(7) But, in the case of a benefit received in the tax year 2005–06, subsection (6) applies only so far as, on a time apportionment basis, the benefit fell to be enjoyed in any part of the year that fell before 5 December 2005.

HMRC supply a worked example, see 47.18.9 (Computation: Motive defence lost).

Suppose:

- (1) An innocent transfer is made before 5 December 2005.

---

241 Response to HMRC consultation “Transfer of assets abroad: draft guidance” (2013) <http://www.icaew.com/~media/Files/Technical/Tax/Tax-faculty/TAXREPs/2013/taxrep-57-13-transfer-of-assets-abroad-draft-guidance.pdf>

- (2) A tainted associated operation is made on or after 5 December 2005.
- (3) An individual receives a benefit in the same year as the associated operation or subsequently.<sup>242</sup>

The beneficiary is taxable under s.731 ITA by reference to all the relevant income from the date of the transfer (or from 1981, if later). This harsh rule was actually intended. EN FB 2006 para 33 provides:

[The effect of s.740(5) ITA is:] for the purposes of [s.731 ITA] where the individual receives a benefit in a year of assessment ending after 5 December 2005, the process of determining relevant income under the general rule for years up to and including that year must take account of relevant income that arose in years of assessment ending before that date, as well as later years.

It will often be impossible for the quantum of relevant income to be ascertained exactly, as the records will not exist. But the issue may in practice be fudged by agreement with HMRC.

## **49.46 Tax return: Motive/EU defence**

### *49.46.1 When disclosure required*

The motive defence<sup>243</sup> not require a formal claim. If there has been an innocent transfer, a taxpayer is entitled and indeed required to complete tax returns on that basis.<sup>244</sup>

However, individuals who complete a self assessment return need to indicate on that return if they have taken advantage of the defence. This is done by completing box 46 in form SA106 (Foreign pages, 2019/20). The rubric for this box (the “motive defence box”) states:

If you’ve omitted income from boxes 11, 13 and 42 because you’re claiming an exemption in relation to a transfer of assets, enter the total amount omitted (and give full details in the ‘Any other information’ box on your tax return)

---

242 There is no charge if the benefit is received in a tax year before the operation: see 49.42.2 (Income pre-tainted op: s.731).

243 In this section reference to the motive defence includes the EU-law defence, as the rules of disclosure are the same.

244 See 49.47 (Motive/EU defence: Disclaimer). See also 46.23 (Tax return: s.720 income) and 47.56 (Tax return: s.731 income).

This relates to the two reliefs which the ITA describes as exemptions:<sup>245</sup> the motive EU-law defences.

It is only correct to put an entry in the box if the motive defence is needed. It is not correct to put an entry in the box if the ToA provisions do not apply to impose a charge for some other reason, such as s.720 protected-trust relief, or the s.720 remittance basis, because that is not an “exemption”.<sup>246</sup>

It often happens that the motive defence box is left blank when it should be completed, as the need to do so in this very complicated area is overlooked. There is no penalty, provided the motive defence claim applies, as no additional tax is thereby due. It is suggested that an entry should be made in the box on the next tax return, with a note in the “Any other information” box to explain the position.

#### 49.46.2 *What information is required*

Two items of information are required by the rubric to the motive defence box: the “amount omitted” and “full details”. (The word “omitted” is somewhat tendentious; but perhaps it does not much matter.)

The “amount omitted” for a taxpayer within s.720 is the income of the person abroad, (ignoring unremitted foreign income if the remittance basis applies). For a taxpayer within s.731, the “amount omitted” is the lower of the value of benefits and relevant income (except so far as the s.731 remittance basis applies). If it is difficult to ascertain the figure of

---

245 Section 736(1) ITA provides: “Sections 737 to 742A deal with exemptions from liability under this Chapter.”

246 HMRC agree. SA106 Notes (2019/20) provides:

**“Box 46 If you’ve omitted income from boxes 11, 13 and 42 because you’re claiming an exemption in relation to a transfer of assets, enter the total amount omitted**

Boxes 10 to 13 and box 42 do not apply as long as the purpose of the transfer and any associated operations was not to avoid tax. ... any income attributable to genuine transactions is exempt, where any liability imposed would constitute a restriction on the EU Treaty freedoms (for example, freedom of establishment or freedom of movement of capital).

An exemption is only due if actual income would otherwise be chargeable.”

HMRC practice (understandably) is not to investigate or provide a ruling on the motive defence, unless some tax turns on the issue.

“omitted income”, it seems to me reasonable to provide an estimate of s.720 income, or in a s.731 case, an estimate of the amount of the benefit but without quantifying the relevant income. If estimated figures are given, this should be stated.

SA106 Notes (2019/20) identifies the “full details” which are required:

You must give details of the assets transferred, and any associated operations, the person abroad concerned, the circumstances of the relevant transactions and the basis of your claim in ‘Any other information’ on page TR 7 of your tax return or on a separate sheet.

On the occasion when the claim is first made, sufficient details should be given for HMRC to review the case. If a claim is agreed, I see no reason to give any details at all in subsequent tax returns (in the absence of further transfers or relevant associated operations). I suggest the words “n/r” be put in the motive defence box (or if the tax return software does not permit that, leave it blank) and note in the “Any other information” box that since the motive defence claim has been agreed, no figure need be provided in the return as it is irrelevant.

#### 49.46.3 *HMRC response to claim*

RI 201 provides:

Where such a disclosure has been made and [motive defence] exemption claimed, the Revenue will make any necessary enquiries about that exemption in the statutory period allowed, and will not seek to reopen that year’s return on discovery grounds if the [motive defence] exemption has to be reconsidered in later years.

International Manual explains HMRC’s administrative arrangements for dealing with a claim:

**INTM600050 Transfer of assets abroad: Mandatory referral to SPT Trusts & Estates Nottingham** [May 2020]

Business Assets and International Technical and Valuation, Bootle is responsible for the operation of the legislation contained in Chapter 2 Part 13 ITA 2007, the provision of Technical Advice thereon and any litigation involving transfer of assets legislation.

All enquiry work involving possible application of the transfer of assets legislation is undertaken by or in conjunction with the specialist team in WMBC Assets Edinburgh. Fraud Investigation Services and WMBC

Wealthy Units also undertake review work in this area in relation to cases handled by them.

The individual Self Assessment tax return will often be the first point of identification of cases where the legislation may apply, and as such those handling receipt of returns have a vital role to play in identifying potential application of this legislation. Offices should not however attempt to determine liability to the Income Charge or the Benefits Charge or discuss the application of the provisions with agents without first contacting Trusts Compliance, Edinburgh... who will arrange any necessary risk assessment of the case and advise on whether and how this aspect is to be taken forward.

WMBC (Wealthy CCM teams) and Fraud Investigation Service offices do not have to make a referral of their own cases in accordance with the previous paragraph but should consult with BAI Technical and Valuation Team, Bootle for advice as necessary, and in every case where litigation may be a possibility.....

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

On this basis, one should expect an enquiry, unless the issue has been resolved in earlier years; but in practice that does not always happen.

#### **49.47 HMRC enquiry on claim**

##### 49.47.1 “*Satisfies an officer*”

Section 739(2) ITA provides:

An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual *satisfies an officer of Revenue and Customs* that condition A or B is met.<sup>247</sup>

The motive defence applies if the individual *satisfies an officer* of HMRC that Condition A or B is met. This wording is language of subjectivity: it suggests that it is not sufficient that condition A or B is met, what matters is that the officer is satisfied in his or her own mind.

However the words have never been understood in that sense. They only impose the burden of proof on the taxpayer. That makes no difference as

---

247 The same wording is found in new conditions A and B: s.737(2) ITA.

the burden of proof already rests on the taxpayer.<sup>248</sup> Thus all the words actually mean is:

An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if condition A or B is met.

The words “satisfy an officer that ...” add nothing.<sup>249</sup>

There is no advance ruling or clearance procedure on the application of the exemption provisions.<sup>250</sup>

#### 49.47.2 *Evidence*

Contemporary correspondence and background documentation may be relevant to the factual issue of whether the transferor had the purpose of reducing tax. It will not shed much light on the issue of whether the purpose should be classified as avoidance or mitigation. Some factors such as confidentiality or tax related agreements may shed light on this, or at least, on whether the parties regarded the matter as tax avoidance.<sup>251</sup> In *IRC v Willoughby* 70 TC 57 for instance, the Special Commissioner reviewed sales literature relating to the offshore bonds. In practice, expect HMRC to ask for contemporary documentation. The advisers should review it before making a claim. In the case of a transfer to a trust, this includes:

- (1) Trust documentation and letters of wishes
- (2) If not evident from the above, details of intended beneficiaries
- (3) Details of assets transferred
- (4) Contemporary correspondence between trustees, accountants and settlor (Legal advice should be privileged)

Often the issue arises many years after the transfer of assets, and the contemporary records have been lost. That should not matter, as

---

248 See 5.37 (Residence: Burden of proof). And in any event, disputes are rarely decided by the burden of proof: see 3.7.4 (Who bears onus of proof).. But the burden of proof may have been a more important issue when the words were introduced in 1936.

249 That is not unusual: see App.2.1.2 (Argument from redundancy), App.2.21 (Reasonable- to-assume).

250 As to the relevance of TiS clearance, see 52.13.2 (TiS/ToA motive defence compared).

251 See 49.14.6 (Other indicia of avoidance).

secondary material and inferences from common sense should suffice, but efforts should be made to recover original documentation, if only to avoid the suspicion that damaging documents may have been suppressed.

Sometimes contemporary documents are relevant, and it should be borne in mind in their drafting that in the absence of privilege, they will be disclosed. In *Marwood Homes* a note of the meeting provided:

[The senior tax manager] went through the draft clearance application ... The main change was to “beef up” the commercial justification for the transactions by referring to effect of the dividends being to offset the damage of the solvency of the *Marwood Homes Ltd* balance sheet due to the 1992 loss.<sup>252</sup>

The Tribunal inferred that it was only then that the commercial reasons was seen as relevant by the parties (which from the terms of the note seems a possible inference, though not a necessary one).<sup>253</sup>

The EC say:

However, in order to ensure that genuine establishments and transactions are not unduly sanctioned it is imperative that where the existence of a purely artificial arrangement is presumed, the taxpayer is given the opportunity, without being subject to undue administrative constraints, to produce evidence of any commercial justification that there may be for that arrangement. The extent to which the onus to demonstrate that their transactions served bona fide business purposes can be placed on the taxpayer can only be determined on a case-by-case basis. In this regard the Commission considers that burden of proof should not lie solely on the side of the taxpayer and that account should be taken of the general compliance capacity of the taxpayer and of the type of arrangement in question.<sup>254</sup>

### 49.47.3 *Legal professional privilege*

ToA draft guidance provides:

#### **INTM602700 Show or satisfy**

---

252 [1999] STC (SCD) 44 at [42].

253 At [75].

254 EC Communication “The application of anti-abuse measures in the area of direct taxation” COM(2007) 785

<http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785>

It is often the case that where transactions have taken place that result in potential liability under the transfer of assets provisions professional advice will have been taken in relation to the transactions. It is sometimes suggested that such advice cannot be disclosed to HMRC because of legal and professional privilege. More is said on this in section “information powers” (see INTM603200). But there is no specific restriction on the information that an individual can provide to demonstrate that the exemption test is met, and an individual who is entitled to exemption can be expected freely to provide it. Where an individual chooses to hold back particulars that may contain material evidence about transactions that would otherwise result in a charge to tax it may well lead the officer of Revenue and Customs to conclude that the conditions for exemption are not met.

It is wrong for HMRC to draw any inference from a taxpayer’s decision to exercise a right to privilege.<sup>255</sup>

Reference to privileged documents or legal advice needs care, as it might amount to waiver of privilege.<sup>256</sup>

## 49.48 Appeals

Section 751 ITA provides:

On any appeal that is notified to the tribunal, the jurisdiction of the tribunal includes jurisdiction to affirm or replace any decision taken by an officer of Revenue and Customs in exercise of the officer’s functions under—

**Section Topic**<sup>257</sup>

- 737 Motive defence: post-4 December 2005 transactions
- 738 Meaning of “commercial transaction”
- 739 Motive defence: pre-5 December 2005 transactions
- 742 Later associated operations fail motive defence conditions
- 742A Exemption for genuine transactions
- 743(2) Double charges relief

---

255 This seems to be accepted in the HMRC Litigation & Settlement Strategy para 13: “HMRC would not normally expect legal professional privilege to be waived.” Though that depends what nuance one gives to the word “normally”. See

<https://www.gov.uk/government/publications/litigation-and-settlement-strategy-lss>

256 *Conegate v HMRC* [2018] UKFTT 82 (TC).

257 For clarity I have set this out in tabular form and with my own wording, rather than as in the statute.

The wording makes clear that jurisdiction of the tribunal is appellate and not supervisory. The wording of New Conditions A and B (“not be reasonable to draw the conclusion ...”) does not impose a *Wednesbury* unreasonableness test.

A decision of the first-tier tribunal is, on ordinary principles, binding on the parties (subject to an appeal) only in relation to the assessments under appeal. It does not bind the parties in other respects, and in *Carvill v IRC*<sup>258</sup> a Special Commissioner allowed a motive defence appeal even though a previous appeal relating to earlier years had been decided against the taxpayers. The taxpayers then sought to recover from HMRC the tax paid under the earlier assessments, but this rightly failed. There must be some finality in tax, even when wrong decisions are reached by the courts.

<sup>259</sup> That issue will rarely, if ever, arise again in practice.

A more common problem is where tax has been paid under the ToA provisions for a number of years without consideration being given to the motive defence, and then it occurs to a taxpayer that a motive defence is applicable. It is considered that the principle in *Carvill (No. 2)* only applied where a motive defence had been litigated and decided by the tribunal, and in the absence of litigation on the point it should be possible to put in an error or mistake claim under usual principles.

An appeal will be made by the individual subject to tax (not the trustees or company within s.731 ITA who have no *locus standi*). If the trustees fund an appeal by the individual against assessment under s.731, will that funding constitute a benefit? If so that benefit would be subject to income tax under s.731, if the appeal is unsuccessful. The position depends on the facts. If the reason the trustees fund the appeal is in order to sort out their tax planning for the future, or in order to benefit the entire class of UK resident beneficiaries, then no taxable benefit is received by the appellant: any benefit is received by all UK beneficiaries and there is no rational means of apportionment. At the other extreme, if the trust fund is (more or less) wound up by a capital payment, and the appeal procedure is specifically to benefit one beneficiary, then the trustees financing the

---

258 [2000] STC (SCD) 143.

259 See *Carvill v IRC (No. 2)* [2002] EWHC 1488 (Ch) and *Carvill (R, oao) v IRC* [2003] EWHC 1852 (Admin).

appeal would constitute a benefit.<sup>260</sup>

#### **49.49 Motive/EU defence: Disclaimer**

There are circumstances where the application of the ToA provisions may reduce a tax charge. In particular, a UK resident transferor who receives a distribution from a non-resident company may be more lightly taxed under s.720: they are taxed on the company's income but has the benefit of tax and tax credits paid by the company, and the distribution is tax free.<sup>261</sup>

Is it possible for an individual to disclaim the motive defence? It seems arguable that the words "the individual satisfies an officer of HMRC" etc., suggest that the benefit of the motive defence can be disclaimed. The individual may choose not to satisfy an officer even though there was no tax avoidance purpose. If the motive defence is compulsory, we would have the surprising result that a transfer for tax avoidance may be less harshly taxed than one which was not.

However, this view would cause considerable difficulties. Suppose a non-resident trust has relevant income of £1m and trust gains of £1m, and capital payments of £1m are made in Year 1 to beneficiary A and in Year 2 to beneficiary B. A and B are both resident and domiciled in the UK. Suppose the trust is in principle within the motive defence because the transfer to it was not for tax avoidance purposes. Before 2008/09 A would probably wish to disclaim the motive defence, if A could, so the capital payment to A was subject to income tax, and they avoided the s.87 interest surcharge. However, it would be in the interest of B to argue that the motive defence did apply, so that the payment to A "washed" the capital gain and the payment to B was tax free. It is evident that the offshore trust rules simply do not work if the motive defence can be disclaimed by one beneficiary and claimed by another. Nor do they work fairly if it can be disclaimed by one beneficiary in a manner which binds all the others. So the better view is that the motive defence (if applicable on the facts) is

---

260 Or else it may be subject to CGT as a capital payment.

261 See 48.3 (Distribution relief).

Also, for completeness, a beneficiary who received a capital payment from an offshore trust before 2008/09 would prefer to be taxed under s.731 than under s.87 TCGA, because the IT rate under s.720 (then, 40%) was lower than the effective CGT rate under s.87 (then, 64%).

compulsory and binds all parties.

The same applies where it suits HMRC to argue that the motive defence is satisfied, and the taxpayer argues that it is not. This in fact happened in one case<sup>262</sup> where HMRC successfully argued that the motive defence applied. In neither case did the taxpayer seek to argue that the motive defence could be disclaimed, so the point may now be regarded as settled law.

HMRC agree. ToA draft guidance provides:

**INTM602660 Applying for exemption**

...The exemption applies automatically if the facts show that the conditions are met. It is not therefore the subject of a ‘claim’ under the normal claims mechanism of the Tax Acts (section 42 TMA 1970).

## 49.50 Tax avoidance: Critique

### 49.50.1 *Avoidance: coherent concept?*

Littlewood surveyed the Privy Council case law and reached a gloomy conclusion:

... on the basic issue—what is tax avoidance?—very little progress has been made. In particular, no one (neither the Privy Council, nor the courts of Australia or New Zealand, nor anyone else) has yet devised a satisfactory definition of tax avoidance. Worse, the Privy Council (like the Australian and New Zealand courts and the various commentators who have addressed the problem) has not only failed to *define* tax avoidance; it has failed even to produce a coherent set of guidelines as to how it might be recognised. In *Newton v Taxation Comr*, Lord Denning said that “ordinary” transactions do not count as avoidance.<sup>263</sup> In *IRC v Challenge Corporation*, Lord Templeman said that “mitigation” does not count as avoidance.<sup>264</sup> And in *Peterson v IRC*, Lord Millett said that the obtaining of “acceptable” tax advantages does not count as avoidance.<sup>265</sup> Clearly this does not constitute a complete

---

262 *Anson v HMRC* [2012] STC 1014 reported at first instance under the name *Swift v HMRC* [2010] SFTD 553 at [22] - [28]. The point was not considered in the Supreme Court.

263 [1958] AC 450 at p.466.

264 See 49.7.1 (Avoidance/mitigation distinction).

265 [2005] UKPC 5 at [35]–[37].

solution.<sup>266</sup>

Nor is that all. Of the 13 cases, some were found by the Privy Council to fall on one side of the line, and some on the other. Surely, then, it might be said, these cases must provide *some* guidance as to where the line is to be drawn? Even this, however, seems unduly optimistic. In other areas of the law, judges (and commentators) might disagree as to how particular cases should be resolved, but at least they generally agree as to what constitutes a marginal case (as with, for example, the distinction between capital and revenue). This is not so, however, of the distinction between tax avoidance and tax mitigation. Rather, the judges tend to present whichever outcome they prefer not only as correct, but as clearly so—even when they fail to agree. This is perhaps the strangest feature of these cases. For example, in *Challenge* Lord Templeman (for the majority) said “a clearer case ... cannot be imagined”,<sup>267</sup> though this was evidently less clear to Lord Oliver who dissented. Similarly in *Peterson* the majority regarded it as clear that the anti-avoidance rule did not apply; and the minority as equally clear that it did: “a clearer case”, said Lord Bingham and Lord Scott in their joint *dissenting* judgment, “can hardly be imagined”.<sup>268</sup>

The cases thus confirm what is notorious: that the idea of tax avoidance is one of the most difficult in the whole of the law. To describe the distinction between avoidance and mitigation as “vague” is to understate the problem, for it suggests that there is general agreement as to roughly where the line lies and that the disagreement is only as to marginal cases. But none of their Lordships appear to have regarded any of the cases as marginal. It is difficult, therefore, to extract from them any guidance as to where the line lies. Notable, too, is the frequency of disagreement: of the eight cases decided after the Privy Council started permitting dissents in 1966, only two were decided unanimously.<sup>269</sup> Dissents tended, moreover, to be colourful. Lord Wilberforce, dissenting in *Mangin v IRC*, accused the majority of “interpretative

---

266 Footnote original: *Simms, Payne and Townend* established that there is a difference between avoidance and evasion. This is important, but provides no guidance as to the distinction between avoidance and mitigation.

267 [1987] 1 AC 155 at p.164.

268 [2005] UKPC 5 at [96]. See also *Peate v CT* [1967] 1 A.C. 308, *O'Neil v IRC* [2001] STC 742, *Mobil Oil v CT* [1966] AC 275, and the judgment of Lord Donovan and Viscount Dilhorne in the first *IRC v Europa Oil* [1971] AC 760.

269 *Ashton v IRC* [1975] STC 471; *O'Neil v IRC* [2001] UKPC 17

astigmatism”.<sup>270</sup> Lord Oliver, in *Challenge*, described the majority view as “eccentric”.<sup>271</sup> And, in *Peterson*, Lord Bingham and Lord Scott said the majority view was “extraordinary”<sup>272</sup> and required “shutting one’s eyes to the obvious.”<sup>273</sup>

It would seem reasonable to conclude that the idea of tax avoidance is simply not susceptible to coherent explication.<sup>274</sup>

Technical Teams Operational Guidance Manual reaches the same conclusion:

**TTOG3435 Identification of Code 8 cases: Tax avoidance** [Jun 2016] ‘Avoidance’ is not defined in the Taxation Acts and attempts to define it have not in the past been successful.

There has been some judicial recognition of this point, though not as strongly expressed:

While ‘tax avoidance’ is a phrase that most people think they understand, tax avoidance is a difficult concept to define and means different things to different people.<sup>275</sup>

#### 49.50.2 *Avoidance concepts defended*

Recognising the shortcomings of the attempts to define tax avoidance often triggers scepticism. According to such views, the distinction is illusory and the search for it is a wild goose chase arising from a logical confusion. Rules against tax avoidance amount to taxation by discretion; and existing anti avoidance rules, or at least, the GAAR, should be repealed. Littlewood comments:

Arguments along these lines are indeed common. Perhaps they are

---

270 [1971] AC 739 at p.755.

271 [1987] 1 AC 155 at p.173.

272 [2005] UKPC 5 at [101].

273 [2005] UKPC 5 at [78] and [101].

274 Littlewood “The Privy Council and the Australasian Anti-Avoidance Rules” [2007] BTR 175.

275 *HMRC v Hyrax Resourcing* [2019] UKFTT 175 (TC) at [153]. Likewise *Carlton (R, oao) v HMRC* [2018] EWHC 130 (Admin) at [69]: “There is, of course, a good reason why the statute makes no reference to tax avoidance: that concept is difficult to define ...”. Likewise *Fisher v HMRC* [2020] UKUT 62 (TCC) at [130]: “The concept of avoidance is a slippery one.”

sound. But there are nonetheless grounds upon which anti-avoidance rules might be defended.

The first of these is expediency: the rules might be radically indeterminate, but they work.

Secondly, the complaint is based on a fallacy. The scope of anti-avoidance rules is obviously uncertain, but it does not follow that *not* having such a rule results in any less uncertainty: even in the absence of a rule against avoidance, the courts seem inevitably (as in the UK) to be called upon to determine whether taxing statutes should be interpreted in such a way as to give efficacy to, or to negate, taxpayers' attempts to avoid tax. The UK's experience, in particular the *Ramsay* line of cases, suggests that the degree of uncertainty might be much the same, or worse. For, although the scope of the *Ramsay* principle remains uncertain, it seems that the idea of avoidance (and presumably also, therefore, the distinction between avoidance and mitigation) is embedded in it ... Consequently there seems to be little reason to suppose that anti-avoidance rules *add to* the level of uncertainty from which taxing statutes suffer. In other words, the uncertainty may be a feature not of the anti-avoidance rule, but of the rules defining the scope of the tax. The effect of the anti-avoidance rule, therefore, is perhaps to tilt the field in favour of the Revenue, whilst leaving the degree of uncertainty more or less unchanged (or perhaps ameliorating it a little). Thirdly, the unpredictable scope of general anti-avoidance rules seems appropriately selective in whom it inconveniences. Taxpayers and their representatives in Australia and New Zealand routinely complain that this unpredictability deters taxpayers from undertaking economic activity which is not tax-driven and which would be beneficial to society.<sup>276</sup> The 13 Privy Council cases, however, suggest that this is not so, since in every one of them (including those in which the rule was held not to apply) the taxpayer plainly went out of his way to structure his affairs in a manner calculated to reduce his liability to tax. The cases thus suggest that it is only those who sail close to the wind who get wet. On this last point, however, it is necessary to acknowledge that the taxpayers who have ended up in the law reports may not be typical of all those against whom the Australian and New Zealand Revenues have invoked their general anti-avoidance rules. In particular, it is possible that the rules have been invoked in cases in which the amount of tax in dispute was too small to be worth litigating, or in which the taxpayer

---

276 Footnote original: see, e.g. *CIR v Challenge Corp Ltd* [1987] 1 AC 155 at 167.

could not afford to litigate.

In other words, it is possible that the general anti-avoidance rules *have* served as a basis for arbitrary taxation even though the law reports contain no evidence of it. It is possible that in the UK the *Ramsay* principle has functioned in this way also.<sup>277</sup>

In the current climate of hostility to avoidance, the point is perhaps academic.

### 49.50.3 *Abolish the 2006 rules*

This topic was never easy, but the FA 2006 made it twice as complicated: it introduced wider and more obscurer rule which apply to transactions from 2005, while retaining the old rules for earlier transactions.<sup>278</sup>

The reader who studies this long and difficult chapter may well agree with the author that the 2006 reform was wrong headed in policy though (as so often) clumsy drafting adds its mite to the confusion. What should be done? One step forward would be to return to the (relatively) simple pre-2006 position, though it would be helpful to have a statutory statement of what I take to be the pre-2006 rule, that the motive test must be satisfied by all critical associated operations.

---

277 Littlewood “The Privy Council and the Australasian Anti-Avoidance Rules” [2007] BTR 175.

278 EN FB 2006 stated:

“The new provisions recast the test for exemption in cases not involving a tax avoidance purpose to make its meaning clearer.”

But no-one was intended to take that seriously.

## CHAPTER FIFTY

# PROFIT FRAGMENTATION

50.1

### 50.1 Profit fragmentation: Introduction

Para 1(1) sch 4 FA 2019 provides:

This Schedule contains provision about countering the tax effects of certain arrangements<sup>1</sup> (“profit fragmentation arrangements”).

I refer to this as the “**PFA code**”.

Profit Fragmentation is a technical term which has nothing much to do with fragmentation. I write it with initial capitals, to reflect the technical nature of the expression.

The development of the PFA rules can be traced through:

- HMRC, “Tax Avoidance involving Profit Fragmentation Consultation document” (“**PFA condoc**”)<sup>2</sup>
- HMRC, “Tax Avoidance involving Profit Fragmentation Summary of Responses”<sup>3</sup> (“**PFA response doc**”)

### 50.2 The target

PFA condoc provides:

---

1 Para 11 sch 4 FA 2019 provides the standard (unnecessary) IT definition of “arrangements”; see App 2.2.3 (Definitions of “arrangement”).

2 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/698175/Tax\\_Avoidance\\_involving\\_Profit\\_Fragmentation\\_consultation\\_document.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/698175/Tax_Avoidance_involving_Profit_Fragmentation_consultation_document.pdf) (April 2018)

3 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/722457/Tax\\_Avoidance\\_involving\\_Profit\\_Fragmentation\\_summary\\_of\\_responses.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722457/Tax_Avoidance_involving_Profit_Fragmentation_summary_of_responses.pdf) (July 2018)

2.5. A UK resident individual A has skills that would enable him or her to generate significant profits - for example, as an entertainer, an asset manager or a specialist producer of high value items.

2.6. A carries on business activity as a sole trader, in partnership, or as an employee or director of a company (in the last case it is likely that the company will be closely held). Some or all of the profits deriving, directly or indirectly, from A's earning capacity, are moved to an offshore vehicle, V Ltd, where nil or very little tax is paid. Commonly, this is an offshore company owned by an offshore trust. Typically A is not a settlor or trustee of that trust. In some cases, A is said to be excluded from benefitting from the trust assets, but there will often be some means by which those amounts will or may accrue to persons who have links to A, including non-linear relatives of A.

2.7. It is claimed that the offshore entity is entitled to payment in respect of A's services for varied reasons. For example:

- A service agreement that allows V Ltd to enter into agreements to supply A's services to clients - this may be in respect of all of A's activities, or only activities performed by A outside the UK. It is likely that A will be paid a modest salary for these services but most of the receipts will be paid to the trustees via V Ltd, or
- The offshore entity invests in a partnership through which A trades and is said to be entitled to an entrepreneurial return on that investment in priority to any profit allocation to A.

Having regard to the activities carried on by V Ltd in the offshore jurisdiction, relative to those carried out by A elsewhere, it is clear that the entity is either overrewarded or designed to facilitate the avoidance of UK tax.

It is asserted that V Ltd does not carry on any trade or profession in the UK and as it is at no time UK resident then no taxable profits arise.

### **Examples**

In each of the examples below, it is asserted that existing anti-avoidance rules do not apply. In practice, all would be vulnerable to challenge, particularly under the Transfer of Assets Abroad legislation.

“Vulnerable to challenge” is something of an understatement.

#### 50.2.1 *Example: Alienated receipts*

PFA condoc provides:

2.8. A management consultant is resident in the UK and provides

professional services for both UK and overseas customers. A proportion of these services is attributed to the UK business, with those receipts reported by the UK business and taxed in the UK.

2.9. However, the remaining receipts are paid by customers directly to an offshore company in a tax haven, owned by a trust based in the tax haven. These are paid in return for consultancy services allegedly<sup>4</sup> provided by the offshore company, which has no assets apart from access to the skills and services of the management consultant himself, neither of which is exercised to any material extent in the tax haven.

2.10. The management consultant in the UK is expressly excluded from benefiting from the trust but relatives can benefit.

2.11. The underlying reality is that all income derives from a single underlying activity (namely the skills of the consultant, who is a UK resident), that no or negligible services are performed by that person in the low tax jurisdiction itself, and consequently the full profits should be taxed in the UK as profits of the consultant.

These are the facts of *Brckett v Chater*, which decided that the company should be taxed on the basis that it is carrying on a trade in the UK through a permanent establishment; or alternatively that the transfer of asset rules apply.<sup>5</sup>

### 50.2.2 Example: Excess expenses

PFA condoc provides:

2.12. A UK individual provides architectural services for clients in the UK. Customers pay the UK individual, but little profit is taxed in the UK, as the individual pays fees to an offshore company for “consultancy” which are deducted from profits and almost entirely cover the profits. The company receiving the fees is owned by an offshore trust which was settled many years ago by a distant relation of the UK individual. The company has no substance or assets.

2.13. The funds held in the company are then returned to the architect in various forms which are alleged to be non-taxable, for example, loans

---

4 The word “allegedly” is misconceived: there is no reason why the company may not provide consultancy services. If the offshore company had been UK resident, no-one would have questioned the point.

5 See 45.4 (“Transfer” of “assets”); 101.25.4 (Branch/agency distinctions).

or payment of supposed business expenses...<sup>6</sup>

2.14. The reality again is that there is a single underlying source of income, namely the skills of the architect, who is a UK resident, that no or negligible services are performed by that person in the low tax jurisdiction itself, and so the full profits should be taxed in the UK as profits of the architect.

In this case the “commission” is not deductible as not incurred wholly and exclusively for the purposes of the business; or else the transfer pricing rules apply to remove the tax advantage.

### **Common features**

2.15. These arrangements differ in some of their details, but what they have in common is that UK profits are moved to offshore structures in low tax jurisdictions, to entities which are supposedly performing or providing services, but have little or no substance. The reality is that the business is carried on by an individual resident in the UK, with core services such as office space, IT and support staff located in the UK, and that the profit allocated offshore is excessive having regard to the services carried out in that territory.

### 50.2.3 *Existing legislation*

PFA condoc provides:

2.16. Existing legislation, in particular the transfer of assets abroad legislation, can tackle many of these arrangements. Challenges are also possible under the rules relating to transfer pricing, disguised remuneration, and other legislation. However, this legislation can be difficult to apply as it requires the gathering of large amounts of information, and the users or promoters of the arrangements may seek to delay matters by arguing that HMRC has no right to force the production of relevant information held offshore.

3.2. Some of the existing legislation which can be relevant to these arrangements, such as transfer pricing and Diverted Profits Tax, has specific exclusions for SMEs [Small and medium-sized enterprises].<sup>7</sup> The broad aim of any new legislation will be to target arrangements

---

6 The example adds here: “The individual in the UK has a lifestyle which could not be supported on the small amount of net profit received and taxed in the UK.” But that is irrelevant to the example.

7 This is not accurate statement: see 24.16 (Non-qualifying territory).

used by the types of business not covered by the existing rules.

Thus both the examples given to illustrate the need for the new law are wrong in the sense that they are clearly caught by existing legislation. That has happened before,<sup>8</sup> but it is a new development for HMRC to (more or less) concede that is the case.

### 50.3 Parties to PFA

#### 50.3.1 Resident party

Para 1 sch 4 FA 2019 provides:

- (2) Profit fragmentation arrangements involve the following parties—  
(a) a person resident in the UK (“the resident party”) ...

#### 50.3.2 Overseas party

Para 1 sch 4 FA 2019 provides:

- (2) Profit fragmentation arrangements involve the following parties...  
(b) an overseas person or entity (“the overseas party”) who is not resident in the UK ...

Para 1(3) sch 4 FA 2019 provides:

An “overseas person or entity” means—

- (a) a person abroad within the meaning given by section 718 of ITA 2007,<sup>9</sup> or  
(b) a company, partnership, trust or other entity or arrangements established or having effect under the law of a country or territory outside the UK (regardless of whether it has legal personality as a body corporate).<sup>10</sup>

The INT Manual provides:

**INTM610040: Parties** [May 2019]

**Example 3 – Defining the Parties**

C Ltd. is a UK resident company which carries out a trade in the UK as a management consultancy firm. D is an individual who is a 20% shareholder in C Ltd. and is responsible for all of the company’s

---

<sup>8</sup> The charity tainted donation rules are an example.

<sup>9</sup> See 45.5 (“Person abroad”).

<sup>10</sup> The words in brackets are otiose, but they do no harm.

overseas business, which is performed from the UK. D is also involved in another business, O BVI Ltd. through which he performs some personal consultancy services. D arranges for C Ltd.'s overseas customers to make payments to O BVI Ltd. which is a British Virgin Islands resident company.

In the above scenario when considering whether the Profit Fragmentation legislation is applicable C Ltd is the resident party, D is the related individual and O BVI Ltd is the overseas party.

**INTM610050: Parties (Continued)** [May 2019]

**Example 4 – The Overseas Party**

O BVI Ltd. (“O”) is a British Virgin Islands incorporated company. O is wholly owned by its director, A, who is UK resident. A carries out all the activities in relation to the entire business of O from his offices in the UK. Since O is centrally managed and controlled in the UK, and is therefore UK-resident, it cannot be the overseas party when considering the Profit Fragmentation legislation.

In these circumstances, if value were transferred from A’s UK business to O, and O subsequently transferred this value outside of the UK then, depending on the nature of the activities carried on by A and O, O could be treated as the resident party and the Profit Fragmentation legislation may be applicable to O’s subsequent transfer of value outside of the UK.

### 50.3.3 *Related individual*

Para 1(2) sch 4 FA 2019 provides:

Profit fragmentation arrangements involve the following parties ...

- (c) an individual (a “related individual”) who is—
  - (i) the resident party,
  - (ii) a member of a partnership of which the resident party is a partner, or
  - (iii) a participator in a company which is the resident party.

The drafting is clumsy. The resident party is a related individual, ie is related to himself/herself. There may not be any other related individual, and if there is, that individual may not be a party to the PF arrangements. But it does not matter.

The significance of the definition is that the PFA code applies if a related individual meets the enjoyment conditions.<sup>11</sup>

---

<sup>11</sup> See 50.8 (Enjoyment conditions).

The definitions of resident/overseas/related party would apply only for the purposes of para 1, but para 11 extends them to the whole of sch 4.

## **50.4 Profit Fragmentation Arrangements**

Para 2(1) sch 4 FA 2019 provides:

Arrangements are “profit fragmentation arrangements” if-

A set of 4 conditions then follow which I call “**PFA conditions (a) to (d)**”.

The definition applies only for the purposes of para 2, but para 11 extends it to the whole of sch 4.

### **50.5 Condition a: Material provision**

Para 2 sch 4 FA 2019 provides:

(1) Arrangements are “profit fragmentation arrangements” if-

(a) provision has been made or imposed as between

[i] the resident party and

[ii] the overseas party

by means of the arrangements (“the material provision”)

This is not so much a separate condition as a definition of “material provision”.

The wording is based on the transfer pricing rules: see 24.7 (“The basic pre-condition”).

Para 2(3) sch 4 FA 2019 provides:

For the purposes of sub-paragraph (1)(a) provision made or imposed as between

[a] a partnership of which the resident party is a member and

[b] the overseas party

is to be regarded as provision made or imposed as between the resident party and the overseas party.

The INT Manual provides a straightforward example:

**INTM610060 The Material Provision** [May 2019]

#### **Example 5 – Provisions for Partnerships**

A is a UK-resident individual who is carrying on a trade in partnership with a number of other individuals as P Associates. P Associates contracts with an overseas company O Ltd. for O Ltd. to provide

services to P Associates in exchange for a fee. For the purpose of the Profit Fragmentation legislation the provision made between P Associates and O Ltd is treated as a provision made between A and O Ltd.

## 50.6 Condition b: Transfer of value

Para 2 sch 4 FA 2019 provides:

- (1) Arrangements are “profit fragmentation arrangements” if ...
- (b) as a result of the material provision, value is transferred from the resident party to the overseas party which derives directly or indirectly from the profits of a business chargeable to income tax or corporation tax (see paragraph 3)

Unpacking this paragraph, the requirements are:

- (1) a business
- (2) chargeable to IT/CT
- (3) value transferred from a resident to an overseas party
- (4) that value is derived from the business

The INT Manual provides 2 examples: assignment of a trading receipt, and excessive expenses:

### **INTM610080 Transfer of Value** [May 2019]

#### **Example 6 – Transfer of Value Income Received Offshore**

This example shows what is meant by a transfer of value where the resident party reduces the amount of income they take into account.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

F Ltd is a UK-resident company that provides consultancy services to UK and non-UK clients out of its offices in London. F Ltd arranges for its non-UK clients to make payments in return for these services to O Ltd which is an offshore company where none of the relevant business activity takes place.

F Ltd provides services with a value of £100,000 to a non-UK client. The non-UK client pays the £100,000 to O Ltd. rather than to F Ltd.

F Ltd has not made any direct payments out of the UK but there has been a transfer of value out of the UK. This is because F Ltd has

provided services with a value of £100,000 but received £0 in return – this means there has been a transfer of £100,000 of value out of the UK.

**Example 7 – Transfer of Value Expenses Paid from UK**

This example illustrates what is meant by a transfer of value where excess expenses are paid by the resident party.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

G Ltd is a UK-resident company that provides consultancy services out of its offices in London. G Ltd carries out all its IT support functions in-house but makes a payment of £50,000 per year, described as IT costs, to O Ltd, an offshore company which lacks the capacity to fulfil the function such that no relevant activity takes place in O Ltd.

G Ltd has made a payment of £50,000 to an overseas party but has received no services, i.e. something with nil value, in return. This means there has been a transfer of £50,000 of value out of the UK.

#### 50.6.1 “Business”

There must be a business. Para 11 sch 4 FA 2019 seeks to provide a definition:

In this Schedule ...

“business” includes any trade, profession or vocation.

This may be in some OPC handbook, as it crops up from time to time. But it is otiose, as a trade/profession/vocation is obviously a business.

This is an inclusive definition, so the PFA code could also apply to a property business.

#### 50.6.2 *Link to business*

The requirement in PFA condition (b) is that the value transferred “derives directly or indirectly from the profits of the business”. This cannot sensibly be defined, but that does not stop the drafter from trying. Para 3 sch 4 FA 2019 provides:

(1) In determining whether value deriving directly or indirectly from a business is transferred from the resident party to the overseas party, account is to be taken of any method, however indirect, by which—

(a) any property or right is transferred or transmitted, or

- (b) the value of any property or right is enhanced or diminished.
- (2) Sub-paragraph (1) applies in particular to—
  - (a) sales, contracts and other transactions made otherwise than for full consideration or for more than full consideration,
  - (b) any method by which any property or right, or the control of any property or right, is transferred or transmitted by assigning—
    - (i) share capital or other rights in a company,
    - (ii) rights in a partnership, or
    - (iii) an interest in settled property,
  - (c) the creation of an option affecting the disposition of any property or right and the giving of consideration for granting it,
  - (d) the creation of a requirement for consent affecting such a disposition and the giving of consideration for granting it,
  - (e) the creation of an embargo affecting such a disposition and the giving of consideration for releasing it, and
  - (f) the disposal of any property or right on the winding up, dissolution or termination of a company, partnership or trust.
- (3) Value may be traced through any number of individuals, companies, partnerships, trusts and other entities or arrangements.
- (4) The property held by a company, partnership, trust or other entity or under any arrangements must be attributed to the shareholders, partners or members, beneficiaries or other participants at each stage on a just and reasonable basis.

The wording is derived from transactions in land rules.<sup>12</sup>

This does show, if it were necessary, that derivation is not to be narrowly understood.

### 50.6.3 *Remittance basis taxpayer*

The INT Manual provides:

**INTM610080 Transfer of Value** [May 2019]

**Example 8 – Deriving From the Profits of a Business** [Judy]

This example illustrates how the concept of deriving from the profits of a business chargeable to income tax applies where an individual who is non-domiciled claims to use the remittance basis and has foreign source income.

---

<sup>12</sup> See 21.18 (Tracing value); 21.19 (Indirect arrangements).

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

J is a UK-resident non-domiciled individual who claims the remittance basis.

J is self-employed and carries on a trade in the UK as a pharmaceuticals consultant. J has offices in London and a small team of staff that she employs, all of who perform their duties in her London offices. J also occasionally travels to Geneva to perform pharmaceutical consulting for a Swiss company (A) in her capacity as a sole trader.

J incorporates a ‘brass plate’ company (B) in Switzerland and asks A to make a contract with B when they seek to use her business’s services, including the work of her UK staff. J does not change anything about her business activities except for arranging that consultancy payments from A are now paid to B instead of to her as a self-employed individual.

We assume for the purpose of this example that no other provisions are applicable here (such as for example Central Management and Control).<sup>13</sup>

J also spends every other weekend carrying out a trade in Switzerland through a further Swiss company (D) leading executive team building excursions in the Alps. This activity takes place solely in Switzerland and all the activities are carried out by J through her Swiss Company (D) in Switzerland.

The Profit Fragmentation legislation would apply to the transfer of value arising from the diversion of income from J’s UK business to the Swiss company, B. This is because these payments are properly attributable to the UK business and derive from the profits of a business chargeable to income tax. These amounts are not eligible for the remittance basis as they are UK source income.

The Profit Fragmentation legislation will not apply to the income derived from her team building company, D, in Switzerland as this is foreign source income so is not derived from the profits of a business chargeable to income tax.

#### 50.6.4 *Tracing example*

---

<sup>13</sup> More analytically, it is assumed that the Swiss company is not UK resident.

The INT Manual provides:

**INTM610090 Tracing Value** [May 2019]

**Example 9 – Tracing Value Through Transactions**

In the following example UK1, UK2 and UK3 are UK resident companies, and OS1, OS2, and OS3 are non-UK resident companies. Each of these companies is party to arrangements whereby value is transferred for which nothing is received in return.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

The following series of transactions is carried out:

- UK1 transfers £1,000 of value to OS1.
- OS1 transfers £1,000 of value to UK2.
- UK2 transfers £1,000 of value to OS2.
- OS2 transfers £500 of value to UK3.
- UK3 transfers £500 of value to OS3.

In these circumstances the resident party could be any of UK1, UK2, UK3, or indeed any combination of UK1, UK2 and UK3 each with separate arrangements, as value has been transferred out of the UK by each of them. As described above this will depend on the specific facts and circumstances surrounding the arrangements. This will include the related individual's relationship with the companies and the nature of the activities that take place in each of these companies.

This is not exactly guidance, but no doubt we will muddle through.

## 50.7 Condition c: Arm's length

Para 2 sch 4 FA 2019 provides:

- (1) Arrangements are “profit fragmentation arrangements” if ...
- (c) the value transferred is greater than it would have been if it had resulted from provision made or imposed as between independent parties acting at arm's length

I would have said that if there were a transaction at arm's length, there would be no value transferred. So this paragraph is otiose. But it does not matter.

The INT Manual provides straightforward examples of (1) diverted

receipts and (2) excessive expenditure, on non-arm's length terms. I set them out only for completeness:

**INTM610100 Arm's Length Transfer** [May 2019]

**Example 10 – Arm's Length Value – Reduction of Income Received**

This example illustrates what is meant by a transfer of value being greater than it would have been if made between parties acting at arm's length in the context where the resident party reduces the amount of income they take into account. As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

C Ltd. is a UK-resident company which provides consultancy services to UK and non-UK clients out of its offices in London. O Ltd. is an offshore company that provides limited ancillary services to consulting businesses. C Ltd. makes arrangements with O Ltd. whereby O Ltd. will provide limited ancillary services to C Ltd. if C Ltd. agrees to have its non-UK clients make payments in return for the services C Ltd. provides as follows:

- 20% to C Ltd., and
- 80% to O Ltd.

C Ltd. provides services with a value of £1m to a non-UK client. In line with the above agreement, in return for these services the non-UK client pays £200,000 to C Ltd and £800,000 to O Ltd.

C Ltd. has not made any direct payments out of the UK but there has been a transfer of value out of the UK. This is because C Ltd. has provided services with a value of £1m and only received £200,000 – this means there has been a transfer of £800,000 of value out of the UK. The services provided by O Ltd. do not warrant such an inflated return.

A provision has been made between C Ltd. and O Ltd. for these arrangements to take place. Had this provision been made or imposed between independent parties acting at arm's length then O Ltd. would have received nothing. The value paid from the non-UK client to C Ltd. would have been the value of the services provided – so £1m. This means that there would be no transfer of value out of the UK as the amount paid into the UK (£1m) would be equivalent to the value of the services provided out of the UK (£1m).

In these circumstances the value transferred out of the UK (£800,000) clearly exceeds the value that would have been transferred out of the UK had the provisions been made or imposed between independent parties acting at arm's length (£0). In these circumstances paragraph 2(1)(c) would be applicable.

**Example 11 – Arm's Length Value – Inflation of Expenses Paid**

This example illustrates what is meant by a transfer of value taking place at greater than it would have been if made between parties acting at arm's length where excess expenses are paid by the resident party.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of

profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

C Ltd. is a UK resident company which provides consultancy services out of its offices in London. C Ltd. carries out all its IT support functions in-house but makes a payment of £50,000 per year to O Ltd., an offshore company which provides limited services, which it describes as IT costs.

C Ltd. has made a payment of £50,000 to an overseas party but has received limited services, which for the purpose of this example have a value of £5,000, in return. This means there has been a transfer of £45,000 of value out of the UK.

Had the provision been made or imposed between independent parties acting at arm's length the value paid from C Ltd. to O Ltd. would have been the arm's length amount which in this case would be £5,000 as O Ltd. has only performed limited services. This means that there would be no transfer of value out of the UK as the amount paid out of the UK (£5,000) would be equivalent in value to the value of the services provided in to the UK (£5,000).

In these circumstances the value transferred out of the UK clearly exceeds the value that would have been transferred out of the UK had the provisions been made or imposed between independent parties acting at arm's length. In these circumstances paragraph 2(1)(c) would be applicable.

## 50.8 Condition d: Enjoyment conditions

Para 2 sch 4 FA 2019 provides:

- (1) Arrangements are “profit fragmentation arrangements” if ...
  - (d) any of the enjoyment conditions are met in relation to a related individual (see paragraph 4).

Para 4 sch 4 FA 2019 provides:

- (1) The enjoyment conditions are met in relation to a related individual if-

There follow two sets of conditions, in short:

- (1) Link to individual; and
- (2) (a) Enjoyment test; or
  - (b) Procurer test

It is difficult to see how the second condition could fail to be met.

The label “Enjoyment conditions” is not apt to describe the total set of conditions.

### 50.8.1 *Link to individual*

Para 4 sch 4 FA 2019 provides:

- (1) The enjoyment conditions are met in relation to a related individual if-
  - (a) it is reasonable to conclude that some or all of the value transferred as a result of the material provision relates to something done by, or any property or purported right of, the individual

Will it ever happen that this condition is not satisfied?

### 50.8.2 *Power to enjoy*

Para 4(4) sch 4 FA 2019 provides:

For the purposes of sub-paragraphs (2) and (3), references to an individual include a reference to any person connected with that individual...

I gloss this as “individual [including connected persons]”.

Para 4 sch 4 FA 2019 provides:

- (1) The enjoyment conditions are met in relation to a related individual [including connected persons] if ...
  - (b) either of the conditions in sub-paragraph (2) is met.
- (2) The conditions are that—
  - (a) under the arrangements—
    - (i) the value transferred, or part of it, is so dealt with by any person as to be calculated at some time to enure for the benefit of the individual [including connected persons],
    - (ii) the value transferred, or part of it, operates to increase the value of any assets which the individual [including connected persons] holds or are held for the benefit of the individual [including connected persons],
    - (iii) the individual [including connected persons] receives or is entitled to receive any benefit provided or to be provided out of the value transferred or part of it,
    - (iv) the individual [including connected persons] may become entitled to the beneficial enjoyment of the value transferred, or part of it, if one or more powers are exercised or successively exercised (and for those purposes it does not matter who may exercise the powers or whether they are exercisable with or without the consent of another person), or

- (v) the individual [including connected persons] (whether acting alone or together with any other person) is able in any manner to control directly or indirectly the application of the value transferred or part of it,

Para 4(3) sch 4 FA 2019 provides:

(3) In determining whether the conditions in sub-paragraph (2)(a) are met in relation to an individual [including connected persons] and the value transferred as a result of the material provision, all benefits which may at any time accrue to a person as a result of the value being transferred must be taken into account, irrespective of—

- (a) the nature or form of the benefits, or
- (b) whether the person has legal or equitable rights in respect of the benefits.

The wording is based on the ToA rules.<sup>14</sup>

### 50.8.3 *Procurer test*

Para 4(2) sch 4 FA 2019 provides:

The conditions are that ...

- (b) it is reasonable to conclude that the individual [including connected persons] (whether acting alone or with any other person) procured the transfer of value from the resident party to the overseas party in such a way as to avoid the conditions in paragraph (a) being met.

In this case the label “enjoyment conditions” is inapt, as the transferor will not have power to enjoy.

This reflects apparent HMRC frustration with the existing s.720 charge. PFA condoc provides:

4.12. In exceptional cases sums may accumulate for long periods with no access by A or immediate family members. In some cases the trust deeds contain conditions which provide that the UK individual does not have the power to enjoy the assets of the trust. In practice,

- [a] this condition may be ignored, or
- [b] the deeds may also give the trustees powers to make payments to anyone they choose, notwithstanding any specific prohibitions set

---

<sup>14</sup> See 46.11 (“Power to enjoy”).

out in the deeds.

In case [b] the individual actually has power to enjoy. Case [a] involves a sham.

The INT Manual provides:

**INTM610130: Enjoyment Conditions: Procurer Test [May 2019]**  
**Example 12 – The Procurer Test**

A is a UK resident individual who carries on a trade in the UK. A is seeking to reduce the tax they pay in the UK while still receiving the profits they make and seeks legal advice about how they can do this. A is given advice about how to set up a structure to divert profits out of the UK.

The advice received by A sets out a number of steps which they can take to ensure that the enjoyment conditions set out in 4(2)(a) Schedule 4 Finance Act 2019 are not satisfied. This advice could involve arrangements for A or their legal advisers to procure a ‘dummy’ settlor to settle a trust, or for the beneficiaries of trusts to be specific named charitable causes. HMRC are not able to demonstrate that A or parties connected to A are able to benefit from these arrangements.

In these circumstances A will have procured the transfer of value with a view to avoiding the conditions set out in paragraph 4(2)(a) and therefore the procurer test will be met.

#### 50.8.4 *Connected persons*

Para 4 sch 4 FA 2019 provides:

- (4) ... for the purposes of this paragraph, section 993 of ITA 2007 (meaning of “connected”) has effect but as if—
- (a) subsection (4) of that section were omitted, and

The deleted rule in s.993(4) provided that partners are connected with other partners and their relatives.

Para 4 sch 4 FA 2019 provides:

- (4) ... for the purposes of this paragraph, section 993 of ITA 2007 (meaning of “connected”) has effect but as if...
- (b) members of a partnership in which the individual is also a member were not “associates” of the individual for the purposes of sections 450 and 451 of CTA 2010 (“control”).

The rule that partners are not associates means that partners are not

connected with a company held by their partnership.

Para 4(5) extends the scope of connected person in a novel way:

For the purposes of sub-paragraph (4), an individual is treated as connected with a person or entity if—

- (a) the individual or a person connected with the individual (whether acting alone or with any other person)—
  - (i) is able to secure that the person or entity acts in accordance with the wishes of the individual or any person connected with the individual,
  - (ii) is able to acquire rights which would enable the individual or any person connected with the individual to secure that the person or entity acts in accordance with the wishes of the individual or any person connected with the individual, or
  - (iii) is able to exercise significant influence over the person or entity (whether or not as a result of a legal entitlement of the individual or any person connected with the individual), or
- (b) the person or entity can reasonably be expected to act, or typically acts, in accordance with the wishes of the individual or a person connected with the individual.

PFA condoc explains the thinking here:

4.16. In some arrangements, persons may not be formally connected, yet it is apparent that transactions occur which would not occur in an arm's length situation. For example, profits made by a UK individual are paid away to a company owned by a trust, and the UK individual receives no services nor any other sort of return for those payments. HMRC is informed that there is no connection between the individual and the trust or company. In these circumstances it may be reasonable to believe that there is a form of connection between the UK individual and the trust.

4.17. The proposed legislation will therefore aim to address situations where individuals or companies effectively follow the instructions of another person, whether or not there is a strict legal arrangement providing that this is the case. It will involve looking at all the circumstances, and in particular whether the alienation of profits that occurs would happen in a genuine commercial arrangement.

This reverses the decisions on the ToA rule.<sup>15</sup>

## **50.9 Tax mismatch**

Para 2(2) sch 4 FA 2019 provides:

But arrangements are not “profit fragmentation arrangements” if—

- (a) the material provision does not result in a tax mismatch for a tax period of the resident party (see paragraphs 5 and 6)

### **50.9.1 “Tax mismatch”**

Para 5 sch 4 FA 2019 provides:

(1) The material provision results in a tax mismatch for a tax period of the resident party if—

- (a) in that period, in relation to a relevant tax, it results in one or both of—

- (i) an increase in the expenses of the resident party for which a deduction is taken into account in calculating the amount of the relevant tax payable by the resident party, or

- (ii) a reduction in the income of the resident party which would otherwise have been taken into account in calculating the amount of the relevant tax payable by the resident party,

- (b) it is reasonable to conclude that—

- (i) [A] the resulting reduction in the amount of the relevant tax which is payable by the resident party exceeds

- [B] the resulting increase in relevant taxes payable by the overseas party for the period corresponding to the tax period, and

- (ii) the overseas party does not meet the 80% payment test, and

- (c) the results described in paragraphs (a) and (b)(i) are not exempted by sub-paragraph (5).

(2) In this Schedule references to “the tax reduction” are to the amount of the excess mentioned in sub-paragraph (1)(b)(i).

(3) It does not matter whether the tax reduction results from the application of different rates of tax, the operation of a relief, the exclusion of any amount from a charge to tax, or otherwise.

---

15 See 46.12.1 (Control over trust income).

“Tax mismatch” is not particularly apt. “Tax saving” is the more appropriate term. But it does not matter.

### 50.9.2 *The 80% payment test*

Para 5(4) sch 4 FA 2019 provides:

“The 80% payment test” is met by the overseas party if the resulting increase in relevant taxes paid by that party as mentioned in sub-paragraph (1)(b)(i) is at least 80% of the amount of the resulting reduction in the amount of the relevant tax payable by the resident party.

### 50.9.3 *Tax period*

Para 5(7) sch 4 FA 2019 provides:

“tax period”, in relation to a resident party, means—

- (a) a tax year, or
- (b) if the resident party is a company, an accounting period of that party.

Para 5(6) sch 4 FA 2019 provides:

In this paragraph and paragraph 6, where the overseas party does not have an actual period for the purposes of relevant taxes which coincides with the tax period of the resident party—

- (a) references to the corresponding period of the overseas party in relation to that tax period are to a notional period of that party for the purposes of relevant taxes that would coincide with that tax period, and
- (b) such apportionments as are just and reasonable are to be made to determine the income or tax liability of that party for that corresponding period.

### 50.9.4 *“Relevant tax”*

Para 5(7) sch 4 FA 2019 provides:

In this paragraph—

“relevant tax” means—

- (a) income tax,
- (b) corporation tax on income,
- (c) a sum chargeable under section 269DA of CTA 2010 (surcharge on banking companies) as if it were an amount of

- corporation tax,
- (d) a sum chargeable under section 330(1) of CTA 2010 (supplementary charge in respect of ring fence trades as if it were an amount of corporation tax), or
  - (e) any non-UK tax on income

The definition is for para 5, but it is incorporated by reference in para 6.

### 50.9.5 *Resulting reduction*

Para 6 sch 4 FA 2019 provides:

- (1) For the purposes of paragraph 5, the resulting reduction in the resident party's liability to a relevant tax for a tax period is—

$$A \times TR$$

A stands for **Absolute value**; TR is **Tax Rate**:

where—

A is the sum of—

- (a) if there are expenses within paragraph 5(1)(a)(i) [deductible expenses], the lower of the amount of expenses and the amount of the deduction mentioned in that provision, and
  - (b) any reduction in income mentioned in paragraph 5(1)(a)(ii), and
- TR is the rate at which, assuming the resident party has profits equal to A chargeable to the relevant tax for the tax period, those profits would be chargeable to that tax.

For this purpose, the rate at which those profits would be chargeable to that tax for that period is the highest rate at which that tax would be chargeable for that period if those profits were added to the resident party's total income.

This may be comparing personal tax rates to corporation tax rates, which is not likely to pass the 80% payment test.

### 50.9.6 *Resulting increase*

Para 6 sch 4 FA 2019 provides:

- (2) For the purposes of paragraph 5(1)(b) and (4), the resulting increase in relevant taxes payable by the overseas party for the period corresponding to the tax period is any increase in the total amount of relevant taxes that would fall to be paid by that party (and not refunded) assuming that—

- (a) the overseas party's income for that period, in consequence of

- the material provision were an amount equal to A,
- (b) account were taken of any deduction or relief (other than any qualifying deduction or qualifying loss relief) taken into account by the overseas party in determining that party's actual liability to any relevant taxes in consequence of the material provision, and
  - (c) all further reasonable steps were taken—
    - (i) under the law of any part of the UK or any country or territory outside the UK, and
    - (ii) under double taxation arrangements made in relation to any country or territory,
 to minimise the amount of tax which would fall to be paid by the overseas party in the country or territory in question (other than steps to secure the benefit of any qualifying deduction or qualifying loss relief).
  - (3) The steps mentioned in sub-paragraph (2)(c) include—
    - (a) claiming, or otherwise securing the benefit of, reliefs, deductions, reductions or allowances, and
    - (b) making elections for tax purposes.
  - (4) For the purposes of this paragraph, any withholding tax which falls to be paid on payments made to the overseas party is (unless it is refunded) to be treated as tax which falls to be paid by that party (and not the person making the payment).

### 50.9.7 80% payment test: Examples

The INT Manual provides straightforward examples:

#### **INTM610160 Quantifying the Resident Party's Tax Reduction** [May 2019]

##### **Example 14 – Determining the Relevant Taxes Payable**

This example should be read alongside Example 15 below.

A is self-employed and liable to income tax at the 45% rate. A has expenses of £30,000 resulting from Profit Fragmentation Arrangements that have resulted in a deduction, and income of £50,000 which as a result of the arrangements has been omitted.

The reduction in A's liability to UK income tax would be computed as:  
 $(£30,000 + £50,000) \times 45\% = £80,000 \times 45\% = £36,000$

O is the overseas party to whom the value is transferred under Profit Fragmentation Arrangements. O pays tax at a rate of 10% on the value transferred and has no expenses.

The increase in the relevant taxes to be paid by the overseas party is:

$$(\pounds 30,000 + \pounds 50,000) \times 10\% = \pounds 80,000 \times 10\% = \pounds 8,000$$

**Example 15 – The 80% Payment Test**

This example illustrates the application of the 80% payment test which is described at INTM610150, and should be read alongside Example 14 above.

If we assume the facts are as above such that the reduction in A's liability to UK income tax was £36,000 ("X") and the increase in relevant taxes to be paid by the overseas party is £8,000 ("Y").

A comparison now needs to be made between these two figures to determine if the 80% payment test is met. This is done by dividing Y by X – to determine the percentage. In this case:

$$\pounds 8,000 / \pounds 36,000 = 22.2\%$$

This means that the increase in the overseas party's tax liability is (22.2%) of the reduction in the resident party's liability to UK tax which is less than the required 80% meaning the 80% payment test is not met.

**INTM610170 Qualifying Deduction and Qualifying Loss Relief [May 2019]****Example 16 – Qualifying Deduction**

This example illustrates what is meant by a qualifying deduction.

As part of a material provision, the overseas party acquires IP from the resident party and then charges royalties to the resident party for its continued use. The overseas party amortises the amount paid for the IP, which is allowable as a deduction in computing the overseas party's liability. This is not a qualifying deduction because it arises from the making of the material provision.

**Example 17 – Qualifying Deductions and Qualifying Losses**

The effect of the rules on qualifying deductions and qualifying loss relief is to give a consistent comparison between the tax positions of the two parties.

If the resident party pays £100 to the overseas party for something that costs the overseas party £95 to provide then the comparison would not be expected to be between the tax effect on the resident party of its paying £100 and the tax payable by the overseas party on a net £5 (calculated as the amount they received for this thing (£100) less the amount it cost them to provide it (£95)). As long as the £95 costs of the overseas party meet the criteria of a qualifying deduction the comparison is between two amounts of £100.

However, if in another situation the overseas party was only taxed on £50 of the £100 because of some particular relief for £50 given in its country of residence that does not meet the qualifying deduction criteria

then the comparison will be between the resident party's reduction of tax on expenditure of £100 and what would have been the overseas party's liability to relevant tax had its taxable income been £50.

Similarly, with loss relief, a reduction below £100 in the taxation of the receipt would not be taken into account to the extent that it relates to qualifying loss relief. But a loss is a qualifying one only if it corresponds to a loss for which the resident party could have obtained relief, so a loss that could be utilised under the law applicable to the overseas party but not to the resident party would not qualify.

If, for example, the resident party is a UK company making a payment to a non-UK resident group company that has no resulting increase in relevant taxes because it can set off brought forward losses of other group companies as well as its own against the relevant profits, only the element of loss relief that corresponds to what would be eligible under the UK rules would be qualifying loss relief.

#### 50.9.8 *Tax refund*

Para 6(5) sch 4 FA 2019 provides:

For the purposes of this paragraph, an amount of tax payable by the overseas party is refunded if and to the extent that—

- (a) any repayment of tax, or any payment in respect of a credit for tax, is made to any person, and
- (b) that repayment or payment is directly or indirectly in respect of the whole or part of the amount of tax payable by the overseas party,

but an amount refunded is to be ignored if and to the extent that it results from qualifying loss relief obtained by that party.

#### 50.9.9 *Overseas party transparent*

Para 6(6) sch 4 FA 2019 provides:

Where some or all of the overseas party's income is treated for the purposes of a relevant tax charged under the law of a country or territory outside the UK as the income of a person or persons other than the overseas party, in paragraph 5 and this paragraph—

- (a) references to that party's liability to any tax (however expressed) include a reference to the liabilities of that person or those persons to the relevant tax,
- (b) references to any tax being payable by that party (however expressed) include a reference to the relevant tax being payable

- by that person or those persons, and
- (c) references to loss relief obtained by that party include a reference to loss relief obtained by that person or those persons, and sub-paragraph (4) applies to that person or any of those persons as it applies to that party.

The INT Manual provides:

**INTM610180: Hybrid and Transparent Entities/ Reasonable to Conclude/ UK Resident Non-Domiciled Individuals** [May 2019]

**Example 18 – Tax Transparent Entity**

If the overseas party was a United States (US) limited liability company (LLC) it could be charged to tax in the US as if it was fiscally transparent. However, for the purposes of UK tax, US LLCs are regarded as taxable entities and not fiscally transparent. In these circumstances paragraph 6(6) would apply to treat the US LLC as fiscally transparent for the purposes of applying the tax mismatch test, thus ensuring that account is taken of tax paid by the members of the overseas party.

For example, A is a UK resident company with Profit Fragmentation Arrangements under which it transfers £10,000 of value to O US LLC. O US LLC is owned by US resident individuals (B and C). O US LLC is a transparent entity for US tax purposes such that B and C pay tax on the profits generated by O.

B pays tax on £5,000 of the value transferred to O US LLC at 28% (£1,400). C also pays tax on £5,000 of value transferred to O US LLC at 39.6% (£1,980). In considering O US LLC's liability to tax account should be taken of the £1,400 and £1,980 paid by B and C. O US LLC is therefore treated as having paid £3,380 on the £10,000 transferred. Thus when considering the tax mismatch condition the increase in relevant taxes to be paid by the overseas party would be £3,380 and not zero.

50.9.10 *Qualifying deduction/loss*

Para 6(7) sch 4 FA 2019 provides:

In this paragraph—

“qualifying deduction” means a deduction which—

- (a) is made in respect of actual expenditure of the overseas party,
- (b) does not arise directly from the arrangements,
- (c) is of a kind for which the resident party would have

obtained a deduction in calculating that party's liability to any income tax or corporation tax had that party incurred the expenditure in respect of which the deduction is given, and

(d) does not exceed the amount of the deduction that the resident party would have so obtained,

“qualifying loss relief” means any means by which a loss might be used for tax purposes to reduce the amount in respect of which the overseas party is liable to tax on the profits of a business

#### 50.9.11 *Reasonable to conclude*

The INT Manual provides:

**INTM610180 Hybrid and Transparent Entities/ Reasonable to Conclude/ UK Resident Non-Domiciled Individuals [May 2019]**  
**Reasonable to Conclude**

It will not always be possible for the resident party to obtain sufficient information about the overseas party to discern the increase in relevant taxes payable by the overseas party when carrying out the tax mismatch test.

If it is reasonable to conclude that the reduction in relevant tax payable by the resident party does not exceed the increase in relevant tax payable by the overseas party, or that the 80% payment test is met then it is reasonable to conclude there is not a tax mismatch.

The expression “reasonable to conclude” shows that this is an objective test, which is to be applied by taking into account all the relevant circumstances and asking what, in the light of those circumstances, a reasonable conclusion would be.

#### 50.9.12 *Foreign domiciled taxpayer*

The INT Manual provides:

**INTM610180 Hybrid and Transparent Entities/ Reasonable to Conclude/ UK Resident Non-Domiciled Individuals [May 2019]**  
**UK Resident Non-Domiciled Individuals**

If the resident party is a non-domiciled individual with foreign source income that is not connected to a UK business activity, then, if that individual is chargeable on the remittance basis for a tax year the foreign source income is not chargeable to income tax or corporation tax. In such a case, any transfer of value from the foreign source will not derive from the profits of a business chargeable to UK tax, so any

arrangements will not be Profit Fragmentation Arrangements.

If the resident party is an individual who has settled an offshore trust, which has as a matter of fact protected foreign source income to which the trust protections described below apply and that is not connected to a UK business activity, then the income would not be an amount taken into account by the resident party in computing the amount of UK tax payable.

The ‘trust protections’ are the changes made by Finance Act 2017 to remove overseas trusts settled by non-UK domiciled settlors from a charge under S624 Income Tax Trading and Other Income Act 2005 (“ITTOIA 05”), S720 ITA 2007 and S727 ITA 2007 in respect of certain trust income and the income of any underlying companies and instead bring them within the scope of S731 ITA 2007 or S643A ITTOIA 05 so that they are assessed on the benefits they receive from the trust and its underlying entities.

This means that any genuine foreign source income will not be affected by the Profit Fragmentation legislation as the Tax Mismatch exception test will apply.

For more details regarding the interaction between the Profit Fragmentation legislation and the transfer of assets abroad rules see INTM610250 and INTM610260.

**Example 19 – Remittance Basis – Foreign Source Income (Judy)**

J is a UK resident non-domiciled individual who claims the remittance basis.

J spends every other weekend carrying out a trade in Switzerland through a Swiss company leading executive team building excursions in the Alps. This activity takes place solely in Switzerland and all the activities are carried out by J in Switzerland.

The Profit Fragmentation legislation will not apply to the income derived from her team building company in Switzerland as this is foreign source income not derived from the profits of a business chargeable to UK income tax.

## 50.10 Counteraction

Para 7 sch 4 FA 2019 provides:

- (1) Adjustments must be made so as to counteract the tax advantages that would (ignoring this Schedule) arise from profit fragmentation arrangements.
- (2) The adjustments—
  - (a) must relate to the expenses, income, profits or losses of the

resident party for the tax period in which value is transferred as a result of the material provision,

- (b) must be based on what the value transferred would have been if it had resulted from a provision made or imposed as between independent parties acting at arm's length, and
  - (c) must be just and reasonable.
- (3) References in this paragraph to “the resident party” are references to the resident party at the time at which the material provision is made or imposed.

Since the requirements of PFA are so vague, and so many different arrangements may be caught, there seems little alternative to a wide HMRC discretion.

In the HMRC view, the taxpayer must make their own counteraction and self-assess accordingly.

The INT Manual provides:

**INTM610280: Making Adjustment on the Tax Return: Individuals**  
[May 2019]

Customers will be required to determine whether the Profit Fragmentation legislation applies to them. If they determine that the Profit Fragmentation legislation does apply to them, they will need to make the adjustments required by paragraph 7 of the legislation. These pages set out how different types of customers to whom the Profit Fragmentation legislation could apply should make the required adjustments on their tax return. Customers to whom the Profit Fragmentation legislation applies, and who currently do not make a self-assessment return, must make a self-assessment return in order to report taxable income arising from the adjustment made under the Profit Fragmentation legislation.

Individuals operating as sole traders/ receiving UK property income required to make adjustments under the Profit Fragmentation legislation  
Individuals who are self-employed (completing SA103F or SA103S)  
Individuals required to adjust their self-employment income under paragraph 7 of the Profit Fragmentation legislation must record these adjustments on their SA return as follows.

Individuals who complete form SA103F must:

- If the required adjustment consists of reducing an expense, disallow the relevant expense that was previously included in the return by making the appropriate entry in one of boxes 32-45.
- If the required adjustment consists of increasing their income,

increase their income by inserting the additional income figure in box 60.

Individuals who complete form SA103S must:

- If the required adjustment consists of reducing an expense, take the relevant expense off the expense figure included in one of boxes 11-19 (and the total at box 20). If their annual turnover was such that they are only required to complete box 20, they should just take the relevant expense off the box 20 total figure.
- If the required adjustment consist of increasing their income, increase their income by inserting the additional income figure at box 27.

Individuals who have UK property income (completing SA105)

Individuals required to adjust their UK property income under paragraph 7 of the Profit Fragmentation legislation must record these adjustments on their SA return (form SA105) as follows:

- If the required adjustment consists of reducing an expense, take the relevant expense off the expense figure/s included in boxes 24-29.
- If the required adjustment consists of increasing their income, increase their income by increasing the total income figure at box 20.

**INTM610290: Members of a partnership required to make adjustments under the Profit Fragmentation legislation [May 2019]**  
**Adjustments required on the Partnership Return (SA800)**

If paragraph 7 of the Profit Fragmentation legislation requires adjustments relating to the income or expenses of a member of a partnership, adjustments must be first be made on the Partnership Return (form SA800).

- If the required adjustment consists of reducing an expense, disallow the relevant expense that was previously included in the return by making the appropriate entry in one of boxes 3.30-3.45.
- If the required adjustment consist of an increase in income, increase the income figure by inserting the additional income figure in box 3.67.
- The adjustments will be carried through to that member's allocation of profits and losses shown on the partnership statements prepared by the partnership as part of the partnership return.

**Adjustments required by partners**

The relevant partnership members must reflect the adjustments to the profit/loss shown on the partnership statement in their own returns. Therefore for partnership members who are individuals, the figure at

box 8 (on form SA104F and SA104S) must be adjusted to reflect the change to their share of the partnership profit or loss as a result of the adjustments required under paragraph 7 of the Profit Fragmentation legislation. Corporate partners must make the necessary adjustment in their CT computation.

**INTM610300 Companies required to make adjustments under the Profit Fragmentation legislation** [May 2019]

If a company is required to make adjustments under paragraph 7 of the Profit Fragmentation legislation, it should make the necessary adjustments to expenses and/or income in its CT computation.

**INTM610200: Profit Fragmentation Adjustments** [May 2019]

**Example 20 – Profit Fragmentation Adjustments**

*As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.*

A UK company (the resident party) makes arrangements with a Bermudian company (the overseas party) to provide administrative services to the UK Company to support its UK business.

The UK Company pays the Bermudian company £100,000, however, the arm's length price of the services actually provided by the Bermudian company is only £10,000. The Bermudian company later makes a loan to a participator in the UK Company (the related individual) that is not taxable in the UK, meaning the enjoyment condition is met.

There is no commercial reason for the excessive payment and it is reasonable to conclude that the arrangements were entered into to obtain a tax advantage. The UK tax that would have been paid on the £90,000 diverted would have been £18,000 and the Bermudian tax paid on the £90,000 was £0, meaning the tax mismatch test was met.

These arrangements are Profit Fragmentation Arrangements so adjustments must be made to the amounts to be included in the UK Company's tax returns.

The Profit Fragmentation legislation ensures the amount of profit that should be taxable in the UK is fully taxed in the UK. In this case the amount relating to the arrangements that should be taxed in the UK but wasn't is £90,000. This is the difference between the value transferred and the arm's length price.

The UK Company should disallow £90,000 worth of their

administrative services costs in their tax computation – increasing their taxable profits by £90,000.

The £10,000 that is still deducted represents the value that should have been transferred for tax purposes between independent parties acting at arm's length.

## **50.11 Exemptions**

Para 5 sch 4 FA 2019 provides:

(5) The results described in sub-paragraph (1)(a) and (b)(i) are exempted if they arise solely by reason of—

- (a) contributions paid by an employer under a registered pension scheme, or overseas pension scheme, in respect of any individual,
- (b) a payment to a charity,
- (c) a payment to a person who, on the ground of sovereign immunity, cannot be liable for any relevant tax...

## **50.12 Payment to fund**

Para 5 sch 4 FA 2019 provides:

(5) The results described in sub-paragraph (1)(a) and (b)(i) are exempted if they arise solely by reason of..

- (d) a payment to an offshore fund or authorised investment fund—
  - (i) which meets the genuine diversity of ownership condition (whether or not a clearance has been given to that effect), or
  - (ii) at least 75% of the investors in which are, throughout the accounting period, registered pension schemes, overseas pension schemes, charities or persons who cannot be liable for any relevant tax on the ground of sovereign immunity.

## **50.13 Diversity of ownership**

Para 11 sch 4 FA 2019 provides:

In this Schedule-

“genuine diversity of ownership condition” means—

- (a) in the case of an offshore fund, the genuine diversity of ownership condition in regulation 75 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), and

- (b) in the case of an authorised investment fund,<sup>16</sup> the genuine diversity of ownership condition in regulation 9A of the Authorised Investment Fund (Tax) Regulations 2006 (S.I. 2006/964)

The two regulations are in similar terms: it is helpful to see them side by side:

### OFTR

(1) The genuine diversity of ownership condition is met if the fund meets, or, in relation to a fund constituted by a class of interests in the main arrangements, the main arrangements meet, conditions A to C throughout the period of account.

(2) Condition A is that the fund produces documents, available to investors and to HMRC, which contain—

- (a) a statement specifying the intended categories of investor,
- (b) an undertaking that interests in the fund will be widely available, and
- (c) an undertaking that interests in the fund will be marketed and made available in accordance with the requirements of paragraph (4)(a).

### AIFTR

(1) For the purposes of these Regulations, the genuine diversity of ownership condition is as follows.

(2) The genuine diversity of ownership condition is that an authorised investment fund must—

- (a) meet conditions A to C throughout the accounting period; or
- (b) comply with paragraph (8).

(3) Condition A is that the fund documents—

- (a) contain a statement that units in the fund will be widely available,
- (b) specify the intended categories of investor, and
- (c) specify that the manager of the fund must market and make available the units in the fund in accordance with paragraph 9A(6)(a).

---

<sup>16</sup> Defined para 11 sch 4 FA 2019: “authorised investment fund” means—

- (a) an open-ended investment company within the meaning of section 613 of CTA 2010, or
- (b) an authorised unit trust within the meaning of section 616 of that Act”.

- (3) Condition B is—
- (a) that the specification of the intended categories of investor do not have a limiting or deterrent effect, and
  - (b) that any other terms or conditions governing participation in the fund do not have a limiting or deterrent effect.

- (4) Condition C is—
- (a) that interests in the fund must be marketed and made available—
    - (i) sufficiently widely to reach the intended categories of investors, and
    - (ii) in a manner appropriate to attract those categories of investors, and
  - (b) that a person who falls within one of the intended categories of investors can, upon request to the manager of this fund, obtain information about the fund and acquire units in it.

- (4) Condition B is that neither—
- (a) the specification of the intended categories of investor, nor
  - (b) any other terms or conditions governing participation in the fund, whether or not specified in the fund documents, have a limiting or deterring effect.

- (5) In paragraph (4) a limiting or deterring effect means an effect which—
- (a) limits investors to a limited number of specific persons or specific groups of connected persons, or
  - (b) deters a reasonable investor within the intended categories of investor from investing in the fund.

- (6) Condition C is that—
- (a) units in the fund must be marketed and made available—
    - (i) sufficiently widely to reach the intended categories of investors, and
    - (ii) in a manner appropriate to attract those categories of investors; and
  - (b) a person who is in an intended category of investor can, upon request to the manager of the fund, obtain information about that fund and acquire units in it.

Condition C is subject to paragraph (7).

- (7) Condition C shall be treated as being met even if at the relevant time the fund has no capacity to receive additional investments, unless—
- (a) the capacity of the fund to receive investments in it is fixed by the fund documents (or otherwise), and
  - (b) a pre-determined number of specific persons or specific groups of connected persons make investments in the fund which collectively exhausts all, or substantially all, of that capacity.
- (5) A fund also meets the genuine diversity of ownership condition if—
- (a) an investor in the fund is an offshore fund, an open-ended investment company or an authorised unit trust scheme (“the feeder fund”),
  - (b) conditions A to C are met in relation to the fund after taking into account—
    - (i) the fund documents relating to the feeder fund, and
    - (ii) the intended investors in the feeder fund, and
  - (c) the fund and the feeder fund have the same manager (or proposed manager).
- (8) An authorised investment fund also meets the genuine diversity of ownership condition if—
- (a) an investor in the fund is a unit trust scheme, an offshore fund or another authorised investment fund (a “feeder fund”);
  - (b) conditions A to C are met in relation to the authorised investment fund after taking into account—
    - (i) the fund documents relating to the feeder fund, and
    - (ii) the intended investors in the feeder fund; and
  - (c) the authorised investment fund and the feeder fund have the same manager (or proposed manager).

## 50.14 Double charge relief

Para 8 sch 4 FA 2019 provides:

- (1) This paragraph applies where—
- (a) the resident party has paid a relevant tax by virtue of the application of paragraph 7,
  - (b) at any time, the resident party or another person pays—
    - (i) a further amount of the relevant tax, or
    - (ii) an amount of non-UK tax<sup>17</sup> corresponding to the relevant

---

<sup>17</sup> Defined by reference in para 11 sch 4 FA 2019: “non-UK tax” has the meaning given by section 187 of CTA 2010”. Section 187 provides:

- tax, and
- (c) the result is a double payment of tax calculated by reference to the same income or profits.
- (2) In order to avoid the double payment of tax, the resident party may make a claim in writing for one or more consequential adjustments to be made in respect of the tax paid mentioned in sub-paragraph (1)(a).
- (3) On a claim under this paragraph an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.
- (4) The amount of any consequential adjustments must not exceed the lesser of—
- (a) the tax paid by the resident party as mentioned in sub-paragraph (1)(a), and
  - (b) the tax paid as mentioned in sub-paragraph (1)(b).
- (5) Consequential adjustments may be made—
- (a) in respect of any tax period,
  - (b) by way of an assessment, the modification of an assessment, the amendment of a claim or otherwise, and
  - (c) despite any time limit imposed by or under any enactment.

### 50.15 Reimbursement relief

Para 9 sch 4 FA 2019 provides:

In calculating income, profits or losses for any tax purposes, no account is to be taken of any amount which is paid (directly or indirectly) by a person for the purposes of meeting or reimbursing the cost of tax charged on the resident party by virtue of the application of paragraph 7.

### 50.16 TAAR

Para 2(2) sch 4 FA 2019 provides:

---

“(1) In this Part “non-UK tax” means a tax chargeable under the law of a territory outside the UK which—

- (a) is charged on income and corresponds to UK income tax, or
  - (b) is charged on income or chargeable gains or both and corresponds to UK corporation tax.
- (2) A tax is not outside the scope of subsection (1) by reason only that it—
- (a) is chargeable under the law of a province, state or other part of a country, or
  - (b) is levied by or on behalf of a municipality or other local body.”

But arrangements are not “profit fragmentation arrangements” if...

- (b) it is not reasonable to conclude that the main purpose, or one of the main purposes, for which the arrangements were entered into was to obtain a tax advantage.

The double negative is non-standard wording, but I do not think that makes any difference.

Para 11 sch 4 FA 2019 sets out the GAAR definition of “tax advantage”.<sup>18</sup> Tax here means income tax and corporation tax.

### **50.17 PFA: EU law**

The PFA code is not EU-law compliant. Perhaps the drafter thought that no longer mattered. A case-law EU law defence must somehow be read it.

### **50.18 Partnerships**

Para 10 sch 4 FA 2019 provides:

- (1) This paragraph applies where a person is a member of a partnership.
- (2) Any references in this Schedule to the expenses, income, profits or losses of, or to the adjustment of the expenses, income, profits or losses of, the person includes a reference to the person’s share of the expenses, income, profits or losses of, or adjustment of the expenses, income, profits or losses of, the partnership.
- (3) For this purpose “the person’s share” of an amount is determined by apportioning the amount between the members of the partnership on a just and reasonable basis.

### **50.19 “Partnership”/”Trust”**

Para 11 sch 4 FA 2019 sets out foreign-entity definitions of partnership/partner/trust/beneficiary; but these definitions are otiose; see 86.1.1 (Foreign-entity definitions).

### **50.20 Other anti-avoidance rules: Interaction**

The INT Manual provides:

**INTM610020: Introduction: Who do these rules apply to? / How**

---

<sup>18</sup> See 2.12.1 (Tax advantage: Definitions).

**will these rules be used?** [May 2019]

The Profit Fragmentation legislation reinforces existing tax legislation. It will only apply after other existing provisions and only to the extent that the existing provisions have not fully counteracted any tax advantages arising from the arrangements. This means that if other tax legislation is being correctly applied such that the correct amount of UK tax is being paid by the resident party then the Profit Fragmentation legislation will not apply.

50.20.1 *PFA/transfer pricing/DPT*

The INT Manual provides:

**INTM610210: Profit Fragmentation Adjustments: Hierarchy of Legislation** [May 2019]**Example 21 – Other Legislation Applying First** [Transfer pricing]

A UK Company, the resident party, makes arrangements with a Bermudian company that meet all the conditions to be Profit Fragmentation Arrangements. The Bermudian company is owned by the same parent company as the UK Company.

The UK Company makes a cash payment of £100,000 to the Bermudian company, however, the services the Bermudian company actually provide to the UK Company are only worth £10,000, this is the price that would be paid between independent parties acting at arm's length. The company makes transfer pricing adjustments to reduce the deduction claimed to £10,000 meaning there is no tax advantage gained from the arrangements.

As the tax advantage has been fully counteracted by the transfer pricing adjustment it would not be just and reasonable to make further adjustments under the Profit Fragmentation legislation so no further adjustments should be made.

**Diverted Profits Tax**

DPT is a separate tax from income or corporation tax. If the Profit Fragmentation legislation leads to adjustments which bring any amount into charge, that amount will not be taxable diverted profits for the purposes of DPT. This is because S83(3), S84(2)(c), and S85(6)(b)(iii) FA 2015, remove any amount taken into account in an assessment to corporation tax from being considered diverted profits...

50.20.2 *PFA/s.720 interaction*

The INT Manual provides:

**INTM610250: Interaction with Other Legislation: Income Chargeable to S720 or S727 ITA 2007 [May 2019]**

The pages describe the interaction between the Profit Fragmentation legislation, and the Transfer of Assets Abroad (TOAA) legislation which can be found at Chapter 2 Part 13 of The Income Tax Act 2007 (ITA 2007).

This guidance considers how the Profit Fragmentation legislation will apply to adjustments that are within the scope of both Paragraph 7 of the Profit Fragmentation legislation and S720 or S727 ITA 2007 of the TOAA legislation. In these circumstances S720 or S727 ITA 2007 should take precedence over the Profit Fragmentation legislation for the reasons that follow.

Paragraph 7 of the Profit Fragmentation legislation sets out the adjustments required in relation to the Profit Fragmentation arrangements. These adjustments are to be made in order to counteract any tax advantages arising from the Profit Fragmentation arrangements that remain after the application of other provisions.

Where S720 or S727 ITA 2007 has charged tax on the income such that any tax advantages arising from the Profit Fragmentation arrangements have been fully counteracted the Profit Fragmentation legislation will not apply. This is because if the individual did have Profit Fragmentation Arrangements as per the definition in paragraph 2, and S720 or 727 ITA 2007 are applied then no later adjustments will be required under paragraph 7 of the Profit Fragmentation legislation as the tax advantage will be counteracted.

If the tax advantage is only partially counteracted by the application of S720 or S727 ITA 2007 then adjustments should be made under paragraph 7 of the Profit Fragmentation legislation to counteract any remaining tax advantage. This could apply in circumstances where a resident party has incurred an expense reducing their taxable profits as a result of a payment to the overseas party. Part of the corresponding receipt is considered income in the accounts of the overseas party and is chargeable to S720 or 727 ITA 2007 on a UK resident individual, but part is treated for example as capital in the overseas party's accounts – Profit Fragmentation would still apply to correct the remaining tax advantage.

If the arrangements include a settlor interested trust and income arises to the settlement S624 Income Tax (Trading and Other income) Act 2005 (ITTOIA) may apply to counteract any tax advantage that arises under the Profit Fragmentation rules in the same way as S720 or S727

ITA 2007.

If an arrangement is covered by the Finance Act 2018 changes, such that there is relevant foreign income, this income is potentially caught by s731 ITA 2007. For information regarding the interaction of s731 ITA 2007 and the Profit Fragmentation arrangements please see 7.1.2 below. For the purpose of these examples we refer solely to S720 ITA 2007, but if the capital sum conditions are in point this could be read as S727 ITA 2007, and the same conclusions would follow.

**Example A - An individual makes a provision to transfer value via a UK resident company to an overseas company owned by an overseas trust in which the individual is settlor and beneficiary.**

J, a UK resident and domiciled individual, owns all of the share capital in a UK resident company which makes a payment of £150,000 to an overseas company. The overseas company is owned by an overseas trust of which J is both the settlor and beneficiary. Following enquiries it transpires that the payment is made for services provided by the overseas company though the payments being made are inflated. The value of the services if they had been undertaken at arm's length are £100,000 not £150,000 though full amount of this receipt is treated as income in the overseas company's accounts. It is assumed for the purpose of this example that no other legislation applies.

The conditions for the application of TOAA are met and the profits of the overseas company will be assessable on J under S720 ITA 2007. The conditions to be Profit Fragmentation arrangements are also met. Assuming for the purpose of this example that the overseas company incurred no deductible expenditure the full amount of the £150,000 will be treated as income arising to J and they will be charged to tax on the full amount under S720 ITA 2007. This means that UK income tax has been paid on the full amount of the income and therefore there is no tax advantage as a result of the Profit Fragmentation arrangements.

**Example B - An individual makes a provision to transfer value to an overseas company for the benefit of a connected person in circumstances when the conditions for s720 ITA 2007 are met.**

A UK resident and domiciled individual (A) makes a payment of £150,000 to an overseas company which is owned by an overseas trust the settlor and beneficiary of which is another UK resident and domiciled individual (B). A and B are connected persons who pay income tax at the additional rate of income tax. The payment relates to services that are provided to him by the overseas company. The value that would have been transferred between independent parties acting at

arm's length is £100,000 not £150,000 though full amount of this receipt is treated as income in the overseas company's accounts.

The conditions to be Profit Fragmentation arrangements are met, as we assume for the purpose of this example are the conditions for S720 ITA 2007 to apply.

The full amount of the £150,000 will be charged treated as income arising to B and they will be charged to tax on the full amount. This means that UK tax has been paid on the full amount of the income and therefore there is no tax advantage as a result of the Profit Fragmentation arrangements.

**Example C- An individual makes a provision to transfer value directly to an overseas company owned by an overseas trust of which the individual is settlor and beneficiary.**

A UK resident and domiciled individual makes a payment of £150,000 for services provided to him by an overseas company which is owned by an overseas trust of which he is the settlor and beneficiary. The services are provided by the overseas company though the payments being made are inflated. The value that would have been transferred between independent parties acting at arm's length is £100,000 not £150,000 though the full amount of this receipt is treated as income in the overseas company's accounts.

The conditions to be Profit Fragmentation arrangements are met, as are the conditions for S720 ITA 2007 to apply.

Assuming for the purposes of this example that the overseas company incurred no expenditure in respect of the services provided the full amount of the £150,000 will be charged treated as arising to the UK resident individual under S720 ITA 07 and they will be charged to tax on the full amount. This means that UK tax has been paid on the full amount of the income and therefore there is no tax advantage as a result of the Profit Fragmentation arrangements.

**PFA**

Applies to business income  
Transfer of assets  
Individual transferor taxable  
Distributed income not taxed again  
Motive defence: avoidance

**ToA**

Applies to any income  
Value transferred  
No transferor needed; anyone taxable  
No rule; maybe HMRC discretion  
Motive defence: Tax advantage

50.20.3 *PFA/s.731 interaction*

The INT Manual provides:

**INTM610260: Interaction with Other Legislation: Income Chargeable to S731 ITA 2007 [May 2019]**

**Benefit Charge**

If Profit Fragmentation legislation is applicable to arrangements under which a benefit charge under S731 ITA 2007 is later raised no relief will be available to set against the amount paid under S731 ITA 2007 to take account of the tax paid under the Profit Fragmentation legislation.

There is no basis on which to give credit relief to the recipient of a benefit who is liable under S731 ITA 2007. Unlike the provisions of S720 and S727 ITA 2007, S731 does not deem particular income of the foreign person to be the income of the UK resident individual receiving the benefit but, rather, seeks to tax the value of a benefit actually received by him, and then only if and to the extent that it can be matched by relevant income.

The relevant income itself is not being taxed as income of the UK resident individual, but the value of the benefit is. In arriving at the net figure for relevant income, deduction is made for any taxes, whether UK or foreign, and any expenses properly incurred against that income under S733(1) ITA 2007. This can include payments made by the overseas person to the resident party to cover the tax liability arising as a result of the Profit Fragmentation legislation.

The double taxation relief available under paragraph 8 of the Profit Fragmentation legislation will not be available in these circumstances as the charge under S731 ITA 2007 is on the benefit that arises and not on income attributed to the UK resident individual.

**Example D-The application of the Profit Fragmentation rules when the benefit charge applies.**

An overseas trust was settled by P, a UK resident and UK domiciled individual for the benefit of his two adult children. P is excluded from benefiting from the trust. A UK resident company makes a payment of £150,000 to an overseas company which is owned by the overseas trust. Services are provided by the overseas company though the payments being made are inflated. The value that would have been transferred between independent parties acting at arm's length is £100,000 not £150,000. Though full amount of this receipt is treated as income in the overseas company's accounts.

The conditions to be Profit Fragmentation arrangements are met so the UK resident company makes an adjustment to reduce their expenses by £50,000 under paragraph 7 of the Profit Fragmentation legislation.

The full amount of the £50,000 will be taxable on the UK resident

company at 20% meaning the UK resident company pays £10,000 of tax. The overseas company makes a payment to the UK resident company for £10,000 to allow them to pay the tax due on the adjusted amount.

For the purposes of the transfer of assets legislation the remaining £140,000 will be relevant income under S733 ITA 07. For the purpose of this example it is assumed that there is no other relevant income in the structure. In the following tax year the overseas trustees make a capital distribution of £150,000 to one of P's children. The relevant income of £140,000 will be matched against the benefit under S733 ITA 07 resulting in a benefits charge on that individual under S731 ITA 2007 of £140,000 assessable on the UK resident individual in this later year.

#### 50.20.4 PFA/Protected trusts interaction

The INT Manual provides:

**INTM610260: Interaction with Other Legislation: Income Chargeable to S731 ITA 2007** [May 2019]

**Trust Protections**

The 'trust protections' are the changes made by Finance Act 2017 and Finance Act 2018 to remove what is referred to as protected foreign source income arising in overseas trusts settled by non-UK domiciled settlors from a charge under S624 Income Tax Trading and Other Income Act 2005 ("ITTOIA 05"), S720 ITA 2007 and S727 ITA 2007 and the protected foreign source income of any underlying companies. Such income is instead brought within the scope of S731 ITA 2007 or S643A ITTOIA 05 so that the settlor and close family members are assessed on the benefits they receive from the trust and its underlying entities to the extent that this can be matched with the protected foreign source income arising within the structure.

Protected foreign source income is defined at S628A ITTOIA 05, S721A and S729A ITA 2007. It is not affected by the Profit Fragmentation legislation for the reasons given below. This means that the trust protections will not be affected by the introduction of the Profit Fragmentation legislation.

Paragraph 2 of the Profit Fragmentation legislation requires that there exists a material provision that results in a transfer of value from the resident party to the overseas party. The value transferred will be a transfer of value generated directly or indirectly from the profits of a business chargeable to UK income tax or corporation tax in the tax year

or accounting period of the resident party.

Protected foreign source income (PFSI) as defined at S721A ITA 2007, is foreign source income. As PFSI cannot represent value which derives directly or indirectly from the profits of a business chargeable to UK income tax or corporation tax, paragraph 2(1)(b) of the Profit Fragmentation legislation will not apply.

PFSI cannot be income that the Profit Fragmentation legislation applies to, so there is no interaction between the Profit Fragmentation legislation and the TOAA legislation for this type of income.

A “transfer of value” for the purpose of paragraph 2 of the Profit Fragmentation legislation will not therefore include genuine protected foreign source income chargeable in the UK under S731 ITA 2007.

#### 50.20.5 PFA/Carried interest/DIM interaction

The INT Manual provides:

**INTM610270: Interaction with Other Legislation: Carried Interest and Disguised Investment Management Fees** [May 2019]

Remuneration for investment management services is typically divided between various parties to a fund arrangement. The fixed fee will show in the accounts of the investment management business as trading income, while the contingent fee element, typically referred to as carried interest, may be recognised in a special purpose vehicle and distributed. Where carried interest arises to individuals in respect of investment management services provided to a collective investment scheme, there are specific rules within Chapter 5, Part 4 of Taxation of Chargeable Gains Act 1992, that determine how this will be brought into account for tax purposes.

It is expected that the value of the remuneration paid for the investment management services will be an arm’s length value under a typical commercial arrangement. In circumstances where the contingent fee element of the remuneration includes ‘disguised investment management fees’, the existing legislation at Chapter 5E Part 13 ITA 07 applies in priority to the Profit Fragmentation rules and should result in the correct amount of UK tax being paid.

#### 50.21 NICs

The INT Manual provides:

**INTM610220: Profit Fragmentation Adjustments: NICs Consequences for Individuals** [May 2019]

Section 15 and Schedule 2 to the Social Security Contributions and Benefits Act 1992 and the Social Security Contributions and Benefits (Northern Ireland) Act 1992 mean that profits adjusted under this Schedule are chargeable to Class 4 NICs where those profits are not from a trade, profession or vocation carried on wholly outside the UK.

## 50.22 Commencement

Para 12 sch 4 FA 2019 provides:

This Schedule has effect—

- (a) for income tax purposes, in relation to any value transferred on or after 6 April 2019 as a result of a material provision, and
- (b) for corporation tax purposes, in relation to any value transferred on or after 1 April 2019 as a result of a material provision.

INTM provides:

### **INTM610030 Introduction: When Do These Rules Apply? [May 2019]**

#### **... Example 1 –No Residual UK Business**

... In 2016 Company A, a UK resident research and development company, (“A Ltd”) created a new type of high-tech micro-chip used in mobile phones. The technology was ahead of its time on creation and the company did not anticipate that it would need any technological maintenance for at least 4 years.

In 2018 the patent for the micro-chip was transferred to Company B (“B Ltd”). B Ltd is another group company, based in the British Virgin Islands (BVI), which holds all of the group’s patents and exploits them all over the world. This transfer took place on arm’s length terms: B Ltd paid a significant sum to A Ltd. in return for the patent

B Ltd. has a workforce based in the BVI responsible for exploiting the group’s patents to customers. During the accounting period ending 31 December 2019 B Ltd. generated income of \$1m from its customers relating to the patent.

The Profit Fragmentation legislation will not apply to the transfer of the patent in 2016 because the transfer took place in advance of the legislation applying. Furthermore, it will not apply to the income generated by B Ltd during the APE 31 December 2019 as this income is not properly attributable to the UK business.

#### **Example 2 – Basic Post-Commencement Transfer**

This example shows when the Profit Fragmentation legislation will apply to certain transfers occurring after 1 April 2019 (or 6 April 2019

for income tax purposes) in relation to transfers that have taken place before that date.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

The facts for this example are the same as those as set out in Example 1, but we are now considering the accounting period ended 31 December 2020.

In January 2020 it becomes apparent that the micro-chips will need updating to ensure the technology remains current. B Ltd. does not have the necessary expertise to update them, so A Ltd. updates the technology for B Ltd. but does not receive any remuneration for doing this. The service of updating the technology by A Ltd without receiving any remuneration results in a transfer of value to B Ltd.

The Profit Fragmentation legislation could apply to this transfer of value at the time this occurs (in this example this is during the accounting period ended 31 December 2020) provided the arrangements are Profit Fragmentation Arrangements and the exception conditions don't apply.

### **50.23 PFA impact**

PFA condoc provides:

This measure is expected to increase receipts by approximately up to £50 million per annum. The final costing will be subject to scrutiny by the Office for Budget Responsibility.

This measure has no impact on compliant<sup>19</sup> businesses.

It is likely to affect a small number of non-compliant businesses, estimated to be in the region of 4-5,000, which are currently involved in tax avoidance arrangements.

5,000 businesses, with a yield of £50m, suggests an average yield of £10k per business. That seems implausible, as one would not set up the arrangements at which PFA is targeted to gain an advantage of that amount. Perhaps the figure is not intended to be taken seriously.

Of course, if HMRC enforced the existing law, the yield should be nil.<sup>20</sup>

---

19 For this tendentious use of the word “compliant” see App 1.3 (“Compliant”).

20 See 50.2 (The target).

## CHAPTER FIFTY ONE

# TRANSFER OF INCOME STREAMS

51.1

### 51.1 Transfer of income streams

#### 51.1.1 *Income-stream codes: Navigation*

This chapter considers the following topics:

<b>Topic (my terminology)</b>	<b>Legislation</b>	<b>Sections</b>
<i>Income Tax/CGT</i>	<i>Part 13 ITA</i>	
Main income-stream code	Chap 5A	809AZA-809AZG
Partnership income-stream code	Chapter 5AA	809AAZA-809AAZB
Asset disposed via partnership	Chapter 5D	809DZA-809DZB
<i>CT income-stream code</i>	<i>CTA</i>	
Company transferors	Chap 1 Part 6 CTA 2010	
Company transferees	Chap 2B Part 6 CTA 2009	

The background to the main income-stream code can be found in:

- HMRC, “Financial Products Avoidance: Consultation on Principles- Based Legislation” 2007
- HMRC, “Principles-based drafting: Transfers of Income Streams” 2009

I would focus on the themes of this book, but it is necessary to consider the provisions as a whole.

#### 51.1.2 *Section numbering system*

The ITA system of numbering sections is idiosyncratic. Section numbering begins with 809, followed by the Chapter letters, ie one of 809A/809AA/809D. The sections are then numbered ZA, ZB, etc. Hence:

- the 1<sup>st</sup> section of Chapter 5A is s.809AZA and the last is s.809AZG
- the 1<sup>st</sup> section of Chapter 5AA is s.809AAZA and the last is s.809AAZB

This is due to a misguided application of OPC drafting guidelines; see App.11.3 (Section numbering system).

## 51.2 Is income transferable?

It is helpful first to consider the position in the absence of the income-streams code or similar legislation.

### 51.2.1 *Income effectively transferable*

As a matter of property law, it is possible for a person:

- (1) to transfer a right to a receipt which would constitute income (eg dividends/interest/royalties) if received by the transferor
- (2) to do so without a transfer of the underlying asset (eg the shares/debt/copyright)

As a matter of tax law, the consideration for the transfer would in principle be capital and not income.<sup>1</sup>

It may be helpful to coin a term for discussion here, and one may say that X “**tax-effectively transfers**” income if the transfer is effective for tax purposes as well as for property law purposes, and the consideration for the transfer is capital. It may loosely (and pejoratively) be said that the transfer turns income into capital; but more accurately, it replaces what would have been an income receipt with a different receipt which is capital.

### 51.2.2 *Pre-2009 anti-avoidance rules*

That allowed scope for tax planning.<sup>2</sup> This was countered by ad hoc anti-avoidance provisions, such as:

#### **ICTA 1988 Topic**

s.730	Transfer of right to dividends
s.775A	Transfer of right to Annual Payments
s.785A	Transfer of chattel lease rentals

---

1 But see below in the case of trading income.

2 Of course the position of the transferee needed consideration, but I need not pursue that here.

These provisions were repealed on the introduction of the income stream code in 2009.

### 51.2.3 *Earned income not transferrable*

On the other hand, certain types of income are not tax-effectively transferable:

- (1) Employment income is not tax-effectively transferable: ie if an employee assigns a right to earnings, the employee remains taxable, not the assignee.<sup>3</sup>
- (2) Trading income is not in general tax-effectively transferable: ie if a trader sells a right to a trading receipt, the sale proceeds constitute a trading receipt, so the sale does not turn income into capital.<sup>4</sup> The disguised trading receipt rules need consideration; and the rules for appropriation from trading stock may also apply here.
- (3) Some cases support the view that partnership income is not tax-effectively transferable, ie if a partner assigns a partnership share to a non-partner, the partner remains taxable on the partnership profits. This applies where the partnership has no capital assets, and the income arises from the personal services of the partner.<sup>5</sup>

---

3 *RFC 2012 Plc (in liquidation) (formerly Rangers Football Club) v AG for Scotland* [2017] UKSC 45.

It is possible for X to cease to be an employee and Y to become an employee, but short of that, which one might say involves a transfer of the underlying asset, employment income is not effectively transferable.

4 Even consideration for an outright sale of royalties by an author carrying on a trade or profession is a receipt of the trade/profession.

Trading income of X is effectively transferable if:

- (1) X ceases to trade and Y commences to trade, or
- (2) X and Y commence to trade in partnership.

But that involves a transfer of the underlying asset (the trading business).

5 Income is effectively transferable if:

- (1) X ceases to be a partner, and Y becomes a partner.
- (2) Existing partners alter their income shares under the partnership agreement.

But that involves a transfer of the underlying asset (the partnership share).

Whether the income is transferable by an assignment of a partnership share to a non-partner is open to doubt. In a New Zealand case, a partner in a firm of accountants assigned a part of his partnership share to a non-partner. It was said that his partnership income arose from his personal services, not from the partnership agreement. In these circumstances the assignment was held to be ineffective, in the

These rules are not affected by the income-stream code, because that code only applies if there would (but for the code) be a tax effective transfer, ie:

- (1) There is an effective transfer of income (a “relevant receipt”)<sup>6</sup>
- (2) The consideration would not be subject to income tax<sup>7</sup>

In short, we are here considering transfers of an *investment* income stream.

### 51.3 Application of IS code

EN FB 2009 referred to the pre-2009 anti-avoidance rules and continued:

48. These statutory rules are not comprehensive. There are also differences and inconsistencies in the way the various provisions work, and ... they have been the subject of attempts to avoid their operation.

49. The new legislation sets out a general principle that a lump sum received for the sale or transfer of income stream is subject to tax in the transferor’s hands in the same way that the income itself would have been (so there is no possibility of converting income into capital). The rule is subject to a number of exceptions.

Section 809AZA(1) ITA provides:

This Chapter [Chap 5A, Income-streams code] applies where-

- (a) a person within the charge to income tax (“the transferor”) makes a transfer to another person (“the transferee”) of a right to relevant receipts (see subsection (2)), and
- (b) (subject to subsection (3)) the transfer of the right is not a consequence of the transfer to the transferee of an asset from which the right to relevant receipts arises.

I deal with these two conditions separately.

### 51.4 Relevant receipts

---

sense that the income of the assigned share remained the income of the transferor for tax purposes: *Hadlee v CIR* [1993] AC 524, approved in the *Rangers* case. This is surprising: the reader may doubt whether the same answer would have been reached had *Hadlee* not been a tax avoidance case. Under our system of precedent, that case will no doubt be followed, at least by the lower courts. However this rule only applies in the case of a partnership whose income is derived from “personal services or exertions” of the assignor.

<sup>6</sup> See 51.4 (Relevant receipts).

<sup>7</sup> See 51.7.1 (Amount otherwise taxed).

Section 809AZA ITA provides:

- (1) This Chapter [Chap 5A, Main income-stream code] applies where-
- (a) a person within the charge to income tax (“the transferor”) makes a transfer to another person (“the transferee”) of a right to relevant receipts

Section 809AZA(2) ITA provides:

- “Relevant receipts” means any income-
- (a) which (but for the transfer) would be charged to income tax as income of the transferor, or
  - (b) which (but for the transfer) would be brought into account in calculating profits of the transferor for the purposes of income tax.

Relevant receipts is not a transparent term: I gloss it as relevant (income) receipts.

The CFM provides

**CFM77050 Transfer Under Sale And Repurchase Agreement** [Nov 2019]

**Example 2** (Urban& Rural)

U Ltd sells securities to R plc under a sale and repurchase (or ‘repo’) agreement. Under the terms of the repo R will compensate U for not receiving the real income by the making of manufactured payments (CFM46010).

The manufactured payments represent consideration for the right to the income that U transfers as a result of the repo.

However, the income payments that are transferred are not relevant receipts. This is because relevant receipts are defined to be amounts that but for the transfer would be charged as income of the transferor. The transfer must therefore have the effect of causing the receipts not to be taxable income of the transferor. Where a sale is made under a standard repo this is not the case since the income is still treated as that of the seller - CTA09/S550. Accordingly, the transfers of income legislation will not apply.

## 51.5 Transfer of income, not asset

Section 809AZA ITA provides:

- (1) This Chapter applies where ...

- (b) (subject to subsection (3))<sup>8</sup> the transfer of the right is not a consequence of the transfer to the transferee of an asset from which the right to relevant [income] receipts arises.

The legislation distinguishes:

- (1) A right to relevant (income) receipts
- (2) An asset from which the right to relevant receipts arises

This is a subtle distinction.

It is considered that a usufruct is an asset from which the right to relevant receipts arises, so the grant of a usufruct is not caught by the Main income-stream code.

The CFM gives two straightforward examples: (1) sale of a business (not caught); (2) sale of a right to licence fees (caught).

### **CFM77030 Company Transferors [Nov 2019]**

#### **Example 1**

A Ltd sells a picture-framing business to B. This includes assigning the lease for the premises and the sale of equipment and stock and the transfer of a number of income-producing assets.

Although, there has, in a sense, been a transfer of an income stream from A Ltd to B (that is, the trading income), the transfer of income streams provisions will not apply. The underlying income-producing assets have been sold.

#### **Example 2**

C Ltd has a software development and consultancy business. In the course of the trade, the company develops a computer program in which there is commercial interest. C Ltd sets up a subsidiary company, D Ltd, to exploit and market the software.

C Ltd enters into a licensing agreement granting D Ltd a 25-year licence on the source code and intellectual property rights in the software, in exchange for a licence fee paid quarterly. The agreement does not require C Ltd to further develop or maintain the software, or supply technical advice to users - this is all done by D Ltd.

The licence fees are agreed to form part of C Ltd's trading income, and are reflected in the amount it returns as trading profits.

C Ltd sells the right to the quarterly licence fees paid by D Ltd to an unconnected company, E Ltd.

---

<sup>8</sup> See 51.5.1 (Annual Payments).

Depending on the facts of the case, the sale proceeds may be treated as trading income on first principles. However, if they are not, then this is a sale of a right to relevant receipts without the transfer of the underlying asset and C Ltd should include the payment for the right to the income as trading income by virtue of S753(1).

### 51.5.1 *Annual Payments*

Section 809AZA(3) ITA provides:

Despite paragraph (b) of subsection (1), this Chapter [Chap 5A, Main income-stream code] applies if the transfer of the right is a consequence of the transfer to the transferee of all rights under an agreement for annual payments ...

See 30.1 (“Annual Payment”).

The CFM provides

**CFM77040 Rights Under Agreement For Annual Payment** [Nov 2019]

CTA10/S752(3) contains an exception to the requirement that the underlying asset is not transferred.

The CFM explains why:

If the asset consists of all the rights under an agreement for annual payments then such an agreement is indistinguishable from a right to relevant receipts. So it is appropriate to treat the outright transfer of the agreement in the same way as a transfer of the right to relevant receipts. The transfer of all rights under an agreement for annual payments was previously taxed as income under ICTA88/S775A, which is repealed at FA09/SCH25/PARA9(1)(b).

The reader may doubt whether this policy argument is correct. The approach under the pre-2009 rules does not count for much, as the object of the income-stream code was said to be to rationalise inconsistent rules. But there it is. The point will not often arise.

This rule applies only where the income that is transferred constitutes annual payments in the hands of the transferor. Where the transferor carries on a trade and the income stream would not have been pure income profit in his hands, S752(3) does not apply.

**Example**

Example 2 at CFM77030 describes the transfer of the right to licence

fees from the holder of the licence, C Ltd, a trading company, to an unconnected company, E Ltd.

If E Ltd does not carry on a trade then the fees are annual payments in its hands; they represent pure income profit.<sup>9</sup>

If E Ltd then transfers the right to these annual payment to a third company, G Ltd, this may be the transfer of all rights under an agreement for annual payments.

S752(3) makes it clear that, despite the fact that the underlying asset consists of all rights under an agreement for annual payments and this is what E Ltd transfers to G Ltd, the provisions of S753 apply.

### 51.5.2 *Sale & repurchase agreement*

Section 809AZA ITA provides:

(3) ... for the purposes of that paragraph [s.809AZA(1)(b)<sup>10</sup>] the transfer of an asset under a sale and repurchase agreement is not to be regarded as a transfer of the asset.

The CFM provides

#### **CFM77050 Transfer Under Sale And Repurchase Agreement** [Nov 2019]

CTA10/S752(3) ensures that where a transfer of an asset is made under an agreement that provides for its repurchase, then for the purposes of S752(1) the asset is to be treated as not having been transferred.

The legislation contains no definition of sale and repurchase agreement. HMRC considers that the expression covers not just agreements where there is a binding obligation to repurchase but to agreements that have the same practical effect (such as linked put and call options where it will always be a benefit for one party to exercise their option).

I think the last sentence is doubtful.

It covers sale and repurchase of securities, but goes far wider.

#### **Example 1**

Town Ltd enters into a sale and repurchase agreement with Country Ltd under which an income generating asset is sold and repurchased. The income stream is retained by Country Ltd (and the consideration

---

9 Whether or not the payments are Annual Payments is a complex issue, which depends on facts not supplied in the example; see 30.3.2 (Pure income profit).

10 See 51.5 (Transfer of income, not asset).

received by Town Ltd reflects that fact). Although the underlying asset is ‘transferred’, Town Ltd knows at all times that it will get it back and the effect of S752(3) is that the asset is treated as not having been transferred. So Town Ltd will be chargeable under S753 on the ‘relevant amount’ (see CFM77060).

## **51.6 Charge on income-stream value**

Section 809AZB(1) ITA provides:

The relevant amount (see subsection (2)) is to be treated as income of the transferor chargeable to income tax in the same way and to the same extent as that in which the relevant [income] receipts-

- (a) would have been chargeable to income tax, or
  - (b) would have been brought into account in calculating any profits for the purposes of income tax,
- but for the transfer of the right to relevant [income] receipts.

There is no purpose or motive defence.

### *51.6.1 Relevant amount*

Section 809AZB(2) ITA provides:

The relevant amount is-

- (a) (except where paragraph (b) applies) the amount of the consideration for the transfer of the right, or
- (b) where the amount of any such consideration is substantially less than the market value of the right at the time when the transfer takes place (or where there is no consideration for the transfer of the right), the market value of the right at that time.

Relevant amount is not a transparent term. I gloss it as relevant amount (consideration).

### *51.6.2 Time income arises*

Section 809AZB(3) ITA provides:

The income under subsection (1) is to be treated as arising in the chargeable period of the transferor in which the transfer takes place.

This differs from corporation tax where the default rule is that the income is to be allocated in accordance with accountancy practice.

The accountancy approach applies to trading/property income. Section

809AZB ITA provides:

- (4) But subsection (5) applies if (apart from the transfer) any of the relevant [income] receipts-
- (a) would have been brought into account in accordance with Part 2 or 3 of ITTOIA 2005 (trading income and property income) in calculating any profits for the purposes of income tax, and
  - (b) in accordance with generally accepted accounting practice, would have been recognised otherwise than wholly in the chargeable period in which the transfer takes place.
- (5) If this subsection applies, the income under subsection (1) is to be treated as arising-
- (a) to the extent that it does not exceed the amount of the consideration for the transfer of the right, in the chargeable period or periods for which, in accordance with generally accepted accounting practice, the consideration for the transfer is recognised for accounting purposes in a profit and loss account or income statement of the transferor, and
  - (b) otherwise, in the chargeable period or periods for which, in accordance with generally accepted accounting practice, the consideration for the transfer would be so recognised if it were of an amount equal to the market value of the right at the time when the transfer takes place.
- (6) But if in a case where the transferor is a company it at any time becomes reasonable to assume that the income (to any extent) is not, or would not be, treated by subsection (5) as arising in an accounting period of the transferor, the income is to that extent to be treated as arising immediately before that time.

## **51.7 Exceptions to charge**

### *51.7.1 Amount otherwise taxed*

Section 809AZC ITA provides:

This Chapter [Chap 5A, Main income-stream code] does not apply if and to the extent that the income under section 809AZB(1) is (apart from this Chapter)-

- (a) charged to tax as income of the transferor,
- (b) brought into account in calculating the profits of the transferor,
- or
- (c) brought into account under CAA 2001.

The wording follows the definition of relevant receipt.<sup>11</sup>

#### 51.7.2 *Pension/life annuity*

Section 809AZD provides:

This Chapter [Chap 5A, Main income-stream code] does not apply to a transfer of a right to-

- (a) annual payments under a life annuity as defined in section 473(2) of ITTOIA 2005, or
- (b) annual payments under an annuity which is pension income within the meaning of Part 9 of ITEPA 2003 (see section 566(2) of that Act).

#### 51.7.3 *Transfer by way of security*

Section 809AZE ITA provides:

(1) This Chapter [Chap 5A, Main income-stream code] does not apply if-

- (a) the consideration for the transfer is the advance under a type 1 finance arrangement, and
- (b) the transferor is, or is a member of a partnership which is, the borrower in relation to the arrangement.

(2) This Chapter does not apply if-

- (a) the consideration for the transfer is the advance under a type 2 finance arrangement or a type 3 finance arrangement, and
- (b) the transferor is a member of the partnership which receives that advance under the arrangement.

(3) In this section-

- “type 1 finance arrangement” has the meaning given for the purposes of Chapter 5B by section 809BZA,
- “type 2 finance arrangement” has the meaning given for the purposes of Chapter 5B by section 809BZF, and
- “type 3 finance arrangement” has the meaning given for the purposes of Chapter 5B by section 809BZJ.

#### 51.7.4 *Leases*

Section 809AZG(1) ITA provides:

---

<sup>11</sup> See 51.4 (Relevant receipts).

For the purposes of this Chapter [Chap 5A, Main income-stream code]—

- (a) the grant or surrender of a lease of land is to be regarded as a transfer of the land, and
- (b) the disposal of an interest in an oil licence (within the meaning of section 809 of CTA 2009) is to be regarded as a transfer of the oil licence.

The CFM provides a straightforward example:

**CFM77110 Transfers Of Certain Interests In Assets Regarded As Transfers Of Underlying Asset** [Nov 2019]

Example

Q Ltd is the tenant of property and the freehold is held by R Ltd. R grants a lease of the property to S Ltd, still subject to the sublease with Q Ltd. In this way R Ltd has transferred an income stream - the rentals from the sublease - to S Ltd.

S757(1)(a) puts it beyond doubt that this is treated as a transfer of the asset from which the rental income from the sublease stems, so that the provisions of S753 do not therefore apply.

51.7.5 *Other exceptions*

Section 809AZG(2) ITA provides:

The Treasury may by order make other provision for securing that other transactions are to be regarded as transfers of assets for those purposes.

No order has been made.

**51.8 “Transfer”**

Section 809AZG ITA provides:

- (3) In this Chapter [Chap 5A, Main income-stream code]—
  - (a) references to a transfer include
    - [i] sale, exchange, gift and assignment (or assignation) and
    - [ii] any other arrangement which equates in substance to a transfer, and

It is difficult to see the point of para [i], but it does no harm.

- (b) references to a transfer taking place are, in the case of an arrangement other than a sale, exchange, gift or assignment (or

assignment), to the making of the arrangement.

I would have thought that was self-evident, but it does no harm.

A waiver of income (eg waiver of a dividend) is not a transfer, or equivalent to a transfer, so is not caught by the income-stream code.

#### 51.8.1 *Transfer to partnership/trust*

Section 809AZG(4) ITA provides:

- [a] A transfer to or by any partnership of which the transferor or transferee is a member, and
  - [b] a transfer to the trustees of any trust of which the transferor is a beneficiary,
- counts as a transfer in relation to which this Chapter [Chap 5A, Main income-stream code] applies.

A gratuitous transfer to a trust of which the transferor is a beneficiary would normally be caught by s.624 (settlor-interested trust code). This provision might apply to a transfer for full consideration.

### 51.9 Position of transferee

Where the transferee is a company it is taxable only on its accounting profit from acquiring the income stream. This will generally be the difference between the cost of the income stream and the amount of income it actually receives. However, there is no similar relief or special treatment for a non-corporate transferee. The double taxation is presumably deliberate.

The reader may think that “Principles-based” drafting is somewhat selective in its choice of principles.<sup>12</sup>

### 51.10 Income streams: Trusts

SAIM provides:

**SAIM11040 Non-Corporate Transferors: Trust Issues** [Dec 2019]

The transfers of income streams legislation applies only where the income which is transferred ceases to be taxable income of the transferor. The creation of an interest in possession by the trustees of a discretionary trust does not prevent the income being income of the

---

12 See **App 1.5** (Principles-based drafting).

trustees for the purposes of income tax.

The creation of an interest in possession - typically by deed of appointment - is not a transfer but it might, conceivably, be an arrangement which is in substance a transfer. Once one abandons legal concepts and looks for substance, anything becomes possible.<sup>13</sup>

Similarly, a transfer by trustees of an existing interest in possession from one life tenant to another (?) does not prevent the income from being income of the trustees for income tax purposes. In both these cases the trustees remain taxable up to the basic rate as being in receipt of the income of the interest in possession part of the trust. This means that the transfers of income streams legislation will not apply to these transfers of income by trustees of a trust.

If the beneficiary of a discretionary trust or an interest in possession trust sells their interest, they are transferring the asset from which the right to income arises. The underlying asset from which the right to relevant receipts arises is the interest in possession. Because the transfer of the income is the consequence of the transfer of an asset the transfers of income streams provisions will not apply.

A discretionary beneficiary has no right to income, only a hope. Although he or she may be able to sell that interest to someone else (?) there is no transfer of a right to income. Even if there were such a transfer then the same reasoning as above would lead to the conclusion that the transfer is the consequence of the transfer of an asset from which the right arises.

Where income to which a beneficiary is already beneficially entitled is mandated to him by the trustees then there is no transfer of a right since the beneficiary's right to the income already exists. Again the transfers of income streams legislation will not apply.

The author in this passage was not familiar with trust law or terminology. But clearly the code is not aimed at exercises of a power of appointment, and HMRC do not intend to apply it there.

The CFM provides:

**CFM77030 Company Transferors** [Nov 2019]

... The transfer of income must be the consequence of the transfer of a right, and not simply an application of the transferor's income. So the

---

13 See **App 6.4** (Real nature of transaction).

legislation will not apply where, for example, trustees of a trust distribute trust income or apply trust income for the benefit of a beneficiary where the trustees remain liable to tax in respect of the income. ...

### **51.11 Territorial limitation**

Section 809AZA ITA provides:

- (1) This Chapter [Chap 5A, Main income-stream code] applies where-
- (a) a person within the charge to income tax (“the transferor”) makes a transfer

The transferor must be “within the charge to income tax”.

A non-resident transferring a foreign income stream is not caught because:

- (1) It is not “within the charge to IT”.
- (2) The foreign income stream would not be charged to income tax as income

The same applies to a transfer during the overseas part of a split year.

The temporary non-residence rules do not apply.

A remittance basis taxpayer is within the charge to IT. The remittance basis applies, on the basis that the charge applies in the same way, and to the same extent, as the charge on relevant (income) receipts.<sup>14</sup>

### **51.12 Partnership income stream/asset**

Section 809AZF(1) ITA provides:

For the purposes of this Chapter [Chap 5A, Main income-stream code] a transfer of a right to relevant receipts consisting of the reduction in a transferor’s share in the profits or losses of a partnership is to be regarded as a consequence of a transfer of an asset from which the right arose (that is, the partnership property)

The result is (in short) to take partnerships outside the main income-stream code. Instead there is now a separate code.

The background can be found in consultation and response papers:<sup>15</sup>

---

14 See 51.6 (Charge on income-stream value).

15 <https://www.gov.uk/government/consultations/a-review-of-two-aspects-of-the-tax-rules-on-partnerships>

- Partnerships: A review of two aspects of the tax rules (May 2013)
- Partnerships: A review of two aspects of the tax rules: Summary of Responses (Dec 2013)

These are now of historical interest only.

HMRC say:

The legislation is designed to counter ‘tax attribute’ schemes involving the transfer of assets and income streams through or by partnerships. These schemes do not rely necessarily on the partnership comprising mixed membership [ie both a company and individuals], although mixed membership partnerships are within the scope of the rules. The transferor and transferee members may have different tax attributes if, for example:

- the transferee is a company and the transferor is an individual
- the transferee has losses to use whereas the transferor does not
- the transferee and transferor are subject to different rate of tax
- transferor and transferee are subject to differing tax computational rules in relation to the asset or income

Where there is a disposal of an asset or income stream through or by a partnership and a main purpose is to secure an Income Tax or Corporation Tax advantage, the rules will impose a charge to tax on income on the person making the disposal.<sup>16</sup>

It may be helpful to read the two Chapters on partnerships(5AA/5D) side by side.

In this area advisors would also need to consider the settlor-interested trust code, see 94.21 (Partnership-settlement); and the mixed partnership rules: see 83.2 (Partnership income: Attribution).

### **51.13 Application conditions**

**s. 809AAZA(1) ITA**

**s.809DZA ITA**

---

<sup>16</sup> <https://www.gov.uk/government/publications/mixed-membership-partnership-aifm-s-and-asset-disposal-rules-legislation-day-technical-note-and-guidance/partnerships-a-review-of-two-aspects-of-the-tax-rules#assets-income-streams>

This Chapter [Chapter 5AA, partnership income streams] applies (subject to subsection (2)) if

(1) This Chapter [Chapter 5D, Asset disposed via partnership] applies if conditions A and B are met.

directly or indirectly in consequence of, or otherwise in connection with, arrangements<sup>17</sup> involving a person within the charge to income tax (“the transferor”) and another person (“the transferee”)—

(2) Condition A is (subject to subsection (3)) that directly or indirectly in consequence of, or otherwise in connection with, arrangements involving a person within the charge to income tax (“the transferor”) and another person (“the transferee”)—

(a) there is, or is in substance, a disposal of a right to relevant receipts<sup>18</sup> by the transferor to the transferee,

(a) there is, or is in substance, a disposal of an asset (“the transferred asset”) by the transferor to the transferee,

(b) the disposal is effected (wholly or partly) by or through a partnership<sup>19</sup> (“the relevant partnership”),

(b) [identical]

17 Section 809AAZA(8)/809DZA(13) provide the standard (unnecessary) IT definition of “arrangements”; see App 2.2.3 (Definitions of “arrangement”).

18 Section 809AAZA(8) provides: “In this Chapter [Chapter 5AA, Partnership income-stream code]—

“relevant receipts” means any income—

(a) which (but for the disposal) would be charged to income tax as income of the transferor (whether directly or as a member of a partnership), or

(b) which (but for the disposal) would be brought into account as income in calculating profits of the transferor (whether directly or as a member of a partnership) for income tax purposes”.

This is based on the Chapter 5A definition; see 51.4 (Relevant receipts).

19 Section 809AAZA(8)/809DZA(13) provide: “partnership” includes a limited liability partnership whether or not section 863(1) of ITTOIA 2005 applies in relation to it.

- (c) at any time— (c) [identical]
  - (i) the transferor is a member of the relevant partnership or of a partnership associated with the relevant partnership, and
  - (ii) the transferee is a member of the relevant partnership or of a partnership associated with the relevant partnership, and
  
- (d) the main purpose, or one of the main purposes, of one or more steps taken in effecting the disposal is the obtaining of a tax advantage<sup>20</sup> for any person. (d) [identical]

51.13.1 *Chap 5D: Condit<sup>n</sup> B: Taxability*

Section 809DZA(9) ITA provides:

Condition B is that it is reasonable to assume that, had the transferred asset instead been disposed of directly by the transferor to the transferee, the relevant amount [consideration] (or any part of it)—

- (a) would have been chargeable to income tax as income of the transferor, or
- (b) would have been brought into account as income in calculating profits of the transferor for income tax purposes.

There is no equivalent for Chapter 5AA (partnership income-stream code).

51.13.2 *Family partnership exemption*

**s.809AAZA(2) ITA**

This Chapter [Chapter 5AA, Partnership income-stream code] does not apply if—

**s.809DZA(3)**

Condition A is not met if—

---

20 Section 809AAZA(8)/809DZA(13) provide:

“tax advantage” means a tax advantage, as defined in section 1139 of CTA 2010, in relation to income tax or the charge to corporation tax on income.

See 2.12.1 (Tax advantage: Definitions).

- (a) the transferor is the spouse or civil partner of the transferee and they are living together,<sup>21</sup> or
- (b) the transferor is a brother, sister, ancestor or lineal descendant of the transferee.

[identical]

Tax planning through close-family partnerships is unobjectionable.

51.13.3 *Disposal*

**s.809AAZA ITA**

(3) In subsection (1)(a) the reference to a disposal of a right to relevant receipts includes anything constituting a disposal of such a right for the purposes of TCGA 1992.

(4) For the purposes of subsection (1)(b) the disposal might, in particular, be effected by an acquisition or disposal of, or an increase or decrease in, an interest in the relevant partnership (including a share of the profits or assets of the relevant partnership or an interest in such a share).

**s.809DZA ITA**

(4) In subsection (2)(a) the reference to a disposal of an asset includes anything constituting a disposal of an asset for the purposes of TCGA 1992.

(5) For the purposes of subsection (2)(b)

[identical]

51.13.4 *Associated partnership*

**s.809AAZA ITA**

(5) For the purposes of subsection (1)(c)

**s.809DZA ITA**

(6) For the purposes of subsection (2)(c)

---

21 See App 3.4.3 (Living together: married couple).

it does not matter if the transferor and the transferee are not members of a partnership as mentioned at the same time. [identical]

(6) For the purposes of subsection (1)(c)

(7) For the purposes of subsection (2)(c)

a partnership is “associated” with the relevant partnership if—  
 (a) it is a member of the relevant partnership, or  
 (b) it is a member of a partnership which is associated with the relevant partnership (whether by virtue of paragraph (a) or this paragraph).

[identical]

#### 51.13.5 *Transferor/transferee*

##### **s.809AAZA ITA**

(7) In subsections (1)(c) and (5)

references to the transferor include a person connected with the transferor and references to the transferee include a person connected with the transferee.

##### **s.809DZA ITA**

[Identical]

#### **51.14 Charge on partnership transfer**

##### **s.809AAZB ITA**

(1) The relevant amount [consideration] is to be treated as income of the transferor chargeable to income tax in the same way and to the same extent as that in which the relevant receipts—

##### **s.809DZB**

(1) The relevant amount [consideration] is to be treated as income of the transferor chargeable to income tax in the same way and to the same extent as that in which it—

(a) would have been chargeable to income tax as income of the transferor, or

(b) would have been brought into account as income in calculating profits of the transferor for income tax purposes,

but for the disposal.

(a) would have been chargeable to income tax as income of the transferor, or

(b) would have been brought into account as income in calculating profits of the transferor for income tax purposes,

as mentioned in section 809DZA(9).<sup>22</sup>

In the case of Chapter 5DD, one might have expected a CGT charge, as it is CGT which is avoided.

#### 51.14.1 *Relevant amount: Chap 5AA*

Section 809AAZB ITA provides:

(2) In subsection (1)

[a] “the relevant amount” is to be read in accordance with section 809AZB(2)<sup>23</sup> and

[b] section 809AZB(3) to (6) applies for the purpose of determining when income under subsection (1) is treated as arising.<sup>24</sup>

(3) For this purpose, in section 809AZB(2) to (6) references to the transfer of the right are to be read as references to the disposal of the right.

Section 809DZB(2) ITA provides:

Section 809AZB(3) to (6) applies for the purpose of determining when income under subsection (1) is treated as arising (reading references to the transfer of the right as references to the disposal of the transferred asset).

#### 51.14.2 *Relevant amount: Chap 5D*

Section 809DZB provides:

---

22 See 51.13.1 (Chap 5D: Condit<sup>n</sup> B: Taxability).

23 See 51.6.1 (Relevant amount).

24 See 51.6.2 (Time income arises).

(10) In this Chapter [Chapter 5D, Asset disposed via partnership] “the relevant amount” means the amount of the consideration received by the transferor for the disposal.

(11) If the transferor receives—

- (a) no consideration for the disposal, or
- (b) consideration which is substantially less than the market value of the transferred asset,

assume for the purposes of subsection (10) that the transferor receives consideration of an amount equal to the market value of the transferred asset.

(12) In subsection (11) references to the market value of the transferred asset are to that value at the time of the disposal.

### 51.15 Chap 5AA/5D interaction

#### s.809AAZB

(4) If, apart from this subsection and section 809DZB(3)—

(a) both this Chapter [Chapter 5AA, Partnership income-stream code] and Chapter 5D [Asset disposed via partnership] would apply in relation to the disposal, and

(b) Chapter 5D [Asset disposed via partnership] would give a greater amount of income of the transferor chargeable to income tax,

this Chapter [Chapter 5AA] is not to apply in relation to the disposal.

#### s.809DZB

(3) If, apart from this subsection and section 809AAZB(4)—

(a) both this Chapter [Chapter 5D, Asset disposed via partnership] and Chapter 5AA [Partnership income-stream code] would apply in relation to the disposal, and

(b) Chapter 5AA [Partnership income-stream code] would give the same amount, or a greater amount, of income of the transferor chargeable to income tax,

this Chapter [Chapter 5D] is not to apply in relation to the disposal.

The larger of the two charges prevails. But this will not happen often.

### 51.16 DT relief

If the transferor is treaty-resident in a foreign state with a DTA in OECD Model form, DT relief will in principle be available under art 13 (Capital

gains) or art 21 (Other Income).<sup>25</sup>

---

25 See 32.16 (DT relief: “Other Income”); 53.22 (DT relief for taxable gains).

## TRANSACTIONS IN SECURITIES

52.1

### 52.1 Transactions in securities

The “lengthy and complicated”<sup>1</sup> topic of transactions in securities requires a book to itself.

There are two sets of rules:

<b>Tax</b>	<b>Provisions</b>	<b>Term (my terminology)</b>
IT	Chapter 1 Part 13 ITA: s.682-712	IT TiS code
CT	Part 15 CTA 2010: s.731-751	CT TiS code

Is there one code or are there two? What are now IT/CT TiS codes share a common origin, and would be accurate to refer to TiS code (in the singular) before 2010, and codes (in the plural) after that date, when the two codes diverged.<sup>2</sup> But perhaps that is pedantic. The two codes still have some terminology in common, but are essentially distinct. In this book I only consider the IT code.

The IT TiS code was rewritten again in 2016. The 2016 reforms were

- 
- <sup>1</sup> *IRC v Laird Group* [2003] STC 1349 at [13]. By the standards of modern anti-avoidance codes the TiS provisions are not lengthy, and no more than averagely complicated. But the case law is lengthy and complicated, as (1) there are more cases than any other anti-avoidance code; (2) the cases often concern factually complicated schemes; and (3) the TiS code has had a complicated evolution, which makes it hard to identify which points discussed in old case law may be relevant now.
  - <sup>2</sup> This was preceded by a consultation paper: HMRC, “Simplifying Transactions in Securities Legislation” (2009)  
<https://www.taxation.co.uk/files/TransactionsSecuritiesLegislation.pdf>

preceded by shallow HMRC consultation and response documents<sup>3</sup> but these shed little light on the provisions.

In 2009 HMRC promised to publish guidance “which meets our customers’ requirements for certainty and clarity” but this never materialised.<sup>4</sup>

### 52.1.1 Construction of *TiS* code

The provisions are broad and the courts construe them broadly.<sup>5</sup> In *IRC v Parker*:<sup>6</sup>

The Statute mounted a massive attack against tax avoidance in many forms. One type of tax avoidance transaction at which the Act is evidently aimed is that generically known as ‘dividend stripping’ ... I do not find it possible to discern in this Act any indication that it was the purpose of the legislature to limit it to any specific form of tax avoidance... we must take the Act as we find it and endeavour to see what it fairly covers.

Nowadays that would seem self-evident, though not in 1966, when *Parker* was decided. But the Courts have gone further.

In *IRC v Joiner*:

... the sections called for a different method of interpretation from that traditionally used in taxing Acts. For whereas it is generally the rule that clear words are required to impose a tax, so that the taxpayer has the benefit of doubts or ambiguities ... the scheme of the sections, introducing as they did a wide and general attack on tax avoidance, required that expressions which might otherwise have been cut down in the interest of precision were to be given the wide meaning evidently intended, even though they led to a conclusion short of which judges

- 
- 3 HMRC, “Company distributions: consultation document” (2015)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/483547/Company\\_distributions\\_-\\_consultation\\_document\\_7029\\_.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/483547/Company_distributions_-_consultation_document_7029_.pdf)  
 HMRC, “Company distributions: summary of responses” (2016)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/510263/Company\\_distributions\\_-\\_summary\\_of\\_responses.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510263/Company_distributions_-_summary_of_responses.pdf)
- 4 The 2009 consultation paper outlined the structure of proposed guidance, but did not set out its contents, so there is not even indicative help to be found there.
- 5 Contrast 45.2 (Construction of ToA provisions).
- 6 43 TC 396 at p.440.

would normally desire to stop.

In *Greenberg v IRC*:<sup>7</sup>

We seem to have travelled a long way from the general and salutary rule that the subject is not to be taxed except by plain words. But I must recognise that plain words are seldom adequate to anticipate and forestall the multiplicity of ingenious schemes which are constantly being devised to evade taxation. Parliament is very properly determined to prevent this kind of tax evasion<sup>8</sup> and, if the courts find it impossible to give very wide meanings to general phrases, the only alternative may be for Parliament to do as some other countries have done, and introduce legislation of a more sweeping character which will put the ordinary well-intentioned person at much greater risk than is created by a wide interpretation of such provisions as those which we are now considering.

What Lord Reid feared has come to pass. Perhaps, but for his approach, it would have happened sooner? Discuss.

The TiS code is not limited to contrived transactions carried out otherwise than on the open market.<sup>9</sup>

In *Grogan v HMRC*<sup>10</sup> the taxpayer argued that prescriptive tax codes<sup>11</sup> by implication excluded the TiS code. This argument was rejected, I think rightly. It is a matter of construction in each case, so it is theoretically possible that some codes might by implication exclude the TiS code, in some cases; but a strong case would be needed to justify that conclusion.

For examples of how very loosely the TiS code has been construed:

- (1) A simple loan is (or may be) a “security”.<sup>12</sup>
- (2) An IT Advantage may be obtained “in consequence of” a transaction in securities, even though the advantage is not causally connected with the transaction in securities, “in the sense that it occurs as a result of that transaction”.<sup>13</sup>

---

7 47 TC 240, at p.272.

8 For this terminology, see 2.2.2 ( Avoidance/evasion distinction).

9 *IRC v Sema Group Pension Scheme* 74 TC 593 at [91] (CA).

10 [2011] STC 1.

11 In that case, qualifying employee share ownership trusts.

12 See 52.3.2 (Is loan a transaction in securities).

13 See 52.13.3 (Tax Advantage obtained).

## 52.2 TiS application conditions

Section 684 ITA provides:

- (1) This section applies to a person (“the party”) where—
  - (a) the person is a party to a transaction in securities or two or more transactions in securities<sup>14</sup> ...
  - (b) the circumstances are
    - [i] covered by section 685 [TiS Circumstances] and
    - [ii] not excluded by section 686 [substantial change of ownership],
  - (c) the main purpose, or one of the main purposes, of the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage, and
  - (d) the party or any other person obtains an income tax advantage in consequence of the transaction or the combined effect of the transactions.

This sets out four sets of conditions (“**TiS application conditions**”). In short:

- (1) A transaction in securities
- (2) TiS Circumstances
- (3) Outside s.686 (substantial change of ownership)
- (4) An IT Advantage:
  - (a) Main purpose to obtain IT Advantage
  - (b) Someone obtains an IT Advantage

## 52.3 Definitions

It is helpful first to deal with some definitions.

### 52.3.1 “Security”

Section 713(1) ITA provides:

In this Chapter [Chapter 1 Part 13] ...  
“securities”—

- (a) includes shares and stock, and
- (b) in relation to a company not limited by shares (whether or not

---

<sup>14</sup> The words “or two or more transactions in securities” are otiose, but they do no harm.

it has a share capital) also includes a reference to the interest of a member of the company as such, whatever the form of that interest<sup>15</sup>

In *IRC v Laird Group*:

The word ‘securities’ includes not only stocks and shares of every description, including preference shares, but also debentures and unsecured loan notes.<sup>16</sup>

This represents the normal meaning of the word.<sup>17</sup>

For completeness: s.685(9) ITA provides two standard definitions taken from the distribution code:

In this section—

“security” includes securities not creating or evidencing a charge on assets;<sup>18</sup>

“share” includes stock and any other interest of a member in a company.<sup>19</sup>

### 52.3.2 *Is loan a security*

Making a loan is a transaction in securities if the loan is a “security”.

*Williams v IRC*<sup>20</sup> was a scheme to extract money from a company. The scheme was complicated, but for present purposes it is sufficient to say:

- (1) D Ltd, in which the taxpayers initially had no interest, lent money to the shareholders of G Ltd.
- (2) G Ltd acquired D Ltd.<sup>21</sup>

15 This only matters in exceptional cases, such as a company limited by guarantee: see 98.2.1 (No share capital).

16 [2003] STC 1349 at [29].

17 See App 2.12 (Security).

18 This has no real effect: see App 2.15 (“Security” in distribution code).

19 This is only a section-wide definition so it is repeated in s.700(4) ITA. It repeats the definition in s.713.

20 54 TC 257.

21 In slightly more detail, the relevant steps were:

- (1) A new company, G Ltd acquired K Ltd in a share for share exchange.
- (2) K Ltd paid a dividend to G Ltd.
- (3) D Ltd, in which the taxpayers initially had no interest, lent money to the shareholders of G Ltd.
- (4) G Ltd acquired D Ltd using the cash received from the dividend from K Ltd.

The result was that the shareholders ended up with cash in their hands, and owed corresponding amounts to D Ltd, a company by then owned by G Ltd.

This was caught by the TiS code as:

- (1) The loans were securities, so making the loan was a transaction in securities.
- (2) The taxpayers obtained, and intended to obtain, an IT Advantage.

On this basis it has been suggested that every loan is a security for TiS purposes. Though that is not the normal or the defined sense of the word.<sup>22</sup> If that is correct, the borrower and lender are parties to a transaction in debt-securities. But the arrangement in *Williams* would be now caught by the GAAR<sup>23</sup> so the issue is less likely to arise.

### 52.3.3 “Close company”

Section 713(1) ITA provides:

In this Chapter [Chapter 1 Part 13]—  
“close company” includes a company that would be a close company if it were resident in the UK

This is a fairly standard form.<sup>24</sup>

Section 713(1) continues:

“company” includes any body corporate

Why is there a non-standard definition of company? It is probably just for historical reasons.<sup>25</sup> At first sight it seems wider than the standard definition.<sup>26</sup> An LLP is a body corporate, and a partnership with legal

The money lent was received in connection with the distribution of profits of K Ltd and represented the value of assets which would have been available for distribution by way of dividend by K Ltd, but for the steps taken by K Ltd. So the scheme fell within (what was then) Circumstance D.

22 See 52.3.1 (“Security”); App 2.12 (“Security”).

23 See 81.8 (Company loans: GAAR).

24 See 99.29.1 (Non-resident close company).

25 This goes back to s.43 FA 1960, when there was no taxes-act wide definition of “company” (indeed there was no taxes act).

26 See 86.3 (Definition of “company”).

personality (such as a Scots partnership) might be a body corporate. But that does not matter, since partnerships and LLPs are not close companies.

#### 52.3.4 “Associate”

“Associate” matters for:

- (1) The exemption for fundamental change of ownership
- (2) The definition of IT advantage

Section 713(1) ITA provides:

In this Chapter [Chapter 1 Part 13] ...  
“associate”<sup>27</sup>

- [a] is to be construed in accordance with section 681DL,
- [b] but as if subsection (4) of that section also included, as persons associated with each other, a person as trustee of a settlement and an individual, where one or more beneficiaries of the settlement are connected or associated with the individual

Amended as s.713(1) directs, s.681DL(2) ITA provides:

Persons are associates if they are associated with each other.

Section 681DL(3) ITA deals with close family:

The following are associated with each other—

- (a) an individual and the individual’s spouse or civil partner or relative,
- (b) an individual and a spouse or civil partner of a relative of the individual,
- (c) an individual and a relative of the individual’s spouse or civil partner,
- (d) an individual and a spouse or civil partner of a relative of the individual’s spouse or civil partner.

Relative is defined in s.681DL(7) ITA:

For the purposes of this section—

- (a) a relative is a brother, sister, ancestor or lineal descendant

Section 681DL(4) ITA (as amended by s.713(1) ITA) deals with trusts:

---

27 The word “associate” is used in the context of close companies with a slightly different definition: see 99.6 (Associates).

The following are associated with each other—

- (a) a person as trustee of a settlement and an individual who (in relation to the settlement) is a settlor, and
- (b) a person as trustee of a settlement and a person associated with an individual who (in relation to the settlement) is a settlor.
- [c] a person as trustee of a settlement and an individual, where one or more beneficiaries of the settlement are connected or associated with the individual.

Settlement means settlement-arrangement.<sup>28</sup>

Section 681DL(5) ITA deals with companies and partnerships:

The following are associated with each other—

- (a) a person and a body of persons<sup>29</sup> of which the person has control,
- (b) a person and a body of persons of which persons associated with the person have control,
- (c) a person and a body of persons of which the person and persons associated with the person have control,
- (d) two or more bodies of persons associated with the same person under paragraphs (a) to (c).

“Control” is not defined here, so it has its strict sense.<sup>30</sup> I wonder if that is deliberate or accidental.

Section 681DL(6) ITA deals with joint ownership:

In relation to a disposal by joint owners, the joint owners and any person associated with any of them are associated with each other.

## 52.4 “Transaction in” securities

Section 684(2) ITA provides:

28 Subsection (7) provides: “For the purposes of this section... (c) “settlement” and “settlor” have the meanings given by section 620 of ITTOIA 2005.” See 1.5 (Settlement-arrangement definition).

29 “Body of persons” is defined in ss.(7): “For the purposes of this section... (b) a body of persons includes a partnership”. A partnership is a body of persons in the general sense, but probably not within the IT definition; see 8.22.1 (Partnership a treaty-person).

30 See 99.2.3 (Default meaning of control).

In this Chapter [Chapter 1 Part 13] “transaction in securities” means [A] a transaction, of whatever description, relating to securities, [B] and includes in particular—

- (a) the purchase, sale or exchange of securities,
- (b) issuing or securing the issue of new securities,
- (c) applying or subscribing for new securities,
- (d) altering or securing the alteration of the rights attached to securities
- (e) a repayment of share capital or share premium, and
- (f) a distribution in respect of securities in a winding up.

In *Parker v IRC*:<sup>31</sup>

The particular instances given [now s.684(2)[B]] in my opinion do not in any way restrict the meaning to be given to the general words which precede them. The redemption of the debentures was, in my opinion, a transaction relating to them and so a transaction in securities as defined.

In *IRC v Laird Group*:<sup>32</sup>

It would not be a normal use of language to describe the payment of a fixed dividend in respect of preference shares as a transaction relating to securities; and I would at least pause before attaching such a description to the payment of interest on a debt merely because it was secured by a debenture or unsecured loan note.<sup>33</sup> Neither the debt nor the rights attached to it, which include the right to receive interest payable in respect of it, is affected by the payment in any way. The debt merely provides the measure of the amount to be received by way of interest. The same applies to fixed dividends payable in respect of preference shares.

I find this a little surprising, but there it is.

Alteration of rights attaching to a security (in this case by a liquidation agreement) is a transaction in securities: *IRC v Joiner* 50 TC 499.

#### 52.4.1 Winding-up

A distribution in a winding-up is a transaction in securities. In this context

---

<sup>31</sup> 43 TC 396 at p.431.

<sup>32</sup> [2003] UKHL 54, at [29].

<sup>33</sup> Author’s footnote: This suggests that a simple debt is not a “security”.

the winding-up TAAR also needs consideration.<sup>34</sup>

CIOT say:

All of the transactions that the [winding-up] TAAR considers are theoretically caught by the transactions in securities rules too, now that a transaction in securities includes a distribution in respect of securities on a winding up. What we think that this will mean is that any transaction where a taxpayer self-assesses that the TAAR does NOT apply is potentially open to counteraction under the transactions in securities rules. ...

It is also extremely likely that, from now on, every liquidation is going to be the subject of a transactions in securities clearance application to HMRC...<sup>35</sup>

I would have thought that a transaction which falls within a straightforward exemption to the winding-up TAAR should by implication be regarded as not falling with the TiS code.

The CTM comments on the interaction of the two codes:

**CTM36350 Requests For Clearance** [Feb 2018]

**... Transactions in Securities**

- [1] ... Where S396B/404A [winding-up TAAR] applies to a distribution in a winding-up then Income Tax is payable on the distribution, and it follows that there can be no tax advantage for the purpose of the transactions in securities legislation. That means that the transactions in securities rules cannot apply where S396B/404A does,
- [2] and a clearance under ITA07/S701 cannot extend to the application of S396B/404A.
- [3] But clearance may still be relevant to the extent that S396B/404A does not apply.

Point [1] is correct. Point [2] does not follow: HMRC could if they wish give a clearance that neither set of provisions should apply to a proposed transaction. But there is no statutory duty to do that, and HMRC are clearly not minded to assist their customers on the point.

## 52.5 TiS Circumstances

---

<sup>34</sup> See 29.8 (Winding-up TAAR).

<sup>35</sup> CIOT, Letter to HMRC (June 2016).

Section 685(1) ITA provides:

The circumstances covered by this section are circumstances where condition A or condition B is met.

I refer to “**TiS Circumstances**”. Thus it appears there are two types of Circumstances, A and B; but there are 3 types of Circumstance A, which I call A(a), A(b) and A(c); it is easier to regard them as 4 distinct Circumstances.

Each Circumstance contains a set of four conditions. Two of these are common to all 4 Circumstances:

- (1) a relevant person receives Relevant Consideration
- (2) the relevant person does not pay income tax on the consideration

#### 52.5.1 “*Relevant person*”

“Relevant person” matters as all 4 Circumstances require that a relevant person receives Relevant Consideration. The definition is the same for all Circumstances. Section 685(3A) ITA provides:

In subsections (2) and (3) “relevant person” means-

- (a) the party, or
- (b) any person other than the party in relation to whom the condition in section 684(1)(d) is met.

Unpacking the definition, this means:

- (a) The parties to the transaction in securities and
- (b) Any person meeting the condition in s.684(1)(d),<sup>36</sup> in short, any person who obtains an IT Advantage<sup>37</sup>

#### 52.5.2 *No IT on consideration*

All four Circumstances require that:

---

<sup>36</sup> See 52.2 (TiS application conditions).

<sup>37</sup> That is, para (b) should be read as if it had commas, thus:

“any person, other than the party, in relation to whom the condition in section 684(1)(d) is met”.

In other words, the phrase “*in relation to whom the condition in section 684(1)(d) is met*” governs the words “any person”; not the words “other than the party”.

the relevant person does not pay or bear income tax<sup>38</sup> on the consideration

This is otiose. If the relevant person did pay IT, there would be no IT Advantage. The words survive for historical reasons. But it does not matter.

## 52.6 TiS Circumstances A(a)(b)

Section 685(2) ITA provides:

Condition A is that,

- [1] as a result of the transaction in securities or any one or more of the transactions in securities,
- [2] a relevant person receives relevant consideration
- [3] in connection with—<sup>39</sup>
  - (a) the distribution, transfer or realisation of assets of a close company, [or]
  - (b) the application of assets of a close company in discharge of liabilities...<sup>40</sup>
- [4] and the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

## 52.7 TiS Circumstances A(c)/B

Section 685(2) ITA provides:

Condition A is that,

- [1] as a result of the transaction in securities or any one or more of the transactions in securities,
- [2] a relevant person receives relevant consideration
- [3] in connection with<sup>41</sup> ...
  - (c) the direct or indirect transfer of assets of one close company to another close company,
- [4] and the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

---

38 See App.2.4.1 (Bear tax by deduction or otherwise).

39 See App App. 2.6.2 (In connection with).

40 An application in discharge of liabilities will normally fall within (a) as a transfer of assets; but it is just possible to conceive of examples where that is not the case. So para (b) is almost but not completely otiose.

41 See App App. 2.6.2 (In connection with).

Section 685(3) ITA provides:

Condition B is that—

- (a) [i] a relevant person receives relevant consideration  
[ii] in connection with<sup>42</sup> the transaction in securities or any one or more of the transactions in securities,
- (b) two or more close companies are concerned in the transaction or transactions in securities concerned, and
- (c) the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

### 52.7.1 Irredeemable share capital

For Circumstances A(c) and B, s.685(7) ITA provides a relief for irredeemable share capital:

- [a] So far as subsection (2)(c) or (3) [Circumstances A(c), B] relates to share capital other than redeemable share capital, it applies only so far as the share capital is repaid (on a winding up or otherwise);
- [b] and for this purpose any distribution made in respect of any shares on a winding up or dissolution of the company is to be treated as a repayment of share capital.

I refer to this as “**irredeemable share capital relief**”.

### 52.7.2 Timing rule

For Circumstances A(c) and B, s.700 ITA provides a timing rule:

- (1) This section applies if section 684 (person liable to counteraction of income tax advantage) applies to a person because the person is in a position to obtain or has obtained an income tax advantage by falling within the circumstances mentioned in [685(2)(c) or (3)]<sup>1</sup> when share capital is repaid.<sup>43</sup>
- (2) An assessment to income tax made in accordance with a counteraction notice must be an assessment for the tax year in which the repayment occurs.

---

42 See **App App. 2.6.2** (In connection with).

43 Section 700(3) ITA provides:

“The references in this section to the repayment of share capital include references to any distribution made in respect of any shares in a winding up or dissolution of the company.” This reflects the rule in s.685(7)[b] ITA.

## 52.8 “Relevant Consideration”

“Relevant Consideration” matters as:

- (1) All 4 Circumstances require that a relevant person receives Relevant Consideration.
- (2) The definition of IT Advantage asks (in short) whether income tax would be payable in respect of the Relevant Consideration if it was a distribution.

Section 685 ITA provides two definitions and I coin terminology to describe them:

Subsection	Definition for	My terminology	See para
(4)	Circumstances A(a)(b)	Type A Relevant Consideration	52.8.2
(5)	Circumstances A(c), B	Type B Relevant Consideration	52.8.3

This is not transparent terminology, but it is difficult to think of better. I use initial capitals, as befits complex defined terms.

The definition applies for the purpose of the TiS Circumstances, so it has to be incorporated by reference elsewhere.<sup>44</sup>

### 52.8.1 “Consideration”

For this purpose “consideration” has an artificial definition. Section 685(8) ITA provides:

References in this section to the receipt of consideration include references to the receipt of any money or money’s worth.

“Property” would be the more apt word.

### 52.8.2 Type A Consideration

Section 685(4) ITA provides:

In a case within subsection (2)(a) or (b) [in my terminology, Circumstances A(a)(b)] “relevant consideration” means consideration which—

- (a) is or represents the value of—
  - (i) assets which are available for distribution by way of dividend by the company, or

---

<sup>44</sup> Section 687(4) ITA.

- (ii) assets which would have been so available apart from anything done by the company,
- (b) is received in respect of future receipts of the company, or
- (c) is or represents the value of trading stock<sup>45</sup> of the company.

“The company” is the company referred to in Circumstances A(a)(b), which refer to:

- (a) the distribution, transfer or realisation of assets of a close company, [or]
- (b) the application of assets of a close company in discharge of liabilities...

### 52.8.3 *Type B Consideration*

Section 685(5) ITA provides:

In a case within subsection (2)(c) or (3) [in my terminology, Circumstances A(c), B] “relevant consideration” means consideration

- [i] which consists of any share capital or any security issued by a close company and
- [ii] which is or represents the value of assets which—
  - (a) are available for distribution by way of dividend by the company,
  - (b) would have been so available apart from anything done by the company, or
  - (c) are trading stock of the company.

### 52.8.4 *Foreign law rule*

Section 685(7A) ITA provides a rule about return of capital by foreign companies, under the guise of a definition of “assets”:

The references in subsection (4)(a)(i) and (ii) to assets do not include assets shown to represent return of sums paid by subscribers on the issue of securities merely because the law of the country in which the company is incorporated allows assets of that description to be available for distribution by way of dividend.

### 52.8.5 “*Available for distribution*”

---

45 Section 713 ITA provides a definition by reference: “trading stock” has the meaning given by section 174 of ITTOIA 2005.

“Available” for distribution means distributable as a matter of company law, whether or not it is commercially possible to distribute.

Section 685(7B) ITA deals with groups:

The references in subsections (4)(a)(i) and (5)(a) to assets which are available for distribution by way of dividend by the company include assets which are available for distribution to the company by way of dividend by any other company it controls.

### 52.8.6 “By way of dividend”

Section 713 ITA provides:

- (1) “dividends” includes references to other distributions and to interest...
- (2) In the definition of “dividends” given by subsection (1), “other distributions” does not include a distribution which is a distribution for the purposes of the Corporation Tax Acts only because it falls within paragraph C or D in section 1000(1) (redeemable share capital or security issued as bonus in respect of shares in, or securities of, the company).

## 52.9 Circumstances A/B comparisons

### 52.9.1 *Circumstance A/B compared*

#### **Circumstances A(a)(b)(c)**

as a result of the transaction in securities or any one or more of the transactions in securities,

a relevant person receives [type A] relevant consideration

#### **Circumstance B**

a relevant person receives [type B] relevant consideration

- in connection with—
- (a) the distribution, transfer or realisation of assets of a close company, [or]
  - (b) the application of assets of a close company in discharge of liabilities [or]
  - (c) the direct or indirect transfer of assets of one close company to another close company,

the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

in connection with the transaction in securities or any one or more of the transactions in securities,

the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

52.9.2 “Relevant Consideration” compared

*Type A Relevant Consideration*

“relevant consideration” means consideration which—

- (a) is or represents the value of—
  - (i) assets which are available for distribution by way of dividend by the company, or
  - (ii) assets which would have been so available apart from anything done by the company,
- (b) is received in respect of future receipts of the company, or

*Type B Relevant Consideration*

“relevant consideration” means consideration

[i] which consists of any share capital or any security issued by a close company and

[ii] which is or represents the value of assets which—

- (a) are available for distribution by way of dividend by the company,
- (b) would have been so available apart from anything done by the company, or

- (c) is or represents the value of trading stock of the company.      (c) are trading stock of the company.

## 52.10 TiS issue list

To summarise the discussion so far. The best way to approach the TiS code is as follows:

### *Preparatory*

- (1) Identify the transaction(s) in securities
- (2) Identify:
  - (a) the parties to the transaction in securities
  - (b) the persons who obtain an IT advantage (together, “relevant persons”)
- (3) Identify the Consideration which the relevant person receives
- (4) Identify the company

### *Type A Relevant Consideration*

- (5) Identify the Consideration which represents assets available for distribution (etc) by the company (Relevant Consideration)

### *Circumstances A(a)(b)*

- (6) Identify:
  - (a) the distribution, transfer or realisation of assets of a close company, or
  - (b) the application of assets of a close company in discharge of liabilities
- (7) Armed with the above, consider Circumstances A(a)(b)

### *Circumstances A(c), B*

- (8) Identify:
  - (a) the direct or indirect transfer of assets of one close company to another close company
  - (b) Type B Relevant Consideration
- (9) Armed with the above, consider Circumstances A(c), B

### *Common to all cases*

- (10) Consider 686 (substantial change of ownership)
- (11) Does the relevant person pay IT on the Relevant Consideration
- (12) Identify the IT Advantage:
  - (a) Is a main purpose to obtain IT Advantage
  - (b) Does a relevant person obtain an IT Advantage

I refer to this as the “**TiS issue list**”. It will be apparent that a rigorous application of the issue list is a labourious exercise.

With this in mind I turn to consider some examples and see how the TiS code applies.

## 52.11 Examples

### 52.11.1 *Close co buys close co for cash*

Suppose:

- (1) An individual holds two close companies (A Ltd and B Ltd)
- (2) The individual sells A Ltd to B Ltd, for cash

Applying the TiS issue list:

The sale is a transaction in securities.

The taxpayers are parties to the transaction in securities and so relevant persons.

There is a transfer of assets by B Ltd.

There is also an application of assets of a close company in discharge of its liabilities under the share purchase contract.

The consideration received is money which would have been available for distribution by B Ltd by way of dividend, so it is Type A Relevant Consideration.

The parties so not pay IT on the relevant consideration.

Circumstance A is met.

These are the facts of *Cleary v IRC*<sup>46</sup> and *Brown v IRC*.<sup>47</sup> In the first case two joint shareholders sold their company to another company. In the second case, the ownership of the purchaser (B Ltd) was not quite the same as the ownership of the purchased company (A Ltd); that made no difference to the application of the Circumstances.<sup>48</sup>

---

46 44 TC 399.

47 47 TC 217.

48 For completeness: *Allam v HMRC* was yet another case of a sale of A Ltd to B Ltd for cash. B Ltd (the purchaser) had sufficient profits available for distribution, so the purchase price it paid was relevant consideration. A Ltd did not have sufficient profits available for distribution, but that did not matter; see [2020] UKFTT 216 (TC) at [200]. That follows from *Cleary*.

That seems right, as it is easy to see that a sale for cash effectively allows the extraction of cash from a company without the IT charge which would be payable on a dividend, and without the drawbacks of a full liquidation.

Although there is an income tax charge on the sale proceeds, there is no reduction in the value of the shares of the purchaser (B Ltd), and no increase in the base cost of those shares. So the value subject to IT on the sale of A Ltd could come into charge to CGT on a sale of B Ltd. The motive defence may be all that avoids potential double taxation here, which perhaps suggests it should not be too rigorously applied.

### 52.11.2 *Share for share exchange*

An example of circumstance B is selling a close company to another close company in consideration of an issue of redeemable shares or loan notes. That seems right as a sale for redeemable shares or loan notes is only a short step from a sale for cash; it amounts to a sale for cash, when the shares or loan notes are redeemed.<sup>49</sup>

The CT Manual provides:

**CTM36850: examples of common circumstances where clearance will be given** [Oct 2020]

**Example 1**

Mrs A and Mrs B jointly own all the share capital in companies C Ltd and D Ltd which operate similar trades. They decide to form a group for specified commercial reasons.<sup>50</sup> They form Newholdco Ltd which issues ordinary shares to Mrs A and Mrs B in exchange for their shares in C Ltd and D Ltd.

But in the case of a sale for ordinary (ie irredeemable) shares, actually

For another aspect of this case, see 49.12 (Consequence/purpose distinction).

49 See 52.11.1 (Close co buys close co for cash).

50 Prior to Oct 2020, this read: “They decide to form a group to improve access to finance for expansion *and to benefit from group taxation provisions.*” This is not an *Income* tax advantage, and not tax avoidance, but it is strictly a CT advantage. Does the new text reflect a change of practice, or is it simply that HMRC did not wish to give a hostage to fortune?

Under the post 2020 wording, the example is self-evident: since it seems to be posited that the sale is for commercial reasons only, it seems clear that the motive defence applies.

caught? Why does the irredeemable share capital relief not apply?<sup>51</sup>

### 52.11.3 *Sale of co to trust/individual*

Suppose the purchase is not a close company but meets the payment price out of a distribution by the purchased company.

### 52.11.4 *Repayment of debt security*

This is caught, assuming the creditor receives relevant consideration.

### 52.11.5 *Loan /liquidation: Individual*

Suppose a non-resident company is wholly owned by a UK resident individual (“X”), and the company lends interest-free to X.

X obtains an IT Advantage.

Circumstances A(c), B are not satisfied because there is only one close company involved.

Circumstance A(b) is not satisfied because the company does not discharge liabilities.

What about Circumstance A(a)? X receives relevant consideration. There is a transfer of assets (the loan). However, does X receive the sum “in connection” with a transfer of assets of a close company? If the company already had the cash, then the only “transfer of assets” is the loan itself. Is the loan connected with itself? The answer must be, no. If the company had to sell assets in order to raise cash to make the loan, that sale would be a “transfer of assets” and Circumstance A(a) would arguably be satisfied.

Similar considerations apply on a liquidation.

### 52.11.6 *Loan/liquidation: Trust*

Suppose a non-resident company is held by a non-resident discretionary trust, and lends interest-free to the trustees. The trustees do not obtain an IT Advantage. The trustees would not have been taxable on a dividend.

Suppose the trust is settlor-interested. If the settlor (“S”) is UK resident and domiciled, S obtains an IT Advantage.

What if S is a remittance basis taxpayer? There is no IT advantage unless the borrowed money is received in the UK.

---

51 See 52.7.1 (Irredeemable share capital).

If the trustees appoint or lend the proceeds to S, the beneficiary receives an IT Advantage. Circumstance A(a) is met. But what is the counteraction?

## 52.12 Fundamental change of ownership

Section 686(1) ITA provides:

Circumstances are excluded by this section if—

- (a) immediately before the transaction in securities (or the first of the transactions in securities) the party holds shares or an interest in shares in the close company, and
- (b) there is a fundamental change of ownership of the close company.

### 52.12.1 “Fundamental change”

Section 686(2) ITA provides:

There is a fundamental change of ownership of the close company if, as a result of the transaction or transactions in securities, the condition in subsection (3) is met.

So we turn to s.686(3) ITA:

The condition in this subsection is that the original shareholder or original shareholders taken together with any associate or associates<sup>52</sup>—

- (a) do not directly or indirectly hold more than 25% of the ordinary share capital of the close company,
  - (b) do not directly or indirectly hold shares in the close company carrying an entitlement to more than 25% of the distributions which may be made by the close company, and
  - (c) do not directly or indirectly hold shares in the close company carrying more than 25% of the total voting rights in the close company.
- (4) In this section “original shareholder” means a person who, immediately before the transaction in securities (or the first of the transactions in securities), held any ordinary share capital of the close company.

Section 686(5) ITA defines “holding” shares:

---

<sup>52</sup> See 52.3.4 (“Associate”).

For the purposes of this section, shares of or share capital in the close company which are held

- [a] by a person controlled<sup>53</sup> by an original shareholder, or
- [b] by two or more original shareholders taken together, count as shares or share capital held by that original shareholder or those original shareholders.

### 52.13 TiS motive defence

Section 684 ITA provides a TAAR:

- (1) This section applies to a person where...
  - (c) the main purpose, or one of the main purposes, of the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage

I refer to this as the “**TiS motive defence**”. It has in the past been called the “escape clause”, but that is not now an appropriate term,<sup>54</sup> and I do not use it here.

For more general discussion see 2.10 (TAAR/unallowable purpose test).

#### 52.13.1 “Income tax advantage”

“Income tax advantage” matters for two overlapping rules:

- (1) The TiS motive defence
- (2) s.684(1)(d) ITA, (in short) requiring that someone obtains an IT advantage

“Income tax advantage” is defined in s.687 ITA. Section 687(1) ITA provides:

For the purposes of this Chapter [Chapter 1 Part 13] the person obtains an income tax advantage if—

- (a) [i] the amount of any income tax which would be payable by the person in respect of the relevant consideration<sup>55</sup> if it

---

53 “Control” is not defined here, so it has its strict sense; see 98.2.3 (Default meaning of control).

54 The term was more apt before 2010, as the motive defence then took the form of a proviso to the TiS charge; but the 2010 rewrite sensibly reframed the motive defence as an independent requirement, expressing it as one of the TiS application conditions.

55 See 52.8 (Relevant Consideration).

- constituted a distribution<sup>56</sup> exceeds
- [ii] the amount of any capital gains tax payable in respect of it, or
  - (b) [i] income tax would be payable by the person in respect of the relevant consideration if it constituted a distribution and
  - [ii] no capital gains tax is payable in respect of it.<sup>57</sup>

Where relevant consideration is received by a UK individual or trust, it will (more or less) always be the case that IT would exceed CGT, so there is (more or less) always an IT Advantage. I refer to this as “IT Advantage”, with initial capitals to reflect the technical nature of the expression.

This is different from the standard IT/CGT definition of tax advantage,<sup>58</sup> (which still applies for the CT TiS rules, and formerly applied for the pre-2010 IT TiS rules). The definition is similar, but for the standard definition one must identify a possible comparator; in the TiS definition of IT Advantage, the comparator is specified (whether or not it is in fact possible for the relevant consideration to constitute a distribution does not matter).

Section 687(2) ITA provides:

So much of the relevant consideration as exceeds the maximum amount that could in any circumstances have been paid to the person or an associate of the person by way of a distribution at the time when Condition A or B in section 685 is met is to be left out of account for the purposes of subsection (1)....

A CGT advantage does not count. That is self-evident, but for completeness, HMRC agree:

The proposed legislation, through the definition of tax advantage would

56 For the standard IT definition see 29.3 (“Distribution”). Section 687 (4) (repeating text in s.713(2) ITA) tweaks this definition here: “In this section ... “distribution” does not include a distribution which is a distribution for the purposes of the Corporation Tax Acts only because it falls within paragraph C or D in section 1000(1) of CTA 2010 (redeemable share capital or security issued as bonus in respect of shares in, or securities of, the company)”.

57 Para (b) adds nothing to para (a), so it is otiose, but that does not matter.

The CT equivalent is in s.732 CTA 2010 but the definition is not identical.

58 See 2.12.1 (Tax advantage: Definitions).

make it clear that the TiS legislation does not apply to TiS where an advantage in relation to tax on chargeable gains is obtained. This would be more relevant for corporation tax where the position is not clear from the existing [pre 2010] legislation.<sup>59</sup>

A UK shareholder<sup>60</sup> who borrows interest-free will obtain an IT Advantage.

### 52.13.2 *TiS/ToA motive defence compared*

In summary, the two motive defences have the following real or apparent differences:

<b>Transfer of Assets Abroad</b>	<b>Transactions in securities</b>	<b>Which is stricter?</b>
Purpose	Object	No difference
<i>Any</i> purpose test	<i>Main</i> purpose test	Little difference
Avoidance of any tax	<i>IT</i> advantage needed	ToA stricter
Tax avoidance, not mitigation	“IT Advantage”	TiS stricter
“...reasonable to assume...”	no equivalent wording	No difference
Test associated operations	Test transactions in securities	ToA stricter
No clearance procedure	Clearance procedure	

It follows that TiS clearance does not entail that the ToA motive defence must also apply;<sup>61</sup> but TiS clearance will usually take one a long way there.

### 52.13.3 *Tax Advantage obtained*

Section 684 ITA provides:

- (1) This section applies to a person (“the party”) where ...
  - (d) the party or any other person obtains an income tax advantage in consequence of the transaction [in securities] or the combined effect of the transactions [in securities].

In *Grogan v HMRC*:

- (1) A company made a payment to a qualifying employee share ownership trust.
- (2) The trust purchased shares (the transaction in securities)

59 See HMRC, “Simplifying Transactions in Securities Legislation” (2009) para 3.3  
<https://www.taxation.co.uk/files/TransactionsSecuritiesLegislation.pdf>

60 apart from an exempt person such as a charity.

61 For instance, if there is an non-IT avoidance purpose, say, IHT avoidance.

The taxpayer argued that the company did not obtain a tax advantage in consequence of the transaction, because the sale was not a tax advantage within the pre-2010 definition (the *Parker* test). The argument would not run now, as the sale would be an IT Advantage within the new definition. But the argument failed because “in consequence of” is not understood strictly:

The phrase ‘in consequence of’ does not mean ‘in consequence only of’ and, indeed, the Code would have almost no teeth at all if that were the case.

[118] Further, I do not consider that such an operation has to be causally connected with the transaction in securities in the sense that it occurs as a result of that transaction. Thus, a complicated tax avoidance scheme may contain many operations which are not themselves transactions in securities but which take place after the first event which is a transaction in securities. Such operations may be a necessary ingredient of the scheme, without which the tax advantage would not be obtained. It may require active steps by a participant in the scheme to ensure that such an operation takes place. Such an operation takes place because there is a scheme, not because there has been a previous transaction in securities.

[119] It can be seen therefore that a tax advantage can be obtained ‘in consequence of’ a transaction in securities notwithstanding (a) that another operation, which is not a transaction in securities, is a necessary ingredient and (b) that such other operation is not one which takes place ‘in consequence of’ the transaction in securities. I can see no reason in principle why the other operation has to take place after the transaction in securities itself. In my judgment, it is enough if the tax advantage is obtained as the result of an overall series of transactions which are linked together to form a scheme and where the relevant transaction in securities is part of that scheme.<sup>62</sup>

#### 52.13.4 *Amount of IT advantage*

The amount of IT Advantage is defined in s.687(3) ITA:

The amount of the income tax advantage is the amount of the excess or (if no capital gains tax is payable) the amount of the income tax which

---

62 [2011] STC 1.

would be payable.

It is not clear what this is for, as the term “amount of the income tax advantage” is not used in the TiS code.

The amount of the IT advantage in general terms is relevant to:

- (1) The terms of a counteraction notice
- (2) The motive defence (as a smaller advantage is less likely to be a main purpose)

But one does not need a definition for those purposes.

## 52.14 TiS clearance

Section 701 ITA provides:

- (1) A person may provide HMRC with particulars of a transaction or transactions effected or to be effected by the person in order to obtain a notification about them under this section...
- (4) The Commissioners must notify the person whether they are satisfied that the transaction or transactions, as described in the particulars, were or will be such that no counteraction notice ought to be served about the transaction or transactions.

The rest of s.701 deals with procedural matters relating to a clearance application:

- (2) If the Commissioners consider that the particulars, or any further information provided under this subsection, are insufficient for the purposes of this section, they must notify the person what further information they require for those purposes within 30 days of receiving the particulars or further information.
- (3) If any such further information is not provided within 30 days from the notification, or such further time as the Commissioners allow, they need not proceed further under this section...
- (5) The notification must be given within 30 days of receipt of the particulars, or, if subsection (2) applies, of all further information required.

The CT Manual provides:

### **CTM36840 transactions in securities: clearances** [Oct 2020]

There is no obligation to seek clearance from HMRC in relation to transactions in securities and potential applicants may decide not to do

so.

A person may apply to the Commissioners for HMRC for clearance under ITA07/S701 or under CTA10/S748 that they will not be subject to counteraction. The application may be made before or after the transactions take place. It must be made by either a party to the transactions or an agent acting on their behalf.

Applications may be made to [reconstructions@hmrc.gov.uk](mailto:reconstructions@hmrc.gov.uk) or by post to: BAI Clearance, HMRC, BX9 1JL

SP 3/80 provides:

... REASONS FOR REFUSING CLEARANCE

1 Where the Commissioners for HMRC cannot give clearance under [s.701 ITA] they are not statutorily required to say why and at one time their practice was to decline to do so. With a view to removing misunderstanding in particular about the scope of [the TiS code] in relation to transactions with a commercial element, they later modified that practice.

Where the applicant has given full reasons for his transactions and clearance has to be refused, the Commissioners for HMRC indicate, where possible, their main grounds for doing so. In appropriate cases where they do not think it right to give reasons the Commissioners for HMRC will invite the principals themselves as well as their advisers to an interview so that the Commissioners for HMRC can be certain they have fully appreciated the position.

SIGNIFICANCE OF REFUSING CLEARANCE

2 The rules of the clearance procedure require the Commissioners for HMRC to say whether in their view [the TiS code] would not apply. They are not required to say whether in their view the section definitely would apply. It may not always be practicable to do so in advance of the transaction's actually being carried out, eg where the motive for it is a relevant factor. Nonetheless, it is not the practice of the Commissioners for HMRC to withhold consent under [s.701 ITA] unless they would, on the information available to them, expect to take counteraction under [the TiS code]. The then Financial Secretary to the Treasury stated this practice in the 1966 Finance Bill debates in the following words:

“The Revenue's approach is that it will not refuse a [s.701] clearance unless, having considered the transaction fully and all the circumstances of it, it would itself take action under the section if

the transaction were completed.”<sup>63</sup>

There is no provision for appealing against a TiS clearance refusal. But it is possible to appeal against a refusal of a CGT clearance, which may determine (more or less) the same issues as a TiS clearance.<sup>64</sup>

#### 52.14.1 *Effect of clearance*

Section 702 ITA provides:

(1) This section applies if the Commissioners for Her Majesty's Revenue and Customs notify a person under section 701 that they are satisfied that a transaction or transactions, as described in the particulars provided under that section, were or will be such that no counteraction notice ought to be served about the transaction or transactions.

(2) No such notice may be served on the person in respect of the transaction or transactions.

(3) But the notification does not prevent such a notice being served on the person in respect of transactions including not only the ones to which the notification relates but also others.

The clearance application must be on behalf of all who may be within s.701, must include all relevant transactions, and must give full details.

#### 52.14.2 *Failure to disclose*

Section 702(4) ITA provides:

The notification is void if the particulars and any further information given under section 701 about the transaction or transactions do not fully and accurately disclose all facts and considerations which are material for the purposes of that section.

The CT Manual provides:

**CTM36845 Response To A Clearance Application** [Feb 2018]

... [The manual sets out s.702(4) and continues:]

Clearance is given on the understanding that the person has come to HMRC with “all cards face up on the table”. In particular an applicant

---

63 Hansard (13 July 1966) Vol 731 col 1566.

64 See 53.18.2 CGT reorganisation relief TAAR and s.138(4) TCGA.

should not consider that information previously supplied to another part of HMRC has been disclosed for the purposes of the clearance application.

There is no provision for “voiding” a clearance. Whether a clearance is, or is not, effective is ultimately a question of fact that would, ultimately, be determined by the Tribunal.

Where a clearance is void HMRC is free to apply, if appropriate, the relevant anti-avoidance provision.

## **52.15 Counteraction**

### *52.15.1 Enquiry*

The TiS code is not within the standard IT/CT enquiry regimes.

Section 695 ITA provides:

(1) An officer of Revenue and Customs may enquire into a transaction or transactions if—

(a) the officer has reason to believe that section 684 (person liable to counteraction of income tax advantage) may apply to a person (“the taxpayer”) in respect of the transaction or transactions, and

(b) the officer notifies the taxpayer of his intention to do so.

(2) The notification may be given at any time not more than 6 years after the end of the tax year to which the income tax advantage in question relates.

### *52.15.2 Counteraction*

Section 698(1) ITA provides:

If on an enquiry under section 695 an officer of Revenue and Customs determines that section 684 [TiS] applies to the taxpayer, the income tax advantage in question is to be counteracted by adjustments, unless the officer is of the opinion that no counteraction is required.

The question is whether s.684 applies to the taxpayer. So we return to s.684, which provides:

(1) This section applies to a person (“the party”) where—

(a) the person is a party to a transaction in securities ...

Thus it appears that the person who is within a counteraction notice must be a party to the transaction in securities.

Thus if a company lends to trustees, and trustees appoint the borrowed money to a beneficiary:

- (1) There can be no counteraction against the trustees because they have not obtained a tax advantage.
- (2) There can be no counteraction against the beneficiary, because the beneficiary is not a party to the transaction in securities.

### 52.15.3 *Counteraction notice*

Section 698 ITA provides:

(2) The adjustments required to be made to counteract the income tax advantage and the basis on which they are to be made are to be specified in a notice served on the person by an officer of Revenue and Customs.

(3) In this Chapter [Chapter 1 Part 13] such a notice is referred to as a “counteraction notice”.

(4) Any of the following adjustments may be specified—

- (a) an assessment,
- (b) the nullifying of a right to repayment,
- (c) the requiring of the return of a repayment already made, or
- (d) the calculation or recalculation of profits or gains or liability to income tax.

(5) An assessment may be made in accordance with a counteraction notice at any time (without regard to any time limit on making the assessment that would otherwise apply).

(6) This section is subject to—

- [a] section 700 (timing of assessments),<sup>65</sup> and
- [b] section 702(2) (effect of clearance notification under s. 701)<sup>66</sup>.

(7) But no other provision in the Income Tax Acts is to be read as limiting the powers conferred by this section.

### 52.15.4 *No-counteraction notice*

Section 698A ITA provides:

(1) If on an enquiry under section 695 an officer of Revenue and Customs is of the opinion that no counteraction is required, the officer must serve notice on the person (a “no-counteraction notice”) stating

---

<sup>65</sup> See 52.7 (Circumstances A(c)/B).

<sup>66</sup> See 52.14.1 (Effect of clearance).

that no counteraction is required and why.

(2) The taxpayer may apply to the tribunal for a direction requiring an officer of Revenue and Customs to issue one of the following within a specified period—

- (a) a counteraction notice;
- (b) a no-counteraction notice.

(3) Any such application is to be subject to the relevant provisions of Part 5 of TMA 1970 (see, in particular, section 48(2)(b) of that Act).

(4) The tribunal must give the direction applied for unless satisfied that there are reasonable grounds for not serving either a counteraction notice or a no-counteraction notice within a specified period.

This is the equivalent of an application for a closure notice under s.28A(4) TMA.

### 52.15.5 Appeals

Section 705 ITA provides:

(1) A person on whom a counteraction notice has been served may appeal on the grounds that—

- (a) section 684 (person liable to counteraction of income tax advantage) does not apply to the person in respect of the transaction or transactions in question, or
- (b) the adjustments directed to be made are inappropriate.

(2) Such an appeal may be made only by giving notice to the Commissioners for HMRC within 30 days of the service of the counteraction notice.

(3) On an appeal under this section that is notified to the tribunal, the tribunal may—

- (a) affirm, vary or cancel the counteraction notice, or
- (b) affirm, vary or quash an assessment made in accordance with the notice.

(4) But the bringing of an appeal under this section does not affect—

- (a) the validity of the counteraction notice, or
- (b) the validity of any other thing done under or in accordance with section 698 (counteraction notices),

pending the determination of the proceedings.

In *Allam v HMRC* the Tribunal considered that s705(1)(b) ITA permits the Tribunal to hear a challenge to the validity of a counteraction notice on

public law grounds, in short, acting wholly unreasonably.<sup>67</sup> But it remains to be seen if other tribunals will take the same wide view.

## CHAPTER FIFTY THREE

# CHARGEABLE GAINS

53.1

### *Cross references*

The following topic is considered elsewhere:

40.13 (CGT rates)

This chapter is concerned with ordinary capital gains. Gains subject to income tax under special regimes (offshore funds, life policies, deeply discounted securities, etc) are considered separately in chapters on those topics.

### **53.1 2019 CGT rewrite**

FA 2019 rewrote the CGT legislation in Part 1 TCGA. It will be a decade or more before guidance and the most important statutory instruments refer to the new legislation, so practitioners will need to remain familiar with the pre-2019 numbering:<sup>1</sup>

<b>Topic</b>	<b>Now (TCGA)</b>	<b>Pre-2019 (TCGA)</b>
Individuals/trusts	1A	1, 2
Branch/agency	1B	10
UK land	1C,1D	<i>new</i>
Losses	1E, 1F	2
Split year	1G	2
CGT rates	1H-1J	4-4BA
CGT annual exemption	1K, 1L	3
Temporary non-residence	1M, 1N	10A, 10AA
Companies	2-2G	8, 10B

---

1 For full tables of destinations/derivations see ICAEW Rep 105/18 Appendix 1  
<https://www.icaew.com/-/media/corporate/files/technical/icaew-representations/2018/icaew-rep-105-18-chargeable-gains-accruing-to-non-residents-and-returns-f-or-disposals-of-land.ashx>

Gains of non-resident company	3-3G	s.13-14A
CGT remittance basis	Sch 1	12

Readers may doubt whether the benefit of the rewrite was worth the cost. One may also doubt whether the rewrite would have happened had there been a consultation. But there it is.

### 53.1.1 *Pre-rewrite continuity*

HMRC say:

Apart from the changes to implement [taxation of non-residents on UK land] and changes required to bring the existing Non-Resident CGT (NRCGT) rules on certain residential property within the scope of CT ... the draft is a re-statement of the existing law and makes no change to the way the existing provisions work.<sup>2</sup>

Para 122 sch 1 FA 2019 provides:

(1) This paragraph applies where this Schedule re-enacts in TCGA 1992 (with or without modification) an enactment contained in TCGA 1992 repealed by this Schedule.

(2) The repeal and re-enactment does not affect the continuity of the law.

(3) Any subordinate legislation or other thing which—

(a) has been made or done, or has effect as if made or done, under or for the purposes of the repealed provision, and

(b) is in force or effective on 5 April 2019,

has effect in relation to times after that date as if made or done under or for the purposes of the corresponding provision of TCGA 1992.

(4) Any reference (express or implied) in any enactment, instrument or document to a provision of TCGA 1992 is to be read as including, in relation to times, circumstances or purposes in relation to which the corresponding repealed provision had effect, a reference to that corresponding provision.

This sub-paragraph applies only so far as the context permits.

(5) Any reference (express or implied) in any enactment, instrument or

---

2 HMRC “Taxing gains made by non-residents on UK immovable property Summary of Responses” (2018) para 2.15.

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/722418/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_summary\\_of\\_responses.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722418/Taxing_gains_made_by_non-residents_on_UK_immovable_property_summary_of_responses.pdf)

document to a repealed provision of TCGA 1992 is to be read as including, in relation to times, circumstances or purposes in relation to which the corresponding provision has effect, as or (as the context may require) as including a reference to that corresponding provision.

This sub-paragraph applies only so far as the context permits.

(6) The generality of this paragraph is not to be affected by specific transitional, transitory or saving provision made elsewhere by this Schedule.

(7) This paragraph has effect instead of section 17(2) of the Interpretation Act 1978.

This is standard form in rewrite legislation.

Para 123-125 sch 1 FA 2019 provides power to correct rewrite errors.

## 53.2 Charge to CGT/CT

### 53.2.1 Charge to CGT

Section 1(1) TCGA provides:

Capital gains tax is charged for a tax year on chargeable gains accruing<sup>3</sup> in the year to a person on the disposal of assets.

Section 1(1) refers to a “person” so it applies to individuals, trustees, companies and PRs. But companies are taken out of CGT, see below.

IT/CT are annual taxes, in the sense that the authority to levy them expires at the end of the tax year, and the taxes need to be re-applied each year, which is done in each year’s Finance Act.<sup>4</sup> That is not the case for CGT; but in practice this does not make any difference.

### 53.2.2 Charge to CT

Section 2 CTA 2009 provides:

(1) Corporation tax is charged on profits of companies for any financial year for which an Act so provides.

(2) In this Part [Part 2 CTA 2009] “profits” means income and chargeable gains, except in so far as the context otherwise requires.

---

<sup>3</sup> See 14.2.4 (Accruing: Gains).

<sup>4</sup> **Section 4(1) ITA**  
Income tax is charged for a year only if an Act so provides.

**s.2(1) CTA 2009**  
Corporation tax is charged on profits of companies for any financial year for which an Act so provides.

Section 4 CTA 2009 provides:

Capital gains tax is not charged on gains accruing to a company in respect of which the company is chargeable to corporation tax, or would be so chargeable but for an exemption.

This meshes with s1(2) TCGA which provides:

As a result of section 4 of CTA 2009, capital gains tax is not charged on gains accruing to a company, but corporation tax is chargeable instead in accordance with-

- (a) section 2 of CTA 2009,
- (b) Chapter 2 of this Part [Part 1 TCGA], and
- (c) other relevant provisions of the Corporation Tax Acts.

Thus companies are subject to CT on chargeable gains, and non-companies are subject to CGT.<sup>5</sup>

### 53.2.3 “Disposal”

Disposal matters because gains accrue on a disposal and in the absence of a disposal there is (normally) no gain.

Section 21(2) TCGA provides:

For the purposes of this Act—

- (a) references to a disposal of an asset include, except where the context otherwise requires, references to a part disposal of an asset, and
- (b) there is a part disposal of an asset where an interest or right in or over the asset is created by the disposal, as well as where it subsists before the disposal, and generally, there is a part disposal of an asset where, on a person making a disposal, any description of property derived from the asset remains undisposed of.

Section 24(2) TCGA provides:

- (1) [a] Subject to the provisions of this Act and, in particular to sections 140A(1D), 140E(7) and 144,
- [b] the occasion of the entire loss, destruction, dissipation or extinction of an asset shall, for the purposes of this Act,

---

<sup>5</sup> A historical note: From 2013-2018 companies were subject to corporation tax on ordinary chargeable gains and to CGT on ATED and NRCGT gains. But we have now reverted to the straightforward pre-2013 rule.

- constitute a disposal of the asset
- [c] whether or not any capital sum by way of compensation or otherwise is received in respect of the destruction, dissipation or extinction of the asset.

#### 53.2.4 “Assets”

“Assets” matter because gains accrue on a disposal of assets, and in the absence of assets, gains do not normally accrue. Section 21(1) TCGA provides:

- All forms of property shall be assets for the purposes of this Act, whether situated in the UK or not, including—
- (a) options, debts and incorporeal property generally, and
  - (b) currency, with the exception (subject to express provision to the contrary) of sterling,
  - (c) any form of property created by the person disposing of it, or otherwise coming to be owned without being acquired.

### 53.3 CGT/CT chargeable amount

The CGT/CT rules are in s.1(3)/2A(1) TCGA. It is helpful to read these side by side:

#### CGT: s.1(3) TCGA

Capital gains tax is charged on the total amount of chargeable gains accruing to a person in a tax year after deducting-

- (a) any allowable losses accruing to the person in the tax year, and
- (b) so far as not previously deducted under this subsection, any allowable losses accruing to the person in any previous tax year.

#### CT: s.2A(1) TCGA

The amount of chargeable gains to be included in a company’s total profits for an accounting period is the total amount of chargeable gains accruing to the company in the period after deducting-

- (a) any allowable losses accruing to the company in the period, and
- (b) so far as not previously deducted under this subsection, any allowable losses previously accruing to the company while it was within the charge to corporation tax.

The rules are the same, except that companies are charged by reference to accounting periods and not tax years.

### 53.3.1 *CGT rules applied to CT*

Section 2D TCGA provides:

- (1) The total amount of chargeable gains to be included in a company's total profits for an accounting period is calculated for corporation tax purposes in accordance with capital gains tax principles.
- (2) All of the following questions are determined in accordance with the enactments relating to capital gains tax as if accounting periods were tax years-
  - (a) any question as to the amounts to be, or not to be, taken into account as chargeable gains or allowable losses,
  - (b) any question as to the amounts to be, or not to be, taken into account in calculating gains or losses,
  - (c) any question as to the amounts charged to tax as a company's gains, and
  - (d) any question as to the time when any amount is treated as accruing.
- (3) This section is subject to any provision made elsewhere by the Corporation Tax Acts.

As the rules are almost the same, the term CGT is sometimes used loosely (and conveniently, if strictly speaking, inaccurately) to include CT on chargeable gains.

### 53.3.2 *IT references in CT context*

Section 2E TCGA provides:

- (1) If the CGT enactments<sup>6</sup> contain any reference to-
  - (a) income tax, or
  - (b) the Income Tax Acts,
 the reference is, in relation to a company, to be read as a reference to corporation tax or the Corporation Tax Acts.
- (2) But-
  - (a) this does not affect references to income tax in section 39(2), and
  - (b) so far as the CGT enactments operate by reference to matters of any specified description, account is to be taken for corporation

---

<sup>6</sup> Section 2E(3) TCGA provides a commonsense definition: "In this section "the CGT enactments" means the enactments relating to capital gains tax."

tax purposes of matters of that description confined to companies but not of any confined to individuals.

### 53.3.3 *Interaction of CT/CGT*

Section 2F TCGA provides:

(1) This Act as it has effect in accordance with this Chapter is not to be affected in its operation by the fact that capital gains tax and corporation tax are distinct taxes.

(2) But this Act is, so far as it is consistent with the Corporation Tax Acts, to apply in relation to capital gains tax and corporation tax on gains as if they were one tax.

(3) Accordingly, a matter which in a case involving two individuals is relevant to both of them in relation to capital gains tax is in a similar case involving an individual and a company-

- (a) relevant to the individual in relation to capital gains tax, and
- (b) relevant to the company in relation to corporation tax.

### 53.3.4 *Interaction of IT/CGT*

Section 37(1) TCGA deals with the relationship between IT and CGT:

There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth

[a] charged to income tax as income of, or

[b] taken into account as a receipt in computing income or profits or gains or losses of,

the person making the disposal for the purposes of the Income Tax Acts.

In short: IT has priority over CGT, and there is no double charge.

What is the position if foreign income of a remittance basis taxpayer is not remitted? Section 37(1) applies: the income is "charged to income tax" even if no tax is paid because of the remittance basis.<sup>7</sup> But this question will not often arise.<sup>8</sup>

For other aspects of s.37, see:

---

7 See 2.4.1 (Unremitted RFI "chargeable").

8 But it is possible to devise situations where the question could arise, for instance, if foreign source income arises to a remittance basis taxpayer from an asset which was UK situate for CGT purposes.

<b>Topic</b>	<b>See para</b>
Interaction of TiL/CGT	21.14.4
Interaction of disguised interest/CGT	25.24.1
Interaction of s.624/CGT	44.12

For completeness: s.37(5) TCGA contains some exceptions to the general rule:

This section shall not preclude the taking into account in a computation of the gain, as consideration for the disposal of an asset,  
 [a] of the capitalised value of a rentcharge (as in a case where a rentcharge is exchanged for some other asset) or  
 [b] of the capitalised value of a ground annual or feu duty, or  
 [c] of a right of any other description to income or to payments in the nature of income over a period, or to a series of payments in the nature of income.

Rentcharges cannot be created after 1977, and feu duty (a Scots law concept) was abolished in 2004, so para [a] and [b] are obsolete.<sup>9</sup> That leaves para [c]. It is difficult to see the reason for it, but fortunately it rarely if ever arises in practice. The rule should be abolished, but the topic of Annual Payments is a dusty corner which needs review in its entirety.<sup>10</sup>

## 53.4 CGT/CT: Territorial scope

### 53.4.1 “Chargeable” gain

Section 15(2) TCGA provides:

Every gain shall, except as otherwise expressly provided, be a chargeable gain.

The expression “chargeable” gain is a label which brings in an uncountable number of rules, for standard drafting to provide a CGT exemption is to direct that gains of a specified nature are not chargeable. However, the term “chargeable” gain does not bring in a territorial limitation: it does not mean gains on which CGT/CT is charged. Gains are in principle “chargeable” even if:

---

<sup>9</sup> Rentcharges Act, 1977, section 3; The Abolition of Feudal Tenure etc (Scotland) Act 2000, section 7; 56(1).

<sup>10</sup> See 30.13 (Annual Payments: Critique).

- (1) The gains accrue to a non-resident or non-UK domiciled person; and
- (2) The gains are not subject to CGT/CT.

### 53.4.2 “Chargeable” asset

The expression “chargeable asset” has at least 3 different definitions in the TCGA. This expression is found in:<sup>11</sup>

<b>TCGA</b>	<b>Topic</b>	<b>See para</b>
s.25	Asset ceases to be chargeable	53.6
s.159	Roll-over relief	<i>Not discussed</i>
s.139	Reconstructions	<i>Not discussed</i>
s.171	CG group relief	60.29
sch 4B para 10	Transfer linked with trustee borrowing	58.12
para 7 sch 7	Relief for gift of business asset	<i>Not discussed</i>

The four most important of these definitions are as follows:

<b>s.25/s.159</b>	<b>s.171</b>	<b>para 10 sch 4B</b>
For the purposes of this section an asset is at any time a chargeable asset in relation to a person if, were it to be disposed of at that time,	For this purpose an asset is a "chargeable asset" in relation to a company at any time if, were the asset to be disposed of by the company at that time,	For the purposes of sub-paragraph (1) an asset is a chargeable asset if
any chargeable gains accruing to him on the disposal would be chargeable to capital gains tax under section 1A(3)(a) or to corporation tax under section 2B(3).	any gain accruing to the company would be a chargeable gain chargeable to corporation tax as a result of section 2B(3) or (4).	a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

Also note para 32 sch 7AC TCGA (substantial shareholding relief):

Any exemption conferred by this Schedule shall be disregarded in determining whether shares are “chargeable shares”, or an asset is a “chargeable asset”, for the purposes of any enactment relating to corporation tax or capital gains tax.

---

<sup>11</sup> This is not a complete list.  
FD\_53\_Chargeable\_Gains.wpd

One might use the expression “chargeable asset” loosely to mean an asset which gives rise to a gain within the territorial scope of CGT/CT. But given the different definitions, I prefer to avoid it as a general term, and I only use the expression in discussion of provisions where it is found, so it is clear which definition is applicable.

### 53.4.3 Territorial scope

There are four classes of the charge:

<b>Taxpayer</b>	<b>CGT</b>	<b>CT</b>	<b>See para</b>
UK resident	s.1A(1)	s.2B(1)	<i>See below</i>
<b>Non-resident</b>			
UK branch/agency/PE	s.1A(3)(a), s.1B	s.2B(3)	53.5
Interest in UK land	s.1A(3)(b), s.1C	s.2B(4)	54.6.3
Land-rich asset	s.1A(3)(c), s.1D	s.2B(4)	54.2

The CGT/CT rules for UK residents are in s.1A(1)/2B(1) TCGA. It is helpful to read these side by side:

#### **CGT: s.1A(1) TCGA**

A person who is UK resident for a tax year is chargeable to capital gains tax on chargeable gains accruing to the person in the tax year on the disposal of assets wherever situated.

#### **CT: s.2B(1) TCGA**

A company which is resident in the UK in an accounting period is chargeable to corporation tax on chargeable gains accruing to the company in the period on the disposal of assets wherever situated.<sup>12</sup>

### 53.4.4 “UK resident for a tax year”

Section 1A(4) TCGA provides:

For the purposes of this Chapter [Chapter 1 Part 1 TCGA] a person is “UK resident” for a tax year if the person is resident in the UK during any part of the tax year.

Under the SRT, an individual is resident (or not) for an entire tax year and not during part of a year;<sup>13</sup> so for an individual, s.1A(4) restates the

12 Section 2B(2) TCGA identifies an exemption which applies for CT and not for CGT: “This is subject to Chapter 3A of Part 2 of CTA 2009 (exemption from charge in respect of profits of foreign permanent establishments).”

13 See 9.1 (Residence throughout tax year).

general rule.

The s.1A(4) rule matters for a trustee (a non-individual):

- (1) For general tax purposes a trustee may be resident during part of a year;<sup>14</sup> but
- (2) For the purposes of Chapter 1 Part 1 TCGA, ie for the purposes of the charge to CGT, the trustee is resident for the whole tax year, and so chargeable on gains of a non-resident part of the year.<sup>15</sup> There is no split-year relief.

Thus one may not know until the end of the tax year whether a non-resident trust is subject to CGT. This might on occasion be helpful, in circumstances when tax on a UK trust is less than tax on a non-resident trust.<sup>16</sup>

#### 53.4.5 Charge on non-resident

A non-resident person is in general outside the scope of CGT. This is the case

- regardless of domicile and
- regardless of the situs of the asset disposed of (except for land/land rich assets).

(By contrast income tax is charged on UK source income, and IHT is charged on UK situate property, regardless of the residence or domicile of the individual.)

This general rule is subject to five exceptions. The first three are in s.1A/2B TCGA. It is helpful to read these side by side:

**CGT: S.1A(3) TCGA**

**CT: s.2B(3) TCGA**

---

14 See 9.15 (Split year of trustees and PRs).

15 A historical note: the position was different pre-2019, though it makes no difference; see 8.9.3 (Trustee changes residence).

16 This is (unsurprisingly) not common, but *Estera Trust (Jersey) v Singh* [2019] EWHC 2039 (Ch) offers an example: an appointment of UK trustees could reduce the IT charge on a purchase of own shares to a CGT charge. And “this course is perfectly proper and no question of illegitimate tax avoidance arises”; see at [9].

A person who is not UK resident for a tax year<sup>17</sup> is chargeable to capital gains tax on chargeable gains accruing to the person in the tax year on the disposal of-

*[Branch/agency]*

(a) assets situated in the UK that

[i] have a relevant connection to the person's UK branch or agency and

[ii] are disposed of at a time when the person has that branch or agency (see section 1B),<sup>18</sup>

*[UK land]*<sup>19</sup>

(b) assets not within paragraph (a) that are interests in UK land (see section 1C), and

*[Land-rich asset]*<sup>20</sup>

(c) assets (wherever situated) not within paragraph (a) or (b) that

A company which is not resident in the UK is chargeable to corporation tax on chargeable gains that-

*[Permanent Establishment]*

(a) accrue to the company on the disposal of assets situated in the UK that

have a relevant connection to the company's UK permanent establishment (see section 2C),

(b) accrue at a time when it has that permanent establishment, and

(c) are, in accordance with sections 20 to 32 of CTA 2009, attributable to that permanent establishment.

(4) In addition, a company which is not resident in the UK is chargeable to corporation tax on chargeable gains accruing to the company on the disposal of assets not within subsection (3) that are-

(a) interests in UK land, or

(b) assets (wherever situated) not within paragraph (a) that

17 See 53.4.4 ("UK resident for a tax year").

18 See 53.5 (Trade through UK branch/PE).

19 See 54.2 (Charge on land/land-rich assets).

20 See 54.10 (Substantial indirect interest).

[i] derive at least 75% of their value from UK land  
 [ii] where the person has a substantial indirect interest in that land (see section 1D and Schedule 1A).

[i] derive at least 75% of their value from UK land  
 [ii] where the company has a substantial indirect interest in that land.

Other exemptions are:

- (1) Temporary non-residents<sup>21</sup>
- (2) Exploration/exploitation assets on the continental shelf (not discussed in this work)

It follows that an individual (wherever domiciled) can in principle avoid CGT if they dispose of appropriate assets before they become UK resident or if they postpone the disposal until they become non-resident. A simple form of CGT planning for an individual whose stay in the UK is a short-term one is not to dispose of assets giving rise to chargeable gains while UK resident.

### 53.5 Trade through UK branch/PE

It is helpful to read the CGT/CT rules side by side:

#### CGT: s.1B(1) TCGA

For the purposes of section 1A(3)(a) a person has a UK branch or agency at any time if, at that time, the person carries on a trade, profession or vocation in the UK through a branch or agency there.

#### CT: s.2C(1) TCGA

For the purposes of section 2B(3) a company has a UK permanent establishment at any time if, at that time, the company carries on a trade<sup>22</sup> in the UK through a permanent establishment there.

#### 53.5.1 *Relevant connection*

It is helpful to read the CGT/CT rules side by side:

---

21 See 10.1 (Temporary non-residence). This is not technically an exception to the general rule, as the legislation does not impose CGT on gains accruing to a non-resident. It deems the gains to accrue later, when the individual is resident. But it comes to the same thing.

22 Section 2B(5) TCGA provides: "In this section references to a trade include an office and references to carrying on a trade include holding an office." But a company does not often hold an office, so this will not often arise.

**CGT: s.1B(2) TCGA**

For the purposes of section 1A(3)(a) an asset has a relevant connection to a person's UK branch or agency if-

(a) it is, or was, used in or for the purposes of the trade, profession or vocation at or before the time of the disposal,

(b) it is, or was, used or held for the purposes of the branch or agency at or before that time, or

(c) it is acquired for use by or for the purposes of the branch or agency.

