p>
---	--

Section 72(1B) TCGA (which applies for both s.72/73) provides the standard concept of (what I call) an estate IIP:

- (1B) An interest falls within this subsection if
- (a) the interest is
    - (i) an immediate post-death interest, within the meaning given by section 49A of the Inheritance Tax Act 1984,
    - (ii) a transitional serial interest, within the meaning given by section 49B of that Act, or
    - (iii) a disabled person's interest, within the meaning given by section 89B of that Act, or
  - (b) section 71A of that Act (trusts for bereaved minors) applies to the property in which the interest subsists.

#### 84.6.1 *Rules applicable to s.72 & s.73*

Section 73(3) TCGA provides:

The last sentence of subsection (1) of section 72 and subsections (3) to (6) of that section shall apply for the purposes of this section as they apply for the purposes of section 72(1).

These provisions of s.72 are therefore apply equally to s.72/73. Section 72 TCGA provides:

- (1) ... For the purposes of this subsection an interest which is a right to part of the income of settled property shall be treated as an interest in a

corresponding part of the settled property.

Next a set of rules for annuities (now never seen in practice):

(3) This section shall apply on the death of the person entitled to any annuity payable out of, or charged on, settled property or the income of settled property as it applies on the death of a person whose interest in possession in the whole or any part of settled property terminates on his death.

(4) Where, in the case of any entitlement to an annuity created by a settlement some of the settled property is appropriated by the trustees as a fund out of which the annuity is payable, and there is no right of recourse to, or to the income of, settled property not so appropriated, then without prejudice to subsection (5) below, the settled property so appropriated shall, while the annuity is payable, and on the occasion of the death of the person entitled to the annuity, be treated for the purposes of this section as being settled property under a separate settlement.

(5) If there is an interest in a part of the settled property and, where that is an interest in income, there is no right of recourse to, or to the income of, the remainder of the settled property, the part of the settled property in which the interest subsists shall while it subsists be treated for the purposes of this section as being settled property under a separate settlement.

Lastly the specialist topic of disabled person's interests:

(6) An interest which is a disabled person's interest by virtue of section 89B(1)(a) or (b) of the Inheritance Tax Act 1984 is to be treated as an interest in possession for the purposes of this section.

#### 84.6.2 *Rules applicable to s.73 only*

Section 73(1)(b) TCGA disapplies rebasing where the trust property reverts to the settlor:

if on the death the property reverts to the disponent,

- [i] the disposal and reacquisition under that subsection shall be deemed to be for such consideration as to secure that neither a gain nor a loss accrues to the trustee, and
- [ii] shall, if the trustee had first acquired the property at a date earlier than 31 March 1982, be deemed to be at that earlier date.

For completeness: s.73(1A) TCGA deals with sub-fund settlements.<sup>29</sup> But since the sub-fund regime is dead-letter law (hardly ever found in practice) the point does not matter.<sup>30</sup>

Section 73(2) TCGA deals with interests in possession in part:

Where the interest referred to in subsection (1) above is an interest in part only of the settled property to which section 71 applies, subsection (1)(a) above shall not apply but any chargeable gain accruing on the disposal shall be reduced by a proportion corresponding to that represented by the part.

#### 84.6.3 *Rule applicable to s.72 only*

For completeness: s.72 TCGA deals with the death of a life tenant where the interest continues, for instance, if A is given property for the lifetime of B (in practice this does not happen outside the textbooks):

(1C) Subsection (1A) above does not have effect in relation to the operation of subsection (1) above as applied by subsection (2) below (but see subsection (2A) below).

(2) Subsection (1) above shall apply where the person entitled to an interest in possession in all or any part of settled property dies (although the interest does not then terminate) as it applies on the termination of such an interest.

(2A) Where the interest in possession mentioned in subsection (2) above is one to which the person becomes entitled on or after 22nd March 2006

(a) subsection (2) above, and

(b) the first sentence of subsection (1) above as applied by subsection (2) above, apply in relation to that interest only if, immediately before the person's death, the interest falls within subsection (1B)(a) above.

## 84.7 **Transfer from PRs to beneficiaries**

### 84.7.1 *Transfer from PRs to legatee*

Section 62(4) TCGA provides:

---

29 “Subsection (1)(b) above shall be treated as having effect in relation to a sub-fund settlement if the property does not revert to the trustees of the principal settlement in relation to that sub-fund settlement by reason only that  
 (a) a sub-fund election is or has been made in respect of another sub-fund of the principal settlement, and  
 (b) the property becomes comprised in that other sub-fund settlement on the death of the person entitled to the interest in possession.”

30 See 59.2 (Sub-fund regime).

- On a person acquiring any asset as legatee (as defined in section 64)—
- (a) no chargeable gain shall accrue to the personal representatives, and
  - (b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.

### 84.7.2 “Legatee”

The question whether a person acquires as legatee matters for 3 CGT purposes:

- (1) There is no disposal by PRs<sup>31</sup>
- (2) A legatee has relief on a disposal of a debt acquired as legatee<sup>32</sup>
- (3) PRs expenditure is deductible in computing the legatee's gain on a disposal by the legatee.<sup>33</sup>

Section 64(2) TCGA provides:

In this Act, unless the context otherwise requires, “legatee” includes [a] any person taking under a testamentary disposition or on an intestacy or partial intestacy, whether he takes beneficially or as trustee ...

Note this is an inclusive definition.

The definition is for the purposes of the TCGA, but similar wording is used elsewhere.

### 84.7.3 *Gift in anticipation of death*

Section 64(2) TCGA provides:

---

31 See 84.7.1 (Transfer from PRs to legatee).

32 Section 251 TCGA.

33 Section 64(1) TCGA provides:

“In the case of a gain accruing to a person on the disposal of, or of a right or interest in or over, an asset held by another person as trustee, or as a personal representative of a deceased person, to which he became absolutely entitled as legatee or as against the trustee—

- (a) any expenditure within section 38(2) incurred by him in relation to the transfer of the asset to him by the personal representative or trustee, and
- (b) any such expenditure incurred in relation to the transfer of the asset by the personal representative or trustee,

shall be allowable as a deduction in the computation of the gain accruing to that person on the disposal.”

In this Act, unless the context otherwise requires, “legatee” includes ...  
 [b] a person taking under a donatio mortis causa [gift in anticipation of death] shall be treated (except for the purposes of section 62) as a legatee and his acquisition as made at the time of the donor’s death.

Gift in anticipation of death is a specialist topic, as the arcane Latin tag suggests, but it does arise from time to time and also has some role in tax planning.<sup>34</sup>

The CG Manual provides:

**CG30400: Donatio Mortis Causa [Jul 2019]**

**Definition**

A donatio mortis causa is a gift made in contemplation of the death of the donor which is intended to take effect only if the donor dies. If the donor recovers from his or her illness, etc., or if the donee dies first, then the gift is to have no effect i.e. it is void. If the gift is made in contemplation of death, it is presumed to be a donatio mortis causa even if the donor does not say that the gift is intended to be conditional on death occurring.

Since the individual has given away these assets before his or her death, he or she is not able to dispose of them by will. They are therefore not ‘assets of which the deceased was competent to dispose’.

**No gain /loss**

For Capital Gains Tax purposes the practical effects of a donatio mortis causa are very similar to those for assets transferred on death. However the legislation arrives at this result in a different way. Instead of deeming there to be no disposal of the asset by the deceased, the legislation in TCGA92/S62 (5) says that no chargeable gain accrues to the person making the disposal. As allowable losses are to be computed in exactly the same way as gains, TCGA92/S16 (1), it also follows that no loss is allowable in respect of such a gift.

**Position of donee**

As TCGA92/S62 (5) merely removes the charge on the donee this means that for all other purposes the transfer by donatio mortis causa, being a gift, takes place at market value, TCGA92/S17 (1). Accordingly the donee is deemed to have acquired the asset at market value.

**Donee: spouses or civil partners**

---

34 See 64.5 (OIG charge on death).

Where a gift is made from one spouse or from one civil partner to the other, normally TCGA92/S58 (1) would say that the disposal should occur at such a figure as to give rise to no gain/no loss and TCGA92/S17 (1) would not apply. However, in the case of a donatio mortis causa this rule is disapplied by TCGA92/S58 (2). Thus all gifts by way of donatio mortis causa are dealt with in the same way.

**Acquisition date for donee**

A person acquiring an asset under a donatio mortis causa is treated as acquiring the asset at the time of the donor’s death, TCGA92/S64 (2). In view of this the market value at which the asset is acquired is the market value at the date of death

**CG31130: recipient under Donatio Mortis Causa is legatee** [Dec 2018]

A person who receives a gift by way of donatio mortis causa, see CG30500+, is to be treated as a legatee for some limited purposes (TCGA92/S64 (2)). The person is not to be treated as a legatee for any of the purposes of TCGA92/S62 but is to be so treated for all other purposes of the Capital Gains Tax Acts. In particular this means that the provisions in TCGA92/S64 (1) allowing a deduction to a legatee for the cost of transferring an asset to that legatee, see CG31190, are to apply to such a recipient.

84.7.4 *Appropriation to legatee*

Section 64(3) TCGA provides:

- [a] For the purposes of the definition of “legatee” above, and of any reference in this Act to a person acquiring an asset “as legatee”,
- [b] property taken under a testamentary disposition or on an intestacy or partial intestacy includes
- [c] any asset appropriated by the personal representatives in or towards satisfaction of
  - [i] a pecuniary legacy or
  - [ii] any other interest or share in the property devolving under the disposition or intestacy.

In particular, if PRs appropriate assets in satisfaction of a pecuniary legacy, the beneficiary acquires as legatee. This is so even if the

appropriation needs the consent of the beneficiary.<sup>35</sup>

If the PRs had no power of appropriation, then an “appropriation” could be authorised only on the basis that it was in fact a sale of the asset to a beneficiary coupled with payment of the legacy by way of set-off. In that case, the beneficiary may acquire as purchaser and not as legatee. In practice, PRs do generally have a power of appropriation,<sup>36</sup> so the issue does not often arise.

Further consideration is needed for foreign jurisdictions, especially civil law jurisdictions, where there may be no PRs in the UK law sense.<sup>37</sup>

Suppose:

- (1) Under a civil law jurisdiction property passes on death to A and B in equal shares. A and B take as legatees.
- (2) A and B then enter into a succession or partition agreement under which A takes some property and B takes other property (of equal value).

That agreement does not constitute a disposal for CGT purposes. *Warrington v Brown* concerned a division of land between co-owners, a partition agreement. This was held not to constitute a disposal for CGT

35 Although for stamp duty purposes the transfer of the asset to a legatee constitutes a conveyance on sale, if the consent of the legatee is required: *Jopling v IRC* [1940] 2 KB 282.

For completeness: CCAB Statement June 1967 provided:

“The Revenue stated that in their view [TCGA s.62(4)] does not apply in all cases where assets are transferred to beneficiaries in specie. Where assets are appointed by personal representatives to satisfy a legacy in circumstances where such appropriation requires the legatee’s consent, ie where the personal representatives do not have (whether by the terms of the will or under the Administration of Estates Act 1925 s.41) powers of appropriation without consent, the Revenue are advised that the acquisition of the asset has a contractual basis and is not strictly an acquisition qua legatee. In practice, however, the disposal of appropriated assets by the personal representatives to a legatee in these circumstances is not treated as an occasion of charge on the personal representatives provided that both they and the legatee agree that the legatee should be treated as acquiring the assets concerned as legatee for the purposes of [TCGA s.62(4)].”

This was written before the enactment of what is now s.64(3) TCGA in 1969. This brought the law into line with what was formerly HMRC practice. So the CCAB Statement is obsolete.

36 Section 41 Administration of Estates Act 1925.

37 See 84.14 (Succession under foreign law).

purposes:

Their interests in the mass precisely reflect the individual interests which they had before the deed was entered into. ... one looks at the mass and not at the individual case in transactions such as the present, where property was put into a pool, and where that result is reached (that the interests in the mass precisely reflect the individual interests before the [division] deed was entered into) there is for capital gains tax purposes no disposal.<sup>38</sup>

The reader may regard this as a surprising decision, but it is long established, not judicially doubted, and should be followed at least up to the level of the Court of Appeal. It should follow that A and B acquire their separate assets as legatees.

#### 84.7.5 *Trustee as legatee*

CG Manual provides:

**CG31110: who is a legatee: trustee as legatee** [Jul 2019]

If a trust is created by the will or intestacy and does actually come into existence then the trustees of that trust are legatees in precisely the same way as, for example, an individual taking an absolute interest in an asset. This is confirmed by TCGA92/S64 (2). As a result the personal representatives are not liable to Capital Gains Tax for disposals after assets have vested in the trustees, see CG30760, and the trustees acquire the assets at market value, see CG31140.

#### 84.7.6 *Trust ends during admin period*

CG Manual provides:

**CG31110: who is a legatee: trustee as legatee** [Jul 2019]

...

When assets pass to the remainderman of the will trust when it comes to an end, the remainderman does not receive the assets from the trust as legatee of the will but as a beneficiary of the trust. The transfer is therefore not exempted by reason of TCGA92/S62 (4), see CG31140. Unless any other exemption applies there will be a chargeable gain on the trustees at that time by reason of TCGA92/S71 (1), see CG37100+.

---

38 Also called *Jenkins v Brown* 62 TC 226 at p.252.

This is in contrast to the position when a will or intestacy sets out to create a life interest trust but the life tenant dies during the period of administration. In those circumstances no trust over specific assets ever comes into existence. The remainderman of the trust becomes the legatee under the will in place of the trustee. When the assets vest they vest directly in that remainderman. Accordingly the remainderman takes as legatee, there is no Capital Gains Tax charge at that time and the remainderman's acquisition cost is the market value at the date of death.

#### 84.7.7 *Executors appoint to beneficiary*

Where executors exercise a power to appoint trust property to a beneficiary, that beneficiary takes under the appointment "as legatee". This follows from the trust law principle that, for the purposes of the rules relating to perpetuities, where trustees exercise a power of appointment, the deed of appointment is read back into the original trust instrument. It is treated as coming into operation at the date of the instrument that creates the power.<sup>39</sup>

Quite apart from that, the beneficiary would take as "legatee" in the general sense of the expression. The definition in s.64(2) is inclusive and not a comprehensive definition. The reason that the beneficiaries take as legatee is that they acquire under an assent. They acquire from the PRs acting in their capacity as PRs.

This conclusion is consistent with the general scheme of the TCGA. A person who acquires under an appropriation acquires "as legatee". It would be anomalous if a person who acquired under an appointment would not.<sup>40</sup>

HMRC agree. CG Manual provides:

#### **CG31430 power to appoint** [Jul 2019]

Where a deceased person's will directs that when assets of the estate vest they are to be held on trust, then the terms of that trust specified in the will may empower the trustees to appoint assets out of the trust to legatees. This is frequently because IHTA84/S144 (see IHTM35181) in specified cases treats the appointment, provided it is made within 2 years of death, for all IHT purposes as if it had been made in the will.

---

<sup>39</sup> See App.4.7.5 (Trust appointment: Filling blanks).

<sup>40</sup> A power of appropriation is sometimes regarded as a dispositive power: *Re Freeston* [1978] Ch 741, though I would not regard that as essential to the argument.

There is no corresponding provision for CGT.

The assets will normally vest in the trustees on the ascertainment of residue, see CG30940+. But, occasionally, specific steps may be taken to vest assets in will trustees in advance of residue being ascertained see CG30900+. Where the trustees exercise their powers of appointment AFTER the assets have vested then the assets concerned will already have passed out of the estate and into the hands of the trustees. In these circumstances the exercise of the power of appointment so that a beneficiary becomes absolutely entitled amounts to a disposal for CGT purposes.

Where the trustees exercise their powers of appointment before the assets have vested in them then the assets are still in the hands of the personal representatives at the time of the exercise. Even though these may be the same individuals as the trustees they are different bodies of persons for CGT purposes, see CG31110+. If, in these circumstances, the trustees make an appointment under the specific powers given to them in the will, then when the asset(s) vest they should be treated as passing direct to the appointee.

The asset(s) appointed should be treated as never becoming subject to the trust. In effect, the appointment is read back into the will. It is treated as though the deceased had intended the assets concerned to pass directly to the legatee rather than into trust. The appointee then takes those asset(s) as legatee and therefore acquires the asset(s) at probate value by reason of TCGA92/S62 (4), see CG31140+. The time limits and procedures in TCGA92/S62(6) and (7) do not apply to this treatment.

#### 84.7.8 *Beneficiary pays for asset*

The CG Manual provides:

**CG31175: payments by legatees to PRs [Jul 2019]**

If an estate has insufficient liquid assets to pay its liabilities and a legatee wishes to receive a particular asset rather than it being sold on the open market by the personal representatives the legatee may agree with the personal representatives that he will provide them with sufficient funds to settle the estate's liabilities in return for them transferring the asset to him. Such an arrangement was considered in the case of *Passant v Jackson*, 59 TC 230. The Appeal Court held that the arrangement was a sale of the property. So in any case involving a similar arrangement it should not be accepted that there was merely a

transfer of an asset to a legatee under cover of TCGA92/S64 (4).

#### 84.7.9 *Transfer to will trust*

If the will appoints non-resident trustees, the PRs may transfer the assets to the trustees without a CGT charge.

If the will appoints UK resident trustees, the PRs may transfer the assets to the trustees but the trust will be within the charge to CGT. If non-resident trustees are subsequently appointed, there will in principle be an exit charge.

It should normally be possible to arrange that:

- (1) The PRs appoint that the assets are to be transferred to trustees of a new non-resident trust.
- (2) The PRs then transfer the assets to the non-resident trustees.

As long as this is done during the administration of the estate, the assets may then become held in a non-resident trust without a charge to CGT.

### 84.8 Deceased not UK resident

If the deceased was not UK resident at the time of their death (regardless of domicile) the PRs are in general outside the scope of CGT.<sup>41</sup>

#### 84.8.1 *Is estate a “settlement” for s.87*

Is a deceased’s estate a “settlement” for the purposes of s.87? The question matters, because if an estate were a “settlement” then:

- (1) Gains accruing to non-resident PRs would be s.1(3) amounts (trust gains) for the purposes of s.87 TCGA; so
- (2) Capital payments from the PRs to UK resident beneficiaries would in principle be subject to tax under s.87; and
- (3) If the will created a will trust, or made a gift to a lifetime trust, unmatched s.1(3) amounts of the PRs might be transferred to the trust on completion of the administration of the estate.<sup>42</sup>

The word “settlement” is used with different definitions; in the

---

<sup>41</sup> See 53.4.3 (Territorial scope).

<sup>42</sup> See 57.39 (Transfer between trusts). It might be said that s.90 TCGA does not apply because PRs do not “transfer” assets to beneficiaries. But if it is right that an estate is not a “settlement” for s.87, this issue does not arise.

terminology of this book:

- (1) The “**standard IT/CGT definition**” (a classic settlement)
- (2) The “**settlement-arrangement**” definition<sup>43</sup>

An estate is not a settlement in the standard IT/CGT sense. If the will creates a will trust, a settlement in the standard IT/CGT sense comes into existence when the administration is complete (or if property is transferred to the trustees sooner).<sup>44</sup> However, s.97(7) TCGA provides the settlement-arrangement definition,<sup>45</sup> so the question is whether an estate may be a settlement-arrangement.

In *IRC v Buchanan* 37 TC 366 at p.374, Lord Goddard said:

I do not think for a minute that a will of a testator comes within section 20<sup>46</sup> at all; it is not a settlement to which the Act applies.

Lord Goddard did not actually say that a will is not a settlement-arrangement but if that is what he meant, the comment was *obiter* and surprising. One might have thought that an estate is a “settlement” in the sense of “arrangement”. There is an element of bounty in that the deceased decides who should benefit (or by not making a will, decides that the intestacy rules should apply). However, Lord Goddard’s comment was loyally followed.<sup>47</sup> Accordingly CG Manual is right to provide:

**CG14590 Connected persons: Trustees** [Jul 2019]

... a will trust cannot be a Settlement for these purposes [for the purposes of the settlement-arrangement definition].

For this reason an estate is not a “settlement” within s.87.

This is in fact the sensible result. The scheme of s.87 is designed with trusts in mind and would not work well if extended to estates:

- (1) Suppose a will left legacies to (UK resident) legatees, and the residue on trust (“the will trust”). It would be odd if the legatees were subject to CGT under s.87 by reference to gains accruing to the estate, or,

43 See 1.2.1 (Terminology) and 1.5 (Settlement-arrangement definition of “settlement”).

44 See 94.3 (Will trust or intestacy).

45 This provides: “settlement” has the meaning given by s.620 of ITTOIA.

46 Section 20 FA 1943, the predecessor of s.644 ITTOIA.

47 *Willingale v Islington Green Investment* 48 TC 547 at p.556. (The point was not argued on appeal.)

subsequently, to the will trust. But that would (almost<sup>48</sup>) necessarily follow, if the estate were a settlement-arrangement.

- (2) Suppose a testator left their estate for such of their children as attain the age of 30, and one child reaches that age before death, or during the period of administration. The executors would transfer half of the estate to the older child and (on completion of administration) hold the other half on trust for the younger child until it reached the vesting age. It would be odd if the older child were subject to CGT under s.87 by reference to gains accruing to estate, or to the younger child's will trust fund.

I have considered one possible argument to the contrary. Section 87(6) TCGA provides:

For the purposes of this section a settlement arising under a will or intestacy shall be treated as made by the testator or intestate at the time of death.<sup>49</sup>

This wording does *not* deem an estate to be a settlement for s.87 purposes. The wording makes sense if one reads it in the context of original s.87 provisions, in the FA 1981. At that time, “settlement” was not expressly defined; for s.87 purposes (what I call) the standard IT/CGT definition applied. So in 1981 it was clear that an estate was not a settlement, and that a will trust was a settlement. However there would be doubt as to who was the settlor of the will trust, and when that settlement was made. These matters are resolved by (what is now) s.87(6).<sup>50</sup> The provision is still needed: the identity of the settlor and domicile at the time of making the settlement are still relevant for s.87, though the relevance is now for transitional relief only.

Another effect of s.87(6) now is to make it clear that a will trust is a settlement for the purposes of s.87.

---

48 A possible way to avoid this unsatisfactory result might be to say that assent of a legacy is not a “capital payment”; but that is a stretch, given the definition that payment includes the transfer of an asset.

49 The wording was previously in s.97(7) TCGA but moved in the 2006 reforms.

50 The same thinking is found in the drafting of Article 1 Trusts (Jersey) Law 1984: “‘settlor’ means a person who provides trust property or makes a testamentary disposition on trust or to a trust”.

### 84.8.2 *Non-resident testator: Planning*

The estate of a non-resident testator is in principle a CGT free vehicle.

In principle, it would be desirable to arrange that gains accrue to PRs during the period of administration, and not to beneficiaries subsequently. If the PRs transfer assets to UK residents who sell the assets, the gain on the disposal is chargeable in full or on the remittance basis. If the PRs transfer assets to non-resident trustees, who sell the assets, the gain is a s.1(3) amount (trust gain). If the will creates a will trust, the trust comes into the scope of s.87 when administration of the estate is completed (or when property is transferred to the trust, if sooner).

By contrast, assets with losses should be transferred to beneficiaries of the estate *in specie*.

It may also be desirable to extend the administration period as long as possible.

If a will creates a will trust, it may be desirable that capital payments are made by the PRs, during the period of administration, not by trustees subsequently. If the trust fund is entirely distributed, no settlement ever comes into existence and s.87 does not operate.

Suppose:

- (1) A will creates a discretionary will trust.
- (2) The PRs exercise their powers<sup>51</sup> to make a distribution to a beneficiary during the administration period.

There is (at the time) no settlement and no s.87 charge. After the completion of administration, the capital payment is not matched to future s.1(3) amounts (trust gains) of the trust. It is considered that s.87(6) TCGA does not retrospectively alter the position. That is not the purpose of the deeming provision.

The position is different if:

- (1) A will makes a gift to a separate trust (“the lifetime trust”).
- (2) The trustees of the lifetime trust exercise their powers to direct the PRs to make a distribution to a beneficiary during the administration period.

That is a capital payment from the trustees of the lifetime trust, which can

---

<sup>51</sup> It is assumed that the PRs have power to do this.

be matched to trust gains of the lifetime trust and so give rise to a s.87 charge on the beneficiary. An Instrument of Variation may be appropriate.

## **84.9 Non-resident co held by non-resident PRs**

Suppose:

- (1) PRs hold a non-resident company.
- (2) The company disposes of an asset and realises a gain, which I call “the company gain”.

### 84.9.1 *Position of company and PRs*

The company is in principle not subject to tax on the company gain because it is not UK resident.

The PRs are participators. But if they are not UK resident, they are not treated as if the company gain had accrued to them. The condition in s.3(2)(a)(b) TCGA is not satisfied.

### 84.9.2 *Position of legatee*

Assume that under the terms of the will the shares pass to a legatee. Is it possible that the legatee should be treated as if the company gain accrued to the legatee, so that:

- (1) a UK resident legatee would be subject to tax on the gain under s.3(2)(a) TCGA; or
- (2) a non-resident trust legatee would be treated as receiving a s.1(3) amount (trust gain) under s.3(2)(b) TCGA?

### 84.9.3 *Legatee during administration*

The first question is whether, at the time the gain accrues to the company (while the estate is still in the course of administration) the legatee is a participator. Section 3B(1) TCGA provides:

“Participator” has the meaning given by section 454 of CTA 2010.”

A legatee is a participator under this definition.<sup>52</sup>

However s.3(3) TCGA (identifying the part of the chargeable gain which is deemed to accrue to the participator) provides:

---

<sup>52</sup> See 99.23.8 (PRs and beneficiaries of estates).

The proportion of the amount of the gain to be apportioned to each person corresponds to the extent of the person's *interest* in the company as a participator or indirect participator.

Residuary<sup>53</sup> beneficiaries of an estate have no legal or equitable interest in the assets of the estate.<sup>54</sup> They have the right to enforce its proper administration but that right is not properly described as an “interest” in the assets. It is therefore considered that during the period of administration the legatee does not have an “interest” as a participator.<sup>55</sup> Thus it does not matter that they are participators because nothing can be attributed to them under s.3.

The context can show that the word “interest” is to be understood in a loose or non-technical sense, in which case it might include the rights of a beneficiary of an estate. But there is no reason here to say the word is used loosely or non-technically. My conclusion is supported by the fact that it is not clear what would be the “just and reasonable” apportionment of the gain as between UK resident PRs and legatees. Also if the will creates a will trust, the trust does not come into existence until completion of the administration of the estate.

#### 84.9.4 *Legatee on transfer of shares*

That is not the end of the matter. Normally, on the completion of the administration of the estate the PRs will transfer the shares to the legatee. What is the position of the legatee then?

The legatee is treated as having acquired the shares on the death.<sup>56</sup> Does this apply for the purposes of s.3 TCGA, so the legatee is retrospectively

---

53 There is however no difference between residuary beneficiaries and specific legatees. The origin of the principle that a residuary legatee has no “interest” in the estate is historical: until the mid 19th century, estates were administered in the ecclesiastical courts and not the Chancery courts. That reasoning would apply to a specific legatee as to a residuary legatee.

54 See 84.1 (Succession law background).

55 See *Willingale v Islington Green Investment* 48 TC 547 at p.562D.

Section 3B(2) TCGA provides: “Any reference to a person's interest as a participator in a company is to the interest in it represented by all the factors by reference to which the person is a participator.” This does not turn a legatee's right into an “interest” if it is not already an interest.

56 See 84.7.1 (Transfer from PRs to legatee).

treated as if the company gain accrued to them?

I first consider the position of a residuary legatee, and consider a specific legatee separately below. For a residuary legatee, it is the old question of how far one carries the deeming.<sup>57</sup> In principle, one carries the deeming all the way and retrospectivity would then follow. However, several difficulties then arise:

- (1) Suppose the PRs were UK resident. They would have been taxed in the first instance on the company gain under s.3 TCGA. There is nothing to give them relief on their subsequently transferring the shares to a legatee. (Section 62(4)(b) TCGA states that the *legatee* shall be treated as if the PRs acquisition had been theirs. It makes no comment about the position of the PRs. Relief might perhaps be implied, but the approach of the House of Lords in *R v Dimsey & Allen* suggests that it should not.)
- (2) Another problem would arise if the PRs receive a dividend from the company, before distributing the shares to the legatee. The legatee would receive the shares but the company at that time may no longer hold funds representing the gain, so it would not be fair that the company gain should be treated as accruing to the legatee. Company distribution relief<sup>58</sup> would not work properly.
- (3) There would be an anomalous distinction between:
  - (a) an assent of the shares (s.3 applies to the legatee); and
  - (b) sale (or liquidation) of the company and assent of the proceeds to the legatee (s.3 TCGA does not apply).

For these reasons it is suggested that the deeming of s.62(4)(b) TCGA does not extend to deem the legatee to receive the company gains under s.3. This construction is also consistent with the limited view of the deeming provision taken in *Marshall v Kerr* 67 TC 56.

The arguments are more finely balanced in the case of a specific legacy. In that case, the assent operates retrospectively, as a matter of general law, at least, unless the assent otherwise provides.<sup>59</sup> But it would be anomalous if there were a distinction between a specific legatee and a residuary

---

57 See App 7.1 (Construction of deeming provisions).

58 See 60.21 (s.3 distribution relief).

59 See 85.5 (Income from specific legacy).

legatee, and it is suggested that no distinction should be drawn between the two cases.

### **84.10 Capital payment from co in estate**

Suppose:

- (1) An estate holds shares in a non-resident company.<sup>60</sup>
- (2) Under the will, the shares are pass to a non-resident trust (“the lifetime trust”).
- (3) The company makes a capital payment to a beneficiary. This may happen, for instance, if an interest free loan is left outstanding.

The capital payment may be provided directly or indirectly by the lifetime trust, in which case it is potentially subject to tax under s.87 like any other capital payment.

If that is not the case, the capital payment may be deemed to be provided by the lifetime trust, under s.96(1) TCGA.<sup>61</sup> That will be the case if the company is “controlled” by the trustees, in the defined sense.

### **84.11 Deceased UK resident**

If the deceased was UK resident and domiciled, the PRs are UK resident and domiciled, and so subject to CGT on all chargeable gains (less losses).

#### *84.11.1 Deceased UK resident non-dom*

Suppose at the time of death the deceased was UK resident but foreign domiciled. The PRs are treated as UK resident but not UK domiciled. CG Manual provides:

**CG30660 Remittance basis not in administration period [Jul 2019]**

If the deceased was resident but not domiciled in the UK before his or her death, then on disposing of assets outside the UK he or she would have benefited from the application of the remittance basis in s.12 TCGA ... . Although the PRs have the same residence and domicile status as the deceased had, if they realise chargeable gains from disposals of assets situated outside the UK but do not remit those gains to the UK immediately they cannot benefit from this treatment. This is

---

60 Similar issues could arise for a UK resident company, but in practice a payment from such a company is less likely to be a capital payment.

61 See 57.10 (Payment from close co: s.96(1)).

because the remittance basis applies only to individuals but s.65(2) says that the body of PRs is not to be treated as an individual.

At first sight this seems surprising, but on reflection, it is not absurd to draw a distinction between:

- (1) a UK resident foreign domiciled individual, taxed on the remittance basis, and
- (2) the PRs of that individual, taxed on an arising basis.

A remittance basis makes less sense for PRs whose role is generally short term.<sup>62</sup>

Of course, if the PRs are actually outside the UK, especially if they are outside the EU, HMRC may not, in practice, be able to recover the tax.

DTR is in principle available to treaty non-resident PRs, which may solve this problem.

#### **84.12 CGT planning for UK PRs**

If PRs sell assets in the period of administration, then any gain will be subject to CGT, even though the net proceeds of sale will in due course pass to a remittance basis taxpayer. If, by contrast, PRs transfer an asset *in specie* to a legatee, then the PRs will not realise any chargeable gain but the base cost of the recipient beneficiary will be that of the PRs.<sup>63</sup> Where the legatee is a remittance basis taxpayer (or a non-UK resident, or a charity), they will often be able to dispose of the asset free of CGT.

It is thus a fundamental principle of CGT planning that PRs should generally avoid, wherever possible, making disposals of assets which pass under the will to remittance basis taxpayers, non-residents or charities, if a gain (less losses) arises on the disposal.

Suppose that a remittance basis taxpayer is entitled to a pecuniary legacy of £1m under a will. The estate holds a foreign situate asset which had a

---

<sup>62</sup> It was formerly argued that the HMRC view is wrong. The argument was largely based on the supposed anomalous position of PRs. Following the 2008 reforms, the anomalies work the other way (for if the remittance basis applied, it would be anomalous that PRs did not pay the remittance basis claim charge). The argument would require the word “individual” in para 1 sch 1 TCGA to include PRs, which is contrary to general statutory usage. So I do not think the argument now merits serious attention (but readers can find further discussion in the 2008/09 edition of this work).

<sup>63</sup> See 84.7 (Transfer from PRs to beneficiaries).

value of £600k at the date of the death of the deceased and which is now worth £1m. If the PRs sell the asset in order to pay the legacy, they will be liable to CGT. This liability can be avoided by the PRs agreeing to transfer the property to the legatee in satisfaction of their pecuniary legacy.

Suppose the PRs inherit an asset belonging to the deceased which is the subject matter of a specific gift in their will; that they then sell the asset, the sale giving rise to a charge to CGT, and that they subsequently transfer the whole or part of the proceeds of sale to the specific legatee.<sup>64</sup> So if there is such a sale, the PRs bear the CGT and transferring the proceeds of sale to the remittance basis taxpayer does not confer any exemption.

It may be necessary to sell some assets to pay liabilities of the PRs, and it may be that the assets available for sale will give rise to a chargeable gain.

One solution is as follows:

- (1) The PRs transfer the asset to the beneficiary subject to a charge for their liabilities under s.36(10) Administration of Estates Act 1925.
- (2) The beneficiary then sells the asset: any gain on the sale accrues to the beneficiary: s.26(2) TCGA.
- (3) Under the charge the proceeds are used to pay the PRs' liability.

These principles are confirmed, if confirmation is needed, in *McLaughlin v HMRC*<sup>65</sup> where a marketed tax avoidance scheme involved bringing in a nondom beneficiary artificially. This survived a technical challenge; and (on its facts rather surprisingly) a *Ramsay*/realistic view challenge.

### 84.13 CGT planning by IoV

Where there is more than one residuary legatee and some are remittance basis taxpayers, non-residents or charities, it would often make sense for

---

<sup>64</sup> Income tax sometimes applies the common law doctrine of relation back; see 85.5 (Income from specific legacy). But this does not apply here. This doctrine would operate only where an asset owned by the deceased is subsequently transferred to the legatee. In any case, the express provisions of the TCGA deal so comprehensively with the situation that any application of the doctrine of relation back to CGT is by necessary implication excluded.

<sup>65</sup> [2012] UKFTT 174 (TC). The artificial planning in this case would now be caught by the GAAR.

assets with inherent capital gains to be transferred to them rather than to UK resident and domiciled individuals. This can often be done by means of an appropriation under s.41 Administration of Estates Act 1925, but (depending on the terms of the will) an instrument of variation may be necessary. The variation must be made within two years of the death of the deceased.

In principle, the approach should be to redirect foreign assets of the estate with inherent capital gains to the remittance basis taxpayer. UK resident and domiciled beneficiaries would instead receive cash or assets without inherent gains. The remittance basis taxpayer might in due course realise the gains free of tax. There would be an overall tax saving, which could be shared between the remittance basis taxpayer and the other beneficiaries by negotiation, or which could be allowed to accrue entirely to the remittance basis taxpayer if the other beneficiaries were so minded.

#### **84.14 Succession under foreign law**

Further consideration is needed if the succession is governed by a foreign law. Section 62(1) TCGA provides:

For the purposes of this Act the assets of which a deceased person was competent to dispose—

- (a) shall be deemed to be acquired on his death by the personal representatives *or other person on whom they devolve* for a consideration equal to their market value at the date of the death...<sup>66</sup>

In civil law jurisdictions, property devolves directly on the beneficiary without the intervention of PRs during an administration period. *Bentley v Pike* concerned the position under German law (the deceased died intestate owning a share of land in Germany). The evidence showed:

... the principle of *Universalsukzession* ... means that on the death of a person, his or her entire property passes immediately and automatically to his or her heirs. ... No distinction is made between movable and immovable property: on the death of the deceased person both types of property are automatically and without any interval in time or any further outward action of any kind vested in the heirs, whoever they may be, no

---

<sup>66</sup> See 84.5 (Acquisition by PRs).

matter whether they are known or whether it is necessary to take steps to ascertain their identity.<sup>67</sup>

In these circumstances, the ownership of the property passed to the beneficiary immediately on the death. The gain on the sale of the property after the death therefore accrued to the beneficiary, and not to the German (rough) equivalent of PRs.

However the position may be fact sensitive, and one should not assume that all civil law jurisdictions are the same. In Quebec, the executor's right of *saisine* [seizin, ie, possession] has priority over the legatee, and income and gains during the administration period accrue to the executor, not the legatee,<sup>68</sup> so it seems that for UK tax purposes, gains should be regarded as accruing to PRs and not the legatee.

## CHAPTER EIGHTY FIVE

# ESTATES OF DECEASED PERSONS: INCOME TAX

### 85.1 Income taxation of estates

#### *Cross references*

The following topics are considered elsewhere:

84.1 (Succession law background)

### **85.1 Income taxation of estates**

This chapter considers the income taxation of personal representatives and beneficiaries of estates of deceased persons. A full discussion needs a book to itself. I try to focus on matters closest to the themes of this book, but that can only be done in the context of a more general discussion of the rules.

I do not consider the equivalent provisions applicable for corporation tax which would apply to corporate beneficiaries.

### **85.2 Meaning of “PRs” for IT**

The same commonsense definition of PRs applies for IT/CGT/CT; it is discussed at 84.3 (PRs: meaning for CGT/IT/CT).

There is no rule for IT purposes that PRs are a single and continuing body distinct from the persons who are actually the PRs.<sup>1</sup> This is anomalous, for that rule applies to PRs for CGT<sup>2</sup> and a similar rule applies to trustees for both taxes. It is suggested that there should be a rule.