**CT: s.2C(2) TCGA**

For the purposes of section 2B(3) an asset has a relevant connection to a company's UK permanent establishment if-

(a) it is, or was, used in or for the purposes of the trade at or before the time of the disposal,

(b) it is, or was, used or held for the purposes of the permanent establishment at or before that time, or

(c) it is acquired for use by or for the purposes of the permanent establishment.

**53.5.2 Used in/for purposes of trade**

The expression "used in or for the purposes of a trade" is found in:

<b>TCGA</b>	<b>Topic</b>	<b>See para</b>
s.1B(2)/2C(2)	Territorial limits of CGT/CT on gains	<i>Discussed here</i>
s.80	Charge on emigration of trust	11.4
Sch 3ZAA	Exit charge payment by installments	11.7
Para 5 sch A1	Trading exemption for land-assets	54.8.5

This expression was discussed in *Marsh v HMRC*.<sup>23</sup>

In a trade of property dealing in the UK by a non-resident the real property assets situated in the UK constitute the stock. Since stock is we think "used in ... the trade" the assets disposed of are within [what is now s.1B(2)] TCGA.

That seems right. In *Marsh* this conclusion did not matter, because if the assets are trading stock then the chargeable gain would be nil.<sup>24</sup> The point is however important for the application of the land-asset trading

23 [2017] UKFTT 320 (TC) at [77].

24 at [78]. See 53.3.4 (Interaction of IT/CGT)

exemption to property trading/development companies.<sup>25</sup>

### 53.5.3 1989 transitional relief

Section 1B(4) TCGA provides:

In the case of a profession or vocation carried on by a person, an asset does not have a relevant connection to the person's UK branch or agency if-

- (a) the asset was only used in or for the purposes of the profession or vocation before 14 March 1989, or
- (b) the asset was only used or held for the purposes of the branch or agency before that date.

This will now rarely if ever apply. It would be a simplification if it were repealed.

### 53.5.4 DT relief

s.1B(3)/2C(3) TCGA flag up DT relief for branch/agency and PE:

#### **CGT: s.1B(3) TCGA**

Section 1A(3)(a) does not apply to a person who, as a result of Part 2 of TIOPA 2010 (double taxation arrangements), is exempt from income tax for the tax year in respect of the profits or gains of the branch or agency.

#### **CT: s.2C(3) TCGA**

Section 2B(3) does not apply to a company which, as a result of Part 2 of TIOPA 2010 (double taxation arrangements), is exempt from corporation tax for the accounting period in respect of the profits of the permanent establishment.

## **53.6 Asset ceases to be chargeable**

Section 25 TCGA supplements the charge on assets of a branch/agency:

(1) Where an asset ceases by virtue of becoming situated outside the UK to be a chargeable asset in relation to a person, he shall be deemed for all purposes of this Act—

- (a) to have disposed of the asset immediately before the time when it became situated outside the UK, and
- (b) immediately to have reacquired it, at its market value at that time.

(2) Subsection (1) above does not apply—

---

<sup>25</sup> See 54.8.5 (Property development company).

- (a) where the asset becomes situated outside the UK contemporaneously with the person there mentioned ceasing to carry on a trade<sup>26</sup> in the UK through a branch or agency, or
  - (b) where the asset is an exploration or exploitation asset. [Not discussed in this work]
- (3) Where an asset ceases to be a chargeable asset in relation to a person by virtue of his ceasing to carry on a trade in the UK through a branch or agency, he shall be deemed for all purposes of this Act—
- (a) to have disposed of the asset immediately before the time when he ceased to carry on the trade in the UK through a branch or agency, and
  - (b) immediately to have reacquired it, at its market value at that time.
- (3A) Subsection (3) above shall not apply if—
- (a) the person ceasing to carry on the trade is a company, and
  - (b) on ceasing to carry on the trade the asset is disposed of in circumstances in which section 139 or 171 applies.
- (5) Subsection (3) above does not apply to an asset which is a chargeable asset in relation to the person there mentioned at any time after he ceases to carry on the trade in the UK through a branch or agency and before the end of the chargeable period in which he does so.
- ...

Section 25(7) TCGA provides the definition of chargeable asset:<sup>27</sup>

For the purposes of this section an asset is at any time a chargeable asset in relation to a person if, were it to be disposed of at that time, any chargeable gains accruing to him on the disposal would be chargeable to capital gains tax under section 1A(3)(a) or to corporation tax under section 2B(3).

See too 11.7 (Payment by instalments).

### 53.6.1 *UK land within s.25*

Section 25ZA TCGA provides:

---

<sup>26</sup> Section 25(8) TCGA provides: “This section shall apply as if references to a trade included references to a profession or vocation.”

<sup>27</sup> See 53.4.2 (“Chargeable” asset).

- (1) This section applies if an interest in UK land<sup>28</sup> is deemed to have been disposed of under section 25(3) by a person at any time.
- (2) The gain or loss that, but for this subsection, would have accrued to the person at that time is not to accrue at that time.
- (3) But, on a subsequent disposal by the person of the whole or part of the interest in UK land, the whole or a corresponding part of the gain or loss is treated as accruing on the subsequent disposal.
- (4) This gain or loss is in addition to any gain or loss that actually accrues on the subsequent disposal.
- (5) A disposal to which section 171 (transfers within a group) applies does not count as a subsequent disposal for the purposes of this section.
- (6) A person may elect for a disposal deemed to have been made under section 25(3) to be excluded from the operation of this section.
- (7) An election made by a company must be made within 2 years after the day on which the deemed disposal occurs.

## 53.7 Gain in split year

### 53.7.1 *Gain in split year: Individual*

Section 1G TCGA provides the usual split-year rule:

- (1) If, as respects any individual, a tax year is a split year, sections 1A(1) and 1E have effect subject to the modifications made by this section.
- (2) Gains accruing to the individual in the overseas part of the tax year are chargeable to capital gains tax only if they accrue on the disposal of assets within section 1A(3).<sup>29</sup>

Thus gains of the overseas part of a split year of an individual are in principle not subject to CGT.

### 53.7.2 *Gain in split year: Trust*

Trustees are subject to CGT on gains in the whole of a year in which they become non-resident or in which they become UK resident (unless DT relief applies).<sup>30</sup> There is no good reason for that rule and it gives rise to an anomaly:

---

28 Defined by reference in ss(8): “In this section “interest in UK land” has the meaning given by section 1C.”

29 See 53.4.5 (Charge on non-resident).

30 The position is different for IT: see 9.15 (Split year of trustees and PRs).

- (1) If a UK trust becomes non-resident, gains of the entire year are in principle subject to CGT (DT relief might be available).
- (2) If a UK trust transfers its assets to a non-resident trust, gains arising after the transfer are in principle not subject to CGT.

So a transfer could be better than a trust migration.

### 53.8 Date of disposal/acquisition

The date of disposal is fundamental for CGT as that is the date that the gain accrues. The acquisition date may also be important.

The CG Manual provides:

**CG14250 date of disposal: introduction** [Jul 2019]

You must establish the correct date of disposal of an asset. This will determine the correct period of assessment and the tax rules which apply. It may affect the rate of tax, relief for losses, valuation and so on.

..

The date of disposal of the person who disposes of an asset will be the date of acquisition of the person who acquires it.

There is some scope to select the date of disposal, so this topic is also important for CGT planning.

#### 53.8.1 *Unconditional contract*

Section 28(1) TCGA provides:

Subject to section 22(2), and subsection (2) below, where an asset is disposed of and acquired under a contract the time at which the disposal and acquisition is made is the time the contract is made (and not, if different, the time at which the asset is conveyed or transferred).

The CG Manual provides:

**CG14261 date of disposal: contracts for disposal** [Jul 2019]

TCGA92/S28 comes into operation only if the contract is completed, or in other words, if the disposal actually takes place. It does not deem a disposal to take place. But when the disposal has taken place in accordance with the contract, it fixes the date of that disposal for capital gains purposes.

This was confirmed in the House of Lords decision in *Jerome v Kelly*, 76 TC 147.

### 53.8.2 *Contract law background*

The question whether, and when, a contract is made is a matter of contract law. The CG Manual makes some comments:

**CG14262 date of disposal: oral contracts** [Jul 2019]

A contract, other than a contract in respect of land, need not necessarily be in writing....

In considering whether an oral contract for sale existed, you will need to examine the facts of the case carefully, by reference to such documents and correspondence as exist, and in the light of the actions of the parties. The basic question will be whether the facts are consistent with an agreement which was binding on the parties.

### 53.8.3 *Oral contract: sale of land*

It is necessary to understand the land law background. In Scotland, and in England from 1989, an oral contract for the sale of land is not possible: a contract must be made in writing.

In England before 1989, the contract was valid but unenforceable. That made a difference. The CG Manual provides:

**CG14262 date of disposal: oral contracts** [Jul 2019]

A contract, other than a contract in respect of land, need not necessarily be in writing. An oral contract may not be enforceable, but this does not prevent it from being a contract of disposal for CGT purposes. There is authority for this in the case of *Thompson v Salah*, 47 TC 559: the principles of this case apply for CGT purposes although it concerned Case VII Schedule D (short term gains).

*Thompson v Salah* involved an oral contract for the sale of land. It was possible for all contracts in respect of land to be oral up to 26 September 1989. With effect from 27 September 1989 onwards, however, the Law of Property (Miscellaneous Provisions) Act 1989 requires all contracts in respect of land in England and Wales to be in writing. ...

In England this is now of historical interest only. But in Northern Ireland, the land law remains as England was before 1989: an oral contract for the sale of land is unenforceable but not void.<sup>31</sup> So *Thompson v Salah* continues to be relevant there.

---

31 See s.2 Statute of Frauds (Ireland) 1695; *Hamilton v Judge* [2010] NICA 49.

The CG Manual repeats these same points in CG25853 but it is not necessary to set that out here.

#### 53.8.4 *Conditional contract*

Section 28(2) TCGA provides:

If the contract is conditional (and in particular if it is conditional on the exercise of an option) the time at which the disposal and acquisition is made is the time when the condition is satisfied.

*Eastham v Leigh London* 46 TC 687 concerned a development lease, that is, the tenant undertook to put up a building on the land, in consideration for which the landlord promised to grant the lease. The language of the agreement was conditional in form:

*If* the said building shall have been completely finished to the satisfaction of the said Surveyor ... and the Tenants shall have performed and observed all the stipulations and conditions on their part contained ... *then* the Landlords shall grant to the Tenants a Lease...

But this was not a conditional contract, in the s.28 sense, or in the ordinary sense (if different):

Although clause 4 is couched in conditional language ... it amounts to no more than this: it provides that if the tenants perform their part of the contract then the landlords will perform their part of the contract; in other words, it is a recognition of the fact that the obligations of the parties are mutual and that the granting of the lease will in fact follow the completion of performance of the obligations of the tenants. That is not, in my judgment, a condition precedent to the contract at all; it is part of the terms of the contract. You may call it a condition if you please, but it does not make it a condition precedent to the existence of a contract, it merely indicates that it is part of the terms of the bargain, just as in all contracts for sale the terms of the bargain are customarily described as conditions of sale.

Similarly *Michaels v Harley House*:

the important difference ... between a true condition precedent which it is not within a contracting party's power to bring about, even though he may undertake to use his best endeavours to bring it about, and a promissory condition which the party does have power to fulfil or to

cause to be fulfilled. In this case the share sale agreement was said to be conditional on completion of the sale of the freehold to the company. But ... completion of the sale and purchase of the freehold was something that TWD had power to bring about, and which it undertook to bring about.<sup>32</sup>

It seems to me that the terminology of condition precedent/subsequent, or true condition precedent/promissory condition, is not ideal for expressing this distinction. However that may be, at least the position is clear.

The CG Manual provides:

**CG14270 date of disposal: conditional contracts** [Jul 2019]

It can be difficult to recognise whether a contract is conditional. Many contracts contain conditions which are to be fulfilled. A contract is only conditional within the meaning of TCGA92/S28 if particular conditions have to be satisfied before the contract becomes a binding document. These are called 'conditions precedent'. When these conditions are met the contract becomes legally binding. At that point the contract has become unconditional. The date on which the conditions are met is the date of disposal.

Other conditions in contracts are called 'conditions subsequent'. These may require the parties to do various things before completion or may establish how the contract is to be performed. But they do not prevent the contract from being binding with immediate effect. If they are not met the contract remains a binding contract but the vendor or purchaser may be able to sue for breach of contract.

In *Lyon v Pettigrew* 58 TC 452, Walton J said

The words 'contract is conditional' have traditionally been used to cover really only two types of case. One is a 'subject to contract' contract, where there is clearly no contract at all ... and the other is where all the liabilities under the contract are conditional upon a certain event.

He went on to give an example of a conditional contract:

It would, for example, be possible for a hotelier to make a booking with a tour operator conditionally upon the next Olympic Games being held in London. Then, until it had been decided that the next Olympic Games were going to be held in London, there would be no effective contract: the whole contract would be conditional, the

---

32 [1998] Lexis Citation 3110.

whole liabilities and duties between the parties would only arise when the condition was fulfilled.

(There is a useful examination of the meaning of ‘conditional’ in *Eastham v Leigh London & Provincial Properties Ltd* 46 TC 687.)

### 53.8.5 Options

A full discussion of the CGT treatment of options requires a chapter.

In short, options involve two disposals:

- (1) A disposal of the option, when granted; and
- (2) A disposal of the underlying property, when the option is exercised

The CG Manual provides:

**CG14275 date of disposal: options** [Jul 2019]

An option is not in itself a conditional contract but operates as an offer which is irrevocable during the option period. See CG12300+. The grant of an option, made either for good consideration or by deed, gives rise to a binding contract to keep the offer open.

Where in the normal way the option agreement is unconditional, the date of the disposal of the option is given by TCGA92/S28 (1) as the date of that agreement.

Where an option to buy is exercised, the offer is thereby accepted so that a separate unconditional contract is made in relation to the asset which is the subject of the offer. The date of the disposal of that asset is given by Section 28(1) as the date of exercise of the option.

### 53.8.6 Postpone disposal date

Obvious CGT planning for individuals is to postpone disposals until non-resident.<sup>33</sup> The CG Manual discussion is lengthy and pedestrian, but the practitioner needs to read it to see how HMRC may approach the issues. The CG Manual provides:

**CG25800 avoidance risk on emigration** [Nov 2019]

When an individual plans to emigrate from the UK they will often want to dispose of their assets located in the UK before departure. This is particularly true of privately run businesses carried on in the UK but it is often also true of other property located in the UK. For such assets it

---

<sup>33</sup> A pre-departure share for share/loan note exchange will not do; see 53.18.2 (CGT reorganisation relief TAAR).

may be necessary, or at least convenient, for the individual to be in the UK to deal with negotiations for the sale. The individual may also need to have a definite sale arranged in order to ensure he or she has funds for use in the country to which he or she is emigrating.

The emigrating individual will have an expectation that their residence position may change and that this may affect their CGT liability.

If the disposal occurs before the date of departure the individual will be liable to a charge to UK CGT in respect of the chargeable assets disposed of.

But there is no form of capital gains 'exit charge' applying to individuals when they emigrate from the UK (see CG13400).

...For 2013-14 and later years an individual will either be resident or not resident in the UK for the year, however split year treatment may apply.

If the disposal occurs in the non UK part of a split year the gain will normally be exempt because it is outside of the scope of TCGA92/S2 (unless the individual later resumes residence in the UK and the temporary non-residence rules in TCGA92/S2 or the other exceptions in CG10978 apply).

So if the sale is genuinely postponed and the individual's residence position has changed by the date of disposal then there will be no charge to UK CGT. However, enquiries might reveal that despite appearances the disposal actually occurred on an earlier date ...

**CG25805 establishing the correct time when a gain arises** [Nov 2019]

An individual intending to emigrate from the UK and dispose of assets may arrange his or her affairs so that although they have certainty or near-certainty that the sale will occur before their UK residence position changes, it appears that the disposal for tax purposes takes place after that date.

The CG Manual then sets out three ways to attack this planning:

There are a number of circumstances in which CGT liability may arise notwithstanding that the date of disposal appears to be after the date of emigration. These are where it can be shown that

[1] there was a binding agreement or contract for sale on or before the date their residence position changes

[2] a business was carried on in the UK through a branch or agency in the period from the date of emigration to the date of disposal...

[3] The disposal falls in a period of temporary non residence see CG26100+.

**CG25820 establishing the correct time when a gain arises: establishing basic facts** [Nov 2019]

When an individual claims that a disposal is exempt because of the actual date of disposal (see CG12700+) you should firstly establish the facts concerning two basic points:

- what is the date of disposal in a written contract? and
- what is the individual's residence status on that date?

In the case of a disposal under an unconditional contract the date of disposal is the date the contract is entered into not the date of completion .... However, it is not unknown for individuals and/or their agents to quote the date of completion as the disposal date.

It can therefore be worth checking that the date quoted is not in fact the completion date.

Oh dear. Leaving aside unrepresented taxpayers, could that really happen very often?

It can therefore be worth checking that the date quoted is not in fact the completion date.

### 53.8.7 *Binding contract pre-departure*

The CG Manual provides:

**CG25850 delayed written contracts** [Nov 2019]

The most common situation is for the individual to negotiate the terms for a disposal but to delay signing the written contract until after the date of departure from the UK. One indicator that this may have happened will be if there is a very short interval between the date their residence position changes and the date the contract is signed.

Cases have been seen where the vendor leaves the UK with a copy of the contract in his possession and posts it from the foreign airport on arrival there. Alternatively, he gives his solicitor a power of attorney under which the solicitor can sign and exchange the contracts on behalf of the vendor once he is outside the UK. There are many other variations.

The author's apparent indignation seems to me to be misplaced.

In most straightforward cases, where there is no question of a continuing business ... it will not be possible to show there is liability to CGT. An agreement, oral or written, which remains 'subject to contract' is not a binding contract.

Where a formal written contract is entered into after emigration, there is a presumption that the parties intend to leave the transfer unagreed until that time even if it is not explicitly 'subject to contract'. It may be possible to displace that presumption if evidence can be obtained ... that the disposal was not in fact conditional or 'subject to contract' at the time of emigration, see CG25805.

**CG25860 binding contract pre-dating emigration** [Nov 2019]

A disposal occurs at the earliest time at which there is a binding contract between the parties. Except where there is a statutory requirement for a contract to be in writing if it is to be valid (see CG25853 above), it does not matter whether the contract is oral or written. [The manual refers to *Thompson v Salah*, discussed 53.8.3 (Oral contract: sale of land), and continues:]

Establishing the existence of a binding contract or agreement, oral or written, in advance of the formal contract presents considerable difficulty, see CG25850 above, and requires the facts of the case to be established in detail. Usually this will involve reviewing the correspondence, notes of meetings, telephone conversations, etc which have taken place between the vendor and purchaser (or more usually their professional representatives) prior to the date of signing the formal documents, to see whether there is evidence of a binding oral agreement or whether the correspondence itself constitutes a binding written agreement. It will not usually be worthwhile to undertake such a detailed review unless there are strong prima facie indications of a pre-emigration binding agreement.

If a binding agreement prior to the date of formal documentation can be established, the date of the earlier agreement is the date of disposal for CGT purposes.

In circumstances like these, I would have thought a binding contract would be most unusual.

**...CG26020 splitting a single contract** [Nov 2019]

In this type of case, what would normally have been included in a single contract for sale is split into two contracts. For example, a farmer owning a farmhouse and associated farmland emigrates; he claims to have sold the farmhouse prior to the date his residence position changes (possibly to give immediate access to capital) and the farmland after the date his residence position changes and this points to the fact that two separate contracts have been entered into. Relief under TCGA92/S222 is claimed on the disposal of the farmhouse. In such cases, it may be

possible to sustain an argument that, in reality, there is only a single disposal for capital gains purposes, the date of disposal of the farmland and the farmhouse being the same: that is to say, the earlier of the two dates.

The argument seems far-fetched, though it depends on the facts.

**CG26030 conditional contracts** [Nov 2019]

Cases have been seen where it is claimed that the date of disposal for capital gains purposes does not occur until the satisfaction of a condition written into the terms of the agreement for sale. To decide whether a condition is such as to make a contract conditional within the terms of TCGA92/S28(2) can be difficult. You will need to consider the full facts of the case in the context of contract law. There is guidance on dates of disposal and conditional contracts at CG14250+ and CG14270+.

**CG26040 options and cross-options** [Nov 2019]

Sometimes the owner, before emigrating, grants an option to a potential purchaser to buy the asset, that option to be exercised during a specified period following the owner's emigration. ... With pure delay cases, however, there may be evidence to show that the option was a sham and that the vendor is assured of his sale before he leaves the UK.

These are cases where the vendor and purchaser each grant an option to the other party to sell/buy the asset which is the subject of the agreements. Invariably in these cross-options cases, the options are granted before the vendor leaves the UK, but one of the options is exercised (usually by the purchaser) after the vendor's date of departure.

...

The argument seems very far-fetched, though it depends on the facts.

53.8.8 *Postpone disposal: GAAR*

The GAAR guidance provides:

**D17 Unconditional contract**

This example is intended to illustrate tax planning where arrangements are structured so that the disposal of an asset falls within a particular period.

**D17.1 Background**

D17.1.1 The Government announces at Autumn statement that, from 6 April 20XX, the rate at which chargeable gains are charged to tax will be reduced from the current level.

**D17.2 The arrangements**

D17.2.1 Taxpayer A has concluded negotiations to dispose of land and buildings to Taxpayer B with an intended completion date of 1 Jan 20XX. Taxpayer A having obtained tax advice renegotiates with Taxpayer B for the unconditional contract date and completion of the disposal to be after 6 April 20XX and to allow Taxpayer B exclusive occupation of the land and buildings rent free from 1 Jan 20XX.

D17.2.2 The sale is completed on 10 May which results in a substantial capital gain to Taxpayer A. The disposal takes place after 6 April 20XX for tax purposes.

**D17.3 The relevant tax provisions**

Sections 1, 2 and 28 TCGA 1992.

**D17.4 The taxpayer's tax analysis**

D17.4.1 The gain should be taxed according to the new rate of CGT in force from 6 April.

**D17.5 What is the GAAR analysis under s207(2) of FA 2013**

D17.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?

The substantive results of the transactions are consistent with the principles on which the relevant provisions are based. The rate of capital gains tax has been reduced from 6 April and the disposal is charged according to the rule in s28 TCGA 1992 that a disposal by way of unconditional contract is treated as taking place at the time of the contract.

**D17.5.2 Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?**

Yes. The contract was delayed so as to take advantage of the reduced rate of tax applying after 5 April 20XX whilst the purchaser was given unusual rights of occupation from the originally agreed completion date.

**D17.5.3 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?**

No. The gain is charged to tax at the rate of tax in force at the time.

**D17.5.4 Does the arrangement include any of the indicators of abusiveness within s207(4) of FA 2013**

No.

**D17.5.5 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?**

Yes. Gains are charged at the rate of tax in force at the time of the contract for disposal.

**D17.6 Conclusion**

D17.6.1 On the facts the arrangements are not abusive and HMRC would not seek to apply the GAAR.<sup>34</sup>

As is common throughout the GAAR guidance, this example selects easy facts, so the answer is straightforward and provides no help in borderline cases.

**53.9 Pre-arrival rebasing**

Unless the temporary non-resident rules apply, basic planning for someone coming to the UK is to realise gains when non-resident. I refer to this as **“pre-arrival rebasing”**. (Conversely, postpone realising losses until resident.)

**53.10 Share pooling and matching**

*Davies v Hicks* explains the background:

One matter on which [CGT has] always had detailed rules is the identification or matching of disposals of fungible assets (like shares of the same class) with acquisitions of assets of the same kind. If a taxpayer (1) acquires 100 ordinary shares in a company in year 1 for £x, (2) acquires another 100 shares of the same class in year 2 for £y, and (3) sells 100 shares in year 3 for £z, how is his CGT worked out? Which shares is he taken to have sold, and what is their base value for CGT? The legislation ... has always provided that the identification of shares disposed of with shares acquired (or the ‘matching’ ... a more commonly used expression, though the statutes have used the word ‘identify’) is governed by specific rules laid down in the statutes from time to time, and is not determined by any specific matching which can be shown to have existed on the particular facts of any disposal.<sup>35</sup>

This topic often arises in the context of non-residents/non-doms, so I consider it in the round. I refer to the rules as **“share pooling/matching”**, though the label is not wholly apt, as the rules apply to fungible assets, not just shares.

---

34 HMRC, “GAAR Guidance” (2017) Part D

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

35 *Davies v Hicks* [2005] EWHC 847 (Ch) at [8].

Sections 104-106A TCGA provide two approaches to the issue:

- (1) Share pooling
- (2) Arrangements of prompt acquisition/disposal, or prompt disposal/re-acquisition, informally known as bed-and-breakfasting. I refer to these as “**share-matching rules**”.

A constant series of amendments over the years has resulted in scrappy drafting.

I do not consider:

- pre-2008 transitional rules
- share reorganisations and stock dividends
- employee share rules
- CT rules

### 53.10.1 *Share pooling*

Section 104(1) TCGA provides for share pooling:

Any number of securities of the same class acquired by the same person in the same capacity shall for the purposes of this Act (subject to express provision to the contrary) be regarded as

[a] indistinguishable parts of a single asset

[b] growing or diminishing on the occasions on which additional securities of the same class are acquired or some of the securities of that class are disposed of.

I refer to this single asset as the s.104 pool.

Share pooling is academic if all the pooled shares are disposed of in a single transaction, but it matters for a part-disposal of the pool.

The CG Manual provides:

**CG51575 The Section 104 Holding In Detail** [May 2020]

...Because the Section 104 holding is treated as a single asset the part disposal rules of TCGA92/S42 apply on a disposal of less than all the shares in the holding. In strictness the apportionment should be made using the A/A+B formula where A equals disposal proceeds of sale and B the market value of the remaining asset. But in practice the apportionment may be made by reference to the number of shares sold.

The CG Manual gives examples:

**CG51590 Share Identification Rules For Capital Gains Tax From 6.4.2008:**

**Examples [May 2020]**

In each example it should be assumed that all acquisitions and disposals are arm's length transactions in shares listed on the stock exchange. The shares are all of the same class in the same company and held by a UK taxpayer in the same capacity. Figures for disposal proceeds are net of incidental costs of disposal.

**EXAMPLE 1 (Ms Davy)**

D makes the following acquisitions and disposals<sup>36</sup>

Date	Transaction	No shares	Purchase/sale price
15 April 2006	buys	1,000	£1,300
4 August 2006	buys	1,000	£1,450
19 January 2007	buys	500	£950
16 March 2010	sells	2,000	£6,850
7 April 2010	buys	2,000	£6,790
10 December 2010	sells	2,200	£7,700

Some of D's purchases were made before 5 April 2008, but her disposals are made after that date so the pooling arrangements apply. Under TCGA92/S106A, see CG50464, her disposals must be identified with acquisitions in the following order

- disposal on 16 March 2010 - this is matched with the 2,000 shares acquired on 7 April 2010. A gain £60 (£6,850 - £6,790) arises. Because the shares bought on 7 April are identified under the "bed and breakfast" rule, they do not enter the pool.
- disposal on 10 December 2010 - this is a part disposal from the Section 104 holding.

Before the disposal, the Section 104 holding comprised the following -

Shares:  $1,000 + 1,000 + 500 = 2,500$

Cost:  $£1,300 + £1,450 + £950 = £3,700$

D sold 2,200 out of 2,500 shares so on a simple apportionment the shares sold have a cost of £3,256. Her chargeable gain is therefore  $£7,700 - £3,256 = £4,444$ .

The Section 104 holding remaining after the disposal comprises 300 shares at a cost of £444.

**EXAMPLE 2 (Mr Browne)**

B makes the following acquisitions and disposals<sup>37</sup>

36 For clarity I have set this out in tabular form rather than the layout of the Manual.

37 For clarity I have set this out in tabular form rather than the layout of the Manual.

Date	Transaction	No shares	Purchase/sale price
17 August 2008	buys	10,000	£2,500
1 April 2009	buys	10,000	£2,600
8 October 2009	1 for 5 rights issue	4,000	£1060
10 December 2012	sells	7,500	£3,000

The 1 for 5 rights issue is a reorganisation of the company's share capital to which TCGA92/S127, see CG51700+, applies. The rights issue shares and their cost are simply added to the Section 104 holding.

Shares:  $10,000 + 10,000 + 4,000 = 24,000$

Cost:  $£2,500 + £2,600 + £1060 = £6,160$

B sold 7,500 out of 24,000 shares so on a simple apportionment the shares sold have a cost of £1,925. His chargeable gain is therefore  $£3,000 - £1,925 = £1,075$ .

The Section 104 holding remaining after the disposal comprises 16,500 shares at a cost of £4,236.

### EXAMPLE 3 (Mrs Mountain)

M makes the following acquisitions and disposals<sup>38</sup>

Date	Transaction	No shares	Purchase/sale price
27 May 1979	buys	7,500	£18,750, worth £21,000 on 31/3/1982
6 February 1988	buys	4,000	£16,500
28 July 1993	buys	4,000	£17,000
31 March 2005	buys	6,000	£29,000
13 June 2013	sells	16,500	£114,675

Up to 5 April 2008, M's 1979 purchase formed a 1982 holding, the 1988 and 1993 purchases together formed a Section 104 holding and the 1999 purchase were treated as a number of individual assets.

These distinctions are not relevant in calculating the chargeable gain on the disposal in 2013.

Before the disposal, the Section 104 holding comprised the following -

Shares:  $7,500 + 4,000 + 4,000 + 6,000 = 21,500$

Cost:  $£21,000$  (market value at 31 March 1983 replaces cost for shares held on that date)  $+ £16,500 + £17,000 + £29,000 = £83,500$

Note that the costs carried from the "old" Section 104 holding do not include indexation.

M sold 16,500 out of 21,500 shares so on a simple apportionment the shares sold

---

38 For clarity I have set this out in tabular form rather than the layout of the Manual.

have a cost of £64,081. Her chargeable gain is therefore  $£114,675 - £64,081 = £50,594$ .

The Section 104 holding remaining after the disposal comprises 5,000 shares at a cost of £19,419.

#### EXAMPLE 4

The trustees of the Peninsula Trust make the following acquisitions and disposals<sup>39</sup>

Date	Transaction	No shares	Purchase/sale price
24 September 1997	buy	15,000	£6,750
30 January 2001	3 for 5 rights issue	9,000	£3,600
14 June 2004	buy	12,000	£13,800
26 November 2005	1 for 4 rights issue	9,000	£9,450
23 February 2010	sell	20,000	£39,000

Up to 5 April 2008, the shares acquired on 24 September 1997 together with those acquired in the rights issue on 30 January 2001 and some of those acquired in the rights issue on 26 November 2005 formed a Section 104 holding. The shares acquired in June 2005 and the remaining shares acquired in the rights issue in November 2005 were treated as a number of individual assets.

These distinctions are not relevant in calculating the chargeable gain on the disposal in 2010. In particular, it is not necessary to break down the second rights issue to arrive at the trustees' chargeable gain on this disposal.

Before the disposal, the trustees' Section 104 holding comprised the following-Shares:  $15,000 + 9,000 + 12,000 + 9,000 = 45,000$

Cost:  $£6,750 + £3,600 + £13,800 + £9,450 = £33,600$

Note that the costs carried from the "old" Section 104 holding do not include indexation.

The trustees sold 20,000 out of 45,000 shares so on a simple apportionment the shares sold have a cost of £14,934. Their chargeable gain is therefore  $£39,000 - £14,934 = £24,066$ .

The Section 104 holding remaining after the disposal comprises 25,000 shares at a cost of £18,666.

#### 53.10.2 Share-matching

On a disposal, the order of matching is:

(1) Assets acquired on the day of disposal ("**same-day rule**")

---

<sup>39</sup> For clarity I have set this out in tabular form rather than the layout of the Manual.

- (2) Assets acquired in 30 days from the date of disposal (“**30-day rule**”)<sup>40</sup>
- (3) Assets in the s.104 pool
- (4) Assets acquired following the disposal (and not already identified under stage (2) above), taking the earliest acquisition first: s.105(2) TCGA

The rules slightly restrict the scope for tax planning by prompt disposal and re-acquisition. This might be done:

- (1) to obtain a tax advantage:
  - (a) to realise a capital loss
  - (b) to realise a gain within the annual exemption
  - (c) for pre-arrival rebasing but at the same time
- (2) to effectively retain the asset, and minimise the commercial risk of holding cash and not the asset

The arrangement is known as bed-and breakfasting, and is said not to constitute tax avoidance.<sup>41</sup>

### 53.10.3 *Same-day rule*

Section 105(1) TCGA provides the same-day rule:

Paragraphs (a) and (b) below shall apply where securities of the same class are acquired or disposed of by the same person on the same day and in the same capacity—

- (a) [i] all the securities so acquired shall be treated as acquired by a single transaction and
  - [ii] all the securities so disposed of shall be treated as disposed of by a single transaction, and
- (b) all the securities so acquired shall, so far as their quantity does not exceed that of the securities so disposed of, be identified with those securities [ie, the securities acquired are identified with the securities disposed of].

### 53.10.4 *Analysis of identification rule*

---

<sup>40</sup> HMRC describe this rule as the “bed and breakfast” rule. They do not refer to the same day rule as a bed and breakfast rule, which does have the connotation of an overnight stay.

<sup>41</sup> See 49.14.7 (Established practice).

The same-day/30-day rules both use the term identification. This is synonymous with “matching” which is the more commonly used word.<sup>42</sup>

Identification is a symmetrical relationship, ie if acquired securities are identified with disposed-of securities, then the disposed-of securities are identified with the acquired securities.

*Davies v Hicks* was a CGT avoidance scheme. In short:

- (1) UK trustees sold shares and held cash
- (2) Foreign trustees were appointed
- (3) The foreign trustees reacquired the same shares within 30 days

The trustees made a disposal of shares at step (1). But under the 30-day rule, the disposed-of shares were identified with the re-acquired shares, and in computing the CGT computation on the disposal at step (1) the gain was computed as the sale price less the acquisition cost at step (3), and on that basis no gain arose on that disposal.

The trustees also made a (deemed) disposal of the trust fund on the trust migration at step (2).<sup>43</sup> The trust fund was (actually) cash and no gain accrues on the disposal of cash. Here, HMRC argued that the effect of the 30-day rule was that the trustees were deemed to hold the shares not the cash, and so there was a deemed disposal of these deemed shares, on which a deemed gain accrued. So the Court had to consider the nature and effect of the share identification rule. HMRC’s argument was rejected:

20.. In my view s.106A is a computational section, and I believe that that applies to s.106A(5)(a) just as much as to all the other detailed rules in the section. What triggers the operation of the section is a disposal of securities (see s.106A(1)), and the purpose of the section is to lay down rules as to how the chargeable gain or allowable loss on that disposal is to be computed. When that computation has been made the purpose of the section has been fulfilled.

21.. If there is not a disposal of securities the section does not begin to apply. Most disposals will be actual disposals. The section certainly can apply to deemed disposals, but the deemed disposal must be one provided for by some provision other than s.106A itself. Further, and

---

42 That is self-evident, but if authority is needed, see the passage from *Davies v Hicks* set out above.

43 See 11.4 (Charge on emigration of trust).

even more importantly, for s.106A to apply the subject matter of the actual or deemed disposal must be securities... When there is a disposal, actual or deemed, of such assets ... , the shares disposed of are matched with shares acquired in accordance with the rules in s.106A . Once they have been so matched the gain or loss on the disposal is computed accordingly. When that process has been completed the application of s.106A to that particular disposal is at an end. The way in which the section operates on that disposal may affect the way in which it applies to future disposals by the same taxpayer of shares of the same class, but apart from that the section has no further statutory function to perform in consequence of the disposal of shares which caused it to apply in the first place. In particular it does not, in my judgment, operate additionally to cause the continuing settled property of the settlement to be treated for the purposes of different CGT provisions as consisting of assets different from those which actually are the continuing settled property. 23. ... So s.106A determined the CGT consequences of the actual disposal of AIT shares by the trustees on 24 October 2000, and the section could have had knock-on effects on the CGT consequences of future disposals of AIT shares by the same settlement. But in my firm opinion it could not and did not have the effect of changing the identity of other assets held by the trustees after they had sold the 100,000 shares, and causing those other assets to be regarded as shares in AIT when in fact they were not.

The reader may doubt whether a Court would make the same decision today. But the law is settled, at least below the level of the CA, and if the same facts re-occurred, no doubt the GAAR would apply.

#### 53.10.5 *Application of same-day rule*

Section 105(3) TCGA excludes share-pooling for securities acquired which fall within the same-day rule:

None of the securities which, by virtue of this section, are identified with other securities shall be regarded as forming part of an existing section 104 holding or as constituting a section 104 holding.

Suppose T has a s.104 pool of securities. There are two possibilities:

- (1) More securities are acquired and then disposed of on the same day. These are matched, they do not enter the s.104 pool, and there is no disposal from that pool.
- (2) Existing securities are disposed of and then the same securities re-

acquired on the same day. The securities acquired are identified with the securities disposed of, ie they are matched and so again, they do not enter the s.104 pool and there is no disposal from that pool.

The second case is more common. The identification here is fictional, in the sense that the disposed of securities would not (in the absence of the same-day rule) be identified with the acquired securities; because the donor did not hold the acquired securities at the time of the disposal.

### 53.10.6 30-day rule

Section 106A TCGA provides:

- (1) This section has effect for the purposes of capital gains tax (but not corporation tax) where any securities are disposed of by any person.
- (2) The securities disposed of shall be identified in accordance with the following provisions of this section with securities of the same class that have been acquired by the person making the disposal.
- (3) The provisions of this section have effect in the case of any disposal notwithstanding that some or all of the securities disposed of are otherwise identified—
  - (a) by the disposal, or
  - (b) by a transfer or delivery giving effect to it;but where a person disposes of securities in one capacity, they shall not be identified under those provisions with any securities which he holds, or can dispose of, only in some other capacity.

Although s.106A(3) is expressed to apply for s.106A, the same principles would apply for s.105.

Section 106A(4) provides:

Securities disposed of on an earlier date shall be identified before securities disposed of on a later date; and, accordingly, securities disposed of by a later disposal shall not be identified with securities already identified as disposed of by an earlier disposal.

Section 106A(5) TCGA provides the 30-day rule:

Subject to subsection (4) above, if within the period of thirty days after the disposal the person making it acquires securities of the same class, the securities disposed of shall be identified—

- (a) with securities acquired by him within that period, rather than with other securities; and

- (b) with securities acquired at an earlier time within that period, rather than with securities acquired at a later time within that period.

Section 106A(5ZA) TCGA provides

None of the securities which, by virtue of subsection (5) above, are identified with other securities shall be regarded as forming part of an existing section 104 holding or as constituting a section 104 holding.

This is the equivalent of s.105(3) TCGA.

Section 106A(9) TCGA provides:

The identification rules set out in the preceding provisions of this section have effect subject to subsection (1) of section 105, and securities disposed of shall not be identified with securities acquired after the disposal except in accordance with that section or subsection (5) above.

So the same-day rule has priority over the 30 day rule.

The 30-day rule is disapplied for non-residents. Section 106(5A) TCGA provides:

Subsection (5) above shall not require securities to be identified with securities which the person making the disposal acquires at a time when—

- (a) he is not resident in the UK, or
- (b) he is resident in the UK but is Treaty non-resident.

What matters is residence at the time of the acquisition, not at the time of disposal.

CG Manual offers some straightforward examples:

**CG51560 The “Same Day” And “Bed And Breakfast” Identification Rules [May 2020]**

**EXAMPLE 1**

Miss A has a Section 104 holding of 1,000 ordinary £1 shares in X plc. On 1 July 2011 she sells the whole 1,000 shares.

She buys the same number of ordinary £1 shares in X plc on 31 July 2011.

The acquisition is within the 30 day period after the disposal, so the disposal and later acquisition are matched in priority to identifying the disposal with the shares in the Section 104 holding.

**EXAMPLE 2**

Mr B has a Section 104 holding of 2,500 ordinary 10p shares in Y plc. On 27 March 2012 he sells 1,700 shares.

On 30 March 2012 he buys another 500 10p shares in Y plc.

The later acquisition of 500 shares does not become part of the Section 104 holding. They are identified with 500 of the shares disposed of on 27 March. The remaining 1,200 shares sold are identified with part of the Section 104 holding.

**EXAMPLE 3**

Mrs C has a Section 104 holding of 10,000 ordinary 25p shares in Z plc. On 28 February 2009 she sells 2,000 shares. On 31 March 2009 she buys another 3,000 of the same shares.

Mrs C's acquisition is not within the 30 days after the disposal. So her disposal cannot be identified under the 30 day rule with 2,000 of the 3,000 shares bought on 31 March. The shares disposed of are therefore identified with part of the Section 104 holding.

**53.10.7 Disposal exceeds acquisitions**

Section 105(2) TCGA provides:

Where the quantity of securities disposed of by any person exceeds the aggregate quantity of—

(a) the securities (if any) which are required by subsection (1) above to be identified with securities acquired on the day of the disposal [same-day rule],

(b) the securities (if any) which are required by section 106A(5) to be identified with securities acquired after the day of the disposal, [30 day rule] and

(c) the securities (if any) which are required by any of the provisions of sections 104, 106A or 107, or of Schedule 2, to be identified with securities acquired before the day of the disposal,

the disposal shall be treated as diminishing a quantity of securities subsequently acquired, and as so diminishing any quantity so acquired at an earlier date, rather than one so acquired at a later date.

This will not often arise.

**53.11 “Securities”**

There are separate definitions for the same-day and 30-day rules.

**53.11.1 Relevant securities**

Both definitions use the term relevant securities. This term is defined twice, with the same meaning, though with trivial drafting differences:

**s.108 TCGA**

In this section “relevant securities” means —

(a) securities, within the meaning of [Chapter 2 of Part 12 of ITA 2007 (accrued income profits)];<sup>44</sup>

(aa) qualifying corporate bonds;

(c) securities which are interests in a non-reporting fund, within the meaning of regulations [under section 354(1) of TIOPA 2010 (see Part 2 of [OFTR] 2009)

**s.106A(10) TCGA**

In this section ...“relevant securities” means—

(a) [Identical

(b) qualifying corporate bonds, and

(c) securities which are interests in a non-reporting fund, within the meaning of [OFTR] 2009 (see regulation 4(2)).

Armed with this definition, we can turn to the two definitions of “securities”

Section 104(3) TCGA provides:

For the purposes of this section [s.104] and sections 105, 107, 110 and 114 ...

“securities” does not include relevant securities as defined in section 108 but, subject to that, means—

(i) shares or securities of a company; and

(ii) any other assets where they are of a nature to be dealt in without identifying the particular assets disposed of or acquired;...

The label “securities” is misleading as the rules apply to fungible assets which are not securities. But no short label could be entirely accurate, and I adopt the statutory term, as anything else is even more confusing.

Section 106A(10) TCGA provides:

In this section ...

“securities” means any securities within the meaning of section 104 or

---

44 See 27.2 (AIP securities),

any relevant securities

I refer to “securities” within these definitions as “**s.104 Securities**” and “**s.106A Securities**” (the initial capital to signify the artificial nature of the definitions).

### 53.11.2 *Position of relevant securities*

Thus relevant securities are outside the same-day rule, and not subject to share pooling, but within the 30-day rule. That is significant for non-residents who are outside the 30-day rule. Is there any reason for treating relevant securities differently from other securities?

## 53.12 Pooling/ matching: Cryptoassets

HMRC comment on the application of these rules in relation to cryptoassets.<sup>45</sup>

### **CRYPTO22200: Pooling** [Apr 2021]

Pooling under TCGA92/S104 allows for simpler Capital Gains Tax calculations. Pooling applies to shares and securities of companies and also ‘any other assets where they are of a nature to be dealt in without identifying the particular assets disposed of or acquired’.

Where the nature of the tokens means they are dealt in without identifying the particular tokens being disposed of or acquired then the tokens should be pooled as per TCGA92/S104(3)(ii) (CG11820). This is commonly referred to as a ‘section 104 pool’. If TCGA92/S104(3)(ii) applies then the beneficial owner of the tokens will have a single pooled asset for Capital Gains Tax purposes that will increase or decrease with each acquisition, part disposal or disposal.

Non-Fungible Tokens (NFTs) are separately identifiable and so are not pooled.

Each type of token will need its own pool. For example, if a person owns bitcoin, ether and litecoin they would have three pools and each one would have its own ‘pooled allowable cost’ associated with it. This pooled allowable cost changes as more tokens of that particular type are acquired and disposed of.

Individuals must still keep a record of the amount spent on each type of token, as well as the pooled allowable cost of each pool.

### **Same day rule**

---

<sup>45</sup> See 97.35.1 (What cryptoassets are).

**TCGA1992/S105**

Where an individual makes acquisitions and disposals of a particular type of tokens on the same day then the same day rules ensure that the maximum number of CGT computations the individual will need to produce for that token type is one per calendar day.

When tokens of the same type are acquired and disposed of by the same individual on the same day and in the same capacity then:

- all the tokens acquired shall be treated as acquired in a single transaction
- all the tokens disposed of shall be treated as disposed of in a single transaction

The tokens acquired will, as far as possible, be matched with the tokens disposed of so that those tokens don't go into the section 104 pool:

- if the quantity of tokens acquired exceeds the number disposed of then the excess tokens will then be considered for the 30 day rule (covered below) and if that doesn't apply then they will go into the section 104 pool
- if the quantity of tokens disposed of exceeds the number acquired then the excess tokens will then be considered for the 30 day rule (covered below) and if that doesn't apply then they will be treated as a disposal from the section 104 pool.

**Acquiring tokens within 30 days of selling****TCGA1992/S106A**

If an individual disposes of tokens and then acquires, in the same capacity, tokens of the same type within the next 30 days then:

- the same day rule (covered above) is applied first if applicable
- the tokens acquired to which the 30 day rule applies don't go into the section 104 pool but instead are matched to the earlier disposal (or disposals) of tokens
- the tokens acquired to which the 30 day rule applies are matched to disposals on the basis of earliest disposal first
- if the quantity of tokens so acquired exceeds the number of tokens disposed of in the preceding 30 days then the excess tokens will go into the section 104 pool.

Further guidance on these rules is at CG51560.

**53.12.1 Examples**

The Crypto Manual provides:

**CRYPTO22251: Example 1 - basic section 104 pool disposal [Apr 2021]**

This example provides a basic insight into how a section 104 pool operates.

Victoria bought 100 token A for £1,000. On 18 September 20XX Victoria bought a further 50 token A for £125,000. Victoria is treated as having a single section 104 pool of 150 of token A and total allowable costs of £126,000:

Date	Quantity of token A	Pooled allowable costs
Opening balance	100	£1,000
18/09/20XX	+50	+£125,000
Closing balance	150	£126,000

On 1 December 20XX Victoria sells 50 of her token A for £300,000. Victoria will be allowed to deduct a proportion of the pooled allowable costs when working out her gain:

Consideration		£300,000
Less allowable costs	$£126,000 \times (50 / 150)$	(£42,000)
Gain		£258,000

Victoria will have a gain of £258,000 and she will need to pay Capital Gains Tax on this. After the sale, Victoria will be treated as having a single section 104 pool of 100 token A and total allowable costs of £84,000:

Date	Quantity of token A	Pooled allowable costs
Opening balance	150	£126,000
01/12/20XX	(50)	(£42,000)
Closing balance	100	£84,000

If Victoria then sold all 100 of her remaining token A then she can deduct all £84,000 of the allowable costs when working out her gain/loss.

**CRYPTO22252: Example 2 - application of the same day rule [Apr 2021]**

This example shows how the same day rule operates, as well as showing what happens to any tokens that can't be matched to the disposal.

Martyn holds 5,000 token B in a section 104 pool. He spent a total of £500 acquiring them, which is his pooled allowable cost.

On 23 June 20XX Martyn enters into the following transactions:

- Morning – he disposes of 1,000 token B for £800.
- Afternoon – he acquires 1,600 token B for £1,000.
- Evening – he disposes of 500 token B for £600.

Martyn's disposals both take place on the same day, so they are treated as a single disposal of 1,500 token B for £1,400. Martyn's acquisition takes place on the same day, so the acquisition is matched with the disposal. Martyn will need to work out the gain on his disposal of 1,500 token B as follows:

Consideration	$£800 + £600$	£1,400
Less allowable costs	$£1,000 \times (1,500 / 1,600)$	(£938)
Gain		£462

Martyn is unable to match the remaining 100 token B to disposals on the same day. Instead those 100 token B and their associated cost of £62 ( $£1,000 \times (100 / 1,600)$ ) will go into the section 104 pool. The section 104 pool now contains 5,100 token B and total pooled costs of £562:

Date	Quantity of token B	Pooled allowable costs
Opening balance	5,000	£500
23/06/20XX	+100	+£62

Closing balance      5,100                                  £562

**CRYPTO22253: Example 3 - application of the 30 day rule** [Apr 2021]

This example shows how the 30 day rule operates, as well as showing what happens to any tokens that can't be matched to the disposal.

Rachel holds 2,000 token C in a section 104 pool. She spent a total of £1,000 to acquire them, which is her pooled allowable cost.

Rachel enters into the following series of transactions:

- On 31 March 20XX Rachel disposes of 1,000 token C for £400.
- On 20 April 20XX Rachel disposes of 500 token C for £150
- On 21 April 20XX Rachel acquires 700 token C for £175
- On 28 April 20XX Rachel acquires 500 token C for £100
- On 1 May 20XX Rachel acquires 500 token C for £150

Acquisitions within 30 days of a disposal are matched on the basis of the earliest acquisition being matched to a disposal. The acquisitions on 21 April 20XX and 28 April 20XX take place within 30 days of the disposal on 31 March 20XX. This means that the acquisitions are matched to the disposal on 31 March 20XX as far as is possible. The acquisitions on 28 April 20XX and 1 May 20XX take place within 30 days of the disposal on 1 May 20XX. This means that the acquisitions are matched to the disposal on 31 March 20XX as far as is possible.

Rachel will need to work out the gain on her two disposals as follows:

31 March 20XX

Consideration	£400
Less allowable costs – 30 day (21/04 – 700 token C)	(£175)
Less allowable costs – 30 day (28/04 – 300 token C) $\text{£}100 \times (300 / 500)$	(£60)
Gain	£165

20 April 20XX

Consideration	£150
Less allowable costs – 30 day (28/04 – 200 token C) $\text{£}100 \times (200 / 500)$	(£40)
Less allowable costs – 30 day (01/05 – 300 token C) $\text{£}150 \times (300 / 500)$	(£90)
Gain	£20

Rachel is unable to match the remaining 200 token C to acquisitions within 30 days of the disposal on 20 April 20XX. Instead those 200 token C and their associated cost of £60 ( $\text{£}150 \times (200 / 500)$ ) will go into the section 104 pool. The section 104 pool now contain 2,200 token C and total pooled costs of £1,060:

Date	Quantity of token C	Pooled allowable costs
Opening balance	2,000	£1,000
01/05/20XX	+200	+£60
Closing balance	2,200	£1,060

**CRYPTO22254: Example 4 - interaction of same day rule with section 104 pool** [Apr 2021]

This example shows how to the same day rule and a part disposal of the section 104 pool interact.

Daniel holds 8,000 token D in a section 104 pool. He spent a total of £1,000 acquiring them, which is his pooled allowable cost.

On 31 January 20XX Daniel enters into the following transactions:

- Disposal of 5,000 token D for £500.
- Acquisition of 4,000 token D for £320
- Acquisition of 1,000 token D for £75
- Acquisition of 1,000 token D for £70
- Disposal of 2,000 token D for £142
- Acquisition of 500 token D for £35

Daniel’s disposals both take place on the same day, so they are treated as a single disposal of 7,000 token D for £642. Daniel’s acquisitions all take place on the same day, so they are treated as a single acquisition of 6,500 token D for £500.

Daniel’s acquisition and disposal take place on the same day, so the acquisition is matched with the disposal. The remaining 500 token D are treated as a part disposal of the section 104 pool. Daniel will need to work out the gain on his disposal as follows:

Consideration	£500 + £142	£642
Less allowable costs – same day (6,000 token D)	£320 + £75 + £70 + £35	(£500)
Less allowable costs – S104	£1,000 x (500 / 8,000)	(£63)
Gain		£79

Daniel will need to reduce his section 104 pool to 7,500 token D and total allowable costs of £937:

Date	Quantity of token D	Pooled allowable costs
Opening balance	8,000	£1,000
31/01/20XX	(500)	(£63)
Closing balance	7,500	£937

**CRYPTO22255: Example 5 - interaction of 30 day rule with section 104 pool [Apr 2021]**

This example shows how to the 30 day rule and a part disposal of the section 104 pool interact.

Melanie holds 14,000 token E in a section 104 pool. She spent a total of £200,000 acquiring them, which is her pooled allowable cost.

On 30 August 20XX Melanie sells 4,000 token E for £160,000.

Then on 11 September 20XX Melanie buys 500 token E for £17,500.

The 500 new tokens were bought within 30 days of the disposal, so they do not go into the section 104 pool. Instead, Melanie is treated as having disposed of:

- the 500 tokens she has just bought
- 3,500 of the tokens already in the section 104 pool

Melanie will need to work out her gain on the disposal of the 4,000 token E as follows:

Consideration		£160,000
Less allowable costs – 30 day (11/09 – 500 token E)		(£17,500)
Less allowable costs – S104 (3,500 token E)	£200,000 x (3,500 / 14,000)	(£50,000)
Gain		£92,500

Melanie still holds a section 104 pool of 10,500 token E. The section 104 pool has allowable costs of £150,000 remaining:

Date	Quantity of token E	Pooled allowable costs
------	---------------------	------------------------

Opening balance	14,000	£200,000
30/08/20XX	(3,500)	(£60,000)
Closing balance	10,500	£140,000

**CRYPTO22256: Example 6 - interaction of same day rule, 30 day rule and section 104 pool [Apr 2021]**

This example shows how the same day rule, 30 day rule and a part disposal of the section 104 pool interact.

Gulferaz holds 100,000 token F in a section 104 pool. He spent a total of £300,000 acquiring them, which is his pooled allowable cost.

Gulferaz enters into the following transactions:

- 31 July 20XX – acquisition of 10,000 token F for £45,000.
- 31 July 20XX – disposal of 30,000 token F for £150,000
- 5 August 20XX – disposal of 20,000 token F for £100,000
- 6 August 20XX – acquisition of 50,000 token F for £225,000
- 7 August 20XX – disposal of 100,000 token F for £150,000

Gulferaz's acquisition on 31 July 20XX takes place on the same day as a disposal so those transactions are matched as far as possible (that is 10,000 token F).

Gulferaz's acquisition on 6 August 20XX takes place within 30 days of the disposal on 31 July 20XX so that acquisition is matched with the disposal on 31 July 20XX as far as possible (that is 20,000 token F).

Gulferaz's acquisition on 6 August 20XX also takes place within 30 days of the disposal on 5 August 20XX so that acquisition is matched with the disposal on 5 August 20XX as far as possible (that is 20,000 token F).

The remaining 10,000 token F acquired on 6 August 20XX go into the section 104 pool as normal.

Gulferaz will need to work out his gains/losses on the three disposals as follows:

31 July 20XX

Consideration		£150,000
Less allowable costs – same day (10,000 token F)	£45,000	(£45,000)
Less allowable costs – 30 day (06/08 - 20,000 token F)	£225,000 x (20,000 / 50,000)	(£90,000)
Gain		£15,000

No token F go into or come out of the section 104 pool at this date.

5 August 20XX

Consideration		£100,000
Less allowable costs – 30 day (06/08 - 20,000 token F)	£225,000 x (20,000 / 50,000)	(£90,000)
Gain		£10,000

No token F go into or come out of the section 104 pool at this date.

6 August 20XX

The section 104 pool is changed as follows:

Date	Quantity of token F	Pooled allowable costs
Opening balance	100,000	£300,000
06/08/20XX	+10,000	+£45,000

Closing balance	110,000	£345,000	
7 August 20XX			
Consideration			£150,000
Less allowable costs – S104	£345,000 x (100,000 / 110,000)		(£313,637)
Loss			(£163,637)

The section 104 pool is changed as follows:

Date	Quantity of token F	Pooled allowable costs
Opening balance	110,000	£345,000
07/08/20XX	(100,000)	(£313,637)
Closing balance	10,000	£31,363

**CRYPTO22257: Example 7 - disposal of tokens to acquire different tokens ('crypto-to-crypto' exchange) [Apr 2021]**

Most types of tokens need to be purchased using another token. This means that a transaction may simultaneously affect two section 104 pools. This example illustrates how a transaction can affect two section 104 pools simultaneously.

Elina holds 100,000 token G in a section 104 pool. She spent a total of £300,000 acquiring them, which is her pooled allowable cost.

Elina enters into the following transactions:

- 31 August 20XX – acquisition of 10,000 token H (with a value of £3,200) for 1,000 token G (with a value of £3,200)
- 31 August 20XX – disposal of 5,000 token H (with a value of £1,700) for 600 token G (with a value of £1,920)
- 31 August 20XX – acquisition of 5,000 token H (with a value of £1,650) for 550 token G (with a value of £1,760)
- 4 September 20XX – disposal of 2,000 token H (with a value of £560) for 180 token G (with a value of £558)
- 16 September 20XX – acquisition of 4,000 token H (with a value of £1,080) for 400 token G (with a value of £1,080)
- 27 October 20XX – disposal of 12,000 token H (with a value of £2,400) for 900 token G (with a value of £2,430)

Elina entered into two acquisitions of token H on 31 August 20XX. These acquisitions are treated as a single acquisition of 15,000 token H on that date. That single acquisition is then matched as far as possible with the disposal of 5,000 token H on the same date. The remaining token H that were acquired go into a section 104 pool of token H.

Elina has also entered into two disposals of token G on 31 August 20XX. These two disposals are treated as a single disposal of 1,550 token G on that date. That single disposal is matched as far as possible with the acquisition of 600 token G on the same date. The disposal is then matched to the acquisition of 180 token G on 4 September 20XX. The remaining part of the disposal comes from the section 104 pool of token G. Elina's disposal of 2,000 token H on 4 September 20XX is matched with the acquisition of 4,000 token H on 16 September 20XX as the acquisition takes place within 30 days of the disposal.

Elina's acquisition of 180 token G on 4 September 20XX goes into the section 104 pool for token G.

Elina's disposal of 400 token G on 16 September 20XX comes from the section 104 pool

of token G.

Elina's disposal of 12,000 token H on 27 October 20XX comes from the section 104 pool for token H.

Elina's acquisition of 900 token G on 27 October 20XX goes into the section 104 pool for token G.

Elina will need to work out her gains/losses on the three disposals as follows:

31 August 20XX – disposal of token G

Consideration	Value of 15,000 token H acquired	£4,850
Less allowable costs – same day (600 token G)	Value of 5,000 token H disposed of on 31/08/20XX	(£1,700)
Less allowable costs – 30 day (04/09 – 180 token G)	Value of 2,000 token H disposed of on 04/09/20XX	(£560)
Less allowable costs – S104	$£300,000 \times 770 / 100,000 = £2,310$	(£2,310)
Gain		£280

31 August 20XX – disposal of token H

Consideration	Value of token G acquired	£1,920
Less allowable costs – same day (5,000 token H)	$(£3,200 + £1,760 = £4,960) \times 5,000 / 15,000$	(£1,653)
Gain		£267

4 September 20XX – disposal of token H

Consideration	Value of token G acquired	£558
Less allowable costs – 30 day (16/09 – 2,000 token H)	$£1,080 \times 2,000 / 4,000$	(£540)
Gain		£18

16 September 20XX – disposal of token G

Consideration	Value of token H acquired	£1,080
Less allowable costs – S104	$£297,690 \times 400 / 99,230$	(£1,200)
Loss		(£120)

27 October 20XX – disposal of token H

Consideration	Value of token G acquired	£2,430
Less allowable costs – S104		(£3,847)
Loss		(£1,417)

The section 104 pools are as follows:

Section 104 pool for token G

Date	Quantity of token G	Pooled allowable costs
Opening balance	100,000	£300,000
31/08/20XX - Disposal of 770 tokens	(770)	(£2,310)
Balance at 31/08/20XX	99,230	£297,690
16/09/20XX - Disposal of 400 tokens	(400)	(£1,200)
Balance at 16/09/20XX	98,830	£296,490
27/10/20XX - Acquisition of 900 tokens	+900	+£2,400
Balance at 27/10/20XX	99,730	£298,890

Section 104 pool for token H

Date	Quantity of token H	Pooled allowable costs
31/08/20XX - Acquisition of token H	+10,000	+£3,307

Balance at 31/08/20XX	10,000	£3,307
04/09/20XX - Acquisition of 2,000 tokens	+2,000	£540
Balance at 04/09/20XX	12,000	£3,847
27/10/20XX - Disposal of 12,000 tokens	(12,000)	(£3,847)
Pool ceases		£0

### 53.12.2 *Blockchain forks*

The CRYPTO Manual provides:

**CRYPTO22300: Blockchain forks** [Apr 2021]

Some cryptoassets are not controlled by a central body or person but operate by consensus amongst that cryptoasset's community. When a significant minority of the community want to do something different, they may create a 'fork' in the distributed ledger.

There are two types of forks, a soft fork and a hard fork. A soft fork updates the protocol and is intended to be adopted by all. No new tokens, or distributed ledger, are expected to be created. A hard fork is different and can result in new tokens coming into existence. Before the fork occurs there is a single distributed ledger. Usually, at the point of the hard fork a second branch (and therefore a new cryptoasset) is created. The distributed ledger for the original and the new cryptoassets have a shared history up to the fork. If an individual held tokens of the cryptoasset on the original distributed ledger they will, usually, hold an equal numbers of tokens on both distributed ledgers after the fork.

The value of the new tokens is derived from the original tokens already held by the individual. This means that section 43 Taxation of Capital Gains Act (TCGA) 1992 will apply.

After the fork the new tokens need to go into their own section 104 pool. Any allowable costs in the section 104 pool of the original cryptoassets are split between the two section 104 pools for the original tokens and the new tokens.

If an individual holds their tokens through an exchange, the exchange will make a choice whether to recognise the new tokens created by the fork.

Costs must be split on a just and reasonable basis under section 52(4) TCGA 1992. HMRC does not prescribe any particular apportionment method. HMRC has the power to enquire into an apportionment method that it believes is not just and reasonable.

The new tokens can only be disposed of if the exchange recognises the new tokens. If the exchange chooses not to recognise the new tokens then the individual may seek to apportion all of the allowable costs to the

original tokens. You will need to decide whether this is just and reasonable in the circumstances. The individual may instead apportion the costs but seek to make a negligible value claim in respect of the new tokens. You will need to consider whether the conditions for making a negligible value claim have all been satisfied. In cases of difficulty you should seek technical advice using the process for your business area.

### 53.12.3 *Airdrops*

The Crypto Manual provides:

**CRYPTO22350: Airdrops** [Apr 2021]

An airdrop is when an individual receives an allocation of tokens. For example, tokens that are given as part of a marketing or advertising campaign.

The cryptoasset using the airdrop typically has its own infrastructure (which may include a smart contract, blockchain or other form of distributed ledger technology) that operates independently of the infrastructure for an existing cryptoasset.

The airdropped tokens will need to go into their own section 104 pool unless the recipient already holds tokens of that cryptoasset, in which case the airdropped tokens will go into the existing section 104 pool. The value of the airdropped cryptoasset does not derive from existing tokens held by the individual, so section 43 TCGA 1992 does not apply.

### 53.12.4 *Losing private keys*

The Crypto Manual provides:

**CRYPTO22400: Losing private keys** [Apr 2021]

If an individual misplaces their private key (for example throwing away the piece of paper it is printed on), they will not be able to access their tokens. The private key still exists as part of the cryptography, albeit it is not known to the owner any more. Similarly the tokens will still exist in the distributed ledger. This means that misplacing the key does not count as a disposal for Capital Gains Tax purposes. More information can be found in CG13155.

If it can be shown there is no prospect of recovering the private key or accessing the tokens, a negligible value claim could be made. If HMRC accepts the negligible value claim, the individual will be treated as having disposed of and re-acquiring the tokens they cannot access so that they can crystallise a loss. Further guidance on negligible value claims is at CRYPTO22500.

### 53.12.5 *Bring defrauded*

The Crypto Manual provides:

**CRYPTO22450: Being defrauded** [Apr 2021]

HMRC does not consider theft to be a disposal, as the individual still owns the stolen asset and has a right to recover it. This means victims of theft cannot claim a loss for Capital Gains Tax.

Individuals who contract to acquire tokens but then do not receive the tokens they have paid for may not be able to claim a capital loss.

Individuals who contract to acquire tokens and do actually receive tokens, may be able to make a negligible value claim to HMRC if those tokens become worthless. If the tokens are worthless when acquired then a negligible value claim won't be allowed. This won't affect the ability of the individual to dispose of the tokens by other means to crystallise the capital loss.

### 53.13 Pooling/matching: ISAs

Reg 34 ISA regs 1998 provides:

(1) For the purposes of capital gains tax on the occasion when the title to account investments is transferred from an account manager to an account investor there shall be deemed to be a disposal and reacquisition by the account investor of those investments for a consideration equal to their market value at the date of the transfer.

(2) Sections 104 to 114 of the Taxation of Chargeable Gains Act 1992 shall apply for the purposes of pooling and identifying account investments as if—

(a) in section 106A after subsection (11) there were added—

(12) This section and sections 104, 110, 110A and 114—

(a) shall apply separately in relation to any securities which are held by a person as account investments so long as they are so held, and

(b) shall apply in relation to any such securities which became account investments by being transferred or renounced to an account manager or to a nominee for an account manager in the circumstances specified in regulation 7(2)(h) and (10)(a), (b) or (ba) as if they had been account investments—

(i) in the case of securities acquired by that person in accordance with the provisions of a savings-related share

- option scheme, which were transferred in the circumstances specified in regulation 7(2)(h)(i) and (10)(a), from the date of their acquisition by him, or
- (ii) in the case of securities appropriated to that person in accordance with the provisions of an approved profit sharing scheme, which were transferred in the circumstances specified in regulation 7(2)(h)(ii) and (10)(b), from the date when he directed the trustees to transfer the ownership of the securities to him or, if earlier, the release date in relation to those securities, or
  - (iii) in the case of securities which were plan shares of a Schedule 2 SIP before being transferred in the circumstances specified in regulation 7(2)(h)(iii) and (10)(ba), from the date when the securities ceased to be subject to the plan, and
- (c) while applying separately to any such securities, shall have effect as if that person held them in a capacity other than that in which he holds any other securities of the same class whether under another such account or otherwise.
- (13) In this section—
- (a) “account”, “account investment” and “account manager” have the same meanings as in the Individual Savings Account Regulations 1998 and “regulation” means a regulation of those Regulations;
  - (b) “approved profit sharing scheme” has the same meaning as in Chapter IV of Part V of the Taxes Act and “savings-related share option scheme” has the meaning given by paragraph 1 of Schedule 9 to that Act.”;
  - (c) “Schedule 2 SIP” and “ceased to be subject to the plan” shall be construed in accordance with the SIP code (see section 488(3) of ITEPA 2003); and
  - (d) “plan shares”, in relation to a Schedule 2 SIP, shall be construed in accordance with the SIP code (see section 488(3) of ITEPA 2003) except that—
    - (i) paragraph 87(6) of Schedule 2 to ITEPA 2003 (meaning of the word “shares” in the context of company reconstructions) shall not apply, and
    - (ii) in paragraph 88(2) of that Schedule (treatment of shares acquired under rights issue) the words “or securities or rights” shall be treated as omitted.

(b) [This amended 110A, repealed 2008]

### 53.13.1 Amendments to s.106A

Reg 34 ISA regs 1998 provides:

(3) Section 106A of the Taxation of Chargeable Gains Act 1992 shall apply for the purposes of identifying securities within the meaning of that section which are eligible to become account investments as if—

- (a) in subsection (4), there were added at the beginning the words “Subject to subsection (14) below”;
  - (b) in subsection (6), the words “subsections (4) and (5) above” were replaced with the words “subsections (4), (5) and (14)”;
- and

Amended as reg 34(3) directs, s.106A TCGA provides:

(4) Subject to subsection (14) below securities disposed of on an earlier date shall be identified before securities disposed of on a later date; and, accordingly, securities disposed of by a later disposal shall not be identified with securities already identified as disposed of by an earlier disposal.

...

(6) Subject to subsections ~~(4) and (5)~~ (4), (5) and (14) above, relevant securities disposed of shall be identified with relevant securities acquired at a later time, rather than with relevant securities acquired at an earlier time.

Reg 34 ISA regs 1998 provides:

(3) Section 106A of the Taxation of Chargeable Gains Act 1992 shall apply for the purposes of identifying securities within the meaning of that section which are eligible to become account investments as if—

- (c) after subsections (12) and (13), as added by paragraph (2), there were added—

“(14) Where a person disposes of securities and securities of the same class which were eligible for transfer to an account under regulation 7(2)(h) were—

- (a) held by him immediately before that disposal, or
- (b) acquired by him on the same day as that disposal, or
- (c) acquired by him within the period of thirty days after that disposal,

and those securities were acquired in the circumstances specified in

that regulation, he shall be treated as having first disposed of any securities of that class held or acquired by him which were not so eligible.”

Reg 34(4) amends provisions relating to share reorganisations, and is not discussed here.

## 53.14 2017 rebasing

### 53.14.1 *Rebasing reliefs*

This section discusses the relief in Para 41 sch 8 F(no.2)A 2017 which I call “**2017 rebasing**”. This is one of several rebasing reliefs:

Name of relief	Provision	See para
1982 rebasing	s.35 TCGA	<i>Not discussed</i>
2008 rebasing	para 126 Sch 7 FA 2008	57.46
2017 rebasing	para 41 sch 8 F(no.2)A 2017	<i>Discussed here</i>
UK land rebasing	sch 4AA TCGA	54.15
Rebasing on death	s.62(1) TCGA	84.5

Also see 19.12.14 (Rebasing/cleansing compared).

The professional bodies have published a set of Q&As with HMRC replies (“**Rebasing Q&As**”).<sup>46</sup> The edition history is:

Version	Date	ICAEW label
1	March 2018	Taxguide 06/18
2	May 2019	Taxguide 09/19

### 53.14.2 *2017 rebasing conditions*

Para 41 sch 8 F(no.2)A 2017 provides:

(1) This paragraph applies to the disposal of an asset by an individual (“P”) where-

P stands for person. But 2017 rebasing applies only to assets of

---

<sup>46</sup> The full title is “Rebasing and Adjustment to the CGT Foreign Capital Losses Election Professional Bodies Q&A”. See <https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-09-19-foreign-capital-losses.ashx> or <https://www.tax.org.uk/policy-technical/submissions/finance-no-2-act-2017-taxation-non-uk-domiciliaries>

individuals: it discriminates against assets held through trusts and companies. In the current HMRC view, it seems, the only acceptable form of ownership is direct absolute ownership.

There follow four conditions, or sets of conditions, which I call “**rebasement conditions (a) - (d)**”.

### 53.14.3 *Acquisition/disposal date*

Para 41 sch 8 F(no.2)A 2017 provides:

- (1) This paragraph applies to the disposal of an asset by an individual (“P”) where-
- (a) the asset was held by P on 5 April 2017

Para 41 sch 8 F(no.2)A 2017 provides:

- (1) This paragraph applies to the disposal of an asset by an individual (“P”) where ...
- (b) the disposal is made on or after 6 April 2017

### 53.14.4 *Condition (c): Situs of asset*

Para 41 sch 8 F(no.2)A 2017 provides:

- (1) This paragraph applies to the disposal of an asset by an individual (“P”) where...
- (c) the asset was not situated in the UK at any time in the relevant period

The relevant period matters as the asset must not be UK situate during that period. Para 41(2) sch 8 F(no.2)A 2017 provides:

- The relevant period is the period which-
- (a) begins with 16 March 2016 or, if later, the date on which P acquired the asset, and
  - (b) ends with 5 April 2017.

Perhaps this is an anti-forestalling rule.

### 53.14.5 *Qualifying individual*

Para 41 sch 8 F(no.2)A 2017 provides:

- (1) This paragraph applies to the disposal of an asset by an individual (“P”) where...
- (d) P is a qualifying individual.

“Qualifying individual” is a label for a set of rules. Para 41 sch 8 F(no.2)A 2017 provides:

(3) P is a qualifying individual if-

A set of four conditions then follow (“**qualifying individual conditions**”):

(3) P is a qualifying individual if-

- (a) section 809H of ITA 2007 (claim for remittance basis by long-term UK resident: charge)<sup>47</sup> applied in relation to P for any tax year before the tax year 2017-18

It may be worthwhile to make a remittance basis claim in order to obtain rebasing. An election for 2016/17 must be made by 5 April 2021.<sup>48</sup>

(3) P is a qualifying individual if ...

(b) P is not an individual who-

- (i) was born in the UK, and  
(ii) whose domicile of origin was in the UK

2017 rebasing does not apply to a formerly-domiciled resident.

(3) P is a qualifying individual if ...

(c) P was not domiciled in the UK at any time in a relevant tax year

A person who acquires a UK domicile of choice loses the relief.

(3) P is a qualifying individual if ...

(d) P met condition B in section 835BA of ITA 2007 [15-year rule]<sup>49</sup> in relation to each relevant tax year.

It is difficult to see why qualifying individual condition (d) must be met for each relevant tax year (not just 2017/18); but it will be rare that the condition is met in 2017/18 and not subsequently (unless the individual leaves the UK and does not return, in which case 2017 rebasing ceases to be an issue).

#### 53.14.6 “Relevant tax year”

---

47 See 16.12.1 (7 & 12-year residence tests).

48 See 117.6 (Claim time limit).

49 See 4.4.2 (IT/CGT dom condition B (15-year rule)).

“Relevant tax year” matters for two purposes:

**Qualifying individual condition: Requirement**

Condition (c): P must be non UK domiciled in each relevant tax year

Condition (d): P must meet the 15-year rule in each relevant tax year

Para 41(4) sch 8 F(no.2)A 2017 provides:

The relevant tax years are-

- (a) the tax year 2017-18, and
- (b) if the disposal was made after that tax year, all subsequent tax years up to and including that in which the disposal was made.

“Relevant tax year” is distinct from the term “relevant period”.<sup>50</sup>

53.14.7 *Effect of 2017 rebasing*

Assuming the rebasing conditions are satisfied, para 41(5) sch 8 F(no.2)A 2017 provides the relief:

In computing, for the purpose of TCGA 1992, the gain or loss accruing on the disposal, it is to be assumed that P acquired the asset on 5 April 2017 for a consideration equal to its market value on that date.

I refer to this as “**2017 rebasing**” to distinguish it from rebasing under the 2008 rules, and other occasions of rebasing.

The wording is based on s.35 TCGA (1982 rebasing).

Para 41(8) sch 8 F(no.2)A 2017 provides:

This Part of this Schedule has effect as if it were included in TCGA 1992.

The August 2016 consultation paper provides:

[1] Rebasing will apply on an asset by asset basis and there will be no requirement that any part of the sales proceeds relating to the part of the gain which arose before April 2017 should be left outside the UK.

[2] Where the asset was originally purchased with clean capital, the entire proceeds from the disposal can be brought to the UK without triggering a remittance. However, where it was purchased wholly or partly with foreign income and gains, an element of the disposal

---

<sup>50</sup> See 53.14.4 (Condition (c): Situs of asset).

proceeds will still relate to<sup>51</sup> those income and gains and so will be subject to the remittance basis in the normal way when the proceeds are brought to the UK.

Point [2] is correct, because rebasing only applies “in computing... the gain or loss accruing on the disposal”.

Offshore funds qualify for 2017 rebasing. The wording is designed to match reg 39(1) OFTR 2009 which provides that the starting point for calculating an offshore income gain is the amount which would be the gain on the disposal in question “for the purposes of TCGA 1992”.<sup>52</sup> HMRC agree.<sup>53</sup>

Deeply discounted securities and life policy gains do not qualify for 2017 rebasing, since the chargeable amounts are not chargeable gains or computed on CGT principles.

Rebasing applies to assets held through partnerships.<sup>54</sup>

Taxpayers should keep evidence relating to value on 6 April 2017, and, in appropriate cases, instruct valuers to prepare valuations, as a contemporary valuation is easier, cheaper, and likely to be more accurate, than one made some years later.

#### 53.14.8 *Inter-spouse transfer*

Para 41(6) sch 8 F(no.2)A 2017 provides:

Sub-paragraph (5) applies notwithstanding section 58(1) of TCGA 1992 (disposals between spouses).

Where 2-17 rebasing applies, an inter-spouse disposal does not cause it to be lost. Rebasing Q&As Q4 provides two straightforward examples, not set out here.

#### 53.14.9 *Rebasing: share matching*

Rebasing Q&As Q7 (Kiki) provides:

K is deemed domiciled in 2017/18 and qualifies for rebasing. She has

51 “Relate to” is an inaccurate paraphrase of the statutory wording, “derive from”. But it does not matter.

52 See 64.19.2 (Computation of OIG).

53 Rebasing Q&As Q1; for Carried Interest, see 69.15 (“Permitted deductions”).

54 This is self-evident, but if authority is needed, see Rebasing Q&As Q2.

a mixed fund investment portfolio that contains a significant amount of clean capital which she wants to cleanse. K does not, however, want to be out of the market for long or acquire different investments. As such:

- a new investment portfolio is opened for the clean capital;
- all the investments are sold on 19 June 2018;
- a cautious cleansing transfer (and nomination) to the new clean capital investment portfolio takes place;
- on 20 June 2018 acquisitions are made such that, once all the acquisitions are made, across the two portfolios K is left with exactly the same investments and in the same quantities as she held on 19 June 2018.

What is the tax analysis?

*Suggested answer:*

From a CGT perspective because there has been a re-acquisition within the period of 30 days after the disposal the base cost for the disposal is the acquisition cost of the new shares (that is the “bed and breakfasting rule”<sup>55</sup> applies).

The base cost for the shares K has in her portfolios as at 20 June 2018 is the rebased 5 April 2017 amount...

#### **HMRC Comment**

The CG analysis is OK and looks to be another mechanism to convert an asset to cash that goes to an account that can then be cleansed. HMRC can agree the cleansing aspects of this.

### 53.14.10 *Rebasing: currency fluctuation*

Rebasing Q&As Q8 provides:

HMRC’s view ... is that if a taxpayer receives \$1,000 of foreign income when it is worth £500 but brings it to the UK when it is worth £700 (due to forex movements) then he is considered to have made a taxable remittance of £700. (Equally if the funds are worth £300 when brought to the UK there is a taxable remittance of £300.)

... It should be noted that we think that the HMRC view is not the better technical interpretation ... <sup>56</sup>

The issue is, however, thrown into sharp focus by rebasing since the HMRC view does not result in the results one would expect given the Chancellor’s announcement

---

55 See 53.10.2 (Share-matching).

56 The practitioners view is correct: see 91.6 (Remittance basis: Conversion date).

Consider the following example:

The taxpayer (who is deemed domiciled in 2017/18 and qualifies for rebasing) has \$1 million of 2014/15 income which was worth £500,000 when received. It is then invested in an asset.

At 5 April 2017 it was worth \$1.2 million (worth £900,000 at that date) and sold for that amount on 7 April 2017.

The taxpayer remits the \$1.2 million (placed in a segregated account) to the UK immediately.

HMRC's interpretation is that the \$1.2 million represents:

- the \$1 million of original income, worth £750,000 at the date of remittance; and
- the £400,000 gain (that is £900,000 less £500,000) subject to rebasing relief.

Under this HMRC approach, since the entire mixed fund has been brought into the UK (so the remittance is not limited to the sterling value of the amount brought into the UK) the taxable remittance is £750,000 notwithstanding that the taxpayer has only remitted £900,000 of cash and expected to benefit from £400,000 rebasing relief.

In contrast, taking the alternative approach (as agreed by the professional bodies) with the same figures the \$1.2 million represents:

- the \$1 million of original income (£500,000); and
- the £400,000 gain (that is £900,000 less £500,000) subject to rebasing relief.

That is £900,000 is brought in per the mixed fund analysis, which agrees to the value of the sterling amount transferred. Only £500,000 is taxable meaning the taxpayer benefits in full from the £400,000 rebasing relief.

Given this issue what should be done in these circumstances?

**Suggested Answer:** Provided a consistent year on year approach is taken for each individual mixed fund bank account analysis the conversion of Remittance Basis foreign income to sterling can take place either on the date the income arises or when the income is remitted.

#### **HMRC Comments**

The gain is correct at £400k. HMRC's interpretation remains unchanged. The conversion of foreign currency into sterling is carried out using the spot rate on the date of remittance. HMRC does not agree the alternative approach suggested.

Rebasing Q&As Q9 provides:

Whilst HMRC in its manuals states that income in a foreign currency should be translated to sterling using the foreign exchange spot rate on remittance this is not the case for gains as there is clear case law to the contrary<sup>57</sup> ... As such, HMRC and practitioners agree on the position for gains.

How will rebasing work where just foreign chargeable gains were used wholly (or in part) to fund the acquisition?

**Suggested Answer:**

This is best explained by way of an example.

The taxpayer (who is deemed domiciled in 2017/18 and qualifies for rebasing) had \$1 million within a bank account (this traced to the sale of an investment in 2009/10 and represented clean capital of £400,000 and Remittance Basis foreign chargeable gains of £200,000).

This \$1 million was immediately re-invested in an asset such that the CGT base cost of the asset was £600,000 sterling.

At 5 April 2017 the new foreign asset was worth \$1.2 million (worth £900,000 at that date) and sold for that amount on 7 April 2017.

The taxpayer remits the \$1.2 million (placed in a segregated account) to the UK immediately.

The \$1.2 million represents:

- the \$1 million of original funds (£400,000 clean capital and £200,000 Remittance Basis foreign chargeable gains); and
- the £300,000 capital gain (that is £900,000 less £600,000).

That is £900,000 is brought to the UK per the mixed fund analysis, which agrees to the value of the sterling amount transferred.

**HMRC Comments**

I think the opening sentence is slightly confusing. Working out what gets remitted and how a gain is calculated are separate things.

On the example - I think it would be helpful if the example confirmed that the new asset was acquired straight after the sale of the investment, otherwise that raises questions on what the acquisition cost for CG would be. HMRC agrees the cleansing aspects of this.

*Example adjusted in line with HMRC comments.*

### 53.14.11 *Rebasing: Reorganisations*

Para 41(7) sch 8 F(no.2)A 2017 deals with corporate reorganisations:

Where under section 127 of TCGA 1992 (including that section as

<sup>57</sup> See 91.2 (CGT: Currency conversion date).

applied by sections 132, 135 and 136 of that Act) an original and a new holding of shares or other securities are treated as the same asset, the condition in sub-paragraph (1)(c) [non-UK situs]<sup>58</sup> applies to both the original and the new holding.

A reorganisation during the relevant period might convert a UK asset into a foreign asset which might arguably allow rebasing. A reorganisation after the relevant period should not matter.

One might have thought that s.137 TCGA (motive test) would be sufficient to prevent abuse; but there it is.

#### 53.14.12 *Rebasing: Remittance reliefs*

Para 42 sch 8 F(no.2)A 2017 deals with the interaction of 2017 rebasing and exempt property remittance relief:<sup>59</sup>

(1) This paragraph applies for the purposes of paragraph 41(1)(c) [non-UK situs] in the case of an asset which, having been situated outside the UK, becomes situated in the UK before the end of the relevant period.

(2) The asset is to be regarded as not situated in the UK at a time in the relevant period when—

- (a) it meets the condition in section 809Z(3)(a), (b) or (c) of ITA 2007 (public access),
- (b) it meets the condition in section 809Z3(3)(a), (b) or (c) of ITA 2007 (repairs),
- (c) the sole or principal purpose of its being situated in the UK is to sell it or put it up for sale, or
- (d) in the case of clothing, footwear, jewellery or a watch, it is for the personal use of—
  - (i) P or a husband, wife or civil partner of P,<sup>60</sup> or
  - (ii) a child or grandchild of a person within sub-paragraph (i), if the child or grandchild has not reached the age of 18.

(3) The asset is to be regarded as not situated in the UK at any time in the relevant period if it is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) of ITA 2007 applies but—

---

58 See 53.14.4 (Condition (c): Situs of asset).

59 See 18.29 (Exempt property).

60 Para 41(4) provides: “Section 809M(3)(a) and (b) of ITA 2007 (persons living together) apply for the purposes of sub-paragraph (2)(d)(i).” See App.3.4.1 (Cohabitee treated as spouse).

- (a) by virtue of section 809X(5)(c) of ITA 2007 (notional remitted amount less than £1000) it is treated as not remitted to the UK, or
- (b) by the end of the relevant period it has not failed to meet the temporary importation rule in section 809Z4 of ITA 2007.

### 53.14.13 *Election out of 2017 rebasing*

Para 43(1) sch 8 F(no.2)A 2017 provides:

An individual may make an election for paragraph 41 not to apply to a disposal made by the individual.

This may be useful if a loss arises.

The standard claim procedure rules apply.<sup>61</sup>

Para 43 sch 8 F(no.2)A 2017 continues:

- (3) An election under this paragraph is irrevocable.
- (4) All such adjustments are to be made, whether by way of discharge or repayment of tax, the making of assessments or otherwise, as are required to give effect to an election under this paragraph.

### 53.14.14 *Rebasing: Critique*

2017 rebasing was an afterthought, first suggested in the 2016 Budget, and perhaps HMRC did not think very deeply about it. The August 2016 consultation paper provides:

The government agrees that it would be punitive to require long-term resident non-doms to pay CGT on gains that have accrued on foreign assets held while the individual was a non-dom. To address these concerns, Budget 16 announced that those individuals who will become deemed-domiciled in April 2017 because they have been resident for 15 of the past 20 years will be able to rebase directly held foreign assets to their market value on 5 April 2017.

Rebasing is restricted to those who become deemed domiciled by clocking up 15 years residence by 2017/18. Someone who became UK resident in 2002/03 or before qualifies, and someone who became UK resident subsequently does not. What is the reason for that? It is a matter of

---

<sup>61</sup> See 117.2.3 (2017 rebasing election).

speculation since no reason was ever given. Perhaps it is thought that those who do not become deemed domiciled in 2017/18:

- (1) have more time in which to make disposals, taxed on the remittance basis, in anticipation of acquiring deemed domicile subsequently; or
- (2) have more time in which to arrange to cease to be UK resident.

Or perhaps it was thought presentationally desirable to offer some relief, but the smaller the relief the better. As it stands, the largesse is significant but its application is random.

### 53.15 CGT remittance basis

Para 1 sch 1 TCGA provides:

- (1) This paragraph applies in the case of an individual to whom the remittance basis applies<sup>62</sup> for a tax year if—
  - (a) in that year the individual disposes of foreign assets,<sup>63</sup>
  - (b) chargeable gains accrue to the individual on the disposal of those assets, and
  - (c) the gains are not taken outside the charge to capital gains tax as a result of section 1G (cases where tax year is a split year).
- (2) The gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.
- (3) The amount treated as accruing is equal to the full amount remitted to the UK<sup>64</sup> at that time.

The use of the word “individual” means that trustees and personal representatives do not qualify for the remittance basis.

The CGT remittance basis applies to foreign *situate* assets.<sup>65</sup> By contrast, the RFI remittance basis applies to foreign *source* income, which is a different concept.<sup>66</sup>

---

62 Para 5(2) sch 1 TCGA provides: “For the purposes of this Schedule any reference to “the remittance basis” applying to an individual for a tax year is to section 809B, 809D or 809E of ITA 2007 applying to the individual for the year.”

63 Para 5(1) sch 1 TCGA provides: “For the purposes of this Schedule “foreign asset” means an asset situated outside the UK.”

64 Para 5(3) sch 1 TCGA provides: “For the purposes of this Schedule any question as to whether, and when, amounts are “remitted to the UK” is determined in accordance with the rules in Chapter A1 of Part 14 of ITA 2007.”

65 See 98.1 (Situs of assets for CGT - Introduction).

66 See 15.6 (No source/deemed source).

See too 17.33 (Gain on disposal at undervalue).

### 53.15.1 *Disposal/accrual date*

The gain is treated as accruing at the date of the remittance. The gain is treated as not accruing on the date of the actual disposal, when it actually accrues. This is relevant for:

- (1) Rate of CGT: rates depend on when gains accrue, so one applies the rate in the year of remittance, not the year of disposal.
- (2) EIS reinvestment relief: time limits for EIS relief depend on when gains accrue (not when the disposal takes place).<sup>67</sup>

Time limits for rollover relief depend on the date of disposal.<sup>68</sup> The drafter of the former para 16(4) schedule A1 TCGA clearly considered that the pre-2008 CGT remittance basis altered the date of disposal, ie the asset is regarded as disposed of at the time of remittance (not at the time of the actual disposal).<sup>69</sup> But for business asset disposal relief (formerly known as entrepreneurs' relief), HMRC regard the date of disposal as the date of the actual disposal, not the date of remittance.<sup>70</sup>

## 53.16 Remittance basis and taper/indexation

### 53.16.1 *Taper relief*

Para 56 sch 2 FA 2008 provides:

- (1) The amendments made by para 31(2) and (3) have effect where the intervening year is the tax year 2008-09 or any subsequent tax year.
- (2) The amendments made by paras 41 and 43 have effect where the eligible year is the tax year 2008-09 or any subsequent tax year.
- (3) The other amendments made by paras 23 to 55 have effect in relation to chargeable gains accruing or treated as accruing in the tax year 2008-09 or any subsequent tax year.

The important provision here is para 56(3).<sup>71</sup> This removes taper relief on gains on disposals before 2008/09 which are remitted after 2008/09.

---

<sup>67</sup> Para 1 sch 5B TCGA.

<sup>68</sup> Section 152(3) TCGA

<sup>69</sup> See the 6th edition of this work, para 29.4.

<sup>70</sup> See 53.17.2 (Deadline for BADR claim).

<sup>71</sup> Para 56 (1)(2) relate to specialist topics, s.56A, 279A and 279B TCGA.

Computations of unremitted gains made before 2008 will need to be recomputed.

A different rule applies for s.1(3) amounts (trust gains).<sup>72</sup>

### 53.16.2 *Indexation relief*

Para 83 sch 2 FA 2008 provides:

The amendments made by paragraphs 77 to 82 [which abolish the indexation allowance] have effect in computing gains on disposals made on or after 6 April 2008.

Assuming that this refers to the actual disposal, the effect is that indexation relief continues to apply to gains on pre-2008 disposals which are remitted after 6 April 2008. This is the HMRC view. The CG Manual provides:

**CG25320 - Remittance basis: computing the foreign chargeable gain: indexation allowance and taper relief** [Nov 2019]

When dealing with remittance basis cases the foreign chargeable gain should be computed as at the date of the disposal using all the normal computational rules.

For disposals occurring after 5 April 1982 and before 6 April 1998 these rules will include an allowance for indexation up to the date of the disposal. No further allowance is due for indexation when the gain is remitted to the UK however long the interval is between the gain arising and the date of the remittance....

### 53.17 **BAD relief: Remittance basis**

The catchy name “business asset disposal relief” replaced “entrepreneurs’ relief” in 2020. Presumably the old name had become an embarrassment. A full discussion of the relief needs a book to itself.

The CGT liaison group (an HMRC led group involving the tax professional bodies) has issued a guidance note (the “**BAD relief note**”)<sup>73</sup> which is discussed here. For other issues on this relief, see:

<b>Topic</b>	<b>See para</b>
--------------	-----------------

---

<sup>72</sup> See 57.42 (s.1(3) amount at 5/4/2008).

<sup>73</sup> [http://www.tax.org.uk/system/files\\_force/file\\_uploads/120213%20ER%20Technical%20Questions%20and%20HMRC%20response.pdf?download=1](http://www.tax.org.uk/system/files_force/file_uploads/120213%20ER%20Technical%20Questions%20and%20HMRC%20response.pdf?download=1)

TNR: BAD relief claim	10.10
BAD relief: Mixed fund	53.17.4
BAD relief: Trade group	60.33
s.86/87 and BAD relief interaction	56.17

### 53.17.1 *BADR and remittance basis*

The BAD relief note provides:

**EXAMPLE D1 – Foreign chargeable gains qualifying for ER fall within [what is now sch 1 TCGA, remittance basis]**

67 Section 169N(9) TCGA 1992 states that ‘any gain or loss taken into account under subsection (1) is not to be taken account under this Act as a chargeable gain or an allowable loss.’

68 The Explanatory Notes published with the Finance Bill 2008 indicate that the purpose of s 169N(9) is merely to ensure that where there is one ER disposal, and gains and losses are aggregated to determine the qualifying net ER gain, this cannot be segregated as gains and losses separately for CGT purposes. There have, however, been concerns about the interpretation of s 169N(9) and how it interacts with other provisions within TCGA 1992.

69 As can be seen from the responses to the following queries, HMRC considers that foreign chargeable gains qualifying for ER fall within [sch 1 TCGA] where such gains are realised by remittance basis users. The delay between the time the gains arises and when the remittance is made is no bar on the claiming of ER provided a valid ER claim is made within the specified time period (see Example D2).

### 53.17.2 *Deadline for BADR claim*

The BAD relief note provides:

**EXAMPLE D2 – The deadline for making an ER claim**

70 The deadline for making an ER claim is linked to the tax year in which the qualifying business disposal is made, not to the tax year that the gain accrues to a taxpayer. Thus if a UK-resident foreign domiciliary wishes to make the claim for a qualifying business disposal of foreign property, it would seem that the following deadlines apply for disposals in the specified tax years, regardless of whether the chargeable gain has been remitted.

<b>Tax year</b>	<b>Claim deadline</b>
2008/09	31 January 2011
2009/10	31 January 2012

2010/11 31 January 2013

2011/12 31 January 2014

71 Does HMRC agree? How would it recommend that such a claim be made if it does not impact on the tax liability as there has been no remittance of the disposal proceeds?

**HMRC response to Example D2**

72 ER is only available on the making of a claim and such claim must be made within the statutory time limit which is set by reference to the date of the qualifying disposal (see s 169M(3) TCGA 1992). It is for the taxpayer to consider whether to submit a protective claim for ER within this time period.

**Further note**

73 This means that where a remittance basis user makes a qualifying gain in a tax year he or she has until the first anniversary of 31 January following the end of the tax year to decide whether or not to make the ER claim. The date that the proceeds are remitted is irrelevant.

74 For example: AB is a remittance basis user. He makes a £10m gain on a qualifying disposal in 2011/12 of shares in a foreign company (total proceeds £15m). He has not made any previous ER claims and so has the entire £10m ER allowance available. He does not expect to remit the proceeds from the gain for at least three years (having sufficient clean capital to supplement his UK income). If he wants to be able to benefit from ER on any eventual remittance of the proceeds he has until 31 January 2014 to make the ER claim. The fact that he will not have remitted the proceeds at that date is irrelevant to the claim deadline.

75 Where an ER claim is required prior to the gains being remitted there will be no gain shown on the tax return. The claim should be made by way of a note to the tax return, with the ER computation included.

53.17.3 *BAD relief limit*

There is a lifetime limit on BAD relief which has fluctuated wildly:

<b>Date of disposal from</b>	<b>Limit</b>
6 April 2008	£1 million.
6 April 2010	£2 million
23 June 2010	£5 million
6 April 2011	£10 million
11 March 2020	£1 million

The BAD relief note provides:

**EXAMPLE D3 – The raised ER limit**

76 It is understood that HMRC's settled view is that the ER limit to apply in respect of remittance basis gains is that which is in force when the gains arise.

77 For example, assuming there have been no other qualifying ER gains, where the disposal date for a qualifying ER gain of £5m (paid into a separate offshore bank account with interest being paid into a separate account) is 19 August 2008 and the proceeds are remitted on 25 October 2010, it is understood that HMRC believes that the £1m lifetime limit in force in 2008/09 applies, such that ER can only be claimed on £1m of the disposal. It would seem to follow from this that HMRC's view must be that the 4/9ths deduction applies to the gain rather than the special 10% tax rate. For a higher rate taxpayer this would mean that even the gain benefiting from ER will be subject to tax at 28% (meaning an effective 15.6% tax rate on the £1m gain benefiting from ER relief) with the £4m excess being taxed at 28%.

78 Can HMRC confirm that the above summarises its thoughts on the issue?

**HMRC response to Example D3**

79 HMRC agree with the analysis. The ER limit to apply with respect to remittance basis gains is that which is in force when the qualifying disposal is made, not when any proceeds are remitted.

53.17.4 *BAD relief: Mixed fund*

The BAD relief note provides:

**EXAMPLE D4 – The ER provisions prior to 23 June 2010 and the mixed fund rules**

80 The ER legislation at s 169N(4) TCGA 1992 states:

The amount arrived at under subsections (1) to (3) is to be treated for the purposes of this Act as a chargeable gain accruing at the time of the disposal to the individual or trustees by whom the claim is made.

81 Does HMRC agree that this means that for the purposes of the mixed fund rules (s 809Q ITA 2007) the amount that will go into the foreign chargeable gains category is the amount of the gain after ER (ie after the 4/9ths reduction)?

**HMRC response to Example D4**

82 The amount to be included in a mixed fund under s 809Q(4) ITA 2007 is the gain as restricted by s 169N.

**EXAMPLE D5 – How does ER relief work for remittance basis users given it is now a tax rate?**

83 It is clear that without the 4/9ths discount provisions, which reduced the gain itself, the mixed fund rules work somewhat differently. It is unclear whether, in situations where the gain is in excess of the unused ER lifetime allowance, this means that:

- ER can be applied such that 10% tax is paid on the amount on which ER can be claimed (either the £10m lifetime limit or that limit less the aggregate of prior ER claims made) with future remittances being taxed at the full rates.
- Or, that a blended rate has to be used.

84 As an example: the capital gain on a disposal of shares by a UK-resident foreign domiciliary is, say, £13m. The individual has not made a prior ER claim and the first £10m is remitted over a number of years. Can you apply ER to this first £10m or do you have to use a blended rate because the actual gain exceeds £10m?

#### **HMRC response to Example D5**

85 Wherever there is a qualifying disposal and a chargeable gain that attracts the tax rate of 10% and there is a balance of that gain that is taxable at either 18% or 28% (and indeed where the individual may have other gains that do not qualify for ER), then the question arises of how these elements are identified for the purposes of s 12 TCGA 1992.

86 HMRC considers that the mixed fund rules in ITA 2007 may be used to identify and quantify the remittance of the foreign chargeable gain. In the absence of a statutory rule for determining whether or not the gains brought into charge under s 12 are liable at the 10% rate, the onus is on the individual to nominate the 10% rate to apply to the maximum extent (by reference to the computational rules in ss (4)–(4B) of s 169N) in priority to other rates and the individual can do so as part of the normal self assessment process.

#### **Further note**

87 We have confirmed with HMRC that the above response means that in the example given the taxpayer would be able to claim on his or her self assessment return that the first £10m remitted is taxed at the special 10% rate.

88 For example: the disposal occurred in 2011/12 and pattern of remittance was as follows:

- 5m in 2011/12;
- 5m in 2012/13; and
- 3m in 2013/14.

Provided an ER claim is made the taxpayer can claim that the remittances in 2011/12 and 2012/13 are taxed at the 10% ER rate.

## 53.18 Reorganisation relief

### 53.18.1 *The relief*

A full discussion of reorganisations requires a book to itself. I focus on issues which are relevant to the themes of this work.

Section 135 TCGA provides the relief:

(1) This section applies in the following circumstances where a company (“company B”) issues shares or debentures to a person in exchange for shares in or debentures of another company (“company A”).

(2) The circumstances are:

Case 1

Where company B holds, or in consequence of the exchange will hold, more than 25% of the ordinary share capital<sup>74</sup> of company A.

Case 2

Where company B issues the shares or debentures in exchange for shares as the result of a general offer—

(a) made to members of company A or any class of them (with or without exceptions for persons connected with company B), and

(b) made in the first instance on a condition such that if it were satisfied company B would have control of company A.

Case 3

Where company B holds, or in consequence of the exchange will hold, the greater part of the voting power in company A.

If these conditions are met, we move on to the relief. Section 135(3) TCGA provides:

(3) Where this section applies, sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if company A and company B were the same company and the exchange were a reorganisation of its share capital.

I refer to this as “CGT reorganisation relief”.

---

<sup>74</sup> Defined s.135(4) TCGA: “In this section “ordinary share capital” has the meaning given by section 1119 of CTA 2010 and also includes—

(a) in relation to a unit trust scheme, any rights that are treated by section 99(1)(b) of this Act (application of Act to unit trust schemes) as shares in a company, and

(b) in relation to a company that has no share capital, any interests in the company possessed by members of the company.”

### 53.18.2 CGT reorganisation relief TAAR

Of course there is a TAAR. Section 137(1) TCGA provides:

- [1] Subject to subsection (2) below [de minimis exemption], and section 138 [clearance],
- [2] neither section 135 nor section 136 shall apply to any issue by a company of shares in or debentures of that company in exchange for or in respect of shares in or debentures of another company unless the exchange or scheme of reconstruction in question
  - [a] is effected for bona fide commercial reasons and
  - [b] does not form part of a scheme or arrangements of which the main purpose, or one of the main purposes, is avoidance of liability to capital gains tax or corporation tax.

There is a 5% de minimis exemption to the TAAR. Section 137 TCGA provides:

- (2) Subsection (1) above shall not affect the operation of section 135 or 136 in any case where the person to whom the shares or debentures are issued does not hold more than 5 per cent of, or of any class of, the shares in or debentures of the second company mentioned in subsection (1) above.
- (3) For the purposes of subsection (2) above shares or debentures held by persons connected with the person there mentioned shall be treated as held by him.

Section 137(4) TCGA provides an extended power of assessment, not discussed here.

### 53.18.3 Commercial reasons

In *Snell v HMRC*<sup>75</sup> a shareholder exchanged shares for loan notes, with the intention of leaving the UK in the following tax year and so in a position to dispose of the loan notes free of CGT. This was still a commercial transaction:

---

<sup>75</sup> [2006] EWHC 3350 (Ch). For completeness, the same issue arose in *Coll v HMRC* [2010] UKUT 114 (TCC) but this case primarily concerns the factual issue of what whether the taxpayer actually intended to leave the UK at the time of the exchange in question.

[Counsel for Mr Snell] concentrated on the reason for the issue of the loan stock, and [Counsel for HMRC] on the reason for the appellant choosing loan stock rather than cash. We are not convinced that one should make a comparison with a different transaction, a sale for cash, and ask if the exchange for loan stock, rather than cash, was effected for bona fide commercial reasons. Such a comparison that can fairly easily be made for an exchange of shares for short-term loan stock but much less easily for a share for share exchange or a reconstruction (which implies continuity of ownership) or amalgamation. We consider that one should take the actual transactions carried out, here the sale of shares to a third party in exchange for three different types of loan stock, and ask whether that was carried out for bona fide commercial reasons.

This was upheld on appeal:

The question is whether 'the exchange in question is effected for bona fide commercial reasons'. If the answer is in the affirmative it is irrelevant to consider the reasons why the parties chose to structure their transaction in that way.<sup>76</sup>

#### 53.18.4 *CGT avoidance*

In *Snell* the taxpayer failed on the second limb of the TAAR:

[Counsel for the taxpayer] contended that the structure of capital gains tax was not to charge tax on disposals by non-residents and so it could not be contrary to the evident intention of Parliament if a person did not pay tax by reason of non-residence. In addition, the Appellant genuinely suffered the economic consequences of becoming non-resident. [Counsel for HMRC] ... contends that but for s 135 capital gains tax would be payable on the contract of sale; Parliament's purpose in enacting s 135 is to allow a person to defer paying tax until he receives cash but not to create an exemption from tax.

We agree with [HMRC]. We consider that [the taxpayer's] analysis considers the absence of liability to tax of non-residents in the abstract and ignores that tax avoidance is part of a purpose test aimed at the circumstances of the particular exchange. It is one thing for a person to enter into an exchange knowing that the consequence may be that as a result of a relief (on death, setting the gain against losses or annual exemptions, becoming non-resident or non-domiciled) no tax will

---

<sup>76</sup> at [12].

ultimately be paid. It is another for a person to enter into the exchange with the main purpose that no tax should be paid as a result of obtaining a particular relief in a later year. It must be within the evident intention of Parliament that reliefs may result in no tax being paid in the future. But it does not follow that that it is within the evident intention of Parliament that that one can enter into an exchange with the specific purpose of deferring tax so as to obtain a particular relief in a subsequent year. We see nothing inconsistent with these two propositions. In the year of the exchange the relief is not applicable and the exchange is effected solely with the purpose of deferring the charge to tax until the particular relief is available. There is no reason why Parliament should intend this. Accordingly we reject Mr Peacock's contention on the meaning of tax avoidance. In principle, if one of the Appellant's main purposes of effecting the Arrangements is that capital gains tax should not be paid because the loan stocks will be redeemed while he is non-resident, that is avoidance of liability to capital gains tax within s 137.<sup>77</sup>

On appeal, this conclusion was approved;<sup>78</sup> but the judge (Sir Andrew Morritt) went further, and doubted the avoidance/mitigation distinction:

I have difficulty in understanding why the dictum of Lord Nolan in *IRC v Willoughby* is relevant to the construction of that part of s.137(1) as requires one of the main purposes of the scheme or arrangements to have been the avoidance of liability to capital gains tax. The passage on which counsel for Mr Snell relies deals with the difference between tax mitigation and tax avoidance. No such distinction is drawn in s.137.... it matters not whether the scheme etc. was formed for purposes of tax mitigation, avoidance or indeed evasion.<sup>79</sup>

The avoidance/mitigation distinction is not expressed in the ToA motive defence or anywhere else. It is an aspect of the word “avoidance”. There is no material distinction between the ToA motive defence and the CGT reorganisation TAAR. The correct view is that the distinction applies to the CGT reorganisation TAAR as it applies to other TAARs which use the word “avoidance”. If, say, there was a share for share exchange with the

---

77 [2006] UKSPC SPC00532 at [5]-[6].

78 [2006] EWHC 3350 (Ch) at [36] (final sentence, approving the Special Commissioner's decision at [6], set out above).

79 [2006] EWHC 3350 (Ch) at [36].

intention that the individual would make a (CGT free) gift to charity in the following year, the relief would still apply as that is not avoidance.

The point would not have been fully argued but lying unexpressed behind Morrith's view was, I suspect, a general scepticism about the use and coherence of an avoidance/mitigation distinction. While there is a debate to be had on that topic, that ship has sailed.

### 53.18.5 *Whose purpose*

What happens if different shareholders in an exchange have different purposes? For instance, one may intend to stay in the UK and another to leave. In *Coll v HMRC*:<sup>80</sup>

s 137 is an all-or-nothing provision applying to all the shareholders (other than unconnected shareholders holding 5% or less). ... if there is such a scheme or arrangement as is mentioned in s 137 then none of the shareholders qualify for treatment under s 135, other than unconnected shareholders holding 5% or less.

The reader may find that rather surprising. It could operate unfairly. Perhaps the Courts may reconsider in a suitable case. But the point will not often arise.

## 53.19 Winding-up offshore company

Suppose:

- (1) F (a remittance basis taxpayer) owns non-UK situate shares.
- (2) The company is put into liquidation and F receives a capital distribution from the liquidator.

F is treated as if F had disposed of the shares in consideration of the distribution: s.122 TCGA. The gain is taxable if the liquidator transfers to the shareholder money in the UK. The same applies if the liquidator transfers assets (land or chattels) enjoyed *in specie* here. It should normally be possible to avoid this.

## 53.20 Trust a taxable unit

The general scheme of CGT is that a trust is treated as a taxable unit. A

---

<sup>80</sup> [2010] UKUT 114 (TCC) at [10]. A similar point arises for the ToA motive defence: see 46.6.5 (Co-transferors: Motive defence).

number of rules follow from or expand on this principle:

Rule	See para	Non-resident exception
Gains taxed on trustees, not beneficiaries	53.20.1	56.1
Trust interest not a chargeable asset	53.20.2	53.20.3
Transfer to trust is a disposal	53.20.4	
Termination of trust is a disposal	53.20.5	
Trustees treated as distinct person	6.3	

The first two of these rules are modified for non-resident trusts, where they could be used for avoidance.

### 53.20.1 *CGT on UK resident trust*

A UK resident trust is in principle subject to CGT:

- (1) the residence/domicile of settlor/beneficiaries is not relevant
- (2) the situs of trust assets is not relevant.

The remittance basis does not apply as that only applies to individuals<sup>81</sup> and trustees are not individuals.

One might avoid this problem for the future by exporting the trust (appointing non-resident trustees) but there will in principle be a migration charge.<sup>82</sup>

One solution may be to transfer assets from the trust to UK resident foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees, see below, it may be possible to claim CGT hold-over relief.<sup>83</sup> The relief applies on a disposal to a foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge. This is confirmed, if confirmation is needed, in *McLaughlin v HMRC*.<sup>84</sup>

### 53.20.2 *Trust interest not chargeable asset*

Section 76(1) TCGA provides:

Subject to subsection (1A) below

[a] no chargeable gain shall accrue on the disposal of an interest created

---

<sup>81</sup> See 53.15 (CGT remittance basis).

<sup>82</sup> See 11.5 (Trustees liable for exit charge).

<sup>83</sup> See 11.4 (Charge on emigration of trust).

<sup>84</sup> [2012] UKFTT 174 (TC).

- by or arising under a settlement (including, in particular, an annuity or life interest, and the reversion to an annuity or life interest)
- [b] [i] by the person for whose benefit the interest was created by the terms of the settlement or
- [ii] by any other person except one who acquired, or derives his title from one who acquired, the interest for a consideration in money or money's worth, other than consideration consisting of another interest under the settlement.

A note on terminology. In English trust law, an interest created by or arising under a settlement is described as an “equitable interest”. I prefer the expression “trust interest”, which is also apt in trust jurisdictions without equity, such as Scotland and the Channel Islands.

### 53.20.3 *Non-resident trust interest*

Section 76 TCGA provides an exception to the relief for trust interests in s.76(1):

- (1A) Subject to subsection (3) below, subsection (1) above does not apply if—
- (a) the settlement falls within subsection (1B) below; or
- (b) the property comprised in the settlement is or includes property deriving directly or indirectly from a settlement falling within that subsection.
- (1B) A settlement falls within this subsection if there has been a time when the trustees of that settlement—
- (a) were not resident in the United Kingdom; or
- (b) fell to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the United Kingdom.

This could lead to double taxation. The problem is exacerbated by the rule that when a trust interest is conferred on a beneficiary, the base cost of the interest is nil: acquisition is not at market value.<sup>85</sup> Fortunately, interests in non-resident trusts are generally subject to powers of appointment. So a beneficiary does not normally dispose of the interest (the exercise of the power of appointment is not a disposal); and if there is a disposal, it does not matter as the market value of the interest is nil.

If a beneficiary disposes of an interest under a trust for actual

---

<sup>85</sup> See App.4.4.1 (Acquisition without corresponding disposal).

consideration, it is necessary to consider sch 4A TCGA. I do not discuss this here as in practice this (almost) never happens.

#### 53.20.4 *Disposal on transfer into trust*

Section 70 TCGA provides:

A transfer into settlement, whether revocable or irrevocable, is a disposal of the entire property thereby becoming settled property

[a] notwithstanding that the transferor has some interest as a beneficiary under the settlement and

[b] notwithstanding that he is a trustee, or the sole trustee, of the settlement.

#### 53.20.5 *Disposal on trust termination*

Section 71(1) TCGA provides:

On the occasion when a person becomes absolutely entitled to any settled property as against the trustee<sup>86</sup> all the assets forming part of the settled property to which he becomes so entitled shall be deemed to have been [a] disposed of by the trustee, and

[b] immediately reacquired by him in his capacity as a trustee within section 60(1) [ie, as bare trustee],

for a consideration equal to their market value.

Section 71(2)-(2D) TCGA deal with losses on the deemed disposal, not discussed here.

Section 76 TCGA provides:

(2) Subject to subsection (1) above, where a person who has acquired an interest in settled property (including in particular the reversion to an annuity or life interest) becomes, as the holder of that interest, absolutely entitled as against the trustee to any settled property, he shall be treated as disposing of the interest in consideration of obtaining that settled property (but without prejudice to any gain accruing to the trustee on the

---

86 Section 71(3) TCGA provides a definition: “References in this section to the case where a person becomes absolutely entitled to settled property as against the trustee shall be taken to include references to the case where a person would become so entitled but for being an infant or other person under disability.” The wording (more or less) matches the definition of bare trust in s.60 TCGA; see 1.7 (Bare trust/nomineeship).

disposal of that property deemed to be effected by him under section 71(1)).

(3) Subsection (1A) above shall not prevent subsection (1) above from applying where the disposal in question is a disposal in consideration of obtaining settled property that is treated as made under subsection (2) above.

Since transfers of trust interests are rare, it is not usually necessary to consider this.

### 53.21 CGT debt exemption

Section 251(1) TCGA provides:

[a] Where a person incurs a debt to another, whether in sterling or in some other currency, no chargeable gain shall accrue to that (that is the original) creditor or his personal representative or legatee on a disposal of the debt,

[b] except in the case of the<sup>87</sup> debt on a security (as defined in section 132).

I refer to this as “CGT debt exemption”; debts within the exemption are usually called “first-hand debts”.

I discuss the following aspects elsewhere:

Topic	See para
Debt on a security	App.2.12
Foreign currency bank account	91.10

This exemption has been described as “a provision of notable obscurity, the purpose and philosophy of which it is difficult to detect”.<sup>88</sup> But it seems straightforward. A first-hand debt (other than a debt on a security) is more likely to give rise to a loss than a gain.<sup>89</sup> If the gain is chargeable, the loss should be allowable. The balance of advantage to HMRC lies in

---

<sup>87</sup> ‘The debt’ is just a slip for ‘a debt’, though comity seems to have prevented the courts from saying so. Nothing turns on the definite article but it has perhaps added to the section’s reputation for obscurity.

<sup>88</sup> *Marren v Ingles* 54 TC 76 at p.96.

<sup>89</sup> Except foreign currency debts, which may give rise to a currency gain or loss; but if one assumes currencies may equally likely move in either direction, losses are still more likely than commercial gains.

exemption. Exemption is a simple if rough and ready solution. The same thinking lies behind the CGT exemption for cars.

### 53.21.1 *Meaning of “debt”*

The word “debt” has a wide variety of meanings.<sup>90</sup> In practice this problem has not often arisen in tax, except in the context of the CGT debt exemption. A contingent obligation to pay an unascertainable amount at an unknown date is not a “debt” within the meaning of s.251; see *Marren v Ingles* 54 TC 76. Private client tax practitioners generally have this at the back of their minds when they use the word debt. But in other contexts the word has a wider meaning.<sup>91</sup>

See too 76.1 (Liability/debt compared).

## 53.22 DT relief for taxable gains

Article 13(5) OECD Model provides:

Gains from the alienation of any property, other than that referred to in paragraphs 1, 2, 3 and 4, shall be taxable only in the Contracting State of which the alienator is a resident.

The four exceptions are:

OECD art	Topic	See para
13(1)	Immovable property	53.23.1
13(2)	Permanent Establishment	53.23.2
13(3)	Ships/Aircraft	53.23.3
13(4)	Land-rich company	53.23.4

Subject to those exceptions, taxing rights are given to the residence State and not the source State.

For losses, see 61.24 (DT relief: gain + loss).

Article 9 BEPS MLI<sup>92</sup> makes provision for land-rich companies. The UK has opted out of this, so it will not be considered here, though it is found in some UK DTAs.

---

90 See 54 TC 76 at p.89ff, where many cases are cited, in a passage approved by HL on appeal.

91 For an example, see 97.23 (Insurance policy).

92 See 103.14 (BEPS multilateral instrument).

### 53.22.1 “Gains”

The text of art 13 refers to “gains” but the heading of the article is “capital gains”.

OECD Commentary provides:

5. The Article does not give a detailed definition of capital gains. This is not necessary for the reasons mentioned above. ...

11. The Article does not distinguish as to the origin of the capital gain. Therefore all capital gains, those accruing over a long term, parallel to a steady improvement in economic conditions, as well as those accruing in a very short period (speculative gains) are covered. Also capital gains which are due to depreciation of the national currency are covered. It is, of course, left to each State to decide whether or not such gains should be taxed.

### 53.22.2 *Gain subject to income tax*

OECD Commentary provides:

3.1 [a] ... The Article does not specify to what kind of tax it applies. It is understood that the Article must apply to all kinds of taxes levied by a Contracting State on capital gains.

[b] The wording of Article 2 [Taxes Covered] is large enough to achieve this aim and to include also special taxes on capital gains.

The reference in para [b] is to art 2(1)(2) OECD Model. The difficulty in relying on those provisions as justification for the proposition at para [a] is that they are not usually included in UK DTAs.<sup>93</sup> But it is not necessary to rely on those provisions. In UK tax law the word “gain” is used to describe capital gains subject to income tax, such as chargeable-event gains, offshore income gains,<sup>94</sup> TiL gains,<sup>95</sup> and many other examples could be given. Income tax was once a tax on income, but it is not now.<sup>96</sup>

### 53.22.3 *Computation of gain*

---

93 See 103.12 (Taxes Covered).

94 See 64.24 (DT reliefs: OIG).

95 See 21.11.4 (Capital gain).

96 See 15.6 (No source/deemed source).

The computation of gain does not matter if the gain is exempt under art 13(5) but it may matter if the gain is taxable but foreign tax credit relief applies.

OECD Commentary provides:

12. The Article does not specify how to compute a capital gain, this being left to the domestic law applicable. As a rule, capital gains are calculated by deducting the cost from the selling price. To arrive at cost all expenses incidental to the purchase and all expenditure for improvements are added to the purchase price. In some cases the cost after deduction of the depreciation allowances already given is taken into account. Some tax laws prescribe another base instead of cost, e.g. the value previously reported by the alienator of the asset for capital tax purposes.

13. Special problems may arise when the basis for the taxation of capital gains is not uniform in the two Contracting States. The capital gain from the alienation of an asset computed in one State according to the rules mentioned in paragraph 12 above, may not necessarily coincide with the capital gain computed in the other State under the accounting rules used there. This may occur when one State has the right to tax capital gains because it is the State of situs while the other State has the right to tax because the enterprise is a resident of that other State.

14. The following example may illustrate this problem:

an enterprise of State A bought immovable property situated in State B. The enterprise may have entered depreciation allowances in the books kept in State A.

If such immovable property is sold at a price which is above cost, a capital gain may be realised and, in addition, the depreciation allowances granted earlier may be recovered.

State B, in which the immovable property is situated and where no books are kept, does not have to take into account, when taxing the income from the immovable property, the depreciation allowances booked in State A. Neither can State B substitute the value of the immovable property shown in the books kept in State A for the cost at the time of the alienation.

State B cannot, therefore, tax the depreciation allowances realised in addition to the capital gain as mentioned in paragraph 12 above.

15. On the other hand, State A of which the alienator is a resident, cannot be obliged in all cases to exempt such book profits fully from its taxes under paragraph 1 of the Article ... To the extent that such book

profits are due to the realisation of the depreciation allowances previously claimed in State A and which had reduced the income or profits taxable in such State A, that State cannot be prevented from taxing such book profits.<sup>97</sup>

#### 53.22.4 *Foreign currency gain*

OECD Commentary provides:

16. Further problems may arise in connection with profits due to changes of the rate of exchange between the currencies of State A and State B. After the devaluation of the currency of State A, enterprises of such State A may, or may have to, increase the book value of the assets situated outside the territory of State A. Apart from any devaluation of the currency of a State, the usual fluctuations of the rate of exchange may give rise to so-called currency gains or losses. Take for example an enterprise of State A having bought and sold immovable property situated in State B. If the cost and the selling price, both expressed in the currency of State B, are equal, there will be no capital gain in State B. When the value of the currency of State B has risen between the purchase and the sale of the asset in relation to the currency of State A, in the currency of that State a profit will accrue to such enterprise. If the value of the currency of State B has fallen in the meantime, the alienator will sustain a loss which will not be recognised in State B. Such currency gains or losses may also arise in connection with claims and debts contracted in a foreign currency. If the balance sheet of a permanent establishment situated in State B of an enterprise of State A shows claims and debts expressed in the currency of State B, the books of the permanent establishment do not show any gain or loss when repayments are made. Changes of the rate of exchange may be reflected, however, in the accounts of the head office. If the value of the currency of State B has risen (fallen) between the time the claim has originated and its repayment, the enterprise, as a whole, will realise a gain (sustain a loss). This is true also with respect to debts if between the time they have originated and their repayment, the currency of State B has fallen (risen) in value.

17. The provisions of the Article do not settle all questions regarding the

---

97 The Commentary continues: “The situation corresponds to that dealt with in paragraph 44 of the Commentary on Article 23 A.” But as the UK does not adopt Article 23A, we need not pursue this here.

taxation of such currency gains. Such gains are in most cases not connected with an alienation of the asset; they may often not even be determined in the State on which the right to tax capital gains is conferred by the Article. Accordingly, the question, as a rule, is not whether the State in which a permanent establishment is situated has a right to tax, but whether the State of which the taxpayer is a resident must, if applying the exemption method, refrain from taxing such currency gains which, in many cases, cannot be shown but in the books kept in the head office. The answer to that latter question depends not only on the Article but also on Article 7 and on Article 23 A. If in a given case differing opinions of two States should result in an actual double taxation, the case should be settled under the mutual agreement procedure provided for by Article 25.

#### 53.22.5 *Sale for annuity*

OECD Commentary provides:

18. Moreover the question arises which Article should apply when there is paid for property sold an annuity during the lifetime of the alienator and not a fixed price. Are such annuity payments, as far as they exceed costs, to be dealt with as a gain from the alienation of the property or as “income not dealt with” according to Article 21? Both opinions may be supported by arguments of equivalent weight, and it seems difficult to give one rule on the matter. In addition such problems are rare in practice, so it therefore seems unnecessary to establish a rule for insertion in the Convention. It may be left to Contracting States who may be involved in such a question to adopt a solution in the mutual agreement procedure provided for by Article 25.

#### 53.22.6 *Prizes*

OECD Commentary provides:

19. The Article is not intended to apply to prizes in a lottery or to premiums and prizes attaching to bonds or debentures.

#### 53.22.7 *Share buy-back/liquidation*

The issue here is whether the proceeds of a purchase of own shares or liquidation are dividends (within art 10) or gains (within art 13).

OECD Commentary provides:

31. If shares are alienated by a shareholder in connection with the

liquidation of the issuing company or the redemption of shares or reduction of paid-up capital of that company, the difference between the proceeds obtained by the shareholder and the par value of the shares may be treated in the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The Article does not prevent the State of residence of the company from taxing such distributions at the rates provided for in Article 10: such taxation is permitted because such difference is covered by the definition of the term “dividends” contained in paragraph 3 of Article 10 and interpreted in paragraph 28 of the Commentary relating thereto, to the extent that the domestic law of that State treats that difference as income from shares. As explained in paragraphs 32.1 to 32.7 of the Commentary on Articles 23A and 23B, where the State of the issuing company treats the difference as a dividend, the State of residence of the shareholder is required to provide relief of double taxation even though such a difference constitutes a capital gain under its own domestic law. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par value or the value at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the interest in accordance with Article 11 (see also paragraphs 20 and 21 of the Commentary on Article 11).

32. There is a need to distinguish the capital gain that may be derived from the alienation of shares acquired upon the exercise of a stock-option granted to an employee or member of a board of directors from the benefit derived from the stock-option that is covered by Article 15 or 16. The principles on which that distinction is based are discussed in paragraphs 12.2 to 12.5 of the Commentary on Article 15 and paragraph 3 of the Commentary on Article 16.

#### 53.22.8 “Alienation”

OECD Commentary provides:

5. ...The words “alienation of property” are used to cover in particular capital gains resulting from the sale or exchange of property and also from

[a] a partial alienation,

[b] the expropriation,

[c] the transfer to a company in exchange for stock,

[d] the sale of a right,

[e] the gift

[f] and even the passing of property on death.

6. Most States taxing capital gains do so when an alienation of capital assets takes place. Some of them, however, tax only so-called realised<sup>98</sup> capital gains. Under certain circumstances, though there is an alienation no realised capital gain is recognised for tax purposes (e.g. when the alienation proceeds are used for acquiring new assets). Whether or not there is a realisation [in UK tax terms, whether a gain accrues on a disposal or whether it is a no gain/no loss disposal] has to be determined according to the applicable domestic tax law. No particular problems arise when the State which has the right to tax does not exercise it at the time the alienation takes place.

### 53.22.9 *Alienation: Deemed disposal*

The Supreme Court of Appeal of South Africa has held that “alienation” includes a deemed disposal:

[24] Article 13 is widely cast. It includes within its ambit capital gains derived from the alienation of all property. It is reasonable to suppose that the parties to the DTA were aware of the provisions of the Eighth Schedule and must have intended Art 13 to apply to capital gains of the kind provided in the Schedule. It is of significance that no distinction is drawn in Art 13(4) between capital gains that arise from actual or deemed alienations of property. There is moreover no reason in principle why the parties to the DTA would have intended that Art 13 should apply only to taxes on actual capital gains resulting from actual alienations of property. [25] Having regard to the factors mentioned, I am of the view that the term ‘alienation’ as it is used in the DTA is not restricted to actual alienation. It is a neutral term having a broader meaning, comprehending both actual and deemed disposals of assets giving rise to taxable capital gains.<sup>99</sup>

The same point should apply in the UK, which is important because deemed disposals for CGT are very common.

OECD Commentary provides:

7. As a rule, appreciation in value not associated with the alienation of a capital asset is not taxed, since, as long as the owner still holds the

---

<sup>98</sup> UK tax lawyers do not use the word “realised” in this sense.

<sup>99</sup> *Commissioner for the South African Revenue Service v Tradehold* [2012] ZASCA 61, 14 ITELR 967.

asset in question, the capital gain exists only on paper. There are, however, tax laws under which capital appreciation and revaluation of business assets are taxed even if there is no alienation.

8. Special circumstances may lead to the taxation of the capital appreciation of an asset that has not been alienated. This may be the case if the value of a capital asset has increased in such a manner that the owner proceeds to the revaluation of this asset in his books. Such revaluation of assets in the books may also occur in the case of a depreciation of the national currency. A number of States levy special taxes on such book profits, amounts put into reserve, an increase in the paid-up capital and other revaluations resulting from the adjustment of the book-value to the intrinsic value of a capital asset. These taxes on capital appreciation (increment taxes) are covered by the Convention according to Article 2 [Taxes Covered].<sup>100</sup>

9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It has not been found necessary to mention such cases expressly in the Article or to lay down special rules. The provisions of the Article as well as those of Articles 6, 7 and 21 [immovable property/business profits/Other Income], seem to be sufficient. As a rule, the right to tax is conferred by the above-mentioned provisions on the State of which the alienator is a resident, except that in the cases of immovable property or of movable property forming part of the business property of a permanent establishment, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraphs 13 to 17 below.<sup>101</sup>

10. In some States the transfer of an asset from a permanent establishment situated in the territory of such State to a permanent establishment or the head office of the same enterprise situated in another State is assimilated to an alienation of property. The Article does not prevent these States from taxing profits or gains deemed to arise in connection with such a transfer, provided, however, that such taxation is in accordance with Article 7.

### **53.23 DT CGT relief: Exceptions**

---

100 This should be so even in UK treaties which do not include art 2(1)(2) OECD Model. See 103.12 (Taxes Covered).

101 See 53.22.3 (Computation of gain).

OECD Commentary provides:

4. It is normal to give the right to tax capital gains on a property of a given kind to the State which under the Convention is entitled to tax both the property and the income derived therefrom.

The OECD model has four exceptions to CG relief, and one further exception is quite commonly found. The exceptions are:

<b>Topic</b>	<b>Article</b>	<b>See para</b>
Immovable property	13(1)	53.23.1
Business property of a PE	13(2)	53.23.2
Ships/aircraft	13(3)	53.23.3
Land rich company	13(4)	53.23.4
Recently departed resident	-	53.23.5

#### 53.23.1 *Immovable property*

Article 13(1) OECD Model provides:

Gains derived<sup>102</sup> by a resident of a Contracting State from the alienation of immovable property referred to in Article 6<sup>103</sup> and situated in the other Contracting State may be taxed in that other State.

#### 53.23.2 *Business property of PE*

Article 13(2) OECD Model provides:

Gains from the alienation of  
 [a] movable property forming part of the business property of a permanent establishment<sup>104</sup> which an enterprise of a Contracting State has in the other Contracting State,  
 [b] including such gains from the alienation of such a permanent establishment (alone or with the whole enterprise),  
 may be taxed in that other State.

OECD Commentary provides:

4. The right to tax a gain from the alienation of a business asset must be given to the same State without regard to the question whether such gain

---

102 See 14.10.1 (“Deriving” income).

103 This incorporates the definition in Article 9(2); see 23.7.1 (“Immovable property”).

104 See 103.13 (Effectively connected with PE).

is a capital gain or a business profit. Accordingly, no distinction between capital gains and commercial profits is made nor is it necessary to have special provisions as to whether the Article on capital gains or Article 7 on the taxation of business profits<sup>105</sup> should apply. It is however left to the domestic law of the taxing State to decide whether a tax on capital gains or on ordinary income must be levied. The Convention does not prejudge this question.

In many countries, though not in the UK, gains on business property of a PE are taxed as business income.

### 53.23.3 *Ships and aircraft*

For completeness: art 13(3) OECD Model provides:

Gains from the alienation of ships or aircraft operated in international traffic, boats engaged in inland waterways transport or movable property pertaining to the operation of such ships, aircraft or boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

### 53.23.4 *Land-rich company*

Article 13(4) OECD Model provides:

Gains derived by a resident of a Contracting State from the alienation of shares or comparable interests, such as interests in a partnership or trust, may be taxed in the other Contracting State if, at any time during the 365 days preceding the alienation, these shares or comparable interests derived more than 50 per cent of their value directly or indirectly from immovable property, as defined in Article 6, situated in that other State.

This clause is not often found in UK treaties but about half a dozen recent treaties have some wording along these lines.<sup>106</sup>

Article 9 BEPS MLI provides alternative rules, but the UK has reserved the right for this not to apply to its Covered Tax Agreements, so it need not be considered here.

### 53.23.5 *Recently departed resident*

---

<sup>105</sup> See 20.22 (DT relief: trading income).

<sup>106</sup> Including: Hungary, Libya, Zambia, Senegal, China, Morocco, Ethiopia.

The CG article in some DTAs restricts CG relief for residents of one State who have recently left the other State. This is not in OECD Model, but about one third of UK treaties have a restriction of this kind. A variety of wordings are found, and I take Italy and USA as examples.

Treaties are easier to follow if one notes in the text which Contracting State is which. Article 13(5) Italy/UK DTA provides:

The provisions of paragraph (4) of this Article [CG relief] shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who:

- (a) is a resident of the other Contracting State [Italy]; and
- (b) has been a resident of the first-mentioned Contracting State [UK] at any time during the five years immediately preceding the alienation of the property; and
- (c) is not subject to tax on those gains in the other Contracting State [Italy].

Article 13(6) USA/UK DTA is similar, but specifies 6 years instead of 5, and lacks para (c):

The provisions of paragraph 5 of this Article [CG relief] shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who [a] is a resident of the other Contracting State [US] and [b] has been a resident of the first-mentioned Contracting State [UK] at any time during the six years immediately preceding the alienation of the property.

This does not impose a charge, but it means that the CGT charge on temporary non-residents who return to the UK is consistent with the treaty. It does not strictly matter, for UK tax, as if the clause is not there, there is a treaty override in any event.<sup>107</sup> But it may matter to treaty-partners (and others) who think the UK ought not to impose tax in breach its treaty obligations. The USA/UK DTA Technical Explanation provides:<sup>108</sup>

Paragraph 6 allows each Contracting State to tax gains derived by certain non-residents who used to be residents of that Contracting State. The rule is included in the Convention in order to allow the UK to apply its

---

107 See 10.9 (DTA override: Gains).

108 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

domestic law regarding such sales. Under UK law, a former resident who re-establishes residence in the UK within five years will remain subject to tax in the UK on any gains realized during the period of nonresidence. The analogous US rules of section 877 are preserved by paragraph 6 of Article 1 (General Scope).

Although the rules allow each of the Contracting States to apply their domestic anti-abuse rules, the foreign tax credit rules provided in paragraphs 2 and 4 of Article 24 (Relief from Double Taxation) ensure that the Contracting State applying an anti-abuse rule to a resident of the other Contracting State maintains only a residual right to tax. The primary right to tax remains with the country of residence. Accordingly, pursuant to subparagraph (b) of paragraph 2 of Article 24, if the gains subject to this rule are derived while the former UK resident was a resident of the United States, then such gains are considered to be gains from sources within the United States. Pursuant to paragraph 4 of Article 24, the UK will grant a foreign tax credit for US tax imposed upon those gains.

Example. In year 1, UK resident A purchases stock in a Country X company for \$1,000. A moves to the United States in year 2, when the fair market value of the stock is \$2,000. In year 3, while A is still a US resident, A sells the Country X stock. In year 4, after the sale of the Country X stock, A moves back to the UK and re-establishes residence. Under Article 13 (6), both the United States and the UK may tax the gain on the sale of the property in year 3. Under Article 24, however, the gain from the sale of the Country X stock is deemed to be from sources within the United States because A was a US resident when the sale occurred and gains from the stock could be taxed by the UK only pursuant to paragraph 6 of Article 13 (that is, the stock could not be taxed under paragraph 1 or 3 of Article 13). Thus the UK is required to provide a foreign tax credit for US taxes paid with respect to gain on the disposition of the Country X stock.

### 53.23.6 *Foreign tax credit relief*

Where the full CG relief does not apply, foreign tax credit relief applies to avoid double taxation. For an example of the operation of FTCD in the USA/UK DTA, see 106.24 (Credit for TNR CGT).

## 53.24 **DT relief: Remittance basis**

Section 12 TCGA provides:

- (1) This section applies to foreign chargeable gains accruing to an individual in a tax year (“the foreign chargeable gains”) if—
- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
  - (b) the individual is not domiciled in the UK in that year.
- (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
- (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.

Art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Suppose:

- (1) A remittance basis taxpayer is UK-law UK resident and treaty-resident in a State with an OECD Model capital gains article.
- (2) The taxpayer receives foreign gains which are in principle subject to CGT.

Can the individual claim DT relief? This raises a characterisation issue.<sup>109</sup> Everyone agrees that DT exemption applies to gains taxable on the remittance basis. Section 12(2) TCGA imposes a deeming which changes timing, that is, the gains which actually accrue on disposal are deemed to accrue when remitted. Section 12(3) imposes a deeming which changes the amount. The character of the gains is not altered. That is, the chargeable gains which are “treated as accruing” are the actual gains which accrued to the individual, and not different (notional) gains.

DT relief requires in principle that the alienator is treaty-resident in the foreign State at the time the gain accrues.<sup>110</sup> What if the gain is a foreign gain of a remittance basis taxpayer? The gain is deemed to accrue at the time that the gain is remitted.<sup>111</sup> If that deeming applies for DT purposes, then odd consequences would follow. Suppose foreign gains accrue to a remittance basis taxpayer who is UK-law UK resident throughout. There are two possibilities:

---

<sup>109</sup> See para 103.22 (Characterisation).

<sup>110</sup> *Smallwood v HMRC* [2009] STC 1222.

<sup>111</sup> See 53.15.1 (Disposal/accrual dates).

**Treaty-resident in foreign State**

<b>Case no.</b>	<i>When gain actually arose</i>	<i>When gain remitted</i>
1	No	Yes
2	Yes	No

If the timing rule applies for DT purposes, DT relief applies in case 1 and not in case 2. That would be absurd: it would often lead to double taxation or double non-taxation. So it is considered that the timing rule does not apply for DT purposes, so DT relief can apply in case 2 but not in case 1.

**53.25 Tax return: Gains**

Gains are returned in Form SA108 (Capital Gains Summary).

SA108 Notes (2019/20) provides:

Fill in the 'Capital gains summary' pages if:

- you sold or disposed of chargeable assets which were worth more than £46,800
- your chargeable gains before taking off any losses were more than £11,700 ('annual exempt amount')
- you have gains in an earlier year taxable in this period
- you want to claim an allowable capital loss or make a capital gains claim or election for the year
- you were not domiciled in the UK and are claiming to pay tax on your foreign gains on the remittance basis
- you're chargeable on the remittance basis and have remitted foreign chargeable gains of an earlier year
- you disposed of the whole or part of an interest in a UK residential property when either non-resident or UK resident and the disposal was in the overseas part of a split year.

See 115.4.1 (Small gains)

## CHAPTER FIFTY FOUR

# UK PROPERTY HELD BY NON-RESIDENTS

54.1

### *Cross references*

The following topics are considered elsewhere:  
115.22 (CT registration).

## 54.1 Introduction

This chapter considers gains accruing to non-UK residents from land/land-rich assets.

The layout of the provisions is as follows:

<b>TCGA</b>	<b>Topic</b>
s.1A(3)(b)/2B(4)(b)	CGT/CT charge on UK land
s.1A(3)(c)/2B(4)(c)	CGT/CT charge on land-rich assets
s.1C	Definition of “interest in UK land”
sch 1A	Definition of land-rich assets
sch 2	Reporting and payment
sch 4AA	UK land rebasing
sch 5AAA	Collective investment vehicles

The development of the rules can be traced through:

- HMRC, “Taxing gains made by non-residents on UK immovable property: Consultation document” (Nov 2017)<sup>1</sup>
- HMC “Taxing gains made by non-residents on UK immovable property -

---

1 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/661467/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_-\\_consultation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/661467/Taxing_gains_made_by_non-residents_on_UK_immovable_property_-_consultation.pdf)

- Application of the anti-forestalling rule - Technical Note” (Nov 2017)<sup>2</sup>
- HMRC “Taxing gains made by non-residents on UK immovable property Summary of Responses” (July 2018)<sup>3</sup> (“**Consultation Response Document**”)
- Draft clauses (July 2018)

HMRC guidance is now in the CG Manual.<sup>4</sup>

I do not consider the topics of property-rich collective investment schemes,<sup>5</sup> compliance, and payment, though I hope to do so in a future edition.

The current rules were introduced from 2019/20.

From 2015/16 to 2018/19 there was a charge on non-residents gains from UK residential property, which was called NRCGT.<sup>6</sup> That term is sometimes used as an informal label for the current rules, but I think it is best to use “NRCGT” as the name for the previous tax regime, and not to use the same term for the current rules. The CG manual uses the term “NRCG rules” for the current rules, which is marginally less confusing but perhaps the best that can be done. “Non residents CGT/CT” might be clearer, if more clumsy.

For an overview, see Lawrance & Coward, “Non-residents and UK real estate: the April 2019 changes” Tax Journal, 29 June 2019.

## 54.2 Charge on land/land-rich assets

The CGT/CT charge is in s.1A(3)/2B(4) TCGA. I set these out elsewhere<sup>7</sup> but it is convenient to recap:

**CGT: S.1A TCGA**

**CT: s.2B TCGA**

2 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/661470/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_-\\_technical\\_note.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/661470/Taxing_gains_made_by_non-residents_on_UK_immovable_property_-_technical_note.pdf) Despite its name, this note does not contain material which a practitioner would call “technical”; see App.1.8 (Technical Notes).

3 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/722418/Taxing\\_gains\\_made\\_by\\_non-residents\\_on\\_UK\\_immovable\\_property\\_summary\\_of\\_responses.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722418/Taxing_gains_made_by_non-residents_on_UK_immovable_property_summary_of_responses.pdf)

4 This replaces draft guidance formerly in App 14 CG Manual.

5 HMRC have issued draft guidance on this: App 15 CG Manual: collective investment schemes <https://www.gov.uk/hmrc-internal-manuals/capital-gains-manual/cg-app15>

6 See 60.42.1 (Non-residents CGT: History).

7 See 53.4.5 (Charge on non-resident).

(3) A person who is not UK resident for a tax year<sup>8</sup> is chargeable to capital gains tax on chargeable gains accruing to the person in the tax year on the disposal of ...

(b) assets not within paragraph (a) that are interests in UK land (see section 1C), and

(c) assets (wherever situated) not within paragraph (a) or (b) that  
 [i] derive at least 75% of their value from UK land  
 [ii] where the person has a substantial indirect interest in that land (see section 1D and Schedule 1A).

(4) In addition, a company which is not resident in the UK is chargeable to corporation tax on chargeable gains accruing to the company on the disposal of

assets not within subsection (3) that are- (a) interests in UK land, or

(b) assets (wherever situated) not within paragraph (a) that  
 [i] derive at least 75% of their value from UK land  
 [ii] where the company has a substantial indirect interest in that land.

I coin the following terminology:

**Land-rich asset** Asset within s.1A(3)(c), in short >75% value from land  
**Land-asset** Asset within s.1A(3)(b)/(c) ie UK land/land-rich asset  
**Land-gain** Gain on disposal of land-asset

In short, individuals/trusts pay CGT, and companies pay CT, on land-gains.

### 54.2.1 *Reliefs/exemptions*

The Consultation Response Document provides:<sup>9</sup>

Existing reliefs and exemptions will apply to non-residents as they do for residents. This will include, among the other exemptions and reliefs,  
 [1] the Annual Exempt Amount,  
 [2] the Substantial Shareholdings Exemption, and  
 [3] the no-gain/no-loss intra-group transfer rules.<sup>10</sup>

<sup>8</sup> See 53.4.4 (“UK resident for a tax year”).

<sup>9</sup> Para 3.11.

<sup>10</sup> See 54.8.4 (Inter-group transfer).

### 54.3 Land-rich asset

Para 1(1) sch 1A TCGA provides:

This Schedule makes provision, for the purposes of section 1A(3)(c) or 2B(4)(b), for determining in the case of any disposal of any asset—

- (a) whether the asset derives at least 75% of its value from UK land (see Part 2 of this Schedule) ...

Para 3(1) sch 1A TCGA provides:

An asset derives at least 75% of its value from UK land if—

- (a) the asset consists of a right or an interest in a company, and
- (b) at the time of the disposal, at least 75% of the total market value of the company's qualifying assets derives (directly or indirectly) from interests in UK land.<sup>11</sup>

I refer to this as the “**land-rich test**”.

It is possible to envisage a company with, say, A and B shares, where the A shares do not derive their value from UK land; but they still fall within para 3(1) because *the company* has sufficiently valuable UK land. Perhaps that was deliberate.

The land-rich test is a “cliff-edge” test and that is deliberate. The Consultation Response Paper provides:

3.51. In looking at the gross asset value of an entity, the 75% property richness test mirrors the provisions in international treaties.<sup>12</sup> A different domestic test would still need to be underpinned by consideration of the Treaty test, to see whether the UK has taxing rights, meaning it would only add complexity to deviate from this. The government also considers that a quantitative test is easier than a qualitative one.

3.52. The government believes that setting the bar at 75% or more of the gross asset value is sufficiently high so as to catch only cases where an entity is, in essence, an envelope for UK land.

The last paragraph does not bear serious examination.

---

<sup>11</sup> See 54.6.3 (“Interest in UK land”).

<sup>12</sup> The author wisely does not seek to identify these treaties. Article 13(4) OECD Model in fact has a 50% test; but this is not normally included in UK treaties; see 53.23.4 (Land-rich company).

### 54.3.1 *Computation of gain*

The chargeable gain is computed by reference to the value of the interest disposed of. Thus in the case of a company that was only 75% property-rich, the remaining assets would be indirectly charged to UK tax. But HMRC were probably right to conclude that the alternative was not workable.

### 54.3.2 *Standard of care*

The Consultation Response Paper provides:

3.53. Officials will produce guidance making it clear what level of due diligence is required to assess the property richness test. In many cases, it will be sufficient to look at a balance sheet or similar statement that represent recent valuations of the assets.

The qualification “in many cases” means that one cannot rely on this. In any case, I would expect some back-tracking.

## 54.4 Derivation

“Derived” is not sensibly possible to define, but that did not stop the drafter from trying. Para 3 sch 1A TCGA provides:

(2) Market value

[a] may be traced through any number of companies, partnerships, trusts and other entities or arrangements but

[b] may not be traced through a normal commercial loan.<sup>13</sup>

(3) It is irrelevant whether the law under which a company, partnership, trust or other entity or an arrangement is established or has effect is—

(a) the law of any part of the UK, or

(b) the law of any territory outside the UK.

(4) The assets held by a company, partnership or trust or other entity or arrangement must be attributed to the shareholders, partners, beneficiaries or other participants at each stage in whatever way is appropriate in the circumstances.

Apart from the exception for a normal commercial loan, it comes down to a just and reasonable apportionment.

---

<sup>13</sup> See 60.12 (Normal commercial loan).

## 54.5 “Qualifying assets”

“Qualifying assets” matters because the land-rich test requires (in short) that at least 75% of the company’s qualifying assets derives from UK land.

Para 3(5) sch 1A TCGA provides:

For the purposes of this paragraph ...

“qualifying assets” has the meaning given by paragraph 4.

Para 4(1) sch 1A TCGA provides:

Subject as follows, all of the assets of the company are qualifying assets.

## 54.6 Chose in action disregard

The land-rich test disregards liabilities.

Para 4(2) sch 1A TCGA provides:

An asset of the company is not a qualifying asset so far as it is matched to a related party liability...

I refer to this as the “**chose in action disregard**”.

### 54.6.1 *Chose in action*

Para 4 sch 1A TCGA provides:

- (4) An asset of the company is matched to a related party liability if—
- (a) the asset consists of a right under a transaction (for example, a right under a loan relationship or derivative contract),
  - (b) the right entitles the company to require another person to meet a liability arising under the transaction...

I refer to an asset which meets this condition as a “chose in action” though the term is not completely apt. I refer to the other person as “the debtor.”

### 54.6.2 *The debtor*

Para 4 sch 1A TCGA provides:

- (4) An asset of the company is matched to a related party liability if ...
- (c) the other person [the debtor]
    - [i] is relevant to the paragraph 3 tracing exercise or
    - [ii] is a related party of the company on the day of the disposal.

Para 4(5) sch 1A TCGA provides:

For the purposes of this paragraph a person is relevant to the paragraph 3 tracing exercise if—

- (a) the person has assets that fall to be taken into account in the tracing exercise mentioned in paragraph 3, or
- (b) the person has obligations (whether as a trustee or otherwise) in relation to the holding of assets comprised in any trust or other arrangement that fall to be taken into account in that exercise.

#### 54.6.3 *Interest in UK land*

The chose in action rule does not apply to an interest in UK land. Para 4(3) sch 1A TCGA provides:

But an interest in UK land is a qualifying asset of the company even if it is matched to any extent to a related party liability.

Classifying non-land as non-qualifying assets makes it easier to pass the land-rich test.

#### 54.6.4 *“Liability”*

Para 4(7) sch 1A TCGA provides a commonsense definition of liability:

In this paragraph a liability includes a contingent liability (such as one arising as a result of the giving of a guarantee, indemnity or other form of financial assistance).

### 54.7 “Related party”

Para 4(6) sch 1A TCGA:

- [a] Whether, for the purposes of this paragraph, a person is a related party of the company on any day is determined in accordance with the rules in Part 8ZB of CTA 2010
- [b] but as if, in section 356OT(4) of that Act, the words “, within the period of 6 months beginning with that day” were omitted.

This adopts the transaction in land definition, with the tweak mentioned at para [b].

The definition is intricate. Section 356OT(1) CTA 2010 provides:

For the purposes of this Part [Part 8ZB Transactions in UK Land] a person (“A”) is related to another person (“B”)—

- (a) throughout any period for which A and B are consolidated for accounting purposes,
- (b) on any day on which the participation condition is met in relation to them, or
- (c) on any day on which the 25% investment condition is met in relation to them.

#### 54.7.1 *Consolidated accounts*

Section 356OT CTA 2010 provides:

- (2) A and B are consolidated for accounting purposes for a period if—
  - (a) their financial results for a period are required to be comprised in group accounts,
  - (b) their financial results for the period would be required to be comprised in group accounts but for the application of an exemption, or
  - (c) their financial results for a period are in fact comprised in group accounts.
- (3) In subsection (2) “group accounts” means accounts prepared under—
  - (a) section 399 of the Companies Act 2006, or
  - (b) any corresponding provision of the law of a territory outside the UK.

#### 54.7.2 *Participation condition*

Amended as para 4(6) sch 1A TCGA requires, s.356OT(4) CTA 2010 provides:

The participation condition is met in relation to A and B (“the relevant parties”) on a day if, ~~within the period of 6 months beginning with that day—~~

- (a) one of the relevant parties directly or indirectly participates in the management, control or capital of the other, or
- (b) the same person or persons directly or indirectly participate in the management, control or capital of each of the relevant parties.

See 24.8 (Participation condition).

#### 54.7.3 *25% investment condition*

Section 356OT(5) CTA 2010 provides:

The 25% investment condition is met in relation to A and B if—

- (a) one of them has a 25% investment in the other, or
- (b) a third person has a 25% investment in each of them.

Section 356OT(6) CTA 2010 adopts the definition of “25% investment” in the hybrid entities code:

Section 259NC of TIOPA 2010 applies for the purposes of determining whether a person has a “25% investment” in another person for the purposes of this section as it applies for the purposes of section 259NB(2) of that Act.

See 100.8 (% investment tests).

## 54.8 Trading exemption

Para 5(1) sch 1A(1) TCGA provides:

A disposal of a right or interest in a company is not to be regarded as a disposal of an asset deriving at least 75% of its value from UK land if it is reasonable to conclude<sup>14</sup> that, so far as the market value of the company’s qualifying assets derives (directly or indirectly) from interests in UK land<sup>15</sup>—

- (a) all of the interests in UK land are used for trading purposes ...

I refer to this as the “**trading exemption**”.

Trading companies must review their position. If they hold any non-trading land (more than insignificant) there is no relief. A group reorganisation may help.

A company which does not meet this trading exemption may still meet the trading requirement for the substantial shareholder exemption.

The trading exemption applies to a disposal of a company. If a trading company disposes of land, the disposal is taxable (though roll-over relief may apply).

### 54.8.1 “Used for trading purposes”

---

14 The phrase “it is reasonable to assume that” adds nothing; see App.2.21 (Reasonable-to-assume).

15 The words “so far as the market value of the company’s qualifying assets derives (directly or indirectly) from interests in UK land” are otiose; but it does not matter.

Para 5(2) sch 1A TCGA provides:

An interest in UK land is “used for trading purposes” for the purposes of this paragraph if (and only if), at the time of the disposal—

- (a) it is being used in, or for the purposes of, a qualifying trade, or
- (b) it has been acquired for use in, or for the purposes of, a qualifying trade.

#### 54.8.2 “Qualifying trade”

Para 5(3) sch 1A TCGA provides:

A trade is a “qualifying” trade for the purposes of this paragraph if—

- (a) [i] it has been carried on
  - [A] by the company, or
  - [B] by a person connected with the company,
- [ii] throughout the period of one year ending with the time of the disposal
- [iii] on a commercial basis with a view to the realisation of profits,<sup>16</sup> and
- (b) it is reasonable to conclude<sup>17</sup> that the trade will continue to be carried on (for more than an insignificant period of time) on a commercial basis with a view to the realisation of profits.

The CG Manual provides:

**CG73946: Indirect disposals: The trading exception** [May 2020]

... Whether a given trade continues is based on similar principles to those applied under Part 14 of CTA10 [change in company ownership]. It is necessary for the disponent to reasonably conclude that the trade is likely to continue for a ‘more than insignificant’ period of time – ‘insignificant’ in this context is a matter of degree, and should be taken in the context of these provisions to mean that the intention of the buyer is to continue to operate the trade. There may be circumstances where the trade is in distress and at risk of closing down after the sale; providing that there is a genuine understanding that the buyer is acquiring the land and trade with the intention of making the trade profitable this can meet the conditions.

Letting out of property is not, in itself, a trade.

---

16 See App 5.1 (Commercial basis/view to profit).

17 See App.2.21 (“Reasonable-to-assume”).

See also CG53000P (Substantial Shareholder Exemption “SSE”) in relation to companies disposing of trading companies or trading groups or sub-groups...

Land can be counted as being used for trading where it is intended that it be so used. So a building that is under repair or being re-fitted can be considered - even if not occupied at the point of disposal - providing that the intention is to use it in the trade following the disposal.

### 54.8.3 *Low-value non-trade interest*

Para 5(1) sch 1A(1) TCGA provides:

A disposal of a right or interest in a company is not to be regarded as a disposal of an asset deriving at least 75% of its value from UK land if it is reasonable to conclude that, so far as the market value of the company’s qualifying assets derives (directly or indirectly) from interests in UK land ...

- (b) all of the interests in UK land would be used for those purposes if low-value non-trade interests in UK land were left out of account.

Para 5(4) sch 1A TCGA provides:

For the purposes of this paragraph, “low-value non-trade interests in UK land” means interests in UK land—

- (a) which are not used for trading purposes, and
- (b) the total market value of which is, at the time of the disposal, no more than 10% of the total market value at that time of the interests in UK land that are used for trading purposes.

The CG Manual provides:

#### **CG73946: Indirect disposals: The trading exception [May 2020]**

##### **... Land not being used in the trade**

Either all of the UK land being disposed of must be used in a qualifying trade, or all but for low-value interests in UK land. This may be the case where, for example, a small amount of the value of UK land represents a dwelling for occupation by a member of staff (but not occupied for the purposes of the qualifying trade), or where there are derelict, low-value properties amongst otherwise occupied ones. This can include the letting out of surplus space by a trader. The scale of the portfolio of property being disposed of in the arrangement will be definitive in looking at the relative value of the amount of property not

used in the trade.

#### 54.8.4 *Inter-group transfer*

The CG Manual provides:

**CG73946: Indirect disposals: The trading exception [May 2020]**  
**... Transfers of UK land within a group ahead of a disposal**

Under the NRCG rules UK land assets and shares in UK property rich companies are “chargeable assets”. This means that intragroup transfers of these “chargeable assets” are undertaken on a tax neutral basis under TCGA 1992/s171. S171 in respect of non-resident companies is discussed further at CG45310.

In a group context, it is common for properties used within the group to be held in a different company to the trading company. A group may have several different trades held via different subsidiaries (in different jurisdictions) and the group parent may be non-UK resident. In the year ahead of a disposal of one of the group’s trades the properties used exclusively in that trade are transferred into a new property company. Where s171 applies the transfers involving UK land will be on a ‘nil gain, nil loss’ basis. If the relevant operating company and the property company are then sold together and the trade is expected to continue for the foreseeable future, then the conditions of the trading exception could be met. This would be a joint sale of the trading company and property-owning company as an ongoing trade.

However, it is important to note that the trading exception applies only at the share asset tier. Depending on circumstances a degrouping charge could apply...

#### 54.8.5 *Property trading/development co*

The CG Manual provides:

**CG73946: Indirect disposals: The trading exception [May 2020]**  
**... Application to Property Development Companies**

Property Development Companies (PDC) can cover a range of activities associated with the development of UK land. This UK land is a principal asset such that they are likely to be UK property rich under Sch 1A.

When considering the disposal of shares in a PDC consideration is first needed as to whether the disposal is charged under the ‘Transactions in UK land’ rules at [BIM60510+] which take priority. The ‘Transaction

in UK land' rules may apply to part or all of the gain.<sup>18</sup>

If NRCG could apply to all or part of the gain then the trading exception can be considered, however it is unlikely the trading exception would apply. For example, it is unlikely

[1] that the 'qualifying trade' will continue and

[2] that the land being used in the 'qualifying trade' at the point of disposal would continue to be used in that 'qualifying trade'.

Cases of doubt or difficulty should be referred to the CG Technical team using the submission template at CG99998.

But point [1] is a question of fact; and [2] is misconceived, as what matters is whether the trade continues, not whether the land continues to be used in the trade. The passage is perhaps considering the specific case of a SPV with one piece of land held as trading stock, selling to a purchaser who will use the land, so the trade will then cease and the trading exemption will not apply.

The Manual does accept, I think rightly, that land held as trading stock is "used in, or for the purposes of, a trade".<sup>19</sup> So the same point would apply to a property trading company, even if it is not carrying out development.

#### 54.8.6 *Planning implications*

In a typical structure, the land and the trade are held in two separate companies, thus:

Asset Co and Trade Co are connected persons. So a disposal of Asset Co by the shareholder is not subject to CGT/CT (though a direct disposal of the land by Asset Co would be subject to CT).

<sup>18</sup> See 21.5 (Transactions in land: Introduction).

<sup>19</sup> See 53.5.2 (Used in/for purposes of trade).

The very wide definition of connected person may be helpful here.

## 54.9 Linked disposals

Para 6 sch 1A TCGA provides:

- (1) This paragraph applies if—
  - (a) there are two or more disposals of rights or interests in companies,
  - (b) the disposals are linked with each other,
  - (c) some but not all of the disposals would, apart from this paragraph, be disposals of assets deriving at least 75% of their value from UK land, and
  - (d) if one of the companies included all of the assets of the others, a disposal of a right or interest in it would not be a disposal of an asset deriving at least 75% of its value from UK land.
- (2) None of the disposals are to be regarded as disposals of assets deriving at least 75% of their value from UK land.
- (3) In determining whether the condition in sub-paragraph (1)(d) is met in the case of a disposal of a right or interest in a company, it is to be assumed that, for the purposes of paragraph 4,<sup>20</sup> each of the other companies in which rights or interest are disposed of is (so far as this would not otherwise be the case) a related party of the company on the day of the disposal.

### 54.9.1 “Linked”

Para 6 sch 1A TCGA provides:

- (4) For the purposes of this paragraph a disposal of a right or interest in a company is linked with a disposal of a right or interest in another company if—
  - (a) the disposals are made under the same arrangements,
  - (b) the disposals are made by the same person or by persons connected with each other,
  - (c) the disposals are made to the same person or to persons connected with each other, and
  - (d) in the case of each disposal, the person making the disposal is connected with the company in which the right or interest is disposed of.

---

<sup>20</sup> See 54.6 (Chose in action disregard).

(5) For the purposes of this paragraph, the question whether or not a person is connected with another is to be determined immediately before the arrangements are entered into.

(6) Section 286 (connected persons: interpretation) has effect for the purposes of this paragraph as if, in subsection (4), the words “Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements,” were omitted.

Suppose a holding company has two subsidiaries of equal worth, one of which derived 100% of its value from UK property. The holding company is not property-rich, deriving only 50% of its value from UK property. If the holding company sells the subsidiaries separately, it would be chargeable on the disposal of the property-rich company. But if the disposals are “linked” this does not apply.

#### 54.10 Substantial indirect interest

A disposal of a land-rich asset is only chargeable if the taxpayer has a “substantial indirect interest”.<sup>21</sup>

Para 1 sch 1A TCGA provides:

This Schedule makes provision, for the purposes of section 1A(3)(c) or 2B(4)(b), for determining in the case of any disposal of any asset...

- (b) whether the person making the disposal has a substantial indirect interest in the UK land (see Part 3 of this Schedule).

Para 8(1) sch 1A TCGA provides:

If—

- (a) a person disposes of an asset consisting of a right or an interest in a company, and
- (b) the asset derives at least 75% of its value from UK land, the person has a substantial indirect interest in UK land if, at any time in the period of 2 years ending with the time of the disposal, the person has a 25% investment in the company.

Para (a) is not a condition or requirement, but just a method of identifying the company referred to in the final paragraph.

Para (b) is otiose, as if the asset does not derived at least 75% of its value from UK land, the asset does not fall within s.1A(3)(c) TCGA, and the

---

21 See 54.2 (Charge on land/land-rich assets).

question whether the person has a substantial indirect interest does not arise. But it does not matter.

#### 54.10.1 *Insignificant ownership period*

Para 8 sch 1A TCGA provides:

(2) But a person is not to be regarded as having a 25% investment in the company at times falling in the person's qualifying ownership period if, having regard to the length of that period, the times (taken as whole) constitute an insignificant proportion of that period.

(3) The "person's qualifying ownership period" means the period throughout which the person has held an asset consisting of a right or an interest in the company, but excluding times that fall before the beginning of the 2 year period mentioned in subparagraph (1).

#### 54.10.2 *"Insignificant"*

This term is not defined. The CG Manual provides:

##### **CG73936 Substantial indirect interest** [May 2020]

As a general rule, HMRC will consider 'insignificant' to be 10% or less of the time (so 75<sup>22</sup> days or less for a full two year period). Where the total ownership period is very brief and the facts and circumstances indicate that the person was never intended to hold a 25% or greater investment for any length of time, this may allow a greater leeway.

#### 54.10.3 *"25% investment"*

For the definition see 100.8 (% investment tests).

#### 54.10.4 *Partnership*

Para 9(11) sch 1A TCGA provides:

Any reference in this paragraph, in the case of a person who is a member of a partnership, to the proceeds, amount or assets of the person includes the person's share of the proceeds, amount or assets of the partnership (apportioning those things between the partners on a just and reasonable basis).

### 54.11 Normal commercial loan

---

<sup>22</sup> Author's footnote: The correct figure is 73 (ignoring the complication of a leap year).

Normal commercial loan matters for:

- (1) The derivation test in para 3 (Market value not traced through a NCL)
- (2) The 25% test in para 9 (NCL does not count as equity)

The definition is intricate. It is taken from the CT group relief rules and illustrates how private client practitioners now have to extend their knowledge to matters which they could formerly have left to corporation tax practitioners.

Para 3(5) sch 1A TCGA provides:

For the purposes of this paragraph—  
“normal commercial loan” means a loan which is a normal commercial loan for the purposes of section 158(1)(b) or 159(4)(b) of CTA 2010

That only applies for para 3, but the definition is repeated in para 9(5). That takes us to s.162(1) CTA 2010 which provides:

For the purposes of sections 158(1)(b) and 159(4)(b) “normal commercial loan” means a loan—

- (a) which is of or includes new consideration, and
- (b) in relation to which each of conditions A to D is met.

I refer to “**NCL conditions A-D**”.

#### 54.11.1 *NCL cond. A: unconvertable*

Section 162(2) CTA 2010 provides:

Condition A is that the loan does not carry any right to conversion into shares or securities other than a right to conversion into—

- (a) shares to which section 164(1) applies,
- (b) securities to which section 164(2) applies, or
- (c) shares or securities
  - [i] in a quoted unconnected company (see section 164(2A)) or
  - [ii] in the relevant company’s quoted parent company (see section 164(3) to (7)).

Section 164 CTA 2010 provides:

- (1) This subsection applies to any shares—
  - (a) in relation to which conditions A, C, D and E in section 160 are met, and
  - (b) which do not carry any rights to conversion into shares or

securities other than rights to conversion into shares or securities in the relevant company's quoted parent company (see subsections (3) to (6)).

- (2) This subsection applies to any securities—
- (a) which represent a loan of or including new consideration,
  - (b) in relation to which conditions B, C and D in section 162 are met, and
  - (c) which do not carry any rights to conversion into shares or securities other than rights to conversion into shares or securities in [a quoted unconnected company (see subsection (2A)) or in]1 the relevant company's quoted parent company.
- (2A) For the purposes of this section and section 162 a company is a quoted unconnected company if (and only if)—
- (a) its ordinary shares are listed on a recognised stock exchange, and
  - (b) it is not connected with the relevant company.
- (3) For the purposes of this section and sections 160 and 162 a company (“the candidate company”) is the relevant company's quoted parent company if (and only if)—
- (a) the relevant company is a 75% subsidiary of the candidate company,
  - (b) the candidate company is not a 75% subsidiary of any company, and
  - (c) the candidate company's ordinary shares are listed on a recognised stock exchange.
- (4) In the case of a company whose]1 ordinary share capital is divided into two or more classes, subsections (2A)(a) and (3)(c) are met only if its ordinary shares of each class are listed on a recognised stock exchange.
- (5) In this section “ordinary shares” means shares forming part of ordinary share capital.
- (6) Subsection (7) applies if, in determining under subsection (3)(a) whether the relevant company is a 75% subsidiary of the candidate company, it is necessary to know, for the purposes of subsection (1)(b) or (2)(c) or section 160(4)(c) or 162(2)(c), whether the candidate company is the relevant company's quoted parent company.
- (7) It is to be assumed for those purposes that the candidate company is the relevant company's quoted parent company.

#### 54.11.2 *Cond. B: no acquisition rights*

Section 162(3) CTA 2010 provides:

Condition B is that the loan does not carry any right to the acquisition of shares or securities.

#### 54.11.3 NCL condition C: interest

Section 162(4) CTA 2010 provides:

Condition C is that the loan does not entitle the loan creditor to any amount by way of interest which—

- (a) depends to any extent on the results of the relevant company's business or on the results of any part of that business,
- (b) depends to any extent on the value of any of the relevant company's assets, or
- (c) exceeds a reasonable commercial return on the new consideration lent.

This subsection needs to be read with section 163.

An interest-free loan satisfies condition C, and may therefore be a "normal commercial loan".

Section 163 CTA 2010 provides three exceptions:

(1) Interest is not within section 162(4)(a) by reason only that the terms of the loan provide for the rate of interest—

- (a) to be reduced if the results of the relevant company's business or any part of the business improve, or
- (b) to be increased if such results worsen.

(2) Interest is not within section 162(4)(b) by reason only that the terms of the loan provide for the rate of interest—

- (a) to be reduced if the value of any of the relevant company's assets increases, or
- (b) to be increased if the value of any such assets decreases.

(3) Subsection (4) applies if—

- (a) a loan is made to the relevant company for the purpose of facilitating the acquisition of land,
- (b) the loan is made on the basis mentioned in subsection (5), and
- (c) none of the land that the loan is used to acquire is acquired with a view to resale at a profit.

(4) Interest on the loan is not within section 162(4)(b) by reason only that the terms of the loan are such that the only way the loan creditor can enforce payment of an amount due is by exercising rights granted by way of security over the land that the loan is used to acquire.

- (5) The basis referred to in subsection (3)(b) is that—
- (a) the whole of the loan is to be applied in the acquisition of land by the relevant company or in meeting incidental costs incurred wholly and exclusively for the purpose of obtaining the loan or providing security for the loan,
  - (b) the payment of any amount due in connection with the loan to the person making it is to be secured on the land that the loan is used to acquire, and
  - (c) no other security is to be required for the payment of any such amount.
  - (6) “Incidental costs” means expenditure on fees, commissions, advertising, printing or other incidental matters.

#### 54.11.4 NCL condition D: repayment

Section 162(5) CTA 2010 provides:

Condition D is that the loan is a loan in relation to which the loan creditor is entitled, on repayment, to an amount which—

- (a) does not exceed the new consideration lent, or
- (b) is reasonably comparable with the amount generally repayable (in relation to an equal amount of new consideration) under the terms of issue of securities listed on a recognised stock exchange.

### 54.12 Connected persons aggregated

Para 10(1) sch 1A TCGA provides:

In determining for the purposes of paragraph 9 [definition of substantial indirect interest] the investment that a person (“P”) has in a company, P is to be taken to have all of the rights and interests of any person connected with P.

I refer to this as the “**para 10 aggregation rule**”.

#### 54.12.1 “Connected”

Para 10 sch 1A TCGA cuts down the standard definition of connected person, for the purposes of the para 110 aggregation rule:

- (2) A person is not to be regarded as connected with another person for the purposes of this paragraph merely as a result of their being parties to a loan that is a normal commercial loan for the purposes of paragraph

9.<sup>23</sup>

(3) Section 286 (connected persons: interpretation)<sup>24</sup> has effect for the purposes of this paragraph—

- (a) as if, in subsection (2), for the words from “, or is a relative” to the end there were substituted “or is a lineal ancestor or lineal descendant of the individual or of the individual’s spouse or civil partner”, and
- (b) as if subsections (4) and (8) were omitted.

Section 286 TCGA as amended provides:

(1) Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section (any provision that one person is connected with another being taken to mean that they are connected with one another).

(2) A person is connected with an individual if that person is the individual’s spouse or civil partner, ~~or is a relative, or the spouse or civil partner of a relative, of the individual or of the individual’s spouse or civil partner~~ or is a lineal ancestor or lineal descendant of the individual or of the individual’s spouse or civil partner.

(3) A person, in his capacity as trustee of a settlement, is connected with—

- (a) any individual who in relation to the settlement is a settlor,
- (b) any person who is connected with such an individual,
- (c) any body corporate which is connected with that settlement,
- (d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and
- (e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement.

(3ZA) [definitions of “settlement” and “trustee”]

(3A) For the purpose of subsection (3) above a body corporate is connected with a settlement if—

- (a) it is a close company (or only not a close company because it is not resident in the UK) and the participators include the trustees of the settlement; or
- (b) it is controlled (within the meaning of section 1124 of CTA 2010 [strict sense control]) by a company falling within paragraph (a) above.

~~(4) Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements, a person is connected with any person with whom he is in partnership, and with the spouse or civil partner or a relative of any individual with whom he is in partnership.~~

23 See 54.11 (Normal commercial loan).

24 See 99.12 (Connected person).

- ~~(5) A company is connected with another company—~~
- ~~(a) if the same person has control of both, or a person has control of one and persons connected with him, or he and persons connected with him, have control of the other, or~~
  - ~~(b) if a group of 2 or more persons has control of each company, and the groups either consist of the same persons or could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person with whom he is connected.~~
- ~~(6) A company is connected with another person, if that person has control of it or if that person and persons connected with him together have control of it.~~
- ~~(7) Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected with one another and with any person acting on the directions of any of them to secure or exercise control of the company.~~
- ~~(8) In this section “relative” means brother, sister, ancestor or lineal descendant.~~

### 54.13 TAAR/Treaty override

Para 11 deals with two distinct topics: a TAAR and a treaty override.

#### 54.13.1 Land-rich TAAR

Of course there is a TAAR.

Para 11 sch 1A TCGA provides:

- (1) This paragraph applies if a person has entered into any arrangements<sup>25</sup> the main purpose, or one of the main purposes, of which is to obtain a tax advantage<sup>26</sup> for the person as a result (wholly or partly) of—
- (a) a provision of this Schedule applying or not applying ...

This applies if the advantage arises as a result of a provision of sch 1A or a DTA. An advantage arising as a result of other provisions does not count. An advantage arising as a result of sch 1A together with other provisions would be caught.

It is easy to see that an arrangement to secure that sch 1A does not apply could have a tax advantage. It is less obvious how an arrangement to

---

25 Para 11(6) sch 1A TCGA provides (with minor contextual modification) the standard (unnecessary) definition: see App 2.2.3 (Definitions of “arrangement”).

26 Para 11(6) sch 1A TCGA sets out the GAAR definition of “tax advantage”; see 2.12.1 (Tax advantage: Definitions).

secure that sch 1A does apply could have a tax advantage; an example is an arrangement to obtain land-asset hold-over relief or rebasing relief.

Para 11(6) sch 1A TCGA provides:

In this paragraph ... “tax” means capital gains tax or corporation tax

The CG Manual provides:

**CG73950 Indirect disposals: TAAR [May 2020]**

Some examples of where this could apply would be:

- Manipulating the company’s assets such that it was not UK property rich when a disposal was made.
- Ordering transactions to ensure a UK land disposal occurred at a time when the company had ceased to be UK property rich.
- Undertaking a disposal where the ‘linked disposals’ exemption<sup>27</sup> would apply with the intention to onward sell some or all of the non-UK land assets such that the exemption would not have been available had just the remaining interests been disposed of.
- A disposal to which the ‘trading exemption’ was met and then UK land used in the trade was disposed of as part of planned arrangements although the trade continued.
- The use of back to back arrangements to break related party rules applying.
- Delaying completion of a transaction to ensure the disposer had ceased to hold a significant indirect interest including by fragmentation

...

**Restructuring of pre-April 2019 holdings**

The extension in scope of the non-resident capital gains rules may have prompted some non-resident investors to consider how their interests in UK land were held.

For example, an exempt investor holding interests in UK land indirectly via a holding company where the holding company is not UK property rich but one or more of its subsidiaries are. In such a case the disposal of a UK property rich subsidiary would be a taxable disposal by the holding company.

To avoid this outcome the exempt investor may have decided to concentrate their UK property rich companies under a new directly held holding company which could then make an exemption election under Para 12 Sch 5AAA.

---

27 See 54.9 (Linked disposal).

Where the restructuring was solely undertaken to allow Sch 5AAA elections i.e. the transparency or exemption elections, to apply it is not expected that the TAAR would apply. Cases of doubt or difficulty should be referred to the CG Technical team using the submission template at CG99998.

#### 54.13.2 *Treaty override*

Para 11 sch 1A TCGA provides:

- (1) This paragraph applies if a person has entered into any arrangements<sup>28</sup> the main purpose, or one of the main purposes, of which is to obtain a tax advantage<sup>29</sup> for the person as a result (wholly or partly) of ...
- (b) double taxation arrangements<sup>30</sup> having effect despite a provision of this Schedule in a case where the advantage is contrary to the object and purpose<sup>31</sup> of the double taxation arrangements.

Para 11(4) Sch 1A TCGA provides a treaty override:

The counteraction has effect in a treaty shopping case<sup>32</sup> regardless of section 6(1) of TIOPA 2010.

The wording is based on the OECD principal purpose test.<sup>33</sup>

The CG Manual provides:

**CG73950 Indirect disposals: TAAR [May 2020]**

[The treaty override] is rooted in the internationally agreed principles governing what the Commentary to the OECD Model calls “improper use of the Convention”, and is explored at length in the Commentary to Article 1 of the OECD Model (paragraphs 54 to 80 in the 2017

28 Para 11(6) sch 1A TCGA provides (with minor contextual modification) the standard (unnecessary) definition: see App 2.2.3 (Definitions of “arrangement”).

29 Para 11(6) sch 1A TCGA sets out the GAAR definition of “tax advantage”; see 2.12.1 (Tax advantage: Definitions).

30 Para 11(6) sch 1A TCGA provides the standard commonsense definition: “In this paragraph ... “double taxation arrangements” means arrangements that have effect under section 2(1) of TIOPA 2010”.

31 See 104.7 (OECD-concept abuse).

32 Defined para 11(6) sch 1A TCGA: “treaty shopping case” means a case where this paragraph applies as a result of sub-paragraph (1)(b).

33 See 104.8 (OECD principal purpose test).

version)<sup>34</sup>...

A DTA will always provide a tax benefit in relation to a particular state in circumstances where the allocation of taxing rights and the relative rates of tax in the contracting states means a person pays less tax in that state than they would absent the DTA. However, under the guiding principle outlined above, abuse arises where arrangements have been entered into to create that effect, and not for commercial or substantive reasons.

HMRC will consider each case on its merits, but for example would in particular consider the application of the TAAR where historically a person or group of persons had used structures for holding UK land that would become taxable in the UK under these rules, but after becoming aware of the indirect disposal rules began to structure so that DTAs would restrict the UK's right to tax.

See too OECD, "Taxation of Offshore Indirect Transfers (Draft Toolkit)".<sup>35</sup>

#### 54.13.3 *Treaty/TAAR counteraction*

Para 11 sch 1A TCGA provides:

(2) The tax advantage is to be counteracted by the making of such adjustments as are just and reasonable.

(3) The adjustments may be made (whether by an officer of Revenue and Customs or the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

This is a counteraction-style TAAR; see 2.10.5 (Consequence of TAAR). The Consultation Response Document provides:

3.160. The government believes that in practice, given the motive test, customers will have certainty as to whether actions they undertake could trigger the [anti-avoidance] rule.

The reader may doubt if that is intended to be taken seriously.

#### 54.14 **Grant of option**

Section 1C TCGA provides:

---

<sup>34</sup> See 104.7 (OECD-concept abuse).

<sup>35</sup> <https://www.oecd.org/tax/taxation-of-offshore-indirect-transfers.htm>

(4) The grant of an option by a person binding the person to dispose of an interest in UK land is (so far as it would not otherwise be the case) regarded as a disposal of an interest in UK land by the person for the purposes of section 1A(3)(b).

(5) This does not affect the operation of section 144 in relation to the grant of the option (or otherwise).<sup>36</sup>

This is derived from the former NRCGT rule. Why is it needed?

### 54.15 UK land rebasing: Introduction

The rebasing rules (“**UK land rebasing**”) are in sch 4AA TCGA.

There are three types of UK land rebasing. I coin the following terminology:

Type of rebasing	Rebase to	sch 4AA	Applies to:
2019 rebasing	2019	Part 2	(a) indirect disposal (b) direct disposal, no residential use (c) direct disposal by non-chargeable person
2015 rebasing	2015	Part 3	Direct disposal, fully residential
2015/19 rebasing	2015/2019	Part 4	Direct disposal, partly residential use

The elections out of these rebasing rules are:

Type of rebasing	Elections	Sch 4AA para
2019 rebasing	Historic cost <sup>37</sup>	4
	Time apportionment	<i>Not available</i>
2015 rebasing	Historic cost	8
	Time apportionment	9
2015/19 rebasing	Historic cost	14
	Time apportionment	<i>Not available</i>

### 54.16 General rebasing conditions

Para 1(1) sch 4AA TCGA provides:

Part 2, 3 or 4 of this Schedule applies on the first occasion on which a person disposes of an asset that the person held on 5 April 2019 where—

- (a) the disposal is either a direct or indirect disposal of UK land,

<sup>36</sup> Para 4(4)(5) sch 1B TCGA makes the same provision for the purposes of that schedule.

<sup>37</sup> Statute calls this the retrospective basis of calculation, but I think my term is clearer.

- and
- (b) the disposal is made by a non-resident or a UK resident in the overseas part of a tax year.

These requirements apply to each of the 3 types of UK land rebasing. I refer to this as the “**general rebasing conditions**”.

#### 54.16.1 *Direct/indirect disposal*

Para 1(3) sch 4AA TCGA provides a (relatively) commonsense definition of direct/indirect disposal of UK land, which is the requirement in general rebasing condition (a):

For the purposes of this Schedule—

- (a) a disposal is a “direct disposal of UK land” if it is a disposal of an interest in UK land, and
- (b) a disposal by a person is an “indirect disposal of UK land” if it is a disposal of an asset (other than an interest in UK land) deriving at least 75% of its value from UK land where the person has a substantial indirect interest in that land.

The wording mirrors s.1A(3)/2B(4) TCGA.<sup>38</sup>

#### 54.16.2 *Disposal by non-resident*

Para 1(4) sch 4AA TCGA (in short) provides a definition of “non-resident”, which is the requirement in general rebasing condition (b):

For the purposes of this paragraph, the disposal is made by a non-resident or a UK resident in the overseas part of a tax year if it is—

- (a) a disposal on which a gain accrues that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land/land-rich asset],<sup>39</sup>
- (b) a disposal on which a gain accrues that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split year] because the asset disposed of is within section 1A(3)(b) or (c) [land-asset],
- (c) a disposal on which a gain accrues that falls to be dealt with by section 2B(4),<sup>40</sup> or

---

38 See 54.2 (Charge on land/land-rich assets).

39 See 54.2 (Charge on land/land-rich assets).

40 See 53.4.5 (Charge on non-resident co).

- (d) a disposal of an asset
  - [i] on which a gain does not accrue
  - [ii] but which, had a gain accrued, would fall to be dealt with as mentioned in any of the preceding paragraphs of this subparagraph.

This is convoluted drafting, but it works.

Land rebasing is therefore an unusual relief: it applies (in short) to non-residents but it does not generally apply to UK residents.<sup>41</sup> It follows that the relief does not apply for the purpose of computing s.3 gains<sup>42</sup> or s.1(3) amounts (trust gains)<sup>43</sup>.

### 54.17 2019 rebasing

Para 2(1) sch 4AA TCGA provides:

This Part [Part 2] of this Schedule applies to-

- (a) all indirect disposals of UK land,
- (b) direct disposals of UK land that were not fully residential before 6 April 2019, and
- (c) direct disposals of UK land by persons who were not chargeable before 6 April 2019.

I refer to this as “**2019 rebasing heads (a)-(c)**”.

#### 54.17.1 *Not fully residential: Head (b)*

2019 rebasing applies (under head (b)) to direct disposals of UK land that were not fully residential before 2019. Para 2(2) sch 4AA TCGA provides the definition:

For the purposes of this paragraph a direct disposal of UK land made by a person was “not fully residential before 6 April 2019” if in the period-

- (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 6 April 2015, and
- (b) ending with 5 April 2019,

there was no day on which the land to which the disposal relates consisted of or included a dwelling.

---

41 But see 54.26 (Rebasing: Company onshoring).

42 See 60.4 (Computing gains: CT rules).

43 See 57.6.1 (s.1(3) amount: Exemptions/reliefs).

“Not fully residential” seems an odd way to express this concept: Not residential (or not fully or partly residential) would be clearer.

#### 54.17.2 *Contract to buy off-plan*

Para 2(3) sch 4AA TCGA provides:

If the disposal is of an interest in land subsisting under a contract for the acquisition of land that, at any time before 6 April 2019, consisted of or included a building to be constructed or adapted for use as a dwelling, the disposal is taken to be fully residential before that date.

#### 54.17.3 *Non-chargeable person: Head (c)*

2019 rebasing applies to direct disposals of UK land by non-chargeable persons. Para 2 sch 4AA TCGA provides the definition:

(4) For the purposes of this paragraph, a disposal is made by a person who was not chargeable before 6 April 2019 if, immediately before that date, the person was-

- (a) a company which was not a closely-held company (see sub-paragraph (5)),
- (b) a widely-marketed scheme (see sub-paragraph (6)), or
- (c) a company carrying on life assurance business (as defined in section 56 of the Finance Act 2012) where the interest in UK land was, immediately before that date, held for the purpose of providing benefits to policyholders in the course of that business.

(5) The question as to whether a company is “a closely-held company” is determined in accordance with Part 1 of Schedule C1; but if-

- (a) the company is a divided company within the meaning of section 14G, and
- (b) the company would not otherwise be regarded as a closely-held company,

the company is to be so regarded if the conditions in subsection (3) of that section are met.

(6) A person is a “widely-marketed scheme” if-

- (a) the person is a scheme within the meaning of section 14F, and
- (b) condition A or B in that section is met, reading the reference in subsection (8)(a) of that section to the non-resident CGT disposal as a reference to the disposal mentioned in paragraph 1(1).

(7) In determining for the purposes of this paragraph whether or not-

- (a) a person is a closely-held company, or
  - (b) a person is a widely-marketed scheme,
- arrangements are to be ignored if the main purpose of, or one of the main purposes of, them is to secure a tax advantage as a result of the person not being a closely-held company or the person being a widely-marketed scheme.<sup>44</sup>
- (8) In this paragraph ...
    - (b) any reference to section 14F, 14G or Schedule C1 are to those provisions as they had effect on 5 April 2019 (before their repeal by Schedule 1 to the Finance Act 2019).

Thus the complex pre-2019 provisions continue to matter for 2019 rebasing head (c).

#### **54.18 2019 Rebasing: The relief**

Assuming the general rebasing conditions are met, and one of 2019 rebasing heads (a)-(c) apply, para 3(1) sch 4AA TCGA provides the relief:

In calculating the gain or loss accruing on the disposal it is [to<sup>45</sup>] be assumed that the asset was on 5 April 2019 sold by the person, and immediately reacquired by the person, at its market value on that date.

The wording is based on s.35 TCGA (1982 rebasing).

#### **54.19 Election out of 2019 rebasing**

Para 3(2) sch 4AA TCGA

This paragraph [2019 rebasing relief] has effect subject to any election made by the person under paragraph 4 (retrospective basis of calculation).

So we turn to para 4(1) sch 4AA TCGA which provides:

The person may make an election under this paragraph for the assumption that the asset is sold and reacquired as mentioned in paragraph 3 not to apply.

---

44 Para 2 incorporates the standard definitions, but for some reason does so indirectly: “(8) In this paragraph ... (a) “arrangements” and “tax advantage” have the same meaning as in section 16A”.

45 Typos in Acts of Parliament are exceptional. But on this occasion the word “to” has been erroneously omitted.

Statute calls this the retrospective basis of calculation, but I think “historic cost” is clearer. There is no time apportionment, so the entire historic gain (if any) will come into charge. So an election will rarely be advantageous.

The Consultation Response document provides:

3.21. The government recognises the burden on taxpayers in having to obtain valuations, but believes that offering the retrospective basis as an option means those unable to get a valuation can use original cost. Time apportionment is still available on purely residential property disposals, and for commercial and mixed-use property it is likely most taxpayers will obtain a valuation for rebasing to ensure they use the most tax effective calculation method.

#### 54.19.1 *Para 4 election: Loss*

Para 4(2) sch 4AA TCGA provides:

If, in the case of an indirect disposal of UK land-

- (a) a person makes an election under this paragraph, and
  - (b) a loss accrues on the disposal,
- the loss is not an allowable loss.

The Consultation Response document provides:

3.22. The government recognises that in some circumstances on indirect disposals it will not be practical to obtain a valuation at April 2019, and so will allow the retrospective basis to be used. To prevent this creating significant losses arising from assets that were not in the UK tax base prior to commencement, where the retrospective basis is used on indirect disposals, it will not be able to produce an allowable loss. Not allowing losses that accrued pre- commencement is coherent with the overall policy, and aligns with the treatment of gains.

3.23. Hence in indirect disposal cases the retrospective basis would only be capable of producing a chargeable gain. Any loss would not be an allowable loss...

This does not apply to a direct disposal. Why is that?

#### 54.19.2 *Para 4 election: Residential property gain*

Para 5 sch 4AA TCGA provides:

(1) This paragraph applies if-

- (a) a person makes an election under paragraph 4 in respect of a

- disposal on which a gain accrues, and
- (b) it is necessary to determine, in accordance with Schedule 1B, how much of the gain is a residential property gain.
- (2) Paragraph 2 of Schedule 1B has effect as if-
  - (a) sub-paragraphs (5) and (6) of that paragraph were omitted, and
  - (b) in that paragraph, “the applicable period” had the definition given by the next sub-paragraph.
- (3) “The applicable period” means the period-
  - (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and
  - (b) ending with the day before the day on which the disposal is made.

Amended as para 5 requires, the key parts of para 2 sch 1B TCGA provide:

- 2 (1) The proportion of a chargeable gain attributable to residential property is equal to—
  - (a) the relevant fraction of the gain, and
  - (b) if there has been mixed use of the land to which the disposal relates on one or more days in the applicable period, the relevant fraction of the gain as adjusted, on a just and reasonable basis, to take account of the mixed use on the day or days.
- (2) The relevant fraction is A/B where—  
A is the number of days in the applicable period on which the land to which the disposal relates consists of or includes a dwelling, and  
B is the total number of days in the applicable period.
- (3) [Definition of “mixed use of land”]
- (4) [Contract for the acquisition of dwelling]
- ~~(5) In this paragraph “the applicable period” means the period—~~
  - ~~(a) beginning with the day on which the person making the disposal acquired the interest in land being disposed of or, if later, the day from which the interest in land became chargeable, and~~
  - ~~(b) ending with the day before the day on which the disposal occurs.~~
- ~~(6) For the purposes of this paragraph an interest in land became “chargeable”—~~
  - ~~(a) in any case where the disposal is of an interest in land in the~~

UK—

- ~~(i) by a person in a tax year in which the person is not UK resident, or~~
- ~~(ii) by a person in the overseas part of a tax year which is, as respects the person, a split year, from 6 April 2015, and~~
- ~~(b) in any other case, from 31 March 1982.~~
- (7) [Interests in land acquired by the person at different times].
- (x) “The applicable period” means the period-
  - (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and
  - (b) ending with the day before the day on which the disposal is made.

## 54.20 2015 rebasing conditions

Para 6(1) sch 4AA TCGA provides:

This Part [Part 3, 2015 rebasing] of this Schedule applies to any direct disposal of UK land if-

- (a) the person held the interest in UK land being disposed of throughout the period beginning with 6 April 2015 and ending with the disposal, and
- (b) the disposal was fully residential before 6 April 2019.

I refer to this as “**2015 rebasing conditions**”.

### 54.20.1 “Fully residential”

Para 6 sch 4AA TCGA provides:

(2) For this purpose a direct disposal of UK land made by a person is “fully residential before 6 April 2019” if in the period-

- (a) beginning with 6 April 2015, and
- (b) ending with 5 April 2019,

every day on which the land to which the disposal relates consisted of a dwelling.

(3) If the disposal is of an interest in land subsisting under a contract for the acquisition of land that, at any time in that period, did not consist of a building to be constructed or adapted for use as a dwelling, the disposal is taken to be not fully residential before 6 April 2019.

(4) This Part [Part 3] of this Schedule does not apply to a direct disposal of UK land made by a person who was not chargeable before 6 April

2019, as determined for the purposes of paragraph 2.<sup>46</sup>

### 54.21 2015 rebasing relief

Para 7(1) sch 4AA TCGA provides:

In calculating the gain or loss accruing on the disposal it is [to<sup>47</sup>] be assumed that the asset was on 5 April 2015 sold by the person, and immediately reacquired by the person, at its market value on that date.

The wording is based on s.35 TCGA (1982 rebasing).

### 54.22 Elections out of 2015 rebasing

Para 7(2) sch 4AA TCGA provides:

This paragraph has effect subject to any election made by the person under either-

- (a) paragraph 8 (retrospective basis of calculation), or
  - (b) paragraph 9 (straight-line time apportionment),
- (and an election may be made under only one of those paragraphs).

#### 54.22.1 *Historic cost election*

Para 8 sch 4AA TCGA provides:

The person may make an election under this paragraph for the assumption that the asset is sold and reacquired as mentioned in paragraph 7 not to apply.

I call this a para 8 historic cost election.

#### 54.22.2 *Time apportionment election*

Para 9 sch 4AA TCGA provides:

- (1) The person may make an election under this paragraph-
  - (a) for the assumption that the asset is sold and reacquired as mentioned in paragraph 7 not to apply, and
  - (b) for the gain or loss accruing on the disposal to be apportioned so that only the post-5 April 2015 proportion of it is treated as accruing on the disposal.

---

46 See 54.17.3 (Non-chargeable person).

47 Typos in Acts of Parliament are exceptional. But on this occasion the word “to” has been erroneously omitted.

(2) The “post-5 April 2015 proportion” is the proportion that the days in the post-5 April 2015 period bear to the days in the ownership period.

(3) For this purpose-

“the post-5 April 2015 period” means the day beginning with 6 April 2015 and ending with the day on which the disposal is made, and

“the ownership period” means the period beginning with the day on which the person acquired the interest disposed of or, if later, 31 March 1982 and ending with the day on which the disposal is made.

I call this a para 9 time apportionment election.

Draft CG Manual CG73972 gives a straightforward example:

Disposal made in June 2020 (1500 days after 5/4/15) and acquisition February 2011 (1500 days before in 6 April 2015).

Gain before any apportionment £1,000.

The post 5 April 2015 proportion of the gain would be £500

i.e.  $1,000 \times (1,500 / (1,500 + 1,500))$

### 54.22.3 *Para 8/9 elections: Residential property gain*

Para 9 and 10 sch 4AA TCGA are best read side by side:

#### **Para 9 sch 4AA: historic cost**

- (1) This paragraph applies if-
- (a) a person makes an election under paragraph 8 in respect of a disposal on which a gain accrues, and
- (b) it is necessary to determine, in accordance with Schedule 1B, how much of the gain is a residential property gain.
- (2) Paragraph 2 of Schedule 1B has effect as if-
- (a) sub-paragraphs (5) and (6) of that paragraph were omitted, and
- (b) in that paragraph, “the applicable period” had the definition given by the next sub-paragraph.

#### **Para 10 sch 4AA: time apportion**

- (1) This paragraph applies if-
- (a) a person makes an election under paragraph 9 in respect of a disposal on which a gain accrues, and
- [identical]
- [identical]
- [identical]
- [identical]
- [identical]

- |  |   |
|--|---|
| <p>(3) “The applicable period” means the period-</p> <p>(a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and</p> <p>(b) ending with the day before the day on which the disposal is made.</p> | <p>(3) “The applicable period” means the period-</p> <p>(a) beginning with 6 April 2015, and</p> <p>[identical]</p> |
|--|---|

These are the equivalents to para 5 sch 4AA TCGA but with different applicable periods; see 54.19.2 (Para 4 election: residential property gain).

### 54.23 2015/2019 rebasing conditions

Para 12 sch 4AA TCGA provides:

- (1) This Part [Part 4, 2015/2019 rebasing] of this Schedule applies to any direct disposal of UK land if-
  - (a) neither Part 2 [2019 rebasing] nor Part 3 [2015 rebasing] of this Schedule applies to the disposal, and
  - (b) the interest in UK land being disposed of was not a post-April 2015 asset that was fully residential before 6 April 2019.
- (2) For this purpose-
  - (a) the interest in UK land being disposed of is a “post-April 2015 asset” if it was acquired by the person after 5 April 2015, and
  - (b) the asset “was fully residential before 6 April 2019” if, in the period beginning with the day on which it was acquired and ending with 5 April 2019, every day on which the land to which the disposal relates consisted of a dwelling.
- (3) If the disposal is of an interest in land subsisting under a contract for the acquisition of land that, at any time in that period, did not consist of a building to be constructed or adapted for use as a dwelling, the disposal is taken to be not fully residential before 6 April 2019.

I refer to this as “**2015/2019 rebasing conditions**”.

### 54.24 2015/2019 rebasing: the relief

Assuming the general rebasing conditions and the 2015/2019 rebasing conditions are met, para 13 sch 4AA TCGA provides:

- (1) In calculating the gain or loss accruing on the disposal (“the actual

disposal”) it is [to<sup>48</sup>] be assumed that-

- (a) the asset was on 5 April 2015 sold by the person, and immediately reacquired by the person, at its market value on that date (but see sub-paragraph (3)), and
  - (b) in addition, the asset was on 5 April 2019 sold by the person, and immediately reacquired by the person, at its market value on that date.
- (2) In the case of the assumed sale on 5 April 2019, the gain or loss accruing on that sale is treated as accruing on the actual disposal (in addition to the gain or loss that actually accrues on the actual disposal).
- (3) If the asset was acquired by the person after 5 April 2015, the assumption that it is sold, and immediately reacquired, on 5 April 2015 is not to apply.

## 54.25 Election out of 2015/2019 rebasing

Para 13(4) sch 4AA TCGA provides:

This paragraph has effect subject to any election made by the person under paragraph 14 (retrospective basis of calculation).

So we turn to para 14 sch 4AA TCGA which provides:

The person may make an election under this paragraph for the assumptions that the asset is sold and reacquired as mentioned in paragraph 13 not to apply.

### 54.25.1 *Para 14 election: Residential property gain*

Para 15 sch 4AA TCGA provides:

- (1) This paragraph applies if-
  - (a) a person makes an election under paragraph 14 in respect of a disposal on which a gain accrues, and
  - (b) it is necessary to determine, in accordance with Schedule 1B, how much of the gain is a residential property gain.
- (2) Paragraph 2 of Schedule 1B has effect as if-
  - (a) sub-paragraphs (5) and (6) of that paragraph were omitted, and
  - (b) in that paragraph, “the applicable period” had the definition given by the next sub-paragraph.

---

48 Typos in Acts of Parliament are exceptional. But on this occasion the word “to” has been erroneously omitted.

- (3) “The applicable period” means the period-
- (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and
  - (b) ending with the day before the day on which the disposal is made.

This is the equivalent to para 5 sch 4AA TCGA but with a different applicable period; see 54.19.2 (Para 4 election: residential property gain).

### **54.26 Rebasing: Company onshoring**

Para 16 sch 4AA TCGA provides:

- (1) This paragraph applies in any case where-
  - (a) a company becomes resident in the UK after 5 April 2019,
  - (b) the company makes a direct or indirect disposal of UK land after that date, and
  - (c) (ignoring this paragraph) Part 2, 3 or 4 of this Schedule would have applied to the disposal but for the fact that it is made at a time when the company is resident in the UK.
- (2) In that case, Part 2, 3 or 4 of this Schedule applies in relation to the disposal (regardless of paragraph 1(1)(c)).

This only applies to companies, so individuals and trustees who become UK resident after 5 April 2019 do not qualify for rebasing. This anomaly is deliberate. The consultation response paper provides:

3.31. In order not to dis-incentivise on-shoring, the government is content to allow for companies who become UK resident to retain the ability to calculate their gains or losses using rebasing to April 2019.

The policy to facilitate onshoring companies, but discourage onshoring of trusts, seems a strange one; but there it is.

### **54.27 Company/trust leaves UK**

Similar rules apply to companies and trusts, and it is easiest to follow if the text is set out side by side:

**Para 17 sch 4AA TCGA (trust)**

**Para 18 sch 4AA TCGA (company)**

(1) This paragraph applies in any case where-

(a) the trustees of a settlement cease to be resident in the UK after 5 April 2019, and

(b) the trustees make a direct or indirect disposal of UK land after that date.

(2) Nothing in Part 2, 3 or 4 of this Schedule applies to the disposal.

(3) The asset that is disposed of is excepted from the application of section 80(2) (deemed disposal of assets on trustees ceasing to be resident in UK).<sup>49</sup>

(1) This paragraph applies in any case where-

(a) a company ceases to be resident in the UK after 5 April 2019, and

(b) the company makes a direct or indirect disposal of UK land after that date.

*Identical*

(3) The asset that is disposed of is excepted from the application of section 185(2) and (3) (deemed disposal of assets on company ceasing to be resident in UK).

## 54.28 Rebasing: Wasting asset

Para 19 sch 4AA TCGA provides:

(1) This paragraph applies if, in calculating a gain or loss accruing to a person in a case where paragraph 3, 7 or 13 is applicable, it is necessary to make a wasting asset determination in relation to the asset disposed of.

(2) The assumption that the asset was acquired on a date mentioned in paragraph 3, 7 or 13 (as the case may be) is to be ignored in making that determination.

(3) In this paragraph “a wasting asset determination” means a determination whether or not an asset is a wasting asset, as defined for the purposes of Chapter 2 of Part 2 of this Act. Capital allowances

Para 20 sch 4AA TCGA provides:

(1) This paragraph applies if, in calculating a gain or loss accruing to a person in a case where paragraph 3, 7 or 13 is applicable, it is to be assumed that the asset disposed of was acquired on a particular date for a consideration equal to its market value on that date.

(2) For the purposes of that calculation-

---

<sup>49</sup> See 11.4.5 (Exit charge: UK land)

- (a) section 41 (restriction of losses by reference to capital allowances and renewals allowances), and
  - (b) section 47 (wasting assets qualifying for capital allowances),
- are to apply in relation to any allowance made in respect of the expenditure actually incurred in acquiring or providing the asset as if it were made in respect of the expenditure assumed to have been incurred.
- (3) In this paragraph “allowance” means any capital allowance or renewals allowance.

## 54.29 Rebasing election procedure

Para 21 sch 4AA TCGA provides:

- (1) An election under any provision of this Schedule must (regardless of section 42(2) of the Management Act)<sup>50</sup> be made by being included in a relevant return relating to the disposal.
- (2) For the purposes of this paragraph a “relevant return” means—
  - (a) an ordinary tax return, or
  - (b) a return under Schedule 2 to the Finance Act 2019.
- (3) An election under any provision of this Schedule which is made by being included in a return under Schedule 2 to the Finance Act 2019 may be subsequently revoked by provision included in an ordinary tax return which is delivered on or before the filing date for the ordinary tax return.
- (4) Subject to that, an election under any provision of this Schedule is irrevocable.
- (5) All such adjustments are to be made, whether by way of discharge or repayment of tax, the making of assessments or otherwise, as are required to give effect to an election under any provision of this Schedule.
- (6) For the purposes of this paragraph, in the case of a person other than a company—
 

“ordinary tax return” means a return under section 8 or 8A of the Management Act,<sup>51</sup> and

“the filing date”, in relation to that return, has the meaning given by section 9A(6) of that Act.
- (7) For the purposes of this paragraph, in the case of a company—
 

“ordinary tax return” means a company tax return under Schedule 18 to

---

<sup>50</sup> See 117.5 (Tax return claims).

<sup>51</sup> See 115.4 (Notice to make return).

the Finance Act 1998, and “the filing date”, in relation to that return, has the meaning given by paragraph 14 of that Schedule.

(8) For the purposes of this paragraph—

- (a) the reference to an election being included in a relevant return includes its being included as a result of an amendment of the return, and
- (b) the reference to the revocation of an election being included in an ordinary tax return includes its being included as a result of an amendment of the return.

### 54.30 Interaction with anti-avoidance

#### 54.30.1 *UK-land gain outside s.3*

Section 3(1) TCGA provides:

- (1) This section applies if ...
  - (d) apart from this section, some or all of the gain would not be chargeable to corporation tax on the company.

This takes UK-land gains outside s.3 TCGA.

#### 54.30.2 *UK-land gain outside s.86/87*

The wording follows a template, so it is helpful to read the provisions side by side:

##### **s.86(4ZA) TCGA**

Where (apart from this subsection) the amount mentioned in subsection (1)(e) would include a chargeable gain or allowable loss to which section 1A(3)(b) or (c) applies (disposals by non-UK residents within the charge to capital gains tax), so much of the gain or loss as would be so included is to be disregarded for the purposes of subsection (1)(e).

##### **s.87(5A) TCGA**

Where (apart from this subsection) the amount mentioned in subsection (4)(a) would include a chargeable gain or allowable loss to which section 1A(3)(b) or (c) applies (disposals by non-UK residents within the charge to capital gains tax), so much of the gain or loss as would be so included is to be disregarded for the purposes of determining the section 1(3) amount.

This takes UK-land gains outside s.86 and s.87 TCGA.

### 54.31 Hold-over relief

CGT has two sets of hold-over reliefs, which (in short) may avoid the charge otherwise arising on gifts<sup>52</sup>:

**(1) s.165 TCGA (business/agricultural property):**

<i>s.165 amended by</i>	<i>Gift by</i>	<i>Asset</i>
(a) <i>unamended</i>	individual	business property
(b) para 1 sch 7	individual	agricultural property
(c) para 2 sch 7	trustee	business property
(d) para 3 sch 7	trustee	agricultural property

**(2) s.260 TCGA: gift by individual/trustee:**

(a) a chargeable transfer<sup>53</sup>

Both sets of reliefs apply in an amended way for land-gains. One might refer to them as “**land-asset s.165/s.260**”.

There are *four* versions of each set of reliefs:

<b>Version</b>	<b>Transferor</b>	<b>Transferee</b>
Standard (non land-assets)	Does not matter	Resident
<i>Land-assets</i>		
s.165(7A)-(7C)	s.260(6ZA)-(6ZC)	Non-resident
s.167A(2)	s.261ZA(2)	Resident
s.167(3)	s.261ZA(3)	Non-resident

Simplicity was not a consideration here; a full discussion would need a book to itself. See Gunn, “Hold-over relief for land: did someone lose the plot” Tax Planning Review (2020) Vol 7 p.233.

### 54.32 Hold-over relief: Standard version

#### 54.32.1 *s.165/260 application conditions*

**s.165(1) TCGA**

**s.260(1) TCGA:**

---

<sup>52</sup> I refer for simplicity to gifts, though the relief applies to all disposals at an undervalue.

<sup>53</sup> There are a further 9 categories of disposal within s.260 which are not discussed here.

If—  
 (a) an individual (“the transferor”) makes a disposal otherwise than under a bargain at arm’s length of an asset within subsection (2) below, and

(b) a claim for relief under this section is made by the transferor and the person who acquires the asset (“the transferee”) or, where the trustees of a settlement are the transferee, by the transferor alone,

then, subject to subsection (3) and sections 166, 167, 167A, 169, 169B and 169C, subsection (4) below shall apply in relation to the disposal.

If—  
 (a) an individual or the trustees of a settlement (“the transferor”) make a disposal within subsection (2) below of an asset

(b) the asset is acquired by an individual or the trustees of a settlement (“the transferee”), and

(c) a claim for relief under this section is made by the transferor and the transferee or, where the trustees of a settlement are the transferee, by the transferor alone,

then, subject to subsection (6) below and sections 169, 169B, 169C, 261 and 261ZA, subsection (3) below shall apply in relation to the disposal.

I refer to the conditions in s.165(1)/s.260(1) as “**s.165/s.260 application conditions**” .

The last paragraph of s.165(1)/260(1) refers to some of the exceptions to hold-over relief; but it is more helpful to set out a complete list:

<b>TCGA</b>	<b>Topic</b>	<b>See para</b>
<i>Hold-over relief disappplied</i>		
s.166/261	Gift to non-resident	
s.167	Gift to foreign-controlled company	
s.167A/261ZA	Gift of land-asset to non-resident	
s.169	Gift to dual resident trust	
s.169B	Gift to settlor-interested trust	
<i>Hold-over relief clawed back</i>		
s.168	Gift to individual who becomes non-resident	8.2
s.169A	Gift to LLP which ceases business (this will rarely if ever happen)	
s.169C	Gift to trust which becomes settlor-interested	

The exceptions in the above table are effectively the same for s.165 and s.260.<sup>54</sup> The next requirement is what distinguishes s.165/260 reliefs:

**s.165(2) TCGA**

- (2) An asset is within this subsection if—
- (a) it is, or is an interest in, an asset used for the purposes of a trade, profession or vocation carried on by—
    - (i) the transferor, or
    - (ii) his personal company, or
    - (iii) a member of a trading group of which the holding company is his personal company, or
  - (b) it consists of shares or securities of a trading company, or of the holding company of a trading group, where—
    - (i) the shares or securities are not listed on a recognised stock exchange, or
    - (ii) the trading company or holding company is the transferor's personal company.

**s.260(2) TCGA**

- (2) A disposal is within this subsection if it is made otherwise than under a bargain at arm's length and—
- (a) is a chargeable transfer within the meaning of the Inheritance Tax Act 1984 (or would be but for section 19 of that Act) and is not a potentially exempt transfer (within the meaning of that Act)...

*54.32.2 Restrictions on s.165 relief*

Section 165(3) TCGA provides 3 restrictions on s.165 hold-over relief, one of which has an equivalent in s.260(6) TCGA

**s.165(3) TCGA**

Subsection (4) below does not apply in relation to a disposal if—

**s.260(6) TCGA:**

---

<sup>54</sup> The drafting is erratic, in that on 2 occasions there are separate provisions for s.165/s.260 reliefs; on other occasions there is one single provision which applies to both reliefs. But it does not matter.

(ba) in the case of a disposal of shares or securities, the transferee is a company,

(c) in the case of a disposal of qualifying corporate bonds, a gain is deemed to accrue by virtue of section 116(10)(b), or

Subsection (3) above does not apply in relation to a disposal of assets within section 115(1) on which a gain is deemed to accrue by virtue of section 116(10)(b) [QCBs].

(d) subsection (3) of section 260 applies in relation to the disposal (or would apply if a claim for relief were duly made under that section).

The effect of para (d) is that s.260 has priority over s.165, if both apply. The point may be to avoid the apportionment which may apply under s.165 for a trading company with non-trading assets.

### 54.32.3 *Standard hold-over relief*

Assuming these conditions are satisfied, the standard relief is in s.165(4)/s.260(3) TCGA:

#### **s.165(4) TCGA**

(4) Where a claim for relief is made under this section in respect of a disposal—

#### **s.260(3) TCGA:**

Where this subsection applies in relation to a disposal—

(a) the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, and  
 (b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question,  
 shall each be reduced by an amount equal to the held-over gain on the disposal.

[identical]

#### 54.32.4 *Held-over gain*

##### **s.165(6) TCGA**

(6) Subject to Part II of Schedule 7 and subsection (7) below,

the reference in subsection (4) above to the held-over gain on a disposal is a reference to the chargeable gain which would have accrued on that disposal apart from subsection (4) above,

and in subsection (7) below that chargeable gain is referred to as the unrelieved gain on the disposal.

##### **s.260(4) TCGA:**

(4) Subject to subsection (5) below,

the reference in subsection (3) above to the held-over gain on a disposal is a reference to the chargeable gain which would have accrued on that disposal apart from this section.

#### 54.32.5 *Actual consideration*

Section 165(7)/s.260(5) TCGA provide:

In any case where—

(a) there is actual consideration<sup>55</sup> (as opposed to the consideration equal to the market value which is deemed to be given by virtue of any

---

<sup>55</sup> See App.4.2 (Consideration) and in particular App.4.2.4 (Transfer on divorce).

provision of this Act) for a disposal in respect of which a claim for relief is made under this section, and  
(b) that actual consideration exceeds the sums allowable as a deduction under section 38,  
the held-over gain on the disposal shall be reduced by the excess referred to in paragraph (b) above.

Section 260(9) TCGA provides:

Where subsection (3) above applies in relation to a disposal which is deemed to occur by virtue of section 71(1) or 72(1), subsection (5) above shall not apply.

Why is that needed?

#### 54.32.6 *IHT added to base cost*

Section 260 TCGA provides:

(7) In the case of a disposal within subsection (2)(a) above [(whether or not subsection (3) above applies in relation to it)]<sup>6</sup> there shall be allowed as a deduction in computing the chargeable gain accruing to the transferee on the disposal of the asset in question an amount equal to whichever is the lesser of—

- (a) the inheritance tax attributable to the value of the asset; and
- (b) the amount of the chargeable gain as computed apart from this subsection.

(8) Where an amount of inheritance tax is varied after it has been taken into account under subsection (7) above, all necessary adjustments shall be made, whether by the making of an assessment to capital gains tax or by the discharge or repayment of such tax.

#### 54.32.7 *Partial relief*

Section 260(10) TCGA provides:

Where a disposal is partly within subsection (2) above, or is a disposal within paragraph (f) of that subsection on which there is a reduced charge such as is mentioned in that paragraph, the preceding provisions of this section shall have effect in relation to an appropriate part of the disposal.

### 54.33 Land-asset hold-over relief

The drafting is dense, and some readers may think, obtuse. The drafter

was particularly fond of referential definitions, and of incorporating provisions with amendments. I expand the latter, thus setting the provision out in full, for the benefit of readers who do not possess instant recall of all the relevant provisions.

#### 54.33.1 “Land-asset”

The statute frequently refers to assets “within s.1A(3)(b) or (c) TCGA”. That means UK land or land-rich assets. I refer to that as a “**land-asset**”, and the gain on the disposal of a land-asset is a “**land-gain**”.

#### 54.33.2 *Land disposal: non-residence condition*

The statute uses the clumsy expression “direct or indirect disposal of UK land which meets the non-residence condition.” Section 165(7D)/260(6ZD) TCGA provide a clumsy referential definition of this term:

For the purposes of subsections [subsections (7A) to (7C)/(6ZA) to (6ZC)] a disposal is a “direct or indirect disposal of UK land which meets the non-residence condition” if it is—

- (a) a disposal on which a gain accrues that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land-asset], or
- (b) a disposal on which a gain accrues that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split years] because the asset disposed of is within section 1A(3)(b) or (c) [land-asset].

In short, this applies to a disposal of a land-asset by a non-resident.

The definition only applies for s.165/s.260, so it has to be repeated verbatim in s.261ZA(6) TCGA.

### 54.34 Land-asset: Resident transferee

#### s.165 TCGA

(7A) Subsections (7B) and (7C) apply in any case where

#### s.260 TCGA

(6ZA) Subsections (6ZB) and (6ZC) apply in any case where—

(a) the disposal is a direct or indirect disposal of UK land which meets the non-residence condition [disposal of land-asset by non-resident], and  
 (b) the transferee is resident in the UK.

[identical]

If these conditions are met, the provisions of s.165/260 are amended as follows:

**s.165 TCGA**

(7B) Subsections (4) and (6) have effect in relation to the disposal as if the references to “chargeable gain” were references to “so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (7D)(a) or (b)”

(7C) Subsection (7) has effect in relation to the disposal as if the reference to “the excess referred to in paragraph (b) above” were a reference to [“so much of the gain mentioned in subsection (7B)]<sup>10</sup> which, ignoring this section and section 17(1), would accrue to the transferor on the disposal”.

**s.260 TCGA**

(6ZB) Subsections (3) and (4) have effect in relation to the disposal as if the reference to “chargeable gain” were a reference to “so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (6ZD)(a) or (b)”.

(6ZC) Subsection (5) has effect in relation to the disposal as if the reference to “the excess referred to in paragraph (b) above” were a reference to “so much of the gain mentioned in subsection (6ZB) which, ignoring this section and section 17(1), would accrue to the transferor on the disposal”.

Amended as ss 7B/6ZB require, s.165(4)/s.260(3) TCGA provide:

**s.165 TCGA**

(4) Where a claim for relief is made under this section in respect of a disposal—

**s.260 TCGA**

(3) Where this subsection applies in relation to a disposal—

(a) the amount of ~~any chargeable gain~~ so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (7D)(a) or (b) which, apart from this section, would accrue to the transferor on the disposal, and

(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question,

shall each be reduced by an amount equal to the held-over gain on the disposal.

(a) the amount of ~~any chargeable gain~~ so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (6ZD)(a) or (b) which, apart from this section, would accrue to the transferor on the disposal, and

[identical]

[identical]

Amended as ss 7B/6ZB require, s.165(6)/s.260(4) TCGA provide:

**s.165 TCGA**

**s.260 TCGA**

Subject to Part II of Schedule 7 and subsection (7) below,

(4) Subject to subsection (5) below,

the reference in subsection (4) above to the held-over gain on a disposal is a reference to

the reference in subsection (3) above to the held-over gain on a disposal is a reference to

~~the chargeable gain so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (7D)(a) or (b)~~ which would have accrued on that disposal apart from subsection (4) above and (in appropriate cases) Schedule 6, and in subsection (7) below that chargeable gain is referred to as the unrelieved gain on the disposal.

~~the chargeable gain so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (6ZD)(a) or (b)~~ which would have accrued on that disposal apart from this section.

We therefore need to ascertain what is the “gain accruing on the disposal as falls to be dealt with as mentioned in subsection [(7D)(a) or (b)]/(6ZD)(a) or (b)”. That is, in short, the gain on a land-asset disposed of by a non-resident.

In short, hold-over relief is reduced to the taxable, land-gain.

54.34.1 *Actual consideration*

Amended as s.165(7C)/s.260(6ZC) TCGA require, s.165(7)/s.260(5) provide:

In any case where—

- (a) there is actual consideration (as opposed to the consideration equal to the market value which is deemed to be given by virtue of any provision of this Act) for a disposal in respect of which a claim for relief is made under this section, and
- (b) that actual consideration exceeds the sums allowable as a deduction under section 38,

the held-over gain on the disposal shall be reduced by ~~the excess referred to in paragraph (b) above~~ so much of the gain mentioned in subsection [(7B)/(6ZB)] which, ignoring this section and section 17(1), would accrue to the transferor on the disposal.

### 54.35 Non-resident transferee

Section 166(1)/s.261(1) TCGA disallow standard hold-over relief on a gift to a non-resident transferee:

#### s.166 TCGA

(1) Subject to section 167A, section 165(4) shall not apply where the transferee is not resident in the UK.

#### s.261 TCGA

Subject to section 261ZA, section 260(3) shall not apply where the transferee is not resident in the UK.

That makes sense because a non-resident transferee would not be generally subject to CGT on the held-over gain, in the event of a later disposal. But UK land is different, so s.167A/s.261ZA TCGA provide different rules.

#### 54.35.1 *Relevant gain*

For the definition, one needs to read together s.167A(6)(7)/s.261ZA(6)(7) TCGA:

(6) For the purposes of this section, a disposal is a “direct or indirect disposal of UK land which meets the non-residence condition” if it is—

- (a) a disposal on which a gain accrues that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land-asset], or
- (b) a disposal on which a gain accrues that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split year] because the asset disposed of is within section 1A(3)(b) or (c)

[land-asset].

(7) For the purposes of this section, a “relevant gain” means so much of any chargeable gain accruing on a disposal as falls to be dealt with as mentioned in subsection (6)(a) or (b).

In my terminology, the relevant gain is the land-gain.

#### 54.35.2 *Disposal by UK resident to non-resident*

##### **s.167A(1) TCGA**

(1) This section applies where  
 [A] the disposal in relation to which a claim could be made under section 165 is  
 [i] a disposal of an asset within section 1A(3)(b) or (c) [land-asset]  
 [ii] to a transferee who is not resident in the UK and,

[B] ignoring section 165—  
 (a) a gain would accrue to the transferor on the disposal, and  
 (b) on the assumption that the disposal is a direct or indirect disposal of UK land which meets the non-residence condition (whether or not that is the case) ,

that gain would be a relevant gain (see subsections (6) and (7)).

##### **s.261ZA(1) TCGA**

(1) This section applies where  
 [A] the disposal in relation to which a claim could be made under section 260 is  
 [i] a disposal of an asset within section 1A(3)(b) or (c) [land-asset]  
 [ii] to a transferee who is not resident in the UK and,

[B] ignoring section 260—  
 (a) a gain would accrue to the transferor on the disposal, and  
 (b) on the assumption that the disposal is a direct or indirect disposal of UK land which meets the non-residence condition (whether or not that is the case),

that gain would be a relevant gain (see subsections (6) and (7)).

In these circumstances, s.167A(2)/s.261ZA(2) modify the standard hold-over relief:

Section 165(4) has effect in relation to the disposal as if it read—

(2) Section 260(3) has effect in relation to the disposal as if it read—

It may be helpful to contrast the standard reliefs and the land-asset reliefs:

**Standard s.165 relief: s.165(4)**

**Land-asset s.165 relief: s.167A(4)**

(4) Where a claim for relief is made under this section in respect of a disposal—

(a) the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, and

(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question,

shall each be reduced by an amount equal to the held-over gain on the disposal.

**Standard s.260 relief: s.260(3)**

Where this subsection applies in relation to a disposal—

(a) the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, and

(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question,

shall each be reduced by an amount equal to the held-over gain on the disposal.

(4) Where a claim for relief is made under this section in respect of the disposal,

the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, shall be reduced by an amount equal to the held-over gain on the disposal.

**Land-asset s.260 relief: s.261ZA(2)**

Where this subsection applies in relation to a disposal,

the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal,

shall be reduced by an amount equal to the held-over gain on the disposal.

54.35.3 *Disposal by non-resident to non-resident*

**s.167A(3)**

**s.261ZA(3)**

Where the disposal is a direct or indirect disposal of UK land which meets the non-residence condition—

(a) section 165(4), as modified by subsection (2) of this section, has effect in relation to the disposal as if the reference to “chargeable gain” were a reference to “relevant gain”,

(b) section 165(6) has effect in relation to the disposal as if the references to “chargeable gain” were references to “relevant gain”, and

(c) section 165(7) has effect in relation to the disposal as if the reference to “the excess referred to in paragraph (b) above” were a reference to “the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal”.

Amended as these provisions require:

**s.165(4) TCGA**

(4) Where a claim for relief is made under this section in respect of a disposal—

the amount of any ~~chargeable gain~~ relevant gain which, apart from this

section, would accrue to the transferor on the disposal, and

[identical]

(a) section 260(3), as modified by subsection (2) of this section, and section 260(4) have effect in relation to the disposal as if the references to “chargeable gain” were references to “relevant gain”, and

(b) section 260(5) has effect in relation to the disposal as if the reference to “the excess referred to in paragraph (b) above” were a reference to “the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal”.

**s.260(3) TCGA:**

Where this subsection applies in relation to a disposal—

[identical]

(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question, shall each be reduced by an amount equal to the held-over gain on the disposal. [identical]

(6) Subject to Part II of Schedule 7 and subsection (7) below, the reference in subsection (4) above to the held-over gain on a disposal is a reference to the ~~chargeable gain~~ relevant gain which would have accrued on that disposal apart from subsection (4) above and (in appropriate cases) Schedule 63, and in subsection (7) below that ~~chargeable gain~~ relevant gain is referred to as the unrelieved gain on the disposal. [No equivalent]

(7) In any case where—  
 (a) there is actual consideration (as opposed to the consideration equal to the market value which is deemed to be given by virtue of section 17(1)) for a disposal in respect of which a claim for relief is made under this section, and  
 (b) that actual consideration exceeds the sums allowable as a deduction under section 38,  
 the held-over gain on the disposal shall be the amount by which the unrelieved gain on the disposal exceeds ~~the excess referred to in paragraph (b) above~~ the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal.

(5) In any case where—  
 (a) there is actual consideration (as opposed to the consideration equal to the market value which is deemed to be given by virtue of any provision of this Act) for a disposal in respect of which a claim for relief is made under this section, and  
 (b) that actual consideration exceeds the sums allowable as a deduction under section 38,  
 the held-over gain on the disposal shall be reduced by ~~the excess referred to in paragraph (b) above~~ the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal.

#### 54.35.4 Disposal by transferee

Section 167A(4)/261ZA(4) TCGA deals with the position where:

- (1) A gives a land-asset to B and claims s.260 hold-over relief
- (2) B later disposes of the asset.

**s.167A(4) TCGA**

(4) Where a claim for relief is made under section 165 in relation to the disposal mentioned in subsection (1), on a subsequent disposal by the transferee of the whole or part of the asset within section 1A(3)(b) or (c) [land-asset] which is the subject of the disposal mentioned in subsection (1), the whole or a corresponding part of the held-over gain (see section 165(6))—

(a) is deemed to accrue to the transferee (in addition to any gain or loss that actually accrues on that subsequent disposal), and  
 (b) (if that would not otherwise be the case) is to be treated as a relevant gain.

**s.261ZA(4) TCGA**

Where a claim for relief is made under section 260 in relation to the disposal mentioned in subsection (1), on a subsequent disposal by the transferee of the whole or part of the asset within section 1A(3)(b) or (c) [land-asset] which is the subject of the disposal mentioned in subsection (1), the whole or a corresponding part of the held-over gain (see section 260(4))—

(a) is deemed to accrue to the transferee (in addition to any gain or loss that actually accrues on that subsequent disposal), and  
 (b) (if that would not otherwise be the case) is to be treated as a relevant gain accruing on a direct or indirect disposal of UK land which meets the non-residence condition.

54.35.5 *Subsequent disposal chargeable transfer***s.167A(5) TCGA**

(5) Where the subsequent disposal mentioned in subsection (4) is (or proves to be) a chargeable transfer for inheritance tax purposes, section 165(10) has effect in relation to the disposal as if—

**s.261ZA(5) TCGA**

Where the subsequent disposal mentioned in subsection (4) is a disposal within section 260(2)(a), subsection (7) of that section has effect in relation to the disposal as if—

(a) the reference to “the chargeable gain accruing to the transferee on the disposal of the asset” were a reference to the chargeable gain accruing on the disposal as computed apart from subsection (4), and

(b) the reference in section 165(10)(b) to “the chargeable gain” were a reference to—

(i) the chargeable gain chargeable to capital gains tax by virtue of any provision of this Act accruing on the disposal, and

(ii) the held-over gain deemed to accrue under subsection (4).

(a) the reference to “the chargeable gain accruing to the transferee on the disposal of the asset” were a reference to the chargeable gain accruing on the disposal as computed apart from subsection (4), and

(b) the reference in section 260(7)(b) to “the chargeable gain” were a reference to—

(i) the chargeable gain (or, where the disposal is a a direct or indirect disposal of UK land which meets the non-residence condition, the relevant gain) accruing on the disposal, and

(ii) the held-over gain deemed to accrue under subsection (4).

Amended as s.167A(5)/s.261ZA(5) TCGA direct:

**s.165(10) TCGA**

Where a disposal [in relation to which subsection (4) above applies]7 is (or proves to be) a chargeable transfer for inheritance tax purposes, there shall be allowed as a deduction in computing (for capital gains tax purposes) ~~the chargeable gain accruing to the transferee on the disposal of the asset~~ the chargeable gain accruing on the disposal as computed apart from subsection (4) in question an amount equal to whichever is the lesser of—

**s.260(7) TCGA**

In the case of a disposal within subsection (2)(a) above (whether or not subsection (3) above applies in relation to it) there shall be allowed as a deduction in computing ~~the chargeable gain accruing to the transferee on the disposal of the asset~~ the chargeable gain accruing on the disposal as computed apart from subsection (4) in question an amount equal to whichever is the lesser of—

(a) the inheritance tax attributable to the value of the asset, and

(b) the amount of ~~the chargeable gain~~

(i) the chargeable gain chargeable to capital gains tax by virtue of any provision of this Act accruing on the disposal, and

(ii) the held-over gain deemed to accrue under subsection (4)

as computed apart from this subsection, and, in the case of a disposal which, being a potentially exempt transfer, proves to be a chargeable transfer, all necessary adjustments shall be made, whether by the discharge or repayment of capital gains tax or otherwise.

(a) the inheritance tax attributable to the value of the asset; and

(b) the amount of ~~the chargeable gain~~

(i) the chargeable gain (or, where the disposal is a direct or indirect disposal of UK land which meets the non-residence condition, the relevant gain) accruing on the disposal, and

(ii) the held-over gain deemed to accrue under subsection (4)

as computed apart from this subsection.

### 54.36 Unascertainable consideration

It will be rare to sell UK land for unascertainable consideration, but provision is made in s.48A(1) TCGA which provides:

This section applies where—

- (a) a person (“P”) has made a disposal (“the original disposal”) on which a relevant non-resident gain or relevant non-resident loss accrued
- (b) P acquired a right as the whole or part of the consideration for that disposal,
- (c) on P’s acquisition of the right, there was no corresponding disposal of it, and
- (d) the right is a right to unascertainable consideration (see subsections (4) to (6)).

If these conditions are met, we move on towards the rule in s.48A(2) TCGA:

If

[a] P subsequently receives consideration (“the ascertained consideration”) representing the whole or part of the consideration referred to in subsection (1)(d) and

[b] “P is not UK resident for the tax year in which the ascertained consideration is received (as determined for the purposes of Chapter 1 of Part 1)—

Pausing there, it is strange that non-residence condition A must be met, and not condition B. But it will not often matter.

We then turn to the rules where these conditions are met:

- (a) the ascertained consideration is treated as not accruing on the disposal of the right,
- (b) the costs of P's acquisition of the right (or, in the case of a part disposal of the right, those costs so far as referable to the part disposed of) are taken to be nil, and
- (c) the following steps are taken.

*Step 1*

Any amount by which the ascertained consideration exceeds the relevant original consideration<sup>56</sup> is treated as consideration (or further consideration) accruing on the original disposal.

If the relevant original consideration exceeds the ascertained consideration, the consideration accruing on the original disposal is treated as reduced by the amount of the excess.

*Step 2*

Compute the difference that the adjustment under step 1 makes to what (if any) relevant non-resident gain or relevant non-resident loss or loss or other gain or loss accrues on the original disposal (computing this separately for each type of gain or loss).

The difference is "positive" if a loss is decreased (to nil or otherwise) or a gain created or increased.

The difference is "negative" if a gain is reduced (to nil or otherwise) or a loss created or increased.

*Step 3*

Any positive amount computed under step 2 is treated for the purposes of this Act and the Management Act as a gain (of the type appropriate to the computation) accruing to P at the time of the receipt of the ascertained consideration.

Any negative amount computed under step 2 is treated for the purposes of this Act and the Management Act as a loss (of the type appropriate to the computation) accruing to P at the time of the receipt of the ascertained consideration.

---

56 Section 48A(3) TCGA provides: "In step 1 in subsection (2), "the relevant original consideration" means the consideration accruing on the original disposal, so far as referable to the right mentioned in subsection (1)(b) (or, in the case of a part disposal of the right, referable to the part disposed of)."

54.36.1 *Unascertainable*

Section 48A TCGA provides:

- (4) A right is a right to unascertainable consideration if, and only if—
  - (a) it is a right to consideration the amount or value of which is unascertainable at the time when the right is conferred, and
  - (b) that amount or value is unascertainable at that time on account of its being referable, in whole or in part, to matters which are uncertain at that time because they have not yet occurred. This subsection is subject to subsections (5) and (6).
- (5) The amount or value of any consideration is not to be regarded as being unascertainable by reason only—
  - (a) that the right to receive the whole or any part of the consideration is postponed or contingent, if the consideration or, as the case may be, that part of it is, in accordance with section 48, brought into account in the computation of the gain accruing to a person on the disposal of an asset, or
  - (b) in a case where the right to receive the whole or any part of the consideration is postponed and is to be, or may be, to any extent satisfied by the receipt of property of one description or property of some other description, that some person has a right to select the property, or the description of property, that is to be received.
- (6) A right is not to be taken to be a right to unascertainable consideration by reason only that either the amount or the value of the consideration has not been fixed, if—
  - (a) the amount will be fixed by reference to the value, and the value is ascertainable, or
  - (b) the value will be fixed by reference to the amount, and the amount is ascertainable.

The gain on the disposal of the right to unascertainable consideration may qualify for DT relief, as it is not a gain derived from the alienation of UK land.

54.36.2 *“Relevant gain/loss”*

Section 48A(7) TCGA provides:

- In this section—
- “relevant non-resident gain” means—

- (a) a gain that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land-asset], or
  - (b) a gain that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split year] because the asset disposed of is within section 1A(3)(b) or (c) [land-asset], and
- “relevant non-resident loss” means an allowable loss accruing on a disposal which, had a gain accrued instead, would have been a relevant non-resident gain.

### 54.36.3 Commencement

The text set out above includes the amendments made by para 27 sch 1 FA 2019. Para 27 provides:

- (5) The amendments made by this paragraph have effect where the ascertained consideration is received on or after 6 April 2019, but, subject to the following modifications, in a case where the original disposal was made before that date.
- (6) In that case, section 48A of TCGA 1992—
  - (a) has effect without the amendments made by sub-paragraphs (2) and (3)(b), and
  - (b) has effect as if, in step 3 in subsection (2)(c) of that section, for “(of the type appropriate to the computation)” (in both places) there were substituted “(of a kind most closely corresponding to that accruing on the original disposal)”.

## 54.37 Residential property gain

### 54.37.1 Residential property gain: outline

This term matters for:

<b>Topic</b>	<b>See para</b>
UK land rebasing	60.16
Rates of CGT	40.13
Private residence relief	55.1

The definition is in:

- (1) sch 1B TCGA
- (2) sch 4AA TCGA (which amends the sch 1B rules where there is an election out of UK land rebasing)

Para 1(1) sch 1B TCGA provides:

For the purposes of Chapter 1 of Part 1 “residential property gain” means so much of a chargeable gain accruing to a person on a disposal of residential property as, in accordance with paragraph 2, is attributable to that property.

This definition is for the purposes of Chapter 1 Part 1, which contain s.1-10 TCGA, which includes the provisions governing rates of CGT. The definition is incorporated by reference where needed elsewhere.

The requirements are, in short:

- (1) Disposal of a residence
- (2) Gain attributable to the residence

A s.3 gain attributed to a UK resident will be a residential property gain where the company disposes of residential property; but a s.87 gain is not a residential property gain, even if matched to a gain on the disposal of residential property.

#### 54.37.2 *Gain attributed to residence*

Para 2(1) sch 1B TCGA provides:

The proportion of a chargeable gain attributable to residential property is equal to—

- (a) the relevant fraction of the gain ...

Para 2(2) sch 1B TCGA provides for time apportionment:

The relevant fraction is  $A/B$  where—

A is the number of days in the applicable period on which the land to which the disposal relates consists of or includes a dwelling, and  
B is the total number of days in the applicable period.

#### 54.37.3 *Mixed use of land*

Para 2(1) sch 1B TCGA provides:

The proportion of a chargeable gain attributable to residential property is equal to ...

- (b) if there has been mixed use of the land to which the disposal relates on one or more days in the applicable period, the relevant fraction of the gain as adjusted, on a just and reasonable basis, to take account of the mixed use on the day or days.

Para 2(3) sch 1B TCGA provides:

There is mixed use of land on any day on which the land consists of—

- (a) one or more dwellings, and
- (b) other land.

#### 54.37.4 *Disposal of contract*

Para 2(4) sch 1B TCGA provides:

If the disposal is of an interest in land subsisting under a contract for the acquisition of land consisting of or including a building that is to be constructed or adapted for use as a dwelling, that land is taken to consist of or include a dwelling throughout the applicable period.

#### 54.37.5 *Applicable period*

Para 2(5) sch 1B TCGA provides:

In this paragraph “the applicable period” means the period—

- (a) beginning with
  - [i] the day on which the person making the disposal acquired the interest in land being disposed of
  - [ii] or, if later, the day from which the interest in land became chargeable, and
- (b) ending with the day before the day on which the disposal occurs.

Para 2(6) sch 1B TCGA provides:

For the purposes of this paragraph an interest in land became “chargeable”—

- (a) in any case where the disposal is of an interest in land in the UK—
  - (i) by a person in a tax year in which the person is not UK resident, or
  - (ii) by a person in the overseas part of a tax year which is, as respects the person, a split year, from 6 April 2015, and
- (b) in any other case, from 31 March 1982.

#### 54.37.6 *2 or more acquisitions*

Para 2(7) sch 1B TCGA provides:

If the interest in land disposed of by the person results from interests in land acquired by the person at different times, the person is regarded for the purposes of this paragraph as having acquired the interest disposed of at the time of the first acquisition.

### **54.38 Residential property**

A residential property gain requires a disposal of residential property.

Para 1(2) sch 1B TCGA provides:

The question whether or not a person disposes of residential property is determined in accordance with paragraphs 3 to 7.

Para 3 sch 1B TCGA provides:

(1) For the purposes of this Schedule a person “disposes of residential property” if the person disposes of an interest in land in a case where—

- (a) the land consisted of or included a dwelling at any time falling on or after the date on which the applicable period begins,
- (b) the interest in land subsisted for the benefit of land that consisted of or included a dwelling at any time falling on or after that date, or
- (c) the interest in land subsists under a contract for the acquisition of land consisting of or including a building that is to be constructed or adapted for use as a dwelling.

(2) No account is to be taken for the purposes of this paragraph of any time falling on (or after) the day on which the disposal is made.

This is actually a definition of “residential property” (not a definition of “disposes” as the wording might suggest).

There are two conditions or sets of conditions:

- (1) Interest in land; see App 2.18 (Interest in land/chargeable interest).
- (2) Conditions (a) to (c), in short, a dwelling; see App 2.19 (Dwelling/residential property).

The term “residential property gain” includes gains from a foreign residence.

### **54.39 Commencement**

Para 120 sch 1 FA 2019 provides:

- (1) The amendments made by this Schedule have effect-

- (a) for the purposes of capital gains tax, for the tax year 2019-20 and subsequent tax years, and
  - (b) for the purposes of corporation tax, for accounting periods beginning on or after 6 April 2019.
- (2) The amendments made by this Schedule also have effect for the purposes of corporation tax in relation to disposals made on or after 6 April 2019 (whether in their application to accounting periods beginning on, and ending on or after, that date or to later accounting periods).

#### 54.39.1 *Pre-2019 losses*

Para 121 sch 1 FA 2019 provides:

121 (1) This paragraph applies to—

- (a) allowable NRCGT losses accruing to a person before 6 April 2019, and
- (b) ring-fenced ATED-related allowable losses accruing to a person before that date,

so far as they have not been deducted under section 2B, 8(1)(b)(ii), 14D or 188D of TCGA 1992 (as those provisions have effect before the amendments made by this Schedule) from chargeable gains accruing before that date.

(2) If losses to which this paragraph applies accrued to a company, they are deductible in accordance with section 2A(1) of TCGA 1992 as if they had accrued to the company while it was within the charge to corporation tax.

(3) If losses to which this paragraph applies accrued to any other person, they—

- (a) are deductible in accordance with section 1(3) of TCGA 1992, and
- (b) are to be treated for the purposes of section 1E of TCGA 1992 as if they accrued on a disposal of assets that were within section 1A(3) of that Act.

(4) In this paragraph—

- (a) the reference to allowable NRCGT losses is to be read in accordance with Schedule 4ZZB to TCGA 1992 (as that Schedule has effect before its repeal by this Schedule), and
- (b) the reference to ring-fenced ATED-related allowable losses is to be read in accordance with section 2B of that Act (as that section has effect before its repeal by this Schedule).

### **54.40 Non-residents CG/CT: History**

From the inception of CGT until 2013, a non-resident did not pay CGT on disposals of UK land (except in the case of a non-resident trader with a UK PE/branch).

From 2013/14 there was a charge (ATED-CGT) on companies within ATED.

From 2015/16 there was a charge (NRCGT) on non-residents, but restricted to residential property.

In the 2017/18 edition of this work, I said:

HMRC say:

“The government believes that it is right that CGT should apply to disposals of interests in UK residential property. **The government does not intend to broaden the scope of the charge and apply CGT to disposals of interests in non-residential property.** This change is focussed on rectifying the unfairness in the system that currently allows non-residents to escape UK CGT on disposals of UK property that are or could be used as a dwellinghouse.”<sup>57</sup>

The bold font is in the original. The author rightly considered the issue an important one. But no reason is given. The claim that this rectifies “unfairness” (and is “right”) is a rhetorical device which avoids answering the question while appearing to do so.

There is no need to justify the taxation of non-residents on gains accruing on UK land (or indeed other UK assets). That is consistent with the general principles of international tax law.<sup>58</sup> Many countries with CGT (perhaps a majority) impose tax in this situation. The question is why there should be a tax on *residential* property but not on non-residential; and why an exemption for widely held companies?... Is there any other country in the world which charges non-residents on gains from residential property, but not from non-residential property? ... The fact that the rest of the world is out of step does not prove that UK policy is wrong, but it might have given pause for thought - had there been time for thought. The legislation was published in draft in December 2014, and completely recast in the Finance Bill. Because of

---

57 NRCGT response paper para 3.9. The same point was made in the NRCGT consultation paper para 2.3: “The government does not intend to change the tax treatment for property, such as office and industrial buildings, which cannot be used as and are not in the course of being converted to a place to live.”

58 OECD Model recognises this: see 53.23.1 (Immovable property in source state).

the 2015 election, the Finance Bill was published on 24 March 2015 and enacted on 26 March, without consideration or amendment. Does anyone think that law enacted in this way is likely to be stable?

Does it now matter? Readers may think it pointless to cry “foul” in a game which has no referee, and whose result is now declared. But I think the story deserves to be recorded, as a lesson in how not to legislate, and as a warning to those minded to rely on HMRC promises about future tax reform.

#### **54.41 Non-residents CGT/IT: Critique**

The 2019 extension of CGT to non-residents holding UK land and land-rich assets is in line with the policy of many, perhaps most countries.

Policy considerations in favour of the reform are fairness and additional revenue.

Policy considerations in favour of the position as it was from the inception of CGT in 1965 to 2019 are: encouragement of inward foreign investment, avoiding the lock-in effect of CGT, and simplicity.<sup>59</sup>

Needless to say, there has been no informed debate on the challenge of finding a balance between the conflicting policy considerations.

This is illustrative of a wider problem: CGT as a whole is

... a highly unsatisfactory tax. Possibly more than any other tax, it has been subject to frequent, dramatic, and often controversial changes...<sup>60</sup>

---

59 An indication of HMRC unease concerning the complication of the land-asset rules is that the consultation response document contains no less than six claims that its proposals constitute simplification.

60 Mirrlees Review, “Tax by Design” (2011) p.326.

## CHAPTER FIFTY FIVE

# RESIDENTIAL PROPERTY: CGT

55.1

### *Cross references*

The following topics are considered elsewhere:

- 40.13 (CGT rates: Introduction) - CGT rates on residential property gains
- 54.15 (UK land rebasing: Introduction)
- 60.17 (s.3 motive defence)
- 60.32 (Private residence relief) - s.3 issues

### **55.1 Private residence relief**

A full discussion of private residence relief (“PRR”) requires a book to itself, and indeed such books have been written. This chapter focuses on matters closest to the themes of this book, but it is necessary to look wider to see the matter in its context.

I do not consider the topics of:

- job-related accommodation
- relief where part of the residence has been let: s.223B TCGA
- disposals by disabled persons or persons in care homes: s.225E TCGA
- relief where delay in moving into property: s.223ZA TCGA
- date of payment of residential property gains<sup>1</sup>

Section 222(1) TCGA provides:

This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—

- (a) a dwelling-house or part of a dwelling-house which is, or has at any time in his period of ownership been, his only or main

---

<sup>1</sup> For background, see HMRC Policy paper, “Capital Gains Tax payment window for residential property gains (July 2018).

- residence, or
- (b) land which he has for his own occupation and enjoyment with that residence as its garden or grounds up to the permitted area.

### 55.1.1 FA 2020 changes

EN FB 2020 provides:

The proposed changes set out in this clause make a number of changes to the private residence relief ancillary reliefs by:

- Reducing final period exemption from 18 months to 9 months, although the special rules that give those with a disability, and those in care, an exemption of 36 months will not change.
- Reforming lettings relief so that relief is only available in those cases where the owner remains in shared occupancy with the tenant.
- Extending job related accommodation relief by extending it to those cases where a home owner who is a serving member of the armed forces is in receipt of payments from the MOD under its Future Accommodation Model (FAM).
- Legislating extra-statutory concessions D21 and D49.
- Amending the private residence relief rules where spouses and civil partners transfer interests in residential properties between them.

For the background, see HMRC policy paper, “Changes to ancillary reliefs in Capital Gains Tax Private Residence Relief”.<sup>2</sup>

## 55.2 “Residence”

Residence (in the sense of private-residence<sup>3</sup>) is a key term for PRR.

### 55.2.1 Private residence/territory-residence

The CG Manual provides:

**CG64455 Meaning of residence in a wider context** [Jul 2019]

Outside the field of taxation there are many circumstances in which the identification of an individual’s residence is important. Whilst the word must be construed by reference to its particular context, the use of the

---

2 <https://www.gov.uk/government/publications/changes-to-ancillary-reliefs-in-capital-gains-tax-private-residence-relief/changes-to-ancillary-reliefs-in-capital-gains-tax-private-residence-relief> (July 2019).

3 See 5.1 (Concepts of residence).

word in a similar context to that with which we are concerned assists in the interpretation to be used for private residence relief.

One such example is the identification of the constituency in which an individual is resident for the purpose of voting. Under the Representation of the People Act 1948, entitlement to vote was given to persons resident in a constituency on a qualifying date. In the case of *Fox v Stirk, Ricketts v Registration Officer for the City of Cambridge* [1970] 3 All ER 7 the Court of Appeal considered whether students should be resident in the constituency of the University that they attended. In his judgment, Lord Denning M.R. cited a passage from the speech of Viscount Cave L.C. in *Levene v IRC* [1928] AC 217

“... the word ‘reside’ is a familiar English word and is defined in the Oxford English Dictionary as meaning ‘to dwell permanently or for a considerable time, to have one’s settled or usual abode, to live in or at a particular place’.”

Lord Denning went on to say

“I derive three principles. The first is that a man can have two residences. He can have a flat in London and a house in the country. He is resident in both. The second principle is that temporary presence at an address does not make a man resident there. A guest who comes for the weekend is not resident. A short stay visitor is not resident. The third principle is that temporary absence does not deprive a person of his residence. If he happens to be away for a holiday or away for the weekend or in hospital, he does not lose his residence on that account.”

Further to this Lord Widgery commented,

“This conception of residence is of a place where a man is based or where he continues to live, the place where he sleeps and shelters and has his home. It is imperative to remember in this context that ‘residence’ implies a degree of permanence. In the words of the Oxford English Dictionary, it is concerned with something which will go on for a considerable time. Consequently a person is not entitled to claim to be a resident at a given town merely because he pays a short, temporary visit. Some assumption of permanence, some degree of continuity, some expectation of continuity, is a vital factor which turns simple occupation into residence.”

These comments are regarded as equally applicable to private residence relief and were relied on in the case of *Goodwin v Curtis*, see CG64460.

Now, *Fox v Stirk* and *Levine v IRC*, are territory-residence cases. It seems to me one should not segue so lightly from the concepts of territory-residence (or tax residence) to private residence; the word is identical but the concepts are different.<sup>4</sup> But no doubt just as one has to live in a country for it to become one's territory-residence, one also has to live in a dwelling in order for it to become one's private residence. The same conclusion would have been reached even without referring to authority.

The reader may ask whether the reasoning matters, as the conclusion is clear. Perhaps it does not matter much. But it is good to know what one is talking about.

### 55.2.2 Residence/home compared

The CG Manual provides:

**CG64435 Meaning of residence: judicial interpretation** [Jul 2019]

The scheme of private residence relief was summarised by Brightman J in *Sansom v Peay* (52 TC 1) as,

“To exempt from liability to Capital Gains Tax the proceeds of sale of a person's home.”

Here Brightman J uses the word ‘home’ in substitution for the word ‘residence’.

And in *Frost v Feltham* (55 TC 10), where the Court was asked to decide which of an individual's residences was his main residence, Nourse J stated,

“A residence is a place where somebody lives.”

These quotations clearly emphasise the point that the test of residence is one of quality rather than quantity: the dwelling house must have become the owner's home.

In the quote cited from *Sansom*, home is simply used as a *synonym* of residence. It is better to use the statutory terminology, but it does not much matter. In the last sentence of the passage, home is used as an *explanation* of residence.

Certainly the terms are close. Perhaps they are equivalent. A home must be a residence; but perhaps it is possible to envisage a residence which is not a home, as the term residence requires less of an emotional

---

4 See 5.1 (Concepts of residence).

connection.<sup>5</sup> Are there any true and absolute synonyms? However that may be, I think the point being made is a dwelling only becomes one's residence, like a home, if one actually lives there.

### 55.2.3 *Period of occupation*

If a residence is “a place where somebody lives”, the question arises how long they have to live there for it to qualify as their residence.

The CG Manual provides:

**CG64435 Meaning of residence: judicial interpretation** [Jul 2019]

There is no minimum period of occupation that would enable an individual to establish a residence. This was confirmed by Millet J in *Moore v Thompson* (61 TC 15) where he stated,

“It is clear that the Commissioners were alive to the fact that even occasional and short residence in a place can make that a residence; but the question was one of fact and degree for the Commissioners.”

Every case must be decided upon its own particular facts.

### 55.2.4 *Mere temporary accommodation*

The CG Manual provides:

**CG64460 Meaning of residence: Goodwin v Curtis** [Jul 2019]

The meaning of the word ‘residence’ was considered further in the case of *Goodwin v Curtis* (70 TC 478).

In 1983 Mr Goodwin set up a company to acquire Hazleton Manor Farmhouse. At that time he was buying it with a view to making it a home for himself and his family. On 1 April 1985 Mr Goodwin acquired the farmhouse from the company, but prior to the completion of his purchase he had instructed agents to sell the farmhouse. At the time of his acquisition he had separated from his wife and he took up temporary residence in the farmhouse until 3 May 1985 when the farmhouse was sold. Mr Goodwin contended that the farmhouse was his only or main residence.

In the High Court, Sir John Vinelott drew heavily on the observations of Lord Denning and Widgery L.J. in *Fox v Stirk, Ricketts v Registration Officer for the City of Cambridge* [1970] 3 All ER 7, and he also quoted with approval the line taken by Brightman J in *Sansom*

---

<sup>5</sup> See 5.20 (“Home”).

*v Peay* (52 TC 1).

Sir John said,

“Amongst the factors to be weighed by the Commissioners are the degree of permanence, continuity and the expectation of continuity. ... in my judgment, they were fully entitled to take the view that the farmhouse was used not as a residence but as mere temporary accommodation for a period that the taxpayer hoped would be brief and which in fact lasted some 32 days between completion of the sale to him and the completion of the sale by him.”

The Court of Appeal upheld the decision of the Commissioners and the High Court that Mr Goodwin had not established a residence in the farmhouse; it had merely provided temporary accommodation. Millett L J stated in the Court of Appeal,

“What I derive from Viscount Cave’s speech is that the word ‘reside’ is an ordinary word of the English language and is eminently suitable for a lay tribunal such as the General Commissioners to apply.”

He went on,

“they (the Commissioners) must be taken to have accepted the Revenue’s submission that the quality of the taxpayer’s occupation of the farmhouse did not have a sufficient degree of permanence, continuity or expectation of continuity to justify its description as residence.”

And later,

“Temporary occupation at an address does not make a man resident there. The question whether the occupation is sufficient to make him resident is one of fact and degree for the Commissioners to decide.”

He went on to say,

“The substance of the Commissioners’ finding taken as a whole, in my judgment, is that the nature, quality, length and circumstances of the taxpayer’s occupation of the Farmhouse did not make his occupation qualify as residence.”

Schiemann LJ added,

I agree with the judgment that has just been delivered. I accept, as did the Commissioners, the Crown’s contention that in order to qualify for the relief a taxpayer must provide some evidence that his residence in the property showed some degree of permanence, some degree of continuity or some expectation of continuity.

### 55.2.5 *Physical occupation*

The CG Manual provides:

**CG64465 Occupation is a requirement** [Jul 2019]

Except in those cases where the legislation deems a dwelling house to be the residence of an individual which are summarised at CG64477, a dwelling house must have been physically occupied as a residence of the individual at some time during their period of ownership in order to qualify for relief.

It is sometimes argued that private residence relief is due where an individual has acquired a dwelling house with the intention of making it their home, but for reasons outside their control they were forced to sell it without ever having occupied it. In these circumstances relief is not available; an intention to occupy is not enough.

The requirement to physically occupy the dwelling house as a residence is made clear in the judicial comments set out at CG64455 and also in the legislation itself. For example,

- TCGA1992/S222 (8) allows an individual currently living in job related accommodation relief in respect of a dwelling house which they intend to occupy as a residence in due course. See CG64555+. If occupation was not a pre-requisite to relief, this provision would not be necessary.
- TCGA92/223 (3) allows relief during certain periods of absence from the dwelling house, see CG65030+. If occupation was not a pre-requisite to relief, absence from the dwelling house would not prevent relief from being available and this provision would be unnecessary.
- TCGA92/224 (2) allows relief to be adjusted where there has been a change in what has been occupied as an individual's residence, see CG67460+. If occupation was not a pre-requisite to relief, a change in what is occupied as the residence would not affect the amount of relief due.

*55.2.6 Interest in dwelling*

The CG Manual provides:

**CG64470 An interest in a dwelling house is a requirement** [Jul 2019]

An individual must have an interest in a dwelling house used as his residence for it to be a residence within the meaning of TCGA92/S222. This is because relief is available on the disposal of, or of an interest in a dwelling house or part of a dwelling house. References to a residence in Section 222 should be interpreted on this basis. Therefore, when

considering which of an individual's residences is their main residence for the purpose of private residence relief, it is only necessary to consider those in which that individual has an interest.

An interest in a dwelling house means a legal or equitable interest. It includes all possible forms of ownership from owning the freehold to being the co-owner of a minimal tenancy. In most cases, where a residence is rented a tenancy exists, and such residences therefore remain within Section 222.

The only circumstance in which an individual can reside in a dwelling house in which he or she has no legal or equitable interest is where the property is occupied under licence. A licence is a permission to reside in a property which may be contractual or gratuitous. For instance, staying in a hotel or in lodgings are examples of residence under contractual licence. And staying with family or friends is an example of residence under gratuitous licence.

An individual's only or main residence may be in a home in which they have no interest. Where it is the case that their main home is occupied under licence but they also reside in another dwelling house in which they have an interest, the residence in which they have an interest will be the only or main residence within S222 because the word residence within Section 222 only refers to residences in which the individual owns an interest...

If this is right, then the meaning of the word "residence" for PRR differs from the ordinary meaning, at least in this one respect.

### 55.2.7 *Garden or grounds*

The CG Manual provides:

#### **CG64360 Garden And Grounds: Definitions** [Jan 2020]

Whether you can regard a particular piece of land as garden or grounds of a residence is a question which must be decided on the facts. The phrase 'garden or grounds' is not defined in the statute and neither has its meaning been considered in case law. Therefore the words must take their everyday meaning.

A useful dictionary definition of the word garden is,

'a piece of ground, usually partly grassed and adjoining a private house, used for growing flowers, fruit or vegetables, and as a place of recreation.'

The word 'grounds' infers a larger area than 'garden'. A useful dictionary definition of the word grounds is,

'Enclosed land surrounding or attached to a dwelling house or other building serving chiefly for ornament or recreation.'

Generally speaking you should accept that land surrounding a residence which is in the

same ownership, is the grounds of the residence, unless it is in use for some other purpose.

Land which at the date of disposal is in use for some other purpose for example agricultural land, commercial woodlands, land under development or land in use for a trade or business should not be regarded as part of the garden or grounds.

The following land should not necessarily be excluded from the garden and grounds:

- Land which has traditionally been the garden and grounds of the residence but at the date of sale is unused or overgrown.
- Paddocks or orchards providing there is no significant business use.
- Land which has a building on it, see CG64200, unless that building is in use for a business or is let.

Where the land in question was acquired on a different date to the residence, it should also be accepted as garden or grounds providing it was subsequently brought into use as the garden or grounds of the residence and remains as garden or grounds at the date of disposal.

### **Mixed Use**

To qualify for relief land does not have to be exclusively in use for recreational purposes. For example, the owner of a guest house may allow guests to use the garden. In these circumstances the garden will still qualify for relief if the other tests are satisfied.

### **CG64367 Garden And Grounds: Land Physically Separated [Jul 2019]**

You may come across the argument that land which is some distance from the residence should qualify for relief because it is in the same ownership as the residence and is used as a garden. Generally speaking this argument should be resisted.

TCGA92/222 (1) (b) provides relief for land which the owner "has for his own occupation and enjoyment with the residence as its garden or grounds". Therefore the land which qualifies for relief must be the garden and grounds of the residence, not land which simply happens to be in the same ownership as the residence. Usually the garden and grounds will be the land which surrounds the residence and is enclosed with it. Land which is separated from the residence by other land which is not in the same ownership will not normally be part of the garden and grounds of the residence.

However if the facts show that land which is physically separated from the residence is naturally and traditionally the garden of the dwelling house and it would normally be passed on as such on conveyance, relief should be allowed. For example, in some villages it is common for the garden to be across the street from the dwelling house. This separation should not be regarded as a reason for denying relief if it can be shown that the land was naturally and traditionally the garden and grounds of that house.

Conversely, a keen gardener may buy a plot of land some distance from their dwelling house because the dwelling house itself may have an inadequate garden. Even though the plot of land may be fully cultivated and regarded as part of the garden by the owner, it will not qualify for relief.

### **CG64391 Garden And Grounds: Caravans And Boats [Jan 2020]**

You may conclude that a caravan or a boat can be regarded as a dwelling house and so may qualify for relief under TCGA92/S222(1)(a), see CG64325 and CG64328. Where this is the case, land which can be regarded as the garden or grounds of the caravan or boat can also qualify for relief under TCGA92/S222 (1) (b).

This view was confirmed in *Moore v Thompson* (61 TC 15) in which the Judge stated, "Perhaps somewhat generously the Revenue have taken the view that if the caravan was a dwelling house, and it was at any time during the taxpayers period of ownership her only or main residence, then the land of the farm was in her occupation and enjoyment with that residence as its garden and grounds up to the permitted area."

A similar line was also taken in the earlier case of *Makins v Elson* (51 TC 437) and this remains the line that you should take.

You will often find that the reason for suggesting that a caravan or boat is a dwelling house is in order to obtain relief on the land on which it stands or is surrounded. This is because the land is often far more valuable than the caravan or boat itself. However if the other conditions for relief are fulfilled and there is land which is identifiably used as the garden and grounds of the caravan or boat, you should allow relief on the disposal of that land.

See App.2.19.1 (Garden or grounds).

### 55.2.8 *Period of ownership*

Section 222(7) TCGA provides:

In this section and sections 222A to 226, "the period of ownership" where the individual has had different interests at different times shall be taken to begin from the first acquisition taken into account in arriving at the expenditure which under Chapter III of Part II is allowable as a deduction in the computation of the gain to which this section applies ...

### 55.2.9 *Inter-spouse transfer*

Section 222(7) TCGA provides:

and in the case of an individual living with his spouse or civil partner living with him—

- (a) if the one disposes of, or of his or her interest in, a dwelling-house or part of a dwelling-house to the other, and in particular if it passes on death to the other as legatee, the other's period of ownership shall begin with the beginning of the period of ownership of the one making the disposal, and
- (b) if paragraph (a) above applies, but the dwelling-house or part of a dwelling-house was not the only or main residence of both throughout the period of ownership of the one making the disposal, account shall be taken of any part of that period during which it was his only or main residence as if it was also that of the other.

## **55.3 Non-residents PRR disallowance**

### *55.3.1 Introduction*

PRR was curtailed in 2015, on the introduction of the short-lived charge on residential property of non-residents, known as NRCGT. The NRCGT consultation paper provided:

Bringing non-residents into CGT without any changes could mean that non-residents invariably chose to nominate their UK residence as their main residence and obtain tax relief on gains made on that property, even where it was not in fact their main residence, yet not pay any UK CGT on gains relating to their other residences outside of the UK. This would undermine the extension of CGT to non-residents.<sup>6</sup>

The problem could not be avoided by restricting PRR to UK residents. The NRCGT consultation paper provided:

6.18 The government has sought legal advice and considers it would not be possible to restrict claims for PRR to EU or EEA residents.

No reason is given (readers may infer that a general object of the paper was to close discussion rather than to inform it). But the reason was that there would be a restriction on free movement of capital, which applies to non-EU states as well as within the EU.<sup>7</sup>

The wording has been amended in consequence of the extension of CGT to non-residents in 2019, but there has been no change of substance.

### *55.3.2 Outline*

In summary: a residence is treated as not being occupied as a residence (so

(2) HMRC & HM Treasury, “Implementing a capital gains tax charge on non-residents: summary of responses” (November 2014)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/380397/Implementing\\_a\\_capital\\_gains\\_tax\\_charge\\_on\\_non\\_residents\\_disposing\\_of\\_UK\\_residential\\_property\\_-\\_summary\\_of\\_responses\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/380397/Implementing_a_capital_gains_tax_charge_on_non_residents_disposing_of_UK_residential_property_-_summary_of_responses_FINAL.pdf)

7 See 102.13 (Movement of capital to third countries).

it does not qualify for PRR) unless:

- (1) The person is resident in the same territory as the residence; or
- (2) The person is present in the residence for at least 90 days per annum.  
The statutory term for this is the “**day count test**”.

This is most important for non-residents who wish to claim PRR on a UK home; but it can also affect UK residents who wish to claim PRR on a non-UK home.

### 55.3.3 *The disallowance*

In order to follow the legislation, one needs to read s.222(1) TCGA and s.222B(1) TCGA together:

**222(1)** This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—

(a) a dwelling-house or part of a dwelling-house which is, or has at any time in his period of ownership been, his only or main residence...

**222B(1)** For the purposes of sections 222 to 226 the dwelling-house or part of a dwelling-house mentioned in section 222(1) is treated as not being occupied as a residence by the individual so mentioned (“P”) at any time in P’s period of ownership which falls within—

- (a) a non-qualifying tax year, or
- (b) a non-qualifying partial tax year.

In the remainder of this section the dwelling-house or part of a dwelling-house is referred to as “the dwelling-house”.

This feeds into the rule that PRR relief is restricted where a property is not the residence throughout the period of ownership. Section 223 TCGA provides:

(1) No part of a gain to which section 222 applies shall be a chargeable gain if the dwelling-house or part of a dwelling-house has been the individual’s only or main residence throughout the period of ownership, or throughout the period of ownership except for all or any part of the last 9 months of that period.

(2) Where subsection (1) above does not apply, a fraction of the gain shall not be a chargeable gain, and that fraction shall be—

- (a) the length of the part or parts of the period of ownership during which the dwelling-house or the part of the dwelling-house was the individual’s only or main residence, but inclusive of the last 9 months of the period of ownership in any event, divided by

- (b) the length of the period of ownership.

So s.222B works to disallow PPR either wholly or in part. Section 223 TCGA defines the key term “period of ownership”:

- (7) In this section “period of ownership”—
  - (a) does not include any period before 31 March 1982, and
  - (b) where
    - [i] the whole or part of the gain to which section 222 applies is a residential property gain (as defined by Schedule 1B)<sup>8</sup>
    - [ii] which is chargeable to capital gains tax because of section 1A(3)(b),<sup>9</sup>does not include any period before 6 April 2015 (but see subsection (7A)).

(7A) Paragraph (b) of the definition of “period of ownership” does not apply in a case where paragraph 8 or 14 of Schedule 4AA applies (the individual has made an [historic-cost] election for the retrospective basis of computation to apply).

#### 55.3.4 “Non-qualifying tax year”

Section 222B(3) TCGA provides:

A tax year the whole of which falls within P’s period of ownership is “a non-qualifying tax year” in relation to the dwelling-house if—

- (a) neither P nor P’s spouse or civil partner was resident for that tax year in the territory in which the dwelling-house is situated, and
- (b) the day count test was not met by P with respect to the dwelling-house for that tax year (see section 222C).

#### 55.3.5 Partial tax years

Section 222B(5) TCGA defines “partial tax year”:

Where part only of a tax year falls within P’s period of ownership, that part is a “partial tax year” for the purposes of this section.

Section 222B(4) TCGA provides the rule:

A partial tax year is “a non-qualifying partial tax year” in relation to the

---

8 See 54.37 (Residential property gain).

9 See 53.4.5 (Charge on non-resident).

dwelling-house if—

- (a) neither P nor P’s spouse or civil partner was resident for the tax year in question in the territory in which the dwelling-house is situated, and
- (b) the day count test was not met by P with respect to the dwelling-house for that partial tax year.

## 55.4 Residence in territory of house

Section 222B(3) TCGA provides:

A tax year the whole of which falls within P’s period of ownership is “a non-qualifying tax year” in relation to the dwelling-house if—

- (a) neither P nor P’s spouse or civil partner was resident for that tax year in the territory in which the dwelling-house is situated

A person who is not so resident will still be entitled to PRR if they meet the day count test.

The question whether an individual is resident in the UK is decided by the SRT.

Section 222B TCGA provides rules to identify when an individual is resident in a foreign state (“**overseas-residence**”). Section 222B(6) provides:

For the purposes of this section an individual is resident in a territory outside the UK (“the overseas territory”) for a tax year (“year X”) in relation to which condition A or B is met.

I refer to “**foreign residence conditions A and B**”

### 55.4.1 Residence condition A

Section 222B(7) TCGA provides:

Condition A is that the individual is, in respect of a period or periods making up more than half of year X, liable to tax in the overseas territory under the law of that territory by reason of the individual’s domicile or residence.

The wording is loosely based on OECD Model definition of treaty-residence.<sup>10</sup>

---

<sup>10</sup> See 8.3 (Residence under art 4(1)).

“Tax” is not defined and it is considered that any residence-based tax<sup>11</sup> will count.

This deals with split years in the foreign state in a sensibly rough and ready manner.

#### *55.4.2 Residence condition B*

Where an individual is resident (in a normal sense of the word) in a country which does not impose residence-based tax, that individual will not meet foreign residence condition A. That may include states with no direct tax at all, such as Saudi Arabia, and states which only tax income from sources in that state, such as Singapore and Hong Kong. Such persons may still fall within foreign residence condition B. Section 222B TCGA provides:

(8) Condition B is that the individual would be resident in the overseas territory for year X in accordance with the statutory residence test in Part 1 of Schedule 45 to the FA 2013, if in Parts 1 and 2 of that Schedule—

- (a) any reference to the UK (however expressed) were read as a reference to the overseas territory,
- (b) “overseas” meant anywhere outside that territory, and
- (c) in paragraph 26 (meaning of “work”), sub-paragraphs (2) to (4), (6) and (7) were disregarded.<sup>12</sup>

(9) In applying the statutory residence test in accordance with subsection (8), any determination of whether—

- (a) the individual was resident in the overseas territory for a tax year preceding year X, or
- (b) another individual is resident in the overseas territory for year X,

is to be made in accordance with the statutory residence test, as modified by subsection (8).

### **55.5 Day count test**

Section 222B(3) TCGA provides:

A tax year the whole of which falls within P’s period of ownership is

---

<sup>11</sup> Or domicile-based tax, though I doubt if there are any.

<sup>12</sup> These provisions deal with matters such as travelling and training: see 5.21 (Work).

“a non-qualifying tax year” in relation to the dwelling-house if...

- (b) the day count test was not met by P with respect to the dwelling-house for that tax year (see section 222C).

Section 222C(1) TCGA provides:

This section explains how P meets the day count test (see section 222B) with respect to the dwelling-house or part of a dwelling-house mentioned in section 222(1) for a full or partial tax year.

In the remainder of this section the dwelling-house or part of a dwelling-house is referred to as “the dwelling-house”.

After this proem we move on:

- (2) P meets that test for a tax year with respect to the dwelling-house if, during that year, P spends at least 90 days in one or more qualifying houses.

Section 222C(6) TCGA explains how to count to 90:

For the purposes of subsections (2) and (3) the days need not be consecutive...

### 55.5.1 *Ownership in part of year*

Where the property is owned for part of a year the 90 day requirement is reduced proportionately. Section 222C TCGA provides:

- (3) P meets that test for a partial tax year<sup>13</sup> with respect to the dwelling-house if, during that partial tax year, P spends at least the relevant number of days in one or more qualifying houses.

- (4) To find the relevant number of days for the purposes of subsection (3), multiply 90 days by the relevant fraction and round up the result to the nearest whole number of days if necessary.

- (5) The relevant fraction is  $(X \div Y)$

where—

“X” is the number of days in the partial tax year;

“Y” is the number of days in the tax year.

### 55.5.2 *Days spent*

---

13 Section 222C(10) incorporates the definition by reference: In this section “partial tax year” has the meaning given by section 222B(5).

Section 222C(8) TCGA provides:

For the purposes of this section, a day counts as a day spent by an individual in a qualifying house if—

- (a) the individual is present at the house at the end of the day, or
- (b) the individual—
  - (i) is present in the house for some period during the day, and
  - (ii) the next day, has stayed overnight in the house.

The wording of (8)(a) is taken from the SRT<sup>14</sup> but is not appropriate here because under the SRT the question is whether the individual is present in the country, and here the question is whether the individual is present in the residence. The problem will often be solved by para (b). It is easy to envisage circumstances where, like Cinderella, P will need to leave the party before midnight in order to qualify for PRR. But fortunately that will not often be the case.

The rules are unnecessarily complicated. It would be sensible to use the SRT test (present in the dwelling-house on a day for at least some of the time, no matter how short a time).<sup>15</sup>

### 55.5.3 *Qualifying house*

Where more than one residence is owned in the same territory during the year, the day count test applies across the properties.

Section 222C(6) TCGA provides:

For the purposes of subsections (2) and (3) ... days spent in different qualifying houses may be aggregated.

Section 222C(9) TCGA provides:

For the purposes of this section—

- (a) the dwelling-house is a qualifying house in relation to P, and
- (b) any other dwelling-house or part of a dwelling-house which is situated in the same territory as the dwelling-house is a qualifying house in relation to P at any particular time if at that time any of the following has an interest in it—
  - (i) P,

---

14 See 5.15.1 (Ascertaining days spent in UK).

15 See 5.11.3 (Sufficient time in UK home).

- (ii) an individual who is P's spouse or civil partner at that time, and
- (iii) an individual who is P's spouse or civil partner at the time of disposal of the dwelling-house.

## 55.6 MPR notice

### 55.6.1 Power to make MPR notice

Section 222(5) TCGA provides:

So far as it is necessary for the purposes of this section to determine which of 2 or more residences is an individual's main residence for any period—

- (a) the individual may conclude that question by notice to an officer of the Board given
  - [i] within 2 years from the beginning of that period
  - [ii] but subject to a right to vary that notice by a further notice to an officer of the Board as respects any period beginning not earlier than 2 years before the giving of the further notice.

I refer to this as “**a MPR notice**”.

### 55.6.2 Time limit for notice

The deadline for making the MPR notice is short, easy to overlook, and if remembered, it has to be made at a time when it may not be clear which is the best property to elect to be the main residence.

The CG Manual provides:

**CG64495 two or more residences: time limit for nominating** [Nov 2019]

TCGA92/222 (5) sets out that a notice nominating which of two or more residences is to be treated as the main residence must be given within two years from the date on which the individual has a particular combination of residences. Each time there is a change in the individual's combination of residences a new period begins and there is a new opportunity to make a nomination. This interpretation of the legislation was confirmed in the case of *Griffin v Craig Harvey*<sup>16</sup> ...

---

16 66 TC 396.

Where a dwelling house is acquired, the date on which there is a new combination of residences will not necessarily be the date of acquisition, it will be the date on which the dwelling house was first used as a residence. Similarly, where an individual ceases to use a dwelling house as a residence, the date on which there is a new combination of residences will be the date on which the dwelling house is no longer used as a residence, it will not necessarily be the date on which that dwelling house is disposed of.

*Example:*

An individual has a single residence until 1 April 2015. On that date she acquired a dwelling house and immediately began to use it as a second residence. She has until 31 March 2017 to nominate which of these residences is to be treated as her main residence.

On 23 November 2015 she acquired another dwelling house and began to use it as a third residence on 1 June 2016. A new period for nominating begins on 1 June 2016 giving her until 31 May 2018 to nominate which of her three residences is to be treated as her main residence.

On 30 September 2016 she ceased to use one of her dwelling houses as a residence and subsequently disposed of it on 30 November 2016. A new period for nominating therefore begins on 30 September 2016; she has until 29 September 2018 to nominate which of her two remaining residences is to be treated as the main residence.

Section 222(5A) TCGA provides:

But a notice or further notice under subsection (5)(a) determining which of 2 or more residences is an individual's main residence for any period may be given more than 2 years from the beginning of the period if during the period the individual has not held an interest of more than a negligible market value in more than one of the residences.

### *55.6.3 Period notice applies*

The CG Manual provides:

**CG64497 two or more residences: date from which a nomination applies** [Jul 2019]

A nomination will apply from the beginning of a period to which it relates, i.e. the date on which the individual had that particular combination of residences giving rise to the need to determine which is the main residence.

The nomination will have continuing effect until the earlier of,

- The date on which the individual's combination of residences changes, or
- The date from which a variation of the original notice is to apply.

A variation of a notice will apply from the date specified in the notice of variation which may be up to two years before the giving of the notice.

#### 55.6.4 Variation of MPR notice

The CG Manual provides:

**CG64510 two or more residences: variation of a notice** [Jul 2019]

A notice given under TCGA92/222 (5) can be varied by a further notice at any time. The further notice can be backdated to be effective from up to two years from the date that it was given.

A variation will often be made when a disposal of a residence is in prospect or the disposal has already been made and the individual making the disposal wishes to secure the final period exemption. See CG64985+.

For example, where an individual with two residences validly nominates house A, they may vary that nomination to house B at any time. The variation can then be varied back to house A within a short space of time. This will enable the individual to obtain the benefit of the final period exemption on house B with a loss of only a small proportion of relief of on house A.

#### 55.6.5 Form of MPR notice

The CG Manual provides:

**CG64520 two or more residences: form of notice** [Jul 2019]

There is no statutory form for a notice under TCGA92/S222 (5) or for a variation of such a notice. However the following conditions must be fulfilled,

- A nomination by an individual must be made to an officer of the Board and must be signed by the individual. TCGA92/S222 (5).
- Spouses or civil partners who are living together<sup>17</sup> can only have one main residence between them for the purpose of private residence relief. If a nomination affects both of them it must be made by notice

---

<sup>17</sup> See App 3.4.3 (Living together: married couple).

in writing to an officer of the Board and must be signed by both of them. TCGA92/S222 (5). See also CG64525 regarding elections on marriage or on registering as civil partners.

- Where one of more of the residences is occupied by a person entitled to occupy it under the terms of a settlement, the notice must be writing to an officer of the Board and should be signed by both the trustees of the settlement and the person entitled to occupy the residence. TCGA92/S225 (b).
- The signature of an agent is not sufficient.

### *55.6.6 Procedure on receipt of notice*

The CG Manual provides:

#### **CG64530 two or more residences: treatment of notice** [Jul 2019]

If a notice or a variation of a notice is received, it should be acknowledged without any comment on its validity, and filed. On acknowledging the notice great care should be taken to avoid giving the impression that the notice is valid where the full facts are not available. In certain circumstances it may be appropriate to ask the taxpayer or their agent for further information with regard to a notice. For example,

- It may be apparent that the notice has been given more than two years after the acquisition of a further dwelling house. This doesn't necessarily mean that the notice is late; the house may not have been occupied as a residence immediately on acquisition. So you should consider asking for more information to establish if the notice has been made after the expiry of the time limit.
- It may be apparent that the nominated dwelling house has not been a residence of the person giving the notice.
- If it appears that the nominated dwelling house is occupied under licence, see CG64536, or that the notice takes account of such a residence, you should consider asking the taxpayer or their agent for further information in order to confirm its validity.

Any enquiries that you do make should be to the extent of satisfying yourself, on the facts available, that the notice is valid or invalid. And, where it is invalid, explaining why to the person who has given the notice, or to their agent.

However until a dwelling house is sold any dispute over the validity of a notice will have no tax consequences. Therefore you should not take your enquiries beyond the stage at which, on the facts made available, you believe the notice to be invalid.

### 55.6.7 MPR notice under regime

The CGT charge on non-residents has a more generous rule for when it is possible to make or change a MPR notice. It is convenient to have different terms for the different types of notice, and in the following discussion I coin the following terms:

- (1) **“a UK MPR notice”** is a an ordinary notice under s.222 TCGA.
- (2) **“a overseas MPR notice”** is a notice under s.222A(2).

Section 222A(1) TCGA provides:

This section applies where—

- (a) an individual (“P”) makes a disposal of, or of an interest in—
  - (i) a dwelling-house, or part of a dwelling-house, which was at any time in P’s period of ownership occupied by P as a residence, or
  - (ii) land (as mentioned in section 222(1)(b)) which P had for P’s own occupation and enjoyment with that residence as its garden or grounds, and
- (b) the disposal is—
  - (i) a disposal on which a residential property gain (as defined by Schedule 1B)<sup>18</sup> accrues which is chargeable to capital gains tax because of section 1A(3)(b), or
  - (ii) a disposal on which a loss accrues but is one which, had a gain accrued, would be within sub-paragraph (i).

In the remainder of this section the residence concerned is referred to as “the dwelling-house”.

Section 222A(2) TCGA provides:

So far as it is necessary for the purposes of section 222, P may determine, by a notice under this section, which of 2 or more residences (of which one is the dwelling-house) was P’s main residence for any period within P’s period of ownership of the dwelling-house.

The important point is that the time limits for a UK MPR notice do not apply to an overseas notice. Section 222A(3) provides:

A notice under this section may vary, as respects any period within P’s

---

<sup>18</sup> See 54.37 (Residential property gain).

period of ownership of the dwelling-house, a notice previously given under section 222(5)(a)....

In principle a notice may be given at any time. Section 222A(4) imposes one limit:

(4) A notice under this section may not vary a notice previously given under section 222(5)(a) as respects any period for which the previous notice had the effect of determining whether or not a disposed of residence was P's main residence.

(5) In subsection (4) "disposed of residence" means one of P's residences which was disposed of (in whole or in part) before the date of the disposal mentioned in subsection (1)(a).

The expression "disposed of residence" is slovenly, verging on ungrammatical, but at least one drafter in the office of parliamentary counsel is fond of it. However clumsy, it is easier to follow the statutory usage.

The new notice can be backdated almost indefinitely.

Section 222A(6) TCGA then deals with procedure:

A notice under this section—

- (a) must be given in the return under Schedule 2 to the Finance Act 2019 in respect of the disposal mentioned in subsection (1)(a), and
- (b) may not subsequently be varied, whether by a notice under this section or section 222(5)(a).

It will be necessary to consider the position at the time of a sale.

In short, the ability to elect operates more favourably as the determination is made at the time of the disposal in the sch 2 return. By contrast, the regime for UK residents remain restricted to a two-year time limit.

Having different time periods for notice (or determination) by residents and by non-residents raises issues for non-residents who become UK resident. A non-resident (with a house still in the UK) would be able to sell the house while away and make an notice at the time of sale. However, if individual became UK resident and then sold the house they could not elect.

To add to the confusion, the individual may not know whether they are UK resident until late in the tax year or some time after the year.

CIOT rightly observed that it would be better to align the provisions for

UK and for offshore MPR notices.<sup>19</sup> But no-one took any notice of that.

## 55.7 Which is main residence

The question of identifying the “main” private residence arises in various tax contexts. It is not possible to give a full list, but they include:

- (1) PRR, where there is no MPR notice
- (2) Definition of Scottish/Welsh taxpayer<sup>20</sup>
- (3) Council tax<sup>21</sup>

A similar question is which is the chief territory-residence for domicile purposes.<sup>22</sup>

How does one ascertain which of two competing private residences is the main residence? The test is multifactorial: no single factor is decisive. The question is one of fact and degree.<sup>23</sup>

The issue arose in *Frost v Feltham* where the taxpayer spent two or three days a month at his property “Mount Severn”. He spent the rest of the time in a pub, “The White Horse”, where he was licensee. The judge noted that “viewed in isolation those are not long periods of time to spend at a house which can properly be described as the principal or more important residence of the persons concerned”. Nevertheless, Mount Severn was his main residence:

If someone lives in two houses the question, which does he use as the principal or more important one, cannot be determined solely by reference to the way in which he divides his time between the two. I can test that by reference to an example far removed from the facts of this case and the conditions of our own times. In his “Lives of the Lord Chancellors” Lord Campbell tells how Lord Eldon was often prevented by the burdens of his office from visiting his estate at Encombe in

---

19 CIOT “Draft FB15 Clauses on Disposals of UK residential interest by non-residents” (2015)

[https://www.tax.org.uk/system/files\\_force/file\\_uploads/150204%20Draft%20FB15%20Clauses%20on%20Disposals%20of%20UK%20residential%20interest%20-%20CIOT%20comments\\_0.pdf?download=1](https://www.tax.org.uk/system/files_force/file_uploads/150204%20Draft%20FB15%20Clauses%20on%20Disposals%20of%20UK%20residential%20interest%20-%20CIOT%20comments_0.pdf?download=1)

20 See 5.45.6 (Two UK residences).

21 Council tax cases offer further examples, but without, I think, taking the matter much further. See eg *R oao Bennett v Copeland Borough Council* [2004] EWCA Civ 672.

22 See 3.9.3 (Which is chief residence).

23 *Frost v Feltham* 55 TC 10 at p.14.

Dorset for long periods at a time. Sometimes he was only able to get down there for three weeks or so in the year, for the partridge shooting in September. True it was that Lord Eldon also had a good house in Hamilton Place, but it could not really have been suggested that he did not use Encombe as his principal or more important residence.<sup>24</sup>

The CG Manual provides:

**CG64545 two or more residences: no valid notice made** [Jul 2019]  
Where an individual has two or more residences within the meaning of Section 222 it is not mandatory for that individual to make a notice nominating which is to be treated as the only or main residence. However where a notice is not made, or an invalid notice is made, the residence which attracts relief is the dwelling house which is the main residence as a matter of fact.

The Manual then turns to the question of which is the main residence as a matter of fact:

All of the facts and circumstances of the particular case must be considered in order to conclude which the residence is the main residence.

In practice the main residence is not necessarily the residence where the individual spends the majority of their time, although it commonly will be. [The Manual considers *Frost v Feltham* discussed above, and continues:]

The following list of points to consider, although not exhaustive, may be useful in establishing which is the main residence,

- If the individual is married or in a civil partnership, where does the family spend its time?
- If the individual has children, where do they go to school?
- At which residence is the individual registered to vote?
- Where is the individual's place of work?
- How is each residence furnished?
- Which address is used for correspondence?
  - Banks & Building Societies
  - Credit cards
  - HMRC
- Where is the individual registered with a doctor / dentist?

---

24 55 TC 10 at p.13.

- At which address is the individual's car registered and insured?  
Which address is the main residence for council tax?

Scottish Taxpayer Technical Guidance Manual adds to the list:

**STTG3700: meaning of 'main place of residence'** [Jun 2016]

- Location of social/non-work activity i.e. club membership/participation, hobbies, etc
- Where are the majority of the individual's possessions kept

## 55.8 Spouses

Section 222(6) TCGA provides:

In the case of an individual living with his spouse or civil partner—

- (a) [i] there can only be one residence or main residence for both, so long as living together and,
- [ii] where a notice under subsection (5)(a) above affects both the individual and his spouse or civil partner, it must be given by both.

In short, spouses can only have one residence which qualifies for PRR. That made sense when the rule was introduced, in 1965, when spouses formed one taxable unit. But it is strange that this policy, which entails a significant discrimination against marriage, has survived independent taxation without more comment.<sup>25</sup> In a case where unmarried cohabitants each own a residence, on which each could claim PRR, marriage brings a significant CGT cost. Those who argue that the tax system should support marriage, and those who argue it should be neutral, should be in favour of repeal of this rule, or its extension to cohabitants.

The principle that spouses form one taxable unit runs through to the overseas PPR provisions. Section 222C(7) TCGA provides:

A day spent by P's spouse or civil partner in a dwelling-house or part of a dwelling-house which is a qualifying house in relation to P counts as a day spent by P in the qualifying house (but no day is to be counted twice as a result of this subsection).

## 55.9 MPR notice on marriage

---

<sup>25</sup> See Loutzenhiser, "Transferable Personal Allowances: A Small Step in the Wrong Direction" [2015] BTR 110.

The CG Manual provides:

**CG64525 two or more residences: nominations on marriage or on registering as civil partners** [Jul 2019]

TCGA92/S222 (6) sets out that spouses or civil partners who are living together can only have one main residence between them for the purpose of private residence relief. If when they marry or register as civil partners they each own a residence and they continue to use both as residences, they can jointly nominate which is to be treated as the main residence. The two year period for making the nomination commences on the date of marriage or the date of registration.

Where one spouse or civil partner owns more than one residence, but the other spouse or civil partner does not own a residence and there is no change in this on marriage or registration as civil partners, then a fresh period for making a nomination does not begin. This is because neither spouse nor civil partner has had a change in their combination of residences, and neither of them needs to become a party to an existing nomination to which they were not already a party. A notice under TCGA92/S222 (5) only has to be made jointly where it affects both spouses or civil partners.

Where the spouses or civil partners jointly own more than one residence at the date of marriage or on registering as civil partners, and neither separately owns any other residence, a new two year period for making a nomination begins. Even though both spouses or civil partners own the same residences as before, and even if they have both previously nominated the same residence, they now have to make a joint nomination in order for it to be valid from the date of marriage or from the date that they were registered as civil partners.

*55.9.1 MPR notice by spouses*

Section 222A(7) TCGA provides:

Where a notice under this section affects both P and an individual (“X”) who was, in the period to which the notice relates (“the relevant period”), P’s spouse or civil partner living with P—

- (a) in a case where each of P and X is required to make a return under Schedule 2 to the Finance Act 2019 in respect of the disposal of an interest in the dwelling-house, notice given by P under this section is effective as respects any part of the relevant period when P and X were living together as spouses

- or civil partners only if notice to the same effect is also given under this section by X in respect of that period;
- (b) in any other case, notice given by P under this section is effective as respects any part of the relevant period when P and X were living together as spouses or civil partners only if it is accompanied by written notification from X agreeing to the terms of the notice in respect of that period.

In short, spouses must act jointly in giving a notice.

## 55.10 Periods of absence relief

### 55.10.1 *Permitted periods of absence*

Section 223(3) TCGA provides relief for certain periods of absence:

For the purposes of sections 222(5) and 222A and subsections (1) and (2) above—

- (a) a period of absence not exceeding 3 years (or periods of absence which together did not exceed 3 years), and in addition
- (b) any period of absence throughout which the individual
- [i] worked in an employment or office all the duties of which were performed outside the UK or
  - [ii] lived with a spouse or civil partner who worked in such an employment or office, and in addition
- (c) any period of absence not exceeding 4 years (or periods of absence which together did not exceed 4 years) throughout which the individual was prevented from residing in the dwelling-house or part of the dwelling-house
- [i] in consequence of the situation of his place of work or
  - [ii] in consequence of any condition imposed by his employer requiring him to reside elsewhere, being a condition reasonably imposed to secure the effective performance by the employee of his duties, and in addition,
- (d) any period of absence not exceeding 4 years (or periods of absence which together did not exceed 4 years) throughout which the individual lived with a spouse or civil partner in respect of whom paragraph (c) applied in respect of that period (or periods),

shall be treated as if in that period of absence the dwelling-house or the part of the dwelling-house were occupied by the individual as a residence if conditions A and B are met.

In short, conditions A and B require a period of residence before and after the period of absence. In full detail:

(3A) Condition A is that before the period there was a time when the dwelling-house was the individual's only or main residence.

(3B) Condition B is that after the period—

- (a) in a case falling within paragraph (a), (b), (c) or (d) of subsection (3), there was a time when the dwelling-house was the individual's only or main residence,
- (b) in a case falling within paragraph (b), (c) or (d) of that subsection, the individual was prevented from resuming residence in the dwelling-house in consequence of the situation of the individual's place of work or a condition imposed by the terms of the individual's employment requiring the individual to reside elsewhere, being a condition reasonably imposed to secure the effective performance by the employee of his duties, or
- (c) in a case falling within paragraph (b), (c) or (d) of that subsection, the individual lived with a spouse or civil partner to whom paragraph (b) of this subsection applied.

Section 222B TCGA provides:

(11) Subsection (1) is subject to—

- (a) section 222(8) (job-related accommodation), and
- (b) section 223(3) (absence reliefs).

If these reliefs apply, a non-resident period is not disqualified from PRR. HMRC say:

**Q11 I lived in the property for 20 years before leaving the UK in 2010 and had met all the conditions for PRR up to that date. Does this mean if I sell the property by 5 October 2016 there will be no CGT liability?**

A11 Yes. If you can identify a time prior to 6 April 2015 that the property qualified for PRR then final period relief will be available i.e. the last 18 months of ownership will be eligible for relief.<sup>26</sup>

---

26 HMRC, "Capital Gains Tax for non-UK residents: sales and disposals of UK residential property: Frequently Asked Questions" (March 2015).  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/413](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/413)

## 55.11 2015 transitional rules

Draft clauses EN provides a summary:

... where a non-UK resident person disposes of a dwelling-house, the use of the property prior to 6 April 2015 is ignored in determining eligibility to private residence relief unless the person otherwise elects and specifies the date as to when, prior to then, the property was the person's only or main residence. Any absence from that date to 5 April 2015 is deducted from the amount of absence available for relief for periods after 5 April 2015.

Section 222B(2) TCGA provides:

Except where the disposal mentioned in section 222(1) is a disposal falling within section 222A(1)(b) (non-resident disposals), subsection (1) does not have effect in respect of any tax year or partial tax year before the tax year 2015-16.

Section 223A TCGA provides:

- (1) This section applies where—
  - (a) the individual mentioned in section 223(1) (“P”) acquired the asset to which the gain mentioned in section 222(1) is attributable before 6 April 2015, and
  - (b) P’s period of ownership for the purposes of section 223 begins on that date because of section 223(7)(b).
- (2) Times before 6 April 2015 are to be ignored in determining whether or not condition A in section 223 is met in relation to a period of absence, unless P elects that this subsection is not to apply in relation to the period.
- (3) An election under subsection (2)—
  - (a) must specify which day before 6 April 2015 P relies on in relation to the period of absence for the purpose of meeting condition A in section 223, and
  - (b) must be made in the return under Schedule 2 to the Finance Act 2019 in respect of the disposal.
- (4) Where P has made an election under subsection (2), section 223 applies as if relevant prior periods of absence counted against the

maximum periods (and maximum aggregate periods) specified in subsection (3)(a), (c) and (d) of that section.

(5) In relation to a maximum period (or maximum aggregate period) specified in paragraph (a), (c) or (d) of section 223(3), “relevant prior period of absence” means a period of absence which would have counted against that maximum period (or maximum aggregate period) if the bridge period were included in the period of ownership.

(6) In subsection (5) “the bridge period” means the period beginning with the day specified in the election and ending with 5 April 2015.

(7) In this section “period of absence” has the same meaning as in section 223.

## 55.12 Residence held by trust or PRs

Section 225 TCGA provides PRR for trusts. FA 2015 makes (relatively) straightforward amendments to bring this into line with the relief for individuals:

(1) Sections 222 to 224 shall also apply in relation to a gain accruing to the trustees of a settlement on a disposal of settled property being an asset within section 222(1) where, during the period of ownership of the trustees, the dwelling-house or part of the dwelling-house mentioned in that subsection has been the only or main residence of a person (“B”) entitled to occupy it under the terms of the settlement, and in those sections as so applied—

(a) references to the individual shall be taken as references to the trustees ~~except in relation to the occupation of the dwelling-house or part of the dwelling-house~~ the matters dealt with in subsection (2), and

(b) the notice which may be given to an officer of the Board under section 222(5)(a) shall be a joint notice by the trustees and ~~the person entitled to occupy the dwelling-house or part of the dwelling-house~~ B, and;

(c) the notice which may be given by the trustees under section 222A is effective only if it is accompanied by written notification from B agreeing to the terms of the notice;

but section 223 (as so applied) shall apply only on the making of a claim by the trustees.

(2) In sections 222 to 224, as applied by subsection (1), references to the individual, in relation to-

- (a) the occupation of the dwelling-house or part of the dwellinghouse,
  - (b) residence in a territory, or
  - (c) meeting the day count test,
- are to be taken as references to B.

Trustees sometimes have a choice of who should be entitled to occupy a property, and that choice may confer (or deny) PRR.

Section 225A TCGA (not discussed here) provides PRR for personal representatives. The FA 2015 makes the corresponding amendments to bring this into line with the relief for individuals

### 55.13 Commencement of PRR rules

Para 10 sch 9 F(no.1)A 2015 provides:

The amendments made by this Schedule have effect in relation to disposals made on or after 6 April 2015.

#### 55.13.1 *Pre-2015/16 years*

Section 222B(2) TCGA provides:

Except where the disposal mentioned in section 222(1) is a disposal falling within section 222A(1)(b) (non-resident disposals), subsection (1) does not have effect in respect of any tax year or partial tax year before the tax year 2015-16.

## CHAPTER FIFTY SIX

# GAINS OF NON-RESIDENT SETTLOR-INTERESTED TRUSTS: s.86

56.1

### *Cross references*

The following topics are considered elsewhere:

- 96.1 (Statutory tax indemnity)
- 56.20 (DT relief: s.86 TCGA)
- 57.6.2 (s.86 gain deducted)
- 57.54 (Non-resident trust: CGT planning)
- 60.21.5 (s.3 distribution relief/s.87/86: Interaction)
- 61.13 (Loss of non-resident trustees)
- 61.15 (Personal loss and s.86 gain)
- 54.30.2 (UK-land gain outside s.86/87)
- 95.1.4 (Two settlors: CGT guidance)

### **56.1 CGT on non-resident trusts**

The general scheme of the TCGA is that a trust where possible is treated as a taxable unit.<sup>1</sup> If the trustees are UK resident, they are subject to CGT, even if the beneficiaries have no connection with the UK. Non-resident trustees are in principle not subject to CGT, even if beneficiaries are resident in the UK.<sup>2</sup> This rule presents an obvious means of CGT avoidance. HMRC's first answer to this is the anti-avoidance rules in ss.86, 87 TCGA.

In outline:

- (1) A settlor is subject to CGT on gains accruing to a non-resident trust if:
  - (a) The settlor is UK resident and UK domiciled.

---

<sup>1</sup> See 53.20 (Trust a taxable unit).

<sup>2</sup> See 53.4 (Territorial scope of CGT).

(b) The settlor has an “interest” in the settlement. (This is widely and artificially defined.)

I refer to this as the “**s.86 charge**” and the gains treated as accruing to the settlor under this section are “**s.86 gains**”.

(2) A beneficiary is subject to CGT if:

(a) The beneficiary is UK resident.

(b) The beneficiary receives a capital payment from the trust.

(c) The trust realises gains.

I refer to this as the “**s.87 charge**” or the “**s.87 capital payments basis**” and the gains treated as accruing to a beneficiary under this section are “**s.87 gains**”. This topic is discussed in the next chapter.

## 56.2 Section 86 charge

The s.86 charge is the subject of this chapter.

The charge was extended in 1991 and 1998 with transitional relief for:

(1) trusts made before 19 March 1991 (“**pre-1991 trusts**”)

(2) trusts made before 17th March 1998 (“**pre-1998 trusts**”)

I refer to trusts which qualify for these reliefs as “**pre-1991 protected trusts**” and “**pre-1998 protected trusts**”.

The charge does not apply to a deemed domiciled settlor if the trust is a protected trust.<sup>3</sup>

Sloppy and repetitive drafting adds to the difficulties.

## 56.3 Fundamental s.86 conditions

Section 86(1) provides:

This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...

There follow eight conditions, or sets of conditions. I refer to these as the “**fundamental s.86 conditions**”. In their statutory order they are:

(1) Qualifying settlement

(2) Trustee residence condition

(3) Settlor residence and domicile conditions

(4) Settlor-interested condition

(5)-(8) Death/divorce of settlor or certain beneficiaries

---

3 See 60.2 (Protected trust: s.86/Para 5A sch 5).

It is convenient to consider the settlor-interested condition before the others.

## **56.4 Minor definitions**

It is helpful first of all to clear out some (relatively) minor definitions. They are repeated up to five times, verbatim: the repetition is because on each occasion the definitions are expressed to be for the purposes of the paragraph and not for the purposes of the schedule or the Act. I set out the para 9 version and give the references for the others.

### *56.4.1 “Settlement” and “settlor”*

“Settlement” is not expressly defined so the standard IT/CGT definition applies. Contrast the IT settlor-interested trust rules, and the s.87 rules, where the settlement-arrangement definition applies. It would be bold to plan on the assumption that this will not change.

For “settlor” see 94.2.9 (Settlor: CGT s.86 definition).

### *56.4.2 “Control” and “participator”*

Para 9(9) sch 5 TCGA provides a slightly cut down form of the ultra-wide sense of control:<sup>4</sup>

[a] For the purposes of sub-paragraph (7) above the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010;

[b] but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(8), 2A(8) and 8(8) sch 5 TCGA and s 96(10) TCGA each repeat this definition.

Participator is relevant to this definition of control. Para 9(11) sch 5 TCGA provides the standard definition:

In this paragraph ... “participator” has the meaning given by section 454 of CTA 2010.

---

4 For the ultra-wide sense of control, see 99.2.2 (Definitions of “control”).

Paras 2(10), 8(9) sch 5 TCGA and s.96(10) TCGA each repeat this definition verbatim.

Para 2A(10) also repeats the definition, but para 2A(9A) sch 5 TCGA cuts it down:

For the purposes of sub-paragraphs (8) and (9) above a person is not to be regarded as a participator in a company controlled by the trustees of a settlement where the person has a share or interest in the capital or income of the company solely by virtue of an interest which the person has under the settlement.

There are (more or less) identical provisions in para 8(8A) and para 9 (10ZA) sch 5 TCGA.

#### 56.4.3 “Associated company”

Para 9(10) sch 5 TCGA provides a slightly cut down form of the usual wide definition:<sup>5</sup>

- [a] For the purposes of sub-paragraph (7) above the question whether one company is associated with another shall be construed in accordance with section 449 of CTA 2010;
- [b] but where in deciding that question for those purposes it falls to be decided whether a company is controlled by a person or persons, no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(9) and 2A(9) sch 5 TCGA repeat the definition.

#### 56.4.4 “Child” and “grandchild”

Para 9(11) sch 5 TCGA provides:

- In this paragraph—
- “child” includes a step-child;
- “grandchild” means a child of a child;

This is repeated verbatim in para 2A(10) sch 5 TCGA.

#### 56.4.5 “Relevant property/income”

---

<sup>5</sup> See 99.17.1 (“Associated company”).

Para 2(2) sch 5 TCGA provides:

- (a) relevant property is property originating from the settlor,
- (b) relevant income is income originating from the settlor.

This is repeated (more or less) verbatim in para 9(10D) sch 5 TCGA.

## **56.5 Settlor-interested condition**

Section 86 TCGA provides:

- (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
  - (d) at any time during the year the settlor has an interest in the settlement;

If a settlement becomes (or ceases to be) settlor-interested during a tax year, s.86 TCGA applies for the whole tax year. This is unlike the IT rules (where if a settlor is excluded s.624 ITTOIA ceases to apply from the date of the exclusion).<sup>6</sup> There is reason for the distinction, because the s.86 charge is on gains less losses for the entire year, and splitting the year would involve some trouble. The rule does however mean that CGT planning by excluding the settlor must be carried out some time in advance.

### *56.5.1 “Settlor-interested”*

The term “settlor-interested” in a s.86 context<sup>7</sup> is a label for a complex set of rules.

Para 2 sch 5 TCGA provides:

- (1) For the purposes of section 86(1)(d) a settlor has an interest in a settlement if—
  - (a) any relevant property<sup>8</sup> which is or may at any time be comprised in the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever,
  - (b) any relevant income which arises or may arise under the

---

<sup>6</sup> See 44.6.6 (Settlor-interest ceases).

<sup>7</sup> The same term is used in an IT context with a different meaning: see 44.6.1 (Concepts of “settlor-interested”).

<sup>8</sup> See 56.4.5 (“Relevant property/income”).

settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever, or

- (c) any defined person enjoys a benefit directly or indirectly from any relevant property which is comprised in the settlement or any relevant income arising under the settlement;

but this sub-paragraph is subject to sub-paragraphs (4) to (6) and paragraph 2A below.

The key term is “defined person”. Para 2(3) sch 5 TCGA provides:

For the purposes of sub-paragraph (1) above each of the following is a defined person—

- (a) the settlor,
- (b) the settlor’s spouse or civil partner;
- (c) any child of the settlor or of the settlor’s spouse or civil partner;
- (d) the spouse or civil partner of any such child;
- (da) any grandchild of the settlor or of the settlor’s spouse or civil partner;
- (db) the spouse or civil partner of any such grandchild;
- (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;
- (f) a company associated with a company falling within paragraph (e) above.

The history has been one of gradual expansion, with the reference to children added in 1991 and paras (da) and (db) - dealing with grandchildren - added in 1998. Thus the definition of settlor-interested is wider than the IT equivalent in s.624, eg the settlor is chargeable on gains accruing to a trust from which their children or grandchildren could benefit even though there is no actual benefit to the settlor.

Para 2(4) sch 5 TCGA provide exceptions copied from the precedent of the IT settlor-interested trust rules; they have no significant application in practice.

The IT settlor-interested rules have a provision that references to spouses do not include separated or potential future spouses.<sup>9</sup> Unfortunately, the CGT settlor-interested rules do not have that rule. The omission raises a number of difficulties.

---

<sup>9</sup> See App 3.2 (“Spouse”); App 3.3 (“Civil partner”).

### 56.5.2 *Civil partner\same-sex spouse*

The Civil Partnership Act took effect on 5 December 2005. Before then, civil partners of the settlor were not expressly excluded in trust drafting, so a trust which merely excluded spouses might become settlor-interested from 2005! HMRC tactfully overlook that:

For settlements made before 5 December 2005, the settlor may not have been considered to have retained an interest in the settlement for Income Tax purposes, as both the settlor and his spouse were specifically excluded from benefit under the particular terms of the settlement deed. Although such an ‘exclusion clause’ would not have included a ‘civil partner’, HMRC will not regard the settlor as retaining an interest unless and until a beneficiary becomes the civil partner of the settlor.<sup>10</sup>

With regards to the provisions of Section 86 TCGA 1992, whereby the gains of a non-resident trust or dual resident trust are chargeable on the settlor. If such provisions did not apply in relation to a settlement made prior to 5 December 2005, and the deed was drafted in such an obvious way as to exclude spouses or future spouses without particular definition of those terms, that exclusion might reasonably be regarded in the context as covering civil partners and those treated as such under CPA who stand in the same position as spouses under the law from 5 December 2005. In such circumstances it will not be HMRC’s intention to apply those provisions to a settlement only as a result of the coming into effect of the CPA. For settlements made on or after 5 December 2005, it is expected that the drafting of the settlement deed excludes the full list of ‘defined persons’ (Schedule 5, Para 2(3) TCGA 1992), including ‘civil partners’, from benefiting in any circumstances under the settlement, if it is intended for the settlement not to be caught by the provisions.<sup>11</sup>

This is just a concession and it may be in the interest of beneficiaries to argue that a pre-2005 settlement under which a future civil partner may benefit should be treated as settlor-interested for CGT purposes.

A similar problem arises with same-sex spouses, for trusts made before the Marriage (Same Sex Couples) Act 2013 came into force. A pre-Act exclusion clause which excludes “spouses” will not exclude a same-sex

---

10 For IT, this rule is statutory; see App 3.2 (“Spouse”); App 3.3 (“Civil partner”).

11 “HMRC Residency: Non-resident trusts” <https://www.gov.uk/non-resident-trusts>

spouse: see para 1 sch 4 Marriage (Same Sex Couples) Act 2013. But I expect HMRC will operate a similar concession.

### 56.5.3 *Potential defined persons*

ICAEW guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

24 ... TCGA 1992 Sch 5 specifies the test as to whether the settlor has an interest. Each of sub-paragraphs 2(1)(a) and(b) uses the words “may...in any circumstances whatever”. Interpreted literally, it appears virtually impossible to define a trust where the settlor does not have an interest, because any beneficiary may become a relative of the settlor as a result of subsequent marriages (or indeed subsequent births if necessary to imagine all conceivable possibilities). ...

*Revenue response:* If the terms of a settlement are so framed that a clearly defined person can benefit, eg the class of beneficiaries includes “any spouse of the settlor” or “spouses of the settlor’s children”, or such persons could be added to the class of beneficiaries, then the settlor will be treated as having an “interest” in the trust. However, where there is no prima facie possibility of a defined person benefiting, the Revenue will not treat the settlor as having an “interest”, unless the terms of the settlement and the circumstances of the case indicate an intention to benefit a person who is likely to become a defined person in the future, eg a settlement in favour of the fiancé of the settlor or of the settlor’s child.

### 56.5.4 *Separated spouse*

ICAEW guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

25 Also on the question of whether a settlor has an interest in a trust, it would be helpful if the statement of practice could confirm that a separated spouse would not be regarded as the settlor’s spouse for this purpose.

*Revenue response:* A separated spouse would be regarded as a spouse for the purposes of these provisions unless, in accordance with existing practice (see para 13(a) Appendix B of the Resident trusts consultative document 19 March 1991)<sup>12</sup> on other provisions having a bearing on

---

12 The reference is to the former SP A30 which provided:

“The settlement legislation [now s.624 ITTOIA] includes provisions which may be

“settlor interest” trusts, the separation is permanent.

## 56.6 Pre-1998 protected trusts

Para 2A(1) sch 5 TCGA provides:

[A] In determining for the purposes of section 86(1)(d) whether the settlor has an interest at any time during any year of assessment in a settlement created before 17th March 1998, paragraphs (da) and (db) of paragraph 2(3) above, and the reference to those paragraphs in paragraph 2(3)(e), shall be disregarded

[B] unless—

- (a) that year is a year in which one of the four conditions set out in the following provisions of this paragraph becomes fulfilled as regards the settlement; or
- (b) one of those conditions became fulfilled as regards that settlement in any previous year of assessment ending on or after 5th April 1998.

In the following discussion:

- (1) A trust qualifying for this relief is a “**pre-1998 protected trust**”
- (2) The conditions in para [B] are the “**s.86 trigger conditions**”. Their effect is that the trust becomes settlor-interested, with the consequence that s.86 begins to apply.

In short, the relief is that a protected pre-1998 trust is allowed to benefit the settlor’s grandchildren without becoming “settlor-interested”.

### 56.6.1 *Trigger 1: Provide property*

Para 2A(2) sch 5 TCGA provides:

---

applied to any settlement where the spouse or any possible future spouse of a settlor may be able to benefit from the income or capital of the settlement in any circumstances whatsoever. In relation to the concept of “possible future spouse” the Board of Inland Revenue have considered the scope of the decision reached in the case of *IRC v Tennant* (24 TC 215) and they take the view that that decision applies -

- (a) where, although a settlor is not at the material time a party to a subsisting marriage, the terms of the settlement are such that a benefit may be conferred on substantially any person who may become the wife or husband of the settlor in future, or
- (b) where, whether or not the settlor is married, the terms of the settlement are such as to indicate a specific intention that a future wife or husband of the settlor may be enabled to benefit.”

The first condition is (subject to sub-paragraph (3) below) that on or after 17th March 1998 property or income is provided directly or indirectly for the purposes of the settlement—

Providing property is discussed in the chapter “who is the settlor”: see 94.6 (Tainting).

There are three exceptions where provision of property is allowed. The first two are in Para 2A(2), which requires that the property is provided:

- (a) otherwise than under a transaction entered into at arm’s length,
- (b) otherwise than in pursuance of a liability incurred by any person before that date.

Thirdly, para 2A(3) sch 5 TCGA provides:

For the purposes of the first condition, where the settlement’s expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored if the value of the property or income so provided does not exceed the difference between the amount of those expenses and the amount of the settlement’s income for the year.

I discuss these exceptions in the context of the 2017 protected trust rules, as that is where these issues now arise; see 88.4.4 (Gratuitous intent: Disregards (a)(b)); 88.4.7 (88.4.7 Expenses: Disregard (g)).

### 56.6.2 *Trigger 2: Emigrating trust*

Para 2A(4) sch 5 TCGA provides:

The second condition is that—

- (a) the trustees cease on or after 17 March 1998 to be resident in the UK, or
- (b) the trustees, while continuing to be resident in the UK, become on or after 17th March 1998 trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

If the emigration is to an EU member state, this rule would breach EU law: see 11.9 (EU restriction on exit taxes).

### 56.6.3 *Trigger 3: Variation of trust*

Para 2A(5) sch 5 TCGA provides:

The third condition is that on or after 17th March 1998 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.

SP 5/92 provides:

36 This provision is concerned with situations where the terms of the settlement are varied by the beneficiaries or a court to admit new beneficiaries within the class of persons defined at TCGA 1992 Sch 5 para 9(7) without thereby bringing the settlement to an end and creating a new one. For example, where the terms of the trust include a power to appoint anyone within a specified range to be a beneficiary, exercise of that power after 19 March 1991 will not be regarded as a variation of the settlement...

#### 56.6.4 *Trigger 4: Unexpected beneficiary*

Para 2A(6) sch 5 TCGA provides:

- (6) The fourth condition is that—
  - (a) on or after 17th March 1998 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
  - (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 17th March 1998) would be capable of enjoying a benefit from the settlement on or after that date.
- (7) Each of the following persons falls within this sub-paragraph—
  - (a) any grandchild of the settlor or of the settlor's spouse or civil partner;
  - (b) the spouse of or civil partner any such grandchild;
  - (c) a company controlled by a person or persons falling within paragraph (a) or (b) above;
  - (d) a company controlled by any such person or persons together with any person or persons (not so falling) each of whom is for the purposes of paragraph 2(1) above a defined person in relation to the settlement;
  - (e) a company associated with a company falling within paragraph (c) or (d) above.

SP 5/92 provides:

37 For the purposes of clarification, this condition deals with “ultra vires” payments, ie cases where one of the persons defined at TCGA 1992 Sch 5 para 9(7) receives a benefit from the trust for the first time and that person is not a beneficiary under the terms of the trust deed. It may also apply where such a person benefits from a transaction with the settlement carried out, for example, under the trustees’ investment powers.

This trigger condition may apply in the case of an ultra vires payment (ie a payment in breach of trust), but only if the payment is in fact a benefit.<sup>13</sup> A transaction under the trustees investment powers is not in principle a benefit, unless perhaps the transaction is a breach of trust, in which case it is not really “under the trustees investment powers”.

## 56.7 Qualifying settlement

Section 86(1) provides:

This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment—

- (a) the settlement is a qualifying settlement in the year;

“Qualifying” settlement is a label for a set of transitional rules.

### 56.7.1 *Post-1991 trust*

This is straightforward. Para 9(1) sch 5 TCGA provides:

A settlement created on or after 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—

- (a) the year of assessment in which it is created, and
- (b) subsequent years of assessment.

## 56.8 Pre-1991 protected trusts

Para 9 continues with a complex grandfathering relief for what statute calls “protected settlements”; although it is generally better to adopt statutory terminology, I refer to these as “**pre-1991 protected trusts**”. That terminology avoids confusion with pre-1998 protected trusts.

Para 9 (1A) sch 5 TCGA provides:

Subject to sub-paragraph (1B) below, a settlement created before 19th

---

<sup>13</sup> See 47.5.11 (“Benefit” in breach of trust).

March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—

- (a) the year 1999–00, and
- (b) subsequent years of assessment.

The relief is in para 1B. Para 9(1B) sch 5 TCGA provides:

Where a settlement created before 19th March 1991 is a protected settlement immediately after the beginning of 6th April 1999, that settlement shall be treated as a qualifying settlement for the purposes of section 86 and this Schedule in a year of assessment mentioned in sub-paragraph (1A)(a) or (b) above only if—

- (a) any of the five conditions set out in subsections (3) to (6A) below becomes fulfilled as regards the settlement in that year; or
- (b) any of those five conditions became so fulfilled in any previous year of assessment ending after 19th March 1991.

In the following discussion:

- (1) A trust qualifying for this relief is a “**pre-1991 protected trust**”
- (2) The conditions in para (a) are the “**s.86 trigger conditions**”. Their effect is that the trust becomes a qualifying settlement, with the consequence that s.86 begins to apply. The drafting technique is different from that used for pre-1998 settlements but the end result is essentially the same.

#### 56.8.1 “*Protected settlements*”

Para 9 sch 5 TCGA provides:

(10A) Subject to sub-paragraph (10B) below, a settlement is a protected settlement at any time in a year of assessment if at that time the beneficiaries<sup>14</sup> of that settlement are confined to persons falling within

---

14 Para 9(10C) defines beneficiary: “For the purposes of sub-paragraph (10A) above a person is a beneficiary of a settlement if—

- (a) there are any circumstances whatever in which relevant property which is or may become comprised in the settlement is or will or may become applicable for his benefit or payable to him;
- (b) there are any circumstances whatever in which relevant income which arises or may arise under the settlement is or will or may become applicable for his benefit or payable to him;
- (c) he enjoys a benefit directly or indirectly from any relevant property comprised in the settlement or any relevant income arising under the settlement.”

some or all of the following descriptions, that is to say—

- (a) children of a settlor or of a spouse or civil partner of a settlor who are under the age of eighteen at that time or who were under that age at the end of the immediately preceding year of assessment;
  - (b) unborn children of a settlor, of a spouse or civil partner of a settlor, or of a future spouse or civil partner of a settlor;
  - (c) future spouses or civil partners of any children or future children of a settlor, a spouse or civil partner of a settlor or any future spouse or civil partner of a settlor;
  - (d) a future spouse or civil partner of a settlor;
  - (e) persons outside the defined categories.
- (10B) For the purposes of sub-paragraph (10A) above a person is outside the defined categories at any time if, and only if, there is no settlor by reference to whom he is at that time a defined person in relation to the settlement for the purposes of paragraph 2(1) above.

The point is that a pre-1991 protected trust may have minor children of the settlor as beneficiaries, but if it is to remain protected, it must exclude them before they become 18.

The trigger conditions are set out at length in para 9.

The relief for pre-1991 trusts was important in its day, and HMRC issued extensive guidance in SP 5/92. The guidance has ceased to be directly important (because there are now few if any pre-1991 protected trusts left) but it is still relevant where similar wording is used elsewhere.

### 56.8.2 *Trigger 1: Providing property*

Para 9(3) sch 5 TCGA provides:

The first condition is that on or after 19th March 1991 property or income is provided directly or indirectly for the purposes of the settlement—

- (a) otherwise than under a transaction entered into at arm's length, and
- (b) otherwise than in pursuance of a liability incurred by any person before that date;

but if the settlement's expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored for the purposes of this condition if the value of the property or income so provided does not exceed the difference between the amount of those expenses and the amount of the settlement's income for the year.

I discuss these conditions in the context of the 2017 protected trust rules, as that is where these issues now arise.<sup>15</sup>

### 56.8.3 *Trigger conditions 2-4*

Trigger condition 2 is the same as the s.86 trigger conditions which apply to pre-1998 protected trusts; it need not be separately set out here.<sup>16</sup>

The third and fourth conditions are based on the s.86 trigger conditions which apply to pre-1998 protected trusts with corresponding amendments in the wording. Para 9 sch 5 TCGA provides:

- (5) The third condition is that on or after 19th March 1991 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.
- (6) The fourth condition is that—
  - (a) on or after 19th March 1991 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
  - (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 19th March 1991) would be capable of enjoying a benefit from the settlement on or after that date.

Para 9(7) sch 5 TCGA provides:

Each of the following persons falls within this sub-paragraph—

- (a) a settlor;
- (b) the spouse or civil partner of a settlor;
- (c) any child of a settlor or of a settlor's spouse or civil partner;
- (d) the spouse or civil partner of any such child;
- (da) any grandchild of a settlor or of a settlor's spouse or civil partner;
- (db) the spouse or civil partner of any such grandchild;
- (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;
- (f) a company associated with a company falling within paragraph

---

15 See 88.5.1 (Gratuitous intent: Disregards (a)(b)); 88.5.3 (Pre-2017 liability: Disregard (f)); 88.5.4 (Expenses: Disregard (g)).

Para 9(3) is the same as para 2A(2)(3); see 56.6.1 (Trigger 1: Providing property).

16 Para 9(4) = para 2A(4); see 56.6.2 (Trigger 2: Emigrating trust).

(e) above.

See 56.6.3 (Trigger 3: Variation of trust); 56.6.4 (Trigger 4: Unexpected beneficiary).

#### 56.8.4 *Trigger 5: Cease to be protected*

Para 9(6A) sch 5 TCGA provides:

The fifth condition is that the settlement ceases to be a protected settlement at any time on or after 6th April 1999.

#### 56.8.5 *Pre-1991 trusts: Critique*

These rules have been in place since 1991. Children then living (or born in the following decade) have reached 18. It is possible to envisage circumstances in which pre-1991 protected trusts could still exist but I suspect that there are no pre-1991 protected trusts now in existence. It is suggested in the interests of simplification that the transitional relief for pre-1991 protected trusts should now be withdrawn.

### 56.9 Trust residence condition

Section 86 TCGA provides:

- (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
  - (b) the trustees of the settlement fulfil the condition as to residence specified in subsection (2) below;

This takes us to s.86(2) TCGA which provides:

The condition as to residence is that—

- (a) there is no time in the year when the trustees are resident in the UK, or
- (b) there is such a time but, whenever the trustees are resident in the UK during the year, they fall to be regarded for the purposes of any double taxation relief arrangements<sup>17</sup> as resident in a territory outside the UK.

Condition (a) is that the trustees are non-resident; condition (b) is that the trustees are UK-law UK resident but treaty-resident in a foreign state with

---

<sup>17</sup> For the meaning of this term, see 11.6.1 (“DTR arrangements” for CGT).

a capital gains article (under the tie-breaker).<sup>18</sup>

## **56.10 Settlor residence/domicile conditions**

Section 86 TCGA provides:

(1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...

(c) a person who is a settlor in relation to the settlement (“the settlor”)

[i] is domiciled<sup>19</sup> in the UK at some time in the year and

[ii] is resident in the UK for the year;

Section 86 does not apply to a foreign domiciled settlor, whether or not they claim the remittance basis. At first sight this seems a surprising inconsistency with the general scheme of taxation of foreign domiciliaries, introduced in 2008. It was however a deliberate decision.<sup>20</sup> No reason was given for it so it is tempting to speculate. Probably it reflects an understanding, which most readers would accept, that it is not appropriate to apply the rules to settlors and trustees from outside the UK because:

(1) the definition of “settlor-interested” for s.86 purposes is too wide, and  
(2) the trigger conditions are too harsh and too complicated,

One must bear in mind that foreign settlors and trustees may not have had the same opportunities to consider UK legislation when making or administering their settlements.

That is actually quite a good reason, though one should not assume that rules of tax law, even important rules, are necessarily enacted with good reasons in mind. Perhaps it was just a concession thrown without much rationalisation, to placate the lobby opposing the 2008 reforms, that is, the true explanation may be located in tax politics rather than tax policy.

Although no claim is needed, the matter should be disclosed on a tax return, if one is completed: see 56.19.1 (Non-domiciled settlor).

## **56.11 Section 86 gains condition**

---

18 For treaty aspects, see 56.20 (DT reliefs: s.86 TCGA).

19 Section 86(3A) TCGA provides: “Section 835BA (deemed domicile) applies for the purposes of subsection (1)(c).” This is the standard wording to apply the deemed domicile rules.

20 The draft clauses which would have amended s.86 were withdrawn.

Section 86 TCGA provides:

- (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
- (e) by virtue of disposals of any of the settled property originating from the settlor, there is an amount on which the trustees would be chargeable to tax for the year under section 1(3) if the assumption as to residence specified in subsection (3) below were made.

I refer to this as the “**s.86 gains condition**”.

#### 56.11.1 *Assumption as to residence*

The assumption as to residence is set out in s.86(3) TCGA but in order to follow it one must read it with s.86(2):

- (2) The condition as to residence is that—
- (a) there is no time in the year when the trustees are resident in the UK, or
- (b) there is such a time but, whenever the trustees are resident in the UK during the year, they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK
- (3) [a] Where subsection (2)(a) above applies, the assumption as to residence is that the trustees are resident in the UK throughout the year; and
- [b] where subsection (2)(b) above applies, the assumption as to residence is that the double taxation relief arrangements do not apply.

In para [b] the assumption is not in fact an assumption “as to residence”: the assumption is a disapplication of treaty relief, but the meaning is clear.

#### 56.11.2 *Ascertaining s.86 gains*

The condition in s.86(1)(e) is that there is an amount, which I call the “**s.86 gains**”. The quantum of the s.86 gains matters because the amount of the charge depends on that.

All the usual CGT reliefs are in principle applicable in computing the s.86 gains. For instance, hold-over relief is available on a transfer to a UK

resident beneficiary, if the usual conditions are satisfied.<sup>21</sup>

Para 1(1) sch 5 TCGA provides:

In construing section 86(1)(e) as regards a particular year of assessment, the effect of section 1K shall be ignored.

This disapplies the trustee annual exemption (which is fair, because the settlor has their own annual exemption).

## **56.12 Death of settlor**

Section 86 TCGA provides:

(1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...

(f) paragraph 3, 4 or 5 of schedule 5 does not prevent this section applying.

This sets out three conditions which are best considered separately.

Para 3 sch 5 TCGA provides:

Section 86 does not apply if the settlor dies in the year.

What is the reason for this rule? Presumably it was thought unfair to tax the settlor's estate on post-death gains, and too much trouble to split the year into disposals before/after the death.

## **56.13 Death/divorce of beneficiaries**

The last two s.86 conditions are set out in paras 4 and 5 sch 5 TCGA:

4(1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for one of the following reasons, namely, that—

- (a) property is, or will or may become, applicable for the benefit of or payable to one of the persons falling within para 2(3)(b) to (db) above,
- (b) income is, or will or may become, applicable for the benefit of or payable to one of those persons, or
- (c) one of those persons enjoys a benefit from property or income.

(2) This paragraph also applies where sub-para (1) above is fulfilled by virtue of 2 or all of paras (a) to (c) being satisfied by reference to the same person.

(3) Where this paragraph applies, section 86 does not apply if the person concerned dies in the year.

---

21 See HMRC Helpsheet 295 quoted at 57.6.1 (s.1(3) amount: Exemptions/reliefs).

- (4) In a case where—
- (a) this paragraph applies, and
  - (b) the person concerned falls within para 2(3)(b), (d) or (db) above, section 86 does not apply if during the year the person concerned ceases to be married to, or a civil partner of, the settlor, child or grandchild concerned (as the case may be).
- 5 (1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for the reason that there are 2 or more persons, each of whom—
- (a) falls within para 2(3)(b) to (db) above, and
  - (b) stands to gain for the reason stated in sub-para (2) below.
- (2) The reason is that—
- (a) property is, or will or may become, applicable for his benefit or payable to him,
  - (b) income is, or will or may become, applicable for his benefit or payable to him,
  - (c) he enjoys a benefit from property or income, or
  - (d) 2 or all of paras (a) to (c) above apply in his case.
- (3) Where this paragraph applies, section 86 does not apply if each of the persons concerned dies in the year.

I cannot see the point of this, though it does offer a kind of symmetry with para 3. I doubt if it ever has or ever will apply.

#### **56.14 s.86 gains attributed to settlor**

Assuming all eight fundamental s.86 conditions are satisfied, we proceed to s.86(4) TCGA which provides:

- Where this section applies—
- (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor
    - [i] in the year
    - [ii] or if, as respects the settlor, the year is a split year, in the UK part of that year ...

Thus there is no split-year relief.<sup>22</sup>

#### **56.15 Interaction of s.86/s.3 TCGA**

Suppose a settlor-interested trust within s.86 TCGA owns a non-resident company within s.3 TCGA, and a gain accrues to the company. The gain is treated as accruing to the trustees. In the absence of express provision,

---

<sup>22</sup> See ? (When no split-year relief).

this gain would not fall within s.86 because the s.86 gains condition would not be satisfied: the gain does not accrue “by virtue of disposals of any of the settled property”.<sup>23</sup> The company property is not settled property. Para 1(3) sch 5 TCGA deals with this:

In a case where—

- (a) the trustees are participators in a company in respect of property which originates from the settlor, and
- (b) under section 3 gains or losses would be treated as accruing to the trustees in a particular year of assessment by virtue of so much of their interest as participators as arises from that property if the assumption as to residence specified in section 86(3) were made,

the gains or losses shall be taken into account in construing section 86(1)(e) as regards that year as if they had accrued by virtue of disposals of settled property originating from the settlor.

Section 3B(1) to (3) shall apply for the purposes of this sub-paragraph as they apply for the purposes of that section.

## **56.16 Corporate settlor**

Section 86 TCGA will not apply to a company which creates a settlor-interested settlement, for the following reasons (any one would suffice):

- (1) In the case of a commercial trust, the company is not a settlor.<sup>24</sup>
- (2) Even assuming a trust made with bounty/gratuitous intent:
  - (a) In the case of a close company, those who control it will usually be settlors, and the company will not be a settlor.<sup>25</sup>
  - (b) Even if the company is a settlor:
    - (i) Section 86 only applies if the company settlor is resident and domiciled (ie incorporated) in the UK, which is not likely to be the case.
    - (ii) The context suggests that only individual settlors are intended to be caught.

## **56.17 s.86/87 & BAD relief interaction**

---

23 See 56.11 (Section 86 gains condition).

24 See 94.39 (Pension/employee benefit trust).

25 See 94.40.1 (Co settlor: s.86 definition).

This section considers whether business asset disposal relief<sup>26</sup> (formerly called “entrepreneurs’ relief) is available on a disposal by a non-resident trust, within s.86, assuming all the relevant conditions are satisfied (so that a disposal by a UK resident trust would qualify for the relief).

Section 169N TCGA provides (so far as relevant):

- (1) Where a claim is made in respect of a qualifying business disposal—
  - (a) the relevant gains (see subsection (5))<sup>27</sup> are to be aggregated, and
  - (b) any relevant losses (see subsection (6)) are to be aggregated and deducted from the aggregate arrived at under paragraph (a).
- (2) The resulting amount is to be treated for the purposes of this Act as a chargeable gain accruing at the time of the disposal to the individual or trustees by whom the claim is made.
- (3) The rate of capital gains tax in respect of that gain is 10%, but this is subject to subsections (4) to (4B)...<sup>28</sup>
- (9) Any gain or loss taken into account under subsection (1) is not to be taken into account under this Act as a chargeable gain or an allowable loss.

The technical question is whether the gains which are treated as accruing to the settlor are the same gains as the gains accruing to the trustees. It is considered that one should apply a purposive construction so that the relief is available.<sup>29</sup> If that were wrong, UK law would not be EU-law compliant, which would give a further defence if the trustees were resident in a MS.

However if it is possible to make the trust UK resident in the year of the disposal, that would be better, as the issue would not arise.

On the other hand, BAD relief is probably not available if the trust is within s.87, as the s.87 gain accruing to a beneficiary is not the same

26 See 53.17 (BAD relief: Remittance basis).

27 Section 169N(5) TCGA provides: “In subsection (1)(a) “relevant gains” means—  
 (a) if the qualifying business disposal is of (or of interests in) shares in or securities of a company (or both), the gains accruing on the disposal (computed in accordance with the provisions of this Act fixing the amount of chargeable gains), and  
 (b) otherwise, the gains accruing on the disposal of any relevant business assets comprised in the qualifying business disposal (so computed).”

28 Subsections (4) to (4B) impose a £10m cap which need not be considered here.

29 A similar issue arises for DTAs; see 56.20.1 (Trustees treaty-resident outside UK).

gain.<sup>30</sup>

## **56.18 Section 86: EU-law compliance**

Section 86 TCGA constitutes a restriction on FoE where the settlor is a MS national.<sup>31</sup>

In *Olsen* the EFTA Court considered a rule under which beneficiaries of an offshore trust were taxed on its income. This was described as a CFC rule, though there would not be a CFC in the UK law sense. The court said:

140 It is not contested that a rule ... which provides that those who hold an interest in a legal entity, such as the beneficiaries of Ptarmigan Trust, are made liable to tax whether or not any funds have been distributed to them, does not have an equivalent in any domestic situation where the beneficiary is a separate taxable individual or legal person from the party which holds the profits and both parties are resident in Norway. ... this rule only applies to taxpayers who benefit from independent undertakings or capital assets domiciled in low-tax countries in the manner described in the provision.

141 That difference in treatment creates a tax disadvantage for the resident taxpayers who are subject to the legislation on CFCs. They are hindered in exercising their right of establishment because they are dissuaded from establishing, acquiring or maintaining an undertaking in another EEA State in which the latter is subject to low levels of taxation. That differential treatment constitutes a restriction on the freedom of establishment, amounting to discrimination, within the meaning of Articles 31 and 34 EEA.

142 The circumstance that trusts are not recognised as separate taxable entities under Norwegian law cannot itself justify a difference in treatment, since, as the company law of the EEA States has not been fully harmonised at EEA level, that would deprive the freedom of establishment of all effectiveness.<sup>32</sup>

143 Furthermore, it is not relevant for the purposes of finding a restriction that taxpayers in Norway do not pay more tax on the profit of a CFC under the Tax Act than would be due were the trust or legal entity established in Norway. The fact remains that the taxpayers ... are

---

30 See 57.60.1 (Trustees treaty-resident outside UK).

31 See 102.9 (“Establishment”).

32 The court cited: Case C-303/07 *Aberdeen Property Fininvest Alpha* para 50.

taxed on the profits of another legal person, which is not the case for resident taxpayers in Norway who hold interests in separate domestic legal entities.<sup>33</sup>

It would now seem difficult to defend s.86 as EU-law compliant.

## **56.19 Tax return: s.86 gains/non-dom status**

### 56.19.1 *Non-domiciled settlor*

This section considers the position where gains accrue to a settlor-interested trust, but s.86 does not apply because the settlor is not UK domiciled.

If the settlor claims the remittance basis, and submits a tax return, they will have completed the relevant boxes in SA109 and no further return or disclosure is necessary.<sup>34</sup>

If the settlor does not claim the remittance basis, but does submit a tax return, then:

- (1) It is necessary to tick box 23 in form SA109 (2019/20). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for 2019–20, put 'X' in the box. Please explain in box 40 how your domicile is relevant to your Income Tax or Capital Gains Tax liability.* (There are further relevant boxes if this is the first domicile claim).
- (2) It is not necessary to tick box 8 in form SA100 (2019/20). The caption by this box reads: *Residence, remittance basis etc. Were you, for all or part of the year to 5 April 2020, one or more of the following – not resident, not domiciled in the UK and claiming the remittance basis, or dual resident in the UK and another country?*

If the settlor does not submit a tax return (because HMRC have not sent a notice to submit the return, and there are no income/gains requiring a return) then no claim or notification is needed.

### 56.19.2 *UK domiciled settlor*

Helpsheet HS299 (Non-resident trust and Capital Gains Tax) 2020

---

33 The court cited: *Cadbury Schweppes* para 45.

34 See 117.4 (Claim made in return).

provides:

If you're liable to tax when gains arise to one or both of the non-resident trustees of your trust and to relevant overseas private companies in which they invest, the trustees' net chargeable gains are attributed to you. You should include them in the overall figure in box 17 on your Capital Gains Tax summary pages. You should include details of these gains in your computations accompanying these pages.

If you're liable to Capital Gains Tax as a beneficiary (whether or not you are also the settlor), because you directly or indirectly receive capital or some other benefit from the trust, then, details of such gains should be set out in a computation accompanying the Capital Gains Tax summary pages and the amount included in box 18. If you make an entry in box 18, see Beneficiaries receiving capital payments from non-resident trust (Self Assessment helpsheet HS301).

## **56.20 DT relief: s.86 gains**

### *56.20.1 Trust treaty-resident outside UK*

Assume the fundamental conditions in s.86(1) TCGA are satisfied. Section 86(4) TCGA provides:

Where this section applies—

- (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year ...

In the HMRC view, the fact that the trustees are treaty-resident in a foreign state with standard form DTA CGT relief does not allow the settlor to claim third-party relief from s.86.<sup>35</sup>

HMRC raise two arguments in the Manuals. The first is a categorisation, *Bricom*-type argument.<sup>36</sup> The CG Manual provides:

#### **38208 Double taxation relief [Jan 2015]**

The gain which is chargeable on the settlor is not the same gain as that which accrues to the trustees, but only an amount equivalent to that gain.

---

35 See 103.21 (Third-party DT relief).

36 See 103.22 (Characterisation).

Therefore articles in particular Double Taxation agreements, under which chargeable gains from the alienation of particular property are exempt from UK tax, will not operate to exempt the settlor from liability under TCGA Section 86.

I think this argument is doubtful. However HMRC have a better argument, on which the CG Manual provides a hint. The Manual first explains why DT relief did apply to the former s.77 TCGA<sup>37</sup> when trustees were treaty-resident in a foreign state with a capital gains article:

**34912. Double taxation relief** [Jul 2019]

A settlor may be able to claim exemption [from s.77 TCGA] on some or all of the attributed trust gains, but this depends on the terms of the particular double taxation agreement. The gain which is chargeable on the settlor is not the same as the gain which accrues to the trustees. Therefore Articles which exempt trustees from UK tax on gains accruing on the disposal of particular property do not necessarily operate to exempt the settlor from liability under Section 77. However section 77(1)(b) requires there to be an amount on which the trustees would have been chargeable for the year in respect of the gains in question. So if the correct interpretation of the Double Taxation Agreement by reference to the relevant acts is that the trustees would be exempt if they were chargeable then there is no liability.

HMRC say this argument does not run for s.86 because the legislation is differently worded:

This is by way of contrast with section 86 where there is a hypothesis in subsections (1)(e)(i) and (3) that the trustees are in fact resident in

---

37 Section 77(1) TCGA (now repealed) provided, so far as relevant:

- (1) Where in a year of assessment—
- (a) chargeable gains accrue to the trustees of a settlement from the disposal of any or all of the settled property,
  - (b) after making any deduction provided for by section 2(2) in respect of disposals of the settled property there remains an amount [now, s.1(3)] on which the trustees would be chargeable to tax for the year in respect of those gains ... and
  - (c) at any time during the year the settlor has an interest in the settlement,
    - [i] the trustees shall not be chargeable to tax in respect of those gains but
    - [ii] instead chargeable gains of an amount equal to that referred to in para (b) shall be treated as accruing to the settlor in that year.

determining whether the section applies<sup>38</sup> and therefore one cannot take into account the actual non-residence. Compare *Bricom Holdings v CIR* 70 TC 272.

But this is not necessarily right; see 57.60.1 (Trustees treaty-resident outside UK) for the discussion on s.87.

Another argument is that s.86(3) envisages a charge in a case where trustees are dual resident in the sense of being UK-law UK resident but treaty-resident in a foreign state. In that case the treaty is intended to be overridden. By implication the same should apply where the trustees are treaty-resident in a foreign state and not UK resident at all.

HMRC accept that foreign tax credit relief is available. The CG Manual provides:

**38208 Double taxation relief** [Jan 2015]

... Where, however, the particular article provides for the allowance, as a credit, of overseas tax payable on gains, that tax can be allowed as a credit. This is because UK tax is computed by reference to the same chargeable gains in respect of which the overseas tax is computed. If there is no Double Taxation agreement, then unilateral relief is available on the same basis.

56.20.2 *Settlor treaty-resident outside UK*

Suppose the settlor is UK-law UK resident but treaty-resident in a foreign state. Can the settlor claim direct relief? The point is the same as for s.3 gains. Art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, the settlor does not qualify for treaty relief because (though treaty non-resident) the settlor is not the alienator. The trustees are the alienator but (on the facts of this example) the trustees are not treaty non-resident. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to a settlor who is treaty-resident in the US.<sup>39</sup> Even under OECD Model, the same result is arguable on the grounds that the gain is treated as accruing to the settlor, they should be

---

38 See 56.11 (Section 86 gains condition).

39 See 87.7.8 (s.624/720 income; s.3/86 gain).

deemed to be the alienator; or the word “alienator” does not require that one must alienate property, only that the gain on the alienation accrues to the person.

### 56.20.3 *Trust co treaty-resident outside UK*

If a non-resident trust within s.86 owns a treaty non-resident company which realises a gain, DT relief is disallowed and the settlor is taxable; see 60.39 (Trust participator: No DT relief).

## 56.21 **Restriction on DTR for s.86 gains**

It is easier to understand the legislation if one bears in mind the tax avoidance schemes it was intended to block.

Suppose a non-resident settlor-interested trust within s.86 TCGA. The trustees would take two steps:

- (1) arrange to dispose of an asset at a time when they are treaty-resident in a foreign state with a DTA with a CG article; and
- (2) become UK resident later in the same tax year.

In the absence of an anti-avoidance rule, this works as

- (1) s.86 does not apply and
- (2) the trustees (although within the charge to CGT) may claim DTR.<sup>40</sup>

This scheme is counteracted by s.83A TCGA.

(1) This section applies if a chargeable gain accrues to the trustees of a settlement on the disposal by them of an asset in a year of assessment and the trustees—

- (a) are within the charge to capital gains tax<sup>41</sup> in that year of assessment, but
- (b) are non-UK resident at the time of the disposal.

The expression “non-UK resident” in (b) is defined in s.83A(4) TCGA:

40 The reader may have considered a similar arrangement where the non-resident trust was not within s.86 but is within s.87. In the absence of an anti-avoidance provision, the same steps would be taken in order to avoid a s.1(3) amount. But this is caught by s.88 TCGA; see 57.38 (Dual resident trust: s.88 TCGA).

41 Section 83A(3) gives this expression a commonsense definition:

“For the purposes of this section the trustees of a settlement are within the charge to capital gains tax in a year of assessment—

- (a) if, during any part of that year of assessment, they are resident in the UK and not Treaty non-resident”.

For the purposes of this section the trustees of a settlement are non-UK resident at a particular time if, at that time,—

- (a) they are not resident in the UK, or
- (b) they are resident in the UK but are Treaty non-resident.

This is a slightly artificial definition, but it is difficult to think of a better label.

If these conditions are satisfied, s.83A(2) TCGA overrides DT relief:

Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing the trustees from being chargeable to capital gains tax (or as preventing a charge to tax arising, whether or not on the trustees) by virtue of the accrual of that gain.

EN FA 2005 explains the words in brackets:

4. Subsection (2) of section 83A has effect to provide that where section 83A applies, nothing in the terms of any Double Taxation Agreement (DTA) can be read as preventing the trustees being chargeable to capital gains tax, or of preventing a charge to tax arising (whether on the trustees or another person), by virtue of the accrual of the gain.

5. The reason for the reference to “another person” in paragraph 4 above is that, in certain circumstances where the trustees of a settlement are within the charge to capital gains tax in a tax year, the rules in section 77 TCGA provide that the trustees do not actually suffer a tax charge in respect of chargeable gains which arise to them on the disposal of settled property which originates from a UK resident or ordinarily resident settlor who has an interest in the settlement at any time in the year. Chargeable gains are instead treated as arising to the settlor, who is then chargeable to tax in respect of them.

Now that s.77 has been repealed, the words in brackets in s.83A(2) should be repealed, as they can never apply, but they do no harm. Section 83A is still needed in order to deal with the s.86 scheme.

Section 83A is somewhat wider than it needed to be in order to deal with these two schemes, and considerable care is needed where trustees become or cease to be treaty non-resident, but in practice difficulties are fairly rare.

## CHAPTER FIFTY SEVEN

# CAPITAL PAYMENTS FROM NON-RESIDENT TRUSTS: s.87

57.1

### *Cross references*

The following topics are considered elsewhere:

- 56.17 (s.86/87 & BAD relief interaction)
- 60.21.5 (Interaction of s.3 distribution relief and s.87, 86)
- 61.13 (Loss of non-resident trustees)
- 61.14 (Personal loss of beneficiary not set against s.87 gain)
- 54.30.2 (UK-land gain outside s.86/87)

For s.87 gains accruing to charity, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations*.<sup>1</sup>

### **57.1 s.87 regime: Introduction**

This chapter considers the CGT charge on beneficiaries who receive capital payments from non-resident trusts. I call this the “**s.87 regime**”. The charge in s.87 TCGA is supplemented by a further charge in s.89 TCGA, but I use the expression “s.87 regime” loosely to refer to both charges.

There are *four* versions of the s.87 regime:

<b>Version</b>	<b>Applies</b>	<b>See para</b>
Standard s.87 regime	Generally	<i>Discussed here</i>
Sch4C s.87 regime	After sch4B-transfer	58.14
<i>Modified regimes for offshore income gains</i>		
Modified standard regime for OIGs		64.13
Modified sch4C regime for OIGs		58.27

---

1 12<sup>th</sup> ed, 2019/20, Chapter 32 (Payments to Charity from Non-Resident Trusts)  
online version <http://www.taxationofcharities.co.uk>

The result is so intricate that no written description could do justice to its complexities.

The rules were introduced in 1981, extended in 1998, extended and rewritten in 2008, and extended again in 2017.

In the following discussion:

The “**pre-2008 s.87**” means s.87 as it was before the 2008 amendments.

The “**s.87 guidance note**” means HMRC’s 54-page guidance note entitled “FA 2008 changes to the CGT charge on beneficiaries of non-resident settlements”.<sup>2</sup>

## 57.2 “Settlement”/“settled property”

Section 97(7) TCGA provides:

In sections 86A to 96 and Schedule 4C and in this section—  
 “settlement” has the meaning given by section 620 of ITTOIA 2005,  
 and  
 “settled property” and references (however expressed) to property  
 comprised in a settlement shall be construed accordingly.

“Settlement” here means settlement-arrangement.<sup>3</sup>

The estate of a deceased person is not a settlement-arrangement.<sup>4</sup>

## 57.3 Non-classic trust

In practice, s.87 is normally concerned with trusts in the classic sense. But a settlement-arrangement need not be a classic trust. In this section I refer to that as a “settlement” with scare quotation marks.

### 57.3.1 *Non-classic trust: trustee*

A classic (trust-law) trust must have trustees. A problem arises if one needs to identify trustees of a “settlement” which is not a trust in the classic (trust-law) sense. Such an entity is not likely to have trustees in the usual (trust-law) sense. However one needs to identify trustees:

(1) For s.87 purposes:

---

2 First published May 2009, 2nd version October 2009,  
<http://webarchive.nationalarchives.gov.uk/20140109143644/http://www.hmrc.gov.uk/cnr/beneficiaries-non-resident.pdf>

3 See 1.5 (Settlement-arrangement definition of settlement).

4 See 84.8.1 (Is estate a “settlement” for s.87).

- (a) To ascertain trust residence<sup>5</sup>
- (b) To identify s.1(3) amounts (trust gains), which are the amounts on which “the trustees of the settlement” would be chargeable to tax under s.1(3) TCGA if they were resident in the UK
- (2) For IHT purposes: to ascertain who is liable for IHT
- (3) For the definition of connected person<sup>6</sup>

There is a standard-form definition which addresses this issue. I deal with it here as the s.87 context is the most important.

The CGT/IHT provisions are conveniently read side by side as they are effectively identical:

**s.97(7A) TCGA**

In this section, sections 86A to 96 and Schedule 4C “trustee”, in relation to a settlement [settlement-arrangement] in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested ...<sup>7</sup>

**s.45 IHTA**

In this Act “trustee”, in relation to a settlement [IHT definition] in relation to which there would be no trustees apart from this section, means any person in whom the settled property or its management is for the time being vested.

It is helpful to coin some terminology, and in this book:

The “**deemed-trustee rule**” is the rule in s.97(7A) TCGA/s.45 IHTA<sup>8</sup>  
A “**trust-law trustee**” is a trustee in the usual (trust-law) sense

5 See 57.4 (Non-resident settlement condition).

6 See 99.14.2 (“Settlement”/“trustee”).

7 Section 97(7A) was introduced by para 15 sch 12 FA 2006. Para 15(3) provides: “This paragraph shall come into force on 6th April 2006 (in relation to settlements whenever created).”

This raises the interesting possibility that s.87 did not apply to a Foundation before 2006 as a Foundation has no “trustees” in the normal (trust law) sense. So pre-2006 gains would not be s.1(3) amounts (trust gains). But it is suggested that the context shows that the word “trustee” should be construed widely enough to include a Foundation (bear in mind that the word “settlement” has the wide and artificial meaning of settlement-arrangement). Section 97(7A) is only for the avoidance of doubt and pre-2006 law was the same as now.

8 The definition also crops up by mistake in the definition of relevant person for remittance purposes; see 17.5 (Relevant person: Trusts).

A “**deemed trustee**” is a trustee in the extended sense (where there would be no trustees apart from the deemed-trustee rule)

Section 97(7A) TCGA continues:

(and a person who is treated as a trustee of the settlement by virtue of this subsection shall be treated as a trustee of the settlement for the purposes of section 69).

Thus for CGT purposes the distinct-person fiction,<sup>9</sup> and the standard IT/CGT test of trust residence, apply to the deemed trustee.

### 57.3.2 *Outright transfer: s.87*

Suppose P gives an asset<sup>10</sup> outright to C. There is no classic trust, but there is a “settlement”.<sup>11</sup>

No-one thinks s.87 would apply to this “settlement”, but it is helpful to ask why not, as the answer is relevant for analysis of other cases.

The “settlement” has no trust-law trustees. There will be a deemed trustee, namely, C, on the basis that the property is vested in C and the management, generally, is also vested in C.<sup>12</sup>

Section 87 does not apply here because:

- (1) There are no s.1(3) amounts (trust gains): no gains accrue to the deemed trustee in their capacity as trustee. On a disposal of the asset, gains accrue to C in C’s private capacity.
- (2) There can be no capital payments (benefits) from the “settlement”.

This fits the scheme of the legislation. There is no need for the s.87 rules: a disposal of the asset constitutes a disposal by C, on which gains accrue to C. The purpose of s.87 is to deal with cases where gains (trust gains) do not accrue to beneficial owners.

### 57.3.3 *Usufruct: s.87*

A usufruct<sup>13</sup> is not a classic trust but it is a “settlement”.

---

<sup>9</sup> See 6.3 (Trustees a distinct person).

<sup>10</sup> Assume the asset is not a non-resident company, which raises further issues discussed below.

<sup>11</sup> See 1.5 (Settlement-arrangement definition). The main significance is that if C is a child of P, and under 18, P will be taxed on the income arising under the “settlement”.

<sup>12</sup> It makes no difference if the property is vested in a nominee for C, because of the CGT bare trust disregard in s.60 TCGA; see 1.7 (Bare trust/nomineeship).

<sup>13</sup> See 86.16 (Usufructs).

The “settlement” has no trust-law trustees.

Section 87 TCGA does not apply to this “settlement”, for the following reasons:

- (1) There is no settled property. There are two items of property, one belonging to the usufructuary and the other belonging to the encumbered owner.
- (2) There is arguably no deemed trustee as there is no one person in whom the property or its management is vested.

If (contrary to the above) there was a deemed trustee, the analysis of an outright transfer becomes applicable:

- (3) No gains accrue to the deemed trustees: on a disposal of the usufruct property, gains accrue to the usufructuary and the encumbered owner in their private capacities. So there are no s.1(3) amounts (trust gains).
- (4) There are no capital payments from the trustees.<sup>14</sup>

This fits the scheme of the legislation. There is no need for the s.87 rules: a disposal of the usufruct property constitutes disposals by the usufructuary/encumbered owner of their respective interests, on which gains accrue to them.

Points (1) and (2) also support the view that a usufruct is not a settlement in the IHT sense. While the concept of IHT-settlement includes non-trust arrangements which are equivalent in effect to a trust, IHT assumes that a settlement has a trustee and settled property, and if an entity does not, then it should not be regarded as a settlement for IHT purposes.

#### *57.3.4 s.87/s.3 relationship*

Suppose P gives a non-resident company to C outright. There is no classic trust, but there is a “settlement”. No-one thinks s.87 would apply to this “settlement”, but it is helpful to ask why not, as the answer is relevant for analysis of other cases.

The “settlement” has no trust-law trustees. Who is the deemed trustee?

- (1) Perhaps C is the deemed trustee, on the basis that the property here should be taken to be the shares. In that case the analysis is like any other

---

<sup>14</sup> In particular, the termination of the usufruct is not a capital payment.

gift to C.<sup>15</sup>

(2) Perhaps the company is the deemed trustee, on the basis that the company's property and its management is vested in the company. In that case, the answer may be that there can be no capital payments (benefits) from the "settlement".

More fundamentally, the non-resident company falls within s.3 TCGA. As a general principle, one cannot apply s.3 *and* s.87 rules, because of the presumption against double taxation.

### 57.3.5 Foundations: s.87

After some vacillation, the analysis adopted in this book is that:

- (1) A Foundation is in principle a trust within the standard IT/CGT definition and a settlement-arrangement.
- (2) A Foundation is not a company.<sup>16</sup>

It may be said that the "settlement" has no trust-law trustees. If so, there will be a deemed trustee, namely, the Foundation itself, on the basis that the property and its management is vested in the Foundation.<sup>17</sup>

On this analysis, the s.87/s.3 overlap or border issue does not arise.

However another possible view is that:

- (1) A Foundation is not a trust, in the standard IT/CGT sense, and
- (2) A Foundation *is* a company.

As a Foundation is in principle a "settlement" (it is an arrangement) the question would then arise whether one would apply s.87 or s.3.

In order to apply s.87, one needs to identify the s.1(3) amount, ie the amount on which the deemed trustees would be chargeable under s.1(3) if they were UK resident. The Foundation (if UK resident) would be subject to CT, on the basis that it is a company and not a trust. So at first sight, the amount chargeable under s.1(3) would be nil! But there are two

<sup>15</sup> See 63.3.2 (Outright transfer: s.87).

<sup>16</sup> See 86.9 (Stiftung/Foundation). Different considerations apply to a Foundation with Founder's Rights.

<sup>17</sup> I have considered whether the members of the board of the Foundation may be a deemed trustee on the basis that the management of the property is vested in them; but the board is simply an organ of the Foundation itself. Where a company is a trustee, no-one says that its directors are trustees. Also no gains can be said to accrue to the directors.

answers to this:

- (1) Section 97(7A) applies the distinct-person fiction, so the deemed trustees are a separate person which is not a company.
- (2) One does not apply the deeming to that extent.<sup>18</sup>

So s.87 can apply to a Foundation even if (contrary to the view taken here) it were held to be a company and not a trust.

It is considered that the context shows that s.87 should apply in priority to s.3. This fits the scheme of the legislation, as apportioning trust gains to participators would be extremely difficult.

Different considerations apply to a Foundation with Founder's Rights. That is a company within s.3, and not a settlement. Gains accruing to the Foundation would be attributable to the founder and no-one else.<sup>19</sup>

Note incidentally that this analysis will sometimes favour HMRC and sometimes not; this is not a case where one analysis will benefit HMRC and the other the taxpayer.

#### **57.4 Non-resident trust condition**

Section 87(1) TCGA sets out the fundamental condition for the application of s.87:

This section applies to a settlement for a tax year ("the relevant tax year") if there is no time in that year when the trustees are resident in the UK.

Statute often refers to a settlement "to which s.87 applies"; this means (in short) a non-resident settlement. In full, it means:

- (1) a non-resident settlement; or
- (2) a dual resident settlement (more accurately, UK-law UK resident, but treaty non-resident under the tie-breaker).<sup>20</sup>

It is not necessary for the settlement to be in existence at the time when a capital payment is received.<sup>21</sup>

#### **57.5 The s.87 charge**

---

18 See App 7.1 (Construction of deeming provisions).

19 See 86.9.10 (Founder's Rights: a company).

20 See 57.38 (Dual-resident trust: s.88 TCGA).

21 *Bowring v HMRC* [2015] UKUT 550 (TCC) at [65] - [71].

Section 87(2) TCGA provides:

- [a] Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement
- [b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
- [c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.1(3) amount for the relevant tax year or any earlier tax year.

The key requirements are “capital payment” “s.1(3) amount” and “matching”.

I refer to gains treated as accruing as “**s.87 gains**”. The term “deemed gains” is sometimes used, but my terminology is clearer.

A s.87 gain accrues in the year that a capital payment is matched with a s.1(3) amount. That may be later than the year that the capital payment is made.

Section 87 is not strictly a charging section, it feeds into s.2 TCGA which imposes the charge. But I use the expression “s.87 charge” as a convenient shorthand.

## 57.6 Section 1(3) amount

Section 87(4) TCGA provides:

The s.1(3) amount for a settlement for a tax year for which this section applies to the settlement is—

- (a) the amount upon which the trustees of the settlement would be chargeable to tax under s.1(3) for that year if they were resident in the UK in that year ...<sup>22</sup>

The terminology has changed over time:

Date	Term
1981-2008	Trust gains
2008-2018	s.2(2) amount
2018 -	s.1(3) amount

“s.1(3) amount” has more or less the same meaning as the term “trust gains” in the pre-2008 s.87. The old terminology was clearer, and EN FB 2008 itself used the term “trust gains”. It is usually better to adopt

---

22 For s.87(4)(b) see 57.6.2 (s.86 gain deducted).

statutory terminology, rather than using a different term with the same meaning but the term “s.1(3) amount” is opaque, so I use the phrase “s.1(3) amounts (trust gains)” or just “trust gains”.

Some practitioners use the term “stockpiled gains” or describe a trust as having a pool of s.1(3) amounts.

Strictly one should not use the term “s.1(3) amount” in the abstract. A s.1(3) amount can exist only in relation to a particular settlement, and for a particular tax year. That is, each s.1(3) amount is linked to a specific trust and a specific tax year. But where the context is clear it is permissible to refer to a s.1(3) amount in isolation (leaving the words “for a settlement and tax year” to be inferred). The expression “s.1(3) amounts” (in the plural) is used where there are s.1(3) amounts for more than one tax year.

Section 87(5) TCGA provides:

The s.1(3) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.

This makes sense, of course, since if s.87 does not apply the trustees must be UK resident and within the scope of CGT.

The s.87 guidance note provides:

10. Section 87(5) provides that the section 2(2) amount for a year in which section 87 does not apply is nil. In particular this is needed to deal with transfer between settlements. The transferee settlement may have a section 2(2) amount for a year in which the trustees were resident in the UK. Section 87(5) ensures no account is taken of that amount. But it can still be treated as having a section 2(2) amount for that year from the transferor settlement.

#### *57.6.1 s.1(3) amount: Exemptions/reliefs*

All the usual CGT reliefs are in principle available for computing the s.1(3) amount.

For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied. HMRC accept this. Helpsheet 295 (Relief for gifts and similar transactions (2020) provides:

There’s no need for the transferor to be resident in the UK. Therefore the relief is available for trustees of non-resident settlements where the chargeable gain would, or might otherwise be, charged on UK

residents.<sup>23</sup>

What about the CGT annual exemption? The CG Manual provides:

**CG38610: Trustees' gains - section [1(3)] amount** [Nov 2019]

The trustees do not have an annual exempt amount which is deducted in calculating the section [1(3)] amount.

And again:

9. ... section 2(2) amount. This is defined in section 87(4). It is the amount on which the trustees would be liable to CGT if they had been resident and ordinarily resident in the UK during the year. As in the original section 87 this is the amount of the gains after deducting losses and without giving any annual exempt amount.<sup>24</sup>

The last sentence is wrong as s.1K(1) TCGA (extended to trustees by sch 1C TCGA) provides: “the annual exempt amount for the year is to be deducted from” trustees gains.<sup>25</sup> So “the amount upon which the trustees would be chargeable to tax under s.1(3) for that year if they were resident” is reduced by the exempt amount.

The courts might disapply the plain words if the result were absurd, but it is not absurd. There may be an element of double relief as beneficiaries may have their own annual exemption. This rule is nevertheless sensible because it saves trustees from having to keep track of small gains (and it avoids non-compliance so far as one could not reasonably expect trustees to actually do so). Of course, there is not much tax at stake here. Perhaps the author confused the position for s.86, where the trustee annual exemption is disappplied.<sup>26</sup>

Other non-resident trusts are not grouped for the purpose of ascertaining the annual exemption.<sup>27</sup> That might allow scope for fragmentation, but costs (and from 2013, the GAAR) prevent abuse.

UK land rebasing does not apply in computing s.1(3) amounts (trust gain) as it must be assumed that the trust is UK resident.<sup>28</sup>

---

23 For instance, the gain might be charged under s.86 or s.87 TCGA.

24 Section 87 guidance note, para 9.

25 See 41.2.4 (Annual exemption: Trusts).

26 See 56.11 (Section 86 gains condition).

27 See 41.2.5 (Grouped trusts).

28 See 54.16 (General rebasing conditions).

For 1981/1988/2008 transitional rules, see 57.40 (Pre-1981 gain/capital payment) ff.

### 57.6.2 *s.86 gain deducted*

In the absence of relief, a gain accruing to a trust may be:

- (1) a s.86 gain taxed on the settlor and
- (2) a s.1(3) amount (trust gain)

Section 87(4)(b) TCGA provides relief for s.87 and so prevents double taxation. It is necessary to read the whole of s.87(4) in order to follow the sense:

The section 1(3) amount for a settlement for a tax year for which this section applies to the settlement is—

- (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 1(3) for that year if they were resident in the UK in that year, or
- (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

In short, s.86 in principle has priority over s.87. This applies even if the settlor does not pay the tax which is due under s.86. That rule seems generous at first sight. But it makes sense, as it is not practical for beneficiaries to check whether or not the settlor is tax compliant.

## 57.7 **Capital payment**

### 57.7.1 “*Capital payment*”

“Capital payment” is defined in s.97(1) TCGA:

In sections 86A to 96 and Schedule 4C and this section “capital payment” —

- (a) means any payment which is neither—
- (i) chargeable to income tax on the recipient, nor
  - (ii) chargeable to income tax on another person under any of sections 643A, 643J and 643L of ITTOIA 2005 and sections 733A, 733C and 733E of ITA 2007,
- or, in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

Section 731 ITA has similar rules. For the interaction with s.731, see 47.17 (s.731/s.87 interaction).

### 57.7.2 “Payment”

Section 97(2) TCGA provides:

- In subsection (1) above references to a payment include references to
- [a] the transfer of an asset and
  - [b] the conferring of any other benefit, and to
  - [c] any occasion on which settled property becomes property to which s.60 applies.

For the meaning of benefit, see 47.5 (Benefit).

### 57.7.3 Termination of settlement

The termination of a settlement constitutes a capital payment, so any s.1(3) amounts at that time will be attributed to the beneficiaries who become entitled to the trust property: s.97(2)[c] TCGA.

This rule should not, in practice, affect well drafted settlements, whose life may extend for a century or more. If action is taken in time it will generally be possible to extend the life of a settlement by appropriate exercise of trustees’ powers. Trustees should if appropriate diarise the date when the settlement may come to an end so as to take action beforehand.

### 57.7.4 Chargeable to IT

A payment is not in general a capital payment if it is chargeable to income tax.

The CG Manual provides:

**CG38625: Capital payments [Jul 2019]**

The exclusion for amounts chargeable to Income Tax includes both

actual income receipts and amounts deemed to be income for tax purposes. For example:

- [1] [a] Trust income payable to a life tenant
  - [b] including distributions of accumulated income.<sup>29</sup>
- [2] Distributions of income treated as income of the settlor when it arises, ITTOIA05/S624(1).

What is the position if a trust makes an income distribution<sup>30</sup> to a remittance basis taxpayer, which is not remitted? This is not a capital payment. The payment is “chargeable to income tax” even if no tax is paid because of the remittance basis.<sup>31</sup> If that were wrong:

- (1) There would be double taxation, a s.87 gain and an IT charge, if the payment were remitted.
- (2) The payment would be matched with s.1(3) amounts which would reduce tax on subsequent capital payments with odd results and some scope for tax planning.

Similarly a benefit which is within s.731, or within s.731 subject to the s.731 remittance basis, is not a capital payment.<sup>32</sup>

The same applies if a settlor-interested discretionary trust within s.624 makes a distribution out of its income to the settlor: that is not a capital payment. In this case there does seem at first sight to be a problem, as there is no income tax charge on receipt of the payment.<sup>33</sup> However the sum is treated for all purposes of income tax to be the income of the settlor and that deeming should be applied in order to determine whether the payment is chargeable to income tax for the purposes of the definition of capital payment.

The same applies if the settlor is within the s.624 remittance basis.

The same applies if a person abroad makes a distribution out of its income to a transferor within s.720, or a transferor within the s.720 remittance basis: that is not a capital payment. (This issue arises in the exceptional case of a trust within s.720 and not within s.624, and in the

---

29 I guess para [b] is referring to income of a life tenant retained in a trust and paid to the life tenant after some delay, though a trusts lawyer would call that retaining income, not accumulating income. But it does not matter.

30 For what is an income distribution, see 38.8 (Trust payment: Income/capital).

31 See 2.4.1 (Unremitted RFI “chargeable”).

32 See 47.17 (s.731/s.87 interaction).

33 See 44.10.3 (Relief for settlor).

more common case of a payment from a company held by a trust.)

### 57.7.5 *Payment from unremitted income*

Suppose:

- (1) A remittance basis taxpayer (“S”) receives foreign income (“old income”) which is not remitted to the UK and so not taxed.
- (2) S transfers the old income to a non-resident trust.
- (3) The trustees invest and realise gains (“trust gains”) in a subsequent tax year. For simplicity, assume that no income accrues to the trustees, or any income which arises to them is segregated and paid out to the settlor.
- (4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old income.<sup>34</sup>

It is considered that the distribution is not a capital payment as it is chargeable to income tax. Otherwise there would be double taxation on the distribution, an income tax charge and a s.87 charge.

### 57.7.6 *Payment from unremitted gains*

Suppose:

- (1) A remittance basis taxpayer (“S”) receives foreign gains (“old gains”) which are not remitted to the UK and so not taxed.
- (2) S transfers the old gains to a non-resident trust.
- (3) The trustees invest and realise gains (“trust gains”) in a subsequent tax year.
- (4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old gains.<sup>35</sup>

At first sight there is a double charge, CGT on the old gains on the remittance basis, and a s.87 charge. That can hardly be right.

The RDR Manual gives this example:

**31180. Foreign chargeable gains accruing on disposal made otherwise than for full consideration [Jan 2019]**

---

<sup>34</sup> On the mixed fund rules which apply in this case, see 19.9 (Unremitted income given to trust).

<sup>35</sup> On the mixed fund rules which apply in this case, see 19.9 (Unremitted income given to trust).

Example 2 (Ahmeda)

A transfers his property in Dubai to a trust receiving no consideration in return. The deemed gain computed using the market value of the property at date of transfer is £400,000.

The trustees subsequently sell the property for £550,000.

The trustees then make a capital payment of £300,000 to a UK close company in which A's spouse is a participator.

The HMRC analysis is as follows:

[1] £300,000 of A's foreign chargeable gain [the £400k deemed gain] has been remitted to the UK. This is because the property is treated as deriving from his gain (Section 809T ITA 2007) and the proceeds from the sale of the property therefore also derive from the gain.

This overlooks the mixed fund rules. Putting aside the interaction with s.87, for a moment, I would say that £150,000 of A's foreign chargeable gain has been remitted to the UK. The £550,000 proceeds of sale received by the trustees is a mixed fund, consisting of:

A's deemed gain	£400,000
The trustees' gain	£150,000

The payment out of the mixed fund is treated as coming from the trustees gain (assume it accrues in a later year).

The HMRC analysis continues:

[2] The company is a relevant person (Section 809M(2)(f) ITA 2007)

This is correct.

[3] and property (that is, money) which derives from A's gain has therefore been received in the UK by or for the benefit of a relevant person (Section 809L ITA 2007).

The example did not in fact specify that the money was received in the UK, only that it was received by a UK company (which is not the same); but let us assume that is factually correct.

[4] The gain which accrues to the trust on the actual sale of the property will be subject to normal rules.

But what are the normal rules? Possibly HMRC assume that there is a s.87 charge on the £300,000 leading to double taxation but tactfully refrain from saying so. The effective rate of CGT on a capital payment could be:

CGT on the old gain	20% <sup>36</sup>
CGT on capital payment <sup>37</sup>	<u>32%</u>
	<u>52%</u>

It is suggested that one should construe the legislation to avoid a double charge; the question is how best to reach that conclusion. Possibilities include:

- (1) The old gains exclude the deeming under s.87; or
- (2) The reference to income tax in the definition of capital payment could be read purposively as extending to CGT so the payment is not a capital payment.<sup>38</sup>
- (3) Section 809P(10) ITA
- (4) Section 32 TMA

These solutions would be consistent with the position where old income is settled.<sup>39</sup>

An alternative would be to say that to the extent that the s.87 charge applies, the capital payment is not to be regarded as derived from the old chargeable gains.

Another possibility is to say that the value of the benefit is reduced to reflect the fact that remittance gives rise to a charge on the old gains.

The position is simpler where the payment is made to the settlor, and not to a third party (as in the HMRC example). But even then, none of these solutions are straightforward. Legislation enacted in the slapdash manner of the FA 2008 is bound to leave rough edges, and the courts should seek to find a construction which avoids double taxation and produces a workable result.

### 57.7.7 *Payment to non-resident*

Section 97(1) TCGA provides:

... “capital payment” —

(a) means any payment ... in the case of a recipient who is not resident

<sup>36</sup> This would in some cases be 28% (upper rate gains).

<sup>37</sup> Including the interest surcharge.

<sup>38</sup> Contrast the ToA rules where a reference to income tax was construed to include corporation tax in order to avoid double taxation: see the 2011/12 edition of this work para 48.2.1 (Transferor’s credit); that point does not now arise.

<sup>39</sup> See 57.7.5 (Payment from unremitted income).

in the UK, any payment received otherwise as income...

As to when a payment is received as income, see 38.8 (Trust payment: Income/ capital). But it does not usually matter if a payment to a non-resident is a capital payment, because of the non-resident disregard.<sup>40</sup>

### 57.7.8 Arm's length transaction relief

Section 97(1) TCGA provides:

In sections 86A to 96 and Schedule 4C and this section “capital payment”...

(b) does not include a payment under a transaction entered into at arm's length if it is received on or after 19th March 1991.

I use the following terminology:

Term	Meaning
Connected person transaction	Transaction between connected persons
Full consideration transaction	Transaction on market value terms
Arm's length transaction	Transaction entered into at arm's length
Arm's length transaction relief	Relief under s.97(1)(b)

Is arm's length transaction relief needed? It is arguable that a transaction at arm's length is not a capital payment at all and this relief was inserted only for the avoidance of doubt.<sup>41</sup> If, (contrary to that view) an arm's length transaction were a capital payment, the amount of the capital payment would normally be nil, though not always, either because statutory valuation rules apply or because the parties (though at arm's length) made a mistake as to valuation.

One might have thought that a connected person transaction does not qualify for arm's length transaction relief because:

- (1) it is treated for CGT as not “a *bargain* made at arm's length”<sup>42</sup> and so
- (2) it should be treated as not a “*transaction* entered into at arm's length”.

One might say that proposition (2) follows from (1) under the principles of construction which apply to deeming provisions.<sup>43</sup> But really there is no meaningful difference between the two propositions: they are two ways

40 See 57.21 (Non-resident disregard).

41 See 47.9.1 (Provision for full consideration).

42 See App 4.6.7 (Deemed non-arm's length).

43 See App 7.1 (Deeming provisions).

of saying the same thing. However HMRC do not agree. The CG Manual provides:

**CG38625: Capital payments** [Jul 2019]

The exclusion for arm's length payments covers commercial transactions.

It also allows the trustees to enter into commercial transactions with connected persons such as the settlor. This is because 'a transaction at arm's length', the term used in TCGA92/S97(1), is not the same as 'a bargain made at arm's length', the term used in TCGA92/S18(2).

Section 18 treats an acquisition and disposal between connected persons as a bargain not made at arm's length and imposes the market value rule in TCGA92/S17. So if the trustees buy an asset from the settlor sections 17 and 18 will treat the acquisition as taking place at market value whatever the terms of the contract. But if the trustees pay a commercial price for the asset the payment is not a capital payment for the purposes of section 87. If the trustees pay more than the market value that may be a capital payment.

The HMRC view is long-standing.<sup>44</sup> So it seems that a connected person transaction can qualify for arm's length transaction relief.

If it is right to say that arm's length transaction relief is otiose, then this is not important. But one area in which the point may arise is where the arm's length transaction involves a loan or provision of a chattel where the statutory valuation rules would apply. The CG Manual appears to accept this, as it concludes:

The exclusion for payments under arm's length transactions is also relevant to the provision of benefits, see CG38640. Trust property occupied by a beneficiary at a commercial rent or a loan on commercial terms would not be a capital payment.

But this passage was written in 2015, before the enactment of the statutory valuation rules in 2017. Although the text has not changed, it is not likely that HMRC have considered the issues of the 2017 reforms. So the taxpayer should not draw much comfort from these sentences.

The point will not often arise, as transactions between trustees and beneficiaries are not generally entered into at arm's length: the fact that the transaction is on arm's length terms is not by itself enough to make the

---

<sup>44</sup> See SP 5/92 cited at 88.5.1 (Gratuitous intent: Disregards (a)(b)).

transaction one entered into at arm's length.

## 57.8 Receipt from trustees

The s.87 charge applies where a beneficiary has received a capital payment from the trustees. There are two requirements here: a *receipt by a beneficiary*, and a *receipt from trustees*.

On the general meaning of “receipt by a beneficiary” see 47.6 (Who receives the benefit?).

Section 97(5) TCGA expands on these concepts:

For the purposes of sections 86A to 90 and Schedule 4C a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—

- (a) he receives it from them directly or indirectly, or
- (b) it is directly or indirectly applied by them in payment of any debt of his or is otherwise paid or applied for his benefit, or
- (c) it is received by a third person at the beneficiary's direction.

This does not extend the meaning of capital payment. It assumes that there is a capital payment (as defined) and addresses the questions of who is the recipient and whether the receipt is from the trustees.<sup>45</sup>

The explanation for s.97(5) is to be found in *Potts' Executors v IRC* 32 TC 211. This concerned (what is now) s.641 ITTOIA which (then) applied to:

Any capital sum paid directly or indirectly ... to the settlor.

In *Potts*, at the request of the settlor, a company connected with a settlement paid tax liabilities of the settlor.<sup>46</sup> The settlor did not actually receive the funds. The House of Lords (in the era of literal, perhaps over-literal, interpretation) held that this was not a payment to the settlor directly or indirectly, so (what is now) s.641 ITTOIA did not apply.

Lord Simonds said:

---

<sup>45</sup> This is clear from the wording, but if authority is needed, see *Burton v HMRC* [2009] SFTD 682 at [43]: “Section 97(5)(b) does not ... require that the benefit be received by the beneficiary but rather extends the circumstances in which a capital payment is treated ‘as received’ from the trustees.”

<sup>46</sup> The trust also made other payments, such as payments to charities at the request of the settlor.

It is sufficient to say that [the word ‘indirectly’] cannot so enlarge the meaning of the words ‘paid to the settlor’ as to include payment to some other person than the settlor for his own use and benefit. I do not feel called upon to determine positively what transactions it might be apt to cover. It may be that it is not apt to cover any that are not already covered by the normal meaning of the words ‘paid to the settlor’.

Lords Normand and Oaksey said:

...it was obviously necessary to provide for the case when persons accountable to the settlor are interposed between the payer and the settlor for the purpose of disguising the transaction. That is a satisfactory explanation of the use of the words “directly or indirectly”.

I think the words “paid directly or indirectly to the settlor” should be held to mean paid into the settlor’s hands or into the hands of someone accountable to him.

Lord MacDermott said:

[The payments] made to Mr. Potts’ agents or in some circuitous way designed to put the money under his control eventually. Had they been, the word “indirectly” might have had a part to play, for in that case the issue would be whether, as a matter of fact, payment had been made one way or another to the settlor. In short, as it appears to me, the words “directly or indirectly” bear only on the mechanics of payment in fact.

It seems to me that there are three distinct views here:

- (1) The word “indirectly” adds nothing or nothing much (Lord Simonds).
- (2) The word “indirectly” applies to payments to X via someone accountable to X (Lords Normand and Oaksey).
- (3) The word “indirectly” applies to payments “in some circuitous way designed to put the money under his control eventually” (Lord MacDermott).

The second of these views was adopted in *Piratin v IRC* 54 TC 730. Here a payment was made from A to B on terms which obliged B to pay an equivalent sum to C. This was held not to amount to an indirect payment to C, because B was not “accountable” for the sum received. The Judge considered the comments of Lords Simonds, Normand and Oaksey set out above and continued:

One thus finds both Lord Normand and Lord Oaksey expressing the opinion in the *Potts* case that a sum cannot be said to be “paid

indirectly” to the settlor within the section, unless it is paid into the hands of someone accountable to him.

“Accountable” was understood strictly (I would have thought, excessively so):

It is common ground that the word “accountable” in an English law sense is not apt to describe the position of a person who is under a mere contractual obligation, such as that owed by [B] to the two settlors. [Counsel for the Revenue] suggested that Lord Normand may have intended to use the word according to a broader meaning attributed to it by Scottish lawyers, but I can see no sufficient justification for that inference. I think that Lord Normand referred to strict accountability in English law, and Goff J. took the same view in *IRC v Wachtel* 46 TC 543 at page 555F....

He rejected the view that the word “indirectly” adds nothing but also rejected Lord MacDermott’s wide approach:

The phrase “or indirectly” in the context of s 451(1) undeniably gives rise to problems of interpretation. If, however, a broader meaning is attributed to it than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

In 1981 parliament reversed these decisions by adding a new subsection to (what was then) s.451 ICTA 1970:

- (9) For the purposes of this section there shall be treated as a capital sum paid to the settlor by the trustees of the settlement any sum which—
- (a) is paid by them to a third party at the settlor’s direction or by virtue of the assignment by him of his right to receive it; or
  - (b) is otherwise paid or applied by them for the benefit of the settlor...

The 1981 Act also introduced s.87 regime including the provision which is now s.97(5) TCGA:<sup>47</sup>

- ... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
- (a) he receives it from them directly or indirectly, or

---

<sup>47</sup> Then s.83(5) FA 1981.

- (b) [i] it is directly or indirectly applied by them in payment of any debt of his or  
[ii] is otherwise paid or applied for his benefit, or
- (c) it is received by a third person at the beneficiary's direction.

The wording of (b) and (c) has its equivalents in s.451(9). In practice these paragraphs are not so important. However, the *Potts* and *Piratin* cases set out above are relevant to discussion of the meaning of “directly or indirectly” in paragraph (a), which is important, and to which I can now turn.

### 57.8.1 *Indirect receipt from trust*

Section 97(5) TCGA provides:

... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—

- (a) he receives it from them directly or indirectly...

What is the meaning of “receives *indirectly*”? It is some sort of anti-conduit rule.

Broadly speaking, there are two possible views:

- (1) The word “indirectly” applies to payments to X via someone accountable to X (following the approach of Lords Normand and Oaksey in *Potts*). I refer to this as the “**narrow view**”.
- (2) The word “indirectly” applies to payments “in some circuitous way designed to put the money under his control eventually” (following the approach of Lord MacDermott in *Potts*). I refer to this as the “**wide view**”.

There are two difficulties with the wide view. The first is raised in *Piratin*:

If, however, a broader meaning is attributed to [indirectly] than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

The reader may think that vagueness is such a common feature of contemporary anti-avoidance legislation that this objection may not have the weight it carried when *Piratin* was decided, in 1981.

Secondly, if it is possible for one person to receive a payment directly, and another to receive the same payment indirectly, there is the problem

of double taxation, as each may be taxed on the payment. The double taxation problem arises (inter alia) if there is held to be an indirect payment to B in two cases:

Case (1):

- (a) Trust 1 makes a payment to A; and
- (b) A makes a payment to B.

Case (2):

- (a) Trust 1 makes a payment to trust 2; and
- (b) Trust 2 makes a payment to B.

In case (1) there is in principle double taxation in the form of tax on both A and B.<sup>48</sup> In case (2) there is in principle double taxation on B.<sup>49</sup> In some cases there is no double taxation,<sup>50</sup> but one cannot say that the question whether there is an indirect payment depends on whether there is double taxation.<sup>51</sup>

These considerations support the narrow view. After some vacillation, the courts upheld that view in *Bowring v HMRC*.<sup>52</sup> The facts were those of case (2) above.<sup>53</sup> The judge said:

55. In my view the natural meaning and effect of indirect receipt in ss.97(5)(a) is that a beneficiary is still to be taken to have received a payment from a settlement even if it is paid to him through an intermediary. It is conceivable that a separate settlement could, depending on the circumstances, constitute such an intermediary, but the payment would not in those circumstances fall to be treated as “made by” and “received from” that intermediary for the purposes of the legislation....

When is a payment received “through an intermediary”?

89. I do not believe that assessment of the facts in a case such as this, in

---

48 Assuming the payments to A and to B can be matched with a s.1(3) amounts (trust gains).

49 Assuming the payment can be matched with a s.1(3) amounts in trust 1 and trust 2.

50 Eg in case (1) if A is non-resident; or in case (2) if trust 1 has no trust gains.

51 If the temporary non-resident rules are in point, ie if in case (1) A is temporarily non resident, it may not be determined for some years whether there is double taxation.

52 [2015] UKUT 550 (TCC) reversing *Herman v HMRC* [2007] STC (SCD) 571, and adopting criticism of *Herman* set out in the 14<sup>th</sup> edition of this work.

53 For case (1) (payment from trust to A, and from A to B) see 47.13.1 (Benefit to B1, used by B1 to benefit B2).

order to determine whether a capital distribution was received from/made by a particular settlement, is susceptible to the application of some more or less formulaic “test”, whether by reference to the existence of a plan or otherwise. In my view the issue raised here requires all relevant factors to be considered, and each case will depend on its own facts. Relevant factors will no doubt include whether what is done is pursuant to a plan or understanding or agreement.

So far we are none the wiser. One might have thought that a trust was a clear case of an intermediary, on the basis that trustees merely “fill in the blanks” left by the settlor.<sup>54</sup> But in *Bowring* the payment was *not* through an intermediary:

I note in particular that the trustee of [trust 1] made an outright, unconditional transfer of its settled property to [trust 2]. There was no agreement between the trustee of [trust 1] and the trustees of [trust 2], and the former admittedly had no say whatsoever in what the latter did with the transferred property, whether by way of distributions to the beneficiaries or otherwise. It is true that

- [1] there was a plan to enable capital payments to be made free of CGT,
- [2] that the plan envisaged virtually all the transferred property being paid to the beneficiaries of [trust 2] (who were also beneficiaries of [trust 1]), and
- [3] that both sets of trustees knowingly played a part in the realisation of the plan.

However, the existence of the plan did not affect the fact that [trust 1]'s settled property was transferred to [trust 2] and was held on the terms of the latter settlement, and that when [trust 2] decided to make (and made) the capital payments, they did so entirely in the exercise of their own discretion - they alone decided on the amounts and dates of the payments, and they made those decisions after the trust assets had been transferred to them. This independence of decision-making is underscored by the fact that *they decided to leave a substantial part of the trust assets undistributed, notwithstanding that the plan had envisaged otherwise.*

... the capital distributions in the present case were clearly received from/made by [trust 2], for the purposes of the legislation. ... I do not consider it possible, taking a realistic view of the facts here, to regard [trust 2] as a mere intermediary in the sense that would be necessary if

---

54 See 4.7.5 (Trust appointment: Filling blanks)

the distributions were to be treated as received from/made by [trust 1] indirectly.<sup>55</sup>

The outcome would have been different if trust 2 had followed the original plan. If that is right, the facts of *Bowring* are quite unusual, for plans are usually followed through; and that might explain why there was no appeal.

The FTT reached the same conclusion on another aspect of this case where the facts were more striking:

- (1) A trust made a payment of £400k to a beneficiary (“B”). This was on the non-binding understanding he would pay it on to two of his cousins (who were also beneficiaries).
- (2) B gave the sum to his two cousins accordingly.

The reason was that B wished to pay the s.87 charge (if any) so the cousins took free of the s.87 charge. HMRC assessed B who then argued, unmeritoriously, that they should have assessed the cousins.

The question was whether the cousins received the sum from the trust “indirectly”.<sup>56</sup>

[The beneficiary] was not in law bound to pay the money on to his two cousins. Nor did he hold it on trusts which were essentially the same as the 1969 trusts. ‘Tracing’ does not apply because while the source of the money could be traced, it no longer was imprinted with a trust. Causation was broken.<sup>57</sup>

On the basis of the informal understanding, this is surprising, and I think it would not and should not be followed. It would be easy for another court to ignore it, either as turning on its own facts, or (better) on the grounds that the subsequent appeal restated the test for providing a benefit “indirectly”. The reader may wonder whether the result would have been the same if HMRC had chosen to assess the cousins rather than B.

The onward-gift rules also need to be considered.<sup>58</sup>

## **57.9 Capital payment to/from company**

### *57.9.1 Terminology*

---

55 [2016] STC 816 at [90] (emphasis added).

56 See 57.8.1 (Indirect receipt from trust).

57 *Bowring v HMRC* [2014] SFTD 347 at [192]. This point was not considered on the appeal.

58 See 57.30 (Onward-gifts: Introduction).

Section 96 TCGA contains two rules:

<b>Rule (my terminology)</b>	<b>Topic</b>	<b>See para</b>
<b>s.96(1) rule</b>	Capital payment received <i>from</i> close co	57.10
<b>s.96(2) rule</b>	Capital payment made <i>to</i> close co	57.11

These labels are not transparent, but it is difficult to think of better.

The rules are distinct, but they share some common definitions and concepts which I consider first.

### 57.9.2 Control: s.96 sense

“Control” in s.96 matters:

- (1) For the s.96(1) rule, which (in short) applies where a capital payment is received from a company controlled by trustees
- (2) For the s.96(2) rule, which deems a capital payment received by a non-resident company to accrue to those who control the company

“Control” is defined in s.96(10) TCGA:

For the purposes of this section—

- (a) [i] the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010,  
     [ii] but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010] if he is not a participator in the company;

This is a slightly cut down form of the ultra-wide sense of control.<sup>59</sup>

There is also a slightly cut down form of the standard definition of participator. Section 96(10) TCGA provides:

- (aa) a person is not to be regarded as a participator in a company controlled by the trustees of a settlement where the person has a share or interest in the capital or income of the company solely by virtue of an interest which the person has under the settlement; ...
- (b) “participator” has the meaning given by section 454 of CTA 2010<sup>60</sup>

The same definitions are used in the context of s.86; for a discussion see

<sup>59</sup> See 99.3 (Control: Ultra-wide sense).

<sup>60</sup> This is the standard definition, see 99.22 (Definitions of participator).

56.4.2 (“Control” and “participator”).

### 57.9.3 *Capital payment to/from co*

A capital payment *from* a close company matters for the s.96(1) rule, which (in short) applies where a capital payment is received from a company controlled by trustees.<sup>61</sup>

A capital payment *to* a close company matters:

- (1) For the s.96(2) rule, which deems a capital payment received by a non-resident company to accrue to those who control the company
- (2) If the company is UK resident: the s.96(2) rule will not apply, but the company will in principle receive s.87 gains.

## 57.10 **Payment from close co: s.96(1) rule**

Section 96(1) TCGA provides:

Where a capital payment is received from a qualifying company which is controlled by the trustees of a settlement at the time it is received, for the purposes of sections 87 to 90 and Schedule 4C it shall be treated as received from the trustees.

I refer to this as the “**s.96(1) rule**”.

See too 84.10 (Capital payment from co in estate).

### 57.10.1 “*Qualifying company*”

Section 96(6) TCGA provides:

For the purposes of subsection (1) above a qualifying company is  
[a] a close company<sup>62</sup> or  
[b] a company which would be a close company if it were resident in the UK.

On this terminology see 99.29.1 (Non-resident close company).

### 57.10.2 “*Controlled by the trustees*”

Section 96 TCGA provides:

---

61 See 29.7 (Distribution to non-shareholder) for a discussion as to whether a payment from a company held by a trust, to a beneficiary, is a capital or income payment.

62 In practice it would be rare for s.96(1) to apply in relation to a (UK resident) close company, as a payment from a (UK resident) close company is not likely to be a capital payment.

- (7) For the purposes of subsection (1) above a company is controlled by the trustees of a settlement if it is controlled
  - [a] by the trustees alone or
  - [b] by the trustees together with a person who (or persons each of whom) falls within subsection (8) below.
- (8) A person falls within this subsection if—
  - (a) he is a settlor in relation to the settlement, or
  - (b) he is connected with a person falling within paragraph (a) above.

57.10.3 s.96(1) rule: Examples

The s.96(1) rule is needed because s.87 only applies if a beneficiary receives a capital payment from *the trustees*. A capital payment from a *company* which was not (directly or indirectly) from the trustees would not be caught.

In the following discussion it is important to distinguish between:

- (1) Control in the s.96 sense<sup>63</sup>
- (2) Control in the natural sense of the word

In example 1, the trustees control the company in the natural sense of control. The beneficiary receives the capital payment from the company directly, but from the trustees indirectly. The s.96(1) rule is not needed in this case, though it does no harm.

In example 2, the company is held in equal shares by three separate trusts. Assume they have the same settlor. No one trust has control in the natural sense of control. In the absence of s.96(1), it might perhaps be argued that a capital payment from the company is tax free, on the grounds that it is not received even indirectly from the trustees of any of the trusts.

63 See 57.9.2 (“Control” in s.96 sense).

So the s.96(1) rule might perhaps be needed in a case where trustees “control” a company (in the s.96 sense) but do not control the company in the natural sense of control.

Where a capital payment is received from a company “controlled” (in the s.96 sense) by several persons, there is no apportionment provision (unlike the s.96(2) rule on a capital payment *to* a company). It is suggested that s.96(1) is a deeming provision which deems the payment to be received from the trustees, but the amount of the capital payment is not affected by the deeming. In example 2, the amount of the capital payment from each trust is not the amount received from the company but the amount actually attributable to the trust:

- (1) If each trust holds a third of the company, and they act together to procure the payment, each makes a third of the capital payment.
- (2) If:
  - (a) one trust has control (in the natural sense), and
  - (b) that trust is in a position to procure the capital payment the capital payment is from that trust alone, and not from any other trust with some other interest in the company.<sup>64</sup>

### **57.11 Payment to close co: s.96(2) rule**

Section 96(2) TCGA provides:

Where

[1][a] a capital payment is received from the trustees of a settlement  
[b] (or treated as so received by virtue of subsection (1) above)<sup>65</sup> and  
[2] it is received by a non-resident qualifying company,  
the rules in subsections (3) to (6) below shall apply for the purposes of sections 87 to 90 and Schedule 4C.

I refer to this as the “**s.96(2) rule**”, and the company is the “**recipient company**”.

#### *57.11.1 “Non-resident qualifying co”*

Section 96(9) TCGA provides:

For the purposes of subsection (2) above a non-resident qualifying

---

<sup>64</sup> But in practice, condition (2)(b) is not likely to be satisfied.

<sup>65</sup> See 57.10 (Payment from close co: s.96(1) rule).

company<sup>66</sup> is a company which is not resident in the UK and would be a close company if it were so resident.

### 57.11.2 *Consequence of payment to co*

The s.96(2) rule depends on whether the recipient company is controlled:

- (1) by one person alone
- (2) by 2 or more persons (taking each one separately)
- (3) by 2 or more persons (taking them together)

Section 96(3)-(5) are conveniently read side by side:

<b>s.96(3)</b>	<b>s.96(4)</b>	<b>s.96(5)</b>
<b>Control by: one person</b>	<b>persons separately</b>	<b>persons together</b>
<p>If the company is controlled by one person alone at the time the payment is received, and</p> <p>that person is then resident in the UK, it shall be treated as a capital payment received by that person.</p>	<p>If the company is controlled by 2 or more persons (taking each one separately) at the time the payment is received, then—</p> <p>(a) if one of them is then resident in the UK, it shall be treated as a capital payment received by that person;</p> <p>(b) if 2 or more of them are then resident in the UK (“the residents”)</p> <p>[i] it shall be treated as being as many equal capital payments as there are residents and</p>	<p>If the company is controlled by 2 or more persons (taking them together) at the time the payment is received—</p> <p>(a) it shall be treated as being as many capital payments as there are participators in the company at the time it is received, and</p>

---

66 For a note on this terminology, see 99.29.1 (Non-resident close company).

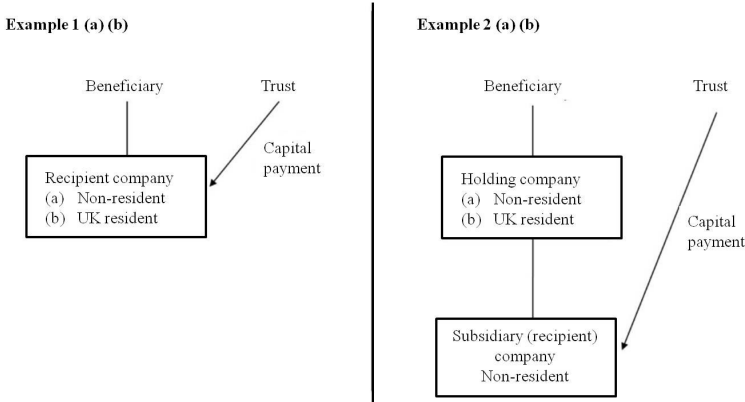

[ii] each of them shall be treated as receiving one of the payments.

(b) each such participator (whatever his residence) shall be treated as receiving one of the payments, quantified on the basis of a just and reasonable apportionment,

but where (by virtue of the preceding provisions of this subsection and apart from this provision) a participator would be treated as receiving less than one-twentieth of the payment actually received by the company, he shall not be treated as receiving anything by virtue of this subsection.

For the meaning of “control” see 57.9.2 (“Control” in s.96 sense).

57.11.3 Capital payment to co: Examples

In example 1(a), a non-resident company receives a benefit directly from the trust. The company is a non-resident qualifying company, so under s96(2) the beneficiary (if UK resident) is treated as receiving the capital payment. In the absence of s.96(2) the position would have been less clear, but it is not necessary to consider that.

In example 1(b), a UK resident company receives a benefit directly from the trust. The company is not a non-resident qualifying company, so the

s.96(2) rule does not apply. It is not needed, because the capital payment to a UK resident company gives rise to a s.87 gain which is subject to corporation tax. It might be said that the beneficiary receives a benefit indirectly, because the value of his company is increased. But that would lead to double taxation, so the better view is that would not count for the purposes of s.87: the benefit is too indirect.

In example 2(a), the non-resident subsidiary of a non-resident holding company receives a capital payment. Under s96(2) the beneficiary (if UK resident) is treated as receiving the capital payment.

In example 2(b), the non-resident subsidiary of a *UK resident* holding company receives a capital payment. One would expect the charge to lie with the UK company, though it needs a somewhat purposive construction to reach that result.

**Example 3**

In example 3, if A, B and C are not associates, then s.96(5) applies and each is treated as receiving one third of the capital payment.

If A, B and C are associates, then each “controls” the company and s.96(4) applies. It is suggested that the outcome is the same. The capital payment which is treated received by each of them is of an amount equal to one third of the capital payment received by the company.

What if A held two thirds of the company and B and C had only one sixth each? It appears that the capital payment is still shared equally.

**Example 4 (a)**

**Example 4 (b)**

In example 4(a), the settlor “controls” NR Co in the ultra-wide sense, but does not “control” the company in the s.96 sense. If there were a capital payment from the trust to the company, it would not be treated as accruing to the settlor. But the trust/company group disregard<sup>67</sup> means that a capital payment from the trust to the company is not normally possible.

In example 4(b), the beneficiary (“B”) is a participator. If B is the settlor, or a relative of the settlor, B has “control” of the company in the s.96 sense. If there were a capital payment from the trust to the company, it would be treated as accruing to B. It is suggested that the amount of the capital payment is only 1% of the value of the benefit to the company.

Suppose a trust subscribes for shares in a company which is not wholly owned by the trust.

- (1) If the share subscription is on arm’s length terms, that is not a benefit to anyone.
- (2) If the terms are unfavourable to the trust (ie the shares which the trust acquires are worth less than the subscription price), it is suggested that:
  - (a) There is still no benefit to the company, so the s.96(2) rule does not apply.
  - (b) A benefit accrues to the other shareholders, if the value of their shareholdings is increased, and the amount of the benefit is the amount of that increase.

57.11.4 *Disregard of payment to co: s.87C*

Section 87C TCGA provides:

---

<sup>67</sup> See 57.12 (Trust/company group disregard).

(1) For the purposes of sections 87 and 87A as they apply in relation to a settlement, no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2).

(2) A capital payment is within this subsection if (and to the extent that) it is received (or treated as received) in a tax year from the trustees of the settlement by a company that—

- (a) is not resident in the UK in that year, and
  - (b) would be a close company if it were resident in the UK,
- (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

This is one of a number of capital payment disregards:

<b>TCGA Scope</b>	<b>See para</b>
s.87C Cap payment received by non-resident co w/i s.96(1)	<i>Discussed here</i>
s.87D Cap payment received by any non-resident	57.21
- Trust/company group disregard	57.12

It is useful to have labels for these rules. I refer to the first as the “**s.87C disregard**”. I generally refer to the second as the “**non-resident disregard**”, but where it is necessary to distinguish it from the s.87C disregard, I call it the “**general (s.87D) disregard**”.

The s.87C disregard is (more or less) overtaken by the general (s.87D) disregard; though it is possible to envisage circumstances where s.87C may apply and s.87D does not (eg a capital payment in the final trust year).

Presumably the purpose of the s.87C disregard was to prevent tax avoidance by capital payments to non-resident companies intended to “wash” trust gains. It is not easy to see how that could have been achieved. But it does not much matter.

#### 57.11.5 *Temporary non-resident beneficiary*

Section 96(9A) TCGA provides:

For the purposes of this section an individual shall be deemed to have been resident in the UK at any time in any year of assessment for which he or she was not so resident if—

- (a) section 1M<sup>68</sup> applies to him or her, and

---

<sup>68</sup> See 10.7 (TNR gain/loss).

- (b) the year falls within the temporary period of non-residence.

Section 96(9B) TCGA deals with assessment time limits:

If—

- (a) it appears after the end of any year of assessment that any individual is to be treated by virtue of subsection (9A) above as having been resident in the UK at any time in that year, and
- (b) as a consequence, any adjustments fall to be made to the amounts of tax taken to have been chargeable by virtue of this section on any person,

nothing in any enactment limiting the time for the making of any claim or assessment shall prevent the making of those adjustments (whether by means of an assessment, an amendment of an assessment, a repayment of tax or otherwise).

#### 57.11.6 *EU-law compliance*

The section 96(2) rule does not apply to a capital payment made to a UK resident company. That makes sense as the UK company would receive a s.87 gain on which it would be taxable. Perhaps the discrimination might not be EU-law compliant? But if that were right, then perhaps the entire s.87 regime is not EU-law compliant, which seems far-fetched.

### 57.12 **Trust/company group disregard**

SP 5/92 para 18 provides:

In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are ... not treated as capital payments within TCGA 1992 s 97.<sup>69</sup>

The paragraph sets out a commonsense definition of “wholly owned”<sup>70</sup>, and includes a qualification in case of avoidance.<sup>71</sup>

---

69 For settlor/tainting aspect of transactions within a trust/company group structure, see 94.24.1 (Transfer within trust/co group).

70 “A company is treated as indirectly wholly owned by the trustees where the whole of its issued share capital is directly and beneficially owned by a company which is directly wholly owned by the trustees or it is the 100% subsidiary of such a company, or a chain of companies, which is indirectly wholly owned by the trustees.”

71 “This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage.”

I coin the following terminology. A trust and its wholly owned companies is a “**trust/company group structure**”. The rule set out above is the “**trust/company group disregard**”.

#### 57.12.1 *Trust benefits wholly owned co*

Thus (say) an interest-free loan from trustees to a wholly owned company is not a capital payment. This fits the scheme of the Act, and no-one has ever suggested otherwise. But why not? This view can be justified on the basis that:

- (1) An interest-free loan to a company wholly owned by the lender is a commercial transaction with no gratuitous intent.
- (2) Whether such a transaction constitutes a “benefit” depends on the context, and the context shows that is not the case here.

In the normal case, no-one other than the trustees would “control” the wholly owned company, in the s.96 sense, so for the purposes of s.96(2) it would not matter if the loan were a capital payment. But it would matter if the company had a participator in the form of a loan creditor.

#### 57.12.2 *Wholly owned co benefits trust*

What about an interest-free loan *from* a wholly owned company *to* the trust which owns it? That would also come within the trust/company group disregard, ie HMRC say it is not treated as a capital payment. Once again, this fits the scheme of the Act, and no-one has ever suggested otherwise. But why not? It seems hard to say that the loan is not a benefit and so a capital payment. The reason must be that the trust cannot be deemed to make a capital payment to itself.

SP 5/92 provides two examples of inter-group transactions:

- Intragroup payments which are not capital payments, for example
- [1] a capital distribution on winding up which represents merely a repayment of capital on shares, or
  - [2] a distribution chargeable to corporation tax,
- do not fall within the ambit of TCGA 1992 s 96.

I think example [1] is misconceived, because a distribution on winding up is not a capital payment (it is not a benefit) and whether it represents merely a repayment of capital on shares is irrelevant. But if it were a benefit, it would fall within the trust/company group disregard.

Turning to example [2]: a capital payment is defined as a benefit which

is not chargeable to *income* tax (or in the case of a non-resident, not received as income). The SP is considering a distribution chargeable to corporation tax. I am not sure how that could happen, in a case where the distribution is received by a non-resident company. However, a distribution is probably not a benefit, and if it were a benefit, it would fall within the trust/company group disregard.

### 57.13 Payment to/from co across trusts

The position is more complicated if two trusts are involved.

I here consider the s.96 issues: for a list of other issues on transfers to/from companies across trusts, see 75.14 (Transfers to/from underlying co).

#### Case 1

#### Case 2

In both cases, the capital payment is not an inter-group transaction, and so the inter-group disregard does not apply.

In case 1, trust 1 makes a capital payment to a company held by trust 2, a separate non-resident trust. There is a capital payment from trust 1 to the company but:

- (1) This capital payment is not treated as received by the settlor of trust 2, under the s.96(2) rule, because the settlor does not have “control” of the company.
- (2) This capital payment is not treated as received by the trustees of trust 2, under s.96(3), as they are non-resident.
- (3) This capital payment is not treated as received by any other person, under s.96(3)-(5), so it has to be disregarded under the s.87C disregard.<sup>72</sup>

<sup>72</sup> For completeness: The payment might also be disregarded under the general (s.87D) disregard. But that adds nothing to s.87C, so it does not matter.

Alternatively, it might be said that the trustees of trust 1 make a (separate) capital payment to trust 2, as they increase the value of the assets of trust 2, which is a benefit. But that would normally be disregarded under the general (s.87D) disregard.

Turning to case 2: In this case a company held by trust 1 makes a capital payment to trust 2, a separate non-resident trust

There is a capital payment to trust 2 from the company, which is treated as received from trust 1, under the s.96(1) rule. Alternatively, it might be said that the trustees of trust 1 make a separate capital payment to trust 2, by procuring the company to make the payment.

The s.96(2) rule does not apply, and the s.87C disregard does not apply, because these only apply to a receipt *by* a company. But the capital payment is normally disregarded under the general (s.87D) disregard.

In short, the end result is that neither of the s.96 rules have a role to play in payments to/from companies across trusts.

#### **57.14 Payment to non-beneficiary**

Section 87 gains are treated as accruing to *a beneficiary of the settlement* who has received a capital payment from the trustees.<sup>73</sup>

At first sight the charge only applies to beneficiaries, so if a capital payment is received by a non-beneficiary there is no charge. However, s.97(8) TCGA provides:

In a case where—

- (a) at any time on or after 19th March 1991
  - [i] a capital payment is received from the trustees of a settlement
  - [ii] or is treated as so received by virtue of section 96(1),<sup>74</sup>
- (b) [i] it is received by a person,
  - [ii] or treated as received by a person by virtue of section 96(2) to (5),<sup>75</sup>
- (c) at the time it is received or treated as received, the person is not (apart from this subsection) a beneficiary of the settlement, and
- (d) subsection (9) or (10) below does not prevent this subsection

---

<sup>73</sup> Section 87(2) TCGA.

<sup>74</sup> See 57.10 (Payment from close co: s.96(1) rule).

<sup>75</sup> See 57.10 (Payment to close co: s.96(2) rule).

applying,  
for the purposes of sections 86A to 90 and Schedule 4C the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.

The drafting is clumsy. The s.87 charge applies to a “beneficiary” who receives a capital payment, but any person who receives a capital payment is treated as a beneficiary. It would have been simpler to say that the charge applies to a “person” who receives a capital payment, and drop the (notional) requirement that recipient has to be a beneficiary! But it comes to the same thing.

The reader may wonder how a capital payment could be received by a non-beneficiary. In general, trustees may only confer benefits on beneficiaries. However, there are cases where it could happen:

- (1) An exercise of a power to apply capital for the benefit of B (a beneficiary) may take the form of a payment to a third person, X (not a beneficiary). This is not a capital payment received by B<sup>76</sup> but it is a capital payment received by X.
- (2) Beneficiaries may authorise trustees to make a payment to a non-beneficiary.<sup>77</sup>

On the other hand if B (a beneficiary) *directs* trustees to make a payment to a third person, X, the benefit is treated as received by B (not X).<sup>78</sup>

If a payment is made in breach of trust, to a non-beneficiary (or indeed to a beneficiary) there is no capital payment (or the value of the benefit is nil).<sup>79</sup>

It is possible that a person may be a beneficiary at the time of a capital payment but not when the s.87 gain accrues (if the trust gain is matched in a later year and the person has then ceased to be a beneficiary). Section 97(8) TCGA does not apply in such a case, because the condition in s.97(8)(c) is not met. It is considered that s.87(2) can and should be

76 See 47.5.8 (Moral/sentimental/hard to value benefit).

77 Another case: suppose trustees make a capital payment to a non-resident close company which is treated as received by the persons who control it; see 57.11 (Payment to close co: s.96(2) rule). Perhaps those persons might not be beneficiaries. But it would be a rare case where trustees could properly make a payment to a company controlled by non-beneficiaries.

78 See 57.8 (Receipt from trustees).

79 See 47.5.11 (“Benefit” in breach of trust).

construed so as to apply in this case; otherwise there would be a strange anomaly in the legislation. That is, when it states that s.87 gains accrue to “a beneficiary of the settlement who has received a capital payment” it is sufficient that the recipient is a beneficiary at the time they receive the capital payment, it is not required that the recipient is also a beneficiary at the time that the s.87 gain accrues.

#### 57.14.1 *Receipt by non-resident co*

Section 97(8)(d) signposts two exceptions to the rule in s.97(8). One concerns transfers between trusts and is discussed elsewhere.<sup>80</sup>

The other is s.97(9) TCGA which provides:

Subsection (8) above shall not apply where a payment mentioned in para (a) is made in circumstances where it is treated (otherwise than by subsection (8) above) as received by a beneficiary.

This would apply where:

- (1) Trustees make a capital payment to a non-resident company, which is not a beneficiary and
- (2) The trustees are treated as making the payment to beneficiaries who control the company.<sup>81</sup>

The point of ss.(9) is that the company is not to be treated as a beneficiary.<sup>82</sup> But would it matter if it were? Perhaps it might have mattered before the enactment of the s.87C disregard, in 2008.

## 57.15 Matching

### 57.15.1 *Why matching matters*

---

<sup>80</sup> See 57.39.1 (Trust transfer: s.87 disapplied).

<sup>81</sup> See 57.11 (Payment to close co: s.96(2) rule).

<sup>82</sup> For completeness. Could ss(8) also apply in a case where a capital payment is received by two persons, one a beneficiary and the other a non-beneficiary? Suppose an arrangement where X receives property directly and Y later receives it indirectly. (The onward gift rules would also need consideration here.)

(1) Assume one of X or Y is a beneficiary but not both. Perhaps in this case the non-beneficiary is not charged, because the capital payment is “treated as received by a beneficiary”. However, this is a case where the payment is *actually* received by the beneficiary (directly or indirectly), not a case where it is *treated* as received.

(2) Assume neither X nor Y are a beneficiary. In that case, X is treated as a beneficiary, but not Y. But this scenario is very far fetched.

The matching of capital payments with s.1(3) amounts is important for many reasons:

- (1) *Time of charge*: The s.87 gains accrue in the year that a capital payment is matched with a s.1(3) amount.
- (2) *Amount of charge*: The amount of the s.87 gain is the amount of the capital payment or the amount matched, if less.
- (3) *Which beneficiaries come into charge*: if
  - (a) more than one beneficiary receives capital payments, and
  - (b) there are not enough s.1(3) amounts to match all the capital paymentsthe question which capital payment is matched with a s.1(3) amount makes all the difference as to which beneficiary receives s.87 gains.
- (4) *Which capital payments come into charge*: if
  - (a) one beneficiary receives more than one capital payment, some in and some outside the UK; and
  - (b) there are not enough s.1(3) amounts to match all the capital paymentsthe question which capital payment is matched with a s.1(3) amount matters for the remittance basis. If a UK benefit is matched, there is a charge; if a non-UK benefit is matched, the s.87 remittance basis offers a defence to the charge.
- (5) *The interest surcharge*, which depends on the time gap between a s.1(3) amount and the capital payment with which it is matched.
- (6) *2008 transitional relief*, which applies where post-2008 capital payments are matched with pre-2008 s.1(3) amounts.

Matching is carried out on a LIFO (last in first out) basis. EN FB 2008 provides a summary:

452. Where the s.2(2) amount is equal to or greater than the capital payments then all the capital payments are matched:

- [1] any surplus s.2(2) amount is carried back to the year preceding the current tax year and any unmatched capital payments of that earlier year are matched to the surplus s.2(2) amount;
- [2] any surplus s.2(2) amount is carried back to the preceding year and matched with unmatched capital payments of that year, and so on, until the s.2(2) amount has been reduced to nil or there are no unmatched capital payments left in any earlier year; and
- [3] any surplus s.2(2) amount left after matching to previous years is

available to match against future capital payments.

453. Where the amount of capital payments for the latest relevant tax year is greater than the s.2(2) amount for that year, then the surplus capital payments are carried back in the same way as surplus s.2(2) amounts, matching the surplus capital payments against the unmatched trust gains of each earlier year, starting with the latest year first and only moving back to an earlier year where there are no unmatched trust gains left in the later year. Any capital payments that remain unmatched are carried forward from the current tax year to be matched against the s.2(2) amounts of future years. ...

455. Note that:

- [1] the matching rules are modified by new subs.(4) of s.762 ICTA in relation to offshore income gains; and
- [2] capital payments are matched to trust gains within a given tax year on a pro rata basis, not on a daily basis.

The s.87 guidance note provides:

14. A key element of the FA 2008 changes is the introduction of rules for matching capital payments to section 2(2) amounts from 6 April 2008. The basic rules are set out in section 87A TCGA in a series of steps. Capital payments are matched against section 2(2) amounts in the following order:

15. First against section 2(2) amounts of the same year.

16. Second against unmatched section 2(2) amounts of earlier years taking the most recent year first.

17. Third against section 2(2) amounts of later years. In this case priority is given first to any capital payments received in that year and then to any capital payments brought forward. If capital payments are brought forward from more than one year the capital payment received in the latest year is matched first.