---

1 For completeness: there is a rule for the purposes of the transactions in land code, see s.517P(4) ITA.

2 See 84.4 (Residence of PRs for CGT).

However it may be implied<sup>3</sup> and it will not often matter.

### 85.3 Residence of PRs for IT

One must identify the PR's actual place of residence in their personal capacities, applying the statutory residence test to PRs who are individuals,<sup>4</sup> and the corporate residence test to corporate PRs.

PRs are UK resident for income tax if they are all UK resident in their personal capacity. They are non-resident if they are all non-resident in their personal capacity. HMRC agree. Form SA906 (Notes) 2020 (Notes on Trust and Estate Non-Residence 2019/20) provides:

***Deciding the personal representatives' residence status for Income Tax purposes***

You can find out the personal representatives' residence status for Income Tax purposes by working through questions 4 to 6.

4. Were **all** the personal representatives resident in the UK for the year to 5 April 2019?

If 'Yes', the personal representatives as a whole are resident in the UK for Income Tax purposes. Tick box 6.1 of the 'Trust and Estate Non-residence' pages [Resident in the UK for Income Tax purposes]. Go to question 7.

If 'No', go to question 5.

5. Were **all** the personal representatives not resident in the UK for the year to 5 April 2019?

If 'Yes', the personal representatives as a whole are not resident in the UK for Income Tax purposes. Tick box 6.2 of the 'Trust and Estate Non-residence' pages [Not resident in the UK for Income Tax purposes]. Please also complete boxes 6.7 to 6.12 as appropriate. Go to question 7.

If 'No', go to question 6 [mixed resident PRs].<sup>5</sup>

The position where an estate has both resident and non-resident PRs is governed by s.834 ITA:

(1) This section applies for income tax purposes if the personal representatives of a deceased person ("D") include one or more persons

---

3 See 99.23.8 (PRs and beneficiaries of estate).

4 See 5.3.1 (SRT: Application to trustees/PRs).

5 <https://www.gov.uk/government/publications/self-assessment-trust-and-estate-non-residence-sa906>

who are UK resident and one or more persons who are non-UK resident.

(2) If the following condition is met, the person or persons who are non-UK resident are treated, in their capacity as personal representatives, as UK resident.

(3) The condition is that when D died D was UK resident or domiciled<sup>6</sup> in the UK.

(4) If that condition is not met, the person or persons who are UK resident are treated, in their capacity as personal representatives, as non-UK resident.

Thus it is possible to arrange that PRs are not UK resident for income tax purposes. All of the PRs must be non-resident in their private capacities, (except in the case of a non-resident non-domiciled testator where only one PR need be non-resident).

There are no statutory rules for domicile, but the domicile of PRs does not matter for IT purposes.

The definition of PRs' residence is different for CGT.<sup>7</sup>

There is a transitional rule for death before 6 April 2013.<sup>8</sup>

## **85.4 Income taxation of PRs**

PRs are "persons" and so pay income tax at the basic rate (or dividend ordinary rate) on the income of the estate if:

- (1) the PRs are UK resident, or
- (2) the income has a UK source.

Until 2016/17 that liability was usually be covered by deduction at source (or a tax credit), but that is no longer the case. PRs do not qualify for personal allowance or a dividend allowance or a savings rate band. HMRC provide a somewhat miserly exemption for interest up to £100 tax (equivalent to £500 interest).

We announced in our April 2016 newsletter the introduction of interim

---

6 Section 834(5) ITA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (3)." This is the standard wording to apply the deemed domicile rules.

7 See 84.4 (Residence of PRs for CGT).

8 I discussed this in the 2021/22 edition of this work para 85.3.1 (Death before 2013) but omit the discussion now as the issue will not often arise.

arrangements regarding trustee returns, returns for estates in administration and payments made under informal arrangement. These arrangements only applied for the tax year 2016 to 2017 and did not require notification from trustees or personal representatives dealing with estates in administration where the only source of income was savings interest and the tax liability was below £100.

We're now extending these interim arrangements to tax years 2017 to 2018 and 2018 to 2019 and will continue to review the situation longer term.<sup>9</sup>

#### 85.4.1 *Foreign domiciled testator*

Form SA906 (Notes) 2019 (Notes on Trust and Estate Non-Residence 2018/19) provides under the heading “Personal representatives: application to Income Tax”:

[1] If the personal representatives are resident in the UK, their taxable income will depend on the domicile of the deceased, whose estate is being administered, at the date of death.

[2] If the deceased was domiciled in the UK, then the personal representatives will be taxable in the normal way on both UK and overseas income.

[3] If the deceased was domiciled outside the UK, they will be taxable only on UK income. In such circumstances, do not include overseas income. Please also tick box 6.6 of the 'Trust and Estate Non-residence' pages.<sup>10</sup>

Point [3] is not right as a matter of law. UK resident PRs are as a matter of law liable to income tax on foreign income regardless of the domicile of the deceased. (Domicile of the deceased is sometimes relevant to the separate question of whether PRs are UK resident, but it is possible for a foreign domiciled deceased to have UK resident PRs.)

One is nevertheless entitled (perhaps bound) to assume that HMRC

---

9 HMRC, Trusts and Estates Newsletter (December 2017)

<https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters/hmrc-trusts-and-estates-newsletter-december-2017>

10 <https://www.gov.uk/government/publications/self-assessment-trust-and-estate-non-residence-sa906> The reference is to box 6.6 in form SA906 (Trust and Estate Non-Residence) which reads: “Tick box 6.6 if the deceased whose estate is being administered was domiciled outside the UK at the date of death”.

mean what they say, in a document as formal as guidance notes to a tax return, unless it is clear that there has been a blunder, that is, if it is clear that they cannot mean what they say. HMRC clearly do mean what they say as they say it more than once and have said it for many years.<sup>11</sup>

There is therefore an informal concessionary practice. A concession is logical where the beneficiary of the estate is non-resident since income tax paid on foreign income would be reclaimed later when the income is paid to the beneficiary. The concession does raise a puzzle where the beneficiary is UK resident and the income is paid to the beneficiary: one might think that the foreign income should not be taken into account in computing the beneficiary's estate income, but that must be too good to be true. I think the effect of the concession should be to treat the PRs as non-resident for IT purposes and that should be followed through for payments made by the PRs (who therefore constitute a foreign estate). Thus a payment of the income to a UK resident beneficiary is taxable under the estate income regime, but a payment to a non-resident (or treaty non-resident) is not.

### **85.5 Income from specific legacy**

This section considers the position where a testator by their Will gives specific assets to a beneficiary.

In the first instance, the PRs will acquire the assets and they will receive the income arising from them. If they do not need to use the assets or income for the purpose of paying debts, taxes, etc., the PRs will in due course transfer the assets and income to the beneficiary (the formal legal terminology is that the PRs “assent to the vesting of the assets in the beneficiary”).

In the first instance, the PRs usually pay tax at the basic rate (or dividend ordinary rate) on income arising from the assets. If the PRs asset and its income vesting in the beneficiary, something rather peculiar happens. The beneficiary is deemed to have been the owner of the asset since the death. The assent is said to “relate back” - that is, it operates retrospectively. For personal property this is a common law rule; for land, it is in s.36

---

11 The point has been made in the equivalent notes going back at least to the 2005 notes. Similar wording is found in form SA904 (Notes) (Notes on Trust and Estate Foreign 2019/20) under the heading “Special circumstances – personal representatives.”

Administration of Estates Act 1925 which provides:

- (1) A personal representative may assent to the vesting, in any person who (whether by devise, bequest, devolution, appropriation or otherwise) may be entitled thereto, either beneficially or as a trustee or personal representative, of any estate or interest in real estate to which the testator or intestate was entitled ....
- (2) The assent shall operate to vest in that person the estate or interest to which the assent relates, and, unless a contrary intention appears, the assent shall relate back to the death of the deceased.

This rule operates for income tax purposes: *IRC v Hawley* 13 TC 327. The beneficiary will, retrospectively, be treated as having received the income year by year as it arose and the PRs will be treated as if they had not received it. The PRs may have paid UK tax. This will retrospectively be treated as being paid by the PRs on behalf of the beneficiary. Thus a beneficiary who is a remittance basis taxpayer can reclaim tax paid by UK resident PRs on unremitted foreign income. A non-resident beneficiary can also reclaim tax (it is not necessary to rely on ESC A14).

TSE Manual provides:

**7490 Beneficiaries of estates: legacies** [Aug 2019]

**Tax rules for specific legacies.**

A legacy may take the form of an asset that does not produce income – for example a picture or a piece of jewellery. The beneficiary does not receive income and has no tax liability in respect of the legacy.

Other assets can produce income – for example a bank account, shareholding or land. The general rule is that the beneficiary is entitled to the income arising to that asset from the death of the deceased person. Sometimes however the personal representatives may by law be entitled to use the income for some other purpose.

If the beneficiary gets the income it should be treated as his income for the year in which it arises. The authority for this is *IRC v Hawley* 13 TC 327. The beneficiary cannot however be taxed on or given repayment on income that he did not receive.

## **85.6 Income from residuary estate**

### *85.6.1 Background law*

During the period of administration, the PRs alone are entitled to the assets in the residue of the estate and its income. On completion of the

administration, the residuary legatee becomes entitled to the assets which at that time form part of the estate, and any income which the PRs have not expended in the course of administration. It is possible for PRs to transfer specific assets to a beneficiary before completion of administration.

### 85.6.2 History

In order to appreciate the income tax law it is helpful to understand its history. In *R v Special Commissioners, ex p. Dr Barnado's Homes* 7 TC 646, the residuary legatee was a charity. Income arose to the PRs during the period of administration on which the PRs paid income tax. The residuary legatee was not entitled to the income of the residuary estate as it arose during the period of administration, so it could not at that time reclaim income tax paid. Instead it sought to recover the tax when it actually received the income, on completion of administration. The House of Lords held that although the sum received by the charity represented (or was derived from) the PR's income, it was received by the charity as a capital receipt (like accumulated income of a trust). The payment on the completion of administration did not operate retrospectively, the PR's income could not be treated as arising to the residuary legatee. So income tax paid by the PRs could not be recovered by the charity. The rule that an assent of a specific legacy relates back to death was not extended to gifts of residue. The reader may think that the charity had the better argument.<sup>12</sup> But that is now of academic interest: the law is settled.

That was a victory for the Revenue, who were no doubt unperturbed about the unfairness to the charity. But subsequently, predictably, individual residuary legatees successfully contended that they were not liable to super-tax (which became surtax in 1927 and is now higher rate tax) on the income of a residuary estate arising during the administration period.<sup>13</sup> The Revenue then realised they had made a rod for their own

---

12 See Nitikman, "The Forgotten Law of Assent" *Trusts & Trustees*, Vol. 18, No. 7, August 2012, p.672. Perhaps the House of Lords was motivated by the (unmentioned) policy argument that any other decision would be inconvenient to the point of unworkable in practice. If so they were right, as the tax rules which have replaced their decision do not work: see 85.22 (Income tax of estates: Critique).

13 eg *Corbett v IRC* 21 TC 449. There are several income tax cases on the issue of whether administration was completed.

back. Legislation was therefore brought in which is now to be found in Chapter 6 Part 5 ITTOIA.

## **85.7 Types of interest in residue**

The legislation distinguishes absolute/limited/discretionary interests in residue.

### *85.7.1 Absolute interest in residue*

Section 650(1) ITTOIA provides a fairly commonsense definition:

A person has an absolute interest in the whole or part of the residue of an estate for the purposes of this Chapter if—

- (a) the capital of the residue or that part is properly payable to the person, or
- (b) it would be so payable, if the residue had been ascertained.

### *85.7.2 Limited interest in residue*

Section 650(2) ITTOIA provides a fairly commonsense definition:

A person has a limited interest in the whole or part of the residue of an estate during any period for the purposes of this Chapter if—

- (a) the person does not have an absolute interest in it, and
- (b) the income from it would be properly payable to the person if the residue had been ascertained at the beginning of that period.

In practice the usual example of a limited interest is a life interest.

### *85.7.3 Discretionary interest in residue*

Section 650(3) ITTOIA provides a fairly commonsense definition:

A person has a discretionary interest in the whole or part of the residue of an estate for the purposes of this Chapter if—

- (a) a discretion may be exercised in the person's favour, and
- (b) on its exercise in the person's favour any of the income of the residue during the whole or part of the administration period (see section 653) would be properly payable to the person if the residue had been ascertained at the beginning of that period.

Section 650(4), (6) ITTOIA defines “properly payable” and s.650(5) deals with the situation where PRs have an interest in another estate.

## **85.8 “UK estate” and “foreign estate”**

The legislation distinguishes “UK estates” and “foreign estates”. The distinction matters for two purposes:

- (1) Computation of the basic amount.
- (2) Source of income (relevant to remittance basis taxpayers and non-residents).

These terms are defined in s.651(1) ITTOIA:

“UK estate”, in relation to a tax year, means an estate<sup>14</sup> which meets conditions A and B, or condition C, for that year, and  
“foreign estate”, in relation to a tax year, means an estate which is not a UK estate in relation to that year.

I refer below to “**estate conditions A to C**”. Unfortunately these conditions are in a tangle.

An estate may be a UK estate in one year and a foreign estate in another year. The question must be addressed each year.

#### 85.8.1 *Estate conditions A and B*

Section 651 ITTOIA provides:

- (2) Condition A is that all the income of the estate either—
  - (a) has borne UK income tax by deduction, or
  - (b) is income in respect of which the personal representatives are directly assessable to UK income tax for the tax year.
- (3) Condition B is that none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident.

#### 85.8.2 *Disregarded income and estate condition C*

Section 651(4) ITTOIA provides:

For the purposes of conditions A and B sums within section 680(3) or (4) (sums treated as bearing tax) are ignored.

The list of disregards in s.680 ITTOIA is as follows:

---

14 Section 649(2) ITTOIA provides a commonsense definition of “estate”:

In this Chapter—

“estate” means the estate of a deceased person (whether a UK estate or a foreign estate).

(3) The following sums are treated as bearing income tax at the dividend ordinary rate—

- (a) a sum charged under Chapter 3 of Part 4 (dividends etc. from UK resident companies etc.), or
- (b) a sum that is part of the aggregate income of the estate because of falling within—
  - (i) section 664(2)(c) (stock dividends), or
  - (ii) section 664(2)(d) (release of loan to participator in close company where debt due from personal representatives).

(4) A sum that is part of the aggregate income of the estate because of falling within section 664(2)(e) (gains from life insurance contracts etc) is treated as bearing income tax at the basic rate.

It is convenient to have a term to describe these categories of income, so I call it “**disregarded income**”.

Why is this income disregarded? Prior to 1996, s.233(1) ICTA 1988 (repealed) provided:

*Where in any year of assessment the income of any person, not being a company resident in the UK, includes a distribution in respect of which that person is not entitled to a tax credit*

- (a) *no assessment shall be made on that person in respect of income tax at the basic rate on the amount or value of the distribution*

...

Thus non-resident PRs who received dividend income would not be assessable and so would count as a foreign estate.

Section 651(5) ITTOIA provides:

Condition C is that the aggregate income of the estate for the tax year consists only of sums within section 680(3) or (4).

### 85.8.3 Examples

If the PRs are UK resident:

- (1) Estate condition A is satisfied (the PRs are directly assessable to IT).
- (2) Estate condition B is satisfied<sup>15</sup>

---

<sup>15</sup> It takes more than one reading to comprehend the triple negative in condition B (the source legislation was clearer before the ITTOIA rewrite). Suppose PRs are not UK resident and receive foreign source income. The position is that condition B is not

so the estate is a UK estate.

If the PRs are UK resident but the testator was foreign domiciled, it appears that the estate is by concession treated as a foreign estate.<sup>16</sup>

If the PRs are non-resident, and have some foreign source income:

- (1) Estate condition A is not satisfied (some of the PR's income is not taxable).
- (2) It does not matter whether estate condition B is satisfied
- (3) Estate condition C is not satisfied

so the estate is not a UK estate.

If the PRs are non-resident but have only UK source taxable income,

- (1) estate condition A is satisfied (they are assessable)
- (2) Estate condition B is satisfied (no foreign income) so the estate is a UK estate.

If the PRs are non resident and have some UK income which qualifies for exemption (eg gilts) the estate is a foreign estate.

It is easy to procure that an estate with non-resident PRs qualifies as a "foreign estate" by arranging that there is some foreign income or FOTRA securities.

## **85.9 Other definitions**

### **85.9.1 "Payment"**

The legislation uses the word "payment" but (like "capital payment" for s.87) this is widely defined. Section 681 ITTOIA provides:

- (1) For the purposes of this Chapter—
  - (a) a transfer of assets, or
  - (b) the appropriation of assets by personal representatives to

---

satisfied because:

- (1) The PRs are not liable to IT on that income
- (2) The reason they are not liable is that they are not UK resident: had they been UK resident, they would have been liable.
- (3) Thus it is not the case that "none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident".

The same applies if non resident PRs receive income from FOTRA securities.

<sup>16</sup> See 85.4.1 (Foreign domiciled testator).

themselves,

is treated as the payment of an amount equal to the assets' value at the date of transfer or appropriation.

(2) The set off or release of a debt is treated for the purposes of this Chapter as the payment of an amount equal to it.

(3) If at the end of the administration period—

(a) there is an obligation to transfer assets to any person, or

(b) personal representatives are entitled to appropriate assets to themselves,

an amount equal to the assets' value at that time is treated as payable then for the purposes of this Chapter.

(4) If at the end of the administration period—

(a) there is an obligation to release or set off a debt owed by any person, or

(b) personal representatives are entitled to release or set off a debt in their own favour,

a sum equal to the debt is treated as payable then for the purposes of this Chapter.

### 85.9.2 “Administration period”

Section 653 ITTOIA provides:

(1) In this Chapter “the administration period”, in relation to the estate of a deceased person, means the period beginning with the deceased's death and ending with the completion of the administration of the estate.

(2) In the application of subsection (1) to Scotland, the reference to the completion of the administration is to be taken as a reference to the date at which, after discharge of, or provision for, liabilities falling to be met out of the deceased's estate, the free balance held in trust for the residuary legatees or for the persons with the right to the intestate estate has been ascertained.

This is, I think, the ordinary meaning of the term; see 84.2 (Period of administration).

### 85.9.3 “Final tax year”

Section 653(3) ITTOIA provides:

In this Chapter “the final tax year” means the tax year in which the administration period ends.

## **85.10 Charge to tax on estate income**

Beneficiaries are subject to tax on estate income. There are essentially three parts to the legislation:

- (1) The charge to tax on estate income.
- (2) The definition of when estate income arises.
- (3) The quantification of the amount of estate income.

Section 649(1) ITTOIA provides the charge to tax:

Income tax is charged on estate income.

Section 659 ITTOIA identifies the person liable:

- (1) If the estate income is from a person's absolute interest or limited interest, that person is liable for any tax charged under section 649 unless subsection (3) or (4) provides that another person is liable.
- (2) If the estate income is from a discretionary interest, the person in whose favour the discretion is exercised in making the payment in question is liable for any tax charged under section 649.

Section 659(3)(4) (not set out here) deal with successive interests.

## **85.11 Estate income**

Estate income is a label which brings in different sets of rules for the different types of interest in residue.

Section 649(2) ITTOIA provides:

- (2) In this Chapter—  
“estate income” means the income treated under this Chapter as arising from an absolute, limited or discretionary interest in the whole or part of the residue of an estate ...
- (3) Estate income is treated as income for income tax purposes.
- (4) If different parts of an estate are subject to different residuary dispositions, those parts are treated for the purposes of this Chapter as if they were separate estates.

The circumstances in which estate income is treated as arising depend on the type of interest in residue. These are set out in ss.652–655 ITTOIA. These provisions state *when* estate income is treated as arising. The question of the *amount* of estate income is addressed separately.

### **85.11.1 *When estate income arises: Absolute interest***

Section 652 ITTOIA provides:

- (1) Income is treated as arising in a tax year from a person's absolute interest in the whole or part of the residue of an estate if—
  - (a) the person has an assumed income entitlement for the tax year in respect of the interest (see sections 665 to 670), and
  - (b) condition A or B is met.
- (2) Condition A is that a payment is made in respect of the interest in the tax year and before the end of the administration period (see section 653).
- (3) Condition B is that the tax year is the final tax year (see section 653).
- (4) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

The key term here is “assumed income entitlement;” see 85.14 (Assumed income entitlement).

#### 85.11.2 *When estate income arises: Limited interest*

Section 654 ITTOIA provides:

- (1) Income is treated as arising in a tax year from a person's limited interest in the whole or part of the residue of an estate in cases A, B and C.
- (2) Case A is where—
  - (a) the interest has not ceased before the beginning of the tax year, and
  - (b) a sum is paid in respect of the interest in that year and before the end of the administration period.
- (3) Case B is where—
  - (a) the tax year is the final tax year,
  - (b) the interest has not ceased before the beginning of that year, and
  - (c) a sum remains payable in respect of the interest at the end of the administration period.
- (4) Case C is where—
  - (a) the tax year is a year before the final tax year,
  - (b) the interest ceases in the tax year, and
  - (c) a sum is paid in respect of the interest in a later tax year but before the end of the administration period, or remains payable in respect of it at the end of that period. ...
- (6) Income treated as arising as a result of this section or section 674 is estate income for the purposes of this Chapter.

### 85.11.3 *When estate income arises: Discretionary interest*

Section 655 ITTOIA provides:

- (1) Income is treated as arising in a tax year from a person's discretionary interest in the whole or part of the residue of an estate if a payment is made in the tax year in exercise of the discretion in that person's favour.
- (2) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

## **85.12 Amount of estate income**

There are two aspects to the rules: quantifying the "basic amount", and grossing up.

### 85.12.1 *UK estate*

Section 656(1) ITTOIA provides:

In the case of a UK estate, tax is charged under section 649 on the amount of estate income treated as arising in the tax year.

Section 656 defines the amount of estate income:

- (2) That amount is the basic amount of that income for the tax year (see subsection (4)) grossed up by reference to the applicable rate for that year (see section 663).
- (3) The gross amount is treated as having borne income tax at that rate.

The applicable rate is not discussed here. The key term is the "basic amount" of estate income.

### 85.12.2 *Foreign estate*

Section 657(1) ITTOIA provides:

In the case of a foreign estate, tax is charged under section 649 on the full<sup>17</sup> amount of estate income treated as arising in the tax year.

The section goes on to specify the amount:

---

<sup>17</sup> Section 657 refers to the "full amount" and s.656 refers only to the "amount", but the word "full" is clearly otiose: there is no difference in meaning.

(2) That amount depends on whether the estate income arising in the tax year is paid from sums within section 680(3) or (4) (sums treated as bearing income tax).

(3) So far as the estate income is paid from such sums, that amount is the basic amount of that income for the tax year grossed up by reference to the applicable rate for that year (see section 663).

(4) That gross amount is treated as having borne income tax at that rate.

(5) So far as the estate income is not paid from sums within section 680(3) or (4), the amount of estate income treated as arising in the tax year is the basic amount of that income for that year.

The difference between UK and foreign estates is that in the latter case there is no grossing up.

We turn at last to the key concept “basic amount”.

### **85.13 “Basic amount of estate income”**

The quantum of the “basic amount of estate income” depends on the type of interest in residue, ie whether there is an absolute, limited or discretionary interest.

#### *85.13.1 Basic amount: Absolute interest*

Section 660 ITTOIA provides:

(1) The basic amount of estate income relating to a person’s absolute interest in the whole or part of the residue of an estate for a tax year before the final tax year is the lower of—

- (a) the total of all sums paid in the tax year in respect of that interest, and
- (b) the amount of the person’s assumed income entitlement for the tax year in respect of it.

(2) The basic amount for the final tax year is equal to the amount of the person’s assumed income entitlement for that year in respect of that interest.

The next key term is “assumed income entitlement”.

#### *85.13.2 Basic amount: Limited interest*

Section 661(1) ITTOIA provides:

(1) The basic amount of estate income relating to a person’s limited interest in the whole or part of the residue of an estate for a tax year is

the total of the sums within section 654(2)(b), (3)(c) and (4)(c) for that year.

### 85.13.3 *Basic amount: Discretionary interest*

Section 662 ITTOIA provides:

The basic amount of estate income relating to a person's discretionary interest in the whole or part of the residue of an estate for a tax year is the total of the payments made in the tax year in exercise of the discretion in favour of the person.

## 85.14 **Assumed income entitlement**

The key term “assumed income entitlement” is relevant to computation of the basic amount. For absolute interests, this is (in brief) calculated as follows.

### 85.14.1 *“Aggregate income of estate”*

First one calculates the “aggregate income of the estate”. This has a broadly commonsense definition in s.664 ITTOIA:

- (1) For the purposes of this Chapter the aggregate income of the estate for a tax year is
  - [a] the total of the income and amounts specified in subsection (2), but
  - [b] excluding the income specified in subsection (5).
- (2) The income and amounts are—
  - (a) the income of the deceased's personal representatives in that capacity which is charged to UK income tax for the tax year,
  - (b) the income of the deceased's personal representatives in that capacity on which such tax would have been charged for the tax year if—
    - (i) it was income of a UK resident, and
    - (ii) it was income from a source in the UK,<sup>18</sup>

Paragraphs (c) to (e) deal with somewhat specialist topics:

- (c) any amount of income treated as arising to the personal representatives under section 410(4) (stock dividends) that would be charged to income tax under Chapter 5 of Part 4 if income

---

<sup>18</sup> I cannot see the point in (ii). If it is income of a UK resident, why does the source matter?

- arising to personal representatives were so charged (see section 411),
- (d) in a case where section 419(2) applies (release of loans to participator in close company: loans and advances to persons who die), the amount that would be charged to income tax under Chapter 6 of Part 4 apart from that section, and
  - (e) any amount that would have been treated as income of the personal representatives in that capacity under section 466 if the condition in section 466(2) had been met (gains from contracts for life insurance).

Section 664(3)(4) deal with deductions:

- (3) In calculating the amount of the income within subsection (2)(a), any allowable deductions are to be taken into account.
- (4) In calculating the amount of the income within subsection (2)(b), any deductions which would be allowable if the income had been charged to UK income tax are to be deducted from the full amount of the income actually arising in the tax year.

Section 664(5) identifies two categories of income not included in “estate income”. The first is income from specific legacies:

- (5) The excluded income is—
  - (a) income to which any person is or may become entitled under a specific disposition<sup>19</sup>

That is excluded from estate income as the income is deemed to accrue to the legatee.<sup>20</sup>

- (5) The excluded income is ...
  - (b) income from property devolving on the personal representatives otherwise than as assets for payment of the deceased’s debts.

---

19 Defined in subsection (6): “In subsection (5)(a) ‘specific disposition’ means a gift of specific property under a will, including—

- (a) the disposition of personal chattels by section 46 of the Administration of Estates Act 1925 (succession on intestacy), and
- (b) any disposition which under the law of another country has a similar effect to a gift of specific property by will under the law of England and Wales, but excluding real property included in a residuary gift made by will by a specific or general description of it or, in Scotland, heritable estate included in such a gift.”

20 See 85.5 (Income from specific legacy).

That would include property which vests in the PRs under the obsolescent settled land act regime.

### 85.14.2 “Residuary income of estate”

Armed with the figure for “the aggregate income of the estate”, one next computes “the residuary income of the estate”. This brings in rules for “allowable estate deductions”. Section 666(1) ITTOIA provides:

For the purposes of this Chapter the residuary income of an estate for a tax year is

- [1] the aggregate income of the estate for that year, less
- [2] the allowable estate deductions for that year.

This is subject to section 669 (reduction in residuary income: inheritance tax on accrued income).<sup>21</sup>

There are four categories of deductions. Section 666(2) ITTOIA provides:

The allowable estate deductions for a tax year are—

- (a) all interest paid in that year by the personal representatives in that capacity (but see section 233 of IHTA 1984: exclusion of interest on unpaid inheritance tax),
- (b) all annual payments for that year which are properly payable out of residue,<sup>22</sup>
- (c) all payments made in that year in respect of expenses incurred by the personal representatives in that capacity in the management of the assets of the estate,<sup>23</sup> and
- (d) any excess deductions from the previous tax year.<sup>24</sup>

This is subject to subsections (3) to (5).

---

21 Section 669 ITTOIA is not considered here.

22 Para (b) should be deleted, as Annual Payments are not now generally allowable; but it does no harm.

23 Section 666(5) restricts this to income expenses: “Payments in respect of expenses are only allowable estate deductions if they are properly chargeable to income (ignoring any specific direction in a will).”

24 This is defined in s.666(6):

“In this section ‘excess deductions from the previous tax year’ means so much of the allowable deductions for the previous tax year as exceeded the aggregate income of the estate for that year.”

This allows unused expenses to be carried forward.

Subsections (3)(4) prevent double allowances:

- (3) No sum is to be treated as an allowable estate deduction if it is allowable in calculating the aggregate income of the estate.
- (4) No sum is to be counted twice as an allowable estate deduction.

### 85.14.3 ‘Assumed income entitlement’

Armed with the figure for the residuary income of the estate, we are at last in a position to compute the assumed income entitlement. Section 665 ITTOIA provides:

(1) Whether a person has an assumed income entitlement for a tax year in respect of an absolute interest in the whole or part of the residue of an estate depends on the results of the following steps.

*Step 1* Find the amount of the person’s share of the residuary income of the estate that is attributable to that interest for that tax year and each previous tax year during which the person had that interest (see sections 666 to 669).

*Step 2* If the estate is a UK estate in relation to any tax year for which an amount has been found under step 1, deduct from that amount income tax on that amount at the applicable rate for that year (see section 670).

*Step 3* Add together the amounts found under step 1 after making any deductions necessary under step 2.

*Step 4* Add together the basic amounts relating to the person’s absolute interest in respect of which the person was liable for income tax for all previous tax years (or would have been so liable if the person had been a person liable for income tax for those years).

(2) For the purposes of this Chapter the person has an assumed income entitlement for the tax year if the amount resulting from step 3 exceeds the amount resulting from step 4.

(3) The assumed income entitlement is equal to the excess.

(4) [This deals with successive interests].

### 85.15 Beneficiary a discretionary trust

Section 483 ITA provides:

(1) This section applies if, during or at the end of the administration period for an estate—

- (a) the personal representatives pay the trustees of a settlement a sum

- representing<sup>25</sup> income of the personal representatives, and
- (b) if this Chapter had applied to personal representatives, income tax would have been charged on that income at the dividend trust rate or at the trust rate.
- (2) The sum is treated as—
  - (a) being paid as income, and
  - (b) having borne income tax at the applicable rate.

Lastly we have some definitions by reference (which would have been unnecessary had there been taxes-act-wide definitions):

- (3) In this section—
  - “administration period” has the meaning given by section 653 of ITTOIA 2005, and
  - “the applicable rate” means the rate referred to in section 663(1) of ITTOIA 2005 (the applicable rate for grossing up basic amounts of estate income).

The drafter has failed to incorporate the extended definition of “payment” but perhaps that may be implied.

## **85.16 Estate income remittance basis**

Section 658 ITTOIA brings in the remittance basis:

- (1) The charge to tax under section 649 on the amount of income arising in a tax year is subject to Part 8 (foreign income: special rules).
- (2) For the purposes of section 830(1) (meaning of “relevant foreign income”) amounts charged to tax under section 649—
  - (a) are treated as arising from a source outside the UK if the estate is a foreign estate, and
  - (b) are treated as not arising from such a source if the estate is a UK estate.

The section uses the words “treated as” because the income (being fictional income) does not have a source.<sup>26</sup>

If a beneficiary is a remittance basis taxpayer, it is important to ensure that the estate is a “foreign estate” and not a “UK estate” because the remittance basis only applies to a foreign estate.

---

25 See App 2.11 (“Representing assets”).

26 See 15.6 (No source/deemed source).

Since the estate income is deemed income, not real income, it cannot be remitted. There is no rule that the PRs income or the beneficiary's actual receipts are is deemed to be derived from the estate income.

### **85.17 Non-resident beneficiary of UK estate: DT relief**

International Manual provides:

#### **367510 Claims by beneficiaries of a UK estate** [Dec 2019]

A distribution made to a beneficiary of income received by a UK estate during its administration period is considered to be a source of income in its own right.<sup>27</sup>

Where a beneficiary receives a distribution of income that has arisen during the administration of a UK estate, that beneficiary may be entitled to relief on the income under a Double Taxation treaty. Relief will be available in one of two ways:

- Other Income article: where an other income article of a treaty does not exclude income paid out of a UK estate, that income is considered as other income. ...

The beneficiary is entitled to full relief from the total tax deemed to have been paid on the income.

- Extra Statutory Concession A14: where it is not possible to relieve the income under an other income article, Extra Statutory Concession A14 allows us to look through to the underlying sources of income received by an estate and allow relief as if the beneficiary owned the sources of income in their own right.<sup>28</sup> ...

International Manual para 367530 sets out a list of countries where relief is available under the Other Income article on distributions made by UK estates. For this list see 38.12.1 (Other Income article).

#### **367540 How to give relief by 'looking through'** [Dec 2019]

A repayment claim will be supported by an R185 (Estate Income) (or an R185E) tax certificate prepared by the personal representative(s) showing the rate(s) at which the sources of income have been taxed.

It should be possible to identify the sources of income from the R185 (Estate Income). If so, you should apply relief at the treaty rate for the type of income. It may not be possible to identify the sources of income

---

<sup>27</sup> Author's footnote: That is, the estate is not considered to be transparent.

<sup>28</sup> See 85.18 (Non-resident beneficiary of UK estate: concessionary relief).

on an R185E; if so you will need to find out what they are. Remember that you will have to open an SA enquiry to ask for the information you need. See INTM331200 for guidance on how to open an enquiry. You should ask the claimant or their representative for a breakdown of the underlying sources of income arising to the estate.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

## **85.18 Non-resident beneficiary of UK estate: Concessionary relief**

ESC A14 provides:

### **Deceased person's estate: residuary income received during the administration period**

A beneficiary who for a year of assessment is not resident or not ordinarily resident in the UK, and is deemed under ITTOIA ss.657, 658(2) and 830(1) to have received income from a UK estate in that year, may claim to have their tax liability on that income from the estate adjusted to what it would be if such income had arisen to them directly and as a result they—

- [1] could claim relief under TA 1988 s.278 (claim to personal reliefs by certain non residents); or
- [2] could claim entitlement to exemption in respect of FOTRA Securities issued in accordance with ITTOIA s.714; or
- [3] could claim relief under the terms of a double taxation agreement; or
- [4] would not have been chargeable to income tax.

The ESC goes on to specify the conditions for the relief.

Relief or exemption, as appropriate, will be granted to the beneficiary only if the personal representatives of the estate—

- have made estate returns for each and every year for which they are required, and
- have paid all tax due and any interest, surcharges and penalties arising, and
- keep available for inspection any relevant tax certificates, together with copies of the estate accounts for all years of the period of administration showing details of all sources of estate income and payments made to beneficiaries.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary is deemed to have received the

income.

No tax will be repayable to the beneficiary in respect of income they are deemed to have received where the basic amount of estate income, if received by a UK resident beneficiary of an estate, is paid sums within ss.657(3), (4) and 680(3), (4) ITTOIA.

This is the equivalent of ESC B18 for trusts.<sup>29</sup>

## **85.19 Time limit for claim/assessment**

Section 682 ITTOIA provides:

(1) This subsection applies if after the administration period ends it is apparent that a person is liable for income tax on estate income for any tax year who previously appeared not to be so liable or to be liable for tax on a lesser amount.

(2) If subsection (1) applies—

(a) the person may be assessed and taxed for the tax year, and

(b) any relief or additional relief to which the person may be entitled for the tax year is to be allowed if a claim is made.

(3) This subsection applies if after the administration period ends it is apparent that a person who previously appeared to be liable for income tax on estate income for any tax year is not so liable or is liable for tax on a lesser amount.

(4) If subsection (3) applies—

(a) all necessary adjustments and repayments of income tax for the tax year are to be made, and

(b) if the person has been allowed relief which exceeds the relief that could have been given by reference to the amount actually charged for the tax year, income tax is charged on the person for that year under this subsection on the excess.

(4A) The excess charged under subsection (4)(b) is treated as an amount of income for income tax purposes, except so far as it represents a tax reduction given effect at Step 6 of the calculation in section 23 of ITA 2007.

(5) An assessment or adjustment made for the purposes of this Chapter or a claim made as a result of this Chapter may be made after the end of the period otherwise allowed if it is made on or before the third anniversary of the normal self-assessment filing date for the tax year in

---

<sup>29</sup> See 38.9 (Discretionary trust transparency: beneficiaries reliefs).

which the administration period ends.

International Manual provides:

**367560 Statutory time limit for claims by beneficiaries** [Dec 2019]

It is possible that a beneficiary may receive a distribution from an estate which includes income received by the personal representative outside the normal statutory time limit. However, Section 700(3) ICTA 1988 allows beneficiaries until 3 years from 31 January following the year in which administration was completed to make their claims. This means that a beneficiary is not prevented from claiming relief from UK tax because of the time taken to complete the administration of the estate. For example, a death occurs during 1994/95. In the normal course of events, the time limit for a beneficiary to claim on administration period income arising in that year would have expired on 5 April 2001. However, if the administration of the estate is not completed until 2002/03 the time limit is extended and the beneficiary has until 31 January 2007 to make the claim.

**85.20 HMRC practice: Conventional basis**

The statutory rules are too complicated, and in practice no-one usually takes much notice of them. The TSE Manual first outlines the law:

**7655. Statutory - conventional basis of taxation** [Mar 2018]

**The statutory basis**

The statutory basis is provided in ITTOIA/Ss654, 656 and 661 for non-corporate beneficiaries, and in CTA 2009/Ss939, 941 and 944 for corporate beneficiaries. This requires all sums paid during or payable on completion of the administration period to be taxed over the course of the administration period. The amounts are allocated to tax years as follows:-

1. where

- the interest has not ceased before the beginning of the tax year
- the administration period continues after the end of the tax year

then the amount is the sum paid in the tax year

2. where

- the interest has not ceased before the beginning of the tax year
- the administration period ends in the tax year

then the amount is the total of

[a] any sum paid in the tax year before the end of the administration period plus

[b] any amount still due to the beneficiary at the end of the administration period...

The amounts allocated to each year are then deemed to be the net income of the beneficiary for that year. The amount concerned is grossed at the applicable rate...