The rules changed from a FIFO to a LIFO basis in 2008. HMRC did not state why they made this change. I surmise that it was done to minimise the benefit of 2008 transitional relief, which applies if post-2008 capital payments are matched with pre-2008 s.1(3) amounts. The old rule would have maximised the benefit of the relief, so that trusts with substantial s.1(3) amounts may have been free of CGT for a substantial period of time. Had the reason been given, there might have been some debate about whether the benefit justified the change, but as it was, there was none. But there it is.

A note on terminology: the statutory language is to match s.1(3) amounts

(trust gains) *with* capital payments; HMRC guidance tends to say: match *to* or *against* capital payments. It is better to use the statutory terminology rather than a paraphrase; though nothing actually turns on the preposition.

### 57.15.2 *The statute*

Section 87A TCGA provides:

- (1) This section supplements s.87.
- (2) The following steps are to be taken for the purposes of matching capital payments with s.1(3) amounts.

*Step 1*

Find the s.1(3) amount for the relevant tax year.

*Step 2*

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Armed with these figures we proceed to the matching rule:

*Step 3*

The s.1(3) amount for the relevant tax year is matched with—

- (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.1(3) amount for the relevant tax year, each capital payment so received, and
- (b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.1(3) amount for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

I refer to a case within (a) as a “**surplus s.1(3) amount**” and a case within (b) as a “**surplus capital payment**”.

The next step is a recomputation of the s.1(3) amount and of the amount of capital payments

*Step 4*

[1] If para (a) of Step 3 applies—

That is, if there is a surplus s.1(3) amount—

- (a) reduce the s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
- (b) reduce the amount of those capital payments to nil.

I refer to the s.1(3) amount after this reduction as the “**unmatched s.1(3)**”

**amount”.**

[2] If para (b) of that Step applies—

That is the case of a surplus capital payment—

- (a) reduce the s.1(3) amount for the relevant tax year to nil,  
and
- (b) reduce the amount of each of the capital payments referred to there  
by the relevant proportion of that capital payment.

I refer to the amount of the capital payments after this deduction as the  
“**unmatched capital payments**”.

Then one starts again at the beginning, but with modifications:

*Step 5*

[1] Start again at Step 1 (unless subs.(3) applies).

[2] If the s.1(3) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—

- (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
- (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

I again refer to a case within step 5[2] (where there is an unmatched s.1(3) amount) as a “**surplus s.1(3) amount**”.

Amended as step 5[2] directs, Steps 1-4 become:

*Step 1*

Find the s.1(3) amount for the relevant tax year [ie the unmatched s.1(3) amount].

*Step 2*

Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*

- (a) *is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

*Step 3*

The s.1(3) amount for the relevant tax year is matched with—

- (a) if the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*
  - (a) *is before the last tax year for which Steps 1 to 4 have been*

*undertaken, and*

*(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

does not exceed the [unmatched ] s.1(3) amount for the relevant tax year, each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments. “The relevant proportion” is the [remaining] s.1(3) amount for the relevant tax year divided by the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*

*(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

*Step 4*

If para (a) of Step 3 applies—

(a) reduce the [unmatched] s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

If para (b) of that Step applies—

(a) reduce the [unmatched] s.1(3) amount for the relevant tax year to nil, and

(b) reduce the [unmatched] amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Eventually the unmatched s.1(3) amount is reduced to nil (ie all the s.1(3) amount is matched). Then step 5[2] ceases to apply. Our journey then takes us to step 5[3]:

*Step 5*

[3] If the s.1(3) amount for the relevant tax year (as so reduced) is nil, read references to the s.1(3) amount for the relevant tax year as the s.1(3) amount for the latest tax year—

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.1(3) amount is not nil.

I refer to a case within step 5[3] as a “**surplus capital payment**”. This is a case where:

(1) there is no unmatched s.1(3) amount for the relevant year;

(2) there is a s.1(3) amount for an earlier year.

Amended as step 5[3] directs, steps 1-4 become:

*Step 1*

Find the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year —*

*(a) which is before the last tax year for which Steps 1 to 4 have been*

*undertaken, and*

*(b) for which the s.1(3) amount is not nil.*

*Step 2*

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

*Step 3*

The s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*

*(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) for which the s.1(3) amount is not nil*

is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.1(3) amount ~~for the relevant tax year~~, *for the latest tax year—*

*(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) for which the s.1(3) amount is not nil.*

each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*

*(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) for which the s.1(3) amount is not nil.*

divided by the total amount of capital payments received in the relevant tax year.

*Step 4*

If para (a) of Step 3 applies—

(a) reduce the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*

*(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) for which the s.1(3) amount is not nil.*

by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

If para (b) of that Step applies—

(a) reduce the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*

*(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) for which the s.1(3) amount is not nil.*

to nil, and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

### 57.15.3 *When to stop*

Section 87A(3) TCGA (incorporated at step 5[1]) states when one can stop repeating these steps:

This subsection applies if—

- (a) all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil, or
- (b) the s.1(3) amounts for the relevant tax year and all earlier tax years have been reduced to nil.

That is, one stops when there are no unmatched capital payments or s.1(3) amounts.

Section 87A(4) TCGA provides:

The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

That seems self-evident.

#### 57.15.4 Example: Surplus trust gains

EN FB 2008 provides some examples. *Text in italics represents HMRC comments:*

**56. Section 87A: Example 1: section 2(2) amount is greater than the total amount of capital payments for latest tax year:**

The facts assumed in the example are as follows:

2008-09: *no surplus trust gains or surplus capital payments*

<i>Year</i>	<i>Capital payment</i>	<i>s.2(2) amount</i>
2009-10:	£100k	nil
2010-11:	£200k	nil
2011-12:	£500k	nil
2012-13:	£500k	£2m

I set out the text of the relevant steps in the analysis.

*Step 1*

Find the s.2(2) amount for the relevant tax year.

*Step 2*

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus s.1(3) amount, because “the total amount of capital payments received in the relevant tax year” (£500k) does not exceed “the s.1(3) amount for the

relevant year” (£2m). Accordingly:

*Step 3*

The s.1(3) amount for the relevant tax year is matched with—

- (a) ... each capital payment so received,

Thus step 3 states that £2m (the s.1(3) amount for 2012/13) is matched with the £500k capital payment. There are two difficulties with this. First, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.1(3) amount, and step 3 tells us that the *s.1(3) amount* is matched with the capital payment. The answer is that matching is by implication a symmetrical relationship, ie if A is matched with B, then B is matched with A.

Secondly, applying step 3 literally, the capital payment (£500k) is matched with the *entire* s.1(3) amount (£2m). This does not matter because s.87(3) TCGA restricts the charge to the amount of the capital payment. In order to follow s.87(3) one needs to read it together with s.87(2):

(2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.1(3) amount for the relevant tax year or any earlier tax year.

(3) The amount of chargeable gains treated as accruing is equal to—

- (a) the amount of the capital payment, or
- (b) if only part of the capital payment is matched, the amount of that part.

But the HMRC analysis is as follows:

*Match as follows:*

- a. 2012-13 capital payments £500,000 match to £500,000 gains.*

The HMRC analysis (wisely) does not try to refer to the statutory steps which authorise this conclusion. (Indeed, there is no reason to think that the author of the HMRC example read the legislation.) But the end result is the same.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

*Step 4*

If para (a) of Step 3 applies—

- (a) reduce the s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
- (b) reduce the amount of those capital payments to nil.

So our revised table becomes:

<i>Year</i>	<i>Capital payment</i>	<i>s.1(3) amount</i>
2009-10:	£100k	nil
2010-11:	£200k	nil
2011-12:	£500k	nil
2012-13:	£0 <del>£500k</del>	£1.5 <del>£2m</del>

The HMRC analysis is as follows:

- [1] 2012-13 capital payments reduced to nil.
- [2] Unmatched 2012-13 trust gains reduced to £1.5 million.
- [3] Refer unmatched trust gains to preceding year.

Point [1] is correct. Points [2] and [3] are a fair paraphrase.

Our journey takes us to step 5:

*Step 5*

- [1] Start again at Step 1 (unless subsection (3) applies).
- [2] If the s.1(3) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
  - (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
  - (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

There is still a surplus s.1(3) amount (the s.1(3) amount for the relevant tax year is not nil, it is now £1.5m).

We revert to step 2 which now reads:

*Step 2*

- Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*
  - (a) *is before the last tax year for which Steps 1 to 4 have been undertaken, and*
  - (b) *is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries*

The “latest tax year” is now 2011-12 and we can take the figures from the revised table.

We move on to step 3. This is a surplus s.1(3) amount case, because “the total amount of capital payments received in the latest tax year” (£500k) does not exceed “the s.1(3) amount for the relevant year” (£1.5m). Accordingly:

*Step 3*

The s.1(3) amount for the relevant tax year is matched with—

- (a) ... each capital payment so received,

Thus step 3 states that £1.5m (the unmatched s.1(3) amount) is matched with the £500k capital payment. But the HMRC analysis is as follows:

*b. 2011-12 unmatched capital payments £500,000 match to £500,000 gains.*

As noted, this is a loose paraphrase of step 3, but it does not matter.

We move on to step 4. Ours is a step 3(a) case, so step 4 provides:

*Step 4*

If para (a) of Step 3 applies—

- (a) reduce the s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
- (b) reduce the amount of those capital payments to nil.

So:

(a): reduce the s.1(3) amount for the relevant year thus: £1.5m – £500k = £1m.

(b): reduce the capital payment for the latest year [2011-12] to nil.

The HMRC analysis is as follows:

*2011-12 capital payments reduced to nil.*

*Unmatched 2012-13 trust gains reduced to £1 million.*

*Refer unmatched trust gains to preceding year.*

The process repeats once again, but “the latest tax year” now becomes 2009-10. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

*2010-11 unmatched capital payments £200,000 match to £200,000 gains.*

*2010-11 capital payments reduced to nil.*

*Unmatched 2012-13 trust gains reduced to £800,000.  
Refer unmatched trust gains to preceding year.*

The process repeats once again, but “the latest tax year” now becomes 2009-10. It is not necessary to set out the steps. The HMRC analysis (or paraphrase) is as follows:

*d. 2009-10 unmatched capital payments £100,000 match to £100,000 gains.  
2010-11 capital payments reduced to nil.  
Unmatched 2012-13 trust gains reduced to £700,000.  
Refer unmatched trust gains to preceding year.*

At this point s.87A(3) TCGA applies because “all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil”. Accordingly the steps come to an end. The HMRC analysis is:

*e. No unmatched capital payments in 2008-09 or earlier years.*

Lastly, the HMRC analysis provides:

*Carry forward unmatched trust gains of 2012-13 of £700,000 to be matched against capital payments of 2013-14 and subsequent years.*

This is a reference to step 1 as amended by step 5[3] but the point does not actually arise under the facts of the HMRC example.

It is noteworthy that in order to deal with the HMRC example (which is a simplification of a typical real life case, for there is only one s.1(3) amount) one has to carry out 15 steps.

The s.87 guidance note provides:

**Example 3: New section 87A - Section 2(2) amounts greater than capital payments in latest year**

At the start of 2008-09 there are no unmatched capital payments or section 2(2) amounts.

Year	Capital payments	S.2(2) amount
2008-09	£10,000	Nil
2009-10	£15,000	Nil
2010-11	£2,000	£24,000

When the years 2008-09 and 2009-10 are considered immediately after the end of those years no chargeable gains accrue.

In 2010-11 the capital payment of £2,000 is matched against the section 2(2) amount. A chargeable gain of £2,000 accrues in the year 2010-11.

The capital payments for 2010-11 are reduced to nil. The section 2(2) amount is reduced to £22,000 (£24,000 – £2,000).

The £22,000 section 2(2) amount for 2010-11 is matched against the capital payments of £15,000 in 2009-10. A chargeable gain of £15,000 accrues in the year 2010-11.

The section 2(2) amount for 2010-11 is reduced to £7,000 (£24,000 – £2,000 – £15,000)

The capital payments for 2009-10 are reduced to nil.

The £7,000 section 2(2) amount for 2010-11 is matched against the capital payments of £10,000 for 2008-09. A chargeable gain of £7,000 accrues in the year 2010-11.

The section 2(2) amount for 2010-11 is reduced to nil (£24,000 – £2,000 – £15,000 – £7,000). The capital payments for 2008-09 are reduced to £3,000 (£10,000 – £7,000). These capital payments will be set against future section 2(2) amounts.

The chargeable gains for 2010-11 total £24,000 (£2,000 + £15,000 + £7,000).

#### 57.15.5 *Example: Surplus capital payment*

HMRC's second example is as follows

***57. Section 87A: Example 2: capital payments are greater than section 2(2) amount for latest tax year: The facts assumed in the example are as follows:***

*2008-09: no surplus trust gains or surplus capital payments*

<i>Year</i>	<i>Capital payment</i>	<i>s.2(2) amount</i>
<i>2009-10:</i>	<i>nil</i>	<i>£100k</i>
<i>2010-11:</i>	<i>nil</i>	<i>£200k</i>
<i>2011-12:</i>	<i>nil</i>	<i>£500k</i>
<i>2012-13:</i>	<i>£2m</i>	<i>£500k</i>

I set out the text of the relevant steps in the analysis.

##### *Step 1*

Find the s.2(2) amount for the relevant tax year.

##### *Step 2*

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus capital payment because “the total amount of capital payments received in the relevant tax year” (£2m) does exceed “the s.1(3) amount for the relevant year” (£500k). Accordingly:

*Step 3*

The s.1(3) amount for the relevant tax year is matched with—

- (b) ... the relevant proportion of each of those capital payments.

The relevant proportion” is the s.1(3) amount for the relevant tax year (£500k) divided by the total amount of capital payments received in the relevant tax year (£2m) = 0.25.

Thus step 3 states that £500k (the s.1(3) amount) is matched with one quarter of the capital payment = £500k. As noted, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.1(3) amount, and step 3 tells us that the *s.1(3) amount* is matched with the capital payment. The solution is that matching is a symmetrical relationship, ie if A is matched with B, then B is matched with A.

The HMRC analysis is as follows:

*Match as follows:*

- a. 2012-13 capital payments £500,000 match to £500,000 gains.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

*Step 4*

[2] If para (b) of that Step [step 3] applies—

- (a) reduce the s.1(3) amount for the relevant tax year to nil, and  
 (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

So our revised table becomes:

<b>Year</b>	<b>Capital payment</b>	<b>s.1(3) amount</b>
2009-10:	nil	£100k
2010-11:	nil	£200k
2011-12:	nil	£500k
2012-13:	£1.5 <del>£2m</del>	£0 <del>£500k</del>

The HMRC analysis is as follows:

*Unmatched 2012-13 capital payments reduced to £1.5 million.*

*Refer unmatched capital payments to preceding year.*

Our journey takes us to step 5.

*Step 5*

[1] Start again at Step 1 (unless subs.(3) applies)....

[3] If the s.1(3) amount for the relevant tax year (as so reduced) is nil, read references to the s.1(3) amount for the relevant tax year as the s.1(3) amount for the latest tax year—

- (a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
- (b) for which the s.1(3) amount is not nil.

This is a surplus capital payment case, (the s.1(3) amount for 2012–13 is now nil).

We revert to step 3 which now reads:

*Step 3*

The s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *for which the s.1(3) amount is not nil*

is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken,*
- (b) *for which the s.1(3) amount is not nil.*

each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year*

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken,*
- (b) *for which the s.1(3) amount is not nil*

divided by the total amount of capital payments received in the relevant tax year.

The “latest tax year” is now 2011-12. This is a surplus capital payment case because “the total amount of capital payments received in the relevant tax year” (now £1.5m) does exceed “the s.1(3) amount for the latest year” (£500k). Accordingly:

*Step 3*

The s.1(3) amount for the latest tax year is matched with—

- (b) ... the relevant proportion of each of those capital payments.

The relevant proportion is one third.

The process repeats again and again. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

*2012-13 trust gains reduced to nil.*

*b. 2011-12: match 2012-13 capital payments £1.5 million to £500,000 gains.*

*2011-12 trust gains reduced to nil.*

*Unmatched 2012-13 capital payments reduced to £1 million.*

*Refer unmatched capital payments to preceding year.*

*c. 2010-11: match 2012-13 capital payments £200,000 to £200,000 gains.*

*2010-11 trust gains reduced to nil.*

*Unmatched 2012-13 capital payments reduced to £800,000.*

*Refer unmatched capital payments to preceding year.*

*d. 2009-10: match 2012-13 capital payments £100,000 to £100,000 gains.*

*2010-11 trust gains reduced to nil.*

*Unmatched 2012-13 capital payments reduced to £700,000.*

*Refer unmatched capital payments to preceding year.*

*e. No unmatched trust gains in 2008-09 or earlier years.*

*Carry forward unmatched capital payments of 2012-13 of £700,000 to be matched against trust gains of 2013-14 and subsequent years.*

It is noteworthy that in order to deal with the HMRC example (which is a simplification of a typical real life case, for there is only one capital payment in five years) one has to carry out 15 steps.

#### 57.15.6 *Year of death of beneficiary*

If a beneficiary dies in a tax year, all gains accruing to the trustees in that year are s.1(3) amounts, which can be matched with capital payments made to the beneficiary, even post-death gains. However gains of a subsequent tax year cannot be matched. Section 87 does not say so expressly but the beneficiary could not be subject to CGT on s.87 gains, as the charge is limited to UK residents (s.2 TCGA) and a deceased person is not resident in the UK. That has to be the rule: otherwise it could happen that an estate of a beneficiary who received capital payments could not be completely administered, as there might be a possibility of gains accruing at any time in the future.

HMRC agree. The CG Manual provides:

**CG38605: Beneficiary** [Nov 2019]

If a beneficiary dies having received unmatched capital payments those payments cannot be matched against trustees' section [1(3)] amounts for years after the year of death. They can be matched section [1(3)] amounts for the year of death even if the trustees' disposal is after the date of death.

Contrast the rule for s.86 which does not apply to gains accruing to the trustees in the year that the settlor dies, even pre-death gains.<sup>83</sup> Perhaps the reason for the s.87 rule is that it works (slightly) more fairly when two beneficiaries receive capital payments in a tax year and one of them dies during that year.

*57.15.7 Method statements: Critique*

The pre-2008 s.87 provided:

*(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*

*(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*

*(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

No reader who labouriously works through the almost endless iterative steps of s.87A will consider the new style of wording is an improvement on the old. I first speculated whether the legislation was drafted by someone who trained to write computer programs rather than legislation. The correct explanation seems to be that "method statements" (ie step-based drafting) was an innovation of the Tax Law Rewrite project in the search for new and clearer methods of drafting; the drafter of the FA 2008 adopted the technique, but in more clumsy hands the technique delivered obscurity rather than clarity.

---

83 See 56.12 (Death of settlor).

This does not necessarily mean that step-based drafting is a bad technique, but it certainly demonstrates how it can be used to bad effect. Finance Bills are generally drafted in a hurry (the FA 2008 was a mad panic) and clarity was a victim of the process.

The fundamental problem however is not the drafting, but the need to match capital payments with trust gains for a year.

### **57.16 Planning by matching**

Matching is a rough and ready rule and trustees need to plan carefully to avoid unfairness.

#### *57.16.1 Planning: Remittance basis*

Suppose:

- (1) Years 1–10: A beneficiary (“B”) occupies a UK house held by a trust. This is a capital payment.
- (2) Year 11: The house is sold for £1m gain and a s.1(3) amount arises. In principle the s.1(3) amount in year 11 is matched with the capital payments in years 1–10. The s.87 gain is taxed on an arising basis of the benefit received in the UK. If B is UK resident in year 11, this is an expensive matter. Suppose:
- (3) Year 11: The trustees make a capital payment of £1m to B outside the UK.

The s.1(3) amount is matched with the £1m capital payment and the s.87 gain is taxed on the remittance basis.

#### *57.16.2 Planning: Interest surcharge*

Since the surcharge matches on a LIFO basis, the charge can be avoided by realising gains in the year that any capital payment is made, so as to frank any capital payment with current year gains. If gains are not actually realised, the rules in schedule 4B TCGA make it fairly easy to realise deemed gains which may do just as well.<sup>84</sup>

### **57.17 Interest surcharge**

Section 91(1) TCGA provides:

---

<sup>84</sup> See 58.1 (Borrowing by non-resident trust).

This section applies if—

- (a) chargeable gains are treated under s.87 or 89(2) as accruing to a beneficiary by virtue of the matching (under s.87A) of all or part of a capital payment with the s.1(3) amount for a tax year (“the relevant tax year”),
- (b) the beneficiary is charged to tax by virtue of that matching, and
- (c) the capital payment was made more than one year after the end of the relevant tax year.

It is not enough that chargeable gains to accrue to a beneficiary, and that the beneficiary is charged to tax; this must be “by virtue of the matching”. But since gains do not accrue unless there is matching, and the beneficiary is not charged unless there is matching, the words appear to be otiose.

Section 91(1A) deals with part matching:

Where part of a capital payment is matched, references in subsections (2) and (3) to the capital payment are to the part matched.

We then turn to the tax increase:

- (2) [a] The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under subsection (3) below,
- [b] except that it shall not be increased beyond the amount of the payment;
- [c] and an assessment may charge tax accordingly.

Para 2[b] stops the Treasury increasing the rate of tax beyond 100%. One would hope it is not necessary.

Para 2[c] is otiose.

Section 91(3) specifies the amount of the increase:

The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this section) carried interest for the chargeable period at the rate of 10 per cent per annum.

Thus we have a notional 10% interest – the rate bears no relation to commercial interest rates – for a period called a chargeable period.

- (4) The chargeable period is the period which—
  - (a) begins with the later of the 2 days specified in subsection (5) below, and
  - (b) ends with 30th November in the year of assessment following

that in which the capital payment is made.

(5) The 2 days are—

- (a) 1st December in the tax year immediately after the relevant tax year, and
- (b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

I call this the “**interest surcharge.**” It is not interest in the strict sense of the word, but the wording is designed to give the some of the appearance of interest.

As the chargeable period cannot exceed 6 years and the maximum surcharge is 60% of the tax. As the top CGT rate is 20% the maximum rate of tax on a capital payment is therefore 32%. The top CGT rate is lower than top IT rates (though this has not always been the case).<sup>85</sup>

For completeness, the Treasury may alter the rules;<sup>86</sup> but they have never done so.

What is the position if the s.87 remittance basis applies? Para 1(2) sch 1 TCGA provides:

The [s.87] gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.

One might argue that there is no interest surcharge, because the gains are not charged to tax by virtue of matching; they are charged by virtue of the remittance. But the better view is the surcharge applies (by reference to the year of capital payment, not by reference to the year of remittance). HMRC agree.<sup>87</sup>

There is a small planning point here for remittance basis taxpayers. One could avoid the interest surcharge if the trustees make capital payments in the year that s.1(3) amounts (trust gains) accrue, with a view to remittance in later years; whereas if the capital payment is made in the later year, followed by prompt remittance, there is an interest surcharge.

The s.87 guidance note provides:

**Example 13: New section 91 - tax increase under section 91 TCGA**

As at [the start of] 2008-09 there are no unmatched capital payments or

---

85 Up to 2015/16, where the full surcharge applied, there was not much difference between IT and the top CGT rate.

86 Section 91(6)(7) TCGA.

87 See 57.19.1 (HMRC examples).

section 2(2) amounts.

<b>Year</b>	<b>Capital payments</b>	<b>S.2(2) amount</b>
2008-09	£ 3,000	£17,000
2009-10	£ 5,000	£ 6,000
2010-11	<u>£37,000</u>	<u>£16,000</u>
Total	<u>£45,000</u>	<u>£39,000</u>

In summary, the capital payments for each year are matched with the section 1(3) amounts for each year as follows:

	Capital payment	s.1(3) amount	s.87 gain	Unmatched s1(3) amount	Unmatched capital payment
2008-09	3,000	17,000	3,000	14,000	
2009-10	5,000	6,000	5,000	1,000	
2010-11	37,000	16,000	16,000	nil	21,000

In 2010-11 it is necessary to match the unmatched capital payments for that year against the unmatched section 2(2) amounts of earlier years. On a last in-first out basis £1000 is matched against the unmatched amount section 2(2) for 2009-10 and £14,000 against the unmatched section 2(2) amount for 2008-09.

Total gains of £31,000 arise as a result of the capital payment in 2010-11 matched as follows:

2010-11	£16,000
2009-10	£1,000
2008-09	£14,000

At the time of writing the annual exempt amount and rate of CGT are not known for 2010-11. This example assumes they are £10,200 and 18% respectively.

The tax due for 2010-11 is £3744 ( $[\text{£}31,000 - \text{£}10,200] @ 18\%$ ).

Section 91 TCGA will apply to increase the tax due on the gain £14,000.

The taxpayer's annual exempt amount can be set against that part of the gain. The tax due on £14,000 - £10,200 is £3800 @ 18% = £684. This amount of tax is increased by 20% ie £136 making the total tax payable £3880 (£3,744 + £136).

In the terminology of s.91, so far as the s.87 gain is matched with the £14k s.1(3) amount for 2008/09:

The relevant tax year is 2008/09

The chargeable period begins 1 December 2009.

The chargeable period ends 30 November 2011.

Hence the rate of the interest surcharge is 20%.

There is no interest surcharge so far as the s.87 gain is matched with the s.1(3) amount for 2009/10 as the condition in s.91(1)(c) is not met. In short, the interest surcharge rule does not apply if only one year has passed since the s.1(3) amount (trust gain).

#### *57.17.1 Interest surcharge planning*

*Realise gains later:* It would be worthwhile where practical to realise gains, in order to match a capital payment to those later gains, rather than matching to earlier gains which incurs the supplement.

*Make capital payments sooner:* If it is not possible to realise later gains, it would generally be better to make capital payments sooner, and pay the CGT sooner but without the surcharge, than to make the capital payments later and pay the surcharge.

#### *57.17.2 Interest surcharge: Critique*

What is the reason for the interest surcharge? It is to counter the perceived advantage that UK trusts pay CGT on an arising basis, but non-resident trusts (outside s.86) pay CGT on a capital payments basis, which is more favourable. But it works very oddly, particularly after the extension of s.87 to foreign domiciled settlors and beneficiaries in 2008. For instance, consider a trust set up some years ago by an Australian for Australian beneficiaries; one beneficiary comes to the UK and receives a capital payment here. Why should there be a surcharge?

The surcharge is not likely to bring in sufficient tax to justify the complications and unfairness that it causes. The case for repeal of the rule is very strong. But there does not seem any likelihood of that.

### **57.18 s.87 gains of split year**

Section 87(2A) TCGA provides:

If the relevant tax year is a split year as respects the beneficiary, the gains are treated as accruing in the UK part of that year.

So all s.87 gains of a split year come into charge.

#### *57.18.1 s.87 split year: Critique*

At first sight, s.87 ought to operate the same split-year rule as ordinary gains: s.87 gains accruing in the overseas part of a split year should not be taxed. That would however require one to determine when in the split

year s.87 gains accrue (or at least, whether gains accrue in the overseas part or the UK part of a split year).

In the following discussion, a “**split-year benefit**” is a benefit conferred during a split year.

In a simple case where trust gains of earlier years will exceed any split-year benefits, it is easy to see that s.87 gains accrue when the benefit is conferred. But where there are (or may be) insufficient trust gains of earlier years to match the split-year benefit, the question of when s.87 gains accrue is less clear. The amount of the s.87 gains depends on factors which are not determined until the end of the tax year:

- (1) the total amount of trust gains (less losses) of the entire tax year and
- (2) the total amount of capital payments to all beneficiaries in the entire tax year.

This was, I expect, the reason for the pre-2018 rule that s.87 gains accruing in a split year were time-apportioned across the year.

A fair and practical rule would be that benefits conferred on a beneficiary during the overseas part of their split year treated like benefits of a year of non-residence, ie (in short) disregarded.

The unfairness of the current rule is exacerbated by the uncertainty as to whether s.87 DT relief applies where a beneficiary is treaty-resident in an foreign state with a treaty in OECD model form.<sup>88</sup>

### 57.19 s.87 remittance basis

Section 87B TCGA provides what I call the “**s.87 remittance basis**”.

Section 87B(1) provides:

This section applies if—

- (a) chargeable gains are treated under s.87 as accruing to an individual in a tax year, and
- (b) s.809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers.

In order to understand the law one must carefully distinguish:

- (1) trust gains (gains accruing to the trustees)
- (2) s.87 gains (treated under s.87 as accruing to the beneficiary)

---

<sup>88</sup> See 57.60.2 (Beneficiary treaty-resident outside UK).

Section 87B(2) TCGA provides the relief:

The chargeable gains [s.87 gains] are chargeable gains accruing on the disposal of an asset situated outside the UK.<sup>89</sup>

This incorporates the remittance basis.<sup>90</sup> It would not work by itself as s.87 gains (being fictional) do not exist and cannot be remitted. So s.87B(3) TCGA provides:

For the purposes of Chapter A1 of part 14 of ITA 2007 (remittance basis) treat relevant property or benefits as deriving from the chargeable gains [the s.87 gains].

The definition of “relevant property or benefits” is convoluted, but ultimately what one would expect. Section 87B(4) TCGA provides:

For the purposes of subsection (3) property or a benefit is “relevant” if the capital payment by reason of which the chargeable gains [the s.87 gains] are treated as accruing consists of—

- (a) [i] the payment or transfer of the property or [ii] its becoming property to which s.60 applies, or
- (b) the conferring of the benefit.<sup>91</sup>

I refer to this as the “**derivation fiction**”.

Thus we have three fictions:

- (1) We pretend the beneficiary receives s.87 gains: this is the basic s.87 fiction.
- (2) We pretend the s.87 gains arise on the disposal of foreign situate assets.
- (3) We pretend the capital payments derive from those s.87 gains (the derivation fiction).

The derivation fiction feeds into remittance condition B. There is a taxable remittance if (in short):

---

<sup>89</sup> It would have been more accurate if the wording had been: “The chargeable gains [s.87 gains] are *treated as* chargeable gains accruing on the disposal of an asset situated outside the UK.” But nothing turns on that.

<sup>90</sup> See 53.15 (CGT remittance basis).

<sup>91</sup> The wording follows the wording of the definition of capital payment: see 57.7.2 (“Payment”).

- (1) *Property*<sup>92</sup> is brought/received/used in the UK (remittance condition A) and
- (2) That property is derived (indirectly) from foreign gains (remittance condition B).

Section 731 adopts a similar rule; for a fuller discussion see 47.39.1 (s.731 remittances: Operation).

A capital payment still reduces the s.1(3) amount (trust gains) even though the payment is (un)taxed under the s.87 remittance basis. This is sensible because other beneficiaries (and the trustees) could not know what the position was.

It does not matter whether the s.1(3) amounts (trust gains) accrue on disposals of UK or foreign assets. All that matters is whether the capital payment is remitted to the UK. HMRC agree. The s.87 guidance note provides:

43. The remittance basis applies to the s.87 gain not the gain that created the s.2(2) amount. For example, trustees dispose of an asset held outside the UK creating a s.2(2) amount.

In the same year they make a capital payment outside the UK to a non-domiciled beneficiary.

The capital payment is matched against the s.2(2) amount.

A s. 87 gain accrues to the beneficiary who has claimed the remittance basis for that year.

The trustees apply the proceeds of the disposal in buying investments in the UK.

The HMRC analysis is as follows:

This remittance of the gain which created the s. 2(2) amount [the trust gain] is not treated as a remittance of the s.87 gain by the beneficiary.<sup>93</sup>

Relevant property/benefits may be received in the UK in a year before the

---

92 Or services, but for clarity I refer only to property. I also assume that the property is brought/received/used by a relevant person.

93 Similarly, FAQ Residence & Domicile – NR trusts provides:

**“Does it make any difference if the assets in the non-resident trust or underlying non-resident company owned by the trust are UK situated?”**

There is no difference in the CGT treatment of UK situated vs foreign situated assets when these are owned by a non-resident trust or underlying non-resident company.”

s.87 gains accrue, due to the quirky matching rules. Suppose:

- (1) Year 1: a beneficiary receives a benefit; there are no s.1(3) amounts (trust gains) so the benefit is not matched and no s.87 gain accrues.
- (2) Year 2: the beneficiary remits the benefit to the UK. There is still no s.87 gain.
- (3) Year 3: trust gains accrue to the trustees and a s.87 gain accrues to the beneficiary.

The s.87 gain is deemed to be remitted in the year it arises (year 3) and not before.<sup>94</sup>

### 57.19.1 *Example: Outright payment*

The s.87 guidance note provides:

**Example 8 – New section 87B - remittance of capital payment: payment**

A is a UK resident and domiciled beneficiary of a non-UK resident settlement. B is a UK resident but non-UK domiciled beneficiary of the same settlement. The settlement owns shares in X Inc. X Inc is an American company registered on the New York Stock Exchange.<sup>95</sup>

In 2008-09 the trustees sell shares in X Inc for \$120,000 when the spot rate is £1 = \$1.50. The acquisition cost of the shares was \$20,000 when spot was also £1 = \$1.50. This creates a section 2(2) amount of £66,666 for 2008-09, ie \$100,000 @ 1.50.

In 2010-11 the trustees make capital payments of \$40,000 into the US bank accounts of each beneficiary. The spot rate of the US dollar at the date of the payment is £1 = \$1.75. Chargeable gains of £22,857 accrue to each beneficiary under section 87 in 2010-11 in respect of these capital payments. \$40,000 @ \$1.75 = £22,857.

At the time of writing the annual exempt amount and rate of CGT are not known for 2010-11 and 2012-13. This example assumes the rate of CGT is 18% for both years and the annual exempt amount was £10,000 in 2010-11 and £11,000 in 2012-13.

The example first deals with the position of A, the UK domiciled beneficiary:

Beneficiary A has other gains in 2010-11. The overall position is as follows.

- Section 87 gains £22,857
- Other personal gains £40,000
- Other personal losses £20,000

---

94 See 17.36 (Remittance before income/gains arise).

95 This sentence is irrelevant, as the situs of the trust asset does not matter for s.87 purposes.

- Annual exempt amount £10,000

The amount on which CGT is chargeable is £32,857. The personal losses can be set only against the other personal gains but the annual exempt amount is allocated first to the section 87 gain leaving £12,857 of that part of the gain chargeable at 18%. The tax due on £12,857 is £2,314 (£12,857 @ 18%). This is increased by £462 (£2,314 @ 20%) because there is a delay of over one year in making the capital payment.

The example then deals with the position of B, the remittance basis taxpayer:

Beneficiary B claims the remittance basis for 2010-11 and leaves the \$40,000 in the US bank account. B also has other gains in 2010-11. These gains and losses arise on the disposal of assets situated in the UK. The overall position is as follows.

- Section 87 gains £22,857
- Other personal gains on UK assets £40,000
- Other personal losses on UK assets £20,000

B does not have an annual exempt amount in 2010-11 because they have claimed the remittance basis. B is not liable to CGT on the section 87 gain of £22,857 because of section 87B. B is liable to CGT at 18% on the full amount of the other net personal gains £20,000.

Because B has claimed the remittance basis they also have to decide whether or not to make an election under section 16ZA TCGA. The effect of that election is allow losses on the disposal of assets situated outside the UK to be set-off against gains, either foreign chargeable gains or gains on the disposal of assets situated in the UK. Unless the election is made the foreign losses will be lost. An effect of the election is that the annual exempt amount cannot be set foreign chargeable gains remitted to the UK, section 16ZB(4). B makes a valid election within the time limit, 31 January 2017.

In 2012-13 B remits \$30,000 of the \$40,000 from the US bank to their UK bank where it is converted to sterling at a rate of £1 = \$2.00 ie £15,000. B is not a remittance basis user in 2012-13. The rate of CGT is 18%. The annual exempt amount is £11,000. The remittance is a disposal of foreign currency in the US bank account giving a loss of £2,142 [ $\$30,000 @ \$2.00 = £15,000 - \$30,000 @ 1.75 = £17,142$ ].

B is liable to CGT in 2012-13 on the following elements.

The section 87 gain is a foreign chargeable gain. Section 12(2) and (3) TCGA provides this chargeable gain is treated as accruing in 2012-13 equal to the full amount of the gains remitted in 2012-13. B has remitted 75% of the £22,857 chargeable gain ( $30,000/40,000 \times £22,857$ ) = £17,142. Section 2(4) TCGA prevents the personal losses, £2,142, being set against this gain. Because of the election under s16ZA neither can the annual exempt amount be set against this part of the gain. Tax is due at 18% on £17,142 = £3,085. This tax is subject to the increase in section 91 TCGA. This is calculated by reference to the year the gain was matched ie 2010-11 not the year the gain was remitted. The rate

charged, 20%, will be the same that applied to beneficiary A. The total tax charged on this part of the gain is  $\pounds 3,085 + \pounds 617 = \pounds 3,702$ .

If B had not made the election under s16ZA the annual exempt amount could be set against the remitted gains reducing the amount liable to the increase under s91. But they would lose the benefit of losses on any assets situated the UK.

Additionally for 2012-13 B has other personal gains on UK assets of  $\pounds 18,000$ . Because of the election under s16ZA the personal losses  $\pounds 2,142$  can be set against these gains as can the annual exempt amount  $\pounds 11,000$ . With a tax rate of 18% the total tax charged on the net gains of  $\pounds 4,858$  is  $\pounds 971$ . The total CGT payable for 2012-13 is  $\pounds 4,673$  ( $\pounds 3,702 + \pounds 971$ ).

### 57.19.2 Example: Use of property

The next HMRC example concerns capital payments which take the form use of accommodation, rather than an outright transfer. Omitting irrelevant detail, the example is as follows:<sup>96</sup>

*Example 9 - New section 87B - Remittance of capital payment: benefit*  
C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement has s.2(2) amounts.

The trustees (or underlying companies) allow C to use rent-free:

- (1) a property outside the UK and
- (2) a property in the UK.

The HMRC analysis is as follows:

The use of both properties by C gives rise to a capital payment equal to the value of the benefit. These capital payments are matched against the section 2(2) amount and a s.87 chargeable gain accrues to C. Section 87B(2) TCGA provides this is a foreign chargeable s.87 gain.

The use of the UK property meets remittance condition A in section 809L.

---

96 The example in full, including its irrelevant detail, is as follows:

“C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement owns 100% of the issued share capital of a Gibraltar holding company which in turn owns 100% of the issued share capital of a Gibraltar company. That company owns a property in Spain. Both companies are non-UK resident.

The company sells the property in Spain creating a section 2(2) amount of  $\pounds 120,000$  through section 13 TCGA. The company invests some of the proceeds in the purchase of a smaller property in Spain. C is allowed to use the property rent-free.

C is also allowed rent-free use of a cottage in Devon owned by the settlement.”

Because section 87B(3) TCGA provides the benefits derive from the [s.87] chargeable gains the use of that property also meets remittance condition B in section 809L(3)(b) ITA 2007.

C is treated as remitting the capital payment created [by] the use of the Devon property to the UK and C is liable to CGT on that [capital] payment.

The use of the property outside the UK is not treated as a remittance to the UK and C is not liable to CGT on that payment.

Remittance conditions A and B are (so far as relevant):

- (2) Condition A is that—
  - (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person ...
- (3) Condition B is that ...
  - (b) the property, [ie the property within (2)(a)]—
    - (i) derives (wholly or in part, and directly or indirectly) from the ... chargeable gains, and
    - (ii) ... is property of ... a relevant person...

Remittance condition A is satisfied on the basis that property (the Devon cottage) is used in the UK. Clarke questions whether remittance condition B is satisfied.<sup>97</sup> There is a relevant benefit: the rent free use of the cottage. That benefit is deemed to be derived from the s.87 gain. It does not follow from that deeming that the property (the Devon cottage) derives from the s.87 gain.

The correct analysis, it is suggested, is that:

- (1) Condition A is satisfied because the right to use the cottage is itself property received or used in the UK; and
- (2) That right is the benefit which is deemed to derive from the s.87 gain.

Clarke argues that “it is the benefit, not any proprietary interest conferred by the benefit, which is derived from the s.87 gains.” But if the benefit is derived from the s.87 gains, then the proprietary interest conferred by the benefit is also derived (indirectly) from the s.87 gains.<sup>98</sup>

## 57.20 Non-resident disregards: Outline

---

<sup>97</sup> *Clarke's Offshore Tax Planning* (24<sup>th</sup> ed, 2017-2018), para 79.6 (Benefit).

<sup>98</sup> See too 47.39.3 (Beneficial loan).

For a similar argument in another context, see 17.15 (Property is the income or gains).  
 FD\_57\_Capital\_Payments\_from\_Non-resident\_Trusts\_S87\_2021.wpd 03/11/21

HM Treasury say:

**2.3.1 Treatment of capital gains in trusts**

... where a beneficiary is not UK resident, no tax is due. Making a capital payment to such a beneficiary has the effect of reducing the gains in the pool and the amounts available to match against any subsequent payments to UK resident beneficiaries. For tax purposes, the pool of gains has been depleted by the payments to non-residents – even though the non-residents did not pay tax on the gain.

... under the new [2018] regime capital payments to a non-resident beneficiary ... will ... not be matched against the pool of trust gains. This is regardless of the domicile status of the settlor and whether or not the recipient of the payment is the settlor or another beneficiary of the trust. This will ensure that the pool of gains against which payments to UK beneficiaries are matched will not be depleted because of payments made to non-residents.<sup>99</sup>

As usual, the policy can be stated in a few lines but its implementation requires a chapter to discuss.

57.20.1 *Navigation*

The following table may assist:

<b>TCGA section</b>	<b>Topic</b>	<b>See para</b>
87D	Non-resident disregard	57.21
87E	Temporary non-resident	57.22
87F	Final trust year	57.24
87G-M	s.87 settlor-attribution	57.29
87N	Migrant disregard	57.23
87P	Temporary migrant	57.23.1

**57.21 Non-resident disregard**

Section 87D(1) TCGA provides:

[a] For the purposes of sections 87 and 87A as they apply in relation to

99 Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.5.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf)

a settlement,<sup>100</sup> no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2) ...

The section then signposts some exceptions:

[b] but this—

- (a) is subject to
  - [i] subsection (3) [settlor-attribution rule] and
  - [ii] section 87E [temporary non-residence], and
- (b) does not affect the operation of sections 87I to 87L [onward gifts] (see, in particular, sections 87K(2) and 87L(2) which apply sections 87 and 87A by reference to the payment mentioned in section 87I(1)(a)).

Section 87D(2) TCGA then identifies the disregarded payments:

[a] A capital payment is within this subsection if (and to the extent that<sup>101</sup>) it is in a tax year received from the trustees of the settlement by a beneficiary who at all times in that year is not resident in the UK,

[b] but this is subject to section 87F [final trust year].

I refer to this rule as the “**non-resident disregard**”. That is not a neat label, but it is difficult to think of a better one. The rule is one of a number of capital payment disregards.<sup>102</sup>

It follows that the non-resident beneficiary will not be taxed, even if the capital payment is matched at a later time when they have become UK resident.

There are five exceptions to the non-resident disregard; for some reason, 4 are mentioned in s.87D(1) and the fifth is mentioned in s.87D(2). They are:

<b>TCGA section</b>	<b>Topic</b>	<b>See para</b>
87D(3)	s.87 settlor attribution	57.21.2
87E	Temporary non-resident	57.22
87F	Final trust year	57.24
87K(2), 87L(2)	Onward gifts	57.33

100 Section 87D(1) refers to s.87/87A “as they apply in relation to a settlement” but the sections do not apply to anything else. The phrase is otiose, though it does no harm.

101 The words in brackets assume that one capital payment could be made partly to a non-resident; that seems a somewhat laboured view, but it does not matter.

102 See 57.11.4 (Disregard of payment to co: s.87C).

What about a capital payment to a non-resident company which is treated as made to a UK resident participator, under the s.96(2) rule?<sup>103</sup> Context show that should not be disregarded.

### 57.21.1 *EU-law compliance*

Is the non-resident disregard EU-law compliant? The rule is particularly odd for charities, as a capital payment to a UK resident charity is not disregarded, but a capital payment to a non-resident charity is disregarded. That is likely a breach of EU law. But that point may not often arise.

### 57.21.2 *Preservation of s.87 settlor-attribution*

The non-resident disregard in s.87D(2) would apply where:

- (1) There is a capital payment to a non-resident who is close-family of the settlor
- (2) The settlor is UK resident and within the s.87 settlor-attribution rule<sup>104</sup>

In this case the non-resident disregard would help the taxpayer as it would disapply the s.87 settlor-attribution rule. Section 87D(3) TCGA prevents this:

Subsection (1) does not apply in relation to a capital payment (or a part of a capital payment) if-

- (a) the recipient beneficiary is a close member of the settlor's family (see section 87H)<sup>105</sup> when the beneficiary receives (or is treated as receiving) the payment (or part),
- (b) the payment (or part) is received on or after 6 April 2018, and
- (c) the settlor is resident in the UK in the tax year in which the payment (or part) is received.

In short, the s.87 settlor-attribution rule has priority over the non-resident disregard.

### 57.21.3 *Planning*

Separate settlements (for UK and non-UK beneficiaries) are better than one settlement for both.

---

103 See 57.11 (Payment to close co: s.96(2) rule).

104 See 57.26 (Settlor-attribution rules).

105 See 57.27.2 ("Close-family").

Where a single settlement currently exists, a transfer to separate settlements for separate branches of the family is likely to be advantageous.

#### 57.21.4 *Pre-2018 payment to non-resident*

Para 1(12) sch 10 FA 2018 provides:

The new sections 87D and 87E have effect—

- (a) except as provided by the new section 87D(3) [preservation of settlor-attribution rule], in relation to payments received in the tax year 2018-19 or a later tax year, and
- (b) in the tax year 2018-19 and later tax years, also in relation to payments received before the tax year 2018-19 that have not been matched under section 87A of TCGA 1992 as it applies for tax years before the tax year 2018-19.

Pre-2018 payments to non-residents that are matched pre-2018 are unaffected.

Pre-2018 payments to non-residents that are unmatched pre-2018 are disregarded. Thus there is an element of retrospectivity in the rule.

#### 57.22 **Payment to temporary non-resident**

The non-resident disregard in s.87D(2) would apply where:

- (1) There is a capital payment to a non-resident who is temporarily non-resident
- (2) The beneficiary becomes UK resident

In this case the non-resident disregard would help the taxpayer by taking the capital payment out of the s.87 TNR charge.<sup>106</sup>

Section 87E(1) TCGA prevents this:

If-

- (a) as a result of section 87D, no account is taken of a capital payment (or a part of a capital payment) for the purposes of sections 87 and 87A,
- (b) the recipient beneficiary is an individual who is temporarily non-resident,<sup>107</sup> and

<sup>106</sup> See 10.7 (TNR gains/losses).

<sup>107</sup> Section 87E(2) TCGA incorporates the usual TNR definitions: “Part 4 of Schedule 45 to FA 2013 explains—

- (c) the payment (or part) is received in the beneficiary's temporary period of non-residence, the payment (or part) is treated for the purposes of sections 87 and 87A as received (by the beneficiary) in the beneficiary's period of return, and account is to be taken of it accordingly for those purposes.

The payment is disregarded in the year of payment, but taken into account in the year of return. For instance: Suppose a trust had trust gains of £3m

- (1) Year 1: Payment of £2m to X (temporarily non-resident). Payment is disregarded.
- (2) Year 2: Payment of £2m to Y (UK resident). Payment is matched with trust gains and £2m s.87 gains accrue to Y.
- (3) Year 3: X becomes UK resident. The year 1 payment is matched with the outstanding £1m trust gains, and £1m s.87 gains accrue to X.

By contrast, if X had returned in year 2, then £1.5m s.87 gains would accrue to each of X and Y.

### 57.22.1 Pre-2015 migration

Para 2 sch 10 FA 2018 provides:

- (1) Sub-paragraph (2) applies in a case where-
  - (a) section 10A of TCGA 1992 (temporary non-residents) as substituted by paragraph 119 of Schedule 45 to FA 2013 applies in relation to an individual,

That is, a post-2013 migration.

- (b) the period of temporary non-residence<sup>108</sup> began before 8 July 2015, and
- (c) a capital payment (or part of a capital payment) is treated by
  - [i] section 87E [payment to temporary non-resident] or
  - [ii] 87P [payment to temporary migrant] of TCGA 1992 as received by the individual in the period of return.
- (2) For the purposes of capital gains tax in respect of any chargeable gain treated by section 87 of TCGA 1992 as accruing to the individual as a result of matching of the payment (or part), section 809B(1A) of

---

(a) when an individual is to be regarded as “temporarily non-resident”, and  
(b) what “the temporary period of residence” and “the period of return” mean.”

This is repeated in s.87P(2) TCGA and para 2(4) sch 10 FA 2018.

108 Para 2(4) incorporates the usual TNR definitions.

ITA 2007 does not have effect in relation to the tax year which consists of or includes the period of return.

Section 809B(1A) applies deemed domicile rules to s.809B (claim for remittance basis).<sup>109</sup> So the effect is to disapply deemed domicile.

Para 2(3) sch 10 FA 2018 provides:

Where by virtue of sub-paragraph (2) the individual makes a claim under section 809B of ITA 2007 for any of the tax years 2018-19 to 2020-21 inclusive, sections 809C, 809G and 809H of ITA 2007 do not apply to the individual for that tax year.

This disapplies the remittance basis charge, which seems generous, though it will not often arise.

### **57.23 Migrant disregard**

The non-resident disregard in s.87D(2) would not apply where:

- (1) There is a capital payment to a UK resident
- (2) There are no trust gains, so there is no s.87 charge at that time
- (3) The individual becomes non-resident
- (4) Trust gains then accrue, which are matched with the earlier capital payment

Section 87N TCGA deals with this:

- (1)[a] For the purposes of sections 87 and 87A as they apply in relation to a settlement for a particular tax year, no account is to be taken of a capital payment (or part of a capital payment) within subsection (2),  
     [b]but this is subject to section 87P [temporary migrant].

The wording is the same as the 87D disregard.

- (2) A capital payment is within this subsection—
  - (a) if it is received by a beneficiary of the settlement before the particular tax year,
  - (b) if the relevant person is resident in the UK in the tax year in which it is received,
  - (c) if the relevant person is not resident in the UK in the particular tax year, and

---

<sup>109</sup> Section 809B(1A) provides: “Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b).”

- (d) so far as it has not been matched (under section 87A as it applies for tax years before the particular tax year) with—
  - (i) the section 1(3) amount for any tax year before the particular tax year, but not earlier than the tax year 2018-19, in which the relevant person is resident in the UK, or
  - (ii) the section 1(3) amount for any tax year earlier than the tax year 2018-19.
- (3) For the purposes of subsection (2), the beneficiary is “the relevant person” unless section 87G(2) applies in relation to the capital payment in which event the settlor is “the relevant person”.

I refer to the beneficiary as the “**migrating beneficiary**”, and the rule is the “**migrant disregard**”.

### 57.23.1 *Temporary migrant*

Section 87P TCGA is the equivalent of s.87E TCGA.<sup>110</sup> The migrant disregard in s.87N(2) would apply where:

- (1) There is a capital payment to a UK resident
- (2) There are no trust gains, so there is no s.87 charge
- (3) The beneficiary becomes temporarily non-resident
- (4) Trust gains then arise

In this case the migrant disregard would help the taxpayer by taking the capital payment out of the normal TNR charge.<sup>111</sup>

Section 87P(1) TCGA prevents this:

If—

- (a) as a result of section 87N, no account is taken of a capital payment (or a part of a capital payment) for the purposes of sections 87 and 87A as they apply in relation to a settlement for a particular tax year,
- (b) the recipient beneficiary (where section 87G(2) does not apply in relation to the capital payment), or the settlor (where section 87G(2) does apply in relation to the capital payment), is an individual who is temporarily non-resident,<sup>112</sup>
- (c) the whole or part of the particular tax year constitutes, or forms part of, that individual’s temporary period of non-residence,

---

110 See 57.22 (Temporary non-resident: Payment postponed until return).

111 See 10.7 ( TNR gains/losses).

112 Section 87P(2) incorporates the standard TNR definitions.

- (d) either—
  - (i) that individual’s temporary period of non-residence begins with the start of a tax year and the payment (or part) is received before that tax year, or
  - (ii) that individual’s temporary period of non-residence begins otherwise than at the start of a tax year and the payment (or part) is received before, or at any time in, the tax year in which that individual’s temporary period of non-residence begins, and
- (e) the payment (or part) has not been matched (under section 87A as it applies for tax years before the particular tax year) with—
  - (i) the section 1(3) amount for any tax year before the particular tax year, but not earlier than the tax year 2018-19, in which that individual is resident in the UK, or
  - (ii) the section 1(3) amount for any tax year earlier than the tax year 2018-19,

the payment (or part) is treated for the purposes of sections 87 and 87A as received (by that individual) in that individual’s period of return, and account is to be taken of it accordingly for those purposes.

The payment is disregarded in the year of payment, but taken into account in the year of return.

### 57.23.2 *Commencement*

Para 1(15) sch 10 FA 2018 provides:

The new sections 87N and 87P have effect where the particular tax year is the tax year 2018-19 or a later tax year.

### 57.24 **Final trust year**

The policy seems to be that prompt termination of a trust is a public good; and in such a case there is a limited exception to the non-resident disregard.

Section 87F TCGA provides:

- (1) This section applies in relation to a settlement if-
  - (a) in a particular tax year, the settlement ceases to exist,
  - (b) two or more beneficiaries (“the recipients”) in the year receive capital payments from the trustees, and
  - (c) at least one of the recipients is, and at least one is not, a

non-resident beneficiary.<sup>113</sup>

(2) Those capital payments, so far as received by such of the recipients as are non-resident beneficiaries, are not within section 87D(2).

If capital payments are made to UK and non-UK beneficiaries the capital payment is apportioned between them.

This has important planning implications. Suppose a trust has £4m trust gains, £8m assets, and a UK and a non-resident beneficiary.

- (1) Suppose there is a £4m capital payment to the non-resident beneficiary in year one, and the balance is paid to the UK resident in year 2. The £4m is taxable.
- (2) Suppose the two payments are made in the same year. The UK tax charge is on £2m.

There may be scope for planning by transferring funds to another settlement, and so terminating an existing settlement.

#### 57.24.1 *Commencement*

Para 1(13) sch 10 FA 2018 provides:

The new sections 87F [final trust year] ... and the amendments made by subparagraphs (4) and (10), have effect in relation to payments received in the tax year 2018-19 or a later tax year

#### **57.25 Non-resident disregard: Critique**

The pre-2018 matching rules were a rough and ready solution to the intractable problem of attributing trust gains to beneficiaries; but they were a solution of a kind. The 2018 rules attribute (more or less) all trust gains to UK residents. For multi-jurisdiction families, ie where family members are resident in different jurisdictions, they will lead to double or multiple taxation, as beneficiaries resident in non-UK jurisdictions (other than tax havens) will also be subject to tax on benefits. The tax may exceed the gains.

One might regard the disregard as an illustration of Brexit parochialism, but that is perhaps to over-intellectualise.

HMRC presented the disregard as a consequence of introducing the

---

113 Section 87F(3) provides: "In this section "non-resident beneficiary" means a beneficiary who at all times in the year is not resident in the UK."

deemed domicile changes,<sup>114</sup> but that was the occasion and not the cause of the change.

## 57.26 Settlor-attribution: Introduction

Settlor-attribution rules apply where benefits within the scope of s.87, s.643A, or s.731 are received by close family of the settlor. If the relevant conditions (which I call attribution conditions) are satisfied, the s.87 gain or s.643A/731 income is attributed to the settlor; that is, treated as arising to the settlor rather than the individual (close-family) receiving the benefit.<sup>115</sup>

These attribution rules are written out 3 times:

Section	Topic	Supplement	See para
s.87G TCGA	s.87 settlor-attribution rule	s.87H	57.29
s.643A(3)(4) ITTOIA	s.643A settlor-attribution rule	s.643E	44.27
s.733A(2)(3) ITA	s.731 settlor-attribution rule	s.733B	47.45

I refer to these together as “**settlor-attribution rules**”.

There is a further set of attribution rules which apply where:

- (1) Benefits within the scope of s.87, s.643A or s.731 are received by a recipient who is not close-family of the settlor.
- (2) The recipient gives the benefits to close family of the settlor.

Again, the s.87 gain or s.643A/s.731 income is in some cases attributed to the settlor, that is, treated as arising to the settlor rather than the individual (close-family) receiving the gift.

114 Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.5: “The government is concerned that there will be an increased opportunity and incentive for those who are deemed domiciled and therefore benefit from the trust arrangements, to benefit further from existing rules that allow the “pool” of taxable gains in overseas trusts to be reduced when capital payments are made to non-resident beneficiaries. In order to address this opportunity for tax avoidance under the new regime capital payments to a non-resident beneficiary ... will therefore not be matched against the pool of trust gains.”

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf)

115 The background can be traced in HMRC, “Reforms to the taxation of non-domiciles: response to further consultation” (2016) para 2.3.5.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf) But this is now of historical interest only.

These attribution rules are also written out 3 times:

Section	Name (my terminology)	See para
s.87L TCGA	OG s.87 settlor-attribution rule	57.34
s.643L ITTOIA	OG s.643A settlor-attribution rule	44.35
s.733E ITA	OG s.731 settlor-attribution rule	47.53

I refer to these together as “**OG settlor-attribution rules**” (and they may be contrasted with the “**basic**” settlor-attribution rules mentioned above).

These uniform labels conveniently indicate a common template behind the rules, though they also conceal significant differences in the scope of the rules. It would have been neater if the attribution rules had been better aligned, but there it is.

The somewhat autistic repetition does make it harder to write a comprehensible exposition. The reader does not want to read the same discussion three times or more. But cross referencing is also inconvenient. There is no solution to this. Sometimes I repeat material, and sometimes I cross reference to where equivalent provisions are discussed in more detail.

### 57.27 “Close-family”

#### 57.27.1 Position from 2018/19

A common definition of close-family applies for:

- (1) The settlor-attribution rules
- (2) The close-family s.643A/s.731 benefit charges

The definition is written out three times, but it suffices to set out s.87H(1) TCGA which provides:

For the purposes of sections 87D, 87G and 87L as they apply in relation to a settlement, a person is a close member of the settlor's family at any time if the settlor is living at that time and—

- (a) the person is the settlor's spouse or civil partner at that time, or
- (b) the person—
  - (i) is a child of the settlor, or of a person who at that time is the settlor's spouse or civil partner, and
  - (ii) at that time has not reached the age of 18.<sup>116</sup>

---

116 The s.643A/s.731 equivalent definitions are in s.643H ITTOIA and s. 733A(7) ITA. The original drafting of s.733A(7) was different, but it was amended in 2018 with FD\_57\_Capital\_Payments\_from\_Non-resident\_Trusts\_S87\_2021.wpd 03/11/21

Section 87H(2) TCGA extends this to cohabittees, using the standard formula.<sup>117</sup>

As the word “close” suggests, this is a narrow definition. In short, close-family means spouse/cohabitee and minor children. Minor grandchildren are not included.

Although not the statutory usage, I prefer to write “close-family” with a hyphen, to highlight the artificially defined nature of the term.

### 57.27.2 2017/18: “Close-family”

Section 731(1B)(b) ITA provides a fourth definition:

a person is a close member of the family of the settlor of a settlement if the person is—

- (i) the settlor's spouse or civil partner,<sup>118</sup> or
- (ii) a child of the settlor, or of a person within sub-paragraph (i), if the child has not reached the age of 18;

That has not been amended so it remains in its original form. What a mess!

## 57.28 Settlor-attribution indemnity

Section 87G(3) TCGA provides:

Where any tax is chargeable on the settlor as a result of subsection (2) and is paid, the settlor is entitled to recover the full amount of the tax from the original recipient.<sup>119</sup>

This is a common feature of all 3 close-family rules, and I refer to it as the “**settlor-attribution indemnity**”.

<b>Tax charge under</b>	<b>Indemnity</b>
-------------------------	------------------

---

retrospective effect from 2017/18 to bring it into line: see para 15 and 21(5) FA 2018. This sort of mess is to be expected from the decision to bring the s.731 provisions into effect a year before the s.624A and CGT provisions.

117 See App 3.4.1 (Cohabitee treated as spouse).

118 The concluding words of s.731(1B)(b) ITA are: “and section 733A(7) (persons living together) applies also for the purposes of paragraph (b).” That is a slip for s.733A(8), which extends para (a) to cohabittees, using the standard formula: see App 3.4.1 (Cohabitee treated as spouse).

119 Section 87G(4) TCGA provides for HMRC to certify the amount of tax paid, in the standard form. See 96.2.3 (Certificate of tax paid).

s.643A settlor-attribution	s.643E ITTOIA
s.87 settlor-attribution	s.87G(4) TCGA
s.87 settlor-attribution	s.87L(5) TCGA
s.731 settlor-attribution	s.733A(5) ITA
s.731 settlor-attribution	s.733E(5) ITA

For a general discussion see 96.1 (Statutory tax indemnities).

The indemnity is from the beneficiary to settlor (not from the trustees). That is right, as an indemnity from the trustees would not have been convenient.

Bearing in mind the limited scope of the settlor-attribution rules, the settlor-attribution indemnity is not important, except in cases of divorce or separation.

The settlor indemnity under the settlor-interested trust code is more sophisticated, dealing with the issues of (1) repayment of tax and (2) the quantum of tax.<sup>120</sup> It is suggested that similar rules ought to be implied for the settlor-attribution indemnities.

## **57.29 s.87 settlor-attribution rule**

### *57.29.1 s.87 attribution rule: Outline*

Section 87G TCGA introduces what I call the “**s.87 settlor-attribution rule**”. This is one of a set of three rules which I call s.731/s.643A/s.87 settlor-attribution rules; see 47.5.11 (Settlor-attribution rules: Introduction).

In outline, a capital payment to close-family of the settlor is attributed to the settlor (if UK resident).

This will generally apply where the settlor and close-family beneficiary are both UK resident, but then the only effect is likely to be loss of the CGT annual exemption, and lower rate of CGT, which is not that significant.

This will also apply where the close-family beneficiary is non-resident, but the settlor is resident. Then what would be a non-chargeable benefit becomes chargeable, which could be important. However it will be rare to have a UK resident settlor and non-resident close-family, and even then, the remittance basis will often avoid the charge.

### *57.29.2 s.87 attribution conditions*

---

<sup>120</sup> See 96.1 (Statutory tax indemnities).

Section 87G(1) TCGA provides:

Subsection (2) applies if in the case of a settlement-

A set of three straightforward conditions then follow, which I call “**s.87 attribution conditions**”:

- (a) a beneficiary of the settlement receives a capital payment from the trustees in a tax year,
- (b) the settlor is resident in<sup>121</sup> the UK at any time in that year, and
- (c) the beneficiary (“the original recipient”) is a close member of the settlor’s family (see section 87H) at the time of receipt.

### 57.29.3 *s.87 settor-attribution rule*

Assuming the s.87 attribution conditions are met, we move on to the rule. Section 87G(2) TCGA provides:

Sections 87 and 87A have effect as if the capital payment-

- (a) was received from the trustees by the settlor-
  - (i) as a beneficiary of the settlement (whether or not the settlor is otherwise a beneficiary of the settlement),<sup>122</sup> and
  - (ii) at the time it was received by the original recipient, and
- (b) was not received by the original recipient.

I refer to this as the “**s.87 settlor-attribution rule**”.

The remittance basis will apply to a settlor who is a remittance basis taxpayer.

### 57.29.4 *Settlor-attribution/start date*

Para 1(13) sch 10 FA 2018 provides:

The new sections ... 87G [s.87 settlor-attribution rule], and the amendments made by subparagraphs (4) and (11), have effect in relation to payments received in the tax year 2018-19 or a later tax year

A pre-2018 capital payment is not caught, even if matched with a post-2018 trust gain.

### 57.29.5 *s.87/IT attribution compared*

---

121 The correct expression for residence of individuals is resident *for* the year; but it does not matter.

122 Para (i) is otiose; see 57.14 (Payment to non-beneficiary); but it does no harm.

The s.87 attribution rule is unlike the s.643A/s.731 attribution rules in two important respects:

- (1) The CGT rule applies to all trust gains; the s.643A/s.731 rules only apply in relation to protected income
- (2) The s.87 settlor-attribution rule applies even if the close-family individual who received the benefit is UK resident and so could have been chargeable. The s.643A/s.731 settlor-attribution rule applies only if the beneficiary is not UK resident, or non-dom, and so not chargeable. In other words, for s.643A/s.731, the settlor is the fall-back taxpayer if the beneficiary is not taxable.

### **57.30 Onward-gifts: Introduction**

The onward-gift rules<sup>123</sup> were introduced in 2018.

HM Treasury say:

The government is aware that if payments are made from a trust  
[1] to a beneficiary who is not a close family member [ie not close-family of the settlor] and who is not UK-resident, or  
[2] to a beneficiary who is a remittance basis user,  
the recipient could agree to hold the money for a period of time before giving or lending it back to a beneficiary in the UK. This would allow the UK-resident beneficiary to receive payments from the trust without paying any UK tax on the distribution.

The government is concerned that this relatively straightforward tax planning could increase significantly once the new non-dom rules have been implemented...

The government will take steps to ensure that, where payments are made from a trust to a nonresident or to a remittance basis user who gives or lends it back to a beneficiary in the UK ... the payment from the trust will be taxed on the UK-resident beneficiary.<sup>124</sup>

---

123 A note on terminology: The statutory term is "onward gifts". Consultation documents used the term "recycling" but the statutory term is better.

124 Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.5.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/574450/non\\_doms\\_consultation\\_response\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf)

Draft clauses were published Sept 2017, but that is now of historical interest only;  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/644270/settlements\\_draft\\_legislation.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/644270/settlements_draft_legislation.pdf)

In fact this planning was not straightforward. Even before 2018 there were anti-conduit rules. For s.87, the arrangement could be caught as an indirect receipt;<sup>125</sup> for s.731 it could be caught as an associated operation.<sup>126</sup> Those provisions will still need to be considered in cases where the onward-gift rules do not apply. The overlap of those rules and the onward-gift rules may also be problematic, but perhaps no-one will worry about that.

Onward gifts also raise trust law issues which I only mention briefly. Trustees must exercise their powers in the interests of beneficiaries, not with a view to benefiting non-beneficiaries. If there is an arrangement under which:

- (1) Trustees make a distribution to a beneficiary
- (2) The beneficiary gives the distribution to a donee who is a non-beneficiary

then the distribution is in principle void under the trust law rule known as “fraud on a power”. But if the donee is also a beneficiary, this difficulty does not arise.

It is melancholic to compare the concept expressed in a few lines with the pages of dense legislation which implement it. Clumsy drafting adds to the complexity.

There are three sets of onward-gift rules, as follows:

<b>Sections</b>	<b>Name of rule (my terms)</b>
s.87I -87M TCGA	s.87 onward-gift rule
s.643I - 643N ITTOIA	s.643A onward-gift rule
s.733B- 733E ITA	s.731 onward-gift rule

These uniform labels conveniently indicate a common template, but they also conceal significant differences in the scope of the rules. It would have been better if the wording of the onward-gift rules had been more closely aligned, but there it is.

The somewhat autistic repetition does make it harder to write a comprehensible exposition. The reader does not want to read the same discussion three times or more. But cross referencing is also inconvenient. There is no solution to this. Sometimes I repeat material, and sometimes

---

125 See 57.8.1 (Indirect receipt from trust).

126 See 47.13.1 (B1 gives benefit to B2).

I cross reference to where an identically worded provision is discussed in more detail.

Similar issues arise for IHT, where the arrangement is called “channelling”; this is addressed by the IHT associated operation rule.<sup>127</sup>

### 57.30.1 Navigation

There is a rough template which s.643A/s.731 mostly follow, and CGT sometimes follows:

<b>Topic</b>	<b>ITTOIA</b>	<b>ITA</b>	<b>TCGA</b>
Onward gift conditions	643I	733B	87I
s.643A/731 chargeable income arising to donee	643J	733C	-
s.643A/731 non-chargeable income arising to donee	643K	733D	-
<i>[CGT] Relevant parts of payment from which onward gift derived</i>	-	-	87J
<i>[CGT] Attribution of s.87 gains/capital payments to donee</i>	-	-	87K
Beneficiary exempt, settlor chargeable	643L	733E	87L
Onward gift to settlor/close-family	643M	-	-
Onward-gift remittance basis	643N	-	87M

The gateway requirements for the onward-gift rules (“onward-gift conditions”) are in subsection (1) of s.87I/s.643I/s.733B. They can be tabulated as follows:

<b>s.87 onward-gift</b>	<b>s.643A/s.731 onward-gift</b>
<i>s.87I(1) TCGA</i>	<i>s.643I(1)/s.733B(1)</i>
(a) Payment to donor	(a) s.643A/s.731 income
(b) Intention to give	(b) Matched with benefit/to protected income
(c) Gift & time limit	(c) Intention to give
(d) Gift from cap. payment	(d) Gift & time limit
(e) Donee UK resident	(e) Gift from benefit
(f) Donor s.87-exempt	(f)(g) Donor outside close-family rule/ s.731 643I(1)(h) Donee settlor/close family

### 57.30.2 Onward-gift terminology

The 3 onward-gift rules share some common terminology. Although it is normally best to adopt statutory terminology, I add a gloss for clarity:

<b>Statutory term</b>	<b>Term in this book</b>
Original beneficiary	Original beneficiary [donor]

127 See 70.14.1 (Channelling).

Subsequent recipient	Subsequent recipient [donee]
Otherwise-liable person	Otherwise-liable person [donor/settlor]
Original payment	Original [capital] payment
Onward payment	Onward payment [gift]
Payment year	[Capital] payment year

### 57.30.3 *Compliance*

If a donor benefits a UK resident, the donee needs to consider if the donor derived the property from which the benefit is provided from an offshore trust, within the last 3 years.

The donee may not be a beneficiary of the trust, and so not entitled to the information needed to complete their tax return, which will largely (not entirely) be in the knowledge of the trustees. But if HMRC assess, the onus would be on the donee to show that the assessment is wrong.

### 57.31 **s.87 onward-gift conditions**

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

A set of 6 conditions then follow, which I call “**s.87 onward-gift conditions**”.

#### 57.31.1 *Cond. (a): Payment to donor*

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

- (a) a capital payment (“the original [capital] payment”) is received in a tax year (“the [capital] payment year”) by a person (“the original beneficiary” [donor]) from the trustees of the settlement

#### 57.31.2 *Cond. (b): Intention to give*

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

- (b) at the time of receipt—
- (i) there are arrangements,<sup>128</sup> or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of the

---

128 There is the standard (unnecessary) definition in s.87I(7) TCGA, s.643(7) ITTOIA, and s.733B(7) ITA; see App 2.2.3 (Definitions of “arrangement”).

- original [capital] payment, and
- (ii) it is reasonable to expect<sup>129</sup> that, in the event of the whole or part of the original [capital] payment being passed on to another person as envisaged by the arrangements or intention, that other person will be resident in the UK when they receive at least part of what is passed on to them

The intention must be the intention of the donor, as no-one else is capable of making the onward payment (gift).

“Arrangement or intention” is a novel expression. It is difficult to envisage an arrangement without the intention, or an intention without the arrangement, since “arrangement” itself has an element of volition; it requires some sort of plan.<sup>130</sup> The reader may think this is slovenly drafting; but it does not matter.

It is suggested that making a will does not count as intention or arrangements, unless made specifically in order to deal with the capital payment.

Section 87I(8) TCGA provides a presumption as to intention:

Where subsection (1)(c) and (d) are met in any case [gift made out of capital payment], it is to be presumed (unless the contrary is shown) that subsection (1)(b) [intention to give] is also met in that case.<sup>131</sup>

But this presumption is of little if any significance, as in a tax appeal the onus of proof is already on the taxpayer.<sup>132</sup>

“Pass on” is layman’s language. The professional bodies say:<sup>133</sup>

**Example 5 “passing on”**

The trustees of a settlement, established for primarily IHT planning reasons, de-envelope a valuable UK residential property and bring the settlement to an end by distributing the assets to the non UK resident and domiciled settlor.

There is no income in the structure.<sup>134</sup>

---

129 See **App 2.21** (Reasonable-to-assume).

130 See App.2.2 (Arrangement).

131 The IT equivalents are: s.643I(6), s.643M(5) ITTOIA/s.733B(6) ITA.

132 See 5.37 (Residence: Burden of proof). And in any event, disputes are rarely decided by the burden of proof: see 3.7.3 (Standard of proof).

133 I have slightly altered the text of the example, for clarity.

134 This fact is not relevant to the example, though it may make the benefit subject to IT rather than CGT.

The settlement is brought to an end because the initial advice to envelope and settle is no longer considered appropriate...<sup>135</sup>

At the time of the distribution of the UK property the settlor planned to retain the property and use it as a base when in the UK.

However, he also intended to allow his two UK resident adult daughters to occupy the property.

[1] He grants them a licence (non-exclusive, so the father can still occupy as before) when both were studying at UK universities.

[2] Subsequently one daughter returned home [ie, ceased to occupy the property] and the other was given an assured shorthold tenancy in the property at a low rent.<sup>136</sup>

The licence is gratuitous, non-exclusive and revocable at any time.

The tenancy is exclusive and may run on from year to year.

Both the licence and the tenancy are granted less than three years after the distribution.

The professional bodies' analysis is as follows:

There has to be an arrangement or intention as regards the passing on of the whole or part of original property (i.e. something contained in the bundle of rights that father obtained when he replaced the trustees as the absolute owner of the land) in order for the onward gift rules to apply...

[1] In the case of the licence the father has nothing less than he originally had, namely the same bundle of rights in relation to the same property and this should not, therefore, be seen as coming within the legislation as no part of the original trust distribution has been "passed on".

[2] In the case of the tenancy given to the daughter she is given an interest in the property. The father's rights have diminished (to what extent depends on the length of the tenancy). As such there has been a "passing-on" of part of the distribution received by the father and the onward gift rules would be engaged.<sup>137</sup>

---

135 This fact is not relevant to the example.

136 This seems odd for the father to grant his daughter a lease; but that does not spoil the fact of the example. The example has to specify that rent is under market rent, otherwise there is no passing-on, no benefit and no charge. If the rent is low enough, the tenancy is not an assured shorthold tenancy but nothing turns on that.

137 "Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty" (Mar 2019)

<https://www.tax.org.uk/policy-technical/technical-news/finance-act-2018-section>

Point [1] is a somewhat literal reading.

A similar question may arise with loans. Suppose:

- (1) A trust has lent money interest free, repayable on demand to a UK beneficiary (B1).
- (2) The trust transfers the debt to a non-resident beneficiary (B2)
- (3) B2 leaves the loan outstanding.

Has B2 passed on part of the original capital payment? The professional bodies would say nothing has been passed on. But the reader may think the section should be construed less literally, particularly bearing in mind that “gift” is widely defined, to include any benefit.

### 57.31.3 Condition (c): Gift

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

- (c) the original beneficiary [donor] makes, directly or indirectly, a gift (“the onward payment”) to a person (“the subsequent recipient” [donee])-
  - (i) [A] at the time the original [capital] payment is received, [B] or at any later time in the 3 years beginning with the day containing the start time, or
  - (ii) at any time before the original [capital] payment is received and, it is reasonable to assume, in anticipation of receipt of the original [capital] payment

There are two rules here:

- (1) the original beneficiary (donor) makes a gift directly or indirectly to a subsequent recipient (donee); and
- (2) a time limit for that gift.

Statute frequently refers to an onward payment (gift) “made as mentioned in s.87I(1)(c)(ii)”. I refer to such a gift as a **“pre-capital payment gift”**.

Section 87I(7) TCGA provides a wide definition of making a gift:

In this section<sup>138</sup> ...  
“gift” includes any benefit, and

---

*-35-and-schedule-10-settlements-anti*

138 This is only a section-wide definition, but it is incorporated by reference in s.87M(6) TCGA.

“make”, in relation to a gift that is a benefit, means confer.<sup>139</sup>

An arm’s length transaction is not an onward payment (gift).

#### 57.31.4 *Gift via trust*

Suppose:

- (1) A capital payment to B1, a non-resident /remittance basis taxpayer.
- (2) B1 transfers the benefit to a trust.
- (3) The trustees benefit B2, a UK resident, within the 3 year time limit.

This raises two issues:

- (1) Is s.87 onward-gift condition (b) met: in short, is there an arrangement/intention for passing on the benefit to a UK resident? It is a question of fact, but note that arrangement is a wide word, and includes arrangements which develop or take place over a period of time, as long as they have “sufficient unity”.<sup>140</sup>
- (2) Is s.87 onward-gift condition (c) met: in short, does B1 make a gift indirectly to B2? Similar wording is used elsewhere in s.87, and the question (in short) is whether there is a plan which is fulfilled.<sup>141</sup> So it overlaps with point (1) and is again a question of fact; but if in practice payments were made in and out of a trust, within a relatively short time, it may not be easy to convince a tribunal that there was no plan. But unless the trust is UK resident, the series of gifts rule will deem condition (c) to be satisfied in any event.<sup>142</sup>

#### 57.31.5 *Onward gift time limit*

There is no time limit for the period between a pre-capital payment gift and the capital payment.

Otherwise, the requirement is that the original beneficiary (donor) must make the gift to the subsequent recipient (donee) within 3 years of the “start time”.

In outline, there are 2 possible start times:

<i>Para</i>	<i>Circumstances</i>	<i>Start time</i>
87I(3)(a)	Normal	When benefit provided to donor

139 The IT equivalents are: s.643I(7), 641M(8) ITTOIA; s.733B(7) ITA.

140 See [App 2.2.4](#) (Identifying the arrangement).

141 See 57.8.1 (Indirect receipt from trust).

142 See 57.36 (Series of gifts: A to B to C).

87I(3)(b) Donee RB user Previous occasion

Section 87I(3) TCGA provides:

For the purposes of subsections (1)(c)(i) and (2)(b)(i)<sup>143</sup>—

- (a) if the original [capital] payment is a capital payment other than one that is treated as received by section 87M<sup>144</sup>, “the start time” is the time the original payment is received, and
- (b) if the original payment is a capital payment that is treated as received by
  - [i] section 87M<sup>145</sup> in connection with the operation of this section, and
  - [ii] sections 87J and 87K, on a previous occasion, “the start time” is the time given by this subsection as the start time on that occasion

I do not understand para (b).

*57.31.6 Cond. (d): Gift from capital payment*

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

- (d) the gift is of or includes-
  - (i) the whole or part of the original [capital] payment,
  - (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents,<sup>146</sup> the whole or part of the original [capital] payment, or
  - (iii) any other property, but only if the original [capital] payment is made with a view to enabling or facilitating,<sup>147</sup> or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee]

If a capital payment is made to a company held by the donor, the shares are not derived from the capital payment but they might represent the

---

143 See 57.36 (Series of gifts: A to B to C).

144 See 57.35 (Donee remittance basis user).

145 See 57.35 (Donee remittance basis user).

146 See App.2.11 (‘Representing’ assets).

147 The wording draws on s.103 FA 1986; see 76.11.6 (s.103(2) exceptions to s.103(1)(b)); but the drafter sought to widen it with the addition of “otherwise in connection with”.

capital payment.<sup>148</sup>

The donor may wish to segregate the original [capital] payment, in order to avoid making gifts out of it for 3 years. (If the capital payment is mixed with other funds, it would be necessary to apply the non-statutory mixed fund rules.<sup>149</sup>)

That prevents a gift falling within (i)(ii), but para (iii) would still need consideration.

#### 57.31.7 *Cond. (e): Donee UK resident*

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

- (e) the subsequent recipient [donee] is resident in the UK in the tax year in which the onward payment [gift] is received by the subsequent recipient ...<sup>150</sup>

#### 57.31.8 *Cond. (f): Donor s.87-exempt*

Section 87I(1) TCGA provides:

Sections 87J and 87K apply if in the case of a settlement...

- (f) in the period beginning with the start of the [capital] payment year and ending with the end of the gift year<sup>151</sup>, there is at least one tax year-
  - (i) for which the otherwise-liable person [donor/settlor] is not resident in the UK, or
  - (ii) for which section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the otherwise-liable person [donor/settlor].

Section 87I(7) TCGA provides:

In this section<sup>152</sup> ...

“the otherwise-liable person”

[i] means the original beneficiary [donor]

148 See App 2.11.5 (Do shares represent co assets).

149 See **App 2.11.7** (Withdrawal from mixed fund).

150 The words omitted here define “gift year”; see 57.32.3 (“Gift” year).

151 See 57.32.3 (“Gift” year).

152 This is only a section-wide definition, but it is incorporated by reference elsewhere: s.87M(6) TCGA.

[ii] unless section 87G(2)<sup>153</sup> applies in relation to the original [capital] payment in which event the settlor is “the otherwise-liable person”.

“Otherwise-liable person” is a clumsy expression, but it is transparent, and difficult to think of better.

#### 57.31.9 *Time of pre-cap. payment gift*

Section 87I(4) TCGA provides:

Where the onward payment [gift] is made as mentioned in subsection (1)(c)(ii) [pre-capital payment gift], the onward payment is to be treated—

- (a) for the purposes of the provisions of this section following subsection (1)(c), and
- (b) for the purposes of sections 87K to 87M, as made and received immediately after the original [capital] payment is received (and in the [capital] payment year).

The point is repeated (unnecessarily) in s.87M(6) TCGA:

Section 87I(4) and (7) (interpretation of references to gifts and their making) apply also for the purposes of subsections (3) and (4) of this section.

#### 57.31.10 *Several gifts in gift year*

Section 87I(5) TCGA provides:

Where this section provides for section 87K to apply in relation to two or more gifts received from the original beneficiary [donor] in the gift year<sup>154</sup> by reference to the original [capital] payment—

- (a) treat that section as applying in relation to a single gift equal in amount to the total of the amount or value of each of the gifts (and as not applying in relation to each gift separately), and
- (b) apportion between the gifts (in proportion to their amounts or values)—
  - (i) any capital payments given by section 87K(2),<sup>155</sup> and

---

153 See 57.29 (s.87 settlor-attribution rule).

154 See 57.32.3 (“Gift” year).

155 See 57.33.1 (OG deemed capital payment).

(ii) any gains given by section 87K(3),<sup>156</sup>  
 as a result of applying section 87K in accordance with paragraph (a).

This would apply in the (somewhat contrived) case where a donor makes pre- and post-capital payment gifts.<sup>157</sup>

57.31.11 *Gift from pre-2018 original payment*

Para 1(14) sch 10 FA 2018 provides:

The new sections 87I to 87M have effect in relation to onward payments [gifts] made on or after 6 April 2018, and do so even in cases where the original [capital] payment is received before that date.

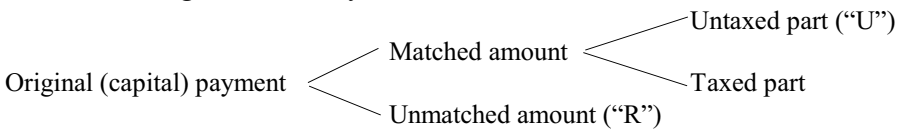

This rule will effectively cease to matter in April 2021.

**57.32 s.87 onward-gift definitions**

Assuming the s.87 onward-gift conditions are met, we move on. First it is helpful to set out some definitions.

57.32.1 *U, R, G*

The original (capital) payment is divided into two amounts (matched and unmatched) and the matched amount is divided into two parts, taxed and untaxed. Diagrammatically:

In full detail, s.87J(1) TCGA provides:

Where this section applies (see section 87I) [s.87 onward-gift conditions are met], for the purposes of section 87K treat the original [capital] payment as divided into slices as follows-

- (a) a slice consisting of the taxed part (if any) of each matched amount (if any),
- (b) a slice (“U”) consisting of the untaxed part (if any) of each matched amount (if any), and

156 See 57.33.2 (OG deemed s.87 gain).

157 See 57.31.3 (Condition (c): Gift).

- (c) a slice (“R”) consisting of the rest (if any) of the original [capital] payment.

U stands for the **U**ntaxed part. R is presumably the **R**emaining amount (ie the unmatched amount, but the abbreviation U had already been taken).

G is the **G**ift. Section 87K(1) TCGA provides:

Where this section applies (see section 87I) [s.87 onward-gift conditions are met], G is—

- (a) the amount or value of so much of the original [capital] payment as is within any of sub-paragraphs (i) to (iii) of section 87I(1)(d) [gifted capital payment], or
- (b) if lower, the amount of the original [capital] payment.

### 57.32.2 “*Matching year*”

The “matching year” is the year in which the original (capital) payment is matched. The relevant part of s.87J(2) provides:

if all or part of the original [capital] payment is, in a tax year (“the matching year”) ... matched under section 87A with the section 1(3) amount for the matching year or any earlier tax year ...<sup>158</sup>

### 57.32.3 “*Gift year*”

The “gift year” is (in general) the tax year in which the onward payment [gift] is made. The relevant part of s.87I(1)(e) provides:

the tax year in which the onward payment [gift] is received by the subsequent recipient (“the gift year”, but see subsection (4))<sup>159</sup>

### 57.32.4 “*Matched amount*”

Section 87J(2) TCGA provides:

For the purposes of this section, if all or part of the original [capital] payment is, in a tax year (“the matching year”) not later than the gift year, matched under section 87A with the section 1(3) amount for the matching year or any earlier tax year, so much of the original [capital]

---

158 For the full text of this para, see 57.32.4 (“Matched amount”).

159 For the full text of this para, see 57.31.7 (Condition (e): Donee UK resident). For subsection (4), see 57.31.9 (Time of pre-cap. payment gift).

payment as is so matched is a “matched amount”.

### 57.32.5 *Taxed/untaxed parts of matched amount*

It is easier to follow if the two parts of the definition are read side by side. Section 87J(3)(4) TCGA provides:

#### **Donor/settlor on arising basis**

(3) For the purposes of subsection (1), if—

(a) as a result of there being a matched amount, gains are treated by section 87 as accruing to the otherwise-liable person [donor/settlor],

(b) the otherwise-liable person [donor/settlor] is resident in the UK for the matching year, and

(c) none of sections 809B, 809D and 809E of ITA 2007 applies to the otherwise-liable person

[donor/settlor] for the matching year

[I] the whole of the matched amount is its “taxed part”

#### **Donor/settlor on remittance basis**

(4) For the purposes of subsection (1), if—

(a) [identical]

(b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the otherwise-liable person

[donor/settlor] for the matching year, and

(c) the whole or part of those gains is remitted to the UK in a tax year—

(i) that is not later than the gift year<sup>160</sup>, and

(ii) in which the otherwise-liable person [donor/settlor] is resident in the UK,

[I] so much of the matched amount as is equal to so much of the gains as is remitted as mentioned in paragraph (c) is the matched amount’s “taxed part”,

<sup>160</sup> See 57.32.3 (“Gift” year).

- [II] (and it has no “untaxed part”).
- [II] and the rest of the matched amount is its “untaxed part”.

Section 87J(5) TCGA deals with the specialist case of sch 4C pools:

For the purposes of subsection (1), if all or part of the original [capital] payment is in a tax year (“the pool-matching year”) not later than the gift year matched, under section 87A as applied by paragraph 8 of Schedule 4C, with the section 1(3) amount in the Schedule 4C pool for the pool-matching year or any earlier tax year—

- (a) so much of the original [capital] payment as is so matched is a “matched amount”, and
- (b) the whole of the matched amount is its “taxed part” (and it has no “untaxed part”).

57.32.6 s.87K application in later year

Section 87I(6) TCGA provides:

Where this section provides for sections 87J and 87K to apply in relation to a gift received in a tax year—

- (a) take the steps required by section 87J before applying section 87K in relation to the gift, but
- (b) in taking the steps required by section 87J, have regard to the application of section 87K in relation to gifts made in earlier tax years.

57.33 s.87 onward-gift rule

Armed with these definitions, and assuming the s.87 onward-gift conditions are satisfied, we turn to the rules in s.87K TCGA. In short:

Condition	Consequence	Amount	Provision
R>0 (unmatched amount)	Deemed cap payment	Smaller of R and G	s.87K(2)
U>0 (untaxed matched amount)	Deemed s.87 gain	Smaller of U and (G-R)	s.87K(3)

57.33.1 OG deemed capital payment

Section 87K(2) TCGA provides:

If R is greater than nil, sections 87 and 87A have effect for the gift year<sup>161</sup> and later tax years-

- (a) as if a capital payment was received from the trustees by the

161 See 57.32.3 (“Gift” year).

subsequent recipient [donee]-

- (i) as a beneficiary of the settlement (whether or not the subsequent recipient is otherwise a beneficiary of the settlement),<sup>162</sup> and
- (ii) at the time the subsequent recipient received the onward payment [gift],
- (b) as if that capital payment consisted of-
  - (i) R, if G is greater than R, or
  - (ii) so much of R as is equal to G, if G is not greater than R, and

I refer to this as a **“OG deemed capital payment”**.

Para (c) provides relief for the donor:

- (c) as if so much of the original [capital] payment as is equal to that capital payment was not received by the otherwise-liable person [donor/settlor].

### 57.33.2 *OG deemed s.87 gain*

Section 87K(3) TCGA provides:

If G is greater than R, and if U is greater than nil-

- (a) chargeable gains are treated as accruing to the subsequent recipient [donee] in the gift year<sup>163</sup> (but see section 87L(3) and (4)),
- (b) the amount of those gains is-
  - (i) U, if  $(G - R)$  is greater than U, or
  - (ii) so much of U as is equal to  $(G - R)$ , if  $(G - R)$  is not greater than U

I refer to this as a **“OG deemed s.87 gain”**.

Para (c) provides relief for the donor:

- (c) the chargeable gains treated by section 87 as accruing to the otherwise-liable person [donor/settlor] by reason of the original [capital] payment are treated as from the end of the gift year<sup>164</sup> as reduced by that amount, with that reduction being made from so much of those gains as has not by then been remitted to the UK in a tax year in which the otherwise-liable person [donor] is

---

162 The wording at para (a) matches s.87D(2) TCGA. It is otiose but it does no harm: see 57.29 (s.87 settlor-attribution rule).

163 See 57.32.3 (“Gift” year).

164 See 57.32.3 (“Gift” year).

resident in the UK.

57.33.3 Pre-capital payment gift: R/U

Section 87K(4) TCGA provides:

If this section applies [s.87 onward-gift conditions are met] by reference to the original [capital] payment also in relation to a gift received from the original beneficiary [donor] in a tax year earlier than the gift year, this section applies in relation to the onward [capital] payment as if—

- (a) the amount given by section 87J for R were reduced by the amount of any capital payment given by subsection (2) in relation to that earlier year, and
- (b) the amount given by section 87J for U were reduced by the amount of any gains given by subsection (3) in relation to that earlier year.

57.34 Onward-gift to close-family: s.87 settlor-attribution rule

Suppose:

- (1) A capital payment is made to a beneficiary (not close-family)
- (2) The beneficiary makes an onward gift to close-family of the settlor

A direct capital payment to close-family is treated as made to the settlor, under the s.87 settlor-attribution rule.<sup>165</sup> Section 87L TCGA ensures that the same applies in the case of an onward gift to close-family. I refer to this as the “s.87 OG settlor-attribution rule”.

Section 87L TCGA provides distinct rules for:

- (1) OG deemed capital payment<sup>166</sup>
- (2) OG deemed s.87 gain<sup>167</sup>

The layout is: s.87L(1)(3) set out application conditions; s.87L(2)(4) set out the rules where those conditions are satisfied. It is easier to follow if the s.87L application conditions are read side by side. Section 87L(1)(3) TCGA provide:

**OG deemed capital payment**

**OG deemed s.87 gain**

(1) Subsection (2) applies where-

(3) Subsection (4) applies where-

165 See 57.26 (Settlor-attribution rules: Introduction).

166 See 57.33.1 (OG deemed capital payment).

167 See 57.33.2 (OG deemed s.87 gain).

- |   |   |
|---|---|
| <p>(a) ignoring this section and section 87M [Donee remittance basis user], a person is treated by section 87K(2) as receiving a capital payment from the trustees of a settlement at a time (“the time of receipt”) in a tax year,</p> <p>(b) the settlor is resident in the UK at any time in that year, and</p> <p>(c) the person mentioned in paragraph (a) [the donee] is a close member of the settlor’s family (see section 87H) at the time of receipt.</p> | <p>(a) in the case of a settlement, chargeable gains are (ignoring this section and section 87M [Donee remittance basis user]) treated by section 87K(3) as accruing to a person in a tax year (“the subsequent recipient” [donee]),</p> <p>(b) [identical]</p> <p>(c) the subsequent recipient [donee] is a close member of the settlor’s family when the subsequent recipient receives the onward payment (see section 87I(1)(c)) by reference to which the chargeable gains are treated as accruing.</p> |
|---|---|

Assuming these conditions are satisfied, we move on to the rules.

Section 87L(2) TCGA provides the rule for an OG deemed capital payment:

Sections 87 and 87A have effect for that year, and later tax years, as if the capital payment-

- (a) was received from the trustees by the settlor-
  - (i) as a beneficiary of the settlement (whether or not the settlor is otherwise a beneficiary of the settlement),<sup>168</sup> and
  - (ii) at the time of receipt, and
- (b) was not received by the person mentioned in subsection (1)(a) [the donee].

Section 87L(4) TCGA provides the rule for an OG deemed s.87 gain:

- [a] Section 87K(3)(a)<sup>169</sup> has effect as if its reference to the subsequent recipient were a reference to the settlor, and
- [b] references (however expressed) to chargeable gains treated as

---

168 The wording at para (a) matches s.87D(2) TCGA. It is otiose but it does no harm: see 57.29.3 (s.87 settor-attribution rule).

169 See 57.33.2 (OG deemed s.87 gain).

accruing by this section are to chargeable gains treated by section 87K(3)(a) as accruing to the settlor as a result of the operation of this subsection.

Amended as s.87L(4) directs, s.87K(3)(a) provides:

- (a) chargeable gains are treated as accruing to the subsequent recipient settlor in the gift year...

Section 87L(5) TCGA provides the settlor with the standard settlor-attribution indemnity.<sup>170</sup>

### 57.35 Donee remittance basis user

Section 87M TCGA provides distinct rules for:

- (1) OG deemed capital payment (s.87K(2) applies<sup>171</sup>)
- (2) OG deemed s.87 gain (s.87K(3) applies<sup>172</sup>)

The layout is: s.87M(1)(3) set out application conditions; s.87M(2)(4) set out the rules where those conditions is satisfied.

It is easier to follow if the s.87M application conditions are read side by side. Section 87M(1)(3) TCGA provides:

#### **OG deemed capital payment**

- (1) Subsection (2) applies where—
- (a) ignoring this section, a person is treated by section

87K(2) as receiving a capital payment from the trustees of a settlement at a time (“the time of receipt”) in a tax year,

#### **OG deemed s.87 gain**

- (3) The rules in subsection (4) apply where—
- (a) in the case of a settlement, chargeable gains are (ignoring this

section) treated by section 87K(3), but not as a result of the operation of section 87L(4), as accruing to a person in a tax year by reference to a gift within section 87I(1)(d) made to the person,

170 See 57.28 (Settlor-attribution indemnity).

171 See 57.33.1 (OG deemed capital payment).

172 See 57.33.2 (OG deemed s.87 gain).

- |   |  |
|---|--|
| <p>(b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the person for that tax year, and</p> <p>(c) the payment is not treated by section 87L(2) [onward-gift to close-family] as received by the settlor.</p> | <p>(b) [identical]</p> <p>(c) none, or part only, of the gains is remitted to the UK in that tax year.</p> |
|---|--|

Section 87M(2) TCGA provides the rule for an OG deemed capital payment:

Section 87I(1)(a) has effect as if

- [a] the capital payment were received from the trustees by the person at the time of receipt, and
- [b] section 87K(2)(a) and (b) do not have effect for the purposes of sections 87 and 87A in the case of the payment.

Section 87M(4) TCGA provides the rule for an OG deemed s.87 gain.

The rules are—

- (a) section 87I(1)(a) has effect—
  - (i) as if a capital payment were received from the trustees by the person at the time the gift is made, and
  - (ii) as if the capital payment were equal in amount to so much of the gains as is not remitted in the tax year mentioned in subsection (3)(a) of this section,
- (b) for the purposes of section 87J—
  - (i) the whole of the capital payment is a “matched amount”, and
  - (ii) the whole of the matched amount is its “untaxed part” (and the matched amount has no “taxed part”), and
- (c) the amount of the gains treated by section 87K(3)(a) and (b) as accruing to the person by reference to the gift<sup>173</sup> is reduced by the amount of the capital payment.

The professional bodies say:

**Subsequent recipient a remittance basis user**

The capital gains tax onward gift rule applies in an odd way where the

---

<sup>173</sup> See 57.33.2 (OG deemed s.87 gain).

subsequent recipient is a remittance basis user.

Where the payment to the original beneficiary is not matched against gains the subsequent recipient is treated under section 87K as having received a capital payment. The effect of section 87M(1) and (2) is that the subsequent recipient is not taxable on that capital payment, even if it is remitted to the UK. The only consequence is that the subsequent recipient is treated as having received a capital payment for the purposes of the conduit rules and would therefore be within the scope of the conduit rules if he or she makes a further onward gift.

The position is slightly different where the subsequent recipient is treated as if chargeable gains had accrued to him or her (as a result of the payment to the original beneficiary being matched against gains but not having been taxed). In these circumstances the effect of section 87M(3) and (4) is that the subsequent recipient is taxable if the onward payment is remitted in the year of receipt but is not taxed if it is remitted to the UK in a subsequent year. Instead, the subsequent recipient is again treated as having received a capital payment for the purposes of the rules and so will be within the scope of the onward gift rules if a further onward payment is made.

Whether or not a subsequent recipient who is a remittance basis user is taxable therefore depends on whether he or she is treated as receiving a capital payment or whether he or she is treated as if chargeable gains have accrued to them. In the former case, he or she will not be taxable but will be capable of making a further gift within the scope of the onward gift rules. In the latter case, he or she will be taxable to the extent that the onward payment is remitted in the year it is received but not if it is remitted in a later year.

The position is similar under the transfer of assets benefits charge. If the onward gift is not remitted to the UK in the charging year, the subsequent recipient is not taxable even if he or she remits the onward payment in a later year. The subsequent recipient is however, in these circumstances, treated as the recipient of a benefit for the purposes of the onward gift rule and so any further gift he or she makes may be taxable on the ultimate recipient.

Where the original beneficiary is a remittance basis user, remittance by the subsequent recipient only leads to him being taxed if the subsequent recipient is a relevant person (as defined by ITA 2007, s 809M(2)).<sup>174</sup>

174 “Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty” (Mar 2019)

<https://www.tax.org.uk/policy-technical/technical-news/finance-act-2018-section>

FD\_57\_Capital\_Payments\_from\_Non-resident\_Trusts\_S87\_2021.wpd

03/11/21

57.35.1 *Previous onward gift*

Section 87M(5) TCGA provides:

Where the capital payment mentioned in section 87I(1)(a) is one treated as received by subsection (2) or (4) of this section in connection with the operation of sections 87I to 87K on a previous occasion, section 87I(1) has effect—

- (a) with the omission of its paragraph (b),
- (b) as if the reference in its paragraph (c) to the original [capital] payment were, instead, to what was the original [capital] payment on that previous occasion, and
- (c) as if the references in its paragraph (d) to the original [capital] payment were, instead, to so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of that paragraph.

Amended as s.87M(5) directs, s.87I(1) provides:

Sections 87J and 87K apply if in the case of a settlement—

- (a) a capital payment (“the original payment”) is received in a tax year (“the payment year”) by a person (“the original beneficiary”) from the trustees of the settlement,
- ~~(b) at the time of receipt—~~
  - ~~(i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of the original payment, and~~
  - ~~(ii) it is reasonable to expect that, in the event of the whole or part of the original payment being passed on to another person as envisaged by the arrangements or intention, that other person will be resident in the UK when they receive at least part of what is passed on to them;~~
- (c) the original beneficiary [donor] makes, directly or indirectly, a gift (“the onward payment”) to a person (“the subsequent recipient”)—
  - (i) at the time what was the original payment on the previous occasion is received, or at any later time in the 3 years beginning with the day containing the start time, or
  - (ii) at any time before the original payment is received and, it is

- reasonable to assume, in anticipation of receipt of the original payment,
- (d) the gift is of or includes—
    - (i) the whole or part of ~~the original payment~~, so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of this paragraph
    - (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of ~~the original payment~~, so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of this paragraph or
    - (iii) any other property, but only if ~~the original payment~~ so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of this paragraph is made with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient,
  - (e) the subsequent recipient is resident in the UK in the tax year in which the onward payment is received by the subsequent recipient (“the gift year”, but see subsection (4)), and
  - (f) in the period beginning with the start of the payment year and ending with the end of the gift year, there is at least one tax year—
    - (i) for which the otherwise-liable person is not resident in the UK, or
    - (ii) for which section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the otherwise-liable person.

### 57.36 Series of gifts: A to B to C

Section 87I(2) TCGA provides:

Where-

A set of six conditions then follow, which I call “**gift-series conditions**”:

- (a) there is a series of two or more gifts,<sup>175</sup>
- (b) the first gift in the series is made, directly or indirectly, by the original beneficiary [donor]—
  - (i) [A] at the time the original [capital] payment is received, [B] or at any later time in the 3 years beginning with the day

---

175 “Gift” includes any benefit; see 57.31.3 (Condition (c): Gift).

- containing the start time, or
- (ii) at any time before the original payment is received and, it is reasonable to assume, in anticipation of receipt of the original payment,

That is, s.87 onward-gift condition (c) is met.<sup>176</sup>

- (c) the recipient of a gift in the series is the person who makes, directly or indirectly, the next gift in the series,
- (d) the recipient of the last gift in the series is resident in the UK in the tax year in which that gift is received,
- (e) as regards each earlier gift in the series, its recipient is not resident in the UK at any time in the tax year in which it is received, and
- (f) the condition in subsection (1)(d) is met in relation to each gift in the series,<sup>177</sup>

Assuming the gift-series conditions are met, we turn to the rule:

the last gift in the series is treated for the purposes of subsection (1)(c)<sup>178</sup> as if its maker were the original beneficiary [donor] (and not its actual maker).

Section 87I(1)(c) provides:

Sections 87J and 87K apply if in the case of a settlement...

- (c) the original beneficiary [donor] makes, directly or indirectly, a gift (“the onward payment”) to a person (“the subsequent recipient” [donee])-
  - (i) [A] at the time the original [capital] payment is received, or [B] at any later time in the 3 years beginning with the day containing the start time, or
  - (ii) at any time before the original [capital] payment is received and, it is reasonable to assume, in anticipation of receipt of the original [capital] payment

The requirement is therefore that the last gift in the series is made within 3 years of the original (capital) payment; (or is a pre-capital payment gift within para (ii)).<sup>179</sup>

176 See 57.31.3 (Condition (c): Gift).

177 See 57.31.6 (Condition (d): Gift from capital payment).

178 See 57.31.3 (Condition (c): Gift).

179 The professional bodies agree: see “Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty”

Also see 57.31.4 (Gift via trust).

## **57.37 Migrant settlement**

### *57.37.1 UK trust becomes non-resident*

Section 89(1) TCGA provides:

Where a period of one or more years of assessment for which s.87 applies to a settlement (“a non-resident period”) succeeds a period of one or more years of assessment for each of which s.87 does not apply to the settlement (“a resident period”), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of sections 87 and 87A if it was not made in anticipation of a disposal made by the trustees in the non-resident period.

### *57.37.2 Offshore trust comes to UK*

Section 89 TCGA provides:

(1A) Subsection (2) applies to a settlement if—

- (a) a non-resident period is succeeded by a resident period, and
- (b) in relation to the last tax year in the non-resident period (“the last non-resident tax year”), s.87A(3) applied by virtue of para (a) of that provision (exhaustion of capital payments).<sup>180</sup>

(2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under s.87A as it applies for that year) with the s.1(3) amount for the last non-resident tax year or any earlier tax year.

(3) Section 87(3) and (4) and ss.87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).

(4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under s.87 as accruing.

## **57.38 Dual-resident trust: s.88 TCGA**

---

(Mar 2019)

<https://www.tax.org.uk/policy-technical/technical-news/finance-act-2018-section-35-and-schedule-10-settlements-anti>

180 See 57.15.3 (When to stop).

In the context of s.88 TCGA, “**dual resident**” is used as a shorthand to describe a trust which is:

- (1) UK-law UK resident; and
- (2) treaty-resident in a foreign state with a DTA which has an article conferring CGT relief (under the tie-breaker).

This is a slightly artificial use for the term “dual resident”, which would naturally be used with a somewhat wider meaning,<sup>181</sup> but it is difficult to think of a better term and no difficulty arises as long as one bears that meaning in mind.

A dual-resident trust would not be within s.87.<sup>182</sup> This gap is filled by s.88 TCGA:

- (1) Section 87 also applies to a settlement for any year of assessment beginning on or after 6th April 1991 if—
  - (a) the trustees are resident in the UK during any part of the year, and
  - (b) at any time of such residence they fall to be regarded for the purposes of any double taxation relief arrangements<sup>183</sup> as resident in a territory outside the UK.

### 57.38.1 Revised s.1(3) amount

The usual definition of s.1(3) amount (trust gains) would not work for a dual-resident trust, so s.88(2) TCGA amends it:

The section 1(3) amount for a tax year for which section 87 applies by virtue of this section is what it would be if the amount mentioned in section 87(4)(a) were the assumed chargeable amount.

Amended as s.88(2) directs, s.87(4) provides:

The section 1(3) amount for a settlement for a tax year for which this section applies to the settlement is—

- (a) ~~the amount upon which the trustees of the settlement would be chargeable to tax under section 1(3) for that year if they were resident and ordinarily resident in the UK in that year~~ the

181 On the terminology see 103.6 (Types of residence).

182 See 57.4 (Non-resident settlement condition). For trusts which are UK-law UK resident but which are treaty-resident outside the UK, see 57.60 (DT relief: s.87 gain).

183 For the meaning of this term, see 11.6.1 (“DTR arrangements” for CGT).

- assumed chargeable amount, or
- (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

The term “assumed chargeable amount” is defined in s.88(3):

For the purposes of subsection (2) above the assumed chargeable amount in respect of a year of assessment is the lesser of the following 2 amounts—

- (a) the amount on which the trustees would be chargeable to tax for the year under section 1(3) on the assumption that the double taxation relief arrangements did not apply;
- (b) the amount on which, by virtue of disposals of protected assets, the trustees would be chargeable to tax for the year under section 1(3) on the assumption that those arrangements did not apply.

### 57.38.2 *Protected assets*

Section 88 TCGA provides:

- (4) For the purposes of subsection (3)(b) above assets are protected assets if—
  - (a) they are of a description specified in the double taxation relief arrangements, and
  - (b) were the trustees to dispose of them at any relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.
- (5) For the purposes of subsection (4) above—
  - (a) the assumption specified in subsection (3)(b) above shall be ignored;
  - (b) a relevant time is any time, in the year of assessment concerned, when the trustees fall to be regarded for the purposes of the arrangements as resident in a territory outside the UK;
  - (c) if different assets are identified by reference to different relevant times, all of them are protected assets.

Most trust assets are “protected assets;” the most common exception would be UK land.<sup>184</sup>

### 57.38.3 *Planning: Avoid dual residence*

---

184 See 53.22 (DT relief for taxable gains).

It is best to avoid dual resident (ie, UK law resident, treaty non-resident) trusts because they involve tax in the UK (so far as the treaty does not provide relief), tax in the treaty jurisdiction, and tax liabilities under s.87. In practice such trusts only arise by accident.

### 57.39 Transfer between trusts

For trust transfers generally, see 75.1 (Inter-trust transfers: Navigation).

#### 57.39.1 *Trust transfer: s.87 disapplied*

Suppose a trust (trust 1) transfers funds to another trust (trust 2). Section 87(2) TCGA does not apply, and trust 2 does not receive s.87 gains. No-one has ever suggested that it does. But why not, assuming of course that trust 2 is UK resident? The reason is that the trustees of trust 2 are not regarded as a beneficiary of trust 1. The word beneficiary may or may not include a trustee who has an interest under a trust which is not a beneficial interest.<sup>185</sup> The context must determine the issue and the context here (especially s.90 TCGA) shows that it does not.<sup>186</sup>

#### 57.39.2 *Trust gain transferred*

Section 90(1) TCGA provides:

---

185 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), paras 5.17-5.18 (Definition of “Beneficiaries”).

186 The drafter of s.97(8)(10) TCGA considered this to be the correct analysis, as they took special care to preserve it.

Section 97(8) TCGA provides that a non-beneficiary is treated as a beneficiary:

“In a case where—

- (a) ... a capital payment is received from the trustees of a settlement...
- (b) it is received by a person ...
- (c) at the time it is received ... the person is not ... a beneficiary of the settlement... for the purposes of sections 86A to 90 ... the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.”

This might apply s.87 to an inter-trust transfer, but that is excluded by s.97(10):

“Subsection (8) above shall not apply so as to treat—

- (a) the trustees of the settlement referred to in that subsection, or
  - (b) the trustees of any other settlement,
- as beneficiaries of the settlement referred to in that subsection.”

It might alternatively be said that s.87(2) does not apply as there is no capital payment, on a transfer between trusts; but that seems a less attractive solution..

This section applies if the trustees of a settlement (“the transferor settlement”) transfer all or part of the settled property to the trustees of another settlement (“the transferee settlement”).

In short, s.90 applies on a transfer between trusts.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust *income* to another trust, it is suggested that s.90 does not apply, because trust income is not “settled property”.<sup>187</sup> There is no scope for avoidance in this view, since the transferee trust receives income which is within the scope of all the income tax anti-avoidance provisions.

Section 90(3) TCGA provides:

Treat the s.1(3) amount for the transferee settlement for any tax year (not later than the year of transfer)<sup>188</sup> as increased by—

- (a) the s.1(3) amount for the transferor settlement for that year (as reduced under s.87A as it applies in relation to that settlement for the year of transfer and all earlier tax years), or
- (b) if part only of the settled property is transferred, the relevant proportion of the amount mentioned in para (a).

Section 90(5) TCGA provides corresponding relief for the transferor trust:

Treat the s.1(3) amount for the transferor settlement for any tax year as reduced by the amount by which the s.1(3) amount for the transferee settlement for that year is increased under subs.(3).

Section 90(7)(8) TCGA deal with timing issues:

- (7) The increase under subs.(3) has effect for the year of transfer and subsequent tax years.
- (8) The reduction under subs.(5) has effect for tax years after the year of transfer.

A loss accruing to the transferee trust cannot be set against the s.1(3) amount transferred from the transferor trust.

---

187 This is consistent with the rule that undistributed discretionary trust income is not settled property for IHT purposes; see ? (Definition of “IHT-settlement”). Though the CGT definition is not the same; see 1.4 (Settlement: Standard IT/CGT definition).

188 Section 90(2) TCGA provides a commonsense definition: “In this section ‘the year of transfer’ means the tax year in which the transfer occurs.”

### 57.39.3 *Amount transferred*

Section 90(4) TCGA provides:

“The relevant proportion” is—

- (a) the market value of the property transferred, divided by
- (b) the market value of the property comprised in the transferor settlement immediately before the transfer.

Gains are transferred on a proportionate basis, not LIFO or FIFO.

Section 90(9) TCGA deals with trust debts:

When calculating the market value of property for the purposes of this section or s.90A in a case where the property is subject to a debt, reduce the market value by the amount of the debt.

### 57.39.4 *Transfer to UK trust*

Section 90(6) TCGA deals with a transfer to a UK resident settlement:

If neither s.87 nor s.89(2) would otherwise apply to the transferee settlement for the year of transfer—

- (a) s.89(2) to (4) apply to the settlement for that year (and subsequent tax years), and
- (b) for this purpose, references there to the last non-resident tax year are to be read as the year of transfer.

Amended as s.90(6) directs, s.89(2) TCGA provides:

Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under section 87A as it applies for that year) with the section 1(3) amount for the ~~last non-resident tax year~~ *year of transfer* or any earlier tax year.

See 57.37.2 (Offshore trust comes to UK).

### 57.39.5 *Transfer for consideration*

Section 90A TCGA provides:

- (1) Section 90 does not apply to a transfer of settled property made for consideration in money or money’s worth if the amount (or value) of that consideration is equal to or exceeds the market value of the

property transferred.

(2) The following provisions apply if—

- (a) s.90 applies to a transfer of settled property made for consideration in money or money’s worth, and
- (b) the amount (or value) of that consideration is less than the market value of the property transferred.

(3) If the transfer is of all of the settled property, for the purposes of s.90 treat the transfer as being of part only of the settled property.

(4) Deduct the amount (or value) of the consideration from the amount of the market value referred to in s.90(4)(a).

Section 90 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest-free loan repayable on demand, because the promise to repay is full consideration. For the same reason s.90 does not apply to repayment of a loan.

57.39.6 Interaction with sch 4B

Section 90(10) TCGA provides:

This section does not apply to—

- (a) a transfer to which Schedule 4B applies, or
- (b) any s.1(3) amount that is in a Schedule 4C pool (see para 1 of Schedule 4C).

See 58.14 (Schedule 4C: The key condition).

57.39.7 HMRC examples

The s.87 guidance note provides some straightforward examples:

**Example Transfer Consideration for transfer**

14	Entire fund	None
15	Part fund	None
16	Entire fund	Market value
17	Entire fund	Less than market value
18	Part fund	Less than market value
19	Transferee trust has unmatched gains (not matched)	
20	Gains of transferor trust matched first	

The first example is a transfer of an entire trust fund:

**Example 14 – New section 90 – All settled property transferred between settlements for nil consideration**

All the settled property of the transferor settlement is transferred to the transferee

settlement for nil consideration in 2008-09.

No capital payments have been made out of the transferor settlement.

The transferor settlement had the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transferee settlement acquires these unmatched section 2(2) amounts. They are added to any unmatched section 2(2) amounts it already has for the years 2005-06 and 2008-09. This applies whatever the residence status of the transferee settlement.

The unmatched section 2(2) amounts in the transferor settlement are now reduced to Nil.<sup>189</sup>

The next example is a transfer of part of a trust fund:

**Example 15 – New section 90 – Part of settled property transferred between settlements for nil consideration**

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement for nil consideration in 2008-09. The cash remains in the transferor settlement.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

It is only the 'relevant proportion' of these unmatched section 2(2) amounts that is transferred to the transferee settlement.

The relevant proportion is 4/5 ( $\frac{£400,000}{[£400,000 + £100,000]}$ ).

*Transferee settlement*

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£16,000	(£20,000 × 4/5)
2008-09	£60,000	(£75,000 × 4/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.

*Transferor settlement*

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement.

The unmatched section 2(2) amounts become:

2005-06	£4,000	(£20,000 – £16,000)
2008-09	£15,000	(£75,000 – £60,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

The next example is a transfer for full consideration:

**Example 16 – New section 90A – All settled property transferred between**

189 Author's footnote: But the transferor settlement has ceased to exist.

**settlements for consideration of market value**

All the settled property of the transferor settlement is transferred to the transferee settlement in 2008-09. The transferee settlement pays market value to the transferor settlement for these assets.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

These unmatched section 2(2) amounts remain in the transferor settlement and can be matched with future capital payments from that settlement. None of the unmatched section 2(2) amounts are transferred to the transferee settlement.

The next example is a transfer at an undervalue:

**Example 17 – New section 90A – All settled property transferred between settlements for consideration less than market value**

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. All these assets are transferred to the transferee settlement in 2008-09. The transferee settlement pays £300,000 to the transferor settlement for these assets.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transfer is treated as if it was a transfer of part only of the settled property. This is to bring in the 'relevant proportion' rules in section 90(3) and (4) TCGA in deciding how much of the unmatched section 2(2) amounts are transferred to the transferee settlement. In calculating the 'relevant proportion' you deduct the amount paid by the transferee settlement from the 'market value of the property transferred'. The relevant proportion is  $2/5$  ( $[\text{£}400,000 + \text{£}100,000 - \text{£}300,000] / [\text{£}400,000 + \text{£}100,000]$ ).

*Transferee settlement*

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£8,000	(£20,000 × 2/5)
2008-09	£30,000	(£75,000 × 2/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year.

This applies whatever the residence status of the transferee settlement.

*Transferor settlement*

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement.

The unmatched section 2(2) amounts become:

2005-06	£12,000	(£20,000 – £8,000)
2008-09	£45,000	(£75,000 – £30,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

**Example 18 – New section 90A – Part of settled property transferred between**

**settlements for consideration less than market value**

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement in 2008-09. The cash remains in the transferor settlement. The transferee settlement pays £300,000 to the transferor settlement for the shares.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

This transfer of part of the settled property brings in the 'relevant proportion' rules in section 90(3) and (4) TCGA in deciding how much of the unmatched section 2(2) amounts are transferred to the transferee settlement. In calculating the 'relevant proportion' you deduct the amount paid by the transferee settlement from the 'market value of the property transferred'.

The relevant proportion is  $1/5$  ( $[\pounds400,000 - \pounds300,000] / [\pounds400,000 + \pounds100,000]$ ).

*Transferee settlement*

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£4,000	(£20,000 × 1/5)
2008-09	£15,000	(£75,000 × 1/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year.

This applies whatever the residence status of the transferee settlement.

*Transferor settlement*

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement.

The unmatched section 2(2) amounts become:

2005-06	£16,000	(£20,000 – £4,000)
2008-09	£60,000	(£75,000 – £15,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

**Example 19 – New section 90(7) – Unmatched section 2(2) amounts transferred on a transfer between settlements do not affect matching in earlier years in transferee settlement**

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2008-09.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transferee settlement acquires these unmatched section 2(2) amounts. They are added to any unmatched section 2(2) amounts it already has. This applies whatever the residence status of the transferee settlement.

The unmatched section 2(2) amounts in the transferor settlement are now reduced to Nil. In its own right the transferee settlement had:

2001-02	Trustees' gains (section 2(2) amount)	£10,000
2004-05	Capital payments	£30,000
2006-07	Trustees' gains (section 2(2) amount)	£50,000
This has resulted in chargeable gains treated as accruing to the beneficiary of:		
2004-05	£10,000 (Also possible increase in tax charged under section 91)	
2006-07	£20,000	

There is no reworking of this matching when section 2(2) amounts are transferred from the transferor settlement. So the 2005-06 section 2(2) amount transferred in is not matched with any of the 2004-05 capital payments. The transferee settlement has unmatched section 2(2) amounts to carry forward of:

2005-06	£20,000	From transferor settlement
2006-07	£30,000	In its own right
2008-09	£75,000	From transferor settlement

**Example 20 – New section 90(3) – Capital payments out of transferor settlement in year of transfer matched with section 2(2) amounts of transferor settlement for that and earlier years before calculating section 2(2) amounts transferred**

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement for nil consideration in 2008-09. The cash remains in the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

The first capital payment made out of the transferor settlement is made in 2008-09. It does not matter whether the capital payment is made before or after the transfer of the shares between settlements. The capital payment is £50,000 to a beneficiary. That £50,000 capital payment is matched with £50,000 of the 2008-09 section 2(2) amount and a chargeable gain of £50,000 is treated as accruing to the beneficiary under section 87 for 2008-09. The remaining unmatched section 2(2) amount for 2008-09 is reduced to £25,000 (£75,000 – £50,000).

It is only the 'relevant proportion' of the remaining unmatched section 2(2) amounts that is transferred to the transferee settlement.

The relevant proportion is 4/5 (£400,000 / [£400,000 + £100,000]).

*Transferee settlement*

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£16,000	(£20,000 × 4/5)
2008-09	£20,000	(£25,000 × 4/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.

*Transferor settlement*

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement.

The unmatched section 2(2) amounts become:

2005-06	£4,000	(£20,000 – £16,000)
---------	--------	---------------------

2008-09 £5,000 (£25,000 – £20,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

### 57.39.8 *Trust transfers: s.87 planning*

It is interesting to compare the technique of s.81 IHTA (deeming transferred property to remain in the original trust).<sup>190</sup> While that is not without its problems, it is a more effective anti-avoidance rule. The reason may be that s.90 is not (or not just) an anti-avoidance provision. It is intended to facilitate inter-trust transfers. Such transfers may be desirable:

- (1) for non-tax reasons, to separate the interests of different branches of a family
- (2) to avoid unfairness which otherwise follows from the operation of s.87.

To illustrate the fairness point. Suppose:

- (1) Trustees hold a trust fund worth £2m with s.1(3) amounts of £1m
- (2) Principal beneficiaries are B1/B2, both UK resident/domiciled
- (3) The trustees wish to make a capital payment of £1m to B1

If they do so directly, then a subsequent distribution to B2 would be tax free. That would not be fair as between B1 and B2 .

Instead:

- (1) The trustees transfer half of the trust fund to a new trust.
- (2) Either the old or the new trust makes the £1m capital payment to B1.

This in principle solves this unfairness: B1 pays tax on one half of the s.1(3) amount and B2 in due course will in principle pay tax on the other half, when that fund is transferred to B2.

Take the same facts but assume that B1 or B2 is non-resident. Prior to the introduction of the non-resident disregard, HMRC were content for payments to be timed so that B1 received his or her payment first and “washed” the trust gains.<sup>191</sup> The planning now would be to transfer a fund to a separate trust. Then make the payment to B1. A payment to the UK resident beneficiary only pays tax on half the gains. That seems a fair

---

190 See 75.10 (Same settlement fiction: s.81).

191 See 57.57.1(Capital payment timing).

result. Could planning to obtain such a fair result constitute avoidance? It would be wise, at least, to arrange that the new trust is not wound up immediately after being created.

### 57.39.9 Trust transfer via company

The position is more complicated if an inter-trust transfer involves a payment from or to an underlying company.

I here consider the s.90 issues: for a list of other issues on transfers to/from companies across trusts, see 75.14 (Transfers to/from underlying co).

#### Case 1

#### Case 2

In case 1, there is a transfer from trust 1 to a company held by trust 2. At first sight, s.90 does not apply because it is not the case that the trustees of a trust 1 transfer *settled property* to the trustees of trust 2.

In case 2, there is a transfer from a company held by trust 1 to trust 2. At first sight, s.90 does not apply because it is not the case that the trustees of a trust 1 transfer settled property *to the trustees of trust 2*.

There might be a transfer from a company held by trust 1 to a company held by trust 2; in that case there are two independent reasons why s.90 does not apply. In these cases there is (in general) a *value shift* between trusts, but no *transfer of property* between trusts.

There is in principle a capital payment from trust 1 to trust 2. But it is difficult to say that a capital payment entails that there is deemed to be a transfer of settled property, even on a purposive construction, because the s.87C disregard and/or the general (s.87D) disregard apply.<sup>192</sup>

Note however that there is (in general) a disposal of assets, by trust 1 (in case 1) or by the company (in case 2), on which a gain may accrue to the trust or company concerned.

192 See 57.13 (Payment to/from co across trusts).

Does this offer a means to avoid the application of s.90? If the issue arises in the context of a tax avoidance scheme, there is more to be said:

- (1) One argument is that the trust/company structure constitutes one arrangement, and so one “settlement” for s.87 purposes. There is a transfer from one such arrangement to another.
- (2) Alternatively, of course, the GAAR might apply.

Neither of those two arguments are straightforward, and both are fact sensitive; but we are fishing in murky waters.

#### **57.40 Pre-1981 gain/capital payment**

Para 116 sch 7 FA 2008 provides:

For the purposes of sections 87 and 87A of TCGA 1992, no account is to be taken of—

- (a) any capital payment received before 10 March 1981, or
- (b) any capital payment received on or after that date but before 6 April 1984, so far as it represents a chargeable gain which accrued to the trustees before 6 April 1981.

Capital payments before 10 March 1981 are disregarded.

Capital payments before 6 April 1984 are disregarded if they represent a chargeable gain which accrued to the trustees before 6 April 1981. How does one decide whether a capital payment represents a pre-1981 gain? Presumably that is so if the capital payment is matched with a pre-1981 gain. But this question will not often arise now.

No account is taken of gains/losses before 1981/82 when the legislation was introduced.

#### **57.41 Pre-1998 gain/capital payment**

Para 118 sch 7 FA 2008 provides:

- (1) This paragraph applies if—
  - (a) s.87 of TCGA 1992 applies to a settlement for the tax year 2008-09 or any subsequent tax year (“the tax year”),
  - (b) the settlement was made before 17 March 1998,
  - (c) none of the settlors fulfilled the residence requirements when the settlement was made, and
  - (d) none of the settlors fulfils the residence requirements in the tax year.
- (2) For the purposes of that section as it applies to the settlement for the

tax year, no account is to be taken of—

- (a) any gains or losses accruing to the trustees of the settlement before 17 March 1998, or
  - (b) any capital payments received before that date.
- (3) A settlor “fulfils the residence requirements” when the settlor is—
- (a) resident or ordinarily resident in the UK, and
  - (b) domiciled<sup>193</sup> in any part of the UK.

In principle, (inter alia) for foreign domiciled settlor settlements, one disregards gains and capital payments before 17 March 1998. But if in any year there is a UK resident and domiciled settlor, even only one of several, the relief is lost in that year. Thus, a “tainting” principle applies.<sup>194</sup> A small, even nominal contribution from a UK resident and domiciled settlor will forfeit the transitional relief for all years that that settlor is UK resident and domiciled.

One can envisage a case where it is better that this relief does not apply, in which case it would be possible to arrange to forfeit the relief, but this will not be common.

#### **57.42 s.1(3) amount at 5/4/2008**

The concept of s.1(3) amount<sup>195</sup> was introduced in the FA 2008 with effect from 2008/09. However it is necessary to compute the s.1(3) amount for earlier years in order to know what s.1(3) amount is carried forward to 2008/09 and subsequently.

Para 120 sch 7 FA 2008 provides:

- (1) This paragraph applies to a settlement if s.87 or s.89(2) of TCGA 1992 applied to it for the tax year 2007–08 or any earlier tax year.
- (2) The following steps are to be taken for the purposes of calculating the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.

*Step 1*

Calculate (in accordance with s.87 and, where appropriate, s.88) the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.

For this purpose, references in s.87(4) and (5) of TCGA 1992 (as

---

193 See 57.53 (Formerly-domiciled resident).

194 See 94.6 (Tainting).

195 It was then called a s.2(2) amount, but I use the modern reference for convenience.

substituted) to s.87 of that Act applying to a settlement for a tax year are to be read as references to s.87 of that Act (as it had effect before that substitution) applying to a settlement for a tax year.

*Step 2*

Find the total amount of chargeable gains treated under s.87 or 89(2) as accruing to beneficiaries of the settlement in the tax year 2007-08 or any earlier tax year (“the total deemed gains”).

I prefer the label “pre-2008 s.87 gains”.

*Step 3*

Find the earliest tax year for which the s.2(2) amount is not nil.

If the s.2(2) amount for that year is less than or equal to the total deemed gains [pre-2008 s.87 gains], reduce that s.2(2) amount to nil. Otherwise, reduce that s.2(2) amount by the amount of the total deemed gains.

*Step 4*

Reduce the total deemed gains [pre-2008 s.87 gains] by the amount by which the s.2(2) amount was reduced under Step 3.

*Step 5*

If the total deemed gains [pre-2008 s.87 gains] is not nil, start again at Step 3.

For this purpose, read references to the earliest tax year for which the s.2(2) amount is not nil as references to the earliest tax year—

- (a) which is after the last tax year for which Steps 3 and 4 have been undertaken, and
- (b) for which the s.2(2) amount is not nil.

EN FB 2008 provides an example:

60. Example: determining the s.2(2) amount for years preceding 2008-09:

The s.2(2) amounts of a settlement were:

2004-05: £100,000

2005-06: £50,000

2006-07: £200,000

2007-08: £200,000

Total deemed gains [pre-2008 s.87 gains] were £450,000.

a. Subtract the s.2(2) (£100,000) amount for the earliest year from the total deemed gains. Section 2(2) amount for 2004-05 reduces to nil. Total deemed gains reduced to £350,000.

b. Subtract the s.2(2) (£50,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for

2005-06 reduces to nil. Total deemed gains reduced to £300,000.

c. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2006-07 reduces to nil. Total deemed gains reduced to £100,000.

d. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2007-08 reduces to £100,000. Total deemed gains reduced to nil.

The s.2(2) amount for the settlement for 2007-08 is therefore £100,000.

In short, pre-2008 s.87 gains are deducted from pre-2008 s.1(3) amounts on a FIFO basis (first in first out). It is expressed in just about the most obscure way possible.<sup>196</sup>

The s.87 guidance note provides:

**Identifying unmatched s.2(2) amount for years before 2008-09: para 120 Sch 7**

30. Although the new matching rules in section 87A take effect from 2008-09 they will apply to match capital payments received in 2008-09 and later against unmatched section 2(2) amounts of 2007-08 and earlier. This means it is necessary to calculate what those section 2(2) amounts are. Paragraph 120 of Schedule 7 explains how to do this in a series of steps. Capital payments matched with these section 2(2) amounts may be subject to the increased tax charge under section 91 TCGA.

31. First you calculate what the section 2(2) amount would be for each earlier year using the definition in the new section 87(4) but applying the CGT rules for the earlier year. So you give taper relief and indexation allowance as appropriate. These section 2(2) amounts include gains made by the trustees which have been matched with capital payments.

32. Second you identify the total chargeable gains that have accrued to beneficiaries under section 87 in the years up to and including 2007-08. This includes chargeable gains that have not been charged to tax – for example because of the non-UK residence or domicile status of the beneficiary. This figure is called the “total deemed capital gains”.

33. Third you allocate the total deemed capital gains to years in which there is a section 2(2) amount taking the earliest year first. You reduce the section 2(2) amount by the amount of the total deemed gains [pre-2008 s.87 gains]. If the total deemed gains are greater than the section

---

196 For discussion of the drafting technique, see 57.15.7 (Method statements: Critique).  
FD\_57\_Capital\_Payments\_from\_Non-resident\_Trusts\_S87\_2021.wpd 03/11/21

2(2) amount the section 2(2) for the year is reduced to nil. A corresponding reduction is made in the total deemed gains. When all the total deemed gains have been allocated you are left with the unmatched section 2(2) amounts for 2007-08 and earlier years. See example 5.

**Example 5: Identifying unmatched s.2(2) amounts for years before 2008-09: para 120 Sch 7**

The section 2(2) amounts for a settlement are:-

2005-06	£50,000
2006-07	£75,000
2007-08	£60,000

Up to and including 2007-08 capital payments of £90,000 have been received by beneficiaries and the total deemed gains [pre-2008 s.87 gains] are £90,000. None of the capital payments were received in the period 12 March to 5 April 2008. See example 12 for an example of payments received in this period by a non-UK domiciled beneficiary.

The total deemed gains are allocated against the section 2(2) amounts using the FIFO rules in paragraph 120 of Schedule 7 that apply to matching for 2007-08 and earlier years. They are allocated as follows:

	Original s2(2) amount	Total deemed gains	Deemed s2(2) amount
2005-06	£50,000	£50,000	Nil
2006-07	£75,000	£40,000	£35,000
2007-08	£60,000	Nil	£60,000

Suppose capital payments of £70,000 were received by beneficiaries in 2009-10 and there is no section 2(2) amount for that year or 2008-09. The £70,000 capital payments are matched under the LIFO rules in the new section 87A TCGA that apply for matching in 2008-09 and later years. £60,000 of those payments are matched against the section 2(2) amount for 2007-08 and £10,000 of those payments are matched against the section 2(2) amount for 2006-07. The total deemed gains are £70,000 (£60,000 + £10,000) treated as accruing in 2009-10. This leaves unmatched a deemed section 2(2) amount for 2006-07 of £25,000 (£35,000 – £10,000) available to match against capital payments made in 2010-11 or later years.

Assuming all the beneficiaries were resident in the UK in 2009-10 their liability to CGT on the section 87 gains accruing to them will depend on their domicile in 2009-10. If any of the beneficiaries are non-UK domiciled individuals paragraph 124(2)(b) of Schedule 7 will prevent them being charged to CGT. This applies whether or not they have claimed to use the remittance basis for 2009-10. If any of the beneficiaries are UK domiciled they will be charged to CGT on the section 87 gains. Any tax due on these gains will be increased by

section 91 TCGA.

Assume the entire capital payment is received by a UK resident and domiciled beneficiary who has no other capital gains and losses in 2009-10. At the time of writing the annual exempt amount and rate of CGT are not known for 2009-10. This example assumes they are the same as for 2008-09 at £9,600 and 18% respectively. The annual exempt amount is set first against the gain accruing from the 2006-07 capital payment. Ie £10,000 – £9,800 = £200. The tax due on the gain accruing from the 2006-07 capital payment is £36 (£200 @ 18%). This tax is increased by £10 (£36 @ 30% = £10). The tax due on the gain accruing from the 2007-08 amount is £10,800 (£60,000 @ 18%). This tax is increased by £2,160 (£10,800 @ 20%). The total CGT payable for 2009-10 is £13006 (£36 + £10 + £10,800 + £2,160).

Para 120(3) provides for schedule 4B cases, though the drafter does not try very hard:

If, before 6 April 2008, the trustees of the settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, sub-para (2) has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

#### 57.42.1 *Pre-2008 OIG amounts*

Para 99 sch 7 FA 2008 applies the same rule to OIG amounts:

Paragraphs 120 and 121 apply in relation to offshore income gains as if—

- (a) references to section 2(2) amounts were to OIG amounts,
- (b) references to chargeable gains were to offshore income gains, and
- (c) Step 1 of paragraph 120(2) provided that OIG amounts are to be calculated in accordance with—
  - (i) section 762(2) of ICTA (the reference in the second sentence of that Step to section 87(4) of TCGA 1992 being read as a reference to section 762(2) of ICTA), or
  - (ii) section 87(5) of TCGA 1992 as applied by section 762(3) of ICTA.

Section 762 ICTA is now repealed. The OFTR should have updated the references but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new

provisions should be implied.

### **57.43 Pre-2008 capital payments**

In order to follow the present legislation, one needs to have in mind the original terms of s.87(6) TCGA, and in order to follow that, one needs to read all of the pre-2008 s.87(4)-(6) TCGA:

*(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*

*(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*

*(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

Para 122 sch 7 FA 2008 provides:

(1) If all of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced to nil.

(2) If part of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced by the amount of that part.

(3) If—

(a) chargeable gains were treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing in the tax year 2007-08 or any earlier tax year to a beneficiary,

(b) more than one capital payment that the beneficiary had received was taken into account for the purposes of determining the amount of chargeable gains treated as accruing to the beneficiary, and

(c) the amount of those chargeable gains was less than the total amount of capital payments taken into account,

for the purposes of this paragraph treat s.87(6) of TCGA 1992 as originally enacted as having effect in relation to earlier capital payments before later ones.

The point of this (I think) is to prevent double counting of a capital payment: it is set against s.1(3) amounts under para 120 and not a second time.

The s.87 guidance note provides:

34. In the same way that it is necessary to deal with unmatched section 2(2) amounts for a year before 2008-09 it is also necessary to deal with unmatched capital payments received before 2008-09. You have to identify the year in which an unmatched capital payment was received. This is dealt with in paragraph 122 of Schedule 7.

35. First you apply the rule in the original section 87(6) to determine if all or any of a capital payment would be left out of account. A payment would be left out of account to the extent that chargeable gains accrued to a beneficiary as a result of making the payment. In other words if the payment is matched against gains made by the trustees. See example 6.

36. If more than one capital payment is matched against the trustees' gains for a year and the total of the payments is greater than the chargeable gain that accrues the rule in paragraph 122(3) applies. You identify the year the unmatched payment was received by matching the payments received in the earliest years first. See example 7.

**Example 6: Identifying unmatched capital payments received before 2008-09: para 122(1) & (2) Sch 7**

2005-06	Capital payments received	Beneficiary A	£15,000
		Beneficiary B	£12,000
	Trustees' gains (s.2(2) amount)		£37,000
2007-08	Capital payments received	Beneficiary A	£8,000
		Beneficiary B	£9,000

In 2005-06 the capital payments £15,000 and £12,000 are matched against £37,000 trustees' gains and chargeable gains of £15,000 and £12,000 accrue to A and B. In 2008-09 and later years paragraph 122(1) of schedule 7 applies and the capital payments are reduced to nil. The unmatched trustees' gains of £10,000 are carried forward under the old section 87(2) to later years.

In 2007-08 £10,000 trustees' gains are matched against the £17,000 capital payments received. Gains of £4,705 ( $£10,000 \times 8,000/17,000$ ) accrue to A and gains of £5,295 ( $£10,000 \times 9,000/17,000$ ) accrue to B. Their respective unmatched capital payments are reduced to £3,295 ( $£8,000 - £4,705$ ) and £3,705 ( $£9,000 - £5,295$ ). Paragraph 122(2) of Schedule 7 ensures only those unmatched parts of the capital payments are carried forward for use in 2008-09 or later years.

The s.87 guidance note provides:

36. If more than one capital payment is matched against the trustees' gains for a year and the total of the payments is greater than the chargeable gain that accrues the rule in paragraph 122(3) applies. You

identify the year the unmatched payment was received by matching the payments received in the earliest years first. See example 7.

The s.87 guidance note provides:

**Example 7: Identifying unmatched capital payments received before 2008-09: Para 122(3) Sch 7**

2005-06	Capital payments received	Beneficiary A	£16,000
		Beneficiary B	£14,000
	Trustees' gains (s.2(2) amount)		£ 5,000
2007-08	Capital payments received	Beneficiary A	£10,000
		Beneficiary B	£ 8,000
	Trustees' gains (s.2(2) amount)		£13,000
2008-09	Section 2(2) amount		£20,000

In 2005-06 gains of £2,667 ( $£5,000 \times 16,000/30,000$ ) would accrue to beneficiary A and the unmatched capital payment would be reduced to £13,333 ( $£16,000 - £2,667$ ). Gains of £2,333 ( $£5,000 \times 14,000/30,000$ ) would accrue to beneficiary B and the unmatched capital payment would be reduced to £11,667 ( $£14,000 - £2,333$ ).

In 2007-08 A receives a further capital payment of £10,000 giving them total unmatched capital payments of £23,333. B receives a further capital payment of £8,000 giving them total unmatched capital payments of £19,667. Gains of £7,054 ( $£13,000 \times 23,333/43,000$ ) accrue to A. Gains of £5,946 ( $£13,000 \times 19,667/43,000$ ) accrue to B. A's unmatched capital payments to carry forward to 2008-09 are £16,279 ( $£23,333 - £7,054$ ). B's unmatched capital payments are £13,721 ( $£19,667 - £5,946$ ).

In 2008-09 the conditions for paragraph 122(3) of Schedule 7 are satisfied:

- Chargeable gains have accrued to both beneficiaries in 2007-08.
- Capital payments from 2005-06 and 2007-08 have been used for the purposes of determining those gains.
- The amount of the chargeable gains £13,000 is less than the total of the capital payments £43,000.

Paragraph 122(3) matches the £13,000 gains first against the capital payments received in 2005-06. In 2005-06 A's unmatched capital payments were £13,333. The 2007-08 gains of £7,054 are matched first against those payments reducing the unmatched capital payments to £6,279. B's unmatched capital payments were £11,667. The 2007-08 gains of £5,496 are matched first against those payments reducing the unmatched capital payments to £5,721. The total unmatched capital payments to carry forward to 2008-09 are then:

- To A £16,279 consisting of £6,279 from 2005-06 and £10,000 from 2007-08
- To B £13,721 consisting of £5,721 from 2005-06 and £8,000 from 2007-08

The ordinary rules of section 87A then apply for the purpose of matching the £20,000 2008-09 section 2(2) amount with the earlier years' capital payments. Gains of £10,000 accrue to A and gains of £8,000 accrue to B as a result of

matching the section 2(2) amount against the capital payments received in 2007-08. That leaves £2,000 of the section 2(2) amount to match with capital payments from 2005-06. A gain of £1,046 ( $£2,000 \times 6279/12,000$ ) accrues to A and a gain of £954 ( $£2,000 \times 5721/12,000$ ) accrues to B as a result of matching that £2,000 of the section 2(2) amount. The total gains attributed under section 87 for 2008-09 are:

- To A £11,046 ( $£10,000 + £1,046$ )
- To B £8,954 ( $£8,000 + £954$ )

The total unmatched capital payments to carry forward to 2009-10 are then:

- To A £5,233 ( $£6,279 - £1,046$ ) all from 2005-06
- To B £4,767 ( $£5,721 - £954$ ) all from 2005-06.

Para 122 then imposes the same rules for OIGs:

(4) References in this paragraph to s.87(6) of TCGA 1992 include that provision as it would (but for the amendments made by this Schedule) have applied by virtue of s.762(3) of ICTA (offshore income gains).

(5) References in this paragraph to chargeable gains include offshore income gains.

Section 762 ICTA is now repealed. The OFTR should have updated the reference but (perhaps carelessly) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

#### **57.44 Pre-2008 capital payment/trust gain, matched post 2008**

Para 124 sch 7 FA 2008 provides:

- (1) This paragraph applies if—
  - (a) chargeable gains are treated under s.87 or 89(2) of TCGA 1992 as accruing to an individual in the tax year 2008-09 or any subsequent tax year, and
  - (b) the individual is not domiciled<sup>197</sup> in the UK in that year.
- (2) The individual is not charged to capital gains tax on the chargeable gains if and to the extent that they are treated as accruing by reason of—
  - (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
  - (b) the matching of any capital payment with the s.2(2) amount for the tax year 2007-08 or any earlier tax year.

There are two reliefs here:

---

197 See 57.53 (Formerly-domiciled resident).

- (1) Para (2)(a) provides relief for pre-2008 capital payments to foreign domiciliaries which are matched with post-2008 s.1(3) amounts.
- (2) Para (2)(b) provides relief for post 2008 capital payments which are matched with pre-2008 s.1(3) amounts.

EN FB 2008 summarises the matter this way:

440. The overall effect of these new rules is that: ...

[1] there will be no charge to tax in respect of capital payments made to non-UK domiciled beneficiaries who:

- [a] receive capital payments before 6 April 2008 that are matched to trust gains accruing on or after 6 April 2008; or
- [b] receive capital payments on or after 6 April 2008 that are matched to trust gains accruing before 6 April 2008.

This will be so irrespective of whether the non-UK domiciled beneficiary is a remittance basis user

The s.87 guidance note provides:

**Example 10: Capital payments received by non-UK domiciled beneficiary before 6 April 2008 matched with s.2(2) amount for 2008-09 or later: para 124 Sch 7**

2005-06	Capital payments received	£10,000
2008-09	Capital payments received	£16,000
	Section 2(2) amount	24,000

The capital payments are received by a beneficiary who is UK resident but non-UK domiciled in 2008-09. A chargeable gain of £24,000 accrues to the beneficiary in 2008-09. On the LIFO basis the capital payments received are matched £16,000 2008-09 and £8,000 2005-06. The beneficiary is liable to CGT on the £16,000 only. The beneficiary is not liable on the £8,000 because the section 2(2) amount realised in 2008-09 is matched to a capital payment received in 2005-06 by a person who is not domiciled in the UK. This applies whether or not the beneficiary is a remittance basis user.

The CGT due on the £16,000 will depend on whether the beneficiary is a remittance basis user and on whether the trustees had made an election under paragraph 126 of Schedule 7. If the trustees have made the election the gain will be restricted to the amount that relates to the growth in the value of the asset since 5 April 2008. If the beneficiary is a remittance basis user the gain will not be charged until it is remitted.

In any circumstances the settlement's section 2(2) amount for 2008-09 is reduced to nil. There are unmatched capital payments from 2005-06 of £2,000 (£10,000 - £8,000) to carry forward.

If the beneficiary was non-UK domiciled in 2005-06 but became UK domiciled sometime before the capital payment was received the condition in paragraph 124(1)(b) is not satisfied. The beneficiary is liable to CGT on the entire gain of

£24,000. It is irrelevant whether the domicile status changed before or after 6 April 2008.

**Example 11: Gain accruing in respect of s.2(2) amount for a year before 2008-09 when beneficiary non-UK domiciled: para 124 Schedule 7**

2005-06	Capital payments received	Nil
	Section 2(2) amount	£ 7,000
2006-07	Capital payments received	Nil
	Section 2(2) amount	£ 5,000
2008-09	Capital payment received	£30,000
	Section 2(2) amount	£16,000

The capital payment in 2008-09 was received by a UK resident but non-UK domiciled beneficiary. A chargeable gain of £28,000 accrues in 2008-09. Using the last-in first-out basis of matching the capital payment £30,000 is matched against the section 2(2) amounts as follows.

2008-09	£16,000
2006-07	£ 5,000
2005-06	<u>£ 7,000</u>
	<u>£28,000</u>

The beneficiary is liable to CGT only on the £16,000 matched with the section 2(2) amount for the year 2008-09. The beneficiary is not liable to CGT on the section 87 gains that accrue as a result of matching the capital payment against section 2(2) amounts for 2006-07 and 2005-06. This is because the beneficiary was not domiciled in the UK in 2008-09 when the capital payment was received and the section 2(2) amounts are for years before 2008-09.

The CGT due on the £16,000 will depend on whether the beneficiary is a remittance basis user and on whether the trustees had made an election under paragraph 126 of Schedule 7. If the trustees have made the election the gain will be restricted to the amount that relates to the growth in the value of the asset since 5 April 2008. If the beneficiary is a remittance basis user the gain will not be charged until it is remitted.

In any circumstances the settlement's section 2(2) amounts for 2008-09, 2006-07 and 2005-06 are reduced to nil. The unmatched capital payments for 2008-09 are reduced to £2,000 (£30,000 - £28,000).

Suppose the beneficiary was non-UK domiciled in 2005-06 and 2006-07 but became UK domiciled in 2007-08 or 2008-09. They would be liable to CGT on the whole chargeable gain £28,000. The fact that they were non-UK domiciled in the years before 2008-09 when the section 2(2) amounts were realised is not relevant. The test in paragraph 124(1)(b) of Schedule 7 is the domicile status for the year in which the gain accrues as a result of matching those amounts with a capital payment.

#### 57.44.1 Pre-2008 capital payment and pre-2008 OIG amount

Para 100 sch 7 FA 2008 provides the same rules for OIG amounts:

(1) This paragraph applies if—

- (a) by virtue of section 87 or 89(2) of, or Schedule 4C to, TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), income is treated under such regulations (regulation 17 of those Regulations[]) as arising to an individual in the tax year 2008–09 or any subsequent tax year, and
  - (b) the individual is not domiciled<sup>198</sup> in the UK in that year.
- (2) The individual is not charged to income tax on the income if and to the extent that it is treated as arising by reason of—
- (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
  - (b) the matching of any capital payment with the OIG amount for the tax year 2007–08 or any earlier tax year.

#### 57.44.2 *Payment 12 Mar - 5 Apr 2008*

Para 125 sch 7 FA 2008 provides a special rule for these capital payments:

- (1) This paragraph applies in relation to a settlement for the tax year 2008-09 or any subsequent tax year (“the relevant tax year”) if—
  - (a) an individual who was resident or ordinarily resident, but not domiciled, in the UK in the tax year 2007-08 received a capital payment from the trustees of the settlement on or after 12 March 2008 but before 6 April 2008, and
  - (b) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.
- (2) For the purposes of sections 87 to 89 of TCGA 1992 as they apply in relation to the settlement for the relevant tax year, no account is to be taken of the capital payment.

One might refer to capital payments made between 12 March and 5 April 2008 as post-budget 2008 capital payments. There is no matching for post-budget 2008 capital payments, so such payments do not reduce s.1(3) amounts.

January 2009 Qs & As provides some background explanation:

**Q4:** Paragraph 125(2) appears to disregard payments between 12 March and 5 April altogether, which is different to the treatment proposed in the Budget documentation published on 12 March.

**A:** The original intention set out in the Budget documentation of 12

---

198 See 57.53 (Formerly-domiciled resident).

March and legislation was to allow the matching of capital payments between 12 March 2008 and 5 April 2008 with any gains relating to the period up to 5 April 2008 arising to the trustees after 5 April 2008. However, this proposal was dropped because it would have introduced additional and unnecessary complexity to the legislation.

This rule is not extended to offshore income gains. It is not clear if that was deliberate or an oversight.

The s.87 guidance note provides:

**Non-UK domiciled beneficiaries: capital payments received 12 March to 5 April 2008: para 125 Sch 7**

50. Paragraph 125 of Schedule 7 is an anti-avoidance measure. Its purpose was to discourage trustees making large capital payments to non-UK domiciled beneficiaries immediately before the beginning of 2008-09. These would then be matched against section 2(2) amounts for 2008-09 or later and, unless they had become UK domiciled, the beneficiaries would not be liable to CGT on any gains accruing to them.

51. The paragraph provides that any capital payment received by a UK resident or ordinary resident beneficiary is ignored if it was received on or after 12 March and before 6 April 2008 by a non-UK domiciled beneficiary. The payment is ignored only if the chargeable gain accrues in 2008-09 or later and the beneficiary is still non-domiciled when the gain accrues. See example 12.

**Example 12: Non-UK domiciled beneficiary: capital payment received 12 March to 5 April 2008: para 125 Sch 7**

Year	Capital payments	S.2(2) amount
2007-08	£200,000	£ 50,000
2010-11	Nil	£ 80,000

The 2007-08 capital payment was made on 4 April 2008 to a UK resident but non-UK domiciled beneficiary.

A chargeable gain of £50,000 accrues to the beneficiary in 2007-08 but they are not liable to CGT on this gain. The settlement’s section 2(2) amount for 2007-08 is reduced to nil. The unmatched capital payment for 2007-08 is reduced to £150,000.

If the beneficiary is non-UK domiciled in 2010-11 the unmatched capital payment £150,000 for 2007-08 is not matched against the section 2(2) amount £80,000 for 2010-11 and no section 87 gain accrues for that year. This is because the capital payment was received in the period 12 March 2008 to 5 April 2008 inclusive by a beneficiary who was not domiciled in the UK when they received the payment. The settlement’s unmatched section 2(2) amount for 2010-11 remains at £80,000.

The capital payment will remain unmatched against section 2(2) amounts for future years provided the beneficiary remains non-domiciled. If the taxpayer has become UK domiciled by the time a section 2(2) amount is realised in a future year the payment can be matched against that amount and a section 87 gain will

accrue to the beneficiary in that year.

In the example suppose a section 2(2) amount of £20,000 is realised in 2011-12. There are no capital payments in that year. The beneficiary is still non-UK domiciled. The unmatched capital payment £150,000 from 2007-08 is not matched against this section 2(2) amount.

The beneficiary becomes UK domiciled in 2012-13 and stays UK domiciled in later years.

In 2014-15 a section 2(2) amount of £80,000 is realised. No capital payments are made in that year. Paragraph 125 of Schedule 7 does not apply to year 2014-15 because the taxpayer is UK domiciled in that year. The rules in section 87A match the section 2(2) amount for 2014-15 with the unmatched capital payment £150,000 2007-08. A chargeable gain of £80,000 accrues to the beneficiary in 2014-15. At the time of writing the annual exempt amount and rate of CGT are not known for 2014-15. This example assumes they are £15,000 and 18% respectively. Assuming that the annual exempt amount is £15,000 and the rate of CGT 18% the beneficiary will be liable to £11,700 CGT on this gain.

The section 2(2) amount for 2014-15 is reduced to nil and the unmatched capital payment for 2007-08 is reduced to £70,000 (£150,000 – £80,000). This capital payment will be matched against section 2(2) amounts realised in later years. Applying the matching rules in section 87A TCGA to a section 2(2) amount for 2014-15 does not result in a capital payment received in 2007-08 being matched against section 2(2) amounts for years 2010-11 and 2011-12. The section 2(2) amounts for those years will be matched against capital payments received in years after 2014-15. The remaining unmatched capital payments for 2007-08 £70,000 will be matched against section 2(2) amounts for years after 2014-15.

### **57.45 Pre-2008 inter-trust transfer**

Para 120(4) sch 7 FA 2008 disapplies the rules in para 120 where there was an inter-trust transfer before 2008/09<sup>199</sup> and para 121 sch 7 FA 2008 sets out its own set of rules:

(1) If s.90 of TCGA 1992 (as originally enacted) applied to a transfer of settled property made before 6 April 2008, this paragraph applies in relation to the transferor settlement and the transferee settlement.

(2) In this paragraph “the year of transfer” means the tax year in which the transfer occurred.

(3) The following steps are to be taken for the purpose of calculating the s.2(2) amount for the transferor and transferee settlements for the tax year 2007-08 and earlier tax years.

---

199 Para 120(4) provides:

This paragraph does not apply if s.90 of TCGA 1992 applied to a transfer of settled property by or to the trustees of the settlement that was made before 6 April 2008 (see para 121).

*Step 1*

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (at the end of the year of transfer) for the transferor settlement for the year of transfer and earlier tax years.

For this purpose, read references there to the tax year 2007-08 as references to the year of transfer.

*Step 2*

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (before the year of transfer) for the transferee settlement for the tax year before the year of transfer and earlier tax years.

For this purpose, read references there to the tax year 2007-08 as references to the tax year before the year of transfer.

*Step 3*

Calculate the s.2(2) amount for the transferee settlement for the year of transfer.

*Step 4*

Treat the s.2(2) amount for the transferee settlement for the year of transfer or any earlier tax year (as calculated under Step 2 or 3) as increased by—

- (a) the s.2(2) amount for the transferor settlement for that year (as calculated under Step 1), or
- (b) if part only of the settled property was transferred, the relevant proportion of the amount mentioned in para (a).

“The relevant proportion” here has the same meaning as in s.90(4) of TCGA 1992 (as substituted by this Schedule).

*Step 5*

Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under Step 4.

*Step 6*

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferor settlement for the tax year 2007-08 and earlier tax years.

For this purpose—

- (a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 1 and 5 above, and
- (b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 1 above.

*Step 7*

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferee settlement for the tax year 2007-08 and earlier tax years.

For this purpose—

- (a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 2 to 4 above, and
- (b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 2 above.

The drafter felt something should be done about multiple transfers, and sch 4B, but did not know what:

- (4) This paragraph applies with any necessary modifications in relation to a settlement as respects which more than one relevant transfer was made.
- (5) In sub-para (4) “relevant transfer” means a transfer—
- (a) made before 6 April 2008, and
  - (b) to which s.90 of TCGA 1992 applied.
- (6) If, before 6 April 2008, the trustees of the transferor or transferee settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, this paragraph has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

Para 99 sch 7 FA 2008<sup>200</sup> applies the same rules for OIG amounts.

### **57.46 Pre-2008 trust immigration**

In order to follow the present legislation, one needs to have in mind the original terms of s.89(2) TCGA, and in order to follow that it needs to be read with s.89(1):

*(1) Where a period of one or more years of assessment for which section 87 applies to a settlement (“a non-resident period”) succeeds a period of one or more years of assessment for each of which section 87 does not apply to the settlement (“a resident period”), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of section 87 if it was not made in anticipation of a disposal made by the trustees in the non-resident period.*

*(2) Where*

- (a) a non-resident period is succeeded by a resident period, and*
- (b) the trust gains for the last year of the non-resident period are not (or not wholly) treated as chargeable gains accruing in that year to beneficiaries,*

*then, subject to subsection (3) below, those trust gains (or the outstanding part of them) shall be treated as chargeable gains accruing in the first year of the resident period to beneficiaries of the settlement who receive capital payments from the trustees in that year; and so on for the second and subsequent years until the amount treated as accruing to beneficiaries is equal to the amount of the trust gains for the last year of the non-resident period.*

Para 123 sch 7 FA 2008 provides:

Section 89(2) of TCGA 1992 as substituted applies to a settlement for

---

200 Set out at 57.42.1 (Pre-2008 OIG amounts).

the tax year 2008-09 (and subsequent tax years) if s.89(2) of that Act as originally enacted would (but for the amendments made by this Schedule) have applied to the settlement for the tax year 2008-09.

## **57.47 2008 rebasing election**

### *57.47.1 Need for rebasing election*

Paragraph 126 sch 7 FA 2008 provides a relief which I call “**2008 rebasing relief**”. This is one of several rebasing reliefs.<sup>201</sup>

Para 126 sch 7 FA 2008 provides:

- (1) The following provisions apply to a settlement if—
  - (a) s.87 applies to the settlement for the tax year 2008-09, and
  - (b) the trustees of the settlement have made an election under this subparagraph. ...
- (5) An election under sub-para (1) is irrevocable.

EN FB 2008 provides:

63. The provisions of para [126] are subject to an election rather than being mandatory because:

- [1] depending on the assets comprised in the settlement as at 6 April 2008 it may not be advantageous for the paragraph to apply; and
- [2] the trustees will be required to provide additional information to HMRC about trust assets. Trustees of non-resident settlements have been assured in a letter from the Acting Chairman of HMRC, Dave Hartnett, dated 12 February 2008 that in applying the provisions set out in this Schedule, HMRC will not require any additional disclosure.<sup>202</sup>

As far as [1] is concerned, it can never be disadvantageous for para 126 to apply (the election cannot in any circumstances increase the tax liability).

The s.87 guidance note provides:

79. The election ... cannot increase the tax payable by a beneficiary. Whether it improves the position of the beneficiary depends on the history of the assets disposed of.

Subject to point [2] (confidentiality) an election should be made in every

---

201 See 53.14.1 (Rebasing reliefs).

202 <http://webarchive.nationalarchives.gov.uk/20080305134412/http://www.hmrc.gov.uk/news/residence-domicile.pdf>

case where it might be useful, which is generally the case where there are or might be UK resident foreign domiciled beneficiaries. I understand however that an election in relation to a trust unknown to HMRC will generally lead to enquiries.

#### 57.47.2 *Election: Requirements*

The s.87 guidance note provides:

82. The election can be made only if the settlement was non-UK resident throughout 2008-09.

This follows from para 126(1)(a). The guidance note continues:

Paragraph 126(1) requires that the election be made by the trustees of the settlement. It must be made by all the trustees or by a majority of them if they are permitted to act through a majority. It cannot be made by a beneficiary. If the beneficiary's Self Assessment tax return is taken up for enquiry an election may require additional disclosure to HMRC about assets held by the trustees in order to agree the valuation.

Para 126(6) sch 7 FA 2008 provides:

An election under that sub-paragraph must be made in the way and form specified by the Commissioners for HMRC.

The s.87 guidance note provides:

89. ... HMRC have provided a form RBE1 to satisfy this requirement and all elections must be made on that form. The form asks for the name of the settlement and the date it was created. The date is used to distinguish between settlements with similar names in particular those created by settlors with a prevalent surname. The form also asks the trustees to identify if and when a trigger event has occurred. The RBE1 can be downloaded from the HMRC website<sup>203</sup>....

90. Some trustees may have made the election by writing to CAR Residency before the form was available. That election remains valid and there is no need to make a further election on the form.

#### 57.47.3 *Election: Time limit*

Para 126(2) sch 7 FA 2008 provides:

---

203 <https://www.gov.uk/government/publications/non-resident-capital-gains-tax-reb-asing-election-assets-held-in-non-uk-resident-settlement-at-5-april-2008-rbe1>  
FD\_57\_Capital\_Payments\_from\_Non-resident\_Trusts\_S87\_2021.wpd 03/11/21

An election under sub-para (1) may only be made on or before the first 31 January to occur after the end of the first tax year (beginning with the tax year 2008-09) in which an event within either of the following paragraphs occurs—

- (a) a capital payment is received (or treated as received) by a beneficiary of the settlement,<sup>204</sup> and the beneficiary is resident in the UK in the tax year in which it is received, and
- (b) the trustees transfer all or part of the settled property to the trustees of another settlement, and s.90 of TCGA 1992 applies in relation to the transfer.

The time limit is crucial. The s.87 guidance note provides:

83. The relief is given only to individuals, paragraph 126(7), but the time limit is triggered if a capital payment is received by any UK resident beneficiary.

“Capital payment” is not defined in sch 7. The standard definition, in s.97 TCGA, is only “for the purposes of s.86A to 97 (and sch 4C)”. Strictly that definition does not apply for the purposes of sch 7. It is considered however that the context shows that the usual definition is intended to apply, notwithstanding the absent-minded omission of a provision to that effect. If that is right, a benefit within s.731 is not a capital payment so does not trigger the deadline for an election. It is well arguable that a benefit within the scope of OIG s.87 (which is chargeable to income tax) is not a “capital payment” for the purposes of para 126,<sup>205</sup> but it would be best not to rely on that point and to make the election in good time.

The s.87 guidance note provides:

87. An election may be made before a triggering event happens.

This is important as it is convenient and (in cases of offshore income gains, may be necessary) to make the election before there is any capital

---

204 Para 126 expands on this in sch 4C cases:

“(3) For a tax year as respects which the settlement has a Schedule 4C pool, the reference in sub-para (2)(a) above to a capital payment received (or treated as received) by a beneficiary of the settlement is to be read as a capital payment received (or treated as received) by a beneficiary of a relevant settlement from the trustees of a relevant settlement.

(4) Para 8A of that Schedule (relevant settlements) applies for the purposes of sub-para (3) above.”

205 See 64.13.3 (“Capital payment”).

payment. The s.87 guidance note continues:

There is no requirement that the beneficiary receiving the payment was a beneficiary of the settlement as at 6 April 2008. The recipient may become a beneficiary at some later time. The time limit in paragraph 126(2) of Schedule 7 runs from the time the trustees first make a capital payment to a UK resident beneficiary. If the trustees make such a payment and do not make the election they may be out of time for making the election if they make a payment to a UK-resident but non-domiciled beneficiary at a later time. The election can be made even if there are no non-UK domiciled beneficiaries when the payment is made.

88. Any election made late will be considered in accordance with the guidance in paragraph 13801 onwards in HMRC's Capital Gains Tax Manual [*recte* Capital Gains Manual].<sup>206</sup>

#### **57.48 2008 Rebasing: The relief**

Assuming an election has been made, we can move on to consider the relief.

The s.87 guidance note provides:

80. The election is commonly known as a “rebasing” election ... But it is not rebasing as that term applies to section 35 TCGA and assets held at 31 March 1982. There is no across the board revaluation of the assets in the trust fund as at 6 April 2008.

Para 126(7) sch 7 FA 2008 provides:

Sub-para (8) applies if—

- (a) by virtue of the matching of
  - [i] a capital payment with
  - [ii] the s.2(2) amount for the settlement for the tax year 2008-09 or any subsequent tax year (“the relevant tax year”), chargeable gains are treated under s.87 or 89(2) of, or para 8 Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
- (b) the individual is resident, but not domiciled,<sup>207</sup> in the UK in that year.

---

206 The reference is now CG13810.

207 See 57.53 (Formerly-domiciled resident).

That is, in short, the relief applies if s.87 gains accrue to a foreign domiciliary. If that condition is satisfied, we turn to the relief in para 126(8):

The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

EN FB 2008 provides:

64. It should be noted that para [126] does not affect the computation of the s.2(2) amount under s.87 for a year. It simply provides a mechanism for identifying an amount of the chargeable gain treated as accruing to a non-UK domiciled beneficiary that is not chargeable to tax because an element of the underlying s.2(2) amounts are attributable to the period before 6 April 2008, when non-UK domiciled beneficiaries were not chargeable to tax in respect of chargeable gains attributed to them under s.87.

But that generally comes to the same thing.

65. Para [126] applies to all non-UK domiciled beneficiaries of a settlement, the trustees of which have made a valid election. The non-UK domiciled beneficiary does not need to be a remittance basis user. Only once the provisions of para [126] have been applied is it necessary to see whether the amount of tax that is left in charge is chargeable on the arising basis, in the year in which the gains are treated as having accrued to the beneficiary, or on the remittance basis where one of s.809B, [809D or 809E] applies.

66. ... Although there is only one s.87 pool for each tax year, where an election has been made under para [126](1) trustees will need to keep track of the separate elements of gains attributed to the period before and after 6 April 2008 within the pool.

67. There are no special rules to deal with assets where the market value as at 6 April 2008 was either higher or lower than both the cost of acquisition of the asset and the disposal proceeds....

81. The election has no effect on the matching of capital payments to section 2(2) amounts or the reduction of capital payments and section 2(2) amounts. It has no effect on gains accruing to UK domiciled beneficiaries.

#### 57.48.1 *“Relevant proportion”*

Para 126(9) sch 7 FA 2008 provides:

The relevant proportion is  $A \div B$  where—

A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the s.2(2) amount for the settlement for the relevant tax year.

In short, rebasing relief applies to relevant assets;

A = gain after rebasing

B = the historic gain (gain without rebasing)

### 57.48.2 “Relevant asset”

Para 126(10) sch 7 FA 2008 provides:

For the purposes of sub-para (9) an asset is a “relevant asset” if—

- (a) by reason of the asset, a chargeable gain or allowable loss accrues to the trustees in the relevant tax year,<sup>208</sup> and
- (b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

The s.87 guidance note provides:

79. ... It is not possible to make the election only in respect of assets which have increased in value since 6 April 2008...

97. You consider only the assets whose disposal gave rise to the section 2(2) amount. Any assets held at 6 April 2008 which are not disposed of are not included in the comparison. This means that assets held at 6 April 2008 need be valued only when they are disposed of.

### 57.48.3 *Asset in underlying company*

Para 126(11) extends rebasing relief to assets held by companies held by trusts:

For those purposes, an asset is also a “relevant asset” if—

- (a) by reason of the asset, chargeable gains are treated under s.13<sup>209</sup> of TCGA 1992 as accruing to the trustees in the relevant tax year,

---

208 The relevant tax year is the year that the trust gain (s.1(3) amount) accrues to the trustees.

209 Now s.3 TCGA.

- (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains, and
- (c) had the company disposed of the asset at any time in the relevant period,<sup>210</sup> part<sup>211</sup> of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to the trustees.

Para 11(a)(b) are the equivalent of para 10(a)(b) for directly held trust assets. Para (c) is new. A company's asset is not a relevant asset if a loss accrues on the disposal. But a trust asset can be a relevant asset even if a loss accrues on the disposal. It follows that one can envisage cases where the fraction A/B is greater than 1 (because an asset which gives rise to a loss on an actual disposal may be such that a gain would arise if the asset had been disposed of on 6/4/2008). However it does not matter if this is so. The relief is that:

The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

So if the relevant proportion is greater than 1, no relief applies but the tax charge is not increased.

#### 57.49 Rebasing: HMRC examples

EN FB 2008 provides some examples. Example 1 is relatively straightforward:

*68. Example 1: basic mechanism of para [126(8)(9)]:*

The trustees of a settlement make an election under para [126](1).

In 2009-10 the trustees dispose of a property for £10 million. The chargeable gain accruing to the trustees is £8 million.

The chargeable gain that would have accrued to the trustees if the gain had been computed using the market value of the property as at 6 April 2008 as the cost of acquisition is £1 million.

The trustees make a capital payment to beneficiaries X and Y of £4 million each. X and Y are both resident in the UK but X is also domiciled in the UK whereas Y is not.

---

210 Para 126(12) provides: "In sub-para (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains."

211 The context shows that this must mean: *all or part*.

There are no unmatched capital payments or trust gains relating to earlier years.

It is easier to follow in a table:

Gains		A	B	A/B	Capital payment	
<i>Pre-08</i>	<i>Post-08</i>				<i>to X</i>	<i>to Y (nondom)</i>
£7m	£1m	£1m	£8m	1/8	£4m	£4m

The HMRC analysis is as follows:

a. Match the capital payments to the s.2(2) amount for the year. Capital payments total £8 million and match to the s.2(2) amount of £8 million. Chargeable gains of £4 million are treated as accruing to X and Y for 2009-10.

X is chargeable to CGT in 2009-10 under s.87 on the gains of £4 million. Y is non-UK domiciled so para [126](1) applies to determine how much of the chargeable gains of £4 million is chargeable to tax.

b. The s.2(2) amount for 2009-10 is £8 million (“B” in para [126(9)]).

c. The s.2(2) amount that would have applied if the trustees had sold the property and reacquired it immediately before 6 April 2008 is £1 million (“A” in para [126(9)]).

d. A/B is  $\frac{1}{8}$ .

e. Apply A/B to the chargeable gains of £4 million accruing to Y: the amount of the gains that is chargeable to tax under para [126(8)] is £4 million/8, i.e. Y is chargeable to CGT on £500,000.

If Y is a remittance basis user there will be no charge to tax until Y remits gain to the UK.

There are no surplus capital payments or trust gains for 2009-10.

Example 2 is more challenging.

69. *Example 2: matching capital payments across years and s.13 gains*

The trustees of a settlement make an election under para [126](1).

The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK.

There are no unmatched trust gains or capital payments relating to earlier years.

In 2010-11 the trustees dispose of two assets:

a. the chargeable gains are £8 million: the pre 6 April 2008 gains are £7 million and the post 5 April 2008 gains are £1 million;

b. the overall loss is £5 million: the pre 6 April 2008 gain is £1 million and the post 5 April 2008 loss is £6 million.

A capital payment of £5 million is made to beneficiary Y.

In 2011-12 the trustees dispose of an asset. The chargeable gain is £5 million: the pre 6 April 2008 gain is £4 million and the post 5 April 2008 gain is £1 million.

Capital payments are made to beneficiaries X and Y of £2 million each. In 2012-13 an underlying company within s.13 wholly owned by the trustees disposes of an asset.<sup>212</sup> The loss on the asset is £2 million.<sup>213</sup> But substituting the market value as at 6 April 2008 creates a post 5 April gain of £1 million. The trustees also dispose of an asset. The chargeable gain is £3 million: the pre 6 April 2008 gain is £2 million and the post 5 April 2008 gain is £1 million.

Capital payments are made to beneficiaries X and Y of £2 million each.

The EN sets out a table to summarise these facts which for ease of reference I set out here slightly expanded. It is easier to follow the example with the fuller spreadsheet available online.<sup>214</sup>

	Gain (loss)		A	B	A/B	Capital payment	
	Pre-08	Post-08				to X	to Y
2010-11	£8m	(£5m)	£0	£3m	0	-	£5m
2011-12	£4m	£1m	£1m	£5m	1/5	£2m	£2m
2012-13	£2m	£2m	£2m(?)	£3m	2/3(?)	£2m	£2m

The HMRC analysis is as follows:

#### **2010-11**

The s.2(2) amount is £3 million. Match capital payment of £5 million against trust gains of £3 million: chargeable gains of £3 million treated as accruing to Y. But Y is not UK domiciled so para [126] applies.

Only £3 million×(A÷B) of the matched capital payment is chargeable to tax. However, the s.2(2) amount based on the market value of the assets as at 6 April 2008 is £0. Therefore A÷B is zero and none of the chargeable gains treated as accruing to Y is chargeable to tax.

2010-11: £2 million unmatched capital payments to Y.

#### **2011-12**

The s.2(2) amount is £5 million. Match capital payments of £4 million in the year against trust gains of £5 million; chargeable gains of £2 million treated as

212 The example confusingly adds that the disposal is for £5m. But that is irrelevant, as what matters for tax is the gain or loss on the disposal, not the amount of the sale proceeds.

213 Author's footnote: This loss is not allowable; careful planning might have avoided that result.

214 [http://www.kessler.co.uk/wp-content/uploads/2012/05/TFD\\_rebasing\\_computati.on.pdf](http://www.kessler.co.uk/wp-content/uploads/2012/05/TFD_rebasing_computati.on.pdf) (not set out here because it requires an A4 sheet to fit in all the data).

accruing to each of X and Y.

There are £1 million trust gains of 2011-12 unmatched. Step 5 of s.87A(2) applies.

Match 2011-12 £1 million trust gains to unmatched capital payments of £2 million to Y of 2010-11.

Chargeable gains of £1 million treated as accruing to Y. Unmatched capital payment to Y of 2010-11 reduced to £1 million.

X is chargeable to tax on £2 million in respect of 2012-13.

Y has chargeable gains of £3 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)] £3 million  $\times$  (A $\div$ B) of the matched capital payment is chargeable to tax.

A $\div$ B is 1/5 so £600,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

£1 million unmatched capital payments to Y originating from 2010-11 to carry forward.

### **2012-13**

The s.2(2) amount is £3 million. The disposal of the asset by the underlying company does not form part of the s.2(2) amount because only s.13 gains are brought into s.87. However, by applying the market values to the assets as at 6 April 2008 there is a gain attributable to the disposal of the asset by the company.

Match the capital payments of £4 million to the s.2(2) amount. Chargeable gains are treated as accruing to X and Y of £1.5 million each under part (b) of Step 3 of s.87A(2).

X is chargeable to tax on £1.5 million in respect of 2012-13.

Y has chargeable gains of £1.5 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

*Under para [126(8)(9)], £1.5 million  $\times$  (A $\div$ B) of the matched capital payment is chargeable to tax. A $\div$ B is 2/3 so £1 million of the chargeable gains treated as accruing to Y in 2012-13 are taxable. While the kink in the value of the company's asset has increased the proportion of gains on which Y is chargeable to tax, Y is still better off than if no election had been made.*

This assumes that the company's asset is a "relevant asset". However it is not a relevant asset, as it is not the case that "by reason of the asset, chargeable gains are treated under s.13 TCGA as accruing to the trustees in the relevant tax year." The correct figure for A/B is 1/3 and not 2/3 and the taxable gain after rebasing relief is £0.5m and not £1m.

There are £1.5m unmatched capital payments to Y to carry forward - £1m from 2010-11 and £0.5m from 2012-13.

There are £0.5m unmatched capital payments to X to carry forward all originating from 2012-13.

70. *Example 3: keeping track of pre 6 April and post 5 April gains and losses.*

The trustees of a settlement make an election under para [126](1). The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK. There are no unmatched trust gains or capital payments relating to earlier years.

In 2010-11 the trustees dispose of an asset. The chargeable gain is £8 million: the pre 6 April gain is £7 million and the post 5 April 2008 gain is £1 million. A capital payment of £2 million is made to each of beneficiaries X and Y.

In 2011-12 the trustees make a further capital payment to X and Y of £2 million each.

The example is easier to follow if the facts are set out in a table:

	Gain Pre 6/4/08	Gain Post 5/4/08	A	B	A/B	Capital payment to X	Capital payment to Y
2010-11	£7m	£1m	£1m	£8m	1/8	£2m	£2m
2011-12	0	0	n/r	£5m	n/r	£2m	£2m

The HMRC analysis is as follows:

**2010-11**

The s.2(2) amount is £8 million.

Match capital payments of £4 million in the year against trust gains of £8 million: chargeable gains of £2 million treated as accruing to each of X and Y. X is chargeable to tax on £2 million in respect of 2010-11.

Y has chargeable gains of £2 million in respect of 2010-11. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)] £2 million × (A ÷ B) of the matched capital payment is chargeable to tax.

A ÷ B is 1/8 so £250,000 of the chargeable gains treated as accruing to Y in 2010-11 are taxable.

The reduced s.2(2) amount for 2010-11 for the purposes of matching with future capital payments is £4m.

**2011-12**

There is no s.2(2) amount for the year. Apply s.87A matching rules to earlier year.

Match capital payments of £4 million in 2011-12 to s.2(2) amount (as reduced) for 2010-11 of £4m:

chargeable gains of £2 million treated as accruing to each of X and Y.

X is chargeable to tax on £2m in respect of 2011-12.

Y has chargeable gains of £2 million in respect of 2011-12. But Y is not UK domiciled so para [126] applies.

Under para [126(7)(8)] £2 million × (A ÷ B) of the matched capital payment is chargeable to tax.

A ÷ B is 0.5/4 so £250,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

The table below shows how the s.2(2) amount for the year and the underlying gains (or losses) relating to the period before and after 6 April 2008 are matched.

2010-11 matching of capital payments	Pre 6 April gain/loss	Post 5 April gain/loss	Total trust gains (s.2(2) amount)
2010-2011	£7m	£1m	£8m
Less matched to capital payment in 2010-11	£3.5m	£500,000	£4m
Unmatched in 2010-11	£3.5m	£500,000	£4m
Less matched to capital payments in 2011-12	£3.5m	£500,000	£4m
Unmatched in 2011-12	£0	£0	£0

The s.87 guidance note provides:

**Example 22: Rebasing: basic operation: para 126 Sch 7**

Settlement X is a non-UK resident settlement created in September 2000. The trust fund consists of a number of quoted investments. Some of these have been held since September 2000. Others have been acquired since 6 April 2008. The settlement has two UK resident beneficiaries. A is domiciled in the UK. B is not domiciled in the UK.

As at 6 April 2008 there are no unmatched capital payments and section 2(2) amounts.

**2008-09**

In 2008-09 a section 2(2) amount of £180,000 accrues to the trustees and capital payments of £50,000 are made to A and B. The capital payments are matched to the section 2(2) amount as shown below.

	2008-09	Matched	c/f
Section 2(2) amount	£180,000	£100,000	£80,000
Capital payments A	£50,000	£50,000	nil
Capital payments B	£50,000	£50,000	nil

A chargeable gain of £50,000 accrues to each beneficiary. Beneficiary A is liable to CGT on the full amount of £50,000. The trustees make a valid election under paragraph 126(1) of Schedule 7 before 31 January 2010. The effect of the election is to reduce the gains chargeable on beneficiary B in accordance with paragraph 126(8) of Schedule 7.

You calculate the section 2(2) amount that the trustees would have made if the gain were calculated by reference to the 6 April 2008 value of assets held at that date and included in the disposal.

	Held 6/4/08	Acquired after 6/4/08	Total
Disposal Proceeds	£180,000	£170,000	£350,000
Acquisition cost	- £10,000	- £160,000	- £170,000
Gain	<u>£170,000</u>	<u>£10,000</u>	<u>£180,000</u>
Disposal Proceeds	£180,000		
6/4/08 value	- £165,000		
Gain	<u>£15,000</u>		

Relevant proportion of s87 gain £50,000 =  
 $£50,000 \times \frac{15,000 + 10,000}{180,000} = £6944$

180,000

Beneficiary B is liable to CGT on £6944 of the £50,000 capital payment. If beneficiary B is a remittance basis user the gain will be taxed only when the gain is remitted to the UK.

**2009-10**

The trustees dispose of assets creating a £20,000 section 2(2) amount. They make capital payments of £15,000 to each beneficiary. £10,000 of each capital payment is matched to the 2009-10 section 2(2) amount. Section 87 gains of £10,000 accrue to each beneficiary in respect of the 2009-10 section 2(2) amount. The £5,000 balance of each capital payment is matched to the £80,000 2008-09 section 2(2) amount. Section 87 gains of £5,000 accrue to each beneficiary in respect of the 2008-09 section 2(2) amount giving total chargeable gains of £15,000 for 2009-10 for each beneficiary. The capital payments for that year are reduced to nil. The section 2(2) amount for 2008-09 is reduced to £70,000.

	Amount/payment	Matched	Year	c/f
2009-10 s.2(2) amount	£20,000	£20,000	2009-10	Nil
Capital payments A	£15,000	£10,000	2009-10	Nil
		£5,000	2008-09	
Capital payments B	£15,000	£10,000	2009-10	Nil
		£5,000	2008-09	
2008-09 s.2(2) amount	£80,000	£10,000	2009-10	£70,000

Beneficiary A will be liable to CGT on the full £15,000 section 87 gain. Beneficiary B's liability will be reduced in accordance with paragraph 126(8) of Schedule 7. This has to be calculated separately for the £10,000 payment matched to the 2009-10 amount and the £5,000 payment matched to the 2008-09 amount.

For 2009-10 the figures are:

	Held 6/4/08	Acquired after 6/4/08	Total
Disposal proceeds	£70,000	£100,000	£170,000
Acquisition cost	- £65,000	- £85,000	- £150,000
Gain	<u>£5,000</u>	<u>£15,000</u>	<u>£20,000</u>
Disposal proceeds	£70,000		
6/4/08 value	£80,000		
Loss	(£5,000)		

The section 2(2) amount calculated using 6 April 2008 values is £10,000 ie £15,000 - £5,000. The relevant proportion of the £10,000 section 87 gain is:  
 $£10,000 \times \frac{10,000}{20,000} = £5,000$

The CGT liability on the £5,000 section 87 gain relating to the 2008-09 section 2(2) amount is limited to:

$$£5,000 \times \frac{25,000}{180,000} = £694$$

B's total liability to CGT in 2009-10 is on gains of £5,694 (£5,000 + £694). If beneficiary B is a remittance basis user the gain will be taxed only when the gain is remitted to the UK.

**Example 23: Rebasing: relevant proportion is 0: para 126 Sch 7**

The facts are the same as that in example 22 year 2009-10 except for the 6 April 2008 value of the assets sold. This is £120,000.

The calculation is now:

	<b>Held 6/4/08</b>	<b>Acquired after 6/4/08</b>	<b>Total</b>
<b>Gain</b>	<b>£5,000</b>	<b>£15,000</b>	<b>£20,000</b>
Disposal proceeds	£70,000		
6/4/08 value	- £120,000		
Loss	<u>£50,000</u>		

The section 2(2) amount calculated using 6 April 2008 values is £15,000 - £50,000. This is restricted to 0 as a section 2(2) amount cannot be negative. Beneficiary B is not liable to CGT on any of the £10,000 2009-10 gain ie  $£10,000 \times 0 = 0$ . B remains liable to CGT on the section 87 gain matched to the 2008-09 section 2(2) amount. As in example 22 this is £694.

B's capital payments for 2009-10 are still reduced to nil.

## **57.50 Rebasing: Minor rules**

### *57.50.1 Asset derived from asset*

Para 126(13) sch 7 FA 2008 extends the relief where one asset is derived from another asset; this will not be very common. It must be read with s.43 TCGA in order to follow the sense:

If and so far as, in a case where assets have been merged or divided or have changed their nature or rights or interests in or over assets have been created or extinguished, the value of an asset is derived from any other asset in the same ownership, an appropriate proportion of the sums allowable as a deduction in the computation of a gain in respect of the other asset under paragraphs (a) and (b) of section 38(1) shall, both for the purpose of the computation of a gain accruing on the disposal of the first-mentioned asset and, if the other asset remains in existence, on a disposal of that other asset, be attributed to the first-mentioned asset.

If a case where s.43 applies, one turns to para 126(13):

If—

- (a) by reason of an asset which would not otherwise be a relevant asset (“the new asset”), chargeable gains or allowable losses accrue, or are treated under s.13 as accruing, to the trustees in the relevant tax year,

- (b) the value of the new asset derives wholly or in part from another asset (“the original asset”), and
  - (c) s.43 of TCGA 1992 applies in relation to the calculation of the chargeable gains or allowable losses,
- the new asset (or part of that asset) is a “relevant asset” if the condition in sub-para (10)(b) or the conditions in sub-para (11)(b) and (c) would be met were the references there to the asset to be read as references to the new asset or the original asset.

### *57.50.2 Inter-group transfer*

Para 126(14)(15) sch 7 FA 2008 extends rebasing relief where there is an inter-group transfer:

- (14) If—
  - (a) on or after 6 April 2008, a company (“company A”) disposes of an asset to another company (“company B”), and
  - (b) s.171 of TCGA (transfers within groups) (as applied by s.14(2) of that Act) applies in relation to the disposal, for the purposes of sub-para (11) (and this sub-paragraph) treat company B as having owned the asset throughout the period when company A owned it.
- (15) If an asset is a relevant asset by virtue of sub-para (14), for the purposes of sub-para (9)—
  - (a) treat the chargeable gains as having accrued to the company which owned the asset at the beginning of 6 April 2008, and
  - (b) treat the proportion of those chargeable gains attributable under s.13 of TCGA 1992 to the trustees as being the proportion of the chargeable gains actually accruing that are so attributable.

Para 126(16) to (18) deals with the situation where an asset is held by a company, and the trustees have held different interests in the company at different times:

- (16) If—
  - (a) an asset would otherwise be a “relevant asset” within sub-para (11), and
  - (b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset (“the relevant proportion”) is greater than the minimum proportion,

for the purposes of sub-para (9) treat the appropriate proportion of the

asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

(17) “The minimum proportion” is the smallest proportion of chargeable gains (if any) that would have been attributable to the trustees on a disposal of the asset at any time in the relevant period (as defined by sub-para (12)).

(18) “The appropriate proportion” is the minimum proportion divided by the relevant proportion.

This does not work. Suppose for example a trust held 50% of the shares in a non resident company, T Ltd before 2008, and later acquired all the shares. T Ltd realises a gain of £100 on an asset (the company’s asset) held before 2008. The gain is deemed to accrue to the trust under s.13. The terms of subpara 16 are met:

- (a) the company’s asset would otherwise be a “relevant asset” within sub-para (11), and
- (b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset (“the relevant proportion” - 100%) is greater than the minimum proportion (which under the definition in 126(17) is 50%.

So subpara 16 directs:

for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

We need to ascertain the appropriate proportion. That is one half divided by the relevant proportion. So we need to know the relevant proportion. That is:

$A \div B$  where—

A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the s.2(2) amount for the settlement for the relevant tax year.

B is £100. In order to work out A we need to know what is the relevant asset, but we do not know what is a relevant asset until we have applied subpara 16. Presumably we are to ignore the subpara 16 reduction, in which case the company asset is the relevant asset. Assume that the

company asset was worth £50 on 6 April 2008, so the relevant proportion is one half. Then the appropriate proportion is one-half divided by one-half, = one. I suspect that the drafter has confused “divided” with “multiplied”. What a shambles! Fortunately the problem may not often arise.

### **57.51 Rebasing: OIG amounts**

Paragraph 101 sch 7 FA 2008 provides equivalent rebasing relief for OIGs:

- (1) This paragraph applies if—
  - (a) the trustees of a settlement have made an election under paragraph 126(1) (re-basing election),
  - (b) income is treated under regulation 17 of the Offshore Funds (Tax) Regulations 2009 as arising to an individual in the tax year 2008–09 or any subsequent tax year (“the relevant tax year”) by reason of the matching, under section 87A of TCGA 1992 as applied by regulation 20 of those Regulations, of an OIG amount with a capital payment received by the individual from the trustees, and
  - (c) the individual is resident or ordinarily resident, but not domiciled,<sup>215</sup> in the UK in the relevant tax year.
- (2) The individual is not charged to income tax on so much of the income as exceeds the relevant proportion of that income.
- (3) Sub-paragraphs (9) to (18) of paragraph 126 (meaning of “the relevant proportion”) apply for the purposes of sub-paragraph (2) above as if—
  - (a) references to section 2(2) amounts were to OIG amounts,
  - (b) references to chargeable gains were to offshore income gains,
  - (c) references to allowable losses were omitted, and
  - (d) references to anything accruing were to it arising (and similar references were read accordingly).

Amended as para 101(3) requires, para 126(9) to (12) provide:

- (9) The relevant proportion is  $A \div B$  where—

A is what would be the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company

---

215 See 57.53 (Formerly-domiciled resident).

concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year.

(10) For the purposes of sub-paragraph (9) an asset is a “relevant asset” if—

- (a) by reason of the asset, ~~a chargeable gain or allowable loss accrues~~ an offshore income gain arises to the trustees in the relevant tax year, and
- (b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

(11) For those purposes, an asset is also a “relevant asset” if—

- (a) by reason of the asset, ~~chargeable gains~~ offshore income gains are treated under section 13<sup>216</sup> of TCGA 1992 as accruing arising to the trustees in the relevant tax year,
- (b) the company to whom the ~~chargeable gains~~ offshore income gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those ~~chargeable gains~~ offshore income gains, and
- (c) had the company disposed of the asset at any time in the relevant period, part of the ~~chargeable gains~~ offshore income gains (if any) accruing on the disposal would have been treated under section 13 of TCGA 1992 as accruing arising to the trustees.

(12) In sub-paragraph (11)(c) “the relevant period” means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the ~~chargeable gains~~ offshore income gains.

(It is not necessary to set out the rest of para 126, as amended).

## **57.52 Rebasing: Transfer between trusts**

Para 127(1) schedule 7 FA 2008 provides:

This paragraph applies if—

- (a) in the tax year 2008-09 or any subsequent tax year, the trustees of a settlement (“the transferor settlement”) transfer all or part of the settled property to the trustees of another settlement (“the

---

216 Now s.3 TCGA.

- transferee settlement”),
- (b) s.90 of TCGA 1992 applies in relation to the transfer,
  - (c) the trustees of the transferor settlement have made an election under para 126(1),
  - (d) by virtue of the matching of a capital payment with the s.2(2) amount for the transferee settlement for the tax year 2008-09 or any subsequent tax year (“the relevant tax year”), chargeable gains are treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
  - (e) the individual is resident, but not domiciled,<sup>217</sup> in the UK in that year.

#### 57.52.1 *Election to rebase*

Para 127(2) sch 7 FA 2008 provides:

If the trustees of the transferee settlement have made an election under para 126(1), para 126(7) to (9) have effect in relation to the transferee settlement for that year as if the reference in para 126(9) to relevant assets included relevant assets within the meaning of this paragraph.

#### 57.52.2 *No election to rebase*

Para 127 sch 7 FA 2008 provides:

(3) If the trustees of the transferee settlement have not made an election under para 126(1), the individual is not charged to capital gains tax on so much of the chargeable gains mentioned in sub-para (1)(d) above as exceeds the relevant proportion of those gains.

(4) The relevant proportion is  $A \div B$  where—

A is what would be the s.2(2) amount for the transferee settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the company concerned and immediately re-acquired by it at the market value at that time, and B is the s.2(2) amount for the transferee settlement for the relevant tax year.

(5) For the purposes of this paragraph an asset is a “relevant asset” if—

- (a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees of the transferee settlement in the relevant tax year,

---

217 See 57.53 (Formerly-domiciled resident).

- (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains,
  - (c) had the company disposed of the asset at any time in the relevant period, part of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to—
    - (i) the trustees of the transferor settlement (if the disposal had been made before the transfer), or
    - (ii) the trustees of the transferee settlement (if it had not).
- (6) In sub-para (5)(c) “the relevant period” means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains.
- (7) Sub-paras (13) to (18) of para 126 apply for the purposes of this paragraph (with such modifications as are necessary) as they apply for the purposes of that paragraph.

January 2009 Qs & As provides:

**Q7** In applying the allocation rules to transfers between settlements, the transferor trust gains carried across will be treated as having accrued to the transferee trust in the year in which they in fact accrued to the transferor trust. Those gains that have been matched with capital payments out of transferor trust in the year of transfer or previous years will be left out of account. Gains carried across will be allocated to a capital payment from the transferee trust on a ‘last in first out’ (LIFO) basis. Gains on such assets will be governed by whether or not the transferor trust has made a rebasing election under paragraph 126 sch 7 FA 2008.

If the transferor settlement has made a rebasing election by the time of the transfer of the transferee settlement, then pre and post April 2008 gains which are deemed to have accrued on the actual disposal of an asset go across *pro rata*.

If the transferor settlement has not made a rebasing election by the 31 January following the year of the transfer, then even if no capital payment has yet been made, the right to rebase is lost in relation to the transferred assets and any assets retained in the transferor trust.

However, it should be noted that any transfers between settlements made prior to 6 April 2008 will not trigger a time limit on rebasing and any assets moving over to the transferee settlement as a result of a transfer made prior to 6 April 2008 will not be affected by any subsequent election for rebasing made by the transferor trust. If the

asset appointed over to the transferee settlement before 6 April 2008 includes shares in a company within s.13 TCGA 1992, then the transferee settlement may wish to elect for rebasing in its own right. An election made by the transferee settlement may cover gains made by such a company – see para 127 Sch 7 FA 2008. Transferee settlements which receive property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement.

The s.87 guidance note provides:

**Rebasing and transfers between settlements**

110. A rebasing election made by the transferor settlement can cover gains made by that settlement after 5 April 2008 even if they are not brought into charge until they are matched with capital payments made by the transferee settlement. Transferee settlements receiving property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement. See example 26.

111. An election made by the transferee settlement can cover gains made by that settlement after 5 April 2008 including those on assets received, prior to 6 April 2008, from another settlement.

**Example 26 Effect of ‘rebasing election’ made by transferor settlement on gains made by transferor settlement treated as accruing when matched with capital payments made by transferee settlement: para 126 Sch 7**

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2009-10. No capital payments have been made out of the transferor settlement. The transferor settlement had no gains made by the trustees prior to the transfer.

Gains arise on the transfer of £100,000. These are on the disposal of an asset which had been held by the trustees since 2001. The post 5 April 2008 element of the gain is £15,000 based on the difference between the value at 6 April 2008 and the value at the time it is transferred.

The transferee settlement has no unmatched section 2(2) amounts of its own. Its only unmatched section 2(2) amount is the £100,000 for 2009-10 it is treated as receiving on the transfer.

In 2010-11 the transferee settlement makes a capital payment of £300,000 to a UK resident but non-UK domiciled beneficiary. Under section 87 £100,000 of the capital payment is matched with the section 2(2) amount and a £100,000 chargeable gain is treated as accruing to the beneficiary.

If a valid election under paragraph 126 Schedule 7 has been made by the trustees of the transferor settlement then only the post 5 April 2008 element of the gain (£15,000) is chargeable to tax on the beneficiary. And that is subject to the remittance basis if the beneficiary is a remittance basis user.

If no valid election has been made by the trustees of the transferor settlement then the full £100,000 is chargeable to tax on the beneficiary. Again this is subject to the remittance basis if the beneficiary is a remittance basis user.

An election made by the trustees of the transferee settlement has no effect on this gain.

**Rebasing and transfers between settlements owning non-UK resident companies: para 127 Sch 7**

The transfer of settled property between settlements does not result in a disposal of the assets held in the underlying non-UK resident company. Where the transfer takes place after 5 April 2008 a disposal may subsequently be made by the underlying company of assets it acquired prior to 6 April 2008. In such a case the rules in paragraph 126 do not apply to any gains made by the underlying company as it has not been part of the transferee settlement structure since 5 April 2008 – paragraph 126(11)(c)

There are special rules in paragraph 127 to give ‘rebasing election’ relief in such cases.

113. For any relief to be available the trustees of the transferor settlement must have made a ‘rebasing election’. How any relief is calculated depends on whether, or not, the trustees of the transferee settlement have also made a ‘rebasing election’.

114. If the trustees of the transferee settlement have made a rebasing election then the assets disposed of by the underlying company are treated in the same way as any assets the transferee settlement has owned from before 6 April 2008 – paragraph 127(2).

115. If the trustees of the transferee settlement have not made a rebasing election then you have to calculate a fraction ‘A/B’ called the ‘relevant proportion’ where (A) is defined as the section 2(2) amount for the transferee settlement for the year a gain is treated as accruing to the non-UK domiciled beneficiary on the assumption the underlying company had sold and immediately re-acquired all its relevant assets at market value immediately before 6 April 2008, divided by (B) is defined as the actual section 2(2) amount for the transferee settlement for the relevant tax year

116. The non-UK domiciled beneficiary is not charged to tax on so much of the gains treated as accruing to him that exceeds the ‘relevant proportion’ of those gains – paragraph 127(3) & (4). See example 27.

**Example 27 Effect of ‘rebasing election’ made by transferor settlement on gains made by underlying non-UK resident close company after company has been transferred to another settlement: Para 127 Sch 7**

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2009-10. No capital payments have been made out of the transferor settlement. The transferor settlement had no gains made by the trustees prior to the transfer.

The transferor settlement’s only assets at the time of transfer are shares in a wholly owned non-UK resident company which it has owned since 2001. A gain arises on the transfer of £100,000. The post 5 April 2008 element of the gain is £15,000 based on the difference between the value at 6 April 2008 and the value at the time it is transferred.

The underlying non-UK resident company continues to own an asset which it

acquired in 2002. That asset is sold in 2011-12 and produces an overall gain of £150,000. The post 5 April 2008 element of the gain is £20,000 based on the difference between the value at 6 April 2008 and the value at the time of its disposal.

The transferee settlement has no unmatched section 2(2) amounts of its own. Its only unmatched section 2(2) amount is the £100,000 for 2009-10 it is treated as receiving on the transfer.

In 2011-12 the transferee settlement makes a capital payment of £250,000 to a UK resident but non-UK domiciled beneficiary. Under section 87 £150,000 of the capital payment is matched with the £150,000 gain made by the underlying non-UK resident company in 2011-12. A £150,000 chargeable gain is treated as accruing to the beneficiary in 2011-12.

Under section 87 a further £100,000 of the capital payment is matched with the section 2(2) amount for 2009-10 and a £100,000 chargeable gain is treated as accruing to the beneficiary in 2011-12.

If no valid election has been made by the trustees of the transferor settlement then the full amount of the gains (£150,000 and £100,000 respectively) are chargeable to tax on the beneficiary in 2011-12. This is subject to the remittance basis if the beneficiary is a remittance basis user. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

If a valid election under paragraph 126 of Schedule 7 has been made by the trustees of both settlements only the post 5 April 2008 element of both of the gains (£20,000 for the 2011-12 section 2(2) amount and £15,000 for the 2009-10 section 2(2) amount) are chargeable to tax on the beneficiary in 2011-12. This is subject to the remittance basis if the beneficiary is a remittance basis user. The time limit for making the election is 31 January 2011 for the transferor settlement and 31 January 2013 for the trustees of the transferee settlement. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

If a valid election has been made by the trustees of the transferor settlement but not the trustees of the transferee settlement the formula in paragraph 127(4) applies to determine the relevant proportion of the gain on which the beneficiary is taxed. Suppose the facts are the same as the example but there is further section 2(2) amount for 2011-12 when the trustees dispose of an asset they have held since before 6 April 2008. The gain on this asset is £80,000. £80,000 of the capital payment made in 2011-12 is matched against this section 2(2) amount. The total amount matched against the 2011-12 section 2(2) amount is £230,000 leaving only £20,000 to be matched against the 2009-10 section 2(2) amount. A in the formula in paragraph 127(4) is the transferee settlement's section 2(2) amount for 2011-12 if all the relevant assets had been sold and reacquired at their value immediately before 6 April 2008. These are the assets in the underlying company. This part of the section 2(2) amount is £20,000 to which you have to add the £80,000.

B in paragraph 127(4) is the full section 2(2) amount of the transferee settlement for 2011-12 of £230,000 (£150,000 + £80,000).

The UK resident but non-UK domiciled beneficiary is charged on £230,000 ×

£100,000/£230,000 = £100,000 of the gains matched to the 2011-12 section 2(2) amount. The gain on the payments matched against the section 2(2) amount on the transfer in 2009-10 is covered by the paragraph 126 election made the trustees of the transferor settlement. The amount of that gain charged to CGT on the UK resident but non-UK domiciled beneficiary is limited to £3000 (£20,000 × 15,000/100,000). The total gains chargeable in 2011-12 are £103,000. This is subject to the remittance basis if the beneficiary is a remittance basis user. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

### 57.52.3 *Transfer between trusts: OIG*

Para 102 sch 7 FA 2008 provides equivalent rules for OIG amounts:

- (1) This paragraph applies if—
  - (a) in the tax year 2008–09 or any subsequent tax year, the trustees of a settlement (“the transferor settlement”) transfer all or part of the settled property to the trustees of another settlement (“the transferee settlement”),
  - (b) section 90 of TCGA 1992 applies in relation to the transfer,
  - (c) the trustees of the transferor settlement have made an election under paragraph 126(1),
  - (d) by virtue of the matching (under section 87A of TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001)) of a capital payment with an OIG amount of the transferee settlement, income is treated under such regulations (regulation 17 of those Regulations [ ]) as arising to an individual in a tax year (“the relevant tax year”), and
  - (e) the individual is resident or ordinarily resident, but not domiciled,<sup>218</sup> in the UK in the relevant tax year.
- (2) If paragraph 101 applies in relation to the transferee settlement, paragraph 126(9) as applied by paragraph 101(3) has effect as if the reference there to relevant assets included relevant assets within the meaning of paragraph 127(4) (as modified by sub-paragraph (4)(b) below).
- (3) If paragraph 101 does not apply in relation to the transferee settlement, the individual is not charged to income tax on so much of the income mentioned in sub-paragraph (1)(d) above as exceeds the relevant proportion of that income.
- (4) Sub-paragraphs (4) to (7) of paragraph 127 (meaning of “the

---

218 See 57.53 (Formerly-domiciled resident).

relevant proportion”) apply for the purposes of sub-paragraph (3) above as if—

- (a) references section 2(2) amounts were to OIG amounts,
- (b) references to chargeable gains were to offshore income gains, and
- (c) references to anything accruing were to it arising.

### **57.53 Formerly-domiciled resident**

Para 172 sch 7 FA 2008 removes transitional reliefs for formerly domiciled residents (but not for those deemed domiciled under the 15 year):

(1) Sub-paragraph (2) has effect for the purposes of— paragraphs 100(1)(b), 101(1)(c) and 102(1)(e), paragraph (b) of paragraph 118(3) so far as having effect for the purposes of paragraph 118(1)(d), and paragraphs 124(1)(b), 126(7)(b), 127(1)(e) and 151(1)(b).

(2) An individual not domiciled in the UK at a time in the tax year 2017-18, or a later tax year, is to be regarded as domiciled in the UK at that time if—

- (a) the individual was born in the UK,
- (b) the individual’s domicile of origin was in the UK, and
- (c) the individual is resident in the UK for the tax year concerned.

### **57.54 Non-resident trust: CGT planning**

When are non-resident trusts advantageous for CGT?

One situation is to maximise use of losses: losses of remittance basis taxpayers are generally unallowable,<sup>219</sup> but losses of non-resident trusts can be set against s.1(3) amounts (trust gains). However no-one *plans* to realise losses so that is not generally a planning point.

#### *57.54.1 s.87 basis v. arising basis*

For taxpayers who are not UK domiciled (or deemed domiciled), non-resident trusts are direct ownership for property within the scope of UK CGT, ie

- (1) For a remittance basis taxpayer: UK situate property and land-rich assets are within the scope of CGT

---

219 See 61.16 (Loss of remittance basis taxpayer).

- (2) For a taxpayer who does not claim the remittance basis: all assets. So even where an individual is not so wealthy that it is worth paying the remittance basis charge, it may still be worthwhile setting up a non-resident trust.

Also trusts are worthwhile for a taxpayer in anticipation of becoming deemed domiciled.

The CGT advantage of the trust is that that gains are taxed on a s.87 capital payment basis and not on the arising basis. That is, if property is held by the settlor directly, gains would be chargeable on an arising basis; if the same property is held on a trust, the gains are taxable on a capital payments basis.

#### 57.54.2 *s. 87 basis v. remittance basis*

Non-resident trusts may be better than absolute ownership of foreign situate property by remittance basis taxpayers, as they may avoid the application of the mixed fund rule.

##### *Example 1 (trust better than absolute ownership)*

Suppose a foreign situate asset is acquired for £1m, sold for £2m, giving a gain of £1m.

If the asset is held by a remittance basis taxpayer (T) who remits £1m, there is a CGT charge on £1m as the remitted sum is all gain. By contrast, suppose:

- (1) the asset is held in a non-resident trust.
- (2) the trust makes a capital payment of £1m to T offshore.
- (3) in the following year, the trust makes a capital payment of £1m to T onshore.

The offshore payment has reduced the s.1(3) amount to nil, so the second payment is free of CGT.

However to take advantage of this requires careful timing of gains and payments that is often not practical. Often, the remittance basis will be better than the capital payments basis.

##### *Example 2 (trust worse than absolute ownership)*

Suppose 3 foreign situate assets are each acquired for £1m, sold for £2m, giving a gain of £1m each.

If the assets are held by a remittance basis taxpayer (T) who remits the £2m proceeds of one of the assets, there is a CGT charge on £1m only. (Assume the proceeds are not paid into a single account, ie are not mixed.)

By contrast, suppose:

- (1) the assets are held in a non-resident trust.
- (2) the trust makes a capital payment of £2m in the UK.

There is then a CGT charge on £2m.

The solution may be to have three separate trusts, one for each asset.

57.54.3 *When non-resident trust not desirable*

Non-resident trusts are not desirable where the settlor is non-UK resident, since trust gains are s.1(3) amounts and gains accruing to the settlor are in principle CGT free.

**57.55 Trust holding company**

Trustees may hold trust assets directly or through a wholly-owned non-resident company (here called “**an underlying company**”).

Which is better? This is a very large question, raising many issues, for many taxes, and the following is more of a checklist.

57.55.1 *Holding co: Advantages*

The trustees have the option to sell the company rather than the underlying assets, potentially avoiding SDLT and, (subject to the land-rich asset rules) CGT which would otherwise arise on a disposal of UK assets.

There may be IT advantages, particularly for UK source income: depending on the type of income, the company only pays tax at the basic rate, or corporation tax rate.

For dividend income receipt by the company is tax free because the company qualifies for a tax credit. But if the income is distributed, or within the scope of s.731, UK beneficiaries will pay tax at their marginal rates, and the use of the company may increase effective tax rates.

There may be of course IHT advantages (the company being non-UK situate).<sup>220</sup>

---

220 See too 49.29 (Transfer: Trust to underlying co).

A UK resident holding company may be advantageous if the income of the non-resident company falls within s.720, as it allows the income to be accumulated.

### 57.55.2 *Asset extraction problem*

The extraction of assets from the company will generally give rise to a double charge:

- (1) An extraction involves a disposal by the underlying company. Gains accruing to the company on that disposal may be attributed to the trustees under s.3 and so constitute trust gains (s.1(3) amounts).<sup>221</sup>
- (2) In addition, there may be a further charge on extraction of an asset from the company:
  - (a) If the asset is extracted on a liquidation, the offshore trustees dispose of the company's shares and so further trust gains accrue.
  - (b) If asset is extracted by dividend, the dividend is income for tax purposes, raising IT issues.

There is normally no relief for that double charge.<sup>222</sup>

Other problems, usually less significant, are:

- (1) Losses of the underlying company are restricted and easily lost altogether.
- (2) If the property is a residence, CGT private residence relief (if otherwise available) is lost by use of a company.<sup>223</sup>

In short: an underlying company should not be used unless there is some good reason to justify the extraction of asset problem.

If the trustees need limited liability, a LLP (which is transparent for CGT) is an alternative which avoids the problems.

### 57.55.3 *Chain of cos: Disadvantages*

Suppose a chain of companies thus:

Trust  
|

221 See 60.1 (Section 3 TCGA: Introduction). But the motive defence may apply.

222 There are some reliefs, eg s.3 distribution relief; but these only help the person who pays tax under s.3, so would only be relevant to a settlor-interested trust within s.86.

223 See 60.32 (Private residence relief).

The asset extraction problem is now exacerbated.

- (1) The asset may be extracted by a series of liquidations: C Ltd is liquidated and its asset transferred to B Ltd; B Ltd is liquidated and its asset is transferred to A Ltd; A Ltd is liquidated and its asset is transferred to the trustees. This involves 6 disposals (3 disposals of the asset and disposals of the shares of A, B and C Ltd). The three disposals of the asset give rise to one chargeable gain (the first two disposals qualify for group relief) but the three disposals of the shares give rise to 3 sets of chargeable gain, with no group relief.<sup>224</sup> The position is worse than where there is no chain of companies.
- (2) The asset may be extracted by a series of dividends: C Ltd transfers the asset in specie to B Ltd by way of dividend, B Ltd transfers the asset in specie to A Ltd by way of dividend, and A Ltd transfers the asset to the trustees by way of dividend. In this case there is again only one chargeable gain from the disposal of the asset. There is also only one set of income for s.720 or s.731 purposes.<sup>225</sup>

In short: chains of companies should in principle be avoided where possible.

## 57.56 Basic planning for s.87

In outline the position is as follows:

### 57.56.1 Indefinite deferral

Beneficiaries are only liable to the s.87 charge if they receive a capital payment. But there may be no need for a capital payment to be made.

---

<sup>224</sup> See 60.25 (CG group reliefs).

<sup>225</sup> See 48.5 (Section 720 trust/co/and co/subsidiary structure); see 47.31 (Company income distributed to trust).

Instead, the capital of the trust fund may be retained. The beneficiaries of the settlement would enjoy a trust fund unreduced by the burden of CGT. In this way the charge may be postponed indefinitely.

### 57.56.2 *Non-resident beneficiary*

Section 1(3) amounts are treated as chargeable gains accruing to a beneficiary who receives capital payments. But a beneficiary who is not resident in the UK (and not temporarily non-resident<sup>226</sup>) is not subject to CGT on those gains. Such a beneficiary may therefore receive capital payments from the trust tax free, just as they can realise capital gains of their own without incurring a tax charge.

### 57.56.3 *UK/nondom beneficiaries: Capital payment timing*

Section 1(3) amounts which have been matched with a capital payment to a beneficiary in an earlier tax year cease to be available for the purpose of the s.87 charge in the following year. This principle applies when the beneficiary is a remittance basis taxpayer. Suppose that s.1(3) amounts are matched with capital payments to a remittance basis beneficiary and the capital payments equal the total s.1(3) amounts. In subsequent tax years these are not taken into account and a capital payment may be made to a UK arising basis beneficiary without incurring any tax charge under s.87. Careful timing is needed. The payment to the remittance basis beneficiary must be made in one tax year and the payment to arising basis beneficiary must be postponed until the following tax year. Section 1(3) amounts accruing in a subsequent tax year may be taxed on that beneficiary.

In *McLaughlin v HMRC*<sup>227</sup> a marketed tax avoidance scheme involved bringing in a nondom beneficiary artificially. This survived a technical challenge; and (on its facts rather surprisingly) a *Ramsay*/realistic view challenge.

## 57.57 GAAR guidance

GAAR guidance provides two s.87 examples.

---

226 See 10.1 (Temporary non-residence).

227 [2012] UKFTT 174 (TC). The artificial planning in this case would now be caught by the GAAR.

### 57.57.1 Capital payment timing

The first example is straightforward timing planning, which no-one would have thought was within the GAAR:

#### **D20 Offshore trust and washing<sup>228</sup> out gains - example 1**

This example illustrates that where the legislation sets precise boundaries the GAAR will not be in point where taxpayers satisfy the statutory conditions.

##### **D20.2 The arrangements**

D20.2.1 A discretionary trust resident outside the UK was set up by a now deceased foreign domiciled settlor.<sup>229</sup> The trust is worth £4m, has a pool of trust gains of £2.5m and no accumulated income or offshore income gains. There are no Sch 4C gains.

D20.2.2 There are four beneficiaries,

- two of whom are resident and domiciled in the UK and
- two of whom live permanently outside the UK [more analytically, are non-resident].

The trustees have made no capital distributions in recent years and it has been decided to end the trust.

The trustees have three options and the taxpayer's analysis on each is as follows:

##### **Option 1** [Payment to all beneficiaries at once]

End the trust in Year 1 paying £1m to each beneficiary.

The UK resident beneficiaries will each pay UK tax on one quarter of the trust gains i.e. £625,000, at the appropriate rate, since the gains are allocated pro rata to the beneficiaries. The non-resident beneficiaries will pay no UK tax although half the trust gains are allocated to them.

##### **Option 2** [Payment to UK beneficiaries first]

Pay the UK resident beneficiaries £2m in Year 1 and the non-resident beneficiaries £2m in Year 2.

The UK resident beneficiaries will each pay UK tax on £1m of gains since all the gains are allocated to them on a LIFO basis. The non-UK resident beneficiaries pay no UK tax and no gains are allocated to them.

##### **Option 3** [Payment to foreign beneficiaries first]

Pay the non-UK resident beneficiaries £2m in Year 1 and the UK resident beneficiaries £2m in Year 2.

The non-UK resident beneficiaries pay no UK tax but the pool of trust gains that can be allocated to payments in the following year is reduced to £500,000. £2m

---

228 I would hesitate to use the term “wash”, but the GAAR guidance uses it in an apparently neutral, non-pejorative sense.

229 The example kills off the settlor in order to avoid s.86 complications, and, perhaps, to establish the genuineness or long term nature of the trust.

of gains have been “washed out”. The UK resident beneficiaries each pay CGT on £250,000.

D20.2.3 The trustees therefore choose option 3 resulting in the least amount of tax for the beneficiaries. The UK resident beneficiaries receive their payment later but with less tax payable.

#### **D20.4 The taxpayer’s tax analysis**

D20.4.1 The taxpayer’s analysis is as set out above. The taxpayer contends that LIFO should be applied.

#### **D20.5 What is the GAAR analysis under s.207(2) FA 2013?**

**D20.6** *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether expressed or implied) and the policy objectives of those provisions?*

The trustees are entitled to organise distributions in a way that minimises tax for the beneficiaries within the range of normal tax planning.

In relation to option 3 the substantive results of the transactions are consistent with the principles on which the relevant provisions are based. The trustees have three different ways of achieving the same result viz to end the trust and distribute property equally to the beneficiaries. They are not compelled to choose the one that raises the most tax or the “middle” option. Provided the payments to the non-resident beneficiaries in Year 1 are genuinely intended to benefit them (and the cash will not simply be passed back to the UK residents later) HMRC would not seek to invoke the GAAR.<sup>230</sup> It is clear that the policy of the capital gains tax legislation in relation to capital payments to beneficiaries is to operate a LIFO policy and in some cases this will result in greater tax on UK residents and in some cases less.

D20.6.1 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The trustees of the discretionary trust making payment to the UK resident beneficiaries in the later year would not be regarded as a contrived or abnormal step.

D20.6.2 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

The anomalies that may arise under the LIFO rules are not seen as shortcomings in themselves but just a necessary result of having a system that allocates gains to capital payments in a certain order.

D20.6.3 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

---

230 An arrangement under which the benefits non-resident beneficiaries will pass the benefit on to UK resident beneficiaries is caught without invoking the GAAR: see 57.8.1 (Indirect receipt from trust).

The arrangements accord with established practice and HMRC has indicated acceptance of the practice.<sup>231</sup>

### **D20.7 Conclusion**

D20.7.1 This is not regarded as an abusive tax arrangement and HMRC would not seek to invoke the GAAR.<sup>232</sup>

From 2018, this example is overtaken by the non-resident disregard.<sup>233</sup> But the same principle applies if:

- (1) There were four beneficiaries of which two were domiciled in the UK, and two were resident non-domiciled remittance basis taxpayers, who received the payment first and did not remit.
- (2) There were two non-resident beneficiaries, and the trustees adopted option 1 which may become the favoured option.

### *57.57.2 Self-cancelling payment*

The second GAAR example concerns a scheme which no-one would have thought falls outside the GAAR (except that it would fail on traditional *Ramsay* grounds of circular, self cancelling arrangement/inserted steps):

### **D21 Offshore trusts and washing out gains - Example 2**

This example illustrates that the inclusion of abnormal steps may cause the arrangement to become abusive in its own context.

#### **D21.2 The arrangements**

Mrs X is non-UK resident and domiciled.

Her son Y is UK resident but foreign domiciled and occupies a house owned by a non-UK resident company that is held within a trust.

The trustees own no other assets. The property is worth £10m. Gains that have accrued<sup>234</sup> post April 2008 are £4m (£2m on property and £2m on company).<sup>235</sup>

The property has not increased in value since April 2013.<sup>236</sup>

The trustees do not want to pay ATED and decide to end the trust by liquidating

---

231 The author is not aware of any publication where HMRC have accepted the practice (other than the GAAR guidance itself). But it does not matter.

232 HMRC, “GAAR Guidance” Part D (Examples) (2017)

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

233 See 57.21 (Non-resident disregard).

234 I think the reference is to unrealised gains.

235 In fact the £2m gain accruing to the company is likely to qualify for the s.3 motive defence. But this does not spoil the point of the example.

236 This is factually implausible, but it simplifies matters by avoiding the complication of CGT on the disposal, and does not affect the point of the example.

the company [and then distributing the trust property]. The intention of the trustees and family is that the son should own the property.

There is no accumulated income or offshore income gains.

The trustees are advised on two options and the taxpayer's analysis on each is as follows:

**Option 1** - Trustees pay [more correctly, transfer] the property to the son. He receives a capital payment of £10m in the UK to which gains of £4m are attributed [more correctly, matched]. He will pay tax on all the trust gains at 28%. The remittance basis does not apply. There is also a small inheritance tax exit charge.

**Option 2** - The settlor<sup>237</sup> adds £4m cash to the trust in year 1.

In the same year the trust liquidates the company and holds the property direct thus realising the £4m gain.

It then pays the £4m cash back to the settlor in the same year.

Year 2 - the property is distributed to the son with a small amount of inheritance tax. The £4m cash payment made in Year 1 washes out the trust gains and so on the distribution of the property to the son there is no CGT.

The trustees therefore choose option 2.

In this example the motive for the capital payment to the son is to avoid ATED. But that background is irrelevant: The same planning could arise whenever it was desired to make a capital payment to a UK beneficiary within the scope of s.87.

If one accepts that the trust must be unwound, there are better options. But those alternatives do not spoil the point of the example.

#### **D21.4 The taxpayer's tax analysis**

D21.4.1 The taxpayer's analysis is as set out above. The taxpayer contends that LIFO should be applied.

#### **D21.5 What is the GAAR analysis under s207(2) FA 2013**

D21.5.1 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether expressed or implied) and the policy objectives of those provisions?*

The trustees are entitled to organise distributions in a way that minimizes tax for the beneficiaries within the range of normal tax planning.<sup>238</sup>

However, option 2 is not consistent with the principles on which the relevant tax

---

237 It is, I think, implied that Mrs X is the settlor of the trust. But it does not matter whether the £4m is added by the settlor or some other non-resident, non-domiciled person.

238 This is a slightly loose paraphrase of the statutory rules, but I think unobjectionable in the context of the example.

provisions are based. LIFO was intended to operate on distributions of capital to beneficiaries by matching gains in a certain order. In this case the settlor has added the cash to the trust as part of a pre-arranged scheme to wash out the gains that she knows will be realised and on the basis that she will receive the cash back again. HMRC would seek to invoke the GAAR. The legislation was not intended to allow settlors to add cash to trusts on a short term basis only to receive it back again shortly thereafter and simply as an exercise to wash out gains.

*D21.5.2 Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The addition of cash followed by the payment out is an abnormal step that is contrived.

*D21.5.3 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

This does intend to exploit a shortcoming in the legislation in a manner where the transactions are intended to have no economic consequences. The settlor has made the gift in the full expectation of receiving the monies back shortly and therefore not losing out.

The position would be different if the settlor had made the gift of cash and the trustees later independently decided in the exercise of their discretion to pay that cash out to other beneficiaries rather than as part of a pre-arranged circular scheme to pass the cash back to the settlor. Then the same issues would not arise.

*D21.5.4 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

HMRC has never accepted such practice.

## **D21.6 Conclusion**

D21.6.1 HMRC would seek to apply the GAAR to such arrangements.

## **D21.7 Proposed counteraction**

D21.7.1 The likely counteraction would be that the addition to the trust and payment of cash to the settlor would be ignored and the son will pay tax as under option 1.<sup>239</sup>

This seems right. The unfairness should be noted of imposing ATED on a company set up in accordance with standard practice, without a de-enveloping relief;<sup>240</sup> but that unfairness is one of the “principles on which

---

239 HMRC, “GAAR Guidance” Part D (Examples) (2017)

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

240 See 93.37 (De-enveloping).

the relevant tax provisions are based”.

In practice, it is not actually worth paying CGT on £4m, or even £2m, just to avoid ATED, so the better option may be to leave the structure as it is (though IHT also need consideration). But that does not spoil the point of the example. Perhaps that is the point of the example.

As with most of the GAAR guidance, the answer to the posited example is easy and uncontroversial. What would the position be if the settlor made the payment to the trust, acknowledging the possibility (with a varied range of probabilities) of a capital payment to a non-resident beneficiary (not necessarily the settlor) in a few years time? The reader will not expect GAAR guidance to answer that.

From 2018, the example has been superseded by the non-resident disregard,<sup>241</sup> but the issue could arise in other circumstances, such as a UK resident remittance basis taxpayer beneficiary.

## 57.58 Record keeping

In cases where it is anticipated that s.87 charges are likely to arise, trustees (most likely using UK agents) should make an annual computation of s.1(3) amounts (trust gains). Likewise if it is anticipated that s.731 charges are likely to arise, trustees (most likely using UK agents) should make an annual computation of relevant income. It should be less work to do this annually than to wait until it matters and review back years after the event.

### 57.58.1 *Form 50(FS)*

A computation of s.1(3) amounts (trust gains) could be sent annually to HMRC in the voluntary form 50(FS). The TSE Manual provides:

**TSEM10130 Non-resident trusts: issue of form 50FS** [Aug 2019]

Although the trustees of a trust which has been non-resident throughout a tax year are not chargeable to Capital Gains Tax on the trust gains, the trust gains may be attributable to the settlor and/or beneficiaries who will be chargeable on the attributed gains in the year the gains arise or in a later year.

SPT Personal Tax International issue forms 50FS to non-resident trusts that are notified to HMRC. The form is a non-statutory form requesting information on trust income and gains. It also asks for details of capital

---

241 See 57.21 (Non-resident disregard).

payments made by the trustees to enable HMRC to monitor liabilities arising to UK resident settlors and beneficiaries of non-resident trusts. Completion of the form is voluntary, but by completing the form and providing information which can be used to reconcile entries made on the settlors' and/or beneficiaries' tax returns, the trustees may prevent enquiries being made into those aspects of the settlors' and beneficiaries' tax returns.

The forms can be issued to any person (including trustees, settlor or beneficiary) and are also available on the HMRC website for customers.

In the absence of immediate or closely anticipated tax charges, I wonder if it is worthwhile for trustees to complete the form.

### *57.58.2 Pre-2008 records*

The s.87 guidance note provides:

133. Before 6 April 2008 trustees of non-UK resident settlements that have no UK domiciled beneficiaries, or beneficiaries who may become UK domiciled, will not have had to consider the possible UK CGT liabilities of the beneficiaries. From 6 April 2008 they will have to consider the possibility that a charge under section 87 or Schedule 4C TCGA may accrue to UK resident but non-UK domiciled beneficiaries.

134. In relation to pre 6 April 2008 transactions HMRC recognise that in such cases trustees

- May not have kept sufficient records to calculate precisely the post 5 April 2008 CGT liabilities that may accrue on UK resident but non-UK domiciled beneficiaries, or
- May not want to incur the expense of searching through old records to obtain all the necessary information to calculate precise CGT liabilities.

135. In such cases HMRC will consider any reasonable solution suggested to them. Usually proposed solutions will have to be considered on a case by case basis.

The guidance note concludes:

One solution that HMRC will accept generally is that all assets held by trustees or underlying companies at midnight on 5 April 2008 are treated as having a zero acquisition cost. Provided the trustees make a valid election under paragraph 126 of Schedule 7 there will be no disadvantage to the beneficiaries. This is because the chargeable gain is restricted to the growth in the value of asset since 6 April 2008.

If a rebasing election is made, pre-2008 gains do not often matter, but there are situations in which it does matter.

### **57.59 Tax return: s.87 gain**

Section 87 gains are returned in Box 18 in the Capital Gains Summary pages (form SA108) 2019/20. The note beside this box reads:

Attributed gains where personal losses cannot be set off.

Form SA108 (notes) 2019/20 provides:

Only fill in this box if you've received any gains, capital payments or benefits, as a beneficiary from a non-UK resident trust.

### **57.60 DT relief: s.87 gain**

#### *57.60.1 Trustee treaty-resident outside UK*

This section considers whether a UK resident beneficiary may claim third-party DT relief where:

- (1) Gains (“trust gains”) accrue to a trust which is treaty-resident in a foreign state with a DTA conferring CGT relief in standard OECD Model form.
- (2) The beneficiary receives a capital payment so a s.87 gain accrues to them.

At first sight, the DTA offers no defence to the charge on the beneficiary. The trust gains accruing to trustees meet the requirements for DTR but the s.87 gain accruing to the beneficiary under s.87 TCGA is not the same gain as the trust gains accruing to the trustees.<sup>242</sup> Section 87 may be regarded as a charge on the capital payment, or a charge on fictional gains, but it is not a charge on the trust gains accruing to the trustees. That seems reasonably clear for several reasons:

- (1) The wording of s.87(2) suggests that the s.87 gains and the trust gains are distinct.
- (2) If the trust gains exceed the capital payment, it would not be clear which trusts gains were charged. Although there are matching rules, these rules only match capital payments to trust gains of a year; they do not match capital payments to specific gains within the year.

---

<sup>242</sup> See 103.22 (Characterisation).

- (3) For the purposes of the CGT remittance basis, the s.87 gain is treated as accruing on the disposal of a foreign situate asset, even if trust gains of the trustees accrue on the disposal of a UK situate asset.<sup>243</sup>

The absence of DT relief in this situation has always been a potential injustice, but following the extension of s.87 to foreign domiciliaries in 2008 it has become a more significant injustice.

There is however an argument that the gains accruing to the trustees are not s.1(3) amounts. The definition is:

the amount upon which the trustees of the settlement would be chargeable to tax under s.1(3) for that year if they were resident in the UK in that year.

The argument is that assuming the trustees were UK resident, they would still be treaty non-resident, so “the amount on which they would be chargeable to tax” would be nil!<sup>244</sup> I refer to this as the “**DT argument**”. It is the old question of how far to carry the deeming.<sup>245</sup>

Unfortunately an argument of this kind was put in a similar context in *Bricom v IRC* where it was rejected. That was a CFC case. One issue was to ascertain the chargeable profits of the CFC. “Chargeable profits” was defined in s.747(6) ICTA which provided (so far as relevant):

In relation to a company resident outside the UK—

- (a) any reference in this Chapter to its chargeable profits for an accounting period is a reference to the amount which, on the assumptions in Schedule 24, would be the amount of the total profits of the company for that period on which ... corporation tax would be chargeable.

Para 1(1) sch 24 ICTA provided:

The company shall be assumed to be resident in the UK.

The CFC was resident in the foreign state, and treaty-resident there, and it argued that although it was deemed to be UK resident, the deeming did

---

243 See 57.19 (s.87 remittance basis).

244 This assumes that the trustees would claim treaty relief, but that is merely an administrative matter and should not be an obstacle. The position is different for gains accruing to underlying companies which are deemed to accrue to the trustees under s.3.

245 See App 7.1 (Constriction of deeming provisions).

not undo those facts. Accordingly, the CFC's chargeable profits should be ascertained on the assumption that the CFC was dual resident and entitled to the benefit of the DTA. The Court of Appeal rejected the argument:

... para 1(1) of Sch 24 is a statutory assumption, and is ambiguous. The question is: what is the nature of the assumption?...

In the present case the purpose for which the assumptions are required is self-evident (!). A controlled foreign company is ex hypothesis resident outside the UK. As a non-resident, it will not normally be subject to UK corporation tax and will have made no claim to relief from such tax. The computation of the profits on which corporation tax is chargeable, therefore, involves ascertaining a hypothetical amount, that is to say the amount which would have represented the amount of such profits if the controlled foreign company had been resident in the UK and had made all necessary claims for relief. The assumptions which Sch 24 requires are not additional assumptions to be made in combination with the actual facts. In relation to the matters which they cover they are substituted for the actual facts. [The CFC] was resident outside the UK; this means that it had no profits actually chargeable to corporation tax; accordingly its chargeable profits are to be ascertained on the footing that it was resident in the UK instead. It is as simple as that. There is no question of dual residence.

... The chargeable profits referred to in s 747(4)(a) must be ascertained without reference to the double taxation agreement ....<sup>246</sup>

The reader may think this a particularly blatant case of assuming the answer and then construing the statute to yield that answer. However that may be, *Bricom* is not a general rule for the construction of provisions deeming UK residence, but a case on the construction of the CFC legislation. The point in the s.87 code must be considered independently.

If the DT argument were correct, there would be an anomaly between:

- (1) trusts which were UK-law non-resident and treaty non-resident, ie within the scope of a DTA; and
- (2) trusts which were UK-law UK resident and treaty non-resident, for these are caught by s.88 TCGA.<sup>247</sup>

If third-party DT relief is not available, a CGT computation deduction is

<sup>246</sup> *Bricom v IRC* 70 TC 272 at p.289.

<sup>247</sup> See 57.38 (Dual-resident trust: s.88 TCGA).

available so foreign tax paid by the trustee is deducted in computing the s.1(3) amount. This is because:

- (1) The s.1(3) amount is the amount on which trustees would have been chargeable to tax if UK resident; and
- (2) UK resident trustees would qualify for a CGT computation deduction, which reduces the amount on which trustees would be chargeable to tax.

### 57.60.2 *Beneficiary treaty-resident outside UK*

Suppose now the beneficiary is UK resident but treaty-resident in a foreign state, in a foreign state with a DTA with a common form CG article. Can the beneficiary claim treaty relief directly? Art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

In 2018, I said:

It is suggested that the beneficiary cannot claim DT relief because:

- (1) The beneficiary is not the alienator.<sup>248</sup>
- (2) The gain is not “from the alienation of any property”.

The contrary is arguable, but does require a very loose reading of the provision.

The position is however changed by the 2019 CGT rewrite, as s.87B(2) now reads:

The chargeable gains [s.87 gains] are chargeable gains accruing on the disposal of an asset situated outside the UK.

So DT relief should apply, from 2019/20, at least if the beneficiary claims the remittance basis.

### 57.60.3 *Credit for foreign tax*

The CG Manual provides:

**CG38610: Trustees’ gains - section [1(3)] amount** [Nov 2019]

Foreign tax paid by the trustees may be deductible in calculating the trustees’ section [1(3)] amount, TIOPA10/S113.

---

248 See 60.38.1 (Participator treaty non-resident).

See 106.27 (CGT/IT computation deduction).

CHAPTER FIFTY EIGHT

**BORROWING BY NON-RESIDENT TRUSTS:  
SCH 4B**

58.1

*Cross references*

**58.1 Borrowing by non-resident trust**

This chapter considers schedules 4B and 4C TCGA, which are designed to counter a set of tax avoidance schemes informally known as flip-flop schemes.

**58.1.1 Loan tax issues: Navigation**

Trust loans can raise countless issues in addition to sch 4B/4C: if a full list could be written, it would include most chapters in this work. The following may serve as a starting point:

<b>General loan issues</b>	<b>See para</b>
General law loan issues	App 2.7
Taxation of interest (including situs of source)	25.1
Situs of benefit of debt	97.1
<b>Trust borrower under loan</b>	
<i>Loan from individual lender to trust</i>	
Remittances: are trustees relevant persons in relation to lender	17.5
s.624: is lender a settlor/is the loan an interest in the trust	44.6.4; 94.26
Could loan cause a POA intangible property charge	80.8
<i>Repayment of trust borrowing to individual lender</i>	
s.633/s.727: charge on repaying loan to settlor/transferor	44.14; 46.17
<i>All loans to trusts</i>	
IHT deduction for trust debt	76.1; 76.14
Tainting protected trusts	88.7

**Trust lender under loan**

s.731/s.87 benefit 47.10

**Loans to/from companies held by trusts** 57.11**58.2 Flip-flop schemes**

In order to understand the law it is helpful to review these schemes. They were designed avoid ss.86, 77 and 87 TCGA and I refer to them as “**s.86, 77, and 87 schemes**”.

The s.86 scheme was as follows. Suppose a non-resident settlor-interested trust (“trust 1”) wished to dispose of an asset. The gain on the disposal would in principle be taxed on the settlor under s.86 TCGA. The following steps could be taken:

- (1) The trustees of trust 1 borrow money up to the value of the asset.
- (2) They transfer the borrowed money to a second trust (“trust 2”).
- (3) The trustees exclude the settlor and designated persons from trust 1 so that s.86 ceases to apply to it.<sup>1</sup>
- (4) In the following tax year, the trustees of trust 1 may sell the asset and realise a gain to which s.86 does not apply. They may then repay the loan.

This scheme was in principle successful.<sup>2</sup>

The s.77 scheme was designed to avoid s.77 TCGA. It involved (more or less) the same steps as the s.86 scheme. In this case however the legislation was (slightly) differently worded, and the scheme was eventually held to be unsuccessful in *West v Trennery*<sup>3</sup>, where the result (appropriately) flip-flopped through taxpayer success before the Commissioners, failure in the High Court, success in the Court of Appeal, to eventual failure in the House of Lords. Section 77 has long been repealed, so this is now of historical interest only, but the background explains one or two features which survive in the present legislation.

The s.87 TCGA schemes came in two versions. The first version was as follows. Suppose a non-resident trust (“trust 1”) without any s.1(3) amount (trust gains) wished:

---

1 See 56.5 (Settlor-interested condition).

2 *Burton v HMRC* [2009] UKFTT 203 (TC). It is striking that the transactions took place in 2000 but the appeal was not heard until a decade later.

3 [2005] UKHL 5.

- (1) to dispose of an asset on which trust gains would accrue, and
- (2) to make a capital payment to UK beneficiaries.

The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

- (1) The trustees of trust 1 borrow money up to the value of the asset.
- (2) They transfer the borrowed money to a second trust (“trust 2”).
- (3) The trustees of trust 2 made a capital payment to the beneficiary.
- (4) In the following tax year, the trustees of trust 1 sell the asset and realise a gain. The capital payment from trust 2 is not matched with the gain in trust 1.
- (5) The trustees may then repay the loan.

A second (and more common) version of the s.87 scheme could be used for a trust which did have trust gains. Suppose the trust wished to make a capital payment to UK beneficiaries. The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

- (1) The trustees of trust 1 borrow money.
- (2) They transfer the borrowed money to trust 2.
- (3) The trustees of trust 2 make a capital payment to the beneficiary. The capital payment from trust 2 is not matched with the trust gains of trust 1. Section 90 TCGA would have stopped this scheme (it carried the trust gain across to trust 2, where the gain would be matched to the capital payment from trust 2). However this section was absentmindedly disapplied by sch 4B TCGA in 2000, which led to a flurry of tax planning until the mistake was finally corrected in 2003.<sup>4</sup>
- (4) In due course, the trustees of trust 1 may repay the loan.

In the 2015/16 edition of this work I said:

The s.87 schemes were held to be unsuccessful in *Herman v HMRC*. It is striking that most of these expensive and widely marketed schemes failed, contrary (I think) to the general expectation of the profession. The reader may think that the taxpayer had the better argument, in *Trennary* and in *Herman*. What lessons should be learned from the debacle? I leave readers to ponder over that.

---

4 See 57.39.6 (Interaction with sch 4B).

The courts subsequently reversed the decision in *Herman*, so the s.87 schemes succeeded after all, or at least those of them which held out to the end of the battle.<sup>5</sup> There is still food for thought in this eventful history, but perhaps less cause for gloom.

Be that as it may, the key features of the schemes were trustee borrowing and a transfer of trust property in year 1, followed by a disposal in a subsequent year. Schedule 4B produces a deemed disposal in year 1, which counteracts the s.86 (and s.77) schemes and the first version of the s.87 scheme. Schedule 4C contains a modified version of the s.87 regime, which allows gains of trust 1 to be matched with capital payments from trust 2; this counteracts the second version of the s.87 scheme.

### 58.2.1 *Income tax flip-flop scheme*

Since schedules 4B/4C only apply for CGT purposes, the reader may wonder if similar schemes could work for IT. Suppose a non-resident settlor-interested discretionary trust (“trust 1”) wished to receive income (for instance by receiving dividends) which would fall within s.624 or s.720. Could the following steps be taken:

- (1) The trustees borrow money up to the anticipated income.
- (2) They transfer the borrowed money to a second trust (“trust 2”).
- (3) The trustees use their powers to exclude the settlor (etc) from trust 1 so that trust ceases to be settlor-interested.
- (4) In the following tax year, the trustees of trust 1 receive the income and repay the borrowing.

The answer is that income tax capital payment provisions, s.633 ITTOIA and s.727 ITA, fill that gap but there may be occasions where planning of that kind is possible.

Similarly, since sch 4C only applies for CGT and OIG purposes, the reader may wonder if planning of this kind would work for s.731; the answer is no, as transfers between trusts do not isolate relevant income; see 47.13.2 (Transfer between trusts). In this respect, s.731 operates rather like schedule 4C.

## 58.3 The key conditions

---

<sup>5</sup> See 57.8.1 (Indirect receipt from trust).

Para 1 sch 4B TCGA provides:

- (1) This Schedule applies where trustees of a settlement—
  - (a) [i] make a transfer of value (see paragraph 2)  
[ii] in a year of assessment in which the settlement is within section 86 or 87 (see paragraph 3), and
  - (b) in accordance with this Schedule the transfer of value is treated as linked with trustee borrowing (see paragraphs 4 to 9).

Thus the three key conditions, or sets of conditions, are:

- (1) A transfer of value (in my terminology, “**a Sch4B-transfer**”)
- (2) Trustee borrowing
- (3) The sch4B-transfer is “linked” with trustee borrowing

If these conditions are satisfied, there is what I call “**a Sch4B-disposal**”.<sup>6</sup>

#### **58.4 Sch4B-transfer**

The statutory term “transfer of value” is unfortunate. Firstly the term is usually used with its IHT meaning. Secondly, the term is artificially defined to include loans and other transactions which do not constitute a transfer of value in any normal sense of the term. Although it is usually better to adopt statutory terminology, in this case I think it is clearer to use the term “**Sch4B-transfer**”.

The fact that there is a sch4B-transfer does not necessarily mean that there is a sch4B-disposal: the transfer is only the first of the three conditions that must be met for a sch4B-disposal.

There are three types of sch4B-transfer. Para 2(1) sch 4B TCGA provides:

- For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they—
- (a) lend money or any other asset to any person,
  - (b) transfer an asset to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred, or
  - (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or

---

<sup>6</sup> See 58.12 (Sch4B-disposal).

value is less than the value of the security.

Trustees do not make a sch4B-transfer if an underlying company held by them lends, transfers, or issues a security. Trustees do not make a sch4B-transfer if they repay a loan.

I comment on the 3 types of sch4B-transfer in their order of importance, rather than in the order set out in the statute.

#### 58.4.1 *Transfer of asset*

Para 2(1) sch 4B TCGA provides:

For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they...

- (b) transfer an asset to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred...

This is the most important type of sch 4B-transfer.

Para 13(1) sch 4B TCGA provides a commonsense definition of “asset”:

In this Schedule any reference to an asset includes money expressed in sterling.

References to the value or market value of such an asset are to its amount.

This is needed as sterling is not usually regarded as an asset for CGT purposes.<sup>7</sup>

Para 13(2) sch 4B TCGA provides a wide definition of “transfer”:

Subject to sub-paragraph (3), references in this Schedule to the transfer of an asset include

- [a] anything that is or is treated as a disposal of the asset for the purposes of this Act,
- [b] or would be if sub-paragraph (1) above [“asset” includes £ sterling] applied generally for the purposes of this Act.

The CG Manual provides:

**35125. Transfer of value** [Jan 2015]

References to transfers of value include everything that is or is treated

---

<sup>7</sup> Section 21 TCGA 1992.

as a disposal under TCGA 1992, and also include transfers or loans of money, and loans of other assets. Note that this includes disposals of assets such as government stock or a dwelling house occupied as a beneficiary's principal private residence, even though there would be no chargeable gain on the disposal. It also includes the occasion of a beneficiary becoming absolutely entitled as against the trustee but in this context see CG35128...

CG35124(b) above makes it clear that a sale of an asset, whether to an unconnected person or a beneficiary, is not a transfer of value provided it is for full consideration.

RI 259 provides:

**B1 Paragraph 2(1)(b)—cash distributions which are income**

Where trustees of a discretionary trust make a distribution which is income of the recipient for UK tax purposes, this is not a [sch4B] “transfer of value” within para 2, which is concerned with capital transactions.

*58.4.2 Grant of lease part-disposal*

Para 13(3) sch 4B TCGA provides:

References in this Schedule to a transfer of an asset do not include a transfer of an asset that is created by the part disposal of another asset.

The CG Manual provides:

**35125. Transfer of value** [Jan 2015]

... Some part disposals involve the creation of a new asset. In this situation any reference in the legislation to the transfer of an asset refers to the (part) disposal of the old asset.

RI 259 provides:

**B8** ... Under paragraph 13(2) references to the transfer of an asset include references to anything that is a disposal, and under section 21(2) TCGA references to a disposal include references to a part disposal. [The manual sets out para 13(3) and continues:] The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of paragraph 2(1)(b) and is not regarded as the transfer simply of the lease.

*58.4.3 Loan of money/asset*

Para 2(1) sch 4B TCGA provides:

For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they—

- (a) lend money or any other asset to any person...

The CG Manual provides:

**35124. Transfer of value** [Jan 2015]

Under TCGA 1992, SCH 4B, para 2(1) trustees make a transfer of value if they

- (a) lend money or any other asset, regardless of whether a commercial rate of interest or hire is charged...

The flip-flop schemes<sup>8</sup> used in practice involved a transfer of an asset, not a loan. But (were it not for this provision) there could be a s.87 scheme under which:

- (1) trust 1 lent to trust 2, and
- (2) trust 2 lent to a beneficiary (or acquired property used rent free by the beneficiary).

So the legislation needed to deal with loans as well as transfers of assets.

RI 259 provides:

**B2 Paragraph 2(1)(a)—beneficiary exercising rights under [TOLATA]<sup>9</sup> 1996 s 12**

In certain circumstances a beneficiary's occupation of property, instead of being the consequence of the volition of the trustees, may result from personal rights under Trusts of Land and Appointment of Trustees Act 1996 s 12. Our view is that if the rights of the beneficiary arise as a consequence of the wording of the deed or will, then the occupation does not give rise to a transfer of value. It may be otherwise where the rights have arisen as a consequence of the exercise by the trustees of a power of appointment or advancement.

But it is considered that a beneficiary's occupation of property is not a loan of an asset, and (unless the trustees grant a lease) it is not a part-disposal of the property, so it is not a sch4B transfer, and the application

---

<sup>8</sup> See 58.2 (Flip-flop schemes).

<sup>9</sup> The original refers erroneously to the "Trustee etc Act".

or otherwise of TOLATA is not relevant.

RI 259 provides:

**B7 What happens when trustees put money into a conventional current or deposit account at a bank or building society?**

Although in general law this is regarded as a loan from the customer to the bank, in the context of this legislation we do not consider that this comes within the meaning of “lend” for the purposes of para 2(1)(a). The currency in which the deposit is made is immaterial.

This is purposive, bordering on wishful, thinking; but since it usually suits the taxpayer, it will not usually be challenged.

58.4.4 *Issue of security*

Para 2(1) sch 4B TCGA provides:

For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they ...

- (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or value is less than the value of the security.

It is normally companies rather than trusts which issue securities, so this is of somewhat theoretical interest. RI 259 provides:

**B3 Paragraph 2(1)(c)— “issue a security”**

We have been asked what the expression “issue a security” covers. It caters for those exceptional circumstances where trustees issue to a beneficiary or to the trustees of another trust a document acknowledging liability. Schedule 4B para 13(2) provides that references to the transfer of an asset include everything that is or is treated as a disposal of an asset. The issue of a security is not in itself the disposal or part disposal of an asset. Therefore para 2(1)(b) does not apply to it, and it was necessary to have a specific provision to cover this possibility.

In practice, as far as I am aware, flip-flop schemes were not carried out by issuing a security but it would be possible: issuing the security at an undervalue is a capital payment. A neater solution would have been to define transfer to include the creation of an asset (as for the ToA provisions); but it works.

58.4.5 *Amount of value transferred*

Para 2 sch 4B TCGA provides:

- (3) In the case of a loan, the amount of value transferred is taken to be the market value of the asset.
- (4) In the case of a transfer, the amount of value transferred is taken to be—
  - (a) if any part of the value of the asset is attributable to trustee borrowing, the market value of the asset;
  - (b) if no part of the value of the asset is attributable to trustee borrowing, the market value of the asset reduced by the amount or value of any consideration received for it...
- (5) In the case of the issue of a security, the amount of value transferred shall be taken to be the value of the security reduced by the amount or value of any consideration received by the trustees for it.
- (6) References in this paragraph to the value of an asset are to its value immediately before the material time, unless the asset does not exist before that time in which case its value immediately after that time shall be taken.

The grant of a lease out of a freehold is treated as a sch4B transfer of value of the freehold interest, and the amount of the value transferred is therefore the value of the freehold, not the value of the lease.

**B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?**

... Under para 13(2) references to the transfer of an asset include references to anything that is a disposal, and under TCGA 1992 s 21(2) references to a disposal include references to a part disposal. Paragraph 13(3) provides that references to a transfer of an asset do not include the transfer of an asset which is created by the part disposal of another asset. The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of para 2(1)(b) and is not regarded as the transfer simply of the lease. If the freehold interest was bought with borrowed money it meets the test in para 2(4)(a), and the amount of value transferred equals the market value of the freehold.

## **58.5 Settlement within section 86/87**

Para 3 sch 4B TCGA provides (more or less) commonsense definitions.

58.5.1 *Within s.86*

Para 3 sch 4B TCGA provides:

(1) This paragraph explains what is meant in this Schedule by a settlement being “within section 86 or 87” in a year of assessment.

(3) A settlement is “within section 86” in a year of assessment if, assuming—

(a) that there were chargeable gains accruing to the trustees by virtue of disposals of any of the settled property originating from the settlor, and

(b) that the other elements of<sup>10</sup> the condition in subsection (1)(e) of that section were met,

chargeable gains would, under that section, be treated as accruing to the settlor in that year.

Expressions used in this sub-paragraph have the same meaning as in section 86.

58.5.2 *Within s.87*

Para 3 sch 4B TCGA, as inserted by s.92(2) FA 2000, used to provide:

*(4) A settlement is “within section 87” in a year of assessment if, assuming—*

*(a) there were trust gains for the year within the meaning of subsection (2) of that section, and*

*(b) that beneficiaries of the settlement received capital payments from the trustees in that year or had received such payments in an earlier year,*

*chargeable gains would, under that section or section 89(2), be treated as accruing to the beneficiaries in that year.*

*Expressions used in this sub-paragraph have the same meaning as in section 87.*

This para was rewritten by para 130 sch 7 FA 2008:

In paragraph 3 of Schedule 4B (transfers of value by trustees linked with trustee borrowing: settlements), for sub-paragraph (4) substitute—

---

10 The words “the other elements of” are otiose: para 3(3)b requires one to assume that the condition in s.86(1)(e) is met, in other words, the condition need not be met. That makes sense. For this condition, see 56.11 (Section 86 gains condition).

- “(4) A settlement is “within section 87” for a tax year if—
- (a) section 87 applies to the settlement for that year,<sup>11</sup> or
  - (b) chargeable gains would be treated under section 89(2) as accruing in that year to a beneficiary who received a capital payment from the trustees of the settlement in that year.
- (5) The reference in subsection (4)(b) to chargeable gains treated as accruing includes offshore income gains treated as arising.”

The drafter absentmindedly repealed the final sentence of para 4, “Expressions used in this sub-paragraph have the same meaning as in section 87”.<sup>12</sup> However, that the context shows that the expressions in para 3(4) are nevertheless to be construed with their s.87 meanings.

## 58.6 Trustee borrowing

Para 4(1) sch 4B TCGA provides a wide definition of borrowing:

For the purposes of this Schedule trustees of a settlement are treated as borrowing if—

- (a) money or any other asset is lent to them, or
- (b) an asset is transferred to them and in connection with the transfer the trustees assume a contractual obligation (whether absolute or conditional) to restore or transfer to any person that or any other asset.

In the following provisions of this Schedule “loan obligation” includes any such obligation as is mentioned in paragraph (b).

RI 259 provides:

**B4** ... The fact that money was borrowed before 21 March 2000 does not prevent it from being outstanding trust borrowing.

Where trustees are presented with a bill, for example for repairs to trust property, bona fide delay in payment would not convert this into a borrowing for the purposes of paragraph 4.

The second paragraph is wrong, since a debt on a bill for *repairs* cannot constitute borrowing within para 4; para 4(1)(b) only applies on a loan or transfer of *assets*.

---

11 See 57.4 (Non-resident settlement condition).

12 Some databases failed to notice this (accidental) repeal and still include this sentence in para 3 sch 4B TCGA.

### 58.6.1 *Loan from underlying co*

In the following discussion, a company wholly owned by a trust is called an “**underlying company**”.

A loan to a trust from an underlying company constitutes “trustee borrowing” for the purposes of sch 4B TCGA. RI 259 states that HMRC take this point:

**B4 Paragraph 4(1): meaning of “borrowing”**

It is not unusual for the trustees of a non-resident trust to borrow money from a non-resident company which they control. In this situation, if the company were resident in the UK, [s.455 CTA 2010 (loans to participators)] might well be applicable. It has been suggested that in this situation the trustees are effectively “borrowing” from themselves and therefore outside para 4(1). We consider this incorrect, particularly in the light of *Chamberlain v IRC*.<sup>13</sup> It does not matter whether the borrowing is from a company controlled by the trustees or their associates, or from an entirely unconnected company.

At first sight this rule seems unnecessary. If a trust borrows from an underlying company, rather than a third party, and makes a sch4B-transfer, it seems odd that there should be a sch4B-disposal and that sch 4C should apply. But in fact a flip-flop scheme could be carried out if trustees borrow from an underlying company, just when they borrow from a third party.

Sympathetic courts have allowed trustees to avoid the unfairness by setting aside loans made in (understandable) ignorance of these counterintuitive rules.<sup>14</sup>

In practice I have not come across a case where HMRC have taken the

---

13 25 TC 317. But *Chamberlain* does not seem relevant here. For this case, see 2.2.7 (Pre-arrangement steps).

14 *Re Leumi Overseas Trust* [2007] JRC 248; *Barclays Private Bank v Chamberlain* 9 ITEL 304. The Supreme Court in *Pitt v Holt* [2013] STC 1148 (more or less) abolished the rule in *Hastings-Bass*, on which these decisions were based; but offshore jurisdictions continue regardless: art 47B ff Trusts (Jersey) Law 1984; Smellie, “Dealing with Mistakes of Trustees or Settlers: the Outlook from the Offshore Bench” (2013) <http://judicial.ky/wp-content/uploads/publications/speeches/2013-11-19-Speech-CJ-DEALINGWITHMISTAKESOFTRUSTEESORSETTLORS.pdf>

point but one could in principle avoid it by arranging a capital payment from the company to a beneficiary, rather than a loan to trustees who make the capital payment.

### 58.6.2 *Amount borrowed*

Para 4(2) sch 4B TCGA provides:

The amount borrowed (the “proceeds” of the borrowing) is taken to be—

- (a) in the case of a loan, the market value<sup>15</sup> of the asset;
- (b) in the case of a transfer [ie a transaction within para 4(1)(b)], the market value of the asset reduced by the amount or value of any consideration received for it.

## 58.7 Sch4B-transfer linked with borrowing

### 58.7.1 *Terminology*

The expression “linked with trustee borrowing” is defined in para 5-8 sch 4B. These paragraphs employ the following terms:

<b>Term</b>	<b>See para</b>
<b>Linked</b> with trustee borrowing	58.7.2
<b>Outstanding</b> trustee borrowing	58.7.4
<b>Normal trust purposes</b>	58.8
<b>Ordinary trust assets</b>	58.9.1

These expressions are best regarded as labels for complex sets of rules. The labels are not particularly apt and the definitions can be described as artificial; the labels taken literally would be misleading. The cosy expressions conceal the complex and arbitrary nature of the rules to which they refer. However it is difficult to think of better terms, and for the purposes of discussion it is best to adopt the statutory terminology *faute de mieux*.

---

15 Defined para 4(3):

“References in this paragraph to the market value of an asset are to its market value immediately before the loan is made, or the transfer is effectively completed, unless the asset does not exist before that time in which case its market value immediately after that time shall be taken.

The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer.”

58.7.2 “*Linked*” with trustee borrowing

Para 5(1) sch 4B TCGA provides:

For the purposes of this Schedule a [sch4B] transfer of value by trustees is treated as linked with trustee borrowing if at the material time there is outstanding trustee borrowing.

58.7.3 “*Outstanding*” trustee borrowing

Para 5(2) sch 4B TCGA provides:

For the purposes of this Schedule there is outstanding trustee borrowing at any time to the extent that—

- (a) any loan obligation<sup>16</sup> is outstanding, and
- (b) there are proceeds of trustee borrowing that have not been either—
  - (i) applied for normal trust purposes, or
  - (ii) taken into account<sup>17</sup> under this Schedule in relation to an earlier [sch4B] transfer of value.

58.7.4 *The material time*

Para 2(2) sch 4B TCGA provides:

References in this Schedule to “the material time”, in relation to a [sch4B] transfer of value, are to the time when the loan is made, the transfer is effectively completed or the security is issued.

The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer.

---

16 Defined in para 4(1): see 58.6 (Trustee borrowing).

17 Para 5(3) sch 4B TCGA provides a commonsense definition: “An amount of trustee borrowing is “taken into account” under this Schedule in relation to a transfer of value if the transfer of value is in accordance with this Schedule treated as linked with trustee borrowing. The amount so taken into account is—  
(a) the amount of the value transferred by that transfer of value, or  
(b) if less, the amount of outstanding trustee borrowing at the material time in relation to that transfer of value.”

The CG Manual provides:

**35128. The material time** [Jan 2015]

The expression ‘the material time’ is important for two reasons.

The first is that the test whether the transfer of value is linked with trust borrowing is applied at the material time.

The second is that the deemed disposal by the trustees occurs at the material time.

[The Manual sets out para 2(2) and continues] So if say trustees appoint a cash sum to a beneficiary, he would become unconditionally entitled when the money had been transferred to his bank account, not when the cheque was handed to him, for at that stage the trustees might have no funds to meet the cheque.<sup>18</sup>

## 58.8 Normal trust purposes

Para 6(1) sch 4B TCGA provides:

For the purposes of this Schedule the proceeds of trustee borrowing are applied for normal trust purposes in the following circumstances, and not otherwise.

There are three types of “normal trust purposes”:

- (1) Payment for ordinary trust assets
- (2) Repayment of loan
- (3) Payment of expenses

Para 9 sch 4B TCGA provides power to amend paras 6-8 by regulation. Presumably HMRC were worried that they might have left some loophole for future tax avoiders. In practice no regulations have been made.

## 58.9 Payment for ordinary trust asset

Para 6(2) sch 4B TCGA provides:

They are applied for normal trust purposes if they are applied by the trustees in making a payment in respect of an ordinary trust asset and the following conditions are met—

- (a) the payment is made under a transaction at arm’s length or is not more than the payment that would be made if the transaction

---

18 It would be unusual for trustees to write a cheque if they are not in funds: the point is that a cheque is revocable until payment is made.

- were at arm's length;
- (b) [i] the asset forms part of the settled property immediately after the material time
  - [ii] or, if it does not do so, the alternative condition in paragraph 8 below<sup>19</sup> is met; and
- (c) the sum paid is (or but for section 17 or 39 would be) allowable under section 38 as a deduction in computing a gain accruing to the trustees on a disposal of the asset.

### 58.9.1 *Ordinary trust asset*

The label “ordinary trust asset” is not apt and many common trust assets do not count as “ordinary”. Para 7 sch 4B TCGA provides:

- (1) The following are “ordinary trust assets” for the purposes of this Schedule—
  - (a) shares or securities;<sup>20</sup>
  - (b) tangible property, whether movable or immovable, or a lease of such property;
  - (c) property not within paragraph (a) or (b) which is used for the purposes of a trade, profession or vocation carried on—
    - (i) by the trustees, or
    - (ii) by a beneficiary who has an interest in possession in the settled property;
  - (d) any right in or over, or any interest in, property of a description within paragraph (b) or (c).

Thus securities are ordinary trust assets but interests in securities are not. The distinction between securities and interests in securities raises some deep questions, though there is no reason to think that the drafter gave any thought to this.

If trustees lend to an underlying company they have not incurred normal trust expenditure; if they subscribe for redeemable shares they have done so (though redeemable shares are commercially equivalent to a loan).

RI 259 provides:

---

19 See 58.9.3 (Asset becomes valueless).

20 Defined (after a fashion) in para 7(2): “In sub-paragraph (1)(a) “securities” has the same meaning as in section 132.” See App 2.12.1 (s.132 TCGA definition). In this section I use the word “securities” to include shares.

We have been asked to say whether a futures contract relating to commodities is an “ordinary trust asset”. Such a contract is not a tangible asset nor does it give the holder an interest in such an asset. Therefore, it is not an “ordinary trust asset”.

### 58.9.2 *Grant of lease*

RI 259 provides:

**B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?**

... Assuming that there is outstanding trustee borrowing at “the material time”, which is defined in para 2(2) as the time the transfer is effectively completed, it is then necessary to consider whether the transfer of value is linked with trustee borrowing. Under para 7 tangible property, and any interest in such property falls within the expression “ordinary trust assets”. However the property concerned must under para 6(2)(b) either form part of the settled property immediately after the material time, or meet the alternative condition in para 8(1)(b) that it is represented by ordinary trust assets which form part of the settled property immediately after the material time. Paragraph 6(2)(b) and para 8(1)(b) may be looked at together. In this situation we say that the reversion to the lease is still part of the settled property, and the lease itself is represented by the right to the rental stream.

Therefore where trustees borrow money to acquire the freehold interest in a property which is then let commercially and, at the material time, there are no outstanding trustee borrowings other than those which have been applied for normal trust purposes, Sch 4B does not apply. But the position will be different if at that moment there are outstanding trustee borrowings applied for other purposes.

The same considerations apply where trustees acquire a long lease which is sublet, and where the asset in question is a chattel rather than land or buildings.

### 58.9.3 *Asset becomes valueless*

Para 8 sch 4B TCGA provides:

- (1) The alternative condition referred to in paragraph 6(2)(b) in relation to an asset which no longer forms part of the settled property is that—
- (a) the asset is treated as having been disposed of by virtue of section 24(1), or
  - (b) one or more ordinary trust assets which taken together directly

or indirectly represent the asset—

- (i) form part of the settled property immediately after the material time, or
- (ii) are treated as having been disposed of by virtue of section 24(1).

(2) Where there has been a part disposal of the asset, the condition in paragraph 6(2)(b) and the provisions of sub-paragraph (1) above may be applied in any combination in relation to the subject matter of the part disposal and what remains.

(3) References in this paragraph to an asset include part of an asset.

### **58.10 Repayment of loan**

Para 6(3) sch 4B TCGA provides:

They are applied for normal trust purposes if—

- (a) they are applied by the trustees in wholly or partly discharging a loan obligation of the trustees, and
- (b) the whole of the proceeds of the borrowing connected with that obligation (or all but an insignificant amount) have been applied by the trustees for normal trust purposes.

### **58.11 Payment of expenses**

Para 6(4) sch 4B TCGA provides:

They are applied for normal trust purposes if they are applied by the trustees in making payments to meet bona fide current expenses incurred by them in administering the settlement or any of the settled property.

RI 259 provides:

#### **B5 Paragraph 6(4)—application of proceeds to meet current expenses**

We have been asked whether trustee borrowings to meet payments on account or provision for future or past expenses are covered by the expression “current expenses”. One circumstance in which borrowings are applied for “normal trust purposes” (para 6) is where they are applied by the trustees in making payments to meet bona fide current expenses incurred by them.

One may note that there are three tests to be met—

- The borrowings have been applied by the moment of the transfer of value (para 5(2)(b)(i)).
- They have been applied to meet bona fide “current expenses”.

- The expenses are expenses of “administering” the settlement or any of the settled property.

In the case of borrowing to meet future expenses it is hard to see how the borrowings can be said to have been applied. But the time for making the test is not when the money is borrowed, but the time of the transfer of value (this is “the material time”, as defined in para 2(2)). In the case of payments on account there would be the requisite application and the liability to pay would have been incurred.

We do not regard “current” as restricting qualification to expenditure which for accounting purposes must fall in the year of borrowing, but we should regard it as excluding borrowing to make a provision for future expenditure or to meet expenditure that was incurred long before but left unpaid. In general where contracts for repairs of an ordinary kind have been entered into, we should regard the expenditure anticipated under those contracts to be current expenses at the moment of borrowing. Where trustees as the owner or tenant of a flat are obliged by contract or under the terms of the lease to make payments into a common fund to meet future maintenance or repair expenditure this would be regarded as a current expense.

The expression “administering the settlement or any of the settled property” should be construed widely to cover not only those expenses properly chargeable to income, or which would be so chargeable but for express provisions of the trust deed, but also capital expenditure such as capital taxes in the UK or elsewhere, or legal costs of a reorganisation, in particular the costs of an application under the Variation of Trusts Act. Other capital expenditure would often be expenditure on the asset itself, and therefore qualify under para 6(2). Contributions to the day-to-day running costs of a nominee company controlled by the trustees would also qualify.

#### 58.11.1 *Unproductive expenditure*

RI 259 provides:

**B9 What happens when money is spent unproductively, for example on a planning application that fails?**

Under para 6(2) there are three conditions that must be met by a payment in respect of “an ordinary trust asset” if it is to be regarded as applied for normal trust purposes. The third, in para 6(2)(c), is that the sum is allowable under TCGA 1992 s 38 (or would be but for s 17 or 39) as a deduction in computing a gain accruing to the trustees on a disposal of the asset. If an application for planning permission fails, then when the

land is actually sold the costs relating to the application are generally not allowable; this is because they are not “reflected in the state or nature of the asset at the time of the disposal”. Paragraph 6(2)(c) however must be referring to a notional disposal not to a real one. In the context of para 6 we consider that the reference can only be to a notional disposal taking place at the time when the expenditure is incurred.

Although one could not lay down as a universal rule that the expenditure would always qualify, the test is whether the existence of the current application for planning permission is reflected in the state or nature of the asset at the time of the notional disposal.

## 58.12 Sch4B-disposal

Para 1(2) sch 4B TCGA provides an outline:

Where this Schedule applies the trustees are treated as disposing of and immediately reacquiring the whole or a proportion of each of the chargeable assets that continue to form part of the settled property (see paragraphs 10 to 13).

I refer to this as a “**Sch4B-disposal**”. Para 10 sch 4B TCGA provides the details:

(1) Where in accordance with this Schedule a [sch4B] transfer of value by trustees is treated as linked with trustee borrowing, the trustees are treated for all purposes of this Act—

- (a) as having at the material time<sup>21</sup> disposed of, and
- (b) as having immediately reacquired,

the whole or a proportion (see paragraph 11) of each of the chargeable assets that form part of the settled property immediately after the material time (“the remaining chargeable assets”).

(2) The deemed disposal and reacquisition shall be taken—

- (a) to be for a consideration equal to the whole or, as the case may be, a proportion of the market value of each of those assets, and
- (b) to be under a bargain at arm’s length.<sup>22</sup>

### 58.12.1 *Chargeable asset*

The key term here is “chargeable asset”. Para 10(3) sch 4B provides:

---

21 See 58.7.4 (The material time).

22 This deeming prevents hold-over relief (which might otherwise apply to a UK resident trust).

For the purposes of sub-paragraph (1) an asset is a chargeable asset if a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

An offshore fund (within the OIG regime) is not a chargeable asset as no chargeable gain can arise on a disposal. See 53.4.2 (“Chargeable” asset).

### 58.12.2 *Extent of disposal*

Para 11 sch 4B TCGA provides:

(1) This paragraph provides for determining whether the deemed disposal and reacquisition is of the whole or a proportion of each of the remaining chargeable assets.

(2) If the amount of value transferred—

- (a) is less than the amount of outstanding trustee borrowing, and
- (b) is also less than the effective value of the remaining chargeable assets,

the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:

$$VT \div EV$$

where—

VT is the amount of value transferred, and

EV is the effective value of the remaining chargeable assets.

(3) If the amount of value transferred—

- (a) is not less than the amount of outstanding trustee borrowing, but
- (b) is less than the effective value of the remaining chargeable assets,

the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:

$$TB \div EV$$

where—

TB is the amount of outstanding trustee borrowing, and

EV is the effective value of the remaining chargeable assets.

(4) In any other case the deemed disposal and reacquisition is of the whole of each of the remaining chargeable assets.

(5) For the purposes of this paragraph the effective value of the remaining chargeable assets means the aggregate market value of those assets reduced by so much of that value as is attributable to trustee borrowing.

(6) References in this paragraph to amounts or values, except in relation

to the amount of value transferred, are to amounts or values immediately after the material time.

### 58.12.3 HMRC example: Part-disposal

RI 259 provides an example:

#### **B10 How should we compute the base cost of assets for future disposals?**

... Suppose that an asset cost £600, the trustees are treated as disposing of two thirds of the asset at the material time (paragraph 10(1)), and the respective values of two thirds and one third immediately after that time are £900 and £450.

HMRC compute the gain on the sch4B-disposal:<sup>23</sup>

Deemed Proceeds	900
Cost [two thirds of 600]	-400
Gain	<u>500</u>

HMRC compute the base cost for a future disposal:

Remaining original cost	600 - 400	200
Deemed Acquisition		<u>900</u>
Revised base cost		<u>1100</u>

## 58.13 Gain/loss on Sch4B-disposal

### 58.13.1 Gain on Sch4B-disposal

If a gain arises to a trust within s.86, on sch4B-disposal, the position is straightforward: the settlor is taxable on the gain.

If the trust is within s.87, the sch 4C rules apply as discussed below.

### 58.13.2 Loss on Sch4B-disposal

If a loss arises on a sch4B disposal, it can in principle be set against other gains of the trustees.

In the HMRC view, if a sch4B-disposal is deliberately made to realise a loss, the loss is disallowed under s.16A TCGA.<sup>24</sup> CG Manual Appendix

23 I have slightly amended the layout for clarity.

24 See 61.21 (Capital loss TAAR).

9 provides:

**Example 18 - trustees make a deliberate transfer of value** [Jun 2016]

1. A body of trustees who fall within the terms of Schedule 4B have outstanding borrowing which has not been used for trust purposes (Schedule 4B is a measure introduced to discourage trustees avoiding capital gains tax by incurring debt and advancing funds from the settlement). The trustees intentionally make a transfer of value which triggers off a charge under Schedule 4B, and as they expect this transaction results in a capital loss. The trustees have realised chargeable gains in the same year, and claim to set the loss against those gains.

2. It is necessary to look at the arrangements which have been entered into by the trustees to determine whether these have been entered into with a main purpose of securing a tax advantage. There are arrangements in this case, so the question is whether or not those arrangements were entered into with a main purpose of securing a tax advantage, and to decide this it is necessary to take account of all the circumstances surrounding the transactions. It will be relevant to consider what the trustees' overall economic objective was, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted. It is significant that Schedule 4B is itself anti-avoidance legislation, intended to counter avoidance of tax on gains by contrived arrangements between settlements. The fact that the trustees have deliberately triggered the operation of the schedule is an indicator that one of their main purposes was to secure the advantage of the capital loss. In such a case, the TAAR [s.16A TCGA] will apply and the loss will not be an allowable loss.

### **58.14 Schedule 4C: Introduction**

A sch4B-disposal takes a trust from the standard s.87 regime to the (even) more complicated rules which I call the “**Sch 4C s.87 regime**”.

Section 85A(1) TCGA provides:

(1) Schedule 4C to this Act has effect with respect to the attribution of gains to beneficiaries where there has been a transfer of value to which Schedule 4B applies.

(2) Sections 86A to 95 have effect subject to the provisions of Schedule 4C.

Para 1(1) sch 4C TCGA makes the same point:

This Schedule applies where the trustees of a settlement (“the transferor settlement”) make a transfer of value to which Schedule 4B applies (“the original transfer”)....

Thus, the sch 4C s.87 regime applies if trustees make a sch4B-transfer which is linked to trustee borrowing.<sup>25</sup>

For completeness, para 1(1) sch 4C TCGA provides:

References in this Schedule to a transfer to which Schedule 4B applies include any such transfer, whether or not any chargeable gain or allowable loss accrues under that Schedule by virtue of the transfer.

We need some terminology to deal with this, and so in this chapter:

The “**transferor trust**” is the trust which makes the sch 4B-transfer (I adopt the statutory term).

In the statute, the sch4B-transfer is called “the original transfer”. I refer to it as the “**Sch4B transfer**” or if there is more than one, the “**original Sch4B-transfer**”.

The “**Sch4B-transfer year**” is the year in which the sch4B-transfer is made.

### 58.15 Sch4C pool

The key to understanding sch 4C is to appreciate that following a sch4B-transfer, there are *two* pools of gains:

- (1) “*Standard s.87 pool*”: The transferor trust may have a pool of s.1(3) amounts (trust gains) governed by the standard s.87 regime
- (2) “*Sch 4C pool*”: The transferor trust may have a sch4C pool, governed by the sch4C s.87 regime

Para 1(2) sch 4C TCGA provides:

The transferor settlement is regarded for the purposes of this Schedule as having a “Schedule 4C pool”.

I abbreviate this to “**Sch4C pool**”.

Para 1(3) sch 4C TCGA provides:

The Schedule 4C pool contains the section 1(3) amounts for the settlement that are outstanding at the end of the tax year in which the

---

25 See 58.3 (The key conditions).

original [Sch 4B-]transfer is made (see paragraph 1A).

Trust gains accruing in years after the sch4B-transfer year do not go into the sch4C pool (unless there is another sch4B-transfer). They go into the standard s.87 pool.

### 58.15.1 “*Outstanding s.1(3) amounts*”

We need to ascertain “the section 1(3) amounts for the settlement that are outstanding” at the end of the tax year when the sch4B-transfer is made.

Para 1A(1) sch 4C TCGA provides:

The following steps are to be taken for the purpose of calculating the section 1(3) amounts for a settlement that are outstanding at the end of a tax year (“the relevant tax year”).

Step 1 provides a commonsense starting point:

*Step 1* Find the section 1(3) amount<sup>26</sup> for the settlement for the relevant tax year and earlier tax years, as reduced under section 87A [matching] as it applies for the relevant tax year and earlier tax years....

So far the rules are the same as for standard s.87 trust gains, ie all the standard s.87 trust gains as at the end of the sch4B-transfer year go into the sch4C pool.

### 58.15.2 *Trust transfer in/before Sch4B-transfer year*

Para 1A(2) sch4C TCGA deals with the special case of transfers between settlements:

For the purposes of Step 1 of sub-paragraph (1) take into account the effect of section 90 in relation to any transfer of settled property from or to the trustees of the settlement made in or before the relevant tax year.

Section 90 TCGA does not apply to a sch4B-transfer, but it would apply if there had been an earlier transfer between trusts which was not a sch4B-transfer.<sup>27</sup>

So far the rules are still the same as for the s.87 trust gain pool.

### 58.15.3 *Payment to non-resident*

---

26 See 57.6 (Section 1(3) amount).

27 See 57.39.6 (Interaction with sch 4B).

Para 1A(1) sch 4C TCGA provides:

*Step 2* This Step applies if directly or indirectly, by virtue of the matching of the section 1(3) amount for the settlement for a tax year (“the applicable year”) with a capital payment, chargeable gains are treated under section 87, 87K,<sup>28</sup> 87L<sup>29</sup> or 89(2) as accruing in the relevant tax year to an individual who is not chargeable to tax for that year.

Increase the section 1(3) amount for the applicable year (found under Step 1) by the amount of the chargeable gains.

...

(3) For the purposes of this Schedule an individual is “chargeable to tax” for a tax year if, as respects that year, the individual is UK resident for the tax year (as determined in accordance with Chapter 1 of Part 1 of this Act).

Thus capital payments to non-residents which (before 2017/18) reduced the standard s.87 pool are added to the sch4C pool. Effectively such payments do not take trust gains out of the sch4C pool. The same rule applies to capital payment to non-residents after the sch4B transfer is made: see 58.19.3 (Sch4C matching rules).

The capital payments which are disregarded are those which are matched to s.87 gains accruing in the “relevant tax year”.

## **58.16 Sch4B trust gains**

### *58.16.1 Sch4B gains added to Sch4C pool*

Section 85A(3) TCGA provides:

[a] When calculating the section 1(3) amount for a settlement for a tax year (within the meaning of section 87), no account is to be taken of any chargeable gains or allowable losses accruing by virtue of Schedule 4B.

[b] Nothing in this subsection affects any increase in a section 1(3) amount by virtue of paragraph 1(3A) or 7B(2)(b)<sup>30</sup> of Schedule 4C.

Gains on the sch4B-disposal do not enter the standard s.87 pool.

---

28 See 57.33 (s.87 onward-gift rule).

29 See 57.34 (Onward-gift to close-family: s.87 settlor-attribution rule).

30 See 58.18 (Second Sch4B-disposal).

Instead para 1A(3A) sch 4C TCGA puts them in the sch4C pool:

The section 1(3) amount for that tax year is increased by—

- (a) the amount of Schedule 4B trust gains accruing by virtue of the original [Sch 4B-]transfer (see paragraphs 3 to 7), and
- (b) the total amount of any further Schedule 4B trust gains accruing by virtue of any further transfers of value to which that Schedule applies that are made by the trustees in that tax year.

The key term here is “Sch4B trust gains”. This term is artificially defined: it does not mean the gains accruing on the sch4B-disposal. For clarity, I write the expression with scare quotation marks.

### 58.16.2 “*Sch4B trust gains*”

Para 3 sch 4C TCGA provides:

- (1) This paragraph explains what is meant for the purposes of this Schedule by “Schedule 4B trust gains”.
- (2) The Schedule 4B trust gains are computed in relation to each transfer of value to which that Schedule applies.
- (3) In relation to a transfer of value the amount of the Schedule 4B trust gains for the purposes of this Schedule is given by—  
CA – SG – AL ...

In short:

CA is **C**hargeable **A**mount

SG is the **S**ettlor **G**ains

AL is **A**llowable **L**osses

Each of these terms is elaborately defined. Para 3(3) continues with an outline:

CA is the chargeable amount computed under paragraph 4 or 5 below, SG is the amount of any gains attributed to the settlor that fall to be deducted under paragraph 6 below, and AL is the amount of any allowable losses that may be deducted under paragraph 7 below.

### 58.16.3 *Ch. amount: Non-resident trust*

Para 4 sch 4C TCGA provides:

- (1) If the [sch4B] transfer of value is made in a year of assessment

during which the trustees of the transferor settlement are at no time resident in the UK the chargeable amount is computed under this paragraph.

(2) Where this paragraph applies the chargeable amount is the amount on which the trustees would have been chargeable to tax under section 1(3) by virtue of Schedule 4B if they had been resident in the UK in the year (and had made the disposals which Schedule 4B treats them as having made).

Para 4(3) sch 4C TCGA deals with the special case of a disposal of land by a non-resident:

Where (apart from this sub-paragraph) the chargeable amount mentioned in sub-paragraph (2) would include a chargeable gain or allowable loss to which section 1A(3)(b) or (c) applies (disposals by non-UK residents within the charge to capital gains tax), so much of the gain or loss as would be so included is to be disregarded for the purposes of determining the chargeable amount.

The wording is based on the s.87 definition of s.1(3) amount.<sup>31</sup>

#### 58.16.4 *Ch. amount: Dual-resident trust*

Para 5 sch 4C TCGA provides:

(1) If the [sch4B] transfer of value is made in a year of assessment where—

- (a) the trustees of the transferor settlement are resident in the UK during any part of the year, and
- (b) at any time of such residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,

the chargeable amount is computed under this paragraph.

(2) Where this paragraph applies the chargeable amount is the lesser of—

- (a) the amount on which the trustees would be chargeable to tax under section 2(2) by virtue of Schedule 4B on the assumption that the double taxation relief arrangements did not apply (and the disposals which Schedule 4B treats them as having made were made), and

---

31 See 57.6 (Section 1(3) amount).

- (b) the amount on which the trustees would be so chargeable to tax by virtue of disposals of protected assets.
- (3) For this purpose “protected assets” has the meaning given by section 88(4).

The wording is based on the s.87 rules for dual-resident trusts.<sup>32</sup>

#### 58.16.5 *Settlor gains*

Para 6(1) sch 4C TCGA provides:

For the purposes of this Schedule the chargeable amount in relation to a [sch4B] transfer of value shall be reduced by the amount of any chargeable gains arising by virtue of that transfer of value that—

- (a) are by virtue of section 86(4) treated as accruing to the settlor,

The wording is based on the s.87 rules.<sup>33</sup>

Para 6(1)(b) deals with a temporary non-resident settlor:

or

- (b) where section 1M applies, are treated by virtue of that section (as it has effect subject to paragraph 12 below) as accruing to the settlor in the period of return.

For the s.87 equivalent rules, see 58.23.1 (Trust within s.86 TCGA).

#### 58.16.6 *Loss set against s.86 gain*

Para 6(2) sch 4C TCGA provides:

In determining for the purposes of sub-paragraph (1)(a) the amount of chargeable gains arising by virtue of a [sch4B] transfer of value that are treated as accruing to the settlor, there shall be disregarded any losses which arise otherwise than by virtue of Schedule 4B.

This applies where a trust within s.86 has losses and then realises gains on a sch4B-disposal. The losses are set against the gains, so net gains are treated as accruing to the settlor. This provision is needed to ensure that those gains are not added to the sch4C pool.

#### 58.16.7 *Loss on Sch4B-disposal*

---

<sup>32</sup> See 57.38 (Dual resident trust: s.88 TCGA).

<sup>33</sup> See 57.6 (Section 1(3) amount).

Para 7 sch 4C TCGA provides:

(1) An allowable loss arising under Schedule 4B in relation to a [Sch4B] transfer of value by the trustees of a settlement may be taken into account in accordance with this paragraph to reduce for the purposes of this Schedule the chargeable amount in relation to another transfer of value by those trustees.

(2) Any such allowable loss goes first to reduce chargeable amounts arising from other transfers of value made in the same year of assessment.

If there is more than one chargeable amount and the aggregate amount of the allowable losses is less than the aggregate of the chargeable amounts, each of the chargeable amounts is reduced proportionately.

(3) If in any year of assessment the aggregate amount of the allowable losses exceeds the aggregate of the chargeable amounts, the excess shall be carried forward to the next year of assessment and treated for the purposes of this paragraph as if it were an allowable loss arising in relation to a [Sch4B] transfer of value made in that year.

(4) Any reduction of a chargeable amount under this paragraph is made after any deduction under paragraph 6.

### **58.17 Restriction on losses**

It is necessary to distinguish between losses accruing on a sch4B-disposal and other losses accruing to trustees.

Section 85A(3) TCGA provides:

When calculating the section 1(3) amount for a settlement for a tax year (within the meaning of section 87), no account is to be taken of any chargeable gains or allowable losses accruing by virtue of Schedule 4B....

Thus losses on a sch4B-disposal cannot be set against gains in computing the s.1(3) amount for s.87 purposes.

Section 85A(4) TCGA provides:

No account shall be taken of any chargeable gains or allowable losses to which sections 87 to 89 apply in computing the gains or losses accruing by virtue of Schedule 4B.

Thus losses on a non-Sch4B-disposal cannot be set against gains accruing on a sch4B-disposal, in computing the sch4C pool.

I cannot see the reason for these rules, but complication was not of concern to the drafter of sch4C, who seems to have regarded loss relief with suspicion.

## **58.18 Second Sch4B-disposal**

Para 7B sch 4C TCGA provides:

- (1) This paragraph applies if the trustees of the transferor settlement make a further transfer of value to which Schedule 4B applies in a tax year (“the year of the transfer”) after the tax year mentioned in paragraph 1(3).<sup>34</sup>
- (2) If the settlement has a Schedule 4C pool at the beginning of the year of the transfer—
  - (a) the section 1(3) amounts in the Schedule 4C pool are increased by the section 1(3) amounts for the settlement that are outstanding at the end of the year of the transfer, and
  - (b) the section 1(3) amount in the pool for the year of transfer is increased (or further increased) by the amount of Schedule 4B trust gains accruing by virtue of the further transfer.
- (3) If the settlement does not have a Schedule 4C pool at the beginning of the year of the transfer, this Schedule applies in relation to the further transfer as it applied in relation to the original [Sch 4B-]transfer.
- (4) For the purposes of this paragraph a settlement has a Schedule 4C pool until the end of the tax year in which all section 1(3) amounts in the pool have been reduced to nil.

For a transitional rule for pre-2008 sch4C pools, see 58.31 (Pre-2008 sch 4C pool).

## **58.19 Sch4C s.87 regime**

### *58.19.1 Standard s.87 regime excluded*

Section 85A(2A) TCGA provides:

For the purposes of sections 87 to 89, no account is to be taken of any section 1(3) amount in a Schedule 4C pool (see paragraph 1 of Schedule 4C).

---

34 “The tax year mentioned in para 1(3)” (sch 4C TCGA) is the tax year in which the original sch 4B-transfer is made; see 58.15 (Schedule 4C pool).

I refer to the s.1(3) amounts in a sch 4C pool as “**Sch4C pool gains**”. This provision takes sch4C pool gains out of the standard s.87 regime. Instead they fall within what I call the “**Sch4C s.87 regime**”.

Trustees therefore need to keep two sets of computations:

- (1) s.1(3) amounts (trust gains) for the standard s.87 regime
- (2) Sch4C pool gains

### 58.19.2 *Schedule 4C s.87 charge*

This is best understood if set side by side with the usual s.87 rule and highlighting the changes:

#### **Para 8(1) sch 4C TCGA**

Chargeable gains are treated as accruing in a tax year (“the relevant tax year”) to a beneficiary who has received<sup>35</sup> a capital payment from the trustees of a relevant settlement in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 1(3) amount in the Schedule 4C pool for the relevant tax year or any earlier tax year.

#### **s.87(2) TCGA**

Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 1(3) amount for the relevant tax year or any earlier tax year.

Para 8(2) sch 4C TCGA provides:

The amount of chargeable gains treated as accruing is equal to—

- (a) the amount of the capital payment, or
- (b) if only part of the payment is matched, the amount of that part.

This is the sch 4C equivalent of s.87(3) TCGA.

---

35 Para 8(6) sch 4C TCGA provides: “Sections 87G(2), 87K(2) and 87L(2) (capital payment treated for purposes of sections 87 and 87A as received by someone other than actual recipient) apply also for the purposes of this paragraph, but this is subject to paragraph 9.” This incorporates the close-family rules: see 57.29.3 (s.87 settor-attribution rule); 57.33 (s.87 onward-gift rule); 57.34 (Onward-gift to close-family: s.87 settlor-attribution rule).

58.19.3 *Sch4C matching rules*

Para 8(3) sch 4C TCGA provides:

Section 87A [matching rules] applies for a tax year for the purposes of matching capital payments received from the trustees of a relevant settlement with section 1(3) amounts in the Schedule 4C pool as if—

- (a) references to section 1(3) amounts were to section 1(3) amounts in the Schedule 4C pool,
- (b) references to a capital payment received from the trustees by a beneficiary were to a capital payment received from the trustees of a relevant settlement by a beneficiary who is chargeable to tax for that year, and
- (c) for section 87A(3)(b) there were substituted—  
 “(b) all section 1(3) amounts in the Schedule 4C pool have been reduced to nil.”

Amended as para 8(3) directs, s.87A TCGA provides:

(1) This section supplements s.87.

(2) The following steps are to be taken for the purposes of matching capital payments with s.1(3) amounts in the Schedule 4C pool.

*Step 1*

Find the s.1(3) amount in the Schedule 4C pool for the relevant tax year.

*Step 2*

Find the total amount of capital payments received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year.

*Step 3*

The s.1(3) amount in the Schedule 4C pool for the relevant tax year is matched with—

- (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.1(3) amount in the Schedule 4C pool for the relevant tax year, each capital payment so received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement, and
- (b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.1(3) amount in the Schedule 4C pool for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

*Step 4*

[1] If para (a) of Step 3 applies—

- (a) reduce the s.1(3) amount in the Schedule 4C pool for the relevant tax year by the total amount of capital payments referred to there, and

- (b) reduce the amount of those capital payments to nil.
- [2] If para (b) of that Step applies—
  - (a) reduce the s.1(3) amount in the Schedule 4C pool for the relevant tax year to nil, and
  - (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

*Step 5*

- [1] Start again at Step 1 (unless subs.(3) applies).
- [2] If the s.1(3) amount in the Schedule 4C pool for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
  - (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
  - (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.
- (3) This subsection applies if—
  - (a) all of the capital payments received by beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year or any earlier tax year have been reduced to nil, or
  - (b) all section 1(3) amounts in the Schedule 4C pool have been reduced to nil. the section 1(3) amounts for the relevant tax year and all earlier tax years have been reduced to nil.
- (4) The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

Para 1A(3) sch 4C TCGA defines “chargeable to tax”:

For the purposes of this Schedule a beneficiary is “chargeable to tax” for a tax year if, as respects that year, the beneficiary is UK resident for the tax year (as determined in accordance with Chapter 1 of Part 1 of this Act).

Para 8(3)(b) is wider than the non-resident disregard in s.87D TCGA which applies to the standard s.87 regime, as there is no exemption for the final tax year, and it applies in tax years before s.87D took effect.

58.19.4 *Sch 4C/standard s.87: Priority*

Para 8(4) sch 4C provides:

Section 87A applies for a tax year by virtue of this paragraph before it applies for that year otherwise than by virtue of this paragraph; but this is subject to sub-paragraph (5).

Thus the sch4C regime has priority over the standard s.87 regime where a trust has:

- (1) a sch4C pool of gains within sch 4C, and
- (2) standard s.1(3) amounts (trust gains) within s.87

#### 58.19.5 *Sch 4C/standard s.87 OIG: Priority*

Para 8(5) sch 4C provides:

If section 87A applies for a tax year by virtue of section 762(3) of the Taxes Act<sup>36</sup> (offshore income gains), it applies for that year by virtue of that provision before it applies for that year by virtue of this paragraph.

Thus the standard OIG s. 87 regime has priority over the sch4C regime where a trust has:

- (1) a sch4C pool of gains within sch 4C, and
- (2) OIG amounts within OIG s.87.

### 58.20 “Relevant settlement”

“Relevant settlement” matters because a capital payment from any relevant settlement is matched to the sch 4C pool.

Para 8A(1) sch 4C TCGA provides:

This paragraph specifies what settlements are relevant settlements in relation to a Schedule 4C pool.

#### 58.20.1 *Transferor/transferee settlements*

Para 8A(2) sch 4C TCGA provides:

The transferor and transferee settlements in relation to the original [Sch 4B-]transfer of value are relevant settlements.

Para 14(2) sch 4C TCGA defines “transferor” and “transferee settlement”:

In this Schedule, in relation to a [Sch4B] transfer of value—

- (a) references to the transferor settlement are to the settlement the trustees of which made the [sch4B] transfer of value; and

---

36 The reference to ICTA is obsolete. However the legislation still works, because the continuity of law provisions in (for example) para 5 sch 2 CTA 2010 require old references to take effect as references to the rewritten provisions.

- (b) references to a transferee settlement are to any settlement of which the settled property includes property representing, directly or indirectly, the proceeds of the [sch4B] transfer of value.

### 58.20.2 *Subsequent transfer*

Para 8A sch 4C TCGA provides:

(3) If the trustees of any settlement that is a relevant settlement in relation to a Schedule 4C pool—

- (a) make a transfer of value to which Schedule 4B applies, or
  - (b) make a transfer of settled property to which section 90 applies,
- any settlement that is a transferee settlement in relation to that transfer is also a relevant settlement in relation to that pool.

(4) If the trustees of a settlement that is a relevant settlement in relation to a Schedule 4C pool make a transfer of value to which Schedule 4B applies, any other settlement that is a relevant settlement in relation to that pool is also a relevant settlement in relation to the Schedule 4C pool arising from the further transfer.

## 58.21 **Capital payment disregards**

Para 9(1) sch 4C TCGA provides:

For the purposes of

[i] paragraph 8 [sch 4C s.87 charge]

[ii] (and section 87A as it applies for the purposes of that paragraph), no account is to be taken of a capital payment to which any of sub-paragraphs (2) to (4) applies (or a part of a capital payment to which sub-paragraph (4) applies).

There are three disregards:

### **Para Disregard**

- 9(2) Capital payment made before a sch4B-transfer
- 9(3) Capital payment from UK resident trust
- 9(4) Capital payment to non-resident close company

### 58.21.1 *Payment pre-4B-transfer*

Para 9(2) sch 4C TCGA provides:

This sub-paragraph applies to a capital payment received before the tax year preceding the tax year in which the original [Sch 4B-]transfer is

made.

That is relatively straightforward.

For a transitional rule for pre-2008 sch4C pools, see 58.31 (Pre-2008 sch 4C pool).

### 58.21.2 *Payment from UK resident trust*

Para 9(3) sch 4C TCGA provides:

This sub-paragraph applies to a capital payment that—

- (a) is received by a beneficiary of a settlement from the trustees in a tax year during the whole of which the trustees—
  - (i) are resident in the UK, and
  - (ii) are not Treaty non-resident,
- (b) was made before any transfer of value to which Schedule 4B applies was made, and
- (c) was not made in anticipation of the making of any such [Sch4B] transfer of value or of chargeable gains accruing under that Schedule.

This must be a rare case.

### 58.21.3 *Payment to non-resident co*

Para 9(4) sch 4C TCGA provides:

This sub-paragraph applies to a capital payment if (and to the extent that) it is received (or treated as received) in a tax year from the trustees by a company that—

- (a) is not resident in the UK in that year, and
- (b) would be a close company if it were resident in the UK, (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

This is the sch4C equivalent of s.87C TCGA.<sup>37</sup>

## 58.22 **Remittance basis**

Para 8AA sch 4C TCGA provides:

Section 87B (remittance basis) applies in relation to chargeable gains

---

<sup>37</sup> See 57.11.4 (Disregard of payment to co: s.87C).

treated under paragraph 8 as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

This incorporates the s.87 remittance basis.<sup>38</sup>

## **58.23 Temporary non-resident**

### *58.23.1 Trust within s.86 TCGA*

Para 12 sch 4C TCGA provides:

- (1) This paragraph applies if—
  - (a) by virtue of section 1M,<sup>39</sup> an amount of chargeable gains within section 86(1)(e) that accrued in a tax year (“year A”) to the trustees of a settlement would be treated as accruing to a person (“the settlor”) in the period of return, and
  - (b) after paragraph 8 has applied for the year of return, the section 1(3) amount for year A that is in the Schedule 4C pool for the settlement is less than the amount mentioned in paragraph (a).
- (2) The amount of chargeable gains treated as mentioned in sub-paragraph (1)(a) as accruing to the settlor in the period of return is limited to the section 1(3) amount referred to in sub-paragraph (1)(b).
- (4) Where the property comprised in the transferor settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment taken into account for the purposes of paragraph 8 above as, on a just and reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account in computing the amount charged to beneficiaries.
- (5) Expressions used in this paragraph and section 1M have the same meanings in this paragraph as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in sub-paragraph (4) above to property originating from the settlor as it applies for the purposes of that Schedule.

### *58.23.2 Trust within s.87*

Para 12A sch 4C TCGA provides:

- (1) This paragraph applies where by virtue of section 1M<sup>40</sup> an amount of

---

38 See 57.19 (s.87 remittance basis).

39 See 10.7 (TNR gain/loss).

40 See 10.7 (TNR gains/loss).

gains would (apart from this Schedule) be treated under section 87 as accruing to a person (“the beneficiary”) in the period of return by virtue of a capital payment made to him in the temporary period of non-residence.

(2) Where this paragraph applies, a capital payment equal to so much of that capital payment as exceeds the amount otherwise charged shall be deemed for the purposes of this Schedule to be made to the beneficiary in the year of return.

(3) The “amount otherwise charged” means the total of any chargeable gains attributed to the beneficiary under section 87(2) or 89(2) by virtue of the capital payment.

(4) For the purposes of paragraph 13(5)(b) a deemed capital payment under this paragraph shall be treated as made when the actual capital payment mentioned in sub-paragraph (1) above was made.

(5) Expressions used in this paragraph and section 1M have the same meanings in this paragraph as in that section.

## **58.24 Interest surcharge**

Para 13 sch 4C TCGA provides:

(1) This paragraph applies if—

(a) chargeable gains are treated under paragraph 8 as accruing to a beneficiary by virtue of the matching (under section 87A) of all or part of a capital payment with the section 1(3) amount for a tax year (“the relevant tax year”), and

(b) the beneficiary is charged to tax by virtue of the matching.

(1A) Where part of a capital payment is matched, references in sub-paragraphs (2) and (3) to the capital payment are to the part matched.

(2) The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under sub-paragraph (3) below, except that it shall not be increased beyond the amount of the payment; and an assessment may charge tax accordingly.

(3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this paragraph) carried interest for the chargeable period at the specified rate.

The “specified rate” means the rate for the time being specified in section 91(3).

(4) The chargeable period is the period which—

(a) begins with the later of the 2 days specified in sub-paragraph (5)

- below, and
  - (b) ends with 30th November in the year of assessment following that in which the capital payment is made.
- (5) The 2 days are—
- (a) 1st December in the tax year immediately after the relevant tax year, and
  - (b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

This is the sch4C equivalent of the s.87 interest surcharge: see 57.17 (Interest surcharge).

### **58.25 Residence of trustees**

Para 10(1) sch 4C TCGA provides:

Subject to paragraph 9(3), it is immaterial for the purposes of paragraph 8 that the trustees of any relevant settlement are or have at any time been resident in the UK.

Why is this needed?

### **58.26 Trust ends after Sch4B-disposal**

Para 13A sch 4C TCGA provides:

Where a settlement ceases to exist after the trustees have made a transfer of value to which Schedule 4B applies, this Schedule has effect as if a year of assessment had ended immediately before the settlement ceased to exist.

Why is this needed?

### **58.27 OIG sch 4C**

Regulation 20(3) OFTR incorporates sch 4C TCGA rules. So far as relevant, this provides:

- ... Schedule 4C to, TCGA 1992 apply in relation to OIG amounts as if—
- (a) references to section 1(3) amounts (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
  - (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,

- (c) references to anything accruing were to it arising<sup>41</sup> (and similar references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),
- (d) ... paragraphs 1(3A), 3 to 7 and 12 of Schedule 4C were omitted  
...

For the application of s.87-98 TCGA to OIGs, see 64.13 (OIG .87 TCGA charge).

It is necessary to distinguish the CGT sch 4C rules and the OIG sch 4C rules because the rules are not identical. It might be helpful to use the following terminology:

- (1) “**CGT sch 4C**”, the provisions of sch 4C TCGA.
- (2) “**OIG sch 4C**”, the provisions of sch4C as amended, which apply when the trust has “**OIG amounts**”.

The omission of para 1(3A) and paras 3-7 sch 4C makes sense as sch 4B does not apply to OIGs. It would have been logical to omit para 7B; instead the drafter neutralises it by not amending references to it.

The omission of para 12 sch 4C makes sense, as s.86 TCGA does not apply to OIGs.

## 58.28 Definitions

There are different sets of definitions for sch 4B and sch 4C.

### 58.28.1 “Settlement” and “trustee”

“Settlement” in sch 4C means settlement-arrangement (and “trustee” has a similarly extended meaning).<sup>42</sup> Whereas “settlement” in sch 4B has the standard CGT/IT definition. This reflects the difference between s.87 and s.86.<sup>43</sup> But sch 4C only applies if the trustees make a sch4B-disposal,<sup>44</sup> so sch 4C can only apply where there is a settlement within the standard CGT/IT meaning.

### 58.28.2 Misc sch 4C definitions

---

41 The terminology of the Taxes Acts is that CGT chargeable gains *accrue*; but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating sch 4C for OIGs; but it does no harm.

42 See 57.2 (“Settlement”/“settled property”).

43 See 56.4.1 (“Settlement” and “settlor”).

44 See 58.14 (Schedule 4C: Introduction).

Para 14(1) sch 4C TCGA provides:

In this Schedule—

- (a) “transfer of value” has the same meaning as in Schedule 4B; and
- (b) references to the time at which a transfer of value was made are to the time which is the material time for the purposes of that Schedule.

### 58.28.3 “Beneficiaries”

Para 14 sch 4C TCGA provides:

(3) References in this Schedule to beneficiaries of a settlement include—

- (a) persons who have ceased to be beneficiaries by the time the chargeable gains accrue, and
- (b) persons who were beneficiaries of the settlement before it ceased to exist,

but who were beneficiaries of the settlement at a time in a previous year of assessment when a capital payment was made to them.

## 58.29 Schedule 4B/4C: Examples

Suppose:

- (1) The settlor lends to a trust.
- (2) The trust repays the loan.

The trust does not make a sch4B-transfer, so it does not make a sch4B-disposal, and sch 4C does not apply.

Suppose:

- (1) The settlor lends to a trust (“trust 1”).
- (2) The settlor assigns the debt to another trust (“trust 2”).
- (3) Trust 1 repays the loan to trust 2.
- (4) Trust 2 makes a payment to the settlor or another beneficiary.

Trust 1 does not make a sch4B-transfer, so it does not make a sch4B-disposal.

Trust 2 does not borrow, so it also does not make a sch4B-disposal.

Suppose:

- (1) The settlor lends to a trust.
- (2) The trustees lend to an underlying company.

Schedule 4B and 4C apply.

Suppose:

(1) The settlor gives to a trust (“trust 1”).

(2) Trust 1 lends to trust 2.

(3) Trust 2 transfers an asset to the settlor.

Trust 1 does not borrow, so it does not make a sch4B-disposal.

Trust 2 does make a sch4B-disposal. But trust 1 is not a relevant settlement.

### 58.30 Transitional rules

Sch 4B and 4C were introduced in 2000 and revised in 2003 and 2008. I refer to the sch 4B/4C regime in the form they took before 2008 as the “**pre-2008 sch 4B/4C regimes**”. There are about a dozen transitional rules. Two of these are considered elsewhere:

57.42 (computing s.1(3) amount at 6/4/2007)

57.45 (Pre-2008 inter-trust transfer)

#### 58.30.1 *Pre-2008 Sch4B-disposal*

Para 147 sch 7 FA 2008 provides:

The amendments made by paragraphs 128 to 146 have effect in relation to transfers of value to which Schedule 4B to TCGA 1992 applies that are made on or after 6 April 2008.

Pre-2008 transfers of value are governed by the pre-2008 sch4B rules.

#### 58.30.2 *Pre-21 Mar 2000 capital payment*

Para 148 sch 7 FA 2008 provides:

For the purposes of

[i] paragraph 8 of Schedule 4C to TCGA 1992 [sch 4C s.87 charge]<sup>45</sup>

[ii] (and section 87A of that Act [matching rules] as it applies for the purposes of that paragraph),

no account is to be taken of any capital payment received before 21 March 2000.

#### 58.30.3 *Pre-2008 payment to company*

Para 149 FA 2008 provides:

A capital payment received before 6 April 2008 is not within paragraph

---

45 See 58.19 (Sch4C s.87 regime).

9(4) of Schedule 4C to TCGA 1992 (if it otherwise would be).

This concerns a capital payment to a non-resident close company: see 58.21.3 (Payment to non-resident co).

#### 58.30.4 *Pre-2008 cap. payment/trust gain matched post 2008*

Para 150 sch 7 FA 2008 provides:

Paragraph 124 applies in relation to chargeable gains treated under paragraph 8 of Schedule 4C to TCGA 1992 as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

In other words, para 124 applies for the sch 4C s.87 charge as it applies for the standard s.87 charge. See 57.44 (Pre-2008 capital payment/trust gain, matched post 2008). So there is no charge on non-UK domiciled beneficiaries who:

- (1) receive pre-2008 capital payments that are matched to a sch4C pool after 6 April 2008; or
- (2) receive post-2008 capital payments that are matched to a pre-2008 sch4C pool.

#### 58.30.5 *Payment 12 Mar-5 Apr 2008*

Para 151 sch 7 FA 2008 provides:

- (1) This paragraph applies for the tax year 2008–09 or any subsequent tax year (“the relevant tax year”) if—
  - (a) an individual who was resident or ordinarily resident, but not domiciled, in the UK in the tax year 2007–08 received a capital payment from the trustees of a settlement on or after 12 March 2008 but before 6 April 2008, and
  - (b) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.
- (2) For the purposes of
  - [i] paragraph 8 of Schedule 4C to TCGA 1992 [sch 4C s.87 charge] as it applies for the relevant tax year
  - [ii] (and section 87A of that Act [matching rules] as it applies for those purposes),no account is to be taken of the capital payment.

This is the equivalent of para 125 sch 7 FA 2008: see 57.44.2 (Payment 12 Mar - 5 Apr 2008).

**58.31 Pre-2008 sch 4C pool**

Para 152 FA 2008 provides:

- [1] Schedule 4C to TCGA 1992 (as it has effect without the amendments made by paragraphs 128 to 146)
- [2] applies for the tax year 2008–09 and subsequent tax years in relation to Schedule 4C pools created before 6 April 2008 (“existing Schedule 4C pools”)
- [3] as if paragraphs 7B and 9(2) were omitted.

The pre FA 2008 sch 4C regime applies when matching post 5 April 2008 capital payments to gains in the pre 6 April 2008 schedule 4C TCGA pool.

The omitted paragraphs listed at [3] are provisions in the pre-2008 sch 4C replaced by provisions in the post-2008 sch 4C:

<b>Para</b>	<b>Topic</b>	<b>See now</b>
7B	Gains on 2 <sup>nd</sup> sch4C-disposal	58.18 (2 <sup>nd</sup> sch4B-disposal)
9(2)	When capital payment is available	58.31.2 (Matched capital payment)

**58.31.1 Pre-2008 sch 4C regime**

An important feature of the pre-2008 sch4C regime was that capital payments to UK resident non-doms did not reduce the sch4C pool. That rule changed in 2008 for post-2008 sch4C pools. From 2003-2008, para 8 sch 4C provided:

*(1) The gains in a settlement’s Schedule 4C pool at the end of any year of assessment are treated as chargeable gains accruing in that year to beneficiaries who receive in that year, or have received in an earlier year, capital payments from the trustees of any settlement that is a relevant settlement in relation to the pool.*

*Paragraph 8A defines “relevant settlement” for this purpose.*

*(2) The attribution of chargeable gains to beneficiaries under this paragraph shall be made in proportion to, but shall not exceed, the amounts of the capital payments made to them.*

*Paragraphs 8B and 8C provide for the matching of gains with available capital payments.*

*(3) A chargeable gain shall not be treated as accruing to a beneficiary under this Schedule unless he is chargeable to tax for that year of assessment.*

*(4) For the purposes of this Schedule a beneficiary is “chargeable to*

tax” for a year of assessment if, and only if—

- (a) he is resident in the United Kingdom for any part of that year or is ordinarily resident in the United Kingdom for that year, and
- (b) he is domiciled in the United Kingdom for any part of that year.<sup>46</sup>

(5) Any gains in a settlement’s Schedule 4C pool that are not attributed to beneficiaries in a year of assessment are carried forward to the following year of assessment, when this paragraph applies again.

The former para 8B sch 4C TCGA provided:

(1) The following rules apply as regards the attribution of the gains in a settlement’s Schedule 4C pool to beneficiaries of relevant settlements. This paragraph has effect subject to paragraph 8C (order of attribution as between gains in Schedule 4C pool and other trust gains).

(2) Gains of earlier years are attributed to beneficiaries before gains of later years.

(3) For the purposes of this Schedule the year of a gain is determined as follows—

- (a) a Schedule 4B trust gain is a gain of the year of assessment in which the transfer of value in question takes place;
- (b) a section 87/89 gain is a gain of the year of assessment in which it first forms part of a settlement’s trust gains in accordance with section 87(2).

(4) Gains of the same year are matched with available capital payments made at any time by trustees of any relevant settlement.

(5) If gains of one year are wholly matched, gains of the next year are then matched, and so on.

(6) The gains are attributed to beneficiaries in proportion to, but not so as to exceed, the amount of available capital payments received by them.

The former para 8C sch 4C TCGA dealt with the priority of the pre-2008 sch 4C charge and the standard s.87 charge:

(1) Where in a year of assessment—

- (a) gains in a settlement’s Schedule 4C pool fall to be attributed to

---

46 A non-domiciled beneficiary was not within the scope of the s.87 or sch4C charge before 2008.

- beneficiaries of relevant settlements, and*
- (b) *one or more of those settlements also have gains that fall to be attributed to beneficiaries under section 87(4) or 89(2), the provisions of paragraph 8B have effect as follows.*
- (2) *The rules in that paragraph apply in relation to all the gains falling to be so attributed.*
- (3) *As between gains of the same year, Schedule 4C gains are attributed to beneficiaries before other gains.*

Thus sch 4C has priority over the standard s.87 charge.

### 58.31.2 *Matched capital payment*

Para 153 sch 7 FA 2008 provides:

Any reduction in the amount of a capital payment has effect for the purposes of Schedule 4C to TCGA 1992 as it applies in relation to existing Schedule 4C pools (as well as for other purposes).

“Existing sch 4C pool” means a pre-2008 sch4C pool.<sup>47</sup>

Para 154 sch 7 FA 2008 provides:

- (1) If all of a capital payment ceases (in the tax year 2008–09 or any subsequent tax year) to be available, the amount of the capital payment is reduced to nil.
- (2) If part of a capital payment ceases (in the tax year 2008–09 or any subsequent tax year) to be available, the amount of the capital payment is reduced by the amount of that part.
- (3) A capital payment “ceases to be available” in a tax year if and to the extent that, by reason of the capital payment, chargeable gains are treated under paragraph 8 of Schedule 4C to TCGA 1992 (as it has effect in relation to existing Schedule 4C pools) as accruing in that year to the recipient.
- (4) If—
  - (a) chargeable gains are treated under paragraph 8 of Schedule 4C to TCGA 1992 (as it has effect in relation to existing Schedule 4C pools) as accruing in a tax year,
  - (b) more than one capital payment that the beneficiary has received is taken into account for the purposes of determining the amount of chargeable gains treated as accruing to the

---

<sup>47</sup> See 58.31 (Pre-2008 sch 4C pool).

- beneficiary, and
- (c) the amount of the chargeable gains is less than the total amount of capital payments taken into account, sub-paragraph (3) applies in relation to earlier capital payments before later ones.

58.31.3 *Pre/post-2008 sch 4C regimes: priority*

Para 155 sch 7 FA 2008 provides:

In any tax year—

- (a) Schedule 4C to TCGA 1992 (as amended by paragraphs 128 to 146) applies in relation to a settlement before that Schedule (as it has effect without those amendments) applies in relation to the settlement, and
- (b) that Schedule (as it has effect without those amendments) applies in relation to the settlement before section 87 or 89(2) of that Act applies in relation to the settlement.

Thus the post-2008 sch4C regime has priority over the pre-2008 sch 4C regime where a trust has:

- (1) a pre-2008 sch4C pool, and  
(2) a post -2008 sch4C pool

58.31.4 *HMRC example: post 2008 sch4C pool*

Example 30 HMRC s.87 guidance illustrates:

- (1) The disregard for a capital payment to a non-resident beneficiary  
(2) Transitional relief for pre-2008 gains matched to a post-2008 capital payment

**Example 30<sup>48</sup>**

**New last in first out (LIFO) rules for allocating capital payments against gains in post 5 April 2008 Schedule 4C pools.**

**Application of remittance basis to gains treated as accruing to beneficiaries who are non-UK domiciled remittance basis users.**

A Schedule 4C TCGA pool of gains was created in 2008-09 as a result of a transfer of value linked with trustee borrowing. The transfer was between two non-UK resident settlements. The Schedule 4C TCGA pool consists of the following gains:

2004-05 Trustees' gains (section 2(2) amount) £20,000

---

48 I altered the layout slightly for added clarity.

2005-06	Trustees' gains (section 2(2) amount)	£30,000
2008-09	Trustees' gains (section 2(2) amount) on transfer	<u>£35,000</u>
	Total schedule 4C pool	<u>£85,000</u>

No capital payments have been made out of either settlement prior to 2009-10. The following capital payments are made subsequently out of the transferee settlement:

2009-10	Payment to non-UK resident and non-UK domiciled beneficiary <sup>49</sup>	£90,000
2010-11	Payment to UK resident but non-UK domiciled beneficiary	£21,000
2010-11	Payment to UK resident and domiciled beneficiary	£42,000

The HMRC analysis is as follows.

*2009/10 [Payment to non-resident]*

The 2009-10 £90,000 capital payment to a non-UK resident and non-UK domiciled beneficiary is not matched with any of the gains (section 2(2) amounts) in the post 6 April 2008 Schedule 4C TCGA pool. This comes from the wording of the new paragraph 8(3)(b) Schedule 4C TCGA.<sup>50</sup>

The capital payment is still available to carry forward to be matched with future gains under section 87 or 89(2) TCGA.

*2010/11 [Payment to UK resident dom/non-dom]*

The 2010-11 capital payments total £63,000 (£21,000 + £42,000). As this is less than the £85,000 gains in the post 6 April 2008 Schedule 4C TCGA pool then all the capital payments can be matched. The restriction [in the pre-2008 sch 4C regime] that does not allow capital payments to a UK resident but non-UK domiciled beneficiary to be matched with gains in a pre 6 April 2008 Schedule 4C TCGA pool does not apply to a post 5 April 2008 Schedule 4C TCGA pool.

The new last in first out (LIFO) rules for matching capital payments with gains in the post 5 April 2008 Schedule 4C TCGA pool apply. These are applied by paragraph 138 Schedule 7 which introduces a new paragraph 8 Schedule 4C TCGA which applies the LIFO rules in section 87A TCGA.

So we look first at the latest gain (section 2(2) amount) in the post 5 April 2008 Schedule 4C TCGA pool. That is the 2008-09 gain of £35,000. This is all matched with capital payments. Gains of £11,667 ( $£35,000 \times £21,000 / [£21,000 + £42,000]$ ) are attributed to the UK resident but non-UK domiciled beneficiary in 2010-11. Gains of £23,333 ( $£35,000 \times £42,000 / [£21,000 + £42,000]$ ) are attributed to the UK resident and domiciled beneficiary in 2010-11.

Next we look at the 2005-06 gain (section 2(2) amount) of £30,000. There are only capital payments left of £28,000 (£63,000 – £35,000) to match with this. Gains of £9,333 ( $£28,000 \times £21,000 / [£21,000 + £42,000]$ ) are attributed to the UK resident but non-UK domiciled beneficiary in 2010-11. Gains of £18,667 ( $£28,000 \times £42,000 / [£21,000 +$

49 Author's footnote: The domicile of the non-resident beneficiary is irrelevant.

50 See 58.19.3 (Sch4C matching rules).

£42,000]) are attributed to the UK resident and domiciled beneficiary in 2010-11.

What remains in the post 5 April 2008 Schedule 4C TCGA pool are

2004-05	Trustees' gains (section 2(2) amount)	£20,000
2005-06	Trustees' gains (section 2(2) amount)	£2,000

The UK resident and domiciled beneficiary has attributed to them gains of £42,000 (£23,333 + £18,667). These are all chargeable to tax on the beneficiary for 2010-11.

The UK resident but non-UK domiciled beneficiary has attributed to them gains of £21,000 (£11,667 + £9,333). £9,333 of these are not chargeable to tax because they result from a matching with trustees' gains (section 2(2) amount) of a year before 2008-09 – paragraph 150 Schedule 7.<sup>51</sup>

The remaining £11,667 are chargeable to tax on the beneficiary in 2010-11 subject to the remittance basis. Paragraph 139 Schedule 7 introduces a new paragraph 8AA Schedule 4C TCGA which applies the section 87B remittance basis rules.

### 58.32 HMRC example: pre-2008 Sch 4C pool

HMRC s.87 guidance provides:

123. Schedule 4C pools created before 6 April 2008 are dealt with differently from those created after 5 April 2008. In broad terms Schedule 4C pools created before 6 April 2008 continue to be dealt with under Schedule 4C as it applied before Schedule 7 changes – paragraph 152 of Schedule 7. See example 28. It is not possible for post 5 April 2008 trust gains to be added to a pre 6 April 2008 Schedule 4C pool.

124. There are ordering rules for matching capital payments made after 5 April 2008. They are matched in the following order under paragraph 155 of Schedule 7: See example 29.

- First against gains in a Schedule 4C pool created after 5 April 2008
- Second against gains in a Schedule 4C pool created before 6 April 2008
- Third against gains not in a Schedule 4C pool

125. Where capital payments are matched against gains in a Schedule 4C pool created before 6 April 2008 earlier gains continue to be matched with earlier capital payments. In other words FIFO (first in, first out) rules continue to apply rather than the general new LIFO (last in, first out) rules. This is relevant for calculating the “increase in tax” charge under paragraph 13 of Schedule 4C.

HMRC example 28 illustrates the treatment of a pre-2008 sch4C pool:

#### Example 28<sup>52</sup>

##### Pre 6 April 2008 Schedule 4C TCGA pool

##### Capital payments made post 5 April 2008 to UK domiciled and non-UK domiciled beneficiaries

51 See 58.30.4 (Pre-2008 cap. payment/trust gain matched post 2008).

52 I altered the layout slightly for added clarity.

A Schedule 4C TCGA pool of gains was created in 2006-07 as a result of a transfer of value linked with trustee borrowing. The transfer was between two non-UK resident settlements. The Schedule 4C TCGA pool consists of the following gains:

2004-05	Trustees' gains (section 2(2) amount)	£20,000
2005-06	Trustees' gains (section 2(2) amount)	£30,000
2006-07	Trustees' gains (section 2(2) amount) on transfer	<u>£70,000</u>
Total sch4C pool		<u>£120,000</u>

No capital payments have been made out of either settlement prior to 2008-09. The following capital payments are made subsequently out of the transferee settlement:

2008-09	Payment to non-UK domiciled beneficiary	£90,000
2009-10	Payment to UK resident and domiciled beneficiary	£60,000

The HMRC analysis is as follows.

Paragraph 152 Schedule 7 confirms that you apply the pre FA 2008 version of Schedule 4C TCGA when matching post 5 April 2008 capital payments to gains in the pre 6 April 2008 Schedule 4C TCGA pool.

*2008/09 [Payment to non-dom]*

The 2008-09 £90,000 capital payment to a non-UK domiciled beneficiary is not matched with any of the gains (section 2(2) amounts) in the pre 6 April 2008 Schedule 4C TCGA pool. This comes from the pre FA 2008 wording of paragraph 8(3) Schedule 4C TCGA.<sup>53</sup> The capital payment is still available to carry forward to be matched with future gains under section 87 or 89(2) TCGA or gains in a post 5 April 2008 Schedule 4C TCGA pool.<sup>54</sup>

*2009/10 [Payment to UK dom]*

The 2009-10 £60,000 capital payment to a UK resident and domiciled beneficiary is matched with £60,000 of the gains (section 2(2) amounts) in the pre 6 April 2008 Schedule 4C TCGA pool. This results in £60,000 gains being treated as accruing to the beneficiary in 2009-10. The capital payment is matched against gains (section 2(2) amounts) on a first in first out (FIFO) basis. This comes from the pre FA 2008 wording of paragraph 8B(2) Schedule 4C TCGA.<sup>55</sup> So for the purpose of the “increase in tax” charge under paragraph 13 Schedule 4C TCGA the £60,000 capital payment is matched against gains (section 2(2) amounts) in the following order:

- First against the 2004-05 £20,000 gains (section 2(2) amounts)
- Second against the 2005-06 £30,000 gains (section 2(2) amounts)
- Third the remaining £10,000 (£60,000 - [£20,000 + £30,000]) of the capital payment against £10,000 of the 2006-07 gains (section 2(2) amounts)

53 See 58.31.1 (Pre-2008 sch 4C regime).

54 Author's footnote: the capital payment is however not matched to the pre-2008 gains, so it is taxable on the non-dom beneficiary.

55 See 58.31.1 (Pre-2008 sch 4C regime).

This leaves £60,000 gains in the Schedule 4C TCGA pool which are all gains (section 2(2) amounts) from 2006-07.

HMRC example 29 concerns a trust with pre- and post-2008 sch4C pools:

**Example 29**

**Ordering rules for allocating capital payments between different Schedule 4C pools and gains dealt with under section 87 or 89(2)**

A pre 6 April 2008 Schedule 4C TCGA pool of gains was created in 2006-07 as a result of a transfer of value linked with trustee borrowing.

A post 5 April 2008 Schedule 4C TCGA pool of gains was created in 2008-09 as a result of a further transfer of value linked with trustee borrowing.

Paragraph 152 of Schedule 7 applies to keep the Schedule 4C TCGA pools separate. Both transfers were between the same two non-UK resident settlements. Additionally there are unmatched gains (section 2(2) amounts) in the transferee settlement. In summary the gains are:

2004-05	Trustees' gains (section 2(2) amount) in transferee settlement	£10,000
2006-07	Pre 6 April 2008 Schedule 4C pool - gains	£50,000
2008-09	Post 6 April 2008 Schedule 4C pool - gains	£30,000
2009-10	Trustees' gains (section 2(2) amount) in transferee settlement	£20,000

In 2010-11 a capital payment of £95,000 is made from the transferee settlement to a UK resident and domiciled beneficiary.

The HMRC analysis is as follows.

The rules in paragraph 155 Schedule 7<sup>56</sup> say that the capital payment is allocated against gains in the following order:

- First against the £30,000 gains in the post 5 April 2008 Schedule 4C TCGA pool
- Second against the £50,000 gains in the pre 6 April 2008 Schedule 4C TCGA pool
- Third the remaining £15,000 (£95,000 - [£30,000 + £50,000]) of the capital payment against £15,000 trustees' gains (section 2(2) amount) in the transferee settlement.

Next you go to the new section 87A TCGA matching rules to decide which trustees' gains these £15,000 capital payments are matched with. The last in first out (LIFO) rule there matches it all with £15,000 of the 2009-10 £20,000 trustees' gains (section 2(2) amount). This leaves unmatched trustees' gains (section 2(2) amount) of:

2004-05	Trustees' gains (section 2(2) amount) in transferee settlement	£10,000
2009-10	Trustees' gains (section 2(2) amount) in transferee settlement	£5,000

**58.33 Critique**

In accordance with government policy, there was no consultation or discussion on the enactment, or multiple amendments, of sch 4B /4C, but

---

56 See 58.31.3 (Priority of post-2008 sch 4C regime).

it is worth looking back now to assess them.

HMRC would regard sch 4B and 4C (in their current form) as successful, as they successfully stopped the schemes at which they are addressed.

Measured by any other criteria they are a failure. They are far too wide (applying to arrangements where there is no avoidance). They are so complicated and counterintuitive that one could not expect even conscientious trustees to comply, except some of the largest trusts with a large budget for UK professional advice. A full analysis - which would be several times the length of this long chapter - will never be written.

I expect that the drafter only expected HMRC, and taxpayers, to look at the rules in cases of “abuse”; an attitude HMRC have expressed in relation to other unworkable anti-avoidance legislation.<sup>57</sup> They are in practice generally ignored, by HMRC and by taxpayers. They remain like unexploded ammunition from a forgotten war: exceptionally careful taxpayers avoid it; others disregard it, generally with impunity as HMRC will rarely know and may not care. While never satisfactory, the problems were made much worse by the extension of the scope of the s.87 charge in 2008. In all these respects, of course, schedules 4B and 4C are not very different from other anti-avoidance legislation of their time.

If a serious attempt is ever made to rationalise the UK taxation of offshore trusts, something much better can be devised. The easiest course would be to restrict the rules with a focussed motive test, ie they only apply where there is a purpose specifically to avoid s.87 or s.86. The schemes at which they are aimed are complex and artificial ones where the avoidance intention is hardly to be denied. The 2013 amendments to (what is now) s.3 TCGA offer a precedent.<sup>58</sup>

The professional bodies raised a similar proposal, with a more ambitious ambit:

**Schedules 4B and 4C should be removed**

This should be accompanied by (panel approved) GAAR guidance saying that any arrangements designed along flip-flop lines would

---

57 The former substantial donor rules are an example, see Kessler & Marre, *Taxation of Charities and Nonprofit Organisations* (9<sup>th</sup> ed., 2013), para 3.15 (Can bona fide charities safely ignore the substantial donor rules?) online version <https://www.taxationofcharities.co.uk> (The rules are now repealed).

58 See 60.17 (s.3 motive defence).

be considered to be caught by the GAAR.<sup>59</sup>

One of the selling points of the GAAR was said to be that some anti-avoidance provisions would become unnecessary.<sup>60</sup> If this is not suitable then nothing is.

60 See 1.12.3 (Alternatives to Framework).

CHAPTER SIXTY NINE

**INVESTMENT MANAGEMENT FEES &  
CARRIED INTEREST**

69.1

**69.1 Investment management fees & carried interest**

The topics of this chapter are:

- (1) Disguised investment management fees (“**DIMF**”)<sup>1</sup>
- (2) Carried interest

The layout of the chapter is as follows:

- (1) Major definitions
- (2) DIMF code
- (3) Carried interest rules
- (4) Income-based carried interest

A full discussion requires a book to itself. I focus on matters closest to the themes of this book, but it is necessary to consider the provisions generally in order to see the issues in their context.

*69.1.1 Navigation*

The legislation is as follows:

<b>Chap</b>	<b>Part</b>	<b>Sections</b>	<b>Act</b>	<b>Topic</b>
5E	13	809EZA-809EZH	ITA	Disguised investment management fees
5F	13	809FZA-809FZZ	ITA	Definition of “Income-based carried interest”
5	3	103KA-103KH	TCGA	Carried interest: CGT

The definitions are mainly in Chapter 5E and incorporated by reference elsewhere. I add the references in footnotes.

---

1 HMRC use the abbreviation “DMF”.

The system of numbering sections is idiosyncratic. In the ITA, section numbering begins with 809, followed by the Chapter letter, ie one of 809E/809F. The sections are then numbered ZA, ZB, etc. Hence:

- the 1<sup>st</sup> section of Chapter 5E is s.809EZA and the last is s.809EZH
- the 1<sup>st</sup> section of Chapter 5F is s.809FZA and the last is s.809FZZ

Subsequent sections are slotted in, such as s.809EZDA and s.809EZDB.

In the TCGA, the sections begin 103K, and are numbered starting from A, so the first section is 103KA and the last is 103KH.

This is due to a misguided application of OPC drafting guidelines; see App.11.3 (Section numbering system).

## 69.2 DIMF: history and guidance

The legislation was introduced in 2015, amended in 2016 and 2017.

The development of the current rules can be traced through:

- HMRC Guidance “Investment managers: Capital Gains Tax treatment of carried interest (2015)”<sup>2</sup>
- HMRC Technical Note “Investment Managers: Disguised Fee Income” (2015)<sup>3</sup>
- Draft guidance informally circulated (2016) (“**DIMF draft guidance**”)<sup>4</sup>

The IF Manual provides:

### **IFM36120: Overview: Introduction** [Oct 2020]

#### **Introduction**

A high level explanation of the disguised investment management fees (DIMF) rules

The disguised investment management fees (DIMF) rules apply to certain sums paid to investment managers. The rules detail how in some circumstances these sums will be charged to income tax.

Many investment management businesses only charge a management fee for the services they provide. However, those who provide services to

2 <https://www.gov.uk/government/publications/investment-managers-capital-gains-tax-treatment-of-carried-interest-july-2015/investment-managers-capital-gains-tax-treatment-of-carried-interest-july-2015>

3 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/417049/Disguised\\_Investment\\_Management\\_Fees\\_Guidance.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/417049/Disguised_Investment_Management_Fees_Guidance.pdf)

4 Investment Managers: Disguised Fee Income, CGT Treatment of Carried Interest <https://www.bvca.co.uk/LinkClick.aspx?fileticket=n5CPCclpPFo%3d&portalid=0&timestamp=1524063247595>

private equity funds and other funds with alternative strategies typically negotiate:

- a ‘management fee’ based on funds (or assets) under management generally at a rate of 1.5-2%; and
- a share of the funds’ profits once the investments have grown by an agreed percentage (hurdle) which is commonly referred to as ‘carried interest’ (IFM36500).

In a typical model, management fees are due irrespective of how well an investment fund performs. They can be paid monthly, quarterly or annually. Carried interest is only paid when the fund performs to a pre-agreed standard. It is performance-related payment typically paid indirectly, through a special purpose vehicle to the individuals who provided investment management services to a fund. Meeting the ‘hurdle’ (or ‘preferred return’) typically means that those involved in managing the fund share 20% profits above a hurdle rate equivalent to an annualised rate of approximately 8%. These amounts vary depending on the agreement entered into with the investors.

Other funds that are not partnerships may agree to pay a performance fee in addition to a management fee. These sums should also be considered under the DIMF rules.

The tax treatment of an investment management fee is covered by the DIMF rules. The main aim of these rules is to ensure that management fees received for managing an investment scheme (and which are not calculated by reference to the performance of the underlying investments) are charged to income tax where they arise to individuals. This is because the amounts in question are in substance income paid in return for the provision of investment management services.

Broadly, the DIMF rules ensure that where sums arise from a fund to an individual providing investment management services, those sums are charged to income tax where they are not:

- carried interest; or
- a return of capital; or
- a return on sums invested

The tax treatment of the first management fee described above (generally 1.5-2% of funds under management), as detailed throughout this guidance applies to any fund which is an investment scheme (IFM36230) irrespective of its structure.

New rules for the tax treatment of carried interest took effect from 8 July 2015. Carried interest is subject to taxation under specific capital gains tax (CGT) rules which are covered in separate guidance, starting at IFM37100.

Carried interest is defined in ITA07/S809E2C, which is in Chapter 5E, and sums meeting this definition are excluded from DIMF rules unless the amounts are Income Based Carried Interest (IBCI). Income Based Carried Interest is explained in detail in separate guidance, starting at IFM38000. (reference currently not active - manual awaiting completion)

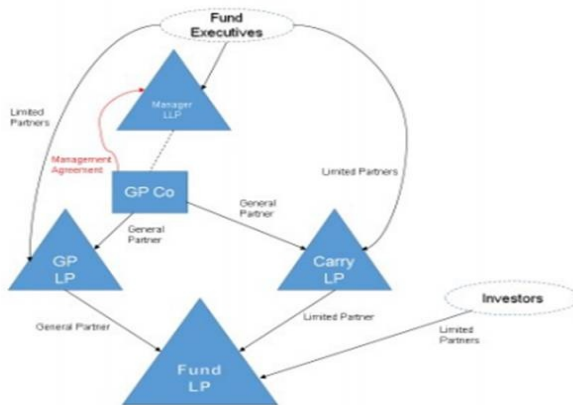

Prior to the introduction of the DIMF rules, carried interest was not defined in the Taxes Acts. However it was explained in a 2003 Memorandum of Understanding agreed between the British Venture Capital Association (BVCA) and the Inland Revenue (a predecessor department to HM Revenue & Customs) (IFM36540).

DIMF draft guidance provides:

**GP LP and GP LLP planning**

5. The effects of the measure are not limited to any one avoidance structure or category of asset manager. However the types of planning at which they were initially aimed are sometimes described as GP LP and GP LLP planning.

6. In both cases, the investments of the fund are held in a limited partnership (LP), the fund partnership. In GP LP planning, the general partner of this LP is itself a limited partnership (GP LP) (See Fig 1).

7. The annual fee<sup>5</sup> is paid as a priority profit share by the fund LP to the GP

---

5 Footnote original: The fee based on assets under management is referred to for convenience in this document as the annual fee, although in practice the fee may be paid at different intervals, for example quarterly or semi-annually. In most private equity funds the fee will strictly be calculated by reference to the sums committed by

LP.

Some of the fee may be paid on to a management company or limited liability partnership, i.e. the traditional structure. However the individual partners in the GP LP may allocate some of the annual fee to themselves without passing it via the management company. GP LLP planning (Fig 2) is broadly similar.

8. The effect of this planning is that annual fees for investment management are not being taxed in full. Since the annual fees are clearly a return for services provided, they should be charged to income tax. Chapter 5E has therefore been introduced to ensure that these fees are charged to income tax.

### 69.3 “Disguised fee”

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if-

A set of three conditions then follows which I call “**disguised-fee conditions (a) to (d)**”. In outline:

#### Para Requirement

- (a) Investment management services
- (c)<sup>6</sup> Management fee from investment scheme

---

investors to the fund, even before those sums have been drawn down.

<sup>6</sup> There is no para (b).

(d) Management fee untaxed

### 69.3.1 *Disguised-fee c<sup>n</sup> (a): IM services*

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if-

- (a) the individual at any time performs or is to perform investment management services directly or indirectly in respect of the scheme under any arrangements<sup>7</sup>

I refer to these arrangements as “**investment-services arrangements**”. The IF Manual provides:

**FM36310: Disguised fees: Condition 1 - Performs investment management services** [Oct 2020]

**Condition 1 - Performs investment management services**

**Timing of the services performed**

The investment management services do not necessarily have to be provided in the year in which the fee arose to meet this condition. Where an individual has performed investment management services in the past or will perform such services in the future this also meets the requirements of condition 1.

Example (Amelia)

A is a recently retired fund manager. She received a disguised fee for investment management services provided in the run up to her retirement. This fee was received in the year after which A retired and no longer provides investment management services.

Despite the investment management services relating to the fee being undertaken in a previous year, the fee is still received in relation to the performance of investment management services, and condition 1 would be met.

...

*In respect of an investment scheme – equity participation*

The scope of ITA07/S809EZA(3)(a) is intentionally wide but, if it can be demonstrated that shares or an interest in an asset manager firm have been granted solely to incentivise executives and the award is not in

---

<sup>7</sup> Section 809EZE ITA provides the standard (unnecessary) IT definition of “arrangements”; see App 2.2.3 (Definitions of “arrangement”). The definition is applied to CGT by s.103KH(1) TCGA.

relation to the performance of the fund, then the DIMF rules may not apply. If however, the award has been made as part of a wider remuneration scheme to avoid the application of the DIMF rules, then the amount may still be charged as income. All facts and circumstances must therefore be taken into consideration in order to evaluate whether the DIMF rules apply.

#### Example 1 (Frances)

An individual fund manager, F, works for a US headquartered group, whose shares are listed on the US stock exchange. F is a member of a UK LLP (controlled by a corporate member owned by the group) which acts as the UK sub-advisor in relation to some of the funds managed by the group. The UK LLP has appropriate commercial substance (staff, contracts and other assets) and receives an arm's length fee for the services it provides to other group companies. F receives a profit share from the LLP in line with market expectations and holds rights to receive carried interest in the funds she is involved with. Separately, F receives an award of shares in the listed US parent under a global share plan designed to incentivise and reward staff (including employees and members of LLPs) across the worldwide group in growing the business.

If F and the group are able to demonstrate that the share award in the listed US parent is not part of a wider scheme to deliver a disguised fee (IFM36300) to her, then neither the DIMF rules nor the carried interest rules (IFM37100) will apply to the holding of the shares or any resultant dividends received in respect of those shares.

#### Example 2 (Sam)

An individual fund manager, S, works for a UK based fund management group with full commercial substance in the UK (staff, contracts and other assets). S is one of four founders of the business and holds a 25% stake in the parent company of the group. S receives an arm's length remuneration (salary, bonus and other benefits) for his work, which is taxed as employment income, and has a carried interest in the funds operated by the group in line with industry standards. The shares S owns in the business carry an entitlement to a 25% share in the residual profits of the business. The group receives priority profit shares, management fees and a small amount of carried interest from the funds it operates as per the contractual arrangements with the investors.

The HMRC analysis is as follows:

Dividends paid to S in respect of his shareholding in the parent company do not constitute a disguised fee (IFM36300). Later, when S disposes of his shareholding, the disposal proceeds will not constitute a disguised fee. The DIMF rules may apply however if S's equity participation is part of a wider arrangement designed to deliver a disguised fee.

### 69.3.2 *Disguised-fee c<sup>n</sup> (c): from investment scheme*

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if ...

(c) under the arrangements, a management fee arises<sup>8</sup> to the individual from an investment scheme in the tax year (see section 809EZB)

Chapter 3 DIMF draft guidance (Examples) provides:

*Example 4 - [accountancy company]*

AB is a director and 50% shareholder in ABCD Limited, an accountancy firm.

Diagrammatically:

AB provides corporate finance advice on a potential acquisition by RS LP, an unconnected private equity fund. ABCD receives a fee for doing so and this increases ABCD's profits. ABCD's profits are subject to corporation tax. AB receives a dividend from ABCD. CD has not provided any services to RS LP and also receives a 50% dividend.

The HMRC analysis is as follows:

Corporate finance services fall within the “investment management services” definition.

The fee is included in the calculation of the profits of ABCD and not

---

<sup>8</sup> See 69.9 (Who receives DIMF) and 14.5.9 (Disguised investment management fees).

AB and so is “untaxed”.

However the dividend is not regarded as arising from the collective investment scheme, and so does not fall within the scope of [the DIMF] charge.

More analytically, the dividend does not meet disguised-fee condition (c).

### 69.3.3 *Disguised-fee c<sup>n</sup> (d): Untaxed*

Section 809EZA(3) ITA provides:

For the purposes of this Chapter a “disguised fee” arises to an individual in a tax year from an investment scheme if...

(d) some or all of the management fee is untaxed;  
and the amount of the disguised fee is so much of the management fee as is untaxed.

Section 809EZA(4) ITA provides an artificial definition of “untaxed”:

For the purposes of subsection (3) the management fee is “untaxed” if and to the extent that the fee would not (apart from this section)-

- (a) be charged to tax under ITEPA 2003 as employment income of the individual for any tax year, or
- (b) be brought into account in calculating the profits of a trade<sup>9</sup> of the individual for the purposes of income tax for any tax year.

In short, untaxed means not subject to income tax in the hands of the individual. A fee is “untaxed” even if it is subject to tax in the hands of the actual recipient (but not the individual).

DIMF draft guidance provides:

72. The effect of the definition is that sums arising to employees which are taxed as benefits or under the employment related securities legislation will not be untaxed for the purposes of Chapter 5E.

74. Section 809EZA(4) makes clear that the charge to tax as employment or trading income does not need to occur in the same year as the charge that would otherwise arise under Chapter 5E. This means that the charge under Chapter 5E could occur in a later or earlier tax year than the other tax liability. For example, an individual performing investment management services could be engaged as an employee and

---

<sup>9</sup> s.809EZA(5) ITA provides: “In subsection (4) “trade” includes profession or vocation.”

receive a deferred bonus which does not fall within the definition of carried interest. Under the statutory definition of arise which applies from 22 October 2015, this amount is likely to have arisen to the individual. When the amount is released from the deferral structure however, it will be charged to income tax and National Insurance contributions in full as employment income. It will not, therefore, be treated as “untaxed”. However, where an individual is or expects to be outside the charge to UK tax when the sum would otherwise be liable to income tax in respect of the sum, this treatment will not apply: section 809EZA requires that the sum is charged to tax as employment income under ITEPA 2003 or that it is brought into account when calculating the profits or a trade for the purposes of UK income tax.

The IF Manual provides:

**IFM36325: Disguised fees: Condition 3 - The sum arising must be untaxed** [Oct 2020]

**Condition 3 - The sum arising must be untaxed**

...Example 1 - accountancy partnership (Ali)

A is a partner in CD LLP, a large accountancy firm. A carries out due diligence on a potential acquisition by RS LP, an unconnected private equity fund. CD LLP received a fee from the fund for doing so and this increases CD LLP’s profits. A receives a share of those profits.

The HMRC analysis is as follows:

Due diligence falls within (b) of the “investment management services” definition found at ITA07/S809EZE(1).

The fee is included in the profits of CD LLP, ITA07/S809EZA(4)(b) advises that a sum will not be considered as ‘untaxed’ if it has been brought into account in calculating the profits of an individual and, as A has received a share of those profits, which will be chargeable to income tax, the sum will not be considered as ‘untaxed’ in her hands.

As the fee is not “untaxed” it is not a disguised investment management fee, because disguised-fee condition (d) is not met.

#### **69.4 “Management fee”**

This term is used in the definition of “disguised fee”: disguised-fee condition (d).

Section 809EZB(1) ITA provides:

Subject as follows, for the purposes of section 809EZA “management fee” means any sum (including a sum in the form of a loan or advance or an allocation of profits) except so far as the sum constitutes-

- (a) a repayment (in whole or part) of an investment made directly or indirectly by the individual in the scheme,
- (b) an arm’s length return on an investment made directly or indirectly by the individual in the scheme, or
- (c) carried interest which is not income-based carried interest (see sections 809EZC and 809EZD for carried interest, and Chapter 5F for income-based carried interest).

If a management fee is “any sum”, almost anything is a management fee. The price paid for this book is a management fee, as defined.<sup>10</sup> The concept is brought down to size by disguised-fee condition (d) which requires the “management fee” (sum) arises from an investment scheme, under the investment-management arrangements.

The significance of the definition of management fee is in paras (a)-(c): I refer to this as “**management-fee exclusions (a) to (c)**”:

<b>Exclusion</b>	<b>Topic</b>	<b>See para</b>
(a)	Scheme investment: Repayment	69.6.6
(b)	Scheme investment: Arm’s length return	69.4.1
(c)	Carried interest	69.5

#### 69.4.1 Management-fee exclusion (b): “Arm’s length return”

Section 809EZB(1) ITA provides that “management fee” means any sum

... except so far as the sum constitutes...

- (b) an arm’s length return on an investment made directly or indirectly by the individual in the scheme

Section 809EZB(2) ITA provides an artificial definition:

For the purposes of subsection (1)(b) a return on an investment is “an arm’s length return” if-

- (a) the return is on an investment which is of the same kind as investments in the scheme made by external investors,
- (b) the return on the investment is reasonably comparable to the

---

<sup>10</sup> Though if needed, one might argue that the label “disguised fee” itself imposes some implied restriction on the concept.

- return to external investors on those investments, and
- (c) the terms governing the return on the investment are reasonably comparable to the terms governing the return to external investors on those investments.

DIMF draft guidance provides:

88. For example, arrangements could be made for the managers' capital to receive an excessive return, and to pay the annual fee in that way. Please note this could be a purely commercial arrangement with external investors negotiated at arm's length. The test does not require an "arm's length return" to be paid in a subjective sense as would be tested, for example, under the transfer pricing rules. The term is a term of art for these purposes and subject to the comments below on "reasonably comparable", that return must be the same as the return paid to external investors. An agreement, for example, which gives the management team enhanced upside and enhanced downside exposure would take the return on that co-investment outside the exclusion even if this was agreed between the managers and unconnected investors at arm's length as part of their genuine commercial bargain.

89. If the return does not meet the arm's length test, then sums arising will be treated entirely as disguised fees, and subject to income tax.

90. It is accepted that the return to internal and external investors will not be identical. In particular, where a private equity fund manager invests in a fund on the same terms as external investors but is not liable to the management fee or carried interest in respect of that investment, HMRC accept that it will still meet the reasonably comparable tests above

#### 69.4.2 "*Reasonably comparable*"

This term is used in the definition of an arm's length return. It is not definable, but that does not deter the drafter. Section 809EZB(2A) ITA provides:

For the purposes of subsection (2)(b), the return on the investment is reasonably comparable to the return to external investors on the investments referred to in subsection (2)(a) if (and only if)-

- (a) the rate of return on the investment is reasonably comparable to the rate of return to external investors on those investments, and
- (b) any other factors relevant to determining the size of the return on the investment are reasonably comparable to the factors

determining the size of the return to external investors on those investments.

DIMF draft guidance provides:

91. The wording “reasonably comparable” is intended to allow for this sort of difference, i.e. where there are genuine commercial reasons for the difference and they do not materially affect, in substance, the return received by managers compared to that accruing to external investors. For example, the “fee and carry free” terms referred to above prevent capital provided by the fund management team “going in a circle” and returning to them in the form of management fee chargeable to tax as income.

92. While it is not set out as such in the legislation, HMRC would accept that where an individual invests capital in a scheme which has been lent to the individual on arm’s length terms, it can still meet the above requirements.

93. HMRC also accept that a management team may take out debt to fund their coinvestment commitment indirectly via another vehicle. For example, debt may be advanced by a bank to a company owned by, or partnership comprised of, the management team. This entity would then meet the co-investment commitment required from the management team with the third party debt subsequently being repaid, with an appropriate return, from the sums allocated in respect of that investment at fund level. Such a structure will not preclude the investment made by managers giving rise to a return which is within the exception provided that return is still, having regard to all the circumstances, reasonably comparable to the return received by external investors (i.e. the return is the same as it would have been if the managers had taken out the debt directly on arm’s length terms as described in paragraph 92).

94. However, where the investment has been made through a leveraged coinvestment vehicle which gives the fund manager(s) an effective deduction for the interest costs on any debt, this would not meet the above requirements. For example, this could involve a partnership with third party borrowing where the financing cost reduces profits on which the managers would otherwise be chargeable. The return from such a structure would no longer be comparable with the return to external investors.

95. Where a co-investment is awarded to an employee at a discount and that discount is fully charged to income tax and National Insurance contributions as employment income, then the return on that investment

(for the purposes of applying section 809EZH(2)) should be determined by reference to the amount brought into charge to tax plus any amounts actually paid by the individual. This would be the same where the co-investment is awarded to an employee in return for no monetary consideration.

96. For example, if an individual receives a co-investment interest of £100, but only pays £20, with the remaining £80 being funded from sums taxed as employment income of the individual, the co-investment treated as made by the individual when applying section 809EZH(2) and determining the return on that co-investment is one of £100. In the round this employee is in the same financial position as another employee who funded their co-investment of £100 out of taxed employment income. HMRC do not believe, in the absence of attempts to avoid or reduce an individual's total tax liability, section 809EZH(2) should be interpreted strictly so as to treat these two employees differently.

...

98. In some situations a fund manager will not make a personal contribution to the fund in question as their co-investment. Instead they will acquire their co-investment from another person. This could arise where a fund manager joins a pre-existing team, or where the entire team managing a fund changes (for example, because of poor performance or due a wider business take-over).

99. The repayment of, and return on, such a co-investment is capable of coming within the exclusions from the definition of disguised fee contained in section 809EZH(1)(a) and (b). In HMRC's view, having regard to the purpose of this legislation, the specific reference to an investment made directly or indirectly includes such acquired co-invest. In the context of investment schemes constituted as a limited company section 809EZH(3) makes specific reference to secondary acquisitions. This should not be read as restricting the meaning of section 809EZH(2) which applies more generally in determining what amounts to an investment in investment scheme. Section 809EZH does not include specific reference to the secondary acquisition of such an interest because it is aimed at partnership situations where the investment, in effect and very broadly, takes the form of a proportionate direct interest in the underlying assets for most direct tax purposes in the UK. It is therefore possible to "step into the shoes" of another in respect of a contribution to the property held by the scheme. The wording "whether by way of capital, loan *or otherwise*" (emphasis added) shows that section 809EZH(2) is not to be read in an overly narrow manner. Section

809EZE(3) puts beyond doubt in the situation where the investment scheme is constituted as a limited company (which will be beneficially owner of the underlying assets and where investors acquire shares in that company) the same treatment is available as regards acquired co-invest. It is designed to make sure that the same rules apply regardless of how a scheme is constituted, rather than applying specifically relaxed rules to corporate schemes over other types of investment vehicle.

100. However, while the repayment of and return on an acquired co-investment can fall within section 809EZB(1)(a) and (b), the analysis of whether the conditions for an arm's length return in sections 809EZB(2) and (2A) can be more difficult. In particular the value of drawn co-investment is likely to have moved since the original investment was drawn down from the person now selling their interest in the fund. If the fund has performed poorly, the co-investment may be worth less than the vendor originally contributed to the scheme. If the fund has performed well, however, the value may have increased. In both situations regard must be had to the strict formulation of sections 809EZB(2) and (2A) described in more detail above.

- a. Where the co-investment has declined in value, if the fund manager purchases the investment for an amount equal to its market value, the fund manager will then receive a return which exceeds that paid to external investors (whose return will, in effect, be calculated of the original amount contributed to the fund). In this case it is therefore necessary for the fund manager to pay at least the "par value" of the co-investment, even if this exceeds the market value.
- b. Where the fund has performed well and the co-investment has appreciated in value, if the fund manager acquires the co-investment for the amount originally contributed to the fund, it will receive a return which exceeds that flowing to external investors and which therefore falls outside section 809EZB(2) and (2A). For the entire return to fall within the exclusion, the fund manager will need to pay a price which equals the increase in value of the investment in the fund. Generally where the fund manager pays the unrestricted market value of the co-investment at the point of acquisition as part of a genuine commercial arrangement negotiated at arm's length, HMRC will accept that the return arising on that co-investment is capable of falling within sections 809EZB(2) and (2A) provided the return otherwise meets the conditions set out in those provisions.

*No comparable funds*

101. Where an investment fund is entirely "in house" it may have no

external investors. In these situations, the comparison to be made for the purposes of s809EZB (2) is with a fund of a similar nature which does have external investors, taking all factors into account.

### 69.4.3 “Sum”

Section 809EZB(3) ITA provides:

In this Chapter “sum” includes any money or money’s worth (and other expressions are to be construed accordingly).

### 69.4.4 *Payment for scheme asset*

Section 809EZB(4) ITA provides:

Where-

- (a) a sum in the form of money’s worth arises to the individual from the scheme in the ordinary course of the scheme’s business, and
- (b) the individual gives the scheme money in exchange for the sum, the sum constitutes a “management fee” only to the extent that its market value at the time it arises exceeds the amount of the money given by the individual.

## 69.5 “Carried interest”

### 69.5.1 *Carried interest: Introduction*

Carried interest matters because:

- (1) It is in principle not a management fee, under management-fee exclusion (c),<sup>11</sup> and so not subject to IT as DIMF
- (2) Special CGT rules apply<sup>12</sup>

DIMF draft guidance provides:

103. This legislation contains two different definitions of carried interest. Section 809EZD sets out the definition of carried interest which follows the description of typical carried interest arrangements in

- [1] the Memorandum of Understanding (MOU) agreed between the BVCA and the Inland Revenue in 2003 and

---

<sup>11</sup> See 69.4 (“Management fee”).

<sup>12</sup> See 69.14 (Carried interest: CGT).

[2] the BVCA’s Statement and Guidelines approved by the then Inland Revenue and Department for Trade and Industry in 1987.<sup>13</sup>

104. However, some investment funds use models of carried interest which do not fit within the description in the MOU. For example, venture capital funds may have a lower hurdle rate, and some funds will pay carried interest out of unrealised profits.

105. Since genuine carried interest is intended to be exempted from the [DIMF] charge, an alternative definition of carried interest is also used in the legislation.

106. The legislation is set out in this way so that funds which are using the model set out in the MOU can be satisfied that the carried interest will be exempt without needing to study the broader definition in s809EYC. (This model of carried interest is defined as meeting the requirements of s809EYC).

107. The wider definition of carried interest used in s809EYC should not be taken as an indication that any particular arrangement necessarily falls within the definition of carried interest in the Memorandum of Understanding; that is a separate issue which must be considered on the facts of the case.

### 69.5.2 “Carried interest”

Section 809EYC(1) ITA provides:

For the purposes of section 809EYC “carried interest” means a sum which arises to the individual

- [a] under the [investment-services] arrangements
- [b] by way of profit-related return.<sup>14</sup>

### 69.5.3 “Profit-related return”

This is the key element in the definition of carried interest.

Section 809EYC(2) ITA provides:

---

13 See 69.2 (DIMF: history and guidance).

14 The second sentence signposts exceptions: “This is subject to subsections (3) to (8) (sums where no significant risk of not arising); and see also section 809EYD (sums treated as carried interest).”

Section 103KH TCGA applies this definition for CGT: “In this Chapter ... “carried interest”, in relation to arrangements referred to in section 103KA(1)(a), has the same meaning as in section 809EYC of ITA 2007 (see sections 809EYC and 809EYD of that Act)”.

A sum which arises to the individual under the [investment-services] arrangements does so by way of “profit-related return” if under the arrangements-

- (a) the sum is to, or may, arise only if-
  - (i) there are profits for a period on the investments, or on particular investments, made for the purposes of the scheme, or
  - (ii) there are profits arising from a disposal of the investments, or of particular investments, made for those purposes,
- (b) the amount of the sum which is to, or may, arise is variable, to a substantial extent, by reference to those profits, and
- (c) returns to external investors are also determined by reference to those profits;

but where any part of the sum does not meet these conditions, that part is not to be regarded as arising by way of “profit-related return”.

#### 69.5.4 “Profits”

Section 809EZE(1) ITA provides:

In this Chapter ...”profits”, in relation to an investment made for the purposes of an investment scheme, means profits (including unrealised profits) arising from the acquisition, holding, management or disposal of the investment (taking into account items of a revenue nature and items of a capital nature).

The IF Manual provides:

#### **FM36520: Meaning of carried interest [Oct 2020]**

##### **Meaning of ‘carried interest’**

... The profits to be considered are the profits based on the period set out in the arrangements. For example, if a fund draws up annual accounts, and a decision on whether to pay carry is based on those accounts, (for example by comparing the net asset value with the net asset value at the start of the accounts period), then the period in question would be the year that this condition is tested against.

Condition 1 may still be met in some circumstances where a fund has made a loss.

##### **Example**

A fund is arranged over a 2 year period, it has made a loss in the second year. However, due to substantial profits in the previous year the fund has made a sufficiently high profit over a two-year period.

As the specified period is 2 years, the above situation would meet the first condition despite making a loss in one of the years.

### 69.5.5 *Vary by reference to profits*

The IF Manual provides:

#### **FM36520 Meaning of carried interest [Oct 2020]**

##### **Meaning of ‘carried interest’**

##### **... Example**

A fund manager is entitled to a fixed fee which will equate to 2% of the value of a fund, payment will be deferred until the fund has positive profits or a capital return.

Just because the fee is conditional (on profits) does not mean that the fee would be carried interest. The amount in this case may be conditional but it does not vary in relation to profits, the value is determined only by the value of the fund - condition 2 is therefore not met.

### 69.5.6 *Risk-free return*

In short, a risk-free return is not carried interest.

Section 809EZC(3) ITA provides:

Where-

- (a) one or more sums (“actual sums”) arise to the individual under the [investment-services] arrangements by way of profit-related return in a tax year, and
- (b) there was no significant risk that a sum of at least a certain amount (“the minimum amount”) would not arise to the individual,

so much of the actual sum, or of the aggregate of the actual sums, as is equal to the minimum amount is not “carried interest”.

(See subsections (7) and (8) as to how the minimum amount is to be apportioned between the actual sums where more than one actual sum arises in the tax year.)

The IF Manual provides:

#### **IFM36531 The “no significant risk” test: Overview [Oct 2020]**

... Significant risk’ is not defined in legislation, but the intention is to

only capture disguised fees; that is, sums which are highly likely to arise. Passing the ‘no significant risk’ test means that there must be significant risk that the sum will not arise. The intention is that, any attempt to make a fee appear as if it is linked to profits while actually being fixed in substance, will be ineffective.

*Purpose of the ‘no significant risk’ test*

The intention of the “no significant risk” test is to ensure that sums awarded to individuals, which in reality are highly likely to arise, are not categorised as carried interest. Instead such sums should be caught by the DIMF rules and charged to income tax. Whether the sum is likely to arise will depend on the facts and circumstances of each case.

*Example (Ayo)*

A, an individual providing investment management services is due to be paid £1m, or £1m plus 10% of profits if the fund profits exceed a certain level.

The £1m is not carried interest as it does not vary by reference to profits and there is not a significant risk that it will not arise. The 10% of profits above a certain profit level could be carried interest as the amount appears to vary. We still have to be mindful that the three profit-related return conditions of ITA07/S809EZC(2) (IFM36300) are met and the requirements of the “no-significant risk” test are fulfilled. For instance, the profit level may have been set at an unrealistically low level where there is no significant risk that it would arise, this could mean that the “no significant risk” test would not be met. Whether the amount meets the profit-related return conditions or the “no significant risk” test will depend on the facts and circumstances at the time.

In practice it should be clear to fund managers, through management agreements entered into whether sums arising to them represent their fixed management fee as opposed to carried interest. This test is intended to catch all amounts which, viewed realistically, represent a largely fixed entitlement based on the amount of assets under management. HMRC may challenge any attempt made to circumvent this test or any of the profit related conditions of ITA07/S809EZC(2) (IFM36300).

Where arrangements do not meet the “no significant risk” test, the sum arising to the fund manager is not carried interest even if the three-profit-related conditions are met.

*Application of the “no significant risk” test to the arrangements*

The no significant risk test applies to sums arising to an individual under arrangements by way of a profit related return, not to the

investments made by the fund.

*Example*

Fund A invests in risky investments but puts arrangements in place which provide a certain payment every year to the fund managers. Fund B invests in relatively safe investments but set a high hurdle rate that must be exceeded before any carried interest was paid.

Despite the nature of the investments, Fund A may not meet the significant risk test, and therefore the fees would be caught by the DIMF rules. Should it be the case that in Fund B it was by no means guaranteed that a manager would ever receive carried interest this may pass the significant risk test despite the less risky investments held.

A history of good performance (e.g. 5 out of 6 previous funds have delivered high returns) does not in itself mean there is no significant risk attached to the sums arising to the fund manager. If funds have to deliver a high enough performance to repay loans to external investors and meet the hurdle rate before any carried interest is paid, it is likely that at the outset there would be a significant risk that carried interest would not be paid. This is not an automatic qualification however and whether the “no significant” risk test has been met would have to be based on the facts and circumstances at the time.

*69.5.7 Time to assess risk*

Section 809EZC(5) ITA provides:

For the purposes of subsection (3)(b) assess the risk as at the latest of-

- (a) the time when the individual becomes party to the [investment-services] arrangements,
- (b) the time when the individual begins to perform investment management services directly or indirectly in respect of the scheme under the [investment-services] arrangements, and
- (c) the time when a material change is made to the [investment-services] arrangements so far as relating to the sums which are to, or may, arise to the individual.

The IF Manual provides:

**IFM36534 Timing of significant risk tests [Oct 2020]**

**Timing of significant risk tests**

... In practice, where there is more than one sum paid in a year each sum should be considered individually then consider all the sums together. It is expected that where sums are taken together, there would only be

a different outcome in circumstances where a fund had invested in a series of investments which when taken together, deliver a certain return to the managers.

Generally, this means that for a fund with a defined lifespan (closed ended fund) the test is likely to be applied at an early stage in the life of the fund. Later in the life of a fund that has been successful, it may be certain that sums will arise to the managers under the arrangements. This does not mean that a sum does not qualify as carried interest, so long as there was significant risk that the sum would arise when the arrangements were entered into.

Where an individual leaves a management team and that individual's entitlement to a sum is wholly or partly reallocated between the remaining managers, this will generally not be considered a material change, provided that:

- the individuals receiving the allocation were previously entitled to a portion of the carried interest in respect of the scheme; and
- the reallocation does not materially distort the proportions in which those individuals will share the carried interest between themselves.

If an individual receives a re-allocated award of carried interest that is greater than the pro-rata amount, then a material change will generally not be considered to have occurred in relation to the original carried interest amount as long as the new carried interest addition has no bearing on the calculation, right to receive or previous arrangement. If the new carried interest addition does have any bearing on the previous arrangement then a material change will have deemed to have occurred for all of the individual's carried interest balance.

There is no legislative definition for material change. Whether a "material change" has occurred or not will depend on the facts.

### 69.5.8 *Insolvency risk*

Section 809EZC(6) ITA provides:

For the purposes of subsection (3)(b) ignore any risk that a sum is prevented from arising to the individual (by reason of insolvency or otherwise).

The IF Manual provides:

**FM36536 Prevention of a sum arising [Oct 2020]**

**Prevention of a sum arising**

... The intention of this sub-section is to prevent individuals claiming

that the scheme that they provide services to is taking risks and therefore there is significant risk that sums will not arise to them as individuals.

DIMF draft guidance provides:

147. It does not mean that a risk of insolvency in the underlying investments of the fund must be ignored; rather this is one of the elements which is taken into account in assessing whether a payment is carried interest or not. It is understood that investment funds may invest in risky ventures where insolvency of an investee company is a real risk.

### 69.5.9 *Tests of risk*

Section 809EZC(4) ITA provides:

For the purposes of subsection (3)(b) assess the risk both-

- (a) in relation to each actual sum (and the investments to which it relates) individually, taking into account also any other sums that might have arisen to the individual under the [investment-services] arrangements instead of that sum, and
- (b) in relation to the actual sum or sums and any other sums that might have arisen to the individual under the [investment-services] arrangements by way of profit-related return in the tax year (and the investments to which all those sums relate) taken as a whole;

(so that, in a particular case, some of the minimum amount may arise by assessing the risk in accordance with paragraph (a) and some by assessing it in accordance with paragraph (b)).

### 69.5.10 *Apportionment*

Section 809EZC ITA provides:

(7) Where more than one actual sum arises in the tax year, the minimum amount is to be apportioned between the actual sums as follows for the purposes of subsection (3)-

- (a) so much of the minimum amount as is attributable to a particular actual sum is to be apportioned to that actual sum, and
- (b) so much of the minimum amount as is not attributable to any particular actual sum is to be apportioned between the actual sums on a just and reasonable basis.

(8) For the purpose of subsection (7) any part of the minimum amount is attributable to a particular actual sum to the extent that there was no significant risk that that part would not arise to the individual in relation to that actual sum, assessing the risk in accordance with subsection (4)(a).

DIMF draft guidance provides:

140. ... the key point is to look at the arrangements as a whole. As explained above, it would be possible for arrangements using safe investments nonetheless not to give a certain return to managers, if the managers had to meet a high hurdle rate before getting any return. The essential is that these clauses are intended to target arrangements to get round the rules by delivering a certain return.

141. HMRC would accept any reasonable qualitative assessment of the risk attached to the carried interest; there is no requirement for a quantitative (e.g. Black Scholes or Monte Carlo method) to be used.

The IF Manual provides:

**IFM36531 The “no significant risk” test: Overview [Oct 2020]**

*Example (Dipti)*

D, an individual providing investment management services is to receive £1m if there are no profits, and 20% of any profits above £50m. There is a 30% chance that profits will exceed £50m.

If profits are £60m, D receives £3m. There is no risk attached to the £1m fee but there was a risk that the extra £2m may not have arisen. £2m is considered carried interest and the £1m fee is a disguised fee charged to income tax.

If the profits were instead £45m, then no additional sum arises. The carried interest is nil and the disguised fee is £1m.

The consideration of the sums together is not intended to catch normal diversification arrangements by funds as it is not unusual for funds to spread investments to give a safer return overall. Sums taken together would only be applicable if avoidance arrangements are in place to give investment managers disguised fees where there was no significant risk.

69.5.11 *Subordinated interest*

DIMF draft guidance provides:

148. The MOU and 1987 Statement is an interpretation of the law which sets out the tax treatment that will follow when venture capital/private equity funds are structured in a certain way. It is assumed that private

equity firms in the UK will very often be structured in this way to ensure that they benefit from the tax treatment set out in the MOU and 1987 Statement.

In short, a subordinated interest is treated as carried interest.

Section 809EZD ITA provides:

- (1) A sum falling within subsection (2) or (3)-
  - (a) is to be assumed to meet the requirements of section 809EZC [definition of carried interest], and
  - (b) accordingly, is to be treated as constituting “carried interest” for the purposes of section 809EZB.
- (2) A sum falls within this subsection if, under the [investment-services] arrangements, it is to, or may, arise to the individual out of profits on the investments made for the purposes of the scheme, but only after-
  - (a) all, or substantially all, of the investments in the scheme made by the participants have been repaid to the participants, and
  - (b) each external investor has received a preferred return on all, or substantially all, of the investor’s investments in the scheme.

The IF Manual provides:

**IFM36540 Sums treated as carried interest [Oct 2020]**

**Sums treated as carried interest**

... The reference to “substantially all” of the investments being repaid acknowledges that capital contributions to the investment scheme (rather than loan commitments to the investment scheme, which will comprise the vast majority of the investment made by managers and third party investors) will rarely be repaid until the investment scheme is wound up. Therefore the carried interest may be paid when the capital investment is still outstanding.

Section 809EZD(3) ITA provides:

A sum falls within this subsection if, under the [investment-services] arrangements, it is to, or may, arise to the individual out of profits on a particular investment made for the purposes of the scheme, but only after-

- (a) all, or substantially all, of the relevant investments made by participants have been repaid to those participants, and
- (b) each of those participants who is an external investor has received a preferred return on all, or substantially all, of the

investor's relevant investments;  
and for this purpose "relevant investments" means those investments in the scheme to which the particular investment made for the purposes of the scheme is attributable.

### 69.5.12 "Preferred return"

This term is used in subordinated interest rules.

Section 809EZD(4) ITA provides:

In this section "preferred return" means a return of not less than the amount that would be payable on the investment by way of interest if-

- (a) compound interest were payable on the investment for the whole of the period during which it was invested in the scheme, and
- (b) the interest were calculated at a rate of 6% per annum, with annual rests.

DIMF draft guidance provides:

154. ... The intention here is to reflect the wording of the MOU (which refers to higher hurdle rates), and to ensure that sums described as carried interest do match the usual commercial arrangements.

## 69.6 Misc definitions

### 69.6.1 "Investment scheme"

This term is used in the definition of "disguised fee".<sup>15</sup>

Section 809EZA ITA provides:

- (6) In this Chapter "investment scheme" means-
  - (a) a collective investment scheme,<sup>16</sup> or
  - (b) an investment trust<sup>17</sup>.
- (7) The reference in subsection (6)(a) to a collective investment scheme

---

15 See 69.3 ("Disguised fee").

16 Section 809EZE incorporates the standard definition by reference: "In this Chapter ... "collective investment scheme" has the meaning given by section 235 of FISMA 2000".

17 Section 809EZE(1) ITA provides a definition by reference: "In this Chapter ... "investment trust" means a company in relation to which conditions A to C in section 1158 of CTA 2010 are met (or treated as met); and for this purpose "company" has the meaning given by section 1121 of CTA 2010."

includes-

- (a) arrangements which permit an external investor to participate in investments acquired by the collective investment scheme without participating in the scheme itself,

The IF Manual provides:

**IFM36367: Disguised fees: Managed Accounts and other parallel structures (from 6 April 2016): Managed accounts [Oct 2020]**

**Managed Accounts**

*ITA07/S809EZA(7)(a) - (b)*

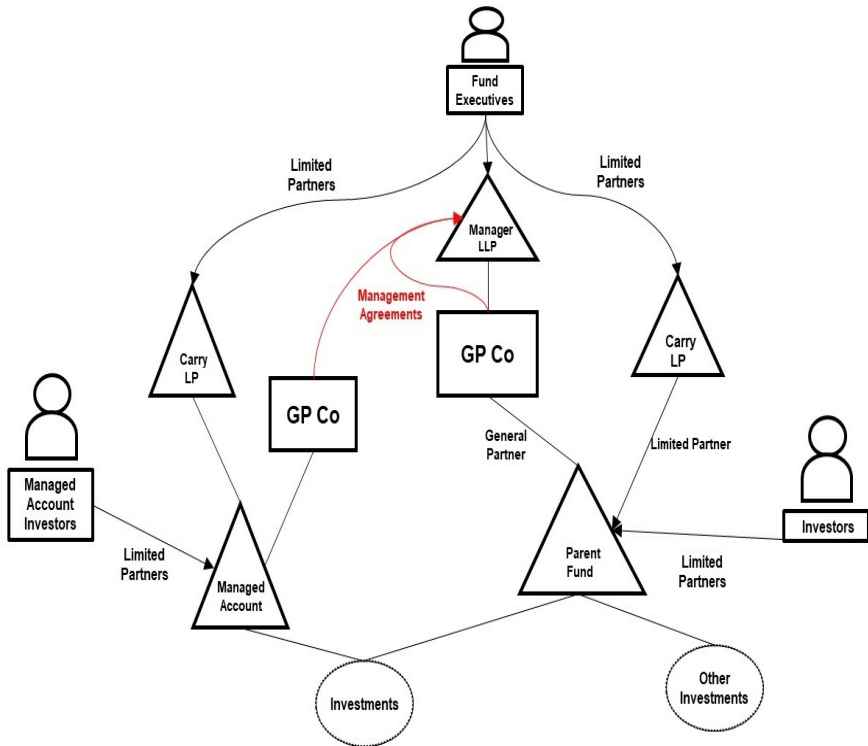

Managed accounts in their simplest form can be thought of as a fund comprising one investor, usually known as the ‘managed account investor’ providing the capital which is managed by the fund management team. These managed accounts may operate and invest alongside a more mainstream fund vehicle, typically referred to as the ‘parent fund’ which is managed by the same team. See the diagram below for a simplified example. A managed account may resemble a smaller version of the parent fund and may have the same carried interest structure. However, a variety of vehicles can be used to implement such an arrangement.

[Managed Accounts

*ITA07/S809EZA(7)(a) - (b)*

Managed accounts in their simplest form can be thought of as a fund comprising one investor, usually known as the ‘managed account investor’ providing the capital which is managed by the fund management team. These managed accounts may operate and invest alongside a more mainstream fund vehicle, typically referred to as the ‘parent fund’ which is managed by the same team. See the diagram below for a simplified example. A managed account may resemble a smaller version of the parent fund and may have the same carried interest structure. However, a variety of vehicles can be used to implement such an arrangement.]

([http://www.hmrc.gov.uk/gds/ifm/images/IFM\\_Managed\\_account.jpg](http://www.hmrc.gov.uk/gds/ifm/images/IFM_Managed_account.jpg))

A common reason for this approach is where an investor has particular requirements which cannot be catered for if it invests in the parent fund vehicle alongside a range of other investors. Such an example would be an institutional investor which may not want to invest in certain industries such as tobacco or alcohol.

Investing through a managed account allows such an investor to decline participation in any investments which fall outside their requirements. This is why on the above diagram most of the fund’s investments are also investments made by the managed account, but there is likely to be disconnected investments where the managed account declines to participate.

There may be other reasons for a managed account. It allows the managed account investor to negotiate a separate deal with the fund management team, potentially around carried interest and management fees, which is kept private from other investors. Some managed account investors may also want more control over the investments made, perhaps retaining the right to refuse certain opportunities even if they do not violate any ethical guidelines or, conversely, to take a disproportionately bigger stake in an investment it feels particularly

positive about.

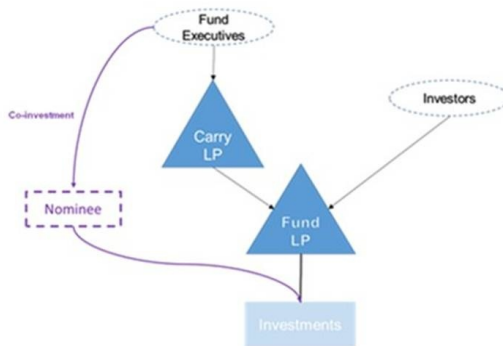

Section 809EZA(7) ITA provides:

The reference in subsection (6)(a) to a collective investment scheme includes ...

- (b) arrangements under which sums arise to an individual performing investment management services in respect of the collective investment scheme without those sums arising from the scheme itself.<sup>18</sup>

DIMF draft guidance provides:

82. It is possible that the managers of a particular fund will not make their co-investment (i.e. the amounts they are required to put into the scheme of their own money on the same terms as investors to give them “skin in the game”) in the fund vehicle itself, but through a parallel structure. This structure could simply be a nominee that acquires the agreed proportion of any underlying investment made by the fund using the fund managers’ own resources. A simplified example is illustrated below.

83. HMRC is also aware that such a structure could be used for less benign ends. For example, the fund managers’ “carried interest” could be achieved not by a special class of interest in the fund limited partnership as has historically been the case, but through a direct interest in the underlying investments which replicates the same economic terms. Again, a simple diagram to illustrate this issue is

18 The definition is applied to CGT by s.103KH(1) TCGA.

shown below.

84. To avoid any doubt that the rules apply to these structures as they would to a more conventional fund set-up, a new sub-section 809EZA(7)(b) was inserted by Finance Act 2016 which provides that “Collective Investment Scheme” for the purposes of the DMF Rules, includes arrangements under which sums arise to a fund manager in respect of a collective investment scheme without the sums arising from the collective investment scheme itself. Please note that the wording “in respect of ” is intentionally wide and could catch any arrangement (including one seeking to avoid these rules) where sums are in any sense structured so that they do not arise from a collective investment scheme...

### 69.6.2 “External investor”

Section 809EZE(1) ITA provides:

In this Chapter ...

“external investor”, in relation to an investment scheme and any arrangements, means a participant in the scheme other than-

- (a) an individual who at any time performs or is to perform investment management services directly or indirectly in respect of the scheme, or
- (b) a person through whom sums are to, or may, arise directly or indirectly to such an individual from the scheme under the [investment-services] arrangements.<sup>19</sup>

### 69.6.3 Investment management services

<sup>19</sup> The definition is applied to CGT by s.103KH(1) TCGA.

This term is used in the definition of “disguised fee”.<sup>20</sup>

Section 809EZE(1) ITA provides:

In this Chapter ...

investment management services”, in relation to an investment scheme, includes-

- (a) seeking funds for the purposes of the scheme from participants or potential participants,
- (b) researching potential investments to be made for the purposes of the scheme,
- (c) acquiring, managing or disposing of property for the purposes of the scheme, and
- (d) acting for the purposes of the scheme with a view to assisting a body in which the scheme has made an investment to raise funds.<sup>21</sup>

DIMF draft guidance provides:

54. ... HMRC’s starting position will always be that a person in receipt of disguised fees (or carried interest) is performing investment management services. Apart from in extremely unusual situations, HMRC would always seek to argue that if investors/the management team have agreed to share part of the remuneration for managing the fund with an individual the reason for that arrangement must be that the individual is performing investment management services in respect of that fund. Otherwise HMRC struggles to see the commercial rationale for the individual receiving either a disguised management fee or carried interest. If an individual works in a business which involves performing investment management services and receives a disguised fee or carried interest, HMRC would say that fact is compelling evidence in and of itself that the individual him or herself performs investment management services directly or indirectly. HMRC would expect the only persons who are not within this category to be remunerated purely through salary and bonus rather than a direct interest in the performance of the underlying fund vehicles.

#### 69.6.4 “Market value”

Section 809EZE(1) ITA incorporates the CGT rules:

---

20 See 69.3 (“Disguised fee”).

21 The definition is applied to CGT by s.103KH(1) TCGA.

In this Chapter ... “market value” has the same meaning as in TCGA 1992 (see sections 272 and 273 of that Act).

#### 69.6.5 “Participant”

Section 809EZE(1) ITA provides:

In this Chapter ...  
“participant”-

- (a) in relation to a collective investment scheme, is construed in accordance with section 235 of FISMA 2000;
- (b) in relation to an investment trust, means a member of the investment trust;

#### 69.6.6 “Investment in scheme”

Section 809EZE ITA provides:

(2) In this Chapter a reference to an investment made by a person in an investment scheme is a reference to a contribution by the person (whether by way of capital, loan or otherwise) towards the property subject to the scheme (but does not include a sum committed but not yet invested).

(3) For the purposes of subsection (2) a person who holds a share in an investment scheme which is a company limited by shares and who acquired the share from a person other than the scheme is to be taken to have made a contribution towards the property subject to the scheme equal to-

- (a) the consideration given by the person for the acquisition of the share, or
- (b) if less, the market value of the share at the time of the acquisition.

#### 69.6.7 “Repayment or return”

Section 809EZE(4) ITA provides:

In this Chapter, in relation to an investment scheme which is a company limited by shares-

- (a) references to a repayment of, or a return on, an investment in the scheme include a repayment of, or a return on, an investment represented by a share in the scheme resulting from-
  - (i) the purchase of the share by the scheme,
  - (ii) the redemption of the share by the scheme,

- (iii) the distribution of assets in respect of the share on the winding up of the scheme, or
- (iv) any similar process;
- (b) references to a return on an investment in the scheme include a dividend or similar distribution in respect of a share in the scheme representing the investment.

## **69.7 DIMF: Deemed trade**

Armed with the definition of disguised fees, we turn to the rules which govern them.

Section 809EZA(1) ITA provides:

Where one or more disguised fees arise to an individual in a tax year from one or more investment schemes (whether or not by virtue of the same arrangements), the individual is liable for income tax for the tax year in respect of the disguised fee or fees as if–

- (a) the individual were carrying on a trade for the tax year,
- (b) the disguised fee or fees were the profits of the trade of the tax year, and
- (c) the individual were the person receiving or entitled to those profits.<sup>22</sup>

The IF Manual provides:

### **IFM36210: Deemed trade: Introduction [Oct 2020]**

#### **Deemed trade**

#### **Introduction**

#### **Consequence of a disguised fee arising**

... the disguised fees are brought into account for the purposes of both income tax and Class 4 National Insurance Contributions (NICs).

As disguised fees are treated as the profits of the deemed trade and not as receipts, no losses or expenses can be set against the disguised fees. For this reason the deemed trade cannot give rise to a loss, as it only applies to fees arising.

However the DIMF rules only re-characterise the nature of the receipt arising to an individual. They do not alter, for tax purposes, the nature of the underlying activities carried out by the individual which give rise to the disguised fee. Nor do the DIMF rules alter the nature of the

---

<sup>22</sup> Para (c) reflects the standard ITTOIA rule that the person liable is the person receiving/entitled to income; see 14.2.1 (Receiving/entitled: Person liable).

activities of any entity or arrangement by virtue of which the disguised fee arises.

For example, where a disguised fee arises from a typical General Partner Limited Partner (GP-LP) structure (IFM36132), although the individual receiving the fee is treated as carrying on a deemed trade, the rules do not re-classify that partnership as carrying on a trade (as may be relevant, for example, to entrepreneurs' relief and interest relief). The GP LP is carrying on an investment business; sums received by the GP LP are not therefore reclassified as trade income.

DIMF draft guidance provides:

28. Please note that as amounts of disguised fee are treated as the profits of a trade (which then come into charge under Part 2 of ITTOIA 2005 without more) they also comprise "relevant UK earnings" for the purposes of determining relief for contributions to registered pension schemes.

## 69.8 DIMF: Territorial limitation

Section 809EZA(2) ITA provides:

For the purposes of subsection (1) the trade is treated as carried on-

- (a) in the UK, to the extent that the individual performs the relevant services in the UK;
- (b) outside the UK, to the extent that the individual performs the relevant services outside the UK;

and for this purpose "the relevant services" means the investment management services by virtue of which the disguised fee or fees arise to the individual in the tax year.

The IF Manual provides:

**FM36220: Deemed Trade: Territorial scope of the deemed trade** [Oct 2020]

**Territorial scope of the deemed trade**

**Location of the deemed trade**

... Where an individual who is resident in the UK for tax purposes performs services both within and outside the UK, the entirety of the profits from the deemed trade are chargeable to UK tax in accordance with ITTOIA05/S6.<sup>23</sup>

---

23 See 20.4 (IT territorial limit: Trading).

For an individual who is non-resident in the UK for tax purposes, the trade is regarded as carried on in the UK when the services are performed in the UK and carried on outside the UK where the services are performed outside the UK.

Even where an individual only performs very limited services in the UK, for example coming to the UK for a small number of business meetings during the course of the year, the legislation provides that a deemed trade exists for that individual.

### 69.8.1 *DT relief*

The IF Manul provides:

**FM36220: Deemed Trade: Territorial scope of the deemed trade**  
[Oct 2020]

**Territorial scope of the deemed trade**

**Location of the deemed trade**

... This means that the business profits article of most double taxation treaties could apply, and so a tax charge will only arise if a permanent establishment (PE) exists (INTM264050).<sup>24</sup>

Example (Thomas and Sam)

ABC LLP is a US limited liability partnership. T is one of three partners who live and work in the US and has not been to the UK in the tax year. S is a fourth partner who lives and works in the US but has visited the UK for three days in relation to the acquisition of a UK business by a collective investment scheme (IFM36900) to which ABC LLP provides investment services. Neither T nor S is UK resident for tax purposes. Each of the four partners received £10,000 that would, if the individuals had lived and worked in the UK, be treated as a disguised fee.

The HMRC analysis is as follows:

T has not performed any services in the UK, so is not brought into charge under the DIMF rules. S has performed services in the UK, so is potentially within the charge. It is unlikely that a few days in the UK will have the effect of creating a UK PE but S will have to consider this carefully and make a decision based on the facts. If there is no PE, then a charge will not arise under the DIMF rules.

---

24 See 20.22 (DT relief: Trading income).

“Unlikely” seems an understatement - but HMRC did not wish to give any hostage to fortune. The Manual continues:

Many asset manager firms are international businesses with operations in more than one financial centre. Where an individual performs any investment management services in the UK they are potentially within the scope of the DIMF rules. Therefore, this may cause concern to non-resident individuals who come to the UK very rarely and do not perform any significant investment management activity whilst in the UK.

Each case will be a question of fact. However, where individuals have little or no presence in the UK it is not expected that a situation will be created in which they will be subject to the DIMF rules. This is the case even where the wider business or group they work for does have a substantial UK operation. For example:

A fund management business headquartered outside the UK has a UK operation and an individual from the headquarters occasionally visits the UK; or

A fund management business that is UK headquartered has fund management divisions based in other jurisdictions and an individual involved in such offshore operations occasionally comes to the UK.

Where an individual is resident in a country with a double taxation agreement with the UK, even where they perform some investment management services in the UK, it does not follow that they will automatically be charged under the DIMF legislation. The general approach and practices followed in relation to double taxation treaties applying to the taxation of trade profits also apply to the individual’s deemed trade.

In the context of DIMF, the deemed trade concerned is a trade of the individual rather than being the same trade as carried on by the entity which engages the individual. In considering whether the individual has a PE for the purposes of a relevant double taxation treaty you must consider the individual’s deemed trade, not that of the entity that engages them.

Whether the engaging entity itself or its wider group already has a UK PE is therefore a separate question entirely. This means it is possible for the entity which engages the individual to have a UK PE while the individual fund manager will not be treated as having a personal PE for the purposes of the relevant treaty. An individual may therefore be able to rely on that treaty to be out of scope of liability under the DIMF

rules. Further advice on permanent establishments and double taxation treaties is available in the International Manual (INTM260000).

Where the activities of an individual do amount to a PE such that a double taxation treaty does not preclude liability from UK tax, it will be necessary to determine the amount of profit attributable to that PE. Establishing the extent to which the individual is performing investment management services in the UK will be a fact specific question which needs to be determined, given reference to all the facts and circumstances.

## 69.9 Who receives DIMF

The rules are in the appallingly numbered sections 809EZDA and 809EZDB.

Section	Applies to	Enjoyment conditions
809EZDA	Connected non-co	No
809EZBB	Connected co/unconnected person	Yes

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies** [Oct 2020]

**The enjoyment conditions - special provisions for companies**

*ITA07/S809EZDB(6)-(10)*

Special provision is made in relation to companies. This is because a fund management business could be set up as a wholly onshore corporate structure, with the fees and any carried interest arising from the underlying funds being charged in full to corporation tax. If, for example, an individual owned more than 50% of that business they would be connected (IFM36330) with the company and charged in full on amounts arising to that company but for this rule.

This would be the case even if the company was a genuine vehicle of substance carrying on the entire investment management trade, the profits of which are charged fully to corporation tax.

All the facts at the time must be considered, however any attempt to gain a tax advantage could result in the fees being chargeable to income tax under disguised investment management fees (DIMF) rules. For example, the use of structures that are artificially interposed between an individual and the management fees to access corporation tax treatment.

The rules are therefore modified in the context of corporate structures

to ensure that the “corporate veil” is not pierced in such situations.

## **69.10 809EZDA: Connected non-company**

Section 809EZDA ITA provides:

- (1) This section applies in relation to an individual (“A”) if-
  - (a) a sum arises to a person (“B”) who is connected with A,
  - (b) B is not a company,
  - (c) income tax is not charged on B in respect of the sum by virtue of this Chapter [Chapter 5E, DIMF],
  - (d) capital gains tax is not charged on B in respect of the sum by virtue of Chapter 5 of Part 3 of TCGA 1992 [carried interest], and
  - (e) the sum does not arise to A apart from this section.
- (2) The sum referred to in subsection (1)(a) arises to A for the purposes of this Chapter.
- (3) Where a sum arises to A by virtue of this section, it arises to A at the time the sum referred to in subsection (1)(a) arises to B.

### 69.10.1 “*Connected person*”

Section 809EZDA(4) ITA tweaks the usual definition:

Section 993 (meaning of “connected”) applies for the purposes of this section, but as if-

- (a) subsection (4) of that section were omitted, and
- (b) partners in a partnership in which A is also a partner were not “associates” of A for the purposes of sections 450 and 451 of CTA 2010 (“control”).<sup>25</sup>

Thus:

- (a) Partners are not connected persons.<sup>26</sup>
- (b) A partner is not connected with a company held by the partnership.<sup>27</sup>

This only applies for the purpose of s.809EZDA, but it is repeated

<sup>25</sup> See 99.15.3 (Person controls company).

<sup>26</sup> See 99.18 (Connected: Partners).

<sup>27</sup> Please note, if any individual partner does have direct or indirect control of a company through a partnership, that company will still be a connected person to that individual for these purposes, it is only the aggregation of interests when judging control which is modified.

verbatim elsewhere in the DIMF code: s.809EZDB(10) ITA, s.103KG(15) TCGA.

## **69.11 809EZDB: Company/unconnected person**

Section 809EZDB(1) ITA provides:

This section applies in relation to an individual (“A”) if-

- (a) a sum arises to-
  - (i) a company connected with A, or
  - (ii) a person not connected with A,
- (b) any of the enjoyment conditions is met, and
- (c) the sum does not arise to A apart from this section.

### 69.11.1 “*Enjoyment conditions*”

Section 809EZDB(2) ITA provides:

The enjoyment conditions are-

- (a) the sum, or part of the sum, is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of A or a person connected with A;
- (b) the arising of the sum operates to increase the value to A or a person connected with A of any assets which-
  - (i) A or the connected person holds, or
  - (ii) are held for the benefit of A or the connected person;
- (c) A or a person connected with A receives or is entitled to receive at any time any benefit provided or to be provided out of the sum or part of the sum;
- (d) A or a person connected with A may become entitled to the beneficial enjoyment of the sum or part of the sum if one or more powers are exercised or successively exercised (and for these purposes it does not matter who may exercise the powers or whether they are exercisable with or without the consent of another person);
- (e) A or a person connected with A is able in any manner to control directly or indirectly the application of the sum or part of the sum.

The drafting is based on the ToA enjoyment conditions.<sup>28</sup> But the ToA rules apply where the individual transferor has a *personal* power to enjoy; the rules here apply if A or a person connected with A has power to enjoy. That is of course much wider.<sup>29</sup>

The last paragraph of s.809EZDB(1) tweaks the definition of connected person in the context of Power to Enjoy:

In this subsection, in a case where the sum referred to in subsection (1)(a) arises to a company connected with A, references to a person connected with A do not include that company.

Assuming the conditions in s.809EZDB(1) are met, we move on. Section 809EZDB ITA provides:

- (3) There arises to A for the purposes of this Chapter-
  - (a) the sum referred to in subsection (1)(a), or
  - (b) if the enjoyment condition in subsection (2)(a), (c), (d) or (e) is met in relation to part of the sum, that part of that sum, or
  - (c) if the enjoyment condition in subsection (2)(b) is met, such part of that sum as is equal to the amount by which the value of the assets referred to in that condition is increased.
- (4) Where a sum (or part of a sum) arises to A by virtue of this section, it arises to A at the time it arises to the person referred to in subsection (1)(a)(i) or (ii) (whether the enjoyment condition was met at that time or at a later date).

### 69.11.2 *Disregarded enjoyment conditions*

Section 809EZDB(6) ITA provides:

---

28 See 46.11 (“Power to enjoy”). Section 809EZDB(5) ITA adds: “In determining whether any of the enjoyment conditions is met in relation to a sum or part of a sum-  
 (a) regard must be had to the substantial result and effect of all the relevant circumstances, and  
 (b) all benefits which may at any time accrue to a person as a result of the sum arising as specified in subsection (1)(a) must be taken into account, irrespective of-  
 (i) the nature or form of the benefits, or  
 (ii) whether the person has legal or equitable rights in respect of the benefits.”

This is also based on the ToA provision; see 46.11.1 (Substance).

29 In this respect the DIMF code follows the approach of the mixed partnership code: see 83.9.1 (PtoE condition (c): Enjoyment conditions).

The enjoyment condition in subsection (2)(b), (c) or (d) is to be treated as not met if it would be met only by reason of A holding shares or an interest in shares in a company.

Section 809EZDB(7) ITA provides:

The enjoyment condition in subsection (2)(a) or (e) is to be treated as not met if the sum referred to in subsection (1)(a) arises to a company connected with A and-

- (a) the company is liable to pay corporation tax in respect of its profits and the sum is included in the computation of those profits..

DIMF draft guidance provides:

224. Secondly, enjoyment conditions (a) and (e) are not be regarded as met where a sum arises to a company connected with A where that company is either chargeable to UK corporation tax in respect of that sum. This will prevent the enjoyment condition being met in relation to onshore structures where a sum of management fee (or carried interest) arises to a company which is resident in the UK for tax purposes and brings those profits into account in calculating its profits chargeable to corporation tax.

Section 809EZDB(7) ITA provides:

The enjoyment condition in subsection (2)(a) or (e) is to be treated as not met if the sum referred to in subsection (1)(a) arises to a company connected with A and ...

- (b) paragraph (a) does not apply but-
  - (i) the company is a CFC<sup>30</sup> and the exemption in Chapter 14 of Part 9A of TIOPA 2010 [foreign tax at least 75% of corresponding UK tax] applies for the accounting period in which the sum arises, or
  - (ii) the company is not a CFC but, if it were, that exemption would apply for that period.

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special**

---

30 Section 809EZDB(7) ITA incorporates a definition by reference: “In this subsection “CFC” has the same meaning as in Part 9A of TIOPA 2010.”

**provisions for companies** [Oct 2020]**The enjoyment conditions - special provisions for companies**

... In effect this means that the CFC is liable to pay an amount of tax in its country of residence equal to at least 75% of the amount that would have been due if it had been chargeable to the tax in the UK. The tax exemption contains detailed rules as to how the comparison is to be undertaken. These rules are designed to prevent manipulation of the tax due in the country of residence. Guidance on these rules can be found at INTM226000+.

Furthermore if the company is not a CFC (for example because it is controlled by persons outside the UK), the exclusion can still apply if the conditions for the tax exemption in the CFC rules are otherwise met (for example, if the company were a CFC it would qualify for exemption because the tax it pays is equal to at least 75% of the amount that would have been due if it had been chargeable to UK tax).

Section 809EZDB ITA then restricts the exceptions with a TAAR, which takes somewhat non-standard form:

(8) But subsections (6) and (7) do not apply if the sum referred to in subsection (1)(a) arises to

- [i] the company referred to in subsection (1)(a)(i) or
- [ii] the person referred to in subsection (1)(a)(ii)

as part of arrangements where-

- (a) it is reasonable to assume that in the absence of the arrangements the sum or part of the sum would have arisen to A or an individual connected with A, and
- (b) it is reasonable to assume that the [investment-services] arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, inheritance tax or corporation tax.

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies** [Oct 2020]**The enjoyment conditions - special provisions for companies**

... Where a UK based manager has a very small shareholding in the ultimate (often quoted) parent vehicle of a large multi-national corporate asset management group, it will generally be obvious that the sums which represent the management fee would not arise to them in the absence of those arrangements.

On the other hand, an individual manager or small management team

interposing a corporate entity with no substance will be caught.

In between the two extremes it is harder to define a clear line where it will become reasonable to assume that in the absence of those arrangements, the sum would have arisen to A or an individual connected with A. The factors below, which are non-exhaustive, may help in considering what is reasonable:

- What structures were used by the fund management house in relation to prior funds (this may not just be their immediately preceding fund);
- Whether the company was put in place in response to advice to minimise a tax burden or achieve tax efficient co-investing funding;
- Whether the fund management business operates (and has always operated) as a wholly corporate group;
- Whether a company in the corporate group carries on a trade of providing investment management or advisory services on a commercial basis with a view to profit and the individual receives an arm's length rate of remuneration from his or her employment by that company. That company has sufficient substance to carry on the management activity and actually does so i.e. with its own employees, contracts and other assets;
- The size of the management team;
- The international spread of the management team;
- What happens when an individual joins or leaves the management team – both in terms of prior agreements and understandings, as well as legal agreements (if the expectation is that the manager will receive a reward which in any sense reflects or is calculated by reference to amounts which have arisen or profits which have accrued to the corporate).

The above list contains suggestions of what could be considered when deciding if it is reasonable to assume that a sum would have arisen to A in the absence of the arrangements. No factor is deemed to be decisive; the analysis depends on the facts and circumstances.

(b) It is reasonable to assume that the arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, inheritance tax, or corporation tax.

This test does not require the purpose of the arrangements to involve the avoidance of the DIMF rules. Seeking to avoid any income tax, capital gains tax, inheritance tax or corporation tax advantage will be sufficient. In particular, HMRC understands that some of the structures set up historically by non-domiciled fund managers were designed to manage their liability to inheritance tax rather than secure any income

tax advantage and this will be sufficient to fail this test.

This test will be deemed to be met where the management fee is used (whether directly or indirectly) to make an investment in a collective investment scheme (ITA07/S809EZB(9)). This will be the case even if there is, in fact, no tax avoidance motive to the arrangements in any sense.

Section 809EZDB(9) ITA provides:

The condition in subsection (8)(b) is to be regarded as met in a case where the sum is applied directly or indirectly as an investment in a collective investment scheme.

The IF Manual provides:

**IFM36335: Disguised fees: The enjoyment conditions - special provisions for companies [Oct 2020]**

**The enjoyment conditions - special provisions for companies**

... This responds to structures which were common before the DIMF rules were introduced which sought to meet fund manager's co-investment commitments in a tax efficient way. Many of these structures sought to apply management fees which would otherwise arise to a fund manager to pay up his or her co-investment commitment. While this provision (ITA07/S809EZB(9)) is targeted at co-invest funding structures, please note this can include investments in any collective investment scheme, not just those managed by the individual in question. If taxpayers argue that the sums are not arising from a collective investment scheme in a way which undermines the clear policy rationale behind this legislation, HMRC will consider making a challenge, this includes applying the targeted anti-avoidance rules (ITA07/S809EZF) (IFM36600).

## 69.12 DIMF TAAR

Section 809EZF ITA provides:

In determining whether section 809EZA<sup>31</sup> applies in relation to an individual, no regard is to be had to any arrangements the main purpose, or one of the main purposes, of which is to secure that that section does not apply in relation to-

(a) the individual, or

---

31 See 69.7 (DIMF: Deemed trade).

- (b) the individual and one or more other individuals.

In my terminology, this is an application-style TAAR.<sup>32</sup>

The IF Manual provides:

**IFM36600: Anti-avoidance clause: Anti-avoidance [Oct 2020]**  
**Anti-Avoidance**

... Where steps are taken to ensure that arrangements fall within the definition of carried interest this will not in itself mean that the anti-avoidance clause will be invoked. For example, if the hurdle rate for a fund was increased from 5% to 6% to adhere with the condition for carried interest detailed at ITA07/S809EZD(4)(b), this would not necessarily be a reason for the anti-avoidance provision to be applied.

Is that law or concession?

### **69.13 DIMF double taxation**

Section 809EZG ITA provides:

- (1) This section applies where-
  - (a) income tax is charged on an individual by virtue of section 809EZA in respect of a disguised fee, and
  - (b) at any time, a tax (whether income tax or another tax) is charged on the individual or another person otherwise than by virtue of section 809EZA in relation to the disguised fee.
- (2) This section also applies where-
  - (a) income tax is charged on an individual by virtue of section 809EZA in respect of a disguised fee which arises to the individual under the [investment-services] arrangements by way of a loan or advance,
  - (b) at any time, a tax (whether income tax or another tax) is charged on the individual in relation to another sum which arises to the individual under the [investment-services] arrangements, and
  - (c) some or all of the loan or advance has to be repaid as a result of the other sum having arisen to the individual.

Where these conditions are satisfied, we move on to the relief:

---

<sup>32</sup> See 2.10 (TAAR/unallowable purpose test).

- (3) In order to avoid a double charge to tax, the individual may make a claim for one or more consequential adjustments to be made in respect of the tax charged as mentioned in subsection (1)(b) or (2)(b).
- (4) On a claim under this section an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.
- (5) The value of any consequential adjustments must not exceed the lesser of the income tax charged on the individual as mentioned in subsection (1)(a) or (2)(a) and-
- (a) where subsection (1) applies, the tax charged as mentioned in subsection (1)(b);
  - (b) where subsection (2) applies, the tax charged as mentioned in subsection (2)(b) in relation to so much of the other sum as does not exceed the amount of the loan or advance that has to be repaid as mentioned in subsection (2)(c).
- (6) Consequential adjustments may be made-
- (a) in respect of any period,
  - (b) by way of an assessment, the modification of an assessment, the amendment of a claim, or otherwise, and
  - (c) despite any time limit imposed by or under any enactment.

The IF Manual provides:

**IFM36730: Avoidance of double taxation: Claim under the first provision** [Oct 2020]

**Claim under the first provision**

...

Example: Fund disposal of an investee company

A fund disposes of an investee company. The proceeds from the disposal are, as a matter of fact, allocated to the individual at the level of a General Partner Limited Partner (GP-LP) entity and used to meet an annual fee. This gives rise to a charge under the DIMF rules. The individual's share of the proceeds are £2m. The individual is also liable to capital gains tax on the share disposal.

The individual has been taxed twice as a result of the DIMF rules and the CG charge on disposal. The individual may therefore be able to make a claim for a consequential adjustment to the CGT charge.

Example: Following the change in the definition of fees 'arising' from 22 October 2015

Following the changes made to the definition of arise with effect from 22 October 2015 (discussed below) a disguised fee arises to a fund

manager's husband (the fund manager having procured that part of the interest in the GP-LP to which she was entitled was instead issued to her husband). The gains and income which the husband is allocated at the level of GP-LP are taxable in his hands in accordance with their original characteristic for tax purposes, for example as a capital gain or dividend income. However, the sum is also treated as arising to the fund manager by virtue of the DIMF rules and is charged in her hands as a disguised fee to trading income.

The provision gives relief in respect of the 'other tax' which is the tax paid by the fund manager's husband in this example. In order to facilitate a just and reasonable claim an officer of HMRC may deem the fund manager's DIMF charge to have been paid by her husband as an administrative easement. This easement, however, is only for administrative purposes and in no way should the application of the easement provide a tax advantage for either party. If a tax advantage is achieved then this may lead to penalties.

In both examples, if the claim is allowed, then the adjustment will be limited by ITA07/S809EZG(5) to the lower of:

- the tax charge under the DIMF rules; and
- the other tax involved.

**IFM36740: Avoidance of double taxation: Claim under the second provision** [Oct 2020]

**Claim under the second provision**

**ITA07/S809EZG(2)**

*ITA07/S809EZG(5)*

This provision applies where income tax is charged to an individual in respect of a disguised fee under the disguised investment management fees (DIMF) rules and this fee has been paid by way of a loan or advance. If this loan or advance is then discharged by using some of the profits of the fund then there may be a further DIMF charge.

*Example: Loan advance paid to manager*

An individual investment manager gets a loan from an investment scheme. Three years later, profits arise in a way that means the profits are not included as profits of a trade and this profit is used to discharge the outstanding loan. The DIMF rules determine that an untaxed management fee arises both at the time the loan is made and again when the profits are used to repay the individual's loan.

The individual has been taxed twice despite the latter profits offsetting the amount that would have at some point been repayable under the individual's loan. Relief can be given against the DIMF charge which

is due in respect of the latter profit payment.

### 69.13.1 *Expenses*

The IF Manual provides:

**IFM36720: Avoidance of double taxation: Consequential adjustment** [Oct 2020]

**Consequential Adjustment**

...Expenses

In circumstances where the General Partner Limited Partner (GP-LP) or the General Partner Limited Liability Partner (GP-LLP) structures are in place in a limited partnership fund (LP Fund) some of the monies flowing through the GP-LP or GP-LLP may be applied in meeting genuine commercial expenses of the LP Fund. The amount applied to these expenses will not be treated as arising to the individuals managing the fund, provided they would be deductible when calculating the profits of a trade of the GP-LP or GP-LLP under normal UK tax principles.

However, in most cases it is unlikely that such expenses would be deductible from investment income and gains arising to members of the GP-LP or GP-LLP from the LP Fund.

The fund manager may therefore be charged to capital gains tax, for example, on the gross gain treated as arising under Statement of Practice D12. Only the net amount actually arising after genuine expenses have been paid is charged under DIMF rules.

HMRC accept that the CGT charged on the gross gain can be reduced under ITA07/S809EZG (up to the amount of tax charged under the DIMF rules in the unlikely situation that the CGT charge exceeds the former). This is the case even though the charge under the DIMF rules will be on the net sum arising.

This treatment will only be permitted as just and reasonable in relation to genuine commercial expenses where those expenses would have been deductible in calculating the profits of a trade of providing investment management expenses in line with the clear purpose of the DIMF rules. It cannot be used to access relief on expenses which would not have been deductible when calculating trading profits.

### 69.14 **Carried interest: CGT**

Armed with the definition of carried interest,<sup>33</sup> we can turn to the rules for carried interest.

Section 103KA(1) TCGA provides:

This section applies where–

- (a) an individual (“A”) performs investment management services directly or indirectly in respect of an investment scheme under arrangements involving at least one partnership, and
- (b) carried interest arises to A under the arrangements.

I refer to this as an “investment-services arrangement”. But the requirement is different from the investment-services arrangement relating to DIMF, as s.103KA only applies if the arrangement involves a partnership. A partnership is not needed for DIMF.

DIMF draft guidance provides:

15. ... section 103KA(1)(a) does not refer to carried interest arising from any particular investment scheme. Section 103KA therefore applies to any carried interest which arises to an investment manager, even if it arises from another investment scheme in relation to which no investment management services are in fact provided. The only condition is that the carried interest arises to the fund management under the arrangements by which he or she provides investment management services to a collective investment scheme ...

16. In virtually all situations, HMRC considers that carried interest (given its commercial rationale) will only arise to individuals where this condition is met. To give an example, a fund manager may manage Fund X at an asset management house. The fund manager may also be given carried interest in another fund managed by a different team (Fund Y). This is part of the remuneration structure at the business where the fund managers are given cross-exposure to the performance of each other’s funds. Here, the carried interest is arising to the fund manager from Fund Y because he or she is performing investment management services to Fund X and so the carried interest arising from both funds falls within section 103KA.

17. Section 103KA also applies where a fund manager has retired or has ceased to perform investment management services and is still in receipt of carried interest. Section 103KA(1) does not include any requirement

---

33 See 69.5 (“Carried interest”).

that the individual is still performing investment management services when the carried interest arises provided the fund manager is performing, or has previously performed, investment management services. If the fund manager has at some point performed investment management services in respect of a collective investment scheme and the carried interest arises under those arrangements, it comes within the scope of these rules.

#### 69.14.1 *Carried-interest charges*

Section 103KA(2) TCGA provides:

If the carried interest arises to A in connection with the disposal of one or more assets of the partnership or partnerships–

- (a) a chargeable gain equal to the amount of the carried interest less any permitted deductions (and no other chargeable gain or loss) is to be treated as accruing to A on the disposal, and
- (b) the chargeable gain is to be treated as accruing to A at the time the carried interest arises.

I refer to this as the “**partnership CI charge**”.

This typically arises when a partnership sells assets and a distribution is made to the partners including carried interest holders.

The gain which is treated as arising is the “**carried interest gain**”. This is a notional (fictional) gain. It is computed according to carried interest rules, and not on CGT principles. It is distinct from the gain (if any) on any actual disposal. A carried interest gain arises if the asset actually disposed of:

- (1) is not a chargeable asset (eg it may be a qualifying corporate bond) or
- (2) is a foreign asset (otherwise qualifying for the CGT remittance basis)
- (3) is sold at a loss (applying CGT computation principles)

DIMF draft guidance provides:

*Section 103KA(2) – disposals property of a partnership*

20. ... HMRC expect that section 103KA(2) will apply to most carried interest arising from most “classic” fund structures, where the fund is structured as limited partnership and the carried interest awarded to fund managers is held through another limited partnership (which is a limited partner in the fund limited partnership as shown in the diagram at paragraph 6 of section 1 above.) Section 103KA(2) is therefore also the primary means by which the legislation counters “base cost shift”

and “cherry picking” as these both required carried interest to arise through partnership structures.

21. As outlined above, where carried interest arose to an individual from the disposal of assets held in a partnership (such as the disposal of an investment held by a fund limited partnership) the quantum of the gain treated as arising to the individual was previously calculated in accordance with SoP D12. Section 103KA(2) supersedes SoP D12 where it applies and substitutes a new, statutory, method to determine the quantum of the gain treated as arising. Section 103KA(2)(a) provides that a gain equal to the amount of carried interest arising less any permitted deductions will arise. As noted below, “permitted deductions” are narrowly defined and section 103KA(2) will charge a fund manager on their true economic gain from the carried interest rather than the amounts calculated under SoP D12.

22. Please note, that section 103KA(2)(a) provides that the gain treated as arising under this section is the only chargeable gain (or loss) treated as arising in respect of that disposal of partnership property, and section 103KA(2)(b) also potentially alters the timing of when the gain accrues to the point at which the carried interest arises to the fund manager. Section 103KA(2) therefore acts to adjust both the timing and quantum of any gain arising to a fund manager which comprises carried interest.

23. In some circumstances a gain may accrue to an individual under SoP D12 before section 103KA is invoked. This is because section 103KA is triggered by a sum arising to a fund manager, whereas a gain can be treated as accruing under the general scheme of CGT and SoP D12 when a partnership asset is disposed of, even if the proceeds are retained and no sum arises to the relevant individual. This is most likely to occur where a partnership asset is disposed of necessitating the calculation of a gain under SoP D12 but where the carried interest is placed into escrow (as discussed below at paragraphs 37-44) such that no sum “rises” to the fund manager at that time. There is nothing at this stage to prevent the gain calculated in accordance with SoP D12 accruing to the fund manager and he or she will be taxed on that gain in accordance with his or her own circumstances. However, once the sum is released from escrow and a sum “rises” to the fund manager, the chargeable gain accruing under section 103KA(2) vacates and supersedes the earlier gain at that point – section 103KA(2) putting beyond doubt that the gain calculated under that section is the only gain treated as arising to the fund manager.

24. Please note the exclusivity of section 103KA(2) also applies in

respect of any loss that would otherwise accrue to a fund manager under SoP D12 (for example, where the hurdle has been hit and the fund manager is receiving carry which is paid out of the disposal of an asset at a loss). Here a gain accrues to the fund manager equal to the sum received, less any permitted deductions, and no loss is treated as accruing to the individual. Where there is the timing difference referred to above (i.e. an asset is disposed of at a loss some time before the proceeds are distributed in a way which prevents a sum “rising” to the fund manager until that later point) it may be prudent for a taxpayer not to claim that loss under section 16(2A), TCGA 1992. If the loss has been claimed as an allowable loss and section 103KA(2) is later invoked such that the loss is vacated and treated as never having arisen, the fund manager may find that his previous tax return(s) are incorrect and that tax has been underpaid.

DIMF draft guidance provides:

26. Please note, in common with other references in the TCGA, “asset” in section 103KA(2) refers to an asset the disposal of which could give rise to a chargeable gain. Where an asset is effectively exempt from capital gains tax under general principles, the carried interest will be charged under section 103KA(3) rather than section 103KA(2). This is most likely to arise in respect of qualifying corporate bonds (or QCBs) within section 116, TCGA 1992 which do not give rise to chargeable gains. The loan notes issued to funds to represent shareholder debt are often QCBs and so carried interest satisfied out of their repayment will come within section 103KA(3) rather than section 103KA(2).

#### 69.14.2 *General CI charge*

Section 103KA(3) TCGA provides:

If the carried interest arises to A in circumstances other than those specified in subsection (2), a chargeable gain of an amount equal to the amount of the carried interest less any permitted deductions is to be treated as accruing to A at the time the carried interest arises.

I refer to this as the “**general CI charge**”; and the partnership and general CI charges together are the “**carried-interest charges**”. Comparing the two charges:

**Partnership CI charge**

Disposal of partnership asset

**General CI charge**

No disposal of partnership asset

CI gain accrues to A	<i>Same</i>
No other gain/loss accrues to A	No equivalent rule

### 69.14.3 *Who receives carried interest*

Section 103KG(1) TCGA provides:

For the purposes of this Chapter [Chapter 5 part 3], carried interest “arises” to an individual (“A”) if, and only if, it arises to him or her for the purposes of Chapter 5E of Part 13 of ITA 2007.

See 69.9 (Who receives DIMF).

The usual terminology is that income *arises* and gains *accrue*. Consistently with that, a carried interest gain is said to accrue, and carried interest is said to arise. The carried interest rules adopt the DIMF code, which concerns income rather than gains, and so used the word “arises”. But “arise” and “accrue” amount to the same thing.

The IF Manual provides:

**IFM37268: Charging Provisions: Definition of "arising": Sums released from escrow** [Oct 2020]

**Sums released from escrow**

... The deferred carried interest rules modify the application of the enjoyment conditions in relation to companies through TCGA92/S103KG(8)-(11). This mirrors the modification as part of the Disguised Investment Management Fees (DIMF) rules seen at ITA07/S809EZDB (6)-(9) (IFM36335).