The TSE Manual then provides a concession:

**The conventional basis**

The beneficiary is treated as if he had been entitled to the income of the estate (or an appropriate part of the estate) as and when the income arose to the personal representatives. The basis applies for all purposes including repayments.

It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis. If the beneficiary asks for the statutory basis to be applied, they should supply HMRC with a computation on that basis. If there are any problems with such a computation, advice should be requested from HMRC Administration of Estates Cardiff.

In other words, the estate is by concession treated as transparent for IT purposes. That will normally suit remittance basis taxpayers.

## **85.21 Tax returns & registration**

### *85.21.1 Simple estates*

HMRC Trusts and Estates Newsletter provides:<sup>30</sup>

**Administration period of Deceased's Estates: IT and CGT  
Informal Payment Arrangements**

The tax liability of most deceased's estates during the administration period is straightforward and can be dealt with by HMRC Pay As You Earn and Self-Assessment.

Personal representatives (executors or administrators) provide HMRC with a calculation of the amount of tax due. HMRC will then provide a payment slip with a reference number, for this payment only, for the Personal Representative to then make a one-off informal payment of the total tax liability for the whole period of administering the deceased's estate, provided certain conditions are met.

---

30 <https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters/hmrc-trusts-and-estates-newsletter-august-2018>

The main condition is that the total tax liability (Income Tax plus Capital Gains Tax) for the entire administration period is £10,000 or less. The other conditions are that the:

- [1] probate or confirmation value of the estate is not more than £2.5m
- [2] proceeds of assets sold by the personal representatives in any one tax year are
  - [a] not more than £250,000, for deaths up to 5 April 2016 or
  - [b] not more than £500,000 for deaths after 5 April 2016
- [3] estate is not regarded as complex, so it can be dealt with without the personal representatives having to complete a Self-Assessment return

All informal payments made for the administration period, should include the reference number provided by HMRC for payment of the administration period tax due.

Any payments made by cheque should include on the reverse the following information:

- the name of the deceased
- the last private address of the deceased
- the deceased's National Insurance number or Self-Assessment UTR or reference which has been provided by HMRC for this payment
- the reason for this payment indicating Administration Period

The covering letter with the cheque for payment of the tax due should be sent to HMRC.

### 85.21.2 *Complex estates*

HMRC Trusts and Estates Newsletter continues:

HMRC Administration of Estates Cardiff is responsible for dealing with all aspects of the period of administration where the case is regarded as a complex case (subject to the exceptions at TSEM7366).

An estate is considered complex if:

- [1] the probate or confirmation value of the estate is more than £2.5 million
- [2] tax due, Income Tax and, or Capital Gains Tax for the whole of the administration period exceeds £10,000
- [3] the proceeds of assets sold by the personal representative in any one tax year for date of deaths up to 5 April 2016 exceeds
  - [a] £250,000 or
  - [b] £500,000 for date of deaths after 5 April 2016

If the estate does not fall into any of the above categories but it cannot easily be dealt with under the informal payments procedures, contact

HMRC Administration of Estates Cardiff for advice on who should deal with the administration period liability.

Estates are not part of the TRS requirements under the legislation that transposed 4MLD, but the method by which complex estates register with HMRC is through the same online process. Personal representatives of complex estates are required to use the TRS to obtain a UTR number for the estate they are administering. The register will ask for basic information, including the identification of the deceased and the personal representatives. For more information, read how to register an estate on TRS.

If an estate is considered complex, Self-Assessment Trust & Estate tax return SA900 will be required for each year of the Administration period. Self-Assessment deadlines for the late submission of tax returns and penalties for late payment of tax apply.

It should be evident when gathering assets and if dealing with the Inheritance Tax account if the probate or confirmation value of the estate is over £2.5m and the estate is therefore considered by HMRC as complex for the Income Tax and Capital Gains Tax of the administration period. Equally, the value of an asset will be required at date of death, which should give some indication if the value is likely to exceed £500,000 when the Executor is selling the asset.

For Income Tax due over £10,000 the estate would be in receipt of gross income exceeding £50,000 during the whole of the administration period which could be from one or various sources: bank and building society interest, dividends, property related income and many more. Again, this should be evident from assets held in the estate but may not be clear early in the administration period. The informal payment procedures can only be used once and only when the administration period has ended. If the £10,000 Income Tax due is exceeded HMRC should be notified as a Self-Assessment Trust & Estate tax return SA900 will be required to be submitted.

Only rarely, should an estate be reported as informal at the end of the administration period and then subsequently, a criterion for complex estate is triggered. This could be a previously unknown assets comes to light which exceeds the informal criterion values. In these circumstances, the estate should be registered on the TRS in order to request a UTR and a Self-Assessment Trust & Estate tax return SA900 will be required for each year of the administration period to declare all the income and, or capital gains information. Any payment previously made using the informal route will be transferred and used against the total tax now due

and included in the Self Assessment statement of account.

### 85.21.3 *Reporting closure of estate*

HMRC refer to completion of administration as closure of an estate.

ATT say:<sup>31</sup>

In April 2020, the functionality of the TRS was increased, and in the August Trust and Estates newsletter, HMRC asked for personal representatives to make notifications of changes to the personal representative's details and notify the "closure" of the estate (i.e. the end of the administration period) via the TRS.

Given that reporting the "closure" of an estate via the TRS effectively meant reporting the end of the administration period to HMRC twice (in addition to being very time-consuming to complete as it requires the executors to set up a Government Gateway and complete a digital handshake to authorise their agents), members asked on what basis HMRC were asking them to do this extra step.

We raised these concerns with HMRC who have now confirmed to us (and other professional bodies) in email correspondence this month that, unlike for registered trusts where certain legal obligations apply regarding when details held on the Trust Register must be updated, estates are not similarly bound.

HMRC have shared the following with us.

"The requirement to update details on TRS applies only to taxable 'relevant' trusts which are registered for the purposes of the 4th Money Laundering Directorate. The requirement does not extend to estates, which are registered to obtain a UTR for SA purposes. HMRC would prefer PRs and agents to use TRS to notify the closure of a registered estate but there is no obligation to do so. Notification can be made by letter or via a SA return if that is more convenient.

"For registered estates where a closure notification has already been made by letter or in a SA return, HMRC does not expect PRs [Personal representatives] or agents to go back and update TRS as this will be done by HMRC staff.

"TRS should be used to notify HMRC that the name or address of a PR has changed."<sup>32</sup>

---

31 <https://www.att.org.uk/technical/news/estates-trusts-registration-service> (Nov 2020)

32 The TRS Manual makes similar points: see TRSM27010 - Types of trust that need to be registered: contents: registrable estates.

If on completion of the administration a trust comes into effect, it is in principle necessary to report that trust under TRS.<sup>33</sup>

#### 85.21.4 Reporting estate distributions

ICAEW say:

##### **Distributions from estates in administration – completing self assessment tax returns and R40s**

HMRC has provided the following clarification on how to report distributions from estates in administration on self assessment tax returns and R40 forms.

When income from an estate in administration is paid out to beneficiaries the executors need to tell the beneficiaries:

- How much income they are entitled to, and
- How much of the entitlement is made up of dividends received before and after 6 April 2016, and
- Whether there is any untaxed bank interest included in their entitlement

##### **Untaxed bank interest**

The R185 statement of estate income is not required where the only income is untaxed bank interest of less than £100 so in this situation the executors have to provide the beneficiaries with a breakdown of any untaxed bank interest on a separate sheet and the beneficiaries should declare the bank interest received in box 2 on page TR3 of the SA100. The R185 has a separate box for the pre April 2016 dividends, box 20, but the new instructions from HMRC appear to advocate ignoring that box. The instructions on the R185 for box 20 is to simply enter these dividends into the white space.

If the beneficiary is a taxpayer in self assessment, they will have to transfer the details in box 18 on the R185 estate income into box 18 on their SA107. They will then need to note in box 25, the white space, of the SA107 how much dividend income was received by the estate before 6 April 2016 but not paid out until after 6 April 2016. They need to do this so that the pre April 2016 tax credit can be taken into account and is not repaid.

By entering all the dividends onto the self assessment return then, provided the beneficiary is not in a tax repayment situation, it seems that

---

33 Registration may not be required within 2 years of death; see 122.9 (Excluded trusts).

the tax will be correctly calculated. If the beneficiary is in a repayment situation it may be necessary to do a manual calculation to ensure the non repayable dividend tax credit is excluded from any repayment.

If the beneficiary is a non-taxpayer, the beneficiary will instead have to transfer the details in box 18 on the R185 statement of estate income into box 4.11 or 6.1 on the R40 depending on whether the dividends were UK or foreign dividends. They need to do this because individuals are entitled to a dividend allowance and will be entitled to a tax rebate or credit against their tax charge of the tax paid on dividends received by the estate after 6 April 2016. There is no additional information box on the R40 so the beneficiary will have to tell HMRC on a separate sheet which dividends were received after 6 April 2016 so that the refund can be calculated.<sup>34</sup>

## **85.22 Income tax of estates: Critique**

There could hardly be a stronger condemnation of the current rules than the statement in the Manual that *It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis*. The code needs to be rethought and replaced with something simpler. But that is outside the scope of this book.

---

CHAPTER EIGHTY FIVE A

**SETTLEMENT, BARE TRUST, AND  
ASSOCIATED TERMINOLOGY**

85.1

**85A.1 Introduction**

This chapter considers:

- (1) Meaning(s) of the term settlement, and associated terms such as bare trust and general power
- (2) Trust law validity rules (sham, illusory trust, etc) which impact on tax

**85A.2 Definitions of “settlement”**

85A.2.1 *Settlement terminology*

There are three tax definitions of “settlement”, or of what amounts to a settlement. When discussing statutory provisions it is usually best to use the statutory terminology, but that will not do here. We need labels to distinguish the definitions. I use the following terms:

<b>Definition of settlement</b>	<b>Application</b>	<b>See para</b>
Classic trust	A trust in the general (trust-law) sense	1.3
Standard IT/CGT definition	Default IT/CGT/CT/SDLT definition	1.5
Settlement-arrangement definition	Settlor-interested trust code, & more	1.4
IHT definition	Applies for IHT	1.6

Because the definitions are different, it is a mistake to ask if an entity is a trust “for tax purposes”. One must ask if it is a trust for IT/CGT, or for IHT purposes, or if it is a settlement-arrangement. An entity may be a trust within one, two, or all three definitions.

**85A.3 Trust/Classic trust**

A “**classic trust**” is a trust in the general (trust law) sense.

This convenient term was first used in *Chinn v Collins*<sup>1</sup> and adopted in *Jones v Garnett*.<sup>2</sup>

In most contexts, the words “settlement” and “trust” are interchangeable, so one might refer to a “classic settlement”; but I prefer “trust” as a shorthand.

A classic trust will be a settlement under the IHT and standard IT/CGT definitions.

Lewin on Trusts discuss four definitions at the beginning of their work. Here is an index of places in this work where the meaning is discussed.

#### 85A.4 Settlement: Standard IT/CGT definition

It is convenient to read the IT/CGT/SDLT definitions side by side:

##### s.466 ITA

(1) This section applies for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.<sup>3</sup>

(2) “Settled property” means any property held in trust other than property excluded by subsection (3).

##### s.68 TCGA

In this Act, unless the context otherwise requires,

“settled property” means any property held in trust other than property to which section 60 applies

##### Para 1 sch 16 FA 2003

(1) In this Part [Part 4, SDLT]

“settlement” means a trust that is not a bare trust.

The sense is the same, though the wording is different, and I refer to this as the “**standard IT/CGT definition**”.<sup>4</sup>

The exception in s.466(3) ITA/s.60 TCGA relates to nominees or bare trustees; see 1.7 (Bare trust/nomineeship).

1 54 TC 311 at p.339,

2 [2007] UKHL 35 at [43].

3 In some cases the context does “otherwise require” because the settlement-arrangement definition is applied. I cannot think of any other case where the context would “otherwise require”.

4 This term is not wholly apt, as what I call the “standard IT/CGT definition” also applies for CT, SDLT and ATED; but it is convenient and reflects the focus of this work.

For CT, s.1169 CTA 2010 applies the IT definition by reference.<sup>5</sup> For ATED, s.95(4) FA 2013 applies the SDLT definition by reference.<sup>6</sup>

The IT/CGT provision is formally a definition of “settled property” not “settlement” but, as s.466(4) ITA suggests, the definition also governs the meaning of the word “settlement”.

85A.4.1 *Property comprised in settlement*

In the IT/CGT definition of settlement, the term “property comprised in a settlement” is given a commonsense definition:

**s.466 ITA**

(4) References, however expressed, to property comprised in a settlement are references to settled property.

**s.68 TCGA**

(and references, however expressed, to property comprised in a settlement are references to settled property).

For this term in the context of the settlement-arrangement definition, see 44.3.1 (Property comprised in a settlement).

**85A.5 Settlement-arrangement definition**

Section 620(1) ITTOIA provides:

In this Chapter [Chapter 5 Part 5, settlor-interested trust code] “settlement” includes<sup>7</sup> any disposition, trust, covenant, agreement, arrangement or transfer of assets...

I refer to this as the “**settlement-arrangement**” definition of settlement.<sup>8</sup>

---

5 “Chapter 2 of Part 9 of ITA 2007 (which relates to settlements and trustees) applies for the purposes of the Corporation Tax Acts as it applies for the purposes of the Income Tax Acts.”

6 “In this section “settlement” has the same meaning as in Part 4 of FA 2003 (see paragraph 1 of schedule 16 to that Act).”

7 The context shows this is an exhaustive definition, ie the word “includes” really means “means”.

8 A note on terminology: The term occasionally used is "statutory settlement". In early editions of this work I called this the "IT definition" of settlement. But I do not use that term now as (1) it became inappropriate following the introduction of the standard IT/CGT definition in 2006; and (2) the settlement-arrangement definition is also used in CGT/CT.

An intention to avoid tax is not required.<sup>9</sup>

#### 85A.5.1 *Non-trust settlement-arrangement*

The paradigm example of a settlement-arrangement is a classic trust made by a settlor for his family. However, a settlement-arrangement need not involve a classic trust. A settlement-arrangement includes:

- (1) An outright gift<sup>10</sup>
- (2) An issue of shares:
  - (a) at an undervalue<sup>11</sup>
  - (b) at market value, intending to add value to the company later<sup>12</sup>
- (3) A partnership<sup>13</sup>
- (4) A covenant to make Annual Payments<sup>14</sup>

The labels “settlement/settlor” are inapt here; but it should not be too confusing - as long as one bears the definition in mind.<sup>15</sup> It may sometimes be helpful to use a clearer and more specific term, such as “partnership-settlement”.

A settlement-arrangement may involve a number of steps; the steps may

9 This is (almost) self-evident, but if authority is needed, see *Jones v Garnett* [2007] UKHL 35 at [48]: “An intention to avoid tax is not ... absolutely essential. It is possible to imagine that an arrangement planned for some other purpose (such as pre-empting the consequences of insolvency or divorce) could ... amount to an arrangement (and so to a settlement). But usually an intention to avoid or minimise tax can readily be inferred ... and that intention is part of the factual material that has to be looked at in the round.”

The other definitions of settlement also do not have a avoidance requirement.

10 That now seems self-evident, but presumably it was not always so, as there is a House of Lords decision on the point: *Thomas v Marshall* 34 TC 178.

11 See 94.40.2 (Co settlor: Other definitions).

12 See *Jones v Garnett* discussed below.

13 See 94.21 (Partnership-settlement).

14 Covenanted Annual Payments have ceased to matter now that Annual Payments by individuals are (more or less) taken out of tax: see 30.6 (Annual Payment exemption). But I include covenants in this list as the law reports include many old cases, some still relevant, where the settlement-arrangement consisted of a deed of covenant.

15 Tax is not the only context where the word “settlement” is used loosely, to include more or less any arrangement, not just classic trusts. Another example is s.24 Matrimonial Causes Act 1973, see *Brooks v Brooks* [1996] AC 375 at p.392: “The authorities have consistently given a wide meaning to settlement in this context”.

include both a classic trust and other steps (so the arrangement is not just the classic trust alone). The use of the label “settlement” for this situation is confusing:

- (1) One needs to distinguish the classic trust from the “settlement” (ie the settlement-arrangement) of which it forms part, but the terms trust/settlement are usually synonymous.
- (2) The settlor of the trust may not be the settlor (or sole settlor) of the settlement-arrangement.

In this context it would help clarity of thought to refer to the trust as a “classic trust”, and use the word “settlement” (in the defined, settlement-arrangement sense) with scare quotation marks.

Is an estate of a deceased person, or a trust under a will or intestacy, a settlement-arrangement? This question does not arise for the purposes of the settlor-interested trust code. Even if it is a settlement-arrangement, it is not settlor-interested,<sup>16</sup> and a deceased settlor cannot be subject to tax. The settlement-arrangement definition is used in other contexts where the issue does arise.<sup>17</sup>

For the position of a trust-company structure, see 44.3.2.2 (Underlying company income).

## 85A.6 Bounty requirement

The settlement-arrangement definition is an outstandingly bad definition, because, taken literally, it covers every conceivable transaction. It has been left to the courts to define the term. In *Jones v Garnett*:<sup>18</sup>

Not every transfer of property is a settlement for the purposes of [the settlement-arrangement definition]. There has to be an “element of bounty” in the transaction.<sup>19</sup>

---

16 The settlor (being dead) cannot benefit; the settlor’s spouse cannot benefit because a widow is not a spouse.

17 See 84.8.1 (Is estate a “settlement” for s.87).

18 [2007] UKHL 35 at [7].

19 HMRC agree. The TSE Manual provides:

**“TSEM4110 scope of statutory definition of settlement [Jul 2017]**

The potential scope of the ‘settlement’ is extremely wide. Given the breadth of the unrestricted term the Courts have concluded that it is appropriate to impose some limitation on its scope. ... Settlement must include an element of bounty, as decided

By contrast, the standard IT/CGT and IHT definitions of “settlement” do not include a bounty requirement.<sup>20</sup>

Case law has also decided that bounty is an implied requirement for “providing” property (which is part of the definition of settlor).<sup>21</sup>

#### 85A.6.1 “Bounty”: Terminology

A note on terminology. In *Jones v Garnett*:<sup>22</sup>

This old-fashioned phrase [“bounty”] ... conjuring up the image of Lady Bountiful in *The Beaux’ Stratagem*, is perhaps not the happiest way of describing a provision for a spouse or minor children.

This is true, but “bounty” is likely to continue as the technical term. It is short, accurate, memorable if archaic, and a change in terminology comes at a cost in terms of inconvenience, complication and perhaps uncertainty.<sup>23</sup> But for clarity I prefer to use the expression “**bounty (gratuitous intent)**”. Statute, understandably, does not use the word bounty, but it does use the term gratuitous intent.<sup>24</sup> Some writers express unease by putting the word in scare quotation marks.

#### 85A.6.2 *A judicial gloss*

There is an important difference between judicial language and statutory language. In *Chinn v Collins*:<sup>25</sup>

---

in the tax case of *CIR v Plummer* (54 TC 1).”

20 This is self-evident, but if authority is needed, see *Nader v HMRC* [2018] UKFTT 0294 (TC) at [206] -[208].

21 See 94.39.3 (Settlor of commercial trust: IT/CGT/IHT definitions).

22 [2007] UKHL 35 at [7].

23 This is self-evident but if authority is needed, see *Jones v Garnett* [2007] UKHL 35 at [76]:

“The word ‘bounty’ rings slightly uncomfortably, at least to my ears. ... However, in the light of the judicial decisions on these provisions, it seems to me that the law is now tolerably clear and sensible, and, particularly given the need for clarity and the room for difficulties in this area, it would be inappropriate to risk introducing uncertainty or new complications by redefining the principles, even if only linguistically.”

24 Eg s.10 IHTA: see 70.12 (Arm’s length transaction).

25 54 TC 311 at p.357.

... the word “bounty” appears nowhere in the Statute. It is not a word of definition. It is a judicial gloss upon the Statute descriptive of those classes of cases which are caught by the section in contrast to those which are not. The courts must, I think, be extremely careful not to interpret this descriptive word too rigidly.<sup>26</sup>

This is a point of general application. It applies for instance to the judicial gloss which limits s.720 to the “transferor”.<sup>27</sup>

Similarly, the *Rangers* case comments on glosses intended to elucidate the concept of earnings “from” an employment:<sup>28</sup>

... the courts at the highest level have repeatedly warned of the need to focus on the words of the statute and not on judicial glosses, which may clarify or illustrate in a particular case but do not replace the statutory words. Thus in *Hochstrasser v Mayes*,<sup>29</sup> in which the House of Lords was considering whether an emolument could be said to arise “from” a taxpayer’s employment or office, Lord Radcliffe cited various judicial statements and stated:

“These are all glosses, and they are all of value as illustrating the idea which is expressed by the words of the statute. But it is perhaps worth observing that they do not displace those words”.

### 85A.6.3 *Bounty: Meaning*

What does bounty mean? In *Jones v Garnett*:<sup>30</sup>

... the general effect of the cases is that, under the arrangement [the settlement under the settlement-arrangement definition], the settlor must provide a benefit which would not have been provided in a

---

26 The passage cites an aphorism of Frankfurter J: “A phrase begins life as a literary expression; its felicity leads to its lazy repetition; and repetition soon establishes it as a legal formula, indiscriminately used to express different and sometimes contradictory ideas.”

27 See 46.3 (Who is the transferor).

28 *RFC 2012 Plc v AG* [2017] UKSC 45 at [11]. If further authority is needed, which I doubt, see *Laidler v Perry* [1966] AC 16:

“... various glosses on or paraphrases of the words in the Act appear in judicial opinions, including speeches in this House. No doubt they were helpful in the circumstances of the cases in which they were used, but in the end we must always return to the words in the statute ...”

29 See 33.5 (Earnings causation tests).

30 [2007] UKHL 35 at [7].

transaction at arm's length.

The TSE Manual provides:

**TSEM4110 scope of statutory definition of settlement** [Jul 2017]

... Settlement must include an element of bounty... Bounty is the provision of value without any corresponding quid pro quo, usually a gift or a transfer at less than full value.

Where a settlor enters into an arrangement that he or she would not have entered into with someone with whom the individual was acting at arm's length, the arrangement is susceptible to the legislation...

In short, bounty means gratuitous intent.

In a commercial transaction or arrangement there is no bounty. In *IRC v Levy*:<sup>31</sup> “a commercial transaction devoid of any element of bounty is not within the definition”. In that case an interest-free loan to a company wholly owned by the lender was held to be a *simple case of a commercial transaction devoid of any element of bounty* and so not a settlement-arrangement. Bearing in mind that “commercial” is itself a somewhat vague concept, this may not take us very far. And the converse does not hold, ie a non-commercial arrangement may lack bounty.

#### 85A.6.4 *Applying bounty test to arrangement*

At first sight bounty seems to be just another item in the arm's length/full consideration vocabulary cluster, which I consider elsewhere.<sup>32</sup> But there is a difference in that arm's length/full consideration are concepts that are usually applied to one-off transactions. Bounty is a concept that is applied to an arrangement, which may include a number of steps, and which may take place over time.

It seems necessary to identify the arrangement before applying the bounty test.<sup>33</sup> But identifying the arrangement is not usually crucial.

In *Jones v Garnett*<sup>34</sup> the steps were:

*Step 1 Creation of company:* Mr Jones and his wife acquired a new company; the formation agent sold them the two issued £1 shares for £1

31 56 TC 68 at p.87.

32 See App 4.1 (Consideration/arm's length/full value).

33 See App 2.2.4 (Identifying the arrangement).

34 [2007] UKHL 35.

each.

*Step 2 Operation of company:*

- (a) The company entered into contracts with customers to provide the services of Mr Jones. These services generated the company's income.
- (b) Mrs Jones did the bookkeeping and administration. This took about 4 hours a week and she was paid market value, £3.6k (c.£16 per hour). Mr Jones took £6.5k as salary which was far less than market value.
- (c) The company distributed most of its profits as dividends.

In short, Mr. Jones worked for a company held equally by himself and his wife. The advantages to Mr and Mrs Jones of receiving the company's earnings as dividends rather than salary were, (1) a dividend paid to Mrs Jones was taxable at a lower rate than Mr Jones, and (2) avoiding NIC. So step 2 was contemplated from the outset.

Step 1 - the issue of shares to Mrs Jones - had an element of bounty, the *expectation* of dividends for Mrs Jones, and that step alone constituted the settlement-arrangement. Step 2 - the operation of the company - constituted post-arrangement step(s) which were not part of the arrangement:

[HMRC argued] that the transfer of the share [to Mrs Jones] was not the whole of the arrangement, which included the provision of services by Mr Jones, the dividend policy and so forth. ... The transfer of the share was in my opinion the essence of the arrangement. The expectation of other future events [i.e. provision of services by Mr Jones and company profits distributed by dividend] gave that transfer the necessary element of bounty but the events themselves did not form part of the arrangement.<sup>35</sup>

So as far as the settlement-arrangement bounty test is concerned, it did not matter that step 2 was not part of the arrangement. That is sensible because it is then not necessary to ask the question of exactly which steps do constitute the settlement, which is imponderable.<sup>36</sup>

---

35 [2007] UKHL 35 at [29]. Lord Walker said the same at [54] stressing the absence of a contract of employment. But the contract would make no difference; see Lord Hoffmann at [20] (with whom 3 other judges agreed).

If another example is needed, see at [22] discussing *Butler v Wildin*.

36 See App 2.2.4 (Identifying the arrangement).

### 85A.6.5 *When to test bounty*

One assesses bounty at the time of the arrangement, which if the later steps do not form part of the arrangement, means at the outset. It is sufficient if bounty is intended to come some time after the (perhaps) arm's length transaction which constitutes the settlement-arrangement:

when considering whether there ... an arrangement, which involved an element of bounty, one should assess the position at the time that the alleged arrangement was made, but, in carrying out that exercise, one should not disregard what happened thereafter. In particular, if the parties intended an element of bounty to accrue, and that element of bounty does indeed eventuate, then, absent any other good reason to the contrary, there is indeed an "arrangement" within the meaning of [the settlement-arrangement definition].<sup>37</sup>

### 85A.6.6 *Retesting bounty*

It seems that one does not assess (or reassess) bounty on a year-by year basis. In *Jones v Garnett*:<sup>38</sup>

the Revenue is anxious to catch only one of the following examples:

- (i) [Husband and wife] may expect that each will make a contribution to the company's earnings of roughly equal financial value;
- (ii) they may expect that each will make a contribution which is equal in terms of effort but ... unequal in terms of earnings for the company;
- (iii) they may expect that each will contribute what they can but that those contributions will vary over time ... or
- (iv) as here, they may expect that one will contribute the work which brings in the money from outside while the other will contribute the limited but necessary ancillary services to make that work possible but bring in no independent money from outside.

There are many variations and permutations between these possibilities. I would have found it easier to understand the Revenue's case if it had adopted a year by year approach: looking at each tax year, has one of the spouses worked for a salary which is seriously less than his services are worth to the company in order to boost the company's profits which can

---

<sup>37</sup> *Jones v Garnett* [2007] UKHL 35 at [79].

<sup>38</sup> [2007] UKHL 35 at [67] - [69].

then be distributed equally between the spouses as dividend? In other words, has there been a gratuitous transfer of income between husband and wife? ...

But the Revenue has expressly eschewed that approach. It relies on the initial acquisition of the company's shares [by Mrs Jones] as the 'settlement'. It has also expressly eschewed the intention of catching any other type of arrangement than that in example (iv) above. It is not interested in picking apart genuinely co-operative family ventures, even if on analysis the contribution of one spouse is worth more than the contribution of another. Nor can it be interested in arrangements which start out as roughly equal ventures but ... become less equal as time goes by. On the Revenue's case, it is only a 'settlement' if a substantial element of 'bounty' - that is, gratuitous transfer - is contemplated at the outset. It must follow that unanticipated later events cannot transform the character of the initial transfer of property or arrangement.

And again:<sup>39</sup>

a different approach would involve considering what transpired each year, when it was decided how much of the company's gross profit should be attributable to Mr and Mrs Jones' respective wages, and how much should be distributed by way of dividend. ...Neither [Counsel for the Revenue] (no doubt reflecting the Revenue's policy) nor [Counsel for the taxpayer] (as it would involve his clients losing on this issue) was prepared to adopt this approach. Although it appears to me to be logically attractive, it would be inconvenient in practice, in that it would be difficult to administer, and it might well produce unfair, even arbitrary, results.<sup>40</sup>

A no-retesting rule helps the taxpayer when arrangements "start out as roughly equal ventures but become less equal as time goes by." But the rule would help HMRC if it were the other way round, ie what starts as an unequal venture later becomes an equal one. Suppose after the Jones' company was set up there was a change so that:

(1) Mrs Jones' work generated half the company's profits; or

---

39 at [89]. See too 94.25 (Provision of services).

40 Lord Neuberger does not identify the unfair results to which he refers. One problem would be this: On the year by year (retesting) approach, what if income was retained in the company and later distributed after circumstances had changed?

- (2) Mrs Jones worked full time on administration, so making “a contribution which is equal in terms of effort but unequal in terms of earnings”.

Would there still be a settlement? On the facts of *Jones v Garnett* that would not matter because the s.624 spouse exemption applied.<sup>41</sup> But that would not help if Mr and Mrs Jones had not been married, but only cohabitees.

It is suggested that in the event of a major unexpected changes the issue of bounty should be revisited, on the basis that a new arrangement has replaced the old one. The no-retesting rule is a concession and not strict law.

#### 85A.6.7 *Trust appointment: Filling blanks*

*Chinn v Collins*<sup>42</sup> concerned an avoidance scheme (known as a “contingent interest scheme”). The object was to transfer funds from an offshore trust to UK beneficiaries. The steps were:

*Step 1 appointment:* Trustees of a trust (the “classic trust”) appointed funds to beneficiaries (“the children”) contingent on the children surviving 3 days (as in due course they did).

*Step 2 sale of equitable interest:* The children sold their equitable interests to a non-resident company.

*Step 3 repurchase of trust assets:* The children bought the assets of the trust fund back from the company.<sup>43</sup>

The object was that the children were not beneficiaries of the settlement after the sale at step 2, and so outside the scope of the predecessor to s.87. The children did indeed cease to be beneficiaries of the classic trust. But the settlement-arrangement definition applied. HMRC argued that they were beneficiaries of a settlement-arrangement, and as such taxable under the predecessor to s.87.

---

41 See 89.14 (s.624 spouse exemption).

42 54 TC 311.

43 A scheme of this kind would not work today. Among other issues, there would now be a CGT charge at step (2) on the disposal of an interest in a non-resident trust; see 53.20.3 (Non-resident trust interest). But the points from the case set out here are of more general importance.

The analysis would be the same without step 3, eg if the trust had held cash.

The 3 steps constituted an arrangement. But where was the bounty? It was found tucked away in the trust appointment at step 1:

What the cases have sought to do is to distinguish between those cases where the recipient has in return for that benefit which he has received accepted some obligation which he has to perform, either before receiving the benefit or at some stated time thereafter, and those cases where the recipient benefits without any assumption by him of any correlative obligation. ... In my judgment there was a very real “bounty” conferred when the trustees with the settlor’s consent exercised the power of appointment in question [in favour of the children]. As [Counsel for the Crown] put it, when the power of appointment was exercised a blank<sup>44</sup> was filled in the original settlement which left blank how the final distribution of the trust’s assets was to be made. That in my judgment was a clear act of “bounty”.<sup>45</sup>

One might have said that the arrangement was:

- (1) the creation of the classic trust *and*
- (2) the subsequent appointment.

In that case the bounty test is satisfied by step 1 of the arrangement. Do the two steps form one arrangement? The appointment was not in contemplation at the outset, but that does not matter: there is a sufficient unity, as the second step is an exercise of the fiduciary power conferred by the first step.<sup>46</sup> That is just another route to the same destination, but the underlying point - the focus on the fiduciary nature of the trustees power of appointment - is very similar.

#### 85A.6.8 *No intention to benefit others*

For completeness I should mention *Clipperton v HMRC*<sup>47</sup> which was a

---

44 The concept of a trust appointment “filling in blanks left by the settlor” is relevant in many contexts where the tax consequences of an appointment arise, such as the question of who is the settlor after a transfer between trusts. See eg 94.12 (Inter-trust transfer: IHT).

45 54 TC 311 at p.357. Likewise at p.351. The principle goes back *Muir v Muir* [1943] AC 468 at p.483: “It is as though the settlor had left a blank in the settlement which B fills up for him if and when the power of appointment is exercised.”

46 See [App. 2.2.5](#) (Sufficient unity test).

47 [2021] UKFTT 12 (TC). The case is not yet final.

hare-brained marketed avoidance scheme, intended to allow shareholders to extract profits from a company without paying IT. The steps were quite simple. In short:

*Step 1 - issue of share in Newco to trust:* A company (“C Ltd”) had 2 shareholders. With their consent, the company transferred a (worthless) share in a new company (“Newco”) to a classic trust whose beneficiaries included the shareholders, C Ltd, and others.

*Step 2 - Funding of Newco and dividend to trust:*

- (a) The company funded Newco so that it held £200k.
- (b) Newco paid a dividend to the trust, most of which was of course eventually received by the shareholders.

The taxpayer’s analysis was:

- (1) The settlor was C Ltd, not the shareholders.
- (2) Under s.624 the dividend was treated as accruing to C Ltd. So the shareholders were not taxed!

One might have thought it clear that the shareholders were settlors, they provided property indirectly by procuring C Ltd to make the settlement. But in the course of a 70 page judgment - the matter would in the past have been dealt with more concisely - the FTT held that they had no intention of bounty:<sup>48</sup>

the appellants did not intend to and, the planning did not in fact, confer any material benefit on any other person. The sole purpose of the plan was for the vast majority of the relevant funds which [C Ltd] paid to [Newco] to be received by the appellants themselves, as duly happened.

With respect, this is wrong and should not be upheld. When property is provided to a substantive trust, as here, there must be an *element* of bounty because there are (and must be) other beneficiaries. Had there not been, there would have been no trust. Also the bounty test is a gloss not to be applied rigidly.<sup>49</sup> It often happens that a person creates a settlor-interested trust with only his own interest in mind, and no-one suggests that they are not the settlor.

---

48 at [228](2).

49 See 85A.6.2 (A judicial gloss). It might also be said that it was sufficient that the C Ltd acted with bounty even if the shareholders did not.

### 85A.6.9 *Bounty: Divorce settlement*

In *Harvey v Sivyer*<sup>50</sup> a separated husband made payments to his minor children under a separation agreement. The payments were not voluntary; they were pursuant to an obligation to maintain the children and contained no element of bounty (gratuitous intent).<sup>51</sup> The taxpayer argued that for this reason that there was no “settlement” within the settlement-arrangement definition. The argument was rejected and the taxpayer was held to be the settlor. The judge tentatively reconciled his decision with the bounty requirement because “the natural relationship between parent and young child was one of such deep affection and concern that there must always be an element of bounty by the parent, even when the provision is on the face of things made under compulsion”.<sup>52</sup> This is romantic fiction. The better way to reach the decision is that the bounty requirement is not statutory, and not to be applied rigidly.<sup>53</sup> The Court of Appeal noted in an earlier case, “if the legislature had set a limit to the extent to which a taxpayer may divest himself for tax purposes of income by voluntary means, I see no reason why the same principle should not be applied to income of which the taxpayer is compulsorily divested”.<sup>54</sup> So this is simply an exception or refinement to the bounty requirement. On this analysis, *Harvey v Sivyer* was correctly decided, though not for the right reasons. Does that matter? Probably not, but it is good to know what we are talking about.

### 85A.7 Definition of “IHT-settlement”

Section 43(2) IHTA provides the IHT definition:

“Settlement” means any disposition or dispositions of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—

- (a) held in trust
  - [i] for persons in succession or

---

50 58 TC 569.

51 58 TC 569 at p.572.

52 58 TC 569 at p.577.

53 See 85A.6.2 (A judicial gloss).

54 *Yates v Starkey* 32 TC 38 at p.53.

- [ii] for any person subject to a contingency, or
- (b) held by trustees
  - [i] on trust to accumulate the whole or part of any income of the property or
  - [ii] with power to make payments out of that income at the discretion of the trustees or some other person, with or without power to accumulate surplus income, or
- (c) charged or burdened (otherwise than for full consideration in money or money's worth paid for his own use or benefit to the person making the disposition) with the payment of any annuity or other periodical payment payable for a life or any other limited or terminable period,
- [d] or would be so held or charged or burdened if the disposition or dispositions were regulated by the law of any part of the UK;
- [e] or whereby, under the law of any other country, the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

The definition of “settlement” requires a combination of two things:

- (1) a disposition (or dispositions) of property
- (2) a state of affairs, or, I would say, an entity, brought about by the disposition(s), whereby the property is held in the ways specified in limbs (a) to [e]<sup>55</sup>

In this section I consider point (2), whether the entity falls within what I call “**limbs (a) to [e]**” of the definition.<sup>56</sup>

Limbs [d] and [e] are unique to the IHT definition of “settlement” and are not found in other definitions.<sup>57</sup>

#### 85A.7.1 *Undistributed trust income*

Undistributed income of a discretionary trust is not “settled property” for IHT purposes. Even if it falls within the opening 3 lines of the definition, which is debatable, it does not fall within any of limbs (a) to [e]. It

<sup>55</sup> This is self-evident, but if authority is needed, see *Barclays Wealth Trustees v HMRC* [2017] EWCA Civ 1512 at [31].

<sup>56</sup> For point (1) and the first 3 lines of the definition, see 71.15 (Adding property: Change of domicile); 75.3 (One IHT-settlement or more).

<sup>57</sup> See 1.2 (Definitions of “settlement”).

becomes settled property if it is accumulated (added to trust capital).<sup>58</sup>

### 85A.7.2 *Limb (a): Persons in succession*

Limb (a) refers to property “held in trust” and limb (b) refers to property “held by trustees” but the meaning must be the same.

The expression “for persons in succession” has a history. It originated in the definition of settlement in the Settled Land Act 1882, which passed to the Settled Land Act 1925.<sup>59</sup> The Settled Land Act definitions were incorporated by reference into Estate Duty. There is a substantial case law, discussing whether Victorian jointures, portions and annuities constitute a settlement. Unsurprisingly, this does not shed much light on current issues; indeed it needs a legal historian to fully understand it. Some general comments are perhaps worth noting. In *Attorney-General v Owen*:

‘By way of succession’ seems to me to be a phrase to which one ought, in dealing with this Act, not to assign a narrow or strictly technical meaning, but to treat it as equivalent to ‘successively upon death’.<sup>60</sup>

But this statement, while no doubt correct, does not take us very far.