### 69.14.4 *Carried interest trade receipt*

Section 103KA(4) TCGA provides:

Subsections (2) and (3) [carried-interest charges] do not apply in relation to carried interest to the extent that–

- (a) it is brought into account in calculating the profits of a trade<sup>34</sup> of A for the purposes of income tax for any tax year

DIMF draft guidance provides:

This ensures that fund managers who receive a performance fee which

---

34 Section 103KA(8) TCGA provides: “In this section ... “trade” includes profession or vocation.”

is brought into account when calculating their trading profits do not need to claim relief from the CGT charge under this legislation to avoid double taxation.

### **69.15 “Permitted deductions”**

This term is used in the computation of carried-interest gains.

Section 103KA(5) TCGA provides:

For the purpose of subsections (2) and (3) “permitted deductions” in relation to A means such parts of the amounts specified in subsection (6) as is just and reasonable.

Permitted deductions are more narrowly defined than the usual rule for CGT deductions (in s.38 TCGA). There are three categories of permitted deduction. Section 103KA(6) TCGA provides:

The amounts referred to in subsection (5) are—

- (a) the amount of any consideration in money given to the scheme by or on behalf of A wholly and exclusively for entering into the [investment-services] arrangements referred to in subsection (1)(a) (but not consideration in respect of co-investments),

The other two deductions deal with the overlap with employment income:

- (b) any amount that constituted earnings of A under Chapter 1 of Part 3 of ITEPA 2003 (earnings) in respect of A’s entering into those arrangements (but not any earnings in respect of co-investments or any amount of exempt income within the meaning of section 8 of that Act), and
- (c) any amount which, by reason of events occurring no later than the time the carried interest arises, counts as income of A under the enactments referred to in section 119A(3) [employment-related securities] in respect of A’s participation in the [investment-services] arrangements referred to in subsection (1)(a) (but not an amount counting as income of A in respect of co-investments); (and section 119A(5) applies for the purposes of this paragraph as it applies for the purposes of section 119A(4)).

For the purposes of this Act no other deduction may be made from the amount of the carried interest referred to in subsection (2) or (3).

Section 103KA(7) TCGA allows a deduction where carried interest is

acquired for consideration:

Where the carried interest arises to A by virtue of his or her acquisition of a right to it from another person for consideration given in money by or on behalf of A, the amount of the chargeable gain accruing to A under subsection (2) or (3) is, on the making of a claim by A under this subsection, to be regarded as reduced by the amount of the consideration.

The IF Manual provides:

**IFM37236: Charging provisions: Operation of the charge: Permitted deductions** [Oct 2020]

**Permitted deductions**

... Deductions are not permitted for base cost contributed by other members of the partnership, or attributable to revaluations of the partnership assets, as was previously possible under Statement of Practice D12 (the “base cost shift”, explained in IFM37160).

2017 Rebasing does not apply, because although there is a deemed disposal and re-acquisition, it is not deemed to be for money. HMRC agree.<sup>35</sup>

## 69.16 Co-investment

Section 103KA(4) TCGA provides:

Subsections (2) and (3) [carried-interest charges] do not apply in relation to carried interest to the extent that...

- (b) it constitutes a co-investment repayment or return.

Section 103KA(8) TCGA defines co-investment:

In this section-

“co-investment”, in relation to A, means

- [a] an investment made directly or indirectly by A in the scheme,
- [b] where there is no return on the investment which is not an arm’s length return within the meaning of section 809EZB(2) of ITA 2007;

Section 103KA(8) TCGA defines repayment or return:

---

<sup>35</sup> See 53.14.7 (Effect of 2017 rebasing), and Rebasing Q&As Question 1.

“co-investment repayment or return” means a repayment in whole or in part of, or a return on, a co-investment;

## 69.17 Disposal of carried interest

Section 103KB TCGA provides:

(1) For the purposes of section 103KA [carried-interest charges], consideration received or receivable by an individual for the disposal, variation, loss or cancellation of a right to carried interest is to be treated as carried interest arising to that individual at the time of the disposal, variation, loss or cancellation.

(2) But subsection (1) does not apply if and to the extent that the consideration is a disguised fee arising to the individual for the purposes of section 809EZA of ITA 2007.

The IF Manual provides:

### **IFM37232: Charging Provisions: Operation of the charge: Disposals [Oct 2020]**

#### **Disposals**

#### **Disposal of partnership assets**

... The general rules in TCGA92, which determine whether a disposal has taken place and for what consideration, will also apply to this section. In particular, TCGA92/S17 will apply to treat an individual as having received market value for a right to carried interest when it is disposed of otherwise than at arm’s length. In circumstances where an individual is forced to dispose of their right to receive carried interest, TCGA92/S17(1)(b) will not apply to the individual making the disposal, where the disposal is sufficiently disassociated to services rendered.

DIMF draft guidance provides:

54. When initially published, the draft Finance Bill contained provisions which would have disregarded restrictions which reduced the value of a right to carried interest for the purposes of section 17. The government was persuaded that this approach was not appropriate and with the expanded definition of “arise” no longer necessary. Such restrictions are not, therefore, disregarded on disposals of carried interest which come within section 17 under Finance (No.2) Act as enacted.

55. So if an individual disposed of their right to carried interest in favour of their child or to an unconnected entity but on non-arm’s length

terms (for example, as a gift to a trust structure from which only their adult children could benefit in an attempt to mitigate the impact of the new rules), the amount charged as a capital gain under this measure will equal the market value of the right to carried interest at that time taking into account any restrictions.

## **69.18 Carried-interest remittance basis**

Section 103KC TCGA provides:

In a case where section 103KA [carried-interest charges] applies, a chargeable gain accruing or treated as accruing to an individual in respect of carried interest is a chargeable gain accruing on the disposal of an asset situated outside the UK only to the extent that the individual performs the services referred to in section 103KA(1)(a) [investment management services<sup>36</sup>] outside the UK.

This extends the remittance basis to UK situate carried interest. In practice carried interest is usually non-UK situate, so the issue does not arise.

Where possible, it is advantageous for investment activity to be performed abroad.

The approach to apportionment should be the same as for employment income.<sup>37</sup>

Records should be kept to show where the work was done. For periods before the legislation was introduced, taxpayers would not have expected to need this, and records may be difficult to recover; the rules operate with an element of retrospectivity. But there it is.

DIMF draft guidance provides:

59. This replaces the normal rule at section 12, TCGA 1992 that defines a foreign chargeable gain by reference to the location of the assets disposed of. Given that carried interest arises in relation to the performance of investment management services, looking to the location where these are performed rather than the location of the assets used to satisfy the carried interest is more appropriate and reflects the “hybrid” nature of the receipt as having some characteristics of an investment return and others of a reward for services.

---

36 See 69.14 (Carried interest: CGT).

37 See 33.31 (Earnings “in respect of” UK duties).

...

61. For some individuals' circumstances, a simple apportionment of their gain based on day-count may produce an acceptable result but in other cases, where more significant management duties are consistently performed in one territory than are performed in another, a simple time-apportionment will tend to under- or over-state the foreign chargeable gain which accrues. Please note that generally the focus will be on the services performed by the individual fund manager – a fund manager who performs the vast majority of their investment management services outside the UK would not be prejudiced by the activities of his or her UK focused colleagues.

62. For example, a UK-based German national may work for a UK headquartered fund. Her office is based in London where she and her family are based. However, her role in the fund is very much focused on Germany and Austria and she leads the teams responsible for investment in those jurisdictions. She spends, on average, 2-3 days a week in Germany but this misrepresents her input. In relation to most transactions on which she works, the fund manager spends an extended period of time setting up and negotiating the original acquisition and subsequently stays in Germany for, say, one week a month to support the management team before staying for a further extended period to negotiate the disposal. Here a day-count may not be appropriate and it is likely that a greater proportion than the c.25% produced by looking at one week out of four is the correct proportion treated as a foreign chargeable gain under the new section 103KC.

63. Similarly HMRC are aware that, for some types of closed-ended funds, carried interest will arise in one year which, in truth, reflects services performed by an individual over a longer period. In such a situation, it may be correct to look at where services have been performed over prior years although, again, this will depend on individual facts and circumstances. For example, an individual involved in fund-raising for a fund may spend the first few years of a fund's life travelling seeking to raise funds from investors outside the UK, only returning to the UK at irregular intervals and generally because it presents their personal home. Once the fund raising process is finished there may be a period where the individual is effectively based in the UK full-time, maintaining relations with investors. Subsequently, before the first fund has even begin to pay carried interest, the fund raiser may recommence travelling seeking to raise commitments for the next fund. Here, those early years largely spent overseas will probably carry more

weight when determining what proportion of the carried interest represents a foreign chargeable gain. An additional example of such a situation is provided in Chapter 3.

64. These two examples are intended to be helpful and to show when HMRC will potentially accept a more generous split under section 103KC in favour of a foreign chargeable gain. However, section 103KC is a double-edged sword and will also operate to increase the proportion of carried interest taxable on a remittance basis user on the arising basis. As a general observation HMRC will be prepared to give weight to activities performed in the underlying jurisdictions where a fund invests.

The IF Manual provides:

**IFM37330: Foreign chargeable gains: Low tax jurisdictions** [Oct 2020]

**Low tax jurisdictions**

The successful performance of a fund which generates carried interest does not arise from tax efficient holding structures but the management of genuine underlying business operations. This is especially true where services based in low tax jurisdictions are labelled as marketing services, investor relations or other vague descriptions which seek to disguise the real contribution of value by the management team in the offshore financial centres where they are normally based.

The correct proportion of carried interest applicable to UK taxation will not be affected by the attempt to disguise the legitimate underlying investment management services.

69.18.1 *Record keeping*

The IF Manual provides:

**IFM37340: Foreign chargeable gains: Record keeping requirements** [Oct 2020]

**Record keeping requirements**

HMRC recognises that carried interest may arise in relation to services performed prior to the introduction of the carried interest rules in Finance (No. 2) Act 2015 (IFM37150) and therefore individuals would not have been aware of the need to keep the relevant records.

HMRC will adopt a pragmatic approach to record keeping and the evidence used to identify a just and reasonable split for foreign chargeable gains.

For remittance basis users, HMRC would expect the customer to have already recorded the information required to determine their residency position and accurately return the income and gains eligible for taxation under the remittance basis.

Additional information may be required to evidence specific duties performed, their location or duties performed over certain periods of time.

### 69.18.2 *Mixed carried interest funds*

The IF Manual provides:

**IFM37350: Foreign chargeable gains: Mixed funds** [Oct 2020]

**Mixed funds**

**TCGA92/S103KA - S103KC**

*ITA07/S809Q*

In general where a remittance of a sum is made to the UK which comprises various items for tax purposes, the mixed funds rules determine the order in which sums are treated as remitted to the UK. Core mixed funds rules can be found at ITA07/S809Q.

Carried interest may comprise foreign chargeable gains and “UK chargeable gains” (taxable on the arising basis when arising to a remittance basis tax payer). If a sum of carried interest was to be considered from a mixed fund, the foreign chargeable gain would be treated as remitted in priority to the UK chargeable gain being taxed under the arising basis. The individual would therefore be required to pay tax on that foreign chargeable gain when making a remittance, in addition to paying tax due on the chargeable gain being taxed under the arising basis. This is in line with ITA07/S809Q.

In circumstances where a non-domiciled individual performs services that give rise to carried interest in the UK and one or more jurisdictions, the carried interest rules produce two separate gains, one relating to UK services and one relating to non-UK services. As two gains are brought into existence at the same time there is no mixed fund from the perspective of the individual in the account of the payor. It is therefore possible to split a sum of carried interest into two separate payments, with one being the foreign chargeable gain. If these two funds are never comingled, a mixed fund will not come into existence.

This does not alter the application of the mixed funds rules to the extent that each of the two carried interest gains may represent a mixed fund of different items determined on general principles. It only applies to

the joint effect of TCGA92/S103KA and TCGA92/S103KC with the result that the gains those sections give rise to will not constitute elements of a single mixed fund unless they are actually paid into a single account, thus making that account a mixed fund.

This analysis derives from the terms of TCGA92/S103KC. HMRC do not consider it justifiable in respect of any other situation or potential mixed fund.

## **69.19 Non-residents**

Non-residents are not in general subject to CGT, and this rule applies to carried interest. This is deliberate.<sup>38</sup>

## **69.20 Other anti-avoidance rules**

The usual CGT anti-avoidance rules are not needed because of the rules as to who receives carried interest.<sup>39</sup> This was overlooked at the time of the introduction of the carried interest rules, and so the following provisions were inserted with retrospective effect in 2017.

### *69.20.1 Carried interest outside s.3*

Section 13(1A) TCGA formerly provided:

*But this section does not apply if the gain is ...*

*(c) a chargeable gain treated as accruing under section 103KA(2) or (3) (carried interest gains).*

This took carried-interest gains outside s.13 TCGA, now s.3 TCGA. Where is the equivalent in the 2019 CGT rewrite?

### *69.20.2 Carried interest outside s.86*

Section 86(4B) TCGA provides:

Where (apart from this subsection) the amount mentioned in subsection (1)(e) would include an amount of chargeable gains treated as accruing under section 103KA(2) or (3) (carried interest gains), the amount of the gains is to be disregarded for the purposes of subsection (1)(e).

This takes carried-interest gains outside s.86 TCGA.

---

<sup>38</sup> 2015 carried-interest guidance para 41.

<sup>39</sup> See 69.14.3 (Who receives carried interest).

### 69.20.3 *Carried interest outside s.87*

Section 87(5B) TCGA provides:

Where (apart from this subsection) the amount mentioned in subsection (4)(a) would include an amount of chargeable gains treated as accruing under section 103KA(2) or (3) (carried interest gains), the amount of the gains is to be disregarded for the purposes of determining the section 1(3) amount.

In short, carried-interest gains are not s.1(3) amounts (trust gains) and so are outside s.87 TCGA.

## 69.21 **Carried-interest TAAR**

Section 103KD TCGA provides:

In determining whether section 103KA [carried-interest charges] applies in relation to an individual, no regard is to be had to any arrangements the main purpose, or one of the main purposes, of which is to secure that that section does not to any extent apply in relation to-

- (a) the individual, or
- (b) the individual and one or more other individuals.

In my terminology, this is an effect-style TAAR.<sup>40</sup>

## 69.22 **Carried interest double taxation**

### 69.22.1 *Conditions for relief*

Section 103KE TCGA provides:

- (1) This section applies where-
  - (a) capital gains tax is charged on an individual by virtue of section 103KA in respect of any carried interest, and
  - (b) Condition A or Condition B is met.
- (2) Condition A is that-
  - (a) at any time, tax (whether income tax or another tax) charged on the individual in relation to the carried interest has been paid by the individual (and has not been repaid), and
  - (b) the amount on which tax is charged as specified in subsection

---

<sup>40</sup> See 2.10 (TAAR/unallowable purpose test).

(1)(a) is not a permissible deduction under section 103KA(6)(b) or (c).<sup>41</sup>

(3) Condition B is that at any time tax (whether income tax or another tax) charged on another person in relation to the carried interest has been paid by that other person (and has not been repaid).

It will almost always be the case that one or other of these conditions is satisfied.

The IF Manual provides:

**IFM37240: Charging provisions: Interaction with other taxes** [Oct 2020]

**Interaction with other UK taxes**

A charge under TCGA92/S103KA does not displace any charge to tax other than CGT that arises by reference to the carried interest. If carried interest represents an amount of income, for example dividends or interest, the fund manager will have two liabilities to tax. Firstly, a liability to income tax on the amount determined in accordance with the appropriate rules (e.g. dividend treatment). Secondly, a chargeable gain calculated in accordance with TCGA92/S103KA(2) or (3) as appropriate. Relief may be claimed for that other tax against the CGT charged under the carried interest rules (IFM37400). This is only applicable to taxes charged under the UK Taxes Acts.

**IFM37420: Prevention of double taxation: Double taxation adjustment** [Oct 2020]

**Double taxation adjustment**

**TCGA92/S103KE(6)-(8)**

The value of adjustments made will not exceed the lesser of:

The capital gains tax charge in respect of the carried interest under the new legislation; and

The other tax paid.

Note that, when considering an adjustment, the other tax must have been paid.

Subject to the next paragraph, an adjustment will not be made if the sum may become chargeable to another tax or if the other tax has only been charged and not paid. Where the other tax has been paid, the individual should file their tax return for the year in which the carried

---

41 Para (2)(b) applies where the carried interest is earnings or employment-related security income: see 69.15 (“Permitted deductions”).

interest arises and claim under these rules for an adjustment to be made in that tax return. If another tax is paid after the capital gain tax (CGT) has been paid, the individual will be able to make a claim to avoid double taxation by amending their tax return or by other means in line with normal rules and time limits rather than relying on TCGA/103KE(7).

Where a sum of carried interest is charged to both CGT under these rules and also income tax in the same year (for example, where the sum represents interest or dividend income), resulting in two charges in respect of the carried interest, a claim can be made in the appropriate tax return so that the appropriate liability is paid and double taxation does not arise. HMRC will treat the income tax as paid by the payment made with the tax return for the year in question. Paying both the income tax due and capital gains tax due at the same time will not be required to request repayment.

Each component of the carried interest arising should be considered separately when determining relief due under TCGA92/S103KE. When a sum comprises a series of items, double taxation relief will be given on an item by item basis and not on a sum as a whole. It will therefore only be possible to set the other tax due on a particular component of the sum arising against the CGT due on that component, rather than the CGT due on the sum as a whole. This is considered to be a just and reasonable approach, in accordance with TCGA92/S103KE(5).

**Example 1**

A sum comprises Item X, Item Y and Item Z. These will be dealt with as three individual items and not as one whole item. This would mean any other tax paid on Item X can only be set against the CGT due on Item X and not on the combined sum of CGT due on Item X, Item Y and Item Z.

**Example 2**

A sum of carried interest totals £2,000 and comprises debt principal of £1,000 and £1,000 of interest on that debt. Relief under TCGA92/S103KE would be given as follows:

The £1,000 of principal is “carried interest” and is charged to CGT at 28% under the carried interest rules amounting to £280.

The £1,000 of interest is also “carried interest” and so charged to CGT at 28% amounting to £280. Income tax charged at 45% will need to be paid and this amounts to £450.

Relief under TCGA92/S103KE allows full relief against the £280 of CGT due on the interest; the income tax payable of £450 effectively

discharges the CGT liability due.

The income tax payable cannot also be set off against the CGT due on the principal. Income tax arises only in respect of the interest and not against the CGT of any other item within the £2,000 (£1,000 principal plus £1,000 interest) carried interest sum.

The net tax charge will therefore be £730:

CGT paid on principal:	£ 280
CGT paid on interest:	£ 280
Income tax paid on interest:	£ 450
Total tax paid:	£1,010
Double taxation relief:	£ (280)
Net tax payable:	£ 730

### 69.22.2 *Foreign tax*

DIMF draft guidance provides:

72. Please note that in contrast to the DMF Rules, section 103KE adjusts the CGT charge under section 103KA to eliminate double taxation (the DMF Rules preserve the charge under section 809EZA by contrast and adjust the “other tax”). As “tax” is not defined for the purposes of the TCGA, it is therefore possible for HMRC to make an adjustment to the charge under section 103KA in respect of non-UK tax to avoid double taxation. To give a very simple example, a US citizen fund manager will be chargeable to US tax on their worldwide income. That fund manager is resident in the UK for tax purposes however and receives carried interest through a partnership structure which is charged to tax under section 103KA(2). For US tax purposes however, the entities in that structure have made “check the box” elections such that it is treated as transparent for US tax purposes. The fund manager is therefore treated as receiving underlying dividend income for US tax purposes and this is charged to US Federal Income tax at a rate in excess of 28%. Here HMRC would accept that the US tax is suffered “in relation to” the carried interest and given the drafting of section 103KE, would be able to adjust down the UK charge under section 103KA to avoid tax. Please note that in situations where the UK has a primary taxing right over the carried interest (as would be likely on the above example) it will only be just and reasonable to grant relief where it is not possible to obtain a tax credit in the other relevant jurisdiction. Section 103KE only operates as a credit of the “last resort” in these cases.

73. If tax has been paid on amounts which are then treated as permitted

deductions in computing the chargeable gain then no relief is available against CGT in respect of that tax under this provision.

74. The value of the adjustments made will not exceed the lesser of: a. the capitals gains tax charge in respect of the carried interest under the new legislation; and b. the other tax paid.

### 69.22.3 “Paid”

DIMF draft guidance provides:

75. The other tax in respect of which an adjustment is sought must have been paid by the individual. It is not sufficient that the sum is charged or may be chargeable to another tax. Often, this other tax will have been paid by the time the individual files his or her tax return for the year in which the carried interest arises: a claim under these rules for an adjustment should then be made in that tax return. Please note that, where a sum of carried interest is charged to capital gains tax under this measure but is also charged to income tax in the same tax year (for example, where the sums represent interest or dividend income to the underlying partnership), such that there are two charges in respect of that carried interest, a claim can be made in the appropriate tax return without the need to discharge both tax liabilities. HMRC will treat the income tax as having been “paid” by the payment made alongside the tax return for the year in question. It would not be necessary to pay both the income tax due and capital gains tax charged under this measure at the same time before requesting a repayment.

76. Where, however, another tax is paid after the CGT charged under the new rules has been paid, the individual will be able to make a claim to avoid double taxation through an amendment to their tax return (where possible) or by other means in accordance with the normal rules and time limits.

77. As explained above in paragraph 46, this legislation establishes a minimum level of tax on carried interest rather than a new regime which disregards the underlying receipts to the fund partnership. This means each component of the sum arising is looked at separately when determining what relief should be given under section 103KE. Where a sum comprises a series of items, double taxation relief will be given on an item by item basis (i.e. it will only be possible to set the other tax due on a particularly component of the sum arising against the CGT due on that component, rather than the CGT due on the sum as a whole). This is the only approach which will be considered “just and reasonable” in accordance with section 103KE(3) by HMRC.

78. Using the same figures as the example in paragraph 47, section 103KE would work as follows.

- The £1000 of principal is “carried interest” and so is charged to capital gains tax at 28% under this measure ( £280).
- The £000 of interest is also “carried interest” and so charged to capital gains tax at 28% (£80). Income tax at 45% (£50) must still be paid.

Section 103KE will allow full relief against the £80 of CGT technically due on the interest income under these rules. The income tax payable on the interest would effectively discharge CGT liability on the same sum. However, the income tax due on the interest income cannot also be set off against the capital gains tax due on the principal. The income tax arises in relation to the interest and so can only be relieved against the capital gains tax due on that interest, and not against the CGT due on any other item which is represented in the sum of carried interest.

#### 69.22.4 *Double taxation adjustment*

Assuming these conditions are satisfied, we move on to the relief. Section 103KE TCGA provides:

(4) In order to avoid a double charge to tax, the individual may make a claim for one or more consequential adjustments to be made in respect of the capital gains tax charged as mentioned in subsection (1)(a).

(5) On a claim under this section an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.

(6) The value of any consequential adjustments made must not exceed the lesser of-

- (a) the capital gains tax charged as mentioned in subsection (1)(a), and
- (b) the tax charged as mentioned in subsection (2)(a) or (3).

This seems an unnecessarily complicated way to express the cap on the relief, but there it is.

(7) Consequential adjustments may be made-

- (a) in respect of any period,
- (b) by way of an assessment, the modification of an assessment, the amendment of a claim, or otherwise, and
- (c) despite any time limit imposed by or under an enactment.

This is the equivalent of the DIMF rule: see 69.13 (DIMF double taxation).

#### 69.22.5 *Claim to disregard losses*

Section 103KE(8) TCGA provides:

Where-

- (a) an individual makes a claim under this section in respect of a year of assessment, and
- (b) apart from this subsection, an amount falls to be deducted under section 1(3)(b) [carried-forward losses<sup>42</sup>] from the total amount of chargeable gains accruing to the individual in that year, the individual may elect that the amount to be so deducted be reduced by any amount not exceeding the amount on which tax is charged as specified in subsection (2)(a) or (3).

This may be relevant where an individual receives a sum which is both income and carried-interest gain. Setting carried-forward capital losses against the carried-interest gain would be wasteful, because the gain qualifies for double taxation adjustment relief.

### 69.23 External investors

Section 103KF TCGA provides:

(1) If-

- (a) a chargeable gain accrues to an external investor<sup>43</sup> in an investment scheme on the disposal of one or more partnership assets, and
- (b) the external investor makes a claim for relief under this section, then subsection (2) applies in relation to the disposal.

(2) The amount of the chargeable gain is to be reduced by an amount equal to-

I – C

where-

- (a) I is an amount equal to such part of the sum invested in the fund by the external investor which on a just and reasonable basis is

---

42 See 61.2 (Deduction of losses).

43 See 69.6.2 (“External investor”).

- referable to the asset or assets disposed of, and
- (b) C is the amount deducted under section 38(1)(a) in respect of consideration given wholly and exclusively for the acquisition of the asset or assets.

This sets aside the base cost shift in favour of the external investors.

## **69.24 Deferred carried interest**

Section 103KG(2) TCGA provides:

But section 809EZDB of ITA 2007 (sums arising to connected company or unconnected person) does not apply in relation to a sum of carried interest arising to-

- (a) a company connected with A, or
  - (b) a person not connected with A,
- where the sum is deferred carried interest in relation to A.

Section 103KG(3) TCGA provides:

In this section, “deferred carried interest”, in relation to A-

- (a) means a sum of carried interest where the provision of the sum to A or a person connected with A is deferred (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise), and
- (b) includes A’s share (as determined on a just and reasonable basis) of any carried interest the provision of which to A and one or more other persons, taken together, has been deferred (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise).

In this subsection, in a case where the sum referred to in subsection (2) arises to a company connected with A, the reference to a person connected with A does not include that company.

## **69.25 Interest ceases to be deferred**

Section 103KG TCGA provides:

- (4) Where-
  - (a) section 809EZDB of ITA 2007 has been disappplied in relation to a sum of deferred carried interest by virtue of subsection (2),
  - (b) the sum ceases to be deferred carried interest in relation to A, and
  - (c) the sum does not in any event arise to A apart from this

subsection,

the sum is to be regarded as arising to A at the time it ceases to be deferred carried interest.

(5) But subsection (4) does not apply if-

- (a) none of the enjoyment conditions is met in relation to the sum when it ceases to be deferred carried interest, and
- (b) there is no reasonable likelihood that any of those conditions will ever be met in relation to the sum.

#### 69.25.1 “*Enjoyment conditions*”

Section 103KG TCGA duplicates the definition in the DIMF legislation; see 69.11.1 (“*Enjoyment conditions*”).

(6) The enjoyment conditions are-

- (a) the sum, or part of the sum, is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of A or a person connected with A;
- (b) the sum’s ceasing to be deferred carried interest in relation to A operates to increase the value to A or a person connected with A of any assets which-
  - (i) A or the connected person holds, or
  - (ii) are held for the benefit of A or the connected person;
- (c) A or a person connected with A receives or is entitled to receive at any time any benefit provided or to be provided out of the sum or part of the sum;
- (d) A or a person connected with A may become entitled to the beneficial enjoyment of the sum or part of the sum if one or more powers are exercised or successively exercised (and for these purposes it does not matter who may exercise the powers or whether they are exercisable with or without the consent of another person);
- (e) A or a person connected with A is able in any manner to control directly or indirectly the application of the sum or part of the sum.

In this subsection, in a case where the sum referred to in subsection (2) arises to a company connected with A, references to a person connected with A do not include that company.

(7) In determining whether any of the enjoyment conditions is met in relation to a sum or part of a sum-

- (a) regard must be had to the substantial result and effect of all the

- relevant circumstances, and
- (b) all benefits which may at any time accrue to a person as a result of the sum ceasing to be deferred carried interest in relation to A must be taken into account, irrespective of-
    - (i) the nature or form of the benefits, or
    - (ii) whether the person has legal or equitable rights in respect of the benefits.

DIMF draft guidance provides:

44. ... the deferred carried interest rules also modify the application of the enjoyment conditions in the context of corporate structures. The relevant provisions at section 103KG(8)-(11) mirror subsections 809EZDB(6)-(9), ITA 2007 here.

Section 103KG TCGA provides:

(8) The enjoyment condition in subsection (6)(b), (c) or (d) is to be treated as not met if it would be met only by reason of A holding shares or an interest in shares in a company.

(9) The enjoyment condition in subsection (6)(a) or (e) is to be treated as not met if the sum referred to in subsection (2) arises to a company connected with A and-

- (a) the company is liable to pay corporation tax in respect of its profits and the sum is included in the computation of those profits, or
- (b) paragraph (a) does not apply but-
  - (i) the company is a CFC and the exemption in Chapter 14 of Part 9A of TIOPA 2010 applies for the accounting period in which the sum arises, or
  - (ii) the company is not a CFC but, if it were, that exemption would apply for that period.

In this subsection “CFC” has the same meaning as in Part 9A of TIOPA 2010.

(10) But subsections (8) and (9) do not apply if the sum referred to in subsection (2) arises to the company referred to in subsection (2)(a) or the person referred to in subsection (2)(b) as part of arrangements where-

- (a) it is reasonable to assume that in the absence of the [investment-services] arrangements the sum or part of the sum would have arisen to A or an individual connected with A, and
- (b) it is reasonable to assume that the [investment-services]

arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, inheritance tax or corporation tax.

(11) The condition in subsection (10)(b) is to be regarded as met in a case where the sum is applied directly or indirectly as an investment in a collective investment scheme.

(12) Subsection (2) does not apply in relation to any sum in relation to which the condition in subsection (8)(b) of section 809EZDB is met by virtue of subsection (9) of that section.

(13) Subsection (2) also does not apply if-

(a) it is reasonable to assume that the deferral referred to in subsection (3)(a) or (b) is not the effect of genuine commercial arrangements, or

(b) that deferral is the effect of such arrangements but it is reasonable to assume that the [investment-services] arrangements have as their main purpose, or one of their main purposes, the avoidance of a liability to pay income tax, capital gains tax, corporation tax or inheritance tax.

(14) In subsection (13), “genuine commercial arrangements” means arrangements involving A (alone or jointly with others performing investment management services) and external investors in the investment scheme.

## **69.26 Income-based carried interest**

The term “income-based” carried interest (“ICBI”) is used in:

- (1) Temporary non-resident rules
- (2) The definition of “management fee”

Section 809EZB(1) ITA provides (so far as relevant)

... “management fee” means any sum (including a sum in the form of a loan or advance or an allocation of profits) except so far as the sum constitutes ...

- c) carried interest which is not income-based carried interest.

The definition is in Chapter 5F Section 809FZA - 809FZY ITA, ie spread over 25 sections of ITA. So it cannot be covered here. Section 809FZA ITA provides an outline:

- (1) This Chapter [Chapter 5F] determines when carried interest arising to an individual from an investment scheme is “income-based carried

interest” for the purposes of Chapter 5E (and, in particular, section 809EZB(1)(c)).

(2) Section 809FZB contains the general rule, under which the extent to which carried interest is income-based carried interest depends on the average holding period of the investment scheme.

(3) Sections 809FZC to 809FZP contain further provision relating to average holding periods.

(4) Sections 809FZQ and 809FZR contain a particular rule for direct lending funds.

(5) Sections 809FZS and 809FZT contain an exception to the general rule for carried interest which is conditionally exempt from income tax.

(6) Sections 809FZU to 809FZZ contain supplementary and interpretative provision.

(7) Nothing in this Chapter [Chapter 5F] affects the liability to any tax of-

- (a) the investment scheme, or
- (b) external investors in the investment scheme.

Section 809FZB ITA provides:

(1) “Income-based carried interest” is the relevant proportion of a sum of carried interest arising to an individual from an investment scheme.

(2) The relevant proportion is determined by reference to the investment scheme’s average holding period as follows.

<b>Average holding period</b>	<b>Relevant proportion</b>
Less than 36 months	100%
At least 36 months but less than 37 months	80%
At least 37 months but less than 38 months	60%
At least 38 months but less than 39 months	40%
At least 39 months but less than 40 months	20%
40 months or more	0%

(3) This section is subject to the following provisions of this Chapter.

We leave the reader to journey on, unaccompanied, to the end of the definition.

### 69.27 ICBI: Returning non-resident

Section 809EZA(2A) ITA provides:

- Subsection (2B) applies instead of subsections (1)<sup>44</sup> and (2)<sup>45</sup> where-
- (a) one or more disguised fees arise to an individual in a tax year (“the relevant tax year”) from one or more investment schemes (whether or not by virtue of the same arrangements),
  - (b) the disguised fees consist of carried interest which is income-based carried interest,
  - (c) the individual is UK resident in the relevant tax year,
  - (d) before the relevant tax year, the individual was not UK resident for a period of at least five consecutive tax years (“the period of non-residence”), and
  - (e) either-
    - (i) the relevant tax year is the first tax year immediately after the end of the period of non-residence, or
    - (ii) the relevant tax year is the second, third, or fourth tax year after the end of that period and the individual has been UK resident in all the intervening tax years.

If these conditions are met, we move on.

Section 809EZA(2A) ITA provides:

To the extent that the income-based carried interest arises by virtue of pre-arrival services, the individual is liable for income tax for the relevant tax year in respect of it as if-

The rules are in para (a) and (b): it is convenient to read them side by side:

- |  |   |
|--|---|
| <p>(a) in relation to pre-arrival services<sup>46</sup> performed in the UK-</p> <p>(i) the individual were carrying on a trade for the relevant year consisting of the performance of those services,</p> | <p>(b) in relation to pre-arrival services performed outside the UK-</p> <p>[identical]</p> |
|--|---|

---

44 See 69.7 (DMIF: Deemed trade).

45 See 69.8 (Territorial limitation).

46 Section 809EZA(2C) ITA provides: “In subsection (2B) “pre-arrival services” means investment management services performed before the end of the period of non-residence.”

(ii) the income-based carried interest, so far as arising by virtue of those services, were profits of that trade, and [identical]

(iii) the individual were the person receiving or entitled to those profits, [identical]

Thus there are two deemed trades. I think the point is that the profits of the second may qualify for the remittance basis. But this relief does not apply if the individual is away for less than 5 years.

## **69.28 Returns and compliance**

IFM provides

**IFM36800: Returning sums chargeable under the disguised investment management fees (DIMF) rules: Returning sums chargeable under the disguised investment management fees (DIMF) rules** [Oct 2020 ]

### **Reporting period**

Sums that arise and are subject to the disguised investment management fees (DIMF) rules should be reported in reference to the tax year. Calendar year reporting is not acceptable unless the disguised fee arises from a profit allocation from a partnership. In these circumstances, this can be returned on the same basis period as that partnership see (IFM36160).

If a sum has been reviewed and DIMF is not believed to be applicable then a note should be included within the white space section that adequately explains why DIMF is not applicable in this case.

For example, if accounts for a partnership are drawn up to the 31 December 2016, and it has been agreed that the profits shown in those accounts are taxed as profits of 2016/17, then the same basis can be applied to the deemed trade.

### **How to return sums chargeable under these provisions**

Sums that arise and are subject to the DIMF rules should be entered on a separate Self-Employment page and returned within the Self-Assessment return.

On the return, the following fields should be completed, with the individual entering:

“Description of business” field: “sums arising under Chapter 5E of Part 13 ITA 2007”.

“Net profit or loss” field: The net profits under the DIMF rules.

“Total taxable profits or net business loss” field: The net profits under the DIMF rules.

“White space”: Details of each sum of the fund in relation to the individual and structure from which the sum arises should be noted in the computations or as a ‘white space’ disclosure.

In most cases HMRC expect that the sum will arise from a fund limited partnership potentially via a General Partner Limited Partner (GP-LP) or similar. The exact wording of the necessary disclosure will depend on the structure and the number of entities through which the sum has passed.

Where disguised fees arise from more than one fund or partnership then an analysis should be provided showing the sums arising from each.

### **Example of a return of DIMF profits**

Greg is a partner in CD LLP, Greg pays income tax and class 4 NICs on his share of CD LLP’s profits. In addition £20,516 is treated as a disguised fee under the DIMF legislation.

Greg will need to report the fees as a separate trade on his tax return. He would enter the following on a separate Self-Employment page within his Self-Assessment:

Description of business field: sums arising under Chapter 5E of Part 13 ITA2007.

Net profit or loss field: £20,516.

Total taxable profits or net business loss field: £20,516.

White space: Disguised investment management fee arising from X Capital Fund LP via X Capital Fund GP LP.

## CHAPTER SIXTY

# GAINS OF NON-RESIDENT COMPANIES

### 60.1

#### *Cross references*

The following topics are considered elsewhere:

- 10.7.1 (TNR s.3 gains)
- 66.5 (Gain accruing to unit trust)
- 69.20.1 (Carried interest outside s.3)
- 57.55 (Trust holding company)

For s.3 gains accruing to charities, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 5.6 (Section 3 TCGA) online version <https://www.taxationofcharities.co.uk>

### **60.1 Section 3 TCGA: Introduction**

Non-resident companies generally pay no UK tax on chargeable gains. This presents an obvious means of CGT avoidance. HMRC's first answer to this is s.3 TCGA.

The same problems arise for income of non-resident companies and for income/gains of non-resident trusts, but the statutory solutions are entirely different.

I refer to gains treated as accruing to a participator under s.3 TCGA as “**s.3 gains**”.

#### 60.1.1 *Pre-2019 rewrite provisions*

Until the 2019 CGT rewrite,<sup>1</sup> the rule was in s.13 TCGA, so this work formerly referred to s.13 gains. It will take years before the CG Manual is updated, and statutory instruments may not be updated at all; so readers will need to keep the old section numbers in mind:

---

<sup>1</sup> See 53.1 (2019 CGT rewrite).

<b>TCGA Topic</b>	<b>Formerly</b>
s.3 Charge	s.13(1) - (3A), (5)(b)(c)(cb)(d), (8), (9), (10)
s.3A Motive defences	s.13(5)(b), (ca)(cb), s13A
s.3B Participators	s.13(10B), (12), (13), (14)
s.3C Double charge reliefs	s.13(5A), (5B), (7), (7A)
s.3D Remittance basis	s.14A
s.3E Temporary non-residents	s.10A(3), (4), (10); s10AA(4); s13(5); s13(3A)
s.3F Group relief	s.14
s.3G Supplemental	s.13(11), (11A) <sup>2</sup>

## 60.2 Non-resident close company

Section 3(1) TCGA provides:

This section applies if—

A set of four conditions then follow:

- (a) a chargeable gain accrues at any time to a non-UK resident close company,<sup>3</sup>

In this chapter when I refer to a company I assume it is a non-UK resident close company.

Next, s.3(1) TCGA provides:

This section applies if ...

- (b) the gain is connected to avoidance (see section 3A),
- (c) the gain is not connected to
  - [i] a foreign trade or
  - [ii] other economically significant foreign activities...

This signposts 3 exceptions considered below.

Lastly, s3(1) TCGA provides:

This section applies if ...

- 2 I am grateful to Sarah Squires of Old Square Tax Chambers for permission to use this table.
- 3 Section 3(11) TCGA provides the standard definition:
  - “In this section “a non-UK resident close company” means a company-
  - (a) which is not resident in the UK, and
  - (b) which would be a close company if it were resident in the UK.”
 For the definition of close company see 99.26 (Close company: Introduction).

- (d) apart from this section, some or all of the gain would not be chargeable to corporation tax on the company.

Thus the CT charge payable by non-resident companies has priority over the s.3 charge.

### 60.3 s.3 gain attributed to participator

Section 3(2) TCGA provides:

So much of the gain as would not otherwise be so chargeable is apportioned among participators, or indirect participators, in the company—

- (a) who are resident in the UK at that time, or
- (b) who are trustees of a settlement and are not resident in the UK at that time.

Section 3(4) TCGA provides:

The amount apportioned to each person is treated as a chargeable gain accruing to the person.

The sidenote to s.3 calls this *attribution* of gains.<sup>4</sup> Section 3 TCGA refers to gains *apportioned* to participators. Elsewhere the company's gain is said to be *treated as accruing* to a person under s.3.<sup>5</sup> These expressions are interchangeable.

### 60.4 Computing gains: CT rules

It is necessary to ascertain the amount of chargeable gains accruing to the non-resident company.

Section 3 applies to chargeable gains, so reliefs which prevent a gain from being a chargeable gain apply for the purposes of s.3.

Section 3G(3) TCGA provides:

For the purposes of section 3 the amount of a gain or loss accruing to a company is calculated as if the company were a company resident in the UK chargeable to corporation tax on the gain.

Indexation relief (though the amount is now frozen) is applicable because

---

<sup>4</sup> The sidenote reads: "Gains attributed to UK resident individuals etc".

<sup>5</sup> See 18.40.8 (Relief for gain on sale).

a company within the charge to CT qualifies for that relief when computing its gains.

The substantial shareholding exemptions in sch 7AC TCGA can apply. Although it is a condition of that relief that the gain accrues to a UK resident company,<sup>6</sup> that condition is deemed to be met for the purposes of the s.3 computation.

UK land rebasing does not apply in computing s.3 gains as it must be assumed that the company is UK resident.<sup>7</sup>

## 60.5 Loan relationships

Section 295(1) CTA 2009 provides:

The general rule for corporation tax purposes is that all profits arising to a company from its loan relationships are chargeable to tax as income in accordance with this Part.

Gains on debts and other loan relationships (including life policies and foreign exchange gains) are not within s.3. Applying the statutory hypothesis of s.3G(3) they are chargeable to tax as income, so no chargeable gain accrues on the disposal.<sup>8</sup>

For a participator who is an individual or a trust, this seems too good to be true, which raises the question whether a court should construe the statutory hypothesis purposively so as to avoid that result.<sup>9</sup> However, s.3 also applies to a participator which is a company. It would be anomalous if a corporate participator did *not* obtain indexation relief, and somewhat surprising if loan relationship (etc) gains were treated as chargeable gains. The battle of the anomalies does not give a clear result, and the provision should be given its natural meaning.

HMRC accept this reasoning:

As a consequence of the application of the loan relationship rules, a gain which accrues to a non-UK resident company on disposal of a debt represented by a balance in a non-sterling bank account will not be a chargeable gain. If the company has no chargeable gain, section 13 is not

---

6 See Para 3 sch 7AC TCGA.

7 See 69.17 (General rebasing conditions).

8 See s.37 TCGA, discussed at 53.3.4 (Interaction of IT/CGT).

9 See App 7.1 (Construction of deeming provisions).

engaged, and therefore UK resident participators cannot be liable to tax in respect of such disposals. This difference in treatment between non-sterling bank accounts held directly and those held indirectly via a non-UK resident company is long standing ....<sup>10</sup>

The foreign currency CGT reform which followed in 2012 was enacted on the basis of this view of the law.<sup>11</sup>

Debts and policies often qualify for other CGT reliefs, so the question whether such gains could fall within s.3 may not often arise.

### 60.5.1 “Loan relationship”

The definition is intricate and a full discussion would need a chapter to itself.

The starting point is s.302(1) CTA 2009:

For the purposes of the Corporation Tax Acts a company has a loan relationship if—

- (a) the company stands in the position of a creditor or debtor as respects any money debt (whether by reference to a security or otherwise), and
- (b) the debt arises from a transaction for the lending of money.<sup>12</sup>

In short, the requirements are:

- (1) money debt and
- (2) lending of money.

### 60.5.2 Money debt

Section 303 CTA 2009 defines “money debt”:

- (1) For the purposes of this Part a money debt is a debt which—

10 HMRC, “The remittance basis and foreign currency bank accounts” (2009) <https://www.gov.uk/government/publications/the-remittance-basis-and-foreign-currency-bank-accounts> The website records that “This publication was withdrawn on 29 May 2015” but there is no reason to think that HMRC practice has changed on this point.

11 The relief on disposals of foreign currency bank accounts applies to individuals, trustees and PRs but not to companies, because companies do not need the relief: see 91.10 (Foreign currency bank account: CGT).

12 In the case of a money debt which does not arise from a loan relationship, the provisions apply but only as respects *interest* payable to or by a company.

- (a) falls to be settled—
    - (i) by the payment of money,
    - (ii) by the transfer of a right to settlement under a debt which is itself a money debt, or
    - (iii) by the issue or transfer of any share in any company,
  - (b) has at any time fallen to be so settled, or
  - (c) may at the option of the debtor or the creditor fall to be so settled.
- (2) For the purposes of subsection (1) any option exercisable by either party to settle the debt in any other way than is mentioned in subsection (1)(a) is ignored.

### 60.5.3 *Transaction of lending money*

Section 303(3) CTA 2009 defines “transaction for the lending of money”:

A money debt is a debt arising from a transaction for the lending of money for the purposes of this Part if an instrument is issued by any person for the purpose of representing—

- (a) security for the debt, or
- (b) the rights of a creditor in respect of the debt.

Section 303(4) CTA 2009 excludes shares:

A debt does not arise from a transaction for the lending of money for the purposes of this Part so far as it arises from rights conferred by shares in a company.

Why is this needed?

### 60.5.4 *Deemed loan relationships*

Section 302(4) signposts 8 sets of special rules in part 6 CTA 2009 (not considered here) which may be treated as loan relationships, so that gains likewise fall out of s.3:

<b>Chapter</b>	<b>Topic</b>
3	OEICs, unit trusts and offshore funds
4	Building societies
5	Registered societies
6	Alternative finance arrangements
7	Shares with guaranteed returns
8	Returns from partnerships
9	Manufactured interest

- 10            Repos
- 11            Investment life insurance contracts

### 60.5.5 *Derivatives and intangibles*

The same applies to gains on:

- (1) Derivative contracts, charged to CT as income: Part 7 CTA 2009
- (2) Intangible fixed assets, charged to CT as income: Part 8 CTA 2009

These gains are likewise taken out of the scope of s.3.

## 60.6 Amount attributed to participator

Once one has identified the participators, one asks how much of the company's gain is attributed to each of them.

Section 3(3) TCGA provides:

The proportion of the amount of the gain to be apportioned to each person corresponds to the extent of the person's interest in the company as a participator or indirect participator.

Section 3B(2) TCGA provides:

Any reference to a person's interest as a participator in a company is to the interest in it represented by all the factors by reference to which the person is a participator.

That is, "interest" in s.3 is not construed in a narrow or technical manner.

Section 3B(3) TCGA provides:

Any reference to the extent of a person's interest as a participator in a company is to such proportion of the interests as participators of all of the company's participators as, on a just and reasonable basis, is represented by that interest.

What is just and reasonable? The CG Manual starts with general comments:

### **CG57260 participators' fractional interests** [Nov 2019]

...

#### **The just and reasonable requirement**

It is quite possible for the different criteria by which persons are participators to produce different percentages for one person's interest in a company. So under one test, for example entitlement to income, A may have 60% and B have 40% and under another test, for example

entitlement to capital, A have 36%, B have 54% and C have 10%. This can happen even with relatively simple company structures, for example where there are preference shares, or loans. The total amount of gains apportioned cannot exceed the chargeable gain of the non-resident company. In this situation the gain has to be apportioned as is just and reasonable. This includes taking into account the interests of non-residents.

In considering a just and reasonable apportionment you should take into account all relevant factors, and not simply make an arithmetical adjustment. It would not usually be correct merely to average out the interests using the different factors. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company and who will derive the benefit of the gain however indirectly. The just and reasonable apportionment prevents an inappropriate part of the gain being attributed to persons without real economic interests, for example commercial loan creditors, see below.

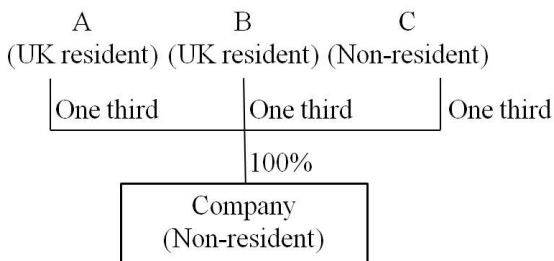

### 60.6.1 Resident/non-resident shareholders

The CG Manual starts with a very simple example:

**CG57275 amount assessable** [Nov 2019]

**Example 1**

- a non-resident company has issued share capital of 150 Ordinary shares
- A, B and C own 50 shares
- A and B are all resident in the UK. C has never been resident in the UK
- the non-resident company realises a gain of 300,000.

You compute the gains to attribute as follows.

Step 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 300,000.

**Step 2**

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances. In this case each of the three participators has a 33⅓ per cent interest.

**Step 3**

Calculate the proportion of the gain apportionable to the interests of each participator. Calculate the interests of all participators, including any who are not resident in the UK. In this case the proportion for each participator is 33⅓% of 300,000 = 100,000.

**Step 4**

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is just and reasonable. Gains of 100,000 are attributed to each of A and B and treated as gains accruing to them on the date on which the gain actually accrued to the company.

C is not liable to UK taxation. But it would not be just and reasonable to reapportion C's gain of 100,000 to A and B as C has a real economic interest in the non-resident company.

### 60.6.2 *Two share classes*

The CG Manual's next example concerns a company with two classes of shares:

**CG57275 amount assessable** [Nov 2019]

**Example 4**

- a non-resident company has issued share capital of 100 A shares and 100 B shares.
- both classes of shares carry equal voting rights but the B shares carry no entitlement to dividends or distributions in a winding-up.
- the A shares are owned by X who is resident in the UK
- the B shares are owned by Y who has never been resident in the UK
- the non-resident company realises a gain of 200,000.

You compute the gains to be attributed charge as follows.

**Step 1**

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 200,000.

**Step 2**

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.

Participator	Voting rights	Distributions
X	50%	100%
Y	50%	0%

X is a 50% participator by reference to voting rights attached to the shareholding in A shares.

Y is a 50% participator by reference to voting rights attached to the shareholding in B shares.

X is a 100% participator by reference to rights to dividends and distributions attached to the shareholding in A shares.

**Step 3**

Calculate the proportion of the gain apportionable to the interests of each participator.

X (rights to income and capital)	$200,000 \times 100\% = 200,000$
Y (voting rights)	$200,000 \times 50\% = 100,000$

**Step 4**

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain. A full review of all of the circumstances would be necessary. It appears that the true economic interest in the non-resident company is held solely by X. Y’s entitlement should be ignored, and the whole of the gain apportioned to X.

## 60.7 Overlapping participators

It is necessary to identify the participators in the non-resident company. Section 3B(1) TCGA incorporates the standard definition.<sup>13</sup> That was not drafted with s.3 in mind. One company can have too many participators for s.3 to cope with easily. I refer to this as the problem of “**overlapping participators**”.

The problem may arise in the context of trusts,<sup>14</sup> loan creditors<sup>15</sup> and chains of companies.<sup>16</sup> The problem is solved in different ways in each case.

## 60.8 Overlapping participators: Loan creditors

The problem of overlapping participators including loan creditors is solved, or fudged, by a just and reasonable apportionment. The CG Manual provides:

### **CG57260 participators’ fractional interests [Nov 2019]**

#### **Loan creditors**

... There will be cases where a loan creditor will be a person or institution (such as a bank<sup>17</sup> or similar financial institution) which has loaned money to the non-resident company as a matter of business on commercial terms. The interest of such a loan creditor acting at arms length will be limited to an expectation of repayment of the amount loaned together with payments of interest at a commercial rate. There will be no expectation that the loan creditor can or will benefit from the profits or gains of the non-resident company. In such a case it would not be just and reasonable to apportion any of the gain to a loan creditor of this type. The attribution should be made to those participators who have a real economic interest in the capital gains.

Where there are participators who are loan creditors it will be necessary to review all of the circumstances to satisfy yourself that the interests of the loan creditors can be excluded for the reasons in the preceding

---

13 Section 3B(1) TCGA provides: ““Participator” has the meaning given by section 454 of CTA 2010.” See 99.22 (Definitions of participator).

14 See 60.9 (Overlapping participators: Trustees/beneficiaries).

15 See 60.8 (Overlapping participators: Loan creditors).

16 See 60.10 (Co chain: Indirect participator).

17 Author’s footnote: the author has overlooked that a bank is not a loan creditor: see 99.25.10 (Bank creditor). But this does not affect the point made here.

paragraph. In some cases the persons with the real economic interest in the non-resident company will be loan creditors whether or not they are participators under one or more of the other tests. In such cases, where there is participation in more than one way, it may be appropriate, depending on the facts of the case, to aggregate the interests of those persons in reaching an apportionment that is just and reasonable.

In other cases the persons with the real economic interest in the non-resident company may be providing the funds which the loan creditor has loaned to the company, and may be persons who are entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for their benefit, and may be participators in their own right by virtue of that test.

If a creditor does not have an economic interest in the company's gains, that is, if the gains do not benefit the creditor, then the gains should not be apportioned to the creditor. I refer to that as the "economic-interest test." One asks: At the time the gain accrued, and on the assumption that the asset which realised a gain had been disposed of at base cost, giving rise to no gain or loss, could the company have repaid the debt? If so then no gain should be apportioned to the loan creditor. That seems relatively clear.

The position is less clear when the economic-interest test is not satisfied. For instance, suppose:

- (1) An unconnected, commercial lender (not a bank) lent £100 on commercial terms to a company with assets worth £200
- (2) The assets of the company fell to £50
- (3) The asset value rose and company realised a gain which left the company with £100

Under the economic-interest test, the lender does have an economic interest in the gain. But it is suggested that one should still not apportion the gain to the commercial lender. Otherwise no well informed UK resident, (other than a bank), and no non-resident trust, would lend to a non-resident close company.

It is suggested that the position is the same with a lender who is a connected person, provided the loan is on commercial terms.

Apportionment would only seem appropriate if the loan was not on commercial terms and the economic-interest test was met.

### 60.8.1 HMRC examples: loan creditors

The CG Manual gives two examples involving loan creditors. The first involves a loan on commercial terms:

**CG57275 amount assessable** [Nov 2019]

**Example 2**

- A and B each own 50 shares
- A and B are both resident in the UK
- C is a loan creditor for 400,000. The loan is an arm's length commercial transaction and interest is payable at a fully commercial rate on the loan
- the non-resident company realises a gain of 500,000
- the total capital<sup>18</sup> of the non-resident company after the gain is 1,000,000.

The solution is to disregard the loan creditor, though the Manual takes many lines to reach this conclusion:

You compute the gains to attribute as follows.

Step 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.

Step 2

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.

A is a 50% participator by reference to the shareholding of 50 shares

B is a 50% participator by reference to the shareholding of 50 shares

C is a participator as a loan creditor, being entitled to an amount of 400,000 out of the total capital of 1,000,000

Step 3

---

18 Author's footnote: "Total capital" here means net asset value, not share capital.

Calculate the proportion of the gain apportionable to the interests of each participator. In this case the proportion for each participator is

A (as shareholder)  $500,000 \times 50\% = 250,000$

B (as shareholder)  $500,000 \times 50\% = 250,000$

C (as loan creditor)  $500,000 \times 40\% = 200,000$

Step 4

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain.

I would have thought that was not an apportionment at all, as one cannot apportion more than the amount of the gain. But whatever the reason, this is not the method used.

C is a participator only by virtue of being a commercial loan creditor, see CG57220. C's entitlement as loan creditor should be ignored, subject to a review of the circumstances to establish that C is indeed merely a commercial loan creditor and has no entitlement to a share of profits or gains, and that there are no other arrangements. In this example it is assumed that there are no other arrangements and therefore the whole of the gain should be apportioned by reference to the interests in shares. The final apportionment becomes

A (as shareholder)  $500,000 \times 50\% = 250,000$

B (as shareholder)  $500,000 \times 50\% = 250,000$

The second example is the same but the loan is interest-free and from a shareholder:

**CG57275 amount assessable** [Nov 2019]

**Example 3**

- a non-resident company has issued share capital of 100 Ordinary shares
- A and B each own 50 shares
- A and B are both resident in the UK
- A is a loan creditor for 200,000. No interest is payable on the loan
- the non-resident company realises a gain of 500,000.

- the total capital<sup>19</sup> of the non-resident company after the gain is 1,000,000.

The solution is *still* to disregard A's interest as loan creditor, though the Manual is not so confident in its answer:

You compute the gains to be attributed as follows.

Step 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.

Step 2

Determine the interests of all participants, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.

A is a 50% participator by reference to the shareholding of 50 shares

B is a 50% participator by reference to the shareholding of 50 shares

A is also a participator as a loan creditor, being entitled to an amount of 200,000 out of the total capital of 1,000,000. If all of the assets of the company were to be distributed immediately after the accrual of the gain the entitlements of A and B would be:

A: 200,000 (as loan creditor) plus 50% of the balance of 800,000 (as shareholder), a total of 600,000 or 60% of the assets.

B: 400,000, 50% of the balance of 800,000 (as shareholder), or 40 % of the assets.

Step 3

Calculate the proportion of the gain apportionable to the interests of each participator. In this case there are two possible apportionments.

A:  $500,000 \times 50\% = 250,000$

B:  $500,000 \times 50\% = 250,000$

<sup>19</sup> Author's footnote: "Total capital" here means net asset value, not share capital.

or

$$A: 500,000 \times 60\% = 300,000$$

$$B: 500,000 \times 40\% = 200,000$$

Step 4

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. As there are at least two possible apportionments we must consider all of the facts relating to the arrangements under which A's loan was made and the arrangements regarding profits and gains of the company. For instance:

- Does the loan agreement give A any preferential rights to profits or gains, or simply to a repayment of the capital?
- Is B entitled to an equal share of profits or gains?

In such cases there is no easy answer and a full consideration of all of the relevant circumstances is necessary. On the bare facts of this example A has no preferential rights and consequently an apportionment by reference to the shareholdings, effectively excluding A's participation as loan creditor, may be just and reasonable. If so, the gain would be attributed

$$A: 500,000 \times 50\% = 250,000$$

$$B: 500,000 \times 50\% = 250,000$$

This is a case where the company could have repaid the debt even if there had been no gain. So the gain did not significantly increase the value of the debt. The loan creditor does not have an economic interest in the gain. The outcome would be different if that were not the case.

## **60.9 Overlapping participators: Trustees/beneficiaries**

Suppose a company is owned by a trust. The trustees are participators. The beneficiaries are in general participators since in general they have an interest in trust property.<sup>20</sup>

The difficulty this would cause for s.3 TCGA was recognised, and beneficiaries are taken out of s.3. Section 3B(4) TCGA provides:

If-

- (a) the interest of a person in a company is wholly or partly represented by an interest under a settlement ("the beneficial interest"), and
- (b) the beneficial interest is the factor (or one of them) by reference to

---

<sup>20</sup> See 99.23.4 (Trustees and beneficiaries).

which the person would, apart from this subsection, have an interest as a participator in the company, that interest as a participator is, so far as represented by the beneficial interest, to be treated instead as the interest of the trustees of the settlement.

The CG Manual provides:

**CG57220 basic conditions for TCGA92/S13: the company** [Nov 2019]

**Beneficiaries**

Where the trustees of a settlement, whether resident in the UK or not, are participators in a non-resident company then in certain circumstances a beneficiary of the settlement will also be within the definition of participator. The effect of TCGA92/S13(14) is that once you reach shares or other interests held by trustees, except in the case of a bare trust, see CG34300, you stop there. In deciding how the chargeable gain of the company should be apportioned, you treat the trustees as if they were the beneficial owners of their shares or other interests and apportion the gain to them as appropriate, ignoring the interests of the beneficiaries. If the trustees are resident then their share of the gain is assessed on them. If the trustees are non-resident then the gain is subject to TCGA92/S86 and TCGA92/S87, see CG57395. Any interest as a participator in the non-resident company which the beneficiary holds in their own right, for example by a personal holding of shares in the non-resident company, will remain within Section 13.

**60.10 Co chain: Indirect participator**

Section 3 TCGA provides:

- (7) A person (“P”) is an “indirect participator” in a company (“A”) if-
  - (a) another company (“B”) which is a non-UK resident close company is a participator in A, and
  - (b) P is a participator in B or P is a participator in a third non-UK resident close company which is participator in B,and so on through any number of non-UK resident close companies that are participators in other non-UK resident close companies.

Section 3 TCGA provides:

- (8) P’s interest as an indirect participator in A in the case of any gain is determined by-

- (a) apportioning the gain among the participators in A according to the extent of their respective interests as participators, and
- (b) then further apportioning the gain apportioned to B among the participators in B according to the extent of their respective interests as participators, and so on through other companies.

The CG Manual provides:

**CG57290 indirect interests: introduction** [Nov 2019]

Without special rules UK resident shareholders or participators could avoid the TCGA92/S13\* charge by placing another non-resident company between themselves and the company making the gain. TCGA92/S13(9) prevents this by allowing us to look through a chain of non-resident companies. The gain is apportioned to the first tier of UK residents or non-resident trusts in the chain of interests. For TCGA92/S13(9) to apply each company in the chain must itself satisfy the basic conditions outlined in CG57220.

Therefore each company must be

- a company that is not resident in the UK
- and
- a company that would be a close company if it was resident in the UK.

The CG Manual begins with a straightforward example:

Example 1<sup>21</sup>

Mr A UK resident shareholder owns 100% of  
 B Ltd non-resident close company which owns 100% of  
 C Ltd non-resident close company which owns 100% of  
 D Ltd non-resident close company.

Gains accruing to D Ltd are not attributed to C under s.3 because C is not UK resident. But the CG Manual correctly notes:

Any gains of D Ltd can be apportioned to Mr A because TCGA92/S13(9) allows you to look through the chain of non-resident closely controlled<sup>22</sup> companies.

Diagrammatically:

---

<sup>21</sup> I have added the diagrams to increase clarity.

<sup>22</sup> The Manual (somewhat unhelpfully) uses the expression “closely controlled” as a synonym of “close”.

Example 1

The next example concerns a chain including a resident company:

Example 2

Mr A UK resident shareholder owns 100% of  
 B Ltd UK resident company which owns 100% of  
 C Ltd non-resident close company which owns 100% of  
 D Ltd non-resident close company.

The Manual analyses this as follows:

Any gains of D Ltd can be apportioned to B Ltd but not Mr A. This is because B Ltd is the first UK resident shareholder in the chain.

Diagrammatically:

Example 2

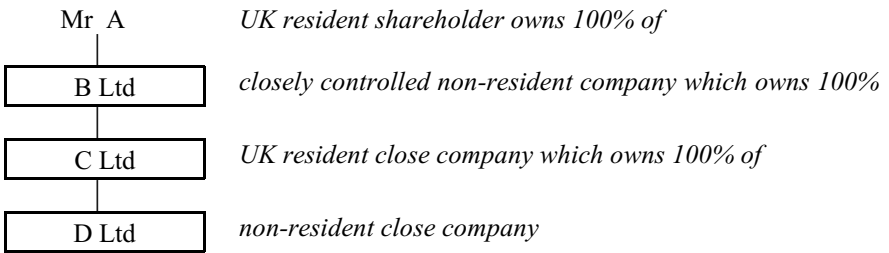

This was correct before 1995, when the former s.13(2) and (9) TCGA only apportioned gains to a *shareholder* in a non-resident company. A is not a shareholder of D Ltd. But why can't A be assessed now? A *is* a participator in D Ltd. Perhaps this rule is implied by s.3(7) TCGA. Or perhaps it would be just and reasonable to apportion under s.3B(3) to company B and to no-one else. One way or the other, the problem of overlapping participators in chains of companies is solved by stopping at the first UK resident company.

Example 3

Mr A UK resident shareholder owns 100% of B Ltd closely controlled non-resident company which owns 100% of C Ltd UK resident close company which owns 100% of D Ltd non-resident close company. Any gains of D Ltd can be apportioned to C Ltd but not Mr A even though Mr A owns shares in B Ltd which is a closely controlled non-resident company. (Gains which accrue to B Ltd in its own right on disposal of its own assets can be apportioned to Mr A.)

Diagrammatically:

Example 3

The next Manual example is a straightforward variation on the above:

Example 4

Mr and Mrs A are both UK resident. Mr A holds shares in B Limited, a UK resident close company. B Ltd holds shares in C, a non-UK resident close company, which holds shares in D, also a non-UK resident close company. Mrs A holds shares in E, a non-UK resident close company which also holds shares in D.

The gains of D Ltd can be apportioned to Mrs A because she is the first UK resident shareholder in the chain of shareholdings which runs from E to her. The gains of D Ltd [E Ltd]<sup>23</sup> cannot be apportioned to Mr A because B Ltd is the first UK resident shareholder in his chain of shareholdings.

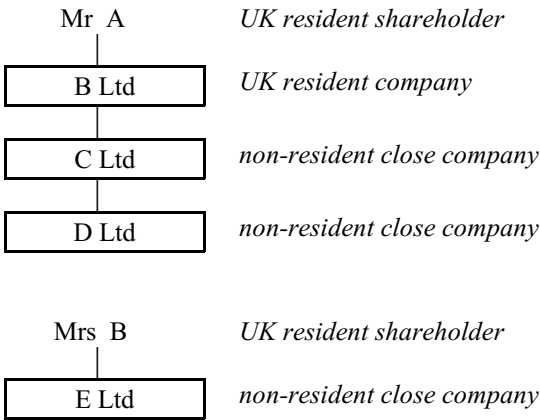

You calculate the extent of a person’s indirect interest on a particular test of participation by multiplying the proportional interest in the assets of each company in the chain.

Diagrammatically:

---

23 The original reads “D Ltd” which must be a slip for “E Ltd”, if the diagram is correct.

Example 4

**60.11 Co chain not wholly-owned**

We have so far considered simple chains of wholly-owned companies. The CG Manual continues with an example of a less than 100% chain:

**57290 indirect interests: introduction** [Nov 2019]

... You calculate the extent of a person’s indirect interest on a particular test of participation by multiplying the proportional interest in the assets of each company in the chain.

Example 5

Mr A is a UK resident. He is a 75% participator in B, which is a 75% participator in C, which is a 50% participator in D. B, C and D are non-UK resident close companies.

If D Ltd makes gains of 100,000 the TCGA92/S13 the gain attributed to Mr A is £100,000 x 50% x 75% x 75% = £28,125.

Diagrammatically:

Example 5

D Ltd
-------

*non-resident company*<sup>24</sup>

Mr A is not a participator in D Ltd but that does not matter because:

- (1) Mr A is a participator in B Ltd
- (2) B Ltd is a participator in C Ltd
- (3) C Ltd is a participator in D Ltd

So gains of D Ltd are attributed to Mr A.

## 60.12 s.3 gains of split year

### 60.12.1 *Split year: Individual*

Section 3(5) TCGA provides the standard split-year rule:

No apportionment of any part of a gain is made to an individual if-

- (a) the gain accrues in a tax year which, as respects the individual, is a split year, and
- (b) the gain accrues in the overseas part of the year.

### 60.12.2 *Split year: trustee*

Section 3 TCGA provides (so far as relevant):

- (1) This section applies if—
  - (a) a chargeable gain accrues at any time to a non-UK resident close company ...
- (2) So much of the gain as would not otherwise be so chargeable is apportioned among participators ... in the company—
  - (a) who are resident in the UK at that time, or
  - (b) who are trustees of a settlement and are not resident in the UK at that time.

Trustees may become UK resident (or cease to be UK resident) during a tax year, eg if a non-resident trustee retires in favour of a UK trustee, or a UK trustee retires in favour of a non-resident trustee. All the s.3 gains of the year are treated as accruing to the trustee, and therefore are within the charge to tax. Thus there is no split year rule.

## 60.13 EU-law compliance

---

<sup>24</sup> It is assumed in the example that D Ltd is close, which is not necessarily the case; that depends on the other shareholdings, which are not specified in the example.

In 2011 the EC formally requested the UK to amend (what is now) s.3 TCGA.<sup>25</sup> In response, the FA 2013 made three changes (retrospective to 2012):

- (1) Increasing the minimum holding requirement from 10% to 25%.
- (2) Extending the defence for trading companies
- (3) A new defence for economically significant activities

EN FB 2013 provides:

An infraction notice (Reasoned Opinion) was issued to the UK by the European Commission on 16 February 2011. ...

13. These changes aim to ensure that the legislation is compatible with the Treaty while maintaining effective protection against tax avoidance.

In 2014 CIOT wrote to the EC contending that the amended rules are still not EU-law compliant. CIOT's main complaints were:

- (1) The 25% minimum holding requirement is inadequate as it may be diluted by the (over-wide) connected person rule.
- (2) The economically significant activity defence is inadequate as it only applies to activities carried on by the company wholly or mainly outside the UK, and does not extend to UK activities.
- (3) The s.3 charge (if applicable) may be disproportionate in that:
  - (a) A minimal breach of the requirements results in a charge by reference to the whole gain.
  - (b) A person who has owns the shares for a short period could have gains attributed to them which relate to periods before they had any interest in the company.
  - (c) The rate of tax on s.3 gains is the CGT rate which exceeds the CT rate applicable to UK companies.

But nothing seems to have happened.

In the meantime, the EC did not withdraw its complaint about the pre-2012 law. The matter came before the CJEU in 2014, which held that the

---

25 An EC press release provided the main details: IP/11/158, 16 February 2011, but this is now of historical interest only. CIOT had lobbied the EC to take this step.

Similar steps were taken for the ToA provisions: See 45.17.2 (ToA: EU-law background).

pre-2012 form of (what is now) s.3 was not EU-law compliant.<sup>26</sup> The UK did not argue to the contrary<sup>27</sup> so it is not clear what was the point of the litigation. The decision would however be useful to those disputing, or seeking to reclaim, tax on s.3 gains in years before 2012/13. Unfortunately the case did not consider the present law, after the 2013 reforms.

## 60.14 25% minimum condition

Section 3 TCGA provides:

- (6) No apportionment of any part of a gain is made to a person if the total amount that would, apart from this subsection, be apportioned to—
- (a) the person, and
  - (b) persons connected to<sup>28</sup> the person,
- is 25% or less of the amount of the gain falling to be apportioned.

I refer to this as the “**25% minimum condition**” and para (b) is the “**aggregation rule**”.

In order to know whether a participator (“A”) in a non-resident company (“OC”) meets the 25% minimum condition, it is necessary to identify and aggregate the interests of other persons if two conditions are satisfied:

- (1) The person is connected with A
- (2) Gains are apportioned to that person

One does not aggregate the interests in OC of

- (1) A and
- (2) *all* persons connected with A

One only counts connected persons to whom gains are apportioned. One ignores connected persons if gains are not apportioned to them (apart from s.3(6)).

For example, assume OC is a non-resident company and:

- (1) A owns 18% of the shares in OC. (Unless the aggregation rule applies, A does not meet the 25% minimum condition.)
- (2) C (the only participator in OC who is connected with A) owns 26% of the shares in OC. (So if the aggregation rule applies, the interest of C

---

<sup>26</sup> Case C-112/14 *EC v UK*.

<sup>27</sup> at [15].

<sup>28</sup> The correct expression is connected *with* (not connected *to*); see 99.12 (Connected person). But it does not matter.

is aggregated with the interest of A, and A does meet the 25% minimum condition.)

Diagrammatically:

The aggregation rule applies if C is:

- (1) a UK resident<sup>29</sup>
- (2) a non-resident trust<sup>30</sup>

In all these cases the gains of OC do fall to be apportioned to C under s.3.

The aggregation rule does not apply if C is a *non-resident individual*. In this case, gains cannot be apportioned to C under s.3. This is the case even if C is within the temporary non-residence rules.

The aggregation rule does not apply if C is a non-resident *company*. In this case, gains of OC may be apportioned to participants in C, but that does not cause A to meet the 25% minimum condition unless those participants are themselves connected with A.

It will always not be possible for a participant to know whether the 25% minimum condition is satisfied, but one must do the best one can.

Interests held by pension funds are not aggregated for the 25% minimum condition.<sup>31</sup>

#### 60.14.1 EU-law aspects of s.3 TCGA

FA 2013 increased the figure from 10% to 25%. The object was to enable HMRC to argue that s.3 primarily affects freedom of establishment, so that challenges are not possible under free movement of capital.<sup>32</sup> But the effect of the economically significant activity and motive defences seems to be that s.3 is sufficiently well targeted to satisfy EU law, whether the challenge comes under FoE or FMC, so the question of which is the

<sup>29</sup> Further consideration would be needed if C were a remittance basis taxpayer who did not remit the s.3 gain.

<sup>30</sup> Prior to 2019/20 the aggregation rule probably did not apply to a non-resident trust.

<sup>31</sup> See 60.35 (Pension scheme).

<sup>32</sup> See 102.7.1 (Which freedom).

applicable freedom, or the impact of Brexit, should not now arise.

## 60.15 Loss accruing to non-resident co

A participator may deduct losses which accrue to them personally against s.3 gains, in accordance with the usual rules.

Different rules apply to losses accruing to the non-resident company which I call “s.3 losses”.

### 60.15.1 *Arising basis participator*

Section 3 TCGA only attributes the company’s gains (not losses) to a participator, so in the absence of further provision a participator would have no relief for losses accruing to the company. Section 3 TCGA provides some relief for these losses:

Section 3 TCGA provides:

(9) So far as it would go to reduce or extinguish chargeable gains accruing, as a result of this section, to a person in a chargeable period, this section applies to a loss accruing to the company on the disposal of an asset in that period as it would apply if there had been a gain.

(10) But-

(a) this only applies in relation to that person,<sup>33</sup> and

(b) this section does not otherwise apply in relation to losses accruing to the company.

The CG Manual correctly provides:

**CG57295 losses: - general** [Nov 2019]

TCGA92/S13 is concerned with the apportionment of gains not losses.

If the disposal by the non-resident company gives rise to a loss then that

---

33 What is the purpose of the rule that loss relief shall only so apply in relation to that person? Perhaps it is intended to cover the situation where:

(1) A owns a company.

(2) The company disposes of asset 1 and realises a loss.

(3) A transfers the company to B.

(4) The company disposes of asset 2 and realises a gain (in the same year).

Perhaps the intention is that the loss is not available to B. But that would have been clear in any case.

Perhaps it was intended to disapply the former rule that losses of one spouse could be deducted against gains of the other, in which case the provision has been otiose since the introduction of independent taxation in 1988.

loss cannot be apportioned to UK residents for them to set it off against their other gains. However, the loss can be set-off

- against gains made by the same company in the same year of assessment
- against gains made by other non-resident companies which have been apportioned to the taxpayer in the same year of assessment.

The term year of assessment means the year of assessment for a UK resident individual. Where the participator is a UK resident company the references to year of assessment are references to accounting periods of the participator.

Losses of the same company (TCGA92/S13(8))

If the non-resident company makes gains and losses in the same year of assessment the losses can be set off against the gains. Any surplus losses cannot be carried forward or back to set-off against gains arising in a different year of assessment.

**Losses of different companies**

If the UK resident is a participator in more than one non-resident company the proportion of the gains and losses of those companies apportioned to the UK resident can be set off against each other in the same year of assessment. Any surplus loss cannot be carried forward or back to set against the gains arising in different years of assessment.

Careful timing of disposals is needed to ensure that the loss relief is used: s.3 losses should not exceed s.3 gains in any year.

60.15.2 *Remittance basis participator*

Section 3D TCGA provides:

- (4) The apportioned amount may not be reduced or extinguished by a loss under section 3 if-
- (a) the apportioned amount is regarded for the purposes of paragraph 1 of Schedule 1 as accruing on a disposal of a foreign asset,
  - (b) the remittance basis applies to the individual for the tax year in question, and
  - (c) any of the apportioned amount is remitted to the UK in a subsequent tax year.

This is analogous to the general rule that there is no carry-back of losses, and it echoes the rule which applies where there is a loss election.

Careful planning is needed to ensure that relief is available for s.3 losses of remittance basis taxpayers.

It is considered that the code of restrictions which apply to personal losses of remittance basis taxpayers<sup>34</sup> do not apply to s.3 losses. If a remittance basis taxpayer has made a loss election, personal losses are set against gains in a particular order, but those rules do not easily fit with the s.3 loss rules. If a remittance basis taxpayer has not made a loss election, personal foreign losses are not allowable; but foreign s.3 losses should remain allowable under the s.3 loss rules.

#### 60.15.3 *Non resident trust participator*

The position is similar as for a UK participator. The aim should be that s.3 losses should not exceed s.3 gains in any year, so that the losses can be set against the gains in computing trust gains (s.1(3) amounts).

#### 60.15.4 *s.3 losses: Policy and reform*

At first sight the rules for s.3 losses are unfair and anomalous compared to other losses:

- (1) s.3 losses can only be set against s.3 gains.
- (2) s.3 losses can only be set against current year s.3 gains and cannot be carried forward.

However there is a good reason not to apportion s.3 losses in the same way as gains, as there may be scope for acquisition of companies in order to acquire their losses; in the corporate area there are rules for pre-acquisition losses, but no-one would want to introduce that complexity into CGT.

There is a better case for carry forward of s.3 losses, to set against other s.3 gains, but even here the possibility of buying in losses prevents reform. Section 16A TCGA prevents obvious abuse, but is not a substitute for properly targeted rules.

A reasonable reform would be to allow s.3 losses to be set only against s.3 gains but to be carried forward for a limited period, say 4 or 6 years. Indeed it would be reasonable to restrict all losses from being carried forward for more than that period.

### **60.16 Negligible value claim**

Section 24 TCGA provides:

---

<sup>34</sup> See 61.16 (Loss of remittance basis taxpayer).

(1A) A negligible value claim may be made by the owner of an asset (“P”) if condition A or B is met.

The usual case is condition A:

(1B) Condition A is that the asset has become of negligible value while owned by P.<sup>35</sup>

The claim should be made by the non-resident company, though in practice HMRC have accepted claims by UK resident participators.<sup>36</sup> It is possible that the non-resident company might authorise a person to make claims on its behalf, especially if that person is the direct or indirect owner and subject to tax under s.3 on all the company’s gains.

Section 24(2)(a) TCGA provides the relief:

Where a negligible value claim is made:

- (a) this Act shall apply as if the claimant had sold, and immediately reacquired, the asset
  - [i] at the time of the claim or
  - [ii] (subject to paragraphs (b) and (c) below) at any earlier time specified in the claim,for a consideration of an amount equal to the value specified in the claim.

Section 24(2)(b) TCGA specifies the limit of the carry-back:

- (b) An earlier time may be specified in the claim if:
  - (i) the claimant owned the asset at the earlier time; and
  - (ii) the asset had become of negligible value at the earlier time; and either
  - (iii) for capital gains tax purposes the earlier time is not more than two years before the beginning of the year of assessment in which the claim is made; or
  - (iv) for corporation tax purposes the earlier time is on or after the first day of the earliest accounting period ending not more than two years before the time of the claim.

The time limit here is that in (iv), on or after the first day of the earliest

---

35 Condition B (not discussed) arises when the disposal by which P acquired the asset was a no gain/no loss disposal.

36 Private correspondence.

accounting period of the non-resident company ending not more than two years before the time of the claim, since s.3G(3) TCGA provides:

For the purposes of section 3 the amount of a gain or loss accruing to a company is calculated as if the company were a company resident in the UK chargeable to corporation tax on the gain.

### 60.17 s.3 motive defence

Section 3(1) TCGA provides:

This section applies if ...

- (b) the gain is connected to avoidance (see section 3A)

Section 3A(1) TCGA provides:

A gain accruing to a company on the disposal of an asset is taken to be “connected to avoidance” unless it is shown<sup>37</sup> that neither-

- (a) the disposal of the asset by the company, nor
- (b) the acquisition or holding of the asset by the company, formed part of a scheme or arrangements of which the main purpose, or one of the main purposes, was avoidance of liability to capital gains tax or corporation tax.

I refer to this as the “**s.3 motive defence**”.

CGT/CT means the UK taxes, and does not include corresponding foreign taxes.<sup>38</sup> Only CGT/CT avoidance matters; eg an intention to avoid IHT would not disqualify the s.3 motive defence. For convenience I refer below only to CGT and leave CT to be understood.

It is best to approach the s.3 motive defence in 2 stages:

- (1) Identify the arrangement, of which the disposal, acquisition or holding form part
- (2) Does this arrangement have a CGT avoidance purpose?

#### 60.17.1 *Identify the arrangement*

It is difficult to envisage that there could be no arrangement, but it is necessary to identify what the arrangement is in order to investigate its

---

37 See **App 2.21.4** (“It is shown that”).

38 See 49.8 (Meaning of “taxation”). The context suggests that corporation tax here means corporation tax on chargeable gains.

purpose.<sup>39</sup>

Acquisition, holding and disposal themselves constitute an arrangement, but the wording seems to require a wider arrangement, of which these steps form part; and in any case, it is unlikely that those steps in isolation would have a CGT avoidance purpose.

In practice the company will often be part of a trust/corporate structure, and that will constitute the arrangement.

A company held directly may also constitute an arrangement.

### 60.17.2 *Purpose of arrangement*

CGT and CT were introduced in 1965. Where a structure was set up before the introduction of CGT, and not in anticipation of the introduction of CGT, it cannot have had a CGT avoidance purpose.

The CG Manual provides:

**CG57319 disposal of assets where the arrangements did not involve a tax avoidance motive - for 2012-13 and later years [Nov 2019]**

... There may be a number of genuine<sup>40</sup> reasons why a non-resident company is used as an investment vehicle.

For example if an individual wanted to acquire a property in another country but was prevented from doing so under the prevailing law in that country because they are non-resident there, this difficulty might be overcome by setting up a company in that territory. The company could then acquire the property as a resident.

To determine if the exemption applies a clear understanding of why the asset was acquired, held and disposed of by the company is needed....

### 60.17.3 *Offshore co holds residence*

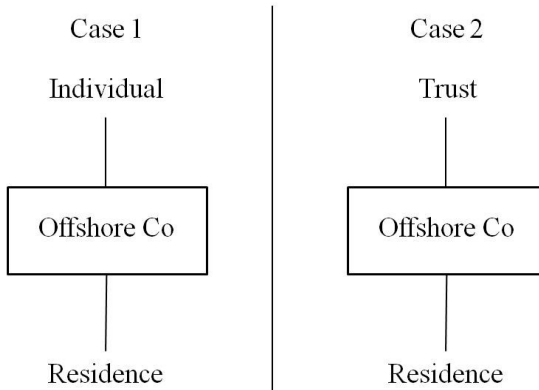

Suppose:

- (1)(a) *Case (1)*: an individual owns an offshore company which holds a residence
- (1)(b) *Case (2)*: a trust owns the company which holds the residence; and
- (2) In either case, the residence which would have been expected to qualify for private residence relief if held directly:

---

<sup>39</sup> See App.2.2 (Arrangement). I use the singular (arrangement); there is no difference between arrangement (singular) and arrangements (plural).

<sup>40</sup> “Genuine” reasons here means non-tax-avoidance reasons: see 49.15.3 (“Genuine”). But of course the focus ought to be specifically on CGT avoidance.

This was typically done before 2017 for IHT reasons.

Applying the two-stage approach:

- (1) In case 1, the arrangement is the use of the company. This cannot have a CGT avoidance purpose: no CGT would be payable if the property had been held in a trust or by the occupier. That continued to be the case after the introduction of NRCGT in 2015,<sup>41</sup> though the circumstances in which a property can be expected to qualify for private residence relief are narrower than before. What matters is the expectation at the time of the acquisition by the company.
- (2) In case (2) the arrangement is the creation of the trust and company. Was CGT avoidance one of the purposes of the creation of the trust? This requires further investigation of the facts. Was the trust a part of a CGT avoidance scheme?<sup>42</sup> Was the use of the company envisaged when the trust was created? and does it matter if it was not?

#### 60.17.4 *Motive defence claim*

The s.3 motive defence does not require a formal claim. If there is no CGT avoidance purpose, a taxpayer is entitled and indeed required to submit tax returns on the basis that the motive defence applies; one is not required to show the motive defence applies before completing the tax return on that basis.

---

41 Now replaced by CGT payable by non-residents; see 53.4.5 (Charge on non-resident).

42 See 49.21.4 (Avoidance of beneficiary CGT).

If an individual completes a self assessment return, it is necessary to indicate that they have taken advantage of the ToA motive defence by an entry in the relevant box.<sup>43</sup> There is no comparable box for the s.3 motive defence, so usual disclosure principles apply.<sup>44</sup>

#### 60.17.5 Pre-2012 gains

The CGT motive defence applies to gains from 2012/13.<sup>45</sup> It is arguable that the pre-2012 rules were not EU-law compliant and earlier gains qualified for an EU law defence. Otherwise older trusts may have substantial s.1(3) amounts (trust gains) even if the motive defence applies.

It is possible to envisage circumstances where the taxpayer will be better off if the motive defence does not apply, because of the interest surcharge applicable to older gains.<sup>46</sup> But that will not happen often.<sup>47</sup>

#### 60.17.6 ToA/s.3 motive defence compared

In summary, the two motive defences have the following real or apparent differences:

<b>Transfer of Assets Abroad</b>	<b>s.3 TCGA</b>	<b>Which is stricter?</b>
<i>Any</i> purpose test	<i>Main</i> purpose test	Little difference
Avoidance of <i>any</i> tax	<i>CGT</i> advantage needed	ToA stricter
"...reasonable to assume..."	no equivalent wording	No difference <sup>48</sup>
Test operations individually	Test arrangement	ToA stricter
Applies to all historic income	Post-2012 gains only	CGT stricter (EU law may help)

### 60.18 Foreign trade exemption

Section 3 3(1) TCGA provides relief for a non-resident trading company:

This section applies if ...

(c) the gain is not connected to a foreign trade ...

Section 3A(2) TCGA provides:

43 See 49.44 (Tax return: Motive/EU defence).

44 See chapter 116.1 (Tax return filing position).

45 See s.62(5) FA 2013.

46 See 57.17 (Interest surcharge).

47 Note that pre-2008 s.1(3) amounts may not count; see 57.44 (Pre-2008 capital payment/trust gain, matched post 2008).

48 See App.2.21 (Reasonable-to-assume).

A gain is “connected to a foreign trade” if it accrues on the disposal of an asset used only-

- (a) for the purposes of a trade carried on by the company wholly outside the UK, or
  - (b) for the purposes of the foreign part of a trade carried on by the company partly within, and partly outside, the UK,
- and the reference here to the foreign part of a trade is to the part of the trade carried on outside the UK.

A company within the foreign trade exemption will normally also qualify for the economically significant activity exemption; but it is just about possible to imagine a foreign trade which is not economically significant.

#### 60.18.1 *Furnished holiday letting*

Foreign trade relief is extended to include furnished holiday letting (which is not strictly classified as a trade).

Section 3A(3) TCGA provides:

For this purpose an asset is to be regarded as used only for the purposes of a trade carried on by the company wholly outside the UK if-

- (a) the asset is accommodation, or an interest or right in accommodation, situated outside the UK, and
- (b) the accommodation has for each relevant period been furnished holiday accommodation<sup>49</sup> of which a person has made a commercial letting.

Section 3A(4) TCGA defines relevant period:

Each of the following is a “relevant period”-

- (a) the period of 12 months ending with the date of the disposal and each of the two preceding periods of 12 months, or
- (b) if the company has beneficially owned the accommodation (or interest or right) for more than 36 months, the period of 12

---

<sup>49</sup> Section 3A(5) TCGA provides a referential definition: “The reference in this section to the commercial letting of furnished holiday accommodation is to be read in accordance with Chapter 6 of Part 4 of CTA 2009, but as if-

- (a) sections 266, 268 and 268A were omitted, and
- (b) the reference to an accounting period in section 267(1) were to a relevant period.”

The definition of furnished holiday accommodation needs a chapter to itself, and is not discussed here.

months ending with the date of the disposal and each of the preceding periods of 12 months throughout which the company had that beneficial ownership.

## **60.19 Economically significant activity**

Section 3(1) TCGA provides relief for a company carrying on an economically significant activity:

This section applies if ...

- (c) the gain is not connected to ... other economically significant foreign activities (see section 3A)

Section 3A(6) TCGA provides:

A gain accruing on the disposal of an asset is “connected to other economically significant foreign activities” if-

- (a) the asset is used only for the purposes of activities carried on by the company wholly or mainly outside the UK,
- (b) the activities consist of the provision of goods or services on a commercial basis, and
- (c) the activities also satisfy the staff, premises and economic value test.

I refer to this as the “**economically significant activity defence**”.

### *60.19.1 Staff/premises/economic value*

Section 3A(7) TCGA provides:

Activities satisfy the staff, premises and economic value test if they involve-

- (a) the use of employees, agents or contractors of the company in numbers, and with competence and authority, commensurate with the size and nature of the activities,
- (b) the use of premises and equipment commensurate with the size and nature of the activities, and
- (c) the addition of economic value by the company to the persons to whom the goods or services are provided commensurate with the size and nature of the activities.

For a discussion, see 102.15.5 (Genuine economic activities).

### *60.19.2 Activities “outside UK”*

The defence requires one to identify where the company's activities are carried on, or at least, whether they are wholly or mainly carried on outside the UK. If the activities are in the UK, or partly in the UK, this defence does not apply. CIOT complained to the EC that this rule is not EU-law compliant, but no-one took any notice.

## **60.20 Partnership holds non-resident co**

Suppose a partnership holds a non-resident company to which a gain accrues. Section 59(1) TCGA provides:

- Where 2 or more persons carry on a trade or business in partnership—
- (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
  - (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This does not apply to a s.3 gain, which is not a gain on the disposal of a partnership asset. But the partners are participators in the company, and it is just and reasonable (because it fits the scheme of the TCGA) to attribute the s.3 gain to the partners. That is, HMRC do not need s.59 TCGA to tax the partners.

## **60.21 s.3 distribution relief**

Section 3C TCGA provides:

- (1) If-
  - (a) an amount of tax is paid by a person as a result of section 3 in respect of a gain, and
  - (b) there is a distribution of an amount in respect of the gain before the end of the relevant period,
 the amount of tax is applied so as to reduce or extinguish any liability of the person to tax in respect of the distribution.
- (2) For the purposes of subsection (1)-
  - (a) the distribution is one made by way of dividend or distribution of capital or on the dissolution of the company,
  - (b) the tax in respect of the distribution is income tax, corporation tax or capital gains tax ....

In the following discussion:

This relief is “**s.3 distribution relief**”.

The amount of tax in (a) - paid as a result of s.3 - is “**s.3 tax**”.

The amount of the liability in (b) - in respect of the distribution - is “**distribution tax**”.

In short, the s.3 tax is set against the distribution tax.

The CG Manual provides:

**CG57351 outline of tax credit relief** [Oct 2019]

[The Manual summarises the provision and continues]

[1] It is important to note that relief under TCGA92/S13(5A) is only due where a charge arises under section 13 in respect of a gain and a further charge arises in respect of a distribution of an amount in respect of the same gain, and that both charges arise on the same person.

[2] Where a gain is attributed to participator A and the distribution is made to participator B no relief can be given to B as B has not paid tax under section 13. ...

Point [1] is a rough paraphrase. Point [2] is correct, but will not arise much in practice.

**CG57360 quantifying tax set-off available following capital dividends or distributions** [Nov 2019]

... Once capital gains tax has been paid under TCGA92/S13(2), then the whole of that tax is available for set-off against any tax liability on a subsequent distribution where the conditions for relief are met. Should only half of the gain be distributed this does not mean that only half of the section 13 capital gains tax can be set off. The section 13 tax represents a pool of tax credit to be used up against tax liability arising from appropriate distributions in respect of the same gain. Thus if only half of the gain is distributed but the tax liability on the distribution is at a higher rate than the tax on the section 13 gain, the tax credit relief will be more than half of the Section 13 tax.

It is a condition of TCGA92/S13(5A) relief that the tax arising on the gain attributed under TCGA92/S13 must have been paid. In some cases the liability on the section 13 gain and on the distribution will arise in the same year of assessment or accounting period, and in other cases the tax on the section 13 gain will not have been paid.

In practice relief may be given by set off providing that the only reason preventing relief being given is that tax on the section 13 gain is unpaid.

...

Income distributions by a non-resident company are generally exempt in

the hands of a corporate participator, so they do not benefit from s.3 distribution relief.

### 60.21.1 *Amount of distribution tax*

For the purpose of s.3 distribution relief, it is necessary to ascertain:

- (1) The amount of distribution tax, which may be
  - (a) Income tax or
  - (b) CGT<sup>50</sup>
- (2) The amount of s.3 tax

Where the distribution is subject to income tax, the amount of distribution tax is straightforward. The position is governed by s.3C(2) TCGA:

For the purposes of subsection (1) ...

- (c) in determining the liability to tax of any individual in respect of any distribution for a tax year it is to be assumed that the distribution is the highest part of the individual's income for the year.

Where the distribution is subject to CGT, the amount of distribution tax is less straightforward.

Before 2008:

- (1) the former s.13(7A)(b)(c) TCGA determined the amount of distribution tax when the distribution was subject to CGT;
- (2) the former s.13(7A)(d) TCGA determined the amount of s.3 tax.

The former s.13(7A) TCGA provided:

*In ascertaining for the purposes of subsection (5A) or (7) above the amount of CGT or income tax chargeable on any person for any year on or in respect of any chargeable gain or distribution...*

- (b) *any gain accruing in that year on the disposal by that person of any asset representing his interest as a participator in the company shall be regarded as forming the highest part of the gains on which he is chargeable to tax for that year;*
- (c) *where any such distribution as is mentioned in subsection (5A)(b) above falls to be treated as a disposal on which a gain accrues on which that person is so chargeable, that gain shall be regarded as forming the next highest part of the gains on which*

---

<sup>50</sup> Or corporation tax, but that is straightforward and not considered here.

*he is so chargeable, after any gains falling within para (b) above; and*

*(d) any gain treated as accruing to that person in that year by virtue of subsection (2) above shall be regarded as the next highest part of the gains on which he is so chargeable, after any gains falling within para (c) above.*

The CG Manual explains:

**CG57375 tax adjustment and reliefs: tax relief ordering rules** [Nov 2019]

Where the events which could give rise to relief under TCGA92/S13(5A) and (7) occurred within a single tax year, there could, in certain circumstances, be computational problems. To prevent this subsection (7A) set out the order of priority to be given to each tax charge. In ascertaining for the purposes of subsections (5A) and (7) the amount of CGT or IT which is chargeable on a person for a year, the order was

1. any distribution which is chargeable as income is treated as the top slice of income for that year
2. any gain accruing on the disposal of any asset representing the participator's interest in the non-resident company is treated as the top slice of gains for that year
3. any gain accruing on a capital distribution is treated as the second slice of gains for that year
4. the gain attributed to the participator under Section 13 is treated as the third slice of gains for that year. ...

Paragraphs (b) - (d) were repealed in 2008. The CG Manual explained why:

In 2008-09 and later years Capital Gains Tax is charged at a fixed rate regardless of an individual's income and so these priority rules are not necessary.<sup>51</sup>

This was correct in 2008. But in 2010/11, CGT rates changed and there

---

51 See CG57375: Non-resident companies: tax adjustment and reliefs: tax relief ordering rules. The passage was deleted in Apr 2019, presumably the point was thought to be of historical interest only.

In fact, even in 2008 the provision might have been retained to deal with the CGT annual exemption; but that might have been regarded as trivial.

were (once again) two rates of CGT, then 18%/28%, and now there are four rates.<sup>52</sup> Unfortunately, the need to re-enact subsections (b)-(d) was overlooked! So there is no current statutory guidance. It is considered the pre-2008 rules should continue to be applied, on the basis that they provide an indication of the intention of parliament, and the failure to re-enact them must have been an oversight. The HMRC examples below adopt that view.

It would of course be easy to tidy up this muddle by re-enacting the old provisions. Mistakes like this are inevitable, and will become more frequent as the complexity of the UK tax system spirals each year, and the part which a single person can keep in mind becomes ever smaller. It is however a pity that the rewrite did not take the opportunity to put this right.

#### 60.21.2 *HMRC examples*

The CG Manual tries to provide two straightforward worked examples. The first sets s.3 tax against tax on a dividend. The second sets s.3 tax against tax on a capital distribution. There are problems with the worked examples, which have been altered, not always successfully, in a series of amendments to the Manual. I hope to consider this in a future edition.

#### 60.21.3 *Relevant period*

Section 3C TCGA provides:

- (3) For the purposes of subsection (1) “the relevant period” means the period of 3 years from the end of whichever of the following periods is earlier-
- (a) the period of account of the company in which the gain accrued, and
  - (b) the period of 12 months beginning with the date on which the gain accrued.

The drafting is convoluted, but in plain English the time limit is the earlier of:

- (1) three years from the end of the accounting period; or
- (2) four years from the date of the gain.

---

<sup>52</sup> See 40.13 (CGT rates).

CIOT have argued that this time limit should be removed.<sup>53</sup> But no-one has taken any notice. There is something to be said for the current rule. A time limit offers some administrative simplification, as it prevents the need to examine very distant years. Indeed there is something to be said for a similar time limit on other carry forward reliefs, such as loss relief, which currently applies without any time limit on the gap between when the loss accrues, and when the gain accrues against which the loss is set.

#### 60.21.4 *Remittance basis taxpayer*

Section 3 distribution relief applies to foreign s.3 gains which are taxed on a remittance basis. However the relief only sets tax on the s.3 gain against tax on the distribution. So the relief does not apply unless:

- (1) the s.3 gain is remitted (so tax is paid on it), and
- (2) the distribution is remitted (so tax actually paid on the distribution qualifies for relief).

Thus suppose:

- (1) Year 1: A company realises a gain deemed to accrue to a remittance basis taxpayer under s.3 but not taxed as it is not remitted.
- (2) Year 3: The company declares a dividend in respect of the gain. The dividend is RFI but not taxable as it is not remitted.
- (3) Year 10: the gain and the dividend are remitted.

The relief applies. The time limit is met as the distribution was within 3 years of the relevant time, the time that the gain accrued to the company. The date of the remittance is not relevant.

#### 60.21.5 *s.3 distribution relief/s.87/86: Interaction*

Suppose non-resident trustees hold a company, and:

- (1) A gain accrues to the company; this gain (the “s.3 gain”) is a trust gain.
- (2) The company is wound up, and a gain accrues to the trustees; this gain (“the distribution gain”) is a further trust gain.
- (3) The two trust gains are matched to a capital payment resulting in a charge under s.87.

---

53 CIOT, “Reform of two anti-avoidance provisions” (2012)

<https://www.kessler.co.uk/wp-content/uploads/2018/12/121002-s13-and-transfer-of-assets-CIOT-comments.pdf>

Does s.3 distribution relief apply? The taxpayer has to argue:

- (1) CGT paid by the beneficiary, so far as the capital payment is matched to the s.3 gain, is paid “as a result of section 3”.
- (2) CGT paid by the beneficiary, so far as the capital payment is matched to the distribution gain, is tax “in respect of the distribution”.

The s.87 gain matched to the s.3 gain arises as a result of the combination of s.3 and s.87. The s.87 gain matched to the distribution gain arises in respect of the combination of the distribution and the capital payment.

“As a result of” and “in respect of” are vague phrases. They can be interpreted more widely, or more loosely, and should take their meaning from the context. The context here is the avoidance of a double charge to tax, which suggests that the words should be construed more widely, so that s.3 distribution relief is available in this case.

A solution may be to make the trust UK resident (the company remaining non-resident); then s.3 distribution relief clearly applies.

By contrast, the application of s.3 distribution relief where s.86 applies seems relatively straightforward.

## 60.22 Deduction relief

Section 3C(4) TCGA provides:

- (4) The amount of tax paid by a person as a result of section 3 is allowable as a deduction in calculating a chargeable gain accruing on the disposal by the person of any asset representing the person’s interest as a participator in the company.
- (5) An amount of tax-
  - (a) is not to be used more than once under this section (whether to reduce or extinguish a liability or as a deduction or a combination of those things)...

I refer to this as “**s.3 deduction relief**”.

This relief sets s.3 tax against the gain, so it is not generous. The CG Manual provides:

**CG57370 tax adjustment and reliefs: disposal of interest by UK resident participator** [Nov 2019]

[The Manual summarises s.13(7) and continues]

No deduction is due if the tax was paid by the non-resident company, see CG57390.

Example:

## Facts

- June 2016 a taxpayer buys 500 out of the 750 issued shares in X Ltd, a non- resident close company, at a cost of £100,000.
- March 2017 X Ltd realises a gain of £6,000.  $500/750 \times £6,000 = £4,000$  is apportioned to the taxpayer. The amount is included in the 2016-17 Self Assessment return. The taxpayer was liable at 20 per cent and tax of £800 was due.
- August 2017 the taxpayer sells the shares for £130,000.

## Chargeable Gain

Disposal proceeds		£130,000
Less Cost	£100,000	
Less s.13(7) deduction	£ 800	<u>-£100,800</u>
Chargeable gain		<u>£ 29,200</u>

**60.23 Reimbursement by non-resident co**

Tax on the s.3 gain is due from the UK resident participator and not from the company. The participator has no statutory right of indemnity against the company. But it is possible that the company might pay the tax on the s.3 gain voluntarily, or perhaps a participator might anticipate the problem and enter into a contract requiring the company to pay the tax.

Section 3G TCGA provides:

- (1) If tax payable by a person (“P”) as a result of section 3 is paid by-
  - (a) the company (“C”) to which the gain accrues, or
  - (b) a company by reference to which P is regarded as an indirect participator in C, the amount paid is not a payment to P for tax purposes.
- (2) The reference here to tax purposes is to the purposes of income tax, capital gains tax or corporation tax.

I refer to this as “**reimbursement relief**”.

The CG Manual provides a précis:

**CG57390 Payment of UK tax by NR company [Nov 2019]**

The non-resident company may pay the UK tax due from a UK resident when gains have been apportioned to him under TCGA92/S13. If so, TCGA92/S13 (11) provides that the payment of the tax on behalf of the UK resident does not give rise to any further liability in the hands of the UK resident. You do not treat the payment as income of the resident or as a capital distribution in respect of the shares in the non-resident company. TCGA92/S13 (11) will also apply if the liability arises because

a UK resident has an indirect shareholding in the non-resident company. The liability can be paid by any of the non-resident close companies in the chain.

Reimbursement is better than an income distribution in respect of the gain as the reimbursement is tax free, whereas an income distribution is subject to income tax (at income tax rates) with the benefit of CGT relief (at CGT rates). Of course, the non-resident company will need to consider whether it would be proper to make the reimbursement as a matter of company law (eg are there other shareholders who may be prejudiced?).

Section 3C TCGA provides:

- (5) An amount of tax ...
  - (b) is not to be applied if it is reimbursed by the company.

## 60.24 Section 3 remittance basis

Section 3D TCGA provides a relief which I call the “**s.3 remittance basis**”. Section 3D provides:

- (1) This section applies if, as a result of section 3, an amount in respect of a gain accruing to a company in a tax year is apportioned to an individual who is not domiciled in the UK in that year.
- (2) The apportioned amount is regarded for the purposes of paragraph 1 of Schedule 1 as accruing on a disposal of a foreign asset if the asset disposed of by the company is a foreign asset (but not otherwise).

This brings sch 1 TCGA into effect, and so provides the remittance basis. Section 3D(3) TCGA provides:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)-

- (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the apportioned amount, and
- (b) if that consideration is less than the market value of the asset, treat the asset as deriving from the apportioned amount.

In the absence of express provision, it might be argued that the s.3 gain could not be remitted as it does not exist. Section 3D(3)(a) deals with that

problem.<sup>54</sup>

Suppose:

- (1) A non resident company (“OC”) disposes of a foreign situate asset and realises a gain.
- (2) The gain (or part) is deemed to accrue to T (an individual taxable under the remittance basis).

T is subject to tax on the gain if OC brings/receives/uses the sum in the UK, if a company is a relevant person in relation to T. A company within s.3 will in principle be a relevant person in relation to T.

If OC distributes the sum by way of dividend and T brings/receives/uses the sum in the UK then T is arguably subject to two charges:

- (1) CGT on the s.3 gain (for what F receives is derived from the gain) and
- (2) IT on the distribution.

The same applies if OC is held by an IIP trust.

Likewise if OC is wound up and the liquidator distributes the sum by way of capital distribution, and F brings/receives/uses the sum in the UK then F is arguably subject to two charges:

- (1) CGT on the s.3 gain (for what F receives is derived from the gain) and
- (2) CGT on the disposal of the shares in OC.

If there are two charges, s.3 distribution relief may apply. But the better view is that there is only a single charge to tax in these cases. One receipt cannot give rise to two charges under the remittance basis.<sup>55</sup>

Section 3D TCGA provides:

- (5) Paragraph 5 of Schedule 1 applies for the purposes of this section as it applies for the purposes of that Schedule.

## **60.25 CG group reliefs**

Group reliefs prevent a gain accruing when an asset is transferred between group companies. We need labels for these reliefs, and I coin the following terminology:

---

<sup>54</sup> Section 3D(3)(b) is necessary since the equivalent rule in s.809T ITA only applies to gains accruing on a disposal by an individual: see 17.33.2 (Remittance of deemed gain).

<sup>55</sup> See 17.16.15 (Income from income/gains).

Type of relief	TCGA section	See para
UK-group relief	s.170-181	60.28
Non-resident group relief	s.3F	60.29

A full discussion needs a book to itself. I focus on non-resident group relief but it is necessary to look at the position in the round.

Where it is necessary to distinguish these from other group reliefs, I call them CG group reliefs.

For other aspects of group reliefs, see 82.23 (Partnerships: Group reliefs); 57.55.3 (Chain of cos: Disadvantages).

## 60.26 “Group”

Section 170(2) TCGA provides:

Except as otherwise provided—

(b) subsections (3) to (6) below apply to determine

[i] whether companies form a group

[ii] and, where they do, which is the principal company of the group.

So we turn to s.170(3) TCGA:

Subject to subsections (4) to (6) below—

(a) [i] a company (referred to below and in sections 171 to 181 as the “principal company of the group”) and all its 75% subsidiaries form a group and,

[ii] if any of those subsidiaries have 75% subsidiaries, the group includes them and their 75% subsidiaries, and so on

Under this definition both resident and non-resident companies may form a group. For partnerships in group structures, see 82.23 (Partnerships: Group reliefs).

## 60.27 “51/75/90 % subsidiary”

Section 1154 CTA 2010 defines 51/75/90 % subsidiary. The definitions also apply for IT purposes.<sup>56</sup> Section 1154 CTA 2010 provides:

---

<sup>56</sup> Section 989 ITA provides:

‘51% subsidiary’, in relation to bodies corporate, has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010).

‘75% subsidiary’, in relation to bodies corporate, has the same meaning as in the

- (1) Subsections (2) to (4) define, for the purposes of the Corporation Tax Acts,<sup>57</sup> the circumstances in which a body corporate (“B”) is a 51% subsidiary, a 75% subsidiary or a 90% subsidiary of another body corporate (“A”).
- (2) B is a 51% subsidiary of A if more than 50% of B’s ordinary share capital is owned directly or indirectly by A.
- (3) B is a 75% subsidiary of A if at least 75% of B’s ordinary share capital is owned directly or indirectly by A.
- (4) B is a 90% subsidiary of A if at least 90% of B’s ordinary share capital is owned directly by A.
- (5) For the purposes of subsections (2) and (3) ordinary share capital is owned “directly or indirectly” by a body corporate if it is owned by it—
  - (a) directly,
  - (b) indirectly, or
  - (c) partly directly and partly indirectly.

The term used here is body corporate, not company; the difference occasionally matters.

For the definition of ordinary share capital, see App 86.41 (Ordinary share capital).

CTM provides:

**CG45110 what is a group?** [Jul 2019]

...The question of whether a particular entity has ordinary share capital may be important when considering capital gains groups. A company that has no ordinary share capital cannot be a subsidiary. The question arises most often when considering entities created under foreign law. There is also the possibility that a foreign entity may be considered to be transparent for UK tax purposes. Of course, a company that has no ordinary share capital may be the principal company of a group. ...

60.27.1 *Ownership*

Section 1154(6) CTA 2010 provides:

In this Chapter references to ownership are to be read as references to beneficial ownership.

---

Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010).

<sup>57</sup> CT principles apply for s.3 purposes, see 60.4 (Computing gains: CT rules).

Beneficial ownership is not defined; it has its English law meaning.<sup>58</sup>

### 60.27.2 Indirect ownership

Section 1155 CTA 2010 provides:

- (1) For the purposes of this Chapter ordinary share capital is owned indirectly by a body corporate if it is owned through another body corporate or other bodies corporate.
- (2) References in this Chapter to ownership through a body corporate are to be read in accordance with subsections (3) and (4).
- (3) Suppose that 3 or more bodies corporate are ordered in a series such that each body in the series (other than the last) owns ordinary share capital of the body immediately below it in the series.
- (4) If B is a body that is below, but not immediately below, A in the series, A is said to own ordinary share capital of B through each body corporate that is between A and B in the series.

So indirect ownership means ownership through another body corporate.

Section 1155(5) CTA 2010 provides:

Sections 1156 and 1157 contain rules for calculating, for the purposes of this Chapter, the amount of a body corporate's ordinary share capital that another body corporate owns-

- (a) indirectly, or
- (b) partly directly and partly indirectly.

These rules are straightforward but not discussed here.

### 60.27.3 Effective subsidiary rule

Section 170(3) TCGA provides:

- (b) a group does not include any company (other than the principal company of the group) that is not an effective 51% subsidiary of the principal company of the group.

I refer to this as the “**effective subsidiary rule**”.

Section 170(7) TCGA provides:

For the purposes of this section and sections 171 to 181, a company (“the subsidiary”) is an effective 51% subsidiary of another company (“the

---

<sup>58</sup> See 71.6 (English-law beneficial ownership).

parent”) at any time if and only if—

- (a) the parent is beneficially entitled to more than 50% of any profits available for distribution to equity holders of the subsidiary; and
- (b) the parent would be beneficially entitled to more than 50% of any assets of the subsidiary available for distribution to its equity holders on a winding-up.

These terms are defined by reference:

(8) Chapter 6 of Part 5 of CTA 2010 (group relief: equity holders and profits or assets available for distribution) applies for the purposes of subsections (6) and (7) as if—

- (a) references to section 151(4)(a) and (b) of that Act were references to subsections (6) and (7) above, . . .
- (aa) in section 158 of that Act after subsection (2) there were inserted—
  - (2A) But for those purposes a person carrying on a business of banking is not treated as a loan creditor of a company in respect of any loan capital or debt issued or incurred by the company for money lent by the person to the company in the ordinary course of that business.”, and
- (b) sections 171(1)(b) and (3), 173, 174 and 176 to 178 of that Act were omitted.

The definitions are as follows:

<b>Term</b>	<b>Definition in CTA 2010</b>
Equity holder	s.157-164
<i>Available for distribution</i>	
Proportion of profits	s.165
Proportion of assets available on winding up	s.166
Supplementary	s.167-182

These definition are highly elaborate, and a full discussion would need a long chapter. In short, the parent’s beneficial ownership must confer a corresponding economic interest in the subsidiary, both when its profits are distributed and when it is wound up.

#### 60.27.4 *Principal company*

Section 170(4) TCGA provides:

A company cannot be the principal company of a group if it is itself a 75% subsidiary of another company.

Section 170(5) TCGA provides:

[a] Where

[i] a company (“the subsidiary”) is a 75% subsidiary of another company but

[ii] those companies are prevented from being members of the same group by subsection (3)(b) above [effective 51% subsidiary rule],

the subsidiary may, where the requirements of subsection (3) above are satisfied, itself be the principal company of another group notwithstanding subsection (4) above

[b] unless this subsection enables a further company to be the principal company of a group of which the subsidiary would be a member.

### 60.27.5 Which group?

Section 170(6) TCGA provides:

[A] A company cannot be a member of more than one group;

[B] but where, apart from this subsection, a company would be a member of 2 or more groups (the principal company of each group being referred to below as the “head of a group”), it is a member only of that group, if any, of which it would be a member under one of the following tests (applying earlier tests in preference to later tests)—

- (a) it is a member of the group it would be a member of if, in applying subsection (3)(b) above [effective 51% subsidiary rule], there were left out of account any amount to which a head of a group is or would be beneficially entitled of any profits available for distribution to equity holders of a head of another group or of any assets of a head of another group available for distribution to its equity holders on a winding-up,
- (b) it is a member of the group the head of which is beneficially entitled to a percentage of profits available for distribution to equity holders of the company that is greater than the percentage of those profits to which any other head of a group is so entitled,
- (c) it is a member of the group the head of which would be beneficially entitled to a percentage of any assets of the company available for distribution to its equity holders on a winding-up that is greater than the percentage of those assets to which any other head of a group would be so entitled,
- (d) it is a member of the group the head of which owns directly or indirectly a percentage of the company’s ordinary share capital

that is greater than the percentage of that capital owned directly or indirectly by any other head of a group (interpreting this paragraph as if it were included in section 1154(2) of CTA 2010).

#### 60.27.6 *Change of principal company*

Section 170(10) TCGA provides:

For the purposes of this section and sections 171 to 181, a group remains the same group so long as the same company remains the principal company of the group, and if at any time the principal company of a group becomes a member of another group, the first group and the other group shall be regarded as the same, and the question whether or not a company has ceased to be a member of a group shall be determined accordingly.

Section 170(10A) deals with a company becoming a *Societas Europaea*, which I need not consider here.

#### 60.27.7 *Winding up*

Section 170(11) TCGA provides:

For the purposes of this section and sections 171 to 181, the passing of a resolution or the making of an order, or any other act, for the winding-up of a member of a group of companies shall not be regarded as the occasion of that or any other company ceasing to be a member of the group.

#### 60.27.8 “*Company*”

Section 170(9) TCGA provides a non-standard definition of “company”:

For the purposes of this section and sections 171 to 181, references to a company apply only to—

- (a) a company as defined in section 1(1) of the Companies Act 2006,<sup>59</sup> and

---

<sup>59</sup> Section 1(1) Companies Act 2006 provides:

In the Companies Acts, unless the context otherwise requires—

“company” means a company formed and registered under this Act, that is—

- (a) a company so formed and registered after the commencement of this Part, or
- (b) a company that immediately before the commencement of this Part—

- (i) was formed and registered under the Companies Act 1985 or the Companies

- (b) a company (other than a limited liability partnership) which
  - [i] is constituted under any other Act or a Royal Charter or letters patent or
  - [ii] is formed under the law of a country or territory outside the UK, and
- (c) a registered society (see section 1119 of CTA 2010) [Co-operative and Community Benefit Societies, etc];<sup>60</sup> and
- (cc) an incorporated friendly society within the meaning of the Friendly Societies Act 1992; and
- (d) a building society.

I think the point is that an unincorporated association does not count as a company and so does not qualify for group relief.

Section 170(2) TCGA provides:

Except as otherwise provided ...

- (d) “group” and “subsidiary” shall be construed with any necessary modifications where applied to a company incorporated under the law of a country outside the UK.

## 60.28 UK-group relief

Section 171 TCGA provides UK-group relief:

(1) Where—

- (a) a company (“company A”) disposes of an asset to another company (“company B”) at a time when both companies are members of the same group, and
  - (b) the conditions in subsection (1A) below are met,
- company A and company B are treated for the purposes of corporation tax on chargeable gains as if the asset were acquired by company B for a consideration of such amount as would secure that neither a gain nor a loss would accrue to company A on the disposal.

Section 171(1A) TCGA (more or less) restricts this relief to UK companies:

---

(Northern Ireland) Order 1986, or

(ii) was an existing company for the purposes of that Act or that Order, (which is to be treated on commencement as if formed and registered under this Act).

<sup>60</sup> Section 170(2) TCGA provides: “Except as otherwise provided ...

(c) in applying section 1154(3) of CTA 2010 (meaning of “75% subsidiary”) any share capital of a registered society (see section 1119 of that Act) shall be treated as ordinary share capital”.

The conditions referred to in subsection (1)(b) above are—

- (a) [i] that company A is resident in the UK at the time of the disposal, or
  - [ii] the asset is a chargeable asset<sup>61</sup> in relation to that company immediately before that time, and
- (b) [i] that company B is resident in the UK at the time of the disposal, or
  - [ii] the asset is a chargeable asset in relation to that company immediately after that time.

I refer to this as “**UK-group relief**”.

Group relief is compulsory but it should be possible to arrange that companies are not part of a group, by issuing shares or arranging some other breach of the definition of a group, and so exclude the relief. That is not likely to arise for UK-group relief, but it may for non-resident group relief.

Section 171(6) dots some *I*'s and crosses some *T*'s:

Subsection (1) above applies notwithstanding any provision in this Act fixing the amount of the consideration deemed to be received on a disposal or given on an acquisition.

But where it is assumed for any purpose that a member of a group of companies has sold or acquired an asset, it shall be assumed also that it was not a sale or acquisition to which this section applies.

### 60.28.1 *Disposal but no acquisition*

The relief only applies where a member of a group of companies disposes of an asset to another member of the same group. The general requirement is therefore that there should be both a disposal by a group company and an

---

61 “Chargeable asset” has an artificial definition in the final sentence of s.171(1A) TCGA:

“For this purpose an asset is a “chargeable asset” in relation to a company at any time if, were the asset to be disposed of by the company at that time, any gain accruing to the company would be a chargeable gain chargeable to corporation tax as a result of section 2B(3) or (4).”

This extends UK-group relief to:

- (1) Non-resident companies with a UK permanent establishment
- (2) Disposals of UK land/land-rich assets

See 53.4.2 (“Chargeable” asset).

acquisition by a group company.

Suppose A Ltd owns B Ltd, B Ltd is put into liquidation and its asset is transferred to A Ltd. There are two disposals:

- (1) B Ltd disposes of the asset which is transferred to A Ltd: this disposal qualifies in principle for group relief.
- (2) A Ltd disposes of its shares in B Ltd.<sup>62</sup> That disposal does not qualify for group relief. It seems strange that the relief does not apply, but the rule is deliberate.<sup>63</sup>

The Manual also gives examples of a purchase of own shares, and an issue of shares:

**CG45320 Exceptions** [Jul 2019]

... Examples would be intra-group transactions involving capital sums derived from assets within TCGA92/S22, ....

f group company A owns shares in group company B, and company B purchases its own shares from A under Section 690 Companies Act 2006, there is a disposal by A of the shares in B but no corresponding acquisition of those shares by B. TCGA92/S171(1) accordingly does not apply....

If group company B issues shares to group company A, there is an acquisition of the shares by A but no disposal of the shares by B. This is in accordance with the general rule that a company issuing shares does not make any disposal of those shares. The no gain/no loss rule accordingly does not apply when one group company issues shares to another. The same considerations apply when one group company issues securities to another. ...

*60.28.2 Exceptions to group relief*

Section 171 TCGA sets out 11 exceptions where group relief does not apply. These are of somewhat specialist interest:

(1B) If—

---

<sup>62</sup> Section 122 TCGA.

<sup>63</sup> Section 171(2) TCGA provides: “the reference in subsection (1) above to company A disposing of an asset shall not apply to anything which under section 122 is to be treated as a disposal of an interest in shares in a company in consideration for a capital distribution (as defined in that section) from that company, whether or not involving a reduction of capital.” This seems to me to be otiose, but the drafter wanted to emphasise the point.

- (a) company A is deemed under section 25(3) to have previously disposed of the asset, but
  - (b) no gain or loss accrued on that deemed disposal as a result of section 25ZA(2),
- that deemed disposal is to be ignored in applying subsection (1) of this section in relation to company B.
- (2) Subsection (1) above shall not apply where the disposal is—
- (a) a disposal of a debt due from company B effected by satisfying the debt or part of it; or
  - (b) a disposal of redeemable shares in a company on the occasion of their redemption; or
  - (c) a disposal by or to an investment trust; or
  - (cc) a disposal by or to a venture capital trust; or
  - (cd) a disposal by or to a qualifying friendly society<sup>64</sup>; or
  - (d) a disposal to a dual resident investing company; or
  - (da) a disposal by or to a company which is, or is a member of, a UK REIT within the meaning of Part 12 of CTA 2010; or
  - (db) a disposal by company A in fulfilment of its obligations under an option granted to company B at a time when those companies were not members of the same group;
- (3) Subsection (1) above shall not apply to a transaction treated by section 127 as it applies by virtue of section 135 as not involving a disposal by company A.

## 60.29 Non-resident group relief

### 60.29.1 “Non-resident group”

Section 3F(3) TCGA provides:

In this section-

“non-resident company” means a company which is not resident in the UK,

“non-resident group of companies”-

- (a) in the case of a group none of whose members are resident in the UK, means that group, and
- (b) in the case of a group some of whose members are not resident in the UK, means the members which are not resident in the UK, and “group” is to be read in accordance with section 170.

---

64 Defined in subsection (5).

The CG Manual provides 3 examples:

**CG57400 non-resident group** [Nov 2019]

...<sup>65</sup>

*Example 1*

B Ltd and C Ltd form a non-resident group. A Ltd is not a member of the non-resident group but it does have the effect of ‘grouping’ B Ltd and C Ltd.

*Example 2*

B Ltd and C Ltd do not form a non-resident group because they are not members of any group.

*Example 3*

B Ltd and C Ltd form a non-resident group because all of the companies in the group are not resident.

60.29.2 s.3 group relief

Section 3F TCGA provides:

- (1) This section applies, for the purposes of section 3, certain provisions

---

65 I have created the diagrams to increase clarity.

of this Act (modified as mentioned below) in relation to non-resident companies which are members of a non-resident group of companies.

(2) The applied provisions are-

- (a) section 41(8),
- (b) section 171 but as if subsections (1)(b) and (1A) were omitted,
- (c) section 173 but as if “to which this section applies” in subsections (1)(a) and (2)(a) were omitted, as if “such” in subsections (1)(c) and (2)(c) were omitted and as if subsection (3) were omitted,
- (d) section 174(4) but as if “at a time when both were members of the group” were substituted for “in a transfer to which section 171(1) applied”,
- (e) section 175(1) but as if “to which this section applies” were omitted...

Thus the rules for UK-group relief are applied to a transfer from a non-resident group company to another non-resident group company. I refer to this as **“non-resident group relief”**.

What about a disposal from a non-resident group company to a UK resident group company? Non-resident group relief does not apply because the companies are not both members of a non-resident group; UK-group relief does not apply as the condition in s.171(1A) TCGA is not met. In practice this problem may not arise, as a transfer from a non-resident company (within the scope of s.3) to a UK company in the same group would be unusual.

For the position before 2019, see the 2018/19 edition of this work para 62.29.7 (Scope of s.3 group relief).

### **60.30 De-grouping charge**

Section 3F TCGA provides:

(1) This section applies, for the purposes of section 3, certain provisions of this Act (modified as mentioned below) in relation to non-resident companies which are members of a non-resident group of companies.

(2) The applied provisions are ...

- (f) section 179 but as if subsections (1)(b) and (1A) were omitted, as if for any reference to a group of companies there were substituted a reference to a non-resident group of companies and as if for any reference to a company there were substituted a reference to a non-resident company.

So the clawback rules for which apply to UK-group relief are incorporated into non-resident group relief. Amended as s.3F directs, s.179(1) TCGA (in outline) provides:

This section applies where—

- (a) [i] a company not resident in the UK (“company A”) acquires an asset from another company not resident in the UK (“company B”)
  - [ii] at a time when company A and company B are members of the same non-resident group
- (b) [disapplied for non-resident group relief purposes]
- (c) company A ceases to be a member of that group within the period of six years after the time of the acquisition.

References in this section to a company ceasing to be a member of a group of companies do not apply to cases where a company ceases to be a member of a non-resident group in consequence of another member of the non-resident group ceasing to exist.

Amended as s.3F directs, s.179(3) TCGA provides the charge:

If, when company A ceases to be a member of the non-resident group, company A, or an associated non-resident company also leaving the group, owns, otherwise than as trading stock—

- (a) the asset, or
- (b) property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

then, subject to subsection (4) below, company A shall be treated for all the purposes of this Act as if immediately after its acquisition of the asset it had sold, and immediately reacquired, the asset at market value at that time.

Section 179(4) TCGA deals with timing:

Any chargeable gain or allowable loss accruing to company A on the sale referred to in subsection (3) above shall be treated as accruing to company A at whichever is the later of the following, that is to say—

- (a) the time immediately after the beginning of the accounting period of that company in which or, as the case may be, at the end of which the company ceases to be a member of the group; and
- (b) the time when under subsection (3) above it is treated as having reacquired the asset; and sections 138 to 142 of CTA 2010 have

effect accordingly as if the actual circumstances were as they are treated as having been.

Section 179(13) TCGA dots some *i*'s and crosses some *t*'s:

Where under this section company A is to be treated as having disposed of, and reacquired, an asset, all such recomputations of liability in respect of other disposals, and all such adjustments of tax, whether by way of assessment or by way of discharge or repayment of tax, as may be required in consequence of the provisions of this section shall be carried out.

### 60.30.1 *Associated cos leave together*

Amended as s.3F directs, s.179(2) TCGA provides:

Where two non-resident companies cease to be members of the non-resident group at the same time, subsection (1) does not have effect as respects the acquisition of an asset by one of the companies from the other if condition A or B is met.

I refer to “**de-grouping exemptions A and B**”.

Section 179(2ZA) sets out degrouping exemption A:

Condition A is that the non-resident companies—

- (a) are both 75% subsidiaries and effective 51% subsidiaries of another non-resident company on the date of the acquisition, and
- (b) remain both 75% subsidiaries and effective 51% subsidiaries of that other non-resident company until immediately after they cease to be members of the non-resident group.

Section 179(2ZB) sets out degrouping exemption B:

Condition B is that one of the non-resident companies—

- (a) is both a 75% subsidiary and an effective 51% subsidiary of the other on the date of the acquisition, and
- (b) remains both a 75% subsidiary and an effective 51% subsidiary of the other until immediately after the non-resident companies cease to be members of the non-resident group.

Section 171 then deals with the case where company A leaves the second non-resident group:

(2A) Subsection (2AA) applies where—

- (a) a non-resident company ("company A") acquired an asset from another non-resident company ("company B") at a time when both company A and company B were members of the same non-resident group ("the first non-resident group"),

- (aa) company A has ceased to be a member of the first non-resident group,
  - (b) subsection (2) above applies in the case of company A's ceasing to be a member of the first non-resident group so that subsection (1) above does not have effect as respects the acquisition of that asset,
  - (c) at the time company A ceases to be a member of the first non-resident group there is a connection between that group and the group of companies of which company A becomes a member on leaving the first group ("the second group"), and
  - (d) subsequently—
    - (i) company A ceases to be a member of the second non-resident group, or
    - (ii) (before sub-paragraph (i) applies) there ceases to be a connection between the two groups.
- (2AA) Where this subsection applies—
- (a) in a case within subsection (2A)(d)(ii), for the purposes of this section (other than subsection (2A)) as it applies as respects the acquisition, company A and any associated non-resident company are to be treated as having ceased to be members of the second non-resident group at the time the connection between the two groups ceases,
  - (b) subsection (1) has effect in relation to company A's ceasing to be a member of the second non-resident group as if it had been the second non-resident group of which both companies had been members at the time of the acquisition, and
  - (c) subsection (2) may operate to prevent subsection (1) applying by virtue of paragraph (b), unless subsection (2AB) applies.
- (2AB) This subsection applies if company A's ceasing to be a member of the first non-resident group at the same time as one or more associated non-resident companies forms part of arrangements the main purpose, or one of the main purposes, of which is the avoidance of a liability to corporation tax.
- (2B) For the purposes of subsection (2A) above there is a connection between the first group and the second group at a particular time if, at that time, the company which is the principal company of that group is under the control<sup>66</sup> of—
- (a) the non-resident company which is the principal company of the first non-resident group or, if that group no longer exists, which was the principal company of that group when company A ceased to be a member of it;
  - (b) any person or persons who control the non-resident company mentioned in paragraph (a) above or who have had it under their control at any time in the period since company A ceased to be a member of the first non-resident group; or

---

66 Section 179(9A) TCGA provides: "Sections 450 and 451 of CTA 2010 (meaning of control) shall have effect for the purposes of subsection (2B) above as they have effect for the purposes of Part 10 of CTA 2010; but a person carrying on a business of banking shall not for the purposes of that subsection be regarded as having control of any company by reason only of having, or of the consequences of having exercised, any rights of that person in respect of loan capital or debt issued or incurred by the company for money lent by that person to the company in the ordinary course of that business."

- (c) any person or persons who have, at any time in that period, had under their control either—
  - (i) a non-resident company which would have been a person falling within paragraph (b) above if it had continued to exist, or
  - (ii) a company which would have been a person falling within this paragraph (whether by reference to a company which would have been a person falling within that paragraph or to a company or series of companies falling within this subparagraph).

(2C) This section shall not have effect as respects any asset if, before the time when company A ceases to be a member of the group or, as the case may be, the second group, an event has already occurred by virtue of which the company falls by virtue of section 101A(3) to be treated as having sold and immediately reacquired the asset at the time specified in subsection (3) below.

(2D) This section shall not have effect as respects any asset if, before the time when company A ceases to be a member of the non-resident group or, as the case may be, the second non-resident group, an event has already occurred by virtue of which the company falls by virtue of section 101C(3) to be treated as having sold and immediately reacquired the asset at the time specified in subsection (3) below.

### 60.30.2 *Exceptions: Chargeable assets*

Section 179 TCGA goes on to set out some exceptions to the charge:

(3A) Any chargeable gain or allowable loss which would otherwise accrue to company A on the sale referred to in subsection (3) does not so accrue if—

- (a) company A ceases to be a member of the non-resident group in consequence of—
  - (i) a disposal of shares in company A or another member of the group made by a member of the group, or
  - (ii) two or more such disposals,

(b) either—

- (i) subsection (3B) applies to the disposal or, if there is more than one disposal, to at least one of them, or
- (ii) sub-paragraph (i) does not apply but had subsection (3B) applied to the disposal or, if there is more than one disposal, to each of them, any gain arising on the disposal or disposals would not have been a chargeable gain by virtue of Schedule 7AC, and

(c) in the absence of this subsection, section 535 of CTA 2010 (UK REITS: exemption of gains) would not apply to the chargeable gain or allowable loss which would accrue to company A on the sale.

(3B) This subsection applies to a disposal of shares if—

- (a) the company making the disposal is resident in the UK at the time of the disposal,
- (b) the shares are chargeable assets<sup>67</sup> in relation to that company immediately before that

---

67 Section 179(10A) TCGA provides: “For the purposes of this section an asset is a “chargeable asset” in relation to a company at any time if any gain accruing to the

time, or

- (c) any part of the chargeable gain or allowable loss accruing on the disposal is treated as a gain or loss accruing to a person by virtue of section 3 (attribution of gains to members of non-resident companies).

In this section “group disposal” means a disposal within subsection (3A)(a) to which this subsection applies and the company making the disposal is referred to as “the transferor company”.

(3C) For the purposes of subsections (3A) and (3B), the question whether there is a disposal is to be determined ignoring section 127 (share reorganisations etc treated as not involving disposal).

(3D) If subsection (3A) applies, any chargeable gain or allowable loss accruing to the transferor company on a group disposal (other than a group disposal to which section 127 applies) is to be calculated—

- (a) where a chargeable gain would accrue to company A in the absence of subsection (3A), as if the amount of the consideration for the group disposal were increased by the amount of the gain, and
- (b) where an allowable loss would accrue to company A in the absence of subsection (3A), as if an amount equal to the amount of the loss were a sum allowable under section 38 as a deduction in the computation of the gain or loss accruing on the group disposal.

(3E) If subsection (3A) applies, and section 127 applies to a group disposal, any chargeable gain or allowable loss accruing to the transferor company on a disposal of the new holding arising from the group disposal (or any part of that holding) is to be calculated—

- (a) where a chargeable gain would accrue to company A in the absence of subsection (3A)—
- (i) as if an amount equal to the amount of the gain were excluded from the expenditure allowable as a deduction under section 38 in the computation of the gain or loss accruing on the disposal (but not so as to reduce that expenditure below nil), and
- (ii) where (ignoring sub-paragraph (i)) the amount of the gain exceeds the expenditure allowable as such a deduction, as if a gain equal to that excess accrued on the disposal of the new holding (or, if the disposal is of a part of the new holding, a gain equal to the corresponding part of that excess accrued on that disposal), in addition to any gain or loss that actually accrues on the disposal of the new holding or part, and
- (b) where an allowable loss would accrue to company A in the absence of subsection (3A), as if an amount equal to the amount of the loss were a sum allowable under

---

company on a disposal of the asset by the company at that time—

- (a) would be a chargeable gain and would by virtue of section 10B form part of its chargeable profits for corporation tax purposes, or
- (b) would, but for Schedule 7AC (exemptions for disposals by companies with substantial shareholdings), be within paragraph (a).”

section 38 as a deduction in the computation of the gain or loss accruing on the disposal.

In this subsection “new holding” has the meaning given by section 126.

(3F) If there is more than one group disposal, the references in subsections (3D) and (3E) to the amount of the gain or loss which would accrue to company A in the absence of subsection (3A) are to be read, in relation to each disposal, as references to—

- (a) such proportion of that amount as the transferor companies in relation to the group disposals jointly elect as the appropriate proportion in relation to the disposal in question, or
- (b) where no election is made, the proportion of that amount attributable to that disposal if that amount is divided equally between the group disposals.

(3G) An election under subsection (3F) must—

- (a) specify the appropriate proportion in relation to each group disposal, and
- (b) be made, by notice to an officer of Revenue and Customs, no later than 2 years after the end of the first accounting period of a company in which any chargeable gain or allowable loss on a group disposal accrues.

(3H) If a group disposal by a company consists of shares of more than one class, then, for the purposes of subsections (3D) and (3E), the company may apportion any increase or deduction to be made between the classes of shares in such manner as it considers appropriate.

### 60.30.3 *Principal co joins other group*

Amended as s.3F directs, s.179 TCGA (in outline) provides:

(5) Subsections (6) to (8) apply where—

- (a) in the absence of subsection (6), company A would be treated by virtue of subsection (3) as selling an asset at any time, by reason of ceasing to be a member of the group, and
- (b) company A ceases to be a member of the group by reason only of the fact that the principal company of that group becomes a member of another group.

(6) Subsection (3) does not apply to treat company A as selling the asset at that time; but if—

- (a) within 6 years of that time company A ceases at any time (“the relevant time”) to satisfy the following conditions, and
- (b) at the relevant time, company A, or a company in the same group as that company, owns otherwise than as trading stock the asset or property to which a chargeable gain has been carried forward from the asset on a replacement of business assets, company A shall be treated for all the purposes of this Act as if, immediately after its acquisition of the asset, it had sold and immediately reacquired the asset at the value that, at the time of acquisition, was its market value.

(7) Those conditions are—

- (a) that company A is a 75% subsidiary of one or more members of the other group referred to in subsection (5) above, and
- (b) that company A is an effective 51% subsidiary of one or more of those members.

(7A) Any chargeable gain or allowable loss which would otherwise accrue to company A

on the sale referred to in subsection (6) does not so accrue if—

- (a) company A ceases at the relevant time to satisfy the conditions in subsection (7) in consequence of—
  - (i) a disposal of shares in company A, or another member of the other group mentioned in subsection (5)(b), made by a member of that other group, or
  - (ii) two or more such disposals,
- (b) either—
  - (i) subsection (3B) applies to the disposal or, if there is more than one disposal, to at least one of them, or
  - (ii) sub-paragraph (i) does not apply but had subsection (3B) applied to the disposal or, if there is more than one disposal, to each of them, any gain arising on the disposal or disposals would not have been a chargeable gain by virtue of Schedule 7AC, and
- (c) in the absence of this subsection, section 535 of CTA 2010 (UK REITS: exemption of gains) would not apply to the chargeable gain or allowable loss which would accrue to company A on the sale.

(7B) Where subsection (7A) applies, subsections (3C) to (3H) apply to the calculation of any chargeable gain or allowable loss accruing on a disposal within subsection (7A)(a) to which subsection (3B) applies (a “relevant disposal”) with the following modifications—

- (a) in subsections (3C) to (3H) for the references to a group disposal substitute references to a relevant disposal, and
- (b) in subsections (3C), (3D) and (3E) for the references to subsection (3A) substitute references to subsection (7A).

(8) Any chargeable gain or allowable loss accruing to company A on the sale referred to in subsection (6) is to be treated as accruing immediately before the relevant time.

(9) Where—

- (a) by virtue of this section a company is treated as having sold an asset at any time, and
- (b) if at that time the company had in fact sold the asset at market value at that time, then, by virtue of section 30 or 31, any allowable loss or chargeable gain accruing on the disposal would have been calculated as if the consideration for the disposal were increased by an amount, subsections (3) and (6) above shall have effect as if the market value at that time had been that amount greater.

#### 60.30.4 “Associated”

Section 179(10) TCGA provides:

For the purposes of this section—

- (a) two companies are associated with each other if one is a 75% subsidiary of the other or both are 75% subsidiaries of another company.
- (b) a chargeable gain is carried forward from an asset to other property on a replacement of business assets if, by one or more claims under sections 152 to 158, the chargeable gain accruing on a disposal of the asset is reduced, and as a result an amount

falls to be deducted from the expenditure allowable in computing a gain accruing on the disposal of the other property,

- (c) an asset acquired by company A shall be treated as the same as an asset owned at a later time by that company or an associated company if the value of the second asset is derived in whole or in part from the first asset, and in particular where the second asset is a freehold, and the first asset was a leasehold and the lessee has acquired the reversion.

### **60.31 Reorganisation relief**

A full discussion of CGT reorganisation relief needs a book to itself. This section focusses on one particular aspect which arises where a reorganisation is carried out by a non-resident company within s.3.

For individuals and trustees, the TCGA distinguishes between:

- (1) a qualifying corporate bond (“QCB”)
- (2) a non-qualifying corporate bond (“NQCB”)

A bond which would otherwise be a QCB may be drafted so as not to meet the requirements of a QCB, eg by a provision allowing the holder to redeem in a currency other than sterling. So on a reorganisation, individual or trustee shareholders can opt out of the QCB regime into the NQCB regime.

However, s.117(A1) TCGA provides:

For the purposes of corporation tax “qualifying corporate bond” means any asset representing a loan relationship of a company

This rule applies for s.3 purposes. A corporate bond is in principle a loan relationship of a company. Suppose:

- (1) A non-resident company within s.3 (“H”) holds a subsidiary (“S”).
- (2) H sells S to a purchaser (“P”) in consideration of loan notes of P.

The loan notes may be drafted so as to constitute a NQCB in the hands of individual or trustee shareholders, but for s.3 purposes gains are computed as if the loan note were a QCB.

### **60.32 Private residence relief**

Suppose T owns a non-resident company, which holds residential property that is T’s main residence (“the residence”). If the company disposes of the residence, and a gain accrues to T, could private residence relief apply? Section 222(1) TCGA provides:

This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—

- (a) a dwelling-house or part of a dwelling-house which is, or has at any time in *his* period of ownership been, his only or main residence, or
  - (b) land *which he has* for his own occupation and enjoyment with that residence as its garden or grounds up to the permitted area.
- (emphasis added)

The gain may accrue to an individual, and it is attributable to the disposal of the residence. However, the relief cannot apply because:

- (1) the condition in (b) is not met: there is no land which T *has*;
- (2) the condition in (a) is not met: the company's period of ownership is not *his* period of ownership.

T might argue that the section should be read non-literally, but it is not absurd to deny private residence relief when a residence is held through a company. The policy is consistent with the rule that gain are computed as if the company were within the charge to CT, and no-one suggests a UK resident company qualifies for private residence relief.

Likewise if the company is held by a non-resident trust, no relief applies to the trustees and the gain on a disposal of the property by the company is a s.1(3) amount (s.87 trust gain) or a s.86 trust gain.

### 60.33 BAD relief: Trade group

Suppose an individual holds a non-resident company which holds a trading company, thus:

If T owned the shares in S personally, T can in principle qualify for business asset disposal relief (formerly called entrepreneurs' relief) on a disposal of S, assuming the necessary conditions are satisfied.<sup>68</sup>

---

68 See 53.17 (BAD relief: Remittance basis).

Suppose H disposes of S. The s.3 gain which will accrue to T on that disposal does not qualify for BAD relief, because it is not a material disposal of business assets (as defined in s169I TCGA).

Suppose H is wound up after the disposal of S. The gain accruing to T on the disposal of H can qualify for BAD relief and so in principle qualifies for the 10% rate.

T will also be able to claim s.3 distribution relief<sup>69</sup> so that tax charged under s3 on the disposal of S will be set against tax on the gain from disposal of H. However the s.3 gain will be charged at 20% and the gain on the disposal of H will be charged at 10%. The former is likely to eliminate the latter so the benefit of BAD relief will be lost.

### **60.34 Foundations**

A Foundation is not within s.3 TCGA for the following reasons:

- (1) A Foundation is a trust in the standard IT/CGT sense.
- (2) Even if a Foundation is not a trust, it is still not a company in the standard tax sense.<sup>70</sup>
- (3) A Foundation is in principle a settlement for the purposes of s.87, so even if it were a company in the standard tax sense, it would fall within s.87.<sup>71</sup> The presumption against double taxation applies. The s.87/s.3 regimes must be alternatives. So even if a Foundation is a company in the s.3 sense, it should be regarded as within the protection of 3B(4) TCGA.<sup>72</sup>

However some commentators take the view that a Foundation is a company, and for completeness I outline here the s.3 issues which would arise if that view were correct.

If a Foundation is a company for the purposes of s.3, the Foundation may be a close company<sup>73</sup> and so within s.3. If that is right, two questions arise:

---

69 See 60.21 (s.3 distribution relief).

70 See 86.9.4 (Foundation: IT/CGT trust).

71 See 57.3.5 (Foundations).

72 See 60.9 (Overlapping participators: Trustees/beneficiaries).

73 A Foundation may be a close company on the basis that:

- (1) The members of the board are directors.
  - (2) The members of the board are participators.
  - (3) The Foundation is under the control of directors who are participators.
- However this depends on the constitution of the Foundation.

- (1) Are foundation-beneficiaries participators?<sup>74</sup>
- (2) If they are participators, what is the extent of their interest for the purpose of s.3?

These questions raise imponderable and unexplored sub-issues: what are the rights of the beneficiaries under the relevant foreign law;<sup>75</sup> and do those rights amount to “interests” for this purpose (a matter of UK law)?

In practice the HMRC view, and my view, is that foundations are trusts, in the standard IT/CGT sense, and not companies, so these problems should not arise.<sup>76</sup>

Different considerations apply to a Foundation with Founder’s Rights. That is a company within s.3, and Foundation gains would be attributable to the founder.<sup>77</sup>

### 60.35 Pension scheme

Pension schemes qualify for CGT relief under s.271(1)(c) and (1A) TCGA:

- (1) The following gains shall not be chargeable gains ...
  - (c) any gain accruing to a person from his acquisition and disposal of assets held by him as part of a fund—
    - (i) mentioned in section 614(2) of the Taxes Act,
    - (ii) to which section 615(3) of the Taxes Act applies, or
    - (iii) mentioned in section 648, 649, 650, 651 or 653 of ITEPA 2003;

...

(1A) A gain accruing to a person on a disposal of investments held for the purposes of a registered pension scheme or an overseas pension scheme is not a chargeable gain.

This does not confer relief from s.3 gains but s.3B(5) TCGA provides relief:

If-

- (a) exempt assets of a pension scheme<sup>78</sup> are taken into account in

<sup>74</sup> See 99.23.4 (Trustees and beneficiaries).

<sup>75</sup> See 86.8 (Beneficiary rights).

<sup>76</sup> See 86.9.11 (HMRC view).

<sup>77</sup> See 86.9.10 (Founder’s Rights: a company).

<sup>78</sup> Defined s.3B(6): “For this purpose-

(a) “assets of a pension scheme” means assets held for the purposes of a fund or

- ascertaining a person’s interest as a participator in a company, and
  - (b) if those assets were ignored, an amount in respect of a gain accruing to the company would not be apportioned to the person as a result of section 3,
- no amount in the respect of the gain is to be apportioned to the person as a result of that section.
- (6) For this purpose-
    - (a) “assets of a pension scheme” means assets held for the purposes of a fund or scheme to which section 271(1)(c) or (1A) applies, and
    - (b) those assets are “exempt” if, at the time when the gain accrues, a disposal of those assets would be exempt from tax as a result of either of those provisions.

A beneficiary of a pension scheme might be a participator in a non-resident company held by the scheme, but they are protected by the exclusion for beneficiaries.<sup>79</sup>

Section 3B(5) also prevents aggregation of a pension scheme’s interest with the interest of a person connected with the trustees of the pension scheme, for the purposes of the 25% minimum condition. That will not normally arise, as trustees of a pension scheme are not usually connected with other persons, but it could happen, eg if the trustees were partners in an investment partnership.

### **60.36 Administration and appeals**

The CG Manual provides:

**CG57213 Non-resident companies: reports and liaison** [Nov 2019]

Any case within the scope of TCGA92/S13 involving individuals should be sent to WMBC Assets using the WMBC, Assets Disclosures (Specialist PT) mailbox whether there is any Capital Gains Tax liability or not. That Group will also consider any Income Tax liability under ITA07/s720.

Mail items that should be sent to this mailbox include:

- 
- scheme to which section 271(1)(c) or (1A) applies, and
  - (b) those assets are “exempt” if, at the time when the gain accrues, a disposal of those assets would be exempt from tax as a result of either of those provisions.”

<sup>79</sup> See 60.9 (Overlapping participators: trustees/beneficiaries).

- any disclosures (Inheritance Tax, Trusts, Periods of Administration)
- intel reports (Inheritance Tax, Trusts, Periods of Administration)
- information that may lead to a discovery assessment for Inheritance Tax, Trusts or Periods of Administration

If you are required to make an apportionment that is just and reasonable by reference to the interests of all of the participators (see CG57260), you will need to liaise with other officers dealing with participators in the non-resident company.

### 60.37 Tax return: s.3 gain

There is no box in form SA108 (Capital gains summary, 2019/20) for s.3 gains of individuals or trustees, so s.3 gains must be entered into the same boxes as if they accrued directly to the participator.

For disclosure of the motive defence, see 60.17.4 (Motive defence claim).

Non-resident trustees are not taxable on s.3 gains, so there is no obligation to put in any return. If the trustees choose to submit the voluntary form 50(FS) (Trust gains and capital payments, 2019/20) they must answer the questions:

Did the trustees or any underlying non-UK resident company make any offshore income gains in the year ended 5 April 2020?

Did the trustees or any underlying non-UK resident company make any capital gains in the year ended 5 April 2020?

### 60.38 DT relief: s.3 gain

In the following discussion I use the following terms to distinguish between 3 types<sup>80</sup> of company residence:

Type of residence	UK-law UK resident	Treaty-resident in State with CG article
Treaty non-resident	No	Yes
Simple non-resident	No	No
UK resident	Yes	No

In this terminology, for instance, a company in Belize is *simple* non-resident (the Belize/UK DTA has no CG article) but a Luxembourg resident

---

<sup>80</sup> A company which is treaty non-resident must also be domestic law non-UK resident, see 7.19 (DTA company residence rule). So it is not necessary to consider the position of a company which is UK resident but treaty-resident outside the UK.

company is *treaty* non-resident.

I consider the following permutations:

Case no	Individual (UK-law UK resident)	Company
1	Treaty non-resident	Simple non-resident
2	Treaty non-resident	Treaty non-resident
3	Treaty resident	Treaty non-resident

60.38.1 *Individual treaty non-resident; company simple non-resident*

Suppose

- (1) An individual (“T”) is UK-law UK resident but treaty non-resident
- (2) T owns a simple non-resident company which realises a gain:

The gain treated as received by T is the same gain as the gain received by NR Ltd. But art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, T does not qualify for treaty relief on a gain accruing to NR Ltd. T (though treaty non-resident) is not the alienator. NR Ltd is the alienator but (on the facts of this example) NR Ltd is not treaty resident in the foreign state which confers DT reliefs. So the terms of art.13(5) are not satisfied.

The US treaty is wider and DT relief applies to an individual who is treaty-resident in the US.<sup>81</sup>

Even under OECD Model, it is suggested that the result is the same, on the grounds that the gain is treated as accruing to T, so T should be deemed to be the alienator; or the word “alienator” does not require that one must dispose of property, only that the gain on the alienation accrues to the person.

Take the same facts except that the company is also treaty non-resident:

---

81 See 87.7.8 (s.624/720 income; s.3/86 gain).

In this case DT relief will apply.

### 60.38.2 Company treaty non-resident

Suppose an individual (or a company) owns a treaty non-resident company which realises a gain:

Section 3(4) TCGA provides:

The amount apportioned to each person is treated as a chargeable gain accruing to the person.

The sidenote to s.3 calls this “attribution” of gains. The expressions *attribute/apportion/treat as* all come to the same thing. This is a deeming which changes the recipient, but the s.3 gain treated as received by T is the same gain as the gain actually received by B Ltd. Subject to the OECD Savings Clause, T can in principle claim DT relief (in my terminology, third-party DT relief)<sup>82</sup> for gains accruing to B Ltd (deemed to accrue to T) under s.3 TCGA.<sup>83</sup>

HMRC agree. The CG Manual provides:

#### **CG57380 double taxation agreements** [May 2020]

You should always check whether there is a double taxation agreement between the UK and the country in which the company making the gain is resident. If there is no double taxation agreement any [s.3 TCGA]<sup>84</sup> charge is unaffected. Similarly if the agreement does not refer to capital gains or Capital Gains Tax the charge under [s.3 TCGA] is unaffected. But, if the agreement provides that gains of the type realised by the

82 See 103.21 (Third-party DT relief).

83 The same point is also made (no doubt it was common ground of the parties) in Case C-112/14 *EC v UK* (the s.3 case) at [5].

84 I have updated references to the former s.13 TCGA.

non-resident company are only taxable in that company's country of residence [s.3 TCGA] cannot apply. For example, Article 15(4) of the Kenya/UK Double Taxation Agreement would prevent TCGA92/S13 applying to the disposal of stocks and shares by a company resident in Kenya. Agreements will often treat gains on the disposal of particular types of asset differently.<sup>85</sup>

However the Savings Clause (if applicable) overrides DT relief.<sup>86</sup> 3<sup>rd</sup> party DT relief applies only:

- (1) In jurisdictions where the OECD Savings Clause does not apply (because the foreign State has opted out of this clause). Luxembourg is an example.
- (2) In the (rare) case where the individual is treaty non-resident (and so outside the Savings Clause).

If the policy is to exclude s.3 gains from treaty relief, this seems misguided. It is illogical for a treaty to provide CGT exemption but not s.3 exemption. If the foreign state does not tax chargeable gains, there should be no CG exemption at all. If it does, exemption should extend to s.3. But there it is.

### 60.38.3 *Chain of companies*

---

85 Likewise INT Manual provides:

**169060 Resident shareholders in non-resident companies - Section 13 TCGA 1992** [Jun 2016]

... the Capital Gains Articles in double taxation agreements may override [s.3 TCGA].

If the non-resident company disposes of immovable property; for example, land, buildings etc, in the UK, double taxation agreements normally provide that any gain can be taxed in UK. Although UK domestic law may prevent a capital gains tax charge on the non-resident company (see s.10 TCGA 1992), s.13 TCGA 1992 can be applied to tax the UK resident shareholder.

If the asset disposed of is not immovable property in the UK; for example, immovable property situated outside the UK, shares etc, then the Capital Gains Article will normally prevent a charge to tax under s.13 TCGA 1992 being made on the shareholder..."

Of course, the text of the CG article in the relevant DTA agreement with the country concerned would need to be examined to see whether it has any variations from the OECD model form, as some did. This is discussed in the 2018/19 edition of this work para 66.40.2 (DTAs excluding s.3 relief); the material is now omitted as the OECD Savings Clause makes it less important.

86 See 104.9 (Savings Clause).

Suppose there is a chain of companies:

Individual (or company) (“A”) - *UK resident*

Suppose a gain accrues to C (“C’s gain”). We have the following possibilities:

	<b>Case 1</b>	<b>Case 2</b>	<b>Case 3</b>
B Ltd	UK resident	simple non-resident	treaty non-resident
C Ltd	treaty non-resident	treaty non-resident	simple non-resident

*Case 1:* If B Ltd is UK resident, and C Ltd is treaty non-resident:

- (1) C’s gain is deemed to accrue to B Ltd; B Ltd may claim DT relief, as noted above, but subject to the Savings Clause.
- (2) A does not need to claim relief, as C’s gain is not deemed to accrue to A.

*Case 2:* If B Ltd is simple non-resident and C Ltd is treaty non-resident, C’s gain in principle accrues to A. A can claim DT relief, but subject to the Savings Clause.

*Case 3:* If C Ltd is simple non-resident, but B Ltd is treaty non-resident, C’s gain is deemed to accrue to A, but A cannot claim DT relief.

### 60.39 Trust participator: No DT relief

Section 79B TCGA provides:

- (1) This section applies where the trustees of a settlement are participators<sup>87</sup>—
  - (a) in a close company, or
  - (b) in a company that is not resident in the UK but would be a close company if it were resident in the UK...

---

<sup>87</sup> Section 79B(1) provides: “For this purpose “participator” has the same meaning as in section 3 (see section 3B)”. That incorporates the standard definition; see 60.6.2 (Overlapping participators).

(2) Where this section applies, nothing in any double taxation relief arrangements<sup>88</sup> shall be read as preventing a charge to tax arising by virtue of the attribution to the trustees under s.3, by reason of their participation in the company mentioned in subsection (1) above, of any part of a chargeable gain accruing to a company that is not resident in the UK.

Suppose a UK trust owns a treaty non-resident company which realises a gain:

DT relief is disallowed under s.79B(1)(b) and the trustees are taxable.

Similarly if a non-resident trust within s.86 owns a treaty non-resident company which realises a gain: DT relief is disallowed under s.79B(1)(b) and the settlor is taxable.

I am unable to see the point of s.79B(1)(a). If trustees are participators in a *close* company, gains accrue to that company and are not attributed to the trustees. Probably the drafter followed other statutory precedents using this form, and did not realise the wording is unsuitable here.<sup>89</sup>

Section 79B(3) TCGA provides:

Where this section applies and—

- (a) a chargeable gain accrues to a company that is not resident in the UK but would be a close company if it were resident in the UK, and
- (b) all or part of the chargeable gain is treated under section 3 as accruing to a close company which is not chargeable to corporation tax in respect of the gain by reason of double taxation arrangements, and
- (c) had the company mentioned in para (b) (and any other relevant<sup>90</sup> company) not been resident in the UK, all or part of the

<sup>88</sup> For the meaning of this term, see 11.6.1 (“DTR arrangements” for CGT).

<sup>89</sup> See 99.29.1 (Non-resident close company).

<sup>90</sup> Section 79B(4) TCGA provides:

“The references in subsection (3) above to ‘any other relevant company’ are to any other company which if it were not resident in the UK would be a company in relation to which section 3(7) applied with the result that all or part of the chargeable gain was attributed to the trustees as mentioned in that subsection.”

chargeable gain would have been attributed to the trustees by reason of their participation in the company mentioned in subsection (1) above,  
 section 3(7) shall apply as if the company mentioned in para (b) above (and any other relevant company) were not resident in the UK.

Section 79B(3) addresses the more challenging case where:

- (1) a trust owns a UK holding company (“UK Ltd”)
- (2) UK Ltd holds a treaty non-resident subsidiary (“TNR Ltd”):

UK Ltd is not taxed under s.3 on TNR’s gain as UK Ltd can claim DT relief. In the absence of s.79B(3), TNR’s gain apparently cannot be apportioned to the trust. The trust does not need DT relief. Section 79B(3) treats UK Ltd as non-resident, so that the gain accruing to TNR can be attributed to the trust.

### 60.39.1 *Critique of s.79B*

There are two objections to s.79B.

One is the constitutional point that the UK is in breach of DTAs with OECD Model form CG article. It might pragmatically be said that if the foreign state does not complain, that does not matter.

It is anomalous that s.79B adversely singles out trustee participators, ignoring individual and company participators.<sup>91</sup> Section 79B could have no part to play in a coherent and logical system of taxing offshore company gains. But the anomaly is reduced by the introduction of the Savings Clause.

## 60.40 Foreign tax credit relief: s.3

SP D23 provides:

---

91 CIOT make this point: “Reform of two anti-avoidance provisions” (2012)  
[http://www.tax.org.uk/Resources/CIOT/Documents/2012/10/121002\\_s13\\_trans\\_assets\\_CIOT.pdf](http://www.tax.org.uk/Resources/CIOT/Documents/2012/10/121002_s13_trans_assets_CIOT.pdf)

[1] Where a UK participator in a non-resident company which would be a close company if resident in the UK is chargeable to CGT on a proportion of a capital gain accruing to that company, tax credit relief may be given against UK CGT for the appropriate proportion of any overseas tax payable by the company in the country where it is resident in respect of its gain [s.9(2) TIOPA<sup>92</sup>];

[2] alternatively, under [s.113 TIOPA<sup>93</sup>], the appropriate proportion of the overseas tax may be deductible in computing the shareholder's gains to the extent that the overseas tax has not qualified for relief under [s.9(2) TIOPA].

This relates to two reliefs:

- (1) Foreign tax credit relief
- (2) CGT computation deduction

The CG Manual summarises these two reliefs and gives a worked example:

**CG57381 overseas tax payable by non-resident company** [Nov 2019]

The non-resident company may have to pay tax on the gain in its country of residence. UK residents to whom the gain is apportioned will get relief for this tax. The two methods of giving relief are:

- Either the UK resident can claim tax credit relief,
- or
- a proportionate part of the tax can be claimed in computing the apportioned gain.

Relief is given on a proportion of the foreign tax equal to the proportion of the total gain attributable to the UK resident. This amount is set-off against the charge to Capital Gains Tax or Corporation Tax on the relevant chargeable gains.

If tax credit relief is allowed no deduction can be allowed in computing the chargeable gain.

If the UK resident does not want to claim tax credit relief, the tax can be deducted in computing the gain, see INTM169010+. The foreign tax paid does not qualify for indexation allowance. Although it is an allowable deduction in computing the gain it is not a deduction within TCGA92/S38 (1)(a) or TCGA92/S38 (1)(b). This means it is not relevant allowable expenditure for indexation allowance purposes, see CG17240.

In all other respects you compute and apportion the gain in the usual way

---

92 See 106.1 (Credit for foreign tax).

93 See 106.27 (CGT/IT computation deduction).

allowing the foreign tax paid as a deduction.

The Manual gives a worked example:

The following example illustrates the differences between allowing any foreign tax paid by the non-resident company as tax credit relief or as a deduction in computing the gain.

Facts

- The non-resident company realises a gain of £20,000 computed under the normal Capital Gains Tax rules.
- It has to pay £5,000 tax on this gain in its country of residence.
- 75 per cent of the gain is attributable to a UK resident.

Capital Gains Tax treatment

A TCGA92/S13 charge of £20,000 @ 75 per cent = £15,000 is apportioned to the UK resident. Relief for the tax paid can be claimed in two ways.

• TAX CREDIT RELIEF

Suppose the UK resident is liable to Capital Gains Tax at 40 per cent. The tax payable would be £6,000. The UK resident can claim tax credit relief on the foreign tax of £5,000 paid by the company in the same proportion as the gain is apportioned. £5,000 @ 75 per cent = £3,750. The total tax payable by the UK resident becomes £2,250.

• DEDUCTION IN COMPUTING THE GAIN

The foreign tax paid of £5,000 can be deducted in computing the gain. No indexation allowance is due on this deduction. The gain to be apportioned becomes £20,000 - £5,000 = £15,000. The taxpayer's share is £15,000 @ 75 per cent = £11,250. At a rate of 40 per cent the tax payable would be £11,250 @ 40 per cent = £4,500.

In this example you would expect the taxpayer to claim tax credit relief.

## CHAPTER SIXTY ONE

# CAPITAL LOSSES

61.1

### *Cross references*

The following topics are considered elsewhere:

19.14 (Loss in mixed fund)

64.21 (Losses from offshore funds)

60.15 (Loss of non-resident co) - s.3 loss

### **61.1 Capital losses: Introduction**

This chapter considers CGT relief for losses.

In this chapter:

“**Personal losses**” means losses accruing to individuals

“**Trust losses**” means losses accruing to trustees

I concentrate on the themes of this book, but the subject can only be understood in the context of the provisions as a whole.

### **61.2 Deduction of losses**

The rules are in s.1(3) TCGA for non-companies and s.2A(1) for companies. It is easier to follow if the provisions are read side by side:

**s.1(3) TCGA**

**s.2A(1) TCGA**

Capital gains tax is charged on the total amount of chargeable gains accruing to a person<sup>1</sup> in a tax year after deducting—

The amount of chargeable gains to be included in a company’s total profits for an accounting period is the total amount of chargeable gains accruing to the company in the period after deducting—

(a) any allowable losses accruing to the person in the tax year, and

(a) any allowable losses accruing to the company in the period, and

(b) so far as not previously deducted under this subsection, any allowable losses accruing to the person in any previous tax year.

(b) so far as not previously deducted under this subsection, any allowable losses previously accruing to the company while it was within the charge to corporation tax

Para (a) deducts current year losses and para (b) deducts brought forward losses.

**61.3 Loss within scope of CGT**

The rule is in s.1E(1) TCGA for non-companies and s.2A(2) for companies. It is easier to follow if the provisions are read side by side:

**Section 1E TCGA**

**Section 2A(2) TCGA**

A loss is not an allowable loss if it accrues in a tax year at a time when, had a gain accrued instead, the gain would not have been chargeable to capital gains tax under this Act for the tax year (and see also sections 16(2) and 16A).

For the purposes of corporation tax on gains “allowable loss” does not include a loss accruing to a company if, had a gain accrued, the company would not have been chargeable to corporation tax on the gain.

**61.4 Corporation tax losses**

Other rules specifically relating to capital losses for corporation tax are not discussed here.

**61.5 Computation of loss**

---

1 Section 1(3) refers to a “person”, so it applies to individuals, trustees and PRs.

Section 16(1) TCGA provides a fairly commonsense rule to compute the amount of a loss:

- [a] Subject to sections 261B, 261D and 263ZA and except as otherwise expressly provided
- [b] the amount of a loss accruing on a disposal of an asset shall be computed in the same way as the amount of a gain accruing on a disposal is computed.

The exceptions listed in [a] are specialist topics not discussed here:

<b>Section</b>	<b>Topic</b>
s.261B	Trading loss treated as CGT allowable loss
s.261D	Post-cessation trade loss treated as CGT allowable loss
s.263ZA	Former employees: employment-related liabilities

## 61.6 Allowable loss

The legislation refers to “allowable” losses. This is a label which brings in a large number of rules; for whenever the drafter wishes to disallow a loss they direct that it is not allowable.

Section 16(2) TCGA defines “allowable” loss:

- [a] Except as otherwise expressly provided, all the provisions of this Act which distinguish gains which are chargeable gains from those which are not, or which make part of a gain a chargeable gain, and part not, shall apply also to distinguish losses which are allowable losses from those which are not, and to make part of a loss an allowable loss, and part not;
- [b] and references in this Act to an allowable loss shall be construed accordingly.

An allowable loss requires a notice or claim.<sup>2</sup> The notice must be given, and any dispute about the loss resolved, at the time the loss accrues, not when the loss is used, which may be at any subsequent time.

## 61.7 Loss of non-resident

Section 16(3) TCGA formerly provided:

*A loss accruing to a person in a year of assessment where the*

---

<sup>2</sup> See 117.2.1 (Capital loss claims).

*residence condition is not met (see section 2(1A)) shall not be an allowable loss for the purposes of this Act unless, under section 2B, 10, 10B, 14D or 188D, he would be chargeable to tax in respect of a chargeable gain if there had been a gain instead of a loss on that occasion.*

In particular, a loss accruing to a non-resident is not in general an allowable loss. This gives a symmetry with the rule that a gain accruing to a non-resident is not in principle subject to CGT.

Section 16(3) was repealed in the 2019 CGT rewrite (saving the need to update the five cross references). There does not seem to be an express replacement. It appears that the drafter thought that the general rule about losses sufficed.<sup>3</sup>

There is also some relief for losses of non-resident trusts within s.86, 87 TCGA,<sup>4</sup> and non-resident companies within s.3 TCGA.<sup>5</sup>

### 61.7.1 Non-resident UK land gains

Section 1E TCGA provides:

(2) In addition, the only allowable losses that qualify for deduction from chargeable gains under section 1A(3) (non-UK residents) are those accruing to the person on disposals of assets within that subsection.

(3) An allowable loss counts for the purposes of subsection (2) even if it accrues in a tax year in which the person was UK resident.

## 61.8 Loss in split year

A split year does not fall within non-residence condition A, as it is a year for which the individual is UK resident. Section 16(3A) TCGA provides:

If the person is an individual and the year is a split year as respects that individual, subsection (3) also applies to a loss accruing to the individual in the overseas part of that year.

This disallows a loss accruing in the overseas part of a split year.

---

<sup>3</sup> See 61.3 (Loss within scope of CGT).

<sup>4</sup> See 61.13 (Loss of non-resident trustees).

<sup>5</sup> See 60.15 (Loss accruing to non-resident co).

## 61.9 Loss on connected person disposal

Section 18 TCGA provides:

- (1) This section shall apply where a person acquires an asset and the person making the disposal is connected with him.
- (2)[See App.4.6.7 (Deemed non-arm's length)]
- (3) Subject to subsection (4) below, if on the disposal a loss accrues to the person making the disposal, it shall not be deductible except from a chargeable gain accruing to him on some other disposal of an asset to the person acquiring the asset mentioned in subsection (1) above, being a disposal made at a time when they are connected persons.<sup>6</sup>

Losses within s.18(3) are referred to as “**clogged**” losses.

The purpose of this rule is not obvious. Perhaps the thinking is that connected person disposals are unlike unconnected person disposals as an asset transferred to a connected person may continue to be available to the transferor. The rule restricts a taxpayer’s ability to accrue losses without the practical consequences that a sale to an unconnected person would entail.

Where there is a clogged loss, a person may make a disposal to the connected person on which a gain accrues, to set the loss against the gain. That should be regarded as acceptable, at least in principle. The drafter could have directed that the loss is not allowable but has expressly recognised that it could be set against some gains.

## 61.10 Chattels

### 61.10.1 *Gain on disposal of chattel*

Section 262 TCGA provides:

- (1) Subject to this section a gain accruing on a disposal of an asset which is tangible movable property shall not be a chargeable gain if the amount or value of the consideration for the disposal does not exceed £6,000.
- (2) Where the amount or value of the consideration for the disposal

---

6 For completeness: s.18(4) TCGA contains an exemption for gifts for educational, cultural or recreational purposes, which (more or less) never has effect and ought to be repealed; s.18(5) TCGA deals with options, not discussed here.

of an asset which is tangible movable property exceeds £6,000, there shall be excluded from any chargeable gain accruing on the disposal so much of it as exceeds five-thirds of the difference between—

- (a) the amount or value of the consideration, and
- (b) £6,000.

### 61.10.2 *Loss on disposal of chattel*

Section 262(3) TCGA provides:

Subsections (1) and (2) above shall not affect the amount of an allowable loss accruing on the disposal of an asset, but for the purposes of computing under this Act the amount of a loss accruing on the disposal of tangible movable property the consideration for the disposal shall, if less than £6,000, be deemed to be £6,000 and the losses which are allowable losses shall be restricted accordingly.

The CG Manual gives a worked example:

#### **CG76613 - Chattels: examples: losses** [Jul 2019]

Mr C sells his son a painting for £5,000. It had originally cost him £8,000. He claims a loss of £3,000.

As this is a transaction between connected persons, see CG14580+, the market value of the asset is used as the disposal consideration.

The painting has a market value of £4,000.

However, as this is less than £6,000, the loss is restricted to:

Deemed consideration	£6,000
Less cost	-£8,000
Restricted loss	<u>£2,000</u>

It would be simpler just to disallow losses on disposals of assets for less than £6k, and it seems anomalous to allow a loss in circumstances when a gain would not be allowable.

The figure of £6,000 was fixed in 1989, so this relief has been substantially eroded by inflation. But it may not actually be a relief, as it is more likely to disallow a loss than to exempt a gain.

### 61.11 **Losses used in best way**

Section 1F TCGA provides:

(1) Allowable losses may (subject to express provision to the contrary) be deducted from gains in whichever way is most beneficial to a person chargeable to capital gains tax.

- (2) Accordingly, an allowable loss may be deducted from a chargeable gain irrespective of the rate of tax at which the gain would otherwise have been charged.
- (3) Allowable losses that are deducted from gains may not be deducted any further than is necessary to eliminate the gains.
- (4) No part of an allowable loss may be relieved under this Act more than once.
- (5) So far as an amount has been relieved under the Income Tax Acts, it may not be further relieved under this Act.

It may be advantageous to set losses against:

- (1) Residential/carried interest gains (in priority to ordinary gains)
- (2) Ordinary gains (in priority to gains which qualify for DT relief)<sup>7</sup>

## 61.12 Losses on death

### 61.12.1 *Loss accruing before death*

Losses accruing before death are not carried forward to PRs.

Section 62(2) TCGA provides for carry-back of losses accruing in the year of death:

Allowable losses sustained by an individual in the year of assessment in which he dies may, so far as they cannot be deducted from chargeable gains accruing in that year, be deducted from chargeable gains accruing to the deceased in the 3 years of assessment preceding the year of assessment in which the death occurs, taking chargeable gains accruing in a later year before those accruing in an earlier year.

Section 62(2AA) TCGA provides the same rule for non-resident losses:

Where relevant non-resident losses (see subsection (11)) are sustained by an individual in the year of assessment in which the individual dies, the losses may, so far as they cannot be deducted from chargeable gains accruing to the individual in that year, be deducted from any gains such as are mentioned in subsection (2A)(b) that accrued to the deceased in the 3 years of assessment preceding the year of assessment in which the death occurs, taking chargeable gains accruing in a later year before those accruing in an earlier year.

Section 62(11) provides the definition:

---

<sup>7</sup> See 106.21.2 (FTC: Capital losses).

“relevant non-resident loss” means an allowable loss accruing on a disposal which, had a gain accrued instead, would have been a relevant non-resident gain.

Carry-back on death seems unnecessary; its repeal would be a small but useful simplification.<sup>8</sup>

Section 62(2A) TCGA provides:

Amounts deductible from chargeable gains for any year in accordance with subsection (2) above shall not be so deductible from any such gains so far as they are—

- (a) gains that are treated as accruing by virtue of section 87 or 89(2) (read, where appropriate, with section 1M), or
- (b) relevant non-resident gains (see subsection (1)).<sup>9</sup>

Thus the disallowance of personal losses against s.87 gains, and the disallowance of ordinary losses against relevant non-resident gains, continues to apply on death. That is consistent with the general rule.<sup>10</sup>

#### 61.12.2 *Unrealised loss at death*

If a person dies holds assets standing at a loss, the effect of CGT rebasing on death is to nullify the loss.<sup>11</sup> Losses could be preserved by a lifetime gift (or sale) to the spouse.<sup>12</sup>

Alternatively, if appropriate, the individual may realise the losses in the year of death (but before death) in order to carry them back against gains in the preceding three years.<sup>13</sup>

### 61.13 Loss of non-resident trust

---

8 This rule perhaps made more sense when introduced in 1965, in the context of the CGT charge on death. If so, the rule lost its rationale following the introduction of rebasing on death in 1971.

9 Section 62(11) provides: “In this section “relevant non-resident gain” means—  
 (a) a gain that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection, or  
 (b) a gain that falls to be dealt with by section 1A(1) in accordance with section 1G(2) because the asset disposed of is within section 1A(3)(b) or (c)”.

10 See 61.14 (Personal loss and s.87 gain).

11 See 84.5 (Acquisition by PRs).

12 See 61.22 (Spouse-transfer loss).

13 See 61.12.1 (Loss accruing before death); 61.22 (Inter-spouse transfer).

61.13.1 *s.87 and trust loss*

Section 87(4) TCGA provides:

The section 1(3) amount for a tax year for which this section applies to the settlement is—

- (a) the amount upon which the trustees would be chargeable to tax under section 1(3) for that year if they were resident in the UK in that year ...

Under this provision, trust losses in a tax year could be set against trust gains in the same year, in computing s.1(3) amounts (trust gains). But trust losses of an earlier year in which the trustees were not resident could not be carried forward and set against trust gains of a later year, because losses of nonresidents are disallowed.<sup>14</sup> However s.97(6) TCGA allows losses to be carried forward:

Section 16(3)<sup>15</sup> shall not prevent losses accruing to trustees in a year of assessment for which section 87 of this Act or section 17 of the 1979 Act applied to the settlement from being allowed as a deduction from chargeable gains accruing in any later year (so far as they have not previously been set against gains for the purposes of a computation under either of those sections or otherwise).

Carried forward trust losses will usually be used to reduce s.1(3) amounts (trust gains) of a subsequent year. If the trust became UK resident they could be set against gains to reduce the trust's own liability.

A trust is therefore sometimes better than absolute ownership by a remittance basis taxpayer, whose personal losses may be disallowed.<sup>16</sup>

61.13.2 *s.86 and trust loss*

Under s.86 TCGA the settlor is taxed on what I call "**s.86 gains**", which is the amount on which trustees would be charged to tax if UK resident.<sup>17</sup> Under this provision trust losses in a tax year could be set

---

14 See 61.7 (Loss accruing to non-resident).

15 The 2019 CGT rewrite failed to update the cross reference, but the presumption of continuity will fill the gap.

16 See 61.16 (Loss of remittance basis taxpayer).

17 See 56.11 (Section 86 gains condition).

against trust gains in the same year, in computing the s.86 gains. But trust losses of an earlier year in which the trustees were not resident could not be carried forward and set against trust gains of a latter year because s.16(3) TCGA disallows such losses. However para 1(2) sch 5 TCGA provides:

In construing section 86(1)(e) as regards a particular year of assessment [that is, in order to ascertain the s.86 gains] —

- (a) any deductions provided for by section 2(2) shall be made in respect of disposals of any of the settled property originating from the settlor, and
- (b) section 16(3) shall be assumed not to prevent losses accruing to trustees in one year of assessment from being allowed as a deduction from chargeable gains accruing in a later year of assessment (so far as not previously set against gains).

For losses and sch 4B TCGA, see 58.16.6 (Losses of trust within s.86).

### 61.13.3 *Loss: s.86 conditions not met*

A person who is not within s.86 may later come within the section.

Para 1(6) sch 5 TCGA provides:

The following rules shall apply in construing section 86(1)(e) as regards a particular year of assessment (“the year concerned”) in a case where the trustees fall within section 86(2)(a)—

- (a) if the conditions mentioned in section 86(1) are not fulfilled as regards the settlement in any year of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before the year concerned;
- (b) if the conditions mentioned in section 86(1) are fulfilled as regards the settlement in any year or years of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before that year (or the first of those years) so falling,

but nothing in the preceding provisions of this sub-paragraph shall prevent deductions being made in respect of losses accruing in a year of assessment in which the conditions mentioned in section 86(1)(a) to (d) and (f) are fulfilled as regards the settlement.

### 61.13.4 *Loss on pre-1991 disposal*

For completeness, para 1(7) Sch 5 TCGA provides:

In construing section 86(1)(e) as regards a particular year of assessment and in relation to a settlement created before 19th March 1991, no account shall be taken of disposals made before 19th March 1991 (whether for the purpose of arriving at gains or for the purpose of arriving at losses).

### 61.14 Personal loss and s.87 gain

Section 1E(4) TCGA provides:

No allowable losses may be deducted from chargeable gains treated as accruing to an individual as a result of section 87, 87K, 87L or 89(2) (read, where appropriate, with section 1M).

The effect is that personal losses may not be set against s.87 gains accruing to the individual.

#### 61.14.1 *Personal loss & s.87: Critique*

The disallowance of personal losses against s.87 gains was introduced in 1998 because of difficulties of interaction with taper relief.<sup>18</sup> The repeal of taper in 2008 should have allowed personal losses to be set once again against s.87 gains. Presumably this point was overlooked; or perhaps a deliberate decision was made to discourage the use of trusts. It is suggested that the rule disallowing personal losses against s.87 gains should be repealed.

### 61.15 Personal loss and s.86 gain

The settlor can set their personal losses against s.86 gains, under s.1(3) TCGA.

For completeness, s.1E(5) TCGA deals with the situation where a settlor has made two or more settlements:

If—

- (a) amounts (or elements of amounts) treated as accruing to an individual as a result of section 86 relate to different

---

18 The CG Manual formerly provided: “**34272 Personal losses** [June 2005]  
... For 1998–99 onwards the beneficiary’s personal allowable losses are not available to reduce these attributed gains. It is not possible to identify any particular gain with a capital payment and so the changes introduced for Section 77 and Section 86 gains, see CG34865+, for 2003–04 onwards could not be extended to Section 87 gains.”

settlements, and  
 (b) the deduction of allowable losses does not reduce the amounts or elements to nil,  
 the deduction applicable to each amount is the proportion that the amount concerned bears to the total of the amounts.

This is only necessary to ascertain the amount which can be recovered under the settlor's indemnity against each settlement.

## 61.16 Loss of remittance basis taxpayer

### 61.16.1 “Foreign/UK loss/gain”

The legislation distinguishes between foreign losses and other losses. Section 16ZA(6) TCGA gives “**foreign loss**” a commonsense meaning:

In this section “foreign loss” means a loss accruing from the disposal of an asset situated outside the UK.

In this chapter:

“**UK loss**” means a loss which is not a foreign loss, ie a loss on a disposal of a UK situate asset

“**Foreign gain**” means a gain accruing on a disposal of an asset situated outside the UK.

“**UK gain**” means a gain which is not a foreign gain, ie a gain on a disposal of a UK situate asset

### 61.16.2 Background

The complex rules can be better understood if one understands the constraints faced by the drafter.

It is difficult to think of a satisfactory rule for losses of a remittance basis taxpayer. Relief for all losses is too generous when only some gains are taxable. Relief for foreign losses remitted to the UK is not satisfactory, as it would usually be easy to remit the losses to the UK, so that amounts to a relief for (almost) all losses, at least for a well-advised taxpayer. Moreover in the case of the extinction of an asset there may be nothing to remit.

The pre-2008 solution was to disallow relief on foreign losses on foreign domiciliaries (to whom the remittance basis applied compulsorily – there was no claim procedure). The CGT remittance basis was a package with advantages and this disadvantage. This was a

rough and ready solution, but simple and workable. However the introduction of the claim for the CGT remittance basis in 2008 changed the situation. If foreign losses of a foreign domiciliary were disallowed only in years that the individual claimed the remittance basis, then an individual might claim the remittance basis in the year that they realise gains and not in the year that they realise losses. On the other hand, the failure to claim would often be expensive in other ways, and as a simple and pragmatic solution it has much to commend it.

The FD draft clauses 2007 proposed to disallow all foreign losses of foreign domiciliaries, but that was not EU-law compliant (not to mention unfair). HMRC presumably agreed, and a new solution had to be devised in the rushed weeks between publication of the FD draft clauses and the Finance Bill, allowing insufficient time for HMRC to consider the issues, and none at all for consultation.

### 61.16.3 *Summary*

EN FB 2008 provides a summary:

355. The overall effect of these new rules is that:

- [1] on the first occasion when a non-UK domiciled individual claims remittance basis for a tax year, the individual may make an election in relation to their foreign losses;
- [2] if the individual does not make an election, foreign losses of that tax year and all future tax years will not be allowable losses; and
- [3] if the individual makes an election, special rules apply to the deduction of allowable losses where there are foreign chargeable gains.

356. The effect of the special rules is that:

[1] where foreign chargeable gains are remitted to the UK in a tax year later than that in which the asset was disposed of:

- [a] no losses of that later year, or of any year later than that in which they arose, are deductible from those gains, and
  - [b] [those gains] may not be covered by the [CGT annual exemption] of the year in which they are remitted; and
- [2] if remittance basis is claimed for the tax year in which foreign chargeable gains arise, the allowable losses available for deduction from gains of that year are deducted

- [a] first from foreign chargeable gains that both arise and are remitted in that year,
- [b] then against foreign chargeable gains arising but not remitted

- in that year, and  
 [c] only then from any other (non-foreign) chargeable gains arising in that year.

The CG Manual provides:

**CG25330 - Remittance basis: losses: introduction** [Nov 2019]

... For tax year 2008-09 onwards an individual may elect that such “foreign losses” which arise in the year of election or subsequent years are allowable, subject to certain special rules, against chargeable gains (TCGA92/S16ZA). The election is irrevocable and has effect in the year it is made and all subsequent years.

The special rules for giving relief in respect of foreign losses have two main effects:

- They prevent any loss (not just a foreign loss) of a later year being allowed against a foreign chargeable gain which arose in an earlier year but which is not remitted (and so not taxed) until the year of the loss or later (TCGA92/S16ZB). This is analogous to the “no carry back” rule where the remittance basis is not in point.
- They limit the amount of losses available for relief against chargeable gains in a year by imposing a strict order in which they are matched with gains of various classes, including unremitted foreign chargeable gains (TCGA1992/S16ZC). Correct operation of these rules is likely to demand careful record-keeping by the taxpayer. ...

The CG Manual provides:

**CG25330C - Remittance basis: matching rules for relieving losses: TCGA92/S16ZC** [Nov 2019]

If an election has been made for foreign losses to remain allowable losses (see CG2530A) then, in a tax year in which the remittance basis applies and the individual is not domiciled in the UK, special rules apply to determine how gains are to be relieved by losses. In summary, the allowable losses deductible under TCGA92/S2 are matched:

- Firstly, against foreign chargeable gains accruing in the tax year to the extent that they are remitted to the UK in that year
- Secondly, against foreign chargeable gains accruing in that year to the extent that they are not so remitted and
- Thirdly, against chargeable gains accruing in that year other than foreign chargeable gains (this does not include chargeable gains treated as accruing under TCGA92/S12 ie on the remittance basis).

And then the amount on which Capital Gains Tax is charged in the year is the total amount of chargeable gains accruing in the year less the losses matched against gains in the first and third categories only. This means in effect that allowable losses which are matched with unremitted foreign chargeable gains are not available for relief against gains on UK assets, which therefore remain chargeable. The unremitted foreign chargeable gains are reduced by the losses matched with them, and so will not give rise to any tax charge if or when they are remitted (TCGA92/S16ZD(3))...

A taxpayer will need to keep records to allow the correct operation of these provisions to be verified.

The F(no.2)A 2017 tweaked these rules by making provision for the possibility that a (deemed) domiciled individual may cease to be deemed domiciled, and later become UK resident again; but that is of limited importance.

#### 61.16.4 *Loss election*

Section 16ZA(1) TCGA provides:

An individual may make an election under this section in respect of—

- (a) the first tax year in which section 809B of ITA 2007 (claim for remittance basis) applies to the individual, or
- (b) the first tax year in which that section applies to the individual following a period in which the individual has been domiciled<sup>19</sup> in the UK.

I refer to para (a) as the “**first RB-claim year**”.

One can put off the first RB-claim year by not making a s.809B remittance basis claim, but that is not generally going to be worthwhile. In straightforward cases the first RB claim year will be 2008/09 or the first year of UK residence if later.

Para (b) will not be common: it will apply where (in short):

- (1) An individual becomes deemed domiciled in the UK.
- (2) The individual leaves the UK for 5 years.
- (3) The individual becomes UK resident again, but not deemed domiciled, as time starts running again for the 15-year rule.

---

<sup>19</sup> Section 16ZA(7) ITA provides: “Section 835BA (deemed domicile) applies for the purposes of this section.” This is the standard wording to apply the deemed domicile rules.

An individual within s.809D or 809E (sub-£2k taxpayer or non-taxpayer) is not within s.809B so all losses are allowable in the usual way.

#### 61.16.5 *Permanent effect of election*

Section 16ZA TCGA provides:

- (2) Where an individual makes an election under this section in respect of a tax year, the election has effect in relation to the individual for—
  - (a) that tax year, and
  - (b) all subsequent tax years.
- ...
- (5) An election under this section is irrevocable.

Thus a taxpayer on claiming the remittance basis has a (more or less) once in a lifetime opportunity to make an election under s.16ZA (which I call a “**loss election**”) and this election (if made) applies for the rest of their life. It is impossible to know what will be the best choice and the taxpayer will have to guess. This is almost unprecedented in tax legislation.

#### 61.16.6 *Individual becomes UK dom*

The loss election lapses if and when the individual becomes UK domiciled. Section 16ZA TCGA provides:

- (2A) But if after making an election under this section an individual becomes domiciled<sup>20</sup> in the UK at any time in a tax year, the election does not have effect in relation to the individual for—
  - (a) that tax year, or
  - (b) any subsequent tax year.
- (2B) Where an election made by an individual under this section in respect of a tax year ceases to have effect by virtue of subsection (2A), the fact that it has ceased to have effect does not prevent the individual from making another election under this section in respect of a later tax year.

---

<sup>20</sup> See above footnote.

The professional bodies have published a set of Q&As<sup>21</sup> which includes two questions on this topic. Question 10 provides:

Do surplus losses which arise while a capital loss election is in force remain available to offset gains accruing once deemed domiciled?

**Suggested answer put to HMRC**

Section 16ZA TCGA provides for an election, the consequence of which is to confirm foreign losses as allowable losses. While the election has effect, s16ZB, s16ZC and s16ZD also have effect (subject to other specific criteria) and provide for special ordering rules on how to offset foreign losses.

Once an individual becomes deemed domiciled, s16ZA(2A) disapplies the election for that, and subsequent, tax years and consequently s16ZB, s16ZC and s16ZD are also turned off. Surplus foreign losses which arose while the election was in place remain as allowable losses under s16 once the individual becomes deemed domiciled. And since the special ordering rules at s16ZB, s16ZC and s16ZD no longer apply, the surplus losses may be offset against both UK and foreign gains which arise (subject to any normal restrictions that might apply eg, to a foreign loss that is also a clogged loss) once the individual is deemed domiciled.

For individuals who did not make the foreign capital loss election, any losses which accrued prior to becoming deemed domiciled are not allowable losses and remain so.

**HMRC Comments**

Agreed.

Question 11 provides:

Can capital losses which are realised while deemed domiciled be offset against Remittance Basis foreign chargeable gains that are remitted to the UK during the deemed domiciled period?

*Suggested answer*

S16ZB operates to stop allowable losses being offset against earlier foreign chargeable gains remitted at a later date (i.e. to prevent the

---

21 The full title is “Rebasing and Adjustment to the CGT Foreign Capital Losses Election Professional Bodies Q&A”. See <https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-09-19-foreign-capital-losses.ashx> or <https://www.tax.org.uk/policy-technical/submissions/finance-no-2-act-2017-taxation-non-uk-domiciliaries>

effective carry back of losses). Loss relief is instead provided by the special ordering rules in s16ZC.

However, once an individual becomes deemed domiciled, s16ZA(2A) disapplies the election under s16ZA for that, and subsequent, tax years and consequently s16ZB, s16ZC and s16ZD are also turned off. Thus, allowable losses which are realised while the individual is deemed domiciled can be offset against Remittance Basis foreign chargeable gains remitted while the individual is deemed domiciled. It should be noted that the same result applies where the individual did not make the foreign capital losses election (that is a loss realised after an individual is deemed UK domiciled can be set against a gain that: (i) was realised when an individual was not deemed UK domiciled; and (ii) is remitted when the individual is deemed UK domiciled).

**HMRC Comment**

Agreed

61.16.7 *Making election/time limit*

RDR Manual provides:

**32060 - Foreign chargeable gains loss election** [Jan 2019]

The election should be made for the first year for which the remittance basis is claimed, irrespective of whether the individual has any foreign chargeable gains or overseas losses in that year. The election will usually be expected to be made within the white space in the Capital Gains supplementary pages of the same SA Return as the first remittance basis claim is made. ...

The election is made in form SA108 (2018/19) box 54 (Any other information). HMRC, “Capital gains summary notes” (2018/19) provides:

if you’re making a claim or an election for losses on foreign assets to be allowable losses, write in the box ‘I elect for my foreign losses to be allowable losses’

The usual time limits apply.<sup>22</sup> The best approach may be to wait until the time limit approaches and make the decision then to elect or not, with the benefit of four year’s hindsight.

---

22 See 117.2.1 (The usual time limits apply).

## 61.17 Foreign loss disallowed if no election

Section 16ZA(3) TCGA provides:

If an individual does not make an election under this section in respect of a year referred to in subsection (1)(a) or (b), foreign losses accruing to the individual in—

- (a) that tax year, or
  - (b) any subsequent tax year except one in which the individual is domiciled<sup>23</sup> in the UK,
- are not allowable losses.

In short, if no election is made, foreign losses accruing to a foreign domiciliary are not allowable:

- (1) in the year that a s.809B remittance basis claim is made; or
- (2) in any subsequent year (even if no remittance basis claim is made in that year) up to the acquisition of UK domicile

There are therefore four or five distinct periods for a UK resident foreign domiciled individual, assuming no loss election is made:

- (1) Before 2008/09: foreign losses are disallowed<sup>24</sup>
- (2) From 2008/09:
  - (a) Period when UK resident but before making a s.809B remittance basis claim: foreign losses are allowable
  - (b) The first RB-claim year, and subsequently while non-domiciled: foreign losses are disallowed
  - (c) After becoming UK domiciled: foreign losses are allowable
- (3) If individual ceases to be UK deemed domiciled and returns to UK, the para (2) cycle begins again.

23 Section 16ZA(7) ITA provides: “Section 835BA (deemed domicile) applies for the purposes of this section.” This is the standard wording to apply the deemed domicile rules.

24 Section 16(4) TCGA as it had effect before 2008/09 provided:

“In accordance with section 12(1), losses accruing on the disposal of assets situated outside the UK to an individual resident or ordinarily resident but not domiciled in the UK shall not be allowable losses.”

This wording is confusing. It means that losses accruing to a foreign domiciliary on a disposal by the foreign domiciliary of foreign situated assets are not allowable. It does not mean that losses are not allowable on a disposal (by any person) to a foreign domiciliary.

If no loss election is made, UK losses are allowable in the normal way, and so:

- (1) Set against
  - (a) UK gains and
  - (b) foreign gains (whenever realised) in the year that they are remitted to the UK; or
- (2) Carried forward.

Para 3(5) sch 8 F(no.2)A 2017 provides a transitional rule:

Where—

- (a) an individual makes an election under section 16ZA of TCGA 1992 as originally enacted for a tax year before the tax year 2017-18, but
  - (b) after making the election the individual becomes domiciled in the UK at any time in a tax year,
- sections 16ZB and 16ZC of that Act do not have effect in relation to the individual by virtue of that election for that tax year or any subsequent tax year.

### 61.17.1 *Planning*

Consider the position before disposing of an asset on which an (otherwise) non-allowable loss will accrue. Possibilities are:

- (1) making assets UK situate prior to disposal<sup>25</sup>
- (2) an inter-spouse transfer<sup>26</sup>

A foreign domiciliary who claims the remittance basis may be worse off than if they had not made the claim, if (1) they fail to make the loss election (2) they realise disallowed foreign losses; and (3) they remit sufficient gains to the UK.

An individual who comes to the UK may consider:

- (1) realising historic foreign losses in the first year of residence (or in the UK part of a split year); and
- (2) not making a s.809B remittance basis claim until after the first year of residence.

## 61.18 **Effect of loss election**

---

<sup>25</sup> Contrast 98.24 (Planning: Changing situs).

<sup>26</sup> See 61.22 (Inter-spouse transfer).

For the purposes of the following discussion it is necessary to distinguish:

- (1) the year in which a gain actually accrues and
- (2) the year in which a gain is remitted (the year of remittance)

A remittance basis taxpayer has three types of foreign gains:

**“Promptly-remitted gains”** means gains remitted in the year that the gains actually accrue.

**“Subsequently-remitted gains”** means gains which are remitted in a year after the gains actually accrue.

**“Unremitted gains”** means gains which are not remitted and so remittance basis exempt.

Para 2 sch 1 TCGA provides:

- (1) This paragraph applies if—
  - (a) gains are treated as accruing to an individual in a tax year as a result of paragraph 1 [remittance basis],<sup>27</sup>
  - (b) the tax year is later than the one (“the actual year of accrual”) in which those gains actually accrued to the individual, and
  - (c) an election under section 16ZA (election for foreign losses to be allowable losses) has effect for both the tax year and the actual year of accrual.
- (2) No allowable losses may be deducted under section 1 from the gains.
- (3) This prohibition—
  - (a) applies regardless of whether or not the allowable losses accrue on disposals of foreign assets, but
  - (b) does not prevent the prior application of paragraph 3(3) in relation to the gains (which contains a rule for reducing the amount of the gains by reference to losses).

In short, para 2 applies to subsequently-remitted gains accruing in or after the RB-claim year. The rules do not apply to gains which accrued before that year. In particular, the rules do not apply to pre-2008 gains, since no s.809B claim or loss election was made in those years.

The CG Manual provides:

---

<sup>27</sup> See 16.14 (Charge on remitted gains).

**CG25330B: no effective carry back of foreign allowable losses: TCGA92/S16ZB\*** [May 2020]

If an election has been made for foreign losses to remain allowable losses (see CG25330A) then a loss may not be set against chargeable gains taxable on the remittance basis in a tax year - known as the applicable tax year<sup>28</sup> - after the foreign chargeable gains which are being remitted arose, if the foreign chargeable gain arose in a year before the loss. This means that a loss cannot be “carried back” and set against a foreign chargeable gain of an earlier year, even if that gain is not taxed until the year of loss because of the remittance basis.

**Example:** (Henri)

H elects to use the remittance basis in 2014-15 and has an unremitted foreign chargeable gain of £1m in that year. He also elects for his foreign losses to remain allowable losses. In 2016-17 he remits the gain to the UK and has a foreign loss of £500,000. He does not elect to use the remittance basis in 2016-17. The relevant tax year<sup>29</sup> is 2014-15 and the applicable tax year is 2016-17. Foreign chargeable gains accrued in or after the relevant tax year but before the applicable tax year and a chargeable gain is treated as accruing in the applicable tax year when those gains are remitted. The conditions of TCGA92/S16ZB(1)\* are therefore satisfied. The remitted gains are known as relevant gains and are excluded from the total amount of chargeable gains from which losses are deducted under TCGA92/S2\*. The relevant gains are nonetheless included in the amount on which Capital Gains Tax is charged for the applicable tax year (TCGA92/S16ZB(2)-(3)\*). So the £500,000 loss may not be set against the chargeable gain of £1m treated as accruing to Henri in 2016-17.

\*These provisions were re-written for disposals from 6 April 2019 see CG10150.

Note that this prohibition of carry-back applies to all losses, not just to foreign losses.

Note also that this prohibition applies whether or not the remittance basis applies in the applicable year, ie the year in which the foreign chargeable gain is remitted.

### 61.18.1 *Setting losses against gains*

---

28 The Manual is using the terminology of the pre-2017 legislation.

29 The Manual is using the terminology of the pre-2017 legislation.

Para 3 sch 1 TCGA directs that losses are to be used in a manner which is not the most favourable to the taxpayer:

(1) This paragraph applies in the case of an individual for a tax year if—

(a) the remittance basis applies to the individual for the tax year, and

(b) an election under section 16ZA has effect for the tax year.

(2) Allowable losses accruing to the individual must be matched to chargeable gains accruing to the individual in accordance with paragraph 4.

(3) If allowable losses are matched to chargeable gains accruing on disposals of foreign assets—

(a) which actually accrue in the tax year, but

(b) which are, as a result of paragraph 1, treated as not accruing in the tax year,

the amount of those gains is reduced by the matched amount (and the allowable losses are reduced accordingly).

(4) So far as allowable losses are matched to other chargeable gains, they are deducted from chargeable gains accruing to the individual in the tax year.

(5) This is subject to—

(a) paragraph 2 (no use of allowable losses against foreign gains remitted in later year), and

(b) section 1E(4) (prohibition of deduction of losses from gains treated as accruing under section 87, 87K, 87L or 89(2)).

So in my terminology, losses are set against gains in this order:

- (a) promptly-remitted gains;
- (b) unremitted foreign gains;
- (c) UK gains.

Losses set against (b) may not be wasted but they are not used until the unremitted gains are remitted.

Para 4 sch 1 TCGA provides:

(1) This paragraph explains how, for the purposes of paragraph 3, allowable losses are matched to chargeable gains in the case of an individual to whom that paragraph applies for a tax year.

(2) The losses are matched to the gains in the following order—

*first*, gains actually accruing to the individual in the tax year on the disposal of foreign assets so far as they are remitted to the

- United Kingdom in the tax year;  
*second*, gains actually accruing to the individual in the tax year on the disposal of foreign assets so far as they are not remitted to the United Kingdom in the tax year;  
*third*, any other gains accruing to the individual in the tax year.
- (3) If the tax year is a split year, the matching under the first and second steps is to be done by reference to the extent to which the gains are, or are not, remitted in the UK part of the year.
- (4) If there are losses to be matched to gains under the second step but the losses are insufficient to eliminate the gains—
- the losses are to be matched against gains accruing on the most recent day first (and then the next most recent day and so on until none of the losses remain), and
  - if losses cannot be matched fully against gains accruing on a particular day, the appropriate portion of the losses is matched against each of the gains.
- (5) “The appropriate portion” means the amount of each gain accruing on the day divided by the total amount of all of the gains accruing on the day.

### 61.18.2 HMRC example

The CG Manual provides:

**CG25330D - Remittance basis: matching rules for relieving losses: example: Section S16ZC TCGA 1992 [Nov 2019]**

*Example (Johann)*

J is a remittance basis user in all years. He has made an election under Section 16ZA TCGA 1992 so his foreign losses are allowable, subject to the rules in Section 16ZB TCGA 1992 and Section 16ZC TCGA 1992. His history of gains and losses is as follows:

	UK gains	UK losses	Foreign gains	Cash brought to UK	Foreign losses
2008-09	100,000	25,000	30,000	0	0
2009-10	17,000	5,000	50,000	60,000 <sup>30</sup>	30,000
2010-11	0	0	12,000	20,000 <sup>31</sup>	25,000

The HMRC analysis is as follows:

30 [HMRC’s note] accepted after enquiry to establish facts and application of mixed fund rules ... as being £30,000 from 2008-09 plus £30,000 from 2009-10

31 [HMRC’s note] accepted after enquiry to establish facts and application of mixed fund rules ... as being all from 2009-10

**2008-09**

Relevant allowable losses are £25,000 (Section 16ZC(7) TCGA 1992)  
Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2008-09 foreign chargeable gains remitted	Nil
b) 2008-09 foreign chargeable gains not remitted	30,000
c) 2008-09 other chargeable gains [UK gains]	100,000

**Step 1** deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2008-09 foreign chargeable gains remitted	Nil
b) 2008-09 foreign chargeable gains not remitted	5,000
c) 2008-09 other chargeable gains	100,000

**Step 2** the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e. £100,000 UK gains) LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £Nil).

So in 2008-09 Capital Gains Tax is charged on £100,000. The effect of the rules is to use allowable losses to frank unremitted foreign chargeable gains even though that leaves UK gains in charge.

The foreign chargeable gain not remitted is reduced by the allowable UK loss deducted from it at step 1 so going forward it becomes £5,000 (Section 16ZD (3) TCGA 1992). This is important to remember if it is remitted in a later year (see below).

**2009-10**

Relevant allowable losses are £35,000 (Section 16ZC(7) TCGA 1992)  
Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2009-10 foreign chargeable gains remitted	30,000
b) 2009-10 foreign chargeable gains not remitted	20,000
c) 2009-10 other chargeable gains	17,000

**Step 1** deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2009-10 foreign chargeable gains remitted	Nil
b) 2009-10 foreign chargeable gains not remitted	15,000
c) 2009-10 other chargeable gains	17,000

**Step 2** the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses(i.e.

£35,000 remitted gains<sup>32</sup>

£17,000 UK gains

£52,000

LESS the total amount deducted at step 1 from gains in classes (a) and (c)

---

32 £5,000 from 2008-09 (after set-off of 2008-09 losses) plus £30,000 from 2009-10

(i.e. £30,000).

So in 2009-10 Capital Gains Tax is charged on £22,000 (52,000 - 30,000).

The effect of the rules is to use allowable losses to frank unremitted foreign chargeable gains even though that leaves UK gains in charge.

The foreign chargeable gain not remitted (category (b)) is reduced by the loss deducted from it at step 1, so it becomes £15,000 (Section 16ZD(3) TCGA 1992). This will be significant if it is remitted in a later year (see below).

### 2010-11

Relevant allowable losses are £25,000 (Section 16ZC(7) TCGA 1992)

Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2010-11 foreign chargeable gains remitted	Nil
b) 2010-11 foreign chargeable gains not remitted	12,000
c) 2010-11 other chargeable gains	Nil

**Step 1** deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2010-11 foreign chargeable gains remitted	Nil
b) 2010-11 foreign chargeable gains not remitted	Nil
c) 2010-11 other chargeable gains	Nil

**Step 2** the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e.

£15,000, the adjusted residue of the 2009-10 gain; see above)

LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £Nil).

So in 2010-2011 Capital Gains Tax is charged on £15,000. Note that none of the foreign loss arising in 2010-2011 can be relieved against the chargeable gain which accrued in the earlier year, even though that gain was not remitted until the year of loss. This is consistent with the fact that UK losses cannot be carried back to set against gains of earlier years.

The foreign chargeable gain not remitted (category (b)) is reduced by the loss deducted from it at step 1, so it becomes £Nil (Section 16ZD (3) TCGA 1992). It has been franked by the loss of the period and will not give rise to a taxable remittance if cash etc representing it is brought to the UK in a later year.

The unused balance of allowable losses (£25,000 - 12,000 = £13,000) is carried forward and may be used to relieve chargeable gains of later years. (Section 16ZD(2) TCGA 1992).

### 61.18.3 Record-keeping

Record-keeping from 2008 is onerous. Before 2008 a taxpayer had only to keep a total of brought forward losses and remitted gains. But now (if a taxpayer makes a loss election) they need to keep track of which year losses accrue, and which day and year subsequently-

remitted gains accrue, in order to apply these loss rules.

### 61.19 When is loss election worthwhile

Careful timing of realisation of losses and of remittances is necessary in order to maximise loss relief if a loss election is made. A few general points can be made.

A person who will realise UK losses and not foreign losses should not make a loss election.

A person who will realise UK losses and foreign losses, but can use inter-spouse transfers to avoid disallowable foreign losses should not make an election.

A person who will realise foreign losses and not UK losses should make an election.

In other cases it is a matter of guesswork.

### 61.20 Basic planning for losses

The restriction on carry-back of losses means that careful timing of disposals may be needed to match losses to gains.

The realisation of losses by non-residents is wasteful. Unless the temporary non-residence rules apply:

- (1) An individual leaving the UK may consider realising losses before they become non-resident.
- (2) An individual coming to the UK may postpone the disposal of assets with unrealised losses until they become UK resident.