More important is the rule that a gift to a trust for A for life, with remainder to A’s PRs, operates as an absolute gift to A.<sup>61</sup> Such a gift is not a settlement, because it is not a trust for persons in succession. The successors have no interest in the property during the life of A.

For this reason a will is not an IHT-settlement.

### 85A.7.3 *Limb (b): Income powers*

Where trustees hold property on trust for a minor absolutely, s.31 Trustee Act 1925 provides (so far as relevant):

(1) ... the trustees may... pay to his parent or guardian, if any, or

---

58 This is recognised in the exit charge rules; see 72.7.2 (Undistributed trust income).

59 There are minor differences in the wording of the definitions but they do not seem relevant for present purposes.

60 [1899] 2 Q B 253. Similarly, *Mundy & Roper’s Contract* [1899] 1 Ch 275 at p.290: “The words [“stands for the time being limited to or in trust for any persons by way of succession”] have no technical force. I see no sufficient reason for restricting their meaning”.

61 *Re Brooks* [1928] Ch 214.

otherwise apply for or towards his maintenance, education, or benefit, the whole or such part, if any, of the income of that property as the trustees may think fit...

(2) ... the trustees shall accumulate all the residue of that income ... and the trustees shall hold the accumulations in trust for such person absolutely.

The IHT Manual summarises:

**IHTM16068 Absolute trusts for minors (England & Wales) [Sep 2018]**

In relation to trusts for minors, the provisions of s.31 Trustee Act 1925 will usually apply during the minority of a beneficiary. This means that the trustees will have discretion to apply the income of a trust fund for the maintenance, education or benefit of a beneficiary. Under s.31 (2) Trustee Act 1925, any surplus income must be accumulated.

This raises the question whether an absolute trust for a minor can be regarded as a ‘settlement’ for IHT purposes under s.43 (2) IHTA. ...

At first sight there appears to be an IHT-settlement within (b), either because there is a trust to accumulate income or because the trustees have power to make payments out of the income. However, a bare trust does not constitute an IHT settlement. This is for two reasons (or for one reason which can be put in two different ways):

- (1) The provisions of s.31 (both the power to maintain and the trust to accumulate) are administrative and not dispositive.<sup>62</sup>
- (2) The provision for accumulation does not constitute “accumulation” in the correct (trust law) sense of the word.<sup>63</sup>

HMRC agree. The Manual continues:

In our view, an absolute trust of this kind is not a settlement for IHT

---

62 For this terminology and its tax implications, see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 16.1 (Administrative, dispositive, beneficial: terminology).

63 See *re Berkeley* [1968] Ch 744 at p.772: “Accumulation to my mind involves the addition of income to capital, thus increasing the estate in favour of those entitled to capital and against the interests of those entitled to income. The mere retention of income [to meet a possible liability] does not alter its nature: it remains income and will be paid out to the income beneficiaries when no longer required.”

purposes. S.31 Trustee Act, including s.31(2), contains provisions which are essentially administrative in nature rather than dispositive. The trustees' discretion in relation to an absolute trust is limited to deciding how much income they spend for the benefit of the beneficiary and how much they retain on the beneficiaries behalf.

The express trusts in such a case will remain for the minor beneficiary absolutely - that is, the beneficiary has an immediate and absolute right to both capital and income, and only their minority will prevent them from requiring the trustees to convey the trust property to them. Any accumulations will be held for the beneficiary if they attain 18 or (by virtue of the original gift, not s.31 Trustee Act) for their estate if they die under that age. The trust property will form part of the beneficiary's estate for IHT purposes.

As a result, a lifetime gift on trust for a minor absolutely, whether or not the provisions of s.31 Trustee Act are excluded, is a potentially exempt transfer.

#### 85A.7.4 *Limb (d): So held by UK law*

This limb provides:

[d] or would be so held or charged or burdened if the disposition or dispositions were regulated by the law of any part of the UK;

Limb [d] is present for historical reasons. The former estate duty definition of "settlement" in s.22(1)(i) FA 1894 provided (so far as relevant):

The expression 'settlement' means any instrument, whether relating to real property or personal property, which

[A] is a settlement within the meaning of the Settled Land Act, 1925, or

[B] if it related to real property would be a settlement within the meaning of that Act

Dick Taverne, then Financial Secretary to the Treasury, explained a problem with this definition:

The definition is primarily by reference to the Settled Land Act 1925, but it brings in property other than settled land by references to instruments which if related to real property in England and Wales would be a settlement within the meaning of the Act. We now see that it is arguable that we have done no more than equate an English

settlement of personalty with one of realty and that we have not caught foreign settlements.<sup>64</sup>

Hence s.36(5) FA 1969 extended the definition:

In the enactments relating to estate duty—

- (a) the expression ‘settlement’— (i) for the avoidance of doubt is hereby declared to include ...
- (bb) any disposition regulated by the law of a territory outside Great Britain which would constitute a settlement within the meaning of section 22(1)(i) of the FA 1894 if it had been regulated by the law of England or, as the case may require, of Scotland;

The words now in s.43(2)[d] IHTA derive from this. But now, the definition of settlement for IHT does not incorporate the SLA 1925 definition by reference, and applies to UK and foreign law trusts, so the words in (bb) were not needed. The drafter of the current definition possibly did not notice, but probably thought the words desirable to preclude an argument that “trust” in s.43(2) IHTA meant a trust governed by a UK law. That argument might have been weak, but given the history of the provisions it would not have been self-evidently wrong.

Limb (d) therefore has little if any practical effect; but it does no harm.

In contemporary legal English one would refer to a disposition *governed* by UK law, rather than *regulated* by UK law, but the meaning is the same.

#### 85A.7.5 *Limb (e): Equivalent to a trust*

This limb provides:

- [e] or whereby, under the law of any other country [other than the UK], the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

The standard IT/CGT definition of settlement has no equivalent of s.43(2)[e]. So while the IT/CGT definition requires that property is held “in trust” it is sufficient for IHT that the administration of the property is governed by provisions equivalent in effect to those which would apply if the property was (in short):

---

64 Hansard Standing Committee F, 24 June 1969, col 721.

- (a) held in trust for persons in succession, or for a person subject to a contingency, (eg an IIP trust) or
- (b) held by trustees on trust to accumulate the income of the property or with power to make income payments (eg a discretionary trust); or
- (c) charged with payment of an annuity (in practice this is rare).

The statute refers to the *administration* of the property being governed by equivalent provisions. Trust law draws a distinction between administrative and dispositive provisions, but the context here suggests that limb (e) is referring to all the provisions which govern the use of the property, and not just administrative provisions in the strict sense.

Two difficulties lie in the short phrase “equivalent in effect”:

- (1) “Equivalent” no doubt requires effective (or substantive) rather than exact equivalence, but equivalence comes in degrees and ways: one cat might sound like another, but look slightly different. Where does one draw the line?
- (2) A trust can have (more or less) the same effect as an entail, usufruct, will, company, partnership, charge by way of security over assets, power of attorney, and so on, though it is not any of those things. A trust is a flexible, protean institution which can have markedly different effects. Likewise companies, partnerships, and other entities can have quite different effects. Much depends on the drafting of the relevant documentation. However, difficulties arising from the amorphous nature of trusts and other entities are mitigated by two considerations:
  - (a) The question is not whether a general type of entity is equivalent, (eg, is a Foundation equivalent to a trust?); the question is whether one particular entity (eg, is the Smith Foundation made on [date]) equivalent?)
  - (b) The question is not whether the particular entity is equivalent to a trust; it is whether it is equivalent to a trust for persons in succession (etc). In short, is it equivalent to an IIP or discretionary trust?

I abbreviate limb [e] to “equivalent to a trust” but that is a convenient shorthand, not a full statement of the statutory test. In deciding whether a foreign institution is equivalent to a trust, one should have regard to the context: is it appropriate in the scheme of IHT that an entity should be

subject to IHT in the same manner as a trust? This consideration supports the view taken below that a Foundation (stiftung) is an IHT-settlement but a usufruct is not.

## **85A.8 Bare trust/nomineeship**

### 85A.8.1 “Bare trust” and related terms

There are three tax definitions of bare trust, or of what amounts to a bare trust. These are intertwined with the definitions of settled property/settlement, as follows:

<b>Provision</b>	<b>Defined term/concept</b>	<b>Applies for</b>
s.466(2) ITA	Settled property	IT/CT
s.466(3) ITA	Bare trust	IT/CT
s.68 TCGA	Settled property	CGT
s.60 TCGA	Bare trust	CGT
Para 1(1) sch 16 FA 2003	Settlement	SDLT
Para 1(2) sch 16 FA 2003	Bare trust	SDLT

It is convenient to read these side by side. The effect is the same, though the wording differs.

The statute begins with the definitions of settlement/settled property, set out at 1.2 (Definitions of “settlement”). With that text in mind we can turn to the tax definition of bare trust, or what amounts to a definition:

<b>s.466 ITA</b>	<b>s.60 TCGA</b>	<b>Para 1,3 sch 16 FA 2003</b>
(3) Property is excluded for the purposes of subsection (2) +and so not “settled property” if—	(1) In relation to property	<b>Para 1(2)</b> In this Part a “bare trust” means a trust under which property is held by a person as trustee—
(a) it is held by a person as nominee for another person,	held by a person as nominee for another person,	[equivalent text is differently placed: see below]
(b) it is held by a person as trustee for another person who is absolutely entitled to the property as against the trustee, or	or as trustee for another person absolutely entitled as against the trustee,	(a) for a person who is absolutely entitled as against the trustee,

(c) it is held by a person as trustee for another person who would be absolutely entitled to the property as against the trustee if that other person were not an infant or otherwise lacking legal capacity.

or for any person who would be so entitled but for being an infant or other person under disability

or who would be so entitled but for being a minor<sup>65</sup> or other person under a disability, or

(6) References to a person who is or would be so entitled include references to two or more persons who are or would be jointly absolutely entitled as against the trustee.

(or for 2 or more persons who are or would be jointly so entitled),

(b) for two or more persons who are or would be jointly so entitled,

and includes a case in which a person holds property as nominee for another.

this Act shall apply as if the property were vested in, and the acts of the nominee or trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or trustee (acquisitions from or disposals to him by that person or persons being disregarded accordingly).

**Para 3(1)** Subject to sub-paragraph (2),<sup>66</sup> where a person acquires a chargeable interest [or an interest in a partnership]<sup>2</sup> as bare trustee, this Part applies as if the interest were vested in, and the acts of the trustee in relation to it were the acts of, the person or persons for whom he is trustee.

For CT, s.1169 CTA 2010 applies the IT definition by reference.<sup>67</sup>

### 85A.8.2 Bare trust terminology

65 Defined in ss(4): “In sub-paragraph (2) “minor”, in relation to Scotland, means a person under legal disability by reason of nonage.”

66 This exception concerns the grant of a lease by a nominee; see 93.28.3 (Bare trust).

67 “Chapter 2 of Part 9 of ITA 2007 (which relates to settlements and trustees) applies for the purposes of the Corporation Tax Acts as it applies for the purposes of the Income Tax Acts.”

The term “bare trust” is not used much in ITA, but is apt to describe trusts within s.466(3). The term “bare trust” is not used in TCGA, but s.60 is headed “Nominees and bare trustees”, which is close.

I use the following terms:

“**Bare trust**” (or “**nomineeship**”, the terms are for present purposes synonymous) is a trust of property:

- (1) within s.466(3) ITA/s.60 TCGA (ie, non-settled property for IT/CGT purposes; in short, someone is absolutely entitled as against the trustee) and
- (2) not within s.43 IHTA (ie, non-settled property for IHT purposes; in short, not held on trust for persons in succession or governed by provisions equivalent in effect).<sup>68</sup>

The two definitions (IT/CGT, and IHT) are not quite identical, but in practice they usually amount to the same.

This has become standard usage among UK private client practitioners, in the context of UK taxation. But it needs to be kept in mind, especially outside UK tax contexts, that the expressions bare trust/ nominee may not necessarily be used in this sense.<sup>69</sup>

“**Substantive trust**” is a trust that is not a bare trust.

The rule in s.60(1) TCGA<sup>70</sup> is the “**CGT bare trust disregard**”.

### 85A.8.3 *Entitled against trustee*

**s.466(5) ITA**

**s.60(2) TCGA**

**Para 1(3) sch 16 FA 2003**

<sup>68</sup> See ? (Definition of “IHT-settlement”).

<sup>69</sup> The old cases, and a variety of different senses of these somewhat imprecise terms, are assembled in *Re Blandy Jenkins* [1917] 1 Ch 46. That is mainly of historical interest, but may still be relevant in considering the meaning of bare trust/nominee in, say, trust or other non-tax legislation. See too see *Herdegen v FCT* (1988) 84 ALR 271 at p.281-282.

There has also been some debate as to whether what I call a bare trust should necessarily be described a “trust”; but that generally makes no difference for tax purposes.

<sup>70</sup> “this Act shall apply as if the property were vested in, and the acts of the nominee or trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or trustee (acquisitions from or disposals to him by that person or persons being disregarded accordingly).”

A person is absolutely entitled to property as against a trustee if<sup>71</sup> the person has the exclusive right to direct how the property is to be dealt with (subject to the trustees' right to use the property for the payment of duty, taxes, costs or other outgoings).

(2) It is hereby declared that references in this Act to any property held by a person as trustee for another person absolutely entitled as against the trustee are references to a case where that other person has the exclusive right, subject only to satisfying any outstanding charge, lien or other right of the trustees to resort to the property for payment of duty, taxes, costs or other outgoings, to direct how that property shall be dealt with.

In sub-paragraph (2)(a) and (b) the references to a person being absolutely entitled to property as against the trustee are references to a case where the person has the exclusive right, subject only to satisfying any outstanding charge, lien or other right of the trustee, to resort to the property for payment of duty, taxes, costs or other outgoings or to direct how the property is to be dealt with.

The phrase “absolutely entitled as against the trustee” marks the border between bare/substantive trusts. It is not as simple as it seems. The case law is conveniently summarised in *McLaughlin v HMRC*,<sup>72</sup> but it is not necessary to discuss this here.

#### 85A.8.4 *Tax treatment of bare trust*

The question whether a trust is classified as a bare/substantive trust is fundamental for tax:

- (1) A bare trust is transparent for CGT, and, generally, for IT/IHT.
- (2) A bare trust is not a settlement in the standard IT/CGT sense.
- (3) A bare trust is not an IHT-settlement.
- (4) A bare trust may be a settlement-arrangement.<sup>73</sup>

In short, a bare trust is not treated like a trust at all. In most cases a bare trust is ignored for tax purposes. But that is not an absolute rule. It turns

---

71 The context suggests that this is an exclusive definition: “if” means “if and only if”.

72 [2012] UKFTT 174 (TC) at [111].

73 In the case of a bare trust for the settlor, there is no bounty (gratuitous intent) and hence no settlement-arrangement; but there is a settlement-arrangement where a settlor creates a bare trust for the benefit of another person.

in each case on the tax provisions concerned. The rights of a beneficiary of a bare trust are different from the rights of a legal owner, and these differences can have tax as well as non-tax consequences.<sup>74</sup>

### 85A.9 3 ½ types of invalidity

In classifying an entity as a substantive trust, four rules of trust law/property law need consideration. In outline:

- (1) *Illusory trusts*: A trust which appears to take the form of a substantive trust, but which (on a careful construction) has only one beneficiary, is an *illusory trust* and invalid.
- (2) *Testamentary dispositions*: A testamentary disposition does not take effect during the life of the testator (purported settlor).
- (3) *Sham*: If a trust is a sham the (purported) trustees generally hold on bare trust for the (purported) settlor.
- (4) *General powers are tantamount to ownership*

In the first three cases the substantive trust is invalid. There may be a bare trust if the trust property is not vested in the name of the beneficial owner, but what matters is that there is no valid *substantive* trust.

In the fourth case the substantive trust may be regarded as invalid for some property law purposes but it is valid for trust law generally, and for tax law. Hence the heading of this section is “3½ types of invalidity”.

Much has been written on sham, and on illusory trusts, (rather less on testamentary dispositions). That focuses on the general law position, and the cases have mostly been insolvency/matrimonial law cases. I concentrate on the rules as they affect the tax position.

#### 85A.9.1 *When the issues arise*

These issues typically arise where a settlor desires:

- (1) to obtain desirable consequences of trusts, ie:
  - (a) tax treatment,
  - (b) succession law treatment, or

---

<sup>74</sup> For other aspects of bare trusts, see:

<b>Topic</b>	<b>See para</b>	<b>Topic</b>	<b>See para</b>
Remittance investment relief	18.3.1	ATED	93.28.3
Nominee partner	82.7	IHT definition of settlement	85A.6.3
s.87	57.3.2	Income taxation	14.8

- (c) insolvency/matrimonial (asset protection) treatment applicable to a substantive trust
- (2) to avoid unwanted aspects of trusts, and retain:
  - (a) benefits or rights equivalent to beneficial ownership, and
  - (b) control of trust property

Responses to this dilemma include:

- (1) Execute a discretionary trust in the common form, but administer the trust property as if it still belonged to the settlor. In short, the trust may be treated like a bank account. That takes us to the territory of sham.
- (2) Give the settlor a right of revocation or general power of appointment. That is fine for tax, but loses asset protection
- (3) Draft the trust to restrict the rights of beneficiaries other than the settlor; and to increase the rights of the settlor. That takes us to the territory of testamentary dispositions, illusory trusts, and general powers.

These rules apply to trusts but not to other entities such as companies.

One of the intuitions underlying the illusory trust rule, and the sham rule, though generally unexpressed, is that a settlor should not “have his cake and eat it”; if a person wishes to create a trust, they should not remain in exactly the same position as a beneficial owner. But this poor exhausted metaphor does not help analysis. It does not answer when a trust becomes illusory. The old cases on testamentary dispositions prevent the carrying out of this intuition very far, as it is clear that there may be a substantive trust even if the interest of the second beneficiary is a future interest of nil economic value.

## **85A.10 Illusory trust**

### *85A.10.1 Illusory: terminology*

The term “**illusory trust**” is not an established term of trust law.<sup>75</sup> I use it to describe a trust which

- (1) at first glance, seems to be a substantive trust but

---

<sup>75</sup> The word illusory has a long legal history, but the concept of illusory trusts starts with Mowbray, “Shams, Pretences, Blackmail and Illusion” [2000] PCB 105.

(2) when carefully construed, confers rights only on the purported settlor

The terminology is currently controversial. In *Clayton v Clayton*:<sup>76</sup>

we do not see any value in using the “illusory” label: if there is no valid trust, that is all that needs to be said.”

Likewise *Mezhdunarodniy Promyshlenniy Bank v Pugachev*:<sup>77</sup>

the word is not helpful and I will only use it in this judgment as a label.

These objections are misplaced. We need labels and the term conveniently expresses a specific ground of invalidity. To describe a trust as “invalid” is not to say all that needs to be said. There are numerous reasons which may render a trust invalid and we need words to say what the reason is. Strictly, perhaps, it is not the trust, but the interests of the (non) beneficiaries which are illusory, but it comes to the same thing.

*Webb v Webb* proposed the term “objective nullity”<sup>78</sup> (objective, to distinguish the concept of sham, which depends on the parties’ subjective intention). But that term is no better. It would also be apt to describe a trust which is void for perpetuity, say, or void because the purported settlor had no mental capacity. But those are different grounds for holding a (purported) substantive trust to be invalid.

#### 85A.10.2 *When is a trust illusory*

Whether a trust confers rights on more than one beneficiary is a question of construction.

Lewin on Trusts says:

The reservation by the settlor of large beneficial powers and interests may leave the lifetime trusts declared in favour of others so squeletic<sup>79</sup> as to be considered illusory.<sup>80</sup>

This is no doubt correct, but it begs the question of what are the “large

76 [2016] NZSC 29 at [123].

77 [2017] EWHC 2426 (Ch) at [169].

78 [2020] UKPC 22 at [73].

79 This word is not in the OED, but one of the authors of Lewin tells me it means: skeletal.

80 20th ed, 2020, para. 1-014.

beneficial powers and interests” which are required to render the “trusts in favour” of others as illusory.

I start with what is not sufficient:

- (1) It is well established that a settlor (“S”) may create a valid trust conferring a life interest on S, with power of revocation exercisable by S, and subject to that, for R. The reversionary interest of R is not classified as illusory.
- (2) A trust may confer a general power of appointment; but the interests of beneficiaries subject to that power are not illusory.

In each case, the other beneficiaries’ interest has a nil economic value and a lifetime settlement of this kind may have in substance the same effect as a will. The cases are not consistent with any requirement of economic value. In determine whether there is a substantive trust, it is not helpful to ask whether a person’s interest is “squeletic”.<sup>81</sup> The question is whether the person has an interest at all. The question is: can they sue for breach of trust. If not their interest can properly be called illusory.

There are three examples in recent cases. The first is *Re the AQ Revocable Trust*. The facts were very strong. The settlor was sole trustee. He was entitled to income and such capital as the trustees (ie the settlor) should determine. He was (importantly) entitled to release trustees from liability. The interests of beneficiaries (other than the settlor) during the settlor’s lifetime were held to be illusory and the rest was testamentary:

[29] ... the concatenation of rights and powers in the settlor, when coupled with the fact that he was the sole trustee at the time of the constitution of the trusts, rendered this trust illusory during his lifetime. ... the cumulative effect of the trust documents, when taken with the de facto situation, means that the settlor as trustee could not effectively be called to account during his lifetime. Crucial to this conclusion is art VIII H, which allows the settlor to absolve himself as trustee from any and all breaches of trust.

This clause provided:

The written approval by the Donor [the settlor] of any trust transaction

---

81 Readers who are not convinced that the word “squeletic” adds much to trust jurisprudence will prefer not to use it.

during his lifetime shall be a complete release of the Trustee (including the Donor) of any liability or responsibility of the Trustee to any person with respect to this transaction.

Palmer argues, I think correctly, that this clause alone is sufficient to show that the trust is illusory.<sup>82</sup> But the Court did not have to go that far:

While it may be that I would not have come to that conclusion had art VIII H been coupled with a distinct and independent trustee, in this case it is the combination which pushes it over the top. Given that the trust agreements are constituted on their face with the settlor as sole trustee, and that no further appointment was made at the time, I consider that arts I and II were void on the face of the documents at the inception of the trust agreements, and that the remaining trusts created by the agreements were therefore testamentary in nature.<sup>83</sup>

The next case is *Clayton v Clayton*. The settlor was sole trustee and a beneficiary. The trust provided that a trustee who is a beneficiary may exercise trustee powers in their own favour. In New Zealand the High Court found for invalidity. The Court of Appeal took the opposite view: the terms of the trust did not erode Mr Clayton's obligation as trustee to act honestly and in good faith; and other beneficiaries were able to enforce that obligation. On that basis the trust was not illusory.<sup>84</sup> The Supreme Court was split and chose to leave the question for another day.<sup>85</sup>

*Pugachev* is the first case in the English courts.<sup>86</sup> Here the settlor was

82 Palmer, "Controlling the Trust" (2011) 12 Otago LR 473

<http://www.nzlii.org/nz/journals/OtaLawRw/2011/3.html>

83 *Re the AQ Revocable Trust*, also reported under the name *BQ v DQ*, [2010] SC (Bda) 40 Civ.

84 [2015] NZCA 30 at [80]: "... once a court accepts, after an examination of all the relevant evidence relating to the settlor's intentions, that a valid trust has been established and is not a sham, the trust should not be able to be treated as non-existent because the trustee has wide powers of control over the trust property."

85 [2016] NZSC 29 at [127]: The issue was "a matter of some complexity on which the court does not have a concluded unanimous view. In light of that, we do not intend to determine the issue because the settlement of the proceedings makes it unnecessary to do so."

86 *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch). This concerned a New Zealand trust, but the parties agreed that English/New Zealand law were the same on this point.

protector and beneficiary. The trust provided that the protector may remove trustees without cause. The trust was held to be illusory.

Strictly speaking, each case is a matter of construction and turns on the words of the trust deed. But effectively, the English Court preferred the approach of the New Zealand High Court in *Clayton* to that of the NZ Court of Appeal.

The fourth case is *Webb v Webb*, see below.

### 85A.10.3 *How far can the drafter go?*

In the 2016/17 edition of this work I said: “It would be wise for the trust drafter to keep a little distance from this still rather indeterminate boundary.” That seems confirmed by the decisions in *Pugachev* and *Webb*.

Trust practitioners have criticised these decisions for the construction of the particular trust deeds and for lack of clarity of analysis.<sup>87</sup> Some good points can be made. But I think my advice remains sound.

How far can the drafter go? The answer depends on whether the settlor wants (1) asset protection or (2) only the tax consequences of creating a settlement. The latter is easier, for instance, a revocable trust has the tax consequences, without providing asset protection.

In general, it is suggested that if a settlor is a beneficiary, they should not also be protector.

### 85A.10.4 *Reserved powers legislation*

Most tax haven jurisdictions have legislation which states that the reservation of specified powers to the settlor will not invalidate the trust. Details vary. One can have an entity which in English law is a bare trust and under the governing law is a substantive trust. But a UK court, applying a UK tax statute, is not bound to treat an entity as a settlement (within the UK tax definitions) just because the foreign law says it is valid.<sup>88</sup>

---

87 Brightwell, “*Mezhprom v Pugachev*: bold new approach or illusory development?” [2018] *Trusts & Trustees* p. 398; Nitikman. “More about illusory trusts” [2021] *Trusts & Trustees* p.69.

88 See 86.1.2 (Foreign law terminology).

## 85A.11 Testamentary disposition

### 85A.11.1 *Why testamentary matters*

English law (and foreign laws which adopt common law principles) distinguish between:

- (1) testamentary dispositions
- (2) non-testamentary dispositions (which might be called “lifetime dispositions”)

The distinction matters for many reasons including the following:

- (1) Formalities: Stricter formalities apply for the validity of a testamentary disposition (eg 2 witnesses are usually required).
- (2) Rules of revocation: A testamentary disposition is normally revoked by making a new will or by marriage. These events do not normally revoke a non-testamentary disposition.
- (3) Date disposition takes effect: A testamentary disposition takes effect on death. A lifetime disposition normally takes effect when executed. If a disposition which creates a trust is a testamentary disposition, the trust must be a bare trust during the life of the settlor/testator.

Statute law recognises and indeed requires a testamentary/non-testamentary distinction but gives no guidance on where to draw the line.<sup>89</sup> The testamentary/non-testamentary distinction derives from 19<sup>th</sup> century case law, but it is being applied now in new contexts.

### 85A.11.2 *What is testamentary?*

A disposition is testamentary if it is the intention of the writer of the document “that death was the event that was to give effect to it”.<sup>90</sup>

A disposition which confers a life interest on the settlor and also a power of revocation is in principle a valid lifetime substantive trust, not

---

<sup>89</sup> Section 1 Wills Act 1837 merely states that the term “will” includes a testamentary disposition.

<sup>90</sup> *Milnes v Foden* (1890) 15 PD 105 at p.107; or (which comes to the same thing) “it is dependent on the death for its vigour and effect”; *Cock v Cooke* (1866) 1 P&D 241 at p.243. If the document calls itself a will, the intention is obvious, but it is not necessary to use the word “will”. For instance, a conveyance “not to take effect until after my decease” is testamentary: *In the Goods of Morgan* (1866) 1 P&D 214.

testamentary. In *Thompson v Browne*:<sup>91</sup>

If there be anything in that decision [*Attorney-General v Jones*] to support the notion, that where a person by deed settles property to his own use during his life, and after his decease for the benefit of other persons, a power of revocation reserved in such a deed alters the character of the instrument, and renders it testamentary ... I can only say that, if this were law, a great number of transactions of which the validity has never been doubted would be liable to be impeached.

Likewise a trust may confer a general power of appointment. The remainder beneficiaries of a trust in this form have an equitable interest from the date of the gift, known as a present future interest. They could take proceedings in the event of a breach of trust. However in practice this may be a theoretical possibility only. The difference between a testamentary disposition and a trust of this kind is then one of form and not one of substance. There is no economic difference. Their interest has a nil economic value.

In cases of this kind it may be harder to construe the document and determine whether the intention of the writer is:

- (1) to confer a present future interest or
- (2) that death is the event which gives effect to the document.

Since it makes no practical (economic) difference, the writer of the document may not have formed a clear intention on the point, or even if they have, they may not have expressed that intention clearly in the document. In these cases the form of the document is an important guide to construction. If the document takes the form of a will, (ie describing itself as a will and executed with the formalities of a will) the intention of the writer must be that it is testamentary. If it takes the form of a lifetime settlement (ie describing itself as such and executed as a deed), the intention of the writer must be that it is a lifetime disposition. Of course the form of the document is not decisive. The context may show otherwise. However, the form certainly gives some indication of intention, and in the absence of contrary indications it should be determinative.

---

91 (1835) 3 My & K 32. The point is also stated in *Baird v Baird* [1990] 2 AC 548 at p.556.

Thus in *Corlet v Isle of Man Bank Limited* [1937] 3 DLR 163, and *Anderson v Patton* [1948] 2 DLR 202 lifetime trusts conferred what one might regard as minimal future revocable interests on beneficiaries other than the settlor, but the trusts were not testamentary. The latter case concerned a document reciting:

received from A \$5,000 which I am to hold in trust for A and which I am to pay out as instructed to X and Y if anything should happen to A. The money will be returned if A should demand it.

The court held by a majority that even this was non-testamentary. The reader may prefer the minority view that this should have been construed as testamentary.

## 85A.12 Sham

The sham rule is (in short) that a trust is invalid if the settlor (and trustees) lack the intention to create a substantive trust.

The word sham has a long legal history, though I do not think anyone thought much about sham trusts before *Rahman v Chase Bank (CI) Trust Co.*<sup>92</sup>

*JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* comments on terminology.<sup>93</sup>

Despite the frequent references to a “sham trust”, there is not really any such thing. What may or may not be a sham are the acts or documents which purport to set up the trust.

It seems to me that “sham trust” is a convenient term to describe what purports to be a trust, but is invalid under the sham rule: the objection is pedantic.

I do not consider this further here, as the case law is extensive, and it has been fully written up elsewhere.

## 85A.13 General power

### 85A.13.1 *General powers terminology*

The term “**general power of appointment**” is a term of trust law and

---

92 [1991] JLR 103.

93 [2017] EWHC 2426 (Ch) at [169].

(subject to context) will have its trust law meaning.

I refer to the person who exercises a power of appointment as “the trustees” (if the power is vested in trustees) or the “**powerholder**” (if the power is vested in an individual). The traditional trust law term is “donee” (that is, the person to whom the power is given) or “appointor” (that is, the person exercising the power).

Powers are either:

- (1) general powers or
- (2) not general powers: the American terminology “**non-general**” is the clearest word. The traditional trust law term is “special power”; one sometimes sees “limited power”.

The cases are mostly old trust law cases, as general powers are not much used nowadays. However general powers do crop up in some tax planning contexts so the law is not of merely academic interest.

### 85A.13.2 *Why general powers matter*

The concept of general powers matters in the following tax contexts:

Term	Topic	See para
General power of appointment	Who is settlor	94.14
Settlement powers	IHT; who is settlor	94.15

These are somewhat niche topics.

For many purposes trust/property law recognises the commercial reality and the powerholder is treated in the same way as the owner. In *Re Triffitt*:<sup>94</sup>

where there is a completely general power in its widest sense, that is tantamount to ownership.

This is particularly important for matrimonial and insolvency (asset protection) rules:

- (1) The holder of a general power must use it to pay their debts before voluntarily using it to benefit others.
- (2) If an insolvent holder of a non-fiduciary power (such as a power of revocation) refuses to exercise the power in their own favour, the

---

94 [1958] Ch. 852 at p.861.

courts will appoint a receiver who can exercise the power.

### 85A.13.3 *What is a general power?*

*In Re Dilke*:<sup>95</sup>

General powers are such as the donee can exercise in favour of such person or persons as he pleases, including himself.

[Non-general powers] are such as the donee can exercise only in favour of certain specified persons or classes.

Powers vested in trustees are not likely to be construed to be general powers, as trustees cannot in principle use their powers to benefit themselves. But it is a question of construction. Different considerations apply if the settlor is trustee.

In *TMSF*<sup>96</sup>, the settlor was a beneficiary and had a power of revocation. The power of revocation was a property right that the settlor could be required to give to his receivers, in short, a general power.<sup>97</sup>

### 85A.13.4 *Validity of trust with general powers*

The commercial reality is that a general power is equivalent to ownership. But there are differences: if the powerholder dies without exercising the power the property will go as in default of appointment, and not under the will or intestacy of the powerholder, and the powerholder may not be entitled to income arising before an appointment.

The trust is a substantive trust for tax purposes.

## 85A.14 **Invalidation rules compared**

### 85A.14.1 *Illusory/testamentary rules compared*

A trust may be illusory but not testamentary. However, the marginally substantive trusts which have given rise to recent cases concern trusts where:

---

95 [1921] 1 Ch 34 at p.42 citing *Farwell on Powers* (3rd ed., 1916), p.8.

96 *TMSF v Merrill Lynch Bank* [2011] UKPC 17.

97 See Russen, “The Reserved Powers Trust; when might Power be Property” [2013] JITTCP 239.

[http://www.maitlandchambers.com/images/uploads/documents/JR\\_Reserved\\_powers\\_trust\\_30.09.13.pdf](http://www.maitlandchambers.com/images/uploads/documents/JR_Reserved_powers_trust_30.09.13.pdf)

- (1) trust provisions during the lifetime of the settlor may be illusory; and
- (2) trust provisions after the death may be testamentary

Factors which suggest that the intention of the writer of the document is testamentary will also tend to show that there was no intention to confer any interest on a beneficiary during the lifetime of the settlor, so the two rules overlap. But they are distinct concepts:

- (1) In the case of an illusory trust, the question is whether a beneficiary other than the settlor has any rights.
- (2) In the case of a testamentary trust, there would be someone who is intended to benefit after the death of settlor/testator, and the question is whether they are intended to have rights immediately or not until the death of the settlor.

#### 85A.14.2 *Sham/illusory trust compared*

The sham rule is distinct from the rules a trust may be classified as a testamentary disposition or an illusory trust. The difference is that:

- (1) Sham depends on the subjective intention of the parties as, typically, shown by their conduct after the creation of the trust.
- (2) The testamentary/illusory trust rules depend on the construction of the document, which is a question of law and an objective matter.<sup>98</sup>

But in practice where it is the intention to create a testamentary disposition or bare trust, the testator/beneficial owner will not have, or manifest, the intention to create a substantive lifetime trust, so these points may all be argued.

In *Webb v Webb*:

87. There is, however, no inconsistency between the finding by Potter J, upheld by the Court of Appeal, that the trusts are not shams and a conclusion that Mr Webb's attempts to create the trusts have failed or are defeasible. Acceptance that Mr Webb intended to create trusts does not in any way preclude a finding that he reserved such broad powers to himself as settlor and beneficiary that he failed to make an effective disposition of the relevant property. ...

---

98 See *Clayton v Clayton* [2015] NZCA 30 at [78]: "the two concepts [sham and illusory trust] are quite different and the distinction is important."

In fact a finding that a trust is illusory is logically inconsistent with a finding of sham. An illusory trust fulfils the settlors' intention which is to retain control and beneficial ownership. But the consequence - invalidity - is the same, so it does not generally matter for practical purposes.

### 85A.14.3 *Illusory trust/general powers compared*

In *Webb v Webb* the terms of the trust were extreme. The settlor was sole trustee. The trust was established for two beneficiaries, the settlor and his son. The settlor as trustee was permitted to exercise the trust's powers notwithstanding that his interests may conflict with his duties as trustee. The settlor had power to nominate himself as sole beneficiary in place of the existing beneficiaries. This power was not subject to any fiduciary duty. I could go on. In short, the settlor had power to arrange that he alone would hold the trust property on trust for himself alone.

In these circumstances:

89. ... the powers reserved to Mr Webb under the trust deeds may be analysed in two different ways.

[1] One is to consider whether those powers were so extensive that Mr Webb can be said never to have disposed of any of the property purportedly settled on or acquired by the trusts. In this connection one might also ask whether the trusts lacked the irreducible core of obligations owed by trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust.

[2] The other is to ask whether the powers reserved to Mr Webb were so extensive that in equity he can be regarded as having had rights which were tantamount to ownership. ...

in this case it can make no difference to the outcome which of these two analytical routes is taken. I will therefore confine myself to the substantive question whether Mr Webb's powers under each of the trust deeds were such that, in equity and in all of the circumstances of this case, he can be regarded as having had rights in the trust assets which were indistinguishable from ownership. In my view he plainly can... In my opinion ... the trust deeds failed to record an effective alienation by Mr Webb of any of the trust property. The bundle of rights which he retained is indistinguishable from ownership.

That seems self-evident. The important question for tax is the question which the Court chose not to decide: was the trust an illusory trust, or was

it a valid substantial trust with a general power? One would hope, the latter. So the trust would be an settlement within the UK tax definitions.

### 85A.15 Consent powers

The question arises as to the classification of a power to appoint to whoever the powerholder directs, subject to the consent of a second person. I refer to that as “**a consent power**”.

It is considered that a consent power is not a general power. This was decided in *Re Churston* and is clearly right on principle:

the reason why a general power of appointment in the ordinary sense starts a new settlement, and has not got to be read back into the original settlement, is because the property is treated as vesting in the donee of the general power, though it is not quite strictly accurate to say that it does so; or, in other words, that the test really is: is there somebody who for all practical purposes can be treated as the owner? <sup>99</sup>

A consent power is not the equivalent of ownership.

*Churston*, it seems to me, successfully cleared up a confusion left by three earlier cases: *Watts*, *Dilke*, and *Philips*. It is necessary for completeness to consider these cases to explain that confusion.

In *Re Watts*,<sup>100</sup> a consent power was also held not to be a general power. In this case however the court laid some stress on particular features of the power concerned:

- (1) The consent power was conferred by a trust made in consideration of marriage.
- (2) The consent power was exercisable during the lifetime of the consentor.
- (3) The consentor had to consent both to the exercise of the power of revocation and to the exercise of the power of new appointment.