### 61.21 Capital-loss TAAR

Section 16A(1) TCGA provides:

For the purposes of this Act, “allowable loss” does not include a loss accruing to a person if—

- (a) it accrues to the person directly or indirectly in consequence of, or otherwise in connection with, any arrangements, and
- (b) the main purpose, or one of the main purposes, of the arrangements is to secure a tax advantage.

I refer to this as the “**capital-loss TAAR**”.

HMRC have issued guidance which I call the “**loss-TAAR**”

**guidance”.**<sup>33</sup>

There are two stages to the application of s.16A:

- (a) *Loss-arrangement analysis*: To identify the arrangement<sup>34</sup> within (a): I refer to such arrangements as a **“loss-arrangement”**.
- (b) *Main-purpose analysis* To ascertain whether the (or a) main purpose of the loss-arrangement is to secure a tax advantage (**“a tax-advantage purpose”**).

### 61.21.1 *Loss-arrangement*

Section 16A(1)(a) TCGA provides:

For the purposes of this Act, “allowable loss” does not include a loss accruing to a person if—

- (a) it accrues to the person directly or indirectly in consequence of, or otherwise in connection with, any arrangements...

At first glance s.16A(1) contains two conditions, but para (a) in isolation does not amount to anything: a loss will (more or less) never accrue without an arrangement.<sup>35</sup> The purpose of para (a) is to *identify* “the arrangements” referred to in para (b), that is, the arrangements whose main purpose must be ascertained. One cannot ascertain the purpose of an arrangement until one knows what the arrangement is.

“The arrangements” are those:

- (1) in consequence of which (directly or indirectly) the loss accrues to the person,<sup>36</sup> or
- (2) in connection with which, the loss accrues to the person.

### 61.21.2 *Gain-transfer arrangement*

Correct identification of the arrangement may make a crucial difference

33 The current version of the guidance is in CG Manual Appendix 9 CGT: avoidance through the creation and use of capital losses [Jun 2017].

34 I do not distinguish between plural *arrangements* and the singular *arrangement*.

35 A disposal on which a loss accrues is a single step, but probably constitutes “arrangements” as the plural includes the singular. If that is right then a loss can never accrue without an arrangement. But that does not matter, as a single step arrangement is not likely to have a tax-advantage purpose.

36 The statutory words “directly or indirectly in consequence of” are otiose, as if the loss accrues *in consequence of* the arrangements it must accrue *in connection with* the arrangements.

to the outcome. Suppose:

- (1) H realised a loss.
- (2) Some time later there is an arrangement (a “gain-transfer arrangement”) under which:
  - (a) W transfers an asset to H (by gift or sale).
  - (b) H disposes of the asset and realises a gain.
  - (c) Possibly, H transfers the proceeds of sale back to W (by gift or payment of the purchase price).<sup>37</sup>

The main purpose of the gain-transfer arrangement is to secure that a gain is set against H’s loss. However it is considered that there is no loss-arrangement (so the TAAR does not apply), because:

- (a) the loss did not arise in consequence of the gain-transfer arrangement; and
- (b) the loss did not accrue in connection with the gain-transfer arrangement. The loss accrued entirely independently of that arrangement, indeed (let us assume) before that arrangement was ever contemplated.

Steps (1) and (2) do not constitute a single arrangement.<sup>38</sup>

Section 16A(3) TCGA provides:

For the purposes of subsection (1) it does not matter—

- (a) whether the loss accrues at a time when there are no chargeable gains from which it could otherwise have been deducted, or
- (b) whether the tax advantage is secured for the person to whom the loss accrues or for any other person.<sup>39</sup>

That does not add anything, or anything much. One would not expect an anti-avoidance rule to be narrowly construed. Section 16A(3)(a) does not alter the analysis of the gain-transfer arrangement: the reason that the arrangement is not a loss-arrangement is not *because* the loss

37 In practice step (c) is not necessary, and it may be wise not to do it; but it is included for the purpose of the example.

38 The GAAR might need separate consideration.

39 What is the point of s.16A(3)(b) TCGA? How can a tax advantage be secured for a person *other* than the person to whom the loss accrues? The answer is if the loss accrues to a non-resident trust or company, for the tax advantage might be enjoyed by a settlor (under s.86) or a beneficiary (under s.87) or a participator (under s.3).

accrues at a time when there are no chargeable gains (although it does accrue at such a time).

A similar point arises with clogged losses. Suppose:

- (1) T transfers an asset to C (a connected person, perhaps a trust made by T) by gift or by sale. A loss accrues which is a clogged loss.<sup>40</sup>
- (2) Some time later:
  - (a) T transfers another asset to C, by gift or sale, on which a gain accrues. The clogged loss can be set against the gain.
  - (b) C sells the asset.
  - (c) Possibly, C transfers the proceeds of sale back to T (by gift or payment of the purchase price).<sup>41</sup>

Step 2 constitutes a gain-transfer arrangement with a tax-advantage purpose. However it is considered that there is no loss-arrangement (so the TAAR does not apply), because:

- (a) the loss did not arise in consequence of the gain-transfer arrangement; and
- (b) the loss did not accrue in connection with the gain-transfer arrangement. The loss accrued entirely independently of that arrangement, indeed (let us assume) before that arrangement was ever contemplated.

### 61.21.3 “Tax advantage”

Section 16A(2) TCGA provides the standard IT/CGT definition of “tax advantage”.<sup>42</sup>

### 61.21.4 Tax-advantage purpose

Section 16A(1) TCGA provides:

For the purposes of this Act, “allowable loss” does not include a loss accruing to a person if...

- (b) the main purpose, or one of the main purposes, of the arrangements is to secure a tax advantage.

Where the (or a) main purpose is to secure a tax advantage, I refer to it

40 See 61.9 (Loss on connected person disposal).

41 In practice step (c) is not necessary, and it would be wise not to do it; but it is included for the purpose of the example.

42 See 2.12.1 (Tax advantage: Definitions).

as “a tax-advantage purpose”.

#### 61.21.5 “Genuine” loss and the TAAR

The loss-TAAR guidance provides:

The [TAAR] does not apply to a simple sale at arm’s length of an investment standing at a loss and the setting of that loss against gains, utilising the statutory relief for losses. Such a transaction does not constitute arrangements whose main purpose is to secure a tax advantage, as the main purpose is the disposal of the unprofitable investment.

And again:

Nor will the [TAAR] ordinarily<sup>43</sup> prevent a genuine loss on a real disposal of an asset from being set off against a person’s own gains, including the case where, before the real disposal that gives rise to the genuine loss, the person acquires the relevant asset from a spouse or civil partner at no gain/no loss under section 58 [TCGA].

According to this, s.16A does not (in short) apply to genuine losses, and a loss following an inter-spouse transfer (“a spouse-transfer loss”) is an example of a genuine loss.

What is meant by genuine loss? At first the unlaywerlike term “genuine” seems almost impossible to pin down, but I think that the concept intended here is the tax avoidance/mitigation distinction.<sup>44</sup> A loss is genuine (in the intended sense) if it is in accordance with the intention of parliament, which may be inferred from indicia such as its economic consequences.

The loss-TAAR guidance provides:

The straightforward use of a statutory relief does not of itself bring arrangements within the TAAR.

The straightforward use of a statutory relief (almost) always involves an arrangement, and often, perhaps usually, there is a tax-advantage purpose; but it is not tax avoidance.

---

43 The word “ordinarily” seems unnecessary, given that the sentence is already qualified by the requirements of a “genuine” loss and a “real” disposal; but the author did not want to give any hostage to fortune.

44 See 49.15.3 (“Genuine”).

The loss-TAAR guidance gives 18 examples:

Example	Facts	Result
1	Avoidance scheme: loss on second-hand policy	Caught
2	Avoidance scheme manipulating co value	Caught
3	Avoidance scheme: matched options	Caught
4	H sells to realise loss; W buys unbeknown to H (!)	OK
5	Inter-spouse transfer to transfer loss to spouse	OK
6	H sells, W buys same shares & transfers to H	Caught
7	As eg 6, but W buys different no. shares	“less likely” caught
8	As eg 6, but W waits 30 days	OK
9	Share sale to realise loss + repurchase after 30 days	OK
10	Sale to realise loss + option to repurchase	Caught
11	Trustees sell to realise loss	OK
12	As eg 11, + trustees fund beneficiary who buys asset	OK
13	As eg 11	OK
14	Trustees distribute asset to beneficiary to realise loss	OK
15	Disposal to purchase EIS shares & obtain EIS relief	OK
16	Disposal of EIS shares	OK
17	Liquidation of company	OK
18	Trustees make deliberate sch4B transfer of value	Caught

Examples 15 and 16, concerning EIS relief, illustrate the “genuineness” point. Example 15 is a sale (realising a loss) in order to raise funds to purchase EIS shares:

An individual, J, invests in shares under the Enterprise Investment Scheme (EIS), with a view to securing income tax relief.

In order to fund the purchase of the shares J sells a capital asset which is standing at a loss to a third party.

To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage.

In this case it is clear that there have been arrangements within the meaning of the legislation, as J has disposed of the capital asset and used the proceeds to fund the purchase of the EIS shares.

That is correct.

To decide what J’s main purpose was in entering into these arrangements, it is necessary to consider the overall economic objective of the arrangements, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or

costly steps have been inserted.

J has made a real disposal of a capital asset in a straightforward way, and has incurred a genuine economic loss. There have been no additional, costly or complex steps inserted into the transactions. The fact that the disposal has been made with a view to using the proceeds to invest in shares which fall within the EIS tax regime does not mean that the arrangements have been entered into with a main purpose of securing a tax advantage, because the straightforward use of a statutory relief does not of itself bring arrangements within the TAAR. Hence the TAAR does not apply.

Example 16 is the disposal of EIS shares at a loss:

Y has disposed of a capital asset and realised a chargeable gain, but the gain is deferred because he invests a sufficient amount in shares issued under the Enterprise Investment Scheme (EIS).

Unfortunately the EIS company in which Y has invested does not succeed, and the shares later become worthless.

Y makes a negligible value claim under section 24(2) and the resulting loss on the shares is set against

[a] the original gain that is brought back into charge under the EIS rules,

[b] or possibly against Y's income under [s.131 ITA].

To determine whether or not the TAAR applies so that the losses Y has realised on the shares in the EIS company are not allowable, it is necessary to decide whether or not arrangements have been entered into with a main purpose of realising a tax advantage. It is clear that there have been arrangements...

More analytically, the question is not *whether* there are arrangements, but *what* are the arrangements. HMRC assume that the arrangement is (1) the acquisition of the EIS shares and (2) the negligible value claim. I doubt if these unconnected steps constitute one set of arrangements. However it does not matter:

... and to decide whether securing a tax advantage was a main purpose of those arrangements it is necessary to take account of all the circumstances in which the arrangements were entered into, including the participants' overall economic objective, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted.

In this case, Y has made a real investment in an EIS company, and

there is nothing to suggest that the EIS company was other than a genuine investment opportunity from Y's perspective. The negligible value claim only creates a disposal for capital gains purposes. No additional, costly or complex steps have been inserted as part of the arrangements; Y is taking advantage of the tax reliefs offered in respect of EIS investments in a straightforward manner. The loss Y suffers on the shares in the company is a real economic loss. Taken together, these factors suggest (?) that there was no main purpose of securing a tax advantage and so Y's loss is allowable. It makes no difference that a gain on the EIS shares may have been exempt. The [capital-loss TAAR] does not have any effect on the normal operation of the relief.

The difficulty is to reconcile the loss-TAAR guidance with the words of the statute. One might simply give up at this point:

We think that the words “**tax avoidance**” should be substituted for “**tax advantage**” ... the guidance contradicts the legislation. Some transactions (such as transfers between spouses) are stated in the guidance not to be caught by the TAAR, when it is strongly arguable that they are caught.<sup>45</sup>

If that is right, then the HMRC guidance is wrong. That is CIOT view.<sup>46</sup> The decision whether or not to apply the legislation to inter-

---

45 CIOT consultation response (8 February 2007). An earlier version of the loss-TAAR guidance (27 March 2007) stated this expressly:

“5. The effect of the legislation will be to restrict the use of capital losses resulting from the arrangements where *tax avoidance* is the main purpose or one of the main purposes of the arrangements.”

But presumably HMRC noticed the inconsistency, and the guidance was amended on 19 July 2007 to read:

“The legislation is intended to have effect where a person enters deliberately and knowingly into arrangements to gain a tax advantage.”

46 “2.1 CIOT disagrees strongly with the majority of HMRC's Guidance, believing it to be in contradiction to the clear wording of section 16A. While it would be tempting to rely on HMRC's leniency, CIOT believe that it may be dangerous to do so.

2.2 CIOT agrees HMRC's *conclusions* in examples 1, 2, 3, 6, 7, 10 and 18 of HMRC Guidance. CIOT also agree that, depending upon the exact fact pattern, HMRC's conclusions in examples 12, 13 and 17 may also be correct.

2.3 However, CIOT disagrees with HMRC's *reasoning* in all bar the first example. In some cases (examples 2, 3, 10 and 17) this is because HMRC's reasoning does not go far enough. In the remaining cases, CIOT believes HMRC's reasoning is incorrect.

spouse transfers (and many other cases) would then made by HMRC with no appeal by the taxpayer (outside judicial review). However, our tools of construction are not so weak as that. There are at least two possible routes to reach the HMRC view:<sup>47</sup>

- (1) A genuine transaction does not give rise a tax advantage. That is, the reference to “tax advantage” should be construed to mean tax avoidance in the strict sense.
- (2) In the case of a genuine transaction, a tax-advantage purpose is not a main purpose.

In either case, the statutory words are construed restrictively. Perhaps it does not matter which analysis is chosen. HMRC rely on the concept of main purpose:

38. The rule does not apply to a simple sale at arm’s length of an investment standing at a loss and the setting of that loss against gains, utilising the statutory relief for losses. Such a transaction does not constitute arrangements whose main purpose is to secure a tax advantage, as the main purpose is the disposal of the unprofitable investment.

In the normal sense of the expression, a disposal of an asset standing at a loss could have the main purpose of obtaining loss relief. In March, before the tax-year end, all competent fund managers review their client portfolios and arrange disposals to accrue losses to set against gains. It may be - indeed I think it will often be - the case that but for CGT, these disposals would not take place.

The fact that the investment was unprofitable in the past might constitute the reason for the disposal, but not necessarily. The asset might become profitable in the future. “Past performance is not a guide to future performance” is an investment mantra.

---

2.4 CIOT disagrees with both HMRC’s *conclusions* and their *reasoning* in examples, 4, 5, 8, 9, 11, 14, 15 and 16 believing that it is unduly lenient and does not accord with the wording of section 16A TCGA. CIOT believes that HMRC’s reasoning and conclusions may also be lenient in examples 12, 13 and 17, although this will depend upon the exact factual situation.”

CIOT, “TAAR guidance: Comments” (2007)

<http://old.tax.org.uk/attach.pl/6382/7453/TAARguidance%20final140108.pdf>

HMRC did not respond.

<sup>47</sup> A third route is to say that a genuine transaction does not constitute an arrangement.

I suggest, therefore, that context shows that the expression “main purpose” should be given a restricted meaning. Whatever the subjective frame of mind of the taxpayer, and regardless of the result of a but-for test, it is only the main purpose to obtain a tax advantage, in cases of tax avoidance, or (which comes to the same thing) in non-genuine transactions. That is not, admittedly, the most natural meaning of “main purpose”, but it is a possible meaning, and if necessary supportable on *Pepper v Hart* grounds. In other words, purpose is a subjective question of fact, but *main* purpose is a legal concept.

The reader may wonder whether this discussion matters, given that HMRC have stated that they will not normally challenge, say, a spouse-transfer loss. On a constitutional level it matters to those who believe that tax should be based on law and not concession and discretion. On a practical level it matters if HMRC decide to change their practice (which the IR20 debacle shows is not a theoretical possibility) or if they apply it inconsistently.

#### 61.21.6 Sale and repurchase

Loss-TAAR guidance example 9 is a straightforward sale and repurchase after 30 days:

An individual, R, who has realised a chargeable gain in a particular tax year, sells shares in a company, X plc., which are standing at a loss, to an unconnected third party.<sup>48</sup> R wishes to offset the resulting capital loss against the other chargeable gain.

31 days later R buys back the same number of shares in X plc., again from an unconnected third party.<sup>49</sup>

To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and as for example 8, this seems to be the case here.

More analytically, the question is not *whether* there are arrangements, but *what* are the arrangements. The loss-arrangement is (1) the sale and (2) the repurchase.

The next question, therefore, is whether the arrangements have a main purpose of securing a tax advantage. As for previous examples,

---

48 If the sale is to a connected person, the loss is restricted.

49 It should not matter that the purchase is from a connected person.

this entails examining all the circumstances surrounding the arrangements, considering their overall economic objective, whether that objective is one that the participants might be expected to have, and which is genuinely being sought, and whether that objective is being fulfilled in a straightforward way, or additional, complex or costly steps have been inserted. In this case, the shares were bought back after the 30 day time limit in section 106A(5) TCGA, so the transaction is not within those “bed and breakfasting” rules.<sup>50</sup>

In disposing of the shares in X plc, R has incurred a real economic loss on a genuine disposal to a third party.

This is not quite right. In disposing of the shares, R did not *incur* a loss. R *accrued* or *realised* the loss which had already been incurred as the asset had fallen in value.

The main-purpose analysis can then begin:

Provided that R has not entered into some form of contract or agreement to ensure that he is not exposed to a genuine economic risk in respect of the shares during the period they were not in his ownership, this suggests that he has not entered into arrangements with a main purpose of securing a tax advantage. The transactions therefore fall outside the scope of the TAAR.

I suggest the better analysis is that since the statute sets out a 30 day limit, a purchase thereafter is not avoidance, and so not a main purpose.

### 61.21.7 Liquidation

The loss-TAAR guidance provides:

**Example 17 - capital loss following disposal of company assets**

M and K are married and between them own all the shares in a property investment company, B Ltd. The shares are standing at a loss but B Ltd owns a valuable property.

M and K jointly buy the property from B Ltd. for cash at its open market value and the company distributes its remaining assets, the cash, during its winding up.

M and K realise losses on their shares.

The HMRC analysis is as follows:

---

<sup>50</sup> See 53.10 (Share pooling).

To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In this case, it seems clear that there have been arrangements, so it is necessary to look at what M and K's main purpose in entering into these arrangements was. This can be determined only by looking at all the circumstances surrounding the arrangements.

The author assumes that M and K have the same purpose. That is not necessarily the case, though the fact that they are married suggests that is likely. (The fact that M and K are married is otherwise irrelevant.) Otherwise, so far, this is not contentious.

In the present example, M and K wanted to wind up B Ltd, but also to retain ownership of the valuable property they controlled via the company. The property was purchased by them from the company at market value, and paid for with real consideration, so there was no artificial reduction in the value of the company.<sup>51</sup> The winding-up of the company allowed the shareholders to realise the economic value of their investment in it in a straightforward way. B Ltd. has simply converted value represented by property into the same value represented by cash, and M and K now own the property directly. This, coupled with the fact that the tax effect of the transactions reflects the economic outcome suggests that there was no main purpose of realising a tax advantage, and so the TAAR will not apply.

It is difficult to take this seriously, but what does emerge is that HMRC do not seek to apply the loss-TAAR to a straightforward liquidation. The same must logically apply if the company were put into liquidation without a prior purchase of its property.

## 61.22 Spouse-transfer loss

### 61.22.1 Tax reasons for spouse transfer

---

51 Author's footnote: HMRC suggest that if the sale was at an undervalue, there would have been an artificial reduction in the value of the company, so the loss-TAAR would apply. Normally the sale at an undervalue would be a distribution subject to IT, and the cost of the IT charge on the distribution would exceed the benefit of the loss relief, so the issue is not likely to arise. But if one could devise circumstances where that were not the case (DT relief for the distribution, but not for the chargeable gain, perhaps?) then the point may be valid.

Suppose an individual (“H”) owns an asset which stands at a loss. It will sometimes happen that the position would be improved if the loss accrued to H’s spouse (“W”) rather than to H. That would be the case if:

- (1) W has realised a gain which could be set against the loss.
- (2) W expects to realise a gain which could be set against the loss.<sup>52</sup>
- (3) W is UK resident and H is non-resident, so his loss is not allowable.
- (4) H is a remittance basis taxpayer, and has made a loss election, so that his loss would be set against foreign gains and so wasted.
- (5) H is expected to die and his loss will then cease to be available, but W has a better life expectancy.

Inter-spouse transfers are on a no-gain no-loss basis for CGT.<sup>53</sup> This relief offers possible tax planning:

- (1) H gives the asset to W.
- (2) W disposes of the asset, and so the loss accrues to her.

#### 61.22.2 Spouse transfer and the TAAR

The planning is accepted in loss-TAAR guidance example 5:<sup>54</sup>

H has shares in S plc which are standing at a loss.

W has shares in a separate company, T plc, standing at a gain.

H transfers his shares to W under the no-gain, no-loss rule in section 58 TCGA, and she then sells both holdings of shares.

The loss on the shares in S plc covers the gain arising from the shares in T plc, and so no CGT is payable by W.

The HMRC analysis is as follows:

Taking the spouses together, H and W each have shares which they want to sell. What happens in fact is that they do sell their shares, and the economic consequence is that they realise a gain on one set of shares and a loss on the other set. To decide whether or not the

---

52 An alternative here may be for W to transfer the asset with the gain to H, so H realises the gain and the loss.

53 See 89.11 (CGT spouse exemption),

54 The guidance refers to Mr H and Mrs H; I have changed that to H and W, which I find slightly easier to follow.

TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In this case, it seems clear that there have been arrangements, namely the transfer of the shares from H to W.

More analytically, the question is not *whether* there are arrangements, but *what* are the arrangements. Here, the loss-arrangement consists of (1) the transfer to W and (2) the sale by W; not the transfer alone. But it does not matter.

We turn to the main-purpose analysis:

It is then necessary to look at what the main purpose of H and W in entering into these arrangements was. This can be determined only by looking at all the circumstances surrounding the arrangements. In the present example, H and W wanted to dispose of their shareholdings, and they did this in a straightforward way.

“Straightforward” is not, er, straightforward. It is evaluative, subjective, and a matter of degree. The *most* straightforward way would be for H to sell, not to give the shares to W who then sells.

They made use of the provisions of section 58 TCGA, which provides the opportunity for spouses (or civil partners) to bring together gains and losses, but again the straightforward use of a statutory relief in this way does not (of itself) bring arrangements within the TAAR.

The same point arises.

Moreover, the tax outcome of the transactions reflects the economic reality of H and W’s situation.

“Economic reality” is vague, evaluative, subjective and often debatable.<sup>55</sup> But in this case the position is clear: in economic reality, W does not realise a loss. The *family unit* (H and W) realises a loss but husband and wife are not now<sup>56</sup> regarded as one person, or one unit, in society generally or for (most) tax purposes (apart from anti-avoidance). That is why the inter-spouse transfer is needed.

---

55 See App.6.5 (Economic reality etc).

56 It is relevant to note that from the inception of CGT until 1988, spouses were one taxable unit, and losses of one spouse were set against gains of the other: s.4(2) Capital Gains Tax Act 1979 (repealed).

In all the circumstances, this suggests that there was no main purpose of achieving a tax advantage, and where there is no such main purpose the rule does not apply.

A main purpose is to obtain the benefit of the loss on a simple but-for test, the inter-spouse transfer would not otherwise have taken place. Any other view is highly implausible. However the purpose is not to achieve a *tax advantage* in the relevant sense, so it does not count as a main purpose within the sense of the section.

Contrast HMRC example 6:

As in example 4, H sells shares in a company, in order to crystallise a loss which can then be set against his chargeable gains arising in the year.

H makes arrangements for his wife W to purchase the same number and class of shares.

W then transfers the shares back to H on the following day. By virtue of section 58 TCGA this is a no-gain, no-loss transaction.

The author's CGT analysis (leaving the loss-TAAR aside for a moment) is defective. Section 58 is not likely to be relevant, as W acquires the shares at market value so she would not realise a gain on the disposal the next day to H. More importantly, the author overlooks the effect of s.106A TCGA on the acquisition by H.<sup>57</sup> But on the assumption that s.106A does not apply, the passage continues:

To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In this case it is clear that there have been arrangements, as H has arranged for his wife to purchase the same number and class of shares.

More analytically, the question is not *whether* there are arrangements, but *what* are the arrangements. The arrangements are the sale by H, the purchase by W, and the transfer from W to H.

The main-purpose analysis can then begin:

It is then necessary to look at what the main purpose of H and W in

---

<sup>57</sup> See 53.10.2 (Share-matching rules).

entering into these arrangements was, and to do so it is necessary to consider the overall economic objective of the arrangements, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted. Clearly the real economic ownership of the shares has remained with H, which suggests that the disposal of the shares was incidental to some other main purpose of the arrangements. The only substantive change here is that a tax loss has been obtained. Since H & W have the same effective holding of shares and no less cash at the end of the arrangements as at the beginning, they have not suffered any corresponding economic loss, which suggests that a main purpose of the arrangements was the securing of that tax advantage. The TAAR will therefore apply and the capital losses claimed by H will not be allowable losses.

There has in fact been a substantive change: W has transferred assets to H so she owns less and he owns more. The difference would be crucial if H became insolvent.

On a subsequent sale by H any chargeable gain would be greater (or any allowable loss would be smaller) than would have been the case if the arrangements had not been entered into. This does not affect the operation of the TAAR in relation to the losses generated under the arrangements.

Example 7 tweaks two facts: (1) the number of shares purchased by W and (2) W wisely does not transfer the shares to H:

The situation may arise where variants on the arrangements in example 6 occur. For example, instead of making arrangements for W to buy back the same number of shares as had been sold by H, the couple might arrange for a slightly different number of shares to be bought. Or she might purchase the shares and retain them as part of her own portfolio, not transferring them back to H at all. To decide whether or not the TAAR applies in such cases, it is still necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In each case it is clear that there have been arrangements, and so it is necessary to look at what the main purposes of these arrangements were.

The main-purpose analysis can then begin:

All the circumstances surrounding the arrangements have to be taken into account, and to do so it is necessary to consider the overall economic objective of the arrangements, whether that objective is one that the participants might ordinarily be expected to have, whether that objective is genuinely being sought, and whether it is being fulfilled in a straightforward way, or additional, complex or costly steps have been inserted.

In a case where a slightly different number of shares has been bought back by W, but those shares are immediately transferred back to H, it is likely that the securing of a tax advantage would still be one of the main purposes, in which case the TAAR would still apply. But if only a very small proportion of the shares sold by H were then purchased by W and transferred back to H, or if W bought the shares and retained them as part of her own share portfolio, it is less likely that the securing of a tax advantage was one of the main purposes of the arrangements, in which case the TAAR would not apply.

“It is less likely” is not exactly guidance. But the author of the guidance did not want to give a hostage to fortune by venturing into the realm of “unlikely”.

Example 7 also raised the intriguing question which arises if W does not transfer the shares to H; but the author forgot to address that.

Example 8 tweaks the facts relating to timing:

A further variant on the situation in example 6 is that W could buy back the same number and class of shares that had been sold by H, but that she does not do so until, say, 31 days after H has sold the shares.

Again, it seems clear that there have been arrangements, and so it is necessary to look at what the main purpose of H and W in entering into these arrangements was.

So to determine whether or not the TAAR applies all the circumstances surrounding the arrangements have to be taken into account, considering:

- the overall economic objective of the arrangements,
- whether that objective is one that the participants might be expected to have, and which is genuinely being sought, and
- whether that objective is being fulfilled in a straightforward way, or additional, complex or costly steps have been inserted.

If W bought back the same number and class of shares which had been sold by H, but did not do so until some weeks after his disposal,

it is less likely that the securing of a tax advantage will have been a main purpose of the arrangements, because there will have been a degree of exposure to market fluctuations and therefore a genuine economic risk. As a general rule of thumb HMRC considers that the TAAR will not apply in any case where a sale of shares is followed by their re-purchase after a period exceeding 30 days, provided that the exposure to market fluctuations in that period is real and there are, for example, no additional contracts or arrangements in place that significantly limit any economic risk. This 30 day rule of thumb is derived from the time limit in section 106A(5) TCGA 1992, the rule which operates to counteract so-called “bed and breakfasting” transactions.

This is consistent with example 9.<sup>58</sup>

### 61.23 Loss-TAAR: Critique

IFS say:

7.4 ... the width of this relatively simple provision [s.16A TCGA] meant that HMRC needed to publish 17 pages of detailed Explanatory Notes to explain how the legislation would be applied. So, considering the example of the person who sells shares standing at a loss in order to set the loss against a gain on another disposal, the Explanatory Notes explain that this transaction will not be prevented, albeit that the legislation could be used to prevent this.

7.5 There are several problems with this approach. First, the Explanatory Notes are not themselves subject to the scrutiny and care in drafting given to legislation. By their nature, Explanatory Notes are not drafted in the precise (?) way required for legislation.

7.6 Second, HMRC does not have the power to legislate: taxation can only be imposed by the legislature and while HMRC may decide upon its own interpretation of the legislation, that interpretation is not binding on taxpayers.

7.7 Third, the ability of taxpayers to rely on the guidance depends upon the type of transaction involved: if it is a single transaction entered into in reliance on specific guidance, the taxpayer can rely on the guidance (although enforcement may be cumbersome, for the reasons explained below). In contrast, if the taxpayer is seeking to rely on guidance in relation to a continuing state of affairs, the

---

58 See 61.21.6 (Sale and repurchase),

taxpayer is exposed to changes in that guidance. ...<sup>59</sup>

IFS then discussed the important issue of whether the loss-TAAR guidance is enforceable.<sup>60</sup> But the loss-TAAR guidance is intended to give HMRC maximum freedom to disregard their guidance (or at least to give freedom to decide when it should or should not apply, which comes to the same thing):

Examples of how the legislation will apply in particular circumstances are set out below. These examples are intended to show how different factors will be taken into consideration in deciding whether or not the TAAR applies in a given set of circumstances. They are not designed as templates<sup>61</sup> for deciding whether a loss is or is not caught by the TAAR in any particular case.

Thus unless my view on the meaning of “tax advantage” in s.16A TCGA is adopted, the loss-TAAR guidance is (more or less) unjusticiable: there is no law, only discretion.

In earlier editions of this work, I said:

The uncertainty caused by provisions such as s.16A (which apply for corporation tax as well as CGT) is a factor which encourages companies to leave the UK for Ireland, Switzerland or elsewhere.<sup>62</sup>

---

59 TLRC discussion paper 7, “Countering Tax Avoidance in the UK” (2009), <http://www.ifs.org.uk/comms/dp7.pdf> (Footnotes omitted).

60 The material, updated, is now in IFS, “HMRC’s Discretion: The Application of the Ultra Vires Rule and the Legitimate Expectation Doctrine” (2014) <http://www.ifs.org.uk/publications/7475> But this is a developing area, and the starting point should now be *Samarkand v HMRC* [2017] EWCA Civ 77.

61 “Template” is a metaphor which may mean little or much. It might mean that the examples cannot be relied on for deciding whether a loss is caught by the TAAR. (In that case one might wonder what is their purpose.) Or it might mean that special circumstances may alter the position so the example is not directly applicable; that seems unobjectionable, indeed self-evident.

62 Freedman et al, “Alternative Approaches to Tax Risk and Tax Avoidance: analysis of a face-to-face corporate survey” (2008) [ideas.repec.org/p/btx/wpaper/0814.html](http://ideas.repec.org/p/btx/wpaper/0814.html): “A majority of ... respondents expressed exasperation with the complexity and unpredictability of current anti-avoidance rules, all but one asserting that this was a phenomenon hindering the competitiveness of the UK economy.” Brexit issues are likely to put the loss-TAAR uncertainty issue, with countless others, onto the back shelf, because of its higher salience and importance.

Nevertheless, HMRC regard the provision as “successful”<sup>63</sup> (which if the only measure of success is preventing avoidance must be correct). So the current position will continue until HMRC change their view that anti-avoidance is a priority that trumps other policy considerations such as certainty and the Rule of Law.

When lobbying against or critiquing what was (in 2007) perceived as the striking vagueness and uncertainty of the capital loss-TAAR, practitioners did not foresee that this would become a standard form, routinely included in countless new TAARs.<sup>64</sup> But there it is.

## 61.24 DT relief on gain + loss

The International Manual provides:

### **INTM153150 - Description of double taxation agreements:**

#### **Capital gains** [Jul 2018]

...CSTD Business, Assets & International, Tax Treaty Team would like to see any case where an individual claims relief for capital losses in circumstances where a corresponding gain would be exempt from UK tax under the terms of a double taxation agreement. In the case of companies such losses are not allowable by virtue of TCGA92/S8(2).<sup>65</sup>

It is easy to think of cases where losses would be allowable but gains exempt; however in practice it will not often matter.

## CHAPTER SIXTY TWO

# LIFE POLICIES AND CONTRACTS

62.1 protected-trust relief  
62.10.4 s.720 remittance basis/

### *Cross references*

The following topics are considered elsewhere:

- 10.19 (TNR: life policies)
- 96.1 (Statutory tax indemnity)
- 97.23 (Insurance policy)
- 98.15 (Insurance policy)

The taxation of policies held by UK resident companies is not discussed.

## 62.1 Policies: Introduction

This chapter considers:

- (1) life insurance policies
- (2) life annuity contracts
- (3) capital redemption policies

ITTOIA refers to these as “policies and contracts”. I abbreviate that to “**policies**”. In the insurance industry the asset is often described as a bond; statute adopts that term in the expressions “personal portfolio bond” and “guaranteed income bond”. I prefer not to use the word “bond” since it is also used to describe debentures and indeed strictly includes any obligation undertaken by deed; but no difficulty arises as long as the meaning is clear.

Policies fall within Chapter 9 Part 4 ITTOIA, sometimes called the “chargeable event” regime. This contains almost 100 sections: it is the longest chapter in ITTOIA. The reader will not be surprised if I say that a full discussion needs a long book to itself. This chapter focuses on matters closest to the themes of this work.

One can effectively opt into the chargeable event regime by framing an investment as a capital redemption policy, or a life policy (which need have only a nominal element of life insurance); and this is common practice.

### 62.1.1 *Navigation*

The layout of the provisions is as follows:

<b>Topic</b>	<b>ITTOIA sections</b>
Charge to tax	461 - 463
Person liable	464 - 472
Policies within Chap 9	473 - 483
Chargeable events	484 - 490
Calculating gains	491 - 497
Part surrenders; excess events	498 - 509
Transaction-related calculations	510 - 514
Personal portfolio bonds	515 - 526

## 62.2 **Definitions**

### 62.2.1 *“Policy”*

The IPT Manual provides:

**1115 Fundamental Concepts: what is a life policy** [Jun 2016]

The word policy in connection with insurance has a long history. It is the formal document in which an insurer (that is, insurance company or friendly society) sets out the terms of its obligations in consideration of the stipulated premiums. For an insurance contract to be made, or varied, between an insurer and policyholder requires the completion of the standard contract law offer and acceptance. There is no practical distinction between contract and policy; the latter simply evidences the former. Lord Donaldson confirmed this in the judgment referred to at IPTM1110 [*Scher v Policyholders Protection Bond* [1994] 2 AC 57.]

### 62.2.2 *“Life insurance”*

The definition of life insurance<sup>1</sup> needs a chapter to itself. IPT Manual provides:

**1115. What is a life policy?** [Jun 2016]

According to the 1774 Life Assurance Act, a policy of life insurance is an insurance policy on life. There is no further definition in the Taxes Acts. If a policy pays benefits on the death of an individual, either whenever it happens, or within a specified term, then it is potentially within the scope of the chargeable event legislation.

It is not relevant for tax purposes that such a policy may also provide insurance against other risks, such as disability and critical illness, although that might affect its regulatory or accounting treatment.

Funeral plan contracts where a customer pays a sum to a funeral provider to provide a funeral in due course are not contracts of insurance, although similar arrangements if made with an insurer as a whole of life policy are, according to the regulatory rules of the Financial Services Authority.<sup>2</sup>

62.2.3 “*Capital redemption policy*”

Section 473(2) ITTOIA provides:

In this Chapter—

“capital redemption policy” means a contract made in the course of a capital redemption business, within the meaning given by section 56(3) of FA 2012.

The definition is only for the purpose of Chapter 9 Part 4 ITTOIA (the

1 A note on terminology. The General Insurance Manual provides:

**“1060. Legal basis of insurance: Indemnity** [Jun 2016]

It used to be said that there was a distinction between

[1] insurance, meaning insurance against a financial loss, and

[2] assurance, meaning the assurance of a fixed or minimum sum upon the occurrence of a specified event that is bound to occur.

The text of the [Policies of Assurance] Act 1601, however, shows that the term “assurance” was applied to what is manifestly indemnity insurance. More recently the distinction has faded further under the influence of the EU, where the official English texts of the relevant Directives consistently use the term “life insurance”. For most practical purposes therefore insurance and assurance can be treated as interchangeable terms. In tax legislation, however, the term “assurance” is usually confined to life business.

2 There is also an interesting discussion in the General Insurance Manual [January 2009] para 1010, not set out here for reasons of space, and in part 7 of the Law Commission paper “Insurable Interest” (2008).

“chargeable event” regime) but it is applied by reference elsewhere.<sup>3</sup>  
That takes us to s.56(3) FA 2012 which provides:

- Business is “capital redemption business” if it consists of
- [a] the effecting on the basis of actuarial calculations, and the carrying out, of contracts
  - [b] under which, in return for one or more fixed payments, a sum of a specified amount (or a series of sums of a specified amount) become payable at a future time or over a period.

IPT Manual provides:

**1120. What is a capital redemption policy?** [Nov 2018]

Capital redemption policies, though issued by insurance companies, are not strictly speaking insurance products. They were once known as investment bond contracts, which is more descriptive but needs to be distinguished from the type of life policy investment bond described at IPTM1100. Under capital redemption policies, one or more fixed sums is paid to an insurer under a contract pursuant to which one or more specified amounts is paid out at some later time or times, on the basis of an actuarial calculation. Typically the contracts take the form of

- an annuity certain, where a capital sum is used to buy an annuity for a fixed term not contingent on life, see IPTM4200,<sup>4</sup> or
- a sinking fund where regular sums are paid in to secure a capital sum at some later date, for example against the need to find a premium payment to renew a lease.

The statutory definition of capital redemption business is at [s.56 FA 2012]. Contracts within such business are long term insurance business but not life business. A capital redemption policy that creates a debtor/creditor relationship, with an agreement to return the sum advanced, is known as a capital redemption bond and is similar in nature to a relevant or deeply discounted security, see SAIM3000. However, such bonds, which may only be sold by an insurer, are removed from the scope of the deeply discounted securities income tax charge of Section 427 ITTOIA onwards.<sup>5</sup> ...

---

3 Eg s.432(3) ITTOIA (DDS code).

4 See 37.17.3 (“Annuity certain”).

5 See too the explanatory notes to the draft legislation published in the Pre-Budget Report, 5 December 2005:

15. A capital redemption policy is a contract, issued by an insurer, which is made in the course of capital redemption business. Under a capital redemption policy, for consideration of a sum or sums of money, the issuer of the policy guarantees to pay out a larger sum on a specified future date or to make a series of payments. Payment is independent of any contingency linked to human life.

Examples of such contracts include—

#### 62.2.4 “Life annuity”

Section 473(2) ITTOIA provides:

In this Chapter... “life annuity” means—

- (a) an annuity that—
  - (i) is a purchased life annuity for the purposes of Chapter 7 of this Part (see section 423),<sup>6</sup> and
  - (ii) is not specified in section 718 (annuities excluded from the exemption for part of purchased life annuity payments under section 717)

Section 718 ITTOIA provides the list of exceptions:

- (2) The annuities are—
  - (a) an annuity the whole or part of the consideration for which consisted of sums satisfying the conditions for relief under section 266 of ICTA (life assurance premiums),
  - (b) an annuity purchased following a direction in a will, and
  - (c) an annuity purchased to provide for an annuity payable as a result of a will or settlement out of income of property disposed of by the will or settlement.
- (3) For the purposes of subsection (2)(c), it does not matter whether or not capital could also be used to pay the annuity.

#### 62.2.5 “Surrender”

In this chapter:

“**A full surrender**” is a surrender of all the rights under the policy.

“**A part-surrender**” is a surrender of part of the rights under the policy.

Section 500 ITTOIA provides:

The following events are treated for the purposes of this Chapter as a surrender of a part of the rights under the policy or contract in

- 
- an annuity certain - an annuity payable for a set period not contingent upon the survival of a life,
  - a leasehold redemption policy - which builds up a fund to be used in some way on the expiry of a lease, and
  - a sinking fund policy - this accumulates a fund for the eventual replacement of a wasting asset.

6 See 37.17.2 (“Purchased life annuity”).

question—

- (a) the falling due of a sum payable as a result of a right under a policy or contract to participate in profits where further rights remain under it,
- (b) in the case of a contract for a life annuity which provides for a capital sum to be taken as an alternative in part to the annuity payments, taking the capital sum,
- (c) the making of a loan to which section 501 applies, and
- (d) the making of a payment to which section 504 applies (payments by insurers under guaranteed income bonds etc.).

Para (c)(d) (loans and guaranteed income bonds) are specialist topics and not discussed here.

### 62.2.6 “Insurance year”

Section 499(1) ITTOIA provides:

In this Chapter “insurance year”, in relation to a policy or contract, means the 12 months beginning with—

- (a) the date on which the insurance or contract is made, or
- (b) any anniversary of that date.

Special rules apply on the termination of a policy:

- (3) An event referred to in section 484(1)(a)(i) or (iii) or (b) to (e)<sup>7</sup> ... is treated as ending the insurance year in which it occurs.
- (4) In this Chapter “final insurance year” means an insurance year that is ended as a result of subsection (3).
- (5) But if, as a result of subsection (3), an insurance year would begin and end in the same tax year—
  - (a) that insurance year and the previous insurance year are treated as one insurance year, and
  - (b) “final insurance year” needs to be read accordingly.

The IPT Manual provides:

**IPTM3505 Chargeable events: calculating gains: ‘insurance year’**  
[Jun 2016]

‘Insurance year’ - sometimes called policy year - begins on the day a policy is taken out and on the same date in subsequent years. It ends on

---

<sup>7</sup> This is a terminal event: see 62.3.3 (Types of chargeable event).

the day before the anniversary of the start date and each subsequent year.

For example, a policy taken out on 1 June 2004 has an 'insurance year' ending on 31 May 2005. A part surrender giving rise to an 'excess event' taking place on 1 April 2005 would fall in tax year 2004-05. But the gain on the 'excess event' would be treated as arising at the end of the 'insurance year', on 31 May 2005, and consequently would be assessable for tax year 2005-6.

If an event brings a policy or contract to an end - full surrender of rights, death, maturity or taking a capital sum as a complete alternative to annuity payments - the 'insurance year' is treated as ended on that date. It is then referred to as the 'final insurance year'.

If that rule would result in an 'insurance year' beginning and ending within the same tax year, then the 'final insurance year' is extended to include the previous 'insurance year'.

For example, if there is an 'insurance year' running from 1 June 2004 to 31 May 2005 and the policy is fully surrendered on 30 June 2005, the 'final insurance year' runs from 1 June 2004 to 30 June 2005.

The extended period of a 'final insurance year', coupled with the requirement on the insurer to issue a chargeable event certificate broadly within three months of the event, may result in the issue of a certificate for an event that turns out not to be chargeable. This may happen where the event is swept up in a calculation for a terminal event that brings the 'final insurance year' to an end, see IPTM3570. In this case the insurer should notify the policyholder that the earlier certificate should be disregarded - see IPTM7210.

### 62.2.7 *Rights, parts and shares*

Section 464(3) ITTOIA provides:

If there has been a surrender or assignment of only a part of or share in rights under the policy or contract, the references in this section and those sections to the rights are references to that part or share.<sup>8</sup>

EN ITTOIA comments:

417. *Subsection (3)* provides that references in sections 464 to 467 to a surrender or assignment of rights refer, where appropriate, to a surrender

---

<sup>8</sup> This is repeated in s.468(6) ITTOIA. (If s.464(3) had ITTOIA-wide application this would have been unnecessary.)

or assignment of a part of, or share of, the rights. A *part* of the rights means one or more discrete rights provided by the policy or contract. A *share* in the rights means part of the ownership, where there are multiple owners, of such a discrete right or rights or of all the rights in the policy or contract.

### 62.3 The charge

The charge is in s.461(1) ITTOIA:

Income tax is charged on gains treated as arising<sup>9</sup> from policies and contracts to which this Chapter applies.

Section 463(1) ITTOIA provides:

Tax is charged under this Chapter on the amount of the gains arising in the tax year.

#### 62.3.1 *Policies within charge*

This takes us to s.473(1) ITTOIA:

This Chapter applies to—  
 (a) policies of life insurance,  
 (b) contracts for life annuities, and  
 (c) capital redemption policies.

Sections 478–483 ITTOIA (not discussed here) specify various types of policies to which the provisions do not apply.

#### 62.3.2 *When gains arise*

The time that the gain arises is particularly important for a beneficiary who becomes or ceases to be UK resident, as a gain arising to a non-resident (or in the overseas part of a split year) is not taxable.

Section 462(1) ITTOIA provides:

For the purposes of this Chapter, a gain from a policy or contract arises

---

9 The general usage of tax legislation is that chargeable gains “accrue” but income “arises”. In the chargeable events legislation, gains are regarded as income and so the word used is “arise”. There is no difference in meaning.

In the chargeable events legislation, gains are sometimes said to “arise” and sometimes “treated as arising”. Again, there is no difference in meaning.

when a chargeable event occurs in relation to the policy or contract (see section 484).

For full surrenders the chargeable event occurs, and the gain arises, at the time of the surrender.

For part-surrenders the event occurs, and the gain arises, at the end of the insurance year<sup>10</sup> for the policy concerned. The reason is perhaps so that only one chargeable event computation is needed, even if there are several part-surrenders during the year.

### 62.3.3 Types of chargeable event

“Chargeable event” is a label which brings in a complex set of rules. Section 484(1) ITTOIA sets out the starting point:

**Chargeable event: text of s.484**

The following are chargeable events—

	<b>Type</b>
(a) in the case of any kind of policy or contract—	
(i) the surrender of all rights under the policy or contract,	Terminal Event
(ii) the assignment of all those rights for money or money’s worth,	
(iii) the falling due of a sum payable as a result of a right under a policy or contract to participate in profits, if there are no remaining rights under it	
(iv) a chargeable event treated as occurring under section 509(1) (chargeable events in certain cases where periodic calculations show gains),	Calculation Event
(v) a surrender or assignment treated as a chargeable event under section 514(1) (chargeable events where transaction-related calculations show gains), and	
(vi) a chargeable event treated as occurring under section 525(2) (chargeable events where annual personal portfolio bond calculations show gains)	
(b) in the case of a policy of life insurance, a death giving rise to benefits under it,	
(c) in the case of a policy of life insurance or a capital	

<sup>10</sup> See 62.2.6 (“Insurance year”).

- |  |                |
|--|----------------|
| redemption policy, its maturity,   |                |
| (d) in the case of a contract for a life annuity which provides for the payment of a capital sum on death, the death, and  | Terminal Event |
| (e) in the case of a contract for a life annuity which provides for a capital sum to be taken as a complete alternative to the annuity payments (or any further annuity payments), taking the capital sum. |                |

Thus there are ten types of chargeable event. They fall into two categories:

(1) **Calculation events:** s.491(4) ITTOIA provides the terminology:

- In this Chapter—  
 “calculation event” means  
 [a] an excess event,  
 [b] a part surrender or assignment event or  
 [c] a personal portfolio bond event

Thus there are three types of calculation event: Section 491(4) then defines these three types:

- [a] “excess event” means a chargeable event within section 509(1),  
 [b] “part surrender or assignment event” means a chargeable event within section 514(1), and  
 [c] “personal portfolio bond event” means a chargeable event within section 525(2).

The terminology of [a] is opaque, and [b] is misleading, but it is hard to think of better labels for the tortuous statutory rules. Calculation events are therefore within s.484(1)(a)(iv), (v) or (vi).

- (2) Other events: that is, chargeable events other than calculation events. Statute calls these “**terminal events**”.<sup>11</sup> Terminal events are those within s.484(1)(a)(i)-(iii) and (b)-(e), in short:  
 (a)(i) full surrender  
 (a)(ii) full assignment  
 (a)(iii), (e) final payment  
 (b)(d) death giving rise to benefits  
 (c) maturity

---

11 This convenient term was introduced in s.465B ITTOIA.

Logically there should be two stages, first to ascertain whether there is a chargeable event and secondly to compute the gain. But in the three calculation event cases the two stages overlap, because the question of whether there is a chargeable event depends on whether there is a gain.

It should be noted that an assignment for no consideration is not a chargeable event. This is the opposite of the CGT position.

Sections 484-489 ITTOIA contain exemptions. These are not discussed here, but s.487 is important because it contains an exemption for inter-spouse transfers (based on the CGT spouse exemption).

#### 62.3.4 Computation of gains

The computation of gains is complex and artificial, and sometimes bears no relation to the commercial gain. *Mayes v HMRC* noted:

This is legislation which does not seek to tax real or commercial gains.<sup>12</sup>

The rules are not the same as the computation of gains for CGT purposes, so one must take care not to confuse:

- (1) chargeable gains (the CGT term) and
- (2) gains under the chargeable events legislation

It is confusing that the legislation calls them both “gains”. The term “**chargeable-event gains**” is used when one needs to distinguish the two types of gains.<sup>13</sup>

There are five different methods of computation for different types of chargeable event. The computation rules are not discussed here.

SA904(Notes) (Notes on Trust and Estate Foreign, 2018/19) comments on how to compute foreign currency gains:

Calculate gains on foreign life insurance policies, life annuities and capital redemption policies in the currency in which the policy or life annuity is denominated. Then convert the gain into sterling at the rate of exchange applicable at the time of the chargeable event (which may not

---

<sup>12</sup> *Mayes v HMRC* [2011] STC 1267 at [60].

<sup>13</sup> The term is occasionally used in statute, eg in a heading in sch 45 FA 2013 (“New special rule: chargeable event gains”).

be at the time the transaction occurred).<sup>14</sup>

This is different from method of computation of chargeable gains. In cases where the CGT method suits the taxpayer, it might well be questioned.

### 62.3.5 *Partial surrender trap*

The provisions are sometimes very crude and partial surrender is a particular trap.

In practice, properly advised taxpayers avoid the problem by taking out a cluster of separate policies, instead of one single policy, and making a full surrender of some of them when they want. So the problem tends to affect those who come to the UK, who have taken out a policy when non-UK resident and without considering the tax issues.

HMRC now have a discretion to recalculate the gain where the statutory computation gives a figure which is wholly disproportionate,<sup>15</sup> though well

---

14 Similarly, the IPT Manual provides:

**9220 Calculation of gains and other amounts for policies in foreign currencies**  
[Jun 2016]

Where a tax representative or insurer reports a gain in sterling, it should compute the gain by calculating the amount of the chargeable event gain in the currency in which the policy is denominated and then convert it into sterling at the conversion rate on the date of the event. This method ensures that currency fluctuations during the life of the policy are disregarded.

Where a tax representative or insurer reports other amounts in sterling, for instance the premiums paid where there has been an assignment, they should be translated at the rate applying on the date of the chargeable event.

Similarly, IPT Manual:

**3700 Foreign policies: differences in treatment** [Dec 2017]

... Some policies are denominated in a foreign currency. In such cases, any chargeable event gain should be computed in the foreign currency and then converted to sterling at the rate that applies at the date of the chargeable event. This method should be adopted rather than any other method such as converting each transaction to sterling at the rate applying on the date the transaction occurred.

For instance, if premium of €10,000 was paid into a policy on 10 May 2002 and the policy was surrendered for €12,500 on 3 January 2005, the chargeable event gain on the surrender is €2,500. This should then be converted to sterling at the conversion rate applying on 3 January 2005 to arrive at the amount of taxable gain.

15 See s. 507A, 512A, ITTOIA, enacted after the *cause célèbre* of *Lobler v HMRC* [2013] UKFTT 141 (TC) which is discussed at 2.5 (Attitudes to tax avoidance).

advised taxpayers would not want to rely on that.

## **62.4 Individuals and settlors**

Once one has identified a chargeable event, and computed the chargeable-event gain, the next stage is to ascertain the person liable for the charge.

Section 464 ITTOIA provides an introduction:

- (1) The person liable for any tax charged under this Chapter is the person indicated by—  
section 465 (person liable: individuals),  
section 466 (person liable: personal representatives), and  
section 467 (person liable: UK resident trustees),  
according to how the rights under the policy or contract are owned or held immediately before the chargeable event in question occurs.
- (2) References in those sections to the ownership or holding of those rights are references to their ownership or holding at that time.

Section 465(1) ITTOIA provides:

An individual is liable for tax under this Chapter if

- [a] the individual is UK resident for the tax year in which the gain arises  
and
- [b] condition A, B or C is met.

I call these conditions “**individual bond conditions A to C**”.

### *62.4.1 Individual beneficial owner*

Section 465(2) ITTOIA provides:

Condition A is that the individual beneficially owns the rights under the policy or contract in question.

Individual bond condition A – gain charged on individual if they are beneficial owner – is natural and sensible.

Sections 469–471 ITTOIA deal with joint ownership.

### *62.4.2 Individual is settlor*

Section 465(3) ITTOIA provides:

Condition B is that those rights are held on non-charitable trusts which the individual created.

There are two strange features about individual bond condition B, where a policy or contract is held in trust. First, it does not refer to the “settlor”, which is the normal tax and trust term, but to trusts “created” by a person. In practice, the settlor will usually be the creator.<sup>16</sup> I use the term “creator (settlor)”.

Secondly the creator (settlor) is charged on the chargeable-event gain arising to their trust regardless of the identity of the beneficiaries. The individual has an indemnity against the trustees<sup>17</sup> so ultimately it is the beneficiaries who bear the burden of the charge, but they do so at the creator (settlor)’s marginal rates. At first sight this seems surprising: the approach more commonly adopted in taxation is only to charge the settlor in the case of settlor-interested trusts, ie if the settlor or (more or less) closely connected persons are beneficiaries. However:

- (1) One approach is not necessarily better than the other.<sup>18</sup>
- (2) The approach adopted for policies may favour the taxpayer, because chargeable-event gains may otherwise be taxed at the trust rate, ie the top rate; so in a very rough and ready way the rule can mitigate the unfairness of taxing trusts at the trust rate, whose beneficiaries may be lower taxpayers.

Section 545 ITTOIA provides a commonsense definition of a “trust”:

“non-charitable trust” means a trust other than a charitable trust.

What if X creates a bare trust for the benefit of Y, and the trust holds a policy on which a gain arises? Condition A is satisfied, so Y is taxed on the gain: condition A refers to beneficial ownership. At first sight, condition B is also satisfied! “Trust” is not defined; the usual tax term is “settlement” or “settled property” (which excludes a bare trust). However the two conditions cannot both be satisfied, and the context shows that

---

16 The reason for the non-standard term was, possibly, (1) to avoid the rule that a “settlor” must have provided an element of bounty or (2) a concern that a company may not be a “settlor”; see 94.39 (Pension/employee benefit trust), or (most likely) (3) a rough and ready way to deal with the two-settlor situation. That is, if A created a trust and B added property, A alone was the creator and was formerly subject to tax on the whole of the gain. But s.472 ITTOIA now provides a more sensible rule in this case.

17 See 96.1 (Statutory tax indemnity).

18 See App ? (Definitions of settlor-interested).

condition B is not intended to be satisfied. Bare trusts are invariably transparent for tax purposes. So a bare trust does not count as a trust for this purpose and “trust” has the same meaning as the usual tax term “settlement”. HMRC agree. The IPT Manual provides:

**IPTM3250 Person liable to charge: summary of the position in relation to trusts** [Jun 2016]

**... Rights held on a bare trust - beneficiary chargeable**

Here the beneficiary is absolutely entitled as against the trustee and the rights are vested in the beneficiary as beneficial owner. The bare trust is ignored and the beneficiary is chargeable by virtue of ITTOIA05/S465 (2). This applies equally where the beneficiary is a minor...

Section 472 ITTOIA deals with trusts with two or more settlors.

The IPT Manual discusses the meaning of “creator”:

**IPTM3250 Person liable to charge: summary of the position in relation to trusts** [Jun 2016]

... ‘Settlor’ or ‘creator’ of a trust has a wide meaning and includes any person who settles property on the trust. So, for instance, where a person pays sums to the trustees to use as current or future premiums for a policy held in the trust, that person is a creator of the trust.

**IPTM3290 Person chargeable: multiple interests: trusts created by more than one person** [Jun 2016]

... If property is contributed by different persons at different times, for instance where property is added to an existing settlement, each is treated as a creator in relation to the trust and consequently as a sole settlor.

The share is taken to be the same as the proportion of property contributed by the creator to the trust as it stands immediately before the chargeable event. Property is contributed for this purpose if it originates from the creator, meaning provided directly or indirectly by that person, unless under reciprocal arrangements with another person. A just and reasonable apportionment may be made where necessary.

I would have said that if A creates a trust, and B adds property to it, A alone is the “creator”;<sup>19</sup> but the issue will not often arise.

---

19 See too 75.3 (One IHT-settlement or more).

### 62.4.3 *Debt charged on policy*

Section 465(4) ITTOIA provides:

Condition C is that those rights are held as security for the individual's debt.

Individual bond condition C – gain charged on individual if held as security for the individual's debt – is a rough and ready solution to the problem of imposing the tax charge where the economic ownership lies. CGT has the opposite rule: s.26 TCGA.

### 62.4.4 *Gains of non-resident*

The charge only applies “if the individual is UK resident for the tax year in which the gain arises”: s.465(1) ITTOIA.

### 62.4.5 *Gains of split year*

Section 465(1A) ITTOIA provides the usual split-year rule:

But if the tax year is a split year as respects the individual, the individual is not liable for tax under this Chapter in respect of gains arising in the overseas part of that year (subject to section 465B).<sup>20</sup>

## 62.5 **No remittance basis**

Section 465(5) ITTOIA provides:

For the purposes of calculating the total income of an individual liable for tax under this Chapter, the amount charged is treated as income.

The drafting technique is that the gain is added to the individual's “total income”. The gain is taxed on an arising basis. The remittance basis does not apply even if the individual is a remittance basis taxpayer and the gain arises from an offshore policy.

It follows that a policy or contract which will give rise to a gain under the chargeable event provisions is not a suitable form of investment for:

- (1) an individual who is a remittance basis taxpayer or
- (2) a trust whose creator (settlor) is a remittance basis taxpayer<sup>21</sup>

---

<sup>20</sup> The exception in brackets refers to the TNR rules: see 10.19 (TNR: life policies).

<sup>21</sup> But it may be suitable if held by a non-resident company held by the trust: see below.

unless the individual expects to be non-resident in the year that the chargeable-event gain arises. If the individual has no short or medium term intention of realising a gain (ie the policy is a long term investment) then the tax disadvantage may be set against the practical convenience of the policy.

The RDR Manual correctly provides:

**33540 Identifying Remittances: Chargeable Event gains** [Jan 2019]

... Gains arising on a chargeable event, for example, the surrender of all rights under a policy of life insurance are chargeable to tax on the arising basis regardless of whether the policyholder is domiciled in the UK or not. The remittance basis does not apply.

...

**Withdrawals in excess of 5% or full surrenders**

If the individual withdraws more than 5% of accumulated premiums then, the amount in excess of 5% or the actual gain if a full surrender, will be chargeable to income tax under the chargeable event legislation. It is charged on the arising basis whether it is remitted or not.

### 62.5.1 *Remittance basis: Critique*

This is at first sight a surprising inconsistency with the general scheme of taxation for foreign domiciliaries.

For completeness: some might suggest the following justification for taxing chargeable-event gains on an arising basis. A remittance basis taxpayer may take out a foreign policy, whose value is linked to a UK asset held by the life insurance company.<sup>22</sup> If the chargeable-event gain was taxed on the remittance basis, then use of a policy “wrapper” would allow what is in economic terms UK source income or gains to be taxed on a remittance basis. I doubt if that is the historical reason for the rule, which is probably due to oversight. However that may be, this possibility does not justify the rule. It is suggested that gains on foreign policies should be taxed on the remittance basis. The problem does not even call for a targeted anti-avoidance, for the planning which only amounts to deferral, and turns capital into income should be regarded as unobjectionable; deferral is in any case available in a number of different ways.

---

22 For an example, see *Foulser v MacDougall* [2007] STC 973.

Long-term residents who pay the remittance basis charge and who have acquired foreign policies may well feel short-changed, though if the figures are large enough, there may be some scope for planning. As with most anomalies, the rule should not affect the well-advised.

### 62.5.2 *Premium unremitted income/gain*

The RDR Manual provides:

#### **33540 Chargeable Event gains** [Jan 2019]

...Under a special rule (ITTOIA05/s507) policyholders are able to make partial surrenders or assignments of broadly up to 5% of accumulated premiums with any tax charge postponed until maturity or other later realisation. This is known as the ‘5% deferral rule’ or the ‘excess rule’. When the policy comes to an end any earlier withdrawals are taken into account in calculating the end gain.

However when considering the position of a remittance basis user you will need to consider what income or gains they used to pay the premium due under the contract or policy. Where an individual purchases an overseas life insurance, or other income-generating, policy and subsequently part of that policy is surrendered for a cash payment and that money is brought to the UK, such payments will be treated as taxable remittances to the extent that the purchase of the original premium was made with the individual’s untaxed foreign income and gains that would have been taxed on the remittance basis if remitted to the UK.

So if the premium was paid using the individual’s foreign income or foreign gains that were untaxed when they arose, because the individual was a remittance basis user in that year, then any of the 5% withdrawal will be a taxable remittance if the money is brought to, or received or used in, the UK. The amount attributable to the ‘5% withdrawal’ indirectly derives from the original premium paid, so Conditions A and B of s809L apply. ...

For mixed fund issues where a policy is bought out of foreign income/gains, see 19.3.7 (Finding income/capital for year).

## **62.6 Non-UK period relief**

Section 528 ITTOIA provides relief for the individual who is UK resident in the year that the gain arises (so they are within the charge) but who has formerly been non-resident. I refer to this as “**non-UK period relief**”.

The development of the current law can be traced from a Consultation document *Life Insurance - Time Apportioned Reductions* (2012).

EN FB 2013 summarises the 2013 changes:

Current [pre-2013] rules only provide for time apportioned reductions where a life insurance policy has been issued by a foreign insurer. Time apportioned reductions will be extended to life insurance policies issued by UK insurers.

Time apportioned reductions will be calculated by reference to the residence history of the person liable to income tax on the gains and not by reference to the residence history of the legal owner of the policy.

### 62.6.1 *Pre/post-2013 rules*

FA 2013 contains 2 sets of amendments:

- (1) Para 3 sch 8:
  - (a) deleted the former s.528, 529 ITTOIA (“pre-2013 provisions”) and
  - (b) inserted new s.528, 528A ITTOIA (“post-2013 provisions”)
- (2) Confusingly, para 87 sch 45 then amended the new s.528, 528A which the same act had just introduced. The significance of that, I think, is to preserve the pre-SLT residence rules where it is necessary to ascertain residence in years before the SLT.

Para 7 sch 8 FA 2013 deals with the transitional rules. Para 7(1) provides:

- (1) The amendments made by this Schedule have effect in relation to—
  - (a) any policy of life insurance issued in respect of an insurance made on or after 6 April 2013, or
  - (b) any contract constituting a capital redemption policy made on or after that date.

The starting point is that:

- (1) The post-2013 provisions apply to post-2013 policies
- (2) The pre-2013 provisions will continue to be relevant for a generation.

Para 7 sch 8 FA 2013 provides:

- (2) The amendment made by paragraph 3 above has effect in relation

to any insurance or contract made<sup>23</sup> before 6 April 2013 if on or after that date—

- (a) the policy or contract is varied with the result that there is an increase in the benefits secured,
- (b) there is or was an assignment (or assignation) of rights, or a share of the rights, conferred by the policy or contract (whether or not for money's worth) to the individual or deceased, or
- (c) some or all of the rights conferred by the policy or contract become or became held as a security for a debt of the individual or deceased,

and the other amendments made by this Schedule have effect in relation to the insurance or contract accordingly.

(3) For the purposes of sub-paragraph (2)(a) an exercise of rights conferred by a policy or contract is to count as a variation of the policy or contract.

If the post-2013 regime is advantageous, it is possible to bring a pre-2013 policy into the new regime. But if the pre-2013 regime is better, it is necessary to take some care to preserve it.

### 62.6.2 *Non-UK period relief: New law*

Post-2013(1) s.528 ITTOIA provides:

Subsection (2) applies if—

- (a) an individual is liable for tax charged on a gain from a policy of life insurance or a capital redemption policy, and
- (b) there are one or more days in the material interest period that are foreign days.

### 62.6.3 *Relief for appropriate fraction*

Post-2013 s.528 ITTOIA provides:

---

<sup>23</sup> Para 7(4) sch 8 FA 2013 provides: “In the case of a policy or contract treated under section 473A of ITTOIA 2005 as a single policy or contract, for the purposes of sub-paragraphs (1) and (2) the date on which the insurance or contract is made is the date on which, as the case may be—

- (a) the first insurance is made in respect of which the connected policies are issued, or
- (b) the first of the connected contracts is made.”

(2) In determining the individual's liability for tax, the gain<sup>24</sup> on which the tax is charged in the case of the individual is to be reduced by the appropriate fraction.

(3) The appropriate fraction is  $A / B$   
where—

A is the number of days in the material interest period which are foreign days, and

B is the number of days in the material interest period.

The key terms are “foreign days” and “material interest period”.

#### 62.6.4 “Foreign days”

Post-2013 s.528(1A) ITTOIA provides:

“Foreign days” are—

- (a) days falling within any tax year for which the individual is not UK resident, and
- (b) days falling within the overseas part of any tax year that is a split year as respects the individual.

#### 62.6.5 “Material interest period”

Post-2013(5) s.528 ITTOIA provides:

In this section “the material interest period” means so much of the policy period as during which the individual meets condition A, B or C in section 465 in relation to the policy (subject to subsection (7)).

That is, in short, the individual is beneficial owner, settlor or mortgagee.<sup>25</sup>

#### 62.6.6 *Inter-spouse transfer*

Post-2013 s.528 ITTOIA provides:

(6) Subsections (7) and (8) apply if, before the chargeable event, there is an assignment falling within section 487(c) [inter-spouse transfer] in relation to the policy where the individual is the assignee.

(7) There is to be added to the material interest period any part of the

---

24 Section 528(4) ITTOIA provides: “In subsection (2) the reference to the gain is to be read in accordance with section 463A(4), 463D(4) or 463E(3) (which relates to restricted relief qualifying policies) if applicable.”

25 See 62.4 Individuals and settlors).

policy period falling before the assignment—

- (a) during which the assignor meets condition A, B or C in section 465 in relation to the policy, and
- (b) which is not included in the material interest period under subsection (5).

(8) In relation to any period added to the material interest period under subsection (7), in subsection (1A)(a) and (b) the reference to the individual is to be read as a reference to the assignor.

### 62.6.7 *Minor provisions*

Post-2013 s.528 ITTOIA provides:

(9) For the purposes of subsections (5) and (7), in section 465(2) to (4) references to the rights under the policy are to be read as including references to a share of those rights.

(10) In this section “the policy period” means the period for which the policy has run before the chargeable event occurs.

(11) If the policy is a policy of life insurance which is a new policy in relation to another policy, for the purposes of subsection (10) the new policy is to be taken to have run—

- (a) from the issue of the other policy, or
- (b) if it also was a new policy in relation to an earlier policy, from the issue of the earlier policy,

and so on; and in subsections (5) to (9) references to the policy are to be read accordingly as including any relevant earlier policy.

(12) In subsection (11) “new policy” has the meaning given in paragraph 17 of Schedule 15 to ICTA.

## 62.7 **Non-UK period relief: PRs/trustees**

Section 528A ITTOIA provides equivalent relief for PRs:

(1) Subsection (3) applies if—

- (a) personal representatives are liable for tax charged on a gain from a policy of life insurance or a capital redemption policy under section 466, and
- (b) there were one or more days in the material interest period that were foreign days.

Section 528A ITTOIA provides equivalent relief for trustees:

(2) Subsection (3) also applies if—

- (a) trustees are liable for tax charged on a gain from a policy of life insurance or a capital redemption policy under section 467 where—
  - (i) of conditions A to D in that section, only condition B is met, and
  - (ii) the absent settlor condition which is met is the one in subsection (4)(b) of that section (deceased settlor),
- (b) there were one or more days in the material interest period that were foreign days, and
- (c) the deceased died—
  - (i) in a tax year for which the deceased was UK resident but not one that was a split year as respects the deceased, or
  - (ii) in the UK part of a tax year that was a split year as respects the deceased.
- (2A) “Foreign days” are—
  - (a) days falling within any tax year for which the deceased was not UK resident, and
  - (b) days falling within the overseas part of any tax year that was a split year as respects the deceased.
- (3) In determining the liability for tax of the personal representatives or trustees, the gain on which the tax is charged in the case of the personal representatives or trustees is to be reduced by the appropriate fraction.
- (4) The appropriate fraction is—
$$A / B$$
where—
  - A is the number of days in the material interest period which [were foreign days, and
  - B is the number of days in the material interest period.
- (5) In subsection (3) the reference to the gain is to be read in accordance with section 463C(8) (which relates to restricted relief qualifying policies) if applicable.
- (6) In this section “the material interest period” means so much of the policy period falling before the deceased's death as during which the deceased met condition A, B or C in section 465 in relation to the policy (subject to subsection (8)).
- (7) Subsections (8) and (9) apply if, before the deceased's death, there was an assignment falling within section 487(c) in relation to the policy where the deceased was the assignee.
- (8) There is to be added to the material interest period any part of the policy period falling before the assignment—

- (a) during which the assignor met condition A, B or C in section 465 in relation to the policy, and
  - (b) which is not included in the material interest period under subsection (6).
- (9) In relation to any period added to the material interest period under subsection (8), in subsection (2A)(a) and (b) the reference to the deceased is to be read as a reference to the assignor.

Section 528A(10)-(13) is the equivalent of s.528 (9)-(12), and need not be set out again here.

## 62.8 Pre-2013 non-UK period relief

For pre-2013 policies the legislation is as follows. Pre-2013 s.528 ITTOIA provides:

- (1) The gain from a foreign policy of life insurance or foreign capital redemption policy is reduced for the purposes of this Chapter if the policy holder was not UK resident throughout the policy period.
  - (2) The amount of the reduction is the appropriate fraction of the gain.
  - (3) The appropriate fraction is  $A/B$  where—
    - A is the number of days on which the policy holder was not UK resident in the policy period, and
    - B is the number of days in that period.
- [ (4)(5)(6) are the equivalent of 528(10)(11)(12) in the post-2013 law ]
- (7) This section is subject to section 529.

Pre-2013 s.529 ITTOIA provides:

- (1) Section 528 does not apply if, when the chargeable event occurs or at any time during the policy period, the policy is or was held—
  - (a) by a non-UK resident trustee,
  - (b) by non-UK resident trustees,<sup>26</sup> or
  - (c) by a foreign institution.

## 62.9 Liability of UK trust

---

26 Para (b) is otiose, but it does not matter. Section 529(2) deals with a detail of trustee residence: "section 110 of FA 1989 (residence of trustees) applies for the purposes of subsection (1)(b) despite section 110(6) of that Act (which provides that it only applies for 1989-90 and subsequent tax years)."

If the creator (settlor) of the trust is alive and UK resident, they will be taxed on the gain.<sup>27</sup> Section 467 ITTOIA provides for the situations where the creator (settlor) is not taxable:

(1) Trustees are liable for tax under this Chapter if immediately before the chargeable event in question occurs they are UK resident and condition A, B, C or D is met.

I refer to “**trust policy conditions A, B, C or D**”. It is considered that these conditions must be satisfied immediately before the event, ie “immediately before” governs the phrase “they are UK resident” and “condition A, B, C or D is met”.

(1A) If trustees are liable for tax under this Chapter, the gain is treated for income tax purposes as income of the trustees.

The rate of tax is in principle 45%.<sup>28</sup>

An appointment to UK resident beneficiaries before the chargeable event may reduce the rate of tax and an appointment to non-resident beneficiaries may avoid tax altogether.

A trust migration may be effective if done before the chargeable event; it is not necessary to wait until the following tax year.

### 62.9.1 *Condition A: Charitable trust*

Section 467(2) ITTOIA provides

Condition A is that the rights under the policy or contract are held by the trustees on charitable trusts.

See Kessler, Wong & Birckbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 4.14 (Life policies/annuities) online version <https://www.taxationofcharities.co.uk>

### 62.9.2 *Condition B: Absent settlor*

Section 467 ITTOIA provides

(3) Condition B is that—

(a) those rights are held by the trustees on non-charitable trusts,

---

<sup>27</sup> See 62.4 (Individuals and settlors).

<sup>28</sup> Section 482 ITA type 7: see 38.2.3 (Trust-rate incomes).

and

(b) one or more of the absent settlor conditions is met.

(4) The absent settlor conditions are that the person who created the trusts—

(a) is non-UK resident,

(aa) is UK resident but the gain arises in the overseas part of a tax year that is, as respects the person who created the trusts, a split year,

(b) has died, or

(c) in the case of a company or foreign institution (see section 468(5)), has been dissolved or wound up or has otherwise come to an end.

### 62.9.3 *Conditions C and D*

Section 467 ITTOIA provides:

(5) Condition C is that—

(a) the rights under the policy or contract are held by the trustees on non-charitable trusts,

(b) condition B does not apply, and

(c) neither section 465 nor section 466 applies.

(6) Condition D is that the rights under the policy or contract are held as security for a debt owed by the trustees.

## 62.10 ToA: Chargeable-event gains

Non-resident trustees are outside the scope of the charge on a chargeable event because s.467(1) ITTOIA (which imposes the charge on trustees) applies only to UK-resident trustees.

A non-resident company is outside the scope of the charge under ITTOIA (which does not apply to companies). It is outside the scope of the charges in CTA 2009 (which only apply to corporation tax).<sup>29</sup>

In the absence of express provision, the chargeable-event gain would not fall within the ToA provisions because the receipt by the person abroad (assuming they are non-resident) is capital and not income or (more accurately) the chargeable-event gain is not income.<sup>30</sup> However, s.468 ITTOIA deals with this. It is helpful to consider trusts and companies

<sup>29</sup> This continues the position formerly governed by ESC C33.

<sup>30</sup> See 45.15 (Income of person abroad).

separately.

### 62.10.1 *Non-resident trust*

Section 468 ITTOIA provides:

(1) This section applies if a gain is treated as arising under this Chapter and ...

(a) trustees who are non-UK resident would be liable for tax in respect of the gain as a result of section 467 if the trustees were UK resident immediately before the chargeable event in question occurs, ...

(2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where a UK resident individual benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4).

(3) In a case within subsection (1)(a), Chapter 2 of Part 13 of ITA 2007 applies as if—

- (a) the gain were income becoming payable to the trustees, and
- (b) that income arose to the trustees in the tax year in which the gain arises. ...

This incorporates ss.720<sup>31</sup> and 731 ITA.

### 62.10.2 *Non-resident co/institution*

Section 468 ITTOIA provides (so far as relevant):

(1) This section applies if a gain is treated as arising under this Chapter and ...

(b) immediately before that event occurs—

- (i) a foreign institution<sup>32</sup> beneficially owns *a share* in the rights,
- (ii) the rights are held for the purposes of a foreign institution, or
- (iii) *a share* in them is held as security for a foreign institution's debt.

---

31 Section 720 ITA is not needed here because a transferor within s.720 would normally be taxed as the creator of the settlement, but the overlap does not matter. It is similar to the overlap of s.624 ITTOIA and s.720 ITA.

32 "Foreign" is defined in s.468(5) ITTOIA: "In this Chapter 'foreign institution' means a company or other institution resident or domiciled outside the UK."  
"Institution" is not defined.

(Emphasis added)

It is curious that (i) and (iii) refer to *shares* in rights. Contrast ss.465(2) and 467(2) ITTOIA.<sup>33</sup> On a traditional approach to statutory construction the (i) and (iii) do not apply if the foreign institution beneficially owns the *entire* policy. The gap is more or less filled by s.468(1)(b)(ii), as if a foreign company owns a policy, the rights are held for its purposes. If necessary a court might decide there was a slip in the drafting, which on a modern approach to construction could be corrected. Perhaps the drafting will be corrected some time.

Assuming s.468(1)(b) ITTOIA is satisfied, we read on:

- (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where a UK resident individual benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4). ...
- (4) In a case within subsection (1)(b), Chapter 2 of Part 13 of ITA 2007 applies as if—
- (a) the gain were income becoming payable to the institution, and
  - (b) that income arose to the institution in the tax year in which the gain arises.

Section 720 ITA is needed here, as the transferor would not otherwise be taxed on the gain.

### 62.10.3 *Transferors: Pre-2005 gain*

Suppose:

- (1) gains arose before 5 December 2005 to a foreign company or trust within s.731; the transferor was not subject to tax on those gains as they arose;<sup>34</sup> and
- (2) the *transferor* receives a benefit.

A transferor is outside the scope of s.731.<sup>35</sup> Under the pre-5 December 2005 law, I suggested that the transferor's s.731 defence would not apply when s.720 did not apply. Now that s.720 does apply, the transferor's defence should apply even to pre-5 December 2005 gains. This could be something of a windfall for transferors; but since unrealised gains were

---

33 See 62.4 (Individuals and settlors) and 62.9 (Liability of UK trust).

34 See the 4th edition of this work, para 20.5.

35 See 47.15 (Taxable-transferor defence).

brought within the s.720 charge from 5 December 2005, HMRC can hardly complain that realised gains now fall within the transferor's defence.

Following the restriction of the taxable-transferor defence in 2017, it is still possible to devise circumstances where this point arises, but in practice it would be very unusual.

#### 62.10.4 *s.720 remittance basis/protected-trust relief*

A chargeable-event gain does not qualify for the s.720 remittance basis, and does not qualify for s.720 protected-trust relief, because the gain does not meet the requirement that the income of the person abroad "would be relevant foreign income if it were the individual's".<sup>36</sup>

For the same reason, a benefit which relates to the gain does not qualify for the s.731 remittance basis.<sup>37</sup>

#### 62.10.5 *Income of life company*

So far we have considered the taxation of chargeable-event gains arising to non-resident trusts or companies which hold policies.

The payment to a non-resident life company (or a subsidiary of such a company) is in principle a transfer of assets within the ToA provisions. The ToA provisions would in principle apply if:

- (1) Income arising as a result of the payment can be identified (ie if the premium paid is segregated)<sup>38</sup>; and
- (2) the motive defence does not apply.

In a straightforward case, the application of the motive defence is well established: *IRC v Willoughby*.<sup>39</sup> If there were a tax avoidance purpose, however, the ToA provisions would in principle apply: the fact that a policy is taken out does not preclude the possibility of tax avoidance. As to whether this could lead to double taxation, see 48.10 (Life policies).

### **62.11 s.624: Chargeable-event gains**

Section 624 ITTOIA never applies to a chargeable-event gain. To see

---

36 See 46.20 (s.720 remittance basis).

37 See 47.39 (s.731 remittance basis).

38 See 45.9.5 (Transfer for issue of life policy).

39 70 TC 57.

why, it is helpful to distinguish:

- (1) UK resident settlor
- (2) Non-UK resident settlor:
  - (a) non-resident trustees
  - (b) UK resident trustees

Where the settlor is UK resident they are taxed on the gain under basic principles as a creator. Section 624 does not apply because the gain is not income of the trustees.

Where the settlor is non-resident and the trustees are non-resident, section 624 does not apply because the gain is not “income” and so it is not “income arising under a settlement”.

Where the trustees are UK resident, but the settlor is not resident, the gain is deemed to be income of the trustees. In these circumstances the s.624 non-resident settlor defence will apply.<sup>40</sup>

## 62.12 Personal representatives

Section 466 ITTOIA provides:

- (1) Personal representatives are liable for tax under this Chapter if
  - [a] the rights under the policy or contract are held by them and
  - [b] the condition in subsection (2) is met
 (and accordingly the gain is treated for income tax purposes as income of the personal representatives in that capacity).
- (2) The condition is that if an individual were liable for tax on a gain in respect of the policy or contract, section 530(1) (individual treated as having paid tax at the basic rate) would be disapplied as a result of—
  - (a) section 531(1) (exceptions from section 530 for policies and contracts specified in section 531(3)), or
  - (b) para 109(2) of Schedule 2 (contracts in accounting periods beginning before 1st January 1992).
- (3) For cases where the condition in subsection (2) is not met, see section 664 of this Act and [section 947 of CTA 2009] (under which the gain is treated as part of the aggregate income of the estate for the purposes of Chapter 6 of Part 5 of this Act and [Chapter 3 of Part 10 of

---

<sup>40</sup> That is, the gain is such that if the settlor were actually entitled thereto, they would not be chargeable to income tax by reason of being non-resident: see 44.9 (Non-resident settlor).

CTA 2009] respectively).

The condition in subsection (2)(b) is a transitional rule now of limited scope.

In order to understand the condition in subsection (2)(a) one needs to follow a trail of statutory provisions. First, ss.530 and 531 ITTOIA:

**530 Income tax treated as paid etc.**

(1) An individual or trustees who are liable for tax on an amount under this Chapter are treated as having paid income tax at the basic rate on that amount.

...

I refer to this as a “**s.530 tax credit**”.

**531 Exceptions to section 530**

(1) Section 530 does not apply to gains from the kinds of policies and contracts specified in subsection (3), except for the purposes of calculating relief under section 535 (top slicing relief).

(2) Subsection (1) is subject to—

section 532 (relief for policies and contracts with European Economic Area insurers), and

section 534 (regulations providing for relief in other cases where foreign tax chargeable).

(3) The policies and contracts are—

(a) a policy of life insurance issued or a contract for a life annuity made by a friendly society in the course of tax exempt life or endowment business<sup>41</sup>,

(b) a foreign policy of life insurance that does not meet conditions A and B,

(ba) a contract the effecting or carrying out of which constitutes protection business within the meaning of section 62 of FA 2012,

(bb) a contract which is not within paragraph (ba) but which, as a result of subsection (4) of that section, is treated for the purposes of that section as being made at any time,

(c) a contract for a life annuity (other than one within para (a)) which has at any time not formed part of any insurance company’s or friendly society’s basic life assurance and

---

41 Terms defined in subsection (4); the definitions need not be considered here.

- general annuity business the income and gains of which are subject to corporation tax, and
- (d) a foreign capital redemption policy.

If we focus on foreign life policies, the relevant provision is (3)(b). The question is whether the foreign policy does not meet conditions A and B (which I will call “**foreign policy conditions A and B**”). Section 531(5) provides:

Condition A is that the policy falls within para (a) of the definition of “foreign policy of life insurance” in section 476(3) (policy issued by a non-UK resident company).

So we turn to s.476(3) ITTOIA:

In this Chapter—

“foreign policy of life insurance” means—

- (a) a policy of life insurance issued by a non-UK resident company, and
- (b) a policy of life insurance which forms part of the overseas life assurance business of an insurance company or friendly society

...

A foreign policy will typically fall within that definition, so it will meet the condition in s.476(3)(a). The meaning of “overseas life assurance business” can be found in s.431D(1) ICTA:

**431D Meaning of “overseas life assurance business”**

(1) In this Chapter “overseas life assurance business” means so much of a company’s relevant life assurance business as is with a policy holder or annuitant not residing in the UK (but not including the reinsurance of such business).

I think we conclude that most foreign policies will satisfy foreign policy condition A. That takes us to foreign policy condition B:

(6) Condition B is that the conditions in para 24(3) of Schedule 15 to ICTA (conditions that are required to be met for certain policies issued by non-UK resident companies to be qualifying policies) are met throughout the period between—

- (a) the date on which the policy was issued, and
- (b) the date on which the gain arises.

It is easy to become tangled in the double double negatives, but I think the chain of reasoning goes as follows:

- (1) Foreign policies will not (usually) satisfy condition B.
- (2) So they fall within s.531(3)(b) (“a foreign policy of life insurance that does not meet conditions A and B”).
- (3) So they do not qualify for a s.530 tax credit.
- (4) So they do meet the condition in s.466(2).
- (5) So that PRs are liable for the chargeable-event gain.

This could be avoided by an assent to a beneficiary.

Section 466 ITTOIA is not expressed to be limited to UK resident PRs. However s.368 ITTOIA provides:

- (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK....
- (3) References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.
- (4) This section is subject to any express or implied provision to the contrary in this Part (or elsewhere in the Income Tax Acts).

Thus non-resident PRs are not chargeable. EN ITTOIA confirms that this is intended:

421. Chapter 1 of Part 4 of this Act provides a general territorial limitation on the scope of the Part. As regards income arising outside the UK, it limits the charge to such income arising to a UK resident. See section 368 (territorial scope of Part 4 charges) and the related commentary on that Chapter. [Section 465 ITTOIA] overlaps and supplements that Chapter to ensure that a non-UK resident individual is not liable to tax under this Chapter on any gains, whether arising in the UK or elsewhere.

## **62.13 Planning for immigrant to UK**

### *62.13.1 Post-immigration planning*

The advisers of a foreign domiciled person who has recently come to the UK should check whether they or any trust they have created has a policy or contract. If so, the position needs to be reviewed.

An assignment of the policy or contract from an individual to a trust (resident or not) does not help, since the individual remains liable as creator.

One simple form of planning is to arrange there is no chargeable event in a year when the individual is UK resident. The part-surrender of up to 5% of the premium paid for the policy or contract per year is not a chargeable event. The surrender, assignment for money or money's worth and maturity of the policy or contract is normally a chargeable event but this can be anticipated and perhaps postponed to a year when the individual is non-resident. A death giving rise to benefits under the policy is also a chargeable event unless the policy is a qualifying policy. In such a case the individual may be at risk as death while UK resident may give rise to a tax charge.

Another course is for the individual to surrender their policy shortly after becoming UK resident; most of the gain will qualify for non-UK period relief.<sup>42</sup>

If a chargeable event is anticipated, the policy or contract could be assigned to a non-resident company, perhaps held by a trust. An assignment for no consideration is not a chargeable event. But the ToA rules will need consideration.

### 62.13.2 *Pre-immigration planning*

There are further possibilities if the individual acts before the tax year in which they become UK resident or in the overseas part of a split year. One possibility is to surrender the policy. A part-surrender may also be a possible option.

## 62.14 **Personal portfolio bonds**

A UK resident is not likely to acquire a personal portfolio bond (“**PPB**”), at least knowingly; but a non-resident who holds one may come to the UK.

Section 515 ITTOIA provides:

- (1) This section applies if a policy or contract to which this Chapter applies is a personal portfolio bond at the end of an insurance year.

---

42 See 62.6 (Non-UK period relief).

In short, the charge arises if the bond is a PPB at the end of the insurance year.<sup>43</sup> The status of the bond at any other time does not matter.

Section 515(3) ITTOIA provides:

A calculation is to be made in accordance with section 522 in relation to the policy or contract as at the end of the insurance year to determine—

- (a) whether a gain has arisen on the policy or contract in relation to that year, and
- (b) if so, the amount of the gain.

The computation of the PPB charge under s.522 is not discussed here. In short, the computation is penal. The tax regime designed not to tax PPBs, but to prevent them being used by UK residents.

I do not discuss the transitional rules for pre-1998 policies.

#### 62.14.1 *Final insurance year*

Section 515(2) ITTOIA provides:

But this section does not apply if the insurance year is the final insurance year.

#### 62.14.2 *PPB: Critique*

The IPTM explains the rationale for the PPB regime:

##### **IPTM7705 - Personal portfolio bonds: introduction** [Aug 2016]

In law, it is the insurer not the policyholder that owns the property that determines the benefits under a life policy. Where the policyholder has the ability to select the property that determines the policy benefits, the policyholder retains nearly all the advantages of direct personal ownership of that property. But because the property is held in the ‘envelope’ of a life insurance policy, the policyholder does not have to pay income tax on dividend and interest income arising from the investments nor capital gains tax on disposals when the investments underlying the policy are altered. Tax on any gains on the policy can also be deferred until the policy comes to an end.

##### **Personal portfolio bond legislation**

The personal portfolio bond (PPB) legislation is an anti-avoidance

---

43 See 62.2.6 (“Insurance year”).

measure which imposes a yearly charge to tax on life insurance and capital redemption policies and life annuity contracts in some circumstances where the property that determines the benefits is able to be selected by the policyholder...

This rationale of the PPB regime calls for critical examination. The tax advantage of deferral is more than compensated by other features of the regime, in particular, the IT charge on capital gains when the policy is realised, and the lack of a tax free uplift on death. The issue should be considered in the context of more fundamental questions on the basis of the taxation of savings, on which the Mirrlees review have done good work. The proposition that “the policyholder retains nearly all the advantages of direct personal ownership of that property” is highly debatable.

In short, it is doubtful whether there is a real problem; and the problem, so far as it exists, does not need a cure of this complexity. The professional bodies made the points when the PPB regime was introduced. The Tax Faculty described it as a “disproportionate response to a perceived problem”<sup>44</sup> and the reader may well agree. But no-one took any notice.

## 62.15 Definition of PPB

I discuss the definition in some detail; a full discussion would need a chapter to itself.

Section 516(1) ITTOIA provides:

In this Chapter “personal portfolio bond” means a policy of life insurance, contract for a life annuity or capital redemption policy which meets conditions A and B.

I refer to “**PPB conditions A and B**”.

### 62.15.1 *Wrapper-type policy*

Section 516(2) ITTOIA provides:

Condition A is that, under the terms of the policy or contract, some or all of the benefits are determined by reference to—

---

44 Tax Journal, 26 Oct 1998 (Issue 473), p.3.

- (a) fluctuations in, or in an index of, the value of property of any description, or
- (b) the value of, or the income from, property of any description.

Where the value of the policy is linked to specific property, this is informally called a life insurance “**wrapper**”, though “wrapper” is not a legal or technical term with a fixed or precise meaning.<sup>45</sup> I refer to the property as the “**underlying property**”. It is sometimes said that the underlying property is “held in the bond”; that is not the strict legal analysis but (although the point has been contested<sup>46</sup>) it seems to me that is not so far from the commercial position.

Section 516(3) ITTOIA provides:

For this purpose it does not matter whether or not the index or property is specified in the policy or contract.

Where policies are acquired by way of investment, PPB Condition A will be commonly be met. What matters then is condition B.

#### 62.15.2 *Power to select*

Section 516(4) ITTOIA provides:

Condition B is that the terms of the policy or contract permit the selection of the index or some or all of the property by—

- (a) the holder of the policy or contract,
- (b) a person connected with the holder,
- (c) the holder and such a connected person acting together,
- (d) a person acting on behalf of the holder,
- (e) a person acting on behalf of a person connected with the holder, or
- (f) a person acting on behalf of the holder and such a connected person acting together.

Section 516(5) ITTOIA deals with jointly held policies:

---

45 As far as I am aware, the 2011 Swiss Tax Agreement represents the first use of the word in tax legislation: see art (2)(i)(f) (the text is set out in the 2016/17 edition of this work at 97.3.3).

46 See 49.14.5 (Economic consequences).

In subsection (4) “holder”, in the case of a policy or contract held by two or more persons, means any of them.

In the following discussion, I use the term “**policyholder**” to include any person within s.516(4), ie the actual policyholder, connected persons, etc. So the question is (in short) whether the terms of the contract permit the policyholder to select the underlying property.

The ITP Manual provides:

**IP7M7715 Ability to select property: meaning [Jun 2016]**

**Meaning of ‘ability to select’ is wide**

[1] Under the PPB legislation, a policyholder’s ability to select property or an index is defined to have a wide scope. It extends to circumstances where a policyholder has any say, even indirectly, in the selection of the property or index.

[2] In particular, a policyholder will be treated as having the ability to select property or an index if under the terms of the policy or contract, the index or property in question may be selected by any of the following: [the Manual summarises the list in s.516(4)].

[3] Where there is more than one policyholder, there will be an ‘ability to select’ if any of the policyholders have the ability to select property or an index.

[4] Where the policyholder genuinely does not have the ability to select property or an index, even if that property or index is not within any of the permitted categories, the policy or contract will not be a PPB, although the presence of personal assets would test this analysis.

[5] If, for instance, the insurer has complete discretion over the selection of the property or index determining the benefits then the policy would not be a PPB. But if the policyholder does have influence over the selection then the ‘ability to select’ lies with the policyholder.

The expression “ability to select” is a convenient paraphrase of the statutory wording of PPB condition B, and I adopt it here. On that basis, paragraphs [2] - [4] are correct. But paras [1] and [5] go too far. A policyholder has ability to select if they can choose an underlying investment, out of various possible underlying investments, and having chosen, their choice will be adopted. That might be extended to say that a policyholder has ability to select if their choice can be expected to be adopted, disregarding some exceptional cases. But a person does not have ability to select merely because they have “any say” or “influence”.

Influence, in its normal sense, is a matter of degree (one speaks of weak and strong influences). At the far end of the spectrum, strong influence shades imperceptibly into an ability to select. The word influence in its normal sense is not restricted to that end of the spectrum.<sup>47</sup>

The ITP Manual provides:

**IPTM7715 Ability to select property: meaning [Jun 2016]**

**...Options in a policy to select property**

If a policyholder is entitled to exercise an option to select property or an index determining the benefits under the policy then the policyholder does have the ‘ability to select’ even if the option is not exercised. But if the insurer has discretion to offer the policyholder the right to select the property or index, the policyholder will have no ability to select until this discretion has been exercised by the insurer.

Similarly, if the terms of the policy allow the policyholder to request a change in its terms to permit selection of property outside the scope of the permitted property, but subject to the agreement of the insurer, the policyholder lacks the ability to select until the insurer has agreed.

A link to personal assets to determine policy benefits will indicate the existence of an ability to select.

**IPTM7720 selection of property by insurers but level of risk selected by policyholder [Jun 2016]**

It is common for policyholders to be able to adjust their level of risk in relation to policy investments by selecting one or more of the insurer’s internal linked funds. Such ability does not, on its own, amount to a power to select property to determine the policy benefits. It is the insurer or its appointed manager that manages the investments in its internal linked funds and selects the property that determines the policy benefits. Units in an insurer’s internal linked fund are not property for the purposes of the PPB legislation.

There may be some cases where the ability to select property is shared between the insurer and the policyholder. Property that may be selected by the insurer alone is of no relevance in determining whether or not a policy is a PPB. The PPB legislation is only concerned with property that may be selected by the policyholder.

**IPTM7725 circumstances where policy is not a PPB Broker-managed funds (‘broker bonds’) [Jun 2016]**

---

47 See 46.12 (Enjoyment condition E: Control).

Many companies offer policyholders the opportunity to invest in broker-managed funds. An intermediary or adviser chosen by the policyholder selects the assets in this sort of fund. The intermediary or adviser has an arrangement with the insurer to manage one of the insurer's internal funds and for this fund to be open to any client of the broker.

The broker is regarded as an agent of the policyholder when advising on whether the client should take out the policy or 'broker bond' in the first place. However, once the broker bond has been taken out, the broker manages the fund as an agent for the insurer and is remunerated by the insurer for doing so. The broker is not an agent of the policyholder when acting in the capacity of an investment adviser for the insurer.

Policyholders who have a policy under whose terms they are able to select a broker-managed fund to determine the value of benefits under the policy would not therefore normally be regarded as having a PPB. Exceptionally, arrangements may result in a policy described as a broker bond being a PPB because the policyholder retains the ability to select - see IPTM7730.

### **Investment advisers**

Where the policyholder is unable under the terms of the policy to select the property to determine the policy benefits, there may nonetheless be an option to require the insurer to appoint an investment adviser. The insurer may offer the policyholder a menu of possible advisers it is willing to appoint. There will usually be a separate agreement in these cases between the insurer and the investment adviser.

A policy written in these terms would not in general be a PPB. In such a case, the adviser would be acting as an agent of the insurer under the agreement between them. That agreement is separate from the insurance contract between the insurer and the policyholder, and from any agreement between the policyholder and the investment adviser. The adviser would not therefore be acting on behalf of the policyholder. The position would be the same as with broker-managed funds, as described in the previous section.

However, as with broker bonds, in exceptional circumstances the arrangements may be such that the policyholder does retain an ability to select - see IPTM7730.

### **IPTM7730 circumstances where policy may be a PPB [Jun 2016]**

Exceptionally, a policy may be a PPB even where there is a broker or investment adviser involved. The arrangements between the insurer and the adviser or broker, or between the adviser or broker and the

policyholder, or in the case of a tripartite agreement among all three of them, could prove material.

The investment objectives of the policyholder in accordance with which the adviser or broker has to act may be so restricted that it is effectively the policyholder that is selecting the property held in the policy. In this case, the adviser or broker is no more than a conduit or agent through whom the policyholder gives the insurer its instructions. These may be instructions as to what new investments may be selected and, with a continuing policy, the scope and freedom for replacing investments by other investments.

The terms of the legislation cannot be avoided simply by interposing an investment adviser or broker between the policyholder and the insurer. An insurer may, however, not be aware of an arrangement between a policyholder and an investment adviser or broker. It is not the responsibility of the insurer, when deciding whether a particular policy is a PPB, to review anything other than the contracts to which it is a party.

## **62.16 Whitelisted property**

Section 517 ITTOIA provides exceptions to the general rule, where a policyholder may have power to select underlying property. The rules are set out twice, first for index linked bonds, and then for bonds linked to underlying property. I consider them in reverse order, as I think the underlying property rules are more important in practice.

Section 517(2) ITTOIA provides:

A policy or contract is not a personal portfolio bond merely because its terms permit the selection of property as described in section 516(4) if all of the property which may be so selected—

- (a) falls within one or more of the categories listed in section 520, and
- (b) meets one or both of the property selection conditions (see section 521).

I refer to property within s.520 as “**whitelisted property**”. The ITPM refers to “permitted property”.

Section 520 ITTOIA sets out 7 categories of whitelisted property. These are, in short, mutual funds:

- (1) The table in subsection (2) sets out the categories of property referred to in section 517(2).

(2) This is the table—

<b>Category</b>	<b>Property</b>
1	property which the insurance company has appropriated to an internal linked fund <sup>48</sup>
2	units in an authorised unit trust
3	shares in an investment trust <sup>49</sup>
4	shares in an open-ended investment company <sup>50</sup>
5	cash <sup>51</sup>
6	a policy or contract to which this Chapter applies, other than an excluded policy or contract (see subsection (3)) <sup>52</sup>
7	an interest in a collective investment scheme <sup>53</sup> constituted by—
	(a) a company which is resident outside the UK (other than an

48 Defined s.520(4): “In this section ... “internal linked fund” has the meaning given by—

- (a) the Interim Prudential Sourcebook for Insurers made by the Prudential Regulation Authority under FISMA 2000, or
- (b) rules made by the Prudential Regulation Authority under FISMA 2000 and having effect for the time being in place of the Sourcebook”.

49 Section 50(4) provides the standard definition.

50 Section 50(4) provides the standard definition.

51 Defined s.520(4): “In this section ... “cash”—

- (a) includes any sum which is deposited—
  - (i) in a building society account (including a share account) or similar account, or
  - (ii) in a bank account or similar account, but
- (b) does not include cash which is acquired wholly or partly for the purpose of realising a gain from its disposal”.

52 Defined s.520(3): “A policy or contract is “excluded” if—

- (a) the policy or contract is itself a personal portfolio bond,
- (b) the value of any benefits under the policy or contract is or has at any time been capable of being determined directly or indirectly by reference to a personal portfolio bond, or
- (c) a personal portfolio bond is related property in relation to the policy or contract.”

“Related property” is defined by reference in s.520(4): “In this section ... “related property” has the same meaning as in section 625 (see subsection (5)).” That takes us to s.625(5) ITTOIA which provides: “In this section “related property”, in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it.”

53 Section 520(4) provides the standard definition.

- open-ended investment company),
- (b) a unit trust scheme the trustees of which are non-UK resident, or
- (c) any other arrangement which takes effect by virtue of the law of a territory outside the UK, and which under that law creates rights in the nature of co-ownership (without restricting that term to its legal meaning in any part of the UK)

HMRC have published a shallow consultation paper considering some extensions to these categories, but without considering wider issues.<sup>54</sup>

Section 521 ITTOIA sets out the property selection conditions. The IPTM has some relevant guidance, but it is too far from the themes of this book to discuss here.

#### 62.16.1 *General selection condition*

Section 521 ITTOIA provides:

- (1) The property selection conditions are—
  - (a) the general selection condition (see subsection (2)), and
  - (b) the class selection condition (see subsection (3)).
- (2) Property meets the general selection condition if, at the time when it may be selected, the opportunity to select property falling within the same category is available to—
  - (a) all policy holders of the insurance company, or
  - (b) persons acting on behalf of those policy holders.

#### 62.16.2 *Class selection condition*

Section 521 ITTOIA provides:

- (3) Property meets the class selection condition if, at the time when it may be selected, the opportunity to select property falling within the same category is available to—
  - (a) a particular class or classes of policy holders of the insurance company, or
  - (b) persons acting on behalf of the members of that class or those

---

54 HMRC, “Personal Portfolio Bonds - Reviewing the Property Categories” (August 2016)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/544513/Personal\\_portfolio\\_bonds-reviewing\\_the\\_property\\_categories.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/544513/Personal_portfolio_bonds-reviewing_the_property_categories.pdf)

classes.

- (4) A group of policy holders to whom the opportunity to select property falling within a particular category is available is a “class” for the purposes of subsection (3) if—
- (a) neither membership of the class nor the opportunity are limited to connected persons,
  - (b) the question whether a policy holder is a member of a class, or has the opportunity, is determined solely by the insurance company, and
  - (c) the opportunity is clearly identified in marketing or other promotional material published by the insurance company to members of the public, or members of the public who are intending investors, as available generally to any person falling within its terms.

The IPTM provides:

**IPTM7715 Ability to select property: meaning** [Jun 2016]

Where the policyholder is also an employee of a permitted fund such as a collective investment scheme or investment trust company – see IPTM7745 and IPTM7750 – and selects units or shares in that fund, that in itself would not cause the policy to be a PPB.

However, the property selection conditions would still need to be met – see IPTM7780 onwards.

## 62.17 Whitelisted indices

Section 517(1) ITTOIA provides:

A policy or contract is not a personal portfolio bond merely because its terms permit the selection of an index as described in section 516(4) if that index—

- (a) falls within one of the categories listed in section 518, and
- (b) meets one of the index selection conditions (see section 519).

I refer to indices within s.518 as “**whitelisted indices**”.

Section 518 sets out the whitelisted indices:

- (1) This section sets out the categories of index referred to in section 517(1).
- (2) Category 1 is the retail prices index.
- (3) Category 2 is any general index which—
  - (a) is similar to the retail prices index, and

- (b) is published by the government of any foreign state or an agent of such a government.
- (4) Category 3 is any published index of prices of shares listed on a recognised stock exchange.

### 62.17.1 General selection

Section 519(1) ITTOIA identifies the two index selection conditions:

The index selection conditions are—

- (a) the general selection condition (see subsection (2)), and
- (b) the class selection condition (see subsection (3)).

The conditions are the same as the property selection conditions set out above; the same wording is used (more or less) verbatim, just replacing *property* with *index* as appropriate.

Section 519(2) ITTOIA provides:

An index meets the general selection condition if, at the time when it may be selected, the opportunity to select the same index is available to—

- (a) all policy holders of the insurance company, or
- (b) persons acting on behalf of those policy holders.

### 62.17.2 Class selection

Section 519(3) ITTOIA provides:

An index meets the class selection condition if, at the time when it may be selected, the opportunity to select the same index is available to—

- (a) a particular class or classes of policy holders of the insurance company, or
  - (b) persons acting on behalf of the members of that class or those classes.
- (4) A group of policy holders to whom the opportunity to select an index is available is a “class” for the purposes of subsection (3) if—
- (a) neither membership of the class nor the opportunity are limited to connected persons,
  - (b) the question whether a policy holder is a member of the class, or has the opportunity, is determined solely by the insurance company, and
  - (c) the opportunity is clearly identified in marketing or other promotional material published by the insurance company to

members of the public, or members of the public who are intending investors, as available generally to any person falling within its terms.

## 62.18 Variation of policy

### 62.18.1 *Novation/variation distinction*

The starting point is to note that a policy is a contract, and like any contract, the parties to a policy can agree to change its terms or to revoke it. A change of the terms of a policy may constitute:

- (1) The termination (rescission) of the old policy in consideration for which the life insurance company enter into a new policy; the contract law term for this is a “**novation.**” The IPT Manual uses the expression “fundamental reconstruction”.
- (2) A variation of the terms of a continuing policy (“**a variation**”).

The IPT Manual discusses the contract law/insurance law background:

**IPTM8145 Significant variation: how and when variations occur**  
[Aug 2016]

#### **Variation of a policy**

The terms of a policy can normally only be varied by explicit agreement between the insurer and the policyholder or a person acting on behalf of the policyholder and the insurer should get written acceptance of the variation from the policyholder. It cannot in general be assumed that the variation is accepted simply because the policyholder does not respond. ... whether there has been a variation in the terms of a policy is a question of contract law.

**IPTM8150 Significant variations: examples** [Jun 2016]

#### **... Date of a variation**

The date of a variation follows the principles of contract law and will normally be the date that the party receiving the offer of a variation accepts that offer.

**IPTM7335 Surrenders: fundamental reconstruction of the policy**  
[Aug 2016]

#### **... Surrender date of old policy and insurance year of new policy**

In line with the general advice given in IPTM7325, the date of the surrender on a reconstruction is the date on which the insurer agrees to make the fundamental change.

The new policy comes into existence on the same date and starts a new insurance year, see IPTM3505. So, following a reconstruction the insurance year will in future end on the day before the anniversary of the date on which the reconstruction happened, not the day before the anniversary of the date on which the original policy was taken out.

A *novation* has important consequences under the chargeable event regime; in particular:

- (1) It constitutes a chargeable event (the surrender of all rights under the policy), on which a gain will in principle arise.
- (2) The new policy may qualify for less, or no, non-residence period relief; will have a different insurance year end date; etc.

A *variation* is not in principle a chargeable event, but it may have important consequences under the chargeable event regime. In particular, a policy may become a PPB, or cease to be a PPB. The IPTM provides:

**IPTM7710 Scope and outline of the PPB legislation** [Aug 2016]

...The test of whether a policy is a PPB is not limited to the terms of the policy at inception but is an ongoing test. Even if a policy was not a PPB when it was taken out, it could subsequently become a PPB through a change in its terms. The reverse situation could also apply if the policy was originally a PPB but its terms were varied so that it ceased to be a PPB.

**IPTM7715 Ability to select property: meaning** [Jun 2016]

**Variation of the terms of the policy**

Even if the original terms of the policy provide only for the selection of property within the permitted categories, if the policyholder subsequently selects other property then that will indicate that the terms of the policy have been varied to allow selection of property wider than the permitted categories. Then the policy will be a PPB.

The annual PPB charge only arises if a policy or contract is a PPB on the last day of the insurance year.

The novation/variation distinction is a matter of contract law/insurance law, not tax law.<sup>55</sup> From a commercial (non-tax) point of view it usually

---

<sup>55</sup> See Clarke, *The Law of Insurance Contracts* (looseleaf ed) para 23-4B ff (Modification or Extension of Existing Insurance); *Chitty on Contracts* (33<sup>rd</sup> ed., 2018), chapter 22 (Discharge by Agreement).

makes no difference, and the courts avoid making the distinction if possible.<sup>56</sup> So the contract law cases are mostly antique. But in this and some other tax contexts, the distinction remains important, so more recent cases tend to be tax cases.<sup>57</sup>

The general principle is well established, that there is a novation if:

- (1) The parties choose it, ie they expressly extinguish the old contract and substitute a new agreement; or
- (2) The parties enter into a contract entirely inconsistent with the old contract, or, if not entirely inconsistent with it, inconsistent with it to an extent that goes to the very root of it.<sup>58</sup>

The IPTM provides:

**IPTM7335 - Surrenders: fundamental reconstruction of the policy**

[Aug 2016]

Where the terms of a policy are changed, those changes may be so fundamental as to constitute a reconstruction bringing to an end the old contract and bringing into existence a new policy in substitution. If so, then the ending of the old policy is treated as a full surrender of the rights under the policy, with all the chargeable event consequences that might follow...

**What is a fundamental reconstruction?**

Whether a change to a policy is fundamental is a question of contract law and can only be answered by reference to the particular facts and circumstances. But it is possible to give some general principles - see IPTM8110....Although the guidance in IPTM8110 specifically applies to qualifying policies, advice about the distinction between changes which are merely variations and those which are fundamental reconstructions has application to non-qualifying policies also.

A variation of a policy, whether significant within the meaning of the qualifying policy rules, or not, has no chargeable event implications for non-qualifying policies.

The main changes which are regarded as fundamental are:

- addition or removal of a life assured under the policy

56 *Samuel v Wadlow* [2007] EWCA Civ 155 at [34].

57 For instance: *Magnavox Electronics Co v Hall* 59 TC 610; *Indofood International Finance v JP Morgan Chase Bank* [2006] EWCA Civ 158 at [60-63] (for other aspects of this case, see 104.11.7 (Indofood)).

58 *British and Benningtons v NW Cachar Tea Co* [1923] AC 48 at p.62, 67.

- switch from an endowment policy to a whole of life policy or vice versa
- change of contingency, for instance addition or removal of disability benefit and critical illness cover, or a change to the cover under a joint policy from first-to-die basis to last-to-die, or vice versa.

A change in the way benefits are calculated, extending the term of the policy or making a regular premium policy paid up are not in most cases fundamental reconstructions ....

A transfer of business from one insurer to another under the Part 7 FSMA2000 process sanctioned by the Court will not normally result in the fundamental reconstruction of the policies transferred but each case would need to be carefully considered on its own facts.

**IPTM8110 - Substitutions: circumstances in which they arise [Jun 2016]**

Where the change to a policy goes to the root of the original contract such that there is a fundamental reconstruction of it, the original policy is treated as surrendered and substituted by a new policy on the date of the change. Such a change may be by agreement between the policyholder and the insurer or by the exercise of an option in the original policy.

A change in the contingency on which the policy pays out a capital sum would always give rise to a fundamental reconstruction but this is not the only example.

**Changes of contingency**

Examples of changes of contingency that give rise to a substitution are

- adding a life assured to a single life policy or removing a life from a joint policy
- changing the contingency on a joint policy so that death benefits are paid on the death of the last survivor rather than on the first death, or vice versa
- adding to a policy that previously lacked it, disability or critical illness cover that would bring the policy to an end if paid, or removing such cover completely from a policy
- converting a whole life policy to an endowment policy or vice versa
- converting a term assurance policy to a whole life or endowment policy.

**Other fundamental changes**

- reducing the premium to a nominal amount, so-called ‘peppercorn premiums’

- making a number of changes simultaneously which separately may not be fundamental but together make a substantial difference to the contract
- the addition or removal of an option, which if exercised would end the policy and bring into existence a substitute policy...

I would not agree that these changes necessarily constitute a novation; it depends on the facts. But in practice it should be possible to avoid changes of this kind and the issue will not arise.

The qualifying policy rules (not discussed here) distinguish between a significant variation and an insignificant variation. The distinction does not matter for PPBs, but the IPT Manual material is set out here, as anything which is classified as a variation (significant or not) does not constitute a novation.

**IPTM8150 - Significant variations: examples** [Jun 2016]

Examples of changes to a policy that are significant variations falling short of a reconstruction are

- an extension or shortening of the term or premium spreading term
- an increase or decrease in the premium
- an increase or decrease in the amount of death benefit assured
- the addition or removal of critical illnesses from the list of illnesses
  - covered under the policy where the insured person is charged in any way for that benefit: but note that
  - if there is no charge for the benefit then the change is an insignificant variation, see IPTM8160
- the addition of critical illness cover to a policy that did not have it before or the complete removal of critical illness cover is a fundamental reconstruction, see IPTM8110
- the addition, removal or significant alteration of an extra benefit for death by accident or of any other permitted benefit
- the addition or removal of a waiver of premium condition
- permitting the policyholder to take a premium holiday
- permitting the policyholder to make a part surrender of rights under the policy
- the addition or removal of an option to the policy, the exercise of which would itself be a significant variation in the terms of the policy.

A change in the way the benefits secured under the policy are determined, as for example between with-profits, without profits and

unit-linked (or ‘investment linked’) was a significant variation before 7 October 2005. However, since that date, such a change is no longer treated as a significant variation - see IPTM8155.

Note that switches between different unit-linked funds are regarded in any event as insignificant variations ...

**IPTM8155 - certain variations not treated as significant** [Aug 2016]

There are some circumstances where a significant variation is disregarded for the purposes of the qualifying policy rules either by statute or by concession.

**Changes in the way benefits secured under a policy are determined**

Legislation was introduced for changes effected on or after 7 October 2005 that ensure that a change in the method for calculating the benefits under the policy, whilst still a variation in contract law, will be disregarded for the purposes of the qualifying policy rules. This encompasses, for instance, a change from with-profits to non-profit unit linked, which would otherwise be treated on first principles as a significant variation, as described in the penultimate paragraph of IPTM8150.

This will mean that changes of this kind can be made with no consequences for the qualifying status of the policies.

However, the new legislation does not extend, for instance, to changes in the premiums payable or the sum assured, as these are not changes to the method for calculating benefits.

**Variations connected with an exceptional risk of death or disability**

Certain variations of a policy are not treated as a variation for the purpose of the qualifying policy rules when there is an exceptional risk of death or disability - see IPTM8075 - even if they are significant.

These are where

- a premium loading for the exceptional risk is added or removed from the policy (although this will require consideration of the annual premium limit for variations which increase the premiums payable from 21 March 2012)
- a provision is added, removed or altered because of an exceptional risk giving rise to a sum chargeable as a debt against the capital sum guaranteed by the policy on death or disability.

**IPTM8160: Insignificant variations** [June 2016]

Examples of insignificant variations are

- a one-off change in the payment of premiums if it relates only to a change in the frequency of the premiums, including for instance where annual premiums are changed to monthly premiums that,

when annualised, are slightly higher to reflect the increased frequency

- a change in ownership of the policy
- a change to the names and addresses on the policy of the policyholder or lives insured, but not changes to the lives insured themselves
- any changes to the premium, sum assured or policy term because of a mis-statement of age on the proposal form
- addition or removal of a critical illness to the list of critical illnesses covered, where the cover on that illness is provided free by the insurer
- a switch between different unit-linked or investment linked funds
- the addition or removal of an option where if the option is exercised the policy is not regarded as having been significantly varied...

### **62.19 Converting PPB into non-PPB**

There are two main ways to convert a PPB into a non-PPB:

- (1) Vary the terms of the policy to restrict the underlying assets to whitelisted assets. It would be usual for the life company to dispose of underlying assets which were not on the whitelist.
- (2) Vary the terms of the policy so that the policyholder has no power to select underlying property. Instead, selection would normally be made by an unconnected fund manager acting on behalf of the life company, not on behalf of the policyholder. It may be necessary for the life company to dispose of underlying assets on the basis that the policyholder has selected them and may be said to retain the power to select until they are disposed of. But that depends on the circumstances.

It is possible to combine the approaches so:

- (1) the policyholder has power to select whitelisted assets and
- (2) other underlying property could be selected but by an unconnected fund manager, not the policyholder.

Drafting is crucial and the documentation needs to be reviewed by someone familiar with the tax background.

### **62.20 Chargeable event regime: EU-law**

In *Anderson v HMRC*,<sup>59</sup> the Tribunal raised the question of EU-law compliance:

35. ... in the case of a UK policy, the policyholder is liable to income tax only at the excess of the higher rate over the basic rate (s 530(1) ITTOIA), but in the case of an offshore policy, the policyholder is liable at the basic rate as well (s 530(4)(b)). On the face of it this treatment discriminates against persons who take out policies with insurers in other Member States of the EU and against insurers in such Member States, such that the free movement of capital and the freedom to provide services might be in issue. The Tribunal assumes however that the differences between the UK system for taxing life assurance (the I minus E basis) and the systems in the rest of the European Union (where there is no current taxation of the income accruing for the benefit of the policyholder) explain why the only remedy for the apparent discrimination is s 532 ITTOIA. But such differences cannot explain why the corresponding deficiency relief rules similarly discriminate due to their failure to give relief at the basic rate where a gain on the policy has been charged to tax at that rate.

36. The Tribunal expresses no view on this last issue, as it falls outside the scope of this appeal.

I hope to consider this further in another edition.

### **62.21 CGT exemption for policies**

Sections 204 and 210 TCGA provide exemptions for policies. In outline, policies are exempt unless assigned for consideration (known as secondhand policies).

### **62.22 Tax return: Chargeable event**

SA100 (notes) (2018/19) provides:

You should fill in the 'Additional information' pages if you have any chargeable event gains.

### **62.23 DT relief: Chargeable-event gain**

Suppose an individual who is UK resident and treaty-resident in a foreign state disposes of a policy so that chargeable-event gains arise directly to

---

<sup>59</sup> TC 02555 (2012). The taxpayer was not represented by counsel.

them. The position is similar to OIGs: see 64.24 (DT reliefs: OIG). It is an interesting question whether the individual claims relief under art.13 or art. 21 OECD Model Convention. At first sight chargeable-event gains are “gains” which arise from the alienation of property, even though not chargeable gains (in the CGT sense) and even though subject to income tax rather than CGT. But the gain is also “income” if that word is given its UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (other income) but no capital gains article, then it is considered that treaty relief is still in principle available.

If a chargeable-event gain arises without an alienation, relief is not available under art 13 OECD Model, but should still be available under art 21.

## **62.24 Policy held by non-dom: IHT**

Section 11 Revenue Act 1884 provides:

... where a policy of life assurance has been effected with any insurance company by a person who shall die domiciled<sup>60</sup> elsewhere than in the UK, the production of a grant of representation from a court in the UK shall not be necessary to establish the right to receive the money payable in respect of such policy.

The IHT Manual provides:

### **30039 - Policies effected by a person who dies domiciled outside the UK [Sep 2018]**

[The Manual summarises s.11 Revenue Act<sup>61</sup> 1884 s.11 and continues:] For the purposes of this section, any policy under which a sum of money becomes payable on a death may be treated as a policy of life assurance, and any association of persons which issued policies in the ordinary course of its business, whether incorporated or not, may be treated as an insurance company.

These provisions do **not** confer any exemption from IHT. Where policy moneys are situate in the UK, tax is nonetheless payable though the moneys may be receivable without the production of a UK grant of representation.

---

60 Deemed domicile does not apply for this purpose.

61 The Manual wrongly refers to the Customs & Inland Revenue Act.

The insurance company can however be liable for the tax where

- [1] it retains policy moneys for the benefit of the beneficiary for investment purposes, outside the terms of the life assurance contract, in which case IHTA s.200(1)(c) may apply to the company as a vestee, or
- [2] it received prior notice that the policy in question is subject to a statutory charge for tax under s.237 IHTA.<sup>62</sup>

Where there is other estate in the UK in respect of which a UK grant is necessary, but the UK representatives are only administrators acting under a power of attorney and in point of fact have not intermeddled with the policy moneys and, without knowledge of the claim for tax in respect of such moneys, have parted with the assets collected by them to their principal (the foreign executor), the claim in respect of the policy moneys should not be pursued against the UK administrators. Similar conditions apply in Scotland to a Factor or Attorney authorised by executors abroad to give up an Inventory (in such cases it is the executors who are confirmed, not the Factor or Attorney).

Refer to Technical for consideration

- all enquiries on this topic
- any case where it is apparent that policy moneys have been paid out without a grant being produced.

The withheld text may well state that IHT in many cases is uncollectable and set out the circumstances in which no attempt should be made to collect it. In practice a well-advised foreign domiciliary (not deemed domiciled) will not acquire or retain a UK situate policy. However a person who is deemed UK domiciled may find this useful, as the executors can fund IHT more easily if they can first recover the money due under the policy and then pay the IHT and obtain a grant.

---

62 Author's footnote: In practice it is unlikely that either [1] or [2] will be the case.

## CHAPTER SIXTY THREE

# OFFSHORE FUNDS: DEFINITIONS

63.1

### **63.1 Offshore funds: Definitions**

The discussion of the definition of offshore fund, and associated definitions, has been moved to App 5A.1, where it is considered together with the related terms collective investment scheme and OEIC.

## CHAPTER SIXTY FOUR

# OFFSHORE INCOME GAINS

64.1

### *Cross references*

For OIG of temporary non-residents, see 10.20 (TNR: Offshore funds)

For OIG of charities, see Kessler, Wong & Birkbeck, *Taxation of Charities & Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), para 4.15 (Offshore Funds) online version <https://www.taxationofcharities.co.uk>

### **64.1 Taxation of offshore funds**

This chapter considers offshore income gains (“OIG”) arising on the disposal of an offshore fund (it is assumed that the relevant conditions are met, in short, that the fund is a non-reporting fund). The next chapter considers income distributions from offshore funds.

The tax legislation is mainly in the Offshore Funds (Tax) Regulations 2009 (“OFTR”). The reader may think it unfortunate that such an important matter was left to regulations, since the drafting and opportunity for consideration are of lower quality, and regulations are not updated with current statutory references. But there it is.

The ink of the regulations had hardly dried before they were amended, first in 2009, with many substantial rounds of amendments subsequently.

The OFTR’s obsolete references to FA 2008 take effect as references to the legislation now in TIOPA.<sup>1</sup>

I do not consider in full the position of offshore funds held by UK resident companies subject to corporation tax.

### **64.2 Definitions**

---

<sup>1</sup> See 63.1 (Offshore fund/CIS/OEIC).

The following definitions are considered elsewhere:

<b>Term</b>	<b>Para</b>
Participant	63.2
Offshore fund	63.3
Main arrangements	63.11

#### 64.2.1 “Interest in an offshore fund”

Regulation 8(1) OFTR provides a commonsense definition:

For the purposes of these Regulations the interest of a participant in an offshore fund is the investment held by a participant taking part in arrangements (or arrangements constituting a fund) to which the relevant group of sections applies.

#### 64.2.2 Reporting/non-reporting fund

Regulation 4 OFTR provides:

- (1) Offshore funds consist of—
  - (a) non-reporting funds (see Part 2 of these Regulations), and
  - (b) reporting funds (see Part 3 of these Regulations).
- (2) In a period of account, an offshore fund is a non-reporting fund unless it is a fund to which Part 3 of these Regulations applies...

Regulation 50 OFTR provides:

In these Regulations a “reporting fund” means an offshore fund to which this Part applies for a period of account.

The requirements to qualify as a reporting fund are not discussed here.

The terminology is not to be confused with the CRS concept of reporting/non-reporting financial institutions.

HMRC publish a list of reporting funds.<sup>2</sup>

### 64.3 Charge to tax on OIG

The legislation distinguishes:

- (1) Offshore income gains (“**OIG**”), which arise on a disposal of a non-reporting offshore fund and fall within the offshore funds rules.
- (2) Chargeable gains, within the scope of CGT. I refer to this for clarity

---

<sup>2</sup> <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>

as “**CGT chargeable gains**” though strictly the term “chargeable gains” is only applicable to CGT. HMRC Manuals sometimes use the term “capital gains”. I do not use that expression as capital gains are not necessarily chargeable gains; but in context the meaning may be clear.

Regulation 17(1) OFTR provides the charge to tax:

There is a charge to tax if—

- (a) a person disposes of an asset,
- (b) either condition A or condition B is met, and
- (c) as a result of the disposal, an offshore income gain arises to the person making the disposal.

I refer to “**non-reporting fund conditions A and B**”.

This provision refers to a “person” so it applies to individuals, trustees, companies and PRs.

#### 64.3.1 *Non-reporting fund condition A*

Regulation 17(2) OFTR provides:

Condition A is that the asset is an interest in a non-reporting fund at the time of the disposal.

#### 64.3.2 *Non-reporting fund condition B*

Condition B concerns funds changing from non-reporting to reporting fund status. Regulation 17(3) OFTR provides:

Condition B is that—

- (a) the asset is an interest in a reporting fund at the time of the disposal,
- (b) the reporting fund was previously a non-reporting fund (becoming a reporting fund as the result of an application under regulation 52),
- (c) the interest was an interest in a non-reporting fund during some or all of the material period,<sup>3</sup>

---

3 Defined reg. 17(4) OFTR:

“For the purposes of paragraph (3)(c) the “material period” means a period beginning with the day on which consideration was given for the acquisition of the asset or on 1st January 1984 (whichever is the later) and ending with the day on

- (d) an election under regulation 48 was not prevented by paragraph (5) of that regulation, and
- (e) no election has been made under regulation 48(2).

### 64.3.3 *OIG treated as income*

Regulation 18(1) OFTR provides:

The offshore income gain arising is treated for all the purposes of the Tax Acts as income which arises at the time of the disposal to the person making the disposal (or treated as making the disposal).

OIG are not income for trust law purposes; so for instance, proceeds of sale of an offshore fund represent OIG but are not payable to a life tenant.

In accordance with the principles of plain English drafting, reg.18(5) signposts the exceptions:

<b>Regulation</b>	<b>Topic</b>
19	Remittance basis
20(1)	Non-resident trusts: OIG not income of settlor
20(5)	Non-resident trusts
24(6)	s.3 TCGA

### 64.3.4 *Person liable*

Regulation 18(2) OFTR provides:

The tax is charged on the person making the disposal (or treated as making the disposal).

### 64.3.5 *Charge as misc income*

#### **Reg18(3) OFTR**

In the case of a person chargeable to income tax, tax is charged under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the disposal is made ...

#### **reg.18(4) OFTR**

In the case of a person chargeable to corporation tax, tax is charged under Chapter 8 of Part 10 of CTA 2009 (miscellaneous income: income not otherwise charged) for the accounting period in which the disposal is made.

---

which the fund became a reporting fund.”

Thus the charge is under the Misc Sweep-up Income charge.<sup>4</sup>

Regulation 18(3) continues:

but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.

These sections are disapplied because OFTR cover the points or covers them differently.

Under s.689, the person liable is the person receiving/entitled to the income. Under reg 18(2) tax is charged on the person making (or treated as making) the disposal. I would have thought that was the same thing.

Under s.688(1) the charge is on the income arising in the tax year. But OIG is the same. Perhaps s.688(1) is disapplied in order to disapply the exceptions in s.688(2).

It would have been simpler to impose a separate charge, rather than to incorporate the charging provision from the misc income sweep-up provisions, and then to exclude other rules of those provisions; but it does not matter. I think the drafting is for historical reasons as the earlier provisions imposed a charge under sch D case VI.

#### 64.4 Meaning of “disposal”

It will be recalled that there is a charge to tax if a person disposes of an offshore fund. “Disposal” is defined in Chapter 4 Part 2 OFTR. Regulation 32 provides:

This Chapter applies if a participant disposes of an asset and at the time of the disposal—

- (a) the asset is an interest in a non-reporting fund, or
- (b) the asset is an interest in a reporting fund and the requirements specified in paragraph (3) of regulation 17 (read, as appropriate, with paragraphs (4) and (5) of that regulation) are met.

I cannot see the point of this, as if a participant disposes of an asset which is not within (a) or (b) then there is no charge under the OFTR and the question of whether there is a disposal for the purposes of the OFTR does not arise. I would be grateful to any reader who could explain. However

---

4 See 32.1 (Misc Sweep-up Income).

that may be, reg.32 does no harm.

We can move on to reg.33(1) which defines disposal:

There is a disposal of an asset for the purposes of these Regulations if there would be a disposal of an asset for the purposes of TCGA 1992.

It is considered that this incorporates the CGT rules on the timing of disposals, as well as the CGT definition of disposal.

OFTR rules differ from CGT rules in relation to reorganisations, and the position on death.

#### **64.5 OIG charge on death**

For CGT purposes, there is no disposal on death. Section 62(1) TCGA provides:

For the purposes of this Act the assets of which a deceased person was competent to dispose—

- (a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
- (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).<sup>5</sup>

Regulation 34(1) OFTR undoes this and provides for a deemed disposal on death:

Notwithstanding anything in paragraph (b) of subsection (1) of section 62 of TCGA 1992 (general provisions applicable on death: no deemed disposal by the deceased), where a person dies and the assets of which the deceased was competent to dispose<sup>6</sup> at the time of death include an interest in a non-reporting fund, then, for the purposes of these Regulations—

- (a) immediately before the acquisition referred to in paragraph (a)

---

<sup>5</sup> See 84.5 (Acquisition by PRs).

<sup>6</sup> Regulation 34(2) defines this expression by reference:

“... the reference in that paragraph to the assets of which a deceased person was competent to dispose are to be construed in accordance with [s.62(10) TCGA].”

Section 62(10) provides a commonsense definition; see 84.5 (Acquisition by PRs).

of that subsection, that interest shall be deemed to be disposed of by the deceased for such a consideration as is mentioned in that subsection; ...

For completeness, reg.34(1) concludes:

but (b) nothing in this regulation affects the determination, in accordance with regulation 32, of the question whether that deemed disposal is one to which this Chapter applies.

I cannot see the point of that, but it does no harm.

Regulation 34(2) incorporates other rules of s.62 TCGA:

Subject to paragraph (1), section 62 of TCGA 1992 applies for the purposes of these Regulations as it applies for the purposes of that Act...,

The following provisions of s.62 therefore apply for OIG; I set out the section highlighting the amendments that the context requires when applying the section to OIG:

[(2) and (2A) deal with losses and are not relevant to OIG.]

(3) In relation to property forming part of the estate of a deceased person the personal representatives shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the personal representatives), and that body shall be treated as having the deceased's residence and domicile at the date of death.

(4) On a person acquiring any asset as legatee (as defined in section 64)—

(a) no ~~chargeable~~ offshore income gain shall accrue to the personal representatives, and

(b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.

(5) Notwithstanding section 17(1) no ~~chargeable~~ offshore income gain shall accrue to any person on his making a disposal by way of donatio mortis causa.

[Subsections (6) to (9) deal with IoVs and need not be set out here.]

The IF Manual deals with the interaction of the OIG charge on death and IHT:

**IFM13383: Offshore Funds: participants in offshore funds: participants within the charge to income tax: disposals:**

**non-reporting funds: death of participant** [Apr 2020]

...An offshore income gain arises and resulting tax becomes payable before the estate of the deceased person is valued for inheritance tax purposes.

There is scope for deathbed planning: a lifetime gift to charity or to a spouse avoids the OIG charge on death, because no OIG arises on the disposal (applying CGT rules which brings into effect the CGT spouse exemption and the CGT charity exemption). By contrast if there is a gift by will to charity or to a spouse the OIG comes into charge on the death.

It seems that a gift by way of *donatio mortis causa* [gift in anticipation of death] also avoids the OIG charge on death.<sup>7</sup>

**64.6 OIG arising to partnership**

Partnerships are transparent for IT and CGT, in the sense that income/gains arise to the partners not the partnership, The same applies to OIG. HMRC agree. SAI Manual provides:

**6370 Offshore income gains: The tax charge** [Feb 2020]

Where an offshore income gain is realised by a partnership, each partner should be separately assessed in respect of his share of the ... income.

**64.7 OIG remittance basis**

Regulation 19 OFTR provides:

(1) This regulation applies to income treated as arising under regulation 17 to an individual in a tax year if—

(a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and

(b) the individual is not [actually] domiciled<sup>8</sup> in the UK in that year.

(2) The income is treated as relevant foreign income of the individual.

The significance of treating the income as RFI is that the income can qualify for the remittance basis. I refer to this as the “**OIG remittance**

<sup>7</sup> See 84.7.3 (Gift in anticipation of death).

<sup>8</sup> The deemed domicile rules do not apply to para 19(1)(b): see 4.3.1 (Scope of IT/CGT deemed-dom). But that does not matter, as the deemed domiciled rules do apply for s.8090B (remittance basis claim), and for s.809E; so a deemed domiciled individual cannot usually meet the requirement in reg 19(1)(a).

**basis”.**

The remittance basis applies even if the offshore fund is a UK situate asset (the CGT situs rules are not relevant) but in practice that is not likely to happen.

So long as the gain is not remitted, a remittance basis taxpayer will not care if the gain is a chargeable gain or an OIG, ie they will not care whether the asset disposed of is an offshore fund.

Regulation 19(3) OFTR contains two rules:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—

- (a) any consideration obtained on the disposal of the asset<sup>9</sup> is treated as deriving from the income

At first sight it is not clear why reg.19(3)(a) is needed. It seems self-evident. There is no equivalent in the CGT charge on gains accruing to individuals. But a reason will emerge.<sup>10</sup>

Regulation 19(3) continues:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) ...

- (b) unless the consideration so obtained is of an amount equal to or exceeding the market value of the asset, the asset is treated as deriving from the income.

Regulation 19(3)(b) is the equivalent of the CGT rule for deemed gains.<sup>11</sup>

## 64.8 OIG arising to UK trust

### 64.8.1 *UK trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its OIG.<sup>12</sup> Tax

<sup>9</sup> Reg 19(4) provides two somewhat unnecessary definitions:

“In paragraph (3)—

(a) “the asset” means the asset the disposal of which causes the income to be treated as arising, and

(b) “the disposal” means the disposal mentioned in sub-paragraph (a) of that paragraph.”

<sup>10</sup> See 64.13.6 (OIG s.87 TCGA remittance basis).

<sup>11</sup> See 17.33 (Gain on disposal at undervalue).

<sup>12</sup> See 64.3 (Charge to tax on OIG).

is charged at the trust rate, 45%: it falls within s.482 type 3.<sup>13</sup>

#### 64.8.2 UK settlor-interested trust

An OIG arising to UK trustees is not “income” in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However reg.18 OFTR directs that the OIG is “treated for all the purposes of the Tax Acts as income” so it does fall within s.624 ITTOIA.

If the settlor is a remittance basis taxpayer the s.624 remittance basis applies, ie an unremitted OIG is not taxed on the settlor but on the trustees.<sup>14</sup>

The rate of tax in the absence of s.624 is the trust rate, which is the top rate, so s.624 can only reduce the tax rate (or make no difference).

#### 64.9 OIG non-residence defence

Regulation 22(1) OFTR provides a territorial limitation for non-residents:

The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—

- (a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax) ...

This incorporates the CGT territorial limitations by reference.<sup>15</sup>

13 See 38.2.3 (Trust-rate income).

14 See 44.8 (s.624 remittance basis).

15 See 53.4.3 (Territorial scope). For completeness: reg.22 OFTR also incorporates s.10 TCGA which would apply if a non-resident carried on a trade through a branch or agency and used the offshore funds for the purposes of the trade. This gives a neat symmetry with the CGT rules but it is hard to imagine that this will ever apply in practice. Regulation 22 provides:

“(1) The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—

...

- (b) section 10 of TCGA 1992 (non-resident with a UK branch or agency);
- (c) section 10B of TCGA 1992 (non-resident company with UK permanent establishment).

(2) Paragraph (1) is subject to paragraphs (3) and (4).

After the 2019 rewrite, the reference to s.2(1) takes effect as a reference to the CGT/CT rules in s.1A(1)/2B(1) TCGA. It is helpful to read these side by side, amended as reg. 22(1) directs:

**IT: s.1A(1) TCGA**

A person who is UK resident for a tax year is chargeable to ~~capital gains tax~~ income tax on ~~chargeable gains~~ offshore income gains accruing to the person in the tax year on the disposal of assets wherever situated.

**CT: s.2B(1) TCGA**

A company which is resident in the UK in an accounting period is chargeable to corporation tax on ~~chargeable gains~~ offshore income gains accruing to the company in the period on the disposal of assets wherever situated.

By implication, a person is not chargeable to IT on offshore income gains if they do not meet the residence condition, that is, if they are not UK resident.

**64.10 OIG arising to non-resident trust**

Where an OIG arises to a non-resident trust, the trustees are not subject to tax on the gain because they are non-UK resident.

**64.10.1 Non-res. settlor-interested trust**

An OIG arising to a non-resident settlor-interested trust is not within s.624 ITTOIA, unlike a UK resident trust. Regulation 20(1) OFTR provides:

If

- [a] an offshore income gain arises to a settlement in a tax year and
- [b] the trustees of the settlement are not resident in the UK in the tax year,

---

(3) In the application of section 10 of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable gains are taxable) have effect with the omission of the words “situated in the UK and”.

(4) In the application of section 10B of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable profits arise for the purposes of corporation tax) have effect with the omission of the words “situated in the UK and”.

Section 1015 ITA could also restrict the territorial scope of the OIG charge, but the rules discussed here leave it no room to operate.

the gain is not regarded as income for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

The consequence is that a settlor (if liable under s.720) does not have an indemnity against the trust for the tax. One wonders if this has been thought through.

The whole of Chapter 5 is disapplied, so where a capital payment is made to a minor child of the settlor, the settlor is not taxable under s.629 ITTOIA (instead the child would be taxable at the appropriate rate. This could lead to a significant saving).

#### 64.11 **OIG anti-avoidance: Outline**

The rule that non-resident trusts and companies are not subject to tax on OIG presents an obvious means of tax avoidance. HMRC might have applied either ToA or CGT anti-avoidance provisions to deal with this. In fact they have applied both:

- (1) The ToA provisions apply: reg.21
- (2) The CGT provisions apply (with amendments):
  - (a) Regulation 20 applies s.87 TCGA.
  - (b) Regulation 24 applies s.3 TCGA.

Further rules are needed to deal with the many possible ways in which the anti-avoidance provisions may interact:

- (1) Interaction between these IT and CGT anti-avoidance provisions potentially applying to the same OIG; and
- (2) Interaction between:
  - (a) the applicable anti-avoidance provision relating to an OIG and
  - (b) s.731 or CGT s.87 (where a beneficiary receives a benefit and there is also relevant income or a CGT s.1(3) amount).

##### 64.11.1 *OIG avoidance rules: Critique*

The result of applying two sets of overlapping anti-avoidance provisions is so complicated that no-one could expect the rules which I seek to explain below to be applied in practice, except by the largest trusts with a large budget for UK professional advice. It also introduces a full set of anomalies and some scope for tax planning.

Although it was the case before 2008 that both ToA and CGT anti-

avoidance provisions applied, the 2008 reforms made both sets of provisions much more complicated, so that the dual application presents much more complexity than before.

The drafting of the OIG provisions was even more rushed than the rest of the 2008 legislation, leaving no time even for HMRC to properly consider the issues, let alone for consultation.<sup>16</sup> It seems to me that there can be no more devastating criticism of the rules than an attempt to explain them. The reader who labours through this chapter is likely to agree that the law ought to be simplified by applying either the ToA or the CGT anti-avoidance rules – CGT would be the better of the two, as OIG are more like capital gains – but not both.

## 64.12 OIG ToA provisions

An OIG arising to a non-resident is not “income”; so in the absence of express provision it would not fall within the ToA provisions even if it arose to a person abroad within s.720 or s.731.<sup>17</sup> Regulation 21(1) OFTR deals with this and thus applies the ToA provisions to OIG:

Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

It is helpful to distinguish the ordinary transfer of asset rules and the rules as they apply to OIG. I use the following terminology:

- (1) **“OIG s.720”**: the provisions of s.720 ITA which apply when:
  - (a) a person abroad receives OIG, treated as income for the purposes of s.720, and
  - (b) the transferor is deemed to receive income (**“OIG s.720 income”**).
- (2) **“OIG s.731”**: the provisions of s.731 ITA which apply when:
  - (a) a person abroad receives OIG, treated as relevant income for the purposes of s.731, and
  - (b) a beneficiary is deemed to receive income (**“OIG s.731 income”**).

---

16 There was an opportunity to rethink in the 2009 regulations, but HMRC had no desire to take it up.

17 See 45.15 (Income of person abroad).

There are only limited differences between the way that s.720/ 731 work for OIG/ordinary income.

#### 64.12.1 *s.720/s.371 remittance basis*

Regulation 21(2) OFTR provides:

Income treated as arising under that Chapter [Chapter 2 Part 13 ITA, transfer of assets abroad] by virtue of paragraph (1) is regarded as “foreign” for the purposes of section 726, 730 or 735 of that Act.

This feeds into s.726 ITA which provide a remittance basis for s.720 income. Section 726 ITA provides:

- (1) This section applies in relation to income treated under section 721 as arising to an individual in a tax year (“the deemed income”) if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.
- (2) For the purposes of this section the deemed income is “foreign” if (and to the corresponding extent that) the income mentioned in section 721(2) would be relevant foreign income if it were the individual's.
- (3) Treat the foreign deemed income as relevant foreign income of the individual.

So the s.720 remittance basis applies for OIG s.720 income.

The s.731 remittance basis applies similarly for OIG s.731 income.

The motive and EU-law defences may also apply.

#### 64.12.2 *OIG: Protected s.720 income?*

The question arises whether offshore income gains of a person abroad constitute protected foreign-source income (in my terminology, “protected s.720 income”).<sup>18</sup> This matters because protected s.720 income qualifies for (what I call) s.720 protected-trust relief. One would expect the answer to be, yes, whether or not the transferor was a remittance basis taxpayer; because that is the case for other foreign source income, and one would expect OIG to be treated in the same way.

The definition of s.720 protected income is in s.721A ITA. The difficulty is the RFI condition, that:

---

<sup>18</sup> See 60.9 (Protected s.720 income).

it [in this case, the OIG which arises to the person abroad] would be relevant foreign income if it were the individual's<sup>19</sup>

Income is RFI if there is a provision which specifically says so.<sup>20</sup>

There are three provisions which might be called on to show that the requirement in s.721A(3)(a) is met.

The first contender is reg. 21(2) OFTR, combined with s.726 ITA. But that does not help for two reasons (either one would suffice):

- (1) it concerns the s.720 OIG income which arises to the transferor. We are concerned with the OIG income which arises to the person abroad. The two are distinct.
- (2) s.726 only applies to remittance basis taxpayers (like reg 19).

The second contender is reg. 19 OFTR. This provides:

- (1) This regulation applies to income treated as arising under regulation 17 to an individual in a tax year if—
  - (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
  - (b) the individual is not domiciled in the UK in that year.
- (2) The income is treated as relevant foreign income of the individual.

For the purpose of the RFI condition, we must imagine that the OIG arising to the person abroad arises to the individual. It should follow, applying the deeming, that there is income treated as arising under regulation 17 to the individual.<sup>21</sup> However reg 19 only applies if the individual is a remittance basis user.

That suggests that the position is as follows:

- (1) If the transferor is a remittance basis taxpayer, the OIG is protected s.720 income, and qualifies for s.720 protected-trust relief.
- (2) If the transferor is not a remittance basis taxpayer (typically because they are deemed domiciled and cannot claim the remittance basis; or because they chose not to do so) then the OIG is not protected s.720

---

19 Where the person abroad is a trust the applicable provision is s.721A(3)(a) ITA. Where the person abroad is a company, the applicable provision is s.721A(4)(a) ITA. But the wording is the same in each case, so it makes no difference.

20 See 15.10.2 (“Relevant foreign income”).

21 Reg.17 requires a disposal, and there is no provision expressly deeming a disposal; contrast 64.13.4 (Deemed disposal for s.87). But this can be implied.

income; so it is taxable on the transferor on an arising basis.

That would be a strange and no doubt unintended result.

### 64.12.3 *Deemed source argument*

A third argument is based on s.830(1) ITTOIA:

... “relevant foreign income” means income which

(a) arises from a source outside the UK, and

(b) is chargeable under any of the provisions specified in subs.(2)

OIGs are chargeable under one of the provisions specified in s.830(2), namely, Chapter 8 Part 5 ITTOIA, which is specified in s.830(2)(o).

The professional bodies have flagged up this argument in a series of papers (“OIG papers”). For completeness, these are:

<b>Title</b>	<b>ICAEW name</b>	<b>Date</b>
Summary Technical Analysis		Jan 2019 <sup>22</sup>
HMRC Response		Nov 2020
Trust Protections and Offshore Income Gains	TAXguide 03/21	Feb 2021 <sup>23</sup>

The 2021 OIG paper sets out the text of the earlier papers verbatim, so it is not now necessary to read the earlier papers..

The 2019 OIG paper started with a disclaimer in fortissimo:

THE ANALYSIS BELOW DOES NOT REFLECT THE VIEWS OF ANY OF THE PROFESSIONAL BODIES. IT IS PUBLISHED SO THAT PROFESSIONAL ADVISERS CAN CONSIDER THE ANALYSIS FOR THEMSELVES USING THEIR OWN PROFESSIONAL JUDGMENT AND CONSTITUTES NEITHER ADVICE NOR GUIDANCE ...

The 2021 paper has a similar disclaimer, though no longer in block capitals.

The “summary technical analysis” is as follows:

4) ... the question put is whether the income would meet the definition of RFI at section 830 ITTOIA 2005 if received by the transferor directly. There are 2 conditions to be RFI.

22 <https://www.tax.org.uk/sites/default/files/Summary%20Technical%20Analysis%20%28January%202019%29.pdf>

23 <https://www.tax.org.uk/sites/default/files/210201%20Trust%20Protections%20-%20Offshore%20Income%20Gains%20Note%20For%20publication.pdf>

*Condition 1: Is the OIG foreign income?*

All income must have a source (various case law can be cited in support of this contention), so if one carries through the deeming in line with *Marshall v Kerr* ... then the deemed income must too have a source.

[The analysis cites the well-known passage from *Marshall v Kerr*,<sup>24</sup> and continues]

In the case of offshore income gains the source should be the foreign fund (it is argued that nothing else is plausible (as stated at the beginning readers must make their own evaluation on this and the other issues).

But an OIG does not arise from a source, as it is a capital gain.<sup>25</sup> It is not the case that “All income must have a source”. The CIOT argument fails at this point. HMRC agree.

I set out the rest for completeness:

*Condition 2: Is the OIG chargeable under one of the provisions listed in s830(2), one of which is Chapter 8 of Part 5 (income not otherwise charged)?*

The analysis postulates that under section 721A(3) the income is received by the transferor (see point 3 above). The analysis goes on to say that Regulation 18 would then be the relevant charging provision in this case (charging individuals under Chapter 8 of Part 5 ITTOIA 2005). Taking all of the above into account, the analysis concludes that both conditions 1 and 2 are met.

Having gone through the above, the analysis concludes that:

- the OIG does meet the definition of RFI at section 830 ITTOIA 2005; and
- the corollary of this conclusion is that the OIG falls within the trust protections on first principles.

CIOT then seek to explain the purpose of reg 19(2) and s.830(4)(aa) ITTOIA (which refers to reg 19(2)):

Various arguments have been put forward. The first is that regulation 19(2) was included by the draftsman to put the matter beyond any doubt. [CIOT cite a well-known comment on the argument from redundancy<sup>26</sup>].

---

24 See App. 4.4 (Deeming provisions: Construction).

25 See 15.6 (No source/deemed source).

26 See App.2.1.2 (Argument from redundancy).

Alternative arguments are that:

- regulation 19 deals only with remittance basis users but is not exclusive; or
- in 2009 regulation 19 unnecessarily re-enacted section 762ZB ICTA 1988 without appreciating that the 2008 reforms had already brought OIGs within Chapter 8 Part 5 ITTOIA.

Whichever argument is correct the analysis states that the existence of regulation 19(2) and section 830(4)(aa) ITTOIA 2005 does not preclude the technical argument made that OIGs should fall within the trust protections on first principles.

But reg 19(2) is needed on the basis that an OIG has no source.

CIOT say:

Note that there is a similar issue for accrued income profits with a similar technical argument being available for why the income should come within the trust protections.

It is arguable that a purposive construction should apply, so that OIG can be protected s.720 income even if the transferor does not claim the remittance basis. As tax statutes become more complex, and the standard of statutory drafting does not (and realistically, cannot) meet the challenge, the Courts should become more willing to correct obvious slips by construction. But that requires moving the line which distinguishes construction from rewriting the legislation.

HMRC were asked to change the law, but it was too much trouble.<sup>27</sup> Perhaps the hope of the CIOT argument was to give HMRC the opportunity to allow the relief under the easier guise of interpretation. But HMRC declined to do so, with an analysis which is technically correct,

---

27 HMRC say (2018): “A decision has been made not to amend the current legislation to include income arising in offshore non-reporting funds in the foreign trust exemptions at this time. The current demands placed on parliamentary resource make it difficult for the government to justify returning to the legislation at this time to add to the generous package of protections which the government has already legislated for in the extensive reform of the non-dom rules last year. Going forward, HMRC will continue to monitor this situation and engage with stakeholders.”

<https://www.tax.org.uk/policy-technical/technical-news/non-dom-reforms-protected-trusts-and-non-reporting-funds-survey-0>

The reason (if it can be called that) will not satisfy HMRC’s customers, and perhaps the decision will come to be reviewed.

though lacking an acknowledgement of the unfairness of the consequences:

Having considered the analysis HMRC CANNOT AGREE THAT IT IS A CORRECT INTERPRETATION for the OIG situation and we would make the following observations:

1) Whilst we appreciate that Regulation 18 of the Offshore Funds (Tax) Regulations 2009 (the Offshore Funds Regulations) treats OIGs arising to participants in non-reporting funds as income which arises at the time of the disposal to the person making the disposal “for all the purposes of the Tax Acts” we do not agree that it follows that OIG income is relevant foreign income as defined in s 830(1)ITTOIA.

2) For the purposes of s 830(1) ITTOIA relevant foreign income means income which:

a) arises from a source outside the UK; and

b) is chargeable under any of the provisions listed in s 830(2)

We do not consider that OIG income treated as arising under Regulation 18(2) of the Offshore Fund Regulations can be said to be income which arises from a source outside the UK. Whilst Regulation 18(2) treats the OIGs as income which arises at the time of the disposal to the person making the disposal it does not treat it as income arising from a source outside the UK. To do so would be to take the deeming provision too far.

It is not even a matter of taking the deeming “too far”: the deeming simply does not entail that the offshore fund has a source.

Therefore it is our view that while it may (?) be correct to say that such deemed income is chargeable under Chapter 8 of Part 5 ITTOIA and thus falls within s 830(2)(o), it does not fall within the definition of relevant foreign income.

3) S 830(4) ITTOIA refers to the treatment of “other income” as relevant foreign income. The wording of this provision makes it clear that it was intended to deal with the treatment of income which had not already been covered in the preceding subsections. It refers to the “treatment” of these categories of income as relevant foreign income rather than stating that they will fall within the definition of relevant foreign income. This is because only some of the statutory provisions listed treat the income in question as relevant foreign income for all purposes. Others such as the provision relating to OIG income limit this treatment.

4) We do not believe that it is correct to say that the provision in Regulation 19(2) of the Offshore Funds Regulations simply restates the position which already existed as a result of applying the definition of relevant foreign income set out in section 830(1) and (2) ITTOIA (on the assumption that OIG income fell within it). If OIG income was correctly categorised as relevant foreign income under s 830(1) and (2) ITTOIA, that would have enabled an individual who was a non-domiciled remittance basis user access to the remittance basis in respect of that income. However there are also other consequences of income being categorized as relevant foreign income which apply to those other than non-domiciled remittance basis users. For example, Part 8 Chapter 3 ITTOIA contains provisions about deductions and reliefs available where relevant foreign income is charged on the arising basis.<sup>28</sup>

Therefore, if it was correct to say that OIG income falls within s 830(1) ITTOIA, the effect would be not only that non-domiciled remittance basis users would be able to claim remittance basis in respect of that income, but that those individuals in receipt of OIG income who are not non-domiciled remittance basis users would be entitled to those deductions and reliefs. When the Offshore Fund Regulations were made, Regulation 19(2) could have stated that OIG income treated as arising under Regulation 17 was treated as relevant foreign income of the individual. However it did not do so – it specifically limited treatment of OIG income as relevant foreign income to those cases where the individual was a non-domiciled remittance basis user.

5) If HMRC were to accept that OIG income already falls within the definition of relevant foreign income in s 830(1) and (2) ITTOIA, the effect would be wider than simply enabling OIG income treated as arising to offshore trustees to be within the definition of protected foreign source income for the purposes of section 721A Income Tax Act 2007. It would also mean that individuals not entitled to claim remittance basis could treat their OIG income as relevant foreign income for the purposes of the rules about expenses and deductions in Part 8 Chapter 3 ITTOIA both before and after the 6 April 2017 date. This would appear to frustrate the intentions of Parliament in enacting section 830 ITTOIA, which clearly indicates that it is s 830(4)(aa) and the provisions of the Offshore Funds Regulations which are to determine the treatment of OIG income as relevant foreign income.

... The intention behind Regulations 18 and 19 of the Offshore Funds

---

28 See 15.11 (RFI collection costs).

Regulations is clear, in that those provisions, rather than s 830(1), are to determine the relevant foreign income treatment of such deemed income and this is confirmed by the wording of s 830(4)(aa) ITTOIA. Here we have a provision which deems an OIG to be income arising at the time of the disposal to the person making the disposal but does not go on to deem it to be income arising from a foreign source. There is nothing in the deeming provision which is irreconcilable with the conclusion that the OIG income, being deemed rather than actual income, does not have a source.

An action group has formed with a view to taking a test case to the FTT.<sup>29</sup>

#### 64.12.4 Tax return disclosure

CIOT say:

##### **2017/18 Tax Returns**

For those completing 2017/18 returns now, where this issue is in point, consideration will need to be given as to what filing position to take. The professional bodies cannot provide advice or guidance; however, professional advisers may want to take the following into account.

HMRC expect: (i) tax returns to be filed on the basis that the trust protections do not apply to OIGs; and (ii) for tax to be paid accordingly. Notwithstanding HMRC's response, an adviser might consider that the better technical position is that the trust protections DO apply. This could be on the basis of the [CIOT analysis] ... or as a result of a different technical analysis. Appropriate white space disclosure of the technical position should be considered (this would include a reference to the view taken being contrary to that of HMRC) bearing in mind the fundamental principles and standards set out in PCRT with particular reference to paragraph 2.29 et seq.<sup>30</sup>

If the tax return is filed on the basis that the trust protections do not apply, the client will have to 31 January 2020 to file an amended return. In the light of the HMRC response, tax advisers may want to consider: (i) whether to amend returns already submitted on the basis that the trust protections do apply; or (ii) whether they feel that the HMRC response is incorrect (in such cases the adequacy of the initial white space

---

<sup>29</sup> For details, contact [Jennifer.Smithson@Macfarlanes.com](mailto:Jennifer.Smithson@Macfarlanes.com)

<sup>30</sup> See 116.3 (Tax return filing position); 116.8 (Disclosing doubt/further information).

disclosure may be something to review).<sup>31</sup>

The 2021 OIG paper upgrades this advice (if one may use the term, having regard to the disclaimer?):

full disclosure is essential (this would include a reference to the view taken being contrary to that of HMRC).

The PCRT has not changed in the interim, but it seems that its “fundamental principles and standards” are susceptible to more than one interpretation. But in this case, disclosure would be advisable.

### 64.13 OIG s.87 charge

An OIG is not a chargeable gain, and so not a s.1(3) amount (trust gain), so in the absence of express provision it would not give rise to a charge under s.87 TCGA. Regulation 20(3) OFTR deals with this and applies the s.87 rules with modifications. Because there are modifications, there are significant differences between OIG s.87 and CGT s.87.

#### 64.13.1 OIG s.87 charge

Regulation 20(3) OFTR incorporates the s.87 TCGA rules in this manner:

Sections 12,<sup>32</sup> 87 to 90A and 96 to 98 of, and Schedule 4C to, TCGA 1992 apply in relation to OIG amounts<sup>33</sup> as if—

- (a) references to section 2(2) amounts<sup>34</sup> (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
- (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,
- (c) references to anything accruing were to it arising<sup>35</sup> (and similar

31 <https://www.tax.org.uk/policy-technical/technical-news/deemed-domicile-trust-protections-hmrc-response#PDF> (Jun 2020).

32 The reference to s.12 TCGA in regulation 20(3) (which became sch 1 TCGA under the 2019 CGT rewrite) makes no sense, and must be a drafting error. However no great harm is done by the error. What matters is the incorporation of s.87 ff TCGA.

33 See 64.13.2 (“OIG amount”),

34 Section 2(2) amounts (trust gains) are now called s.1(3) amounts; but the 2019 CGT rewrite did not rewrite statutory instruments.

35 The terminology of the Taxes Acts is that CGT chargeable gains *accrue*; but OIG *arise*. There is no difference in meaning so it seems slightly pedantic to make the change of terminology when incorporating the CGT s.87 provisions for OIG; but it

- references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),
- (d) sections 87(4), 88(2) to (5) and 97(6) and paragraphs 1(3A), 3 to 7 and 12 of Schedule 4C were omitted, and
  - (e) regulation 21<sup>36</sup> did not apply.

In this section I consider the application of s.87-98 TCGA to OIG.

I do not set out all of s.87-98 TCGA, as amended, because the text would be too long for the exercise to be useful. The key provision is s.87(2)(3) TCGA which (amended as reg.20(3) directs) provides:

- [2][a] *Offshore income gains* are treated as *arising* in the relevant tax year to a beneficiary of the settlement
  - [b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
  - [c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the *OIG amount* for the relevant tax year or any earlier tax year.
- (3) The amount of *offshore income gains* treated as *arising* is equal to—
  - (a) the amount of the capital payment, or
  - (b) if only part of the capital payment is matched, the amount of that part.

It is necessary to distinguish CGT s.87 and OIG s.87 because the rules are not identical. I use the following terminology:

- (1) “**CGT s.87**”, the provisions of s.87 TCGA which apply when:
  - (a) a trust has a “**CGT s.1(3) amount**” (trust gains) and
  - (b) a beneficiary is deemed to receive a CGT chargeable gain (“**s.87 CGT gain**”).
- (2) “**OIG s.87**”, the provisions of s.87 as amended, which apply when:
  - (a) a trust has an “**OIG amount**”; and
  - (b) a beneficiary is deemed to receive an OIG (“**s.87 OIG**”).

For a discussion of CGT s.87, see 57.1 (s.87 regime: Introduction). I concentrate here on points where OIG s.87 is different from CGT s.87.

### 64.13.2 “*OIG amount*”

---

does no harm.

<sup>36</sup> See 64.12 (OIT ToA provisions).

Regulation 20(2) OFTR defines the term “OIG amount”:

If—

- (a) offshore income gains arise to the trustees of a settlement in a tax year, and
  - (b) section 87 of TCGA 1992 (gains of non-resident settlements) applies to the settlement for that year,
- the OIG amount for the settlement for that year is the amount of the offshore income gains.

“OIG amount” is the OIG equivalent of the CGT concept “s.1(3) amount” (formerly called trust gains).

The definition is not identically worded.<sup>37</sup> It is necessary to have a different definition, since the definition of s.1(3) amounts (trust gains) caters for losses, and for CGT chargeable gains within s.86 TCGA; the definition of OIG amounts does not do this because there is no relief for OIG losses and s.86 does not apply to OIG.

One (I expect, unintended) consequence of the difference in drafting is that there is no double taxation relief where the OIG are subject to a foreign capital gains tax.<sup>38</sup>

The drafter has correctly provided in reg. 20(3)(d) OFTR that s.87(4) TCGA does not apply for OIG s.87, because it has no role in that context.

### 64.13.3 “Capital payment”

“Capital payment” is defined in s.97(1) TCGA. The OFTR does not amend this. Section 97(1) provides:

In sections 86A to 96 and Schedule 4C and this section “capital

---

37 Section 87 TCGA provides:

“(4) The section 1(3) amount for a settlement for a tax year for which this section applies to the settlement is—

- (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 1(3) for that year if they were resident in the UK in that year, or
- (b) if section 86 applies to the settlement for that year, the amount mentioned in para (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

(5) The section 1(3) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.”

38 See 57.60 (DT relief: s.87 gain).

payment”—

(a) means any payment which is neither—

(i) chargeable to income tax on the recipient, nor

(ii) chargeable to income tax on another person under any of sections 643A, 643J and 643L of ITTOIA 2005 and sections 733A, 733C and 733E of ITA 2007,

or, in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

Suppose a trust within OIG s.87 makes a capital payment (or what appears to be a capital payment) to a UK resident beneficiary. The definition does not actually work for OIG s.87, since what would otherwise be a capital payment falling within OIG s.87 *is* chargeable to IT under OIG s.87! But for the purposes of OIG s.87 the definition must be taken to read that “capital payment” means:

[i] any payment which is not chargeable to income tax ... [*apart from OIG s.87*]

[ii] or, in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

I refer to a capital payment which is subject to income tax under OIG s.87 as an “**OIG capital payment**”.

#### 64.13.4 *Deemed disposal for s.87*

If OIG s.87 applies, a beneficiary receives a s.87 OIG. OIG s.87 does not directly impose a charge on the s.87 OIG: the deeming feeds into reg.17 which imposes the charge when an OIG arises to the person making the disposal of an offshore fund.<sup>39</sup> A further deeming is needed, because the beneficiary who receives the s.87 OIG does not make a disposal. Therefore reg.20(5) OFTR provides for a deemed disposal, to bring the s.87 OIG into charge under reg.17:

If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

The same rule applies for s.3 OIG.<sup>40</sup>

---

39 See 64.3 (Charge to tax on OIG).

40 See 64.14.1 (Deemed disposal for s.3).

### 64.13.5 *OIG s.87 : Misc points*

The deemed disposal rules of sch 4B TCGA do not apply to OIG,<sup>41</sup> but sch 4C TCGA may apply.

The interest surcharge rule in s.91 TCGA applies only to CGT s.87 and not to OIG s.87.

A capital payment from a trust with OIG amounts does not give rise to an IHT exit charge as the exit charge income exemption applies.<sup>42</sup>

I deal with the 2008 transitional rules elsewhere because they are best considered together with the CGT s.87 transitional rules.<sup>43</sup>

For sch 4C, see 58.27 (OIG sch 4C).

### 64.13.6 *OIG s.87 Remittance basis*

If a remittance basis taxpayer receives a s.87 OIG, s.87B TCGA applies to bring in a remittance basis just like the CGT s.87 remittance basis.

Reg.19(5) OFTR provides:

This regulation does not apply for the purposes of regulation 20.

That disapplies the ordinary OIG remittance basis.<sup>44</sup> That is needed because the OIG s.87B remittance basis applies instead.

### 64.13.7 *HMRC views*

HMRC agree with the above. The IF Manual provides:

**IFM13430: Effect of residence / domicile of beneficiary on offshore income gains arising in non-resident settlement structures that are attributed under section 87 TCGA rules - regulation 20 [Apr 2020]**  
**Beneficiary is UK resident and domiciled**

Where attributions are made to a beneficiary who is UK resident or ordinarily resident and is domiciled in the UK, then the full amount of the offshore income gain attributed is liable to tax on the beneficiary as income.

**Beneficiary is UK resident but non-UK domiciled**

41 See 58.12.1 (Chargeable asset).

42 See 72.9.3 (S.731/exit charge interaction).

43 See 57.42.1 (Pre-2008 OIG amounts); 57.45 (Pre-2008 inter-trust transfer); 57.51 (Rebasing - OIG amounts).

44 See 64.7 (OIG remittance basis).

Where attributions are made to a beneficiary who is UK resident or ordinarily resident but non-UK domiciled then, under section 87 TCGA rules, the full amount attributed may not be chargeable to income tax. Special rules may apply where the offshore income gains or capital payment were prior to 6 April 2008 – see the Capital Gains Manual from CG38730.

From 6 April 2017 a person may become deemed domiciled under s835BA ITA 2007. This document gives an introduction to the rules. The full amount of the offshore income gain attributed to the individual reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments. That is so even though less than the full amount may be chargeable to income tax on the individual.

#### **Beneficiary is non-UK resident**

Offshore income gains can still be attributed to a beneficiary who is not resident or ordinarily resident in the UK using the section 87 TCGA attribution rules. This applies even though they may not be chargeable to tax on such an individual. Any such attribution reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments. Detail on the rules for matching capital payments can be found in the Capital Gains Manual from CG38700.

### **64.14 OIG s.3 charge**

An OIG is not a chargeable gain, so in the absence of express provision it would not fall within s.3 TCGA. Regulation 24 OFTR deals with this and applies s.3 TCGA to OIG, with some modification:

- (1) Section 13 of TCGA 1992 (chargeable gains accruing to certain non-resident companies) applies for the purposes of this Part with the following modifications.
- (2) The section applies as if—
  - (a) for any reference to a chargeable gain there were substituted a reference to an offshore income gain; and
  - (b) for any reference to anything accruing there were substituted a reference to it arising<sup>45</sup> (with similar references being read

---

<sup>45</sup> The terminology of the Taxes Acts is that CGT chargeable gains *accrue*; but OIG *arise*. There is no difference in meaning, so it seems slightly pedantic to make the change of terminology when incorporating the CGT s.3 code for OIG; but it does no

accordingly).

- (3) The section applies as if, in subsection (5), paragraphs (b) and (c) were omitted.
- (4) The section applies as if, in subsection (7), for the reference to capital gains tax there were substituted a reference to income tax or corporation tax.
- (5) The section applies as if subsection (8) were omitted. ...

The references are to the pre-2019 legislation; the OFTR ought to be rewritten for the 2019 CGT rewrite, but the policy is not to update statutory instruments; we will have to cope as best we can.

I refer to this as the “**OIG s.3 charge**”. It is necessary to distinguish the CGT s.3 rules and the OIG s.3 rules because the rules (though similar) are not identical. I refer below to:

- (1) “**CGT s.3**”, the provisions of s.3 TCGA which apply when:
  - (a) a non-resident close company receives CGT chargeable gains, and
  - (b) a participator is deemed to receive the gain (the “**s.3 CGT gain**”).
- (2) “**OIG s.3**”, the provisions of s.3 as amended, which apply when:
  - (a) a non-resident close company receives OIG, and
  - (b) a participator is deemed to receive the OIG (the “**s.3 OIG**”).

Amended as reg.24 directs, the former s.13 TCGA provided:

- (1) This section applies as respects *offshore income gains arising* to a company—
  - (a) which is not resident in the UK, and
  - (b) which would be a close company if it were resident in the UK.
- (1A) [Interaction with ATED-CGT and NRCGT; not now applicable]
- (2) Subject to this section, every person who at the time when the *offshore income gain arises* to the company is resident in the UK, and who is a participator in the company, shall be treated for the purposes of this Act as if a part of the *offshore income gain* had *arisen* to him.
- (3) That part shall be equal to the proportion of the gain that corresponds to the extent of the participator’s interest as a participator in the company.
- (3A) Subsection (2) does not apply in the case of a participator who is an individual if—
  - (a) the tax year in which the *offshore income gain arises* to the company is a split year as respects the participator, and
  - (b) the *offshore income gain arises* to the company in the overseas part of that year.

---

harm.

(4) Subsection (2) above shall not apply in the case of any participator in the company to which the *offshore income gain arises* where the aggregate amount falling under that subsection to be apportioned to him and to persons connected with him does not exceed one quarter of the gain.

(5) This section shall not apply in relation to—

~~(b) an offshore income gain accruing on the disposal of an asset used, and used only—~~

~~(i) for the purposes of a trade carried on by the company wholly outside the UK, or~~

~~(ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the UK, or~~

(ca) *an offshore income gain arising* on the disposal of an asset used, and used only, for the purposes of economically significant activities carried on by the company wholly or mainly outside the UK, or

(cb) *an offshore income gain arising* to the company on a disposal of an asset where it is shown that neither—

(i) the disposal of the asset by the company, nor

(ii) the acquisition or holding of the asset by the company, formed part of a scheme or arrangements of which the main purpose, or one of the main purposes, was avoidance of liability to capital gains tax<sup>46</sup> or corporation tax, or

(d) to *an offshore income gain* in respect of which the company is chargeable to tax by virtue of section 10B.

[Subsections 5A to 7A relate to company distribution relief and company disposal relief and need not be set out here.]

~~(8) So far as it would go to reduce or extinguish chargeable gains accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal, but shall only so apply in relation to that person; and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.~~

(9) If a person who is a participator in the company at the time when the *offshore income gain arises* to the company is itself a company which is not resident in the UK but which would be a close company if it were resident in the UK, an amount equal to the amount apportioned under subsection (3) above out of the *offshore income gain* to the participating company's interest as a participator in the company to which the *gain arises* shall be further apportioned among the

---

46 In the context of offshore income gains, CGT should be read as a reference to Income Tax. When para (cb) was added to s.13, the drafter overlooked the need to make a corresponding amendment to reg.24 OFTR in order to make the words fit to OIG. This slip should be corrected by construction as the intended meaning is clear.

participators in the participating company according to the extent of their respective interests as participators, and subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned, and so on through any number of companies.

(10) The persons treated by this section as if a part of an *offshore income gain arising* to a company had *arisen* to them shall include the trustees of a settlement who are participators in the company, or in any company amongst the participators in which the gain is apportioned under subsection (9) above, if when the gain *arises* to the company the trustees are not resident in the UK.

(10B) [*This relates to pension schemes and need not be set out here*]

(11) [*This confers relief where tax is paid by the non-resident close company and need not be set out here*]

(11A) For the purposes of this section the amount of the gain or loss<sup>47</sup> *arising* at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on *offshore income gains*.

[*Section 13(12) to (14) contain definition and administrative provisions which need not be set out here*]

For a discussion of CGT s.3, see 60.1 (Section 3 TCGA: Introduction). I discuss here only the areas where OIG s.3 is different from CGT s.3.

The most important difference is that a s.3 CGT gain is subject to CGT at CGT rates; a s.3 OIG is subject to IT at IT rates.

The deletions in the former s.13(5)(8) make sense as those CGT rules would not be appropriate for OIG s.3.

DT relief may apply where a UK resident trustee holds a treaty non-resident company to which an OIG applies: s.79B TCGA disapplies the relief for CGT<sup>48</sup> but not for OIG.

Non-resident group relief does not apply to OIG s.3 because reg.24 does not incorporate the group relief rules (formerly s.14 TCGA, now s.3F TCGA).

#### 64.14.1 *Deemed disposal for s.3*

If OIG s.3 applies, a participator receives a s.3 OIG. OIG s.3 does not directly impose a charge on the s.3 OIG: the deeming feeds into reg.17 which imposes the charge when an OIG arises to the person making the

---

47 The words “or loss” are otiose here. Presumably the drafter overlooked the need to delete them as the legislation takes the trouble to delete them elsewhere. But nothing turns on that.

48 See 60.39(Trust participator: No DT relief).

disposal of an offshore fund.<sup>49</sup> A further deeming is needed, because the participator who receives the s.3 OIG does not make a disposal. Therefore reg.24(6) OFTR provides for a deemed disposal, to bring the s.3 OIG into charge under reg.17:

If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

The same rule applies for OIG s.87.<sup>50</sup>

#### 64.14.2 OIG s.3 remittance basis

Section 3D TCGA provides the CGT s.3 remittance basis,<sup>51</sup> but that section does not apply for the purposes of OIG s.3. Instead the ordinary OIG remittance basis in reg.19 applies,<sup>52</sup> but the end result is the same. This explains reg.19(3)(a) which provides:

- (3) For the purposes of Chapter A1 of Part 14 of ITA 2007(10) (remittance basis)—
- (a) any consideration obtained on the disposal of the asset is treated as deriving from the income. ...

This is the equivalent of s.3D(3) TCGA which similarly provides:

- For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)-
- (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the apportioned amount ...

#### 64.15 OIG and s.86

An OIG is not a chargeable gain so it does not fall within s.86 even if it arises to a non-resident trust. There is no provision which extends s.86 to apply. So a settlor of a non-resident trust is not subject to tax on trust OIG under s.86 TCGA; but s.720 may apply where the settlor has power to enjoy.

---

49 See 64.3 (Charge to tax on OIG).

50 See 64.13.4 (Deemed disposal for s.87).

51 See 60.24 (Section 3 remittance basis).

52 See 64.7 (OIG remittance basis).

### 64.15.1 *Planning: Exclude settlor not children*

Suppose a non-resident trust where:

- (1) the settlor and spouse are excluded, but
- (2) s.86 applies (because the settlor is UK domiciled and the settlor's children are beneficiaries)

It may be attractive for a trust to invest in offshore funds (which give rise to OIG outside s.86) rather than other assets (which give rise to CGT chargeable gains within s.86). Similarly, the trustees may invest for income and not capital growth. It may however be a balancing exercise, as to do so does increase the rate of tax on capital payments from CGT rates to IT rates.

### 64.16 **Anti-avoidance rules: Interaction**

#### 64.16.1 *OIG s.87/CGT s.87: Priority*

Suppose a capital payment is made to a UK beneficiary from a trust with OIG amounts and CGT s.1(3) amounts. This would in principle give rise to a charge under OIG s.87 and CGT s.87, or at least it might not be clear which of the two applied.

It matters which applies because in one case the OIG is taxed at income tax rates and in the other the CGT chargeable gain is taxed at CGT rates.

Regulation 20(4) OFTR deals with this:

Section 87A of TCGA 1992 applies for a tax year by virtue of paragraph (3) before it applies for that year otherwise than by virtue of that paragraph.

In short, OIG s.87 has priority to CGT s.87. Where OIG s.87 applies to a capital payment, there is no "capital payment" for the purposes of CGT s.87 as the payment is subject to income tax.

The IF Manual offers the following example:

**IFM13432: Allocating capital payments between offshore income gains and chargeable gains arising in non-resident settlements - regulation 20(4)** [Apr 2020]

Example where both offshore income gains and capital gains received  
A settlement with non-UK resident trustees has never been settlor interested and has never received any income.

This simplifies matters as it is not necessary to consider the ToA rules or

s.86 TCGA. In real life, the position would generally be much more complicated.

The following OIG amounts and capital gains have been received by the settlement:

	OIG amount	Chargeable gains
2008-09	£30,000	
2009-10		£40,000
2010-11	<u>£50,000</u>	<u>£60,000</u>
Total	<u>£80,000</u>	<u>£100,000</u>

The first capital payment out of the settlement is made in 2019-20. That is a capital payment of £70,000 to a UK resident and domiciled beneficiary.

The HMRC analysis for 2019/20 is as follows:

Regulation 20(4) tells you that you match any capital payments with OIG amounts arising in the non-resident settlement before matching with chargeable gains. This applies even if the OIG amount arose in an earlier year than the capital gain.

Using the section 87A TCGA attribution rules the capital payment is matched first with the entire £50,000 OIG amount arising in 2019-20. Then the remaining £20,000 (£70,000 - £50,000) is matched with £20,000 of the £30,000 OIG amount arising in 2017-18.

The beneficiary is treated as receiving £70,000 offshore income gains chargeable to income tax in 2019-20.

HMRC note that the £70k capital payment is matched with (1) the £50k OIG in 2010/11 and (2) £20k of the OIG in 2008/09. But it does not matter, as on the facts of the example, it makes no difference to which OIG the capital payment is matched. It matters for CGT chargeable gains, because of the interest surcharge, but that does not apply for OIG.

HMRC do not seek to argue that s.731 OIG applies.

HMRC then turn to consider the position going forward:

There are unmatched OIG amounts and chargeable gains in the settlement to carry forward at 5 April 2020 of:

2017-18 OIG amount £10,000 (£30,000 less £20,000 matched with capital payment)

2018-19 Capital gains £40,000

2019-20 Capital gains £60,000.

The HMRC example is an easier case as there was one capital payment which was less than the total OIG. Suppose there was more than one capital payment, and the total amount exceeded the OIG. For instance, on the facts of the above example, suppose in the same year but on different days:

Capital payment 1: £80k

Capital payment 2: £20k

Does one say:

- (a) Capital payment 1 is matched with the OIG and capital payment 2 is matched with the CGT chargeable gains? or
- (b) Each capital payment is matched with 80% of the OIG and 20% of the CGT chargeable gains?

It is considered that solution (b) is correct. That is consistent with the rule for s.1(3) amounts (trust gains).

#### 64.16.2 *OIG s.3/ToA priority: Co not in trust*

Suppose an OIG arises to a non-resident company (the company not being held by a trust). This could give rise to a charge under OIG s.720 (on the transferor) and under OIG s.3 (on the participators), or at least it might not be clear which of the two charges applies.

It may not matter which applies, as the OIG is taxed at income tax rates in either event, but it could matter eg if the transferor is not the sole participator.

Regulation 21(3) OFTR deals with this but it needs to be read with reg.21(1) to follow the sense:

(1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person...

(3) Paragraph (1) does not apply in relation to an offshore income gain if (and to the extent that) it is treated, by virtue of regulation 24 [OIG s.3], as arising to a person resident in the UK.

In short, a s.3 OIG charge has priority over the OIG ToA provisions. Regulation 24(7) OFTR provides:

To the extent that an offshore income gain is treated, by virtue of this

regulation [reg 24 = OIG s.3], as having accrued<sup>53</sup> to any person resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

#### 64.16.3 OIG s.3/ToA priority: Co in trust

Suppose an OIG arises to a company held by a settlor-interested trust. Suppose the company is within s.720. The trustees make a capital payment to a UK resident beneficiary. This could give rise to charges:

- (1) under OIG s.720 on the transferor and
- (2) under OIG s.87 on the beneficiary, on the basis that the OIG arise to the trustees and constitute OIG amounts which are matched to the capital payments.

Is relief available under reg. 24(7) OFTR? That provides:

To the extent that an offshore income gain is treated, by virtue of this regulation [reg 24 = OIG s.3], as having accrued to any person resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

One would have to argue that the gain accruing to the individual is the same gain as that accruing to the company. It is suggested that this is the case, since otherwise there would be a strange anomaly between this case and the simple case where the OIG arises to the trust directly (without a company). The purpose of s.3 is to put the taxpayer in the same position as if there were no company.

#### 64.17 OIG s.87/ToA: Priority

Suppose an OIG arises to a non-resident trust which makes a capital payment to a beneficiary. This could give rise to a charge under OIG s.87 and the ToA provisions, or at least it might not be clear which of the two applies.

It may matter which applies because:

---

<sup>53</sup> The terminology of the Taxes Acts is generally that CGT chargeable gains *accrue*; but OIG *arise*. There is no difference in meaning so it does not matter that the wrong word is used here.

- (1) OIG s.87 qualifies for:
  - (a) 2008 rebasing relief
  - (b) 2008 transitional relief.
- (2) Different remittance basis rules apply.

Regulation 21(5) deals with this but one first needs to read reg.21(4) OFTR which provides:

The following provisions apply if regulation 20 [OIG s.87] applies in relation to an offshore income gain (the “relevant offshore income gain”).

In short, the two provisions which follow – reg.21(5)(6) – apply where an OIG arises to a non-resident trust.

Regulation 21(5) needs to be read with reg.21(1) to follow the sense:

(1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person...

(5) If—

- (a) by virtue of regulation 20 [OIG s.87] an offshore income gain is treated as arising in a tax year to a person resident in the UK, and
- (b) it is so treated by reason of the relevant offshore income gain (or part of it),

for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

In short, the OIG s.87 charge has priority over the ToA provisions if the OIG amount is matched to a capital payment to a *UK resident*. I refer to this provision as the “**OIG s.87 priority rule**”. This applies even if the s.87 OIG is matched to a remittance basis taxpayer and (un)taxed on the s.87 OIG remittance basis, because an OIG is nevertheless treated as arising to a UK resident.

The OIG s.87 priority rule applies for Chapter 2 of Part 13 of ITA 2007 but it is necessary to consider s.720 and s.731 separately.

#### 64.17.1 *OIG s.720/s.87 Priority*

The following examples are based on this situation:

- (1) A non-resident settlor-interested trust is within s.720. The

transferor/settlor (for the purposes of these examples the terms are interchangeable) is UK resident. The motive defence does not apply.

- (2) The trust has realised an OIG in year 1 of £1m.
- (3) The trust has no relevant income. (It would be unusual for a trust within s.720 to have relevant income.)

*Example 1 (no capital payment)*

*The trustees make no capital payment to any beneficiary in the year that the OIG arises.*

The settlor as transferor is taxed on the OIG under OIG s.720 (subject to the s.720 remittance basis if applicable).

Regulation 21(6) OFTR prevents a double charge to tax under OIG s.87, if there is a capital payment in a subsequent tax year. It provides:

If, by virtue of paragraph (1) [OIG s.720] as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

*Example 2 (capital payment to settlor)*

*The trustees make a capital payment of £1m to the settlor in year 1.*

The settlor is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).

The ToA provisions are disapplied for OIG because the OIG s.87 priority rule applies.

It may make no difference whether it is OIG s.720 or OIG s.87 which is used to tax the settlor but it may matter for the following reasons:

- (1) 2008 rebasing relief
- (2) 2008 transitional relief
- (3) mixed fund rules.

*Example 2a (capital payment of part of OIG to settlor)*

*The trustees make a capital payment of £0.5m to the settlor in year 1.*

The settlor is taxed on the £0.5m capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).

The settlor is taxed on £0.5m under OIG s.720.

*Example 3 (capital payment to UK beneficiary)*

*The trustees make a capital payment of £1m to a UK resident beneficiary*

*(not the settlor) in year 1.*

The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis if applicable).

The ToA provisions are disapplied because the OIG s.87 priority rule applies.

So the result of the capital payment is to shift the tax charge from the settlor to the beneficiary. This would be particularly important if the beneficiary was a remittance basis taxpayer and the settlor was not. In such a case a capital payment to the beneficiary would save tax. The capital payment also affects the quantum of the charge if 2008 rebasing relief or 2008 transitional relief applies.

If the capital payment had been to a non-UK resident beneficiary, the settlor would be taxed on £1m under OIG s.720.

*Example 3a (capital payment of part of OIG to beneficiary)*

*The trustees make a capital payment of £0.5m to a UK resident beneficiary (not the settlor) in year 1.*

The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis if applicable).

*Planning for trust within s.720 which realises an OIG*

In short, where an OIG arises to a trust within s.720, it is advantageous for the trustees to make a capital payment equal to the OIG amount to a UK beneficiary, if:

- (1) the settlor is not a remittance basis taxpayer and the beneficiary is a remittance basis taxpayer; or
- (2) 2008 rebasing relief or 2008 transitional relief applies.

This planning point will often require a distribution to be made in the year that the OIG arises. The sum distributed need not be the proceeds representing the OIG. Other capital payments (eg the use of living accommodation) may suffice as that capital payment may be matched with the OIG.

If there is no time to make a payment in the form of a bank transfer, a resolution of the trustees to exercise their power to make a distribution will suffice. If the figures are not available, a resolution to distribute an amount equal to the offshore income gains will suffice. In order to make a distribution, it may be necessary to make a deed of appointment, or obtain consent of a protector: that depends of course on the terms of the

trust.

#### 64.17.2 *OIG s.731/s.87 priority: same OIG*

I turn to consider whether OIG s.87 takes precedence over OIG s.731.

The effect of the OIG s.87 priority rule is that if the OIG amount is matched to a capital payment to a UK resident then:

- (1) an OIG is treated as arising in the year to that beneficiary and
- (2) this disapplies OIG s.731.

In this situation, the OIG s.87 charge has priority over OIG s.731. This applies even if the OIG s.87 charge is (un)taxed on the s.87 OIG remittance basis because the s.87 OIG is nevertheless treated as arising.

#### *Examples*

The following examples are based on this situation:

- (1) A non-resident trust is within s.731 (UK resident beneficiaries) but not within s.720 (transferor has no power to enjoy or is not UK resident.) The motive defence does not apply.
- (2) The trust has realised an OIG in year 1 of £1m.
- (3) The trust has no relevant income (leaving aside the OIG).

#### *Example 1 (capital payment to UK beneficiary in year 1)*

*The trustees make a capital payment of £1m to a UK resident beneficiary in year 1.*

The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).

The ToA provisions are disapplied, ie, the OIG does not count as relevant income for s.731.

#### *Example 1a (capital payment of part to UK beneficiary)*

*The trustees make a capital payment of £0.5m to a UK resident beneficiary in year 1.*

It is considered that the beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis). HMRC agree: see the HMRC example set out in para 64.16.1 (Priority between OIG s.87 and CGT s.87), where a trust with an OIG amount of £80k made a capital payment of £70k and the capital payment was said to fall within OIG s.87. It is not entirely clear from the wording of the OIG s.87 priority rule that this is the case. That provides:

- (5) If—
- (a) by virtue of regulation 20 [OIG s.87] an offshore income gain is treated as arising in a tax year to a person resident in the UK, and
  - (b) it is so treated by reason of the relevant offshore income gain (or part of it),
- for that and subsequent tax years paragraph (1) [applying the ToA rules] does not apply in relation to the relevant offshore income gain (or that part).

Now, the position is clear if a capital payment is equal to the entire OIG amount (as in example 1). But if the capital payment is equal to half the OIG amount, one might say that half the OIG remains to count as relevant income so the capital payment falls within s.731 OIG. But that would be an anomalous inconsistency with the position which applies when the capital payment equals the entire OIG. It would be particularly difficult to apply if the capital payment is more than half the OIG. So the better view is that OIG s.87 applies. If that is correct, then OIG s.731 will never apply.

*Example 2 (capital payment to UK beneficiary in year 2)*

*(1) The trustees make no capital payment in year 1.*

No-one is subject to tax in year 1 as:

- (a) OIG s.87 only applies if there is a capital payment.
- (b) OIG s.731 only applies if there is a benefit (which means (more or less) the same as a capital payment).

*(2) The trustees make a capital payment of £1m to a UK resident beneficiary in year 2.*

The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis). The beneficiary is not taxed under OIG s.731 as the OIG s.87 priority rule applies.

I have considered whether reg. 21(6) OFTR overrides this rule. Reg 21(6) OFTR provides:

If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

Does this apply in year 1? Only if *income is treated under Chapter 2 of Part 13 of ITA as arising* in year 1. Chapter 2 Part 13 uses the expression *income is treated as arising* in s.731 (income treated as arising to an individual who receives a benefit) and in s.720 (income treated as arising to a transferor). However these sections do not apply in year 1. So reg.21(6) does not apply.

I have considered the argument that income is treated as arising in year 1 to the *person abroad* (the OIG) because of reg.21(1). But this is not correct, for such income is not treated as arising under Chapter 2 Part 13. This is confirmed, I think, by reg. 21(2) OFTR which uses the expression “treated as arising” where the reference is clearly to income treated as arising to the transferor under s.720 or to a beneficiary under s.731.

It follows that if capital payments are made only to UK resident beneficiaries, they are all taxed under OIG s.87 and not OIG s.731.

*Example 2a (capital payment of part of OIG to UK beneficiary in year 2)*  
*The facts are the same as example 2, but the trustees make a capital payment of only £0.5m to a UK resident beneficiary in year 2.*

It is considered that the beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis). The beneficiary is not taxed under OIG s.731 as the OIG s.87 priority rule applies.

### *Example 3*

*(1) Year 1: The trustees make a capital payment of £1m (ie an amount equal to the OIG) to a non-resident beneficiary*

No-one is subject to tax in year 1 as OIG s.87 TCGA and OIG s.731 only apply if there is a capital payment or benefit to a UK resident beneficiary.

*(2) Year 2: The trustees make a capital payment of £1m to a UK resident beneficiary.*

(a) The UK beneficiary is not taxed on the capital payment under OIG s.87 because the trust’s OIG amount is matched to the capital payment in year 1.

(b) As the OIG constitutes relevant income, the UK beneficiary may be taxed under OIG s.731 as the OIG s.87 priority rule does not apply:

- (i) If the capital payment to the non-resident beneficiary in year 1 distributed the relevant income, there is no OIG s.731 charge.
- (ii) If the capital payment to the non-resident beneficiary in year 1 did not distribute the relevant income, the UK beneficiary is subject

to tax under OIG s.731.

### 64.17.3 Example: OIG s.87: 2008 transitional relief

The IF Manual provides:

**IFM13434: Example showing how a UK resident but non-UK domiciled beneficiary may not be chargeable to tax on an offshore income gain arising in a non-resident settlement prior to 6 April 2008 - paragraph 100 Schedule 7 FA 2008 [Apr 2020]**

**Example of effect of paragraph 100 Schedule 7 FA 2008**

A settlement with non-UK resident trustees has never been settlor interested. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains.

The non-resident company held a material interest in an offshore fund. When that was disposed of in 2005-06 an OIG amount of £60,000 arose. The first capital payments to beneficiaries were made in 2010-11 which were:

- £40,000 to a UK resident and domiciled beneficiary
- £40,000 to a UK resident but non-UK domiciled beneficiary
- £40,000 to a non-UK resident beneficiary.

What is the position for OIG s.731? Para 21(5) OFTR (the OIG s.87 priority rule) provides:

If—

- (a) by virtue of regulation 20 [OIG s.87] an offshore income gain is treated as arising in a tax year to a person *resident in the UK*, and
- (b) it is so treated by reason of the relevant offshore income gain (or part of it),

for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

Of the £60k OIG, only £40k is treated as arising to persons resident in the UK, so one might think that £20k remained as relevant income, taxable on the UK resident beneficiaries. That is a surprising result, for contrast the situation where the same payments are made to the UK beneficiaries and no payment to the non resident. The UK domiciled resident is taxed on £30k and the foreign domiciled resident is not taxed. It seems strange if the tax should be more because of the payment to the non-resident. The

author of the OF Manual presumably thought so. Presumably the reason is that the payment to the non-resident is regarded as distributing the relevant income.

The same point applies to the next example.

#### 64.17.4 Example: Settlor excluded OIG s.87 rebasing relief

The IF Manual provides:

**IFM13436: Example showing how a UK resident but non-UK domiciled beneficiary may benefit from a ‘rebasings’ election - paragraph 101 Schedule 7 FA 2008 [Apr 2020]**

Example of effect of ‘rebasings’ election - paragraph 101 Schedule 7 FA 2008

A settlement with non-UK resident trustees is settlor interested because the settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains. The trustees have made a ‘rebasings’ election under paragraph 126 Schedule 7 FA 2008. The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.

The first capital payments made to beneficiaries were made in 2010-11. They were:

- £40,000 to a UK resident and domiciled beneficiary
- £40,000 to a UK resident but non-UK domiciled beneficiary
- £40,000 to a non-UK resident beneficiary.

The HMRC analysis is as follows:

There is a matching of £20,000 of each of these capital payments with the 2010-11 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.

The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.

The UK resident but non-UK domiciled beneficiary (where the remittance basis is used) is only chargeable to income tax on £5,000 (£20,000 x £15,000/£60,000) of the £20,000 offshore income gain attributed to them.

That is the post 5 April 2008 element of the £20,000 offshore income gain attributed to them. This is by virtue of paragraph 101 Schedule 7 FA 2008.

The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.

There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

#### 64.17.5 *Example: OIG s.720: Loss of rebasing relief*

The IF Manual provides:

**IFM13438: Example showing how a UK resident but non-UK domiciled beneficiary may not benefit from a ‘rebasings’ election - paragraph 101 Schedule 7 FA 2008 [Apr 2020]**

Example of ‘rebasings’ election having no effect - paragraph 101 Schedule 7 FA 2008

This example has similar facts as that in OFM15650 with the exception that capital payments are not made to beneficiaries until a year after that in which the OIG amount arises in the offshore trust structure. In such a case there may be no benefits of a ‘rebasings’ election to a non-UK domiciled beneficiary in respect of any offshore income gain attributed to them.

A settlement with non-UK resident trustees is settlor interested because the UK resident and ordinarily resident, but non-domiciled, settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any capital gains. The trustees have made a ‘rebasings’ election under paragraph 126 Schedule 7 FA 2008.

The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.

The first capital payments made to beneficiaries were made in 2011-12. They were:

- £40,000 to a UK resident and domiciled beneficiary
- £40,000 to a UK resident but non-UK domiciled beneficiary (who was also the settlor)
- £40,000 to a non-UK resident beneficiary.

In 2010-11 there have been no capital payments in that year, or earlier years, to beneficiaries. So there can be no attribution of the OIG amount

to beneficiaries under the section 87 attribution rules in regulation 20. We then have to consider if there can be an attribution under the transfer of assets rules in regulation 21 for 2010-11. The entire £60,000 OIG amount can be attributed to the settlor as an offshore income gain for that year. The non-UK domiciled settlor is chargeable to income tax in 2010-11 on the £60,000 offshore income gains attributed to them, subject to any remittance basis considerations. The 'rebasing' election has no effect on the amount chargeable to income tax as the attribution has not been made via the section 87 attribution rules.

The OIG amount is reduced to Nil (regulation 21(6)). There are no unmatched OIG amounts to carry forward to 2011-12. There is nothing to match with the capital payments made in 2011-12 so the full amount of those payments are unmatched capital payments to carry forward at 5 April 2012.

Was this result intended in 2008? Since HMRC gave no indication of their thinking, it is hard to tell.

#### **64.18 OIG s.87/ToA interaction with motive defence**

EN FB 2008 provides:

46. Offshore income gains that are not matched in that year [the year they arise] will be chargeable to tax by reason of the provisions relating to the transfer of assets abroad legislation in Chapter 2 of Part 13 of the Income Tax Act 2007. *There is an exception to this rule where the motive or purpose defence in sections 736 to 742 applies to the gain.*

The legislation has not however achieved this result. Regulation 21(6) disapplies OIG s.87:

If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year,...

We must ask whether "income is treated under Chapter 2 of Part 13 of ITA 2007 as arising" if the motive defence applies. In fact even where the motive defence does apply, income is treated as arising *to the person abroad*. Regulation 21(1) OFTR provides:

Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income

becoming payable to the person.

But reg.21(6) is perhaps intending us to ask if income is treated as arising *to the transferor or to an individual who receives a benefit* under s.720 or s.731. Section 739(2) ITA provides the relief where the motive defence applies to pre-2006 transactions:

An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.

Section 737(2) ITA is identically worded for post-2006 transactions. Now, even though the individual is not liable for IT, the terms of reg.21(6) are still satisfied: “income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year” even if the individual is not liable for income tax on that income. The result is not absurd, especially since the motive defence may be retrospectively lost by a tainted associated operation.

A court may find this too literal an approach. But as the legislation becomes more and more complex (and the OFTR is as complex as tax can get), it is less and less appropriate to apply anything but a literal interpretation to find what it means.

## 64.19 Computation of OIG

Regulation 38 OFTR provides:

- (1) An offshore income gain arises to a person on the disposal of an asset if a basic gain arises on the disposal.
- (2) The disposal gives rise to an offshore income gain of an amount equal to the basic gain on the disposal.
- (3) The following provisions of this Chapter explain how the basic gain is computed.

### 64.19.1 “Basic gain”

So we move on to reg 39(1) OFTR:

In the case of a participant chargeable to income tax,<sup>54</sup> the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed without regard to

---

54 Also see 64.19.2 (OIG of company within CT).

any charge to income tax arising under this Part.

The amount of the “basic gain” is the same as the amount of a CGT chargeable gain would be had the asset not been an offshore fund.

There is no relief for tax credits or foreign tax paid by the offshore fund (except that such tax reduces the value of the fund and so reduces the OIG). But this is also the case for CGT.

Regulation 39(3) signposts eight special cases:

The computation of the basic gain is subject to—

- (a) regulation 34 (provisions applicable on death),<sup>55</sup>
- (aa) regulation 36A (exchanges and schemes of reconstruction);
- (d) regulation 37 (exchange of interests of different classes);
- (e) regulation 40 (earlier disposal to which the no gain/no loss basis applies);
- (f) regulation 41 (modifications of TCGA 1992);
- (g) regulation 42 (losses);
- (h) regulation 43 (special rules for certain existing holdings).

In these cases the amount of the OIG may exceed the basic gain.

I do not discuss regulations 36A-37.

Regulation 41(1) disapplies roll-over relief:

If the disposal forms part of a transfer to which section 162 of TCGA 1992 (roll-over relief on transfer of business) applies, the basic gain arising on the disposal is computed without regard to any deduction which falls to be made under that section in computing a chargeable gain.

It would be a rare case where roll-over relief would be in point.

Regulation 41(2) OFTR disapplies hold-over relief:

If the disposal is made otherwise than under a bargain at arm’s length and a claim for relief is made in respect of that disposal under section 165 or 260 of TCGA 1992 (relief for gifts), the claim does not affect the computation of the basic gain arising on the disposal.

#### 64.19.2 *OIG of company within CT*

For completeness: reg.39(2) OFTR provides:

---

<sup>55</sup> See 64.5 (OIG charge on death).

In the case of a participant chargeable to corporation tax, the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed—

- (a) without regard to any charge to corporation tax arising under this Part, and
- (b) without regard to any indexation allowance on the disposal under TCGA 1992.

Separate provision is needed to disapply the indexation allowance (which is available to companies but not to individuals).

Regulation 40 OFTR prevents indexation relief creeping in by the back door:

- (1) This regulation applies if—
  - (a) a participant is chargeable to corporation tax, and
  - (b) the amount of any chargeable gain or allowable loss which would arise on the disposal would fall to be computed in a way which, in whole or in part, would take account of the indexation allowance on an earlier disposal to which section 56(2) of TCGA 1992 (disposals on a no gain/no loss basis) applies.
- (2) The basic gain on the disposal is computed as if—
  - (a) no indexation allowance had been available on any such earlier disposal, and
  - (b) subject to that, neither a gain nor a loss had arisen to the person making such an earlier disposal.

## 64.20 CGT gain from offshore fund

A disposal for the purposes of the offshore funds rules is generally also a disposal for CGT.<sup>56</sup> The OFTR provides relief against a double charge. Regulation 44 sets the scene and provides terminology:

- (1) This Chapter applies if—
  - (a) a material disposal<sup>57</sup> gives rise to an offshore income gain, and
  - (b) that disposal also constitutes the disposal of the interest concerned for the purposes of TCGA 1992.

---

<sup>56</sup> See 64.4 (Meaning of “disposal”),

<sup>57</sup> Defined in reg.15 OFTR: “In these Regulations a ‘material disposal’ means a disposal to which this Part applies.” Since the expression “material disposal” is only used once in reg.44, it could have been more concisely expressed, but the meaning is clear.

(2) In this Chapter the disposal specified in paragraph (1)(b) is called the “TCGA disposal”.

Regulation 45 OFTR provides:

(1) This regulation applies for the purposes of the computation of the chargeable gain arising on the TCGA disposal.

(2) The provisions of this regulation have effect in relation to the TCGA disposal in substitution for section 37(1) of TCGA 1992 (deduction of consideration chargeable to tax on income).

(3) In the computation of the gain arising on the TCGA disposal, a sum equal to the offshore income gain shall be deducted from the sum which would otherwise constitute the amount or value of the consideration for the disposal.

Regulation 45(2) disapplies s.37(1) TCGA which normally avoids a double charge of IT and CGT. In its place, reg 45(3) introduces its own rules. I am not sure why, because s.37 would seem to have had the same effect.<sup>58</sup> I would be grateful to any reader who could explain.

#### 64.20.1 *Part-disposal*

Regulation 45(5)(6) OFTR deals with part-disposals:

(5) Paragraph (6) applies if the TCGA disposal is of such a nature that, by virtue of section 42 of TCGA 1992 (part disposals), an apportionment falls to be made of certain expenditure.

(6) No deduction is to be made by virtue of paragraph (3) in determining the amount or value of the consideration for the purposes of the fraction in section 42(2) of TCGA 1992.

The IF Manual provides:

**IFM13615: Offshore Funds: deduction of offshore income gains in computing capital gains: treatment of the disposal - general [Apr 2020]**

**Regulation 45 of SI 2009/3001**

---

58 Section 37(1) TCGA provides: “There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money’s worth charged to income tax as income of, or taken into account as a receipt in computing income or profits or gains or losses of, the person making the disposal for the purposes of the Income Tax Acts.”

... Where there is a part-disposal so that section 42 TCGA applies to determine the apportionment of acquisition costs to the disposal, the full amount of disposal consideration is taken into account for the purposes of the calculation of the fraction required by that section. In other words, the offshore income gain is not deducted from the disposal consideration for the purposes of calculating the part-disposal fraction at section 42(2) - for further details relating to part-disposals see the Capital Gains Manual.

Why is that?

### 64.21 Losses from offshore funds

Regulation 42 OFTR provides:

- (1) If the effect of any computation under regulations 39 to 41 would be to produce a loss, the basic gain on the disposal is nil.
- (2) Paragraph (1) applies notwithstanding section 16 of TCGA 1992 (losses determined in like manner as gains).
- (3) Accordingly, for the purposes of these Regulations, no loss is to be treated as arising on the disposal.

An offshore income gain is charged to IT but where a loss arises on the disposal, there is no income tax relief.<sup>59</sup> The loss will be allowable for CGT if ordinary CGT principles permit. HMRC agree. The IF Manual provides:

**IFM13410: Offshore Funds: participants in offshore funds: the charge to tax on disposal of an interest in a non-reporting fund: overview** [Apr 2020]

...Where there is a loss on disposal then the gain for the purposes of tax on an offshore income gain is nil; that is there is no recognition of losses for the purposes of these regulations (regulation 42). Accordingly, in a case where there is also a disposal for the purposes of TCGA, any loss made (calculated in accordance with that Act) may be treated as a capital loss for the purposes of TCGA.

This means that remittance basis taxpayers and non-residents will generally have no loss relief.<sup>60</sup>

---

<sup>59</sup> Section 152(8) ITA prevents miscellaneous losses being set against OIG.

<sup>60</sup> See 61.1 (Capital losses).

The allowable loss (if there is one) is computed on CGT principles (not the OIG computation rules) but the result is the same.

## 64.22 Tax regimes priority to OIG

### 64.22.1 *Loan relationships/derivatives/intangible fixed assets*

Regulation 25 OFTR provides:

- (1) No liability to tax arises under regulation 17 if any of conditions A to E is met.
- (2) Condition A is that the participant is required to treat the interest in the fund as a loan relationship under Chapter 3 of Part 6 of CTA 2009.
- (3) Condition B is that the participant is required to treat the interest in the fund as a derivative contract to which the provisions of Part 7 of CTA 2009 apply.
- (4) Condition C is that the asset is an intangible fixed asset to which the provisions of Part 8 of CTA 2009 apply.

These exemptions concern UK companies within corporation tax.

### 64.22.2 *Excluded indexed securities*

Regulation 25 OFTR provides:

- (1) No liability to tax arises under regulation 17 if any of conditions A to E is met...
- (5) Condition D is that the asset consists of excluded indexed securities as defined in section 433 of ITTOIA 2005.<sup>61</sup>

### 64.22.3 *Insurance policies*

Regulation 25 OFTR provides:

- (1) No liability to tax arises under regulation 17 if any of conditions A to E is met...
- (6) Condition E is that the asset is a right arising under a policy of insurance.