But as *Churston* pointed out, these features have no bearing on the central question of whether the power is equivalent to ownership.

I cannot think that for the purpose of applying the rule against perpetuities a power to appoint as A thinks fit with the consent of B can

---

99 [1954] Ch 334 at p.347.

100 [1931] 2 Ch 302.

have a different effect according to whether it is in a marriage settlement or in any other settlement.<sup>101</sup>

Quite so.

a power to A to appoint to anybody he thinks fit during the life of B would be a general power of the common kind, though it could not be exercised after the death of B; by the terms of its creation it would thereupon cease to be a power at all. Likewise, a power to A to appoint to anybody he might think fit during a period of 21 years would appear to me to be a general power of the common kind, though obviously it could not be exercised after the expiration of the term of 21 years...<sup>102</sup>

Quite so.

Then he said that regard must also be had to the fact of “her consent in writing being given both to the exercise of the power of revocation and to the exercise of the power of new appointment.” Again, I cannot appreciate the bearing of that. The two things are different things.<sup>103</sup>

So in conclusion:

I therefore cannot say that I can see any real ground of distinction on those facts between *In re Watts* and *In re Dilke* and *In re Phillips*, neither of which, as far as I can make out, really throws any particular light on the present question.<sup>104</sup>

So the decision in *Watts* was correct; but not on the ground that its consent power was different from powers which *Dilke* and *Phillips* considered to be general powers; but on the ground that those cases were not relevant to the definition of “general power”.

What were those two cases? *Re Dilke*<sup>105</sup> concerned a consent power which the powerholder exercised so as to confer a general testamentary power on herself, which did not require a consent.<sup>106</sup> The question was

---

101 [1954] Ch 334 at p.342.

102 [1954] Ch 334 at p.342.

103 [1954] Ch 334 at p.342

104 [1954] Ch 334 at p.343

105 [1921] 1 Ch 34.

106 [1921] 1 Ch 34. It seems that this was done because of a concern that the donee may lose mental capacity. I suspect there were death duty implications; but it does not matter.

whether the consent power was validly exercised. This was a question of construction, and the exercise of the power was rightly held valid. The court described the power as “a general power of appointment to be exercised with certain consent”. The question whether the consent power had to be categorised as a general power did not arise and I do not think that the court decided it.

*Re Phillips*<sup>107</sup> concerned the insolvent powerholder rule: the holder of a consent power exercised the power and then died insolvent. The question was whether the appointed funds were available for the disappointed creditor – and it was held that they were. The case could have been decided on the basis that the consent power was a general power; but it could equally have been decided on the basis that the insolvent powerholder rule applied on the exercise of a consent power even though it was not a general power: “the equity of the creditors is as strong as if it were an unfettered general power which the testator could exercise without consent.” The court did not clearly distinguish the two possible analyses, but the consent power was not held, or at least not clearly held, to be a general power.

*Churlston* was approved in *Re Triffitt's Settlement*, which again concerned a consent power:

for the purposes of the rule against perpetuities, a power such as I have read must be treated as a special or limited power. That seems to be the effect of *In re Watts* and *In re Churston Settled Estates*.<sup>108</sup>

*Churlston* also decided that a joint power (a power to appoint to whoever two persons jointly direct) is similarly not a general power.

#### 85A.15.1 *General power varying trust*

---

107 [1931] 1 Ch 347.

108 [1958] Ch 852 at p.861. For completeness: the Judge continued: “... On the other hand, under the now obsolete Legacy Duty Act, 1796, it would seem that a power in these terms has the character of a general power: see *Platt v Routh* (1841) 3 Beav 257.” But *Platt v Routh* did not concern a consent power, but a general testamentary power exercisable by will in favour of anyone in the world other than three named families; so this is not relevant here.

*Re Churlston* was also approved in *Tasarruf Mevduati Sigorta Fonu v Merrill Lynch Bank and Trust Co* [2011] 4 All ER 704.

A general power of appointment (whether testamentary or not) may be used:

- (1) in a manner which creates a new trust, or
- (2) in a manner which merely varies an existing trust.

In case (2) it is considered that the powerholder is not in principle the settlor, but is in the same position as a person who consents to the exercise of a power.<sup>109</sup>

### **85A.16 Conflict of laws**

Common law jurisdictions generally follow English law principles; indeed the cases cited above are drawn from multiple jurisdictions. But the terms of the statutory trust laws of tax haven jurisdictions would need consideration.

I would be interested to hear from Scottish readers if Scots law is the same.

In civil law jurisdictions it should not be assumed that common law principles apply. It may be that:

- (1) a trust would be void as a sham, or illusory, under English law principles; but
- (2) it is valid under its proper law, perhaps some civil law jurisdiction which recognises trusts or trust-like entities, but does not share our concept of sham.

#### 85A.16.1 *Conflict: Sham*

The validity of a trust is a matter of the governing law, and UK tax must be applied on the basis that the trust has effect according to its terms.

It may be that:

- (1) a trust would be classified as illusory under English trust law principles; but
- (2) it is not classified as illusory under its proper law.

#### 85A.16.2 *Conflict: Illusory trust*

The question of what are the rights of the beneficiaries are a matter for the proper law; but if in fact they have no rights, then it is considered that it

---

<sup>109</sup> The position is analogous to 94.22 (Resettlement by beneficiaries).

should be classified as a bare trust or nomineehip, for UK tax purposes.<sup>110</sup>

Reserved powers provisions in foreign trust laws make no difference:

- (1) They may merely declare the common law rules<sup>111</sup>
- (2) If they seek to do more, they are misguided and ineffective. Whether a trust instrument is a bare trust (nomineehip) is a matter of construction. If, properly construed, it is a nomineehip, it is not invalid as such and a statutory provision cannot turn it into an substantive trust.
- (3) Whatever effect they have in their own jurisdiction, they do not affect the construction of UK tax statutes which will treat the illusory trust as a bare trust.

It may be that:

- (1) a trust would be classified as testamentary under English law principles; but
- (2) it is not classified as testamentary under its proper law.

English law may recognise the validity of the testamentary provision under the Wills Act 1963. If the disposition is void in English law but valid in foreign law, the applicable conflict of law principles must be applied to see which legal system has priority. The starting point is the domicile of the settlor and the situs of immovable property. Prior to the death, there is a bare trust, at least for UK tax purposes, just as for an illusory trust.

This particular conflict issue arises with American grantor trusts, see 86.5 (US grantor trust).

---

110 Another possible analysis is that the settlor has a general power over non-settled property. A general power over non-settled property is property for IHT purposes; in particular, it is not a “settlement power” (which is disregarded for IHT purposes).

111 In *Re the AQ Revocable Trust* at [17] the court held that reserved power provisions in the then Bermudan trust legislation merely codified the common law rules (though the Bermudan law has since changed).

## FOREIGN ENTITIES

86.1

### 86.1 Foreign entities: Introduction

UK tax law categorises entities as:

- (1) Legal persons, such as companies, trustees and PRs<sup>1</sup>
- (2) Entities which are not legal persons, such as trusts and English partnerships

With more or less difficulty (depending on the similarity of the law of the country concerned) it may be necessary to shoehorn foreign entities into these categories; or more accurately, it is necessary to decide whether references to companies, partnerships, trusts, persons, etc, in any particular statutory provision include some particular foreign entity. For in general, references to companies, partnerships, trusts, etc are not restricted to UK entities.<sup>2</sup>

Similarly, it is necessary to decide whether technical terms such as “share capital” or “interest in possession”, or less technical terms such as “interest in”, are apt to include rights in or under foreign entities.

*Memec v IRC* explains the general approach:<sup>3</sup>

When an English tribunal has to apply the provisions of an UK taxing statute to some transaction, arrangement or entity which is governed by a foreign system of law, the tribunal must take account of the rules of that foreign system (properly proved if not admitted) in order to

---

1 This list is not comprehensive.

2 LLP is an exception as this term is defined to mean a UK LLP; see 82.20.1 (Definition and nature of LLP).

3 71 TC 77 (HC) at p.92, approved *Anson v HMRC* [2015] UKSC 44 at [51].

determine the nature and characteristics of the transaction, arrangement or entity. But having informed itself in this way, the tribunal must then apply the taxing statute as part of English law.<sup>4</sup>

I refer to this as the “**common-law *Memec* approach**”.

Thus the question whether a reference to (say) a trust or trustee, in any particular statutory provision, includes some particular foreign entity or person, raises some fundamental questions:

- (1) What is the definition, or determinative characteristics, of a trust or trustee (within the meaning of the section), a question of UK law; and
- (2) Does the foreign entity or person have those characteristics, a question of the foreign law.

Similar issues arise in the application of DTAs to foreign (and UK) entities, for instance, whether an entity is a “person” or a “body corporate” for the purpose of a DTA. Similar issues arise in non-tax contexts.<sup>5</sup>

Other countries generally adopt the same approach:

11. In most [OECD] Member countries, as a matter of principle, tax laws apply on the basis of the legal relationship deriving from other branches of the law. Thus the tax laws of these countries, when referring to partnerships, will, absent special tax definitions, refer to those entities that constitute partnerships according to domestic civil or commercial law.

12. Difficulties often arise, however, where income is derived by [arises to] an entity organised under the laws of another jurisdiction. In that case, the entity will have to be classified for purposes of the application

---

4 If further authority is needed, which I doubt, see Rowlatt J in *Garland v Archer-Shee*: 15 TC 693 at p.711: “...it is not a question of American law whether something is or is not within the Income Tax Acts. The question of the American law is, what are exactly the rights and duties of the parties under an American trust, and when you find what those rights and duties are, you see what category they come in, and the place they fill in the scheme of the English Income Tax Acts which the courts here must construe.” This passage was approved in *Rae v Lazard* 41 TC 1 at p.31, and again in *Memec* 71 TC 77 at 111.

5 See for instance s.1208 Companies Act 2006: “partnership” means—  
 (a) a partnership within the Partnership Act 1890, or  
 (b) a limited partnership registered under the Limited Partnerships Act 1907, or a firm or entity of a similar character formed under the law of a country or territory outside the UK.

of the tax laws of the country where the income is derived, regardless of whether or not that classification is compatible with the civil or commercial law system of the jurisdiction from which the entity derives its legal status.

13. For example, if the tax system of a country recognises only individuals, companies and partnerships (but not trusts) as taxpayers and provides for a different tax treatment for these three types of taxpayers, that country will have to ‘force’ foreign entities in one or the other of these categories (with more or less difficulty depending on the similarity of the civil and commercial law of the countries concerned) for purposes of applying its tax system to domestic income derived by these foreign entities.

14. In doing so, the practice of most countries is to adopt the same approach as the one they apply in a purely domestic context. They will therefore apply their domestic tax classification to foreign entities on the basis of the foreign law’s legal characteristics of the entity. In the previous example, the country, for the purposes of taxing the domestic income of a trust established under the law of a foreign jurisdiction, will typically examine the legal characteristics of the trust as they derive from the trust law of the foreign jurisdiction in order to determine whom it should tax and whether that person should be taxed as an individual, company or partnership, which are the only categories recognised under its tax law.<sup>6</sup>

US law adopts the same approach.<sup>7</sup> In *Biddle v Commissioner*<sup>8</sup> the issue was whether tax deducted at source on a dividend by a UK company<sup>9</sup> was regarded as “tax paid by a shareholder” for the purposes of a US statute:

---

6 OECD, “The Application of the OECD Model Tax Convention to Partnerships” (1999) available (at a small charge) from <http://www.oecd.org>

In Ireland this approach was adopted in *Quigley v Harris* [2008] IEHC 403. In that case the approach was said to derive from the principle of comity of nations, that is, that the courts of one jurisdiction recognise and give effect to rights and obligations relating to foreign entities, in accordance with the law of the state where the entity is established.

7 Subject of course to express statutory rules, such as the US “check-the-box” rules; see 86.34.1 (LLCs: US law background).

8 302 U.S. 573 (1938).

9 Before the introduction of Corporation Tax.

At the outset it is to be observed that decision must turn on the precise meaning of the words in the statute which grants to the citizen taxpayer a credit for foreign “income taxes paid.” The power to tax and to grant the credit resides in Congress, and it is the will of Congress which controls the application of the provisions for credit. The expression of its will in legislation must be taken to conform to its own criteria unless the statute, by express language or necessary implication, makes the meaning of the phrase “paid or accrued,” and hence the operation of the statute in which it occurs, depend upon its characterization by the foreign statutes and by decisions under them. ...

... The phrase “income taxes paid,” as used in our own revenue laws, has for most practical purposes a well understood meaning to be derived from an examination of the statutes which provide for the laying and collection of income taxes. It is that meaning which must be attributed to it as used in § 131.

Hence the board’s finding... that “the stockholder receiving the dividend is regarded in the English income tax acts as having paid ‘by deduction or otherwise’<sup>10</sup> the tax ‘appropriate’ to the dividend” is not conclusive. At most it is but a factor to be considered in deciding whether the stockholder pays the tax within the meaning of our own statute. That must ultimately be determined by ascertaining from an examination of the manner in which the British tax is laid and collected what the stockholder has done in conformity to British law and whether it is the substantial equivalent of payment of the tax as those terms are used in our own statute.

The same approach applies when *UK* law non-tax issues arise in a tax context:

The law of tax is not an island entire of itself. Unless a taxing statute says to the contrary the right of the state to charge tax in relation to a given transaction is subject to the effect of that transaction as defined by the general law.<sup>11</sup>

The only difference is that English law is regarded in English courts as law (and so to be argued by Counsel); and foreign law is regarded as fact (and so to be proved by evidence).<sup>12</sup>

---

10 See App.2.4.1 (Bear tax by deduction or otherwise).

11 *AC v DC* [2012] EWHC 2032 (Fam), 15 ITEL R 811, at [31].

12 See 86.45 (Proof of foreign law).

So far as the topic raises issues of foreign law I necessarily rely on limited material available to an English lawyer. I would be interested to hear from readers with expertise on entities discussed in this chapter, and in particular if they disagree with HMRC official views.

A fuller discussion of the deeply intriguing issues raised in this chapter would need a book to itself.

### 86.1.1 *Foreign-entity definitions*

Statutes occasionally contain definitions which formulate the common-law *Memec* approach. For instance this definition of partnership:

“partnership” includes an entity established under the law of a country or territory outside the UK of a similar character to a partnership

Likewise this definition of trust:

“trust” includes arrangements-

- (a) which have effect under the law of a country or territory outside the UK, and
- (b) under which persons acting in a fiduciary capacity hold and administer property on behalf of other persons<sup>13</sup>

The definition of partnership adds nothing to the common-law *Memec* approach, and so its omission also means nothing. The definition of trust sheds confusion rather than light, for the expression “fiduciary capacity” is notoriously vague. It is best regarded as another attempt to formulate the common-law *Memec* approach in words, so it also has no actual effect.

Likewise para 4(6) sch 1B TCGA:

In applying the domestic concepts of law mentioned in this paragraph to land outside the UK, this paragraph is to be read so as to produce the result most closely corresponding with that produced in relation to land in the UK.

---

13 These trust and partnership definitions are both to be found in:

- s.517N(4) ITA (= s.356ON CTA 2010) (transactions in land); see 21.18 (Tracing value)
- Para 11 sch 4 FA 2019 (profit fragmentation); see 50.19 (“Partnership”/Trust”) The foreign-entity definition of partnership is slightly more common, dating back to s.57 Pensions Act 2004. The foreign-entity definition of trust derives from s.6B Building Societies Act 1986 (inserted 1997).

In practice I doubt if anyone takes much notice of statutory foreign-entity definitions.<sup>14</sup> It is unfortunate that statutes should be cluttered up with provisions of this kind; they are misguided. But there it is.

### 86.1.2 Foreign law terminology

The fact that a foreign law describes, classifies or defines an entity as, say, a trust or company, does not entail that the entity is necessarily a trust or company in UK law, or for the purposes of UK tax. In *HMRC v First Nationwide*:<sup>15</sup>

The meaning of the word [dividend] in the tax legislation is a matter of English law not of Cayman law.

Although Cayman law uses the word “dividend” to cover the distributions made in the present case ... it does not follow that the Preference Dividends are therefore “dividends” with the meaning of the UK tax legislation.

The CTM provides:

**CTM80152 Groups: Group Relief And Partnerships [Dec 2019]**

... Institutions organised outside the UK and considered to be partnerships in their home territory may be ‘companies’ for the purposes of group relief, depending on the facts and circumstances of the institution concerned. Classification under UK law does not necessarily follow treatment in the home territory. ...

If the foreign law is sufficiently similar to UK law, it is considered that a foreign law description or classification of an entity ought to be relevant, though not decisive; but in practice, in the event of a dispute, the question whether the foreign law is “sufficiently similar” is likely to be contested.

In *Columbus Container Services* the advocate-general observed:

At the current stage of development of Community law, it does not require member states to recognise in their territory the legal and tax

---

14 Except in relation to LLPs. Since the term LLP means a UK law LLP, a provision of this kind is needed to extend the meaning to include foreign LLPs.

15 [2011] UKUT 174 (TCC) at [23]. The point was not doubted on appeal. Other examples: a US grantor trust is not a trust for UK tax purposes, see 86.5 (US grantor trust); and a US limited liability company is not a company for UK tax purposes, see 86.34.1 (LLCs: US law background).

status afforded by the domestic law of the other member states to entities which carry out their economic activities there.<sup>16</sup>

## 86.2 “Transparent” and “opaque”

### 86.2.1 *Transparent/opaque terminology*

UK tax law may categorise entities as “transparent” or “opaque”.<sup>17</sup>

The International Manual explains this terminology:

**180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [Dec 2019]

...[The HMRC transparent/opaque list<sup>18</sup>] describes entities as either fiscally “transparent” or “opaque” solely for the purposes of deciding how a member<sup>19</sup> is to be taxed on the income they derive from their interest in the entity.

[1] In the case of a “transparent” entity the member is regarded as being entitled to a share in the underlying income of the entity as it arises and is charged to tax in the UK on their share of the profits on that basis.

[2] But, in the case of an “opaque” entity the member generally is taxed only on the distributions made by the entity. ...

OECD discuss the term in the context of art 1(2) OECD Model and make the same point in another way:<sup>20</sup>

The concept of “fiscally transparent” used in [OECD Model para 1(2)<sup>21</sup>] refers to situations where, under the domestic law of a Contracting State, the income ... of the entity or arrangement is not

16 *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554 at [41].

17 The term sometimes used is “fiscally” transparent/opaque. In a tax context that is synonymous with transparent/opaque but the expression may be useful to distinguish:

- (1) the tax concept, and
- (2) non-tax uses of the term, where “transparency” refers to the values of openness, communication and accountability

The American legal English term “pass-through” is synonymous with transparent.

18 See 86.40 (HMRC transparent/opaque list).

19 Author’s footnote: In this context it is convenient to use the word “member” loosely, to include any person with an interest in an entity.

20 Commentary on OECD Model art 1(2), para 9.

21 See 87.4 (OECD hybrid-entity rules).

taxed at the level of the entity or the arrangement but at the level of the persons who have an interest in that entity or arrangement.

### 86.2.2 Consequences of transparency

OECD Commentary continues:

This will normally be the case where

[1] the amount of tax payable on a share of the income of an entity or arrangement is determined separately in relation to the personal characteristics of the person who is entitled to that share so that the tax will depend

[a] on whether that person is taxable or not,

[b] on the other income that the person has,

[c] on the personal allowances to which the person is entitled and

[d] on the tax rate applicable to that person;

[2] also,

[a] the character and source,

[b] as well as the timing of the realisation,

of the income for tax purposes will not be affected by the fact that it has been earned through the entity or arrangement.

The fact that the income is computed at the level of the entity or arrangement before the share is allocated to the person will not affect that result.<sup>22</sup>

One might regard that either as consequences or aspects or hallmarks of transparency, depending on one's perspective.

Identity of income and timing is a matter of degree: how precise does the identity have to be for a body to qualify as transparent? It is suggested that there should be no single universally applicable answer: the answer must depend on the context in which it arises.

The terminology is used similarly for CGT:

(1) In the case of a transparent entity, members are regarded as being entitled to the gains of the entity as they accrue.

(2) In the case of an opaque entity, members are in principle taxed only on distributions made by the entity; the entity itself is a taxable unit regarded as receiving the gains. For instance, partners are regarded

---

22 A footnote here refers to OECD Partnerships Report para 37- 40; for the relevant text see 8.22.2 (Partnership "liable to tax").

as entitled to the gains of a partnership as they accrue, and are charged to CGT on that basis; so a partnership is said to be transparent for CGT.

Strictly, one should not use the term “transparent” without identifying the tax involved, because an entity may be transparent for one tax and not for another.

### 86.2.3 Further uses of the terminology

The sense(s) explained above is the paradigm use of the terms transparent/opaque. However the terminology is used in an analogous way in many other contexts. For instance,

- (1) A partnership or other entity may be said to be transparent in the sense that:
  - (a) the business of the entity is regarded as carried on by its members<sup>23</sup>
  - (b) employees of the entity are regarded as employees of the members<sup>24</sup>
  - (c) assets of the entity are regarded as held or owned by the members<sup>25</sup>
- (2) A partnership may be said to be opaque (not transparent) for IHT situs rules, because the situs of a partner’s interest in a partnership is not the situs of the partnership assets.<sup>26</sup>

One should not use the term without identifying the provision or context involved, as an entity may be transparent for one purpose and not for another.

### 86.2.4 Transparent/opaque: Caution

Terms which can be used in so many senses need to be used with caution.

---

23 See 87.6.1 (Deemed-recipient fiction: Effect).

24 See 36.15 (Employer a partnership).

25 See 29.9.6 (Receipt via transparent entity).

26 Another example: a partnership may be said to be opaque for the purposes of the ITA remittance basis, in the sense that property brought to the UK by the partnership is not regarded as remitted by the partners; see 17.37.1 (Partnership opaque for remittance basis).

UK tax statutes do not generally use the term “transparent”, though it is occasionally found in recent provisions.<sup>27</sup> Thus the person liable for income tax is generally the person receiving or entitled to the income.<sup>28</sup> The correct statutory question to ask here is therefore not whether the entity is transparent, but whether a member of an entity is a person receiving or entitled to the income. Similarly, the person chargeable to CGT is the person to whom gains accrue.<sup>29</sup> The correct statutory question to ask is therefore whether a gain accrues to the members or to the entity. For IHT situs, the correct statutory question to ask is, what is the situs of the partner’s interest in the entity, not whether the entity is transparent; and for remittances, the correct statutory question to ask should be framed in the terms of remittance condition A and not in terms of transparency.

In other words, in cases where statute does not use the word “transparent”:

- (1) The labels transparent/opaque are often a convenient shorthand; but
- (2) It is necessary to remember the words of the statute: if that is not done, the terminology may mislead.

In these cases the labels transparent/opaque are better used to summarise a conclusion rather than as the reason for reaching that conclusion.

The FTT has made this point:

The issue is whether the UK tax is ‘computed by reference to the same profits or income’ ... Asking whether SP LLC is transparent or opaque may be another way of asking the same question but we consider that it is preferable to apply the words of the Treaty.<sup>30</sup>

The Supreme Court agreed:

The issue in this case [*Anson*]

- [1] is not whether the receipts of the LLC from third parties are to be regarded as having been paid to the members of the LLC, but

---

27 For instance in the OFTR: see 63.13 (“Transparent fund”).

28 See 14.2.1 (Receiving/entitled: Person liable).

29 See 14.2.4 (Accruing: Gains).

30 *Anson v HMRC* reported under the name *Swift v HMRC* [2010] UKFTT 88 (TC) at [18].

[2] whether the income on which Mr Anson paid tax in the US is the same<sup>31</sup> as the income on which he is liable to tax in the UK.... That issue is different from the issue considered in *Memec*.<sup>32</sup> The answer to the question whether the receipts and expenditure of an entity are paid to and by its members does not necessarily determine whether, when a profit arises in a given accounting period, that profit constitutes the income of the members. The answer to the latter question depends on the respective rights of the entity and its members in relation to the profit, and therefore on the legal regime governing those rights.<sup>33</sup>

It can only confuse the issue to describe both questions as whether an LLC is transparent, because they are (or may be) distinct questions. One may say, as the Supreme Court did in *Anson*, “transparent” *in the sense that...*<sup>34</sup>

This is especially important outside the paradigm context, but the same point arises even there. For instance, classification of an entity as transparent for IT in the paradigm sense that the income is treated as the income of the members of the entity may seem to entail that the entity itself is regarded as *not* entitled to the income. Thus a partnership is transparent, and income accrue to the partners and not to the partnership. But this is not always the case. For instance, an IIP trust is transparent, but the trustees may still be taxable on the trust income.<sup>35</sup> That seems illogical only if one fails to ask the *statutory* question. Trustees of an IIP trust may be persons who receive trust income even if they are not persons who are entitled to the income, so they may be liable to income tax.<sup>36</sup>

The International Manual provides:

**180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes [Dec 2019]**

... The expressions “transparent” and “opaque” are not interchangeable with “partnership” and “company” or “body corporate”. A fiscally transparent entity is not necessarily a partnership. A fiscally opaque

---

31 See 106.5 (Same income rule).

32 The issue in *Memec* was whether a dividend received by a stille Gesellschaft was *paid* to the “silent partner”; see 86.21 (Stille Gesellschaft).

33 [2015] UKSC 44 at [109].

34 [2015] UKSC 44 at [43]. The quotation marks are original.

35 Likewise a settlor-interested trust within s.624.

36 See 39.2 (Taxation of IIP trustees).

entity is not necessarily a “body corporate” or a “company” for UK tax purposes. ...

Although the expressions are not interchangeable, the issues overlap. A transparent entity is not necessarily a partnership<sup>37</sup> but a partnership is always transparent for IT/CT and CGT.<sup>38</sup>

#### 86.2.5 *Transparent or opaque?*

Occasionally statute answers the question. For instance, s.65(2) TCGA provides that trusts and estates are opaque for CGT:

Subject to section 60 and any other express provision to the contrary,  
 [1] chargeable gains accruing to the trustees of a settlement or to the personal representatives of a deceased person, and  
 [2] capital gains tax chargeable on or in the name of such trustees or personal representatives,  
 shall not be regarded for the purposes of this Act as accruing to, or chargeable on, any other person ...

Conversely, s.60 TCGA provides that a bare trust is transparent for CGT.<sup>39</sup> More often it is a matter of applying general principles. The International Manual provides:

**180010. Factors to consider in classifying a foreign entity for UK tax purposes [May 2019]**

When considering the classification of a foreign entity (i.e. whether it is either opaque or transparent) for UK tax purposes, due regard is given to the approach of the Court of Appeal in the case of *Memec plc v IRC* (71 TC 77) and the line of case law that precedes it. In particular, the following matters should be considered:

- 1 Does the foreign entity have a legal existence separate from that of the persons who have an interest in it?

If the entity does not have (or at least involve) a “separate legal existence” (I think the correct technical term is legal personality, in the sense that it is capable of holding property<sup>40</sup>) that is the end of the matter. The entity

---

37 For instance, an IIP trust is also transparent: see 39.3 (Taxation of life tenant).

38 See 82.15 (Partnership transparency: IT/CT); 82.19 (Partnership transparency: CGT).

39 See 1.7 (Bare trust/nomineeship).

40 See App.2.9 (Person/legal personality).

cannot be opaque, in the sense that it cannot be a person receiving or entitled to income. On the other hand, an entity which does have legal personality can be transparent or opaque. A Scots partnership is an example of a transparent entity with legal personality.

2 Does the entity issue share capital or something else, which serves the same function as share capital?

This raises the question what is share capital; see 86.41 (Ordinary share capital).

3 Is the business carried on by the entity itself or jointly by the persons who have an interest in it that is separate and distinct from the entity?

4[i] Are the persons who have an interest in the entity entitled to share in its profits as they arise; or

[ii] does the amount of profits to which they are entitled depend on a decision of the entity or its members, after the period in which the profits have arisen, to make a distribution of its profits.

5 Who is responsible for debts incurred as a result of the carrying on of the business: the entity or the persons who have an interest in it?

6 Do the assets used for carrying on the business belong beneficially to the entity or to the persons who have an interest in it?

Some of those factors may point in one direction; others may point in another. An overall conclusion is reached from looking at all the factors together, though some have more significance than others. Particular attention is paid to factors 3. and 4.<sup>41</sup>

The Manual passage makes the point made at 86.1 (Foreign entities: Introduction):

In considering these factors we look at the foreign commercial law under which the entity is formed and at the internal constitution of the entity. ... The conclusion that is reached is then used in considering the relevant piece of UK tax law.

### 86.2.6 *Foreign law transparency*

The International Manual adopts a parochial approach:

---

41 This passage is also set out in INT Manual 180010. I deal with the omitted sentence in the following paragraph.

**180010. Factors to consider in classifying a foreign entity for UK tax purposes** [May 2019]

... How the entity is classified for tax purposes in any other country is not relevant.

If the foreign law is sufficiently similar to UK law, it is considered that a foreign law classification as transparent/opaque ought to be relevant, though not of course decisive. An incidental attraction of this course is that it reduces the number of hybrid entities, which give rise to difficulties.<sup>42</sup> But in the event of a dispute, the question whether the foreign law is “sufficiently similar” is likely to be contested.<sup>43</sup>

### 86.3 Definition of “company”

There are about a dozen definitions of company relevant to this book. They can be categorised as follows:

<b>Definition</b>	<b>See</b>
Company in standard tax sense	<i>Discussed here</i>
Non-standard tax definitions of company:	
CG group relief	60.26
SDLT/ATED	93.2.2
Transactions in securities	52.3.3
Sale of occupation income	s.789 ITA
Notice of 1st accounting period	115.22.1
OECD Model definition of company	29.9.4
Company in general sense	<i>Discussed here</i>
Company in Companies Act 2006 sense	<i>Discussed here</i>

Strictly, one should not use the word company without specifying which definition applies; but in practice the context will generally supply that; and references to company in this work generally mean a company in the standard tax sense.

#### 86.3.1 *Company: Standard tax sense*

It is helpful to set out the CT/IT/CGT/SDLT definitions side by side:

**s.1121 CTA 2010**      **s.992 ITA**      **s.288 TCGA**      **s.100(1) FA 2003**

---

42 See 87.1 (Hybrid entities).

43 Contrast 86.1.2 (Foreign law terminology).

(1) In the Corporation Tax Acts “company” means	(1) In the Income Tax Acts “company” means	In this Act, unless the context otherwise requires ... “company” includes <sup>44</sup>	In this Part [Part 4, SDLT] “company”, except as otherwise expressly provided, means
[a] any body corporate or unincorporated association, but	any body corporate or unincorporated association, but	[a] any body corporate or unincorporated association but	any body corporate or unincorporated association,
[b] does not include [i] a partnership,	does not include [i] a partnership,	[b] does not include a partnership,	but does not include a partnership.
[ii] a co-ownership scheme (as defined by section 235A of the Financial Services and Markets Act 2000)			
[iii] a local authority or a local authority association. <sup>45</sup>	[ii] a local authority or a local authority association.		

---

44 Although the word here is “includes” it is difficult to envisage an entity which is a company in the general sense of the word but which is not a body corporate; so “includes” here means “means”.

45 This is subject to some minor (unnecessarily complicated) exceptions not considered here.

(2) Subsection (1) needs to be read with section 617 (under which the trustees of an authorised unit trust are treated for certain purposes as a UK resident company).	(2) Subsection (1) needs to be with read with section 617 of CTA 2010 (authorised unit trust treated as UK resident company). <sup>46</sup>	[c] and shall be construed in accordance with section 99. <sup>47</sup>
--	---	---

I refer to these definitions individually as the CT/IT/CGT/SDLT definitions and together (ignoring small differences between them) as the “**standard tax definition**”; and a body within this definition is a company in the “**standard tax sense**”.

The standard tax definition expressly excludes partnerships. This is perhaps to exclude some foreign law partnerships which are or might be bodies corporate; or, when the definition was drafted, in 1965, it may have been thought that a Scots partnership was a body corporate.<sup>48</sup>

An LLP is a body corporate but is (generally) outside the standard tax definition of company for two reasons (either would suffice): an LLP counts as a partnership, and is also expressly excluded from the tax definition of company.<sup>49</sup>

A corporate trustee in its trustee capacity is a notional person, but that person is not a company in the standard tax sense.<sup>50</sup>

### 86.3.2 *Company definitions compared*

The IT definition is wider than the CT definition as it may include a co-ownership scheme. But I am not sure if that matters.

---

46 Section 993(3) ITA signposts 3 sets of exceptions:

- (a) Part 6 ITA: venture capital trusts
- (b) Chap 1,4 Pt 13: transactions in securities & sales of occupation income
- (c) s.993/994 ITA: meaning of connected person

The exception in the transactions in land code was removed when that code was rewritten in 2016; the need to amend s.993(3) to remove this reference was overlooked.

47 Section 99 TCGA relates to unit trusts; see 66.5 (Unit trust CGT: Deemed company).

48 But this is not now the generally held view: see 82.13.2 (Partnership: a body corporate?).

49 See 82.21.1 (Income tax treatment of LLP).

50 See 6.3 (Trustees a distinct person).

The CGT definition is wider than the IT/CT definitions as it includes:

- (1) unit trusts and
- (2) local authorities<sup>51</sup>

The CTM provides:

**CTM00510 Meaning of company, profits and income** [Jun 2019]

[The Manual cites the CT definition, considers the history from 1799, and continues:] The nomenclature is highly confusing. “Company” is customarily used congruently with incorporated company but has a tax definition that largely for historical reasons goes wider but nevertheless excludes partnerships. “Company” is not always congruent with “legal person” either since in Scotland a partnership has legal personality. Moreover an unincorporated association (which is neither a legal person nor a partnership) is within the tax definition of company mentioned above.

One does need to bear in mind that the standard tax sense of company is wider than the general sense, as it includes unincorporated associations. The full details are, admittedly, quite intricate; but one does not often need to consider them. That does not seem confusing, by the standards of tax legislation. Perhaps the passage was written before tax legislation reached its current level of complexity.

### 86.3.3 *Company: undefined/IHT sense*

Where the word company is not defined, takes its ordinary meaning, subject to context. The ordinary meaning is wide: the word company can include LLPs and Scottish partnerships.<sup>52</sup>

IHTA does not provide a definition of “company”; but the definition of close company in the IHT close-company code incorporates the CT definition.<sup>53</sup>

In IHT law, and tax law generally, the concepts of partnership and company are mutually exclusive. So in an IHT context it is suggested that “company” (where undefined) means companies formed under UK

51 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), Chapter 44 (Local Authorities)

online version <https://www.taxationofcharities.co.uk>

52 *Glasgow City Council v Unison* [2014] CSIH 27 at [46].

53 See 77.2.1 (“Close company”).

Company law, and foreign entities similar to such companies; but it does not include English or Scots law partnerships, or foreign entities similar to such partnerships .

#### 86.3.4 *EU company list*

Art 2(a) EU Parent/Subsidiary directive<sup>54</sup> provides:

For the purposes of this Directive the following definitions shall apply:

(a) ‘company of a Member State’ means any company which:

(i) takes one of the forms listed in Annex I, Part A ...

The annex sets out a list of entities which should in principle be treated as companies (and as bodies corporate) for UK tax purposes:

- (a)[i] companies incorporated under Council Regulation (EC) No 2157/2001 of 8 October 2001 on the Statute for a European company (SE) and Council Directive 2001/86/EC of 8 October 2001 supplementing the Statute for a European company with regard to the involvement of employees and
- [ii] cooperative societies incorporated under Council Regulation (EC) No 1435/2003 of 22 July 2003 on the Statute for a European Cooperative Society (SCE) and Council Directive 2003/72/EC of 22 July 2003 supplementing the Statute for a European Cooperative Society with regard to the involvement of employees;
- (b) companies under Belgian law known as ‘société anonyme’/‘naamloze vennootschap’, ‘société en commandite par actions’/‘commanditaire vennootschap op aandelen’, ‘société privée à responsabilité limitée’/‘besloten vennootschap met beperkte aansprakelijkheid’, ‘société coopérative à responsabilité limitée’/‘coöperatieve vennootschap met beperkte

---

54 The full title is: Council Directive 2011/96/EU of 30 November 2011 on the common system of taxation applicable in the case of parent companies and subsidiaries of different Member States. The same list is found in Annex 1 Mergers Directive 2009/133/EC. However, the 2011 Directive contains subsection (ka) which provides that “companies under Croatian law known as: ‘dioničko društvo’, ‘društvo s ograničenom odgovornošću’, and other companies constituted under Croatian law subject to Croatian profit tax”. It also has a broader list of Austrian entities that are subject to corporate tax as under section (t) “companies under Austrian law known as ‘Aktiengesellschaft’, ‘Gesellschaft mit beschränkter Haftung’, ‘Versicherungsvereine auf Gegenseitigkeit’, ‘Erwerbs- und Wirtschaftsgenossenschaften’, ‘Betriebe gewerblicher Art von Körperschaften des öffentlichen Rechts’, ‘Sparkassen’, and other companies constituted under Austrian law subject to Austrian corporate tax.”

aansprakelijkheid’, ‘société coopérative à responsabilité illimitée’/‘coöperatieve vennootschap met onbeperkte aansprakelijkheid’, ‘société en nom collectif’/‘vennootschap onder firma’, ‘société en commandite simple’/‘gewone commanditaire vennootschap’, public undertakings which have adopted one of the abovementioned legal forms, and other companies constituted under Belgian law subject to Belgian corporate tax;

(c) companies under Bulgarian law known as: ‘събирателно дружество’, ‘командитно дружество’, ‘дружество с ограничена отговорност’, ‘акционерно дружество’, ‘командитно дружество с акции’, ‘неперсонифицирано дружество’, ‘кооперации’, ‘кооперативни съюзи’, ‘държавни предприятия’ constituted under Bulgarian law and carrying on commercial activities;

(d) companies under Czech law known as: ‘akciová společnost’, ‘společnost s ručením omezeným’;

(e) companies under Danish law known as ‘aktieselskab’ and ‘anpartsselskab’. Other companies subject to tax under the Corporation Tax Act, in so far as their taxable income is calculated and taxed in accordance with the general tax legislation rules applicable to ‘aktieselskaber’;

(f) companies under German law known as ‘Aktiengesellschaft’, ‘Kommanditgesellschaft auf Aktien’, ‘Gesellschaft mit beschränkter Haftung’, ‘Versicherungsverein auf Gegenseitigkeit’, ‘Erwerbs- und Wirtschaftsgenossenschaft’, ‘Betriebe gewerblicher Art von juristischen Personen des öffentlichen Rechts’, and other companies constituted under German law subject to German corporate tax;

(g) companies under Estonian law known as: ‘täisühing’, ‘usaldusühing’, ‘osühing’, ‘aktsiaselts’, ‘tulundusühistu’;

(h) companies incorporated or existing under Irish law, bodies registered under the Industrial and Provident Societies Act, building societies incorporated under the Building Societies Acts and trustee savings banks within the meaning of the Trustee Savings Banks Act, 1989;

(i) companies under Greek law known as ‘ανώνυμη εταιρεία’, ‘εταιρεία περιορισμένης ευθύνης (Ε.Π.Ε.)’ and other companies constituted under Greek law subject to Greek corporate tax;

(j) companies under Spanish law known as: ‘sociedad anónima’, ‘sociedad comanditaria por acciones’, ‘sociedad de responsabilidad limitada’, public law bodies which operate under private law. Other entities constituted under Spanish law subject to Spanish corporate tax (‘Impuesto sobre Sociedades’);

(k) companies under French law known as ‘société anonyme’, ‘société en commandite par actions’, ‘société à responsabilité limitée’, ‘sociétés par actions simplifiées’, ‘sociétés d’assurances mutuelles’, ‘caisses d’épargne et de

prévoyance’, ‘sociétés civiles’ which are automatically subject to corporation tax, ‘coopératives’, ‘unions de coopératives’, industrial and commercial public establishments and undertakings, and other companies constituted under French law subject to French corporate tax;

(l) companies under Italian law known as ‘società per azioni’, ‘società in accomandita per azioni’, ‘società a responsabilità limitata’, ‘società cooperativa’, ‘società di mutua assicurazione’, and private and public entities whose activity is wholly or principally commercial;

(m) under Cypriot law: ‘εταιρείες’ as defined in the Income Tax laws;

(n) companies under Latvian law known as: ‘akciju sabiedrība’, ‘sabiedrība ar ierobežotu atbildību’;

(o) companies incorporated under the law of Lithuania;

(p) companies under Luxembourgish law known as ‘société anonyme’, ‘société en commandite par actions’, ‘société à responsabilité limitée’, ‘société coopérative’, ‘société coopérative organisée comme une société anonyme’, ‘association d’assurances mutuelles’, ‘association d’épargne-pension’, ‘entreprise de nature commerciale, industrielle ou minière de l’Etat, des communes, des syndicats de communes, des établissements publics et des autres personnes morales de droit public’, and other companies constituted under Luxembourg law subject to Luxembourg corporate tax;

(q) companies under Hungarian law known as: ‘közkereseti társaság’, ‘betéti társaság’, ‘közös vállalat’, ‘korlátolt felelősségű társaság’, ‘részvénytársaság’, ‘egyesülés’, ‘szövetkezet’;

(r) companies under Maltese law known as: ‘Kumpaniji ta’ Responsabilita’ Limitata’, ‘Soċjetajiet en commandite li l-kapital tagħhom maqsum f’azzjonijiet’;

(s) companies under Dutch law known as ‘naamloze vennootschap’, ‘besloten vennootschap met beperkte aansprakelijkheid’, ‘open commanditaire vennootschap’, ‘coöperatie’, ‘onderlinge waarborgmaatschappij’, ‘fonds voor gemene rekening’, ‘vereniging op coöperatieve grondslag’, ‘vereniging welke op onderlinge grondslag als verzekeraar of kredietinstelling optreedt’, and other companies constituted under Dutch law subject to Dutch corporate tax;

(t) companies under Austrian law known as ‘Aktiengesellschaft’, ‘Gesellschaft mit beschränkter Haftung’, ‘Versicherungsvereine auf Gegenseitigkeit’, ‘Erwerbs- und Wirtschaftsgenossenschaften’, ‘Betriebe gewerblicher Art von Körperschaften des öffentlichen Rechts’, ‘Sparkassen’, and other companies constituted under Austrian law subject to Austrian corporate tax;

(u) companies under Polish law known as: ‘spółka akcyjna’, ‘spółka z ograniczoną odpowiedzialnością’, ‘spółka komandytowo-akcyjna’;

- (v) commercial companies or civil law companies having a commercial form and cooperatives and public undertakings incorporated in accordance with Portuguese law;
- (w) companies under Romanian law known as: ‘societă i pe ac iuni’, ‘societă i în comandită pe ac iuni’, ‘societă i cu răspundere limitată’, ‘societă i în nume colectiv’, ‘societă i în comandită simplă’;
- (x) companies under Slovenian law known as: ‘delniška družba’, ‘komanditna družba’, ‘družba z omejeno odgovornostjo’;
- (y) companies under Slovak law known as: ‘akciová spoločnosť’, ‘spoločnosť s ručením obmedzeným’, ‘komanditná spoločnosť’;
- (z) companies under Finnish law known as ‘osakeyhtiö’/‘aktiebolag’, ‘osuuskunta’/‘andelslag’, ‘säästöpankki’/‘sparbank’ and ‘vakuutusyhtiö’/‘försäkringsbolag’;
- (aa) companies under Swedish law known as ‘aktiebolag’, ‘försäkringsaktiebolag’, ‘ekonomiska föreningar’, ‘sparbanker’, ‘ömsesidiga försäkringsbolag’, ‘försäkringsföreningar’;
- (ab) companies incorporated under the law of the United Kingdom;
- (ka) companies under Croatian law known as: ‘dioničko društvo’, ‘društvo s ograničenom odgovornošću’, and other companies constituted under Croatian law subject to Croatian profit tax.

## 86.4 Body corporate

### 86.4.1 *Why body corporate matters*

The question whether an entity is a body corporate matters because:

- (1) A body corporate is (subject to a few exceptions) a company in the standard tax sense.
- (2) There are some specific rules which apply to a body corporate.<sup>55</sup>  
Examples include:
  - (a) SD/SDLT group relief<sup>56</sup>
  - (b) The definition of “51/75/90 % subsidiary” which is important for some group reliefs<sup>57</sup>

---

55 This may be done in a straightforward manner by a provision referring to a body corporate; or in a roundabout manner by a provision referring to a company but defining company to mean body corporate (overriding the standard tax definition of company).

56 See 82.23 (Partnerships: Group reliefs),

57 See 60.27 (“51/75/90 % subsidiary”).

### 86.4.2 *Company/body corporate compared*

Body corporate/company in the tax sense are distinct concepts, (even though they normally overlap):

- (1) An unincorporated association is not a body corporate but is a company (in the standard tax sense)
- (2) An LLP is a body corporate but is not a company (in the standard tax sense),<sup>58</sup> and the same may be the case for some foreign law partnerships

Body corporate/company in the *general* sense are also distinct concepts. A company in the general sense is a body corporate. But a body corporate is not necessarily a company in the general sense; examples are:

- (1) An LLP, a body corporate but not a company in the general or in the tax senses
- (2) A co-operative and mutual benefit society, a body corporate, and a company in the tax sense but not in the general sense
- (3) An Anstalt may be a non-UK example: a body corporate, perhaps not a company in the general sense, but (at least, usually) a company in the tax sense

None of this should cause confusion as long as one bears in mind that “company” does not have a single general meaning.

### 86.4.3 *What is a body corporate?*

How does one decide whether an entity is a body corporate? There is no definition in tax statutes. As the postpositive adjective<sup>59</sup> suggests, the term is ancient and somewhat archaic. A body corporate means a corporate (or incorporated) body.<sup>60</sup> But that does not take us very far.

---

58 See 82.20 (Limited liability partnership).

59 Other examples in legal vocabulary are: court martial, fee simple, letters patent; see [https://en.wikipedia.org/wiki/Postpositive\\_adjective](https://en.wikipedia.org/wiki/Postpositive_adjective)

60 Corporate/unincorporate are just archaic terms for incorporated/unincorporated. This is self-evident, but if necessary, and assuming general statutory definitions can shed light on the general meaning of words, support might be had from:

- (1) s.1173 Companies Act 2006, providing that “body corporate” includes a body incorporated outside the UK.
- (2) Sch 1 Interpretation and Legislative Reform (Scotland) Act 2010, providing that ‘person’ includes a body of persons corporate or unincorporated.

CT Manual provides:

**CTM00510: Meaning of company, profits and income** [Jun 2019]  
 ... Nor is there any definition of body corporate, though it appears to mean a legal person of full capacity distinct from its members with perpetual succession created by, or observing provisions required by, authority, whether Crown or Parliament. That excludes Scottish partnerships which have no perpetual succession and are formed by the partners, notwithstanding their legal personality.

The following are bodies corporate:

A company registered under the Companies Act 2006<sup>61</sup>  
 An OEIC<sup>62</sup>

The following are not a body corporate:

A Scots partnership<sup>63</sup>  
 A unit trust<sup>64</sup>

In relation to other entities, I discuss the body corporate issue elsewhere:

<b>Entity</b>	<b>See para</b>
Foundation	86.9.4
Limited liability company	86.34.6

A trustee is a notional person, but that person is not a body corporate.<sup>65</sup>

Foreign law occasionally stipulates that an entity is a body corporate; for instance, art 9A(5) Limited Partnerships (Guernsey) Law 1995 provides:

61 Section 16(2) Companies Act 2006 provides: “The subscribers to the memorandum, together with such other persons as may from time to time become members of the company, are a body corporate by the name stated in the certificate of incorporation.”

62 The definition of OEIC requires that it is a body corporate: see 2.7 (Open-ended investment co).

Reg 3(1) Open-Ended Investment Companies Regulations 2001 provides: “If the Authority makes an authorisation order then, immediately upon the coming into effect of the order, the body to which the authorisation order relates is to be incorporated as an open-ended investment company (notwithstanding that, at the point of its incorporation by virtue of this paragraph, the body will not have any shareholders or property).” Such a body is a body corporate: *HMRC v Hargreaves Lansdown Asset Management* [2019] UKUT 246 (TCC) at [68].

63 See 82.13.2 (Partnership: a body corporate?).

64 See 66.2 (Definition of “unit trust”).

65 See 6.3 (Trustees a distinct person).

For the avoidance of doubt (!) ... a limited partnership with legal personality is a body corporate.

Foreign provisions of this kind do not necessarily mean that the entity is a body corporate for UK law or, more accurately, for the purposes of any particular UK statutory provision using that expression.<sup>66</sup> But in practice it is likely to answer the question.

It is possible for an entity to have legal personality without being a body corporate. A Scottish partnership is one example, and a Foundation may be another. After discussing the position of trade unions, the Scottish Law Commission say:

2.26 There are other examples of statutory provisions which have been held to create what were described as “quasi-corporations”,<sup>67</sup> that is, bodies created by statute with certain attributes of legal personality but without corporate status. By way of contrast, the case of *J H Rayner (Mincing Lane) Ltd v Department of Trade and Industry*<sup>68</sup> concerned the International Tin Council which, in accordance with obligations undertaken by the UK under an international agreement, was created by an Order in Council which provided that the ITC “shall have the capacities of a body corporate”. After the ITC became insolvent, the House of Lords rejected the argument of its creditors that a distinction could be drawn between a body corporate on the one hand and an entity with “the capacities of a body corporate” on the other, so as to impose liability on members in the latter case. Lord Oliver of Aylmerton observed:

...the undoubted existence of capacities may lead and, in some circumstances, must lead to a necessary inference of the status of the person on whom they are conferred. Whether that is expressed... by saying that the status is the sum total of the capacities or that the status

---

66 See 86.1.2 (Foreign law terminology).

67 Footnote original: Eg *IRC v Bew Estates Ltd* [1956] Ch 407 at p.415 (the War Damage Commission); *Knight and Searle v Dove* [1964] 2 QB 631 at p.643 (the London Trustee Savings Bank). The Scottish Law Commission may afford another example. For further discussion, see also Wedderburn, “Corporate personality and social policy: the problem of the quasi-corporation” (1965) 28 MLR 62.

68 [1990] 2 AC 418.

may be deduced from the capacities is really a question of purely academic interest and does not affect the ultimate result.<sup>69</sup>

Avery Jones comments:<sup>70</sup>

The International Tin Council had legal personality under the treaty creating it, including the capacity to contract and acquire and dispose of movable and immovable property and to institute legal proceedings, but the UK legislation giving effect to the treaty in internal law, provided that it had the legal capacities of a body corporate, without making it a body corporate (which would have had the undesirable effect of making it, as an international body, subject to UK law on, for example, winding-up). This was held by the House of Lords in *J.H. Rayner v Department of Trade* [1990] 2 AC 418 to have created a separate legal person with the result that the members of it were not liable for its liabilities. The following quotation from an Australian case was cited: “A body, which, as distinct from the natural persons composing it, can have rights and be subject to duties and own property must be regarded as having legal personality, whether it is or is not called a corporation.”<sup>71</sup>

#### 86.4.4 HMRC body corporate list

The former Stamp Taxes Manual offered a list addressing the question of whether a foreign entity is a body corporate:

##### **6.124 Foreign Companies**

Some foreign companies have been accepted as falling within the term ‘body corporate’ for the purposes of the intra group relief. The following is a list of examples of foreign bodies accepted by us as falling within the definition of “body corporate” for Section 42 [FA 1930] and Section 151 [FA 1995] purposes:–

Although the list is expressed to be for the purposes of two specific provisions, there is no specific definition of “body corporate” in those sections; if an entity is a body corporate for those purposes, it is in

---

69 at p.504.

70 Avery Jones et al, “Characterisation of Other States' Partnerships for Income Tax” [2002] BTR 375.

71 *Chaff and Hay Acquisitions Committee v J A Hemphill and Sons Proprietary Ltd* (1947) 74 CLR 375 at p.385.

See too 86.31.4 (Stichting a treaty-person).

principle a body corporate (and a company in the standard tax sense) for tax purposes generally.

Australia	Private companies which do not need to comply with certain requirements, are known as ‘proprietary’ companies. Such companies registered in New South Wales are bodies corporate.
Bahamas	Companies described as limited.
Belgium	Société de personnes à responsabilité limitée (descussociés). <sup>72</sup>
Bermuda	Companies described as limited.
BVI	A company described as limited and which is incorporated under the Companies Act 243.
Canada	Companies described as limited.
Cayman Islands	Companies described as Ltd.
Denmark	A company described as an A/S.
Finland	An ‘Oy’ (Osakeyhtiö) is a Finnish limited company which may be public or private.
France	Société Anonyme and Société en commandite par actions.
Germany	Aktiengesellschaft. Gesellschaft mit Beschränkte Haftung. Kommanditgesellschaft <sup>73</sup> auf Aktien.
Guernsey	A company constituted under the laws of Guernsey and registered before the Royal Court.
Holland	Naamloze Vennootschap. Besloten Vennootschap.
Hong Kong	Companies described as limited.
Irish Minister of State	An Irish minister may be accepted as a parent body corporate for S42 purposes
Italy	Società per Azioni.
Liberia	Companies described as limited but note that we may require to see the Certificate of Incorporation.
Malaysia	A company which includes the word ‘Berhad’ as part of and at the end of its name.
Netherlands Antilles <sup>74</sup>	Naamloze Vennootschap.
Norway	Aksjeselskap (et) or Aktieselskap <sup>75</sup> (et).
Panama	Sociedad Anonima. ‘Corp.’ ‘Inc.’ Note that ‘Ltd’ is not conclusive.
Portugal	A body which is a Sociedade por Quotas.
Saudi Arabia	A company organised pursuant to the laws of the Kingdom of Saudi Arabia has been accepted although it did not have perpetual succession.
Singapore	Companies described as limited.

---

<sup>72</sup> “Descussociés” is a misprint but I do not know what is intended.

<sup>73</sup> HMRC text erroneously reads: Kommanditfellschaft.

<sup>74</sup> Netherlands Antilles ceased to exist in 2010 and is now Curaçao and Sint Maarten. The law of the former Netherlands Antilles continues to apply unless and until amended.

<sup>75</sup> HMRC text erroneously reads: Aktieselscap.

South Africa	A Company which is 'limited by shares'.
Spain	Sociedad Anonima and Sociedad de Responsabilidad Limitada.
Sweden	Aktiebolaget. Also The Kingdom of Sweden.
Switzerland	Société Anonyme, Société en commandite <sup>76</sup> par actions and Aktiengesellschaft. A verein. <sup>77</sup>
Trinidad	A company limited 'by shares'.
USA	Corporations (usually described as 'Corporation' 'Company' or 'Incorporated') organised under the laws of various states. Delaware Limited Liability Companies.
Venezuela	Corporations organised under the laws of Venezuela.

#### 86.4.5 *Body corporate: Critique*

Why do some tax rules (such as group relief) refer to *body corporate* rather than *company*? It may be that the drafter intended the distinction (eg to exclude unincorporated associations and include LLPs). It may be intended that:

- (1) A partnership which is a body corporate (such as an LLP) may be the parent company of a group, though not a subsidiary (as it will not have ordinary share capital).
- (2) An unincorporated association, not a body corporate, cannot be a member of a group even though it is liable to corporation tax.

It may be for historical reasons, particularly if the drafting dates back to before the introduction of the definition of company in the standard tax sense, in 1965. Or it may be that the drafter gave no particular attention to the matter and regarded the terms as synonymous (as is nearly the case, but not quite).

There is scope for simplification here, though as always, reform would need consultation and thinking through. Except in the definition of company, the term "body corporate" need not and should not be used in UK tax law.

### 86.5 US grantor trust

Revocable trusts are commonly used in the USA for estate planning.<sup>78</sup> With an American settlor these are almost always grantor trusts (a US

---

<sup>76</sup> HMRC text erroneously reads: commandit.

<sup>77</sup> "A verein" is a misprint but I do not know what is intended.

<sup>78</sup> I am grateful to Ian Watson for his comments on this section.

income tax concept) and transparent for USA tax purposes as to income and capital gains, though with non-USA settlors they are only transparent in limited circumstances.

The classification of a US revocable trust turns on the nature of the rights conferred by the trust, which depends on the drafting and governing law of the trust.<sup>79</sup> Only general comments are possible here.

Under a common form grantor trust, the settlor (the synonymous terms grantor, trustor, creator or donor are also used) is sole trustee, the trust is revocable, and the income and capital is paid to the settlor on demand. Section 603 America Uniform Trust Code<sup>80</sup> provides:

While a trust is revocable [and the settlor has capacity to revoke the trust],<sup>81</sup> rights of the beneficiaries are subject to the control of, and the duties of the trustee are owed exclusively to, the settlor.

A USA revocable trust of this kind is not a trust in the standard IT/CGT sense, as the property is not held “in trust”. This may seem paradoxical, but only if one forgets that “trust” in a foreign law may not have the same meaning as it has in a UK statute.<sup>82</sup> In English law, “there is an irreducible core of obligations owed by the trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust. If the beneficiaries have no rights enforceable against the trustees there are no trusts.”<sup>83</sup> The US revocable trust may appear at first sight to grant rights

79 Each USA state is a separate jurisdiction, with its own trust law, derived from English law but with statutory and case law variations.

80 [http://www.uniformlaws.org/shared/docs/trust\\_code/utc\\_final\\_rev2010.pdf](http://www.uniformlaws.org/shared/docs/trust_code/utc_final_rev2010.pdf) The uniform code project is an attempt to standardise US law, but adoption of uniform codes is far from universal, and states may adopt them with variations. Some states (eg, California Probate Code section 15800) impose rules almost identical in effect to s.603 UTC, but independently of the uniform code project. There is a general trend in American jurisprudence towards the same result even in the absence of express statutory provision. Strictly it would be necessary to obtain foreign law tax advice on this issue, but that is not entirely straightforward, as the UK concept of a bare trust is unknown. It is sometimes possible to obtain local legal advice that their law does not differ from the UTC on the relevant point.

81 Square brackets in original, as the wording is optional.

82 See 86.1.2 (Foreign law terminology).

83 *Armitage v Nurse* [1998] Ch 241 at p.253. Likewise Hague Convention art.2: “A trust has the following characteristics ... (c) the trustee has the power and the duty, *in respect of which he is accountable*, to manage, employ or dispose of the assets in

to beneficiaries, but during the lifetime of the settlor (or at least while the settlor has mental capacity) the rights are unenforceable and do not amount to “rights” at all.

If the settlor is not the sole trustee, there is a trust; but if (in the words of the Uniform Trust Code) “the duties of the trustee are owed exclusively to the settlor” then the US revocable trust is a bare trust for UK tax purposes:

- (1) For IT/CGT, the settlor is absolutely entitled as against the trustee.
- (2) The trust is not an IHT-settlement, since:
  - (a) The property is not held in trust for persons in succession.
  - (b) The USA revocable trust is not equivalent to a trust for persons in succession. The element of succession is that of a will.
  - (c) The USA revocable trust is not equivalent to a trust with power to make payments out of that income at the discretion of the trustees or some other person.

In short, a USA revocable trust of this kind is classified in UK tax law as a bare trust and a testamentary disposition.<sup>84</sup>

This view is supported by *Re the AQ Revocable Trust*.<sup>85</sup> Here a Bermuda law trust deed, drafted in US grantor trust form, executed by a Bermuda domiciled settlor, was held to be illusory and testamentary, and invalid (it originally took effect as a valid will, but was revoked by a subsequent marriage). Had the settlor been US domiciled, the trust would (I expect) not have been revoked by the subsequent marriage, and so would have taken effect on death as a testamentary disposition, recognised in English law; but it would not have constituted a substantive trust for UK tax purposes during the settlor’s lifetime.

Depending on the drafting, a USA revocable trust of this kind may cease to be a bare trust, and become a settlement (for IHT and IT/CGT) if the settlor loses mental capacity. This could of course have significant UK tax consequences.

---

accordance with the terms of the trust ...”. The rule goes back to *Morice v The Bishop of Durham* (1804) 9 Ves Jun 399 at p.405: “There must be someone in whose favour the Court can decree performance.”

84 See 1.7 (Bare trust/nomineeship). Underhill & Hayton agree at para 100.158 (Changing the governing law): *Law of Trusts & Trustees* (19th ed., 2016).

85 See 1.9 (Illusory trusts).

One could if desired draft a trust which meets the USA requirements to be a grantor trust and which is a settlement for IT/CGT and IHT purposes. It would need to be one where (during the lifetime of the settlor) the trustees owed duties to beneficiaries other than just the settlor.

It is understood that as at Dec 2020, HMRC are planning to take a case on the s.603 issue “in the near future (2 years)” and are unwilling to give rulings or indeed any comment to their customers in the meantime.

## 86.6 *Garland trusts*

The distinctive feature of *Garland* trusts (unlike English law trusts) is that beneficiaries have no interest in the trust property. Their right is *in personam* (against the trustees) not *in rem* (against the property). In other respects *Garland* trusts are like English trusts. A *Garland* trust is in principle a settlement within the standard IT/CGT and IHT definitions.

The approach of the tax code is to make some statutory provision in relation to Scotland, and otherwise to ignore the problems.

For the income taxation of *Garland* trusts, and the trust law background, see 39.3 (Taxation of life tenant); 39.7.3 (*Garland trusts*); 39.8 (*Baker or Garland trust?*). This section considers IHT and CGT.

### 86.6.1 *IIP in Garland trust*

The question arises whether a beneficiary of a *Garland* trust should be regarded as having an interest in possession in settled property. (This question does not often matter for IHT for trusts made after 2006.)

“Interest in possession” is a concept of English trust law which has no equivalent in Scots trust law, and maybe in other trust laws. But that does not prevent a beneficiary under a foreign law trust from having an interest which is an IIP within the meaning of a UK tax statute. A beneficiary under a *Garland* trust has an “interest” and if that interest gives an entitlement to income, it is an interest “in possession”.

However under a *Garland* trust, a beneficiary does not have an interest *in settled property*. The beneficiary does not have an interest in trust property at all.

In relation to Scots law trusts, the IHT problem is resolved by statute. Section 46 IHTA provides:

In the application of this Act to Scotland,  
[1] any reference to an interest in possession [1] in settled property is

- [a] a reference to an interest of any kind under a settlement by virtue of which
    - [i] the person in right of that interest is entitled to the enjoyment of the property or
    - [ii] would be so entitled if the property were capable of enjoyment,
  - [b] including an interest of an assignee under an assignation of an interest of any kind (other than a reversionary interest) in property subject to a proper liferent;
- [2] and the person in right of such an interest at any time shall be deemed to be entitled to a corresponding interest in the whole or any part of the property comprised in the settlement.

There is no equivalent provision for CGT (except for Scots proper liferents, which are not trusts). HMRC practice is to treat life tenants in *Garland* trusts as if they had an interest in possession in the settled property. The CG Manual provides:

**CG31301 Scottish proper liferents** [Jul 2019]

... There are two ways in which a liferent [roughly, life interest] can be set up. In the first case, where the interest is known as an improper liferent, the property is vested in trustees who administer the property and pay the income to the liferenter. In general the trustees have the power to sell the property in question and replace it by other property, whether land and buildings or other assets.

An improper liferent is clearly a trust. HMRC continue:

On the death of the liferenter the provisions of s.72, s.73 and s.74 TCGA apply as appropriate.

A court applying a purposive approach may well reject as too subtle a distinction between an interest in settled property and an interest under a settlement which is not an interest in settled property. Since this will usually suit taxpayers, it will not often be challenged.

### 86.6.2 *Reversionary interest: Garland trust*

Section 47 IHTA provides:

In this Act “reversionary interest” means a future interest under a settlement, whether it is vested or contingent (including an interest

expectant on the termination of an interest in possession which, by virtue of section 50 below, is treated as subsisting in part of any property)...

A beneficiary of a *Garland* trust may have a reversionary interest, within this definition, as although it is not strictly an interest in settled property, it is an interest under a settlement.

### 86.6.3 *Garland* trust: SDLT

Para 2 sch 16 FA 2003 addresses the issue for SDLT:

Where property is held in trust under the law of Scotland, or of a country or territory outside the UK, on terms such that, if the trust had effect under the law of England and Wales, a beneficiary would be regarded as having an equitable interest in the trust property—

(a) that beneficiary shall be treated for the purposes of this Part as having such an interest notwithstanding that no such interest is recognised by the law of Scotland or, as the case may be, the country or territory outside the UK, and

(b) an acquisition of the interest of a beneficiary under the trust shall accordingly be treated as involving the acquisition of an interest in the trust property.

## 86.7 Liechtenstein: Introduction

Liechtenstein has 4 types of entity that may be used in wealth-holding arrangements:

Entity	Translation	See para
Stiftung	Foundation	86.9
Anstalt	Establishment	86.10
Treuunternehmen	Trust Enterprise	86.11
Treuhandenschaft	Trust	86.12

I consider these separately, but here make some comments which apply to all these entities.

The law is in the Liechtenstein *Personen- und Gesellschaftsrecht*.<sup>86</sup>

---

<sup>86</sup> <https://www.gesetze.li/konso/pdf/1926004000?version=14> (German).

Liechtenstein publishes English translations.<sup>87</sup> However these do not have official status, and are not updated with PGR amendments. The style of translation is very literal. I have not followed them exactly in my translations below.

HMRC expressed their views in the Liechtenstein disclosure facility.<sup>88</sup>

---

87 <http://www.icnl.org/research/library/files/Liechtenstein/liechcomp.pdf> (English)  
<https://www.marxerpartner.com/files/media/Downloads/New%20Foundation%20Law.pdf> (Translation of revised Foundations law, inserted into PGR in 2008)

Note that the following translations are not up to date:

<http://www.icnl.org/research/library/files/Liechtenstein/liechcomp.pdf>

Spitz & Clarke, Offshore Tax Service (looseleaf)

Glasson, "International Trust Laws" (looseleaf)

88 See the Second Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters (2010)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/387491/Second\\_joint\\_declaration\\_Memorandum\\_of\\_Understanding.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/387491/Second_joint_declaration_Memorandum_of_Understanding.pdf)

The Second Joint Declaration replaced the First Joint Declaration (2009) but there are no significant changes in the passages quoted here, apart from strengthening the disclaimer. See

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/387490/Joint\\_declaration\\_Memorandum\\_of\\_Understanding.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/387490/Joint_declaration_Memorandum_of_Understanding.pdf)

The Second Joint Declaration is subject to this disclaimer and qualification:

"The Government of the Principality of Liechtenstein and HMRC have considered and agreed the following guidance on characterisation, recognition and treatment of certain legal entities and fiduciary relationships to assist taxpayers and financial intermediaries in meeting their obligations for the purposes of the MOU. This guidance is based on Liechtenstein and UK laws as of 1 January 2010. The parties may review and revise this guidance to reflect relevant changes in those laws in the future. Where a person has an interest in a type of entity that is not specified below, they must provide complete information about the entity to HMRC to enable a view to be given.

For avoidance of doubt, nothing contained in this appendix is to affect the ability of affected persons to rely on UK law or practice permitting alternative characterisation, recognition and treatment. The parties further recognise that the ultimate UK taxation consequences for UK taxpayers will depend on the particular facts relating to specific entities or fiduciary relationships.

Nothing in this appendix affects how those entities or relationships are treated for any purposes outside the MOU."

(The first Joint Declaration contained a similar disclaimer, but without the last

Foundations are found in many jurisdictions, but Anstalt and Trust Enterprise are unique to Liechtenstein.

In the USA, a Foundation is classified as a trust for tax purposes, and an Anstalt and Trust Enterprise are classified as a company.<sup>89</sup> However the USA has express entity classification rules, which are different from UK tax law, so the USA material has no relevance in the UK.

## 86.8 Beneficiary rights

It has been argued that beneficiaries of a Foundation, in standard form,<sup>90</sup> have no enforceable rights; and likewise for other Liechtenstein entities. If correct, that would have certain UK tax advantages. (There would of course be a non-tax disadvantage that there would be nothing beneficiaries could do if the Foundation board decided to keep the trust fund for themselves or their friends). But the proposition seems absurd. What would be the point of any Foundation law if it conferred no enforceable rights?

For Liechtenstein, Art 2 PGR provides an answer:

Jedermann hat in der Ausübung seiner Rechte und in der Erfüllung seiner Pflichten nach Treu und Glauben zu handeln.

A person must act in good faith when exercising their rights or performing their duties.

Likewise art 182 PGR:

b) Befugnisse und Pflichten  
aa) Im Allgemeinen

Powers and duties: General

---

sentence).

89 IRS Memorandum AM2009-012, 2009, (Entity Classification of Liechtenstein Anstalts and Stiftungs) <http://www.irs.gov/pub/irs-utl/am2009012.pdf> Michaels "US tax treatment of the Liechtenstein trust enterprise (Trust Reg.)" [2010] Trusts & Trustees 405.

90 Beneficiaries' rights depend on the constitution of the entity, and no doubt express wording could confer rights, or confer them more clearly. But entities in more common form do not take this course, apart from those with Founder's Rights.

1) Die Verwaltung hat alle Befugnisse und Pflichten, die nicht einem anderen Organ übertragen oder vorbehalten sind ... Sie hat insbesondere auch für die Erhaltung des Grundkapitals sowie für die Sicherstellung und den Erfolg des Unternehmens im Rahmen ihrer gesetzlichen Pflichten und der dargebotenen Möglichkeiten besorgt zu sein.

The Board [entity administrators] shall have all the powers and duties not transferred to or reserved for another body ... In particular, the Board are responsible for the preservation of Entity capital, and, in the context of their statutory duties and investment opportunities, with the safety and success of the undertaking.

2) Sie hat das Unternehmen der Verbandsperson mit Sorgfalt zu leiten und zu fördern und haftet für die Beobachtung der Grundsätze einer sorgfältigen Geschäftsführung und Vertretung. Ein Mitglied der Verwaltung handelt im Einklang mit diesen Grundsätzen, wenn es sich bei seiner unternehmerischen Entscheidung nicht von sachfremden Interessen leiten liess und vernünftigerweise annehmen durfte, auf der Grundlage angemessener Information zum Wohle der Verbandsperson zu handeln....

The Board shall promote the entity's undertaking with due care and shall observe the principles of prudent business management and agency. A member of the Board acts in accordance with these principles if it does not take into account extraneous interests, acts in the interest of the entity prudently, and is properly informed...

4) Die Verwaltung ist der Verbandsperson gegenüber verpflichtet, alle Beschränkungen einzuhalten, die durch Gesetz, Statuten, Beschluss des zuständigen Organes oder in anderer Weise festgesetzt sind.

The Board is responsible to the entity to observe all restrictions laid down by law, articles, resolutions of the competent body, or in any other manner.

5) Soweit es nicht anders bestimmt ist, kommen der Verwaltung einer Verbandsperson die gleichen Befugnisse und Pflichten zu, wie der Verwaltung bei eingetragenen Genossenschaften.

Subject to any provision to the contrary, the Board of an Entity has the same powers and responsibilities as the Board of a registered Association.

### Biedermann explains:

Since, in most cases, the Liechtenstein foundation has legal personality, it is subject to the general provisions concerning legal persons and it has a corporate structure with a board of foundation. The *in rem* aspect of

the beneficial rights under trusts, i.e. non-reachability of trust property by creditors of the trustee, is not necessary for foundations, since the foundation has its own personality. The beneficial rights under a foundation may be less strong, because there is no specific tracing possibility *vis-à-vis mala fide* purchasers and volunteers. However, this deficiency is overcome by the public faith principle, since anyone dealing with a foundation has to look at the objects and competence clause of a foundation in order to know whether a board of foundation is entitled to *e.g.* sell some specific foundation property.<sup>91</sup>

Similar points arise for other Liechtenstein entities: Trust Enterprise and Anstalt.

Similar points arise for Foundation laws in other jurisdictions. For instance, in Jersey, art 25(1) Foundations (Jersey) Law 2009 provides:

A beneficiary under a foundation –

- (a) has no interest in the foundation's assets; and
- (b) is not owed by the foundation or by a person appointed under the regulations of the foundation a duty that is or is analogous to a fiduciary duty.<sup>92</sup>

Art 22 Foundations (Jersey) Law is the equivalent of art 182 PGR:

---

91 Biedermann, "Foundations vs Trusts" [1993] PCB 283. The 2008 amendment to the law of Foundations does not affect art 2 PGR.

92 A different rule applies when a beneficiary becomes entitled to a benefit. Art 25(2) Foundations (Jersey) Law provides: "However, if –

(a) a beneficiary under a foundation becomes entitled to a benefit under the foundation in accordance with the charter or the regulations of the foundation; and

(b) the benefit is not provided, the beneficiary may seek an order of the Royal Court ordering the foundation to provide the benefit.

(3) Except as provided by paragraph (4), the beneficiary must seek the order within the period of 3 years from the time when the beneficiary became aware of his or her entitlement to the benefit.

(4) If the beneficiary has not attained the age of 18 years when he or she became aware of his or her entitlement to the benefit, the period referred to paragraph (3) begins to run on the day on which the beneficiary attains that age."

But it seems doubtful if that applies to a merely discretionary beneficiary.

- (1) The members of the council of a foundation must conduct the foundation's affairs in accordance with its charter and regulations and this Law.
- (2) The members of the council of a foundation must –
  - (a) act honestly and in good faith with a view to the best interests of the foundation; and
  - (b) exercise the care, diligence and skill that reasonably prudent persons would exercise in comparable circumstances.

The misconception may be due to ambiguity in the expression “no enforceable rights”, compounded by problems of translation between civil law/common law jurisdictions. A discretionary beneficiary of a Foundation, Trust Enterprise or Anstalt may have no interest in the entity's property. But that is also broadly true of a beneficiary of a discretionary trust and under a *Garland* trust. It is also true of a shareholder in a company. That does not entail that they have no enforceable rights of any kind. In the event of a breach by a governing body, the remedy may be to petition the Court to replace the Board/Council members.<sup>93</sup>

### 86.8.1 *Founder's Rights*

The content of founder's rights strictly depends on the constitution of the entity.<sup>94</sup> But founder's rights typically confer power to decide distributions

---

<sup>93</sup> Thus the Australian and the Canadian analyses of a Foundation proceed on the basis that beneficiaries do have rights: see 86.9.5 (Australian law views); 86.9.8 (Canadian law views).

<sup>94</sup> For instance, art 18 Foundations (Jersey) Law 2009 provides:

- (1) A founder of a foundation has such rights (if any) in respect of the foundation and its assets as are provided for in its charter and regulations.
- (2) Any rights a founder of a foundation may have in respect of the foundation and its assets may be assigned to some other person if the charter or regulations of the foundation so provide.
- (3) Where –
  - (a) a founder of a foundation has rights in respect of the foundation and its assets; or
  - (b) a person has been assigned any rights of a founder in respect of a foundation and its assets,
 and the founder or person, as the case may be –
  - (c) dies; or
  - (d) in the case of a founder or a person that is not an individual, ceases to exist, those rights vest in the guardian of the foundation unless its charter or regulations

(to the founder or to others); and the entity has no duties to anyone other than the founder. I use the term Founder's Rights (with initial capitals) in that sense.<sup>95</sup>

An entity with Founder's Rights cannot be a settlement (under the IT/CGT and IHT definitions) because the only person who has any rights in relation to the entity is the founder.<sup>96</sup> An entity with Founder's Rights cannot be a settlement-arrangement, as there is no bounty. In these circumstances a Foundation and an Anstalt<sup>97</sup> should be classified as a company.<sup>98</sup>

If that is right, then termination of Founder's Rights (by an alteration of the constitution or by death of the founder) change the characterisation from company to trust. But there is no reason why that should not be so. It does not involve a disposal for CGT purposes, as the entity continues in existence: only its characterisation has changed.<sup>99</sup> But it may constitute an alteration in share capital for the IHT close-company code.<sup>100</sup>

## 86.9 Stiftung/Foundation

I here consider categorisation issues (ie, is a foundation a trust or a company?); for other aspects of foundations see:

Topic	See para
s.87 TCGA/Who are foundation trustees	57.3.4
s.3 TCGA	60.34

Foundation jurisdictions differ. I am not aware of differences between jurisdictions which might significantly affect UK tax categorisation issues,

---

provide otherwise.

95 The Liechtenstein disclosure facility uses the term in this sense: "For avoidance of doubt, in case of an establishment with founder's rights as used above, the founder (settlor) with founder's rights has full powers to decide upon who the beneficiaries are and to change the beneficiaries, and such powers are transferable."