## 64.23 Transparent fund exemption

Regulation 29(1) OFTR provides:

---

<sup>61</sup> See 28.7 (Excluded indexed security).

No liability to tax arises under regulation 17 if—

- (a) the disposal is the disposal of an interest in an offshore fund falling within paragraph (b) or (c) of section 40A(2) of FA 2008 [now s.355 TIOPA, non-corporate mutual funds],<sup>62</sup> and
- (b) the fund is a transparent fund.

This is subject to paragraphs (2) and (3).

The exceptions are:

**Para Exception**

- (2) Fund holding other funds
- (3) Provision of information

#### 64.23.1 “Transparent fund”

Regulation 11 OFTR provides the definition:

For the purposes of these Regulations a fund is a “transparent fund” if, in the case of holders of interests in the fund who are individuals resident in the UK, any sums which form part of the income of the fund are of such a nature that those holders—

- (a) are chargeable to tax under a provision specified in section 830(2) of ITTOIA 2005<sup>63</sup> in respect of such of those sums as are referable to their interests, or
- (b) if any of that income is derived from assets within the UK, would be so chargeable had the assets been outside the UK.

I am not sure why the definition is expressed in such a convoluted fashion. But in practice this comes down to the usual tax sense of the word “transparent”.

#### 64.23.2 *Fund of funds*

Regulation 29(2) OFTR provides:

But there is a charge to tax under regulation 17 if—

- (a) there is a disposal of an interest in a transparent fund, and

---

62 See 63.3.1 (Offshore fund: Definition). The wording makes sense, as a fund within para (a) of the section cannot be a transparent fund, but it could have been more simply drafted.

63 Section 830(2) ITTOIA lists the 24 categories of RFI; see 15.10.2 (Relevant foreign income).

- (b) during a period beginning with the date the interest (or any part of it) was acquired and ending with the date of the disposal, the offshore fund has at any time held interests in other non-reporting funds which amounted in total to more than 5% by value of the offshore fund's assets.

The IF Manual provides:

**IFM13470: interests in certain transparent funds** [Apr 2020]

Arrangements that fall within the definition of an offshore fund and are transparent for income purposes but not transparent for capital gains purposes include, for example, so called 'Baker' unit trusts (following the case of *Archer-Shee v. Baker*, 11 TC 749) and certain foreign contractual arrangements (such as Fonds Commun de Placement ('FCPs')).

They are subject to the Offshore Funds (Tax) Regulations 2009 (SI2009/3001) generally, with certain modifications as described below. The purpose of the offshore funds regime is to ensure that income cannot be rolled up with any subsequent gain on disposal being charged only as a capital gain. If a fund is transparent for income, such as would be the case for certain unit trusts and contractual funds, then any income arising to the fund is treated as arising to an investor in proportion to their rights. This means that income is charged to tax as it arises.

However, it might be the case that an income transparent fund that came within paragraph (b) or (c) of S355(1) of TIOPA 2010 has itself invested in an opaque non-reporting fund, and if that were the case then income could be rolled up in the underlying fund, because income would only be credited to the investing fund if it was actually distributed.

To prevent unnecessary administrative burdens for transparent arrangements that come within the definition of an offshore fund and for their investors, any gain on disposal of an interest in an income-transparent offshore fund will not be taxed as an offshore income gain unless -

- during a period beginning on the date the interest (or any part of it) was acquired and ending on the date of the disposal, the offshore fund at any time held interests in other non-reporting funds (except for certain other transparent funds - see below) which amounted in total to more than 5% by value of the offshore fund's assets (regulation 29(2)), or
- the transparent fund is a non-reporting fund, and the fund fails to

make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the United Kingdom with respect to their shares of the income of the fund (regulation 29(3)).

Whilst this means that such funds will have to monitor their underlying investments, it allows them to avoid the need to apply for reporting fund status. UK investors will be charged capital gains tax or corporation tax on a capital gain arising, rather than incurring an offshore income gain, provided the fund has complied with regulation 29(2).

It follows that, if a transparent offshore fund is invested more than 5% by value of its total investments in non-reporting non-transparent funds, it may apply for reporting fund status in order to allow UK investors to be charged to tax on capital gains on disposal rather than on an offshore income gain. If reporting fund status is granted then the fund will be subject to the requirements of the regulations, including those relating to the calculation of income from non-reporting funds (see regulations 69 to 71).

### 64.23.3 *Transparent fund holds another*

Regulation 29(4) OFTR provides:

If, on the disposal by an offshore fund of an interest in another non-reporting fund, no liability would arise under regulation 17 by virtue of this regulation, that interest is not taken into account for the purposes of paragraph (2)(b).

The IF Manual provides:

**IFM13470: Offshore Funds: investors in non-reporting funds: exceptions to the charge to tax: interests in certain transparent funds** [Apr 2020

Investments by transparent non-reporting funds in other transparent non-reporting funds - Regulation 29(4)

There is one important relaxation of the requirements of regulation 29(2). That is, if a transparent non-reporting fund ('TNRF1') invests in another TNRF (TNRF2). Then, where a disposal of an interest in TNRF2 would not itself give rise to an offshore income gain (under regulation 17) for a UK investor, the interest held by TNRF1 in TNRF2 is ignored in determining whether TNRF1 is invested in non-reporting funds by more than 5% of the value of its assets in total. This is because, in such circumstances, there can be no significant roll-up of income in

the underlying fund(s).

This means that a TNRF's investments could, for example, consist wholly of interests in other underlying TNRFs that may only hold UK property or a TNRF could be the top-layer fund in a fund of funds structure, with multiple layers of other TNRFs below the top fund, provided that each of those underlying TNRFs themselves did not hold more than 5% by value of their total assets in other non-transparent, non-reporting funds.

In deciding whether the investee fund qualifies under this regulation, this rule may be applied to the investee fund and to any funds in which it, in turn, holds investments.

#### 64.23.4 *Provision of information*

Regulation 29(3) OFTR provides:

And there is a charge to tax under regulation 17 if—

- (a) there is a disposal of an interest in a transparent fund,
- (b) the fund is a non-reporting fund, and
- (c) the fund fails to make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the UK with respect to their shares of the income of the fund.

The IF Manual provides:

**IFM13470: Offshore Funds: investors in non-reporting funds: exceptions to the charge to tax: interests in certain transparent funds** [Apr 2020]

**Provision of 'sufficient information' to participants - Regulation 29(3)**

If a fund is unable to provide sufficient information to its UK investors to enable them to meet their UK tax obligations then an offshore income gain will be charged on any gains realised on subsequent disposals of relevant interests. The provision of 'sufficient information' would include details of an investor's proportionate share of both income arising to the fund and reported income or offshore income gains arising to it, as well as confirmation as to whether or not the fund has invested more than 5% by value of its assets in non-reporting funds.

In practice, many existing income-transparent funds with UK investors already provide vouchers to those clients detailing income arising to the fund, for example interest income, and foreign or UK dividends.

HMRC consider that, for the purposes of regulations 29 and 92D only, sufficient information will have been provided by the fund to a UK investor if the information would enable the UK investor to compute their final UK tax liability (arising from their interest in the offshore fund) correctly. The required level of detail will depend upon the complexity of the fund and/or its investments.

UK investors will still be required to complete their tax returns in the required format under self-assessment. For example, a unit holder would need to know whether the source of their income is land and property income, trading income, interest, UK dividends, foreign dividends and so on. Where transparent funds have complex structures and a number of sources of income, this can lead to complex tax issues arising for an individual completing their tax return.

#### 64.24 DT reliefs: OIG

Suppose an individual who is UK resident and treaty-resident in a foreign state disposes of offshore funds so that OIG arise directly to them.

Article 13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Article 21(1) OECD Model provides:

Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

It is an interesting question whether the individual claims relief under Art.13 or Art.21. At first sight OIG are “gains” which arise from the alienation of property, even though not chargeable gains and even though subject to income tax rather than CGT.<sup>64</sup> But OIG are also “income” if that word is given its UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (Other Income) but no capital gains article, then it is considered that treaty relief is in principle available.

##### 64.24.1 s.3 OIG: Company treaty-resident outside UK

---

64 See 53.22.2 (Gain subject to income tax).

Suppose OIG arise to a company which is treaty-resident in a foreign state and so are deemed to accrue to a UK resident participator under s.3 TCGA. In principle, DT reliefs apply to OIG deemed to accrue under OIG s.3 just as they do for chargeable gains deemed to accrue under CGT s.3.<sup>65</sup>

I have considered reg. 24(6) OFTR which provides:

If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

This does not disapply treaty relief, either because it has no application for the purposes of the treaty or because (while deeming the participator to be the disponent) it does not say that the non-resident company is not the alienator.<sup>66</sup>

#### 64.24.2 s.3 OIG: Participator treaty-resident outside UK

In the case of CGT s.3 gains, the participator has a difficulty in obtaining relief under a CG article, in that they are not at first sight the “alienator”.<sup>67</sup>

However it is considered that the Other Income article<sup>68</sup> provides relief, in the case of OIG. If the capital gains article is in point, it is arguable that reg. 24(6) OFTR deems the participator to be the alienator.

#### 64.24.3 s.87 OIG: Beneficiary treaty-resident outside UK

In the case of CGT s.87 gains, the beneficiary has a difficulty in obtaining relief, in that they are not at first sight the “alienator” and the gain is not “from the alienation of any property”.<sup>69</sup> However in the case of OIG it is considered that the Other Income article<sup>70</sup> provides relief. If the capital gains article were in point, it is arguable that reg.20(5) OFTR deems the beneficiary to be the alienator but the problem remains that the gain is not “from the alienation of any property”.

#### 64.24.4 DT relief: OIG of trust/co

If OIG arises to a trust, the position is similar to s.624; see 44.18 (DT

---

65 For this terminology, see 64.14 (OIG s.3 charge).

66 For the reason for this provision, see 64.13.4 (Deemed disposal for s.87).

67 See 60.38.1 (Participator treaty non-resident).

68 See 32.16 (DT relief: “Other Income”).

69 See 57.60.2 (Beneficiary treaty-resident outside UK).

70 See 32.16 (DT relief: “Other Income”).

relief: s.624 income). If the OIG arises to a company within s.720, s.720 issues arise: see 46.24 (DT relief: s.720 income).

**64.25 Reorganisations: navigation**

There are 5 sets of provisions to consider:

<b>Provisions</b>	<b>Topic</b>
s.26-138A TCGA	The “usual reorganisation rules”
Chapter 4 Part 3 TCGA	Collective Investment Scheme reorganisations
Reg 36A, 37 OFTR	Amendments to above rules for offshore funds
Sch 5AA TCGA	Definition of “reconstruction” for usual rules
Sch 5AZA TCGA	Definition of “reconstruction” for CI Scheme

<b>Usual rules</b>		<b>Collective Investment Scheme</b>	
<i>TCGA section</i>	<i>Topic</i>	<i>TCGA section</i>	<i>See para</i>
	<i>Reorganisation/reduction of share capital</i>		
126	Application of ss. 127 to 131	103E	64.26, 64.27
127	Equation of original shares/new holding	}	
128	Consideration given/received by holder		
129	Part disposal of new holding		
130	Composite new holdings		
131	Indexation allowance		
	<i>Conversion of securities</i>		
132	Equation of converted securities/new holding		
133	Premiums on conversion of securities		
133A	Cash payments: euroconversion of securities		
134	Compensation stock		
	<i>Company reconstructions</i>		
135	Exchange of securities for those in another company	103G	64.29
136	Reconstruction involving issue of securities	103H	64.30
137	Reorganisation TAAR	103K	64.33
138	Clearance in advance		
138A	Earn out rights		

As the reader interested in this area is likely to be familiar with the usual reorganisation rules, I set out the rules side by side to highlight the differences.

**64.26 “Collective investment scheme”**

Section 103E TCGA provides:

(1) In this Chapter (except this section) references to a collective investment scheme are to a collective investment scheme falling within any of the following paragraphs--

- (a) an authorised contractual scheme which is a co-ownership scheme,
  - (b) a unit trust scheme, or
  - (c) an offshore fund.
- (5) In this Chapter, “units” includes shares in a company.

### **64.27 Usual reorganisation rules disappplied**

Section 103E TCGA provides:

(2) Sections 126 to 138A (reorganisation of share capital, conversion of securities etc) do not apply for the purposes of the treatment of participants in collective investment schemes falling within subsection (1)(a) to (c) except as applied by this Chapter.

(3) But sections 135 to 138A (company reconstructions) may apply for those purposes where either company A or company B is not a collective investment scheme falling within subsection (1)(a) to (c).

(4) In subsection (3), “company A” and “company B” have the meaning given by section 135 or 136 as the case may be.

### **64.28 Exchange within same scheme**

Section 103F TCGA provides:

(1) This section applies in the following cases.

Case 1

Where--

- (a) a participant in a collective investment scheme exchanges units in the scheme for other units in the scheme (“new units”) of substantially the same value, and
- (b) the property subject to the scheme and the rights of participants to share in the capital and income in relation to that property are the same immediately before and immediately after the event (ignoring any changes as a result of a variation in management

charges<sup>71</sup>).

#### Case 2

Where there is a reorganisation of the units in a collective investment scheme in which

- [i] all the participants holding units in the scheme
  - [ii] or, where there are different classes of unit in the scheme, all the participants holding units in the same class,
- exchange all their units for other units (“new units”) in the scheme.

(2) Where this section applies--

- (a) sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if the collective investment scheme were a company and the event mentioned in subsection (1) were a reorganisation of its share capital, and
- (b) any distribution in relation to any new units is to be treated for the purposes of capital gains tax, corporation tax or income tax on the basis set out in section 127 (as adapted).

### 64.29 Exchange: other scheme units

Section 103G TCGA is the equivalent of the usual s.135 rule:

#### Section 135

(1) This section applies in the following circumstances where a company (“company B”) issues shares or debentures to a person in exchange for shares in or debentures of another company (“company A”).

#### Section 103G

(1) This section applies in the following cases where units in a collective investment scheme (“collective investment scheme B”) are issued to a person in exchange for units in another collective investment scheme (“collective investment scheme A”).

---

71 Defined s.103F(3): “In subsection (1), “management charges” mean the costs charged to the property subject to the scheme in respect of remunerating the parties operating the scheme, administrating the scheme or investing or safeguarding the property subject to the scheme.”

(2) The circumstances are:

Case 2

Where company B issues the shares or debentures in exchange for shares as the result of a general offer

- (a) made to members of company A or any class of them (with or without exceptions for persons connected with company B), and
- (b) made in the first instance on a condition such that if it were satisfied company B would have control of company A.

Case 1

Where company B holds, or in consequence of the exchange will hold, more than 25% of the ordinary share capital of company A.

Case 3

Where company B holds, or in consequence of the exchange will hold, the greater part of the voting power in company A.

(2) The cases are--

Case 1

Where units in collective investment scheme B are issued in exchange for units as the result of a general offer--

- (a) made to participants in collective investment scheme A or any class of them, and
- (b) made in the first instance on a condition such that if it were satisfied the property subject to collective investment scheme B would include units in collective investment scheme A giving rights to more than 50% of the capital, and more than 50% of the income, of collective investment scheme A.

Case 2

Where--

- (a) under an arrangement, participants in collective investment scheme A exchange units in that scheme for units of substantially the same value in collective investment scheme B, and
- (b) in consequence of the exchanges under the arrangement, 85% or more of the property subject to collective investment scheme B is constituted by units in collective investment scheme A.

(3) Where this section applies, sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if company A and company B were the same company and the exchange were a reorganisation of its share capital.

(6) This section has effect subject to section 137(1) (exchange must be for bona fide commercial reasons and not part of tax avoidance scheme).

(3) Where this section applies, sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if collective investment scheme A and collective investment scheme B were the same company and the exchange were a reorganisation of its share capital.

(4) This section has effect subject to section 103K(1) (exchange must be for bona fide commercial reasons and not part of tax avoidance scheme).

### 64.30 Reconstruction: issue of units

Section 103H TCGA is the equivalent of the usual s.136 rule:

#### Section 136 TCGA

(1) This section applies where

(a) an arrangement between a company (“company A”) and

(i) the persons holding shares in or debentures of the company, or

(ii) where there are different classes of shares in or debentures of the company, the persons holding any class of those shares or debentures,

is entered into for the purposes of, or in connection with, a scheme of reconstruction, and

#### Section 103H

(1) This section applies where--

(a) for the purposes of, or in connection with, a scheme of reconstruction an arrangement is entered into by

[i] all the participants holding units in an original collective investment scheme (“scheme A”), or

[ii] where there are different classes of units in the scheme, all the participants holding any class of those units, and

- (b) under the arrangement
  - (i) another company (“company B”) issues shares or debentures to those persons in respect of and in proportion to (or as nearly as may be in proportion to) their relevant holdings in company A, and
  - (ii) the shares in or debentures of company A comprised in relevant holdings are retained by those persons or are cancelled or otherwise extinguished.

(2) Where this section applies

- (a) those persons are treated as exchanging their relevant holdings in company A for the shares or debentures held by them in consequence of the arrangement, and
- (b) sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if company A and company B were the same company and the exchange were a reorganisation of its share capital.

For this purpose shares in or debentures of company A comprised in relevant holdings that are retained are treated as if they had been cancelled and replaced by a new issue.

- (b) under the arrangement--
  - (i) units in a successor collective investment scheme or feeder fund (“scheme B”) are issued to those participants in respect of and in proportion to (or as nearly as may be in proportion to) their relevant holdings in scheme A, and
  - (ii) the units in scheme A comprised in relevant holdings are retained by those participants or are cancelled or otherwise extinguished.

(2) Where this section applies--

- (a) those participants are treated as exchanging their relevant holdings in scheme A for the units held by them in consequence of the arrangement, and
- (b) sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if scheme A and scheme B were the same company and the exchange were a reorganisation of its share capital.

For this purpose units in scheme A comprised in relevant holdings that are retained are treated as if they had been cancelled and replaced by a new issue.

(3) Where a reorganisation of the share capital of company A is carried out for the purposes of the scheme of reconstruction, the provisions of subsections (1) and (2) apply in relation to the position after the reorganisation.

(4) In this section  
(a) “scheme of reconstruction” has the meaning given by Schedule 5AA to this Act;

(3) Where a reorganisation within case 2 of section 103F(1) of the units in scheme A is carried out for the purposes of the scheme of reconstruction, the provisions of subsections (1) and (2) apply in relation to the position after the reorganisation.

[See s.103J]

- (b) references to “relevant holdings” of shares in or debentures of company A are
- (i) where there is only one class of shares in or debentures of the company, to holdings of shares in or debentures of the company, and
  - (ii) where there are different classes of shares in or debentures of the company, to holdings of a class of shares or debentures that is involved in the scheme of reconstruction (within the meaning of paragraph 2 of Schedule 5AA);
- (c) references to shares or debentures being retained include their being retained with altered rights or in an altered form, whether as the result of reduction, consolidation, division or otherwise; and
- (d) any reference to a reorganisation of a company's share capital is to a reorganisation within the meaning of section 126.
- (4) In this section, references to “relevant holdings” of units are--
- (a) where there is only one class of units in scheme A, to holdings of units in the scheme, and
  - (b) where there are different classes of units in scheme A, to holdings of a class of units that is involved in the scheme of reconstruction (within the meaning of paragraph 3 of Schedule 5AZA).
- [See s.103J]
- (6) This section has effect subject to section 137(1) (scheme of reconstruction must be for bona fide commercial reasons and not part of tax avoidance scheme).
- (5) This section has effect subject to section 103K(1) (scheme of reconstruction must be for bona fide commercial reasons and not part of tax avoidance scheme).

### 64.31 Reconstruction with conversion

Section 103I TCGA provides:

- (1) This section applies where--
- (a) a scheme of reconstruction is entered into and given effect to,

and

(b) for the purposes of, or in connection with, the scheme of reconstruction, units in a collective investment scheme (“the conversion scheme”) are issued to participants in another collective investment scheme (“scheme C”) in exchange for and in proportion to (or as nearly as may be in proportion to) their conversion holdings in accordance with regulation 12(1)(b) of the Undertakings for Collective Investment in Transferable Securities Regulations 2011.<sup>72</sup>

(2) Where this section applies sections 127 to 131 apply with the necessary adaptations as if scheme C and the conversion scheme were the same company and the exchange were a reorganisation of its share capital.

(3) In this section “conversion holdings” means the units in scheme C to be converted in accordance with regulation 12(1)(b) of the Undertakings for Collective Investment in Transferable Securities Regulations 2011 into units in the conversion scheme for the purposes of, or in connection with, the scheme of reconstruction.

(4) This section has effect subject to section 103K(1) (scheme of reconstruction must be for bona fide commercial reasons and not part of tax avoidance scheme).

### 64.32 Supplementary provisions

Section 103J TCGA provides:

In sections 103H and 103I--

- (a) “feeder fund” has the meaning given by paragraph 3(2) of Schedule 5AZA to this Act;
- (b) “scheme of reconstruction” has the meaning given by paragraph 1 of Schedule 5AZA;

---

<sup>72</sup> Reg 12(1) provides: “The unit-holders of the merging and the receiving UCITS may require their UCITS—

- (a) to purchase or redeem any units they hold in either the merging or the receiving UCITS; or
- (b) to convert any units they hold in either the merging or receiving UCITS into units of another UCITS which—
  - (i) has similar investment policies to those of the merging or receiving UCITS; and
  - (ii) is managed by the same manager or by a manager which is associated with that manager within the meaning of section 256 of the Companies Act 2006.”

- (c) “original collective investment scheme” and “successor collective investment scheme” must be construed in accordance with paragraph 2(2) of Schedule 5AZA; and
- (d) references to units being retained include their being retained with altered rights or in an altered form, whether as the result of reduction, consolidation, division or otherwise.

### 64.33 Reorganisation TAAR

Section 103K TCGA is the equivalent of the usual s.137 rule:

#### Section 135

(1) Subject to subsection (2) below, and section 138, neither section 135 nor section 136 shall apply to any issue by a company of shares in or debentures of that company in exchange for or in respect of shares in or debentures of another company unless the exchange or scheme of reconstruction in question is effected for bona fide commercial reasons and does not form part of a scheme or arrangements of which the main purpose, or one of the main purposes, is avoidance of liability to capital gains tax or corporation tax.

(2) Subsection (1) above shall not affect the operation of section 135 or 136 in any case where the person to whom the shares or debentures are issued does not hold more than 5 per cent of, or of any class of, the shares in or debentures of the second company mentioned in subsection (1) above.

#### Section 103K

(1) Subject to subsection (2) below, and section 138, section 103G, 103H or 103I shall not apply to any issue of units in a collective investment scheme in exchange for or in respect of units in another scheme unless the exchange or scheme of reconstruction in question is effected for bona fide commercial reasons and does not form part of a scheme or arrangements of which the main purpose, or one of the main purposes, is avoidance of liability to capital gains tax, corporation tax or income tax.

(2) Subsection (1) above shall not affect the operation of section 103G, 103H or 103I in any case where the participant to whom the units are issued does not hold more than 5 per cent of, or of any class of, the units in the second scheme mentioned in subsection (1) above.

(3) For the purposes of subsection (2) above shares or debentures held by persons connected with the person there mentioned shall be treated as held by him.

(4) If any tax assessed on a person (the chargeable person) by virtue of subsection (1) above is not paid within 6 months from the date determined under subsection (4A) below, any other person who

- (a) holds all or any part of the shares or debentures that were issued to the chargeable person, and
- (b) has acquired them without there having been, since their acquisition by the chargeable person, any disposal of them not falling within section 58(1) or 171,

may, at any time within 2 years from that date, be assessed and charged (in the name of the chargeable person) to all or, as the case may be, a corresponding part of the unpaid tax; and a person paying any amount of tax under this subsection shall be entitled to recover from the chargeable person a sum equal to that amount together with any interest paid by him under section 87A of the Management Act on that amount.

(3) For the purposes of subsection (2) above units held by participants connected with the participant there mentioned shall be treated as held by that participant.

(4) If any tax assessed on a participant (“the chargeable participant”) by virtue of subsection (1) above is not paid within 6 months from the date determined under subsection (5) below, any other participant who--

- (a) holds all or any part of the units that were issued to the chargeable participant, and
- (a) has acquired them without there having been, since their acquisition by the chargeable participant, any disposal of them not falling within section 58(1) or 171,

may, at any time within 2 years from that date, be assessed and charged (in the name of the chargeable participant) to all or, as the case may be, a corresponding part of the unpaid tax; and a participant paying any amount of tax under this subsection shall be entitled to recover from the chargeable participant a sum equal to that amount together with any interest paid by him under section 87A of the Management Act on that amount.

- (4A) The date referred to in subsection (4) above is whichever is the later of
- (a) the date when the tax becomes due and payable by the chargeable person; and
  - (b) the date when the assessment was made on the chargeable person.
- (5) The date referred to in subsection (4) above is whichever is the later of--
- (a) the date when the tax becomes due and payable by the chargeable participant; and
  - (b) the date when the assessment was made on the chargeable participant.
- (6) Section 138 (procedure for clearance in advance) applies to this section as it applies to section 137 (with any necessary modifications).

#### 64.34 Reorganisations: Offshore funds

The above rules apply to collective investment schemes. OFTR further tweaks these reorganisation rules in relation to offshore funds. Reg 36A OFTR provides:

- (1) The following sections of TCGA 1992 do not apply to the extent that an interest in a non-reporting fund is exchanged or treated as exchanged for an asset which is not an interest in a non-reporting fund.
- (2) The sections are—
  - (a) section 103G (exchange of units for those in another collective investment scheme),
  - (b) section 103H (scheme of reconstruction involving issue of units),
  - (c) section 135 (exchange of securities for those in another company), and
  - (d) section 136 (scheme of reconstruction involving issue of securities).
- (3) In a case where one of those sections would apply apart from paragraph (1), the exchange or deemed exchange shall for the purposes of this Part constitute a disposal of interests in the non-reporting fund for a consideration equal to their market value at the time of the exchange or deemed exchange.

Reg 37 OFTR provides:

- (1) If conditions A to D are met, section 127 of TCGA 1992 (equation

of original shares and new holding) does not prevent an exchange from constituting a disposal for the purposes of these Regulations.

(2) Condition A is that an offshore fund is constituted by a class of interest (“class A”) in main arrangements.<sup>73</sup>

(3) Condition B is that a participant exchanges an interest of class A for an interest in another offshore fund constituted by a different class of interest (“class B”) in those main arrangements.

(4) Condition C is that the interest of class A is at the time of the exchange an interest in a non-reporting fund.

(5) Condition D is that the interest of class B is at the time of the exchange an interest which is not an interest in a non-reporting fund.

(6) Any disposal to which this regulation applies is to be treated as a disposal for a consideration equal to the market value of the rights at the time of the exchange.

The object is to prevent fundholders reorganising their way out of OIG status, and so out of OIG charges.

---

73 See 63.11 (Different classes of interest).

## CHAPTER SIXTY FIVE

# INCOME FROM OFFSHORE FUNDS

65.1 Non-reporting fund holds reporting fund  
65.7 Non-reporting fund holds reporting fund  
65.9 Non-reporting becomes reporting fund

### 65.1 Introduction

This chapter considers the taxation of income arising from offshore funds. The taxation of offshore income gains (which arise on the disposal of a fund) is considered in the previous chapter.

### 65.2 Bond fund

Section 378A ITTOIA reclassifies some dividends as interest:

- (1) This section applies where—
  - (a) a dividend<sup>1</sup> is paid by an offshore fund, and
  - (b) the offshore fund fails to meet the qualifying investments test at any time in the relevant period.<sup>2</sup>

---

1 Defined in s378A(7): “In this section ... “dividend” includes any distribution that (but for this section) would be treated as a dividend for income tax purposes”. What is this referring to?

2 Defined in s.378A(4)(5):

- (4) “The relevant period” means—
  - (a) the relevant period of account of the offshore fund, or
  - (b) if longer, the period of 12 months ending on the last day of that period.
- (5) “The relevant period of account” means—
  - (a) the last period of account ending before the dividend is paid, in a case in which the profits available for distribution at the end of that period (and not used since then by distribution or otherwise) equal or exceed the amount of the dividend (aggregated with any other distribution made by the offshore fund at the same time), and
  - (b) the period of account in which the dividend is paid, in any other case.

(2) The dividend is treated as interest for income tax purposes.

I refer to offshore funds within s.378A as “**bond funds**”, and s.378A is “**the bond-fund rule**”. In short, the rule re-categorises dividends as interest.

EN FA 2009 explains:

Certain distributions from offshore funds are economically similar to payments of yearly interest. [Section 378A ITTOIA] charges distributions of this type to tax as if they were yearly interest.

... The test in subsection (3) is similar to that which applies to corporate investors for the purposes of the loan relationships legislation. (See sections 490 and 493 CTA 2009). A distribution is treated as interest if the offshore fund, at any time during the ‘relevant period’, holds more than 60 per cent of its assets in the form of qualifying investments. The definition of a qualifying investment is set out in section 494 CTA 2009 and, in summary, refers to interest bearing and economically similar investments.

... The purpose of the clause is to prevent a tax advantage being gained by holding interest bearing assets within an offshore fund structure....

... where a distribution from an offshore fund takes the form of a dividend the rate will be the dividend tax rate after taking into account the dividend tax credit. However, where the offshore fund is substantially invested in interest bearing, or economically similar, assets as described in paragraph 4 above then any distribution will be treated as interest for income tax purposes.

The bond-fund rule applies to reporting and non-reporting funds.

One might have thought that the bond-fund rule only applies to a corporate fund, as a non-corporate fund does not pay “dividends”. But reg 96 OFTR<sup>3</sup> assumes s.378A (the bond-fund rule) may also apply to a non-corporate non-transparent fund. However, the only effect of the bond-fund rule, if it does apply to a non-corporate non-transparent fund, would be to categorise as interest what would otherwise be Misc Sweep-up Income or Annual Payment income: that will rarely if ever make any difference.<sup>4</sup>

The bond-fund rule does not apply to transparent funds, because a

---

3 See 65.4 (Taxation of reporting fund income).

4 It could make a difference if there were miscellaneous income losses.

distribution from (or through) a transparent fund is not a “dividend”.

### 65.2.1 *60% qualifying investments test*

Section 378A(3) ITTOIA defines the qualifying investments test:

For the purposes of this section, an offshore fund fails to meet the qualifying investments test if the market value of the fund’s qualifying investments exceeds 60% of the market value of all of the assets of the fund (excluding cash awaiting investment)...

“qualifying investments” has the meaning given in section 494 of CTA 2009.

### 65.2.2 *Qualifying investments*

Section 494(1) CTA 2009 provides:

In section 493 “qualifying investments”, in relation to an open-ended investment company, a unit trust scheme or an offshore fund, means investments of the company, scheme or fund of any of the following descriptions—

- (a) money placed at interest,
- (b) securities,<sup>5</sup>
- (c) shares in a building society,
- (d) qualifying holdings in an open-ended investment company, a unit trust scheme or an offshore fund,
- (e) alternative finance arrangements,
- (f) derivative contracts whose underlying subject matter consists wholly of any one or more of—
  - (i) the matters referred to in paragraphs (a) to (e) (other than diminishing shared ownership arrangements), and
  - (ii) currency,
- (g) contracts for differences whose underlying subject matter consists wholly of any one or more of—
  - (i) interest rates,
  - (ii) creditworthiness, and
  - (iii) currency, and
- (h) derivative contracts not within paragraph (f) or (g) where there is a hedging relationship between the contract and an asset

---

<sup>5</sup> Section 494(2) CTA 2009 provides: “In this section ... "security" does not include shares in a company”.

within paragraphs (a) to (d).

I do not consider the definitions of the terms used above for which s.494(2) CTA 2009 incorporates definitions by reference:

<b>Term</b>	<b>Definition in CTA 2009</b>
Contract for differences	s.582
Diminishing shared ownership arrangements	s.504
Hedging relationship	s.496
Qualifying holding	s.495(1)
Underlying subject matter	s.583

### 65.3 Deemed reporting-fund income

In the absence of express provision, undistributed income of offshore funds would not be subject to tax. Regulation 94(1)(2) OFTR deal with non-transparent/transparent funds;<sup>6</sup> it is helpful to read them side by side:

#### **Reg 94(1): Non-transparent fund**

In the case of a reporting fund which is not a transparent fund, the Tax Acts have effect as if the excess (if any) of

[a] the reported income of the fund in respect of a reporting period over

[b] the distributions made by the fund in respect of the reporting period

were additional distributions made to the participants in the fund in proportion to their rights.

#### **Reg 94(2): transparent fund**

In the case of a reporting fund which is a transparent fund, the Tax Acts have effect as if the excess (if any) of

[a] the reported income of the fund in respect of a reporting period over

[b] the income of the fund for the reporting period

were additional income of the participants in the fund in proportion to their rights.

I refer to this as “**deemed reporting-fund income**”.

Reg.94(3) OFTR identifies the date and recipient of deemed reporting-fund income:

The excess specified in paragraphs (1) and (2) is treated as made, on the

---

<sup>6</sup> See 63.13 (“Transparent fund”).

fund distribution date,<sup>7</sup> or on such earlier date as the reported income in respect of that reporting period is recognised in the participant's accounts, to participants holding an interest in the fund at the end of the reporting period.

Deemed reporting-fund income is notional income, distinct from the actual income of the offshore fund. For instance, tax credits on the fund would not be available to the participant.

For completeness: reg 94(3A) deals with the interaction with the share-matching 30-day rule:<sup>8</sup>

If—

- (a) a participant disposes of an interest in a reporting fund in a reporting period (“the earlier period”), and
- (b) section 106A of TCGA 1992 (identification of securities: capital gains tax) applies to identify the whole or any part of that interest with an interest acquired in the next reporting period,

then, for the purposes of paragraph (3), the disposal of the interest so identified shall be ignored and the participant shall be treated as holding that interest at the end of the earlier period.

### 65.4 Taxation of reporting-fund income

Regulations 95/96/97 OFTR deal with reporting-fund income as follows:

<b>Reg</b>	<b>Type of reporting fund</b>
95	Corporate fund
96	Non-corporate non-transparent fund
97	Transparent fund

It may be convenient to read them side by side:

#### **Reg 95: corporate fund    Reg 96: non-corp. non-transp.    Reg 97: transparent**

(1) This regulation applies if—	(1) This regulation applies if—	(1) This regulation applies if—
---------------------------------	---------------------------------	---------------------------------

---

7 This term is defined in reg.94(4) OFTR: In these Regulations the “fund distribution date” for a reporting period of a reporting fund means the date six months following the last day of the reporting period.

8 See 53.10.2 (Share-matching rules).

(a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period, and

[identical to 95(1)(a)]

(b) the fund falls within section 40A(2)(a) of FA 2008 [now s.355(1)(a) TIOPA: corporate fund<sup>9</sup>].

(b) the fund falls within paragraph (b) or (c) of section 40A(2) of FA 2008 [now s.355(1)(b)(c) TIOPA: non-corporate fund<sup>10</sup>], and

(c) the fund is not a transparent fund.

(a) a reporting fund is a transparent fund, and

(2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.

[identical to 95(2)]

(b) some or all of the excess specified in regulation 94(2) is treated as income of a participant by virtue of that provision.

(3) If section 378A of ITTOIA 2005 (offshore fund distributions)<sup>11</sup> applies to any amount falling within paragraph (1) or (2), the amount is charged to income tax in accordance with that section.

(3) Any amount to which paragraph (1) or (2) applies is charged to income tax—

(2) Any amount to which paragraph (1) applies is charged to income tax

(a) under section 378A of ITTOIA 2005 (offshore fund distributions), or

9 See 63.3.1 (Offshore fund: Definition)

10 See 63.3.1 (Offshore fund: Definition)

11 See 65.2 (Bond fund).

(b) (if that section does not apply) under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the distribution is made,

but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.<sup>12</sup>

under Chapter 8 of Part 5 of ITTOIA 2005 as relevant foreign income within the meaning given by section 830 of ITTOIA 2005 for the year of assessment in which the distribution is made,

but sections 688(1) and 689 of ITTOIA 2005 do not apply.

In short:

- (1) Deemed reporting-fund income of bond funds is “treated as interest for income tax purposes.”
- (2) Corporate non-bond fund: deemed reporting-fund income is treated as a distribution.
- (3) Non-corporate non-bond fund: deemed reporting-fund income is treated as miscellaneous sweep-up income.

#### 65.4.1 *Non-resident participant*

*Actual distributions from a non-transparent fund:* the income is non-UK source, so a non-resident is not subject to tax.

*Deemed reporting-fund income from a non-transparent fund:* A non-resident is not subject to tax as reg 95/96 only apply if the participant is “chargeable to income tax”.

*Deemed reporting fund income from a transparent fund:* The deeming in reg 92(2) OFTR is that the deemed income arises from the fund, so the income is foreign source and so a non-resident is not subject to tax.<sup>13</sup>

*Actual distributions of a transparent fund:* UK source income of the

---

<sup>12</sup> The disapplied sections are the rules for quantum of charge/ remittance basis and liability for s.687 misc sweep-up income. This follows the precedent of the OIG provisions; see 64.3.5 (Charge on OIG).

<sup>13</sup> See 15.2 (Source: IT territorial limit).

transparent fund would be chargeable, subject to non-resident IT relief,<sup>14</sup> but a charge would rarely if ever happen in practice.

It is considered that deemed reporting-fund income counts as income of the person abroad, for the purposes of the ToA provisions, even though it is not chargeable on the person abroad.

#### 65.4.2 *Remittance basis participant*

*Actual distributions from a non-transparent fund:* the income is RFI and qualifies for the remittance basis.

*Deemed reporting-fund income from a non-transparent fund:* The deeming in reg 92(1) OFTR is that the deemed income arises from the fund, so the income is RFI and qualifies for the remittance basis.

*Deemed reporting fund income from a transparent fund:* Reg 97(2) states that the income is RFI, so it qualifies for the remittance basis.

*Actual distributions of a transparent fund:* UK source income of the transparent fund would be chargeable on an arising basis; but that would rarely if ever happen in practice.

Can deemed reporting-fund income be remitted? Legislation frequently deems an individual to receive income/gains (eg deemed s.624/s.720 income, deemed s.3 gains). In these cases the legislation almost always has a provision which deems some actual property to be derived from the individual's deemed income/gain.<sup>15</sup> So if that property is received by the individual (or a relevant person) there is a taxable remittance. In this case however there is no such provision. So it appears at first sight that the deemed reporting-fund income cannot be remitted. While the actual income in the hands of the offshore fund could be received in the UK, those funds do not derive from the deemed reporting-fund income. The deemed reporting-fund income perhaps derives from those funds.

This does lead to a result that might be thought too good to be true. So it is more than possible that a court might read in an implied provision that the actual income of the offshore fund is derived from the deemed reporting-fund income, though that verges on legislation rather than construction.

HMRC may not agree. The IF Manual provides:

---

14 See 42.1 (Non-residents IT relief: Introduction),

15 See for instance 60.24 (Section 3 remittance basis).

**IFM13338: Offshore Funds: participants in offshore funds: participants within the charge to income tax: non-UK domicile: remittance basis [Apr 2020]**

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis, then the normal remittance basis rules will apply to income arising from the holding in the offshore fund (for detailed guidance see the Residence, Domicile and Remittance basis Manual from RDRM3000.

In the case of income that is reported by a reporting fund, but is not distributed, then that income has not been remitted to the UK.

**Transparent Funds**

In a case where the offshore fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case, the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply – the income is charged to tax on the UK resident individual as it arises. Where the income arises offshore then the remittance rules will apply.

The IF Manual provides:

**IFM13372: Offshore Funds: participants in offshore funds: participants within the charge to income tax: disposals: reporting funds [Apr 2020] to w/e 5 Mar 2021)**

**...Remittance basis users**

The proceeds of a disposal of a reporting fund will normally constitute a ‘mixed fund’ for the purposes of the remittance basis rules, applicable to UK resident investors subject to income tax. This is because the proceeds may have been funded by undistributed (and therefore unremitted) reported income as well as by the original investment and any capital growth.

65.4.3 *Tax credit on distribution*

For completeness: reg 95(4) OFTR dealt with tax credits:

If

[a] paragraph (3) does not apply to any amount falling within paragraph (1) or (2), but

[b] the participant is entitled to a tax credit on receiving a distribution falling within paragraph (1),

section 397A of ITTOIA 2005 (savings and investment income:

dividends from non-UK resident companies) also applies to the excess falling within paragraph (2).

But tax credits were abolished in 2016, and s.397A was repealed, so reg 95(4) cannot apply. The failure to repeal it was an oversight or, perhaps, a decision was made not to bother to bring statutory instruments up to date.

### 65.5 Non-reporting fund income

Non-reporting funds may not make any income distributions to participants. But if they do, then subject to the bond-fund rule, normal principles apply:

- (1) Distributions from corporate funds are taxed as dividend income.
- (2) Distributions from non-transparent non-corporate funds (eg non-transparent unit trusts) would be taxed as Annual Payments.
- (3) Net income of transparent funds would be taxed as the income of the underlying assets.

In each case the income will in principle be RFI and so can qualify for the remittance basis.

### 65.6 Summary

Type of fund	Type of distribution	Categorisation/Reference	
Corporate	Bond fund	Dividend	Interest s.378A
		Distribution	Interest reg 95(3)(a)
		Deemed R-F income	Interest reg 95(3)(a)
	Non-bond fund	Dividend/distribution	Div/distribution Ord principles
Deemed R-F income		Distribution reg 92(1)	
Non corporate Non transparent	Bond fund	Distribution	Interest s.378A
		Deemed R-F income	Interest reg 96(3)(a)
	Non-bond fund	Distribution	Misc income reg 96(3)(b)
		Deemed R-F income	Misc income reg 96(3)(b)

### 65.7 Non-reporting fund holds reporting fund

Regulation 16 OFTR provides:

(1) This regulation applies if a non-reporting fund which is a transparent fund has an interest in a reporting fund.

(2) In the case of any **excess** specified in regulation 94(1) or (2) which is treated, under that regulation, as made to the non-reporting fund, the Tax Acts have effect as if the excess were additional income of the participants in the non-reporting fund in proportion to their rights.

(3) The additional income is treated as arising on the same date as the excess is treated as made to the non-reporting fund.

(4) If a participant in the non-reporting fund is chargeable to income tax, the additional income is charged as relevant foreign income within the meaning given by section 830 of ITTOIA 2005.

### 65.8 Fund treated as non-trading

This topic is dealt with in chapter 6 part 3 OFTR. A full discussion needs a long chapter to itself. In short, reg.80 OFTR provides:

(1) This regulation applies if a diversely owned fund carries out an investment transaction in an accounting period.

(2) The investment transaction is treated as a non-trading transaction.

The consequence of non-trading status is that the profit of the transaction is not income and need not be distributed by reporting funds.

The definitions of diversely owned and investment transaction are not considered here. HMRC argue that reg.80 is not to be taken to mean what it says:

HMRC is aware that there has been recent industry speculation as to whether regulations contained within Chapter 6 of Part 3 of The Offshore Funds (Tax) Regulations 2009 (the 'regulations'), setting out when transactions by certain offshore 'reporting' funds are not treated as trading transactions for the purposes of computing 'reportable income', has any relevance to matters relating to the taxation of such funds potentially trading in the UK through a permanent establishment or agent. HMRC is therefore confirming that there is no such relevance.

Regulation 80(2) of the regulations, which confirms that certain transactions are treated as non-trading transactions, applies only for the purposes of Chapter 5 of

the regulations; that is for the purposes of computing an offshore fund's reportable income in order to establish the UK tax position of participants in the fund.

The regulations are made under powers enabling provision to be made about the tax treatment of participants in an offshore fund (section 41 FA 2008) and they should be read in that context. Specifically, the regulations do not make or purport to make rules that affect the taxation of any of the funds referred to therein as 'offshore funds'; only to regulate the taxation of the returns from those funds to persons taxable under UK legislation. Funds that are taxable in the UK are dealt with by other legislation.

It is a question of fact whether or not, for the purposes of that other legislation, a non-resident fund is carrying on a trade in the UK. Where such a fund is carrying on a trade in the UK through an investment manager operating here, the protection of the Investment Manager Exemption may be available in relation to any 'investment transaction' specified in the Investment Manager (Specified Transaction) Regulations 2009.<sup>16</sup>

## 65.9 Non-reporting becomes reporting fund

Regulation 48 OFTR provides:

- (1) This regulation applies if an offshore fund ceases to be a non-reporting fund and becomes a reporting fund.
- (2) A participant in the fund may make an election to be treated—
  - (a) as disposing of the interest owned by the participant in the non-reporting fund at its market value on the disposal date, and
  - (b) as acquiring a holding in the reporting fund at the beginning of the reporting fund's first period of account.

This is subject to paragraph (5).

- (3) Chapter 5 of this Part applies to determine the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a).
- (4) The deemed acquisition referred to in paragraph (2)(b) is treated as made for the same amount as the deemed disposal referred to in paragraph (2)(a).
- (5) An election may not be made under paragraph (2) unless the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a) (determined in accordance with paragraph (3)) is greater than zero.
- (6) If the participant is chargeable to income tax, the election mentioned in paragraph (2) must be made by being included in a return made for the tax year which includes the disposal date.

---

<sup>16</sup> <http://webarchive.nationalarchives.gov.uk/20140109143644/http://www.hmrc.gov.uk/cta/invest-man-exempt.htm> (Feb 2010).

(7) If the participant is chargeable to corporation tax, the election mentioned in paragraph (2) must be made by being included in the participant's company tax return for the accounting period which includes the disposal date.

(8) In this regulation—

“company tax return” has the same meaning as in Schedule 18 to the FA 1998;

the “disposal date” means the final day of the last period of account before the fund becomes a reporting fund.

### **65.10 2009 transitional rules**

I do not attempt to discuss transitional rules in detail.<sup>17</sup>

Reg.30 OFTR provides:

(1) No liability to tax arises under regulation 17 in respect of any rights in an offshore fund to which this regulation applies if the rights are acquired by a person—

- (a) before 1st December 2009, or
- (b) in accordance with paragraph (2).

(2) Rights are acquired in accordance with this paragraph if—

- (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
- (b) in the case of an agreement which was conditional, the conditions are met before that date, and
- (c) the agreement is not varied on or after that date.

(3) Rights of a person in a fund are rights in an offshore fund to which this regulation applies if, on the date on which the person acquired the

---

<sup>17</sup> Note also the following HMRC statement: “HMRC regrets that ... the Statutory Instrument (SI 2009/3139) ... contained an error with respect to long periods of account.

The intention was that the transitional rules, which provide for an existing fund to apply for distributing status for periods ended on or after 1 December 2009, would not apply to any period ending after 31 May 2012 (not 2011 as provided for in the instrument).

The government intends to amend the cut-off date given in sub-paragraph 3(3B) of Schedule 1 to The Offshore Funds (Tax) Regulations (SI 2009/3001 as amended by SI 2009/3139) to read 31 May 2012.

This announcement therefore gives notice of the intended amendment, which will be made at the first convenient opportunity.”

rights, those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA.

Reg.43 OFTR provides for the case where a person holds an offshore fund before 2009 and purchases more of the same fund:

- (1) This regulation applies if—
  - (a) a person acquired rights (the “protected rights”) in an offshore fund—
    - (i) before 1st December 2009, or
    - (ii) in accordance with paragraph (2),
  - (b) immediately before 1st December 2009 those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA, and
  - (c) on or after 1st December 2009 the person acquires additional rights in the offshore fund (the “non-protected rights”).
- (2) Rights are acquired in accordance with this paragraph if—
  - (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
  - (b) in the case of an agreement which was conditional, the conditions are met before that date, and
  - (c) the agreement is not varied on or after that date.
- (3) For the purposes of tax in respect of chargeable gains—
  - (a) section 104 of TCGA 1992 (share pooling: general interpretative provisions) applies as if the protected rights were assets of a different class from the non-protected rights, and
  - (b) all the protected rights must be treated as disposed of before any of the non-protected rights may be so treated.

<p>In the Income Tax Acts “unit trust scheme” has the meaning given by section 237 of FSMA 2000. This is subject to subsection (2)<sup>1</sup></p>	<p>Subject to subsection (3)<sup>2</sup> and sections 99A<sup>3</sup> and 151W(a)<sup>4</sup> below, in this Act— (a) “unit trust scheme” has the meaning given by section 237(1) of the Financial Services and Markets Act 2000;</p>	<p>[for the purposes of the Corporation Tax Acts ] “unit trust scheme” has the meaning given by section 237 of FISMA 2000</p>
--	---	---

So we turn to s.237(1) FSMA, which provides:

In this Part “unit trust scheme” means a collective investment scheme<sup>5</sup> under which the property is held on trust for the participants, except that it does not include a contractual scheme.

In this work I abbreviate “unit trust scheme” to “**unit trust**”.

A unit trust is not a body corporate.<sup>6</sup>

#### 66.2.1 “On trust for participants”

In *Barker v Baxendale Walker Solicitors*:

[The statutory] conditions require, albeit by necessary implication, that there is more than one participator taking part in the scheme: indeed, that is the essence of the investment being “collective”.<sup>7</sup>

When is property held “on trust”? Land in England is held on trust in all cases of co-ownership. Shares may be held on trust if there are more than four co-owners, as shares cannot usually be registered in the names of more than four shareholders.

Partnership property is not in principle held on trust (though there could be a trust if the documentation so provided, or in the case of land in

---

1 See 66.2.2 (Limited partnership exemption).

2 See 66.2.2 (Limited partnership exemption).

3 Section 99A relates to umbrella schemes, see 66.6 (Umbrella schemes).

4 This relates to investment bond arrangements, not discussed here.

5 See App 5A1.16 (Collective investment scheme).

6 This is self-evident, but if authority is needed, see *HMRC v Hargreaves Lansdown Asset Management* [2019] UKUT 246 (TCC) at [74].

7 [2016] EWHC 664 (Ch) at [207].

England and Wales).<sup>8</sup>

What if some but not all scheme property is held on trust for the participants? It is suggested that the definition of unit trust requires that all (or at least substantially all) the property is held on trust. If property is held on trust for a partnership with legal personality, the property is not held on trust for the participants.

Possibly s.60 TCGA may apply in some cases, so that a simple nomineehip may be disregarded.

### 66.2.2 *Limited partnership exemption*

There is some power to alter the definition by regulation. The drafting is not quite uniform between the taxes, which makes an exposition more difficult to follow, but there it is:

#### **s.1007(2) ITA**

The Treasury may, in relation to a unit trust scheme within the meaning given by section 237 of FISMA 2000 whose trustees are UK resident, by regulations provide that the scheme is not to be a unit trust scheme for the purposes of the definition in section 989 of “unauthorised unit trust” if it is within a specified description.

#### **s.99(3) TCGA**

The Treasury may by regulations provide that any scheme of a description specified in the regulations shall be treated as not being a unit trust scheme for the purposes of this Act...

The regulations are the Capital Gains Tax (Definition of Unit Trust Scheme) Regulations 1988 and the Income Tax (Definition of Unit Trust Scheme) Regulations 1988:

#### **IT regs**

#### **CGT regs**

---

8 If authority is needed, see *Samarkand Film Partnership No 3 v HMRC* [2011] UKFTT 610 at [42] (TC) where Jersey partnerships were collective investment schemes, but their assets were not held on trust, so the partnerships did not constitute unit trusts. This point was not discussed on appeal.

**3** Subject to the provisions of these Regulations, a unit trust scheme which is ...  
 (c) a limited partnership scheme ...<sup>9</sup>  
 shall be treated as not being a unit trust scheme for the purposes of section 354A [ICTA 1970, now s.504 ITA and s.621 CTA 2010].

**3** A unit trust scheme which is—  
 (a) a limited partnership scheme ...<sup>10</sup>  
 shall be treated as not being a unit trust scheme for the purposes of the principal Act.<sup>11</sup>

**8** A unit trust scheme is a limited partnership scheme when the scheme property is held on trust for the general partners and the limited partners in a limited partnership.<sup>12</sup>

**4** [identical]

I refer to this as the “**LP exemption**”.

An Inland Revenue press release explained the background:

The wide Financial Services Act definition of unit trust scheme [which was introduced for tax purposes in 1987] may cover some schemes for which there is already a satisfactory tax treatment different from the unit trust tax treatment. Limited partnerships come into this category. It appears that a limited partnership can technically constitute a unit trust scheme within the meaning of the FSA 1986. Consequently, in the absence of regulations, limited partnerships would be subject to taxation as unit trusts. Ministers have decided that this would not be appropriate. Regulations are therefore proposed to leave limited partnerships to be taxed as they always have been, the partners bearing tax on their share

---

9 The omitted words relate to enterprise zone property schemes, charitable unit trust schemes, approved profit sharing schemes and approved employee share ownership plans; these are not discussed here.  
 10 The omitted words relate to approved profit sharing schemes and employee share ownership plans; these are not discussed here.  
 11 Reg 2 provides that “the principal Act” means the Capital Gains Tax Act 1979; this will now take effect as a reference to the TCGA.  
 12 Regulation 2 provides some necessary (and some unnecessary) definitions. In particular, “limited partnership” means a limited partnership registered under the Limited Partnerships Act 1907 and “general partner” and “limited partner” have the same meanings as in that Act. The CGT regs are identical.

of partnership income and gains.<sup>13</sup>

### 66.2.3 *Partnership outside LP exemption*

The LP exemption only applies to a LP registered under the Limited Partnerships Act 1907 so it does not apply to a foreign law LP.

In the case of an limited partnership governed by the law of another Member State, the LP exemption does not apply in terms, but the discrimination is in breach of EU law so it is considered that HMRC could not tax an EU law limited partnership as a unit trust. However in a civil law jurisdiction, partnership property is not likely to be held on trust, so the LP would not fall within the definition of unit trust, and the exemption is not needed. So the issue of EU-law compliance is not likely to arise; though it could, in theory, arise in relation to an LP governed by the law of the Republic of Ireland (which is a common law jurisdiction).

The LP exemption does not apply to a general partnership (because that is not a LP). It was perhaps considered that the exemption is not needed for that, as the partners would have day-to-day control, so the partnership is not a collective investment scheme, so it cannot be a unit trust.

Of course, even if the LP exemption is not applicable, a partnership is only a unit trust if it satisfies all the other parts of the definition, and that will not happen very often if at all.

## 66.3 **Authorised unit trust**

Section 99 TCGA provides:

(2) Subject to subsection (3) and sections 99A and 151W(a) below, in this Act ...

(b) “authorised unit trust” means, as respects an accounting period, a unit trust scheme in the case of which an order under section 243 of the Financial Services and Markets Act 2000 is in force during the whole or part of that period.

## 66.4 **Income accruing to unit trust**

### 66.4.1 *Authorised unit trust*

Section 617(1) CTA 2010 provides:

---

13 [1987] STI 784.

In respect of income arising to the trustees of an authorised unit trust, and for the purposes of the provisions relating to relief for capital expenditure, the Tax Acts shall have effect as if—

- (a) the trustees were a UK resident company; and
- (b) the rights of the unit holders were shares in the company.

So authorised unit trusts are not transparent for IT purposes.

EN ITTOIA Vol II discusses the location of the source of AUT income distributions:

51. It is possible for the FSA to recognise a non-UK unit trust scheme for marketing into the UK. However, only those UK tax resident unit trusts that are “authorised” by the FSA come within [what is now s.617 CTA 2010]. Section [617(1) CTA 2010] provides that the Tax Acts apply to UK authorised unit trusts and shall have effect as if the trustees of the authorised unit trust were a company resident in the UK. Although the application of [s.617 CTA 2010] is by reference to the trustees’ income (and relief for capital expenditure), the treatment of the trustees as a UK resident company carries through for the purposes of taxing interest distributions treated as made to unit holders. That is because [what is now s.373 ITTOIA] provides that the Tax Acts shall have effect as if such interest distributions were made “by the company referred to in section 468(1)”. As these distributions are treated as made by such a company, that is a UK resident company, they can only be UK source income.

The wording has changed but the point is still valid.

The taxation of AUTs is not discussed here.

#### 66.4.2 *Unauthorised UT: UK trustees*

Section 504 ITA provides:

- (1) This section applies for income tax purposes in relation to an unauthorised unit trust if the trustees are UK resident.
- (2) If income arises to the trustees, the income is treated as the income of the trustees and not of the unit holders.
- ...
- (5) Sections 494 and 495 and 496B do not apply in relation to payments made by the trustees.<sup>14</sup>

---

<sup>14</sup> The CT equivalent is s.621 CTA 2010.

So unauthorised unit trusts with UK resident trustees are not transparent for IT purposes. The taxation of these unit trusts is not discussed here.

### 66.4.3 *Unauthorised UT: Foreign trustee*

This leaves the question of unauthorised unit trusts with non-resident trustees. There is no statutory provision so we are thrown back to first principles, and ordinary interest in possession trust rules apply. For IT purposes, depending on the drafting and proper law, a unit trust may be a transparent, *Baker* style trust or non-transparent.<sup>15</sup>

HMRC agree. The IF provides:

**IFM13324: Offshore Funds: participants in offshore funds: participants within the charge to income tax: reporting funds: income and distributions: tax transparent funds** Apr 2020]

**Regulation 97 – transparent offshore funds of SI 2009/3001**

Arrangements that fall within the definition of an offshore fund and are transparent for income purposes but not transparent for capital gains purposes include, for example, so called ‘Baker’ unit trusts (following the case of *Archer-Shee v. Baker*, 11TC749) and certain foreign contractual arrangements (such as Fonds Commun de Placement (‘FCPs’)).

Income: UK tax treatment of investors

No matter what the legal form of a transparent reporting fund, for UK tax purposes the income of an income-transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements).

The IF Manual also discusses *Garland* unit trusts:

**IFM13322: Offshore Funds: participants in offshore funds: participants within the charge to income tax: reporting funds: income and distributions: other non-corporate offshore funds** [Apr

---

<sup>15</sup> See 39.1 (IIP trusts: income tax). This view is supported by *Minister of National Revenue v Trans-Canada Investment Co* [1956] SCC 49 <https://www.kessler.co.uk/wp-content/uploads/2012/04/Minister-of-National-Revenue-Trans-Canada.pdf> where the Canadian Supreme Court applied *Baker* to a unit trust arrangement.

2020]

**Regulation 96 – other non-corporate offshore funds of SI 2009/3001**

Arrangements that are non-transparent for income purposes and that come within the definition of an offshore fund under section S355(1) TIOPA 2010 (that is, funds that do not take corporate form) will be foreign unit trusts. Foreign unit trusts that are not transparent for income purposes are sometimes referred to as ‘Garland’ unit trusts.

UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or is accumulated. Unlike the position for transparent unit trusts, that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005) and the tax rates applying will be those applying to such income.

If there is an excess of reported income over the amount allocated (for example if the unit trust has invested in another reporting fund and has itself received reports of income which was not actually distributed to it) then the excess must be treated by the participant in the same way as the allocated income (that is as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005)).

A Garland trust may be a reporting or a non-reporting fund.

Whether a fund is a Baker trust or a Garland trust depends on the applicable law<sup>16</sup> and the drafting. Appropriate drafting may create a *Garland*-style non-transparent unit trust even in a *Baker* jurisdiction.

#### 66.4.4 *Australian and Irish unit trusts*

The HMRC transparent/opaque list classifies Australian unit trusts as transparent for IT, and Irish unit trusts as opaque.<sup>17</sup> That is an oversimplification.

In Australia, most unit trusts are drafted to be transparent. But there are some where the unit holder’s entitlement depends on the exercise of a discretionary power by the trustee so they are UK-law opaque; they may be treated as Australia-law transparent if the trustee exercises the power by the end of the tax year (in which case the unit trust is a hybrid entity).

---

<sup>16</sup> See 39.8 (Baker or Garland trust?).

<sup>17</sup> See 86.40 (HMRC transparent/opaque list).

Australian law also has an anti-avoidance measure designed to prevent listed companies reorganising as unit trusts. A public trading trust /corporate unit trust<sup>18</sup> is a unit trust that carries on a business and has more than a threshold number of unit holders. These are Australian-law opaque, but may be UK-law transparent, so may also be hybrid entities.<sup>19</sup>

Similarly in Ireland, the position will depend on the drafting of the particular unit trust.

#### 66.4.5 *Residence of unit trust*

As a matter of trust law, and tax law, trustees of a unit trust are persons, but a unit trust is not a person. So it is more accurate to refer to trustee residence, not unit trust residence. However the expressions may be used synonymously, without causing confusion, and for brevity I refer to residence of a unit trust.

The residence of a unit trust is important for IT purposes, because the rules set out above depend on whether or not the trustees are UK resident. However, there is no definition of residence for this purpose. The standard IT/CGT definition of residence of “trustees of a settlement”<sup>20</sup> does not apply, because a unit trust is not a “settlement”.<sup>21</sup> Ordinary rules of residence apply to determine the residence of the trustees in their private capacities.

The residence of the trustees of a unit trust is also important for determining whether a unit trust is an offshore fund, and (more or less)<sup>22</sup> the same principles apply.

### 66.5 Unit trust CGT: Deemed company

Section 99(1) TCGA provides:

This Act shall apply in relation to any unit trust scheme as if—  
(a) the scheme were a company,

---

18 A public trading trust is one which was set up as a unit trust; a corporate unit trust – is one which started life as a company whose business was transferred to a unit trust.

19 I am grateful to Michael Flynn SC for his comments on this point.

20 See 6.1 (Residence of trusts).

21 The term “settlement” in this context is not expressly defined, but property in a unit trust is not “settled property” for the purposes of IT: s.466 ITA. It is considered that “settlement”, in this context, requires settled property (as defined).

22 For an exceptional case, see 63.3.4 (Residence of fund).

- (b) the rights of the unit holders were shares in the company, and
  - (c) in the case of an authorised unit trust, the company were resident in the UK,
- except that nothing in this section shall be taken to bring a unit trust scheme within the charge to corporation tax on chargeable gains.

I refer to this as the “**deemed company fiction**”.

There are four categories of unit trust for CGT:

- (1) Authorised unit trust: gains exempt from CGT<sup>23</sup>
- (2) Unauthorised unit trusts:
  - (a) UK resident unauthorised unit trust: gains subject to CGT<sup>24</sup>
  - (b) Non-resident unauthorised unit trust: gains not generally<sup>25</sup> subject to CGT.
  - (c) Transparent funds (see next section)

Residence of a unit trust is therefore important for CGT. Statute states that authorised unit trusts are UK resident but does not define the test of residence for unauthorised unit trusts. Since a unit trust is treated as a company, it is considered that the test of residence for CGT is the corporate test, ie, central management and control.<sup>26</sup>

Gains accruing to a non-resident “close” unit trust fall in principle within the scope of s.3 TCGA, and may be attributed to UK resident unit holders.<sup>27</sup>

## 66.6 Umbrella schemes

Section 99A TCGA provides:

- (1) In this section an “umbrella scheme” means a relevant collective investment scheme—
  - (a) which provides arrangements for separate pooling of the contributions of the participants and the profits or income out of which payments are to be made to them, and

---

23 Section 100 TCGA.

24 But I wonder if any UK resident unauthorised unit trusts exist: this charge may be only theoretical.

25 The usual exceptions apply, for trades with a UK PE, and residential property.

26 There is some relevant discussion at 8.19.4 (POEM/central M&C compared).

27 Ghosh agrees: “When is a company not a company?” PTPR Vol 7 p.241 <http://www.khplc.co.uk/reviews>

(b) under which the participants are entitled to exchange rights in one pool for rights in another,  
and any reference to a part of an umbrella scheme is a reference to such of the arrangements as relate to a separate pool.

(2) For the purposes of this Act (except subsection (1) and section 103C)–

(a) each of the parts of an umbrella scheme shall itself be regarded as a collective investment scheme of the same form as the umbrella scheme as a whole, and

(b) the umbrella scheme as a whole shall not be regarded as a collective investment scheme of that form or as any other form of collective investment scheme,

and the participants in the umbrella scheme are to be treated accordingly.

(2A) Subsection (2)–

(a) does not prevent gains or losses accruing to an umbrella scheme which is a unit trust scheme (other than an authorised unit trust) being regarded as gains or losses accruing to the umbrella scheme as a whole, and

(b) does not apply for the purposes of section 100(2).

(4) Nothing in subsection (2) shall prevent–

(a) gains accruing to an umbrella scheme being regarded as gains accruing to an authorised unit trust for the purposes of section 100(1) (exemption for authorised unit trusts etc);

(b) a transfer of business to an umbrella scheme being regarded as a transfer to a unit trust scheme for the purposes of section 139(4) (exclusion of transfers to authorised unit trusts etc);

(5) For the purposes of subsection (1), “arrangements” includes arrangements provided in a company's instrument of incorporation.

(6) In this section, “relevant collective investment scheme” means a collective investment scheme which is–

(a) an authorised contractual scheme which is a co-ownership scheme,

(b) a unit trust scheme, or

(c) an offshore fund.

See App **5A** 1.14 (Umbrella/class of interest).

## 66.7 Unit trust transparent offshore fund

### 66.7.1 “Tax transparent fund”

Section 103D TCGA provides:

(1) For the purposes of this section—

“tax transparent fund” means—

(a) an authorised contractual scheme which is a co-ownership scheme,  
or

(b) an offshore fund that is a transparent fund within the meaning given by regulation 11 of the Offshore Funds (Tax) Regulations 2009 and “fund property”, in relation to a tax transparent fund, means the property subject to the fund.

(2) For the purposes of this Act—

“authorised contractual scheme” has the meaning given by section 237(3) of the Financial Services and Markets Act 2000, and

“co-ownership scheme” has the meaning given by section 235A of that Act.

### 66.7.2 *Deemed company fiction disapplied*

Section 99(1A) TCGA provides an exception to the deemed company fiction:

Subsection (1) does not apply to an offshore fund that is a transparent fund within the meaning given by regulation 11 of the Offshore Funds (Tax) Regulations 2009<sup>28</sup> (see instead section 103D).

So we turn to s.103D(3) TCGA which provides:

[a] A unit in a tax transparent fund is treated as an asset for the purposes of this Act,

[b] and, accordingly, a participant’s interest in the fund property is disregarded for those purposes.

A tax transparent fund is (notwithstanding its terminology) opaque for CGT in the sense that gains accrue to the fund, not to the participants.

### 66.7.3 *Gain on disposal of unit*

Section 103D TCGA provides:

(4) In computing the gain accruing on a disposal by a participant of

---

28 For reg 11OFTR, see 63.13 (“Transparent fund”).

- units<sup>29</sup> in a tax transparent fund, an amount which—
- (a) represents income from the fund property, and
  - (b) is taken into account as a receipt or other credit of the participant in calculating an amount chargeable to income tax,
- is treated as expenditure falling within section 38(1)(b).
- (5) In computing the gain accruing on a disposal by a participant of units in a tax transparent fund—
- (a) the sums that would otherwise be allowable under section 38(1) as a deduction from the consideration in the computation of the gain are reduced (but not below nil) by the amounts within subsection (7), and
  - (b) if those amounts exceed the sums that would otherwise be so allowable, the consideration is treated as increased by the amount of the excess.
- (6) So far as an amount within subsection (7) is dealt with under subsection (5)(a), it is not also dealt with under section 39.
- (7) An amount is within this subsection if it is—
- (a) any amount arising to the participant from the fund property which is taken into account as an expense or other debit of the participant in calculating an amount chargeable to income tax, or
  - (b) anything paid or transferred to the participant, or anything else of value received by the participant, which is referable to the holding of the units (whenever paid, transferred or received) unless section 22 applies to whatever is paid, transferred or received.
- (8) In the case of any asset transferred as mentioned in subsection (7)(b), the value of the asset on the date of the transfer is taken to be its market value on that date.
- (9) If a participant has incurred expenditure in relation to any fund property in respect of which a capital allowance or renewals allowance

---

29 Section 103D(10) provides: “In this section—

“participant”—

- (a) in relation to a collective investment scheme, is to be read in accordance with section 235 of the Financial Services and Markets Act 2000, and
  - (b) in relation to an offshore fund (which is not a collective investment scheme), has the meaning given in section 362(1) of TIOPA 2010, and
- “units”, in relation to a tax transparent fund, means the rights or interests (however described) of the participants in the fund.

See 63.2 (Participant/participate).

(as defined by section 41(4) or (5)) has been or may be made, that expenditure is excluded from the sums allowable as a deduction in computing the amount of a loss accruing to the participant on a disposal of the units in the fund.

(10) In this section--

“participant”--

(a) in relation to a collective investment scheme, is to be read in accordance with section 235 of the Financial Services and Markets Act 2000, and

(b) in relation to an offshore fund (which is not a collective investment scheme), has the meaning given in section 362(1) of TIOPA 2010, and

“units”, in relation to a tax transparent fund, means the rights or interests (however described) of the participants in the fund.

Lastly, for completeness, 103DA TCGA deals with share pooling for transparent funds:

A unit in a transparent fund is to be regarded as a security for the purposes of sections 104, 105, 107, 110 and 114 (share pooling, identification of securities and indexation).

I would have thought that was the case anyway, so the provision only for the avoidance of doubt.

## 66.8 Situs of unit

### 66.8.1 *Situs of unit for IHT*

The situs of a unit in an authorised unit trust is not normally relevant for IHT<sup>30</sup> but it may matter for the ITA remittance basis. The situs of a unit in an unauthorised unit trust is important for IHT.

A unit is unlike an equitable interest under a conventional trust. The rights of a unit holder arise from contract as well as trust, and a unit is in many ways analogous to a share in a company.<sup>31</sup> One should not apply rules governing other kinds of equitable interests without considering this.

It is considered that share/security situs rules should normally be applied,

---

30 See 71.3 (Non-settled UK funds).

31 Thomas & Hudson, *The Law of Trusts* (2<sup>nd</sup> ed., 2010), para 53.28, says that the rights are *primarily* contractual, but to classify overlapping rights as “primary” and “secondary” seems to me somewhat arbitrary.

so that the place of the register is normally the determining factor. HMRC accept this.<sup>32</sup>

Another possible view is that situs depends on the residence of the trustees. In practice a situation where the place of residence of the trustees is different from the place of the register would be rare so the priority between the two tests may never need to be decided. Trustee residence determines whether a unit trust is treated as a company or offshore fund for IT and CGT purposes.<sup>33</sup> It might therefore be said to be consistent with the tax legislation if situs of a unit for IHT depends upon the residence of the trustees. However, situs for IHT is based on private international law, not tax law, so the relevance of unit trust tax provisions is very marginal.

Situs of a unit does not depend on the situs of the underlying assets of the unit trust. The idea that one looks at the underlying assets, at first sight seems sensible, as it is consistent with the usual test for situs of a bare trust. But it is unsound for two reasons:

- (1) If the underlying assets are spread across different jurisdictions it would be impossible to ascertain the situs of the unit (if a unit is regarded as a single asset). The unit should not be regarded as several separate interests in as many assets as are held by the unit trust, looking through the unit trust like a bare trust, as this is to ignore the nature of the unit.<sup>34</sup>
- (2) The proposal to look to the situs of the underlying assets is unworkable because the unit holder will not normally be able to ascertain what the underlying assets are at any particular moment. (Accounts of the unit trust may disclose the position at the end of an accounting period but that will not help as underlying assets may be

---

32 Press Release 16 October 2002 (OEICs and AUTs) para 9 stated (before the introduction of IHT relief for AUTs):

“[OEICs and units in Authorised Unit Trusts] are treated as situated in the UK in the same way as other UK registered shares. That is so even if the ‘underlying’ assets of the collective investment fund are non-UK assets.”

See too [1998] PCB 172. This conclusion is supported by *CPT Custodian Pty v Commissioners of State Revenue* (2005) 221 ALR 196 <http://www.austlii.com> (unit holders not joint “owner” of land for purposes of Australian rating laws).

33 See 66.4.2 (Unauthorised UT: UK trustees); 63.3 (“Offshore fund”).

34 A similar argument applies in relation to the situs of an equitable interest under a substantive trust.

bought and sold frequently by the trustees of the unit trust. The unit holder normally has no further right to information.)

Although the consequence is that one can alter situs by interposition of a unit trust, that is not so surprising: one can do the same with an OEIC or any company.

### 66.8.2 *Situs of unit for CGT*

If the unit trust is not subject to UK law, registered units are situate where they are registered, because that is the rule for shares<sup>35</sup> and the unit is deemed to be a share. This is the same as the private international law rule.

If the unit trust is subject to UK law, a unit is probably UK situate under the UK law rule,<sup>36</sup> or under CGT situs rules for shares in UK incorporated companies.<sup>37</sup> However, a UK law unit trust will in practice have a register here, so the question of priority between the place-of-register rule and the UK law rule will not arise.

The situs of the underlying assets is not relevant. Section 99 TCGA overrides s.60 TCGA. A unit is an asset for CGT purposes, rather than an interest in an asset, so that the co-ownership rule is not relevant.<sup>38</sup>

### 66.8.3 *Residence of trustees and situs*

The residence of the trustees is not relevant for situs, though non-resident trustees are required if it is desired that the units are not to be chargeable securities for SDRT purposes.<sup>39</sup>

## 66.9 **Gain on disposal of unit**

An offshore unit trust will be an offshore fund. It may qualify as a reporting fund. If it does not, a gain accruing on a disposal of a unit will be an offshore income gain.<sup>40</sup>

---

35 See 98.6 (Registered security: non-UK co).

36 See 98.13.4 (UK-law rule).

37 See 98.5 (Securities of UK company). This assumes that a unit trust with a UK proper law should be regarded for CGT as a company incorporated in the UK. That seems the better view, though the contrary is arguable.

38 See 98.3 (Co-owned assets).

39 See s.99(5A) FA 1986.

40 See 63.3 (“Offshore fund”).

## 66.10 Fonds commun de placement

Fonds commun de placement may be translated as “mutual funds”, or “common funds” but it is better to use the French term, (abbreviated as FCP).

The UCITS directive provides:

Les organismes visés au paragraphe 2 [organismes de placement collectif en valeurs mobilières (OPCVM)] peuvent revêtir la forme contractuelle (fonds communs de placement gérés par une société de gestion) ou de trust (unit trust) ou la forme statutaire (société d'investissement).

The undertakings referred to in paragraph 2 [undertakings for collective investment in transferable securities (UCITS)] may be constituted in accordance with contract law (as common funds [FCPs] managed by management companies), trust law (as unit trusts), or statute (as investment companies).

Luxembourg law offers two definitions of the term in different statutes, but the differences do not matter for present purposes:

Est réputée fonds commun de placement pour l'application de la présente partie toute masse indivise de valeurs mobilières et/ou d'autres actifs financiers liquides mentionnés à l'article 41, paragraphe (1), composée et gérée selon le principe de la répartition des risques pour le compte de propriétaires indivis qui ne sont engagés que jusqu'à concurrence de leur mise et dont les droits sont représentés par des parts destinées au placement dans le public par une offre publique ou privée.<sup>41</sup>

Fonds commun de placement for the purposes of this Part means a fund of transferable securities and/or other liquid financial assets mentioned in article 41(1), established and managed, on the basis of spread risk, on behalf of joint owners who are liable for no more than their investment, and whose rights are represented by shares to be issued to the public under a public or private offer.

---

41 Loi du 17 décembre 2010 concernant les organismes de placement collectif (Law of 17 December 2010 concerning undertakings for collective investment) Art 5  
<http://legilux.public.lu/eli/etat/leg/loi/2010/12/17/n9/jo>

Est réputée fonds commun de placement pour l'application de la présente loi toute masse indivise de valeurs composée et gérée selon le principe de la répartition des risques pour le compte de propriétaires indivis qui ne sont engagés que jusqu'à concurrence de leur mise et dont les droits sont représentés par des parts réservées à un ou plusieurs investisseurs avertis.<sup>42</sup>

Fonds commun de placement for the purposes of this law means a fund of securities, established and managed, on the basis of spread risk, on behalf of joint owners who are liable for no more than their investment, and whose rights are represented by units intended for one or more informed investors.

In France:

Sous réserve des dispositions de l'article L. 214-8-7, le fonds commun de placement, qui n'a pas la personnalité morale, est une copropriété d'instruments financiers et de dépôts dont les parts sont émises et rachetées à la demande, selon le cas, des souscripteurs ou des porteurs et à la valeur liquidative majorée ou diminuée, selon les cas, des frais et commissions.<sup>43</sup>

Subject to the provisions of article L. 214-8-7, le fonds commun de placement, which does not have legal personality, is a joint ownership of financial instruments and deposits, the shares of which are issued and redeemed at the requests, as the case may be, from subscribers or holders and at the increased or decreased net asset value, as the case may be, of fees and commissions.

### 66.10.1 *IT position of FCP*

The HMRC transparent/opaque list refers to Luxembourg fonds commun de placement, and French fonds commun de placement à risques, and classifies them as transparent.<sup>44</sup>

42 Loi du 13 février 2007 relative aux fonds d'investissement spécialisés (Law of 13 February 2007 relating to specialized investment funds) Art 4

<http://legilux.public.lu/eli/etat/leg/loi/2007/02/13/n1/jo>

43 Article L214-8 Code monétaire et financier.

44 See 86.40 (HMRC transparent/opaque list).

### 66.10.2 CGT position of FCP

An FCP is not a unit trust, on the basis that FCP assets are not held on trust. This is addressed by s.103D TCGA (and assumed in the drafting of the definition of offshore fund<sup>45</sup>).

But if it mattered, the question whether an FCP is a trust (or more accurately, whether references to a trust in any particular provision include an FCP) would benefit from further examination. The Australian Taxation Office classify an FCP as a trust for tax purposes:

#### **Overview of the Umbrella Fund**

19. The Umbrella Fund is an open-ended unincorporated mutual investment fund in the form of a ‘fonds commun de placement’. It is governed by Luxembourg law and qualifies as an Undertakings for Collective Investment in Transferable Securities (UCITS) ...

20. As a pooled investment vehicle and form of collective investment fund, the Umbrella Fund receives cash or assets from Unitholder subscriptions and invests its cash/assets in various assets comprising Transferable Securities, Money Market Instruments and some non-transferable securities. Investments are made within permitted parameters as set out in the Management Regulations and Prospectus, and in accordance with the requirements applicable to UCITS under Luxembourg laws and regulations.

21. Subscription for Units in the Umbrella Fund is made by completing required documentation (including an Account Opening Agreement) and submitting that, together with payment of the full purchase price of the Units subscribed for, for acceptance by the Management Company. The issue price of a particular Unit class in the Umbrella Fund or a Fund is based on the net asset value of that Unit class (subject to adjustments for swing pricing) at the Valuation Point on the relevant Dealing Day (that is the time of subscription).

22. The key features of the Umbrella Fund are that:

- it is managed by the Management Company, the sole and exclusive objective in respect of which is the management of the Umbrella Fund (and its assets) on behalf, and in the interests, of its Unitholders
- its assets are kept separate from the Management Company which entrusts the Depositary with the custody of its assets in separate accounts or deposits on behalf of the Unitholders

---

45 See 63.3 (“Offshore fund”).

- the Umbrella Fund is divided into separate sub-funds referred to as Funds
- Units issued with respect to each Fund may be divided into separate classes with each such class representing an interest in the underlying net assets of the Fund but with different characteristics as are established specifically with respect to such class
- the Unitholders legally own Units in the Umbrella Fund (or Fund), as evidenced by mention in the Register of Unitholders
- a Unitholder's acquisition of Units in the Umbrella Fund implies their acceptance of the Management Regulations of the Umbrella Fund which govern the legal relationship between the Unitholders, the Management Company and the Depositary
- the entire assets of the Umbrella Fund are the joint property of all Unitholders, who have equal rights in proportion to the number of Units of each class they hold in individual Funds
- each Unit confers an equal and undivided interest in the assets of the Umbrella Fund as a whole or the relevant Fund, and does not confer an interest in any particular asset
- the Unitholders of Distributing Unit Classes (as beneficiaries of the Umbrella Fund) are beneficially entitled to the income of a Fund as it is earned by the Fund
- the extent to which distributions are made with respect to any Fund will be determined by the Management Company with consideration to net investment income and net realised capital gains, and the net asset value of the Umbrella Fund not falling below the minimum capital amount prescribed by law, and
- distributions to the Unitholders of Distributing Unit Classes of the Funds will generally be declared and paid at least annually within one month following the end of the financial year of the Umbrella Fund.

23. Distributions to the Unitholders of Distributing Unit Classes in a Fund may represent both dividends and capital gains received by the Umbrella Fund as a result of holding and/or disposing its assets, and on-paying these income streams to the Unitholders in the form of a fund distribution, net of taxes, fees and other expenses.

24. Depending on the domestic tax laws of the jurisdiction that the Umbrella Fund has invested in, withholding tax is likely to be incurred by the Umbrella Fund when income and/or capital proceeds are remitted from that jurisdiction to the Umbrella Fund. The amount of dividend income and/or capital proceeds that is then on-paid by the Umbrella Fund to the Unitholders, in the form of a fund distribution, will

effectively be net of withholding tax.

25. Unitholders may request redemption of their Units from a Fund at the redemption price. The redemption price is based on the net asset value of the relevant Unit class in the Umbrella Fund or a Fund (subject to adjustments for swing pricing) at the Valuation Point on the relevant Dealing Day (that is the time of redemption).

26. Legal or beneficial ownership of Units cannot be transferred other than by redemption in accordance with the Management Regulations.

### **The Management Company**

27. Amongst other things, the Management Company:

- is entitled to buy, sell, subscribe for, exchange and receive any assets and to exercise all the rights directly or indirectly connected with the Umbrella Fund's assets
- shall determine the investment policy of the Umbrella Fund, but may avail itself of services of Investment Managers
- is authorised to file any tax elections and tax certifications with tax authorities outside of Luxembourg as it deems necessary, and vis responsible for making Units available to Unitholders.

### **The Depositary**

28. Amongst other things, the Depositary:

- holds the legal title to all of the Umbrella Fund's assets for the benefit of all Unitholders
- is the administrative, registrar, transfer and paying agent for the Umbrella Fund
- may only draw on the Umbrella Fund's assets or make payments to third parties for the Umbrella Fund by order of the Management Company within the scope of the Management Regulations
- shall ensure that the sale, issue, redemption, conversion and cancellation of Units effected for the account of the Umbrella Fund or by the Management Company are carried out in accordance with the law and the Management Regulations
- shall ensure that the value of Units is calculated in accordance with the law and the Management Regulations, and
- shall ensure that the Umbrella Fund's proceeds/earnings are employed in accordance with the Management Regulations...

### **Explanation**

The Umbrella Fund constitutes a trust

30. The term 'trust' is not defined in the ITAA 1936 or ITAA 1997. Whether a trust relationship between the Management Company (or the

Depository) and a Unitholder exists upon the Unitholder's acquisition of Units in the Umbrella Fund should therefore be determined in accordance with guidance provided by the Courts.

31. Gaudron, McHugh, Gummow, Kirby and Hayne JJ in *Associated Alloys Pty Limited v. ACN 001 452 106 Pty Limited* [2000] HCA 25, at paragraph 29, endorsed the joint judgment of Dixon CJ, Williams and Fullagar JJ, in *Kauter v. Hilton* (1953) 90 CLR 86 who, at page 97, identified:

...the established rule that in order to constitute a trust the intention to do so must be clear and that it must also be clear what property is subject to the trust and reasonably certain who are the beneficiaries.

32. [The ruling refers to the definition of "trust" in *Harmer v. FCT*; see 86.9.6 (Trust concept in Australian law), and continues:]

33. All four essential elements of a trust are present so as to give rise to a trust relationship between the Management Company, the Depository and the Unitholders. This is held because:

- legal title to the assets of the Umbrella Fund vests with the Depository (or a member of the Depository's sub-custody network).
- the assets of the Umbrella Fund (being Transferable Securities, non-transferable securities and Money Market Instruments) are capable of being held on trust and, pursuant to the terms of the Management Regulations, are dealt with by the Management Company and the Depository acting in a trustee capacity on behalf of, in the interests and for the benefit of, the Unitholders, and
- Unitholders (who are clearly intended to be beneficiaries of the Umbrella Fund) are beneficially entitled to a proportion of the underlying assets of the Umbrella Fund (or a relevant Fund) in accordance with their Unit holding and receive income from the investment of the Umbrella Fund assets by the Management Company and/or the Depository as it arises.<sup>46</sup>

### 66.11 Irish Common Contractual Fund

The [Ireland] European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 provides a definition:

---

46 ATO, Product Ruling PR 2016/8 Income tax: tax consequences of investing in Wellington Management Funds (Luxembourg)

<https://www.ato.gov.au/law/view/document?DocID=PRR/PR20168/NAT/ATO/00001>

3(1) In these Regulations—

“common contractual fund” means a collective investment undertaking, being an unincorporated body established by a management company under which the participants by contractual arrangement participate and share in the property of the undertaking as co-owners

This appears to be a statutory equivalent of a FCP.

The HMRC transparent/opaque list classifies a CCF as transparent.<sup>47</sup>

---

47 See 86.40 (HMRC transparent/opaque list). See too 86.31.3 (Stichting holds CCF).

## INTERMEDIATED SECURITIES

### 67.1 Securities law background

#### 67.1 Securities law background

The Law Commission has issued several papers on this topic, including:

**“Law Commission 2008 paper”**: The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury<sup>1</sup>

**“Law Commission 2020 paper”**: Intermediated securities: who owns your shares?<sup>2</sup>

The 2008 paper addresses situs issues which are not considered in the 2020 paper, so I refer to both. The position has not materially changed since 2008.

##### 67.1.1 *Intermediaries*

The Law Commission 2008 paper provides:

2.7 ...immobilisation entails depositing securities in paper form with a depository linked to a settlement system so that they are held indirectly. Where a new issue of securities is immobilised from the outset, the entire issue will be typically constituted by a single ‘global’ or ‘jumbo’ certificate which remains in the vaults of the depository.<sup>3</sup> The

---

1 <https://www.lawcom.gov.uk/project/property-interests-in-intermediated-securities>

2 <https://www.lawcom.gov.uk/project/intermediated-securities> (Nov 2020).

3 Footnote original: Interests in the global note may be exchangeable for definitive certificates, so that the investor can acquire a direct relationship with the issuer. Usually, however, the global note is intended to be permanently immobilised and cannot be split into definitive certificates other than in extreme circumstances, such

depository (or its nominee) becomes the owner of the securities either by registering the securities in its name with the issuer (in the case of registered securities) or by physical possession of the global certificate (in the case of bearer securities).

2.8 Participants in the settlement system keep interests in the immobilised securities by holding an account with the securities depository. These account holders are able to transfer and pledge their interests in the securities through book entries on the depository's books rather than by re-registration or by delivery of the underlying securities. Following the computerisation of settlement systems in the late twentieth century, the depository's 'books' that record ownership are now electronic records....

2.11 Recording investors' interests in securities as electronic bytes of information enables these interests to be transferred with ease from one account holder to another simply by a credit and debit in the computerised accounts of an intermediary. As long as the legal system recognises this as a valid transfer of an interest in securities, traditional formalities associated with the transfer of underlying securities (for example, the execution of stock transfer forms and the issuance of new certificates) can be avoided. Greater transferability of securities enhances liquidity and consequently their value.

### **Pooled Accounts**

2.17 ... Where an intermediary holds fungible securities for more than one investor it will typically pool these securities in a single client account. To do so, the intermediary opens an account with the issuer or intermediary above it in its own name and records in its own books each individual investor's allocation in the pooled account. In most legal systems, the only reference to an investor's specific allocation is made in its intermediary's accounts and not in the accounts of any higher-tier intermediary or in the register of the issuer...

A note on terminology. It is apparent from the above that the terms "depository" and "intermediary" may be used synonymously. The term "account keeper" is also used. I prefer the word "**intermediary**" as an asset may be held through a number of intermediaries and "depository" only seems apt for the first of the chain.

The "**ultimate depository**" is the first intermediary in what may be a

---

as the failure of a bond trustee to act on the instructions of the investors upon a default.

chain of intermediaries, ie the intermediary who has legal title to the security.

The “**underlying security**” is the asset held by the ultimate depository. It may be described as “immobilised” (when the ultimate depository holds a share certificate) or “dematerialised” (where there is no share certificate).

“**Investor**” is the ultimate holder of securities through one or more intermediaries, ie a person who does not act as intermediary for another person. The term sometimes used is “ultimate investor”.

### 67.1.2 *Central securities depository*

#### **Central Securities Depositories in indirect holding systems**

2.19 The efficiencies generated by intermediation led the Group of Thirty to recommend in 1989 that each domestic market should establish a central securities depository (CSD) to hold both physical and dematerialised securities in the relevant market. Immobilisation of securities is therefore centralised in a single depository (or through a nominee of the CSD). An indirect holding system based on the immobilisation of securities in a domestic CSD is the most common model in advanced countries and there are about thirty systems operating in this manner in Europe alone.

CREST may be regarded as the UK CSD. But securities registered on CREST are registered in the name of the legal owner (ie not registered in the name of CREST) so they are not intermediated securities unless the legal owner is itself an intermediary.<sup>4</sup>

National CSDs do not usually raise issues for situs, as the situs of the register of the CSD is usually the same as the situs of the underlying securities. However the issue does arise for international CSDs and other intermediaries.

2.20 In addition to national CSDs, Euroclear in Brussels and Clearstream in Luxembourg operate as international central securities depositories (ICSDs). ICSDs were originally established to manage clearing and settlement of Eurobonds for which there was no supporting market infrastructure. Since their creation over thirty years ago, the business of ICSDs has expanded to also cover most domestic and

---

4 See 97.8 (CREST).

internationally traded securities....

## 67.2 Transparent/contract-based securities

In order to determine tax treatment of an asset one must identify the asset and its legal nature.

There are in principle two types of intermediated security:

- (1) The intermediary may hold the underlying security in such a manner that the investors have a proprietary interest in it. In a common law jurisdiction, that will involve the depository holding the underlying security on trust for the investor. In a civil law jurisdiction the relationship will not be described as a trust, but the end result will be the same: the investors have a proprietary interest. I refer to that as an **“IT transparent”** intermediated security, as it is transparent in the sense that the income of the underlying security is regarded as the income of the investor (“proprietary” intermediated security would be another possible term; note that different principles apply for IHT).
- (2) The intermediary may hold the underlying security beneficially, and have a merely contractual obligation to transfer money or assets to the investor. I refer to that as a **“contract-based”** intermediated security (“opaque” would be an alternative term.)

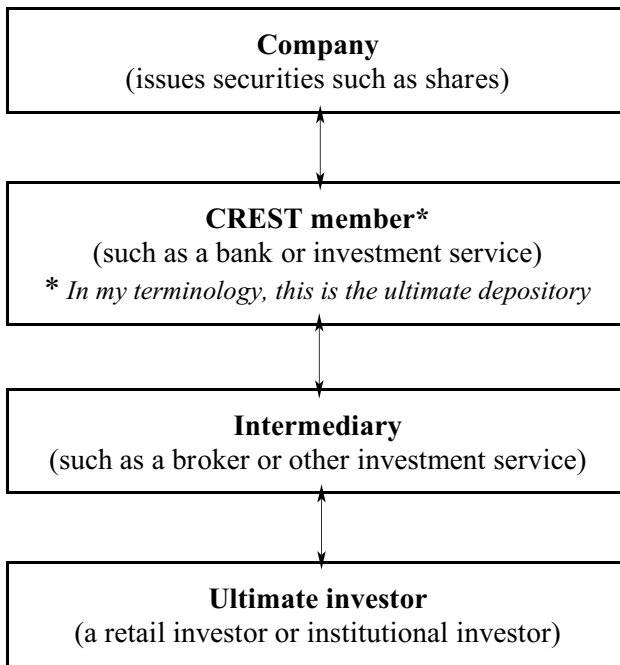

Where there are a series of intermediaries, each may hold their interest on the basis of transparent or contract-based obligations in favour of the next in the chain, or some may hold on one basis and others on another.

Whether an intermediated security is transparent or contract-based depends on the documentation and the law which governs it. This subject is made more complicated by the variety of jurisdictions which may be involved.

### 67.2.1 English law

The Law Commission 2020 paper provides:

- 2.61 The following diagram is a simplified example of an intermediated securities chain, demonstrating some of the potential different levels in the chain. In practice, there may be additional layers of intermediation and intermediaries may hold securities for ultimate investors in omnibus and segregated accounts as well as on their own account.

2.62 In order to understand how intermediated securities chains may affect the rights of ultimate investors, we need to consider the legal basis of the relationships between the parties in the chain, as well as the nature of their interest in the securities.

**The legal relationships in an intermediated securities chain: a series of trusts**

2.63 Under the law of England and Wales, it is now “reasonably well settled” that the arrangements between parties in an intermediated securities chain are characterised as a “series of trusts and sub-trusts”<sup>5</sup>. This may be agreed expressly by the parties or implied.<sup>6</sup> As Mr Justice Briggs (as he then was) said in

5 Footnote original: *Re Lehman Brothers International (Europe) (in administration)* [2012] EWHC 2997 (Ch) at [163].

6 Footnote original: R Goode and L Gullifer, *Goode and Gullifer on Legal Problems of Credit and Security* (6th ed 2017) para 6-08; M Bridge, L Gullifer, K F K Low and G McMeel, *The Law of Personal Property* (2nd ed 2018) para 6-054. See *Further Updated Advice on Intermediated Securities* (2008) from para 2.59. See description of the nature of a trust in A Hudson, *The Law and Regulation of Finance* (2nd ed 2013) para 22-01 onwards.

*Re Lehman Brothers:*<sup>7</sup>

It is common ground that a trust may exist not merely between legal owner and ultimate beneficial owner, but at each stage of a chain between them, so that, for example, A may hold on trust for X, X on trust for Y and Y on trust for B. The only true trust of the property itself (ie of the legal rights) is that of A for X. At each lower stage in the chain, the intermediate trustee holds on trust only his interest in the property held on trust for him. That is how the holding of intermediated securities works under English law, wherever a proprietary interest is to be conferred on the ultimate investor. In practice, especially in relation to dematerialised securities, there may be several links in that chain.

- 2.64 In our simple example above, the company issues shares, which are purchased by the custodian bank, a CREST member. According to the trusts law analysis, the custodian bank is the legal owner of the shares and, as trustee, holds the shares on trust for its account holders, including the broker. The broker is both the beneficiary of the trust with the custodian bank, and a sub-trustee, holding an interest in the shares on trust for the ultimate investor.
- 2.65 As well as trusts and sub-trusts between the parties, the relationships in the chain are regulated by individual contracts entered into between the relevant parties at each stage in the chain...
- 2.66 ... For debt securities, the top of the chain differs, although the general structure, from the company to the holder of debt securities, is similar. Where there is a bond or note issue, it is usual for there to be only one global bearer note, which represents the entire issue.<sup>8</sup> That note is physically held by a

---

7 Footnote original: *Re Lehman Brothers International (Europe) (in administration)* [2010] EWHC 2914 (Ch) at [226] and *Re Lehman Brothers International (Europe) (in administration)* [2012] EWHC 2997 (Ch) at [163]. See also *SL Claimants v Tesco plc* [2019] EWHC 2858 (Ch), [2020] Bus LR 250 at [6].

8 Footnote original: Most bonds are now held through these global custodian arrangements: J Payne, *Intermediation and Beyond* (2019) p 177. Although global notes can be issued as a registered rather than bearer note, commentators say that it is most common for there to be a bearer note issued in Europe. See R Salter, *Intermediation and Beyond* (2019) pp 131 and 132. For a description of the “Classical Global Note” and the “New Global Note” systems, see R Goode and L

custodian bank permanently on behalf of an international central securities depository (this process is referred to as “immobilisation”).<sup>9</sup> The chain then proceeds as above, with intermediaries between the custodian bank and the ultimate investors.

**An ultimate investor has both proprietary and personal rights in relation to the securities**

- 2.67 As we have seen, the relationships between the parties in an intermediated securities chain are characterised as trusts, overlaid with contracts agreed between parties at each level of the chain. This analysis has two effects. The first effect is that an ultimate investor does not own securities. Instead, they hold a beneficial interest in securities.<sup>10</sup>
- 2.68 The second effect is that an ultimate investor has a combination of both proprietary and personal rights in relation to intermediated securities. By “proprietary” rights, we mean that an ultimate investor has a right of ownership in the property held on trust (in this case, the beneficial interest in the securities held by the intermediary, rather than the securities themselves). Proprietary rights are enforceable against third parties.
- 2.69 For example ... if an intermediary becomes insolvent, the interest in the securities will not form part of the insolvent intermediary’s estate. Beneficial ownership of the property remains with the ultimate investor...
- 2.70 Where an intermediary uses an omnibus account, which may contain millions of intermediated securities, the ultimate investor does not have a proprietary right in respect of specific intermediated securities in that account. Rather, the ultimate investor has a proprietary right in the form of beneficial co-ownership in the pool of intermediated securities.<sup>11</sup> This

---

Gullifer, *Goode and Gullifer on Legal Problems of Credit and Security* (6th ed 2017) para 6-08.

9 Footnote original: Under the law of England and Wales, the holder of the note would be the legal owner of the securities, although commentators say that it is unlikely that the nature of the interest of the holder would be governed by our domestic law: R Goode and L Gullifer, *Goode and Gullifer on Legal Problems of Credit and Security* (6th ed 2017) para 6-08.

10 Footnote original: See from para 2.63 above.

11 The Law Commission give references, including: *Goode and Gullifer on Legal Problems of Credit and Security* (6th ed 2017) para 6-18; *Further Updated Advice*

means that the ultimate investor cannot point to certain intermediated securities which they own. Instead, they own a proportion of the intermediated securities in the account.<sup>12</sup>

- 2.71 Along with proprietary rights, an ultimate investor has personal rights. By “personal” rights, we mean that an ultimate investor would be able to claim compensation from an intermediary for breach of their duties under contract or the trust. For example, the intermediary, as trustee, may have a duty to transfer the intermediated securities upon instruction or perform other duties.<sup>13</sup> If the intermediary fails to carry out these duties, the ultimate investor may have a claim against the intermediary. However, unlike proprietary rights, personal rights are not enforceable against third parties. Therefore, an ultimate investor’s claim against an intermediary may be worth little or nothing if the intermediary has become insolvent.

### 67.2.2 Foreign law

So far as the topic raises issues of foreign law I necessarily rely on limited material available to an English lawyer. I would be interested to hear from readers with expertise on entities discussed in this chapter.

For Scots law, see the Law Commission 2020 paper para 2.72. Perhaps in practice intermediation is not governed by Scots law.

### 67.2.3 US intermediated securities

Section 8 [US] Uniform Commercial Code<sup>14</sup> sets out a code for intermediated securities. It has a vocabulary and concepts of its own. The right of the investor (“entitlement holder”) is a “security entitlement”. This confers personal rights against the “securities intermediary” and an interest in the financial asset held by the intermediary. Section 8-503 Uniform Commercial Code provides:

---

*on Intermediated Securities* (2008) paras 2.63 to 2.72.

12 The Law Commission give references, including *Goode and Gullifer on Legal Problems of Credit and Security* (6th ed 2017) para 6-15.

13 Footnote original: R Goode and L Gullifer, *Goode and Gullifer on Legal Problems of Credit and Security* (6th ed 2017) para 6-18.

14 <https://www.law.cornell.edu/ucc>

(a) To the extent necessary<sup>15</sup> for a securities intermediary to satisfy all security entitlements with respect to a particular financial asset, all interests in that financial asset held by the securities intermediary are held by the securities intermediary for the entitlement holders, are not property of the securities intermediary, and are not subject to claims of creditors of the securities intermediary...

(b) An entitlement holder's property interest with respect to a particular financial asset under subsection (a) is a pro rata property interest in all interests in that financial asset held by the securities intermediary, without regard to the time the entitlement holder acquired the security entitlement or the time the securities intermediary acquired the interest in that financial asset.

(c) An entitlement holder's property interest with respect to a particular financial asset under subsection (a) may be enforced against the securities intermediary only by exercise of the entitlement holder's rights under Sections 8-505 through 8-508.

This is not a common law trust, or at least, it does not use trust law vocabulary, but I think it comes to the same thing.

However, a security representing other securities does not create a security entitlement, so depository receipts (or units in a fund) are not governed by article 8. Instead the holder's rights are determined by the relevant document.<sup>16</sup>

#### 67.2.4 American depository receipts

The CG Manual provides:

##### **CG50240 Depository receipts** [May 2020]

##### **... DRs issued outside UK**

Where a DR is issued outside the UK the question of whether the holder of the DR is the beneficial owner of the underlying shares will be determined by reference to the law of the territory in which the DR

---

15 This formulation reflects the fact that US intermediaries do not generally segregate securities so one cannot identify particular securities as the ones held for customers; Official Comment 1 to §8-503.

16 Financial Markets Law Committee, "Report on research into the 1994 revisions to Article 8 of the Uniform Commercial Code" para 2.

<http://fmlc.org/wp-content/uploads/2018/02/Issue-3-Background-paper-on-Article-8-of-the-Uniform-Commercial-Code.pdf>

is issued. ...

More accurately, whether the holder of the DR is the beneficial owner of the underlying securities will depend on the terms of the deposit agreement construed in accordance with the law governing the agreement.

The CG Manual provides, rather optimistically:

Information on beneficial ownership may be provided to investors by the depository.

It seems unlikely that a foreign depository would give UK tax advice, or sufficient information to determine the UK tax issues.

In *Chembulk Management Pte Ltd v Vedanta Ltd*:<sup>17</sup>

an American Depositary Receipt (“ADR”) or ADS program<sup>18</sup> divides the ownership of a foreign stock between the depository and/or custodian, which act as the title owner, and the ADS holder, who holds a beneficial interest, the exact parameters of which are delineated in the governing ADR agreement, in the stock.

In *Carver v Bank of New York Mellon*:<sup>19</sup>

A careful reading of the Deposit Agreement confirms that BNYM, as *title* owner, holds the Deposited Securities for the Plans, which in turn have a beneficial ownership interest in the underlying Deposited Securities. ... With the exception of the obligation to hold the Deposited Securities, the [Deposit Agreement] seems to allocate all other relevant rights with respect to the Deposited Securities to the Plans. These include the right to redeem ADRs by exchanging them for the underlying Deposited Securities; the right to receive cash distributions in USD; and the right to instruct BNYM regarding the voting of shares. The Court concludes that these equitable rights give rise to, at least, a beneficial ownership interest in the Deposited Securities by the Plans.

These American depository receipts would be IT/CGT transparent, and there is no reason to think that they were untypical, so unless the

---

17 Nos. 16 CV 9827-LTS-KHP, 16 CV 9799-LTS-KHP United States District Court (2018)

18 Footnote original: ADSs [American Depositary Shares] are also referred to as ADRs.

19 United States District Court , New York (2017)

documentation was non-standard, that would be the UK tax position. Until 2012 that was, I think, generally accepted, and this was the view expressed in the CG Manual.

*HSBC Holdings v HMRC*<sup>20</sup> concerned ADRs governed by the law of New York. It suited HMRC to argue that HSBC depository receipts were contract-based. The tribunal heard expert evidence and preferred the view that the ADRs, which were “fairly typical”,<sup>21</sup> were contract-based, though the conclusion is tentatively expressed:

148. Overall our conclusion is that we are not satisfied as a matter of fact that under the law of the State of New York the holder of an HSBC ADR has a beneficial interest in the underlying fund of HSBC shares.

In the HSBC litigation it suited HMRC to argue for contract-based ADRs, but that conclusion would sometimes favour the taxpayer. Accordingly HMRC now seek to return to what was formerly understood to be the position.

**Beneficial ownership not conclusively determined by overseas law**

Where beneficial ownership of the underlying shares cannot conclusively be determined by reference to the law governing the arrangements relating to the issue of the DRs, for tax purposes HMRC will continue to determine beneficial ownership according to its understanding of the principles of UK law.<sup>22</sup> This means that HMRC will continue to apply its longstanding practice of regarding the holder of a DR as holding the beneficial interest in the underlying shares and the treatment will be the same for UK issued DRs.

The ADRs referred to in the HSBC decision fall into this category.

Thus HMRC first disregarded their longstanding practice, and now disregard the tribunal’s decision which was based on HMRC’s expert evidence. The reader may think this a not very impressive display of administration. Now it is done, the genie is not so easily returned to the bottle. If it suits them, taxpayers may properly proceed on the basis that

---

20 [2012] UKFTT 163 (TC)

21 at [97].

22 Author’s footnote: The UK has three legal systems. Scots trust law is quite different from English law, though whether these differences lead to a different outcome is not clear.

the tribunal correctly decided that the HSBC ADRs, and others in standard form, are contract-based. Though taxpayers may also properly proceed on the basis that the tribunal was wrong, and the subsequent HMRC statement is correct, and I expect that is the usual practice.<sup>23</sup>

### 67.2.5 *Belgium and Luxembourg*

I concentrate on Belgium and Luxembourg as they are the homes of Euroclear and Clearstream. The Law Commission 2008 paper provides:

#### **LEGAL ANALYSIS OF INTERMEDIATED SECURITIES**

2.31 Belgium<sup>24</sup> and Luxembourg<sup>25</sup> are each home to major ICSDs (Euroclear and Clearstream respectively) and both have recently clarified their respective securities laws. Investors that hold securities through an intermediary in an omnibus account are treated as having a co-ownership right in the pool of fungible securities, exercisable only against the intermediary. Should the intermediary fall insolvent, the investor is given a right of revendication, that is to say, a claim for the return of property enforceable against the intermediary and its creditors...

#### **Direct enforcement versus indirect enforcement**

2.35 In all common law jurisdictions (such as the UK and the US) and a number of civil law countries (for example Belgium and Luxembourg), an investor that holds through an intermediary is unable to exercise the rights it may have in the underlying securities directly against the issuer of those securities.<sup>26</sup> The investor can only enjoy the fruits of its investment by enforcing its rights against its intermediary. Furthermore, the investor will be generally prohibited from making a claim against securities held in the account of a higher tier intermediary but must rely on the contractual and fiduciary obligations of its own

---

23 This is supported by Cooklin, “UK companies listing in the US”, Tax Journal 14 March 2014: “Many US lawyers expressed surprise at the expert witness evidence on the effects of the underlying New York law documentation on which the FTT’s finding of facts was based.”

24 Footnote original: Belgian Royal Decree No. 62, as co-ordinated by Royal Decree of 27 January 2004.

25 Footnote original: Luxembourg Law of 1 August 2001 on the circulation of securities and other fungible instruments, Articles 6.7 and 15.

26 Footnote original: Unless the issuer permits otherwise by contract or provisions in a deed poll or trust deed.

intermediary to pursue such claims....

2.49 The effect of commingling securities in a pooled account is generally to preclude the continuing existence of direct property rights of individual owners in the specific securities held prior to commingling...

#### **LEGAL PROTECTION BASED ON CO-OWNERSHIP**

2.51 In a number of EU Member States, account holders are given proprietary rights (or the equivalent protection) by treating their interests in a commingled account as co-ownership (or co-proprietary) interests in a fungible pool.

2.52 In Belgium<sup>27</sup> and Luxembourg,<sup>28</sup> statute converts what would otherwise be a mere contractual claim against the intermediary into an intangible co-ownership right in a pool of fungible book-entry securities held by the intermediary.<sup>29</sup>

This is not a trust, but it comes to the same thing. So intermediated securities held by Euroclear and Clearstream are transparent, not contract based.

#### 67.2.6 Denmark, Germany, Netherlands, Switzerland

27 The footnote refers to Belgium Royal Decree No 62, which is headed: Coordonné relatif au dépôt d'instruments financiers fongibles et à la liquidation d'opérations sur ces instruments. [Facilitating the Circulation of Securities], Article 2.

[http://eur-lex.europa.eu/n-lex/legis\\_nl/overheid\\_form\\_en.htm](http://eur-lex.europa.eu/n-lex/legis_nl/overheid_form_en.htm) or

<http://justice.belgium.be/fr/>

28 Article 3(1) [Luxembourg] Securities Act 2001 <http://www.cssf.lu> provides:

Le titulaire de compte bénéficie, à concurrence du nombre de titres inscrits en son compte titres, d'un droit réel de nature incorporelle sur l'ensemble des titres de même genre, tenus en compte par son teneur de compte pertinent, des droits attachés aux titres et des droits prévus par la présente loi. Sous réserve de dispositions légales contraaires, il ne peut faire valoir ses droits qu'à l'égard du teneur de comptes pertinent.

The account holder benefits - up to the amount of securities held on its securities account - from an intangible interest in all the securities of the same description held on an account by the relevant account keeper, from the rights attached to the securities and from the rights provided for in this law. Unless otherwise provided by law, the account holder may only exercise its rights against the relevant account keeper.

29 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

The Law Commission 2008 paper provides:<sup>30</sup>

An investor may be granted a right to enforce its claim against an upper tier intermediary in circumstances where its own intermediary has acted in breach of duty or is insolvent. This is the case in Denmark and Germany<sup>31</sup> and possibly also in the Netherlands.<sup>32</sup>

Thus it seems that intermediated securities in these jurisdictions are also transparent.

For Switzerland, see the Federal Act on Intermediated Securities.<sup>33</sup>

### **67.3 Situs of transparent intermediated security for IHT & IT**

There are no relevant statutory provisions, so the common law rules apply for IHT.

The relevant principle is that an asset is situate where it can be dealt with. An intermediated security is dealt with (ie transferred) in the jurisdiction of the intermediary. That is the jurisdiction where litigation over the transfer of the intermediated security would normally take place. So that is the situs of the intermediated security; the situs of the underlying security is irrelevant.

It might be argued that in the case of a transparent intermediated security, the situs of the investor's asset (the intermediated security) must be that of the underlying security on the basis that:

- (1) intermediation constitutes a bare trust (or more accurately, a series of bare trusts) over the underlying security, and

---

30 Law Commission, "Issues Affecting Account Holders and Intermediaries" para 1.239 (June 2006)

[http://www.lawcom.gov.uk/wp-content/uploads/2015/03/Intermediated\\_security\\_seminar\\_2.pdf](http://www.lawcom.gov.uk/wp-content/uploads/2015/03/Intermediated_security_seminar_2.pdf)

31 Footnote original: If an intermediary refuses to enforce a claim against the intermediary above for the return of securities, German law permits the investor to bring a direct action for return against the upper tier intermediary under the Securities Deposit Act, sections 7-8.

32 Footnote original: Sections 7:420 and 421 of the Netherlands Civil Code which relate to agency contracts could give the investor a right against an upper tier intermediary in the event of a breach of duty or insolvency of its own intermediary.

The Netherlands Civil Code is available in English on <http://www.dutchcivillaw.com>

33 <https://www.admin.ch/opc/en/classified-compilation/20061735/index.html>

- (2) the situs rule for bare trusts is always that the bare trust should be disregarded.<sup>34</sup>

However the trust (if any) is unlike a straightforward bare trust since (inter alia):

- (1) Ultimate investors can only make claims against their immediate intermediary, not against the company which issues the securities, or against another intermediary (the “no look through principle”).
- (2) The interests of the ultimate investors are pooled.
- (3) Change of title is effected by registration.

In fact intermediation is not properly described as a bare trust in the older sense of that expression.<sup>35</sup> If it is described as a bare trust, then the expression is being used widely, and there is no reason that all bare trusts (if the term is used so widely) should be governed by the same situs rule.

Dicey agrees:

... the *situs* of immobilised securities should be regarded as the place where the depository is established and where it keeps the database in which the entitlements of the depositors are recorded.<sup>36</sup>

In *Re Bloom*:<sup>37</sup>

The place where the central securities depository control account is located could [and should] be considered the situs of “dematerialized” securities. In a multi-tiered holding system, the account would be situated at the financial investment intermediary on whose books the interest of the debtor appears. This is the place where the record that determines title is to be found.

The Law Commission agree. The Law Commission 2008 paper provides:

---

34 See 97.30 (Bare trust or nominee ship).

35 See 1.7.1 (“Bare trust” and related terms).

36 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 22-043 (Immobilised securities). This view is enthusiastically supported by Benjamin, *Interests in Securities* (2000), Chap 7.

37 [2004] BCSC 70, 27 BCLR (4th) 176 <http://www.canlii.org> in *Secure Capital v Credit Suisse* [2015] EWHC 388 (Comm) this view was accepted without argument (though in the result, situs was not held not to be relevant). The point did not arise on the appeal.

21.6 The concentration of the investor's interests into one account *with a single situs* can also greatly simplify conflicts of laws issues. This is of particular benefit to lenders wishing to take security over a portfolio of securities. Provided that the choice of law rules applied to the different intermediated securities are clear, the lender need only concern itself with the perfection requirements of the jurisdiction in which the account is located rather than the requirements of each of the jurisdictions applicable to the various underlying securities.

Thus the situs of the intermediated security (the asset held by the investor) may be different from the situs of the underlying security. Such differences are not surprising since, as the 2020 paper provides:

Holding investments through an intermediated securities chain can have a profound effect on the ability of ultimate investors to exercise rights... ultimate investors can generally only make a contractual or trusts claim against their immediate intermediary, and not against the company which issues the securities, nor against another intermediary (the “no look through principle”).<sup>38</sup>

Investors may for practical purposes ignore the difference between intermediated and underlying securities, but the differences will emerge on the insolvency of an intermediary, as happened in the case of Lehman Brothers, or in any other case where the investor wishes to exercise rights in relation to the securities.

### 67.3.1 HMRC view

HMRC may take a different view. They may regard intermediated securities which are transparent for income tax as transparent for situs; what matters is the situs of the underlying security. In 1994 HMRC said:

... where a financial institution or other intermediary has purchased Eurobonds or similar fungibles through Euroclear or Cedel [now Clearstream] on behalf of a client-investor, the Revenue will treat the financial institution or intermediary as the nominee or agent of the client-investor, unless the terms of the particular issue prescribed

---

38 Law Commission 2020 paper, para 1.23 -1.24. Likewise the 2008 paper: “2.24 Intermediation has had a substantial effect in transforming the legal nature of investor's rights in securities.”

otherwise. So, save in the excepted circumstances, the Revenue will look through the intermediary and treat the beneficiary-investor as owning the underlying Eurobonds or similar fungibles.<sup>39</sup>

The IHT Manual is obscure:

**IHTM27077 Eurobonds and American depository receipts** [May 2020]

We regard the situs of securities dealt with through computerised clearing systems (for example, Euroclear; CEDEL [which became Clearstream in 2002]) as determined by the terms of issue of the particular security. ...

This passage might perhaps be intended to say that HMRC look through the intermediary, but it does not say that. It actually says very little. It does not explain what constitute “the terms of issue”: does that include intermediation? It does not explain how situs is decided once one knows what are the terms of issue. To say that “situs is determined by the terms of issue” is not a very accurate statement, or at least, not a very helpful statement, of the rules which apply to directly held (non-intermediated) securities. So it impossible to say from this passage what HMRC think the position may be.

There is a certain common sense in the view that situs of an intermediated security is determined by the situs of the underlying security. However, situs is not (or not just) a matter of common sense, and that view cannot stand against the authorities set out above. The common law situs rules looks to the situs of the intermediated security, not the underlying security.

It must be frustrating for HMRC to see a significant part of the economy taken out of the scope of IHT by means of clearing systems and intermediated securities. But in practice the loss of tax should be (more or less) nil, because:

- (1) UK resident foreign domiciliaries (if properly advised) will not usually hold investments in listed UK companies (for IT and CGT reasons as well as possible IHT).
- (2) For non-residents, IHT on such assets is largely uncollectable.

---

39 [1994] PCB 139.

Indeed the current law could aid the UK economy by encouraging investment in UK listed companies, or at least it could if HMRC acknowledged it.

## 67.4 Situs of proprietary intermediated security for CGT

In the absence of a statutory provision, the IHT situs rule will apply for CGT. Six statutory provisions need consideration: the co-ownership situs rules, the bare trust disregard, the UK-law rule, and the rules dealing with securities in s.275(1)(d)(da)(e).

### 67.4.1 *Intermediated securities of non-UK company*

The reader will recall that s.275(1)(e) TCGA provides:

subject to paras (d) [government securities] and (da) [UK incorporated companies] above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.<sup>40</sup>

In this paragraph I assume we are not concerned with government securities or UK incorporated companies within paras (d) or (da).

I first consider debentures and then shares.

As far as debentures are concerned, there are two questions:

- (1) are intermediated debentures (the interests held by investors) properly described as “debentures” within the meaning of s.275(1)(e)?
- (2) if so are intermediated debentures “registered” debentures?

Since debenture stock count as “debentures”<sup>41</sup> it seems reasonably clear that the intermediated debentures are properly described as “debentures”.

Intermediated debentures are registered in the sense that the investors interests are recorded on the intermediary’s register.<sup>42</sup> At first sight one might think that the register referred to in s.275(1)(e) must be a register kept by the company which issued the debentures. However a company does not have to keep a register of its debenture holders (unlike a

---

40 See 98.6 (Registered security: non-UK co).

41 See 98.2.4 (“Debenture”).

42 Benjamin, *Interests in Securities* (2000) para 2.91: “Interests in securities [Intermediated securities] may properly be characterised as a form of registered securities, even where the underlying securities are in bearer form.”

shareholder register). The distinguishing feature of a register is that it determines or provides evidence of ownership.<sup>43</sup> So it is considered that intermediated debentures are “registered” on the intermediary’s register. It follows that:

- (1) If the underlying debenture is not registered, the intermediary’s register is the only register, and the investors interests are situate where the intermediary’s register is situated.
- (2) If the underlying debenture is registered, there are two registers:
  - (a) The company’s register of the underlying debenture (which will record the intermediary as the registered holder).
  - (b) The intermediary’s register of the intermediated debenture (which will record the investor as the registered holder).

It is considered that the company’s register does not come into the picture, since the asset which the investor owns is the intermediated debenture and not the underlying debenture. But even if that is not correct, the intermediary’s register should be regarded as the principal register so that is the one which governs situs.

For these reasons, an intermediated debenture of a non-UK incorporated company is situate where the intermediary keeps its register.

In practice it does not often matter whether the situs of an intermediated debenture (of a non-UK incorporated company) is in the place of the intermediary’s register or the situs of the underlying debenture. Either way, the asset will not usually be UK situate. But it could matter, for instance, if the debenture is a bearer debenture and the document is in the UK. In such a case it is sensible to look to the intermediary’s register rather than to the place of the document of the underlying debenture, since an investor could not be expected to know where the document of the underlying debenture is situated.

The same applies when the underlying security is shares in a non-UK incorporated company, rather than debentures.

#### *67.4.2 Securities of UK incorporated company*

It is considered that intermediated securities of UK incorporated

---

<sup>43</sup> The intermediary’s register is not open to inspection, unlike a register under s.744 Companies Act 2006, but open access is not an essential feature of a register, and there is no reason to expect foreign law to apply English company rule principles.

companies are properly described as shares or debentures and so fall within the rules in s.275(1)(da) TCGA. If that is correct, the registered securities rule in 275(1)(e) does not apply: it does not matter whether the securities are regarded as registered. Intermediated securities of UK incorporated companies are UK situate for CGT purposes.

#### 67.4.3 *Municipal and government securities*

For the same reason, intermediated securities of government or municipal authorities are situated in the authority concerned: s.275(1)(d) TCGA.

#### 67.4.4 *Another view*

In the case of co-ownership interests the co-ownership situs rules<sup>44</sup> in s.275C TCGA provide:

(2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.

(3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

Do investors hold interests in the underlying securities as co-owners (within the meaning of the co-ownership rule)? That depends on the terms of the agreement with the intermediary but it is likely to be the case.<sup>45</sup> If so, it appears at first sight that these rules override the common law situs rule, so the situs of the investor's interest for CGT is that of the underlying security.

The CGT bare trust disregard<sup>46</sup> provides another route to the same destination. Does the intermediary hold for the investors as bare trustee (within the statutory sense of that expression)? That depends on the terms of the agreement with the intermediary but it is likely to be the case. If so, it appears at first sight that the effect of s.60 TCGA is to treat the investors as co-owners of the underlying security, so the situs of the investor's interest is that of the underlying security.

---

44 See 98.3 (Co-owned assets).

45 See 67.1 (Securities law background).

46 See 1.7 (Bare trust/nomineeship).

It is arguable however that these deeming provisions do not alter the fact that the investor's intermediated securities are "registered" so that s.275(1)(e) continues to apply. This also overrides the UK-law rule<sup>47</sup> even if the underlying security was subject to UK law, or if the intermediary arrangement was subject to UK law.

#### 67.4.5 Conclusion

The CG Manual formerly stated that the situs of an intermediated security for CGT purposes is that of the underlying security rather than that of the intermediary's register.<sup>48</sup> That is correct for securities of UK incorporated companies. It is considered that situs of securities of non-UK companies depends on the place of the intermediary's register. That could be different from the situs of the underlying security, though circumstances in which the difference matters will be rare.

### 67.5 Transparent intermediated securities: CGT

The CG Manual discusses the issue under the heading "depository receipts". The Manual first discusses the securities law background and practice:

#### **CG50240 Depository receipts** [May 2020]

You may come across assets referred to as Depository Receipts (DRs). The commonest are American Depository Receipts (ADRs).

DRs are used as substitute instruments indicating ownership of securities such as shares. Although DRs may be owned by anyone, they are designed primarily to enable investors to hold and deal in shares of companies located in countries other than their own. Such activities might otherwise be inhibited by difficulties in transferring original share certificates from one country to another. The investors hold or trade the DRs rather than the share certificates themselves.

A person holding shares for which DRs are available can convert them into DR form by depositing the share certificates with a local branch of a depository (a financial institution such as a bank). The depository

---

47 See 98.13.1 ("Intangible asset").

48 See 67.3.1 (HMRC view). Curiously, the CG Manual in 2012 deleted the passage which formerly stated that the situs of the DR is the situs of the underlying security. That might reflect a hesitant change of view or just an accident. But as far as I know, HMRC practice has not changed.

issues a DR. This document certifies that the depository, or an appointed custodian in the country of the underlying shares, holds the share certificates and that the owner of the DR is entitled to the share certificates on surrender of the DR. The precise detail of the arrangements may vary, but the holder of a DR will generally have many of the benefits associated with share ownership. In particular:

- the DR can be exchanged for the underlying shares on demand by the DR holder
- any dividends, subject to a handling fee, flow through to the DR holder.
- the holder of shares in DR form may at any time cancel the arrangement by asking for delivery of the share certificates in respect of their underlying shares, and surrendering the DRs at a local branch of the depository.

This guidance applies to DRs that display such characteristics.

We have been asked to clarify how holding shares via DRs will affect liability to Capital Gains Tax or Corporation Tax on chargeable gains following the decision of the First Tier Tribunal in the Stamp Duty Reserve Tax case of *HSBC v Commissioners for HMRC*, [2012] UKFTT 163 (TC).

#### **UK-issued DRs**

Where a DR is issued in the UK the HMRC view is that the holder of a DR is the beneficial owner of the underlying shares. ...

More accurately, as discussed above, whether a trust is created would depend on the terms of the deposit agreement construed in accordance with the law governing the agreement.

Assuming there is a transparent intermediated security, the CG Manual goes on to set out the tax implications:

... The practical implications include that:

- [1] a transfer of shares by a shareholder to a depository in exchange for an issue of DRs is not a disposal of the shares for capital gains purposes because the shareholder retains beneficial ownership of the shares
- [2] a disposal of the DRs is a disposal of both the DRs themselves and a disposal of the underlying shares.<sup>49</sup>

---

<sup>49</sup> Author's footnote: This assumes that the investor holds two distinct assets, (1) "the DRs themselves", and (2) the underlying securities (or at least an interest in them). That is not correct. A DR should be regarded as a matter of general law as one asset

In practice the value of a DR will track the value of the underlying shares very closely and to that extent the consideration for the disposal of the DRs should be regarded as consideration for the disposal of the shares

[3] in a share exchange or company reconstruction in which shareholders have an option to receive DRs instead of being issued with shares we accept that the shares are to be treated for the purposes of TCGA92/S135 as being issued to the shareholders, see CG52500+.

[4] if the holder of DRs converts them back into the underlying shares there is no change of ownership of those shares and so no disposal of the shares. There will have been a disposal of the DRs and the usual computational rules will apply. If no consideration is received for the disposal of the DRs there will be no chargeable gain.

[5] where a person holds the same class of shares directly and through DRs then they may be regarded as constituting a single holding for share identification purposes, see CG51500.

#### *67.5.1 Voting rights on intermediated securities*

The holder of intermediated securities may or may not have the voting rights attached to the shares: that depends on the documentation. Normally it makes no difference for tax purposes, but occasionally that matters.

Section 169S(3) TCGA defines “personal company” for the purposes of business asset disposal relief:

For the purposes of this Chapter “personal company”, in relation to an individual, means a company—

- (a) at least 5% of the ordinary share capital of which is held by the individual, and
- (b) at least 5% of the voting rights in which are exercisable by the individual by virtue of that holding.

So where BAD relief may be applicable, care needs to be taken or the

---

and not two. Admittedly a DR confers a number of different rights, but that is also true of a share, a unit in a unit trust, an equitable interest, and most if not all types of property which are nevertheless regarded as single items of property and not as two or more distinct items. However, it does not matter as the Manual goes on to effectively ignore the two-asset analysis. In the view of the Manual, the beneficial interest in the underlying share is effectively the only asset.

relief may be lost.

## **67.6 Taxation of contract-based intermediated securities**

The CG Manual also considers the tax position of contract-based intermediated securities:

### **50240 Depository receipts [Dec 2019]**

#### **...Beneficial ownership determined by overseas law**

Where the relevant law means that the holder of a DR is not the beneficial owner of the underlying shares the practical implications include that:

[1] a transfer of shares by a shareholder to a depository in exchange for an issue of DRs is a disposal of the shares for capital gains purposes because the shareholder loses beneficial ownership of the shares

[2] a disposal of the DRs is not a disposal of the underlying shares

[3] in a share exchange or company reconstruction in which shareholders have an option to receive DRs instead of being issued with shares the conditions of TCGA92/S135 will not be met by shareholders who take DRs as they have not been issued with shares.

[4] where a holder of DRs converts them into the underlying shares there will be a disposal of the DRs and an acquisition of shares. The usual computational rules will apply.

In addition:

- (1) The situs of the intermediated security for IHT purposes will be the relevant jurisdiction.
- (2) The intermediated security will be UK situate for CGT purposes if governed by UK law, under the UK law rule, or if it is a future or option. Otherwise it will be non-UK situate.
- (3) The income from the ADR would be foreign source income (but subject to the manufactured dividend rules, if applicable).

## INVESTMENT MANAGER EXEMPTIONS

68.1

### 68.1 Investment manager exemptions

This chapter considers three related exemptions where an investment manager or broker (“**broker/IM**”) acts for a non-resident client.

In order to understand the exemptions, it is helpful first to note the tax issues which a non-resident person would face (in the absence of relief) if it carried on a trade in the UK through a broker/IM. It is necessary to consider separately (1) a non-resident company and (2) a non-resident individual or trust.

In the absence of these exemptions, if a non-resident *company* carried on a trade in the UK through a UK broker/IM, the non-resident company would face a UK tax charge arising from the fact that it might be trading in the UK through a permanent establishment ie the broker/IM might be an agency PE). If so:

- (1) The non-resident company would (in short) be subject to corporation tax on its profits.<sup>1</sup>
- (2) The broker/IM would be a “UK representative” and that tax could be collected from it.<sup>2</sup>

Similarly, in the absence of these exemptions, if a non-resident *individual or trust* carried on a trade in the UK through a UK broker/IM, the non-resident would face a UK tax charge arising from the fact that it might be trading in the UK through a branch or agency (ie the broker/IM might be a branch or agency). If so:

- (1) The non-resident individual or trust would (in short) be subject to

---

1 See 20.5 (CT territorial limit: Trading).

2 See 118.3 (UK representative).

income tax and CGT<sup>3</sup> on its profits.

- (2) The broker/IM would be a “UK representative” and that tax could be collected from it.<sup>4</sup>

Alternatively the position might be that the broker/IM was not a branch or agency or PE of the non-resident, but nevertheless the non-resident was trading in the UK. In that case (whether a company or an individual or trust) the non-resident person would in principle<sup>5</sup> be subject to income tax on its trading profits.

Clearly, if there were no relief, non-residents would not use a UK broker/IM (at least if there were a risk that their activities might be characterised as trading). The investment management exemptions override these tax charges. Assuming the various requirements are met the exemptions are as follows:

- (1) *IME PE relief*: A broker/IM is not a permanent establishment of a non-resident company. The main significance of this is:
- (a) to disapply the corporation tax charge which applies when a non-resident company trades through a UK PE.
  - (b) to disapply the provisions allowing collection of tax from a PE (as its “UK representative”).
- (2) *IME UK-representative relief*: A broker/IM is not a UK representative for IT and CGT. The main significance of this is to disapply the rules allowing the collection of IT/CGT from UK representatives of non-residents. This exemption is in chapter 2B part 14 ITA and chapter 7A TCGA.
- (3) *IME non-resident IT relief*: UK source income generated through a broker/IM is one of the classes of income which qualifies for non-resident IT relief.<sup>6</sup> This exemption is part of the code of non-resident IT relief set out in Chapter 1 Part 14 ITA. I refer to it as “**IME non-resident IT relief**”.

<b>Relief</b>	<b>Section</b>
IME PE relief	ss.1145-1151 CTA 2010
IME UK-representative relief	835H-835S ITA
IME non-resident IT relief	816-828 ITA

3 See 53.5 (Trade through UK branch/PE).

4 See 101.24 (Why branch/agency matters).

5 In practice a DTA would often provide relief.

6 See 42.1 (Non-residents IT relief: Introduction).

I refer to the exemptions together as the “**investment manager exemptions**” abbreviated to “**IME**”. (References to investment managers in this label include brokers.) The term used in the HMRC Manuals is “investment management exemption”, in the singular. But they are best regarded as three separate (though linked) exemptions.

The rules are written out *four* times in four different places.<sup>7</sup> The rules for brokers are similar to investment managers, but are set out separately each time, so there are eight sets of rules. This does make a coherent exposition rather difficult. Where the rules repeat or overlap, I set out the text of IME non-resident IT relief, citing the statutory equivalents for the other rules in footnotes, unless there are material differences.

It would be simpler and shorter if branch/agency were abolished and the PE rules applied to non-companies just as to companies.<sup>8</sup>

### 68.1.1 *Policy background*

SP 1/01 explains the policy considerations behind the investment management exemptions:

1. There are two policy objectives underlying the Investment Managers Exemption. These objectives are

- [a] firstly, that an overseas investor should not be brought into UK tax in relation to investment transactions simply because they are conducted on their behalf by a UK resident investment manager, and
- [b] secondly, that any fees earned by a UK resident investment manager for services performed for the non-resident investors should be fully chargeable to UK tax.

The first objective rests on tax competition considerations.<sup>9</sup>

2. The UK tax system seeks to achieve these objectives by granting what is termed the Investment Manager Exemption. The exemption enables non-residents to appoint UK based investment managers without the risk of UK taxation and is one of the key components of the UKs continuing attraction for investment managers. HMRC is committed to maintaining this environment by improving the

---

<sup>7</sup> The fourth iteration of the IME is in part 8B CTA 2010 (Northern Ireland Rate), not discussed here.

<sup>8</sup> See 101.26 (Branch/agency: Critique).

<sup>9</sup> See 1.2.2 (Other tax competition).

exemption to meet developments in the investment management industry through providing greater flexibility and better explanations for investment managers and expanding the scope of exempt activities.

Other countries adopt the same approach:

The highly mobile nature of the funds management business suggests that income from portfolio foreign investments flowing to non resident investors should not be taxed in Australia. Even modest amounts of Australian tax on these investors is likely to impede the growth of this business. Only the income of the Australian funds manager should be subject to Australian tax.<sup>10</sup>

## 68.2 IME PE relief

I discuss IME PE relief in this chapter, though to see the topic in the round one needs to be familiar with the meanings and functions of PE, for which see 101.2 (PE: UK-law/OECD Model meanings).

The key points to bear in mind for present purposes are as follows. Firstly, the term “permanent establishment” is used in different places with different definitions. It is strictly necessary to distinguish between:

- (1) “**UK-law PE**” defined in s.1141 CTA 2010.
- (2) “**OECD-model PE**” defined in OECD Model.

Secondly, an independent agent is not a PE (the “**independent agent exemption**”). The wording of the independent agent exemption differs slightly between UK-law PE and OECD-model PE so it is strictly necessary to distinguish between:

- (1) “**UK-law independent agent exemption**” defined in s.1142 CTA 2010.
- (2) “**OECD Model independent agent exemption**” defined in OECD Model.

Section 1142 CTA 2010 provides:

- (1) A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent’s business.
- (2) Sections 1145 to 1151 apply for the purpose of supplementing

---

<sup>10</sup> See “A Platform for Consultation” (Australia, 2010) para 30.61 <http://rbt.treasury.gov.au/publications/paper3>

subsection (1) in relation to transactions carried out on behalf of a non-UK resident company by a person in the UK acting as—

- (a) a broker (section 1145),
- (b) an investment manager (sections 1146 to 1150)...

Section 1145 CTA 2010 provides IME PE relief for a broker:

(1) This section applies if a transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as a broker.

(2) In relation to the transaction, the broker is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the broker's business if (and only if) each of conditions A to D is met. ...

Section 1146 CTA 2010 provides IME PE relief for an investment manager:

(1) This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.

(2) In relation to the investment transaction, the investment manager is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the investment manager's business if (and only if) each of conditions A to E is met ("the independent investment manager conditions"). ...

If the conditions for IME PE relief are met:

- (1) The broker/IM is not a UK-law PE.
- (2) It will not normally matter whether the broker/IM is an OECD-model PE.<sup>11</sup>

If the conditions for IME PE relief are *not* met, the broker/IM is not "an agent of independent status acting in the ordinary course of the investment manager's business" and does not qualify for the UK-law independent agent exemption. Thus the broker/IM may be a UK-law PE – if the general requirements of a PE are met, that is, if the broker/IM is "an agent acting on behalf of the non-resident company and has and habitually exercises there authority to do business on behalf of the company". In other words,

---

<sup>11</sup> For completeness: where the conditions for IME PE relief are met, (1) it is likely that the broker/IM is an independent agent, and so not an OECD-model PE; (2) It is not likely that HMRC would seek to argue to the contrary.

failure to meet the conditions for IME PE relief disappplies the independent agent exemption, but it does not necessarily follow that the broker/IM is a UK-law PE:

- (1) If the broker/IM is not a UK-law PE, it will not normally matter whether the broker/IM is an OECD-model PE.
- (2) If the broker/IM is a UK-law PE, it is possible that it is not an OECD-model PE, in which case treaty relief may apply.

These are the complications which arise from having two definitions of PE.

In short, IME PE relief offers a safe harbour, in which a company can be reasonably sure it does not have a PE. SP 1/01 explains:

10. The Investment Manager Exemption legislation now only has relevance for corporation tax by providing greater clarity about what constitutes independence of investment managers in relation to the non-residents for which they act.

### **68.3 IME non-resident IT relief**

I discuss the IME aspects of non-resident IT relief in this chapter, though to follow it one needs to be familiar with the background rules of non-resident IT relief, for which see 42.1 (Non-residents income tax relief: Introduction).

SP 1/01 explains:

10. ... For income tax it raises the threshold for chargeability so that the same criteria apply when there is no treaty protection in the form of a permanent establishment article.<sup>12</sup>

For individuals and trustees, non-resident IT relief applies to “disregarded income”.<sup>13</sup> This term includes “disregarded transaction income”. This is where IME non-resident IT relief comes into play. For individuals and trusts, s.814(1)(2) ITA provides relief for a broker:

- (1) Subsection (2) applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.

---

12 That is, IME non-resident IT relief provides roughly the same relief as article 7 OECD Model: “The profits of an enterprise carried on by a resident of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein.”

13 See 42.5 (Disregarded income).

- (2) Income is “disregarded transaction income”, subject to subsection (6), if—
  - (a) it is transaction income, and
  - (b) the independent broker conditions are met in relation to the transaction in question.

For individuals and trusts, s.814(3)(4) ITA provides relief for an investment manager:

- (3) Subsection (4) applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
- (4) Income is “disregarded transaction income”, subject to subsection (6), if—
  - (a) it is transaction income, and
  - (b) the independent investment manager conditions are met in relation to the transaction in question.

For non-resident companies the drafting is similar and the result is the same. Non-resident IT relief applies to “disregarded company income”. Section 816 ITA provides:

- (1) For the purposes of this Chapter income arising to a non-UK resident company is “disregarded company income” if it is ...
  - (c) income arising from a transaction carried out through a broker in the UK acting as an agent of independent status in the ordinary course of the broker’s business,
  - (d) income arising from a transaction carried out through an investment manager in the UK acting as an agent of independent status in the ordinary course of the investment manager’s business, ...

## **68.4 IME UK-representative relief**

I discuss IME UK-representative relief in this chapter, though to see it in the round one needs to be familiar with the UK representative rules, for which see 118.2 (Tax collected from UK representative).

Section 835H ITA provides relief for brokers:

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.
- (2) The broker is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
  - (a) the amount is transaction income in relation to a transaction carried out through the broker in the UK on behalf of the non-UK resident, and

- (b) the independent broker conditions are met in relation to the transaction (see section 835L).

Section 835I ITA provides relief for investment managers:

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
- (2) The investment manager is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
  - (a) the amount is transaction income in relation to an investment transaction carried out through the investment manager in the UK on behalf of the non-UK resident, and
  - (b) the independent investment manager conditions are met in relation to the investment transaction (see section 835M).

## 68.5 IME definitions

### 68.5.1 “Investment manager”

Section 827(1) ITA provides a commonsense definition:

In this Chapter “investment manager” means a person who provides investment management services.<sup>14</sup>

An investment manager who merely gives advice would not be a PE. However an investment manager with discretionary management powers would be a PE, at least if the principal was carrying on a trade.

### 68.5.2 “Broker”

There is no statutory definition. The former International Tax Handbook provided:

#### **926. NRs: Machinery of assessment: commodity markets: broker**

A few words are called for about an important market operator, the broker. London has been a great market for centuries. Until a few decades ago vast amounts of produce were landed in, or trans-shipped in London docks and it was here and in other ports that the markets grew. They are run by Trade Associations which lay down rules designed to secure a fair, orderly and open market; to provide for membership, and to consider things like rates of brokerage. The actual constitution of the different markets varies but one would normally find as members some big producers, some major users, both of whom may have a seat in the market ring, the place of business. But the central character is the broker. A broker is a negotiator for commission, who will sell or

---

<sup>14</sup> The equivalent for IME PE relief is s.1150(1) CTA 2010.

buy for clients. Brokers have a long history, but, in modern usage, Bowstead, the writer of the standard work on agency, describes the broker in this way–

“A broker is an agent whose ordinary course of business is to negotiate and make contracts for the sale and purchase of goods and other property of which he is not entrusted with the possession or control.”<sup>15</sup>

Payne, a writer on British Commercial Institutions, says this of an import broker–

“The function of a broker is to bring two parties together for the purpose of concluding a contract. Brokers are generally produce brokers with whose aid very large transactions take place at the chief importing ports. They are often specialists who, through long experience of markets ... are able to buy and sell to better advantage than could the general import merchant ... he (the broker) is not associated with the physical movement of the goods, nor with clearing them through Customs. After selling a consignment by auction, or by private treaty, the broker is paid a commission or fee (brokerage) which, with the other expenses of sale is deducted from the gross selling price.”

Brokers are thus associated with the great commodity markets and exchanges, professional negotiators who will act for buyers and sellers and have nothing to do with the work-a-day business of handling or insuring the goods. They constitute an essential link in the market mechanism, in making the function of the market-place in determining price, available to their clients. Another odd quality of brokers is that the same broker can, by the custom of certain markets, act both for buyer and seller.

This means in practice that if A has asked a broker to sell something and B has asked the same broker to buy the same thing, the broker can match the two. The market rules would require that the broker does this business in the open (so that any other broker can step in if he wishes) and that preserves the idea of open market dealing and the natural protection which it gives to buyer and seller. Although the broker has acted for both parties the open nature of the market mechanism ensures that the price is a fair market price. ...

**939 NRs: when to accept the TMA 70 s.82 broker exemption - General**

Brokers and general commission agents take a very limited part in the marketing process. They are there to make the advantages of the market-place available to their clients. Whatever the terms mean, we do not accept as a broker or as a general commission agent a man who does everything the client himself would do in running the business were he himself here to do it, even if the agent acts for more than one client. Both expressions are primarily to do with commodity markets and that is what they were really intended for.

But over the years the application of the broker and general commission agent exemption has been extended. Stockbrokers, for example, will generally fall within Section 82(1) [TMA].<sup>16</sup> We have certainly accepted that there can be

---

15 Bowstead and Reynolds on Agency, (19<sup>th</sup> ed., 2013), 1.035.

16 Section 82 (now repealed) provided: “Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker ... In this subsection, ‘broker’ includes a general commission agent.”

general commission agents and brokers in the field of shipping and that the exemption is sometimes appropriate. In insurance, on the other hand, we resist the suggestion that an underwriting agent can be a general commission agent. Insurance brokers will not normally be carrying on a non-resident's trade. If it seems that they do then they will arguably be acting in the capacity of underwriting agents and we would deny the exemption. If, in Districts, there are cases outside the usual commodity markets, where exemption under Section 82(1) appears to have been given but this treatment has not definitely and fairly recently, say within the last twenty years, been approved or condoned by International Division, it would be sensible to consider asking for advice on the next convenient occasion.

### 68.5.3 “*Transaction income*”

Section 814(5) ITA provides the definition:

In this Chapter “transaction income”, in relation to a transaction carried out through a broker or investment manager in the UK on behalf of a non-UK resident, means income which arises to the non-UK resident from—

- (a) so much of the non-UK resident's business carried on (alone or in partnership) through the broker or investment manager as relates to the transaction, or
- (b) property or rights which, as a result of the transaction, are used by, or held by or for, the broker or investment manager on behalf of the non-UK resident.

### 68.5.4 “*Investment transaction*”

Section 827(2) ITA provides the definition:

In this section “investment transaction” means any transaction of a description specified for the purposes of this section in regulations made by HMRC.<sup>17</sup>

The regulations are the Investment Manager (Investment Transaction) Regulations 2014.<sup>18</sup> A full discussion would be a lengthy affair.

The label “*investment transaction*” is not strictly appropriate because the transaction will be a *trading* transaction and the so-called investment will

---

<sup>17</sup> IME PE relief equivalent is s.1150(1) CTA 2010.

<sup>18</sup> The background can be traced in consultation and response papers “Investment Management Exemption and Collective Investment Schemes - expanding the ‘white list’” (2013).

be trading stock,<sup>19</sup> but it does not matter.

## **68.6 Investment manager conditions**

For IME non-resident IT relief, s.818(1) ITA provides:

The independent investment manager conditions are met in relation to an investment transaction carried out on behalf of a non-UK resident by an investment manager in the UK if conditions A to E are met.

For IME PE relief, s.1146 CTA 2010 provides:

(1) This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.

(2) In relation to the investment transaction, the investment manager is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the investment manager's business if (and only if) each of conditions A to E is met ("the independent investment manager conditions").

I refer to these as "**investment manager conditions A to E**".

## **68.7 Cond. A/B: Investment manager**

Section 818 ITA provides:

(2) Condition A is that at the time of the transaction the investment manager is carrying on a business of providing investment management services.

(3) Condition B is that the transaction is carried out in the ordinary course of that business.<sup>20</sup>

These are the equivalent of broker conditions A and B.

## **68.8 Cond. C: Independence test**

Section 818(4) ITA provides:

Condition C is that, when the investment manager acts on behalf of the non-UK resident in relation to the transaction, the relationship between them, having regard to its legal, financial and commercial characteristics, is a relationship between persons carrying on

---

19 See 68.14.1 ("Investment": Terminology).

20 The equivalent for IME PE relief is s.1146(3)(4) CTA 2010.

independent businesses dealing with each other at arm's length.<sup>21</sup>

SP 1/01 calls this the independent capacity test.

The requirement is equivalent to the rule that an independent agent is not a PE. According to the INTM, an agent's "legal financial and commercial characteristics" is relevant to determine whether the agent has "independent status" (so as to qualify for the independent agent exemption to the PE rule). So guidance on what is an independent agent for PE is relevant to condition C.<sup>22</sup>

This is imprecise, so the SP offers two (relatively) bright line tests which may offer a safe harbour for collective funds:

- (1) widely held funds
- (2) 70% test

If neither bright line test is satisfied, one is back to the vagueness of the law. SP 1/01 provides:

41. If none of the above tests are satisfied HMRC will have regard to the overall circumstances of the relationship between the non-resident and the investment manager in determining whether they are carrying on independent businesses that deal with each other on arms length terms. It is not possible to describe every scenario in which the relationship may still meet this test but the guidance in this Statement of Practice should provide certainty to the vast majority of non-residents trading in the UK through an investment manager and HMRC will also continue to provide advice for any other circumstances.

#### 68.8.1 *Widely held fund*

SP 1/01 provides:

36. The relationship will be considered to be independent if the non-resident has the following characteristics:

- (a) the non-resident is a widely held collective fund or, if not,
- (b) the non-resident is not a widely held collective fund but is either being actively marketed with the intention that it become one or is being wound up or dissolved.

37. A fund will be regarded as widely held if

- [a] either no majority interest in the fund is ultimately held by five or fewer persons and persons connected with them, or

---

21 The equivalent for IME PE relief is s.1146(5) CTA 2010.

22 See 101.14 (Independent agent exemption).

[b] no interest of more than 20% is held by a single person and persons connected with that person.

A fund may need to establish a track record before new investors are obtained and will therefore have 18 months from the commencement of trading in the UK to meet the widely held test.

Where investment management services are provided to a collective investment scheme constituted as a partnership, participants in the scheme will not be regarded as connected persons for this purpose if their only connection is membership of the partnership. This means that if the investment manager is a partner in the fund it will not be treated as connected with the other partners in the fund for the purpose only of the Independent Capacity Test, although there may still otherwise be connection under s 993 ITA 2007 between the participants, for example as partners in another capacity.

38. Actively marketed means there must be evidence of ongoing genuine attempts to obtain third party investment into the fund in order to meet the widely held test and that the terms on which interests in the fund are offered are not prohibitive or discriminatory for that class of business.

39. If the fund has one of the above two characteristics the independent capacity test will be met without the need to refer to any other factors.

### 68.8.2 70% test

SP 1/01 provides:

40. In other cases the independent capacity test will be met:

(a) where the provision of services to the non-resident and persons connected with the non-resident is not a substantial part of the investment management business. Where that part does not exceed 70% of the investment managers business, either by reference to fees or to some other measure (where that would be more appropriate), it will not be regarded as substantial.

There is special provision for start-ups. SP 1/01 provides:

40. In other cases the independent capacity test will be met ...

(a) ... Further, if in the first 18 months from the start of a new investment management business the services provided to the non-resident exceed 70% of the business, they will not be treated as a substantial part of the business provided that they are consistently below 70% in subsequent periods.

(b) where the provision of services to the non-resident represents more than 70% of the investment managers business 18 months

- after the start of a new investment management business but
- [i] that was for reasons outside the managers control and
  - [ii] the manager had taken all reasonable steps to bring it below 70%.

The investment manager will be expected to provide all relevant information to support a contention that the services are a substantial part of the manager's business for reasons beyond the managers control and to demonstrate what steps have been taken to rectify that position.

### 68.8.3 *Feeder funds and sub-funds*

SP 1/01 provides:

42. Some funds adopt a master/feeder structure. Where the investment manager manages an opaque master fund, such as a company, which has feeder funds then the independence test will be applied as if the master fund were transparent by looking at the beneficial ownership of each feeder fund (and applying the provisions of this Section A to the aggregate interests in the feeder funds) to determine whether the master fund is independent.

43. Similarly, if the investment manager acts for one or more sub-funds of an umbrella fund it is the beneficial ownership of the latter (applying the provisions of this section A to the interests in the umbrella fund) that will determine whether the independence test is met.

### 68.8.4 *Parent/subsidiary*

SP 1/01 provides:

44. It should be noted that a subsidiary may be considered independent of its parent company for the purposes of the test, notwithstanding the parents ownership of the share capital.

See 101.15.1 (Control by principal).

## 68.9 The 20% rule

Section 818(5) ITA provides:

Condition D is that the requirements of the 20% rule are met (see s.819).<sup>23</sup>

SP 1/01 calls this "the 20% test". A clearer label would be the 20% beneficial owner rule; but it is best to use the wording of the statute.

---

23 The equivalent for IME PE relief is s.1146(6) CTA 2010.

Section 819(1) ITA provides:

The requirements of the 20% rule are met if conditions A and B are met.<sup>24</sup>

I refer to these as “**20% rule conditions A and B**”. Section 819(2) ITA defines condition A:

Condition A is that in relation to a qualifying period<sup>25</sup> it has been or is the intention of the investment manager and the persons connected with the investment manager that at least 80% of the non-UK resident’s relevant disregarded income should consist of amounts to which none of them has a beneficial entitlement.

Section 819(3) ITA defines condition B:

Condition B is that, so far as there is a failure to fulfil that intention, that failure—

- (a) is attributable (directly or indirectly) to matters outside the control of the investment manager and persons connected with the investment manager, and
- (b) does not result from a failure by any of them to take such steps as may be reasonable for mitigating the effect of those matters in relation to the fulfilment of that intention.<sup>26</sup>

SP 1/01 provides:

48. The 20% test is treated as satisfied throughout any period, not exceeding five years, for which it is met in respect of the total taxable income of the period arising from transactions carried out through the

---

24 The equivalent for IME PE relief is s.1147(1) CTA 2010.

25 Section 820 ITA provides:

“(1) This section applies for the purposes of this Chapter.

(2) If section 819 applies for the purposes of section 813, a “qualifying period” means—

- (a) the tax year in which the transaction income is chargeable to income tax, or
- (b) a period of not more than 5 years comprising two or more tax years including that one.

(3) If section 819 applies for the purposes of section 816, a “qualifying period” means—

- (a) the accounting period of the non-UK resident company in which the transaction in question is carried out, or
- (b) a period of not more than 5 years comprising two or more complete accounting periods including that one.”

26 The equivalent for IME PE relief is s.1147(2)(3) CTA 2010.

investment manager. It is also treated as satisfied if the manager intended to meet that test but failed to do so, wholly or partly, for reasons outside the managers control, having taken any reasonable steps to fulfil that intention. This means that the manager must fulfil the intention to keep its beneficial entitlement within 20% of the total taxable income for the period insofar as it is reasonable to do so, but is not required to get within that figure at any cost, for instance where there are good commercial reasons for not achieving.

### 68.9.1 “Relevant disregarded income”

For IME non-resident IT relief, s.821 ITA provides:

(1) This section applies for the purposes of this Chapter.

There are two definitions, one for individuals/trusts and another for companies. It is easier to follow if they are read side by side:

#### **s.821(2)(4): trusts/individuals**

(2) If section 819 applies for the purposes of section 813,<sup>27</sup>

the “relevant disregarded income” of the non-UK resident for the qualifying period is the total of the non-UK resident’s income for the tax years comprised in the qualifying period which derives from the transactions mentioned in subsection (4).

(4) The transactions referred to in subsection (2) are investment transactions—

(a) carried out by the investment manager on the non-UK resident’s behalf, and

#### **s.821(3)(5): companies**

(3) If section 819 applies for the purposes of section 816,<sup>28</sup>

the “relevant disregarded income” of the non-UK resident company for the qualifying period is the total of the non-UK resident company’s income for the accounting periods comprised in the qualifying period which derives from the transactions mentioned in subsection (5).

(5) The transactions referred to in subsection (3) are transactions—

(a) [identical]

27 This applies to individuals and trusts: see 42.5 (Disregarded income).

28 This applies to companies: see ? (Disregarded company income).

(b) in relation to which the independent investment manager conditions are met, ignoring the requirements of the 20% rule.

(b) in relation to which the investment manager does not fall to be treated as a permanent establishment of the non-UK resident company, ignoring the requirements of the 20% rule.

Section 1148(4)(5) CTA 2010 provides the equivalent for IME PE relief in identical wording.

### 68.9.2 “Beneficial entitlement”

For IME non-resident IT relief, s.822(1) ITA provides:

This section applies for the purposes of this Chapter.

In fact the expression “beneficial entitlement” only appears in 20% rule condition A, so the definition is only needed for that purpose.

(2) A person has a “beneficial entitlement” to relevant disregarded income if the person has or may acquire a beneficial entitlement that is, or would be, attributable to the relevant disregarded income as a result of having an interest or other rights mentioned in subsection (3).

(3) The interests and rights referred to in subsection (2) are—

- (a) an interest (whether or not an interest giving a right to an immediate payment of a share in the profits or gains) in property in which the whole or any part of the relevant disregarded income is represented, or
- (b) an interest in, or other rights in relation to, the non-UK resident.

Section 1148 CTA 2010 provides the equivalent for IME PE relief.

### 68.9.3 20% rule: HMRC practice

SP 1/01 provides:

45. In essence the requirement is that the investment manager and persons connected with it, including connected charities, must not have a beneficial entitlement to more than 20% of the non-residents chargeable profit arising from transactions carried out through the investment manager. The definition of connected persons is that in s 993 ITA 2007.

46. Management fees paid to the investment manager and persons connected with it are not included in the chargeable profit provided they would be allowable in computing the profit of the non-resident were it

chargeable to UK tax. This applies equally to incentive fees, performance fees or incentive allocations which are calculated by reference to any increase in the net asset value or profits of the relevant non-resident. This treatment of incentive allocations is explained further below...

49. This is an example of how the test may be met throughout a period of five years:

<b>Years</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>
Taxable income of non-resident	£100	£200	£200	£250	£250
Entitlement of manager to above	£32	£58	£40	£35	£5
Expressed as % for each year	32%	29%	20%	14%	2%
Average % over qualifying period	32%	30%	26%	22%	17%

It may be assumed that the test is satisfied for year one because (a) in this example it was the managers intention to have a beneficial entitlement to an average of 20% or less in aggregate over a five year period and (b) that intention was fulfilled. Had the 20% beneficial entitlement been achieved before the five years were up, then that shorter period would have been the qualifying period. A second qualifying period of up to five years could include years 2, 3, 4, 5 and 6 and so on.

50. As with any other tests for the exemption, unless specified otherwise, the UK tax rules regard companies, including LLCs, as opaque and the CTA 2010 rules apply. Partnerships (including LLPs to which s 863 ITTOIA/1273 CTA 2009 apply) are transparent for income and corporation tax purposes: CTA 2010 rules will apply to partners within the charge to CT and ITA 2007 to partners within the charge to IT. In addition, the rule for non-resident companies at s1149 CTA 2010 treats partnership collective investment schemes in which they invest as assumed companies for the purposes of the 20% test.

51. Non-UK resident investors in a fund which is structured as a partnership will be partners and participants in the fund. Where a non-resident is connected to the investment manager the 20% test would be automatically broken since all the non-resident participants would be connected to the investment manager under s 993(4) ITA 2007 by virtue of their being partners in the same partnership. The investment manager and connected persons would then be entitled to all the income of that non-resident. Accordingly, where the investment management services are provided to a collective investment scheme (as defined in the Financial Services and Markets Act 2000) the 20% test is applied by looking at the scheme as a whole rather than at the individual participators. It is not then relevant that the investment manager may be connected to the non-resident as partner (s.835Q ITA 2007 and s.1149

CTA 2010) or that the non-resident participants themselves carry on a financial trade as the availability of the exemption is instead tested solely by reference to the nature of the activities of the notional company represented by the scheme.

52. In certain circumstances the investment manager may be connected with the participants because both are partners in one or more partnerships which have an interest in the fund in question. Where the 20% test is failed as a consequence of aggregating the managers income with that of certain partners who are not connected persons otherwise than as a result of s 993(4) ITA 2007, ie by being partners in a partnership, the failure will be regarded as a failure under s.835N ITA 2007 and s.1147 CTA 2010 to fulfil an intention to satisfy the test. But in certain situations that failure will be considered as:

- (a) attributable to matters outside the control of the manager and persons connected with it; and
- (b) as not being the result of a failure to take reasonable steps to mitigate the effect of those matters in relation to the fulfilment of that intention.

In those situations the 20% test will be met. The legislation will be applied in this way where:

- the connected persons are partners other than solely in a fund under consideration; and
- partnership is the only reason that the manager is connected with them.

This is a fudge to avoid undesirable consequences of the ultra-wide definition of connected person.<sup>29</sup>

53. Where overseas pension funds are set up under trust the trustees do not have beneficial ownership of the pension fund income although they may be the legal owners. The 20% test will not therefore apply where the trustee is connected to the UK investment manager. In practice it would be unusual for an overseas pension fund to be carrying on a financial trade.

...<sup>30</sup>

55. Some non-residents remunerate investment managers with profit or incentive allocations and in consultations HMRC, investment managers and advisors reached a consensus that these are performance fees in substance. As such, these are income in nature and where they are recognised by the UK manager as fee income the allocations may be

---

29 See 99.8 (Width of definition).

30 The paragraph omitted here discusses “control”; see 99.3.3 General control).

treated as fees payable by the non-resident when computing the chargeable profit. Furthermore, where HMRC is satisfied that some of the allocations are due to an overseas service provider as remuneration for those services at the arms length rate those allocations will have the same treatment in computing relevant excluded income.

56. Deferred fees, or securities or interests provided as reward, may in turn generate some form of return. The legislation draws no distinction between the forms in which the profits of the fund are attributed to deferred fees or other investments as the test is based on beneficial entitlement to the chargeable profits of the non-resident and if the managers beneficial entitlement to those profits, including the return on the securities, interests or deferred fees, exceeds 20% the test will not have been met.

57. Options to acquire any securities or interests in the non-resident, within the meanings at s 420 ITEPA 2003, need only be considered in the context of the 20% test when the options are exercised.

58. Some investments in a non-resident may be linked to structured products issued to customers which provide a return based on the performance of the non-resident, an example of which would be a bank investing in a non-resident fund and selling a product to a customer on which the return is linked to the performance of the fund. In such circumstances the beneficial entitlement to the income of the non-resident remains with the investor in the non-resident, in this example the bank, and not the holder of the structured product, such as the customer.

#### 68.9.4 *Position if 20% rule not met*

Section 823 ITA provides:

- (1) This section applies in the case of an investment transaction in relation to which the independent investment manager conditions are met, except for the requirements of the 20% rule.
- (2) This Chapter has effect as if the requirements of that rule were met in relation to the transaction but only in relation to—
  - (a) so much of the transaction income of the non-UK resident as falls within subsection (3), if this section applies for the purposes of section 813, or
  - (b) so much of the income of the non-UK resident company deriving from the transaction as falls within subsection (3), if this section applies for the purposes of section 816.
- (3) Income falls within this subsection if it does not represent income—
  - (a) which is relevant disregarded income of the non-UK resident,

and

- (b) to which the investment manager or a person connected with the investment manager has or has had any beneficial entitlement.

SP 1/01 provides:

47. Where the 20% threshold is exceeded, the part of the income of the non-resident to which the investment manager and connected persons are beneficially entitled is excluded from the limitation of charge. The limitation of charge will apply to the part to which they are not beneficially entitled provided the other tests in the investment manager provisions are met.

#### 68.9.5 *20% rule: mutual funds*

Section 824 ITA provides:

(1) This section applies if amounts arise or accrue to the non-UK resident as a participant in a collective investment scheme.

(2) It applies for the purposes of determining whether the requirements of the 20% rule are met in relation to a transaction carried out for the purposes of the scheme [(so far as the transaction is one in respect of which such amounts so arise or accrue)]<sup>1</sup>.

(3) In applying this section make the following assumptions—

(a) that all the transactions carried out for the purposes of the scheme are carried out on behalf of a company (“the assumed company”) which is—

- (i) constituted for the purposes of the scheme, and
- (ii) non-UK resident, and

(b) that the participants do not have any rights in respect of the amounts arising or accruing in respect of those transactions, other than the rights which, if they held shares in the assumed company, would be their rights as shareholders.

(4) If the scheme is such that the assumed company would not be regarded for tax purposes as carrying on a trade in the United Kingdom in relation to the appropriate relevant period, the requirements of the 20% rule are treated as met in relation to a transaction carried out for the purposes of the scheme.

(5) If the scheme is such that the assumed company would be so regarded for tax purposes, sections 819 to 823 have effect in relation to a transaction carried out for the purposes of the scheme with the modifications in subsection (6).

(6) The modifications are—

- (a) for references to the non-UK resident substitute references to the assumed company, and
  - (b) for references to the non-UK resident's relevant disregarded income for a qualifying period substitute references to the sum of the amounts that would, for relevant periods comprised in the qualifying period, be chargeable to tax on the assumed company as profits deriving from the transactions—
    - (i) carried out by the investment manager, and
    - (ii) assumed to be carried out on behalf of the company.
- (7) In this section—
- “the appropriate relevant period” is—
- (a) the tax year in which the transaction income is chargeable to income tax, if this section applies for the purposes of section 813, or
  - (b) the accounting period in which the transaction is carried out, if this section applies for the purposes of section 816,
- “collective investment scheme” has the meaning given by section 235 of FISMA 2000,
- “participant”, in relation to a collective investment scheme, is construed in accordance with that section, and
- “relevant period” means—
- (a) a tax year, if this section applies for the purposes of section 813, or
  - (b) an accounting period, if this section applies for the purposes of section 816.

### 68.9.6 *20%/independence test interaction*

SP 1/01 provides:

59. The independence test and the 20% test apply quite separately. For example, a UK investment manager acts for an overseas trading fund constituted as a company. If the investment manager is not acting in an independent capacity in relation to the fund company then the whole of the income of the fund is liable to assessment. If the independence test is satisfied, then the 20% test must be separately addressed. If the investment managers interest in the fund company is 25% then that share of the funds trading income is liable to assessment.

## 68.10 **Cond. E: Customary remuneration**

Section 818 ITA(6) provides:

Condition E is that the remuneration which the investment manager receives in respect of the transaction for the provision of investment

management services to the non-UK resident is not less than is customary for that class of business.

SP 1/01 calls this “the customary rate test”

This is the equivalent of broker condition C. It overlaps with investment manager condition C since an arm’s length relationship would normally involve customary remuneration.

SP 1/01 explains the meaning of “customary remuneration”:

60. The UK investment manager must receive remuneration at a rate that is not less than customary for the services. The legislation does not define what is customary nor does it specify from whom remuneration must be received although, as already explained, HMRC will not regard a UK investment manager as acting in an independent capacity on behalf of the non-resident unless the relationship between them is that of persons carrying on independent businesses and dealing with each other at arms length.

61. HMRC will be guided by the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations when determining whether a pricing structure applies the customary rate and will look at whether the net effect of any provision made or imposed by means of a transaction or series of transactions provides the UK investment manager with a level of remuneration which would have been achieved at arms length. All circumstances will be taken into consideration, including whether that remuneration has been reduced below the arms length rate in any way either before or after payment to the UK investment manager.

62. HMRC recognises that remuneration structures through which the non-resident pays fees in a particular class of investment management take numerous forms, with variations including, for example, investment terms intended to attract certain investors or to lock in an investment. The arms length definition of customary rate for the independent investment manager means that such arrangements between unconnected parties would not jeopardise this test. Transactions made at arms length may include directly or indirectly reduced or rebated fees for unconnected investors in the non-resident. Similarly, rebated, reduced or zero fee arrangements which are made between the manager and the unconnected non-resident for genuine commercial reasons, such as where the manager is receiving a separate fee in respect of the assets in which the non resident is investing, would be regarded as transactions made at arms length.

63. In determining whether remuneration has been reduced below the arms length rate in any way HMRC will consider both the remuneration received by the UK investment manager and any amounts payable to any

person:

- for services provided to the non-resident, or
- in connection with the non-resident, or
- that relate to the performance of the non-resident.

These amounts, which may be payable by either the non-resident or the UK investment manager, will be treated as reducing the remuneration received in the UK below the customary rate unless they can be shown to be at an arms length rate.

64. HMRC consider that in order to meet the customary rate test fees payable to a UK investment manager should be recognised for UK tax purposes when earned. A cash payment may be deferred or reinvested in the fund but this should not affect the recognition of the fee income. As a result, the UK manager would pay tax on the fee for the period when earned and no difficulty with the customary rate test is envisaged in these circumstances. If cash settlement of management fees is deferred the manager may have effectively made a loan to, or investment in, the non-resident, as a result of which the return on that loan or investment would be attributable to the manager and may need to be taken into account for the 20% test.

Paras 64 onwards do not stand up to much examination.

65. Where a UK investment manager, a partner, LLP member, director or employee of that manager, or a person connected with any of these, acquires a security or an interest of some other kind, in the non-resident or in another entity, for services provided by the manager:

- to the non-resident
- in connection with the non-resident

the customary rate test will only be met if it can be shown that the manager, partner or LLP member brings the security or other interest into charge to UK tax at its market value or, in the case of a director or employee, that the security or other interest is taxed as employment income in accordance with Part 7 ITEPA 2003. The definition of security here will be that found in s420 ITEPA 2003. An interest is intended to apply to an interest in a security or securities and any other interest not within the s420 ITEPA definition.

66. Where an option is brought into UK tax charge at full market value at the time it is exercised HMRC will not regard this remuneration as less than the arms length rate for the purposes of the customary rate test.

67. Preferential investment terms involving reduced or rebated fees for directors or staff of the investment manager may be a benefit provided by reason of employment and thus may give rise to an employee income tax charge under ITEPA 2003. Similarly, where the investment manager

is a partnership, preferential fee terms may be offered to partners who acquire interests in the non-resident, in which case the ensuing personal tax consequences will apply. HMRC will not ordinarily regard these terms as reducing the investment managers fees for services below the arms length amount unless significant UK tax avoidance or evasion is suspected, in which case all the facts and circumstances will be considered to determine whether the rate of remuneration is below the arms length amount.

68. The vast majority of non-residents easily meet the customary rate test. However, HMRC has occasionally encountered structures in which offshore arrangements have been used to evade or avoid UK tax. Commonly, such structures involve arrangements whereby fees charged to the non-resident are diverted to an offshore vehicle at a non-arms length rate. Such arrangements represent an abuse of the exemption, place compliant<sup>31</sup> UK managers at a competitive disadvantage and may result in a non-resident failing to meet the terms of the exemption unless remedial action is taken.

The SP then turns to consider what evidence may be required:

69. HMRC has published guidance in its International Manual on what documentation and evidence is required to demonstrate an arms length reward. At the time of publication of this Statement that guidance appears at INTM483030 and it is advisable to check that the most up to date advice is being followed.

70. The legislation considers the obligations and liabilities of the non-resident and whether the non-resident is exempt from UK tax on its UK trading profits. A non-resident may be a taxable person and in considering whether that is the case, and whether the UK agent has been rewarded with an arms length rate, it may be appropriate in some circumstances for HMRC to ask for information such as statutory financial statements of the non-resident and its agents and a full and factual functional analysis of all services provided to the non-resident.

71. In circumstances where such information is requested to ascertain whether the remuneration has been at the customary rate HMRC would normally ask the UK investment manager, but in some circumstances may ask the non-resident, to provide such information as may reasonably be considered necessary. The information powers available to HMRC would include those relevant to the tax liabilities of the non-resident but where reasonable co-operation is provided by the UK investment manager and/or, where appropriate, the non-resident it is intended that

---

31 For this contested use of the word “compliant” see App 1.3 (“Compliant”).

a reasonable opportunity will be given to supply the information voluntarily before the use of information powers is considered.

72. Where appropriate documentation, including a factual functional analysis and an acceptable transfer pricing methodology, is in place to support a tax return, the investment manager will have an opportunity to agree an adjustment to the return to meet the customary rate test or for any other reason, or to have adjustments determined through litigation where such an agreement has not been reached, without the non-resident having thereby failed the customary rate test.

73. However, where the investment manager does not have the appropriate documentation and methodology in place at the time of making a return and the remuneration for that period is less than the arms length rate, it is possible that the customary rate test has not been met. HMRC would expect the non-resident and the investment manager to ensure that adequate measures are taken to prevent the fund or its investors being exposed to UK tax and will give reasonable notice of possible action, and the reasons for it, to both the non-resident and its agents if it discovers any circumstances in which the non-resident may not have met the Investment Manager Exemption tests.

74. Each case will be considered on its own facts and it is possible that appropriate corrective action through adjustment to the customary rate will still enable the test to be met. It is not possible to describe every scenario but this general approach is intended to provide certainty on what the legislation requires and to reassure non-residents that a disproportionate outcome will not arise from a corrected failure to meet the test.

## 68.11 Independent broker conditions

Section 817 ITA provides:

(1) The independent broker conditions are met in relation to a transaction carried out on behalf of a non-UK resident by a broker in the UK if—

- (a) conditions A to D are met, if this section applies for the purposes of section 813 [individuals/trustees], or
- (b) conditions A to C and E are met, if this section applies for the purposes of section 816 [companies].

I refer to these as “**broker conditions A to E**”.

### 68.11.1 *Cond. A/B: Broker business*

Section 817 ITA provides:

(2) Condition A is that at the time of the transaction the broker is carrying on the business of a broker.

(3) Condition B is that the transaction is carried out in the ordinary course of that business.

The former International Tax Handbook provided:

**940. NRs: accepting TMA 70 s82 broker exemption: in course of business**

The exemption in Section 82(1) applies only to transactions which the broker carries out (on behalf of the non-resident) “in the ordinary course of his business as such”. In modern times it has become common for brokers to extend their business beyond mere “broking” but it does not follow that, just because what they do is now customarily done by brokers, they do it in the ordinary course of their business as brokers. Thus stockbrokers and commodity brokers often provide investment management schemes for clients. But investment management does not thereby become an ordinary function of a broker. However, there are special provisions for investment managers which are considered in ITH951.

68.11.2 *Condition C: Remuneration*

Section 817(4) ITA provides:

Condition C is that the remuneration which the broker receives in respect of the transaction for the provision of the services of a broker to the non-UK resident is not less than is customary for that class of business.

68.11.3 *Cond. D: UK representative*

Section 817(5) ITA provides:

Condition D is that the broker does not fall for the purposes of Chapter 2B of this Part, or of Chapter 1 of Part 7A of TCGA, to be treated as a UK representative of the non-UK resident in relation to  
[1] any other income which is chargeable to income tax, or  
[2] amounts which are chargeable to capital gains tax,  
for the same tax year as the transaction income.

This condition applies to individuals/trustees and not to companies.

68.11.4 *Cond. E: Permanent establishment*

Section 817(6) ITA provides:

Condition E is that the broker does not fall to be treated as a permanent establishment of the non-UK resident company in relation to any other transaction of any kind carried out in the same accounting period of the non-UK resident company as the transaction in question.

The wording is the equivalent of broker condition D for companies (using the company tax concept of PE rather than the individual/trustee concept of branch/agency).

## **68.12 Transactions through broker**

Section 828 ITA provides:

- (1) For the purposes of this Chapter a person is regarded as carrying out a transaction on behalf of another if the person—
  - (a) undertakes the transaction, whether on behalf of or to the account of the other, or
  - (b) gives instructions for it to be so carried out by another.
- (2) In the case of a person who acts as a broker or investment manager as part only of a business, this Chapter has effect as if that part were a separate business.

## **68.13 Relevance of trading to IME**

The question whether the non-resident client is trading is crucial for the IME. Unless the non-resident client is trading, the three IME exemptions are not needed:

- (1) In the absence of a trade, a non-resident company is not subject to CT even if it has a permanent establishment and so the company does not have to rely on IME PE relief.
- (2) In the absence of a trade, there can be no UK representative and the non-resident does not need to rely on IME UK-representative relief.
- (3) In the absence of a trade, non-residents may qualify for non-resident IT relief and do not have to rely on IME non-resident IT relief.

SP 1/01 acknowledges this:

14. The Investment Manager Exemption legislation has no relevance unless the non-resident is trading in the UK.
15. If the transactions carried out through the investment manager are part of the trade carried on by the non-resident then, unless the [IME] tests ... are satisfied ... the income from that trade, including any profit from the realisation of securities, for example, is taxable. ...

## 68.14 What is a financial trade?

For general discussion of the concept of trade, see App.2.20 (Trade). I consider here when there is a trade of dealing in securities, options and futures (which I abbreviate to securities, “financial assets” or “financial transactions”); and the related question of when gambling is a trade.

The trading/non-trading distinction is important here, for non-resident individuals, trusts and companies; but it is elusive.

### 68.14.1 “Investment”: Terminology

“**Investment**” or “investing” is a word with several meanings.<sup>32</sup>

In one sense all securities are “investments”. We have investment managers, investment brokers and investment companies or trusts. This is convenient and common usage. However two distinctions are sometimes drawn which narrow the meaning of “investment”:

*Investment/gambling distinction:* A distinction is sometimes drawn between:

- (1) investing in securities and
- (2) gambling or speculating.

I discuss the meaning of “gambling” and “speculating” below. The point here is that gambling or speculating (whatever that means) is not (in some sense of the word) investing.

*Investment/trading distinction:* For tax purposes a distinction is drawn between:

- (1) investing in securities and
- (2) *trading* in securities. (In tax terminology “dealing” is an informal synonym of trading, but I think it is clearer to use the statutory term.)

The point here is that trading (whatever that means) is not investing (in some sense of the word). In this sense, which is strictly correct tax terminology, a trader is not “investing” and holds securities as trading stock and not as “investments”. I stress this because one often finds the

---

32 For discussion of this terminology in a commercial context see Graham & Dodd, *Security Analysis* (6<sup>th</sup> ed., 2009), chap 4 (distinctions between investment and speculation). For discussion in a UK tax context, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed., 2019/20), para 6.9 (Investment) online version <https://www.taxationofcharities.co.uk>

word “investment” used in a trading context.<sup>33</sup> This is not surprising because in the finance industry, the terms “investing”, “trading” and “dealing” are all used as synonyms: brokers and investment managers do not draw the tax distinction.

In the absence of trade, a financial transaction is usually investment, and the trading/non-trading tax distinction can be described as a trading/investment distinction. This has been doubted:

[Counsel for HMRC] mildly criticised para 11 for having posed the question ‘trade or no trade?’ but then, having treated that as equivalent to ‘trade or investment?’ I think there is some force in that criticism, since the word ‘investment’ has many shades of meaning, both in taxing statutes and elsewhere ....<sup>34</sup>

This is strictly correct. Non-financial transactions may easily be non-trade and non-investment. The purchase of a lunch-time sandwich, for instance, is neither trade nor investment. Financial transactions may also be non-trading and non-investment. There may be a gap. (In particular, financial transactions have sometimes been described as “gambling” and classified as neither trading nor investment.) However, for most practical purposes that can be disregarded, and in the context of financial transactions, the trade/non-trade distinction can be regarded as equivalent to trade/investment distinction.

This discussion of terminology does not identify the dividing line between trading and investment, but it is a necessary start if we are to know what we are talking about.

### 68.14.2 *Principles*

The principles are summarised in *Cooper v C & J Clark*:

[1] First, marketable securities, being income-yielding assets usually capable of appreciating in value, are prima facie purchased and sold by way of investment and not by way of trade.

[2] Secondly, a series of purchases and sales may sometimes, if carried out pursuant to a deliberate and organised scheme of profit-making, amount to a trade.

[3] Thirdly, it is easier to characterise a series of purchases and sales as

---

33 See 68.5.4 (“Investment transaction”).

34 *Wannell v Rothwell* 68 TC 719 at p.730.

a trade in a case where they are made by a trading entity<sup>35</sup> as opposed to an individual.

[4] Fourthly, in the case of a trading entity that characterisation is more easily made where the purchases and sales are substantial in relation to its other activities, all the more so where they are of frequent occurrence and extend over a long period of time.<sup>36</sup>

This is uncontentious and helpful as far as it goes.

### 68.14.3 “Speculative” transactions

*Cooper v C & J Clark* continues:

Fifthly, it is sometimes helpful, although not decisive, to ask whether a series of sales and purchases is speculative or not. The reason why the question is sometimes helpful is that the answer may throw light in one direction or the other, but it is not decisive because according to the circumstances either a trade or a course of investment may be speculative.<sup>37</sup>

What does speculative mean? Graham & Dodd canvas various possible definitions, and suggest the following “as in harmony with the popular understanding of the term and the requirements of reasonable precision”:

An investment operation is one which, upon thorough analysis, promises safety of principal and a satisfactory return. Operations not meeting these requirements are speculative.<sup>38</sup>

---

35 By “trading entity” it is not entirely clear whether the judge had in mind:

- (1) an entity carrying on a trade apart from any financial transactions (such as the taxpayer company in *C&J Clark*, which manufactured shoes); or
- (2) any company entitled to carry on a trade, whether or not it carries on any activity apart financial transactions.

The general rule is that it is easier to characterise a series of purchases and sales as a trade in any case where they are made by a company entitled to carry on a trade. See 68.14.4 (“Gambling”).

36 54 TC 670 at p.676.

37 54 TC 670 at p.676.

38 Graham & Dodd, *Security Analysis* (6<sup>th</sup> ed., 2009), p.106.

Fred Schwed Jr gives a similar explanation of this slippery word in *Where are the Customers’ Yachts?* (1940) Chapter 8:

“Investment and speculation are said to be two different things, and the prudent man is advised to engage in the one and avoid the other. This is something like explaining to the troubled adolescent that Love and Passion are two different things. He perceives that they are different, but they don’t seem quite different enough to

In short, a financial transaction is described as “speculative” if it is risky and especially if the purchaser stands to make or lose money depending on how the market moves in the short term. I use the expression “speculative (risky)”.

In that sense, financial transactions are often if not mostly speculative (risky) though it is a question of degree and some transactions are more speculative (risky) than others.

The passage from *C&J Clark*, while describing the issue of whether a transaction is speculative as “sometimes helpful” does not inform us whether a positive answer supports a conclusion of trading or non-trading. I think the inference is that speculative (risky) transactions are more likely to be trading. But it is considered that to ask whether a transaction is speculative (risky) is rarely if ever going to be helpful. See *Lewis Emanuel v White*:

The word ‘speculation’ is not, I think, as a matter of language, an accurate antithesis either to the word ‘trade’ or to the word ‘investment’: either a trade or investment may be speculative.<sup>39</sup>

But *Eclipse Film Partners No. 35 v HMRC* took a different view:

[Counsel for the taxpayer] criticised the FTT's statement ... that the

---

clear up his problems.

Investment and speculation have been so often defined that a couple more faulty definitions should do no harm, the science of economics having reached a point where further confusion is impossible. Thus,

- Speculation is an effort, probably unsuccessful, to turn a little money into a lot.
- Investment is an effort, which should be successful, to prevent a lot of money from becoming a little.

If you take a thousand dollars down to Wall Street and attempt to run it up to \$25,000 in the course of a year, you are speculating. If you take \$25,000 down there and attempt to earn a thousand dollars a year with it (by buying twenty-five four per cent bonds) you are investing. ...”

Sometimes the word “speculative” is used to describe a transaction made with a view to profit (as opposed to a transaction intended to hedge a financial risk). In that sense it is relevant to ask whether a transaction is speculative, in hedging transactions the important question is the tax treatment of the liability which is hedged. However hedging is a special case, and I do not think that is what the judge had in mind in *C&J Clark* when he said that it is relevant to ask whether a series of sales and purchases is speculative.

39 42 TC 369 at p.377; this passage was cited with approval in *Wannell v Rothwell* 68 TC 719 at p.730.

transactions entered into by Eclipse did not have the speculative aspect which the FTT would expect to see in trading transactions. He submitted that they were wrong to view speculation as a critical ingredient of trade. ... We agree that carrying on a trade does not necessarily require that there must be risk. It is apparent, however ... that the FTT's view was that speculation is an indication of trade, not that it is essential. That is a perfectly legitimate approach.<sup>40</sup>

But the question in *Eclipse* was not trade or investment. It was trade or non-trade/non-investment, and in that context the element of speculation is perhaps more relevant.

#### 68.14.4 “Gambling”

In order to avoid confusion, it is essential to bear in mind that the word “gambling” may be used in two senses.

In the strict sense:

- (1) Gambling<sup>41</sup> contracts were formerly unenforceable
- (2) Gambling transactions are not a trade

I refer to this as the “**gaming/wagering sense**”. The Gambling Act 2005 abolished the former contract law rule that gaming/wagering contracts were unenforceable in English law.<sup>42</sup> However the rule remains that the activity of gaming/wagering is not a trade, and the profits (if any) are not subject to income tax;<sup>43</sup> or CGT.<sup>44</sup>

---

40 [2015] STC 1429 at [143].

41 Also called gaming, wagering and betting.

42 Section 63 Financial Services Act 1986 had already restricted the rule that bets on stock market movements were unenforceable.

43 *Hakki v Secretary of State for Work and Pensions* [2014] EWCA Civ 530 (professional poker player not carrying on trade). BIM provides:

**BIM22015 Meaning of trade: betting and gambling - introduction** [Jan 2019]

The basic position is that betting and gambling, as such, do not constitute trading. Rowlatt J said in *Graham v Green* [1925] 9 TC 309:

‘A bet is merely an irrational agreement that one person should pay another person on the happening of an event.’

This decision has stood the test of time. In an Australian case, *Evans v FCT* [1989] 20 ATR 922, 89 ATC 4540 Hill J said:

‘There has been no decision of a court in Australia nor, so far as I am aware, in the UK where it has been held that a mere punter was carrying on a business.’

However, an organised activity to make profits out of the gambling public will normally amount to trading.

Although over time new forms of games of chance have evolved, these principles

In a loose sense, “gambling” means (more or less) the same as speculative, in the sense discussed above: that is, risky. I refer to this as the “**loose (high-risk) sense**”. Thus the purchase of a future or option, or bitcoin, say, may constitute gambling in the loose (high-risk) sense, but it is not gambling in the strict (gaming/wagering) sense.<sup>45</sup>

In *Lewis Emanuel v White* the court said:

... it is certainly true, at any rate in the case of an individual, that he may carry out a whole range of financial activities which do not amount to a trade but which could equally not be described as an investment, even upon a short-term basis. These activities include betting and gambling in the narrow sense. They also include, it seems to me, all sorts of Stock Exchange transactions. For want of a better phrase, I will describe this class of activities as gambling transactions.

---

remain the same. The taxpayer placing a spread bet is not normally carrying on a trade (see BIM22020 for exceptions). They are not taxable on the profits, nor do they receive relief for their losses. The bookmaker organising the spread bet is taxable on their profits.”

In Northern Ireland, gaming contracts remain void: Art. 170 Betting, Gaming, Lotteries and Amusements (NI) Order 1985. It seems right that a change to English gaming law should not affect the issue of whether gaming constitutes a trade, which should be the same across the whole of the UK.

On the policy issues, see Royal Commission on the Taxation of Profits and Income, Final Report (1953) Cmd 9474 chapter 13.

44 Section 51(1) TCGA. The reason for IT/CGT exemption is (1) that losses are generally more likely than profits, and one could not tax profits without allowing some relief for losses; (2) betting duty may apply instead.

In relation to financial bets (as opposed to betting such as sports betting) the commercial effect of a bet is (more or less) the same as a cash settled option or future, so the existence of two distinct tax regimes is somewhat odd; but there it is. For spread betting, see 17.16.18 (Betting).

45 HMRC agreed:

**CRYPTO10450: Why HMRC does not consider buying and selling cryptoassets to be gambling** [Apr 2021]

HMRC does not consider the buying and selling of cryptoassets to be the same as gambling. The term ‘gambling’ is not defined in the Income Tax or Corporation Tax Acts, or in the Taxation of Chargeable Gains Act 1992. Whether a transaction can be characterised as betting or gambling is a question of fact. It will be down to the caseworker to consider the particular facts of any transaction involving cryptoassets and conclude whether that transaction had the character of betting or gambling. Where a customer considers that their transactions involving cryptoassets amounted to gambling please make a referral following the process at CRYPTO100500.

It seems a little strange to describe “all sorts of stock exchange transactions” as gambling, but the passage makes sense if one bears in mind that it was written in 1965, when the cult of the equity had only just begun, and before it had received judicial notice.<sup>46</sup> Before then, the only assets recognised as investments were gilts and mortgages, and equities would not be regarded as investments: they were felt to be too risky. They would not naturally be regarded as trading, so they were put into the category of non-trading non-investments.

It is considered that to ask whether or not transactions are gambling (in the loose (high-risk) sense) is the same as to ask whether or not transactions are speculative (risky): it is not helpful in determining whether or not transactions are to be classified as trading.<sup>47</sup>

#### 68.14.5 *Trading: companies/individuals*

It is well established that the test for whether a company is trading in financial assets is different from the test of whether an individual is trading, and that companies are more likely to be trading than individuals. The reason is said to be that companies (unlike individuals) are usually entitled only to trade or to invest. They cannot carry on non-trading non-investment activities of the kind categorised as “gambling” (in the loose (high-risk) sense). The passage cited above continues:

It seems to me, however, that in general it is much more difficult to bring the activities of a company within this class of gambling transactions. An individual may do as he pleases: a corporation must act within the limitations of its memorandum of association. All companies have power to invest; many companies have power to deal [ie trade] in securities; few companies can have power to enter into gambling transactions - i.e., by [the judge’s] definition, transactions otherwise than by way of investment or trade. Where a transaction can be brought within the scope of an authorised object - e.g., investment or dealing - one would not readily treat the transaction as having been carried out ultra vires in pursuit of an unauthorised object - e.g., gambling. In other words, one expects a trading company’s activities, apart from capital investment, to

---

46 *Sinclair v Lee* [1993] Ch 497 at p.512: “The cult of the equity ... did not really begin until the mid or late 1950s.”

47 Of course (in the absence of trade) it does not matter for individuals whether one describes financial transactions as investment or as gambling (in the loose high-risk sense), since the tax consequence is the same: the profits are subject to CGT and not IT.

be by way of trade.

The reasoning is now invalid:

- (1) Nowadays one would not readily describe normal equity investment as “gambling” even in the loose (high-risk) sense.
- (2) Companies powers have increased.

The BI Manual notes point (2). It cites *Lewis Emanuel v White* and comments:

**BIM56870 Financial traders - instruments and shares: case law and companies** [Jun 2016]

**... Recent developments**

Since the *Lewis Emanuel* case was heard, company law has been amended. S39 Companies Act 2006 now says:

‘The validity of an act done by a company shall not be called into question on the ground of lack of capacity by reason of anything in the company's constitution.’

Furthermore, there is judicial approval for the right of a company to engage in speculative transactions. In *Hazell v Hammersmith & Fulham London Borough Council* [1991] 2 WLR 372 at p.372, Lord Templeman said:

‘... Individual trading corporations and others may speculate as much as they please or consider prudent.’

Although it is unlikely that a company would ever enter into a gambling transaction, there is no reason why its activities could not include speculative transactions which, while not being investments, might also not amount to trading.

It is considered that the rule continues to be valid that companies (assuming their articles authorise trading) are more easily held to be trading than individuals.<sup>48</sup> However the basis of that rule cannot now be the reason given in *Lewis Emanuel* (that financial transactions carried out by individuals should generally be classified as non-trading non-investment transactions but companies, unlike individuals, must either trade or invest, so they are more likely to be trading). One could simply say that the rule is now established and continues to hold even if its reasons have ceased to be sound. However, if needed the rule has another, sounder basis. This is that one badge or indication of trade is “trading structure” and companies (if their articles authorise trading) have that

---

48 See 68.14.2 (Principles) item [3].

element of “trading structure” which individuals do not.

Business Income Manual provides:

**BIM56850 Financial traders - instruments and shares: case law and individuals** [Jan 2019]

In the past, the approach taken in deciding whether a company is carrying on a trade of buying and selling shares and other financial instruments has been different from that adopted for individuals....

Despite the words “in the past” I do not think the author intends to suggest the position is any different today.

Since different tests apply to determine whether companies and individuals are trading, I consider the cases for individuals and for companies separately.

68.14.6 *Trading by individual*

There have been five UK cases discussing whether individuals are trading in financial assets. The first is *Salt v Chamberlain* 53 TC 143 where Oliver J said:

Where the question is whether an individual engaged in speculative dealings in securities is carrying on a trade, the prima facie presumption would be ... that he is not. It is for the fact-finding tribunal to say whether the circumstances proved in evidence or admitted take the case out of the norm.

In *Salt v Chamberlain* the individual relied on the following matters to justify a conclusion of trading. There were about 50 sale/purchase transactions per annum, over a four-year period. A substantial proportion of the transactions concerned options (rather than securities yielding income). One-third of purchases and sales were within the settlement period, and many others were within a short period thereafter. The purchases were financed in part by borrowing. On these facts the General Commissioners found that the taxpayer was not trading, and on appeal the court held that the Commissioners were entitled to reach that conclusion.

A similar approach was applied in Hong Kong Inland Revenue Board of Review Decision *Case No. D 42/90*. The following aspects of the matter might have justified a conclusion of trading. The individual’s transactions were in Hang Seng Index futures contracts which had a short lifespan and produced no income. The individual ran an “active” account (the number of transactions is not recorded). The Board found that the taxpayer was

not trading.<sup>49</sup>

The next UK case is *Wannell v Rothwell* 68 TC 719. In this case there were about 60 sale/purchase transactions per annum. The assets traded were shares and commodities. Some of the money used was borrowed. The taxpayer was aiming at quick profits and had no intention of taking possession of the commodities or (with rare exceptions) of holding shares. The Special Commissioner did not decide whether the taxpayer was trading, but the Judge found that the Special Commissioner would have been “almost bound” to reach the conclusion that the taxpayer was trading. I think it was significant that the assets traded included commodities as well as securities.

In assessing the significance of turnover of assets, one should take into account that active portfolio management is more common now than in the past. In *Manzur v HMRC*<sup>50</sup> transactions numbered between 240 and 300 per annum, which was described as “not numerous”. Shares were sometimes held for as long as six months. This was held to be investment, not trade.

The most recent case is *Ali v HMRC*.<sup>51</sup> The facts were extreme. The individual conducted about 1000-2000 transactions each year. Shares were held for a few hours, or for a day or two. He worked a 40-hour week on his share dealing activities. Even that was held to fall within the normal’s land of fact and degree, but understandably the tribunal found it was trading.

The BI Manual provides:

**BIM56860 Financial traders - instruments and shares: three cases involving individuals** [Jun 2016]

An activity of buying and selling shares and other financial instruments undertaken by an individual will normally amount to investment or speculation falling short of trading unless there are factors which take the case ‘out of the norm’ (see BIM56850). ...

**Salt v Chamberlain**

---

49 <http://www.info.gov.hk/bor/en/docs/d4306.pdf>

50 [2010] UKFTT 580 (TC). However little weight should be given to this brief first tier tribunal decision, in which the taxpayer was not represented by counsel and the taxpayer’s best case *Wannell v Rothwell* was not cited.

51 [2016] SFTD 335. A disturbing feature of this case was that HMRC had sought penalties, contending that the Taxpayer’s view was not merely incorrect but negligent. But neither side was represented by counsel.

The Commissioners in this case found that Mr Salt was not trading, and Oliver J held in the High Court that the facts entitled the Commissioners to come to this conclusion.

Mr Salt was a mathematics graduate who used his knowledge of computers to forecast the movements in share prices. In the period 11 December 1968 - 31 March 1973 he entered into approximately 200 transactions for the purchase and sale of securities, which included put and call options and settlements at the end of an account for balances only. He used his own funds as well as borrowings from the bank and against life assurance policies.

**Wannell v Rothwell**

Mr Wannell had previously worked for a commodity futures dealer as a trader prior to the commencement of his activity. His duties had included advising clients on long-term investments and short-term trading opportunities in commodity futures and options. He had obtained qualifications relevant to his duties and, in the course of his own activity, had access to market reports and analysis but not a full screen service. All the transactions were placed with a broker. There were 11 purchases and sales of commodities between May and October 1986 and 46 purchases and 49 sales of shares between October 1985 and August 1987. He dealt on his own account and there were no customers.

The Deputy Special Commissioner said:

‘The essential point in the present case is that of organisation. Was the Appellant, doing two or three deals a month from home through brokers, but doing them with the benefit of experience, training and contacts which he had, organised in a way that a trader could be said to be organised? The case is very close to the borderline, and if the only question I had to decide were whether the Appellant was trading, I might be inclined to give him the benefit of the doubt and find that he fell, by a hair’s breadth, on the trading side of the dividing line.’

This case considered not only the question of whether Mr Wannell was trading but whether he was trading commercially for the purposes of relief for losses (see BIM85705), and the Deputy Special Commissioner concluded that:

‘a case which is so close to the trading borderline because of its lack of commercial organisation is bound to be on the wrong side of the [loss relief] borderline.’

When this case came before the High Court, Robert Walker J found that the Deputy Special Commissioner must be taken to have found that Mr Wannell was trading, but also that he had had sufficient evidence before

him to come to the conclusion that the activity was not carried on commercially, so the losses could not be set off against general income...

### **Manzur**

Mr Manzur was a retired surgeon. He used his own savings to begin acquiring stocks and shares. He made between 240 and 300 trades in a year using an online stockbroker. Some of the shares were turned over very quickly but others were retained for six months or more.

The tribunal held that Mr Manzur's buying and selling amounted to the management of a portfolio of investments rather than trading. They upheld the view in *Salt v Chamberlain* that the badges of trade were of limited value and said there was no definitive checklist which could be used to say whether someone was trading or not. The number and frequency of transactions, and the short-term nature of the holdings alone did not establish trading. Other factors taken into account were:

- the time spent on the activity (about two hours a day);
- the fact that Mr Manzur did not entirely rely on his own expertise but used the advice of brokers;
- that the activities were not characteristic of established share dealers, for example Mr Manzur had no customers and was dependent on market movements alone to make a profit.

### **Conclusion**

The cases discussed above show that no one factor can determine whether an activity has been taken 'out of the norm'. Some factors may be more relevant in some cases than in others. You have to take a view after considering the relevant circumstances as a whole.

The CRPTO Manual provides:

### **CRYPTO20250: What is trading [Apr 2021]**

Only in exceptional circumstances would HMRC expect individuals to buy and sell exchange tokens with such frequency, level of organisation and sophistication that the activity amounts to a financial trade in itself. If the taxpayer's activity is considered to be trading then Income Tax will take priority over Capital Gains Tax and will apply to profits (or losses).

As with any activity, the question whether cryptoasset activities amount to trading depends on a number of factors and the individual circumstances. Whether an individual is engaged in a financial trade through the activity of buying and selling tokens will ultimately be a question of fact. It's often the case that individuals and companies entering into transactions consisting of buying and selling tokens will describe them as 'trades'. However, the use of the term 'trade' in this context is not sufficient to be regarded as a financial trade for tax

purposes.

A trade in exchange tokens would be similar in nature to a trade in shares, securities and other financial products. The approach to be taken in determining whether a trade is being conducted or not would also be similar, and guidance can be drawn from the existing case law on trading in shares and securities.

#### 68.14.7 *Trading by trust*

There are no tax cases on whether trustees of a private trust are trading, but it is considered that their position is in principle similar to individuals.

In *Smith v Anderson* (a non-tax case discussing an early unit trust) James LJ said:

In my opinion, nothing that is to be done under this deed by the trustees comes within the ordinary meaning of “business”, any more than what is done by the trustees of a marriage settlement who have large properties vested in them, and who have very extensive powers of disposing of the investments, changing the investments, and selling them and reinvesting in other investments, according to their discretion and judgment ... That is not a business. No doubt there is power ... to dispose of the investments and reinvest in some similar securities ... This appears to me to be no more than the power of varying investments which you would find in an ordinary trust deed ...<sup>52</sup>

SP1/01 states that “In practice it would be unusual for an overseas pension fund to be carrying on a financial trade.”

#### 68.14.8 *Trading by company*

There have been two cases discussing whether companies are trading in financial assets. Each concerned a trading company using spare cash to carry out stock exchange transactions.

In *Lewis Emanuel v White* 42 TC 369 the company carried out over 100 transactions per annum (described as “a very large number”). The majority were sold in the same year, often within a matter of weeks. It was held that the only possible conclusion was trading.

In *Cooper v C & J Clark* 54 TC 670 the company made only 13 transactions over nine months. The commissioners findings of trade were upheld, though only just (the judge would not have found there was a trade). So I think we can say that is an example of a non-trade.

---

52 15 Ch D 247 at p.276.

It is considered the company's own classification of its activity as trading/non-trading (in the company's constitution, board resolutions and accounts) is a matter which in an otherwise marginal case ought to be decisive.

An activity may constitute a trade even if the activity is ultra vires the company. *Lewis Emanuel* was such a case: 42 TC at p.377. But in the light of subsequent changes to company law, this issue is not now likely to arise.

UK resident companies also need to consider the derivative contract rules in part 7 CTA 2009, which are not discussed here.

#### 68.14.9 *Trading by partnership*

The same principles apply to partnerships as to companies.

The CT Manual provides:

**CTM36580 BVCA statement and guidelines** [Feb 2018]

... Where the general partner provides management assistance to the companies in which investments are held by the partnership, such assistance would not, of itself, cause the limited partnership to be treated as trading.

That seems self-evident.

#### 68.14.10 *SP 1/01*

SP 1/01 provides some heavily guarded generalities, and anyone who tries to use this guidance will find that it does not take them very far.<sup>53</sup> For what it is worth, the material is set out here:

16. Whether or not a taxpayer is trading is a question to be determined by reference to all the facts and circumstances of the particular case. This applies as much to financial transactions as to other activities.

17. In determining the question of trading, any transactions carried out through an investment manager are to be considered in the context of the status and world-wide activities of the non-resident. It is not possible in this statement to consider every possible set of circumstances but, for example, an individual is unlikely to be regarded as trading as a result of purely speculative transactions.<sup>54</sup>

18. For a company, a transaction will generally be either trading or

---

<sup>53</sup> There is similar (qualified) guidance in SP 3/02.

<sup>54</sup> Likewise SP 3/02 para 8.

capital in nature (this may also be the case for non-corporate collective investment vehicles whether open-ended or closed-ended.)

The point of para 18 is that the transaction will not give rise to misc sweep-up income; see 32.8 (Futures and Options).

If the main business of a non-resident company is a trade outside the financial area, or an investment holding business, the activities in the UK would normally amount to trading only if they constituted or were part of a separate financial trade. But if, exceptionally, activities which are an integral part of the profit earning activities of a non-financial trade are carried out through a UK investment manager (for example, hedging on the London terminal markets by a non-resident dealer in physical commodities) then that might amount to trading here. The view to be taken on a particular case will depend on all the facts of that case. 19. The active management of an investment portfolio of shares, bonds and money market instruments such as bills, certificates of deposit, floating rate notes and commercial paper does not constitute a trade.

The use of the term “investment” (if it carries its normal tax meaning) makes para 19 tautologous. Presumably the word is used in the wider sense, in which case the sentence makes an important point. But the author adds a qualification to neutralise that:

But every case must be considered in the light of its own facts.

20. HMRC view short positions as conceptually the same as long positions and synthetic positions as conceptually the same as the equivalent real positions. Neither going short nor taking synthetic positions using derivatives are in themselves indicative of trading. Furthermore, synthetic positions that give exposure to part of an asset are conceptually the same as synthetic positions that give exposure to the whole of an asset. Thus a synthetic position that gives exposure only to a bonds credit risk is no more or less likely to be a trading transaction than a synthetic or real position that gives exposure to the bonds coupon, liquidity, credit and currency risks. These techniques may constitute investment in themselves or may form part of an investment activity.

21. Where futures and options are used by non-residents who are collective investment vehicles (whether open-ended or closed-ended), pension funds and other bodies which either do not trade or whose principal trade is outside the financial area, Statement of Practice 03/02 Tax Treatment of Derivative Transactions will be applied.

22. ...<sup>55</sup> The criteria for deciding whether a non-resident financial company is an investment company or a trading company are the same as those which apply to a resident company.

BI Manual expands on this:

**20250 - Trade: badges of trade: income producing assets** [Jun 2016]

*... Financial assets*

Normally transactions by individuals and companies in financial assets, such as shares, options and futures, do not amount to trading for tax purposes. Shares are generally held for investment, either to gain from income or capital growth. Short-term transactions, which cannot be classed as investments, usually fall short of trading, being in a class of transaction analogous to gambling or speculation.

Whether an activity of buying and selling shares, securities and other financial instruments amounts to a trade is considered further at BIM56800 onwards.

**56910. Financial traders - instruments and shares: synthetic positions** [Jun 2016]

Financial transactions include the acquisition, holding, dealing with, and disposal of financial assets such as shares and bonds. They also include taking synthetic positions in relation to such assets or corresponding indices, or discrete components of them. In our view, using synthetics is not itself indicative of trading. There is no conceptual difference between a 'real' and a synthetic financial transaction (for example, buying a share or entering into a derivative contract that replicates the risks and rewards of ownership). All of these approaches may form part of an investment strategy and some of them may constitute investment in themselves.

***Short positions are conceptually the same as long positions***

Buying a share because you take the view that its price will rise and shorting a share because you think its price will fall are conceptually the same. In simple terms, a view is merely being taken on the direction of movement. It follows that synthetic long and short positions are conceptually the same as one another and the equivalent real transactions.

***Derivatives that give exposure to part of an asset are conceptually the same as derivatives that give exposure to the whole asset***

A view may be expressed on a bundle of components embedded in an instrument, for example the coupon, liquidity, credit risk and currency of a bond, or alternatively a view may be expressed on one or a combination of these components. There is no conceptual difference between taking a view on all components by buying the instrument or entering a derivative contract that replicates ownership, or taking a view on one or a combination of the components via derivatives. There is no conceptual difference between taking

---

55 The omitted text discusses whether the financial trade is carried on in the UK; see 20.12.3 (Buying/selling through agent). This is distinct from the question of whether there is a trade.

a view on the direction of movement (as with simply long and short positions) or taking a view on the magnitude or timing of movements, or other components. Multi-derivative or hybrid strategies should not be unbundled.

Given the wide range of situations this principle can apply to, three examples are set out below. These are intended to be illustrative and not a definitive list.

In all cases involving any such ‘bundling’ we would expect there to be evidence that the transactions were executed in pursuit of a clear prior strategy.

***Two or more derivatives***