For the meaning of "Founder" see 86.9.3 (Definition of Founder). But the identity of the Founder does not matter for the purposes of categorisation.

96 See 86.5 (US grantor trust).

97 See 86.10 (Anstalt/Establishment).

98 Founder's Rights are similar to shares. Unless the documentation otherwise provides, Founder's Rights can be assigned by a lifetime disposition or by will.

99 See too 86.44 (Change of entity type).

100 See 77.6 (Change in share capital/rights).

though that is possible. Foundations also differ in their drafting of their constitutions. But (apart from the special case of founder's shares), I am not aware of drafting points which should significantly affect UK tax categorisation issues, though that too is possible.

For the Foundation law background, see Panico, *Private Foundations Law and Practice* (1<sup>st</sup> ed, 2014).

### 86.9.1 *Foundation terminology*

The German term Stiftung is conventionally translated as “foundation”. I expect that is because the French/Latin equivalents are foundation/fundatio. The English word does not itself convey any information about the entity. If anything, it could be misleading. In the UK, the word “foundation” is used to refer to a nonprofit organisation,<sup>101</sup> and is most commonly found as a name for a charity (eg the British Heart Foundation). In the USA, “private foundation” is a technical term used to describe a specific category of charities and NPOs, in short, those which receive their funds from one person and which are regarded as donor-controlled.<sup>102</sup> These native English meanings of foundation are not relevant here.

I call it a Foundation, with an initial capital to reflect the technical nature of the word.

Foundations are long established in Liechtenstein and other civil law jurisdictions, and are now established by statute in most tax havens. Modern English language Foundation Laws follow the civil law pattern: their purpose is to provide clients from civil law jurisdictions an entity which civil lawyers will recognise and understand.

### 86.9.2 *Definitions of Foundation*

Gretton says:

---

101 See Companies House Guidance, “Sensitive words and expressions specified in regulations that require the prior approval of the Secretary of State to use in a company or business name”

<https://www.gov.uk/government/publications/incorporation-and-names/annex-a-sensitive-words-and-expressions-or-words-that-could-imply-a-connection-with-government>

102 See US Internal Revenue Code § 509 (Private foundation defined).

Eventually the civil law tradition came to recognise two sorts of juristic person: the *universitas personarum*, the corporation, and the *universitas rerum*, the foundation.<sup>103</sup> (The common law tradition has not gone down this road, recognising only corporations.) A foundation is a juristic person which is not a corporation. It has no members. It is an autonomous patrimony dedicated to a purpose - a *Zweckvermögen*. Some writers regarded the *Zweckvermögen* as having no owner at all. Others described it as owning itself. Others argued that it was “owned” by the “purpose” itself. Others again argued that notionally one could distinguish the juristic person (though memberless) from the estate which was owned: this latter is the dominant conception.<sup>104</sup>

Liechtenstein Foundations are governed by part 5 PGR.<sup>105</sup> The law was rewritten in 2008, with effect from 1 April 2009.

Art 552(1) PGR provides a definition:

### **I. Begriff und Zweck**

1. Umschreibung und Abgrenzung  
1) Eine Stiftung im Sinne dieses Abschnittes ist ein rechtlich und wirtschaftlich verselbständigt Zweckvermögen, welches als Verbandsperson (juristische Person) durch die einseitige Willenserklärung des Stifters errichtet wird.

Der Stifter widmet das bestimmt bezeichnete Stiftungsvermögen und legt den unmittelbar nach aussen gerichteten, bestimmt bezeichneten Stiftungszweck sowie Begünstigte fest.

### **Concept and purpose**

Description and definition

A Foundation within the meaning of this Part is a legally and economically independent purpose fund [sometimes translated: dedicated patrimony] which is formed as a legal entity (legal person)<sup>106</sup> by a unilateral declaration of the founder.

The founder provides the specifically designated Foundation assets, specifies the purpose of the Foundation, entirely non-self-serving and specifically designated, and also specifies the beneficiaries.

103 Footnote original: ... To what extent this conceptualisation was due to Savigny, and to what extent it is medieval, I am unqualified to discuss. [Gretton gives some references omitted here].

104 Gretton “Trusts Without Equity” (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5; footnotes omitted or abbreviated.

105 See 86.7 (Liechtenstein: Introduction).

106 A Foundation is a legal person, unlike a Trust Enterprise, which may be formed with or without legal personality.

2) Eine Stiftung darf ein nach kaufmännischer Art geführtes Gewerbe nur dann ausüben, wenn es der Erreichung ihres gemeinnützigen Zwecks unmittelbar dient oder aufgrund einer spezialgesetzlichen Grundlage zulässig ist. Soweit es die ordnungsgemäße Anlage und Verwaltung des Stiftungsvermögens erfordert, ist die Einrichtung eines kaufmännischen Betriebes auch bei privatnützigen Stiftungen zulässig.

A Foundation is only permitted to carry on a business activity if that is directly in furtherance of its charitable object or is expressly permitted by statute. So far the orderly investment and management of the Foundation assets require, a business activity is also permissible for private Foundations.

This may be compared to the definition in Austria. Article 1 Privatstiftungsgesetz 1993<sup>107</sup> provides the definition:

(1) Die Privatstiftung im Sinn dieses Bundesgesetzes ist ein Rechtsträger, dem vom Stifter ein Vermögen gewidmet ist, um durch dessen Nutzung, Verwaltung und Verwertung der Erfüllung eines erlaubten, vom Stifter bestimmten Zwecks zu dienen; sie genießt Rechtspersönlichkeit und muß ihren Sitz im Inland haben.

A private Foundation within the meaning of this law is a legal person, whose property is provided by the settlor, for its use, management and investment, for the purpose specified by the settlor; it possesses legal personality and must have its management [Seat] in Austria.

(2) Eine Privatstiftung darf nicht  
 1. eine gewerbsmäßige Tätigkeit, die über eine bloße Nebentätigkeit hinausgeht, ausüben;  
 2. die Geschäftsführung einer Handelsgesellschaft übernehmen;  
 3. unbeschränkt haftender Gesellschafter einer eingetragenen Personengesellschaft sein.

A private Foundation must not  
 1. carry on a commercial activity that is more than merely ancillary;  
 2. conduct the management of a trading company;  
 3. be a general partner of a registered partnership.

---

107 <https://www.jusline.at/gesetz/psg>

### 86.9.3 *Definition of Founder*

Art 552(4) PGR provides:

1) Stifter können eine oder mehrere natürliche oder juristische Personen sein. Eine durch letztwillige Verfügung errichtete Stiftung kann nur einen Stifter haben.

Founders may be one or more natural persons or legal entities. A foundation established by testamentary disposition can only have one founder.

2) Hat eine Stiftung mehrere Stifter, so können die dem Stifter zustehenden oder vorbehaltenen Rechte nur von allen Stiftern gemeinsam ausgeübt werden, es sei denn, die Stiftungserklärung sieht etwas anderes vor. Fällt einer der Stifter weg, so erlöschen im Zweifel die vorgenannten Rechte.

If a foundation has several founders, the rights to which the founder is entitled or which are reserved to the founder may only be exercised jointly by all the founders, unless the foundation declaration provides otherwise. If one of the founders dies, then in case of doubt the aforementioned rights expire.

3) Wird die Stiftung durch einen indirekten Stellvertreter errichtet, so gilt der Geschäftsherr (Machtgeber) als Stifter. Handelt auch dieser als indirekter Stellvertreter für einen Dritten, so gilt dessen Geschäftsherr (Machtgeber) als Stifter. In jedem Fall ist der indirekte Stellvertreter verpflichtet, dem Stiftungsrat die Person des Stifters bekannt zu geben.

If the foundation is formed by an indirect representative, the principal (authoriser) shall be deemed to be the founder. If this person also acts as an indirect representative for a third party, then his principal (authoriser) is deemed to be the founder. In either case, the indirect representative must notify to the Foundation board the name of the founder.

### 86.9.4 *Foundation: IT/CGT trust*

A Foundation might in principle be classified in any of the following ways:

- (1) A trust in the standard IT/CGT sense<sup>108</sup>
- (2) A company in the standard tax sense<sup>109</sup>

---

108 See ? (Settlor: Standard IT/CGT definition).

109 See 86.3 (Definition of “company”)

## (3) A legal person, but neither a trust nor a company in those senses

This work up to the 2018/19 edition took the view that property of a Foundation is not held “in trust”, and so a Foundation is not a trust in the standard IT/CGT sense. Instead it was a company:

A characteristic of a trust is that “the assets constitute a separate fund and are not a part of the trustee’s own estate”.<sup>110</sup> A Foundation does not have this characteristic: A Foundation holds property, but there is only one fund, not a fund separate from the Foundation’s own assets (as would be the case for a trustee). So it is not an IT/CGT settlement.

There are of course other significant differences between a Foundation and a trust, in particular the beneficiaries of a Foundation have different and perhaps weaker rights. But the failure to meet what the Hague convention on the law applicable to trusts identifies as a defining characteristic is the most significant point.

A Foundation is a body corporate. It is therefore a company for UK tax purposes. A Foundation is therefore subject to UK corporation tax on its income and gains if it is UK resident and in principle subject to income tax on UK source income at the basic rate if non-resident. The test of residence is the company test of central management and control.

But on further reflection I am inclined to think, with HMRC, that

- (1) A Foundation is a trust within the standard IT/CGT definition, and
- (2) A Foundation is not a company in the standard tax sense

The reasons are as follows:

- (1) A Foundation is a trust in the standard IT/CGT sense because:

---

110 Footnote original: See Article 2 Hague Convention on the Law applicable to Trusts and on their Recognition. See too Hayton “Principles of European Trust Law” p.23 in *Modern International Developments in Trust Law* (1999) ed. Hayton: “While many mainland European jurisdictions have the functional equivalent of a charitable purpose trust in the guise of a foundation which has legal personality, we deliberately rejected extending our [conception of] trust to cover such functions. It is because a trust is not a company, not a corporate person, but a segregated fund owned by trustees, that different rules from those for companies developed for trusts.”

It is hard to make any comment about trusts without qualification. Assets of a charitable trustee incorporated under s.251 Charities Act 2011 might not constitute a separate fund. But that is an anomalous and unusual case and perhaps itself not a “trust” in the ordinary sense.

- (a) It must benefit others, not itself (“unmittelbar nach aussen gerichteten ... Stiftungszweck”).
- (b) In applying statutory words (here, “Settled property” means any property held in trust ...) to a foreign law entity, a certain amount of flexibility is appropriate. A Foundation is more like a trust than like a company.

This is consistent with practice in Australia, which is well-reasoned.

The argument to the contrary was that:

- (1) A foundation is a body corporate.
- (2) Company (in the standard tax sense) is defined to include a body corporate.

But it is suggested that a foundation is not a body corporate, or at least not in the relevant sense:

- (1) Who is the “body”, in the absence of shareholders or members? It can hardly be the Board of the Foundation.
- (2) A Foundation does have legal personality but what that entails must be understood in the context of the applicable law’s concept of legal personality, not English law.<sup>111</sup> It does not follow from Liechtenstein law legal personality that a Foundation is a body corporate in the UK law sense.<sup>112</sup>

---

111 See App.2.9.4 (Legal person: Foreign law).

112 See 86.4.3(What is a body corporate?)

In Guernsey, “Foundations have legal personality but are not bodies corporate”; see States of Guernsey, “Consultation on the potential enactment of LLC legislation in Guernsey” p.8 (2019)

<https://www.weareguernsey.com/media/6971/llc-consultation-report.pdf>

Art 30 Foundations (Jersey) Law 2009: “A foundation is an incorporated body.” Perhaps that tends to suggest it is a body corporate, but perhaps not for UK tax law purposes.

OECD Model Commentary supports the view that a Foundation is a body corporate, at least for OECD Model purposes. Art 3(1) OECD Model provides:

“a) the term “person” includes an individual, a company and any other body of persons;

b) the term “company” means any body corporate or any entity that is treated as a body corporate for tax purposes”

The OECD Commentary on art 3, para 2, provides:

“... the term ‘person’ includes any entity that, although not incorporated, is treated

Even if (contrary to the above) a Foundation is a body corporate, it does not matter because:

- (1) It is a trustee, and so (except where the context otherwise requires), it is treated as a distinct notional person which is not a body corporate<sup>113</sup>  
or
- (2) Context shows that it is not intended to be within the definition of company.

If (contrary to all the above) a Foundation is not a trust in the standard IT/CGT sense, it would *still* not be a company in the standard tax sense. If not a trust, a Foundation should be regarded as a legal person other than a company in the standard tax sense.

A Foundation is a settlement-arrangement<sup>114</sup> so it is a “settlement” for the purposes of s.87 TCGA.<sup>115</sup>

#### 86.9.5 Australian law view

The Australian Taxation Office categorise a Foundation as a trust, for the purposes of Australian tax law.

##### Status of a Liechtenstein Foundation

**Question 1:** Is the X Foundation, a Liechtenstein foundation, a trust estate for the purposes of Division 6 of Part III of the [Australia] Income Tax Assessment Act 1936 (ITAA 1936)?

**Answer:** Yes ...

##### Relevant facts:

##### The X Foundation

The X Foundation is a Liechtenstein foundation known as a Stiftung...

The ruling sets out a detailed description of the Foundation; but it is sufficient here to note that the Foundation was in common form, and did not confer Founder’s Rights.

---

as a body corporate for tax purposes. Thus, e.g. a foundation (fondation, Stiftung) may fall within the meaning of the term ‘person’.”

But there is no doubt that a Foundation is a person; it is not necessary to say that it is a body corporate; and it is doubtful whether it is right to generalise about the foundations in different legal systems.

113 See 6.3 (Trustees a distinct person).

114 Assuming (as will generally be the case) that the bounty requirement is met.

115 See 57.2 (“Settlement”/“settled property”).

**Reasons for decision:*****Liechtenstein Foundation (Stiftung) Law***

[The ruling sets out the relevant provisions of the PGR and continues:]

In summary, a Liechtenstein foundation exists to give effect to the stated, non-commercial wishes of its Founder, as set out in a Foundation Deed (the Statutes). The Founder transfers assets to the foundation in the interest of specific beneficiaries. The assets become legally independent from the Founder so that the foundation is endowed with those assets to form a separate legal personality.

The foundation is normally administered by the foundation board which amounts to a board of trustees, in accordance with the declared wishes of its founder.

A foundation may be a family foundation established to provide benefits to members of a designated family, or a charitable or religious foundation.

***Nature of the foundation***

The Liechtenstein foundation is similar to a corporation in that it can enter into contracts, sue, be sued and hold bank accounts, in its own name. However, unlike the corporation, the foundation itself has no members or shareholders. Similarly, the founder has no ownership rights to the independent assets. The foundation has beneficiaries but they are not owners of the foundation.

The foundation above all constitutes a relationship of trust between persons. In practice, the founder authorises the foundation board to administer his personal assets, or a part thereof, in the interest of one or more beneficiaries.

**Question 1: Is the X Foundation a ‘trust estate’ under Division 6 of Part III of the ITAA 1936?****86.9.6 Trust concept in Australia**

The ATO statement continues:

Division 6 of Part III of the ITAA 1936 provides for the income tax treatment of the net income of trust estates. ‘Trust estate’ is not defined in the ITAA 1936 or the Income Tax Assessment Act 1997 (ITAA 1997) as no definition of a trust seems to have been accepted as comprehensive and exact. French J in *Harmer v FCT* (1989) 20 ATR 1461; 89 ATC 5180 (*Harmer Case*) stated that a trust is notably ‘a definition of a relationship by reference to obligations’. As to what constitutes a ‘trust relationship’ should therefore be determined in accordance with guidance provided by the Courts.

The 7th edition of Jacobs’ *Law of Trusts in Australia* (Chapter I paragraph 103)<sup>116</sup> defines a trust relationship as:

‘...the whole relationship which arises between the parties in respect of the property the subject of the trust, and the obligation of the trustee to the beneficiary, and the interest of the beneficiary in the property may be regarded as results flowing from the existence of that relationship.’

---

116 Paragraph 1-03, in the 8<sup>th</sup> edition (2016). The passage quoted is unchanged in the current edition.

Following from the above definition, the four essential elements of a ‘trust relationship’ are identified in paragraph 104, Chapter I, of the previously stated edition of Jacobs’ *Law of Trusts in Australia*. Those essential elements were quoted with approval in the *Harmer Case* at 89 ATC 5187, as follows:

- The existence of a trustee who holds a legal or equitable interest in the trust property,
- The existence of trust property which must be property capable of being held on trust and which includes a chose in action,
- The existence of one or more beneficiaries other than the trustee, and
- A personal obligation on the trustee to deal with the trust property for the benefit of the beneficiaries

[The ruling refers to ATO Interpretative decision ATO ID 2008/2 which concludes that a Dutch Stichting is a ‘trust’, and ATO ID 2008/62 which concludes that as the Stichting is created under Netherlands law and has a legal personality under Netherlands law, it should be recognised as a legal entity in Australia; see 86.31 (Dutch stichting/Foundation).]

In regards to the creation of a ‘trust’ and the role of a trustee’, the majority of the High Court in *The Registrar of the Accident Compensation Tribunal (Vic) v FCT93* ATC 4835 at 4842 clarified that:

‘A trust may be created without use of the word “trust”. And, unless there is something in the circumstances of the case to indicate otherwise, a person who has “the custody and administration of property on behalf of others” or who “has received, as and for the beneficial property of another, something which he is to hold, apply or account for specifically for this benefit” is a trustee in the ordinary sense.’

On the concept of a trust there is no difference between Australian and English law.

### 86.9.7 *Categorisation of Foundation*

The ATO statement continues:

The X Foundation has been established consistent with Article 552 §§ 1-41 of the PGR as a separate legal entity intended to serve private or personal purposes in accordance with its declaration of establishment.

The By-Laws of the X Foundation provide that it was formed by the trustee company, acting as the Founder. For the purposes of the PGR, the trustee company has the role of an indirect representative giving effect to the declared wishes of Mr. Y as the principal (authoriser). Mr. Y is therefore deemed to be the Founder of the X Foundation.

The underlying purpose of the Foundation, pursuant to the declaration establishment and the By-Laws, is to invest, manage and administer the foundation assets, in the nature of investment products for the support and/or benefit of all or any one or more of the beneficiaries of the Foundation.

The declaration of establishment and the By-Laws authorise the foundation board to determine the beneficiaries and make distributions of the foundation assets to designated beneficiaries in their entirety or in parts at any time and at the free discretion of the foundation board.

In summary, having regard to its declaration of establishment and By-Laws:  
 The X Foundation has legal ownership and possession of the foundation assets;  
 The foundation assets are capable of being held on trust;  
 The foundation board, in the role of a trustee, manages and administers the foundation assets for the benefit of beneficiaries of the Foundation;  
 The beneficiaries of the Foundation are expressly identified in the By-Laws; and  
 The terms of the declaration of establishment and the By-Laws impose on the foundation board, a personal obligation to deal with the foundation assets strictly for the benefit of the beneficiaries as the foundation board may in its absolute discretion think fit.  
 It is considered that, in respect of the X Foundation, all four essential elements identified in the *Harmer Case* as giving rise to a trust relationship exist between the Foundation, the foundation board and the persons entitled to benefits (the beneficiaries) from the foundation.

In *Mulherin v. CT* 2013 FCAFC 115 (*‘the Mulherin Case’*), the Full Federal Court found that the AAT had correctly affirmed the Commissioner’s decision to assess the taxpayer’s income from a Liechtenstein Foundation established by the taxpayer. The premise of the assessments, as determined by the Commissioner and accepted by the taxpayer, was that the income represented the taxpayer’s present entitlement in respect of a ‘resident trust estate’.

In conclusion, based on the interpretation of the Liechtenstein Foundation Law and the views held by Australian Courts, it is considered that the X Foundation is a ‘trust estate’ for the purposes of Division 6 of Part III of the ITAA 1936 for the income years covered by this ruling.<sup>117</sup>

The same reasoning should apply in the UK.

### 86.9.8 Canadian law view

However an Austrian Privatstiftung (non-charitable Foundation) has been categorised as a company, not a trust, for Canadian tax law:

[39] ... the law of Austria does not recognize trusts as understood in Canadian law. However, it is evident that as a practical matter ... Herbert Sommerer may well have achieved many of the objectives that could have been achieved in a common law jurisdiction by settling a trust for Peter Sommerer, his spouse and their children. He did so by creating and endowing the Sommerer Private Foundation under the Austrian Private Foundations Act and naming Peter Sommerer, his spouse, and their children as beneficiaries and ultimate beneficiaries. But that does not

---

117 ATO “Status of a Liechtenstein Foundation” (2017)

<https://www.ato.gov.au/law/view/view.htm?docid=EV/1051209890341&PiT=99991231235958>

mean as a matter of law that the creation and endowment of the Sommerer Private Foundation was the settlement of a trust...

[40] As mentioned above, an Austrian private foundation is a juridical person with the legal capacity to own property in its own right and to deal with its property on its own account. The legal right of an Austrian private foundation to deal with its own property is the same as the legal right of a Canadian corporation to deal with its own property. That is so despite the fact that the board of an Austrian private foundation must manage its affairs in furtherance of the purposes stipulated in its constating documents. The board of directors of a corporation is similarly constrained, in the sense that it must manage the affairs of the corporation in its best interests, subject to any terms and conditions in its constating documents.

[41] A corporation does not hold its property in trust for its shareholders or members, except to the extent that a trust deed or an analogous legal instrument imposes the legal and equitable obligations of a trustee on the corporation with respect to specific corporate property. Assuming it is theoretically possible for an Austrian private foundation to hold its property in trust (that is, subject to conditions that are analogous to the legal and equitable obligations of a trustee in a common law jurisdiction), that possibility cannot be realized unless those conditions are formally established. Nothing in the constating documents of the Sommerer Private Foundation or the law of Austria ... supports the conclusion that the right of the Sommerer Private Foundation to deal with its property is constrained by any legal or equitable obligations analogous to those of a common law trustee.

[42] Looking at the situation from another point of view, a shareholder or member of a corporation, as such, is not the beneficial owner of any property or the corporation, and has no legal or equitable claim to the corporate property ... a shareholder or member has only an inchoate right to receive distributions of corporate property from time to time at the discretion of the board of directors, and to share in the distribution of the corporate property upon its dissolution. The same can be said of the interest of a beneficiary or an ultimate beneficiary in the property of an Austrian private foundation. Nothing in the Austrian Private Foundations Act or the constating documents of the Sommerer Private Foundation gives Peter Sommerer a legal or equitable claim to the corporate property that is different from that of a shareholder or member of a corporation.

[43] For these reasons, I doubt that the Sommerer Private Foundation holds any of its property in trust for Peter Sommerer.<sup>118</sup>

The Australian/Canadian positions could be reconciled on the basis that:

- (1) Liechtenstein/Austrian Foundations are different,<sup>119</sup> so that one could be regarded as a trust and the other as a company or
- (2) Australian/Canadian tax laws are different, so they categorise the same entities in different ways.

I cannot identify material differences. Unless expert evidence can be cited, the better view is that they are incompatible, rival, analyses; and it is considered that the Australian analysis is better, at least for the UK.

### 86.9.9 *Foundation an IHT-settlement*

Foundation property is normally held for persons in succession or with power to make payments out of Foundation income.<sup>120</sup> The question then is (in short) whether a Foundation is a trust, or equivalent in effect to a trust.<sup>121</sup>

This raises a question as to the effect of a Foundation. For Liechtenstein, Lorenz says:

It now appears that the Liechtenstein Supreme Court has used Liechtenstein trust law as a basis for the development of a coherent pattern of principles applicable to all types of Liechtenstein asset planning devices, in particular foundations and establishments, and not just the trust ...

... the internal design of foundations will increasingly come to resemble that of trusts, and that disputes relating to foundations will increasingly be resolved by applying principles of trust law.<sup>122</sup>

Biedermann says:

---

118 *Canada v Sommerer* [2012] FCA 207, 15 ITELR 426; <http://www.canlii.org>

119 See 86.9.2 (Foundation definition).

120 See 1.6.3 (Limb (b): Income powers).

121 See ? (Definition of “IHT-settlement”).

122 *Disputes involving Trusts*, ed. Vogt, 1999, p.213.

Operationally speaking, there is no difference between a family foundation and a family trust.<sup>123</sup>

CRS guidance refers to foundations as “functionally similar to trusts”.<sup>124</sup> The Liechtenstein disclosure facility<sup>125</sup> provides:

a business activity is only allowed in the case of charitable foundations or private foundations where a respective law specifically permits it. In the case of family foundations, business activity (“*nach kaufmännischer Art geführtes Gewerbe*”) is not permitted. Accordingly, while a foundation has its own legal personality, its essence and purpose, like those of a trust, is to preserve and maintain assets for the beneficiaries

It is considered that a Foundation is an IHT-settlement on the basis that:

- (1) it is a trust; or
- (2) if not a trust, it is at least equivalent to a trust<sup>126</sup>

It has been argued that a Foundation cannot be an IHT-settlement because beneficiaries of the Foundation have no interest in Foundation property. But even if the premise is correct, the conclusion does not follow. Beneficiaries of a *Garland* trust have no interest in trust property. A charitable trust confers no rights on beneficiaries, and a charitable trust is clearly an IHT-settlement. All that matters is that there is some legal mechanism which recognises their rights and prevents the board of a Foundation treating the Foundation property as their own.

---

123 Biedermann, “Foundations vs Trusts” [1993] PCB 283. Nosedá makes a similar point: “The Foundations (Jersey) Law 2009: A Civilian Perspective” [2010] *The Jersey & Guernsey Law Review* 48 at [13].

124 See 121.27 (Controlling person: Foundations).

125 See 86.7 (Liechtenstein: Introduction).

126 This view has some support in *Hamilton v Hamilton* [2016] EWHC 1132 (Ch) at [20] (“... the assumption (which would have been hard to resist) that the establishment of [the Liechtenstein Foundation] created a settlement, within the very wide definition of that term in s.43(2) IHTA...”).

The contrary argument would focus on the word “equivalent”, and state that since there are undoubtedly some differences, the two are not equivalent. The statute is looking at the broad substance rather than absolute equivalence but where to draw the line is hard to tell. But if a Foundation *is* a trust the issue does not arise.

It is considered that a charitable Foundation (as opposed to a private Foundation) is not an IHT-settlement. It is closer to a charitable company, and so should not be regarded as equivalent in effect to a charitable trust.<sup>127</sup>

#### 86.9.10 *Founder's Rights: a company*

The position is different for a Foundation with Founder's Rights.<sup>128</sup> This cannot be a settlement or a settlement-arrangement. The choice is between a bare trust for the founder, and a company beneficially owned by the founder; a company seems the best analysis.

#### 86.9.11 *HMRC view*

The Liechtenstein disclosure facility<sup>129</sup> provides:

... foundations ("Stiftungen") [are] to be characterised, recognised and treated as trusts for UK tax purposes.<sup>130</sup>

The former TDSI Guidance Notes<sup>131</sup> provided:

[1] ... Stiftungs are Liechtenstein business entities which are fiscally opaque. ...

127 For the question of whether foreign charities qualify for UK charity tax relief, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), Chapter 3 (Definitions of "Charity") online version <https://www.taxationofcharities.co.uk> HMRC accept this in practice (private correspondence).

128 See 86.8.1 (Founder's Rights).

129 See 86.7 (Liechtenstein: Introduction).

130 The same point is made in ToA draft guidance:

**INTM600380 person abroad - examples** "... Generally we treat ... a Stiftung like a discretionary trust."

Again, in the context of s.720 protected-trust relief, HMRC guidance states that "settlement" (here, the standard IT/CGT definition) includes "foreign entities that fall to be treated like trusts under the principle in *Meme plc v IRC* e.g. certain types of foundations"; See 88.13.2 (Condition (b): Settlement).

131 HMRC, "Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 2.3.

<https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions>

TDSI was abolished in 2016, and the Guidance Notes withdrawn. But the general point made here remains relevant, and there is no reason to think that HMRC practice has changed.

[2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor<sup>132</sup> and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.

[3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

Point [3] assumes that a Foundation can be transparent for IT which contradicts point [1].<sup>133</sup>

HMRC do not refer to statutory provisions but are clearly saying that in their view Foundations are trusts for all tax purposes.

It is true that HMRC recognise that there may be special circumstances, but in the absence of special circumstances, if it suits the Foundation to take the view that the Foundation is a trust for all tax purposes, including the IT/CGT definition, it can properly do so. That might be helpful, for instance, if the taxpayer wishes to argue that:

- income of a company held by a Foundation is protected s.720 income<sup>134</sup>
- ESC B18 applies
- a Foundation is an IIP trust and transparent for income tax purposes
- ATED does not apply<sup>135</sup>

#### 86.9.12 *Foundation: IIP trust?*

Since a Foundation is an IHT-settlement, the question may arise whether a beneficiary's interest under the settlement is an interest in possession. (This question does not often matter for IHT for Foundations made after 2006.)

This raises two issues:

- (1) What is the test for an “interest in possession”. This is a question of UK tax law; “interest in possession” is a technical term of English trust

132 Author's footnote: It is assumed that the Foundation is a settlor-interested trust.

133 HMRC classify Liechtenstein as a *Garland* jurisdiction: see 39.8 (Baker or Garland trust?).

134 See 88.14.1 (Cond. (c): Trustee participator).

135 See 93.27 (Co. purchaser (non-natural person)).

law, and (subject to any particular provisions in the tax statute concerned) it should have its English trust law meaning.

- (2) Whether any particular interest meets those requirements; this is a matter of applying the governing law to the document in question.

An interest in possession is a current right to current income. If a Foundation confers such a right, the beneficiary has an interest in possession. Whether that should be regarded as an interest in possession *in settled property* is at first sight more doubtful.<sup>136</sup> However as “settlement” is given an extended meaning, it is suggested that the meaning of related expressions such as “interest in possession in settled property” should be given a comparable extended meaning. Thus a beneficiary has an IIP if they have the right to the income of the Foundation as it arises.<sup>137</sup>

Whether a beneficiary has the right to income as it arises depends on the drafting (construed in accordance with the governing law). At the borderline, the distinction between IIP and non-IIP trusts is one of form rather than substance, and not appropriate to a Foundation which is not even a trust, but merely equivalent in effect. In such cases one can only answer the question on the basis of “doing the best one can” and with the benefit of appropriate foreign law advice.

### 86.9.13 *Foundation: Income distributions*

This section considers the taxation of a UK resident beneficiary on a distribution from a Foundation.

If a Foundation is a trust, within the standard IT/CGT definition, and not transparent (ie there is no interest in possession), an income receipt from a Foundation is classified as an Annual Payment and not a distribution. (The same should apply if, contrary to the view taken in this book, a Foundation is an entity which is neither a company nor a trust). For arising basis taxpayers, this makes a difference as the rates of tax for Annual Payments and company distributions are different.

If that is right, the position depends on the drafting of the power which the Foundation uses to make or authorise the distribution.<sup>138</sup> If the receipt

---

136 See 86.8 (Beneficiary rights).

137 See 86.6.1 (IIP in Garland trust).

138 See 38.8 (Trust payment: Income/capital).

is classified as income, it is classified as an Annual Payment, like a trust distribution. If the receipt is classified as capital the usual s.731/s.87 rules will apply.

## 86.10 Anstalt/Establishment

The term Anstalt is conventionally translated as “establishment”. I expect that is because the French equivalent is *établissement*. But the English word itself does not convey any information about the entity. One might call it an Establishment, with an initial capital to reflect the technical nature of the expression, but I prefer to use the word Anstalt. The term must not be confused with *Permanent Establishment* which is a different concept.

An Anstalt is governed by Part 5 PGR.<sup>139</sup> Art 534(1) PGR provides the definition:

### A. Begriff und Abgrenzung

Anstalt (Etablissement) im Sinne dieses Titels ist ein nach den folgenden Vorschriften rechtlich verselbständigt und organisiertes, dauernden wirtschaftlichen oder anderen Zwecken gewidmetes, ins Öffentlichkeitsregister als Anstaltsregister eingetragenes Unternehmen, das einen Bestand von sachlichen, allenfalls persönlichen Mitteln aufweist und nicht öffentlich-rechtlichen Charakter hat oder eine andere Form der Verbandsperson aufweist.

### Concept and definition

An Anstalt (Establishment) within the meaning of this Part [Part 5 PGR], and pursuant to the following regulations, is a legally independent and organised undertaking, dedicated to permanent economic or other objects, and entered in the Public Anstalt Register, which holds tangible or personal property, and is not a public law institution or any other type of legal entity.

The former TDSI Guidance Notes provided:

### Anstalts & Stiftungs

Anstalts ... are Liechtenstein business entities which are fiscally opaque.

---

139 See 86.7 (Liechtenstein: Introduction). See too “Half Trust, Half Company, All Anstalt” Bulletin for International Taxation, 1999 (Volume 53), No 8.

The current HMRC view is that Anstalts should all be dealt with as if they are companies. For TDSI, this means that Anstalts should receive gross interest.<sup>140</sup>

Despite this statement, and classification in the HMRC transparent/opaque list as “opaque”, HMRC practice has not always been consistent.<sup>141</sup> The Liechtenstein disclosure facility<sup>142</sup> takes a different approach:

- 1) An establishment (“Anstalt”) in Liechtenstein to be characterised, recognised, and treated for UK tax purposes as follows:
  - a) An establishment that according to its articles is permitted to undertake a business activity (“*nach kaufmännischer Art geführtes Gewerbe*”), and therefore is obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as a company.
  - b) An establishment that according to its articles is *not* permitted to undertake a business activity (“*nach kaufmännischer Art geführtes Gewerbe*”), and therefore is *not* obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as follows:
    - i) An establishment with founder’s rights<sup>143</sup> or shares<sup>144</sup> to be characterised, recognised and treated as a company.
    - ii) An establishment with no founder’s rights or shares to be characterised, recognised and treated as a trust.

Other Liechtenstein treaties also draw distinctions between Anstalts (and Trust Enterprises) carrying on commercial /non-commercial activity, and

---

140 HMRC, “Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 2.3.

<https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions>

TDSI was abolished from 2016/17, and the Guidance Notes withdrawn. But the general point made here remains relevant.

141 Private correspondence.

142 See 86.7 (Liechtenstein: Introduction).

143 For Founder’s Rights (Gründerrechte) see 86.8.1 (Founder’s Rights).

144 Author’s footnote: An Anstalt with shares (Anstaltsanteile) is possible but not common.

those with/without Founder's Rights. For instance, under Liechtenstein FATCA, an Anstalt with non-commercial objects is classified as a trust.<sup>145</sup>

An Anstalt with Founder's Rights cannot be a settlement under the IT/CGT or IHT definitions, or a settlement-arrangement.<sup>146</sup> The choice is between a bare trust for the founder, and a company beneficially owned by the founder; company seems the best analysis.

Article 545(2) PGR provides:

<p>Vom Anstaltsvermögen darf nur ein dem Überschuss des Reinvermögens über den statutarisch eingezahlten oder sonst gedeckten Anstaltsfonds entsprechender Betrag nach allfälligen Rücklagen in die durch die Statuten vorgesehenen Reservefonds, als verfügbarer Reingewinn entnommen werden.</p>	<p>Only an amount corresponding to the surplus of net assets in excess of the establishment capital paid in pursuant to the articles or otherwise covered may be withdrawn from the Anstalt's assets as available net profit, after allowance has been made for anticipated reserves to be paid into the reserve fund provided for in the articles</p>
--	--

While not determinative, this does seem a very company-like feature of an Anstalt.

---

145 The full title is: Agreement between the Government of the United States of America and the Government of the Principality of Liechtenstein to Improve International Tax Compliance and to Implement FATCA. This provides:

<p>The term "Trust" shall include trusts, foundations and non-commercial establishments ("Anstalten") if the foundation or establishment is created for the primary purpose of protecting or conserving the property of the foundation or establishment on behalf of beneficiaries.</p>	<p>Der Ausdruck "Trust" umfasst Trusts, Stiftungen und nicht kommerziell tätige Anstalten, sofern die Stiftung oder Anstalt für den vorrangigen Zweck errichtet wurde, das Eigentum der Stiftung oder Anstalt für die Begünstigten zu schützen oder zu erhalten.</p>
---	--

<https://www.treasury.gov/resource-center/tax-policy/treaties/Documents/FATCA-Agreement-Liechtenstein-5-19-2014.pdf>  
<https://www.gesetze.li/konso/pdf/2015005000?version=2>

Similarly, I understand that under the Liechtenstein/Austria Tax Cooperation Agreement, a Trust Enterprise with no Founder's Rights and non-commercial objects is classified as a Foundation; but I have not seen the relevant treaty text.

146 See 86.8.1 (Founder's Rights).

Matthews says that “the structure much more resembles a company than a trust” and goes on to say that the PGR envisages 3 kinds of Anstalt:<sup>147</sup>

- (i) the one-man Anstalt
- (ii) the trust-like Anstalt
- (iii) the company-like Anstalt

The first is like a one-man company. The founder is the only beneficiary and controls everything that the Anstalt does.

The second is where the founder gives control to a board of directors and the beneficiaries are other people.

The third is where two or more founders create a structure to benefit themselves, retaining control in their hands.

It makes sense to treat type (i) and (iii) as a company and type (ii) as a trust.<sup>148</sup>

## 86.11 Treuunternehmen/Trust Enterprise

### 86.11.1 *Treuunternehmen terminology*

Treuunternehmen is literally and conventionally translated “trust enterprise” (sometimes “trust undertaking”). But the English expression does not itself convey much information about the entity. I call it a Trust Enterprise, with initial capitals to reflect the technical nature of the expression, though there is something to be said for using the German term.

---

147 “Some Alternatives to Trusts” [1995] OTPR 31.

148 Though in practice there may be borderline cases. Matthews says: “Of course, it is possible to design and form an Anstalt which falls between these different types. For example, the founder might remain the principal beneficiary during his life, and retain control of the Anstalt activities as well, but on his death cede control to a board of directors and appoint third party beneficiaries. Or he might appoint third party beneficiaries straightaway, but retain control.”

The term Geschäftstreuhand is a synonym.<sup>149</sup> I translate this “Business Trust”, again with initial capitals to indicate that it is a technical term.

It is sometimes called Trust reg. (reg for registered)<sup>150</sup>; that does not seem wholly apt but it might again be regarded as a technical expression.

A Trust Enterprise is governed by art 932a PGR.<sup>151</sup> Art 932a(1) PGR provides the definition:

**a) Treuunternehmen ohne und mit Persönlichkeit**

1) Treuunternehmen als eigentliche Geschäftstreuhand nach dem Gesetze ist ein auf Grund der Treusatzung von einem oder mehreren Treuhändern (als treuhänderischen Inhabern) unter eigenem Namen oder eigener Firma geführtes beziehungsweise weiter betriebenes, rechtlich verselbständigtes, organisiertes, wirtschaftlichen oder anderen Zwecken dienendes und mit eigenem Vermögen bewidmetes Unternehmen ohne Persönlichkeit, für dessen Verbindlichkeiten eine Haftung gemäss diesem Gesetze besteht (“Treuunternehmen ohne Persönlichkeit”) und das weder öffentlich-rechtlichen Charakter hat noch eine andere privatrechtliche Rechtsform aufweist.

**Trust Enterprises with and without legal personality**

A Trust Enterprise which constitutes a true Business Trust according to the law, is an undertaking, managed or operated on the basis of the trust articles by one or more trustees (as fiduciary owners), under their own name or a firm name, which, legally autonomous and organised, pursues economic or other objects, and is endowed with its own assets, without legal personality, whose liabilities are governed by this law (“Trust Enterprise without legal personality”) and that is not a public law institution or any other private law legal entity.

149 Art 1032a PRG, amended 2010, provides:

In der Firma oder in einem Zusatz muss “registriertes Treuunternehmen” stehen, oder eine ähnliche Bezeichnung, wie “registrierte Geschäftstreuhand”, “registrierte Salmanschaft”, “registrierte Treustiftung”, “registriertes Treuinstitut”, bei einem Treuunternehmen, das kein nach kaufmännischer Art geführtes Gewerbe betreibt ...

(A Trust Enterprise that does not carry on business must include in its name (or by its name) the words “registered Trust Enterprise” or a similar expression such as registered Geschäftstreuhand [Business Trust]/Salmanschaft/Treustiftung/Treuinstitut.

150 See above footnote.

151 See 86.7 (Liechtenstein: Introduction).

2) Wird unter sinngemässer Anwendung des vorausgehenden Absatzes ein Unternehmen in der nach den Vorschriften dieses Gesetzes aufgestellten Treusatzung (Errichtungsurkunde) ausdrücklich als Treuunternehmen mit Persönlichkeit errichtet, so finden auf dieses uneigentliche Treuunternehmen im übrigen die Bestimmungen über die eigentliche Geschäftstreuhand, insbesondere jene über die Haftung für die Verbindlichkeiten entsprechende Anwendung (“Treuunternehmen mit Persönlichkeit”).

Where, by analogous application of the above paragraph, an undertaking is created as a Trust Enterprise with legal personality expressly stated in the trust articles (formation deed), which are drawn up pursuant to the provisions of this law, the provisions concerning a true Business Trust shall also apply to this quasi Trust Enterprise, in particular, those relating to liability (“Trust Enterprise with legal personality”).

The Liechtenstein disclosure facility<sup>152</sup> records the HMRC view:

A trust enterprise (“*Treuunternehmen*”) in Liechtenstein is to be characterised, recognised, and treated for UK tax purposes in an analogous way to an establishment (“*Anstalt*”).<sup>153</sup>

The Trust Enterprise was introduced in 1928.

It is said to be modelled on the US (or Massachusetts) business trust.<sup>154</sup> That does not take a UK practitioner very far, because

- (1) The US business trust is an unfamiliar institution, (if indeed it is a clearly defined institution); and
- (2) It is not clear how closely the Trust Enterprise follows that model.<sup>155</sup>

PGR describes Trust Enterprises with/without legal personality as *eigentliche/uneigentliche* Treuunternehmen, which might be translated as *true/quasi* Trust Enterprises. It is suggested that the distinction does not affect the entity classification for UK tax purposes, because (apart from

152 See 86.7 (Liechtenstein: Introduction).

153 See 86.10 (Anstalt/Establishment).

154 This explains why PGR treats the terms Treuunternehmen (Trust Enterprise) and Geschäftstreuhand (Business Trust) as synonyms.

155 A Trust Enterprise seems quite different from the business trust considered by the Supreme Judicial Court of Massachusetts in *State Street Trust Co. v. Hall* 311 Mass. 299 (Mass. 1942).

For what it is worth, note that the Massachusetts business trust is classified as transparent in the HMRC transparent/opaque list: See 86.40 (HMRC transparent/opaque list).

legal personality, which should not be decisive by itself)<sup>156</sup> the same principles govern both; and the HMRC statement does not distinguish them. In practice, Trust Enterprise with legal personality is the standard form.

## 86.12 Treuhandenschaft (trust)

PGR uses the term Treuhänderschaft, but the term Treuhandenschaft is now more common, and I think the meaning is the same. This is translated as “trust”.

PGR devotes a chapter to the topic, articles 897-932. Spitz & Clarke say that the entity “is based to a great extent, but not exclusively, upon the common law model”.<sup>157</sup>

Art 897 PGR<sup>158</sup> provides a definition:

Treuhänder (Trustee oder Salmann) im Sinne dieses Gesetzes ist diejenige Einzelperson, Firma oder Verbandsperson, welcher ein anderer (der Treugeber) bewegliches oder unbewegliches Vermögen oder ein Recht (als Treugut), welcher Art auch immer, mit der Verpflichtung zuwendet, dieses als Treugut im eigenen Namen als selbständiger Rechtsträger zu Gunsten eines oder mehrerer Dritter (Begünstigter) mit Wirkung gegen jedermann zu verwalten oder zu verwenden.

Trustee (in German, Treuhänder or Salmann<sup>159</sup>) within the meaning of this law is an individual, firm or company to whom another (the settlor) transfers movable or immovable property or a right (trust property), of any kind, with the obligation to administer or use it, in his own name as an independent owner, for the benefit of one or more third parties (beneficiaries), with effect against all other persons.

On the basis of this, it is considered that a Treuhandenschaft is a trust in the normal sense of the word, and within the standard IT/CGT definition, and within the other tax definitions.

The Liechtenstein disclosure facility<sup>160</sup> provides:

---

156 A Trust Enterprise which is a legal person is not a body corporate: the terms are not identical; see 86.4.3 (What is a body corporate?)

157 Spitz & Clarke, *Offshore Service* (looseleaf) para LIE.501.

158 See 86.7 (Liechtenstein: Introduction).

159 In practice I do not think that the word *Salmann* is used now.

160 See 86.7 (Liechtenstein: Introduction).

Trusts (“*Treuhandschaften*”) ... are to be characterised, recognised and treated as trusts for UK tax purposes.

### 86.13 AG/GmbH/SE

The Liechtenstein disclosure facility<sup>161</sup> provides:

1) A European Union harmonised company form, such as “Aktiengesellschaft” or “AG”; “Gesellschaft mit beschränkter Haftung” or “GmbH”; “Societas Europaea” or “SE” is to be characterised, recognised and treated as a company for UK tax purposes.

### 86.14 Proper liferent (Scotland)

#### 86.14.1 *Scots law background*

The CG Manual explains the Scots law background:

#### **31301 Scottish proper liferents** [Jul 2019]

In Scotland the expression ‘liferent’ is used to describe the situation where the income from particular property is to be paid to a person, the liferenter, for a specified period, generally his or her lifetime. At the end of the period the property will generally pass to a person known as the *fiar*.

There are two ways in which a liferent can be set up ... In the second case, the title to heritable property (land and/or buildings) is held by the liferenter. In this situation he or she is a proper liferenter. A proper liferenter cannot dispose of a greater title than his own. He cannot dispose of the property in his will. On his death the property passes to the *fiar*.

Where property in Scotland passes to a person for life under a will, and there is no suggestion that it is to be held by trustees, he has a proper liferent.

---

161 See 86.7 (Liechtenstein: Introduction).

A proper liferent is rare in practice.<sup>162</sup> I discuss it here because (aside from the intrinsic interest of the questions which arise) that sheds light on the treatment of civil-law usufructs.

A proper liferent is a Scottish version of the civil-law usufruct. Erskine states:

The only one of these servitudes which has been received into our law, is usufruct; which is defined by the Romans, a right which one has to use and enjoy a subject during life, without destroying or wasting its substance;<sup>163</sup> which definition is well enough adapted to the nature of our liferents.<sup>164</sup>

#### 86.14.2 *Proper liferent: CGT*

The CG Manual provides:

**CG31301 Scottish proper liferents** [Jul 2019]

... A proper liferent does not make the relevant property settled property [for CGT].

---

162 See *Stronach's Exrs v Robertson* [2002] SC 540 at p.553: “Liferent and fee is a form of land tenure fairly infrequently used in the 21st century. We agree with the sheriff that its lack of popularity might well be attributable, at least in part, to the fiar’s inability to control the actings of the liferenter during the currency of the liferent.” Note that a trust is significantly different on this point.

163 See 86.16.1 (Usufruct law background).

164 Institute II, Title IX, 39. *Stair Memorial Encyclopaedia*, Vol. 13, para. 1601 cites this passage from Erskine and says:

“The historical development of liferents awaits examination. It is not clear whether the concept of liferent derived directly from the Civilian usufruct or was an indigenous - if analogous - concept which was subsequently identified by later writers as being the Civilian usufruct. The prevalence of the non-Civilian terminology of ‘fee’ and ‘liferent’ is perhaps evidence in favour of the latter possibility.”

But for present purposes it does not much matter whether the Scots law concept derives directly from Roman law usufruct or was originally distinct but later identified as a usufruct.

That is correct: a proper liferent is not a trust within the standard IT/CGT definition,<sup>165</sup> as there is no property “held in trust”.<sup>166</sup> The Manual continues:

Section 43(4)(c) IHTA 1984 provides that it is settled property for IHT purposes. TCGA does not go so far, but Section 63 provides that the person entitled to possession on the death of a proper liferenter shall be deemed to have acquired all the assets forming part of the property at their market value at death.

Section 63 TCGA provides:

**63 Death: application of law in Scotland**

- (1) The provisions of this Act, so far as relating to the consequences of the death of a proper liferenter of any property, shall have effect subject to the provisions of this section.
- (2) On the death of any such liferenter the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as fiar<sup>167</sup> shall be deemed to have acquired all the assets forming part of the property at the date of the deceased’s death for a consideration equal to their market value at that date.

This allows CGT rebasing on death<sup>168</sup> but it does not make the proper liferent a settlement for CGT purposes.

A sale of the underlying property involves a disposal by the liferenter and by the fiar of their respective interests. The CGT position is in short as follows:

- (1) A gain on a disposal of the liferent is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests does not apply.<sup>169</sup>
  - (b) The liferenter can qualify for CGT private residence relief.<sup>170</sup>

165 See 1.4 (Settlement: Standard IT/CGT definition).

166 For the same reason a proper liferent was not regarded as settled property for Estate Duty: *Dymond’s Death Duties* (15<sup>th</sup> ed., 1973) p.303-304.

167 Some databases erroneously read “heir”.

168 See 84.5.1 (Rebasing on death). This applies even if the liferent is not an estate IIP: the drafter of the 2006 reforms overlooked Scottish liferents.

169 See 53.20.2 (Trust interest not chargeable asset).

170 HMRC agree. The CG Manual provides:

“The disposal or termination of a proper liferent may qualify for private residence relief under section 222 TCGA as it is an interest in land.”

- (c) The liferent may be a wasting asset (expected life of less than 50 years). If so it would reduce the base cost and increase the gain.<sup>171</sup>
- (2) A gain on a disposal of the interest of the fiar is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests does not apply.
  - (b) The fiar will not qualify for CGT private residence relief (unless they occupy the property as their main residence, which would be unusual). The relief in s.225 TCGA will not apply.

In practice, if CGT private residence relief may apply, it is better to create a classic settlement and not a proper liferent, because then the property can be sold during the lifetime of the liferenter free of CGT.

### 86.14.3 *Proper liferent: IHT*

The IHT Manual provides:

#### **16071 Introduction** [Jun 2016]

The original view was that a proper liferenter was beneficially entitled to the property which was the subject of the liferent and that a proper liferent was a “settlement” within the meaning of [s.43 IHTA 1984] with the result that the liferenter fell to be treated as beneficially entitled to the settled property.<sup>172</sup>

However the Board were advised that a proper liferenter was beneficially entitled only to his right to the liferent and not to the property itself so that on the death of a proper liferenter the liferenter was beneficially entitled to the liferent and not to the capital in which it subsisted. It follows that on the death of the liferenter the value to be placed on the proper liferent was nil.

#### **16072. IHT position** [Jun 2016]

Section 93 FA 1980 [now s.43(4)(c) IHTA] brought proper liferents into line with the settled property regime of the [IHTA] ...

Section 43(4) IHTA provides:

In relation to Scotland “settlement” also includes...

---

<sup>171</sup> Section 46 TCGA.

<sup>172</sup> This is considering a pre-2006 liferent, which would have conferred an estate interest in possession.

- (c) any deed<sup>173</sup> creating or reserving a proper liferent of any property whether heritable or moveable (the property from time to time subject to the proper liferent being treated as the property comprised in the settlement);

Section 46 IHTA provides that references to an interest in possession include a proper liferent.<sup>174</sup>

Section 47 IHTA provides:

In this Act “reversionary interest” ... in relation to Scotland includes an interest in the fee of property subject to a proper liferent.

Lastly, s.142(7) IHTA provides that for the purposes of s.142 IHTA (deeds of variation):

In the application of subsection (4) above<sup>175</sup> to Scotland, property which is subject to a proper liferent shall be deemed to be held in trust for the liferenter.

This is needed as while a proper liferent is an IHT-settlement, there is no property held “in trust”.

## 86.15 Legal life interest (N. Ireland)

### 86.15.1 NI law background

A Northern Ireland legal life interest is rare in practice, except in home made wills. The CG Manual provides:

**31303 Northern Ireland** [Mar 2017]

---

173 Section 43(4) provides a definition: “for the purposes of this subsection “deed” includes any disposition, arrangement, contract, resolution, instrument or writing.” That definition has no relation to the English law sense of the word “deed”. But the word “deed” is used differently in Scots law: see 97.15 (Jurisdictions without “deeds”).

174 See 86.6.1 (IIP in Garland trust).

175 Section 142(4) IHTA provides (so far as relevant): “Where a variation ... results in property being held *in trust* for a person for a period which ends not more than two years after the death, this Act shall apply as if the disposition of the property that takes effect at the end of the period had had effect from the beginning of the period...”

The land law of Northern Ireland, except where there is specific legislation to the contrary, is basically the same as the pre-1925 law of England & Wales. Accordingly it is possible to have a legal interest 'limited for life'...

### 86.15.2 *Legal life interest: CGT*

Section 63A TCGA provides:

(1) The provisions of this Act, so far as relating to the consequences of the death of a person to whom property in Northern Ireland stands limited for life ("the deceased"), shall have effect subject to the provisions of this section.

(2) A person who acquires property in fee simple absolute or fee tail in possession as a consequence of the deceased's death shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

The CG Manual provides:

#### **31303 Northern Ireland** [Mar 2017]

Under Section 43(5) IHTA 1984 in such a situation the property is deemed to be settled property.

There was no comparable provision for CGT until Section 63A TCGA 1992 was enacted in FA 2006 with effect from 6 April 2006. Under this provision where a person with a legal interest limited for life dies, a person who acquires in fee simple or fee tail in possession as a consequence of the former person's death is deemed to acquire all the assets forming part of the property at market value at death. This does not apply to land outside Northern Ireland.

Section 63A is modelled on s.63 TCGA.<sup>176</sup> It allows CGT rebasing on death<sup>177</sup> but does not make the legal life interest a settlement within the IT/CGT definition.

---

<sup>176</sup> See 86.14.2 (Proper liferent: CGT).

<sup>177</sup> See 84.5.1 (Rebasing on death). This applies even if the life interest is not an estate IIP: the drafter of the 2006 reforms overlooked Northern Ireland life interests.

A sale of the underlying property involves a disposal by the life tenant and by the remainderman of their respective interests. The CGT position is in short as follows:

- (1) A gain on a disposal of a legal life interest is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests<sup>178</sup> does not apply.
  - (b) The life tenant can qualify for CGT private residence relief.
  - (c) The legal life interest may be a wasting asset (expected life of less than 50 years). If so it would reduce the base cost and increase the gain.<sup>179</sup>
- (2) A gain on a disposal of the reversionary interest is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests does not apply.
  - (b) The reversionary interest will not qualify for CGT private residence relief (unless the remainderman occupies the property as their main residence, which would be unusual). The relief in s.225 TCGA will not apply.

In practice, if private residence relief may apply, it is better for CGT to create a classic settlement, not a legal life interest, because then the property can be sold during the lifetime of the life tenant free of CGT.

### 86.15.3 *Legal life interest: IHT*

Section 43(5) IHTA provides:

In the application of this Act to Northern Ireland this section shall have effect as if references to property held in trust for persons included references to property standing limited to persons...

## 86.16 **Usufructs**

Usufruct jurisdictions differ. I am not aware of differences between jurisdictions which should significantly affect UK tax categorisation issues, though that is not impossible. Usufructs also differ in their drafting of their constitutions. But I am not aware of drafting points which should

---

178 See 53.20.2 (Trust interest not chargeable asset).

179 Section 46 TCGA.

significantly affect UK tax categorisation issues, though that too is not impossible.

For an English language discussion, see Verbeke, Verdickt & Maasland, “The Many Faces of Usufruct”.<sup>180</sup>

#### 86.16.1 *Usufruct law background*

Article 578 French Code Civil provides a short definition:

L'usufruit est le droit de jouir des choses dont un autre a la propriété, comme le propriétaire lui-même, mais à la charge d'en conserver la substance.<sup>181</sup>

A usufruct is the right to enjoy property belonging to another, as if its owner, at the expense of preserving that property.

Similarly article 467 Spanish Código Civil:

El usufructo da derecho a disfrutar los bienes ajenos con la obligación de conservar su forma y sustancia, a no ser que el título de su constitución o la ley autoricen otra cosa.<sup>182</sup>

A usufruct gives the right to enjoy the property of others with the obligation to preserve its form and substance, unless the terms of its constitution or the law otherwise provide.

Article 1439 Portuguese Código Civil:

---

180 in Merwe & Verbeke (eds), *Time Limited Interests in Land* (2012) (“Verbeke”) [https://www.researchgate.net/publication/322754722\\_2012\\_Many\\_faces\\_of\\_usufruct](https://www.researchgate.net/publication/322754722_2012_Many_faces_of_usufruct)

181 The Code Civil in French is at <http://www.legifrance.gouv.fr> The definition derives from Roman law: *Usus fructus est ius alienis rebus utendi fruendi salva rerum substantia*. (Paul, Vitellius, book 3) accessible <http://droitromain.upmf-grenoble.fr/Corpus/d-07.htm#9>

182 The code in Spanish is at <https://boe.es/buscar/act.php?id=BOE-A-1889-4763&p=20151006&tn=2>

Usufruto é o direito de gozar temporária e plenamente uma coisa ou direito alheio, sem alterar a sua forma ou substância.<sup>183</sup>

Usufruct is the right to enjoy temporarily and fully a thing or right of others, without changing its form or substance.

The Swiss civil code does not provide a short definition, but its provisions on usufructs<sup>184</sup> cover these points.

In the following discussion:

The **“usufructuary”** is the owner of the right of enjoyment (the usufruct). The **“encumbered owner”** is the owner of the property subject to that right. (I think this is a clearer term than “bare owner” or “naked owner” which is a more literal translation of the French term *nu-proprétaire*).<sup>185</sup> The **“usufructuary property”** is the land or other asset under which the interests of the usufructuary and the encumbered owner subsist.

Verbeke says: “Usufruct is a real right, that is, a right on the property itself and not merely a right in relation to the property’s profits.” So the interest of the usufructuary is an interest in the usufructuary property, and situate where that property is situate. The interest of the usufructuary is immovable property (assuming the usufructuary property is immovable property).<sup>186</sup>

A usufruct may subsist over land or shares or other types of property. The IHT Manual provides:

**IHTM27054: usufruct** [Sep 2018]

Usufruct is a civil law term referring to right of one individual to use and enjoy the property that is vested in another, provided the property concerned is neither impaired nor altered. The right of ownership gives the owner the ability to

183 The code in Portuguese is at

[https://www.pgdlisboa.pt/leis/lei\\_mostra\\_articulado.php?nid=775&tabela=leis&](https://www.pgdlisboa.pt/leis/lei_mostra_articulado.php?nid=775&tabela=leis&)

184 Art 745 ff Swiss Civil Code. This is available in English at:

<https://www.admin.ch/opc/en/classified-compilation/19070042/201801010000/210.pdf>

185 Though in Louisiana, an English language civil law jurisdiction, the legislation uses the term “naked owner”.

186 This has been stated in relation to DTAs, see 23.7.1 (“Immovable property”); but I think it is true in other contexts also.

- use the property, or live in it,
- receive the income from it, for example in the form of rent, and
- sell or otherwise dispose of the property.

The owner can split his ownership in two so that there is

- the usufruct; which is right to use the property and receive the income from it, and
- the bare ownership of the property, which includes the right to dispose of it.

The person who holds the right to use and enjoy the property is known as the usufructuary and the person who holds the right to dispose of the property is known as the bare owner – in French, the ‘usufruitier’ and the ‘nu-proprétaire’

You may come across a usufruct where an estate includes land and buildings in EU or other foreign countries. It may be referred to as a usufruct or ‘usufruit’ in French, or given another name such as a ‘Nießbrauch’ in German.<sup>187</sup> But no matter how it is labelled, it is important to identify the underlying rights of the arrangements and understand the circumstances that apply to the usufruct in each case. For example, another means of providing an income for life in Germany is a ‘Leibrente’ – which may be closer to an annuity than the rights under a usufruct.

### 86.16.2 *Usufruct: CGT*

The CG Manual provides:

**CG31305 Other interests** [Jul 2019]

... A usufruct governed by French law would be regarded as a non-trust arrangement as it is broadly similar to a Scottish proper liferent.

That is correct: a usufruct is not a settlement within the standard IT/CGT definition,<sup>188</sup> as there is no property held “in trust”.<sup>189</sup>

---

187 Author’s footnote: The position in Germany is governed by art.100 and 1030 Bürgerliches Gesetzbuch.

188 See 1.4 (Settlement: Standard IT/CGT definition).

189 This is almost self-evident, but if authority is needed, see *Lewin on Trusts* (20<sup>th</sup> ed, 2020) para 1-001 (Definitions and descriptions) and 1-027 (Unique features stated in civilian terms).

In the past, however, HMRC have more than once expressed the view that a usufruct is a trust for CGT purposes. (Private correspondence).

A sale of the usufructuary property involves a disposal by the usufructuary and by the encumbered owner of their respective interests. The CGT position is in short as follows:

- (1) A gain on a disposal of the interest of the usufructuary is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests<sup>190</sup> does not apply.
  - (b) The usufructuary can qualify for CGT private residence relief.
  - (c) The interest of the usufructuary may be a wasting asset (expected life of less than 50 years). If so it would reduce the base cost and increase the gain.<sup>191</sup>
- (2) A gain on a disposal of the interest of the encumbered owner is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests does not apply.
  - (b) The encumbered owner will not qualify for CGT private residence relief (unless they occupy the property as their main residence, which would be unusual). The relief in s.225 TCGA will not apply.

CGT rebasing does not apply on the death of the usufructuary.<sup>192</sup>

---

190 See 53.20.2 (Trust interest not chargeable asset).

191 Section 46 TCGA.

192 See 84.5.1 (Rebasing on death). A Scottish proper liferent qualifies for CGT rebasing on death: see s.63 TCGA. discussed at 86.14.2 (Proper liferent: CGT). However s.63 TCGA does not apply to a foreign law usufruct because:

(1) The expression “proper liferenter” is a technical Scots law term which is not apt to include a usufructuary under a non-Scots law usufruct.

(2) The heading to the section (“Death: application of law in Scotland”) shows the intention to restrict the application to Scotland.

(3) The section in its original form provided (word repealed in 2006 are underlined):  
 “(1) The provisions of this Act, so far as relating to the consequences of the death of an heir of entail in possession of any property in Scotland subject to an entail, whether sui juris or not, or of a proper liferenter of any property, shall have effect subject to the provisions of this section.

(2) For the purposes of this Act, on the death of any such heir or liferenter the heir of entail next entitled to the entailed property under the entail or, as the case may be, the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as fiar shall be deemed to have acquired all the assets forming part of the property at the date of the deceased’s death for a consideration equal to their market value at that date.”

The result is a CGT discrimination against usufructs.<sup>193</sup> If the usufruct is in an EU jurisdiction, this discrimination is not justifiable, and it is suggested that under EU-law principles:

- (1) CGT rebasing on death should be available.<sup>194</sup>
- (2) Arguably, private residence relief should apply on a sale of the encumbered property during the lifetime of the usufructuary, if it is the main residence of the usufructuary and the other conditions for relief are satisfied.

If an individual creates a usufruct under which they retain an interest, this is a part disposal for CGT purposes, as the rule for transfers into trust<sup>195</sup> does not apply.

A usufruct may be a settlement within the settlement-arrangement definition, but it is not within the scope of s.87.<sup>196</sup>

### 86.16.3 *Is usufruct an IHT-settlement*

The question discussed here is whether a usufruct constitutes a settlement within the IHT definition.<sup>197</sup>

The IHT Manual provides:

---

The underlined words contain references to Scotland which make it clear that the entire section is restricted to property in Scotland; and the repeal of those words was not intended to alter that.

I set this out at length because the contrary view has been suggested.

193 It is not possible to avoid this problem by creating a classic settlement instead of a usufruct, because civil law systems do not usually recognise trusts; even if a trust is theoretically possible, it is probably not practical for tax reasons or because it raises too many uncertainties.

194 This issue should eventually be resolved in *Findlay v HMRC* which has so far only reached a preparatory stage: [2018] UKFTT 217 (TC).

195 See 53.20.4 (Disposal on transfer into trust).

196 See 57.3.3 (Usufruct: Deemed trustee).

197 Strictly the term usufruct means the right of the usufructuary to enjoy the property; so the statutory question is whether the creation of a usufruct is a disposition whereby property is held on trust (etc) for persons in succession. Or to put it another way, the question is not whether a usufruct *constitutes* a settlement but whether it *entails* a settlement. But the question is conveniently abbreviated into asking whether a usufruct is a settlement. The usufruct is here regarded as an entity, and not (or not just) the usufructuary's right to enjoyment.

**IHTM27054: usufruct** [Sep 2018]

In HMRC's view, a usufruct should be treated as a settlement for IHT purposes given the closing words of IHTA84/S43(2), '...or would be so held charged or burdened if the disposition were regulated by the law of any part of the UK....'. This creates a fiction solely for the purposes of charging IHT and requires us to look at the outcome of the disposition and then consider how that outcome could be achieved under the law of any part of the UK. Bearing in mind the nature of the split in ownership that a usufruct achieves, the closest equivalent under UK law is a life interest settlement, with the bare owners holding the property for the benefit of the usufructuary (life tenant) with remainders to themselves.<sup>198</sup>

HMRC's argument relies on s.43(2)[d].<sup>199</sup> It is not correct.

---

198 HMRC practice has not always been consistent. HMRC, "Trusts and Estates newsletter" (Sep 2015) provides:

"... Since April 2013, HMRC has dealt with a small number of cases where the estate included a usufruct and in each case, the facts were less than straightforward. HMRC applied its approach to the facts of each case as it understood them to be, and in each case, the difference between the value reported by the taxpayer and the value that emerged following HMRC's approach was not sufficient to warrant pursuit. So in accordance with its Litigation and Settlement Strategy, HMRC adopted the value reported by the taxpayer.

But HMRC remains of the view that, generally, a usufruct should be treated as giving rise to a settlement for IHT purposes and will pursue the collection of tax on that basis."

<https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-d-estates-newsletters/hmrc-trusts-and-d-estates-newsletter-september-2015>

The IHT Manual provides an element of pragmatism:

**IHTM27054: usufruct** [Sep 2018]

The correct treatment of a usufruct for IHT purposes is not universally accepted. One leading commentator refers to it as a 'toss of a coin matter'; some accept HMRC's view, whilst others are strongly opposed to it. It is for this reason that any case where the taxpayer is not prepared to proceed along the lines above should, once the detailed facts have been ascertained, be referred to Technical to consider how to take the case forward. It is possible that the value for tax that emerges from applying HMRC's approach may not be (so) very different from the value offered by the taxpayer, particularly where there are encumbrances against the property; but each case will need to be considered on its own merits.

199 See 1.6.4 (Limb (d): So held by UK law).

- (1) Para [d] does not “require us to look at the outcome of the disposition and then consider how that outcome could be achieved under the law of any part of the UK”:
  - (a) The purpose of para [d] is to deem a foreign trust to be a UK law trust, to preclude an argument that the words “on trust” (or “in trust”) in the definition apply to UK-law trusts and do not apply to foreign-law trusts.
  - (b) According to HMRC, para [d] poses a hypothetical question: what would result if a foreign disposition creating, a usufruct, or, say, a Liechtenstein Treuunternehmen, were governed by a UK law. That is an impossible question as UK law has no such entity.
  - (c) The HMRC view leaves no purpose for para [e].
- (2) If, contrary to the above, para [d] did require one to ask whether the property would be held on trust if the disposition were regulated by the law of any part of the UK” HMRC’s answer to that hypothetical question is wrong. It is not the case that “the closest equivalent under UK law is a life interest settlement”:
  - (a) There is no such thing as “UK law” (at least as far as property/trust law is concerned). The laws of Scotland/Northern Ireland/England are distinct.
  - (b) In fact Scots law does have a usufruct (by another name). If the disposition were regulated by Scots law, it should constitute a proper liferent, which is deemed to be an IHT- settlement, but is not deemed to constitute property held on trust,<sup>200</sup> so para [d] would not be met. Likewise if the disposition were regulated by the law of Northern Ireland, it would constitute a legal life interest.
  - (c) If one had to find the closest equivalent in English law, it would be a lease for life, which is not a trust.

HMRC do not argue in the Manual that a usufruct is a settlement under s.43(2)[e], ie, that under the law of the usufruct, the administration of the property is governed by provisions “equivalent in effect to those which would apply if the property were held on trust for persons in succession.”<sup>201</sup> Note how the HMRC paraphrase (“how that outcome could be achieved

---

200 See 1.6.4 (Proper liferent: IHT).

201 See 1.6.5 (Limb (e): Equivalent to a trust).

under the law of any part of the UK”) is an easier test to pass than the terms of para [e].

I think HMRC are right to take the view that para [e] is not satisfied. There is an element of succession, but that is not enough. The usufruct must be equivalent in effect to *a trust* for persons in succession. There are important differences between a usufruct and a trust:

- (1) There is no settled property
- (2) There are no actual trustees<sup>202</sup>
- (3) The usufructuary has the right to enjoy the property in specie, unlike a beneficiary of a trust of land
- (4) A sale of the usufructuary property in its entirety requires the consent of both the encumbered owner and the usufructuary

For all these reasons, a usufruct is more like a lease for life or a legal life interest than a classic settlement.

Overall a usufruct is sufficiently unlike a trust that it is suggested that the two should not be regarded as equivalent, so it is not an IHT-settlement.<sup>203</sup>

It might be said that there would be an anomaly if:

- (1) a usufruct is not an IHT-settlement; but
- (2) a Scots proper liferent (which is a usufruct or usufruct-like entity) is an IHT-settlement.

But the boot is on the other foot: if a usufruct were an IHT-settlement, there would have been an anomaly between the introduction of CTT in 1975 and the enactment of (what is now) s.43(4)(c) IHTA, during which time a proper liferent was not an IHT-settlement. The enactment of a provision dealing with Scots law liferents should not affect the position of foreign law usufructs.

#### 86.16.4 *IHT if usufruct is a settlement*

---

202 If a usufruct were an IHT settlement, it is difficult even to identify deemed trustees: see 57.3 (Non-classic trust: Trustee). This also supports the view that a usufruct is not an IHT settlement.

203 This issue did not arise for proper liferents (Scotland) or legal life interests (Northern Ireland) since the para [e] of the definition (dealing with provisions “equivalent in effect”) only applies to non-UK legal systems.

If a usufruct is an IHT-settlement, there would in principle be charges to IHT on the following occasions:

- (1) On the creation of the usufruct
- (2) On ten-year anniversaries<sup>204</sup>
- (3) On the death of the usufructuary

The usufructuary property may qualify as excluded property, depending of course on the domicile of the settlor (and, if a spouse has an initial estate IIP, the domicile of the spouse).

DT relief will sometimes be available.

The IHT Manual provides:

**IHTM27054: usufruct** [Sep 2018]

On the footing that a usufruct should be treated as interest in possession settlement, the following consequences will flow.

Note that it is assumed throughout the Manual passage that a donor creates a usufruct by way of lifetime gift, and that the donor is UK domiciled. On that basis, the pre-2006 position was relatively straightforward:

[1] Where the usufruct was created prior to 22 March 2006, it should be treated as an interest in possession created prior to that date. Consequently,

- [a] if the donor gave a property to their children, retaining the usufruct, there will be no loss to their estate at that time; but the property, at the open market value, will remain part of their estate on death.
- [b] If a husband gave his wife a usufruct over his property, the transfer will benefit from spouse or civil partner exemption and the property, at the open market value, will form part of the spouse's estate on her death.
- [c] If a father gave a usufruct over his property to his children, the transfer will be a PET.
- [d] In all cases, the bare ownership of the property should be treated as a reversionary interest and will normally be excluded property under IHTA84/S48(1).

The Manual then turns to consider the post-2006 position:

---

204 Not for a usufruct created on death, which will qualify as an IPDI.

- [2] Where the usufruct is created on or after 22 March 2006,
- [a] the settlement will be a relevant property settlement.
  - [b] On creation of a usufruct:
    - [i] the donor will be making an immediately chargeable transfer of the full value of the property<sup>205</sup>
    - [ii] [the property] will then be subject to relevant property charges.
    - [iii] No spouse or civil partner exemption will be due.
  - [c] If the donor has retained a usufruct over the property, they may well have reserved a benefit in the property,
  - [d] but otherwise, no part of the property will form part of any person's estate.<sup>206</sup>

The author has not worked through the IHT issues here. One might have some sympathy, as the position is so complicated; but it is HMRC who are responsible for that.

A common case is where an owner of property ("S") creates a usufruct under which S is the usufructuary and a child is the encumbered owner. If the usufruct is an IHT-settlement, and S is UK domiciled, then:

- (1) S makes a transfer of value equal to the value of the property.<sup>207</sup>
- (2) The gift is a PET so far as attributable to the child's reversionary interest.<sup>208</sup>

That is so strange as to make one question whether the analysis that a usufruct is an IHT-settlement can be correct.

- (3) In principle the creation of a usufruct is not a gift with reservation of benefit as the donor enjoys no benefit from the property given away (the reversion). But if the usufruct is created over land, then it will normally be deemed to be a GWR under s.102B FA 1986 (not discussed here).

---

205 Author's footnote: This is not necessarily correct, either as the donor may retain an interest (which reduces the value transferred) or as the gift may partly be a PET.

206 Author's footnote: this is not correct, as the reversionary interest is in the estate of the encumbered owner.

207 See s.3(1) IHTA; the value of the usufructuary's interest is disregarded as an interest in possession in settled property: s.5(1)(a)(ii) IHTA.

208 See s.3A(1)(c) and 3A(2)(a) IHTA. The interest of the encumbered owner (the child) is excluded property but nevertheless it forms part of their estate (except on death).

- (4) The pre-owned asset issues are wonderfully intricate. (Of course, no attention was given to usufructs when the legislation was enacted.) In outline:
- (a) If the gift is a GWR then POA does not apply.
  - (b) If the gift is not a GWR (eg a usufruct over shares, or over land acquired more than 7 years before the gift) POA may apply; it is necessary to consider the POA land, chattel or intangible property charge as applicable.<sup>209</sup>
- (5) The interest of the encumbered owner is a reversionary interest<sup>210</sup> and so in principle excluded property, which is advantageous if the encumbered owner is UK domiciled.
- (6) The IHT spouse exemption would in principle be available on the creation of a usufruct on death.

Further consideration is needed if the creation of the usufruct is by way of sale and not by way of gift.

Depending on the circumstances it will sometimes be in the taxpayers' interest to accept the HMRC view (that a usufruct is an IHT-settlement), and sometimes to challenge it.

#### 86.16.5 *Usufruct: Valuation*

It may be necessary to value:

- (1) The interests of the usufructuary and the encumbered owner
- (2) The usufructuary property, which in the HMRC view is settled property.

Some foreign tax laws (eg France) have tax rules to value the interests of the usufructuary and the encumbered owner. Those rules do not apply for UK tax purposes, so the usual market value rules must be applied.<sup>211</sup>

Valuation of these interests should take into account the costs of possible IHT charges (which if due would in principle be borne out of the

---

209 See 80.1 (Pre-owned assets: Introduction).

210 It is considered that the encumbered owner's interest is a "future interest" and so within the definition in s.47 IHTA, which is set out at 86.6.2 (Reversionary interest: Garland trust).

211 It may be that foreign valuation rules happen to produce the market value figure, but that is not necessarily (perhaps not even usually) the case.

encumbered owner's interests), or the costs and risks of debating whether these IHT charges actually arise.

The IHT Manual provides:

**IHTM27054: usufruct** [Sep 2018]

... The property over which the usufruct exists should be valued on the open market basis, without regard to the values that may be ascribed to the different rights by the relevant foreign law. The property is treated for IHT purposes as regulated by UK law – which does not recognise any other statutory regime for valuation – leaving us with the usual valuation approach under IHTA84/S160.

But it is important to establish the detail of the circumstances surrounding the property because if the property is mortgaged, the mortgage is an incumbrance against the property which is very likely to be a valid deduction against the property under IHTA84/S162(4).

If the property is subject to a lease, that too will reduce the value of the property depending on the terms of the lease. The terms of some overseas leases, particularly around renewal, may be quite onerous and have a significant impact on the value of the property.

If the property is farmland in the European Economic Area, it may also qualify for agricultural relief in view of IHTA84/S115(5)(b).
